Bogata Telephone Office Moves To Emory

Continental Telephone's Service Center in Emory, Texas will begin handling service requests for Bogata area telephone users beginning Monday, August 4, 1980. The Bogata business office will permanently close

at the end of business on Friday, August 1, 1980. Anne Logan, Customer Service Manager for the area, explained that the move to consolidate offices was made to improve service for local residents through more

efficient operations.

Customer Service Supervisor, Kenneth Jeffrey, and all existing installation and repair personnel will remain in the Company office building in Bogata and will be in regular contact

with Emory regarding service and repair calls.

Service Manager Logan explained that increasing costs makes it advantageous to combine customer records and office services into fewer but larger offices and modern technology makes it practical. "Each of our Service Centers is being considered for consolidation," he said, "as part of a continuing effort to improve operating efficiency and reduce costs." "Initial reaction of area residents may be that quality of service might slip, Logan continued, "but our experience in consolidating other offices has shown that just the opposite is true. Better service is the result." She went on to point out that the greater number of service representatives in a larger office provides greater availability to customers. Billing dates are arranged so that office workload is spread evenly throughout the month. The fact that Logan's office is at the Emory Service Center also means that she can react more quickly to potential service difficulties. This improvement will provide the latest in customer service to Bogata residents.

Only six of Continental's sixteen Bogata area employees will be affected by the move. The Company is currently working to place most of these employees in other locations so they can remain with the firm if they choose. In addition to installation and repair, central office personnel will remain in the Bogata area.

Fowler Defeats Beadle In County Attorney Bid

Thomas H. Fowler, a Clarksville attorney, defeated Red River County Attorney Pat F. Beadle in his re-election bid by better than a two to one majority in Saturday's Democratic primary runoff election.

Fowler received 1,559 to Beadle's 623 votes in official totals from 32 boxes released by Red River County Clerk Mary Housler.

Fowler said he attributes the victory to his promise to provide the county a full-time prosecutor.

Fowler won a runoff position in the May 3 Democratic primary, leading Beadle 1,347 votes to 1,108.

Kimberly Magee

Elected NHS V-P

Kimberly Kay Magee, daughter of the Rev. and Mrs. C.O. Magee, Jr., of Little Rock, Arkansas, was elected vice-president of the National Honor Society at Central High School.

At a recent Honors convocation, Miss Magee received a trophy as an outstanding drama student, and has been notified that she has been accepted at the Governor's school for the gifted to be held at Hendrix College for five weeks this summer.

Miss Magee was student director of a recent Central High School play. At District competition she received Superior ratings awarded for drama and speech. She was a member of the productions, "Music Man" and "Sound of Music."

She is the granddaughter of Mr. and Mrs. Gene Hawkins.

Rosalie

Meeting Called

A meeting has been called for June 18 at the Rosalie Community House for the purpose of organizing the Community Club, and discussion and planning for improvements needed. This is a meeting place for reunions and other community gatherings and improvements are badly needed.

All friends and interested persons are urged to attend this meeting at 8:30 p.m.

Defeated in their county attorney bids in the May 3 election were Clayton I. Hall, 989 votes, and Jack O. Herrington, 643 votes.

Although a large number of absentee votes had indicated a larger than usual

runoff turnout, Fowler, a Red River County native, said he was not surprised by the total votes the old political pros had told him to expect about half the turnout for the runoff as for the May 3 election.

NATIONAL ASSOCIATION AVID TURTLE RACERS INC.

Bogata News Bogata, Texas

Dear Sir:

Our Association read with great interest the letter in your last week's paper regarding Mr. LaFont's intended interest of racing his "Turtleog." The NAATRI (National Association Avid Turtle Racers Incorporated) regrets to inform Mr. LaFont that a "turtleog" is not eligible to compete against terrapins and/or turtles. We have had to deal with Mr. LaFont in the past during contests in Cheyenne, Wyoming, Butte, Montana, and Clear Water, Florida. It seems that he and his family go all over the United States to big functions such as Bogata Frontier Days, eat the free breakfasts, enjoy the family entertainment, see the tremendous parades, and attend the biggest rodeos in the Nation and then race their hybrid "turtleog" and attempt to take all the prizes and ribbons.

