MANY PARTIES AT SCHOOL TO CLOSE OUT YEAR

"All work and no play makes Jack a dull boy" goes the old adage, so pupils in the Eldorado grade school have been playing before settling down for last minute reviewing for exams.

Several parties and picnics were held last week and the first part of this week with room mothers assisting in entertaining. On Thursday afternoon the second grade pupils of Mrs. Carl Stevens enjoyed a train ride to Sonora, and a picnic lunch at a roadside park on the Ozona road. They were accompanied by a number of mothers, who brought the group back in cars.

A train ride to Sonora and picnic lunch at a park honored the two first grades last Friday. Approximately 43 pupils were accompanied by their teachers, Miss Thelma Ellington and Mrs. E. W. Mund, and several mothers, who brought the children home in cars.

Mrs. D. C. Royster's second grade pupils were hosts at a luncheon and party in their room Tuesday. Following lunch at 11:30, the children sang songs. Room mothers were assisted in entertaining by mothers of the children.

Third grade pupils, assisted by their teacher, Mrs. Bennie Watson, were hosts at a party Tuesday afternoon honoring their mothers. Thomasine Jones presided at the guest register, and guests were regaled with readings, songs, records and games. Decorations, refreshments and entertainment were all planned by the children. Refreshments of lemonade and cookies were served to 26 guests in addition to the students and their teacher. Mrs. Watson was presented with a gift.

Room mothers honored the fifth grade with a picnic at the Roadside Park last week. They were accompanied by their teacher, Miss Ina Mae Lightsey, and the mothers.

CITY OFFICIALS PLAN DRAINAGE IMPROVEMENTS

City officials are studying the city's drainage problems, with the intention of providing conduits at several poorly drained street intersections. Among places receiving attention may be three trouble spots: the Yates-McWhorter corner, the Godwin corner and the old Gene Parker place.

GILMER-AIKIN GROUP IN SESSION SATURDAY

Study of questionnaires which the committee had submitted to Schleicher County residents occupied the attention of the Gilmer Aikin committee, in session Saturday afternoon at the court house.

Data on the public's reaction to the school set-up, including faculty, county wide school facilities, taxation and other questions, was studied, and the summaries later mailed to state headquarters by the committee chairman, Mrs. Carroll Ratliff.

The committee will meet regularly to continue with their study of Schleicher's schools.

Mr. and Mrs. Glenn Elrod and Mr. and Mrs. J. C. Avery and son Bobby of Monahans visited in the C. O. Bruton home Sunday.

Marshall W. Bailey, son of Mrs. K. Bailey, Eldorado, has been named to the fall honor roll at Texas Tech.

Buster Gunn called friends here Sunday and reported that his wife, who underwent surgery last Thursday at the Baptist Memorial Hospital in San Antonio, was getting along nicely, and was able to walk some that day.

Mr. and Mrs. Claud Alexander and boys of Austin spent the week end with their parents, Mr. and Mrs. T. H. Alexander and other relatives. On Sunday the family enjoyed dinner at the Ray Alexander home.

Two Fires Reported; Both Total Losses

Schleicher County lost two buildings in rural fires during the week end.

E. E. Newlin lost a trailer, 21 bales of hay, tractor and tires and other less valuable equipment in a "surprise fire" Saturday night on the J. C. Wells place.

Mr. Newlin discovered the loss after daylight Sunday morning, when only smoldering ruins were found on the site. The barn and sheep shed were burned entirely down. There was no insurance on buildings or contents.

A cow escaped burning by backing away from the fire to a corner of the lot.

Failure to discover any trace of the tire rims causes Mr. Newlin to think that the blaze might be of incendiary origin.

The house on the Vinson place 3 miles from Eldorado on the Rudd road burned completely down Friday morning. A family named Davidson, whom Mr. Vinson had employed to work on fences and do other repairs lost the clothing and household goods they had with them when the oil stove exploded, setting the house on fire. Firemen made the run from Eldorado, but the building was burned nearly down before they could reach the place.

The five room house was built in 1912. It was occupied by the Roy Davidsons until recently.

William Spurgers of Sul Ross College visited his mother, Mrs. Nettie Spurgers over the week end.

Mr. and Mrs. Harold Scherz of Sonora visited Sunday with her parents, Mr. and Mrs. L. D. Ochsner.

