Daily subscriber to United Press wire service, bringing the latest world news to readers of the Ranger Daily Times.

Says Other Weapons Must Go With Bomb

Well...
I Dunno,
But...

Glad to see that at least one Ranger Bulldog rated an honorable mention in one of the sports writers all state lists.

Worth Carlin was one of six men in all of District 9-AA to be among those chosen and Worth got the honorable mention in the list of tackles.

A well earned honor, too.

While we're on the subject of football, though the AA season is over, the Warders are still at it and that bunch of little scrappers needs some support from the fans.

Thursday afternoon they are to play the Eastland ward school team and the Ranger boys will get half of the gate receipts. Those receipts will be used to get letters for the players, they hope. But what the boys and their coach, G. M. Munnerlyn, would like to have is enough money to buy suits for the boys.

With what they can salvage from the AA cast offs, it wouldn't take too much to get the boys the bare necessities for their games and sure it would add a bit of zest to their playing.

Those boys are the future AA Bulldogs and a little patting on the back and encouragement would sure help. Besides that, they have won all but one of their games this season and Coach Munnerlyn tells us that most of them, including some of the best players go to high school next year.

The team they meet Thursday is undefeated and all Eastland schools will be turned out in time for the game, thus assuring a big cheering section for the Eastland team.

We'd sure like to see those Ranger boys backed by as big a cheering section as Eastland can turn out.

Called to our attention Sunday was the totally unnecessary and discourteous habit that most drivers have of driving up and down Main street with the car lights on full.

One man on returning from a long trip, stated that the blinding lights from the cars, with the confusing lights from the streets and stores, very nearly caused him to have a wreck on Main street.

He's right, too. There is absolutely no need for bright lights while driving on Main street and the dimmers are certainly sufficient.

Don't think that there's any law against using the full lights but a little consideration should not be beyond the giving, and it might help prevent accidents.

We can add our two bits to that, too. It would be a help to pedestrians and would cost the drivers nothing but the flick of a switch.

We don't know if or not it was intentional, but the police benefit show will be given on Friday, December 13, and the psychology of that would seem to be for those who are superstitious, to go to the show that night to avoid possible bad luck on that night. The basis of the contention being that a person seated in a picture show is less likely to encounter bad luck than one moving about the town.

To say the least of it, to the superstitious, it would be the wrong time to run afoul of the police and a ticket to their show might be a ticket to avoiding bad luck.

December got off to a start on a higher pattern just like November. Every single week-end in the month of November brought a norther and sure enough the first day of December, Sunday, brought along a norther, dropping temperatures to the lowest of the season, 26 degrees. At 8:00 o'clock this morning it was still 28 degrees and once during the morning dropped back to 27. Highest maximum temperature for the month was 31.

A heavy frost covered everything this morning, just one in a series of heavy ones in the past week.

Total precipitation for the month (Continued on Page 4)

PRESIDENT SEES ARMY-NAVY GAME

Waiting for the start of the Army-Navy game in Municipal Stadium in Philadelphia, President Truman waves his hat to the crowd. In the box with the President are Mrs. Truman and Admiral Leahy. (NEA Telephoto).

Warders Play Eastland On This Thursday

Thursday afternoon at 3:00 o'clock the Ranger Ward School Bulldogs will meet the Eastland ward school team in a game at the Eastland field.

This is the first game to be played between the two teams which are rated as fairly evenly matched. Eastland has not lost a single game while the Ranger team has taken one defeat. They lost their second game with Breckenridge by a score of 6 to 0.

Coach G. M. Munnerlyn says that his boys are in fair shape for the game and they will be out to add another victory to their list. Receipts from the game will likely be used to buy letters for the team and it is urged that a large following of fans be out to see the game.

Police Benefit Show To Be At Arcadia Dec. 13

Chief George Murphy announced today that the annual police benefit show will be shown at the Arcadia Theatre on the night of December 13.

Proceeds from the show are used each year to purchase uniforms for the policemen, and the show is made possible through courtesy of B. E. Garner, manager of the Interstate Theatres in Ranger.

Tickets for the show will go on sale Tuesday and may be purchased by contacting any of the police force.

The nation's greatest harvest occurred in 1946. The total surpassed the previous record year of 1942 by 2 per cent. It also was 26 per cent above the 1923-32 average.

