

# HOOPER SLAPS AT CONGRESSMAN

## Work Of Welfare Board One Of Major Activities Here In 1932

### FIVE PERSONS BURN TO DEATH IN BARSTOW FAMILY REUNION

My congratulations to the first baby born in 1933 are presented with this sketch. If the proud father does not like this caricature of himself, we can plead the fact that at this writing we are not sure which is the first baby.

Note to Dr. Schulkey: Some of your neighbors report that you are a skilled roller-skater, even against hard winds. Take care, however, that you do not break the children's skates, and that you do not fall down and break your ... er ... dignity.

Percy, the office mouse, says he can't sympathize with those citizens who have annual reports to make—he knows we have to look over dozens of reports and draw conclusions from long rows of figures.

Sometimes we think this world needs to go back to the age of cattle grazing and cattle rustling. A rustler is a great deal easier to control than predatory interests of this age.

We know how to bring back prosperity—just start a big war. But war is hell, and paying for war brings up the need for an even stronger word. Instead, restoration of general confidence is the most important way in sight to bring back buying power now latent.

It is impossible to walk about the streets of Pampa very long without getting into a discussion of taxes. The state and especially the available school fund must have more tax sources. One tax source was drastically lowered when the \$3,000 homestead exemption for state levies was passed on favorably by the people. In looking about for new tax sources at the same time it seeks cuts in expenditures, the next legislature will stir up a hornet's nest.

Many new sources are proposed. The most logical of all would be levies on luxuries. But what's one man's luxury is another's necessity, or so it will be argued. Mrs. Ferguson is said to be friendly to raising the ban on boxing, with a stiff tax to be imposed. Friends of horse racing may seek the same means for approval of their sport. There are always many who wish higher taxes on sulphur, in which Texas supplies the world without using much of the mineral.

One tax in particular this writer is eager to see left alone—the gasoline tax. And by leaving it alone we mean just that. We don't want it diverted to any other purpose. Texas already diverts more away from the gasoline tax for highway building than any other state. We gladly pay the gasoline tax when it is used to build good roads. Texas is wisely letting the traffic which

## THREE GUESSES

(ANSWERS ON PAGE 2)

## GASOLINE IS THROWN INTO HEATED STOVE

### HOUSE SHOWERED WITH FLAMES DURING EXPLOSION

## CHILDREN BURN IN BED

### TWO FAMILIES GROUPED AROUND STOVE WHILE 'RADIOING'

BARSTOW, Jan. 3. (P)—Five persons were burned to death in a fire yesterday which destroyed the home of Walter Hood, tenant farmer, three miles north of here. Three others were believed dying as a result of burns.

The fire was caused by gasoline thrown into a heated stove.

The dead:

Walter Hood, 40, tenant on the Charles E. Nichols farm.

Three children of Mr. and Mrs. Walter Hood, aged 2, 4, and 6 years, all girls.

The 2-year-old baby of Mr. and Mrs. Jack Hood.

Injured and in the camp hospital at Pecos, N. M., are:

Mrs. Walter Hood.

Mr. and Mrs. Jack Hood.

The three are expected to die.

Two sons of Mr. and Mrs. Walter Hood escaped uninjured from the blazing building.

Survivors said the gas was thrown into the stove after the fire had died down. They said they frequently used gasoline to revive the fire in the stove.

Jack Hood and his family were visiting his brother, Walter.

Listening to Radio.

Warren Hood, 6, son of Mr. and Mrs. Walter Hood, gave a confused and frightened version of the tragedy.

He said that both families had gathered about a stove to listen to the radio. The fire had died down, Walter Hood reached for a can of kerosene and threw the oil on the fire, the can exploding and showering the house with flames.

The parents were unable to move and the children were too frightened to do more than scream. By the time help arrived, all had been burned. Three children were burned to death as they slept.

The two families had assembled for a New Year's reunion. They lived in a frame tenant farm house.

## Police Arrest 63 Less During Previous Month

There are statistical indications that Pampa is becoming safer, saner, and better behaved.

Arrests by the city officers declined in number from 157 in November to 94 in December. Holiday celebrating was of a type which did not end up in police court. Arrests included 15 for vagrancy, 32 for intoxication, 7 for disturbing the peace, 1 for speeding, 29 for other traffic violations, and 10 for investigation.

Twenty-eight cases were dismissed. Fines assessed totaled \$559.50, but collections were \$357.25. Prisoners worked 59 days and served 88 days in jail. Five persons were turned over to the county on felony complaints.

Decision of the city to keep offenders in jail the full time of their sentences, to give smaller credit for "laying out," coupled with cold weather which made working out fines disagreeable, tended to discourage offenses against the peace and dignity of the city.

## I SAW--

Some business and professional men who started off the New Year with new office girls.

A rather worried look on Coach Odus Mitchell's face. This time it's the grades of his basketball team. It looks now as if some of the boys are going to be ineligible just when they'll be needed most.

## COUNTY FARM AGENT ASSISTED RESIDENTS TO WEATHER BLEAK PERIODS ON FARM DURING 1932

### Thomas Introduces New Methods of Beef-Canning

Demonstrations of means to conserve food and otherwise to enable farm residents of Gray county to weather the period of low prices for farm products required a great amount of time of the county agent in 1932. It is shown in the annual report of Ralph Thomas.

Mr. Thomas called attention to valued assistance rendered by the Board of City Development, civic clubs, and newspapers of the county. He had the cooperation of teachers of vocational agriculture and of the home demonstration agent. School officials and the county superintendent also were praised for their help.

The report shows that there are six organized boys' 4-H clubs in the county—at Back, Webb, Alameda, Eldridge, Hopkins, and Grandview—with an enrollment of 63 members.

There also is a county-wide club of 15 members who do not live near the other clubs. Seven boys and one girl showed calves at the Amarillo baby beef show and won \$88 in prize money. Jim Farley of Groom had the grand champion of the show. Andrew Wilson of McLean entered a senior calf which took third place. Betty Farley won the title of county livestock champion. Gray county calves taken to the Kansas City Livestock show were in the money and took higher places than expected.

At present 16 boys are being fed by twelve club boys and girls for the spring show in Amarillo. Livestock men of this area have cooperated with the boys and assisted them in feeding methods and transporting of the stock to the various shows. A camp for the club boys was a popular feature of the year. Three boys attended the short course at A. & M. The lads showed much ability also in cotton growing, making of reports and keepings records, and in making their operations businesslike. Seed provided by the state and the B. C. D. was planted in demonstration fields.

During 1932, 2,220 acres of land was terraced on the county, most of it under the supervision of Mr. Thomas. This work centered in the Eldridge, Alameda, and McLean communities. Even where terraces broke, the farmers did not have to re-plant. Several farmers said, after the terracing was tried, that they would not try to farm more than they could terrace. Wheat lands suffered from drought, excessive moisture in June, and hail. The low price of the crop provided difficulty for the farmers who had intended to terrace but could not.

Much Slaughtering

There were seven beef slaughtering and 28 beef cutting demonstrations, 6 pork slaughtering and 9 pork cutting and curing demonstrations in 16 communities of the county. More than 500 persons attended these 50 demonstrations. Latest methods of cutting and curing were shown Miss Ruby

(See COUNTY, Page 6.)

## Table Catches Fire From Gas Stove in Store

What might have been a serious conflagration was averted by H. A. "Dad" Shannon, night watchman, when he discovered fire in the Kraft's Meat store at 4 o'clock this morning while making his rounds. He immediately called the fire department.

