ELDORADO — SCHLEICHER COUNTY, TEXAS

THURSDAY, OCTOBER 10, 1957

NUMBER 41

## Nine-Member Slate of Officers Is Elected At C of C Meeting

Heading the newly formed Schleicher county chamber of commerce is Jo Ed Hill, manager of the Eldorado Wool Company. Hill's election was a part of the action taken by 60 interested citizens at the second C of C meeting which was held Monday night in the Memorial building.

Other officers elected included Elmer Peters, vice president; T. P. Robinson, Jr., sec-treas; and Mrs. Vida Kreklow, Eldon Calk, Charles Hahn, Edwin Jackson, J. E. Hill, and E. H. Topfiffe, directors.

Earlier the group heard Ralph Duncan of the West Texas Chamber of Commerce office in Abilene set forth the procedures for setting up a chamber organization in a town. Pointing out that Eldorado was the ninth community this year to ask for help in organizing a C of C, Duncan stated that a chamber represented group action of the community.

The needs of a new organization were discussed by Duncan as being four-fold:

1. A program of work must be set up, a blueprint for action must be drawn up; goals must be set toward which the chamber can work. The plan must be adapted to the needs of the given community and trade area.

2. Enough dollars must be raised to do the job; sufficient finance is necessary to cover the budget it takes for the program of work.

3. Active dedicated leadership in the chamber is needed, backed up by a strong committee structure.

4. A full time manager is needed to handle the details.

### Projects Suggested

The assembly split up into small six-man discussion groups to suggest needed projects to better the county. These were then presented

## Court Convened Monday; 4 Indictments Returned

A 51st District Court grand jury here Monday returned indictments charging misdemeanor thefts against four men. Indictments were returned against Roy Carlos Casidy, 18, of Abilene, and Cecil Jeffrey, 22, of Eldorado, charging theft of four pipe wrenches, a trailer hitch, hacksaw and 10 gallons of gasoline August 25 from the Claude King wax plant at Huldale.

Cecil Jeffrey pled guilty and received a 15-day jail sentence and \$100 fine. Casidy is out on \$500 bail.

Two Sonora men, Tommy Sessoms and Ira Wall were indicted on charges of taking 14 batteries valued at \$28 June 6 from a local trucking concern. They are both out on bond.

Carroll White was foreman of the grand jury. Judge Joe L. Mays will hold court again in Eldorado Monday, October 21.

## Planning Continues On RIAL Campaign Here

Further plans were under way this week for Eldorado and Schleicher county to participate in Religion In American Life campaign, with Edwin Jackson as general chairman. Importance of religion and church attendance is to be emphasized during the month of November, and the campaign has been endorsed by the Eldorado Ministerial Alliance.

Other workers with RIAL were announced this week: Fred Watson and George Cales, attendance; W. G. Godwin, boys and girls; Mrs. Edwin Jackson, women's clubs; Dick Preston, civic and fraternal organizations; Mrs. Joe Edens, churches.

Attendance at all churches is to be reported on during the one-month campaign.

Increased attendance at worship services and support of all religious institutions will be urged during the local program, sponsored by a committee representing community religious and civic groups.

Activities will stress the cam-

to the entire group and included: extending Highway 33 west to Iraan, a county hospital, securing a new and larger motel, creating larger markets for produce, inviting a dentist to locate for practice in Eldorado, continued improvement of airport facilities, improved auction and marketing facilities for livestock, development of new industry, and a recreational program for youth.

### Budget Discussed

No estimate of membership costs has yet been worked out by the new executive committee; however, discussions have placed the yearly budget at approximately \$8,000, of which the manager would get \$4200.

Duncan met Tuesday morning with the local officers to further discuss their new duties. Other plans to be worked out by the executive board include those relative to procuring a manager, setting up of the budget, and outlining a program of work.

This ground work will then be reported on at the next general meeting of the Chamber of Commerce, which will be held the night of Monday, November 4th.

A total of 354 bales had been ginned according to the owner of the local gin. He predicted that no more would be brought in this week on account of the weather. ## Tuesday Morning Breakfast Launches Fund Drive For Boy Scout Council

Kicking off the local 1957 fund drive for the Concho Valley Boy Scout Council was a breakfast Tuesday morning in the Memorial building, which a large group of fund drive workers attended.

W. H. Hale is general chairman of this year's drive and is being assisted by a number of captains. Pledge cards are in the hands of the solicitors and it is hoped to end the drive as quickly as possible. The Concho Valley Council, Boy Scouts of America, with head-

quarters in San Angelo, launched its 1957 fund drive in most towns over its 23½ counties, on Oct. 8.

