Since the beginning of time man has been dependent on the soil for the necessary things to sustain life. The need for the things that are necessary is the same today as in the beginning. Some things that have changed are man's requirement of the products from the soil. It is needful that man take more from the soil today than in years past; this being due in part to increased population. The use of every crop produced on agricultural lands has increased either because of necessity or to meet the requirements of the high standard of living.

Most people will agree that soils should be used in a way whereby their productivity is maintained or increased. By using soil in this manner the people of the United States will continue to enjoy a high standard of living. This includes security for farm and ranch families and a continuous and abundant supply of farm products for all of the people.

Since farmers are dependent upon the soil for their livelihood, their interest in its proper use should be paramount. Because of our dependence on the soil, everyone should be interested in its proper use. The job of proper land use must begin on the farm or ranch and must be done by the farmer or rancher. To achieve the objective each acre of agriculture land must be used within its full capabilities and treated in accordance with its needs for protection and improvement.

Throughout the United States farmers and ranchers are receiving assistance through their local Soil Conservation districts in determining their needs from a soil, water and plant conservation standpoint. Through these conservation districts they are assisted by technicians in planning and applying the needed conservation practices on their land.

Before the right treatment of soil can be prescribed its needs and capabilities must be determined. This is done by a soils scientist of the Soil Conservation Service. Their job is to make a complete inventory of the farm, field by field. Some of the things that the soil scientist must know is depth, texture, permeability, slope and erosion. With all the factors considered the capability of the soil is determined. Each acre must be used within its capabilities and treated in accordance with its need for protection and improvement. To use the land within its capabilities for example, a deep soil could be used for cropland or grassland and still be within its capabilities. Very shallow soils being used as grassland would be within its capabilities, but would not be if used for cropland.

The needed treatment of the land varies with the capability of the land. For example a deep soil with very little slope and no erosion from under would not need terraces. The same soil on a steep slope and considerable erosion would need terraces to conserve soil and water.

The productivity of new crop land is high because of the fertility and general condition of the soil. This of course can be effected by the condition of the soil when used as grassland. Naturally a new field that had a good grass cover will have more organic matter in the soil than one that had very little or no grass cover. This being the case the productivity of the land high in organic matter will be higher than the land with little organic matter, considering other factors the same.

Under farming operations the organic matter soon becomes depleted if proper measures are not taken. Since crops are generally removed instead of being left to decay, not enough residue is added to the soil to maintain its natural balance. The result is a serious lack of nitrogen which is largely stored in organic matter and released by decay. Another is

a serious change in the structure of the soil, which becomes more finely divided and compact as the amount of organic matter is decreased.

The practice of leaving the proper amount of crop stubble (crop residue utilization) helps to conserve soil and water as well as helping maintain the fertility of the soil.

The proper treatment of farmland or rangeland consists of a combination of soil, water, and plant conservation practices. The application and maintenance of these practices will not only effect the well-being of the citizens of America today but will also effect the well-being of future generations which must be secured also if the nation is to continue to live.

"As the soil goes, so goes its people. Poor soil, poor people."

News From Our Neighbors

Damage Repaired
 Vaughan Chevrolet Co. is doing business in a normal manner this week having completed extensive repairs and re-decorating since its costly fire of three weeks ago. — Robert Lee Observer.

Rabies Scare
 Following discovery of a rabid fox within the city limits on Monday of this week, and another 3 weeks ago, emergency action has been declared by the City of Eden in the fight against the spread of rabies, and all dogs and cats running at large within the city during the next three weeks will be destroyed whether they are wearing vaccination and license tags or not. —Eden Echo.

Trying For Water
 Eldon McGonagill's water well on the eastern outskirts of Marathon pumped 200 gallons per minute in tests conducted last week-end by Dixon Water System Co. of Odessa.

The tests were conducted for the Dow Chemical Co. which is contemplating establishment of a fluorspar plant in Marathon if an ample water supply is found. —Alpine Avalanche.

To Organize
 Watermelon growers of Mason County are urged to be present next Thursday night, Jan. 31, when they will form an association at the district courtroom. Meeting time is 7 o'clock. —Mason Co. News

To Take Bids
 Bids will be accepted from contractors on Fort Stockton's new \$266,000 intermediate school building on Feb. 12, school business manager E. F. Triplett announced today. —Ft. Stockton Pioneer.