After breaking in the front door, the firemen discovered the blaze which was extinguished without the use of water or chemical. A gas stove which had been left burning to keep the store warm had ignited a nearby table which was burning when the firemen arrived. The gas was turned out and the table removed.

The building was full of smoke which was soon cleared by opening doors and turning on fans. Chief Clyde Gold had not estimated the great loss, but announced it slightly if any.

The chief is of the opinion that the gas pressure increased during the night and the flames got above the stove.

## SLAIN WIFE

Mrs. Ruth Steers, 26, above, employee of the Cleveland Society for the Blind, was the victim of a brutal murderer who left her bullet-pierced body, bound and blindfolded, in the auto she had been driving. Police, almost without a clue, sought a former employee who had been discharged and who, they felt, might have harbored a grudge.

## FIRE LOSS IN PAMPA IN 1932 UNUSUALLY LOW

### Lower Insurance Will Result From Record

Pampa's fire credits will be boosted as the result of an unusually good fire loss record for 1932.

Losses calculated as of 1932 totaled \$8,840 within the city limits, and of this only \$8,048.86 was included in insurance losses. The losses in 1931, which included some fires on which insurance losses were not incurred until that year although the losses were in 1930, totaled \$58,960.16. The report of Clyde Gold, fire marshal, shows a decrease of \$50,113.30 over 1931.

Last year there were 86 answered alarms. Some of these were for fires outside the city limits. Eight persons were injured and 3

(See FIRE LOSS, Page 5.)

## WOMEN OF CHURCH TO MERELY SIT AND EAT

Women of the Presbyterian church will be guests of men of the church in the dining hall tonight at 7 o'clock.

Committees of men were busy today arranging for all details of the dinner and program. The men will cook and serve the meal and presumably wash the dishes.

## BOTH CHINESE AND JAPS CLAIM VICTORY IN BATTLE AT WALLED CITY ON BORDER

### Japanese Report Capture of City; Chinese State They Are Holding Garrison.

By The Associated Press. Conflicting accounts told today of hostilities between Japanese troops and the Chinese garrison of the walled city of Shanhaikwan.

From Tokyo, reports to the Renzo news agency told of the capture of the city, which is within the great wall of China, by Japanese and the retirement of the Chinese defenders to Chinwangtao 10 miles away.

Chinese sources in both Nanking and Peking contradicted these re-

## REPORT SHOWS 4957 PERSONS RECEIVED AID

### PROVIDING FOR NEEDY FIRST CONCERN OF COMMUNITY

## WORKER STAYED BUSY

### MRS. DAVIS REVEALS SURPRISING NATURE OF SERVICES

The huge scope of the Pampa Welfare Board through 1932 was revealed in the report presented board members in session this morning. The amount of aid rendered and the work done by Mrs. W. H. Davis and her assistant, Miss Dorothy Mullen, was a surprise, even to the board members.

More than \$5,000 in cash was handled and disbursed during the year to thousands of people. Thousands of pieces of clothing were distributed and many sick persons were cared for. Mrs. Davis was on call day and night and many times she was called in the middle of the night to get a physician for one of the families on her list or to send someone to the hospital.

During the year, 1,099 families received aid through the welfare board. The individuals numbered 4,957 and besides that number 315 non-family persons were given aid. Sixteen babies were born to families dependent on the board. Three babies were placed in good homes through adoption. Thirteen layettes were furnished.

The management of the Welfare Board handled the Red Cross flow 23,837 pounds of which was distributed. Garments distributed included 1,992 government garments, 2,443 used garments, and 557 pairs of shoes, 250 pairs being new.

A girl who attempted to commit suicide was placed in a hospital and cared for until her parents arrived. A mentally deranged girl was taken to an insane asylum in another city. A deaf and dumb boy was placed in the state school.

Care of the needy during illness was one of the big features of the year's work. The board arranged for 150 doctor calls and sent 23 urgent cases to hospitals.

Groceries Biggest Item. Receipts for the year were received through a drive and donations. The federal relief program placed some money in the funds, absolute relief cases being handled through the Welfare Board by appointment.

Disbursement included the expenditure of \$2,488.70 for groceries. The telephone and telephone bills for the past year amounted to \$140. Most of the calls were made during investigation of persons claiming to be destitute and also claiming to be eligible for help in Pampa. The

(See REPORT, Page 6.)

## WHISKY IS SIEZED

City officers yesterday made a raid and seized half a gallon of very green whisky in a jar. Justice W. S. Baxter issued a warrant for the arrest of a man in connection with the case, but arrest was delayed pending improvement in the physical condition of the accused.

Joe Kahl, former Pampa boy, left yesterday for Tulsa university, Tulsa, after vacationing here.

## EMERGENCY FARM RELIEF BILL TO FIX MINIMUM WHEAT PRICE INTRODUCED IN HOUSE BY JONES

### Consideration To Be Given Thursday On Measure

WASHINGTON, Jan. 3. (P)—Chairman Jones today introduced the emergency farm relief bill prepared by the house agriculture committee to establish minimum prices on wheat, cotton, tobacco and hogs.

The bill was introduced shortly before a meeting of the committee to act finally on the measure.

"I will ask the rules committee tomorrow for a resolution to give the bill a privileged status so that we can proceed with its consideration Thursdays," Jones said.

Speaker Garner said he thought it best not to limit discussion but to permit the house to debate the bill freely.

Garner said it might be possible to reach a final vote this week.

## Every Jaysee to Be Given Tasks; Name Alternates

Every active member of the Junior chamber of commerce will be given work in some kind of public service, it was announced today by President W. T. Fraser at luncheon.

Members were asked to signify on which of the numerous committees they would rather be placed. Alternate directors were elected as follows: Bob Fuller, Dr. R. M. Johnson, Harry Walker, E. M. Conley, and Dr. M. C. Overton.

Short talks on New Year resolutions and other subjects were made today by W. V. Murry, E. P. Ritchie, Clyde Gold, Marvin Lewis, Murray Freundlich, E. M. Conley, Harry E. Hoare, and Capt. Clyde Hollingsworth of the Salvation Army. Chief Gold told of the good work of citizens in reducing fire losses to about \$8,000 in 1932, with a resulting saving of \$10,000 or more in premiums for 1933.

## N. J. Mitchell Office Deputy Of New Sheriff

New faces in the courthouse were becoming more familiar to the "gang" of regular visitors today. Sheriff C. E. Pipes and Deputies E. C. Stark, R. B. Stout, and N. J. Mitchell were on duty, with Deputy Stark serving as bailiff in 14th district court. Deputy Mitchell a peace officer of 14 years experience, is office deputy in charge of records and the complex fee system. He has been in the city about a year, but has been here at intervals for many years.

Miss Mabel Davis remained in the office of the county treasurer today, but D. R. Henry, treasurer-elect, was expected to qualify for the office during the day. A new courthouse inhabitant is County Judge C. E. Cary, who is occupying the quarters previously unoccupied adjacent to the library used by the county attorney.

The county commissioners planned to meet during the day and swear in deputy clerks who have been retained without change.

## ESCAPES THUS

Costume meant little to Alfred Davis (above) who suddenly decided he disliked the Industrial Home school at Washington, D. C. Clad only in night garments he slipped away for a couple of miles—through woods and creeks—until finally he was caught and returned by a policeman.

## PLAN TO MOVE LIBRARY GIVEN CITY APPROVAL

### No Funds Available To Partition Basement

Pampa's public library, enjoying steadily increasing patronage, must have more room within the near future.

