Mao Hits U.S.; Still No Word On New Talks

MUNSAN, Korea, Oct. 23. (AP)—Red China's Peiping radio quoted Premier Mao Tse-tung today as saying the Chinese will continue to "resist America" until the United States accepts Red peace proposals in Korea.

The Red Chinese premier added that armistice negotiations "will be a success if America takes a rational stand in truce talks."

The broadcast was heard in Tokyo as the Reds let another day slip by without approving an agreement to reopen cease-fire talks which they broke off two months ago.

Mayo's remarks were taken to mean the Communists haven't changed their position during the two-month break in negotiations. Red negotiators had insisted on a cease-fire line along the 38th Parallel. They said the United Nations emphasis on a battle line truce was irrational.

Peiping radio reported two generals of the five-man Communist delegation have been replaced. A United Nations spokesman said the changes may indicate the Reds plan to place greater emphasis on military considerations and less on political phases of an armistice.

Reorganization of the Communist delegation was announced as the Reds ignored a U. N. challenge to ratify quickly new truce talk rules.

Vice Adm. C. Turner Joy, top Allied negotiator, signed the new ground rules Monday a few hours after liaison officers approved them. He asked North Korean Lt. Gen. Nam Il, head of the Red truce team, to act quickly so negotiations could be resumed promptly after a two-month interruption.

While Nam Il was silent the Peiping radio announced the changes in the Red delegation, paralleling replacement last week of two members of the U. N. truce team.

The broadcast said Chinese Gen. Pien Chiang-wu would replace Chinese Gen. Tung Hwa, and North Korean Gen. Cheng Du Kon would succeed North Korean Gen. Chang Chog San.

Brig. Gen. William P. Nuckols, official spokesman of the U. N. command, said it was possible Chang is "a more military type" than Tung who was regarded by the U. N. delegation as a political advisor.

Nuckols said Chang never gave any indication of taking an active part in negotiations.

SUNRAY OFFICIALS HERE FOR OPENING

Luther Williams, director of public relations for the Sunray Oil Corp., Tulsa arrived at the Snyder Gasoline Plant about 10 o'clock tod day and immediately pinned the "host' armband on E. J. Mills, plant superintendent. Douglas Renfrow, staff writer for the Oil Daily, new Chicago oil publication, watches the procedure. An open house for the public will begin at 1:30 tomorrow afternoon when Olin Culberson, chairman of the Railroad Commission, delivers the principal address of dedication ceremonies.—(Lee Watson photograph).

150 Red Jets Rise To Attack B-29's As They Hit Air Field

EIGHTH ARMY, Korea, Oct. 23. (AP)—Communist airmen hurled 150 jets at U. N. warplanes today and lost at least 14 destroyed or damaged in history's largest jet battle.

Two American planes were shot down and at least two damaged.

The Fifth Air Force estimated 215 jets, plus an undisclosed number of B-29 Superforts, were involved.

The previous record in a single jet battle was 199 on Sept. 26.

The Russian - type MIG-15s swarmed in waves on B-29 Superforts bombing a new Red airfield at Namsi, 45 miles from the Manchurian border.

Airmen were credited with destroying five Red jets, probably destroying two, and damaging between seven and ten.

YANKS SUSTAIN LOSSES

One B-29 was crippled and plunged into the Yellow Sea. The crew bailed out. A Fifth Air Force briefing officer said one F-84 Thunderjet was shot down.

Two B-29s from Okinawa were badly damaged, but landed at Allied bases in Korea.

The estimated 150 fast Red jets — a record number — fought with 96 Sabre and Thunderjets and an unannounced number of B-29s.

Two columns of U. S. Patton tanks rumbled up parallel valleys northeast of Kumsong Tuesday and for the third day bombarded the town. Their guns touched off new fires in the wrecked city. Tankers hunted Reds for a mile beyond the town. They reported they killed about 200 Chinese and wounded 150. An officer said they returned to their own lines through Red artillery fire without loss.

CHINESE COUNTER ATTACK

A daylong fight crackled southwest of Kumsong between U. N. troops and 100 counterattacking Chinese. The Reds were chased back into their own bunkers.

The air battle overshadowed action on the quieting ground fronts.

United Nations tank and infantry forces began developing smoldering Kumsong, deserted former Red stronghold on the Central Front. The Allies in the eastern mountains beat off three Red probing attacks. And in the West, raiding U. N. patrols got into a stiff fight with entrenched Chinese west of Yonchon.

Waves of Red jets swept in from Manchuria in "one of the heaviest and most determined attacks ever launched against the Superforts by the MIGs," an air force announcement said.

Pilots reports indicated more than 100 Red jets swept in to attack.

The fight broke into three distinct mass battles as escorting Sabre jets ad Thunderjets took on the Red attackers.

RED CASUALTIES HIGH

U. N. ground forces inflicted 29,275 casualties on the Reds last week, Eighth Army headquarters announced. Of the total, 22,000 were listed as killed, 6,000 wounded and 1,275 taken prisoner.

The toll was taken mainly on the central and west-central fronts. Gen. James A. Van Fleet ordered limited offensives there to straighten his lines on the eve of new armistice talks expected to open soon at Panmunjom.

Cairo Demonstrations; British Cut Movement Of Railroads, Trucks

CAIRO, Oct. 23. (AP)—Egyptian mobs roamed Cairo today shouting for arms to settle their differences with the British. It was a nation-wide "day of mourning" to honor 16 Egyptians killed in last week's disorders.

The crowds in Cairo were fairly orderly, but in Alexandria, Egypt's second largest city, police were forced to fire shots into the air and buckshot into the ground to keep demonstrators in check.

The new demonstrations followed a British move sharply cutting rail and traffic and banning road movement in the disputed Suez Canal zone.

In Cairo where anti-British feeling was rising, the demonstrators yelled: "We want arms." One of the crowd held up a gun and shouted: "This is how we will talk to Attlee."

All shops were closed in Alexandria and Cairo.

An open car filled with demonstrators attempted to drive to the Garden City area of Cairo where the British and American embassies are located. A guard of 50 Egyptian police turned them back.

The traffic cuts will remain in force until dock laborers, boycotting the unloading of British supply ships at the military port of Adabia, about 10 miles south of Suez, go back to work, a British military spokesman said.

The British seized the harbor and railway station at Port Suez Monday night.

A limited number of trains will be run, operated by British army crews. One passenger train and one freight train daily will be permitted to cross the canal to supply Egyptian troops on the east side of the canal, the British said. Food trains for Egyptian civilian throughout the Canal Zone also will operate.

BRITISH DENY REPORTS

The British denied Egyptian reports that they used a squadron of tanks to take the railway shops and station at Port Suez Monday night. Only "six or seven" armored vehicles were on the move in the area Monday, the spokesman said.

But British troops are stationed at switches and crossings from Port Said to Suez, along the full 104-mile length of the canal, he disclosed.

British soldiers have been searching every Egyptian entering the canal area since Oct. 17 and have been ransacking boxcars to prevent "organized gangs" from infiltering the control zone, the spokesman revealed.

Meanwhile, a Royal Air Force spokesman in Cairo said small flights of RAF jet planes were continuing to make "reconnaissance sorties" over the canal area to keep an eye on ground activities.

Aerial reconnaissance from both jet planes and light aircraft has been going on for several days, he added.

ACCOUNTING PROMISED

Egypt's fiery nationalistic prime minister, Mustapha El Nahas Pasha, told cheering audiences meanwhile that he would bring the British to a "severe accounting" for their continued resistance to the Egyptian ouster moves.

Seaboard Test Is Staked In Central Dawson

Seaboard Oil Co. of Delaware and others have staked location for the No. 1 R. O. Goss as a wildcat in Central - East Dawson County.

Location is one and one - half miles east of the Spraberry Deep field and 760 feet from east and 660 feet from north lines of the 200 acre lease in the southeast quarter of section 43-33-15n-T&P.

That makes it 19 miles southeast of Lamesa.

Projected depth is 9,000 feet. That is calculated to take it through the Mississippian and into the Devonian. Rotary tools will be moved in and drilling will begin soon.

FISHER COUNTY

Seaboard Oil Co. of Delaware and General Crude Oil Co. staked a 7,000-foot Ellenburger test three miles south of Claytonville in Fisher County.

The No. 1 Ralph Collins will be 660 feet from south and west lines of R. Clayton survey.

FISHER FAILURE

Mendota Oil Co. has plugged and abandoned its No. 1 T. N. McCright, wildcat in East - Central Fisher County, at total depth of 5,413 feet in lime and shale.

Location was nine miles southeast of Rotan and in section 77-1-H&TC.

BORDEN WELLS

Phillips Petroleum Co. No. 1-A Clayton, 12 miles southeast of Gail, recovered 160 feet of mud and 320 feet of salt water in a drillstem test in the top of the Canyon reef. Tool was open two hours and 30 minutes.

Top of the reef has been called at 8,200 feet. Operator is now drilling ahead below 8,500 feet.

Brinkerhoff No. 1-A Clayton, Borden prospector, is drilling below 3,500 feet in lime and shale.

IN KENT

Charles B. Wrightsman No. 2 Frank Stewart is reported testing for potential test. It is reported to have flowed 23 barrels of oil per hour on recent gauges. It is located 10 miles northwest of Clairemont and is a northwest offset to the No. 1 Stewart, three quarters of a mile northwest of the Salt Creek field.

Seaboard Oil Co. and Republic Natural Gas Co. No. 1-C Girard, stepout to the Salt Creek field, is coring below 6,861 feet on a minus datum of 4,731 feet.

Humble Oil & Refining Co. No. 2 W. H. McLaurin, East Dolar-Pennsylvanian field location, is drilling in lime below 3,562 feet.

FLOWING OIL

Richardson & Bass No. 1 McCabe, Southeast Mitchell wildcat, flowed 78 barrels of oil with four barrels of water during the last 24 hours. Observers estimated the flow averaged 40 minutes out of every three hours.

Two Charged With Helping In Jail Break

Felony charges accusing two men of assisting in the Saturday night jail break here were filed yesterday afternoon against William E. Cauble, 33, of 1211 Twenty-eighth Street, and Eusebia Gonzales, 20, of Snyder.

Both were inmates of the jail at the time and are still prisoners there. Cauble was being held on a charge of driving a vehicle while under influence of intoxicating liquor as a second offense, and Gonzales was serving time in lieu of a $48.50 fine for aggravated assault.

None of the five felony prisoners who escaped through a hole made in an outer wall of the old jail has been recaptured, the sheriff's department reported today.

Cauble appeared before W. C. Davidson, justice of peace, yesterday afternoon and waived preliminary hearing on the charge of aiding in the break. Bond was set for him at $1,000. He was already being held in jail in lieu of making bond of $750 on the driving charge.

Bond was set for Gonzales at $500. Cauble was charged with sawing a lock bolt on the door of the bull pen in the jail with a broken hack saw blade. Gonzales was charged with stationing himself at the outer door of the runaround room in the jail and effectively giving oral warning that "The laws are coming," thus aiding the five prisoners in perfecting their escape.

Those who escaped were: Wilbur James Williams, 45-year-old Negro charged with burglary; John Willie Baker, 30-year-old Negro charged on three counts with felony theft; J. M. Steward, 25, charged with making a false statement to procure a bank loan; William C. Kidd, 25, charged with car theft; and Gilbert M. Conreras, 27-year-old Latin American charged with car theft.

Roy Turner Is Mentioned As Party Leader

WASHINGTON, Oct. 23. (AP)—President Truman was reported being urged today by some party members to pick a Protestant who is not a lawyer for the Democratic National Committee's new chairman.

William M. Boyle Jr. steps out as chairman at an Oct. 31 meeting of the committee here. Boyle, a lawyer who once had a Washington practice, has denied charges he ever sought to influence government loans. He said he was quitting for health reasons. Mr. Truman backed him up in this.

Until the President's nomination of Gen. Mark Clark as Ambassador to the Vatican raised a religious controversy, it had been generally assumed a Roman Catholic would be picked to succeed Boyle. In recent years the post has been held by members of that faith.

Among those mentioned as possible choices, including some Catholics, are Senator Earl C. Clements (D-Ky), Price Stabilizer Michael DiSalle, former Gov. Roy Turner of Oklahoma, former Rep. John Carroll of Colorado, and John L. Sullivan, former Secretary of the Navy. All but Clements and Turner are lawyers.

Commissioners State They Will Attend 37th Street Meeting Tonight

All four county commissioners yesterday indicated their intention to be present at the open meeting tonight of property owners interested in the paving of Thirty-seventh Street.

At their meeting yesterday, the commissioners were reminded of the meeting by Edgar Taylor, county judge, who had previously promised to attend to explain the county's deal for paving the road west from the Big Spring highway to a point beyond the airport.

All property owners and residents of the area using Thirty-seventh Street west from the highway are invited to attend a meeting at 7:30 o'clock tonight at the recreation hall at the [illegible] camp.

City and county officials will explain what must be done before the county can pave the street as part of its 157-mile road project.

Highway Deaths Above Same Period Last Year

AUSTIN, Oct. 23. (AP) — Texas traffic deaths this year are six per cent ahead of last year, the Department of Public Safety reported today.

Deaths last month were tabulated at 220 and still incomplete. That compared to 177 for September a year ago. The 1951 death total so far is 1,722.

Three Flee Jail In Sweetwater; All Are Caught

SWEETWATER, Tex., Oct. 23—Three prisoners bent on escape from confinement made their way out of the Nolan County jail at about 3 o'clock this morning and fled to Roscoe before an alert night watchman gave the tip that brought them into custody.

Sheriff Cal Montgomery said the prisoners were two men and one woman — Grady Lee Ayers, 20, charged with car theft; Wright R. Meade, 24, charged with swindling by worthless check; and Judy Pierce Nelson, 20, charged with vagrancy.

OUT WINDOW

"Ayers was confined in the runaround outside the cells," Montgomery said. "He escaped through a west steel mesh window by prying it loose at the corner, got out on a ledge, and climbed nine feet to the roof on an air conditioner."

Montgomery said Ayers, after he went to the roof from the fourth floor window, crossed to the other side of the courthouse building, let himself down to a staircase window on the third floor and climbed back into the building. After climbing into the sheriff's locked office through a ventilator over the door, Ayers got the keys, let himself back out and went back to the jail on the fourth floor of the courthouse to free two other prisoners.

The break was discovered about 30 minutes later when Mrs. Montgomery saw a light in the woman's cell which had been left on after the escape. The sheriff and his wife live in an apartment on the same floor.

All available city policemen, highway patrolmen, and sheriff's officials were used in the hunt stretching over Sweetwater and the surrounding countryside.

All had gone back to Sweetwater from the hunt at dawn this morning when Fred Clayton, a service station operator in Roscoe called in a message from the Roscoe nightwatchman that the three fugitives were in Roscoe. Montgomery said they had been there [illegible] before the nightwatchman saw them.

HEADED WEST

Ed Crane, the watchman, waited until Montgomery reached Roscoe, and both men picked up the prisoners in the north edge of town attempting to hitch a ride on the Snyder highway.

Montgomery said the last break from the county jail was about two months ago when H. B. Line, 32, charged with theft over $50, gained freedom in the same manner, but used a blanket rope to drop from the window. Line had used a hacksaw blade to get out of his cell, then he left the building through the same window Ayers used. Line has not yet been apprehended.

Senators Hope To Avoid Vote On Appointment To Vatican

WASHINGTON, Oct. 23. (AP)—Opposition by Senator Connally (D-Texas) gave weight today to a Democratic move to avoid a vote on President Truman's nomination of Gen. Mark Clark as ambassador to the Vatican.

Connally based his fight against the appointment on Clark's World War II command of the 36th Texas National Guard Division in the bloody Rapido River crossing in Italy.

But a Democratic Senator who usually supports Mr. Truman's proposals told a reporter he and others hope for avoidance of the religious issue raised by the President's move to give full diplomatic recognition to the Vatican.

This Senator, who asked that his name not be used, said he believes the President's action has put on a hot political spot every Senator running for re-election next year in states where the result is in doubt between Democrats and Republicans.

A vote for confirmation of Clark would anger Protestant elements which have opposed giving diplomatic recognition to the Roman Catholic Church state, the Senator said, while a vote against Clark might arouse Catholics who hold the balance of power in some areas.

As a result, the Democratic Senator said he and others hope the President will decide to name Clark as his personal representative to the Vatican. Myron C. Taylor held that status from 1940 until last January.

This would not require Senate action on Clark's appointment, or would it require action by both houses on a bill to waive the law against a military officer's appointment to a civilian post. It also would not involve official diplomatic recognition of the Vatican.

Clark's nomination was submitted Saturday and Congress adjourned about three hours later without acting on it.

Many prominent protestants have objected to the action, arguing that establishment of full diplomatic relations with the Vatican violates a constitutional injunction that church and state affairs be kept separate. The White House said "a few hundred" letters and telegrams had come in, most of them critical.

Out-of-State Guests Arrive To Open Plant

A vanguard of out-of-state guests started arriving today for dedication of the Snyder Gasoline Plant here tomorrow. Early arrivals include Luther Williams, public relations director for Sunray Oil Corp.; Dick Fancher, Sunray safety director; and H. G. Teverbaugh, Sunray senior Engieer, all of Tulsa.

E. J. Mills, plant superintendent, said that Olin Culberson, Chairman of the Railroad Commission of Texas who will make the main address at tomorrow's ceremonies, will arrive at Sweetwater airport about 10 o'clock tomorrow morning. With him will be H. W. Manley a vice president of Sunray.

Plans are complete for entertaining more than 1,000 guests at the dedication, Mills said.

A delegation of writers for newspapers and oil industry trade journals will come to Snyder early tomorrow from Lubbock on a chartered bus. A special tour of the plant has been arranged before the throng arrives at the ceremonies tomorrow afternoon.

Williams said that writers from more than a dozen trade journals from all over the nation will be in that group.

Sunray officials to be here tomorrow include C. H. Wright, president; H. O. Harder, Floyd L. Martin, D. R. Snow, Edward Howell, M. D. Kirk, and H. W. Manley, all vice presidents; L. G. Rodgers, superintendent of gas-gasoline department; R. W. Griffity, assistant superintendent gas-gasoline department; A. V. Murray, products sales manager; and K. J. Maltby, Tulsa office manager, gas - gasoline department.

Will Question Secretary To Vice President

WASHINGTON, Oct. 23. (AP)—Senate investigators made plans today to question Vice President Barkley's secretary and a Senate committee employe about the employe's statement they interceded in behalf of government loan applicants.

"We are going to talk to both of them as soon as it can be arranged," said Francis D. Flanagan, chief counsel to the Senate's Investigations Subcommittee.

Senator Hoey (D-NC) the subcommittee chairman, ordered a preliminary inquiry Monday at the request of Senator Sparkman (D-Ala), who heads the Senate Small Business Committee.

Sparkman's request dealt with Charles D. Shaver, counsel to the small business unit. Shaver had declared he and Barkley's secretary, Mrs. Flo Bratton, went to bat at the Reconstruction Finance Corporation (RFC) for two loan applicants in 1950. Shaver's statement to newsmen was prompted by published reports.

Shaver said he had done nothing wrong and was making no apologies.

At her home in Cold Spring, Ky., Mrs. Bratton was reported to talk to Barkley.

Barkley said he knew nothing about the episodes but that if Mrs. Bratton did intercede, she acted "against my specific instructions" to his staff regarding such matters.

The Vice President had no comment on whether he would keep Mrs. Bratton on as secretary.

"I haven't had a chance to talk to her to get her side of the story," Barkley said.

In reply to questions, Flanagan said the investigations subcommittee would let developments determine whether to discuss the matter with Barkley.

Colorado River Water District Temporary Victory in Martin

AUSTIN, Oct. 23 (AP) — A 126th District Court restraining order temporarily blocked the Martin County Water District from preventing the piping of underground water from Martin County to Odessa and Big Spring.

The order was granted upon the request of the Colorado River Municipal Water District, of which Big Spring, Odessa, and Snyder are members. The district owns leases within the Martin County district from which it intends to pump water to supplement the supply in the Colorado Dam under construction in Southwest Scurry County.

The Martin County district was granted a ground water designation by the state Board of Water Engineers [illegible] a reservoir subdivision within the county and south of the Canadian River." The Martin County district then set up spacing rules on water wells which tied up the Colorado River District's pipeline plans.

The petition presented by the Colorado River group asked the court to declare void the ground water designation. A hearing has been set for Oct. 29.

Low This Morning of 43

Cloudy skies yesterday gave Snyder its coolest day in recent weeks. The temperature reached a cool 64 degrees as its highest mark, and fell to 43 degrees before dawn today.

County Discusses Building New Jail

M. C. Butler of the Butler-Brasher Engineering Co. of Lubbock and Charles M. Smith of Plainview, representing the Central Investment Co. of Texas, met with two of the county commissioners and the county judge this morning and discussed possibilities of building a new jail.

In the discussion, which began shortly before noon, Smith advised it was his opinion a jail costing about $200,000 could be built with issuance of time warrants, eliminating the necessity of a bond election.

Butler said he thought a two-story building, about 40 by 60 feet, with facilities to handle 50 prisoners could be built for about that amount of money.

Ted Haney, commissioner of precinct No. 3, asked whether structural steel could be obtained. Butler said he [illegible] the steel could be procured, adding that he knew of a case in which steel priority had been granted recently for jail construction.