New School Building
 Cecil Sullivan, McCamey building contractor, was awarded the contract for the construction of the new school administration building. At their regular monthly meeting, the Board of Education of the McCamey schools also voted to rehire Hubert L. Wheat as superintendent and start a beautification program at the Dunbar school. Sullivan was awarded the general construction contract of the school administration on his bid of \$37,502.00. —McCamey News.

County Offices Move
 These are moving days at the Crockett County courthouse. County officials are moving to new office quarters in the county office building, made available when the building was recently vacated by the Crockett County hospital for its new building on the northwest side of Ozona. —Ozona Stockman.

Crockett Commissioners Still Study Extension of FM Road No. 33
 District Highway Engineer J. A.

Snell and Assistant Engineer Willis of the San Angelo district office of the State Highway department conferred with members of the Crockett County Commissioners Court Wednesday relative to the department's plans for construction of an extension of FM Road 33 west to Iraan.

The engineers presented facts concerning possible traffic movements with the new construction and revealed the Highway department's plans for area construction. It had been the plan of the Commissioners Court to go over the possible routes with the highway engineers but due to the wet, drizzly weather, the trip was postponed. Further study of the proposition was promised by the conferees.

At a recent meeting of the Commissioners Court, the court passed consideration, pending further information, on the Highway Department's proposal to extend the Farm-Market 33 west. —Ozona Stockman.

'GLENDALE CLUB MEETS

The Glendale Home Demonstration club met January 24 in the home of Mrs. Ed Meador. The meeting was called to order by Mrs. W. T. Huber, the president, and the secretary, Mrs. Hancock, read the minutes.

New yearbooks were presented to the 11 members present. There were three guests, Mrs. Russell Beach, Mrs. C. C. Henderson, and Mrs. L. W. Chrestman.

Each member contributed 25¢ toward the Home Demonstration education fund. Mrs. Kreklow gave a demonstration on cooking and serving of vegetables.

The next meeting will be Feb. 28 in the home of Mrs. James Williams.

Fort Worth—Numbers of livestock at Fort Worth dropped sharply below a week ago due to icy weather over much of the territory, and prices Monday reflected strength through most of the grades and classes of livestock offered.

Fed steers and yearlings were strong to 50 cents higher and slaughter calves ruled strong to 25 or 50 cents up. Stockers were very scarce, and strong. Cows and bulls ruled fully steady.

Fed steers and yearlings of good and choice grades cashed at \$17-20, and fed heifers ranged from \$19 downward. Medium and lower grades sold from \$12 to \$16. Fat cows drew \$11.50 to \$13.50 and canners and cutters cashed at \$8 to \$11.50. Bulls were reported from \$10 to \$15.

Good and choice fat calves cashed at \$15-19; and medium and lower grades scored \$10 to \$15. Stocker steer calves were quotable from \$20 down, and steer yearlings around \$18 down.

Lambs Advance Again

Good and choice wooled fat lambs sold from \$18 to \$19.25 and a few club lambs sifted from the Stock Show topped at \$19.50 at Fort Worth Monday. Shorn lambs of choice grades and with No. 1 skin sold from \$18.50 down and No. 2 skin lambs sold from \$17.50

down. Cull to medium lambs sold from \$12 to \$16.50.

Stocker and feeder lambs of good and choice grades cashed at \$16.50 to \$17.50, feeders at \$17.50 having No. 1 pelts. Full wooled feeders were considered quotable to \$18. Old ewes sold from \$6 to \$8. Old bucks sold from \$5 to \$6. Old wethers were quotable from \$10 to \$12, and yearlings and two-year-old muttons were quotable around \$14 to \$16.

Drouth relief legislation was considered by the House Agriculture committee last week, and hearings on the subject will continue. The particular bill under study was introduced by Congressman Poage of Waco, myself, and a dozen others from Texas and other states. It proposes to provide for a protein supplement feed plan, patterned after the hay program, and also deals with a deferred grazing arrangement in the disaster areas.