Please inform your judges that the turtleog cannot win and be a sanctioned champion by this organization. Should he or any of his many children attempt to enter this "turtleog" they will be disqualified.

Sincerely,
Simon Mausitnashioe,
President, NAATRI

P.S. Please advise all judges that Mr. LaFont may try to disguise his "turtleog" and use some local citizen to enter it as a turtle.

Gas does not contain poisonous ingredients. If most, or all, the air in a room were replaced with gas, however, a person would suffocate from lack of oxygen. It would be like drowning.

So you can detect the presence of gas, should there be a leak, we put a harmless odorant in gas.

If you smell gas in your home, ventilate your house immediately by opening doors and windows. Do not turn on any light switches or appliances.

CALL ARKLA GAS immediately.

Natural gas has a better safety record than any other form of energy. Please help us keep it that way.

Irish-Harris Vows

Sandra Jean Irish became the bride of Terrance Mitchell Harris on May 24, 1980, at 2 p.m. in the Oakland Heights Baptist Church sanctuary. The Rev. James Dixon officiated at the double ring ceremony. The bride's father escorted her down the aisle.

Parents of the bride are Mrs. Frances Miears of Paris and Floyd C. Hanna of Kilgore. Her grandparents are Mr. and Mrs. Tullie Burns of Bogata and Mr. and Mrs. Edwin Hanna of Sorrento, Louisiana.

The Rev. David Griffin, former pastor of First United Methodist Church in Bogata, Cuthand and Lone Star, heard the couple pledge their double ring vows before an altar centered with a heart candelabra holding lighted votives, and an arch entwined with boxwood fern and daisies in the bride's chosen colors of pastels.

White doves were centered at the top of the arch. Two 15-branch candelabras and two seven-branched candelabras adorned with rainbow ribbons stood on either side of the arch. Tall white wicker baskets, filled with arrangements of gladiolas and adorned with rainbow ribbons stood in front of the seven-branched candelabras. Wicker fans with asparagus fern and pastel daisies with rainbow ribbon marked the family pews.

Miss Cathy Jones of Bogata, pianist, presented favorite selections of the couple prior to the ceremony. Miss Mary Lynn Vaughan and Miss Tammy Strain sang, "More," "There Is Love," and "Let It Be Me." Her cathedral-length mantilla of illusion, edged in lace matching her gown, fell from a lace camelot cap covered with lace and motifs. She carried a colonial style bouquet of silk pastel roses and Shasta daisies framed with lace and rainbow satin streamers tied in love knots with small flowers attached.

The traditional something old was her grandmother's wedding rings.

She presented a red rose to her mother upon her entrance, and one to her new mother-in-law upon her exit.

The bride's mother wore a full-length gown of pink knit with matching chiffon cape. She wore a white orchid.

 Five good reasons
for choosing the Nite-Liter

1. Extra security that
comes from well-
lighted property.

2. Backyard
barbeques are
more fun, since
extra light gives
more visibility.

3. Less chance of accidents
— no more stumbling
in the dark.

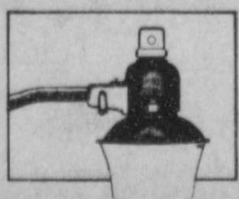

4. A few more
"daylight" hours
to finish out-
door chores.

5. Kids can play
outside longer.

That's nice.

Any car momentum (forward movement) you can conserve is better than none. It takes up to 6 times as much gas to get a car from a dead stop than from a moving speed of just a few miles per hour. Cutting down on the number of times you have to stop is a major requisite for becoming a good economy driver. By eliminating many complete stops you gain from 10 to 25% better gas mileage.

We are going to price everything as low as we can every day, and, since nothing is going to be advertised, please check our prices often.

Now, here is a promise I am going to make to you, our customers: there will never, never be a limit placed on anything. You will always be able to buy all that we have and all that we can get.

Weekly Agriculture Update

By Herb Brevard

The rain across East Texas is extremely helpful to most agricultural producers. The dry conditions have been beneficial, however, in helping control the spread of many plant diseases.