Butler estimated that steel cells used in the building would cost about $50,000.

The other commissioner present was Doyle Parmer, precinct No. 4. The group planned to meet again this afternoon.

Hearing on Injunction By Merchant's Motor Lines Is Set Nov. 5

DALLAS, Oct. 23 (AP) — A hearing on an injunction asked against the AFL International Teamsters Union and four Texas locals has been postponed until Nov. 5.

Merchants Fast Motor Lines Inc. asked the injunction last week, charging the union and motor freight lines with conspiracy in restraint of trade. The suit grew out of a strike at the company's offices in Dallas, Houston, Abilene and Fort Worth on Oct. 1.

Borden Court Put Off Until Friday Morning

A common law damage suit in Borden County's civil district court at Gail was postponed yesterday until Friday, Ben F. Thorpe, district judge, said.

Judge Thorpe said the postponement was necessary because an attorney in the case, Sterling Williams of Snyder, was called out of the state. There will be no court there until Friday, the Judge said.

Independent Papers Back Conservatives

LONDON, Oct. 23. (AP)—Two of Britain's most respected newspapers, the Times of London and the Manchester Guardian, swung their support to the Conservative Party in last-minute decisions before Thursday's general election.

Neither is affiliated with one of the two major parties.

In leading editorials they advanced the same reason for their decision — namely, that the Labor Party and its socialistic policies no longer will serve the best interests of the country.

The campaign moved into high gear in the last two days before the election. Britons awaited with interest the final major speech — this afternoon — from Winston Churchill, who will again be prime minister if the Conservatives take over the government.

Major personalities in both parties headed for strategic areas to make closing appeals to voters. Both organizations sent teams of doorbell ringers from house to house in districts classed as "doubtful."

The consensus of opinion still held that the Tories would win.

The Times spoke with a new voice on the battle. Its main editorial was captioned: "Time For a Change." Until now the influential journal had not taken sides. But today it said:

"If the vote goes against Mr. Attlee and his colleagues on Thursday, it will be because of the conviction that they have nothing further to contribute in this chapter, at least, to the conduct of their country's affairs.

"It is not simply that, in their election statements, bereft now of the old, exhausted remedies of six years ago, they have nothing to offer. It is the mounting impression [illegible] circulation and error that tells against them."

The influence of the Times' statement today — especially since the newspaper is not identified with any political party — probably will work powerfully to the advantage of the Conservatives.

The Manchester Guardian's pronouncement may possibly be of even greater importance. It has been for many years the main voice of the Liberal Party. More than 2,600 people voted Liberal in 1950. Their votes, in closely-contested districts, may make all the difference between the Tory and Labor candidates.

The Times was neutral in the 1950 election. The Guardian supported the Labor Party.

District Convention Of VFW Will Be Held In Snyder Next Spring

Snyder's Veterans of Foreign Wars Post was selected by unanimous vote in Brownwood last week end to host the Eight District convention here in the spring of 1952, Commander Jack Caperton announced yesterday.

Caperton and nine other delegates from the Snyder post were in Brownwood Saturday and Sunday for the fall convention. Caperton said the delegates learned that Snyder has the third largest post in the district and the fifteenth largest in the state.

Attending were Woodrow Speck, Tom Jenkins, Dick Hall, George Nichols, Austin Bratton, Bill Turner, Claude Lloyd, Harold Jean Kruse, and James Turner. Representing the VFW Auxiliary at the meeting was Mrs. George Nichols.

WEATHER

WEST TEXAS — Partly cloudy tonight and Wednesday; not much change in temperatures.

EAST TEXAS — Mostly cloudy tonight and Wednesday; cooler tonight except warmer extreme northwest. Scattered showers extreme east portion tonight.

Bank Deposits Top Year Ago, But Lower Than Mid-Summer

Despite one of the driest years in Scurry County's history, bank deposits in Snyder have shown a big increase over October of last year, according to figures published by both banks here in answer to a call yesterday.

Conibined deposits in the Snyder National Bank and the West Texas State Bank now total $19,745,695, an increase over [illegible] $3,838,112.

Loans in the two banks have increased by an even greater percentage, jumping $1,553,018 over last year's total to reach a high for the year of $5,014,508. A year ago loans in Snyder banks totaled $3,461,490.

While deposits here have increased over October of last year, deposits have declined at both banks since the last bank call on June 30. The mid-summer period was outstanding nationally as one of slow retail trade, record - breaking deposits, and little building.

On the June 30 call, deposits totaled $23,515,407, or $3,769,712 more than they total today.

DEPOSITS	
Oct. 10, 1951	
Snyder National	$12,538,189

Safety Measures Are Discussed by Junior Chamber of Commerce

The placing of caution signs and other safety measures on Snyder streets near schools and on highways was discussed at the regular meeting of the Junior Chamber of Commerce at the Village last night.

Members decided to investigate the possibility of erecting noticeable caution signs in the near future.

The group voted to sponsor a Christmas decoration contest in the residential areas again this year.

The next meeting will be a Halloween party with the Jaycettes.

Kiwanis Will Meet At Snyder Gasoline Plant

Instead of the usual Wednesday noon luncheon, the Kiwanis Club will meet at noon tomorrow at the Snyder Gasoline Plant which is holding open house, it was announced today.

The club secretary will record names of members present, giving them credit on their records.

Mrs. James R. Cook, 1101 Twenty - ninth Street, spent the day in Colorado City Sunday with her mother, Mrs. M. M. Krop.

Mrs. James R. Burns of Fort Worth visited last week with her sister and her husband, Mr. and Mrs. H. F. Boss, 700 Nineteenth Street.

HARVEST MOON

LAGUNA BEACH, Calif., Oct. 23. (AP)—Composer Jack Norworth, 72, who wrote the song hit, "Shine On Harvest Moon," and Mrs. Amy Swor, 56, widow of Comedian Bert Swor, are newlyweds.

Norworth revealed Monday that they were married last Wednesday at — most appropriately — Lovington, N.M.

Four Snyder Firms Have Postage Meter

Stamp licking is a thing of the past in Snyder.

At least it's no problem for four Snyder firms, who have successfully put to use the postage meter, the latest in mailing efficiency. These machines account for about $500 a month in Snyder postal receipts.

Meters in use in Snyder, which resemble and operate much like a large adding machine, have proven to be useful in several ways, mainly saving time for the clerk who sends out the company's mail.

While the meters are nothing new to larger cities, they have been used here only two years by companies which put out several hundred letters each month.

The meters are serviced at the post office each time the firm needs postage. Postage is paid in advance and the amount of postage bought is run up on the meter. Then the meter is put to use, with letters stamped just as fast as the clerk can slide them in and press the right button for the amount of postage needed. When the postage on the meter is used up, the machine is taken back to the post office, where the firm can buy more postage.

Although the firms using the machines send out only enough mail to use just a few hundred dollars in postage each month, the meter has more than proven itself in saving valuable time for the clerk who would ordinarily spend many hours at the desk with sticky fingers and the taste of glue in his mouth.

70-Pound Weight Limit On Overseas Packages

Weight limits on parcel post Christmas packages to be mailed overseas before Nov. 15 are 70 pounds or under, as announced this week by Postmaster H. D. Moreland.

The Daily News yesterday reported the limit as seven pounds.

Mr. and Mrs. Merle Marshall of Silver City, N.M., are visiting this week with Mrs. Marshall's sister and her husband, Mr. and Mrs. Homer Merritt, 1804 Twenty-fourth Street.

Church Groups In Opposition Over Clark

By The Associated Press

President Truman's appointment of Episcopalian Gen. Mark Clark as U. S. Ambassador to the Vatican brought outspoken comment—mostly in protest — from several Texas Protestant groups.

Statements from religious leaders of Sen. Connally that he would oppose Senate approval of Clark.

Sen. Johnson called the action a [illegible] from our traditions and policies of the past.

Methodist ministers of the Fort Worth district passed a resolution criticizing the action "on the grounds that it violates the principles cherished by America of separation of church and state."

The Galveston District Conference of the Methodist Church passed a resolution to "protest the appointment of Gen. Mark Clark as a revolutionary departure from the traditional separation of church and state and as a dangerous precedent."

The conference advised its pastors and laymen to make individual protests of the appointment.

Dr. J. Howard Williams of Dallas, executive secretary of the executive board of the Baptist General Convention of Texas, called Truman's appointment "one of the most unfortunate acts of his ill-fated administration."

He said "our government has no constitutional right to form an official relationship with any religious organization, whatever its beliefs."

Connally said he felt that Clark, as U. S. commander in Italy in World War II, "showed himself unfit" for any high position. He recalled that the 36th division of Texas National Guardsmen suffered heavy losses in the battle of the Rapido River in Italy. There has been controversy over the wisdom of Clark's military decisions.

As chairman of the Foreign Relations Committee, Connally occupies a key position in Senate consideration of Clark's nomination. His group handles all diplomatic nominations.

Aged Romeo's Money Divided Among His Former Conquests

CHICAGO, Oct. 23. (AP)—The $5,555 found in the underwear of Sigmund (Swindling Sam) Engel while he was in jail in 1949 was divided among five persons in circuit court yesterday.

Three of the women in the life of the 76-year-old Romeo each got a portion, but not the amount they sought. Engel is serving a two-to-10-year prison sentence for confidence game in connection with the complaint of one of the women, Mrs. Reseda Corrigan.

Mrs. Corrigan, 41-year-old redhaired widow, sued for $3,700 which she said she gave Engel after he promised to marry her. She was awarded $600.

Funds Growing For Respirator

More than $190 has been collected in the joint American Legion and Veterans of Foreign Wars drive toward the purchase of a portable iron lung for use in transporting Snyder polio victims, Legionnaires were told at their meeting last night.

Miss Leah Davis, public health nurse who directs the program, reported progress in the drive for donations to meet the expected cost of between $350 and $500 for the respirator.

During the meeting, Legion members voted to present a check for $100 this week to the county U.S.O. Fund.

A report on the National American Legion Convention in Miami last week was given by James E. Morris, who attended as a delegate from the Snyder post. Hilton Lambert, post commander, appointed 15 delegates to attend the Nineteenth District Convention in Brownfield Nov. 10-11.

PERSONALS

Mr. and Mrs. Melvin Newton Jr., of Austin visited over the week end with Mrs. Newton's parents, Mr. and Mrs. Ben Harless of Dunn, and with his parents, Mr. and Mrs. Melvin Newton, Sr., 2711 Avenue V.

E. B. Boone, 3006 Avenue E, is visiting this week with his parents, Mr. and Mrs. W. V. Boone of Tyler, Tex.

Mr. and Mrs. H. G. Courtney, 1808 Avenue I, have visiting them this week Mrs. Courtney's parents, Mr. and Mrs. J. W. Lovell of Eastland.

Mrs. C. E. Creswell, 1901 Nineteenth Street, returned home last Friday after spending two weeks with Mrs. J. F. Creswell of Hemleigh who has been in the Rotan Hospital. Mrs. J. F. Creswell also returned to her home from the hospital last Friday.

Mrs. W. F. McMennamy and children, 3100 Avenue B, spent Friday night and Saturday with Mrs McMennamy's parents, Mr. and Mrs. A. R. Freudiger of Lubbock.

Mr. and Mrs. W. B. Nance of the Von Roeder addition had as their guests over the week end Mr. and Mrs. Dale Walker and children of Sundown.

Freezing Cold In Some Areas

By The Associated Press

Temperatures moderated over the Rocky Mountain region today after the season's first blast of sub-zero Monday but it was still on the cool side eastward into the north central region.

It was sub-freezing over Northern Montana, the Dakotas and Western Minnestoa early today. Mild weather continued across the southern tier of states and in most of the Eastern States.

Rain pelted wide areas. One belt extended from Eastern Oklahoma northeastward to the Lower Great Lakes Region. Other wet spots included the Pacific Northwest and in Georgia and Southern South Carolina. Nearly two inches of rain doused Indianapolis in a six-hour period Monday night. Heavy falls also were reported at Fort Smith, Ark., and Portland, Ore.

Assault Charge Filed Against Two Men Here

A felony charge of assault with intent to murder was filed this morning against two Snyder Negroes.

The charge, signed by Frank James, 18, Negro, charges that Will Clay and Vernon Clay of the Clay Bros. Hotel assaulted Ernest James with intent to murder him on Sunday.

Ernest James had been released from the county jail for hospitalization at the time of the incident. He was to be hospitalized for injuries sustained in a previous fight, Frank James, his brother, said. Ernest James is under grand jury indictment for robbery by assault.

Mrs. Walter Sellars and granddaughter, Doris Jean Sellars, 2408 Twenty - sixth Street, visited over the week end with Mrs. Sellar's daughter and her husband, Mr. and Mrs. W. C. Scrivner of Fayetteville, Tex.

Special Services At First Christian Church

The Rev. Wilbur Mindel of Odessa will be the speaker at the second of four special services at the First Christian Church tonight.

These services, which began last night, are designed to acquaint the audience with the basic beliefs of the church, the Rev. Clifford Taylor, pastor, said. The service tonight will begin at 7:30, and services are also planned for Wednesday and Thursday nights.

Mr. and Mrs. J. H. Mixon, 3102 Avenue U, had as their guests over the week end Mrs Mixon's brother and family, Mr. and Mrs. M. E. Mason and daughter of Ranger, Tex.

The National Geographic Society says thse sandwich has been traced as far back as the Romans.

THE STORY OF SUNRAY—Aggressive Enterprise for 31 Years

The Oil is Here

Mustang and Red Fish oil fields in the Corpus Christi Bay area of Texas have yielded ten or more pay sands since discovery in 1949. Although the fields have not yet been closely defined they are apparently developing into a substantial series of multizone reservoirs. It is proving out geophysical exploration that was recorded in part, a dozen years ago. SUNRAY has some 8000 acres of oil prospect leases and ten oil producing wells in these fields to date. They offer SUNRAY one of its most concentrated and promising areas for immediate development.

★ ★ ★

Lessening the Gamble Under the Ground

[illegible] discovered petroleum seeping to the surface through springs or cracks in the earth. Using their knowledge of water-well drilling, they usually drilled where they saw oil on the surface. There was *relatively little gamble* in drilling America's first oil wells.

As the search for more oil progressed, and it became necessary to drill deeper and deeper into the earth, drillers could no longer depend upon surface signs to tell them where to drill. The "wildcatter", determined to find oil in a new territory, risked his money blindly — hoping that with luck he would discover a new oil field.

Today the "wildcatter" turns to science before he risks money on drilling. Now, before thousands of dollars are spent for drilling, [illegible] knows pretty well what areas and locations *should* prove productive. By modern electronics those who search for new oil are able to send electrical impulses deep into the earth for helpful information. These impulses reveal hidden structures and often indicate the probability of oil formations.

SUNRAY during the past thirty-one years, has constantly increased its use of modern exploratory techniques. This scientific search for new oil is being pursued in all areas where SUNRAY operations are carried on, but particularly in Gulf Coast and West Texas, Louisiana, Oklahoma and the Rocky Mountain states, which offer good discovery possibilities.

Working hand in hand with geophysicists and seismograph crews, are geologists and finally the drilling crews. By doing preliminary exploration, before moving in drilling rigs, American ingenuity has made vast gains in *lessening the gamble under the ground.*

Is oil a profitable business? It is . . . to the landowner . . . the royalty owner . . . to oil company employees . . . to oil company stockholders . . . to the motorist and commercial users who benefit from oil's progress . . . and to the community, state and nation which benefit from the industry's substantial taxes. Is oil a profitable business? Yes! What's wrong with that?

FREE — *"What's Wrong with Being an OIL COMPANY?" by Ernestine Adams, a most revealing article which "calls a spade a spade". Write for your copy—Address Sunray Oil Corporation, P. O. Box* [illegible], Tulsa, Oklahoma

BUTANE STORAGE IN UNDERGROUND CAVERN

From the well head in the foreground 41,000 barrels of butane or propane can be stored in underground caverns at the Snyder Gasoline Plant. Two other wells run the total underground storage capacity to 90,000 barrels. This 41,000-barrel well holds as much liquified pressure gasses as 20 of the huge 2,000-barrel surface storage tanks shown in the background.—(E. J. Mills photographs.)

SALT DOMES PROVIDE CHEAP STORAGE TANKS

Huge caverns in crystalline salt layers which underlie most of West Texas have been hollowed out by circulating water through the salt domes to form underground storage caves for butane and propane. Butane and propane, pumped into the underground caverns as water is drawn out, are brought out again by pumping the water in.

Salt Domes Serve as Storage Tanks for Gas Plant Products

Salt domes which underlie the Snyder Gasoline Plant have been converted into man-made caverns for inexpensive storage of liquefied petroleum gases.

Regardless of the season, butane, propane, and other petroleum products (made from casinghead gas which once was flared from Kelly-Snyder wells) pour out of the plant.

Storage of the products, during the summer months when demand is slow, presented a problem involving two relatively scarce items —money and steel.

From these necessities was born the idea of underground storage in salt domes under the plant site. It is one of the largest such storage projects being used in the nation.

PART OF PLANT

Sunray Oil Corp. operates the storage wells for itself and 30 other companies and 60 individual owners of the Snyder Gasoline Plant.

Both big savings in steel and storage costs are made by using this unique underground system. Although the process was known as long ago as the 1890's, its use is relatively new.

Sold, crystalline salt beds which underlie almost all of West Texas were discovered under the plant. A test well was drilled at the plant site and its core showed that the salt beds started at 640-foot depth and lay in strata on down to about 1,200 feet.

The strata of salt are divided by red beds (a clay formation.)

Drillers set and cemented casing on the well at 640 feet, then run a pipe to the bottom of the hole at 1200 feet. Water was circulated through the well, in through the deep pipe and out through the casing. The water melted the salt, and washed out the domes, leaving a cavity in the earth.

Operators of the plant found that the cavity would hold water, so they knew it would hold liquid gases too, because they are lighter than water, E. J. Mills, superintendent of the plant, said.

By using this storage method, the plant can produce at capacity rate all the time without overflowing its storage facilities during periods of the year when demand for the fuels is low, and it will have a backlog of butane and storage for peak consumption periods.

COST OF FACTOR

Primary reason for the wells was shortage of steel, but the cost angle also makes the wells attractive to plant owners. Steel storage tanks cost about $25 per barrel of their capacity. The underground salt-dome storage wells cost about $1.25 per barrel of their storage—with no shortage of materials to crimp their use.

To rest fears of some persons that the wells might cave in, Mills explained that they are only about 40 feet in diameter and when not filled with gas they are filled with water.

Three storage wells now in use at the plant have a capacity of 90,000 barrels of butane and propane. First of the wells has a capacity of 41,000 barrels—or slightly more than 20 times as much as the large 2,000-barrel surface tanks, eight of which are used at the plant.

The No. 2 well has a capacity of 15,000 barrels, and the third well holds 34,000 barrels.

In washing out the huge underground caverns, 198,000 barrels of fresh water were employed to dissolve an estimated 25,000 pounds of salt in well No. 1. The brine which contained the salt dissolved from the salt series was conducted to an open asphalt-lined surface storage pit having a capacity of 200,000 barrels; in this fashion contamination of surface water supplies was prevented. In a like manner, two other wells were completed to create man-made underground caverns with a capacity sufficient to handle up to 90,000 barrles of liquefied petroleum gases.

From a conservation angle, development and general adoption of underground LPG storage will have a very important and far-reaching effects upon the LPG industry.

The state motto of Virginia is "Sic Semper Tyrannis"—"This Always to Tyrants". The state emblem of Virginia shows an armed figure standing over the fallen body of a tyrant.

Reform Movement In Boston Is Serious Matter To Machines

BOSTON, Oct. 23 (AP)—There's a reform revolt brewing in historic Boston that supporters like to think of as another "tea party."

It already has gained so much ground old-time political leaders have shown alarm.

Behind the burgeoning drive to reform the city government is a 24-year-old lawyer, Jerome L. Rappaport, who claims he has no personal political ambitions.

"I am interested only in good government," he says.

The groundwork for this new revolution was laid 18 months ago when Rappaport and a dozen others — all under 30 — launched their "New Boston committee."

They announced they were out to find the "City's civic conscience." This was the only plank in their platform.

Veteran campaigners took them lightly as did-described "do-gooders." Reform movements never have gone far in this old city during the last half-century.

Skipping over most of the so-called "name" candidates, the young reformers put up slates for city council and school committee —and nominated them in the September primary. Some of the committee privately admit they were surprised by the complete sweep.

This has set the stage for one of the strangest elections in Boston's long history on Nov. 6.

The [illegible] of the new Boston committee brought an immediate response from former Mayor James Michael Curley, one of the nation's last big city political bosses. The 77-year-old Curley gave up his own campaign for mayor to fight the reform movement.

Leaders of the "N. B. C." — most of whom supported Mayor John B. Hynes for re-election — chided Curley and pointed out he ran a poor second to Hynes in the primary anyway.

Boston's municipal elections are non-partisan, but Curley saw a Republican "plot" behind the committee to give the GOP control of this traditionally Democratic city.

"The New Boston Committee," he declared angrily, "is the instrument designed to disrupt and destroy Democratic harmony and pave the way for the defeat of the Democratic party in the nation and state in 1952."

Curley intends to leave his name on the November ballot, but claims he won't "solicit" votes for himself. Both Curley and Mayor Hynes, the "career man" city clerk who beat him two years ago, are Democrats.