The outcome of these bills remains uncertain. The Department of Agriculture appears to be dragging its feet on the subjects, and some opposition is cropping up here and there. The deferred grazing is especially needed in order

to speed up the recovery of the ranges, once the rain begins to fall. Experts tell us that by applying a sound deferred and controlled grazing plan to rangelands in the area, when rain comes the land will be restored to normal productive capacity from two to three times as quickly as would be the case if the denuded land is kept grazed down before it has a chance to re-seed and produce a cover. In their briefing before President Eisenhower in San Angelo, A&M spokesmen plugged for a sensible deferred program.

LUBBOCK MAN TO HEAD TEXAS HEART FUND

Dr. E. N. Jones, president of Texas Technological college at Lubbock, will serve as chairman of the Texas Heart Fund for 1957.

Announcement of the acceptance of the post by the noted educator was made by Howard Walker of Lubbock, chairman of the board, and Dr. D. D. Warren of Waco, president of the Texas Heart Association.

Annual campaign of the Texas Heart Association, an affiliate of the American Heart Association, for funds with which to combat the nation's number one killer-disease will be conducted throughout February, Dr. Jones announced.

In accepting the chairmanship of the 1957 Texas Heart Fund, Dr. Jones pointed out that "diseases of the heart and circulation constitute the leading health problem of our times and must be fought with every resource at our command."

U. S. Savings Bonds are indestructible!

Everything, they say, comes out in the wash. And this photograph shows how a U. S. Savings Bond left in a man's shirt pocket came out after a session with the wringer. But its value hadn't shrunk a bit. The U. S. Treasury replaced it—as it has nearly a million other Bonds which were mutilated, stolen, lost or destroyed.

Savings Bonds have been wrung through wringers, destroyed in fires, chewed up by dogs, goats, cows and probably children. But their owners never lost one penny. The Treasury keeps a record of all Bonds purchased and replaces them without charge in case of mishaps. What's more, the Treasury issues the Bond with

its original date so you don't lose a penny of interest either.

U. S. Savings Bonds are not only safer than cash but one of the best investments you can make. Your government guarantees the principal—up to any amount—and the rate of interest you receive.

You'll be surprised at how savings accumulate when you invest regularly in Bonds.

So start buying Bonds today—either on the Payroll Savings Plan where you work or at your bank. And make your Bond buying a regular habit. It's one that will bring your family greater security.

PART OF EVERY AMERICAN'S SAVINGS BELONGS IN U. S. SAVINGS BONDS

The U. S. Government does not pay for this advertisement. The Treasury Department thanks, for their patriotic donation, the Advertising Council and

Evening Worship	7:00
Monday:	
Women of the Church	
Exec. Council	9:30
Mid-winter lectures begin at	
Austin Presbyterian Theological	
Seminary	7:30
Wednesday:	
Crusaders	4:00
Choir Rehearsal	4:00

Altho our attendance was low on account of the icy weather last Sunday we were greatly benefited by the visit of our director of Christian Education, Mr. Leonard Boswell. He pointed out many things to us that we feel will help us to do a better job with our educational program.

Sunday is the beginning of our season of emphasis on World Missions. During the month various departments of the church school will study our various fields of work in Formosa, Korea, Brazil, Peru, Africa, Iraq, and Mexico.

Thought For The Week Ministerial Alliance

When do you wind your watch? At night? Most people do. Most jewelers wind theirs in the morning, to begin the day on full spring. Whether you wind it in the morning or night you know that it is necessary to wind it or else you will not have the time with you. It will be just a guess. The same is true with prayer. The time doesn't make the difference, the important thing is that you pray. Pray in the morning, in the evening, during the day, whenever you feel the need of God's guidance. Pray knowing that he is present and nearer than hands and feet. Pray when you have a quiet time alone, pray as you drive seeking God's protection, pray for forgiveness for all the things you have done which are wrong and pray more for forgiveness for the things you know you should have done and didn't. Pray until prayer becomes a part of your everyday living. Then you will be the kind of Christian that most people want to become.—James Spencer.

Methodist News

The sermon subject next Sunday will be, "Prayer Is a Power." The text will be Luke 11:1. This is the fifth sermon in a series of twelve on the general theme, "What We Believe." The sermon is illustrated every Sunday by a beautiful colored stamp which is given to every person who attends Sunday school, to be pasted in a special stamp collection book which is given to everyone present. This is the Nelson Attendance Plan and it is proving itself very effective. Our Sunday school attendance last Sunday was 88 in spite of the severe weather.

