Driver Education Supported By Local Organizations

From the Junior Woman's Club comes the following article in support of driver education:

Statistics prove that driver education reduces accidents. The estimate is 50%, even with the inadequate courses we now have. House Bill 278 is now in committee in the Legislature; it would amend the Gilmer-Aiken law to add a section on driver education. If it is passed, the schools would be permitted units to defray the cost of teaching driver education, the standards to be set by the Texas Education Agency. The course would include a minimum of 30 clock hours for classroom instruction, plus an average minimum of 6 clock hours per student for actual instruction in driving the car. It is recommended that the teacher must have six semester hours in safety education to qualify.

The cost of the program will amount to only 40 cents per person or \$1.00 per car. Besides the lives, injuries and heartbreak, we will save the cost of the program over and over again, in dollars, out of the \$150,000,000 we have been spending every year in having accidents in Texas. We will save the cost of the program in reduced automobile insurance for drivers under 25 who have had an approved course in driver education. Final approval on this first reduction in surcharge should be granted by the Insurance commission within 30 days.

House Bill 278 was introduced by Rep. Carroll Cobb of Seminole and referred to the committee on appropriations. It has the support of the Texas Congress of Parents and Teachers, Texas Home Demonstration Association, Business and Professional Women, Veterans of Foreign Wars, Texas Safety Association, American Society of Safety Engineers, Texas Federation of Women's Clubs, and others. The Jaycees, Rotary, Lions, Kiwanis clubs over the state have taken city-wide and county-wide action in support of this effort, to save lives on our highways through preventative means.

DON'T BUY JUST TOMATO PLANTS

There is nothing more appetizing than going to the table in summer and finding tomatoes from the home garden. To do this there are some things to remember.

Tomato plants will make good growth as far as vegetative parts are concerned and will not set fruit. Standard varieties of tomatoes under Texas conditions usually quit setting fruit when the temperature is 85 to 90 degrees and stays there for some time. Our standard varieties Rutgers, Marglobe, Pitchard and Stokesdale will usually stop putting on fruit in early May and June and if put out late may not bear at all. Put tomatoes out early in this county, having as large a plant as possible from plant box or hotbed. Be sure you know the variety you are buying.

A few varieties known as heat-resisting Blossoms, or Summer Tomatoes are a much better bet in Schleicher County. The Porter is a well known variety of this type. The Summer Prolific, Red Cloud, Victor, Western Red, and Firesteel are other varieties in the category.

Fertilize your peach and plum trees this month by spreading six pounds of 12-12-12 fertilizer and a like amount of 5-10-10 in April. Disc or spade in the fertilizer 3/4 inches deep. If your tree is on the lawn use a sharp instrument sinking holes in a pattern; fill the holes and turn the water on and soak.

Reseeded Ranges Profitable Solution

College Station. — Texas ranchmen are learning to live with drought and profit too. A range specialist says the answer for many lies in keeping a proper grass and livestock balance on reseeded ranges.

Many attempts at reseeding have not been profitable—and for several reasons, says G. O. Hoffman, extension range specialist. Reseeding fails because of planting at the wrong time or season, improperly prepared seedbeds, lack of seedling protection and weed control and grazing before the new plants become well established.

Hoffman advises farmers to determine whether as much as 15 percent of the native, key grasses are still present. If they are, don't reseed. Deferred grazing is a better and cheaper method of recovery. A reseeding operation should be planned like a cash crop, Hoffman says. Fields out of cultivation for long periods seeded to adapted grasses give quickest response. Plant the grasses in rows and follow with a roller or cultipacker.

Reseeding is recommended in West Texas in April, May or June. Management following seeding plays an equally important role in re-establishing rangeland. Do not graze the new grass the first year, or until the plant crowns are at least one inch in diameter.

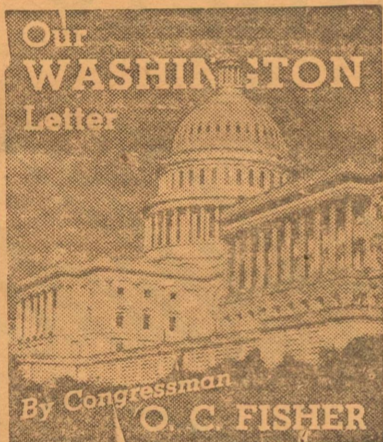

Turn in the cows only after the new grasses have a firm foothold. But don't run in too many animals. Next comes the job of balancing livestock with forage produced.

Mr. and Mrs. Richard Cheatham spent Sunday in San Angelo with Mr. and Mrs. Millard Smith Jr.

Mr. and Mrs. C. A. Taylor and Kenneth and Sharon of Los Angeles, Calif., were here Thursday night with Mrs. S. H. Cheatham. Mr. and Mrs. Taylor went to Houston Friday to visit relatives and left the children here to visit. They plan to return about the 15th for a week's visit here before returning home.

Mr. and Mrs. George Williams and Juanice attended funeral services for his cousin, N. H. Rogers, Friday at Brady.

Mrs. Robert Lee Brothers and two daughters of Gonzales spent the week end with Mr. and Mrs. Lenard Miller.

The problem of getting men in military service to reenlist was aired in the House last week when a new career incentive pay bill was approved and sent to the Senate.

It costs Uncle Sam a lot of money to train a person to be a soldier and it is therefore to the interest of the Government to have that person reenlist. More than \$6,000 is spent on training a GI the first year he is in. But in specialties the training cost is really high. For example it takes \$120,000 to train a jet pilot, and \$275,000 to train a jet bomber pilot.

But in this time when private industry offers more and more retirement and pension plans and social security and other benefits and attractions are available, it is increasingly difficult to keep people in the military service. The more the turn-over, the more the cost of Government.