"We want to reach more boys who want to be Scouts. Every boy should be given that opportunity," said Mr. Charles E. Coombs, president of the Council. "We will expand all efforts to make this possible. We are working closely with churches, P-TA groups and other sponsors or units. We must also expand our camping facilities.

"Some of the funds contributed will help maintain and improve Camps Fawcett and Sol Mayer, where each summer hundreds of youngsters enjoy a camping experience. In 1957, 820 Scouts were in long term camp. At a reasonable cost, Scouts enjoy swimming, boating, canoeing, handcraft, and camping all under the guidance of experts," Mr. Coombs said.

"We must remember," said Mr. Coombs, "that through Scouting hundreds of our boys are helping themselves to develop physical fitness, personal skills, self reliance, courage and ideals of service to God and to country."

Civil defense and Red Cross authorities valued the service rendered by Scouts and have planned for properly trained Scouts to take their places among community forces in meeting any emergency anywhere.

The Boy Scouts of America continues to expand its civil defense participation on a nationwide basis. Its preparedness plans involving the training of boys to take care of themselves and others in times of disaster have been already proven to be helpful. Much of the training that prepares the Scouts to render emergency service is absorbed through camping experiences. More than a half million Scout campers spend one or more weeks in camp each summer.

ADDING MUCH to the half-time shows of this year's football games are the drum major and twirlers. Left to right, seated, are Margo Mittel, Genelle McCalla, drum major; and Emma Lou Menees. Standing are Janis Sofre, Linda Bess Love, Judy Wyatt, and Kay Thomerson. Not shown is the feature twirler, Arnie L. Westbrook.

It has been several years since a flyer made a night landing at the local airport. Tuesday evening at about 7:30 a pilot who repeatedly "buzzed" the town drew quite a number of cars to the airport, and then he landed without mishap.

Lighting of the north-south strip at the airport is one of the phases of airport improvement now in the planning stage. Two strips have been graded out, and the north-south one is to be caliche.

Airport improvements are being done jointly by the county and city.

—ps—

Ice was spilled for half a block on Main street Monday when a large truck owned by San Angelo Ice Service rounded the hotel corner and nearly went out of control. A rear spring hanger broke, allowing the wheels to turn crosswise under the truck and causing the ice to be spilled on the street. After a repair job by a local mechanic, the truck proceeded to its destination.

—ps—

The wind Tuesday night that came with the rain caused a freak accident on Main street. A Reynolds farmer had pulled his trailer loaded with picked cotton under the canopy at Booth's Magnolia station to keep it from getting wet. When he returned for it about 9:30 p. m. he found it had been blown from under the shelter and into a pickup parked at Joe Wagley's garage. There was some damage to the pickup, and the tarp covering the cotton has not been located.

## COUNTY AGENT'S COLUMN

by Tiny Godwin

Schleicher County Agricultural Agent

Defoliation of cotton can pay big dividends when used at the proper time. It speeds maturity, especially on late cotton, aiding the producer to get the maximum if frost date is crowding.

Defoliant, dust or sprays should be applied at least 35 days after the period of maximum flower load. This permits the maximum staple length development. Another way to time the application of defoliants would be 30 days after cotton quits making "cut out" or when the youngest bolls expected to make cotton is 30 days old. Application should be made 10 days to two weeks prior to intended picking date. If time is permissible it is safe also to apply the defoliant when 50% of all bolls are open.

Timing and the type of defoliant to use is of utmost importance for the greatest returns. There are plenty of leaflets, 145, Cotton Defoliation Guides, giving trade names, chemical names, rates per acre and dilution information at the agent's office.

Some 14 irrigation farmers of Schleicher and Tom Green counties visited the Henry Moore, John Mayo and Clyde Keeney farms to see demonstrations on the ground that could save dollars and cents per acre, per bale and many hours of labor in the future.

At the Henry Moore farm, three varieties of cotton, empire, lankart 57, and acala 1517 b. r. were treated the same, receiving equal amounts of water and fertilizer.

Henry Moore explained his operation of deep plowing which was not practiced in 1956. This year he plowed 12-14 inches deep, breaking the hard pan, making water and fertilizer more available to the plants. There was less cracking and breaking of feeder roots. A big financial gain was made here in bigger yields, and water and fertilizer was more available to the plant.

Yields of the different varieties and how much of each in seed cotton to make a 500-pound bale, staple length of each variety, ginning properties, difference in value of the varieties after being ginned. Other properties were also discussed.