Last night the city commission approved a proposal that the library occupy a portion of the southeast part of the basement, but found no funds available for partitioning and building shelves. An estimate of the funds needed for materials will be made soon and the discussion of the problem continued.

In December the library had 1,603 patrons. A total of 3,996 books were checked out. Forty-eight books were catalogued and 33 were mended. Some fines were worked out and some were paid in cash. Forty-one books were overdue. Mrs. James Todd Jr., the librarian, wrote 21 letters to patrons.

WEST TEXAS: Partly cloudy tonight and Wednesday; warmer tonight except in southwest portion; colder in the Panhandle Wednesday.

—AND A SMILE

OMAHA, Neb.—Desk Sergeants silently showed over the record book and let Guisayco Grungeter, a zealous, who said he came from Boston, write his name in the book himself when he was arrested on charges of vagrancy.

## LEADERS ARE CRITICIZED FOR INTERFERENCE

### 'KEEP HANDS OFF' IS TOLD DEMOCRATS BY PRESIDENT

## REGROUPING ADVOCATED

### DEMOCRATIC PLANS, 'A BACKWARD STEP' HE AVERS

WASHINGTON, Jan. 3. (P)—President Hoover today hit out at congressional opposition to his plans for regrouping governmental agencies, saying in a statement that unless congress "keeps its hands off now or" gives larger powers to President-elect Roosevelt, any reorganization will be "merely make believe."

Calling in newspapermen for his first press conference since September 13, Mr. Hoover said he considered "the proposals of democratic leaders in congress to stop the reorganization" to be "a backward step."

The chief executive added that he believed proposals on capitol hill "to transfer the job of reorganization to my successor" were simply "a device" by which his plans could be defeated.

Proposed Regrouping. The president recently sent a special message to congress proposing regrouping of more than 50 federal agencies and commissions into nine divisions, along with the abolition of some.

He advocated a central division of public works, consolidation of merchant marine activities, a reorganized public health division and other changes.

The text of the president's statement follows:

"The proposals of democratic leaders in congress to stop the reorganization of government functions which I have made is a backward step. The same opposition has arisen which has defeated every effort at reorganization for 25 years."

"The chairman of one house committee discloses: 'Many members of the administration itself opposed Mr. Hoover's plan,' but that he had not called them to testify because 'the saw no reason to embarrass them.' He could add that outside groups, congressional committees and members of congress fear a reduction of influence in the administration of these functions."

Defeat Forecast. "The proposal to transfer the job of reorganization to my successor is simply a device by which it is hoped that these proposals can be defeated. Statements that I have made over ten years as to the opposition which has always thwarted reorganization have come true."

"No private business and no other government would tolerate the division of its construction work into over 20 authorities in 12 different departments and establishments, as is the case of our government. It is only by considering that duplication and waste of a multitude of offices and officials can be eliminated. It is the only way that the public can know what is going on in this branch of government. They can only be brought under the limelight if they are concentrated in one place."

Make-Believe. "No other government and no good government would tolerate merchant marine activities separated over 7 departments or independent establishments. The same can be said as to public health, education, land utilization, etc. Altogether I have directed that 58 boards, commission and bureau

(See LEADER, Page 5.)

## I HEARD--

Al Doucette say he was a human being again this morning after holding office in Gray county for the last 20 years. "Al" was tax assessor for six years and county surveyor for the last 14 years.

Harry Walker, technician at the Pampa hospital, trying to convince Dr. W. Purviance and Mrs. Jimmie Wheeler that Technocracy was just a steal from a technician's work and that Pampa had a couple of such prominent citizens.

## MORE WAYS OF KILLING CAT

Some of us in Moore county are doing most of our worrying these days over such matters as the moisture for next season's wheat crop, or the present status of the cattle and hog market, or where the next meal is coming from. It is well that we should consider these things, for they mean our very existence.

At the same time we should not and must not overlook the matters of government and proposals of government that are likely to affect us indirectly as much or more than these matters which seem to be of immediate consequence to our ways of living.

As is generally known the next season of the Texas legislature will be confronted with the proposition of diverting the gasoline tax into other channels. They tell us that this act will, if it is accomplished, be only for the time being and only as an emergency measure. The Moore County NEWS has repeatedly pointed out and will continue to point out the fact that diversion of the gasoline tax into other channels is an atrocity against the car owners of Texas. That gasoline tax money either belongs on the highways of Texas or in the pockets of those who pay it!

But the advocates of the diversion scheme are not so dumb. They know too well perhaps, that there are more ways than one of killing a cat.

It so happens that the "economy" committee of the house will recommend radical and drastic changes in our educational system. Particularly in the institutions of higher learning. They propose to cripple Texas Tech and abolish the Canyon Teachers College. This proposition will naturally arouse the ire of all of West Texas.

And when West Texas protests, the suave gentlemen will say, "Very well you can have your schools. But you must choose between your schools and your roads. Permit us to divert the gas tax and you get your schools. Keep on trying to build your roads and your schools will be abandoned. Their walls will crumble and decay, and your children will grow up in ignorance." And that makes a pretty story.

On its face it is very simple—a choice between our schools and our roads. But a bigger falsehood was never born in the minds of men. West Texas—in either case or both—is to be the goat. If we lose our schools or lose our roads, or lose both, we are the chumps. The shock absorber, if you please, of the conniving politicians.

It is not necessary to close the schools of Texas. Nor is it necessary to stop the construction of highways in Texas—and particularly in West Texas. Do not be misled. There is not now and there will not be a choice between good roads and good schools.

It is necessary that the citizens of West Texas and the Panhandle keep their eyes and ears focused on the legislative halls at Austin for the next three or four months. It is necessary that West Texas be ready at a moment's notice to rise in a body and protect our inherent rights.

WEST TEXAS—SEE THAT YOU ARE NOT BETRAYED—Moore County NEWS.

The run of books is growing cleaner and they're brushing up plays and movies, but pear gray fedoras keep on getting smutty in spite of everything.

## — THIS CURIOUS WORLD —

### ENOS A. MILLS,

FAMOUS NATURALIST, SPENT HIS LIFE IN THE WILDEST MOUNTAINS OF COLORADO, AMONG GRIZZLY BEARS AND OTHER WILD ANIMALS. HE SUCCESSFULLY DODGED LANDSLIDES, AND ONCE CLIMBED DOWN THE DANGEROUS WALLS OF A STEEP MOUNTAIN, ALTHOUGH SNOWBLIND! THEN, IN 1922, HE VISITED NEW YORK CITY, ONLY TO BE FATALLY INJURED IN A SUBWAY ACCIDENT!

**CROCODILES**  
CAUSE A LARGER LOSS OF LIFE IN AFRICA THAN ALL OTHER ANIMALS COMBINED.

THE SIGNATURE OF BOB LYLE, BILOXI, MISS.

CROCODILES are found in almost every lake and stream of Africa that is of suitable depth and temperature. Although the natives wear special charms to protect them from crocodiles, the death toll from this source is nevertheless an appalling one. The casualties are greatest among women and children. In spite of full knowledge of the reputation of the crocodile, the natives continue to bathe in the infested streams, as if they had never heard of the man-eaters.

# HUGE INTEREST-BEARING DEBT OF THIS NATION CLAIMED TOO HEAVY FOR FUTURE

Lack of Proportionate Increase in Profits and Employment Are Cited.

EDITOR'S NOTE: This is the fourth of six articles giving a new insight into Technocracy whose prediction of possible economic collapse started a far-flung controversy. The articles also present other statistics pertaining to displacement of men by machines, energy consumption, debts, and other points involved.