MORE MEAT MEANS MORE THAN FOOD, CITY SAYS

CHICAGO (UP) — More meat to eat also means more soap to wash with, more shoes to shine, more fat to cook with and more lard with which to repair the kitchen chair.

While meat was scarce, the articles made from livestock by-products also were scarce. The carter men were worried. Housewives were not alone in worrying.

The importance of livestock by-products rests in the fact that only 55 per cent of the live weight of a steer can be sold as beef and that only 30 per cent of a hog can be sold as fresh meat.

Animal hides are the most valuable by-products. In fact, the leather industry exists only because of the livestock industry.

The hide accounts for 8.6 per cent of the total return from a steer, as compared with 4.1 per cent returned from all other by-products. The return from the sheep pelt is relatively higher, amounting to 14.5 per cent, with

FAIRCLOTH, RUSSELL WIN CALF ROPING

Sig Faircloth of Ranger and Ralph Russell of Merkel took off the \$500 pots at the big calf roping event held Saturday afternoon at 2:30 o'clock at the Ranger Rodeo arena.

The two were winners in matched calf roping contests with Faircloth matched against Buryle Hittson of Breckenridge and Russell roping against Phelton Herrington of Ranger.

Faircloth's time for 10 calves was 16.7 and Hittson had 19.1 for the ten animals. Russell had the best time of the four with 15.8 on 10 calves against Herrington's 21.09 on nine calves.

Another feature of the event was a jackpot roping contest in which Whit Kinney of Stephenville was first place winner, Nig Wright of Stephenville, second place and Ralph Russell of Merkel was third place winner.

Others taking part in the contest were Lanam Riley of Ft. Worth; Royce Sewall, of Fort Worth; Jen Slaughter, Jr., Cisco; Johnnie Chapman, Ft. Worth; Jack Whitaker of Breckenridge; Dan McLaughlin, Ft. Worth; Leo Huff, Cisco; George Brown, Stephenville; Phelton Herrington, Ranger; Buryle Hittson, Breckenridge; C. T. Hill Breckenridge; Dick Fox, Ranger and Glenn Elliott of Fort Worth.

LIVESTOCK
FORT WORTH — Cattle 5000, calves 3800. Medium to good steers and yearlings 15.00-19.00. God and choice fat calves 14.50-17.00.

Hogs 800. Top 25.00 paid for good and choice hogs averaging 180 lbs up.

Sheep 8500. Choice woolled lambs up to 21.00. Medium to good fat lambs from 16.00-19.00.

the return from other by-products amounting to 4.1 per cent.

Some of the by-products of a steer, and the part of the animal from which they are made:

From the hide you get glue, grease, fertilizer, plasterers' hair and hair felt.

The hoofs are used to make combs, buttons and potassium ferrocyanide.

The viscera yields tallow, grease, medicine and oleo oil.

The interior fat of the steer winds up as soap, oil, glycerin and candles.

The stomachs of hogs are used to make pepsin. The thyroid and pancreatic glands of pigs, sheep and cattle are used in pharmaceutical products.

Hog hair and bristles are made into curled hair and brushes.

Curled hair is sold for mattresses. So you don't only eat livestock. You wear it, drink it, sleep on it, see it, wash with it, cook with it, brush your hair with it, carry things in it, cheer half backs carrying it.

UP President To Speak At Jaycees Banquet

WICHITA FALLS, Tex., (UP) — A native Texan now vice president of United Press in New York City will return December 14 to speak at the annual stag gridiron banquet of the Wichita Falls Junior Chamber of Commerce.

Jack Bisco, born in Mineral Wells and later a student at a Ft. Worth high school and Texas Christian University, will be able to tell Jaycees of the postwar world through recent tours of Europe and the Pacific.

He attended the University of Missouri, worked for a Ft. Worth newspaper, and joined the United Press in 1929, working since in Dallas, Kansas City, Cleveland and New York.

Aged Negro Is Heard In Case Of Sen. Bilbo

JACKSON, Miss.—T. E. Wilson, aged negro leader, testified today that campaign speeches by Sen. Theodore G. Bilbo, D. Miss., were instrumental in denying to negroes the right to vote in the July 2 state Democratic primary.

Wilson, president of the Mississippi Progressive Voters League, was the first witness before a five-man Senate campaign investigating committee hearing charges that Bilbo's renomination was illegal because negroes were not permitted to vote.

