# Here's Why It Pays To Defoliate . . .

... PROPER DEFOLIATION WILL ASSURE YOU MORE PROFIT PER ACRE BY

- (A) Earlier Harvesting, Due To Faster Opening Of Mature Bolls.
- (B) Reducing Boll Rot; Retards Deterioration Of Fiber And Seed
- (C) Reducing Late Insect Infestation
- (D) Producing Better Lint Grades Of Machine Picked Cotton, Due To The Reduction Of Trash & Leaf Stain.
- (E) Facilitates Hand And Machine Picking:

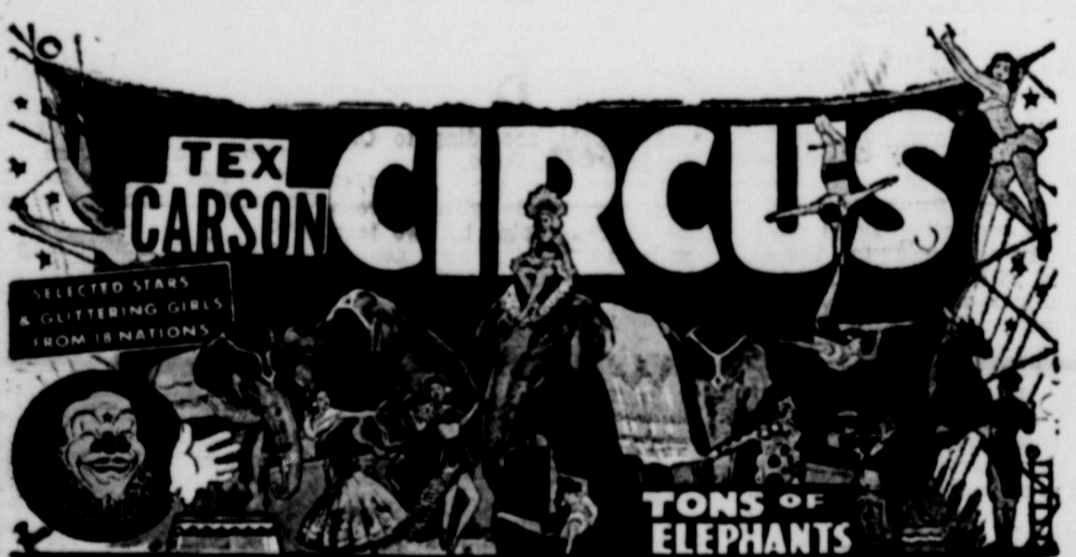

- (1) By reducing amount of plant material going through stripper heads.
- (2) Permits earlier stripping in the morning.
- (3) Makes One Stripping possible in many cases, due to more uniform boll opening.
- (4) Insures easier and quicker hand-pulling.

## EARTH OIL & GAS

### SIMPLE ECONOMICS

It's as simple as 2 + 2 = 4. Philgas® is so economical to use in tractors that savings on fuel bills alone soon pay the cost of converting. You save on repair bills and downtime, too...because your engine lasts longer!

Philgas burns clean. That means no oil dilution, no cylinder wall washing... longer ring and valve life. You get more power...smooth anti-knock performance under heavy loads.

If you buy a tractor, get a factory model designed for this money-saving fuel. For a low-cost, high-octane tractor fuel, you can't beat Philgas!

**BERKELEY DEEPWELL PUMPS FOR EVERY PURPOSE**

**DEEPWELL JET TYPE WATER SYSTEMS**  
5 to 25 gallons per minute, 1/4 to 5 H.P., depths to 300 ft. Write for Bulletins 505, 506 and 510.

**BERKELEY CRUSADER DEEPWELL TURBINES**  
for 4 in. inside diameter wells and larger. 25 to 50 G.P.M., 1 1/2 to 7 1/2 H.P., depths to 500 ft. At a setting of 100 ft., these rugged pumping units incorporate 60 less parts than a turbine of conventional design. Operating at 1750 R.P.M., the Crusader is subjected to considerably less wear than any competitive high speed turbine. Incorporating the Berkeley Combination feature, the Crusader maintains pressure for household use while flood irrigating. For more detailed information, write for copy of Bulletin 802.

**BERKELEY COMBINATION DEEPWELL TURBINES**  
50 to 250 G.P.M., 1 1/2 to 10 H.P., depths to 500 ft. These combination units are the equivalent of two pumps. The booster pump in the head provides ample high pressure water for a pressure system, while the turbine supplies a steady high capacity stream for irrigation. Write for Bulletin 801.

**DEEPWELL IRRIGATION TURBINES**  
for high capacity pumping, depths 500 feet, 200 G.P.M. and up. Available oil or water lubricated, enclosed or semi-open impellers. Illustrated at the left is a Model 1403HM, capable of capacities in excess of 2500 G.P.M. Write today for Bulletin 811.