By J. R. BRACKETT.  
(Copyright, 1932, by The Associated Press.)

NEW YORK (AP)—Debt, says Technocracy, is crushing the life out of the economic system burdening the machine so that it cannot produce to the full, giving dictatorial power to the bankers—"debt merchants," as Technocracy calls them. Debt is overwhelming, Technocracy holds because it increases almost constantly and thus requires the nation to pay an ever-growing burden of interest, while, in the meantime and as at present, profits do not increase proportionately. Debts are "fixed charges," varying little, while income goes up and down violently.

Technocracy, a group of engineers at Columbia university working under the direction of Howard Scott, is delving into the effect of the machine on the present economic system. Its findings have led Scott to predict the existing structure of the nation under drastic changes are made in the methods of control.

Debt Base of Price System. Debt is a major aspect of Technocracy's theories, perhaps the major aspect, because debt is the base of the price system, and the price system is the general name given this and any other political entity which uses a commodity—gold in this instance—as a measure of wealth, and which seeks to produce for profit instead of for use.

Technocracy estimates that the total of interest-bearing debt—mortgages, bank loans, bonds, and so on—in the U. S. is about \$218,000,000,000; that the fixed charge on this debt is equal to more than half the nation's present income; and that this debt has been increasing faster than production.

Other Statistics Differ. Other statistics do not exactly agree, however. Computations by Dr. Ragnar D. Naess, director of research for Goldman Sachs Trading Corp., show that total interest-bearing debt in the United States in 1931 was \$156,615,000,000; that it was \$160,528,000,000 in 1930; \$161,448,000,000 in 1929; and \$159,130,000,000 in 1928. These figures com-

Is the nation's interest-bearing debt a burden which the present social system cannot carry? Technocracy, estimating the debt as \$218,000,000,000, says debt is a major factor which will force drastic changes in existing methods because it is frustrating mechanical advance.

pare with Technocracy's only published figure of \$218,000,000,000. Dr. Naess says this debt is a crushing burden but he doubts that it should be given the stress laid on it by Scott.

Debt increased about 38 per cent between 1923 and 1931.

Statistics of the National Bureau of Economic research for the years 1922-1929 show that physical volume of all production increased about 34 per cent. Such figures are not fully comparable but serve to indicate the difference in the amount of change.

Since the depression started, production has declined considerably more than debt, but this always is true in depression. Dr. Naess points out that large amounts of debt are defaulted in depressions, and that such is certain to be the case in this one.

This check, Dr. Naess believes, is more or less automatic, and while such defaults or other means of reducing the debt become more diffi-

cult as a society ages, it is impossible to say that debt alone or even primarily would be responsible for a system's collapse—because it can be and is in fact reduced. It is rigid, Dr. Naess says, but not quite so rigid as Technocracy holds.

Dr. Naess calculates that 9.34 per cent of the national income went for the paying of interest on the total debt in 1923; that it was 10.72 per cent in 1925; 11.62 per cent in 1929; 18 per cent in 1931, and probably between 23 and 24 per cent in 1932. This compares with Technocracy's assertion that half the national incomes goes for the debt's fixed charges.

(Tomorrow—Machines and Man Hours.)

## COTTON STATISTICS

There were 4,833 bales of cotton, counting round as half bales, ginned in Gray county from the crop of 1932 prior to December 13, 1932, as compared with 6,214 bales ginned to December 13, 1931.

# the WORLD of STAMPS

By QUINTON JAMES

Commemorating the seventy-fifth anniversary of the introduction of postage stamps by Roumania, the postoffice is issuing a 1933 series of eight stamps ranging from 25 bani to 16 lei. Only 200,000 of each are being printed.

All the backgrounds are white, and none but the 16 lei is perforated.

The 25 bani, black, rectangular, has the wild-ox design of the original 1888 stamp. The one lei, round,

violet, shows the lion-bridge design, formerly found on Roumanian coins. The 2 lei, green, round, carries the former coat of arms.

The 3 lei, round, red, has an eagle and castle design. The 6 lei, octagonal, wine-colored, shows the modern coat of arms. The 7.50 lei, round, light-blue, has the spread eagle of early coins. The 10 lei, round, dark-blue, carries the wild-ox design. The 16 lei, light green, similar to the 1903 issue commemorating the opening of the new postoffice, shows a mail coach leaving the postoffice.

Roumania also has issued three welfare stamps, with a face value of 4, 6, and 10 lei, plus an additional charge in each case of 1 lei, for the benefit of the tuberculosis sanatorium for postal employees.

## Fruitful Russia.

A 50 kopek stamp has been issued by Russia to commemorate the tenth anniversary of the MOPR (International Society for the aid of political prisoners). Printed in red, it shows a worker breaking into a jail to release prisoners, whose manacles hands are stretched out.

Russia, prolific issuer, also has put out stamps in honor of the fifteenth anniversary of the revolution.

The 3k, deep violet, shows Lenin addressing the workers from the top of an armored car on his re-

turn from Switzerland in 1917; the 5k, dark brown, the capture of the Winter Palace; the 15k, dark green, a modern harvesting scene, and the 35k, slate brown, an allegorical scene representing the oppressed looking to the U. S. S. R. with the handwriting "Lenin" in the sky.

## THE RED CROSS LEADS

More nations have honored the service of the Red Cross than they have any other relief organization. From the time of the world war until the present, some country has put out an issue to aid this international "Great Mother." The Red Cross did not benefit financially from the 2-cent fiftieth anniversary Red Cross stamp issued by the United States in 1931 but our nation has since given far more in the form of wheat and cotton from the farm relief board. REV A. A. HYDE.

## Worrell Makes 184 Health Inspections

The report of D. R. T. J. Worrell, assistant city health officer, showed 184 inspections for December.

These included 23 of restaurants, 24 of meat markets and slaughter houses, 4 of bake shops, 9 of soda fountains, 2 of water samples, 9 of milk samples, 1 food analysis, 72 tuberculosis tests, 23 abortion tests of cattle, 8 of dairy plants and 1 of a dairy farm. One contagious disease was quarantined.

The city's health was good, although there was a seasonal increase of colds, influenza, and pneumonia.

## Strange 'Varmint' Has Forked Tail

"What sort of a varmint is this?" The NEWS is in possession of some kind of a lizard that needs identifying. The reptile, found yesterday afternoon near Boyer by Walter Dempster, employee of the Humble Pipeline company, has two tails, one on top of the other, and scales somewhat similar to those on a fish.

It is six inches long and of a greenish-gray color on the top, with a light green stomach. The pronged tails are one and one-half inches long. It was dug out of the ground at a depth of about two feet. Five small, long toes with sharp claws extend from short legs.

Mr. Dempster left his find at The NEWS for identification.

## Water Consumption Steadily Declines

Consumption of city water remains at the lowest seasonal levels. The city department pumped 16,230,000 gallons in December, or a daily average of 523,550 gallons.

Breakage of a water main and accidental breaking a fire plug caused heavy losses of water on two occasions. Pumping has steadily declined since the summer lawn rate was terminated.

December consumption, probably because of holiday occasions and visiting, increased somewhat over November.

Misses Mary Evelyn Herbert and Georgiana Mager of Amarillo, who have been visiting Mrs. Beulah Robinson, have returned home.

## ANSWERS

LIBERTY BELL cracked while tolling the death of Chief Justice John Marshall of the U. S. supreme court in 1835. The animal shown is a LYNX. The PILGRIMS landed at PROVINCETOWN and CLARK'S ISLAND before landing on PLYMOUTH ROCK.