What happens when cotton is irrigated only twice and then abandoned was also shown. It is doubtful that this cotton will pay according to Mr. Moore's figures. Also shown was cotton that missed the first watering—a difference in

yield of half to three quarters bale per acre.

The best insecticide program available, the cost and results were shown. All varieties were sprayed 15 times, 12 times with tractor equipment. Cost of application with tractor equipment was \$4.20 per acre plus cost of insecticide.

Defoliation was discussed by the group as to when and how it would pay the greatest returns.

The group was shown good northern star cotton on the John Mayo farm in the varieties study. Further study was conducted on the C. R. Keeney farm on 1517 acala cotton.

Domestic demand for agricultural products will probably be high for 1958 because consumer incomes should remain at a high level, and general economic activity should continue strong. Public construction at present is 10% above last year and will probably be higher in 1958. State and local governments will spend more money in 1958. Federal government expenditures will be high, even though there will be some reductions.

We usually tell the faults we see in others because it takes so much less time than it would to tell our own.

Which is the Brand New Suit...  
And which has been Sanitone Dry Cleaned 50 Times?

Here's dramatic proof that repeated quality dry cleanings do not alter look and feel of newness!

No longer need you worry about how often to have your clothes dry cleaned. Do it whenever they are soiled or mussed because ingrained soil and perspiration are hard on clothes — NOT QUALITY DRY CLEANING! The makers of SANITONE ran exhaustive tests to prove this.

One of the identical brand-new suits pictured above, was Sanitone Dry Cleaned 50 (fifty) times and even experts could detect no significant difference between it and the one that was brand new... either in appearance, or in the feel of the fabric. This test has been duplicated with swatches cut from the same bolt of cloth as the suits shown here. We have them on

display, so come in and see for yourself how safe Sanitone Dry Cleaning is for your family's clothes.

In fact, we believe you'll agree that all clothes will stay new-looking longer WITH regular Sanitone Dry Cleaning. Our regular patrons will back that up 100%, too. So why not start today?

By what standards do I judge the people of my community.

The executive board will meet at 7 p. m. and the program will follow immediately. The program will be brief, and the adult education classes will meet after the P-TA meeting.

**Home Demonstration Agent's Column**

By MRS. VIDA KREKLOW

Word bouquets to— Mrs. Russell Heaner and the Womens Society of Christian Service of Eldorado's First Methodist Church for having compiled a terrific cook book called "What's Cookin'?"

It is as if you had the time and facilities for gathering and recording all the good recipes of your friends, not only in our county but from states and counties far away. There is one thing about it—you can just about figure that every recipe in the book will be good. No woman wants everybody in the county making something from her recipe that isn't strictly the best. The next time you think about what to cook that might be a little different, beg, buy or borrow a copy of "What's Cookin'?" You'll be inspired and will find what you are looking for

Another bouquet to—

Mrs. J. B. Montgomery for loving her country well enough to go to the trouble of distributing to the presidents of all Home Demonstration clubs enough copies of "What the Constitution Means to You," for all the 125 club women in the county. Mrs. Montgomery and other DAR members are trying to help us remember where our freedom has come from.

Mrs. T. C. Meador came by the office this morning and brought me a loaf of carrot bread as delicious as it is easy and different. Along with the bread came the recipe which made it very handy for the women in the court house who got tastes (and little taste at that.) It was so good that they wanted the recipe right then and there, and I think that you will want it too.

**Carrot Bread**

2/3 cup Wesson, or other oil  
1 cup sugar; 2 eggs  
Mix these in order given  
1½ cup flour  
1teaspoon soda  
½ teaspoon salt  
1 teaspoon cinnamon  
Sift these together once and add to sugar mixture. Then add 1 cup grated carrots  
2/3 cup nuts and raisins( makes bread good but not necessary.  
Bake in a flour dusted loaf pan at 350 for about 45 minutes. This is delicious eaten hot with butter. Just as good cold. Freezes very well. Can be refrigerated for several days. You don't necessarily have to double this recipe but while you are all geared up, make 3 or 4 loaves. It is not much more trouble and that way maybe you can stay ahead of the eating.

Yesterday, October 9, the group to be members of the upholstery class had their first meeting. Actually this was a re-upholstery training day in that we studied the chairs brought in and checked their conditions. The chairs were stripped to the frame and webbing, springs, padding and the lines of one chair were studied. They were measured for materials needed to re-cover them and when the state of finish of the wood required it, the old finish was removed and new sealer and stain put on.

It's always fun to see a before and after in a piece of furniture which has been restored or a chair which has been re-upholstered.