According to Dr. James Robinson, area entomologist for the Texas Agricultural Extension Service, many insects are now infesting gardens and lawns. Several reports of fleas and ticks have been received. These pests are often difficult to control and may require several treatments with the

proper insecticide.

Insects which cause catfacing on peaches are beginning to appear. The damage done by these insects prevents the fruit from being top quality and thus reduces the sale price.

In the lawns, white grubs and chinch bugs will be appearing soon. Robinson says to look for the May or June beetles which are the adult of the white grub. Chinch bugs cause extensive damage in many St. Augustine lawns each year. Both of these insects can be controlled by using the

proper insecticide as directed on the label.

Squash bugs are infesting many home gardens. These insects are difficult to control and the gardener may need to make several applications of the approved insecticide.

Tip moth control on Christmas trees should be a major concern to Christmas tree producers. Robinson says that the next few days may be critical.

County Extension agents throughout East Texas have publications available on the control of various insect pests. A visit or call to the local county Extension office could pay big dividends.

Fasken Sprigs Coastal Bermuda

By Ray Haddock

Andy Fasken has recently completed sprigging over 125 acres of coastal bermudagrass. His 450 acre farm is located northeast of Bogata, in the Line Branch watershed.

Thirty acres of critical area or gullies was shaped last fall on this farm. Soil Conservation Service (SCS)

furnished cost-share assistance thru the RC&D program. This program provided 80 percent of cost to landowners having erosion problems in the Line Branch watershed.

"Over forty-eight bushels of bermudagrass was sprigged per acre on the shaping we did last fall," stated Fasken. "Because of the steep slope and high erosion potential of this soil we needed a cover on it as quick as possible," continued Fasken. After the sprigging operation a 80-80-80 fertilizer was applied.

"When I purchased this land there were gullies four to eight foot deep just continuously all the way around this hill" stated Fasken as he looks across the freshly sprigged ground. With the gullies filled in and bermudagrass growing, Fasken thinks he can develop a fairly good pasture.

Fasken has established quite a number of acres of coastal bermudagrass, he agrees with the SCS recommendations; prepare a good clean seed bed and sprig the grass early. Take a soil sample and apply fertilizer according to the test. After grass is established do not graze or cut for hay until at least 80 percent of the ground is covered.

"Management is also a key factor in maintaining a quality stand of grass once it is established," states Fasken. "Do not over graze, keep your cattle rotating from one pasture to another," he suggested. The grass needs a rest after several days of grazing. If coastal is grazed too close under drought conditions or too late in the year you will get some kill on it. Fasken strives to keep at least a six inch height on the grass at all times. Also, if you use it for hay purposes topdress after each cutting with nitrogen and do not cut after October 1, give the grass a chance to establish some growth before the first killing frost.

With the high cost of nitrogen, clovers can be seeded in the stand of bermudagrass. This will provide early grazing and also return some nitrogen back into the soil. Some clovers will grow best on well drained soils, while some respond best to wetter type soils. SCS technicians will assist landowners on the type of grasses best suited for their soil. If you are thinking about establishing grasses or overseeding legumes this fall for winter grazing, we will provide technical assistance to you. Our office is in the basement of the Post Office in Clarksville.

New Sales Tax Return Is Shorter Form

State Comptroller Bob Bullock Monday unveiled a new streamlined sales tax return—the best and shortest in the nation—that he says will reduce paperwork and bookkeeping chores for most Texas businesses.

Bullock said the short form sales tax return is about the size of a postcard and will be into use this month.

"The best and shortest in the nation, bar none," he said of the new return, "and it won't take a fancy-pants Dallas lawyer to fill it out."

Bullock said 85 percent of all Texas sales tax permit holders will be able to use the short form.

"Now more than a quarter-million taxpayers can fill out their taxes on a pre-printed 9-by-4 inch card in probably less time than it takes to make out a grocery list."

The new short form requires less information from taxpayers than the current sales tax return and state, city and metropolitan transit authority tax rates are combined in one computation.

The new form will also shorten processing time within the Comptroller's office.