## Kidneys trouble you?

Heed Promptly Kidney and Bladder Irregularities

Are you bothered with bladder irregularities, getting up at night and nagging backache? Heed promptly these symptoms. They may warn of some disordered kidney or bladder condition. Users everywhere rely on Doan's Pills. Praised for 50 years the country over. Sold by all druggists.

When I like something I evermore like it!

THEY'RE Milder—  
THEY TASTE BETTER

—and I like CHESTERFIELD Cigarettes. To me, they are mild—that is, they don't seem to be strong; and there is certainly no bite, so far as I can tell. To me, they taste better and they have a pleasing aroma.

Every CHESTERFIELD that I get is well-filled, and I feel like I am getting my money's worth—that there is no short measure about it. I like CHESTERFIELDS. They satisfy me.

# Murfee's INC.

PAMPA'S LEADING DEPARTMENT STORE

# JANUARY BARGAIN PARTY SET FOR FRIDAY NIGHT

## ALL WOMEN'S CLUBS ARE TO AID IN EVENT

ABOUT FIFTY PRIZES WILL BE GIVEN PLAYERS

Every one who enjoys an evening of fun is invited to attend a January Bargain party at 8 o'clock Friday evening in the club room at the city hall.

The date was set and plans for the event made at a meeting of the club room furnishing committee, of which Mrs. J. M. Dodson is chairman, yesterday afternoon. All women's clubs in Pampa are co-operating to make the event a success, and money will be used to furnish the club room. Another meeting will be held Thursday afternoon at 4 o'clock to complete arrangements.

Guests may play whatever table game they choose. About 50 prizes will be given during the evening. Among other things they include prizes for high score among both men and women for every game played. Thirty-two decks of cards for the evening have been furnished by the Panhandle Insurance company, and various merchants are contributing the prizes. The Little Theater, the A. A. U. W., and the following clubs are sponsoring the event: Business and Professional Women's, Treble Clef, Civic Culture, Arno Art, Child Study, Twentieth Century, Junior Twentieth Century, Twentieth Century Culture, and El Progresso. Price of admission will be 49 cents.

## Mrs. Saunders Is Hostess at Dinner

Mrs. L. O. Saunders, Mary Ellen street, entertained her nephews and families Sunday at a New Year dinner.

Guests were Mr. and Mrs. Walter Davis, Mr. and Mrs. Lester Davis and daughters, Barbara, Joan, and Phyllis, and Mr. and Mrs. Clem Davis of LeFors.

## Most Children Are Well After "Flu"

There is still a small amount of "flu" among school children of Pampa, it was announced from the superintendent's office. Most of the "flu" victims have recovered, however, and are back at school. Absentee figures for yesterday follow: High school, 38; Junior high, 34; Baker, 61; Woodrow Wilson, 8; Horace Mann, 33; Sam Houston, 30.

Roy Horstmann, brother of the famous Harold Horstmann of Purdue football fame, will be eligible for the varsity next year.

## QUIVERING NERVES

Yield to Lydia E. Pinkham's Vegetable Compound

When you are just on edge... when you can't stand the children's noise... when everything is a burden... when you are irritable and blue... try this medicine. 98 out of 100 women report benefit.

It will give you just the extra energy you need. Life will seem worth living again.

## Mother Honored by College

A Distinguished Mother and her three Distinguished Sons. Mrs. Otella Compton and, top to bottom, Karl, Arthur and Wilson Compton.

## FLAVOR SHOULD BE CONSERVED IN ALL MEATS

DENTON, Jan. 3.—Meat is a food which is almost universally used and liked. It is eaten primarily for its lean content, though its palatability is influenced by marbling, or the depositing of fat within the lean tissues.

One of the chief problems in the cooking of meat is to prepare it in such a way as to retain as much of the natural flavor as possible. The flavor is found in the juices within the muscles. To retain the juice the meat is seared at a high temperature; a small amount of the fat from the meat can be used to sear it.

Meat may be prepared in many ways. To add variety to the menu and at the same time practice economy, use some of the tougher and more unusual cuts. The various organs of the animal may be used and delicious as well as nutritious dishes prepared.

## MENUS

Breakfast: Oranges, bacon, toast, coffee, milk.

Lunch: Brain oysters, potato puffs, spinach, popovers, preserves, and milk.

Dinner: Spanish steak, rice, turnips, bread, butter, and baked apples.

Breakfast: Cream of wheat with dates, scrambled eggs, muffins, coffee, and milk.

Lunch: Cream of pea soup, combination salad, rolls, butter, chocolate, and vanilla wafers.

Dinner: Rolled flank steak, baked potatoes, carrots, bread, butter, and moulded fruit salad.

## RECIPES

Spanish Steak: 2 lbs. beef steak, 1/2 cup flour, 2 T. fat, few slices onion, salt, pepper, one-half green pepper chopped, 1 cup boiling water, 1 cup canned tomatoes.

Add salt and pepper to flour and pound into meat, using edge of plate or wooden potato masher. Heat the fat and sear the meat in it. Remove to casserole, add onion, green pepper, water, tomatoes and cook at 350 degree F. until tender.

Rolls: One and one-half pounds flank steak, one-half cup flour, salt, pepper, 2 cups corn bread crumbs, 1 egg, onion, 2 stalks of chopped celery, seasoning. Make a dressing of the cornbread, egg, onion, celery and seasoning. Trim steak and dredge with flour, pound all the while. Sprinkle both sides with salt and pepper. Cover with water and cook for about 3 hours.

Braised Oysters: 1 brain, 2 eggs, 1 T. milk, salt, corn meal, parsley.

After the brain has been partitioned, separate into pieces about the size of large oysters. Dip in slightly beaten egg, to which 1 T. of milk has been added and then roll in seasoned crumbs. Fry in deep fat, serve garnished with sprigs of parsley.

Baked Liver: 2 lbs. of liver in one piece, one-half T. salt, 1 medium onion, 4 strips of bacon. Soak liver in cold salted water for 30 minutes, or until the blood is removed.

Take off outside skin, if it is tough. Place in covered roasting pan. Salt and cover with slices of onion and strips of bacon. Bake in a moderate oven until the liver is done. Allow about 30 minutes per pound for baking.

## CARD OF THANKS

We wish to express our sincere appreciation to all of our friends for kindnesses shown following the death of our relative, Mrs. M. I. Goodfellow.

Mr. and Mrs. Charles C. Cook and family.

Mr. and Mrs. H. D. Bull.

## NEA Service

WOOSTER, O., Jan. 3.—"Motherhood is its own career. None is superior to it. It is woman's greatest privilege, responsibility and challenge."

These are the words of Mrs. Otella Compton, 74, Distinguished Mother. This is her comment to women who seek to mix career and motherhood, to those who choose a career other than motherhood.

Mrs. Compton is the proud holder of an honorary degree of Doctor of Laws.

The degree was not awarded to her because she was not learned in law, nor because of any gift to a university building fund. She got it because she is the mother of three distinguished sons and a splendid daughter. She got it because one college, at least, believed that a distinguished career as a mother merited its honors.

It was a far step taken by Western College for Women headed by President Ralph K. Hickok, when it said to a woman: "You have given useful children to the nation. We want to honor you for it."

MRS. COMPTON is the wife of Prof. Elias Compton, for 40 years and more a member of the faculty of Wooster college, and for several years its dean. From the little mid-Ohio college town she sent into the world three sons and a daughter. And the years of careful sympathetic training bore fruit.