Our churchwide School of Missions begins next Sunday evening at the 7 o'clock service. Mrs. R. R.

Heaner will conduct this study and will give all four lectures, one on each Sunday evening in February. The study this year will be, "South of the Himalayas." There will be a fellowship hour following the evening service, under the direction of Mrs. Luke Thompson, Jr. At that time there will be a display of art and craft objects from India in the parsonage. Refreshments will be served by the Commission on Missions. Everyone is cordially invited to attend.

Choir rehearsal will be held Wednesday at 6:30 under the direction of Bob Burkart.

The pastor will be in Dallas next week attending Ministers Week at SMU. This is the largest lecture-ship for ministers in the world. In case of any emergency he can be contacted through his brother-in-law, Donald L. Bearden, at TAYlor 4-0381 or LAkeside 1-7753.

Austin.—A number of the "Better Government" bills requested of the Legislature by the Texas Press Association have hit the legislative hopper. Outstanding among those introduced are:

1. A Mandatory Publications bill designed to force public officials to print public notices as called for by present statutes. Requiring removal from office of any public official who refuses to publish financial reports called for under existing laws, this bill would eliminate such occurrences as have happened in Duval County in recent years. Introduced by Sen. Preston Smith of Lubbock and Rep. John Lee of Kermit.

2. A bill to provide for public notice of applications of veterans applying for loans under the Veterans Land Act. Notices, to appear in the veteran's home town newspaper, would specify name of the veteran, describe the land, and quote the price he will be paying. Sen. Charles Herring of Austin and Rep. Louis M. Anderson of Midland have introduced companion bills in the Senate and House.

3. Rep. Virginia Duff of Ferris and Sen. Crawford Martin of Hillsboro have introduced measures which will require publication of annual financial statements by school districts and other official bodies. Again, a measure to help prevent situations similar to that in Duval County.

4. Sen. Otis Lock of Lufkin and Rep. Howard Green have introduced bills in their respective houses which would make it unlawful to bar newspaper reporters from precinct conventions. Object: To prevent instances when newsmen are unable to report convention facts to their readers because they are refused admission to such political meetings.

5. Meetings of public bodies

would be open to the public, including newspapermen, if a bill introduced by Sen. Henry B. Gonzalez of San Antonio and Rep. Don Kennard of Fort Worth is passed. This bill will insure the "public's business" being kept public.

6. A measure providing for removal of officials who refuse to testify concerning their duties. By Sen. Doyle Willis and Rep. Howard Green, both of Fort Worth.

7. Two bills introduced by Rep. Jack Welch of Marlin would require insurance companies to publish financial statements annually, and provide a penalty for furnishing false information to the insurance commission.

8. Another bill by Rep. DeWitt Hale of Corpus Christi would require each treasurer receiving or controlling funds of a school district to keep a full account of all funds, and to file an annual report of those funds each school year. Present laws do not provide adequate protection at the local level for such accountings.

Among other items in the still-abundant flow of suggested legislation are bills which would:

1. Require voters to register by parties. By Sen. Henry B. Gonzalez of San Antonio.

2. Provide paid investigators to assist grand juries. By Rep. John T. Cox of Temple.

3. Refund state taxes on gasoline paid by cities. By Rep. Robert W. Baker of Houston.

4. Exempt widows, old age pensioners, injured veterans and others from state property taxes on the first \$5,000 in value. By Rep. D. Roy Harrington of Port Arthur.

5. Place liquidation of insurance companies under supervision of Travis County district judges rather than the Insurance Commis-

sion. By Sen. Charles Herring of Austin.

6. Make Texas Thanksgiving the same as the federal holiday. By Sen. Dorsey B. Hardeman of San Angelo.

7. Re-organize the Industrial Accident Board and increase workmen's compensation benefits. By Reps. Kennard and Wade Spilman of McAllen.

8. Provide for annual sessions boost legislators' salaries to \$7,500 a year and the speaker and lieutenant governor to \$12,500. By Rep. Truett Latimer of Abilene.