Skeet Mace has made it possible for us to use the former Cameron show room, so some time drop by and take a look at the "before" chairs. (I've promised the owners of the chairs that no one will ever know to whom the chair belongs; after they are finished I think they will be proud to have them tagged.)

We wish we could invite visitors for it's always so much fun to watch somebody else work; but we simply can't. There will be two women from each club, making 14. Each woman will need space for a pair of saw horses and her chair and this type of work takes room. When we are finished we'll have a "chair fair" and invite everybody to come and see.

Our plan is to work a day or two out of each week and if anybody is interested they can join the sidewalk superintendents and watch through the show windows.

A recent spice test has been run on peptic ulcer patients. The patient didn't know what was in the capsule he took, but three times daily he was given with meals, a selection of spices.

The spices tested included cinnamon, nutmeg, allspice, thyme, sage, paprika, caraway seed, chili pepper, cloves, black pepper, and mustard seed. Symptoms developed in only five patients in this group during the administration of spices; two had trouble with black pepper, one with chili pepper (or as we call it, chili powder) one with nutmeg and one with ground mustard seed.

Only four out of the 11 spices seem to be the offenders. This sounds good for the cinnamon roll and ginger cake lovers who have been holding off because they did not know which spice was doing the damage.

Chocolate covered popcorn balls: Mix one cup sugar, ½ cup water, ½ cup white corn syrup, 3 table-spoons butter or margarine, and 3 squares chocolate (grated), and a pinch of salt. Cook all ingredients to hard ball stage (254 F. on candy thermometer.) Pour over 4 quarts freshly popped corn and mix quickly. Butter hands and shape into balls. Wrap in wax paper.

**Otis Deal Pleased With Heavy Calves and Teavier Muttons**

Otis Deal, stock farmer 22 miles northwest of Eldorado, is pretty well pleased with his production record for the year beginning September 1956 and ending September 1957. When asked what he credited the production to, Otis said "I just gave them some room." Otis is also conscious of the fact that the good rains that fell this spring helped, but he knows too that it takes good grass to make rain count when it does come.

For several years now Otis has been watching his grass and doing some things on the place himself instead of leaving everything to weather conditions. He remarked several times that years ago he ran too many stock on the place and has been paying for it during the past years. After Otis began watching his grasses he began carrying out such conservation practices as deferred grazing, proper use and some rotational grazing. During the past several light rainfall years he has learned to appreciate the value of grass cover on the land. Otis is of the opinion now that we must get water into the ground before it can grow grass.

Continuous dry years almost forced Otis out of the livestock business. Being a cooperater with the local Eldorado - Divide Soil Conservation district he decided to work a little closer to the range management part of his conservation plan. From time to time Otis looked at his rangeland with technicians of the soil conservation service. Grass was discussed as well as range conditions and Otis made some important decisions and began to carry out the above mentioned conservation practices—the following results and accomplishments are encouraging:

In September 1956 Otis bought 163 six year old ewes. He crossed them with black faced bucks and fed them pretty good through the winter as they were old ewes. Even at that he said he lost 10 of them. Otis carried out a little of what he called pasture rotation in that he lambed in a small pasture and as twins were born he separated them and ran them in another pasture. He said he had about 40 sets of twins.

Out of the 153 remaining ewes 8 or 10 of them were dry. Even at this 181 lambs were weaned and sold July 19. The fat lambs were sold at a pay weight of 88½ lbs. The cut-backs were sold two months later, September 19, for the same pay weight of 88½ lbs. These cut-backs were fed a few oats and ran in a field and pasture, Otis said.

The old ewes were cold in July just after taking the lambs off and their pay weight was 118 lbs.

Outside of the above mentioned

old ewes there were 30 ewe lambs on the place. This made a total of 32 animal units of sheep on 2.4 sections.

In addition to the 32 animal units of sheep Otis had 18 cows, 2 heifer yearlings and 1 bull on the place. He produced 18 calves which was a 100 per cent calf crop. Of the 15 calves which were sold, 10 of them were steers and their pay weight was 584 pounds. The other 5 were heifer calves and their pay weight was 495 pounds. Otis remarked that these 15 calves averaged him \$134.00 per head.

During the winter the mother cows of these calves were fed about 100 sacks of cake and less than 300 bales of hay.

This example bears out the fact that when an operator has hay on

the ground and does a small amount of supplemental feeding he will cause them to do better and he isn't feeding them to keep them alive.

Figuring the stocking rate on this place means that Otis ran a total of 56 animals units (cows and sheep) on 2.4 sections. On an animal unit per section basis he ran 24 animal units per section, and with a moderate amount of supplemental feeding produced good heavy lambs and calves.