Mr. and Mrs. F. L. Powers, Jr. and daughter, Linda of Alpine spent the week end visiting with G. H. Davis, father of Mrs. Powers, her sister, Mrs. W. C. Doyle and family, and her brother, Lum Davis and family.

Fine Rain Brings Smiles To County

"And it may not be over" is the oft-heard remark today, as Schleicherites eye murky skies, and gloat over the deep mud—the result of the biggest rain this ranching county has had in years.

Measuring 2.12 inches in Eldorado, the rain fell over all of the county, bringing new life to parched pastures and good planting conditions to the county's farm land.

Estimates include the following official and unofficial amounts from the county:

Forrest Runge 1.6.
Archie Mittel 1.53.
Eldorado 2.12.
J. T. Williams 1.
Bob Anderson, on highway north of town, nearly 2 inches; J. H. Boothe farm, nearly 2 inches; Edwin Jackson, 2 inches; J. C. Johnson 2½ inches; Jurecks 1 inch; Marvin Logan 2 inches; John Bledsoe on south highway 2 3-4 inches; Victor Sauer 1 1-4; Grate Edmiston ½ inch; from Bert Page place on to town, heavy rains with draws running; Milton Baugh 1½; E. Meador 1½; Marion Wade 2 in.; Ed Davis 1 3-4; E. E. Newlin, 15 miles southwest, 1½.

MISS HARPER TO PRESENT PIANO RECITAL

Miss Emily Ann Harper, daughter of Mr. and Mrs. S. D. Harper and a senior at Eldorado High School, will present a piano recital Sunday afternoon at 4:00 at the First Presbyterian Church here.

Her program will consist of numbers by Bach, Beethoven, Chopin, Mendelssohn and others; also appearing on the program will be Mrs. A. E. Prugel of Sonora, who will play a violin solo, and the high school girls' quartet, consisting of Misses Louise Burk, Jane Mund, Marselaine Patterson and Tinsy Spurgers, who will sing, accompanied by Miss Harper.

The soloist began her study of music at the age of 7, and has been a pupil of Miss Mollie Turner, long-time Eldorado piano teacher, and of Mrs. S. M. Loeffler of Sonora since that time.

She has been a member of the National Fraternity of Student Musicians for ten years, and was on the state honor roll one year and on the national honor roll nine years in that organization.

Miss Harper has been a member of the National Piano Playing Guild for many years, and recently passed the examination which will qualify her for a high school diploma given by the Guild. Mrs. Adelaide Anderson of Boise, Idaho, was judge for the contest which was held in Sonora last week. Qualifications for recipients of the high school diploma are very high: Miss Harper was required to memorize ten difficult pieces from specified composers and periods, including a complete sonata, besides demonstrating a thorough background in piano technique, theory and musicianship. She received the rating of "superior" at the conclusion of the examination.

Miss Harper will receive her high school diploma this month from the Eldorado High School, and plans to continue her study of music at North Texas State College, where she has enrolled for the fall term.

Everyone is cordially invited to attend the recital.

WEATHER MAY POSTPONE HORSE RACES SATURDAY

If it continues to rain, the airport will be too muddy to have the horse races which are scheduled for this coming Saturday, according to the racing officials.

If the weather clears and the track dries, the races will be held at 2:30. Horses scheduled to run include A. G. Clark's Sky Chief, Whit Smith's Tuffy, Jack McClatchey's mare, Arch Orey's bay, Bill McCravey's Mamma, Jack Jones' Tiny, and others.

For the first time in several years there was some water in the county's lake beds. A day after the rain, water was still standing in terraced fields.

Seed business is brisk today in Eldorado, as cotton growers prepare to plant their spring crop, and stock men make plans to put in feed.

Rains of over two weeks ago had prepared the soil for the heavier precipitation. At that time Rudd received 2 inches in two rains, Eldorado 1½ inches and other parts of the county some moisture in varying amounts.

The drought had reached serious proportions when the rains finally came. Some larger stockmen had leased grass elsewhere, and moved their stock out to pasture; a few others had sold outright, realizing that there could be no profit in prolonged feeding through what should normally be a rainy season.

Grass is already looking greener, and within a few weeks should provide excellent grazing. Meanwhile stockmen are eyeing the clouds and hoping for more—it is an acknowledged fact that a rancher never gets enough rain!

LIONS CLUB TO CELEBRATE THEIR BIRTHDAY

Miss May Burton presented the High School Girl's Quintet in several vocal numbers at the regular meeting of the Lions Club Wednesday.