Bullock said the design of the form is the result of a concentrated effort by his department to adopt reform measures that assist taxpayers by "making paying taxes as uncomplicated as humanly possible."

"Cumbersome forms at the Comptroller's office are going the way of gas-guzzling cars—into the junk heap."

Bullock said federal officials say government required paperwork at state and local levels nationwide costs between \$5 to \$9 billion

to prepare each year. "And, they didn't count the frustration level of those who have to do this paperwork and bookkeeping," he said. "Our new return is just short of being revolutionary. It's a current application of some old advice: Keep it short and keep it simple," he said.

Monthly taxpayers will begin using the new form in June to report their May taxes and quarterly taxpayers will use the new form starting in July to report April, May and June sales.

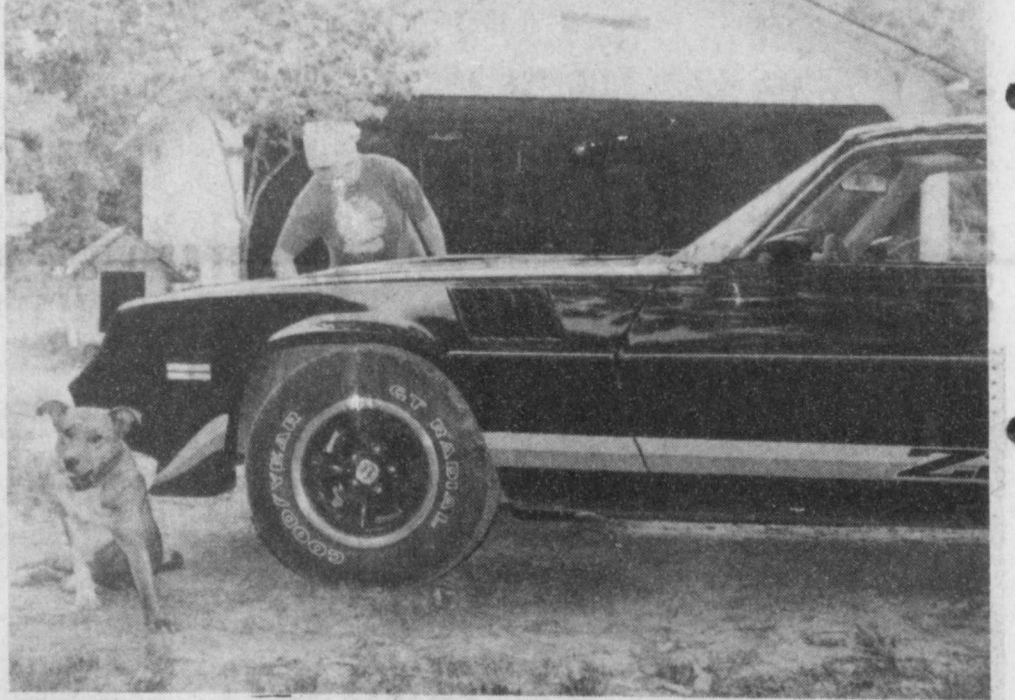

Hardwood Publication Available

Harwood forests cover nearly 7 million acres in Central and East Texas, and these hardwood trees are vital for wildlife, recreation and wood products.

Well-managed hardwood sites can provide all three. However, specific forest management activities depend on the site (upland or bottomland), tree species, and desires of the individual landowner.

To assist private landowners in developing their hardwood land for maximum pleasure and profit, the Texas Forest Service has issued Circular No. 248, "Managing Hardwoods." This publication gives information on species, how to manage hardwoods for wildlife, and suggestions for selling trees for the highest profit.

For a free copy of this publication or personal assistance in managing your trees, contact any Texas Forest Service office, or write Texas Forest Service, Texas A&M University, College Station, TX 77843.

THANK YOU, SUPPORTERS

for your hard work and long hours. You have made it possible for Red River Co. to have its first full-time County Attorney.

I have already stopped taking criminal cases; however I must earn a living during the next 6½ months.

Therefore, I am continuing to take new civil (non-criminal) cases through November 30, 1980.

I will take office January 1, 1981 because of your help, and I thank you.