COMPLETES BUSINESS COURSE

Burnell Doyle, daughter of Mr. and Mrs. Claude Doyle, recently completed a course at San Angelo Business college in office machines bookkeeping, and shorthand. The night course lasted six months. Miss Doyle is employed in the First National Bank here.

ATTEND REUNION

Mrs. Will Doyle and Mr. and Mrs. Claude Doyle and Jerry Lynn attended a Porter family reunion recently at Lampasas. They visited the D. A. Porter family, and other relatives attending included: Mr. and Mrs. L. I. Patterson and daughter Marie of Glenville, Ga., Betty Ann Durrence, Miles Driggers of Waco, Mr. and Mrs. Dwayne Blackwell and Mr. and Mrs. Lowell Griffin, James and Linda Sue of Kerrville; Mr. and Mrs. Clinton Porter and family of Carrizo Springs, Mr. and Mrs. Alton Porter of Kermit, and Mr. and Mrs. Marlin Porter of Lometa; Mr. and Mrs. D. T. Weeks and Mr. and Mrs. Milton Machen and children of Lampasas.

LIONS CLUB NEWS

Miss Betty Hanks of San Angelo gave an illustrated lecture to the Eldorado Lions club yesterday. She showed beautiful colored slides taken on her goodwill tour of Spain last summer. Every year the city of San Angelo selects some outstanding young lady and sends her as community ambassador to some country in Europe. Miss Hanks was chosen last year to make the

goodwill tour of Spain as the official representative of the city of San Angelo. She was introduced by Joe Andrews.

The program next Wednesday will be presented by Dr. H. E. Hickman, heart specialist of San Angelo. He will speak in layman's terms on the subject, "The Heart and Arteries in Middle Life." He will be introduced by Dr. J. I. Mowrey.

Golden Esso Extra

has the highest octane rating of any gasoline.

Modern cars, especially the 1957 models, have engines with very high compression ratios (9 to 1, and higher!).

These engines require a gasoline that's better than the best of "premium" gasolines, better than the "supers."

The one gasoline—the only one—that permits every high compression engine to deliver its full power output is Humble's Golden Esso Extra.

It is the world's finest automotive fuel... with the highest octane rating of any gasoline.

Protect the value of your automobile investment—use the gasoline that gives you added value from full performance. Fill up at the golden pump under your neighbor's Humble sign.

If you answer yes to any one of these questions, you should try Golden Esso Extra—world's finest gasoline.

- Does your car knock on "premium" gasoline?
- Is your car air-conditioned? (On an average the engine pulls a 3-ton air conditioner.)
- Does the engine have a compression ratio of 9 to 1, or higher?
- Does your car have more than one carburetor or a "Power-Pack"?
- Is the engine rated at 200 horsepower or higher?

(These points become even more important as you add miles to a new car. Anti-knock requirements increase when you pass the break-in period.)

Don't let a "knock you can't hear" rob your car of power!

Engineers call it "trace knock," a knock so faint that only a trained technician can hear it. But like all knocks, it robs your engine of power, forecasts engine damage. If yours is a modern car in any price class—especially if it's a 1957 model—prevent "trace knock" with Golden Esso Extra, the gasoline with the highest octane rating ever.

CHERRY PIE SUPREME

½ cup Pet Evaporated Milk
3 Tablespoons cornstarch
¼ cup sugar
1-lb. 4-oz. can sour, pitted cherries
2 Tablespoons butter or margarine
1 Tablespoon lemon juice
few grains salt
1 cup powdered sugar

Have ready a baked 9-in. pastry shell. Chill milk in ice tray until almost frozen around the edges. Mix in a 1-qt. saucepan the cornstarch and sugar. Drain cherries, saving syrup. If necessary, add water to syrup to make 1 cup. Stir syrup into cornstarch mixture. Cook and stir until very thick and clear, about 7 min. Cool thoroughly and then add drained cherries. Put into pastry shell. Meanwhile, melt butter in small saucepan. Take from heat and mix in until smooth the lemon juice, salt and powdered sugar. Cool thoroughly. Put ice-cold milk into a cold 1-qt. bowl. Whip with cold rotary beater, or with electric beater at high speed, until stiff. Whip in cooled powdered sugar mixture just until mixed, about ¼ at a time. Do not overbeat. Arrange around edge of pie. Chill an hour before serving.