Philip Gauss of San Angelo spoke on the State Health Mobile X-Ray Unit for tuberculosis which he expects to bring to Eldorado July 29, 30, and 31. The club voted to sponsor this mass x-ray, and a committee was appointed to publicize and make arrangements for the unit. These include C. A. Reynolds, E. W. Brooks, Jim Hays and Jerry Pennington.

It was announced that Ladies Night would be observed with a birthday party in observance of the 21st anniversary of the organization with a barbecue and program next Tuesday evening at 7:30 at the ball park if the weather is permissible, and at the gym if not.

The club received their charter May 18, twenty years ago.

Woman's Club Meets With Mrs. Tisdale

The Woman's Club held its regular meeting Tuesday afternoon in the home of Mrs. V. G. Tisdale. A short program was observed with a discussion on "Far as Human Eye Could See" by Mrs. L. D. Ochsner and a report of the Chairman of Education by Mrs. Arthur Mund.

Mrs. Douglas Mebane gave a report of the state convention of TFWC which she attended in Austin. She reported that the program stressed the need of peace to save the world and the part which the Woman's Clubs are contributing.

The Sixth District of which the Eldorado Club is a member won the loving cup for the organization of 14 new clubs in the district, and the Junior Club of Eldorado, sponsored by the Woman's Club, was the one that won this cup for the district president, Mrs. W. E. Cantrell.

Refreshments were served to Mrs. Earl Ralston of Dallas, a guest, and Mmes. D. E. DeLong, Joe B. Edens, S. D. Harper, D. C. Hill, Bill Huber, Douglas Mebane, Arthur Mund, L. D. Ochsner, Keno Ogden, Bert Page, James Page, Luke Robinson, Jess Walston, Edwin Jackson, W. T. Whitten and the hostess.

Mr. and Mrs. John Stigler and family were guests of her parents, Mr. and Mrs. G. B. Wright at Hico over the week end.

Mr. and Mrs. R. A. Evans, Jr. were week end visitors in San Angelo at the home of Mrs. Evans' mother, Mrs. L. D. Head.

As the deal here included trading of his West Texas fixtures for those owned by the Hendersons, he will either store or sell the latter when he leaves Eldorado this week end.

MASS X-RAYS ARE SCHEDULED BY HEALTH DEPT.

Three days in mid-summer—July 29, 30 and 31—have been designated for the visit of the state health department's mobile health unit, for mass x-rays of people in Schleicher County for tuberculosis detection.

P. W. Gauss, field representative, was here Wednesday conferring with PTA health committee chairman Mrs. S. D. Harper and assistants, and Lion's committee C. A. Reynolds, E. W. Brooks, Jerry Pennington and Jim Hays, and mapping out plans for the event.

The health unit can x-ray from 60 to 125 per hour, with its new and modern equipment. Stressing early detection of tuberculosis among adults over 15 years of age, the workers hope to give the x-rays to every adult person in Schleicher County. The x-rays are given free, require no undressing, and require only 2 minutes to administer.

The mass x-rays are designed to search out unknown cases of TB, so that early treatment may be administered.

Mr. Gauss, in his visit here yesterday, stressed the fact that the disease cannot be detected in its early stages. Using the county's population figures as a guide he estimated that from 30 to 40 people in this county now have TB in some form. The state health department expects through its x-ray visits to search out every case—a project which is the most far-reaching and most important ever attempted by the state.

COSTS OF PRODUCING YOUR ELECTRIC SERVICE HAVE BEEN GOING UP

BUT THE PRICE YOU PAY FOR ELECTRIC SERVICE IS STILL DOWN!

It's a hard fight!

THE cost of producing electric service is going up... and up! Everyday necessities are taking more and more of Reddy Kilowatt's pay—but he is fighting to keep your electric service the biggest bargain in your family budget.

Fuel is up, materials are up, structures are up, new equipment is up, the average cost per man-hour worked is up; almost everything needed to provide you with electric service is up except the hire of capital. Many people—who are owners either directly or indirectly through savings accounts, insurance policies, trust funds, or similar institutions—are getting less for our use or hire of their savings.

Thus, here is one very important difference between Reddy Kilowatt's services and most other things you buy. While other costs have almost doubled since 1938, the hourly pay of Reddy Kilowatt—average cost per kilowatt-hour for residential use—has come down 17 per cent.