Karl T. Compton was for a long time professor of physics at Princeton, and now for a number of years has been president of Massachusetts Institute of Technology, by many considered the premier scientific school of the country.

Arthur H. Compton, the second son, became professor of physics at the University of Chicago, and a few years ago won the Nobel prize in physics. His debate with Dr. Millikan of Chicago on the nature of cosmic rays was the outstanding feature of the recent meeting of the American Association for the Advancement of Science.

The third son, Wilson Compton, became an outstanding lawyer and economist in Washington, D. C. The daughter became the wife of Charles H. Rice of Ewing College, Aallahabad, India.

SURELY any mother might be proud of such a record. But too often the sacrifices and the painstaking work of such mothers goes unrecognized in the world at large.

Mrs. Compton's did not. She happens to be a graduate of Western college at Oxford, Ohio. It was 46 years ago that she was a student there, in days when women students in college were not so common as they are today.

"It took me 10 years to work my way through college since my family fortunes were swept away in the inflation period following the Civil War," she recalls. "But I never had any other thought than to finish and secure my degree, no matter how long it took."

"That's how I felt about raising my family. I felt nothing was too hard, or too much of a sacrifice to achieve the kind of children I wanted to send out into the world."

WESTERN COLLEGE felt such service should be recognized. And this winter it conferred the degree of Doctor of Laws on Mrs. Compton, to mark its pride in Mrs. Compton's rich achievements as a wife, a mother, a friend of youth, a servant of the church.

The address of the day was delivered by Arthur Compton, and her family joined with her alma mater in honoring a mother.

Mrs. Compton feels that rearing splendid children is a job in itself. "I didn't have time for many things outside the home when they were little," she says. "I was un-

## Fort Russell Abandoned By First Cavalry

MARFA, Jan. 3.—The veteran first cavalry was on its way today to Camp Knox, Ky., to be reorganized into a motorized unit.

Leaving Fort D. A. Russell here yesterday, a motor convoy of 65 trucks and automobiles bearing personnel and equipment started the long trek across country.

The regiment was scheduled to halt last night at Dryden, 95 miles from Marfa. Today it expected to reach Fort Clark, another old border post.

About 400 enlisted men and five officers of the first cavalry were making the trip.

Before breaking camp they first destroyed a quantity of old blankets, mattresses and other wearing apparel that was considered unfit for further service.

## PERSONALS

Mrs. M. C. Doss of White Deer was a Pampa shopper yesterday.

Charles N. White of LeFors transacted business here this morning.

Earl Johnson of White Deer was a Pampa visitor last night.

John Osborne spent the weekend with relatives in Miami.

Herbert Willis of White Deer is in the city today.

Mr. and Mrs. R. B. Haynes of Miami were Pampa visitors this morning.

R. B. Fisher was able to be in his office at the high school this morning following a severe attack of influenza. Mr. and Mrs. Fisher and son, Brent, spent Christmas in Missouri and Oklahoma. Mr. Fisher contracted the flu on the way home.

Mr. and Mrs. John R. Gray of Dallas are visiting friends here for a few days.

Glyde McGinsley of Amarillo spent yesterday in Pampa.

L. B. Mann of Wichita Falls is a Pampa visitor today.

August G. Nagel of Wichita Falls is a Pampa visitor for a few days.

R. W. Ryan of Klaw City, Okla. is visiting friends in Pampa this week.

J. I. Suther of Amarillo was in the city yesterday.

Miss Marjorie Buckler and Miss Christine Cook left last night to resume their studies at the Miss Hockaday school at Dallas.

Willie to leave them to nurses. I feel that the same rule holds good today. We must constantly discipline ourselves if we are to train children aright. I always felt they must follow their own initiative, and I tried to let them carry out their own ideas. In their seeming disobedience I always tried to find the underlying motive and did not punish them impulsively."

Mrs. Compton may not be as learned in the law as some other holders of the degree given her. But it would be hard to say that she is the least worthy holder of that honor.

## WOMEN STUDY WORLD'S NEED OF THE WORD

BAPTISTS HOLD THEIR FIRST MEETING OF NEW YEAR

"The World's Need of the Word" was the subject of an instructive missionary program led by Mrs. F. Ewing Leach at a meeting of the First Baptist W. M. S. yesterday afternoon.

The program followed a business meeting, during which the resignation of Mrs. J. A. Meek as president was submitted and the nominating committee was asked to select her successor. Mrs. E. L. Anderson resigned as chairman of Circle 3. A committee was appointed to help plan the brotherhood banquet of Friday evening.

After a devotional by Mrs. E. L. Anderson, Mrs. L. H. Greene told of revivals in the past, and Mrs. T. P. Morton discussed revivals of the present, especially those in foreign lands. Mrs. G. H. Covington enumerated the things necessary for a revival.

About twenty-five persons attended.

## The Social CALENDAR

### WEDNESDAY

Women's council of the First Christian church will meet at 2:30 o'clock as follows: Group 1, Mrs. Tom Sanders; 1212 E. Browning; group 2, Mrs. W. A. Martin, 221 E. Brown, with Mrs. E. L. Reese as co-hostess; group 3, Mrs. Fred Gantz, 306 N. Somerville; group 4, postponed.

Women's auxiliary of the Episcopal church will meet at 2:30 o'clock. Mrs. Paul Jones will be hostess.

First Christian church will begin a study of Romans in connection with the prayer meeting hour.

Altar society of the Holy Souls church will meet at 2:30 o'clock with Mrs. William Cunningham, 417 N. Faulkner.

Women's auxiliary of the Presbyterian church will meet at 2:30.

Le Bon Temps club will meet Wednesday afternoon at 2:30 o'clock with Mrs. E. Hooks.

Executive board of Horace Mann Parent-Teacher association will meet at 8 a. m. at the school.

Fidelis Matrons officers, group captains, and lieutenants will have a business meeting and covered dish luncheon tomorrow at 12:45 o'clock in the basement of the First Baptist church.

## "Baby Doe." Wife of Bonanza King Guards Ancient Mine With Shotgun

LEADVILLE, Colo., Jan. 3.—(P)—"Baby Doe" Tabor, once beautiful wife of H. A. W. Tabor, the bonanza king, holds true to a promise to her husband never to relinquish possession of the Matchless mine.

Assured by mining experts there is a vein of rich gold still uncovered in the mine which started the world with its output of silver in the days when the white metal was valuable, the aged woman guards it with double-barreled shotgun. She holds possession through the right of homestead although a mortgage on the mine was foreclosed several years ago.

"Two attempts have been made to burn her out," said Mr. Tabor. "Some person or persons came stealthily upon my property during the night and set fire to some of the outbuildings in the hope of driving me out. There are many who doubt this statement, but since the last fire I have taken every precaution. I am prepared."

"My husband's last words and request before he died was that the title to the Matchless mine should never leave my name. He said the mine contained more wealth in it than had ever been taken out."

"During the mine's operations in the past men erected a huge bulkhead which they claimed was for the purpose of eliminating a cave-in, but I know better. It was placed there to keep prying eyes from discovering a great sulphate vein which had not been uncovered. Samples had been taken and proved to be gold bearing."

Equipment Perfect. "Mrs. Tabor has faithfully kept the trust imposed on her by her husband," Edward W. Riggs, former mining engineer, said. "Each week she makes the rounds about the mine. Dressed in overalls and equipped with only an old oil lamp she descends into the pit by way of the tunnel, going down some 300 feet, until she reaches the water level. The machinery, the hoists, the water pumps and all the other

## "Don't Allow Bulbs to Become too Dry," Warns Texas Tech Professor

LUBBOCK, Jan. 3.—(P)—Precaution should be taken at this time of the year to keep flower bulbs, stored for the winter, from becoming too dry, warns George W. Woodbury, associate professor of horticulture at Texas Technological college.