Directors of the New Boston committee are a varied group — Democrats, Republicans, [illegible] and independents. They range from John Horan, president of the Boston CIO Council, to Henry L. Shattuck, former treasurer of Harvard College and wealthy back bay socialite.

Settlement Ends Strike

PARIS, Oct. 23 (AP)—A strike of press and composing room workers which prevented publication of today's European edition of the New York Herald Tribune ended this morning with the signing of a city-wide wage agreement.

Sees Strain On Refineries; Perhaps Surplus In Near East

WASHINGTON, Oct. 23 (AP)—The Bureau of Mines takes an optimistic look of the nation's oil situation for this winter.

In a revised estimate, the bureau predicts that under normal conditions supplies should be adequate to meet all requirements.

The same view is held by officials of the Petroleum Administration for Defense (PAD) and by some representatives of the oil industry.

The revised bureau of mines report says the normal seasonal increase in inputs of crude oil and oil products is being reduced due to the current shortage in supplies abroad. Exports have risen sharply and the bureau predicts they will continue at an abnormally high rate during the remainder of 1951.

However, the bureau said, if exports continue at the present rate refineries will have to run close to capacity to meet the requirements in the first three months of 1952.

The Independent Petroleum Association of America, meanwhile, sees the possibility of a world surplus of oil.

In its October "Facts and Forecasts" the association said a very large percentage of the 684,000-barrel-daily production of Iran prior to the shutdown of the Anglo-Iranian Oil Company refinery [illegible] by increasing production in Kuwait and Saudi Arabia.

"When the Iranian dispute is settled and production is resumed in Iran, there may be a world surplus of oil unless production somewhere is cut back," the report stated.

"In this event, if Kuwait and Saudi Arabia were unwilling or unable to cut back production, the net result could be a surplus of more than 500,000 barrels daily in the Middle East. Such a surplus seeking market outlets could disrupt world trade."

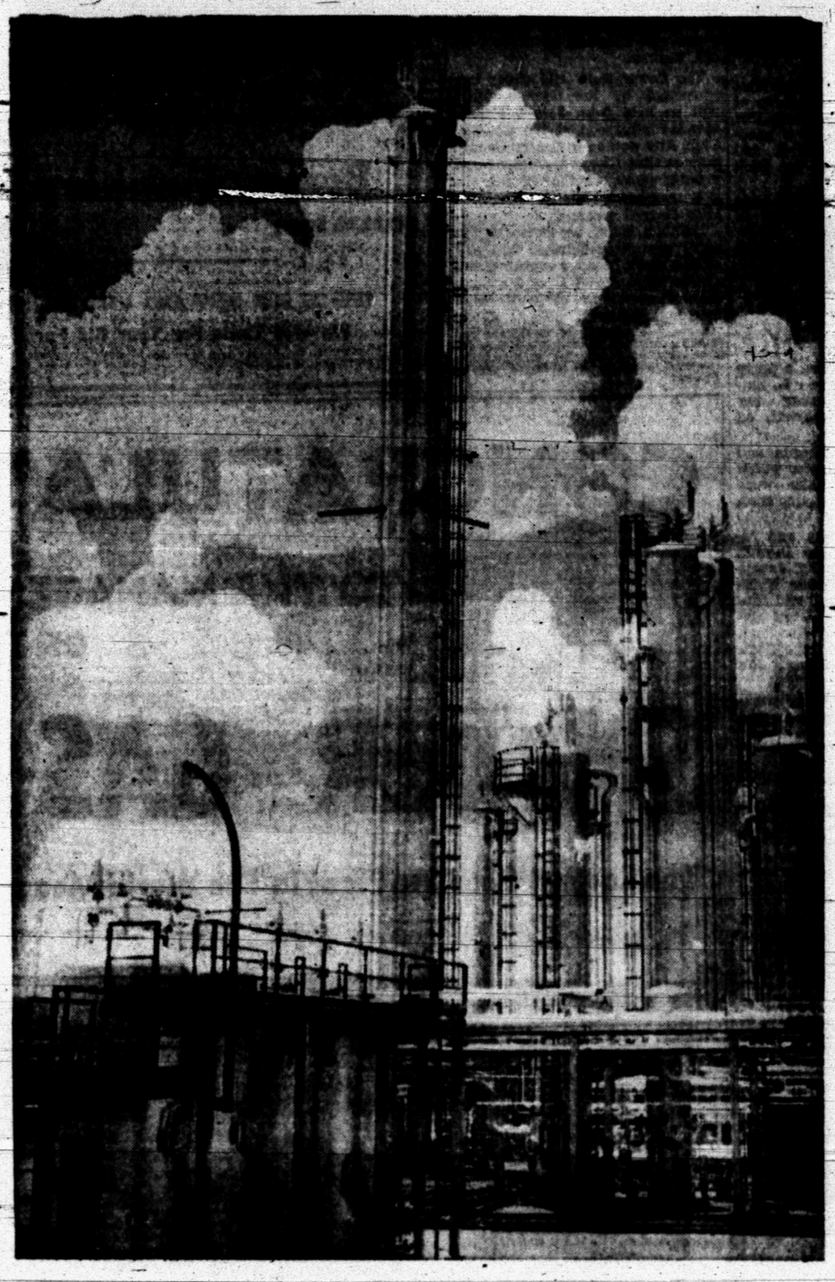
Attend The Dedication Ceremonies



SNYDER GASOLINE PLANT

PAINTING

We Are Proud To Have Been Selected Paint Contractors.

Dedication Of Snyder Gasoline Plant, Wednesday October 24.

HULBERT PAINTING CO.

Borger, Texas

THE TOWN

By SUE HOLMES

Saturday Mrs. D. E. HILL finished up her managerial duties at the Hollywood Shop. The attractive brunette commuted from her home in Sweetwater during the year she was connected with the dress shop. Taking her place as manager is Mrs. JOHN KELLER, who was called to her mother's bedside Sunday night.

• • •

Are you going through that awkward in-between stage where your coloring and face powder just don't jibe with each other because your summer tan is fading to an unflattering sallow hue?

Not much fun, but don't toss away your face powder if it is the kind you had blended for your complexion. If the powder was originally blended for you during the summer months when your skin was a deep bronze, take the powder back to the store and the cosmetic consultant will add lighter tones.

• • •

The brisk norther last night didn't keep away the frilly bare formals at the Country Club dance. Among the many persons dnacing to Blue Barron's music was Mrs. JAKE SPRINGER, in a black formal with gold metallic trim and a wide gold belt. Mrs. AL SIMPSON'S ballerina length dress was of purple velvet. With it she wore black suede opera pumps and rhinestone jewelry.

During the evening the orchestra played "Happy Birthday" to Mrs. HAROLD JONES.

Cole-Hunt Nuptials Are Read

Miss Johnny Cole became the bride of Glen A. Hunt in a ceremony Friday morning at the home of Boyd Fanning, minister of the Church of Christ, who officiated.

The bride is the daughter of Mr. and Mrs. John Cole, 2900 Avenue H, and the bridegroom's parents are Mr. and Mrs. Glen A. Hunt of Carthage, Tex.

Members of the immediate families and close friends were present for the ceremony at which Mr. and Mrs. Charles McKinney attended the couple. Mrs. McKinney is the bride's sister.

For her wedding the bride chose a brown suit with accessories of brown and tangerine velvet.

After a wedding trip to Dallas the couple is at home at Avenue G and Twenty - eighth Street. Mrs. Hunt is a graduate of Snyder High School and is employed by the Southwestern Bell Telephone Co. The bridegroom was graduated from Carthage High School and is with Iverson Supply Co. here.

B&PW Members To Sweetwater Meeting

Members of the Business & Professional Women's Club will go to Sweetwater tonight to hear a talk by the state president, according to Mrs. Mary Lou Simonson.

A meeting was scheduled at the Ranch House Dining Room but will not take place because of the Sweetwater program.

Mrs. Minnie P. Cooper of Corsicana is state president of the group.

Jayceettes Plan Rummage Sale Nov. 3

Jayceettes planned a rummage sale at their short business meeting last night. The sale will take place Nov. 3, Mrs. Jack Kennedy said.

Members of the Junior Chamber of Commerce and Jayceettes have scheduled a Halloween party Monday night, with the men providing food and the women the entertainment.

Couple Married In Belton Are At Home Here

Mr. and Mrs. W. T. Edwards are living at 1901 Nineteenth Street following their marriage Oct. 5 in Belton, Tex.

The marriage took place in the home of the Rev. James Basden, minister of the Baptist Church in Belton. Mrs. Patsy Helms, sister of the bridegroom, attended the couple.

Mrs. Edwards is the former Miss Patsy Ruth Creswell, daughter of Mr. and Mrs. C. E. Creswell, 1901 Nineteenth Street. She is a graduate of [illegible] High School and was formerly employed by Cox Electric Co. here.

The bridegroom's parents are Mr. and Mrs. S. E. Edwards of Rotan. He is a graduate of Aspermont High School and is engaged in oil field work.

7-Year-Old Daughter Is Honored at Party

Mrs. W. T. Teague gave a party at her home, 2008 Avenue L, Saturday afternoon honoring her daughter, Pamela Jo Ahrlett, on her seventh birthday.

Guests listened to records and played outdoor games, after which punch and birthday cake were served. Favors were toy airplanes, cars and balloons.

Attending were Loretta and Alma Nell Evans, Jimmie Bryant, Lane and Jerry McKinney, Jackie Bryant, Nancy and Jimmie Nidiffer, Carol, Benny, Russell and Sheila Dever, Marjorie and Jerry McDowell, Sarah and Peggy Kirkland, James Robert and Charlene Ahrlett and Joyce Teague, Pamela Jo's brother and sisters.

During the party birthday packages arrived from Lampasas and Llano.

Mrs. Chapman Named To VFW Auxiliary Job

Mrs. Ed Chapman, president of the Veterans of Foreign Wars Auxiliary here, has been appointed deputy chief of staff of district No. 8.

The appointment was announced Friday by Mrs. Lillian E. Smith of San Antonio, state deputy chief of staff. Mrs. Chapman will work under Mrs. Ruby Jo Roe of Abilen, president of district eight.

Duties of the deputy chief of staff of the auxiliary include leadership in civic and benevolent projects sponsored by the organization.

Mr. and Mrs. L. T. Autry of Lamesa are spending this week in the home of his mother, Mrs. G. L. Autry, Sr., 1903 Avenue M.

Rules for Garden Club Flower Show Announced

Final arrangements for the flower show Monday are to be made at a special Garden Club meeting at 9:30 o'clock Friday morning at the Village, according to Miss Myrtle Harrell. Reports will also be given on the flower arrangement school held last week in Sweetwater and attended by several local women.

The flower show and silver tea, sponsored by the Garden Club, will be held from 3 to 5 o'clock Monday afternoon at the Country Club. Any woman in Scurry County may exhibit flower [illegible] arrangements, whether or not she is a member of the Garden Club, Miss Harrell stressed.

Exhibits must be given to the entry committee between 9:30 and 11:30 o'clock Monday morning and are to be removed after 5 o'clock that afternoon or early Tuesday morning, she said.

A complete schedule of regulations and classifications will be printed tomorrow for those planning to prepare arrangements.

General points to be observed are as follows:

1. All containers should have the owner's name on them, as each individual is responsible for her own property.
2. An exhibitor shall have only one entry in one class, but may enter as many classes as desired.
3. All exhibits should be accompanied by properly filled out card.
4. The entry and classification committee will have the authority to reclassify any entry.
5. Entries that do not conform to schedule will be disqualified and will be used for display only.
6. The competitive system will be used for judging the show except for those classes having insufficient entries. The merit system will be used when one entry is judged alone.
7. Scale of points used in judging will be according to the national handbook of Garden Clubs.
8. Stands are permitted in all artistic arrangements. Accessories and additional foliage are permitted only where stated in schedule.
9. No visible ties or wires will be allowed.
10. Freshness, fragrance and named varieties will be given preference by judges.
11. Horticulture exhibits will be placed in green gingerale bottles and must have been grown by the exhibitor. (These include single specimens not in an arrangement.)
12. House plants must have been in exhibitor's possession for at least 90 days. Such plants shall be displayed in plain pots or containers.

Entries may include blooming house plants, foliage plants, single specimens of roses, dahlias, chrysanthemums, or other seasonable flowers, and arrangements of

Neutralized Korea Is Called Best Route to Peace In Asia

By DOROTHY THOMPSON

The great political reality which must be recognized if we are to have peace in Korea is that the revolution of Asia for the Asiatics is only accelerated and intensified by western armed intervention.

This movement spearheaded the Japanese drive for Asiatic hegemony, and was not stopped by the defeat of Japan. The leadership merely passed into the hands of revolutionary China.

The virtue of the Soviets, from the viewpoint of exercising political intelligence, was to recognize the inevitability of a rising—brewing since World War I, to back a candidate to lead it—the Chinese revolutionary forces, and to put itself squarely behind the revolt. How it will work out for the Soviets in the long run is another matter altogether.

The assets that exist in Asia against the success of Russo-Chinese policy is the fear and hatred of Communism and Communist methods, suspicion of Russian revolutionary imperialism, and the possible emergence of a third force strongly committed to Asiatic independence, of either Russian or western leadership.

• • •

Jawaharlal Nehru is perpetually attacked for refusing to join our side. The attacks will not have the slighest effect, especially after the lesson of Korea. India, like Korea, is a peninsula with a long frontier on China, and she cannot be defended by the west except by making herself a battleground.

But, politically speaking, Nehru (who certainly knows the mind of Asia rather better than any westerner is likely to) knows that in the present fervor of Asiatic national revolutionism no country that apears as a western stooge can exercise influence or be safe from its neighbors. Intelligent Japanese know the same, as do Indonesians and Filipinos. America cannot defeat the Asiatic revolution by disregarding that it exists and that its basic impulse is to achieve independence of alien rule.

If this is realized, it follows that any attempt to attach Korea to a western block cannot bring peace and can only exacerbate hostility toward the west in all Asia. Peace can only conceivably be made in Korea on the basis of the neutralization of the country. And this, it seems to me, is the proposition that should be made. For, in a military stalemate, armistices and cease - fires cannot lead to anything unless they are accompanied by clear political offers.

The principle that Korea should be united must stand fast. The principle that both North and South Koreans must lay down their arms and the people be allowed to choose the form of government they desire must be reiterated. But it must be recognized that no great powers with direct frontiers on Korea, as both China and Russia have, will permit a western protectorate to be established in Korea if they can prevent it. And Russia and China are proving that they can prevent it.

Both sides of the frontier should be permanently defortified and an international guard set up, composed entirely of troops from Asian nations which have supported Korean independence but refused to participate in the war on either side.

When this has been agreed Chinese troops should withdraw into Manchuria, and western troops to a defined area in the south. And when it has been accomplished, western troops should withdraw after the permanent neutralization of Korea has been ratified in the U. N. security council, and by treaties between the United States, the new Korean government, Russia and Red China.

(Released By The Bell Syndicate)

Who Cares About a Jail?

The escape of five prisoners from the county jail Saturday night again focuses attention on our county jail, the horrors of which have for a long time been a public scandal.

If the jail weren't so vile, it would be a colossal joke—a place of detention from which men can escape, armed only with a spoon or a pair of scissors to chisel away weak mortar.

But there isn't anything funny about the jail. It is a monument to man's inhumanity to man. Scurry County doesn't punish it's prisoners with confinement, it degrades them to an almost animal level. When men are incarcerated for months in a jail where they cannot bathe, where the filth of decades has piled up and can never be cleaned, the situation becomes a blight on the community.

All of this is widely known. The public has been informed. Grand juries have suggested vague remedies. But if this situation weighs heavily on the public conscience, if the people of Scurry County are ashamed of the jail which they are rich enough to replace, we haven't heard much about it.

It is not surprising in view of the public indifference to this issue that the commissioners court has not set the county afire trying to get a new jail built.

The lack of public expression about public issues is one of the most serious hindrances to Scurry County's progress. In other communities, leaders who do not approve the trend of public affairs say so, sometimes in inflammatory statements, but more often in sober, thoughtful comments designed to bring more citizens to their point of view and to force official action.

That is too seldom the case here. The jail is notorious and the public knows it. But few agitate for a remedy, which everyone knows the county can afford. The grand juries make a few polite recommendations. The newspaper runs a page of pictures and a couple of editorials. The bar association makes a feint in the direction of an investigation. And that's a popular uprising, Snyder style.

Where is the spirit that builds communities, that speaks out in candor and honesty on public issues?

If the leaders of this county believe something should be done about the jail, let them say so—to the commissioners, and to the public through the newspaper.

If it doesn't make any difference to you, don't be surprised that it makes no difference to the other fellow.

Ketchup Is Leading Contender For America's National Dish

By HAL BOYLE

NEW YORK, Oct. 23. (AP) —Americans are a strange nation of people united by a red cement called ketchup.

It is doubtful which has done more to hold them together.

Long debates have been held on what is the great American dish. Apple pie? Pumpkin pie? Fried chicken? Turkey with cranberry sauce? The hamburger? The hot dog?

All these have their passionate defenders. But to any one who regularly travels these United States, there can be but one answer. The great American dish isn't a dish at all. It's a bottle, a bottle containing the flavor in widest favor — ketchup.

Ketchup, also known as catchup and catsup, is no more native to these shores than folks named Smith, Jones, Johnson or O'Houlihan. It is an immigrant. It originated in Malay. It was made usually of mushrooms, unripe walnuts and ripe tomatoes, and was used to flavor soups, meat and fish.

RED IMMIGRANT

Only after migrating to America, however, did ketchup come into its own. Here its ingredients are tomato puree, vinegar, spices and sugar.

And the scarlet, gooey semi-fluid graduated from a flavoring substance into an all-purpose food. Your true ketchup fan today will eat it through a straw. He will douse it on everything from chicken-a-la-king to ice cream, and only an iron tradition keeps some enthusiasts from using it to cool their coffee.

In times of prosperity the poor man uses it to anoint everything on his full plate. In times of hardship ketchup is the poor man's surest fodder. He can go up to a cafeteria counter, ask for a cup of hot water, take the steaming cup to the nearest table, pump some ketchup in it — and he has a bowl of tomato soup for nothing.

DAMYANKEE BLAMED

"During the last depression," a Florida cafeteria owner told me, "that ketchup soup trick almost caused me to go broke. I think it started with a damyankee visitor, but he sure did spread the custom fast through the South."

What explains the overwhelming popularity of ketchup? Many restaurant owners have a cynical answer.

"Because it's free," they say. "Anything that's free is bound to be popular."

The biggest problem is how to thump it out of the bottle without getting it on your necktie. But that can easily be solved.

Simply wear a bowie. Then you get it on your shirt, instead of your necktie. And if you're so finicky that even that bothers you, well — wear a red shirt.

Mr. and Mrs. Bill Babb of Midland spent the week end with their parents, Mr. and Mrs. J. E. LeMond, 1100 Twenty - sixth Street, and Mr. and Mrs. E. W. Babb, 3100 Avenue T.

SNAP DECISION

LOS ANGELES, Oct. 23. (AP)— It took Mrs. Carolina Paris, 70, ele en years and 11 months to make up her mind to remarry.

So she and Jim Nicolino, 68, obtained marriage license Monday and agreed they will wed "very soon."

Nicolino said that for 30 years he, a stone mason, had lived as a roomer in Mrs. Paris' home. Her husband died 12 years ago. One month later Nicolino proposed. And 11 years and 11 months after she accepted.

PERSONALS

Mrs. F. E. Weathersbee and her daughter, Miss Marybeue Weathersbee, 1708 Twenty - seventh Street, visited Mr. and Mrs. Claude Weathersbee in Floydada Sunday.

Mr. and Mrs. Leslie F. Brown, 1708 Eighteenth Street, are the parents of a daughter born early yesterday in the Snyder Hospital.

Mr. and Mrs. R. L. Brice, Clairemont Road, spent the week end in Waco where they attended the Baylor - Texas Tech game Saturday and visited Mrs. Brice's sister, Miss Frances Leath, a Baylor student. Friday they visited in Stephenville with Mr. and Mrs. Clyde Winston Boren, former Snyder residents. Leatha, David and Mary Brice stayed with their grandmother, Mrs. Ola B. Leath, while their parents were gone.

Mr. and Mrs. W. A. Anderson, Lamesa highway, had as week-end visitors their daughter and son-in-law, Mr. and Mrs. Ralph Reynolds and son, David, of McCamey, Tex.

Mr. and Mrs. Hildreth, Lamesa highway, had as houseguests over the week end her parents, Mr. and Mrs. M. M. Chancey of Henryetta, Okla., and Mr. and Mrs. Kenneth Shields of Maljamar, N.M. Earlier last week Mr. and Mrs. Tom Hughes of Caracas, Venezuela, visited the Hildreths. Mrs. Hughes is Mrs. Hildreth's sister.

Mr. and Mrs. L. J. Colwell, 2212 Twenty - seventh Street, visited last week with Mr. Colwells sister, Mrs. Verta Mask of Weatherford, Tex.

Mrs. E. P. Alford and daughter, Mary Frances, 1506 Twenty-sixth Street, attended a gift tea near Rotan Sunday.