Court Dismisses Petrillo Case

CHICAGO — U. S. District Judge Walter S. Labay today dismissed a criminal information filed by the government against President James C. Petrillo of the American Federation of Musicians and ruled that the Lea Act is unconstitutional.

The act makes it a crime to force or attempt to force a station to hire more employees than necessary. Petrillo's attorney's welcomed the case as a test of the act's constitutionality.

Most municipal auditoriums in major U.S. cities operate at a loss and lie idle almost four months a year, says the American Municipal Association.

Shopping Days To Christmas

JUDGE HINTS AT LENIENCY FOR LEWIS

WASHINGTON—Federal Judge T. Alan Goldsborough suggested today that John L. Lewis and his United Mine Workers Union, AFL, might get off with a light penalty if they could convince him they acted in good faith in terminating their contract with the government.

Cancellation of the contract was the trigger that started on November 21 the coal strike that hit the nation with increasing severity today as winters first cold wave swept the east.

Goldsborough dropped the hint about penalties as Lewis' contempt trial went into its second week. The government sought to blast the union contention that the government was operating the soft coal mines under a sham arrangement.

The judges past remarks, however, indicated strongly that he believes Lewis willfully violated his order to keep the contract in effect.

Lewis' lawyers argued that the mines actually have been operated by the private owners and that the Smith-Connally Anti-Strike law does not apply. They protested that the Smith-Connally Law, which carries stiff penalties for striking against government-seized properties, was not involved because Lewis was on trial for contempt.

"I presume," Goldsborough noted, "that the defendants are trying to prove that they acted in good faith so that even if they are found guilty, the punishment will be very different than if the violation was intentional."

Violations of the Smith-Connally law are punishable by a maximum \$5000 fine and/or one year in prison. On a contempt conviction, the judge may assess whatever penalty he chooses.

Lewis' trial turned largely into legal skirmishing between union and government lawyers. The union sought to establish that government operation of the mines was a sham arrangement. The government endeavored to prove that it actually is directing operation of the mines.

Blonde Eyeful Escapes Male Dormitory Stares

GETTYSBURG, Pa. (UP) — Mrs. Shirley Blackwood, a fetching blonde secretary, had to figure out some way to get past the men's temporary dormitory at Gettysburg College each day—she hadn't the heart to go right through it.

So she climbs a ladder to the upper-story office of the athletic director in the college gymnasium building where she works. Just below the office are the crowded quarters of 200 men students.

Has Proof Rats Can't Take Cold

TYLER, Tex. (UP) — Proof that rats can't stand cold weather has been exhibited by the Tyler-Smith county health unit.

The unit reported a cold wave had driven the rats indoors and that rats being killed in business establishments had jumped 50 per cent during November.

The booming rat-killing business had brought about the end of 490 rats in November, with the deaths attributed to a poison known mysteriously as "1080."

PITY THE POOR KILROYS

CLEVELAND (UP) — Practical jokers have no difficulty finding Kilroy here. The Cleveland telephone directory lists 11 Kilroys, a Kilroy Structural Steel Co., and a Kilroy's Cafe.

And the phone book has really been getting a workout these nights. They call and ask: "Is Kilroy there?"

"We're called almost every night. It's getting to be a bore," said Mrs. E. A. Kilroy, who has the misfortune of being first among the Kilroys in the book.

Jap Christmas To Be Christian In Its Nature

TOKYO (UP) — Many Japanese children who were deprived of toys and holiday decorations during the war will have their first real Christmas this year.

Although most of the little ones will be from Buddhist and Shinto families they will celebrate Christmas in much the same way as youngsters in Christian homes throughout the world. The Japanese—always looking for a good excuse for a holiday—have long made Christmas a major event in their country.

Last Christmas came too soon after the end of the war. There were no toys and people were hungry. This Christmas will be a little better. Small toy factories are returning to life, turning old airplane and cannon parts into scooters, toy jeeps and Christmas decorations. In pre-war days, many of these decorations and toys would have found their way to America and into the Santa Claus lands of the big department stores.

Coyotes Get Tough With Kansas Farmers

McPHERSON, Kan. (UP) — Roving bands of coyotes are cutting down on the turkey crop in McPherson County. Equally important, the coyotes are cutting down on the farmers' sleep.