Miss Pepper, a granddaughter of the late Jeff Davis Pepper, well known registered goat breeder of Edwards County, is a graduate of the Sweetwater High School and received her degree in homemaking from the North Texas State College at Denton. She has been employed this year as homemaking teacher at Eldorado.

The local Girl Scout organization received a check recently from the San Angelo Junior College for candles which the girls had made to be used as decorations at a college dance. The order was received through Anita Runge, a student at the college.

The candles are made by melting ordinary candles in flower shaped molds and make a very beautiful centerpiece when used with blossoms floating in water.

More Milk Per Cow? Here's How!

The number of dairy cows in the United States has increased only 1% since 1940. In the same eight years, a 10% increase in population has added about 12,000,000 more mouths to feed. These new American appetites need plenty of dairy products. Where are they coming from? More cows? Certainly that should mean more milk. But to bring more cows into production takes time—three years or more. The other solution is to increase the average production of milk and butterfat per cow. On many farms, dairy production has been increased without adding more cows. Here's how:

1. Improve your pastures. Dairy men have a saying—"Grow more grass and make more cash!" Good grass is your best and cheapest dairy feed. Lime and fertilize. Control weeds by spraying and mowing. Reseed to improve grasses. These are all good pasture builders.

2. Handle your milk and cream efficiently. Mechanical separators reduce loss of butterfat and improve its quality. Give more careful attention to sanitation. Quick cooling and proper handling can help you sell milk and cream, of better quality, for more profit.

3. Eliminate cattle pests. New sprays, like derris and DDT, used on the herd and in the barn, can rid your cows of grubs, practically eliminate pesky flies and lice. These pests rob America of an unbelievable amount of milk each year. Iowa alone sets the loss caused by heel flies and grubs at nearly 250 million pounds of milk in one year.

4. Control mastitis and Bang's disease. They are serious enemies of milk production. Complete control of them could increase the nation's milk supply 20% or more. That would be one quart every day for 30,000,000 people.

5. Check with your neighbors. See what they have done to increase their herd averages. You can also get help from your County Agent, your Vocational Agricultural teacher, your State College Experiment Station, or your State Veterinarian.

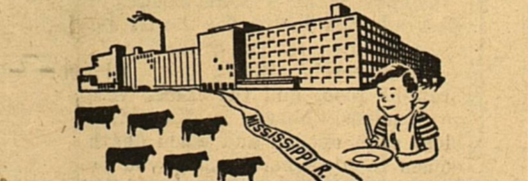

Increase production with more milk per cow. And more milk per cow means more cash for you.

"It takes a big engine to pull a HEAVY Load"

This little engine is good for its purpose, but is not built to pull such a big load.

The larger engine is designed to handle large loads—efficiently, economically and easily.

Two-thirds of the livestock is produced west of the Mississippi River. Two-thirds of the meat is eaten east of the Mississippi. Bringing these two together is a job requiring a large engine.

That's why the country needs nationwide meat packers like Swift & Company. For with processing plants located where most of the livestock is raised, we can help bridge the gap between western range and the kitchen range. It is an important job, and we're proud that we are able to handle a share of it.

How you gonna care for 'em down on the farm?

Fresh, high-quality eggs grade better, bring better prices and help build consumer demand. Ideal eggs are large, fresh and clean. They are uniform in size and shape. Clear, thick whites, and firm, evenly colored yolks show good interior quality.

Top grade eggs begin with a good flock of layers, properly fed and cared for. Remove the roosters when breeding season ends—your hens will lay as well and infertile eggs keep much better. Keep the nests well filled with straw. Gather eggs two or three times a day. . . . Never wash eggs! Use steel wool to clean the dirty ones. . . . Keep them in a cool place—not over 60°. Sort them in the case according to color and size. Market them at least twice a week.

Remember, your best advertisement is to produce eggs which will reach the consumer fresh, clean and evenly sized. Quality helps make a better market for your eggs.

HAM & EGGS GO TOGETHER

Milk, cream, poultry and eggs brought producers a gross income of nearly 6½ billion dollars last year. That's big business!

Every family in the nation uses dairy and poultry products. These products are perishable. They have to be handled with care. It's a big job to process and distribute butter, cheese, ice cream, dressed poultry, and eggs in prime condition. It's a nationwide job—as broad and as long as America.