Mr. and Mrs. L. F. Cox and family, Sue and L. F. Cox, Jr., 2611 Avenue X, visited over the week end with Mrs. Cox's mother, Mrs. C. W. Tresenriter of Rockwall, Tex. Mrs. Trenrite retuned home with the Cox family fo a few weeks' visit.

Mr. and Mrs. W. D. Hamlin, 1012 Thirtieth Street, visited last week end with Mr. and Mrs. Bob Gore of Amarillo. On Sunday Mr. Hamlin's father and sister, J. D. Hamlin and Mrs. R. H. Gore of Friona visited in Amarillo with Mr. and Mrs. Hamlin and Mr. and Mrs. Gore.

Mr. and Mrs. W. M. Adams, 1901 Avenue S, visited last week with their daughter, Mrs. Jim A. Adams of Lubbock.

Interstage Heaters Innovation In Scurry Gathering System

Loss of gaseous hydrocarbons from lease stock tanks is materially reduced through an innovation in conventional gathering system designs in the Snyder field. This departure is the use of interstage heaters between gas separators on individual leases.

This and many other conservation features are to be found in the design of facilities in conjunction with the new Snyder natural-gasoline plant owned by 30 companies and 60 individuals in the Scurry County oil field.

This plant, operated by Sunray Oil Corp., is a cooperative 38-million project for the conservation of gas and manufacture of natural gasoline products. It will be formally dedicated here tomorrow in public ceremonies at which Olin Culberson, chairman of the Railroad Commission of Texas, will speak.

Two complete gas - gathering systems for low and high pressure bring gas from 850 wells located on 35,000 productive acres in the Kelley - Snyder area and completed in the 6,500 - 6,700-foot Canyon lime reef reservoir.

Output of products from the 70 million cubic feet per day plant is scheduled as follows: propane, 230,000 gallons per day; butane, 137,000 gallons per day; isobutane, 38,000 gallons per day, and 18-lb. R. v.p. natural gasoline 142,000 gallons per day.

Advantages of the interstage heating between gas separators include:

1. Substantial reduction in the size and tonnage of pipe required for the low pressure gathering system since all separators will be operating at a pressure of 15 pounds per square inch for delivery of gas to the low pressure system. (This is in contrast to the conventional low pressure gas-gathering systems which are usually designed on a basis of from o to 5 pounds per square inch inlet pressure commencing from the individual low pressure separators on each lease.)

2. Constant casinghead gasoline content is obtained fom the individual leases. The new method eliminated the effect of climatic conditions on the gasoline recovery from the gas.

3. Maximum volune of flash gas is separated and recovered from the crude oil obviating the necessity for lease owners or plant participants to elevate their separators.

Another conservation feature of the Snyder plant is the buried gravity drainage drip collector installed at topographically low points along the route of the low pressure system.

Utilizing natural gravity drainage, this "stage - gathering" of the drip gasoline at low spots in the ground surface has eliminated considerable field labor. Steel requirements for pipe line tonnage was much less than for a conventional separate drip-gathering network which would parallel the gas-gathering systems. Another advantage of the gravity - drainage method lies in its automatic gathering arrangement which does away with the need for hand-operated drips for pressuring the drip gasoline into the plant proper.

No Soap For Bubble Bather

BEVERLY HILLS, Calif., Oct. 23. (AP)—Lili St. Cyr got her picture in the papers Monday, and that was news for two reasons:

1. It didn't cost her anything — yet. (Usually, when you see Lili's picture, it's in a paid advertisement.)

2. This time, she had her clothes on.

Lili is a stripper. She looks almost as good with her clothes on as she does with them off.

But, human nature being what it is, most folks prefer Lili in the raw.

That's what got Lili in trouble. She went highbrow not long ago and began stripping at a plush night club, the patrons of which wouldn't be caught dead in Lili's old Main Street haunt.

Lili said she was trying to "elevate her art." The police, after a raid Friday night, said she was "lewdly exposing her person."

Miss St. Cyr (rhymes with sincere) was doing a bubble-bath act, with a transparent bathtub. Vice squadders watched the performance and decided it was no soap. They marched back to Lili's dressing (?) room and handed her a citation.

Lili went to court Monday to be arraigned on an indecency charge.

The court set Lili's bail at $250. Lili, with reverse English, covered it.

PERSONALS

J. W. Ainsworth, who has been confined to his bed for five months and twenty-two days, is reported to be improving now.

Mr. and Mrs. D. A. George of Amarillo spent the week end with their son and his wife, Mr. and Mrs. James H. George, 3726 Highland Drive.

Mr. and Mrs. R. H. Leeson of Abilene spent last week end with Mr. and Mrs. C. T. Glen, 1012 Thirtieth Street.

Mr. and Mrs. A. C. Alexander, 2908 Avenue U, have as their guest this week Mrs. Alexander's sister, Mrs. Fern Bidwell of Lubbock.

Mr. and Mrs. Royce Johnson and children of Dunn spent Sunday in the home of Mr. Johnson's sister and her husband, Mr. and Mrs. Arvol Allen, 602 Twenty-eighth Street.

Mr. and Mrs. S. W. Angel, 1311 Twentieth Street, had as their guests Friday Mrs. Angel's brother and his wife, Mr. and Mrs. Bobbie Adams of Shallowater, Tex.

Mr. and Mrs. Elmer Askins and daughter of Big Spring visited over the week end with his parents, Mr. and Mrs. W. H. Askins, 1507 Twenty - first Street.

Mr. and Mrs. W. F. Atwood and children, 1320 Avenue T, visited recently with friends and relatives, Mr. and Mrs. W. J. Atwood and Mr. and Mrs. Davis Leake, both of Dallas.

Mrs. Effie Jones of Carlsbad, N.M., is visiting this week with her son and wife, Mr. and Mrs. and her sister, Mrs. J. P. Avary, Lawrence Jones north of the city, 3208 Avenue V.

Legion Auxiliary

Members of the American Legion Auxiliary made plans for the poppy sale to be held Nov. 10 in conjunction with the American Legion and Veterans of Foreign Wars and their auxiliary. The members met last night at the Friendly Flower Shop. The group charter has been sent to national headquarters, according to Mrs. E. P. Ketner, president.

Ratliff Takes One Last Crack At Cherry Before Feud Dies

By HAROLD V. RATLIFF
Associated Press Staff

DALLAS, Oct. 23. (AP) — Comment by Texas sports writers varied on Blair Cherry's magazine article about why he quit coaching at the University of Texas.

Some, like Hal Scherwitz of the San Antonio Light, said it was disappointing. "There's nothing in it that hasn't been in the public prints around here more than once—and a lot of time back," observed handsome Hal.

Dick Peebles of the San Antonio Express who identifies himself as writer of a column Cherry reproduced in his story but did not give the name of the author, says: "we haven't been able to figure out whether we should feel happy or slighted." The column had reported that some alumni were trying to fire Cherry.

Bill Rives of the Dallas News takes exception to Cherry's statement that we put Texas on the spot by making it a prohibitive favorite to win the 1950 Southwest Conference championship. "Writers all over the state, including myself, picked Texas last season, the campaign which resulted in Cherry's resignation," Rives wrote.

Jack Gallagher, writing in the Houston Post, says Cherry will go down as an excellent strategist, "but he offered no threat to Freud, Machiavelli and Jung as a psychologist."

CHERRY NEEDLED WALKER

Then Jack tells of the time Cherry needled Doak Walker of SMU before Texas played SMU. He quotes Walker as saying Cherry came over to him and said, "Doak, you better be ready today, because we're going to whip you." So the Doaker told his teammates about it. They got all fired up — and SMU beat Texas. So perhaps Cherry was his own undoing and the sports writers didn't have anything to do with it.

A. C. Greene, sports writer at Abilene, asked Cherry if he had read our column concerning his magazine story and if he would like to comment. Cherry replied that for his part he'd let the feud die. He added that, "I have written my story in the Saturday Evening Post. It can speak for itself."

Harry Gilstrap, sports editor of the Amarillo Globe-News, reads with relish Cherry's pungent article.

Harry apparently thought Cherry put your correspondent in his rightful place when the coach, who quit because of the pressure of the alumni and fans, his health and because he had a good job in the oil business, accused us of unethical tactics.

Cherry said we took advantage of his honesty and quoted him on things we should not have quoted him on, thus putting him on the spot.

Our rejoinder was lengthy, explaining that we had obtained the statements interviews which we did not know were supposed to be off the record. So brother Gilstrap says our answer at such length was not warranted — that Cherry's story was solid and not of the sensational. Harry's inference was that the great, good man should not be criticized at all.

Since we recall a few years ago when Howard Lynch, coach of Amarillo High School, made something of a similar charge against the Globe-News, thus bringing several columns of hot rebuttal in the Amarillo papers, we can not quite consider that Harry is consistent. Lynch, who is no longer coach at Amarillo, though we are not accusing the Globe-News writers of having anything to do with that, had remarked that the paper didn't report the football as it should. Boy! Did those fellows at the Globe-News go to town on Lynch.

We believe the space given by the paper in firing at Lynch was equally as much as given to our column answering Cherry.

And Putt Powell, Harry's coworker, gets into the act. He remarks that Cherry didn't go after sports writers until he had the circulation. As I recall Lynch didn't have the circulation when he took a crack at the press.

LYNCH SHOULD WRITE

Howard should write a magazine article on "Why I quit Coaching at Amarillo High School." He then might have the circulation, too.

Let's talk about Southwest Conference football of which there is nothing more uncertain or exciting.

No one should leave a conference stadium until the game ends. That's the way the games are in this league. Here's an example of what can happen:

James R. Record, managing editor of the Fort Worth Star-Telegram, was at home last Saturday afternoon. He listened to the TCU-Texas A&M game on the radio until the score got to be A&M 14, TCU 0. Figuring that about wrapped it up, Record turned off the radio and took a nap. When he woke up, he tuned in on a newscast. There came over the radio the news that TCU had won 20-14, scoring three touchdowns in about five minutes of the last period.

Boudreau Will Trade Anyone For Strength

BOSTON, Oct. 23. (AP)—Lou Boudreau did not even mention pennant while making his formal debut as the Boston Red Sox' manager for the next two seasons.

Recalling the seven years he required to make the Cleveland Indians the 1948 world baseball champions, Boudreau's only promise was to plug the Red Sox' obvious gaps.

"Our first need is an established catcher, then a dependable doubleplay combination," Boudreau said Monday when General Manager Joe Cronin made the long anticipated announcement concerning Steve O'Neill's successor as Red Sox pilot.

"And we'll trade any one of our players to get the strength we need," Boudreau continued.

"Does that include Ted Williams"? he was asked.

"Yes," Lou replied. "Everybody, Ted included, will be used as trading material to get the players we want."

Williams bears an extraordinary price tag in Boudreau's new managerial books.

"You don't give away a player like Williams who drives in 126 runs for you," he explained. Then, adroitly, he fended a query concerning a Williams deal for Ned Gerver and Sherm Lollar, the St. Louis Browns' star battery.

Baylor Coach Feels Pressure

WACO, Oct. 23. (AP)—George Sauer says being coach of the only undefeated, untied team in the Southwest Conference is like the prisoner waiting for the electric chair.

Sauer is coach of Baylor, which in four games is unbeaten but which now faces what the coach considers the toughest obstacle of the season.

Baylor meets Texas A&M Saturday and it will be on the Aggies' home field with them in a savage mood over losing to Baylor last year and being tumbled from the unbeaten ranks by twice-defeated Texas Christian last week.

Baylor won't be at top strength for the Aggies Saturday, Sauer said. Harold Riley, end, and Walter Bates, guard, have been out with injuries for several weeks and apparently won't play Saturday.

Otherwise the team, which seeks Baylor's first Southwest Conference championship in 25 years, is ready and Sauer said he believed they would be "up" for this one without any urging.

A&M, is a traditional foe and its game with Baylor always is a season highlight. A capacity crowd of 40,000 is due as A&M makes its last stand in the conference race. A defeat now would eliminate the Aggies from the title running.

Stamford One Of Season's Toughest Foes

Dust flying around the Snyder Tiger practice field this week indicates gruelling days of practice for Speedy Moffett's footballers as they strive to make up the deficit suffered in Friday's defeat from Hamlin.

Supplying the push are co-captains Don Keller, N. J. Harrison, and Red Green.

The captains are not even letting the gridders slow down in practice long enough to think they might lose their second district game, which will be played at Stamford Friday night.

Moffett and assistants all agree that the boys must develop the desire to win as well as offensive stability.

According to previous game reports for the two teams, the Tigers will meet one of the hardest-hitting teams of the season. Stamford, which now sits on top of season play with Anson, is undefeated and untied, while Snyder shows a record of two wins, one tie, and three losses.

Stamford last week defeated Rotan 20-0 in its first district game, while Snyder lost to Hamlin 12-6. Among other teams defeated by the Stamford crew are Ranger, Albany, Ballinger, and Winters, none of which the Tigers have met this year.

District 5AA Scores
Anson 27, Colorado City 0
Stamford 20, Rotan 0
Hamlin 12, Snyder 6

Navy Plans Tests On Rocket Helicopter

PASADENA, Calif., Oct. 23. (AP)—A one-man 100-pound helicopter powered by rockets in the tips of two small rotar blades will be tested soon by the Navy.

One-man helicopters have been tested before, but they were powered with gasoline engines, not rockets.

Tiger 'B' Squad Will Meet Lamesa Saturday; Tied in First Match

Snyder High School's Tiger "B" squad has become a crew of optimists this week in preparation for a second tilt with the Lamesa "B" team Saturday night.

Coach Hal Battles this week has confidence in his backfield combination of Quarterback D. C. Carper and Halfback Miles Davis to lead the offensive against the same team the squad tied 14-14 two weeks ago. Carper, a 95-pounder, has shown plenty of progress in his pitch - offs to Davis and his quick aerial passes to End Regan White, who scored both tallies against Lamesa in the previous game.

Most of the linemen are too light or too inexperienced to show much defensive power, Battle said. One outstanding lineman, who Battle reports full of fight is Doug James, a center who anchors the defensive line.

Both theams will use a T formation in the Saturday game in Lamesa.

Plans for Basketball Season Are Made Here

Planning for the high school basketball season began this week at Snyder High School and in District 5AA, Coach Ernest Kinney announced today.

District play will begin Jan. 10 for conference games, Kinney said, while non-conference games will start soon after the end of the football season.

In a recent district meeting at Rotan which Kinney and M. E. Stanfield, superintendent of schools attended, representatives agreed to hold district games on Monday and Thursday nights instead of the regular Tuesday and Friday so that more officials will be available for the games.

The district voted to award the championship team for the coming season $15 to buy a trophy. Members of the district other than Snyder are Hamlin, Stamford, Rotan, Anson, and Colorado City.

Associated Press Poll Puts Tennessee First, Baylor 7th

NEW YORK, Oct. 23. (AP)—Tennessee, the pre-season favorite, regained the top spot today among the nation's college football teams in the fourth weekly Associated Press poll.

Unbeaten Baylor climbed to seventh. Texas, victim of Arkansas, slipped from fourth to tenth. The Texas Aggies plummeted to 16th and Arkansas gained the 19th round.

Sport writers gave SMU 12 points Rice 10 and TCU 4.

California, last week's top team, dropped to No. 9.

The Tennessee Volunteers, who crushed Alabama, 27-13, Saturday, received a whopping total of 70 first-place votes, out of 161 cast by the nation's sports writers and sportscasters to take over the No. 1 ranking.

AGGIES SKID LOWER

This gave Tennessee 1,354 points — a comfortable margin over Michigan State, the No. 2 team, with 1,204 points. Michigan State, a 32-21 winner over Penn State, had 28 first-place votes, and moved up from a third place ranking a week ago.

The rough week-end for several top-ranking teams caused some juggling of the standings among the top 10, but only Texas A&M dropped out of the select group. The Aggies skidded from No. 6 last week to No. 16, after being upset by TCU, 20-14.

Another team moving up is Baylor, now No. 7 after a No. 1 ranking last week. The Bears thumped Texas Tech, 40-20, Saturday.

SEVEN ARE UNDEFEATED

All of the top 10 teams except Southern California, California and Texas are undefeated and untied.

The first ten, with first-place votes in parenthesis:

	Points
1. Tennessee (70)	1,354
2. Michigan State (28)	1,204
3. Georgia Tech (13)	1,026
4. Illinois (12)	875
5. Maryland (11)	841
6. Southern California (13)	711
7. Baylor (2)	621
8. Princeton (2)	523
9. California (1)	435
10. Texas	182
SECOND TEN	
11. Stanford (1)	164
12. Cornell (1)	131
13. Northwestern	122
14. Wisconsin	98
15. Notre Dame	97
16. Texas A&M (1)	91
17. Kentucky (1)	47
18. Washington State	38
19. Arkansas	26
20. San Francisco	18

Others: Michigan and Oklahoma 14, SMU and Cincinnati 12, Rice and Mississippi 10, College of Pacific and Pennsylvania 7, LSU and Washington 5, Miami (Fla), TCU and Tulsa 4, Clemson and Bucknell 3, Holy Cross and Colorado 2, Villanova 1.

Wildcat Test Staked In Southeast Runnels

Saxon Exploration Co. No. 1 Mrs. S. Bixby and others is to be a 4,500-foot wildcat in Southeast Runnels County ten miles southeast of Ballinger.

Location is in section 518, C. H. Willingham survey. That makes it eight miles southwest of the Love-Gunsight sand field.

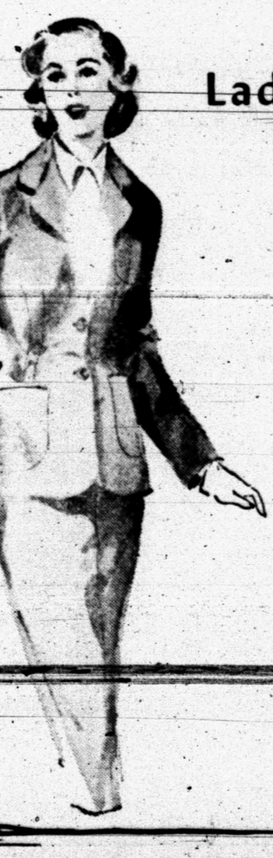
Man! What a Buy! Special Purchase Men's Slacks!
$5.90 each
Every man who sees this collection of Slacks will say that this is the feature item of this great savings event. Famous name ... Hollywood style with continuous waist band, drop belt loops and pleats. Gabardines, Flannels and Sharkskins. Regular $8.95 to $10.95.

Special Purchase 2-Trouser Suits by Clipper Craft
Take another look at that amazing price ... $55.00 with two pair of pants. All-Wool Gabardines, All-Wool Sharkskins, All-Wool Worsteds. You have a grand selection of colors in regulars, longs and shorts. Single or double breasted. This famous brand "CLIPPER CRAFT" sells all over the nation for $75.00. This won't happen but once a year, and then only at Dunlap's.
$55 with two pair of pants
With Only One Pair of Pants ... $46.00



Special Purchase Ladies Suits and Coats
ALL-WOOL COATS
An exciting collection in several styles. Fabrics by Julliard, Forstmann and Miron. True luxury in the season's newest colors. Every one would be priced at $59.95 if they had not been specially purchased. Come and see this sensational value. Sizes 10 to 18.
$39

JULLIARD GABARDINE SUITS
Styles and colors to put you at the head of the fashion parade. These suits carry a label you have worn and loved. If not a special purchase for our Anniversary Event they would be priced at $59.95. Buy your suit now ... at the beginning of the season ... at a savings. Sizes 10-20.
$39

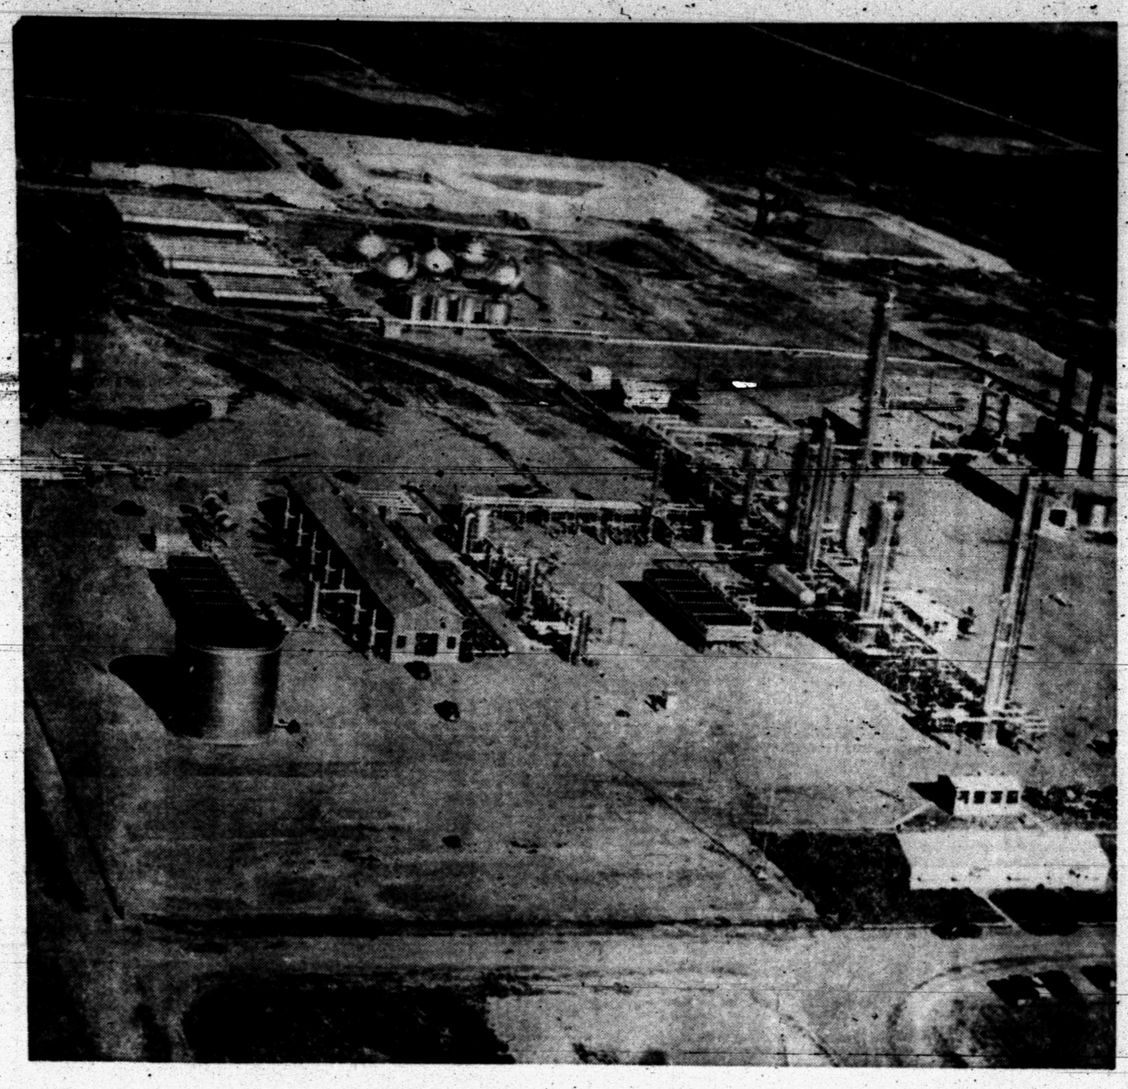
THE SNYDER DAILY NEWS

VOL. 2, NO. 149 SNYDER, TEXAS, TUESDAY, OCTOBER 23, 1951 SECTION TWO

Public Invited to Dedication Of New Snyder Gasoline Plant



All-day ceremonies and a public open house are planned at the $8,000,000 Snyder Gasoline Plant three miles northwest of here Wednesday. Olin Culberson, chairman of the Railroad Commission of Texas, will be the featured speaker. Built in less than a year, the plant will process gas formerly flared from more than 850 oil wells in a 35,000 acre surrounding area.—(Lee Watson photograph.)