So, in an effort to turn this trend and to attract more young men to make the military a career, the incentive pay bill was approved by the House. Examples of how it applies: A 2nd lieutenant who has completed 3 years service—including his enlisted period—will get an increase from \$237.12 to \$296.40 per month. The 1st lieutenant, \$274.18 to \$335.40.

The higher increases will go to those who have served for at least 3 years—those in whom the government has a sizeable investment in training costs.

Pork To Be Plentiful For Month Of April

College Station. — Slumping prices for live hogs are reflected in the meat markets. Supplies of pork are large, the slaughter rate is running from 20 to 25 percent ahead of last year at this season, and this plus lower retail prices, says Mae Belle Smith, extension consumer education specialist, puts pork in the featured spot for April.

Other meats on the April list include beef and such fish as shrimp, frozen haddock and halibut and canned tuna.

Pinto beans, canned snap beans and canned sweet corn remain in heavy supply as do fresh and processed oranges and grapefruit, raisins and small prunes.

Rice, eggs and dairy products also rate a high ranking on the April list for supplies are near record levels. Miss Smith says lard, vegetable fats and oils complete the list.

Sudangrass Helps Lick Summer Grazing Job

College Station. — Farmers can help lick their summer grazing problems with staggered plantings of sudangrass.

Sudangrass, with the aid of a little moisture, furnishes abundant grazing and allows livestock to lay off permanent pastures during hot weather. This "lay off" period enables permanent pastures to rest and get a firm footing before the next grazing season, advises E. M. Trew, extension pasture specialist.

Now is the time to plant sudangrass in most of Texas, Trew says. Planting in areas where frost may yet occur should wait until all frost danger is past. He recommends planting one acre for each animal unit on the farm.

Sudangrass is a vital link in any year-round grazing program and is gaining popularity among the state's farmers.

By first planting when frost danger passes followed with plantings at three to four week intervals as long as moisture permits, grazing can be greatly extended thru the summer.

"Some stockmen have had grazing from about six weeks after frost until just before frost in the fall," he says. Different plantings must be fenced separately.

Sweet sudan is adapted to the entire state but does better in humid areas. Common and Tift also are well adapted to Texas conditions. Highest returns from temporary grazing are obtained thru rotation. Concentrate on a small area, graze it off quickly, then move to another block.

by the Travis County grand jury on conspiracy to defraud the state of \$82,500. Giles made bond of \$60,000 in the Travis cases.

In San Antonio, Giles was reported as saying that when he comes to trial he will have plenty to say.

"I welcome an opportunity to stand trial on this case so that the full facts can be developed," Giles stated. "There's certainly another side to this whole story, and I'll tell it to the proper authorities at the proper time."

Governor Shivers has released a letter to investigators offering to testify publicly. He said, "The public is entitled to have the facts and to have them now—without a smokescreen of veiled threats, rumors and insinuations."

Attorney General John Ben Shepperd already has appeared before every grand jury investigating block land sales, and before both houses of the Legislature. He has stated publicly that he would testify at any time.

A full investigation of every phase of land office operations since Giles took office as commissioner on Jan. 1, 1939 was called for by Rep. D. B. Hardeman of Denison. He introduced a bill in the House appropriating \$500,000 for the special investigation.

Tax Bills Pending

Deadline for introduction of new bills in the Legislature arrived at midnight Friday. It found a wide variety of "big" tax bills out of which the House may choose its selection of \$85 million in new money for general purposes—and a possible \$45 million for highways.

Administration sponsored were the Murphy two-cent gasoline tax increase and the Kirklind one-cent cigarette tax increase. Neither has been set for committee hearing. Heard by committee and sent to sub-committee was Rep. Jerry Sadler's \$8.30 per barrel beer tax.

A "Small Car" price makes it yours
—delivered and ready to roll

WE keep coming across a good many people who still are surprised when they see the low *delivered* price of the Buick shown here.

They're surprised because they know that this price is just about what a lot of the smaller cars are asking—if not more.

But that's just the point.

What's making the 1955 Buick the hottest one in all Buick sales history is the simple fact that its low *delivered* price buys so much more automobile.

Much more automobile when it comes to the lift and life of great V8 power—Buick power in record might.

Much more automobile when it comes to style and size and room and ride steadiness—and the integrity of construction that comes of Buick building.

Much more, too, when it comes to matching your motoring needs to the simple practicality of your budget—because Buick offers you

DID YOU KNOW—

- that the Buick SPECIAL is priced below any other car of 188 horsepower and 122-inch wheelbase?
- that the Buick SPECIAL is priced below some models of the three best-known smaller cars?
- that the Buick SPECIAL gives you more pounds of automobile than any other car at its low price?

a stunning choice in just about every price class...

Like the rock-bottom-priced SPECIAL—the high-powered CENTURY—the extra-spacious SUPER—the magnificent and custom-built ROADMASTER. Each is a Buick through and through—and each is a big reason why Buick sales are soaring as never before.

Why not drop in on us this week and see how much your new-car dollars can really buy—in thrills and fun and comfort and deep satisfaction—when you buy Buick.

'Thought For The Week
 Ministerial Alliance

It is said of Jesus that, "He steadfastly set his face to go to Jerusalem." We see here that the resolution was deliberate. It was no accident that Jesus found himself in Jerusalem, he planned to be there. He went out to meet the task before him. We do not simply drift into great opportunities. We must face them. There is an old saying "Any dead fish can drift with the current, but only a live one can go up-stream." Only the person who is alert in our day can go against the currents that sweep us out to the sea of confusion. Let us place our hand in the hand of Jesus and resolutely face life victoriously.—Doyle W. Morton.
