## Pvt. A. C. Young Was Killed On Okinawa May 17

Mr. and Mrs. J. E. Young who reside near the Higginbotham Community received a telegram from the War Department Saturday, July 21, informing them that their son, Pvt. Adrian C. Young, was killed in action on Okinawa May 17, 1945.

Pvt. Young, who was a member of the Infantry, had been overseas since February 15, and at the time of his death had been on the front lines for 4 days.

He entered service September 21, 1944 and received his training at Camp Hood, Texas. From there he was sent to Hawaii, and then to the Marianas and on to Okinawa.

Prior to entering the service, the 20 year old Infantryman farmed in this county. He is a former student of the Union School.

A brother, T-5 James Young recently returned from duty in the European Theatre of War.

Technician Young, who holds the Combat Infantry Badge, 2 Battle Stars for the Germany and Czechoslovakia campaigns, a Bronze Star and the Good Conduct Medal, returned to the States June 28. He arrived here on July 8 for a 30 day furlough, and is scheduled to report to Fort Sam Houston on completion of his furlough.

Technician Young, who was stationed in Germany and Czechoslovakia while overseas, farmed with his father prior to entering the service 3 years ago.

Staff Sgt. Ellis McCarty is visiting with friends in Carlsbad, New Mexico and El Paso this week.

Mr. and Mrs. J. M. Ranson spent Saturday in Post visiting with their son and family, Mr. and Mrs. Ralph Ranson.

Miss Betty Bratcher is visiting here with her parents, Mr. and Mrs. B. B. Bratcher.

Now stationed in Pearl Harbor is Seaman Second Class Van Berniece Smith, the son of Mr. and Mrs. M. B. Smith of Hancock Community. He entered service on April 18, 1945 and received his training in San Diego, California. He sailed for overseas duty on July 11. Prior to entering the service Smith, who is a former student of the Hancock School, farmed in this county. He recently spent his leave here visiting with his parents, wife and three children, Sharon, Clinton, and Donna Kay, all of Hancock, and reported back to his station July 6.

Sgt. Young C. Lee, the son of Mr. and Mrs. J. S. Lee who reside in this county, is now stationed on the Philippines, where he serves with the ground crew in the Air Corps. Entering service in October 1942, he received his training in Lubbock, Pampa, and at Chanute Field, Illinois. He received overseas orders and left for foreign duty in November of 1943. Prior to entering the military service, he farmed with his father.

## Local Men Attended Tech Short Course

Several Dawson County residents attended all or a portion of the three-and-one-half days livestock feeding short course held at Texas Technological College in Lubbock last week.

County Agent T. A. Barfield attended the course, and in addition to him Elmo Smith, A. E. Jacobs, Ben Dopson, Sam Richardson, and Jack Broyles were in attendance.

Oil mill representatives, farmers and ranchers from all over Texas and parts of New Mexico were enrolled in the course, which was reported to have been one of the most successful ever held at the college.

Sgt. Robert E. Lee is the son of Mr. and Mrs. J. S. Lee who reside in the Sand Community. He is a member of the Field Artillery, having entered service three years ago on August 12. He received his training at Camp White, Oregon. He was given overseas orders and left for foreign duty one year ago. His wife, the former Miss Juanita Minter, resides in this city at 1001 North Second Street. Prior to entering the service, Sgt. Lee farmed with his father.

## Pfc. Allred Has Been Given Decoration

WITH THE FIFTH ARMY, Italy —Private First Class Donald E. Allred, rifleman, son of Mrs. Effie M. Allred, whose home is on Route 1, Ackerly, has been cited by the 338th Infantry Regiment of the Fifth Army's 85th "Custer" Division and awarded the Combat Infantryman Badge for actual participation in combat against the enemy in Italy.

Standards for the badge are high. The decoration is awarded to the Infantry soldier who has proved his fighting ability in combat.

The handsome badge consists of a silver rifle set against a background of Infantry blue, enclosed in a silver wreath.

## Vets Invited To Visit FSA Office About Farm Loans

Servicemen in Dawson and Borden Counties returning from military duty and interested in establishing themselves on family type farms may apply at the Farm Security Administration office for a government loan covering full cost of land and improvements, according to William D. Mitchell, FSA Supervisor here. A limited number of such loans may be made in these counties as a result of a new \$25,000,000 appropriation Congress has voted FSA for a farm ownership program for veterans.