The world's largest natural gasoline plant—if measured by total production of liquid hydrocarbons—will be dedicated here in ceremonies beginning at 1:30 tomorrow afternoon when West Texas attends open house at the Snyder Gasoline Plant.

Olin Culberson of Austin, chairman of the state's railroad commission, will make an address just before the public inspection of the $8 million natural gas conservation project which is operated by the Sunray Oil Corp. for some 30 companies and 60 individuals who own it.

Gov. Allan Shivers, who had planned to attend, notified Sunray officials late last week that emergency committments would prevent his presence, but he extended congratulations to the operators in a successful institution of the new plant.

TESTS RUNNING HIGH

Although the plant is still undergoing processing tests, more than 437,000 gallons of liquid products were produced in a single 24-hour period this week, and the plant is also processing approximately 50 million cubic feet of gas each day.

The most significant and unusual feature of this plant is the de-enthanizing absober into which the compressed gas is discharged from the compressors. This is the industry's first field plant adaptation of such principles, although they have been used to some extent in complete refinery practice for several years. It is this unit that takes everything but the final blue-burning commercial flame out of this very rich field gas, making finished production high at the plant.

The richness of this gas from the county's Kelley - Snyder oil reservoir is proving unusually valuable in production of natural gasoline and liquefiable petroleum gases (LPG) known as propanes and butanes. These LPG products are finding a rapidly increasing market due to their uses on farms, in homes, and in industry as dependable multi-purpose fuels.

34,000 ACRES IN PROJECT

The building of the Snyder Gasoline Plant as a cooperative enterprise by the owners and producers in the area means that millions of barrels of rich gas formerly flared as waste when the oil was produced directly to storage tanks are now being channeled to usable purposes through oil - gas separators and processing which extracts the valuable liquids from the "wet" field gases.

The plant is serving an area embracing approximately 34,000 acres of productive leases in the Kelley - Snyder field, producing mainly from the prolific Canyon Reef, and is connected to about 860 producing oil wells in the group.

It is estimated that these acres have recoverable crude reserves of 300 million barrels if no repressuring methods are used. Petroleum engineers now working on recommendations for a Scurry repressuring project hope production can be approximately doubled by unitization if pressure maintenance is instituted.

CONSERVATION BIG FACTOR

On the conservative estimate of 300 million barrels of recoverable reserves underlying the leases served by the plant, it is supposed that the operation of this plant will eventually result in the recovery and conservation of 64 million barrels of liquid products and 200 billion cubic feet of gas, which otherwise would have been wasted by venting to the air as the oil is produced.

If unitization of the field is successful, which will allow repressuring, these figures of conserved barrels of liquid products and gas will be substantially increased.

By incorporating a unique system of two-stage oil and gas separation with interstage heating on the leases into the gathering system and the Snyder Gasoline Plant design, it was possible to effect important savings among which the following were outstanding:

1. More than 3.4 billion cubic feet of casinghead gas were conserved and sold during the 10-month construction period of the plant. If this two - stage gathering system had not been incorporated into the design of the plant, it would have been necessary to vent this volume of gas into the air as waste.

2. More than 1,000 tons of steel critically needed in the nation's defense effort was conserved by going to this two-stage design on the gathering system.

3. Important economies in the amount of fuel gas necessary for plant operation were effected.

4. Stock tank losses of gaseous hydrocarbons were materially reduced due to this two-stage separation system with interstage heating.

PEAK NOT YET REACHED

The Snyder plant was completed in record time for a project of its size and was put into operation in June of this year—only 10 or 11 months after settlement of the process.

The plant design itself is unique in that the de-ethanizer absorber is used, resulting in a minimum number of fractionating columns. Because of this, no re-absorber system is necessary, and elimination of this need further reduces fractionating equipment and the amount of compressor horsepower needed.

The plant is designed ultimately to handle approximately 70 million cubic feet of gas per day and to produce about 574,000 gallons of liquid products a day when peak production is reached.

Liquid products produced are propane, normal butane, iso-butane and various vapor pressure natural gasolines. Products are moved from the plant by tank car and by tank truck. All residue gas remaining after extraction of liquid hydrocarbons is treated for the removal of undesirable constitutents and is sold to gas pipe line companies who have pipe line conections to the plant.

Oilmen Gloomy About Controls Over Economy

HOUSTON, Oct. 23. (AP)—Increased government activity was condemned today by Clarence Manion, law dean of Notre Dame, speaking to the Independent Petroleum Association of America convention.

"If the people of the United States knew as little about electricity as they do about human liberties, they would spend their nights in semi-darkness and much of their days in drudgery," Manion said.

The speaker quoted from Woodrow Wilson who said in 1912: "The history of librety is a history of the limitations of governmental powers."

Oiln Culberson, chairman of the Texas Railroad Commission, gave the official welcome, after the session was opened by Paul F. Barnhard, vice president of the IPAA for Southeast Texas.

SOME CONTROL NEEDED

J. Ed Warren of Midland, president of the association, said, in effect, that while some controls are necessary, it is necessary to fight against their extension to keep the entire economy of the nation from being controlled.

Warren looked with gloom ahead.

"We are attempting to maintain an economy that is partly wartime and controlled, and partly peacetime and free," he said.

Controls to assure war products cause unbalance and bottlenecks which generate the urge for more controls, he said.

Kashmir Not Ready To Sell Its Products

SPRINAGAR, Kashmir, Oct. 23. (AP) — Kashmir, famed far beyond the Indian sub-continent for its handicrafts, is staying clear of the American market until it is certain of meeting its volume demands.

Kashmir woodwork, embroidery, woolens, other products of "home factories" have been carried back to the United States and to Europe by tourist visitors. Demands from buyers, especially from New York, have been a natural result. But Kashmir state officials who direct the thriving home industries program turned down the offers.

"If we go into the foreign market—especially the American market—today and fail we have lost our chance for all time," said one state trading official. "We prefer to wait until our production can supply quality goods in the volume such markets demand."

An official who accompanied Prime Minister Sheikh Abdullah on his last visit to the United States took along a few samples of Kashmir handicraft.

"Buyers saw them in New York, and wanted to buy from us," he recalled. "One man inspected a Kashmir carving set I had. He didn't want a hundred or five hundred of them—he wanted to buy fifty thousand sets. It was frightening."

Today 95 per cent of Kashmir's home industry products — second only to tourism as a money maker—find a market in India. Most of them are sold through Kashmir state operated stores in New Delhi, Bombay, Calcutta, and Sprinagar.

Carved walnut furniture, novel walnut-cased carving sets, rough woolen tweeds, embroideries, and furs, all flown into the state stores to produce much needed revenue for Kashmir.

Most of the products now come from state-organized cooperatives, groups of wood workers, weavers, other fireside artisans who have been joined into larger production organizations. Such groups are guaranteed a fixed price for their products by the state, which in turn markets them through its government operated stores.

Crude oil prices in the U. S. have stayed well below the current inflationary spiral. No general advance has taken place since December, 1947, in spite of higher taxes, wages and material costs.

12 Legislators Achieve 'New Reputations' Among the Public

By Congressional Quarterly

WASHINGTON, Oct. 23. — (CQ) —Some two score Congressmen have jumped into the headlines this year, making new national reputations for themselves as investigators, sponsors of controversial and vital legislation or as party leaders.

The new names frequently are taking the limelight away from such veteran Congressional leaders as Vice President Alben W. Barkley, Speaker Sam Rayburn (D-Tex.); Sen. Robert A. Taft (R-Ohio) and House GOP Leader Joseph W. Martin, Jr. (R-Mass.).

Congressional Quarterly has selected 12 of the newly hailed men and has sought to find what catapulted them onto the news pages. The 12 were picked for their activites this year only. They aren't necessarily the "best" or "most outstanding" of the year—but C-Q's editors regarded them as the newest names in the headlines.

Senators chosen include these Democrats: J. William Fulbright of Arkansas, RFC investigator; Estes Kefauver of Tennessee, crime prober; and Ernest W. McFarland of Arizona, new Senate Majority Leader.

Republican Senators are: Homer E. Capehart of Indiana, sponsor of controversial price control legislation; Everett M. Dirksen of Illionis, chairman of the Senate GOP Campaign Committee; and John J. Williams of Delaware, subsidy and internal revenue bureau prober.

House Democrats include: Laurie C. Battle of Alabama, sponsor of legislation slashing non-Communist trade with Reds; Porter Hardy, Jr., of Virginia, investigator of defense loan and tax amortization programs; and James P. Richards of South Carolina, new chairman of the Foreign Affairs Committee.

House Republicans are: O. K. Armstrong of Missouri, public heckler of Russian Communists; Ben F. Jensen of Iowa, leading House budget - cutter and author of controversial Jensen economy amendments; and Kenneth B. Keating of New York, controversial power amendment sponsor.

Among the group, at least three have been mentioned as possible candidates for President or Vice President in 1952; Dirksen, Fulbright and Kefauver.

SOME LEFT OUT

Congressional Quarterly explained that some "big names" were not included on the list because they already had made national reputations in prior years for activities similar to those attracting attention in 1951.

In this category were such well-known figures as Sen. Joseph R. McCarthy (R-Wis.), hunter of Communists; Paul H. Douglas (D-Ill.) economy axe-wielder; and Karl E. Mundt (R-S.D.), GOP - Dixiecrat peacemaker.

Many others were considered for selection but were not included in CQ's listing. Among this group were these Senators:

William Benton (D-Conn.), sponsor of legislation to oust McCarthy from the Senate; Lyndon B. Johnson (D-Tex.), Democratic Whip and watchdog of military waste; James P. Kem (R-Mo.), author of the original bill throttling trade between Reds and non-Communists; Robert S. Kerr (D-Okla.), Administration spokesman on the General MacArthur controversy; Pat McCarran (D-Nev.), chairman of the Internal Security Subcommittee; Blair Moody (D-Mich.), newspaperman turned Senator who has gone to bat for small business; Margaret Chase Smith (R-Maine), investigator of 1950 campaigns; and Charles W. Tobey (R-N.H.), crime prober.

Similarly, several other House Members who have gained new reputations include Herbert C. Bonner (D-N.C.), investigator of military surplus sales; Emanuel Celler (D-N.Y.), baseball prober; Clair Engle (D-Calif.), opponent of the China lobby and Central Arizona project; A. S. Herlong, Jr., (D-Fla.), sponsor of a measure tying prices to costs; Donald L. Jackson (R-Calif.) investigator of Un-American activities; George H. Mahon (D-Tex.), chairman of the Military Appropriations Subcommittee and Paul W. Shafer (R-Mich.), critic of Administration foreign policy.

VARIED BACKGROUNDS

The 12 "new reputations" leaders picked by C have varied backgrounds and varied "specialties" in Congress.

Half of them are lawyers; five are businessmen, four are farmers and one, Armstrong, is a writer. McFarland and Richards were judges. Fulbright was a university president. Armstrong, Battle and Hardy are sons of ministers. Eight of the 12 are veterans. Keating is a brigadier general in the Army Reserves.

Five of the 12 are Southerners, four are Midwesterns, two are Easterners and one, McFarland, is a Westerner. The Southern majority on committees shows up in the fact that Fulbright, Kefauver, Richards and Hardy made their new reputations as committee or subcommittee chairmen.

All have had considerable experience in legislative activity, including the freshmen. Dirksen is a former member of the House, and Armstrong, a former member of the Missouri legislature. Kefauver and Fulbight also are ex-Representatives.

WHAT THEY DID

Following are the details on the Congressmen who have made new reputations this year—Congressmen who have moved into the spotlight with old standbys.

(For each of the new reputations, CQ has compiled Party Unity percentages—showing the times the Congressman voted with his own party on party-line issues—Bipartisan Support percentages—Showing the times he went along with the majority on a GOP-Democrat bipartisan combine—and On-the-Record scores—showing whether he took every opportunity to be recorded on a roll-call vote. These scores are shown for each Congressman. They may be compared with the average scores, for all Congressmen, which happened to be about 89 per cent for Party Unity and Bipartisan Support and 90 for On-the-Record for the first six months of 1951.)

FULBRIGHT — He gained new fame this year as chairman of the Senate Banking Subcommittee which investigated influence peddling in the Reconstruction Finance Corporation.

One of Fulbright's RFC reports was called "asinine" by the President, but its revelations were followed by a complete reorganization of the big government lending agency. Fed up with what he saw in the investigation, Fulbright became one of the leading Congressional backers of attempts to raise the ethics of government officials. His name has been mentioned frequently as a Vice Presidential candidate on the 1952 Democratic ticket. Fulbright had an above average Party Unity percentage (91), an average Bipartisan support score (80) and below average On-the-Record percentage (79).

KEFAUVER — His name became a household word this year when his Crime Investigation Committee was televised to what was then the world's biggest TV audience. His group held hearings all over the nation, caused the retirement of scores of law enforcement officials and caused state and local leaders to take a sharper look at crime in their own backyards.

Although Kefauver's probe embarrased Democratic officials in several states, he has become a leading possibility for the Vice Presidendtial race next year. Kefauver was above average this year on Party Unity (89), below average on Bipartisan support (71) and below average on On-the-Record (84).

McFARLAND — He was just another likeable Senator when he

Iranian Crisis Booms Demand For Mexico's Oil Production

MEXICO CITY, Oct. 23. (AP)—The rush to buy Mexican oil is on—but Mexico does not have much to sell.

The Egyptians are coming on a buying trip; the Belgians and French are already here. Central America has asked about a sales contract.

Mexico is in sixth place in the world as an oil producer. But she uses two-thirds of all she produces. Last year this left only 23 million barrels for export. This is only about five per cent of the Iranian production, whose disappearance accounts for the rush to Mexico.

Mexican production has increased — it is running this year at the rate of about eight per cent more than last year. Exports this year may be as much as 32 million barrels. But, until big new fields can be found and brought into production, this seems to be the limit.

NEW FIELD HELPS

First figures on 1950 production here were 73 million barrels. Later a report by an impartial foreign observer scaled it down to 70,544,000 barrels. So far this year the production has been running at 6,387,000 barrels a month — 76,644,000 barrels a year.

Some of the increase is accounted for by the new Jose Colomo field in the state of Tabasco near the Tehuantepec Isthmus. The rest comes mainly from older fields which Mexico expropriated from foreign owners in 1938 and later paid for.

Petroleos Mexicanos — PEMEX, the government corporation set up to operate the expropriated properties — is now producing just as much oil as it safely can from the oil fields. In fact, some foreign oil men say oil may be pumped even faster than good oil field practice approves. Also, the fields are being re-pressured — gas is being pumped back into them — to increase the yield. Which means that any increase in production will have to come from new fields. The old ones are producing at capacity.

DOMESTIC CONSUMPTION

Nor is there much hope Mexico can reduce her domestic consumption to provide more export oil, no matter how good the offers she may get from abroad. A large part of her food moves by truck, making gasoline essential. Her railroads use oil exclusively, either in the fleet of new diesel locomotives or in oil-burning steam engines. Hydro-electric plants have barely kept pace with the increasing demand for electric power, so oil-using generating plants are still essential.

Not all the Mexican export figures represent net sales abroad, either. Mexico still buys a lot from the United States. One reason is that Mexican crude does not produce good lubricating oil. The only U. S. oil companies still operating here are those selling lubricants.

Another reason is that PEMEX still has trouble distributing its products in many parts of the country, because of a shortage of tank cars and trucks. For this reason the border area is supplied from the U. S.

U. S. SUPPLIES BORDER

In September, for instance, 389 carloads of oil was the largest single item among imports through Laredo, Texas. This was 18 per cent of all items through Laredo, which handles 70 per cent of Mexico's rail imports.

Before the expropriation, the U. S. took 70 per cent of Mexico's oil exports. Minor amounts went to Britain — 10 per cent — and Guatemala, Holland, Cuba, Italy, France and Panama. Under government operation the foreign market has been broadened but not enlarged.

In 1921 the foreign companies exported 193 million barrels. Mexico sells to all those countries as well as to Sweden, Spain, Norway, Canada, Yugoslavia, Germany, Belgium, Honduras, Spanish West Africa and New Zealand.

But she cannot sell as much as they want to buy.

Czech Refugee Millionth To Be Resettled

GENEVA, Oct. 23. (AP)— Alexander Ranezay, 47, Czech refugee who fled before the Red Army in 1945 with his wife and two children, was celebrated in a blaze of camera lights and oratory here today as the one-millionth refugee resettled by the International Refugee Organization.

Ranezay and his family will leave Bremen, Germany, on the IRO-chartered ship Muir, Nov. 2, for thier new home in Midland, Texas.

After six years as a man without a country in various Austrian refugee camps of the IRO, Ranezay will be at home late next month at 810 West Story Street, in Midland.

The Czech refugee, former estate manager for a Slovakian count, will be gardener and handyman at the home of William Penn, oil engineer in Midland. With Ranezay will be his wife, Maria Julia, a dress designer, and his daughter, Lydia, 21, and Erika, 10.

Ranezay said he was looking forward to farming by modern agriculture methods in Texas. Since 1949, he has been working as driver of the kindergarten bus for the U. S. Army dependents school in Salzburg.

J. Donald Kingsley, director general of IRO, in an address at today's ceremony, said Ranezay represented the near completion of "the most successful and most efficient example of large-scale international cooperation in history."

Ranezay made a short speech in halting English.

"To be a refugee," he said, "means two things: It means your own government is your enemy because you have risked everything for your choice of true libety. It also means that you are unwanted in the country where you are living. There are a million people, who are saying with all their hearts thanks a million."

Legislators

(Continued From Page 2)

was tapped for the job of Senate Majority Leader this year. He now has a big hand in determining party strategy, is official Democratic watchdog over debate and is charged with keeping the Senate's nose to the legislative grindstone.

Since he was handed his new jobs, McFarland's Party Unity percentage jumped to 92. His Bipartisan support is still average at 81, and his On-the-Record score is tops (100).

CAPEHART — His name became well - known when President Truman blasted the "terrible Capehart amendment" to the Defense Production Act. The amendment, Truman said, was "an economic booby trap" designed to force price ceilings up on thousands of items.

Capehart defended the provision as one designed to "roll back the price of all gougers to a fair and reasonable level." He also claimed to be only one of five Congressmen—the rest Democrats—who had worked out the amendment.

The Hoosier has been a leading GOP spokesman this year on foreign policy and was active in the RFC probe. His Party Unity is above average (83); Bipartisan Support is below average (75) and his On-the-Record percentage was about average (89).

DIRKSEN — He has been the most active of freshmen Senators. He is chairman of the Gop senate Campaign Committee and is in line for the next top Committee post open to a new Republican. Dirksen has led economy fights from the GOP side and has taken a key part in debate on foreign aid, housing and rent control.