"Storage that is cool and relatively dry is the most suitable," Woodbury said. "If storage is too warm, evaporation takes place rapidly and the roots or bulbs will be damaged. If kept too moist, on the other hand, they will be damaged by rot organisms. A dry, cool cellar, or an attic which is not too warm furnish good storage."

"Some growers prefer to store dahlias bulbs in dry sand boxes or barrels. This method reduces drying-out to a minimum, and will sometimes prevent growth while in storage."

"Choice bulbs may be dipped in a pail about two-thirds full of water, heated to a temperature of 160 to 170 degrees F. over which is a layer of paraffin. Care should be taken not to leave the bulbs in the water long enough to damage them. They can be given a second dipping if not entirely covered the first time."

These facts were gleaned from a survey made at Texas State College for Women (CIA). Students quite often accused the size of their feet to extensive walking done at the college, but freshmen this year entirely discredit this story.

Whether the petite foot of the last generation has entirely disappeared, or whether the twenty-first century college girl realizes the need of substantial foundation to the extent that she is entirely frank may account for the increase in shoe size average during the past thirty years.

# Rules for Regulating Gas Flow in Panhandle Are Received

Special orders of the state railroad commission establishing field rules for conservation of gas in Moore, Hutchinson, Hartley, Carson, Gray, Wheeler, and Potter counties have been received.

Effective January 1 were these rules:

Rule 1. The following definition are prescribed:

"A"—By the term "casinghead gas" is meant any gas and vapor indigenous to the oil strata.

"B"—By the term "natural gas" is meant any gas and vapor produced from beneath the surface of the ground in said district except "casinghead gas" as herein defined.

"C"—By the term, "gas oil ratio" is meant volume of gas to oil and water.

"D"—For the purpose of calculating gas-oil ratio only, the term "cubic foot of gas" is meant volume of gas expressed in cubic feet and computed at a base pressure of four (4) ounces per square inch above the average barometric pressure of 14.4 pounds per square inch, a standard base and flowing temperature of 60 degrees Fahrenheit, correction to be made for pressure according to Boyle's law, and for specific gravity according to test made by the balance method, as set forth.

"E"—For the purposes of this order any well in said district in which the gas-oil ratio exceeds five hundred thousand (500,000) cubic feet to one barrel of oil or any well which is now producing natural gas only is hereby defined as a gas well. And gas produced through a bradenhead or a well equipped to produce oil from a point and horizon and natural gas from another point horizon is classified as gas produced from a gas well.

Rule 2. All gas wells shall be chosen in until such time as such natural gas shall be utilized for purposes and uses authorized by law and the orders or permits of this commission. When gas produced under rule No. 7 is insufficient for supplying the demand for residue gas from any natural gasoline extraction plant, upon application to and approval of deputy supervisor of said district, after hearing, gas containing hydrogen sulphide from wells producing natural gas only may be used for the purpose of extracting natural gasoline therefrom so long as the residue gas from the natural gasoline extraction plant is utilized without surface waste. The demand for such natural gas containing hydrogen sulphide shall be apportioned ratably among all wells within this class connected to the same gasoline plant, in proportion to the potential capacities from any such well shall not be greater than 25 per cent of the potential capacity thereof or such other maximum percentage of the potential capacity thereof as this commission may designate for wells producing natural gas only.

Rule 3. The flow or production of each gas well as herein defined shall be restricted to 25 per cent of its potential capacity; that is to say in any day of twenty-four (24) hours no gas well shall be permitted to flow or produce more than 25 per cent of the potential capacity thereof.

Rule 4. Volumetric tests of gas produced by individual wells shall be taken by such methods and as often as the commission may direct; but where Pitot tube readings are taken the same shall be computed according to Reid's Open Flow tables.

Rule 5. Natural gas that has been artificially introduced into an oil well and produced with oil in "gas lift" operations with production of oil shall not be used for any other purposes than the uses prescribed by law and the orders or permits of this commission. Special permits may be granted by the deputy supervisor of said district after hearing for the use of natural gas in necessary quantities in gas lift operations provided that the amount of gas so used in any well shall not exceed five thousand (5,000) cubic feet per barrel of oil or ten thousand (10,000) cubic feet of gas per barrel of oil and water.

Rule 6. Casinghead gas shall not be produced from any oil well except with the oil and at such gas-oil ratio as do not exceed the ratio that is established by these rules and which may be established by any subsequent rules or orders of this commission. Provided that the prohibition herein shall not apply to casinghead gas produced through the annular space between the tubing and the casing of a pumping well during pumping operations.

Rule 7. "A" Except as specifically provided for in section "B" of this rule, gas and oil shall not be produced together from any well in said district at a gas-oil ratio in excess of twenty-five thousand (25,000) cubic feet of gas per barrel of oil. This rule shall not be construed as prohibiting or limiting the production of "natural gas" from the bradenhead of a well equipped to produce oil and "casinghead" gas from one point and horizon, and "natural gas" from another point and horizon, so long as said "natural gas" is produced and used in such manner as not to conflict with or violate the law and the permits, rules and regulations of this commission.

Wells now in existence, producing gas and oil with a gas-oil ratio in excess of twenty-five thousand (25,000) cubic feet of gas per barrel of oil, but less than five hundred thousand (500,000) cubic feet of gas per barrel of oil, and which are able to dispose of their gas production at a natural gasoline extraction plant, shall be permitted to produce at gas-oil ratio in excess of twenty-five (25,000) cubic feet of gas per barrel of oil; but in no event shall any individual well be entitled to produce or be permitted to produce a larger volume of gas with its oil than necessary to secure to it its ratable proportion of the amount of gas in excess of twenty-five (25,000) cubic feet per barrel being processed at the natural gasoline extraction plant serving it without surface wastage into the air of tail or residue gas at said natural gasoline extraction plant; not shall any such well in any event be permitted to produce in excess of 75 per cent of its open flow capacity. A plant shall be permitted, at the discretion of and under the supervision of the deputy supervisor of this commission to release to the air in excess of the maximum amount of gas to provide the flexibility necessary in supplying residue outlet and such release to the air shall not be construed as surface waste.

"C" After the effective date of this order, the deputy supervisor of this commission in said district shall determine from time to time and as often as necessary the volumes of gas to be produced with the oil as to each well in said district falling within the classification in sub-section "B" of this rule; and said deputy supervisor shall check the production of gas from each well of said classification monthly and shall see that discrepancies are adjusted during the ensuing month.

Rule 8. The daily volume of gas escaping into the air from all wells in said district shall be determined and reported monthly to the commission. All residue gas going into the air from natural gasoline extraction plants shall be metered and report of daily volume of such gas shall be reported monthly to the commission in such form as the commission or its deputy supervisor in charge of said district shall prescribe.

Rule 9. No new connections of wells to lines supplying gas to natural gasoline extraction plants in said district shall be made without first securing permission to make such connections from the deputy supervisor of this commission in charge of enforcing these rules in said district. After notice from the commission, no natural gasoline extraction plant in said district shall take or process any gas that is being or might be produced in said district in violation of or in conflict with these rules, this order, or such other rules or orders as may be

# Jack Pickford Dies in France

PARIS, Jan. 3. (AP)—Jack Pickford, brother of Mary Pickford and motion picture actor, died in the American hospital here today. He had been in the hospital since Oct. 14 after suffering a breakdown. He was 36 years old.