When the coyotes became bold enough to ignore warning shotgun blasts, and ordinary lights in the turkey pens, one farmer installed fluorescent lighting. Net result: the coyotes didn't have to stumble around in the dark looking for the turkeys.

Other farmers, down to their in the turkey pens keep the coyotes have been sleeping in the turkey pens. They report their presence in the turkey pens keeps the coyotes away—but the coyotes' howling keeps the farmers awake.

Cemetery Work To Be Done At Howard, Dec. 14

It was announced today that there will be a cemetery working at the Howard Cemetery on December 14.

The gathering will last all day and those who attend are asked to bring a basket lunch as lunch will be spread on the site at noon. All interested persons are invited to attend.

Fuel Shortages Cutting Deep Into Production

PITTSBURGH — Fuel shortages resulting from the strike of 400,000 United Mine Workers dragged industrial production still lower today and a cold wave sweeping across the nation aggravated already heavy demands on shrinking coal reserves.

Unemployment edged past the 115,000 mark, exclusive of the striking miners, but industrialists present cutbacks and layoffs were but a drop in the bucket compared with imminent results of a continued strike.

Hardest hit were transportation and steel with 19,000 railroad workers and more than 70,000 steel workers idle, but the pinch was spreading rapidly to related industries and retail trade.

Laborite Says Britain, U. S. For Joint Defense

LONDON — Konni Zilliacus, one of the leaders of the revolting group of British labor members of Parliament, today charged that American and British military authorities have agreed to plan jointly for defense against Russia in a world war.

Zilliacus charge came after a British government spokesman said that the United States and Britain are conducting conversations "on a technical level" for standardization of weapons and "peacetime military cooperation" but denied that hard and fast agreements or decisions had been reached.

Texas Brothers Draw 25 Year Prison Terms

OKLAHOMA CITY, (UP) — The Hixon brothers of Texas were sentenced to 25 years in Federal Prison today for the \$23,000 daring daylight robbery of the Walters, Okla., National Bank, last Aug. 8.

The heavy punishment was fixed by U. S. District Judge Edgar S. Vaughn after the brothers—James A. Hixon, 27, and Joseph Luther Hixon, 33, of Electra, Tex.—denied knowing what became of \$25,000 of the loot still missing.

More than a million scooters built in a year is the production record claimed by a Chicago company.

BRITON CLAIMS SOME MORE DEADLY THAN ATOMIC POWER

LAKE SUCCESS, N. Y.—While the United States and Russia clashed over what to do with the atomic bomb, Great Britain informed the United Nations today that there are "other more terrible weapons" which must be outlawed immediately.

"There is no longer safe ground for saying the atomic bomb remains the most terrible of weapons," Sir Hartley Shawcross of Britain told the UN's 54-nation political and security committee.

"As we abolish the atomic bomb, so must we abolish... even more terrible methods of warfare which are not named but the existence is not entirely unknown," he said.

Shawcross spoke after Soviet Deputy Foreign Minister Andrei Vishinsky called the atomic bomb "the queen of the horror" of devastating weapons which the United Nations should abolish for all time.

Meanwhile, the United States accused Russia of trying to "get rid of the atomic bomb" and then holding the threat of veto over any further steps toward world disarmament.

Sen. Tom Connally, D. Tex., said America never would agree to a world arms-scraping program subject to the "uncontrolled and unbridled action" of the UN security council, where the Big Five have the power of veto.

In a major clarification of America's disarmament policy, Connally said Soviet Russia was trying to win UN approval of a "narrow and circumscribed" disarmament program which would leave nations free to maintain "other weapons of mass destruction" while requiring the United States to scrap its atomic bombs.

Airtight Alibi Cracks By Slip-Up On Date

COLUMBUS, O. (UP) — Common Pleas Judge Joseph M. Clifford seemed impressed by the alibi which Ray Bishop, 22, of Kingsport, Tenn., tried to establish.

Bishop, charged with stabbing, drugging and robbing a taxicab driver here, produced three witnesses who said they had been with him the night of June 5 from 8:30 p.m. to 4 a.m. the next day.

Assistant Prosecutor T. Vincent Martin suggested a reading of the indictment, which charged Bishop with committing the crime at 3 a.m. June 5.

Judge Clifford sentenced Bishop to 10 to 25 years in prison.