For 1945-46 Congress voted FSA more than three times as much money as it did in the last fiscal year for loans to farmers under provision of the Bankhead-Jones Tenant Purchase Act. The agency will have \$50,000,000 as against \$15,000,000 for last year. One-half of this has been set up as a program specifically for ex-soldiers.

Veterans will have the same terms as other farmers. Loans may run for 40 years and bear three per cent interest, according to Mitchell. Only those that are unable to obtain adequate financing through other sources are eligible for an FSA loan.

Applicants are invited to visit the

FSA office in Lamesa after locating the farms they want to buy. Each farm is appraised in line with its actual value based on its long-time earning capacity. The FSA Committee of local farmers determines the eligibility of applicants. Jack Broyles, Ben Dopson, and Marvin E. Boren with O. H. Morris as alternate and M. M. Debnam as GI Certifying Committeeman comprise the committee in this county.

"Many veterans will find it desirable to work several years as tenants before becoming land owners," Mitchell declared. "Under its rural rehabilitation program FSA is able to make operating loans for purchase of equipment, livestock, feed, fertilizer, seed and minor improvements."

Veterans also will be eligible to share in the \$25,000,000 appropriated for the regular farm ownership program. To date FSA has assisted more than 3000 Texas farmers and 2000 Oklahoma farmers to become land owners. Taking advantage of the variable payment plan which enables the borrower to make large repayments in good years, hundreds of these farmers are three to five years ahead of schedule or repayments," Mitchell reports.

## Fair Ground Building Is Designated As A Collection Point For Your Scrap Paper

### Rationing Of Gas Stoves Lifted

Rationing of gas cooking and gas heating stoves will end July 31, the District Office of Price Administration has announced. Combination ranges, except oil-gas combinations, will also be removed from rationing on that date.

Oil cooking, oil heating, combination oil-gas stoves and oil conversion burners for stoves will remain rationed.

OPA explained that a substantial increase in production of gas heating and cooking stoves is scheduled for this quarter. Authorized production appears great enough to remove the necessity of rationing gas stoves. The supply of fuel oil and kerosene is so short, that unrestricted sale of oil burning stoves cannot be permitted. They will remain under the same rationing restrictions as formerly.

Mr. and Mrs. B. E. Miller and children, Billie Carroll and Berma, and granddaughters Norma Lynn, spent several days in San Angelo last week where they visited relatives.

Mr. and Mrs. Leon Ranson of Levelland spent the week end here visiting in the homes of Mr. and Mrs. J. M. Ranson and Mrs. Alice Banta.

Pvt. Weldon Page recently visited his parents, Mr. and Mrs. Luther E. Page in this city on furlough. He is stationed at Ft. Riley, Kansas. Pvt. Page entered the service last October and received his basic training at Camp Roberts, California, which is an Infantry training center. After spending several months at that station, he was transferred to a Mechanized Cavalry unit and went to a radio school. Upon completion of that training, he was sent to his present station at Ft. Riley, Kansas, and is being taught the tactics of the Cavalry. Pvt. Page is a graduate of Lamesa High School, where he participated in the activities of the high school band, having served as captain of that organization during the 1943-44 school year, and having held first chair in the trombone section. Prior to his entry into the service, he was employed at Hurt's in this city.

The salvage of waste paper is one of the most important responsibilities borne by Americans at home who are helping to bring the war to a victorious and speedy conclusion.

Paper's part in the war is tremendous. From the day a soldier goes to war, he is dependent on paper. From his draft card to his honorable discharge, his records are kept on it. His barracks are built with paper wallboard, paper roofing, and paper insulation. He shoots at paper targets, eats from paper plates, drinks from paper cups. His food is wrapped and shipped in paper. His battles are planned, his orders are issued on paper. His life-saving blood plasma is protected by paper and shipped in paper cartons. His food is dropped by paper parachutes. His cartridges are wrapped in it; his helmet and shoes are lined with it; his letters are written on it. Literally, he lives, travels and fights with paper his indispensable ally.

The local Home Demonstration Council is sponsoring a paper collection project here, and according to the regulations they have set forth for the event, community chairmen of the drive will take their collections of paper to the first building inside the Fair Grounds, on either Tuesday or Friday when Mrs. C. F. Gowen will keep the building open from 5:30 to 6 p. m., or on Saturdays when the building will be open from 2 to 6 p. m.