Dirksen's Party Unity has been above average (92); his Bipartisan Support below average (68); and On-the-Record was about average (90).

WILLIAMS — He started his Internal Revenue probes when his own income tax reports were mishandled. Since then his quiet work has resulted in several resignations and firings of Internal Revenue officials throughout the country. He has hit at the national chairmen of both parties for their dealings with the RFC.

The former Delaware feed dealer says he has just started on his income tax investigations. Williams was above average on Party Unity and On-the-Record (87 and 94) and below average in Bipartisan Support (65).

BATTLE — This legislator was sponsor of one of the most debated bills of the year — legislation to cut off U. S. aid to any nation selling war materials behind the iron curtain. The Administration supported the bill after a stiffer resolution had been pushed through earlier in the year. The Battle resolution eventually won out.

Battle was above average this year on Bipartisan Support and On-the-Record (91 and 95) and below average on Party Unity (67).

HARDY — He was chairman this year of a House investigating group which uncovered several page-one stories on loan and tax policies in the defense agencies. His report denounced rapid tax write-offs and over - liberal loan policies. Brig. Gen. David J. Crawford was transferred from the Detroit Army tank arsenal after Hardy revealed he accepted favors from ordanance contractors.

Like many southerners, Hardy has a below - average Party Unity percentage (70) and high Bipartisan and On-the-Record scores (91 and 98).

RICHARDS — He was put in the chairman's slot of the powerful House Foreign Affairs Committee this year. In this position he has been responsible for all foreign aid bills. His Party Unity score is below average (58); his Bipartisan Support (90) and On-the-Record scores about average (88).

ARMSTRONG — This man has been in the news as a continuing critic of the Administration's foreign policy and a heckler of the Russian Communists. He made news by handing Russia's Gromyko a map showing 175 "slave labor" camps in Russia. Missourian Armstrong has been above average on Party Unity (90) Bipartisan Support (88) but below for On-the-Record (85).

JENSEN — This veteran legislator was author of the highly publicized economy amendment added to six regular appropriations bills this year. the House and Senate deadlocked over this amendment The bills were held up until a compromise was worked out. Jensen was above average on Party Unity and On-the-Record (98 and 99) and below average on Bipartisan Support (67).

KEATING — He was sponsor of a controversial power amendment which raised again the public vs. private power battle in the West. He also has been active in economy moves and in attempts to streamline the government along lines recommended by the Hoover Commission. Keating's Party Unity and Bipartisan Support scores have been below average (70 and 79); his One-the-Record score is 100 per cent.

THE ADVENTURES OF PATSY

Oil Industry Given Tribute By Ken Reagan

KEN REGAN

By KEN REGAN, Rep.

WASHINGTON, Oct. 23. —Another year has rolled around and again we recognize the oil industry which has contributed so much to the progress, development and wealth of West Texas.

I am honored to have a part in expressing my congratulations to those of you in that business throughout the West Texas area and to further assure you that your interests are mine in attempting to do all things that will be in the interest of advancing legitimate activities.

It is most gratifying to know that this vast area has already produced more than four billion barrels of petroleum with estimated proven reserves remaining in excess of 10 billion barrels and with unlimited areas not yet prospected or developed.

In discussing our part of the country with many of the active operators, I have heard it several times repeated that our West Texas area is the last great hunting ground in the United States for substantial flowing production of crude oil.

VALUABLE BACKLOG

It is unnecessary for me to point out the many great advantages the discovery of this new wealth has brought to our section of the country and many individual communities as is obvious to all who reside here.

It is becoming generally known, not only to the people of the United States but the world, as a vast petroleum reservoir, which not only contributes so much to the economy of our particular section but to the entire United States in time of peace and in turn becomes a most valuable backlog of one of the most vital sinews for defense of our country.

INDUSTRIAL GROWTH

There has been a vast production of oil and gas already established in our area. It is reasonably expected that our part of the country may see a substantial industrial growth through additional establishment of carbon black plants, refineries, and other industries which would use large volumes of both oil and gas as the basis for their operations.

In addition to the present known reserves in our West Texas area, it is also recognized that the tidelands area along the Gulf has potential possibilities for discovery of additional petroleum.

It is gratifying to know that the House again through a substantial vote expressed itself in favor of the states' rights to these tideland areas and it is to be hoped that the Senate will soon act favorably on this bill that will quit claim any interest the federal government might claim to all that area along the Texas coast extending three leagues into the Gulf or approximately 10½ miles.

DEPLETION ALLOWANCE

Each year increasing demands are made of Congress to reduce or repeal the 27½ percent depletion allowance on petroleum production. But during these many years, it is becoming increasingly manifest that this depletion allowance is not only fair and justified but through it risk capital has gone forward in a great program of development which meets our demands in peace and has been accelebrated in time of war or great national need.

As chairman of the sub-committee on Mines and mining in the House, I feel particularly favored in being in a position to better serve those in the oil and gas exploration and development business as most bills introduced in Congress having to do with leasing and oil development are referred to this committee.

FINE SERVICE

I have been constantly in touch with the Petroleum Administration for Defense, and have been more than pleased with the fine service it renders, and with Richard Lawton, a former independent operator of El Dorado, Ark., who is trying to do all possible in a fair allocation of steel. He is doing his best to supply all legitimate requests for well pipe, and although he is fully aware that is a tremendous job, he is encouraged in believing that all legitimate demands will be pretty closely met.

I feel the oil fraternity is fortunate in having a man of his abiltiy and knowledge of West Texas in this important post in government and hope the oil fraternity will join me in expressing appreciation to him for his sacrificial service to the oil industry.

I have supported every economy in government coming before us in the belief that drastic and substantial economies should be practiced. I voted against the recent tax bill in the full belief that through reductions in non-essential expenditures we could balance the budget without additional revenue, and am thoroughly convinced that my position was sound.

One Killed, 3 Injured In East Texas Wreck

HOUSTON, Oct. 23 (AP) — Mrs. Susie Bjorch, 62, was killed and three other persons were injured in a three-car collision here Sunday night.

Charges of negligent homicide and assault by automobile were filed in justice court against the husband, John L. Bjorch, 64, of Longview.

Injured were Bjorch, and Mr. and Mrs. James A. Elkins Jr. of Houston. Elkins is president of the City National Bank.

The driver of a third car, Carl E. Lee of Houston, told officers his car was lightly sideswiped when he swerved to avoid a car traveling on the wrong side of the highway. He said the car that nicked him then crashed into the Elkins' car.

Ninety-nine per cent of all locomotives ordered by U. S. railroads in 1950 were diesel-powered.

CONGRATULATIONS.....

SNYDER GASOLINE PLANT

Formal Dedication Wednesday, October 24

THIS NEW PLANT MEANS ADDITIONAL PROSPERITY TO THIS RICH AREA

HIAWATHA OIL and Gas Co.

Milam Bldg. San Antonio, Texas

When you want a little onion juice to flavor a salad dressing, sprinkle a little salt on a slice of onion and scrape the salted surface with a knife or spoon to obtain the juice.

When you're stuffing a turkey take care to put in the stuffing will make the stuffing soggy and loosely because it swells during the roasting process. Ov—packing may burst the bird.

The Snyder Gasoline Plant presents an even more spectacular view at night than during the day. Above, the plant is shown as it reflects light from the huge flare which illuminates a big section of the county at night. When additions to the plant are complete its capacity will be raised to the point where none of the gas coming into it will have to be flared.

ACTING HEAD—Richard M. Bissell, Jr. (above), has been designated by President Truman to be the Acting Administrator of the Economic Cooperation Administration.

Special Laboratory In Dayton Checks On Russian Armament

DAYTON, O., Oct. 23. (AP)—The Air Force is peeking over Russia's shoulder — in a laboratory.

The laboratory is the U. S. Air Force Technical Intelligence Center at nearby Wright-Patterson Air Force Base. What goes on there is so secret even workers themselves can't get in the restricted area without special code numbers on their passes.

An electric "code verifier" flashes like a metal detector in a prison when each of the workers check in or out. Armed guards will stop you, if you walk 10 feet inside the area without an escort.

A carefully screened, select group of officers and civilians works at the center. Engineers, photo interpreters, metallurgists, scientists and specially trained evaluation experts of all kinds are putting the enemy under the microscope 24 hours a day, studying North Korean Communist equipment as well as Russian equipment.

What these technicians do, the technique they employ and how much they learn is a secret locked behind the laboratory fences. But, of technical information about the their prime job is to get every bit of technical information about the enemy, evaluate it and make the information available to our fliers in combat.

More than 100 tons of captured North Korean, Chinese Red and Russian equipment have been shipped thousands of miles from the fighting zone to the Ohio intelligence center. Some was flown here. More came by ship.

One big item is a MIG-15 jet fighter taken by an air intelligence team shortly after it was shot down in Korea.

"It was fairly intact," an officer said, "but there wasn't enough to warrant reconstructing it and flying the machine."

The officer explained, however, the Air Force could build an MIG-15 and fly it, if it wanted to. There's another MIG15 at the base these days. But's it's a pile of junk now. A mass of turbine engine cowlings, wires, seats, tailpipe from a jet engine, rudder fin and elevators stacked in a storeroom. It was more complete when they got it, but they took it apart and studied it, piece by piece.

Col. Harold E. Watson, pointed to the pile of junk.

"Sure, we learned a lot of things about it. But, we're only telling our own interested agencies. That's what makes our work so tough. It isn't that we're afraid to tell the Russians about the MIG. They know all about it. But they don't know how much we know."

The warehouse looks like a Russian junkpile, with here and there supplies of intact equipment. There are racks of clothing worn by North Korean Navy, Air and Army officers.

There are oxygen masks, gloves, flying jackets, boots, helmets, new engines of a reciprocating type used by Russians in transport planes.

In warehouse cubby-holes, is a partly intact Russian IL-11 two-seater trainer. The wing is in good condition. The fuselage, however, is partly shot-up.

Just a junk heap? Yes, but it told U. S. experts many things. For instance, the plane was armed. Allied trainers are not.

What kind of things do the experts learn when they peer over the shoulder of the Russian bear?

Well, the warehouse has some machineguns taken from the Russian MIG's. They are larger and heavier caliber than the guns in our F-86 Sabre jets. But they fire less rapidly and the Sabre has more guns.

Maybe that is one reason American jets are shooting down MIG's in Korea today.

Air Force Teaches Its Crews To Survive In Rough Country

By JOSEPH J. LIPPER

HIGH SIERRA, Calif., (AP)—The Air Force is telling its bomber crews to get lost in the wilds so they'll learn how to survive.

That's why I'm supposedly lost and trying to survive with a B-29 crew from Travis Air Force Base.

Of course, we know that help isn't far off. It isn't as though we are stranded in, say, Alaska or the Arctic Tundra. But we get the idea.

Every crew in the Stretegic Air Command is required to take a course in survival in rugged terrain.

Each week, a half dozen bomber crews from Travis, halfway between San Francisco and Sacramento, are driven up into a wilderness area in the Sierra, given a couple days of instruction and left on their own.

GRIB FOR FOOD

Since early this morning, we've been grubbing for food — deer, rabbits, fish or anything else in nature's pantry.

When dawn cracked over the pine-covered mountains, our plane commander, Capt. Mez Lubischer flushed us out of sleeping bags with:

"Okay, men, no canned rations today. You're a bunch of Daniel Boones. You got scrounge for your food."

We have hunting knives, a .22 caliber Hornet rifle that comes in a bomber escape kit, and a parachute.

An instructor showed us how to make more than 35 survival a[illegible] from a parachute — things like tepee, rabbit snares, snowshoes, fish net and [illegible].

Our [illegible] Norma Hart, [illegible] with a [illegible] parachute shroud [illegible] look so far. We're growing [illegible].

[illegible] PARTY TENNT

Generally, downed crews will have more equipment than we have on this trip. Each plane carries [illegible] with 22 rifle, contains a [illegible] ax, food rations and a [illegible] radio man is supposed to [illegible] with a hand-powered radio, with a range of 2,000 miles.

"But we like to teach the men to get along on the barest of equipment," Burnett explained.

Lt. Gen. Curis Lemay, boss of the Strategic Air Command, is credited with inaugurating survival training. Officers say that if he notes a plane commander can't lead his men in the wilderness, he is rated down in proficiency reports.

Wlel, so far, all we have to eat is a squirrel shot by Sgt. Kenneth Olson.

"That won't feed 12 men," says Capt. Lubischer "I think I'll go out and check on the other men."

GAME IS SCARCE

This may have been happy hunting grounds once. But too many bomber crews have been here before us. Game is scarce. Fishing is poor.

Finally Lubischer says "okay" and we build a fire, break open the in-flight rations and eat. The rations, carried by Air Force planes, are rich— everything from canned beef steaks and ham 'n eggs to dessert and soluble coffee. Napkins, too.

The captain points to the mountain ahead of us. Tomorrow we'll climb out of here. Seven miles away trucks are waiting to take us home.

Wonder if we really survived?

The tireless search for new U. S. oil reserves goes on constantly. More than 20 million acres are under lease for exploration in states which up to now have had no production.

Three out of every four barrels of crude oil moving to U. S. refineries are carried by pipe lines.

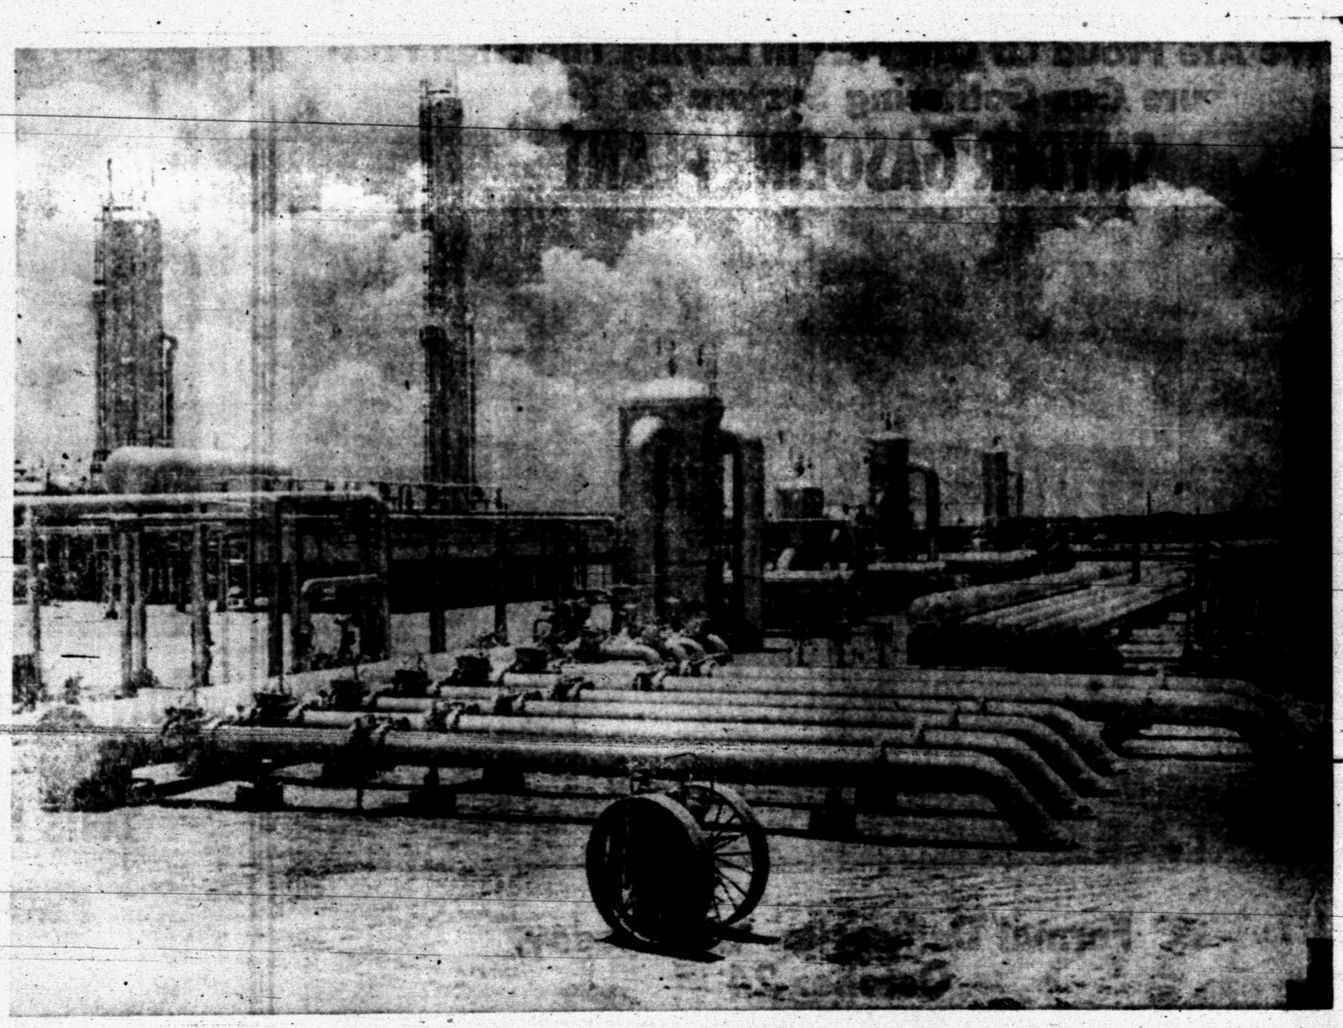
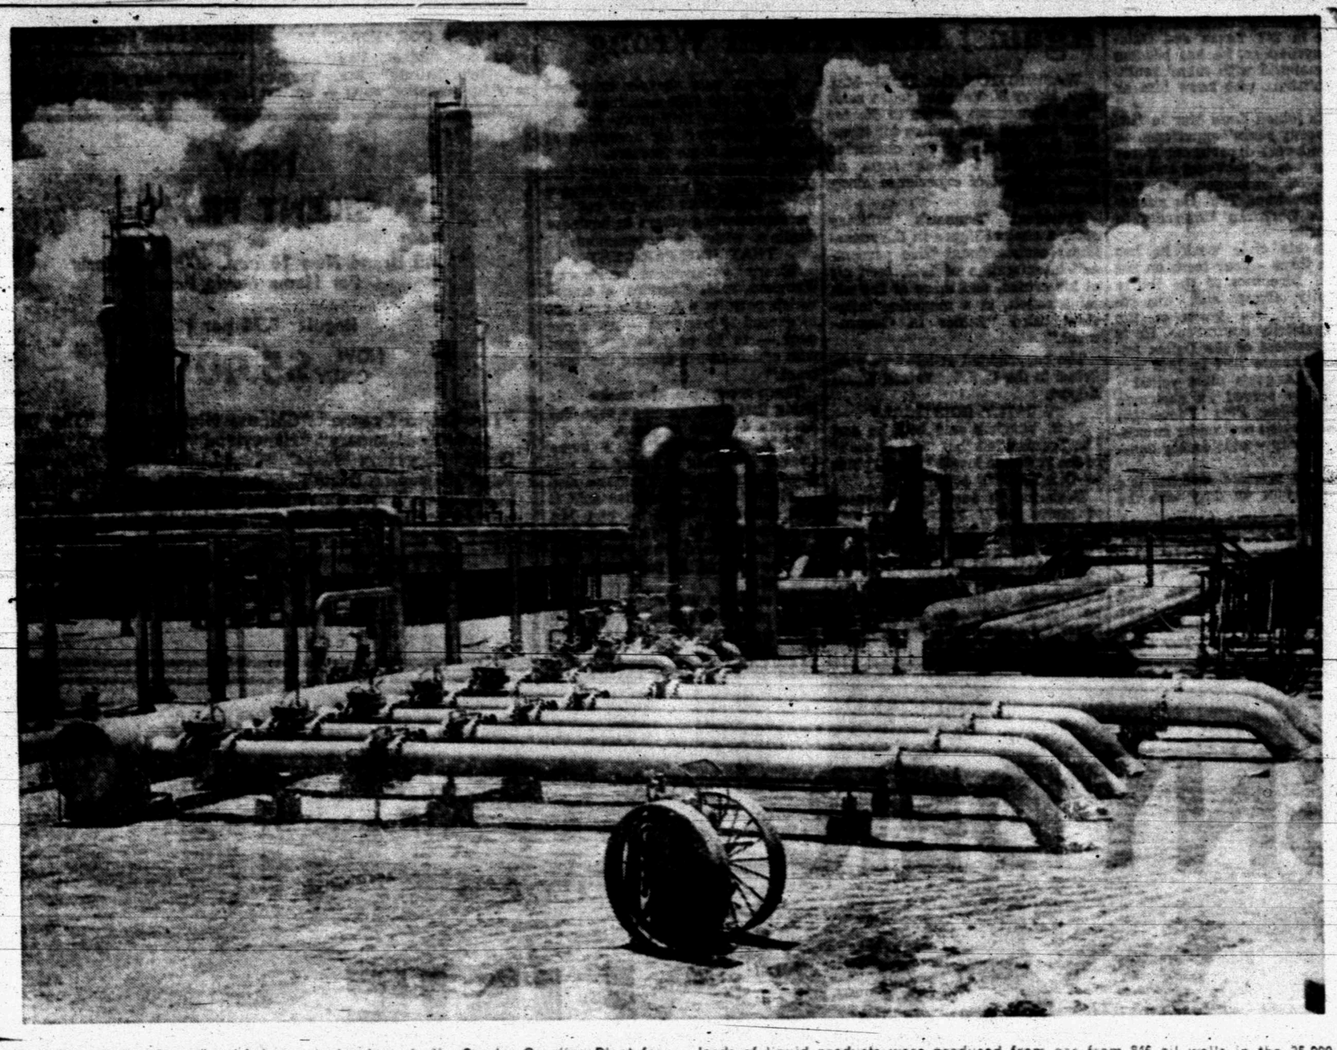
SNYDER GASOLINE PLANT
The World's Larges Gasoline Plant Measured In Liquid Production
Wednesday October 24th



OUR SINCERE GOOD WISHES
Cities Service Oil Co.
BARTLESVILLE, OKLAHOMA



Pipes in the foreground bring casinghead gas to the Snyder Gasoline Plant for processing into liquid products and natural gas. After being put under high pressures, butane, isobutane, propane, and natural gasoline are extracted from the casinghead gas in the $8,000,000 plant. During July, 497 rail tank cars, and 773 truck loads of liquid products were produced from gas from 846 oil wells in the 35,000 acre area surrounding the plant and shipped to consumers.—(E. J. Mills photograph.)