Brazos River Carrying Texas Out To The Sea

COLLEGE STATION, Tex. (UP) — The Brazos River, a lazy Texas stream which in some seasons in places can be waded from bank to bank, is estimated by Texas A. and M. College agronomists to be carrying 16,000 acres of soil to sea each year.

An agronomy class checked the mid-river state and estimated that around 16,000,000 tons of Texas suspended sandy loam, silty loam and clay among the organic materials pass College Station annually.

Youthful Scientists
Make Rockets Work

FLINTRIDGE, Cal. (UP)—Inspired ten years ago by comic strip rocket scientists, a group of high school and college students has developed a new secret liquid propellant which may have valuable military and peacetime uses.

The fuel has worked with unexpected success on a few experimental "baby" rockets fired from the group's dry riverbed proving grounds. It has been offered for tests in rockets such as the German V-2.

"If our fuel is an improvement over what the army now has, we will be proud of our contribution," 18-year-old George James, a Glendale Junior College student and president of the group, said. "If it is less effective, our work will have ruled out one possibility and indirectly advanced rocket research."

The young scientists now are working on rockets that may move mud-stalled or snow-bound autos, shoot ropes across canyons and drop fire-extinguisher chemicals

NEW ONE-PIECE HEARING
AID TO BE SHOWN HERE

Mr. W. L. Mackey, factory representative of the Vacolite Co., will demonstrate free the new Vacopak one-piece hearing aid at the Gholson Hotel in Ranger, Wednesday, December 4, from 10 a.m. to 6 p.m.

Latest development in electronic research and engineering makes possible this complete in one pie hearing aid. There is no separate battery pack to wear or carry. Vacopak is adjusted to your individual hearing loss. Its specially patented control turns blurred sounds into clear understandable speech—without noise or static. Come in and try it free and with out obligation.

Fresh supply of batteries for all types of hearing aids.

ARMY HAS TROUBLE WITH NAVY

The mighty Army team had sixty full minutes of trouble, as a fighting Navy team slashed hard on their heels. The final score was Army 21, Navy 18, just proof that Navy really played a bang-up ball game. Here No. 32, Gerber of the Navy, makes a five yard gain in the first quarter of the game played in Municipal Stadium at Philadelphia, Pennsylvania. (NEA Telephoto).

Fails To Support Chicago Opera Sam Insull's \$23,000,000 Shrine

CHICAGO (UP)—The Chicago Opera, home of great singers and glittering audiences for 15 years, faces another of its recurrent financial crises, and perhaps its last curtain.

Unmet obligations and an indifferent public have disheartened the sponsors and management, who once dreamed of making Chicago the grand opera center of the world.

A \$30,000 deficit is still to be met after the close of this year's season, and directors are undecided whether to try again next year.

The company and the 42-story Civic Opera building in which it is housed are still haunted by the ghost of Samuel Insull, fabulous financier of the twenties.

The opera company was formed under his direction, and the \$23,000,000 building of steel and limestone was completed under his supervision in 1931, when the full effects of the depression which sunk Insull and his utilities empire were being felt.

Insull believed the massive office structure housing the opera would bring in sufficient revenue to meet all its expenses while bringing Chicago the world's greatest operatic productions, after the bonds issued to build it had been retired.

Put the market crash and depression ruined him and overwhelmed his \$4,000,000,000 utilities and industrial holdings.

Atop the building was a luxurious eight story penthouse where Insull entertained the great of the musical, social and financial world.

In 1943 all obligations of the opera company were taken care of when the building was sold to a finance corporation, and its sponsors hoped to make grand opera pay for itself.

But now the last of a trust fund to help pay the deficits has run out. This season the deficit was \$80,000, and the last \$50,000 from the trust fund leaves \$30,000 still to be raised if grand opera is to return to Chicago next year.

Abner J. Stilwell, banker who is president of the opera company said he was too busy to worry about next year.

"We've tried putting requests for donations in the programs," he said, "but we've had no response whatever."

Hearth Addicts Wasting Wood, They Are Told

WASHINGTON (UP)—The U. S. Forest Service says that too many Americans are enjoying the romance of the old-fashioned open fireplace at the expense of the housing effort.

Although mill waste such as slabs and edgings are all right for fuel, the service said many people are burning so-called bodywood which could be used better as timber of new veterans' homes.