With a stocking rate somewhere around this number and the condition of his range it is believed Otis can continue to produce good heavy lambs and calves with a minimum amount of supplemental feeding, and his range continue to improve with even 25% less than normal rainfall.

**Electricity does it for only a few cents!**

Electricity is the biggest bargain in your budget—and even more of a bargain today than it was years ago—in fact in homes served by WTU, the average cost of a kilowatt hour of electric service is 20% LESS than it was 10 years ago. Your electric bill may be higher, but that is because electricity is so inexpensive you can afford to use much more of it these days. Don't you think so?

**HOW MANY FOR GOD?**

One-seventh of your time belongs to God, it is "holy to the Lord" (Ex. 31:15). Sunday is not yours to do as you wish. It is a day divinely set aside for worship and spiritual refreshment. It is the Lord's Day.

**Eldorado Ministerial Alliance Thought for the Week**

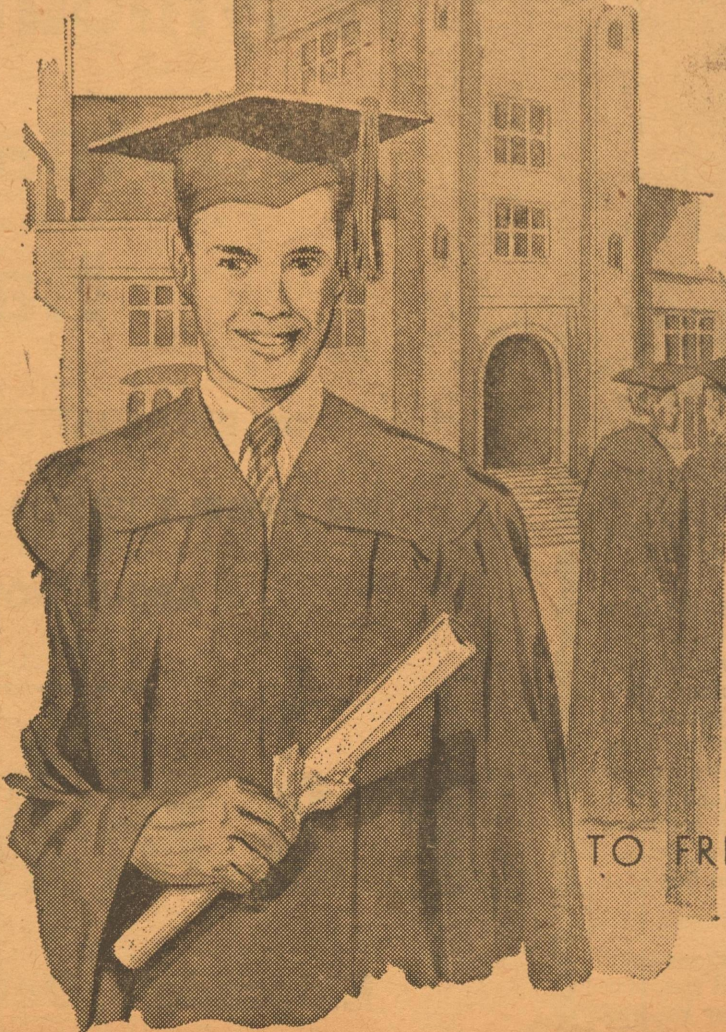

Time is something that man thinks he has plenty of, yet is something that we either use or lose. Many of us seem to lose most of our time because we use our time in endeavors that are not worthy of God's people. Take Sunday for instance. So many people say that this is the only day they can sleep in the morning. Who says or has ever said that any of us were supposed to spend any time in bed other than what is needed for normal rest!

Idleness is not what the creator had in mind when He marked one day out of seven for rest and recreation. It is necessary for men

to labor at least five days a week for food, clothing and shelter or in other words for material benefits. Therefore our Lord bids us to rest (cease) from our material labors and spend at least one day in charging the spirit so that we can renew our material labors with vigor and direction.

Selfish idleness is no fit occupation for man yet this is what many men seem to feel they have the right to do on Sunday. All time is the Lord's and he gives generously of it so that we might earn our daily bread. Is it too much to ask that we give him at least one day each week?—Alanson Brown.

**YOUR HOMETOWN NEWSPAPER IS A STRONG LINK WITH HOME**

From the day your children leave home for the first time—throughout their stay away from home—the local newspaper you send them regularly can be one of their strongest ties with home. An important addition to your letters, it helps them keep astride of changes that occur in their hometown; events that happen to people they know. It can be a source of comfort to them and to parents at home, because by informing them, you interest them and keep them closer to home.