Another collection point for waste paper is the courthouse lawn, where a trailer is stationed on Saturdays. Bundles can be left with personnel there on Saturdays from 10 a. m. to 6 p. m. Bundles should be left there only on that day so that they can be tended to properly.

All types of paper are needed, and council members have asked that your collections be tied for easy handling. Twelve inch bundles have been designated as the size of newspaper collections and 10 inch bundles for books and magazines. These should be tied securely. Boxes should be flattened out and tied.

Save all your waste paper and turn it in on collection days. The council wants all the scrap paper they can secure before September 15.

## Report On Local Oil Developments Given

News of oil developments in this county was carried in Sunday's issue of the Lubbock Avancher-Journal. An article stated that Magnolia Petroleum Company No. 1 Youngblood, northwest Dawson County wildcat, in section 29, block M, FL survey, one and one-half miles northeast of closest production in the Welch-Nelson field had reached 4,717 feet in lime, and is due to encounter the expected pay shortly.

Sgt. Leroy Reeves of Spokane, Washington is here on a fifteen day furlough visiting with his wife and small son Thomas Leroy.

## And That's No Bull; Soo. Bossie, It's A Pigeon

By HOWARD W. BLAKESLEE  
AP Science Editor  
CLEMSON, S. C.—Use of homing pigeons to fly the Sperm for artificial insemination is being planned at Clemson College.

If it works a farmer may keep a pigeon instead of a bull. Since many rural areas are still several days by mail from the centers where bulls are maintained, the birds would solve some breeding problems.

Cooperating with Clemson, the Corning Glass Works is developing tiny thermos bottles, which would be no more load for pigeons than the film they fly for photog-

raphers. The bottles would keep the Sperm refrigerated, a necessity.

The homing birds which Clemson plans to use for the first experiments are being raised and trained by H. R. Stephenson, of Greenville, S. C., who suggested the idea.

Clemson College was one of the first institutions in the United States to inaugurate artificial insemination for herds, a few months after Rutgers University, New Jersey, pioneered the American work in 1938. The artificial method has already become one of the important factors in producing more and richer milk during the war. U. S. Department of Agriculture figures for 1944 recorded nearly 100 artificial breeding associations, with a membership of more than 28,000 dairymen and nearly a quarter of a million cows.

The bulls numbered only 657 for this vast herd. That is about one-tenth the number formerly needed, but the quality of bulls is far higher than when nature worked unaided.

J. P. LaMaster, head of the Dairy Department of Clemson College, directs it partly to get rid of a troublesome venereal disease common among cattle, and in less than six months this disease disappeared from the Clemson herds.

Artificial insemination of dairy cattle has become big business and big money in some areas. Advertising does it. A bull's services are sometimes offered for as high as \$500 per calf. The advertising then states, and truthfully, that the nearly 100 offspring of this bull have been sold at an average price of \$2,000 each. This is possible for breeders exhibiting at the big shows.

It is not possible for the little farmers who only want to increase the milk production and quality of a few cows. Clemson has concentrated on serving the small dairymen. The Clemson bulls include some nationally famous in dairy circles, but the cost to farmers from this state college is only a few dollars per calf.

## Check Nutritional Value Of Foods

Parents who strive to give their children well-balanced meals probably wonder if these foods really contain all the essentials their children really need, so food nutritionists have developed a check list . . . a number of points to look for that show whether or not a child is eating the right things.

A child who gets all the foods he needs should first of all have a well developed body, says Mrs. Eloise T. Johnson, specialist in Family Life Education of the A. and M. College Extension Service. His posture should be perfect, and he should be fat enough so his bones don't stick out. The lines of his body should be slight curves—not angles, and his muscles hard and firm. Flabby fat often means too much of some kinds of foods, and isn't an indication of good health.

"With plenty of right foods and adequate exercise, a child should have bright, clear eyes, glossy hair, and well-formed, sound teeth," Mrs. Johnson said. "His gums should be pink and firm; his skin should be smooth and have good color. When he goes to bed, he should sleep soundly, and wake up refreshed. Many times a bad disposition can be chalked up to not getting the right foods. He should be full of energy, and should be better able to meet the normal exposures to colds and other diseases he gets at school."