It said more wood is used for fuel than any other purpose, pointing out that about two-fifths of all wood taken from U. S. forests winds up in stoves, furnaces, ranges or fireplaces.

"The value of standing timber frequently is underrated and trees that are of considerably greater value for other purposes are cut into cordwood," the service said.

"Wider use of mill waste such as slabs and edgings, and forest waste, would aid the conservation of better grades of timber for badly needed flooring, furniture and other scarce wood products."

"The value of standing timber frequently is underrated and trees that are of considerably greater value for other purposes are cut into cordwood," the service said.

"Wider use of mill waste such as slabs and edgings, and forest waste, would aid the conservation of better grades of timber for badly needed flooring, furniture and other scarce wood products."

Back-Stage Behind the Curtains-

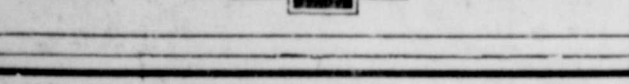

In every organized business, large or small, there is a mass of preparation, work, skill, experience and expense before any thought can be given to profits from the finished product. For example, the cost of typing a 100-page abstract is a trifle compared to that of assembling, classifying and posting the records day after day in preparation for your next order. The abstract, therefore, can't be cheap like dirt, but always there is the element of safety and a saving in including it in every real estate transaction.

Arabs Prepare for Trouble

Until recently split into two rival factions, the Najada and Futuwa, Palestine's "illegal" Arab army is combining under the leadership of Haj Amin el Hussein, former Grand Mufti of Jerusalem. Exclusive photo above shows Kamel Arelkat, left, Futuwa commander, with aides during recent "council of war" in a Haifa suburb. Behind him, right, is Kazem Selah Hussein, cousin of the Grand Mufti.

THRILL PACKED SEA ADVENTURE GREAT FILM

One hundred and sixty-seven days of adventure on the high seas, days that roused a nation to a fever pitch of excitement, are compressed into an hour and a half of thrilling screen entertainment in Paramount's picture of Richard Dana's memorable classic of the sea, "Twelve Years Before the Mast." The film the first motion picture adaptation of Dana's novel, opened yesterday at the Arcadia Theatre with Alan Ladd, Brian Donlevy, William Bendix and Barry Fitzgerald starred, and Howard da Silva, Esther Fernandez, Albert Dekker, Luis Van Rooten and Darryl Hickman heading an excellent supporting cast.

All the fury and suspense of Dana's searing denunciation of the slave-like treatment of the early American merchant mariner has been captured and enhanced by the scope of the motion picture camera. His grimly fascinating tale of the voyage of the devil-ship, "Pilgrim," to Boston, around Cape Horn, to California, is brought to vivid life on the screen.

Mr. and Mrs. Royce Rainbolt were Thanksgiving guests of Mr. Rainbolt's uncle in Winters, Tex.

Mrs. A. H. Powell and son, W. J. Powell, and Mrs. Virge Johnson are spending today in Fort Worth.

Messages Soon To Be Sent By Telefax System

FORT WORTH, Tex. (UP)—Texans will soon be writing their way, telegraphically, across the nation.

By the use of "telefax" short for telegraphic facsimile, Joseph Egan, Western Union president, explained, a person receiving a telegram would read the telegram in the handwriting of the person sending it.

On a tour of Western Union facilities over the nation, Egan and six vice presidents recently visited Fort Worth.

He said the new system, a product of Western Union research, had been used experimentally for several years in New York City.

Patrons will go to a pay telegraph station, deposit correct change in the slots, and the message delivered would be an exact reproduction of the long hand message written by the originator. The system will be placed in use throughout the Western Union network, Egan said, as soon as equipment now in production is delivered.

Iowa Banks Warned Of Holdup Danger

DES MOINES, Ia. (UP)—A revival of bank robberies in the Middle West has been predicted by R. W. Nebergall, chief of the Iowa

Department of Criminal Investigation.

Referring to recent bank robberies in Missouri and Nebraska, Nebergall reported that all Iowa banks have been sent warnings to be on the lookout. So far, Iowa has been relatively free of bank robberies, he said. The worst period for bank robberies in the Hawkeye State was back in the '20s and early '30s.

Grass is one crop that can be readily stored in stacks, kept in good condition for many years and used when most needed.