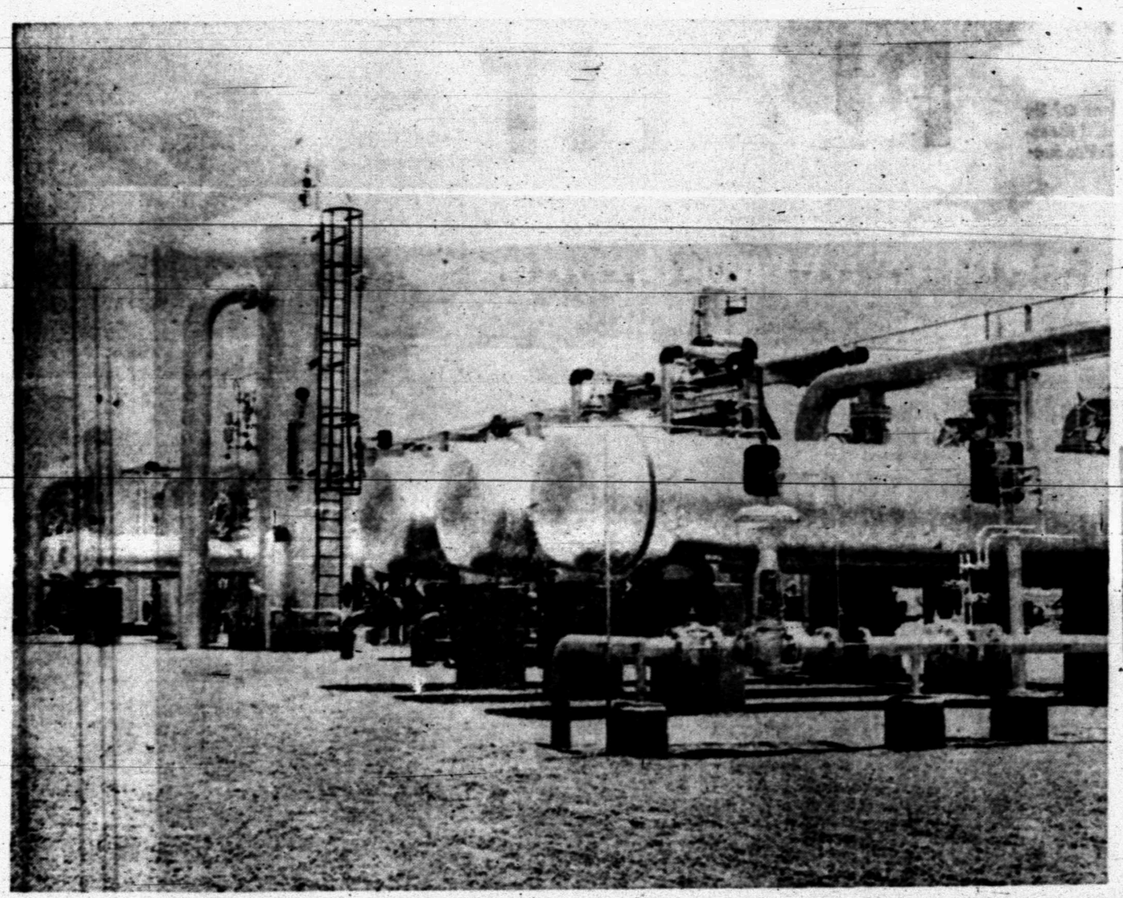
These huge towers do the actual separation of liquids from the gases at Snyder Gasoline Plant. Debutanizer, depropanizer, and absorber towers in the fractionating area form an impressive skyline for the plant which covers 70 acres of land. The plant was constructed under the supervision and is being operated by Sunray Oil Corporation.(E. J. Mills photograph.)

DEDICATION OF BIG PLANT

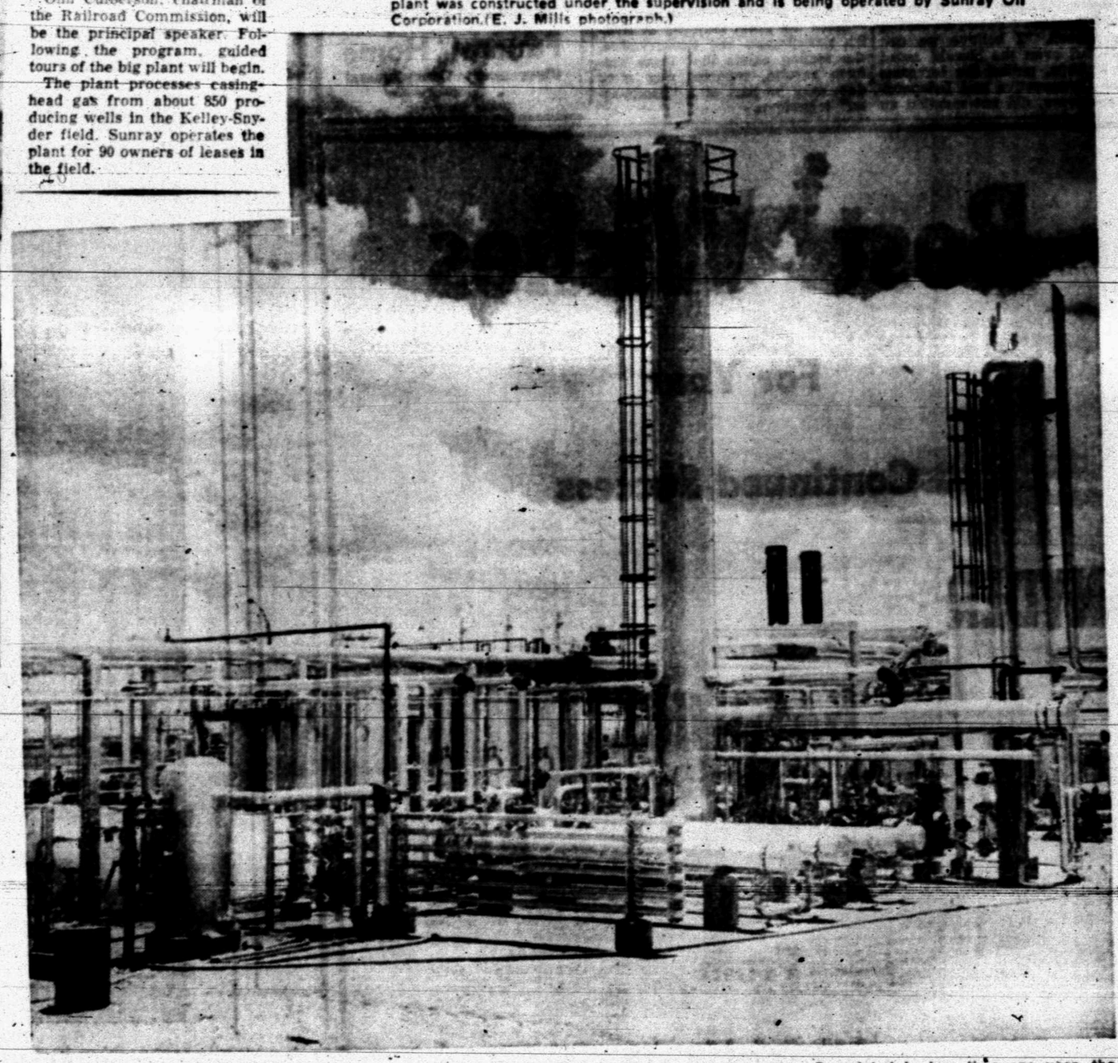
The Snyder Gasoline Plant, world's largest natural gasoline plant measured in terms of liquid products derived, will be dedicated in public ceremonies beginning at 1:30 o'clock tomorrow afternoon.

Olin Culberson, chairman of the Railroad Commission, will be the principal speaker. Following the program, guided tours of the big plant will begin.

The plant processes casinghead gas from about 850 producing wells in the Kelley-Snyder field. Sunray operates the plant for 90 owners of leases in the field.



Tanks in the foreground are where liquid from the fractionating towers settle before being piped to storage areas. Much of the casinghead gas which comes to the plant from oil wells goes away as natural gas to be sold to consumers by Lone Star Gas Co., and El Paso Natural Gas Co. The plant extracts butane, propane, isobutane, and natural gasoline from the casinghead gas. Seven 1,350 horse power compressor engines put the low pressure gas from the gathering system under high pressure for processing by the plant.—(E. J. Mills photograph.)



Casinghead gas flows through this maze of pipes and valves soon after it enters the Snyder Gasoline Plant area. Still at low pressure here, processing has just begun. Present capacity of the plant is 70-million cubic feet of gas per day, but planned additions will increase its capacity. Completed in less than one year, the plant has shut off most gas flares in is area. About 250 men were employed daily. (E. J. Mills photograph.)

Churchill Promises to Revive Famous Liverpool Cotton Mart

LONDON — Winston Churchill's Conservatives have formally promised to re - establish the Liverpool cotton market if they're returned to power in this month's election. Lancashire cotton men, however, say this will take months or even years, according to the Wall Street Journal.

Before World War II, the Liverpool market was the center of the world's cotton trade and one of Britain's biggest earners of foreign exchange. It was shut down during the war, and the Labor government refused to reopen it when peace came, substituting government bulk buying of cotton instead.

"Getting it going again after 10 years of idleness will be a much tougher job than unscrambling the nationalized steel industry," says one leading Lanchashire cotton man.

STAFF HAS SCATTERED

For one thing, many of the experts who used to run the cotton exchange have scattered, and it would take time before a trained staff could be assembled to re-establish the market.

Another hurdle: Today's foreign exchange snarls. Half of Lancashire's cotton needs involve buying staple from hard - currency areas. "We would like to make big purchases of American cotton," declares one pre-war cotton broker. "In fact, we would like to take as much as they would sell us. But how can private traders find dollars to pay for these imports?"

Lancashire cotton men think that if the Liverpool market is going to be re - established as an international mart, the government will have to help overcome the knotty problem of exchange control.

A substantial amount of capital will also be needed to resume operations because of the tremendous post - war rises in the price of raw cotton. Large Lanchashire cotton spinning firms and American shippers may be invited to assist financially in getting the market under way.

THE SITUATION TODAY

Today the government's raw cotton commission buys fibre for Lancashire's needs only. If the Liverpool cotton market is to be re-established on its pre-war basis as an international cotton exchange much greater quantities will have to be bought to satisfy the needs of other nations, too. The snag, according to cotton merchants, is much of this cotton would have to be bought in the U.S. for dollars —and then resold to soft - currency countries for other kinds of money. Britain would have to devise a means for averting this kind of dollar drain, which it could ill-afford at the present time.

In a recent speech, Mr. Churchill reaffirmed his intention to re-establish the Liverpool cotton market if returned to power, but he cautioned:

"It is much easier to destroy than to rebuild. The resources of the market in men and capital have been scattered. They cannot be re-assembled by a gesture. We should do every thing in our power to retrieve it and bring it back to life but time will be needed in this, as in many other directions, to undo the harm so wantonly done."

Opinion Still Points Toward Conservatives As Vote Nears

LONDON, Oct. 23. (AP) — British election campaigning moved into the closing stages today, and political forecasts were almost unanimous in predicting victory for the Conservative Party led by Winston Churchill.

Voters go to the polls at 7 a.m. (1 a.m. CST Thursday).

Latest reports today from political soundings all over the United Kingdom, as reported by London newspapers, told the same story with varying details — a forecast the Conservatives will defeat the Labor Party.

Estimates of the expected Tory majority in the House of Commons ranged from 43 to 100 seats.

The single dissenting opinion came — as was expected — from the Daily Herald, a Labor Party journal.

LABOR IS CAUTIOUS

It quoted Morgan Phillips, secretary of the Labor Party, as saying in a speech, "I believe we can win." But even the Herald noted that Phillips, unlike the forecasts of the Conservative and Independent observers, did not mention an estimated figure in the next House of Commons.

The majority of editors on local newspapers throughout Britain believe the Conservatives will capture the government by 76 seats, the Bournemouth Times reported. The editors were asked to forecast the result of the election in their own districts.

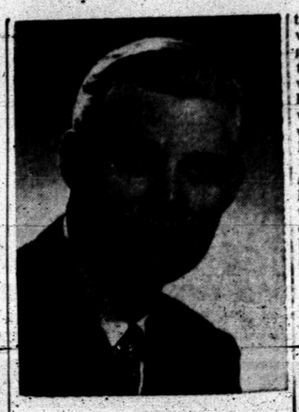
It is a notable fact that, throughout this campaign, the heavy weight of opinion — as reported in public opinion tests of various types and shapes — has favored the Conservatives.

The Herald dismissed these findings today with the line: "Let them Gallup — we can win."

ACCURACY QUESTIONED

Not every political observer in London, by any means, is convinced of the accuracy of the polls.

Since the great majority of British newspapers are Conservative, the feeling exists that these uniform results, reported day after day, may be part of a "bandwagon" technique.



L. C. Roberts

L. C. Roberts Heads Gas Co. Advertising

Appointment of L. C. Roberts of Dallas to succeed the late J. M. Floyd as advertising director of Lone Star Gas Co. has been announced by D. A. Hulcy, president.

Roberts has been with Lone Star for the past 18 years, all of this time being spent in various capacities in the advertising department. In 1942 he was made advertising supervision and in that position he initiated and carried through many successful Lone Star advertising and sales promotion programs.

In commenting on Roberts' appointment, Hulcy said that "because of Lone Star's ever - expanding advertising and merchandising programs to promote the sale of modern automatic gas appliances through more than 1,500 dealer stores and our own offices over the system, we are fortunate in having a man whose entire business experience has been in the important field of merchandising.

"His special knowledge and experience will be most valuable in the development of this area's unlimited market for the various types of gas - operated air - conditioning equipment. Roberts is well known among our people for his thoroughness and planning ability. He is no stranger to the retailer and his problems for he has worked with many in developing gas appliance sales programs for them. In placing Lone Star's advertising in 247 Texas and Oklahoma newspapers, he has become well acquainted with many southwest publishers who know him as Bob."

Roberts joined Lone Star in 1933 after several years' experience in large Southwest department stores where he was advertising and sales promotion manager. He was born in Brenham, Tex. He attended Texas Christian Univerlity in Fort Worth.

Among his civic work he has served a three - year term on the Board of Directors of the Dallas Community Chest and was co-chairman for two years of the Chest's publicity committee. He is a past president of the Dallas Advertising League and in 1945 was voted the League's most valuable member. He served as chairman of the Dallas Fire Prevention Council in which postion he launched several city - wide safety campaigns.

Roberts is married and has one son who is now on duty with the Air Force.

Dewey Reported Ill

ALBANY, N. Y., Oct. 23. (AP)—A virus infection has forced Governor Thomas E. Dewey to cancel all engagements for the next few days.

Harry Vaughan Says Criticism Against Him Proven Wrong

WASHINGTON, Oct. 23. (AP)—Maj. Gen. Harry H. Vaughan today said: "It is sometimes easier to die for your country than to live for it under the attacks of the character assassin, and I speak from no mean amount of experience along those lines."

President Truman's military aide, a central figure in the sensational congressional "five percenter" investigation of 1949, teed off at his critics, and those of the administration, in a magazine interview titled "Ethics in Government."

The copyrighted article was published in the U. S. News and World Report.

"MOSTLY POLITICAL"

In it, Vaughan said both he and Mr. Truman felt that "99 per cent" of the criticism leveled against him in Congress "is political."

Declaring "I have been accused of more things than almost any man in public life today," Vaughan added:

"The fact that practically all of the accusations were disproven completely on investigation makes no difference the reputation never catches up with the headline innundo."

Vaughan was sharply criticized by the Senate subcommittee which conducted the 1949 probe into influence peddling, for accepting as a gift seven home freezers.

The committee was probing into the activities of men who charge a fee — sometimes five per cent — for representing others in business dealings with the government.

THAT FIVE PER CENT

"Every government contract," Vaughan said, "carries a clause which permits a fee of a sum not to exceed 10 per cent — not 5 per cent — to be paid to any agent who assists in negotiating that contract."

There are people who make their living that way, Vaughan said, but he was not one of them.

Of his acceptance of a home freezer — other Washington notables including the Trumans also received them — Vaughan said it was delivered while he and Mr. Truman were in Potsdam. Later, when he learned who sent it, he said he offered to pay for it but was refused.

He said the sender, Dave Bennett, president of the Albert Verly Co., never did business with the government and never attempted to do business with the government."

HOPES FOR 'MIRACLE'

On other subjects, Vaughan said:

1. He's "afraid" Mr. Truman may be prevailed upon — against his wishes — to return to the White House for another term, "although I still hope for a miracle."

The port city of St. Malo, France, is a 65-acre granite island.

Pro and Con Arguments Given On Constitutional Amendments

AUSTIN, Oct. 23. (AP)—"If you ask me," has said many a Texas taxpayer, "I could tell the state a thing or two about taking care of money."

Now it has happened.

The state is asking you a thing or two about spending money and probably nothing would make it happier than to have every taxpayer answer — at the polls Nov. 13.

There'll be five proposed changes in the state's constitution to vote on then and every one of them involves a major money policy.

To help the voter decide whether the changes are good or bad, the Texas League of Women Voters has prepared a folder which sets out the agruments both for and against each one of the proposed amendments.

Members say they aren't interested in HOW you vote — just that you DO vote.

Here are excerpts from some of the arguments, taken in the order the amendments will appear on your ballot.

RETIREMENT SYSTEM

No. 1. To authorize a statewide system of retirement and dis bility pensions for county appointive officers and employes.

Those who are for it say county participation would be entirely voluntary and would first have to be authorized by voters of a county before it could be put into operation there. Administration of a unified system would be less expensive. It leaves decision of financing up to the individual county, providing only that the state would pay no part of the benefits.

Those who are against it say Texas already has laws adequately providing for setting up of retirement and disability funds for county officials and employes. It does not provide that both the county and employe contribute to the fund and does not provide death benefits. Employes couldn't be placed under the federal social security act if covered by another government retirement system.

BOND INVESTMENTS

No. 2 To permit the investment of the permanent University of Texas fund in securities other than bonds of the United States, the State of Texas and certain municipal bonds.

Proponents say income of the fund would be materially improved, reducing demand on the state's general revenue fund for appropriations. Other leading American universities have already broadened their investments to include high-grade common stocks, returning 4 to 6 per cent, compared to the university's 2½ per cent last year.

Opponents say complications of an undesirable nature could result if abuses ever developed in the choice of stocks and if the economy of the country should run into a deflationary period.

No. 3. To authorize a maximum tax of 50 cents on each $100 valuation of property in rural fire prevention districts to provide equipment and personnel for fire fighting.

VOTE OF PEOPLE

Friends say the tax cannot be levied except by a vote of the people living in the fire prevention district affected. Adequate fire prevention facilities will result in lower fire insurance rates and better protection to property.

Opponents claim the amendment doesn't limit the size or power of such districts or define rural fire prevention. Commissioners courts already have power to purchase county fire fighting equipment.

No. 4 To permit the total amount of bonds that may be issued by the veterans' land board to be $100 million instead of $25 million.

Those in favor of it say the amendment will not cost the state any money as the program has proved self sustaining. Veterans can better afford to buy farms and ranches under the long-term, low interest program and more idle land will be put into production.

Opponents contend the expanded program may not prove self sustaining. The bonds issued are a binding obligation on the state and might prove a terrific burden if bad times brought many defaults in payment of the veterans's notes.

No. 5. To increase from $35 million to $42 million the limitation in state assistance to the needy blind, the needy aged and needy children.

OPPORTUNITY TO IMPROVE

Those for it argue the amendment offers an opportunity to improve the state welfare program by increasing the maximum aid payments. Present allotments are too low to provide bare necessities in today's high costs.

Opponents claim the amendment removes citizenship requirements for recipients, thus opening the pension rolls to a flood of aliens with five years residence. That would likely reduce individual payments so there would be enough money to go around instead of increasing individual payments.

Abe Burrows Claims To Be Well Traveled

NEW YORK, Oct. 23. (AP)—A man who looks like a prime candidate for the grunt and groan wrestling industry, Abe Burrows, now is well established as one of the most eloquent wits and stage directors in Broadway show business.