A plan should be worked out to include the vitamins, minerals, and other food values that add up to a balanced diet. Individual needs vary, but a good place to start is with milk—serve a child at least three or four cups a day. Include a serving of sweet or Irish potatoes, citrus fruits and tomatoes for vitamin C, and some green and yellow vegetables. Other fruits and vegetables—apples, bananas, corn, beets, turnips, etc., should also appear several times a week.

Protein should be served frequently—lean meat, poultry and fish, and dry beans, peas or nuts. Eggs should appear on the menu at least four or five times a week. Fats and oils give stick to the ribs quality, and of course we like some sugar, syrups and preserves. In general, if you can include plenty of each food group in your meals every week, chances are the children will rate high on the check-list for a well-fed child.

## An Experiment Disclosed That Rats Co-Operate

By H. W. BYAKESLEE  
AP Science Editor  
CHAPEL HILL, N. C. — A discovery that rats can learn to co-operate with each other, for their mutual benefit, has been made at the University of North Carolina psychology department.

White rats in the laboratory faced and solved situations unlike anything a rat ever knew in nature, and as difficult for these animals as the new world situation is to human beings.

The experiments were conducted by Dr. William J. Daniel. He built a box whose floor was a grid of brass rods. In the middle of this floor was a food box, its top level with the floor.

At one end, was a little platform out of reach of the food box. The platform operated an electric switch, so that when a rat was standing on the grid floor and these rods were electrified just enough to give the animal's feet an unpleasant shock, he could escape by stepping on the platform and shutting off the current.

If he stepped off this platform, the current and shocks resumed. Rats placed in the box soon learned how to rush to the platform to shut off the unpleasant current and that if they left the platform to eat they had to endure the shock.

After the rats knew this, they

were placed in the box in pairs to see whether they would learn to take turns, one holding down the platform while the other ate.

They did just that, voluntarily and without any training.

They developed a surprising and amusing degree of skill. If the rat on the platform wanted a turn at the food, and got off the platform to shock his feeding companion, he also got the shocks.

If the rat at the food cup lingered too long to suit the other, the one on the platform would sometimes place one paw on the platform and switching the current on and off with the speed of a drum beat that would be enough to pry the other rat loose from the cup.

They really took turns more than 95 per cent of the time.

After the rats had learned to cooperate, less and less electric shock was needed to keep them cooperating. But they never cooperated when there was no shock at all.

There were great differences in individual rats. A few cooperated just as little as possible, right to the point of nearly starving their companions to death.

But even among rats, the stinkers were the exception.

Eyes of rabbit have fields of vision which overlap behind their head. With this arrangement they can see, without turning their heads, and enemy approaching from the rear.

## For Sale: Hell

AP Newsfeatures  
RALEIGH, N. C.—If you want to get Hell come to North Carolina.

Nobody will give you Hell, understand. You have to buy it.

Hell and Purgatory are the names of two uncertain bogs in eastern North Carolina. The state board of education, owner, recently sold Purgatory. Hell is also for sale.

These bogs, called pocosins, are relatively very wet and very dry, often have excessively acid soil, are covered by evergreen shrubs and scrubby pines, and have never been adequately surveyed.

In the history of the two pocosins a fire warden stands in the most sympathetic light. He called up headquarters and told his superiors there was a fire in Hell.

You can guess what they thought.

Japan's legislative body, the Imperial Diet, has 404 members, divided into the House of Peers, whose members are men of wealth or distinction and an elected House of Representatives.

All aircraft control bearings not made of stainless steel must be cadmium plated to a thickness held between three-ten thousandths and five-ten thousandths of an inch to meet military specifications.

## Postwar Cotton Industry Topic At Dallas Meet

Texas A. and M. College was represented by President Gibb Gilchrist on the program of the sixth annual Cotton Research Congress at Dallas on July 12 and 13, and Grover C. King, Lavaca County agricultural agent, represented the Texas Extension Service. It was the first time in its history that a county agricultural agent had participated in a program of the Congress.

President Gilchrist told the large group of farmers and specialists from many branches of the cotton industry present, that the great postwar challenge to cotton is one of competent human leadership. The cotton industry, an aggregation of thousands of enterprises and personalities, could well use the binding or cementing influence of competent leadership in order that a cohesive body might result with a capacity to cope more effectively with its many problems, President Gilchrist said. All of us interested directly and indirectly in a livelihood from cotton, he added, must enlarge our perspective and assume a greater load of responsibility.