We have nationwide refrigerating and meat distributing facilities to serve both producers and consumers. It is economical to use these same coolers, refrigerator cars and trucks for dairy and poultry products.

The Swift salesman sells meat, poultry, eggs, cheese, butter and other products. In this way we can have one salesman for sixteen or more products, instead of sixteen salesmen each selling one product. The same goes for delivery, too.

If you were in business marketing many different products to the same buyers, would you have one salesman for each product? You would have each salesman sell many of your products. That saves money, effort, travel and the buyers' time. That's our way, too.

Standardbred vs. Crossbred Chickens

by R. George Jaap
Ohio State University, Columbus, Ohio

The relative merits of standardbred vs. crossbred chickens may be summed up in three words—not much difference. But this difference is more often in favor of the well-chosen crossbred.

The advantages of a good crossbred are: faster growth and more eggs. However, many a slip can occur in crossbreeding chickens which will make them inferior, market-wise, to standardbreds.

For example, to produce a suitable crossbred, both standardbred parental breeds must be of top quality. If one has a mediocre egg production, it is almost a certainty the resulting crossbred will be a poorer producer than the high-producing standardbred side of the family.

The fact that crossbreds usually are darker-colored may be a market disadvantage. Many markets pay a premium for white-feathered chickens. White Plymouth Rocks are not suitable for crossbreeding. If they are crossed with New Hampshires, dark-colored chickens will often result. Therefore, the premium for whites is lost. And the slightly faster growth rate of crossbreds may not make up this profit difference.

In color of eggs, the crossbred producer is also at a market disadvantage. Most egg-producing crossbreds lay colored eggs. Many markets pay more for white eggs. Therefore, the crossbred producer forfeits the profit on white eggs until crossbreds, which will consistently lay white eggs, are produced.

In certain cases, crossbreds may develop a greater susceptibility to disease than the better parent.

It is possible to develop crossbreds superior to the better standardbred strains. But determining the most suitable crossbreds is difficult because two different breeds are involved.

From where I sit... by Joe Marsh

**Jeb Had the Folks
in Stitches!**

At the Friday Night Social, Jeb Crowell had the audience in stitches—doing a take-off on the blustering character who belittles everybody and everything that isn't from his own home town.

In our town, for instance: Some folks like band concerts, others don't—some families serve beer with dinner, others, buttermilk—and as for politics, there's plenty of healthy disagreement.

Well, we can laugh at that sort of character because from where I sit, Americans are just the opposite. We like to boast a bit perhaps, about the paint job on the new barn, or the missus' style of cooking—but we aren't intolerant of people who don't think or act exactly the same way we do.

But when it comes to denying folks the right to think or act as they choose...no, we're like you—we don't believe in it, whether it goes for serving beer, or speaking one's mind on public affairs.

Weekly

Gospel Sermon

THE CHURCH OF CHRIST in Eldorado cordially invites you to all services.

Kenneth J. Arrington, Minister
"WHAT IF WE DID NOT HAVE THE LORD'S DAY?"
Text: Acts 20:7.

"And upon the first day of the week, when the disciples came together to break bread, Paul preached unto them, ready to depart on the morrow; and continued his speech until midnight."

The above passage of scripture gives us one of the most important purposes for the coming together, into a worship service, of the disciples of Christ. This was to break bread, or partake of the communion—the Lord's Supper—in remembrance of the sufferings and death of our blessed Redeemer. This was in compliance with Christ's almost dying request (Matt. 26:26-29); (I Cor. 11:23-29). True followers of Christ still meet together upon the first day of the week (the Lord's Day, Rev. I 1:10) for this scriptural and worthy purpose.

In meditating upon the first day of the week, and its wonderful meaning and value to us now—the thought occurred... just what a great difference it would make... "if we did not have the Lord's

Day!" The numerous things that have taken place upon this day make it the dearest and most treasured one of all the week. After He had died for our sins our Lord and Savior arose upon this day. His one wonderful church built for our salvation (in the Church we are saved, II Tim. 2:10) was established upon this day, Acts 2:37-38. After being baptized for the forgiveness of sins they were added to this one church (Acts 2:47). The Lord added them to His church. Then they were saved from past sins (Mk. 16:16) and if faithful "unto death" would have the crown. (Rev. 2:10) What a day is the Lord's Day. Therefore, come to services (Heb. 10:25) this coming Lord's Day.