In addition he is a top flight writer of stage and television shows as well as being author of songs with titles which, at first glance, make you reach for the comforting folds of a strait jacket.

Burrows attributes his gift for writing witty and colorful dialogue to the fact that he is a "widely traveled man," but he is no globe trotter. Born in New York, he lived in Manhattan, then in the Bronx and then in Brooklyn. This footloose existence brought him in touch with all the widely varied and colorful neighborhoods of New York and in his memory is a vast library of every type of humor and customs from every section of the world.

"A lot of playwrights have trouble writing dialogue," he said, "because they try to write grammatically and people just don't talk grammatically.

They try to write speeches that are too long. Bernard Shaw wrote some long speeches, but he had a great gift for brevity in speech.

"When you are on a stage you are asking people to pay money to be quiet. In that case, brevity is important."

Burrows is now represented on Broadway as co-author of the Damon Runyon musical, "Guys and Dolls", and as director of the musical revue, "Two on the Aisle". Both are hits. He is both writing and directing the forthcoming "Jamie." ("Guys and Dolls" ends a Texas State Fair engagement Sunday.)

The jovial writer-comedian didn't start his career as a writer. He left New York University as a salesman of two such incongruous wares as wall paper and maple syrup. He soon discovered that his gags were going over great with the customers, but they wouldn't buy any wall paper or maple syrup. So he started to sell his gags and soon became head writer on Ed Gardner's "Duffy's Tavern" program. This led to television, and now to his multitude of activities on Broadway.

RECALLING THE PAST — Captains "Doc" Blanchard (left) and Arnold Tucker visit with their West Point teammate, Glenn Davis, at [illegible], N. Y., as the famous "Mr. Outside," now playing pro f[illegible], takes time out from practice.

Mother And Daughter Team Are Together In Broadway Chorus

By ADELAIDE KERR

NEW YORK, Oct. 23. (AP)—Deborah Ramsen is one of the few chorus girls who can say to the next chorine in line:

"Mother, lend me a pin."

Deborah and her mother, whose stage name is Lily Paget, are both in the chorus of the hit musical, "Call Me Madam."

Both mother and daughter - the family name is Stoller — have small parts — Deborah as a secretary and Lily as a maid. But Deborah has the most lines, — five to her mother's one. Lily was there first, though, and helped coach her daughter when she auditioned for the job. She even lent her her best dress to try out.

NOTHING NEW

Teamwork is nothing new to the Stollers. It began when they lived in Paris. Deborah was only a baby when her father, Alexander Stoller, sculptor, urged her mother to start the singing lessons she had always longed for, because he believed she had a voice with a future. So Brier Stoller began her scales: her husband went on with his work and they took turns babysitting with Deborah.

After they came back to the United States, Brier Stoller made her debut in the Cincinnati Opera Co. as Elsa in "Lohengrin." Then came World War II and Stoller here went to the OWI. Mrs. Stoller, who found that operatic engagements do not grow on trees, took the stage name Lily Paget, and got jobs in some Broadway shows, including "Bloomer Girl" and "Love Life." Deborah went to boarding school and studied piano, ballet and drawing. Sometimes she accompanied her mother on tour.

LEARNED SOMETHING

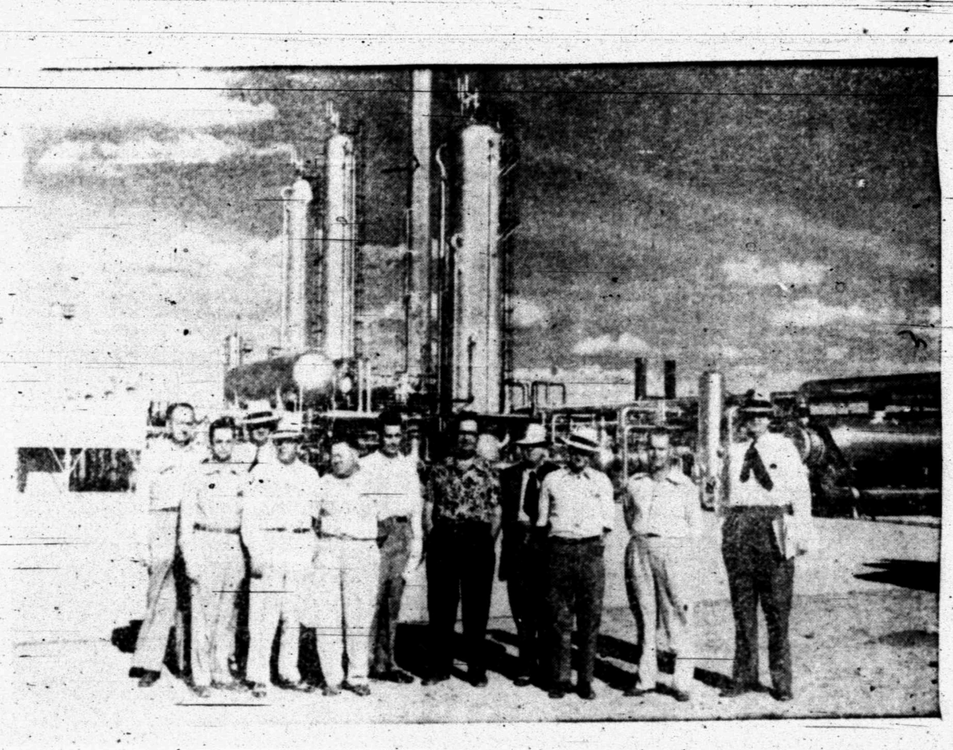
"In those days I learned something that made me start teaching singing," said Mrs. Stoller. "You can't be a specialist in the theater any more. You need to know a lot of things. A dancer can learn to sing and get more jobs. A concert singer can learn 'pop' singing, and when she can't get opera jobs, she can go on the radio."

Although the Stollers are mother and daughter and Lily is slim and young, you would never mix them up. Lily's hair is a short curly chestnut and Deborah's long and blonde.

Home — an apartment in Midtown Manhattan — operates by Stoller teamwork. Father Stoller sculptures and does the cooking. Mrs. Stoller teaches and runs the dishes and studies singing.

"Mother pulls me out of bed and makes me work," she said. "I don't know whether I would have the fight in me. But she makes me get up and go."

When used to cover a casket, the flag should be placed so that the union is at the head and over the left shoulder.



FORMAL DEDICATION

WEDNESDAY, OCTOBER 24th

SNYDER GASOLINE PLANT

A great dedication service has been planned for the people of this area on Wednesday afternoon, October 24, and we urge each and everyone of you to attend and see at first hand the greatness of this fine multi-million dollar industry.

We at the West Texas State Bank are indeed looking forward, with a great deal of pleasure to many years of happy association with the personnel of this great industry.

West Texas State Bank

Former SS Officer Is Leader Of Hindu Sect In New Delhi

NEW DALHI, Oct. 23. (AP) — A six-foot-three former lieutenant in Hitler's SS Troops has found an elevated spot for reflection on the past.

Leopold Fischer, a hulking 28-year-old giant with a philosophical flair, decided after the war it was time for an about-face. A mixture by birth of Austrian and Indian blood, Fischer turned to Hinduism.

Now dubbed "Swami Agehananda," which means "Saint Homeless Bliss," he has zoomed to eminence in the august Hindu order of Shankaracharya monks. His spiritual merit has been set at "1,008," a sacred category only a handful of pandits have surpassed.

This fall Agehananda will become Mandaleshwar, or abbott, of Jobner Monastery, one of India's oldest, located 110 miles from Jaipur in the bleak Rajasthan Desert.

There he can mull over a career which has already ranged from study of Sankrit at Oxford to prison in Britain and France as a captive Nazi and suspected saboteur.

Agehananda says he was born in Vienna, son of a Bohemian father and Punjabi mother. The father, Capt. Hans Fischer, an Austrian army pilot in World War I won fame as a professional polo player. It was while instructing the late Maharajah of Bikaner in the ways of continental polo that Capt. Fischer met a Sikh contractor's daughter named Kamala Chopra in Rawalpindi. They married and settled in Vienna. By World War II they had been divorced.

As a youth, Agehananda recalls learning Hindustani from his mother and developing a burning attachment for the Indian independence movement. He had just earned a doctorate in philosophy at the University of Vienna when war clouds hovered over Austria.

After a brief refuge in England, Agehananda went to Berlin to join the "Indian National Army" which stormy Subhas Chandra Bose was forming under German auspices to "liberate" India from British rule.

Until capture by the French in April, 1945, seven days before the armistice, Agehananda's "Indian Voluntary Legion in Waffen S.S." saw action in Germany, France, Holland, Belgium, and Italy, including the Salerno and Monte Cassino engagements.

He spent six months in the former Nazi concentration camp at Paderton in the British zone of occupied Germany. Then British authorities secured his transfer to solitary confinement in Old Bailey Prison in London. They wanted him for investigation of complicity in the 1943 bombing of three factories by men posing as British students.

He finally was released Feb. 27, 1947. Then followed the acquisition of an Oxford master's degree in Sanskrit and Linguistics, and his entrance into the Ramakrishna Mission as a Hindu monk.

Aided by Mrs. Rameshwari Nehru, sister-in-law of the prime minister, whom he had met in Vienna, Agehananda gained admission to India. His application for Indian citizenship, however, still rests on the desk of Home Minister Chakravarti Rajogopalachari, who holds him in dark suspicion.

India's leading holy men do not view Agehananda with such wonderment. They deem it but deserved tribute to the quality of Hinduism that this striking individual should come to their midst.

Membership in the 300,000-strong Shankaracharya order involves a period of isolated study and meditation under a "Geru," or preceptor. Agehananda spent six months in a Himalayan cave before his aged mentor gave him the nod.

Last April Agehananda had a big hand in the organization of the Delhi Holy Men's Convention which suggested Truman and Stalin should meet au natural "to get that nothing-to-hide-from-each other feeling."

As abbott, Agehananda will have charge of nearly 50 "sanyasis" monks of a lower status. Jobner Monastery was built in 920 B.C. by Sureshavara, one of the five direct disciples of Shankaracharya, founder of the order.

Before entering seclusion in Rajasthan, Agehananda has bustled about Delhi from mass meetings of the Hindu faithful, to dinner with such friends as the Austrian minister in India, Kurt Enderl.

"There is one really fine thing about the life of a Mandaleshwar," Agehananda commented. "You are very independent and free from supervision. Confidentally, I promise you that next year I will slip off to Vienna for the opening of the opera."

Water Is One Big Projects Of Oil Firm's

MIDLAND, Oct. 23. — Water plays an important part in drilling operations for oil. Ask any oil man. No water — no oil fields.

One of the several Tex-Harvey enterprises, then, is playing an important role in development of the Tex-Harvey Field of the rich Spraberry Trend.

It is the Tex-Harvey Water Company.

It deals in just that — water. The water is obtained from a source five miles southeast of Midland and is pumped 14 miles to the oil field. There, it is sold to operators.

When the Tex-Harvey Drilling Company, one of the first to drill in the Spraberry, started operations in the Tex-Harvey Field, it found water was going to be necessary.

And there was no water nearby in the field.

GOT BUSY

Tex-Harvey got busy. It found water in abundance on a 160-acre farm near Midland. That farm was purchased and wells were dug.

An eight and ⅝ inch pipe line to carry the water to the oil field was laid.

Tex-Harvey was now in the water business.

There was plenty of water for the Tex-Harvey drilling operations and so — customers were invited. And customers began to tap on.

But here's another interesting feature: ranchers along the water lifeline get their stock water for free, in exchange for right-of-way.

A big prospective customer for Tex-Harvey water is the Tex-Harvey Gasoline Plant now under construction in the Tex-Harvey Field. This $5,000,000 enterprise is just one of Tex-Harvey's many in the development of West Texas.

But back to the water for drilling.

FIVE WELLS

There are five wells on the Tex-Harvey Farm. Two of these are adequate to furnish water for the Tex-Harvey portion of the oil field. The wells hit water pay at 1,000 feet — and it's good water. Pumps send the water gushing to the oil field through the pipe line strong enough for 100 pounds of pressure at the tap.

In order to maintain such good pressure, Tex-Harvey has constructed a 10,000 barrel tank at the source.

Not only that. Tex-Harvey has leased for water rights an adjoining section of land to the 160-acre farm.

"There's plenty more where this is coming from," says Major Arthur Harvey, the owner of the several Tex-Harvey enterprises.

Sunray Assets, Gross Volume Grow Over Same Period in '50

TULSA, Oct. 23 —Estimated earnings of Sunray Oil Corp. during the first nine months of this year are equivalent to $1.80 per common share based on the average number of shares outstanding during the period, the company's 70,000 stockholders were informed recently in a third - quarter report.

Sunray's net income after costs and taxes for the nine months ended September 30, 1951, is estimated at $18,061,209 as compared to $19,001,938 for the same period in 1950.

GROSS IS MORE

It was noted in the Sunray report that the company's gross income for the first nine months of 1951 amounts to $96,343,422 as compared with $82,891,987 for the first nine months of 1950, for an increase of 16.23 per cent.

The company's net income before deducation for ad valorem and gross production taxes, and provision for federal and state income taxes (including Excess Profits Tax) amounted to $32,375,752 for the nine months in 1951 as compared with $27,786,740 for 1950, an increase of 16.52 per cent.

The attention of the company's stockholders was called to the fact that for the first nine months of 1951 ad valorem, gross production and income taxes amounted to $14,314,543 as compared with $8,784,802 for the same period in 1950, or an increase in these particular taxes of 63 per cent.

"It will be noted," C. H. Wright, president, said, "that there were substantial increases in the business done and the earnings of the corporation prior to the application of these various taxes over which we have no control."

ASSETS CLIMB

Current assets of the corporation have increased from $57,600,000 on Dec. 31, 1950 to $60,400,000 as of Sept. 30, 1951, while current liabilities are approximately $26,000,000 as compared with $24,150,000 at Dec. 31, 1950.

During the third quarter there was set aside for retirement 32,400 shares of the corporation's 4¼ per cent Cumulative Preferred Stock, Series "A", purchased by the corporation pursuant to the semi - annual purchase fund provision of said stock. This makes a total of 64,800 shares set aside for retirement in the current year.

At Sept. 30 Sunray was producing approximately 75,000 net barrels of crude oil and liquefied petroleum products per day.

Sunray has established production on a large block of prospect acres the company holds in the Spraberry trend in West Texas. Sunray has completed four producers to date and has drilling rigs operating on six other locations in Upton, Midland and Reagan Counties.

The company is completing potential tests on its first gas well on a principal block in its 11,000 acre holdings under lease in the Blanco - San Juan area in New Mexico.

GULF COAST POOL

A westward extension in the Red Fish Bay pool, Nueces County, Texas, is the company's well on State Tract No. 353-1 which has been completed to produce at the rate of 360 barrels high gravity crude daily. This well is producing from one 14 and proves up additional acres for oil production. Coring tests made while Sunray's new well was being drilled indicate the presence of six possible oil producing sands and three zones containing gas - distillate production possibilities above the completion depth on this tract. Sunray has completed 10 wells and is drilling three additional tests offsetting production adjacent to its bay area properties.

Refining sales for the first nine months approximated $36,100,000 as compared with $22,900,000 for the same period last year. The company has acquired the complete refining facilities of the Rock Island Refinery at Sunray (Duncan), Okla., and is now operating this plant as an adjunct to Sunray's catalytic cracking refinery adjoining the property.

The company has been granted a certificate of necessity by the Defense Production Administration to build a new 25,000 barrel per day capacity catalytic cracking refinery at Corpus Christi, Tex. Under provisions of the 1950 U. S. Revenue Act which apply to this DPA certificate, the company will be able to depreciate this investment more rapidly than normally. Construction should start early in 1952.

Dry gas and gas - cycling plant sales for the first nine months amounted to $6,428,000. The new Snyder Gasoline Plant in Scurry County, Texas, being operated by Sunray, is now operating and producing gasolines and a variety of liquefied petroleum gas products.

"Sunray along with the rest of the petroleum industry," President Wright declared, "is in a good position to meet the market demands for crude petroleum, refined oil products, high octane gasolines and LPG products expected during the fall and winter months. Barring unforeseen happenings, operations during the last quarter of the year should continue at a high level of production and sales."

According to a leading oil industry research scientist, every important organic chemical in the world can be made from petroleum.

Congratulations

And

Best Wishes

We Cordially Invite You To Attend The Dedicatory Ceremonies and Inspection Tour

OF OUR NEW

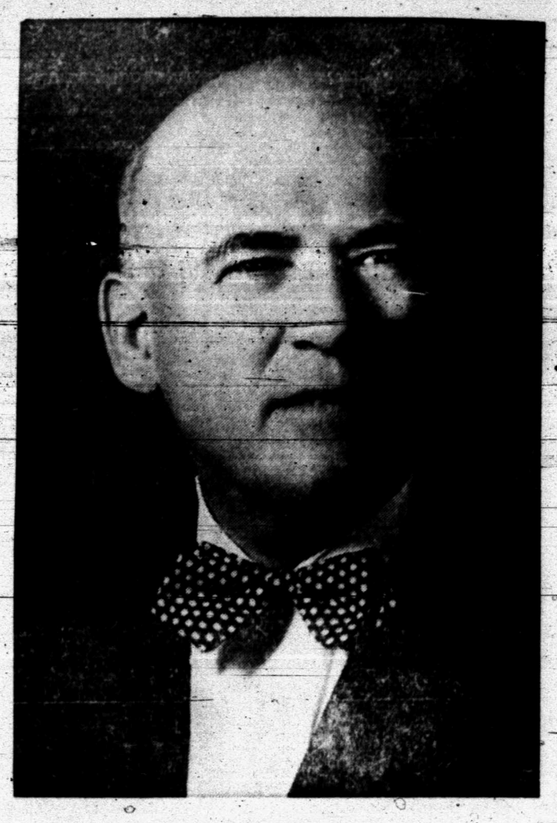
SNYDER GASOLINE PLANT

AT 12:00 NOON---WEDNESDAY, OCTOBER 24TH

-- ADDRESS --

By The Honorable OLIN CULBERSON

Chairman, The Railroad Commission Of Texas



OLIN CULBERSON, Chairman

As Director of Production in the Oil and Gas Division of the Commission, Culberson set up the system for accounting of oil and the tender system for controlling the production and movement of oil. This brought order out of chaos in the oil industry in Texas.

He proposed the rule providing for regular meetings of the full Commission once per week for the purpose of consideration of and promulgation of orders and hearings of the Commissoin.

Culberson led the fight for the elimination of the discriminatory freight rates against the Souhwestern Territory.

He is a member of the committee on cooperation between State and federal commissions of the National Association of Railroads and Utilities Commissioners.

SNYDER GASOLINE PLANT ADVISORY COMMITTEE

- Cities Sevice Oil Company
- Fullerton Oil Company
- L. M. Lockhart
- Lone Star Producing Company
- Scurry Natural Gas Company
- Skelly Oil Company
- Sunray Oil Corporation

AND

PARTICIPANTS IN THE SNYDER GASOLINE PLANT: Fullerton Oil Co., Scurry Natural Gasoline Corp., Sunray Oil Corp., Lone Star Producing Co., Cities Service Oil Co., Castleman & O'Neill et al., Skelly Oil Co., L. M. Lockhart, Wilshire Oil Co., Seaboard Oil Co., Pure Oil Co., Placid Oil Co., Ryan, Hayes & Burke, Penntex Oil Corp. Hiawatha Oil & Gas Co. J. S. Abercrombie, Claud Hamil, Southern Production Co., Inc., King, Warren & Dye, Headwaters Oil Co. et al, Ryan & Burke, Greenbrier Oil Co., Ralph A. Johnston, William G. Johnston, Hunt Oil Co., Youngblood & Foree, Saltmont Oil Co., N. B. Hunt, W. P. Luse, Strebor Oil Co., et al Stolkin & Koolish, Standard Fryer Drilling Co. et al., C. H. Lockhart, Jr., and H. R. Bright, J. A. Humphrey, Stanolind Oil & Gas Co.

.....Official Program.....

1:00 PM---BAND CONCERT by Snyder High School Band at Bandstand

1:25 PM---Guests assemble at bandstand

1:30 PM---CALL TO ORDER by Chairmn, Luther Williams, Director of Public Relations, Sunray Oil Corp., Tulsa, Okla.

1:32 PM---THE NATIONAL ANTHEM --- Raising of the Flag

1:38 PM---INVOCATION, Rev. Ronald Hubbard

1:39 PM---Introduction of platform guests

1 42 PM---WELCOME by Ralph Geisenhonor, Director, Scurry County Chamber of Commerce

1:45 PM---'MAKING THE PLANT WORK', report by James Wiseman, vice president, The Fluor Corp., Ltd., Los Angeles, Calif.

1:55 PM---ADDRESS by the Honorable Olin Culberson, Chairman of the Railroad Commission of Texas, Austin, Texas

2:15 PM---PRESENTATION of 'keys to the plant' to H. W. Manley, vice president Sunray Oil Corp., Tulsa, as operator for ownership interests. Presentation by W. W. Valentine, Pres., Fullerton Oil Co., Pasadena, Calif.

2:20 PM---RAISING OF THE TEXAS STATE FLAG---'The Eyes of Texas'

2:25 PM---Adjournment and band concert

2:30 PM---Guided tours from plant gate

Band concert ends 3:00 PM

Tours end 3:30 PM