Dr. Edmund L. Gros, who attended him, stated that death resulted from "multiple neuritis which finally affected the brain center."

Mary Pickford, who had been kept informed of her brother's condition by trans-Atlantic telephone, had expressed a desire to come from Hollywood to be with him but Dr. Gros told her she could not arrive in time.

# FIRE LOSS—

(Continued from Page 1)

persons killed in the conflagrations. There were no accidents in the fire department. The value of property involved in fires was \$148,810, but prompt turning in of alarms enabled the department to hold losses to a minimum in most cases.

There were five calls in December, with property damage of \$375. A total of 550 feet of fire hose was strung.

Fire Chief Gold devoted part of his time to investigations, including instances where arson was suspected. He made 521 inspections and 211 corrections of hazards.

# LEADER—

(Continued from Page 1)

should be consolidated into 9 divisions.

"Neither congress must keep its hands off now, or they must give to my successor much larger powers of independent action than given to any president if there is ever to be recognition that the president should be free of the limitations in the law passed last year which gives congress the veto power, which prevents the abolition of functions, which prevents the rearrangement of major departments. Otherwise it will, as is now being demonstrated in the present law, again be merely make-believe."

promulgated by this commission in this case.

Rule 10. The purpose of the commission in promulgating this order is, by rules of general application to prevent and to minimize the physical wastage of gas now taking place in said Panhandle district; and from the facts in its possession the commission is of the opinion that this order and these rules will tend to accomplish said purpose. In providing, therefore, for a maximum gas-oil ratio as provided for in sub-section "A" of rule No. 7 hereof, and in permitting the production of gas in excess of such maximum ratio as provided for in sub-section "B" of rule No. 7 hereof, the commission is not unaware of the necessity of considering from time to time the determination of individual gas-oil ratios in said district; and of guarding against the possibility of the creation of physical waste by any arbitrary application of general rules. The commission, therefore, reserves to itself the right to grant exceptions to these rules, after a hearing, should it appear that physical waste could reasonably be expected to result from their application in individual cases; and to fix gas-oil ratios, at either a lower or a higher proportion than is provided for herein, as to individual wells and as to individual leases and properties, as rapidly as the fact can be determined upon which to act, in order that the possibility of such physical waste as might reasonably be expected to result from the continuance of any improper gas-oil ratio that might exist or that might come into being may be prevented in an adequate manner.

## NEW ORLEANS COTTON

NEW ORLEANS, Jan. 3 (AP)—Cotton reopened after the long New Year's holiday slightly more active and somewhat higher as Liverpool came in slightly better than due. First trades here showed gains of two to five points, due to trade buying and price fixing. This was soon followed by hedge-selling, however, and the market eased to \$5.96 for March, \$6.07 for May, and \$6.20 for July, or 2 to 4 points down from the opening and unchanged to one point up from the previous close.

Near the end of the first hour the market quieted down and was steady at or near the lows.

## CHICAGO GRAIN

CHICAGO, Jan. 3. (AP)—Material upturns in grain values here took

action early today. The Liverpool wheat market showed decided strength, and further stimulus was given that hereafter said section shall read as follows:

Opening 1/4-1/2 higher, wheat afterwar reacted somewhat. Corn started 1/4-1/2 up and subsequently held near the initial range.

Wheat closed unsettled at the same as Saturday's finish to 1/4 off, corn unchanged to 1/4-1/2 higher, oats 1/2 down, and provisions 2 to 5 cents up.

| Wheat | High   | Low    | Close      |
|-------|--------|--------|------------|
| May   | 45 1/2 | 44 1/2 | 44 1/2-1/4 |
| July  | 45 1/2 | 44 1/2 | 44 1/2-1/4 |
| Sept. | 46 1/2 | 45 1/2 | 45 1/2     |

## KANSAS CITY LIVESTOCK

KANSAS CITY, Jan. 3. (AP)—U. S. D. A.—Hogs, 4,000; steady to 10 higher; top \$2.90 on choice 160-220 lbs.; 140-350 lbs., \$2.45-2.90; packing sows, 275-500 lbs., \$1.75-2.25; stock pigs, 70-130 lbs., \$2.50-2.75.

Cattle, 5,000; calves, 400; early top light-weight steers \$6.00; 550-1,500 lbs., \$3.85-5.75; common and medium 550 lbs. up, \$2.75-5.47; heifers, 550-850 lbs., \$4.25-5.25; cows, \$2.25-5.37; weaners (milk-fed), medium to choice, \$2.50-5.65; stocker and feeder steers, \$3.75-5.75.

Sheep, 4,000; top and bulk fed lambs, \$5.25; (X) 90 lbs. down, \$5.00-35; (X) 90-98 lbs., \$4.75-5.25; ewes 90-150 lbs., \$1.25-5.2.

(X) Quotations based on ewes and wethers.

The market ruled quiet but very steady all morning. Prices advanced gradually owing to a total of selling pressure and moderate trade buying and price fixing. March advanced to 6.04, May to 6.17 and July to 6.29, or 9 to 10 points above the previous close.

Around noon the market was steady but quiet and unchanged to two points under the highs.

ORDINANCE NO. 147  
AN ORDINANCE AMENDING SECTIONS NOS. II AND VII, OF ORDINANCE NO. 107, PASSED AND APPROVED BY THE CITY COMMISSION OF PAMPA, ON OCTOBER 13, 1928, PROVIDING FOR THE TAXING AND VACCINATION OF DOGS; AND DECLARING AN EMERGENCY.  
BE IT ORDAINED BY THE CITY OF PAMPA, TEXAS:  
SECTION I. Section No. II, of Ordinance No. 107, passed and approved by the City Commission of

said city on October 13, 1928, providing for the taxing and vaccination of dogs, is hereby amended so that hereafter said section shall read as follows:

"There shall become due and payable to the City of Pampa on the 15th day of January of each year from each person, association of persons, or corporation owning, harboring or maintaining any such animal of the dog kind in said city, the sum of \$1.00 for each male dog and \$2.00 for each female dog so harbored, owned, or maintained, as dog tax for the year commencing on said January 15th, and failure to pay such tax before the first day of February after such tax shall become due shall be deemed a violation of this ordinance."

The full amount of such tax shall become due and payable on each such animal brought into, or born in, said city after said January 15th, which amount shall cover the tax on such animal until the succeeding January 15th. The said tax on such animals shall become due and payable on the day when such animal is brought into, or born in, said city, and failure to pay such tax within fifteen days after it becomes due shall be deemed a violation of this ordinance."

SECTION 2: Section No. VII, of said Ordinance No. 107, is hereby amended so that hereafter said section shall read as follows:

"No animal of the dog kind not wearing on its collar in a plainly conspicuous place the metal tag provided for in Section III hereof for the current tax year, as set out in Section II hereof, as of the time such dog is running at large, and no such animal not wearing the tag provided for in Section IV hereof which has been issued not more than twelve months, shall be allowed to run at large in the corporate limits of the City of Pampa."

SECTION 3: EMERGENCY. It appearing that said Ordinance No. 107 should be amended as herein set out, and it further appearing that the public welfare demands the immediate enforcement of such amendments, an emergency is hereby declared, and the rules prescribing three separate readings of an ordinance are hereby suspended, and this ordinance shall be in full force and effect on and after its passage and publication as prescribed by law.

Passed and approved this 28th day of December, 1932.  
W. A. BRATTON, Mayor.  
Attest: J. H. Blythe, City Secretary.