King used his four-years experience in soil building work as the basis for a discussion of proved farm practices in Texas. He said that winter cover crops of annual yellow blossom clover fertilized with 200 pounds an acre of superphosphate had brought pronounced increased acreage production of cotton in Lavaca County, and had retarded cotton root rot.

Two speakers, John Leahy of College Station, director of the Texas Cotton Research Committee, and Charles K. Everett of New York, director of merchandising for a cotton trade organization, struck optimistic notes. Leahy declared that "in my consideration of the future of cotton I believe sincerely that the threat from synthetic competition is a transient force as are storm clouds." Everett predicted that the vast strides made in lowering the cost of cotton production will create new markets for the staple in the postwar era.

The practicability and economy of mechanization of cotton cultivation and picking as practiced in the Delta area of Mississippi were discussed by Francis Gerdes of the Stoneville Cotton Laboratory, who is a graduate of Texas A. and M. College, and by Dr. J. E. Adams of the Stoneville experiment sub-station.

## Labor Supply For Crop Harvests Is Discussed

Mid-July signaled the virtual completion of the wheat harvest in the Panhandle area, with farmers turning attention to preparation of the soil for next year's crop. For this work tractor drivers were needed in Dallam, Hartley, Sherman, Hutchinson, Potter and Swisher counties, according to Caesar Hohn, Extension state farm labor supervisor. According to the estimate of the U. S. Department of Agriculture the 1945 wheat yield will be upwards of 36,000,000 bushels.

Meanwhile, cotton picking in Lower Rio Grande Valley counties was approaching its peak, and cotton was opening rapidly in the Coastal Bend area, Hohn said. Pickers will be progressively in demand for the Coastal region, but action already had been taken by the Extension farm labor office to assemble competent pickers in east Texas who will be at liberty after completion of the tomato harvest and other seasonal farm work. The reduced yield of cotton in the Valley will further ease the demand for labor in the Coastal Bend by releasing pickers when most needed, Hohn said.

Weather recently has been so favorable for the rice crop that harvesting was expected to begin generally at least 15 days earlier than in 1944, Hohn said. Present indications are for a yield equal to that of last year, or even larger. Prisoners of war already have been designated as the major labor supply for harvesting the rice crop.

Improved weather in areas of West Texas has created demand for laborers for cultivating seasonal crops and for general farm work. Cotton choppers were needed in Childress, Wheeler, Knox, Dickens, Mitchell, Nolan and Taylor counties; and a similar type of workers were in demand in Denton, Collin, Fannin, Rockwall and Limestone counties.

Some miscellaneous labor needs also had developed, Hohn said. The best broomcorn crop in several years had created a demand for harvest workers in Lampasas County. At the same time, an acute shortage of dairy workers had developed in San Patricio County.

The first national election returns to be broadcast were on Nov. 2, 1920, when Harding defeated Cox.

ADMIRING RETURNED HERO'S MEDALS—The family of Lt. Audie Murphy (second from right) gathered around to admire the medals which make him one of the most decorated hero's in the U. S. Army and gained him the name of "Blood and Guts Junior." Shown at their Farmersville, Texas, home are (left to right): Brothers and sisters Billie Murphy, Mrs. Corrine Burns, Joe Murphy, Nadine Murphy, Lt. Murphy, holding Congressional Medal of Honor; and Cousin Poland Glenn Burns. (AP Photo).

## Plants Are Indicators of Soil Fertility

Plant growth writes a story of fertility or the lack of it in the soil for any one able to read it. For instance, says M. K. Thornton, agri-

cultural chemist for the A. and M. College Extension Service, certain plants may do well in some places and be entirely absent a short distance away. The means of making a particular plant grow where it now is absent is the simple matter of soil fertility, or soil reaction.

If it is a question of fertility, application of fertilizer will overcome any deficiency and the plant will thrive equally well over the area.

Thornton says. If it is a case of soil reaction, the application of the proper soil amendment will produce the desired results.

Restoration of the soil is the constant effort of nature, but natural processes are slow. Thornton cites this specific case: When many east Texas soils are worn out the only plants which will grow may be "poor joe." This plant will struggle along and return to the soil a small amount of minerals and organic matter when it dies in the fall. To this extent, the level of soil fertility is raised. Each succeeding year the plant will become more vigorous and have a greater influence upon the level of soil fertility.

The progressive improvements of the soil will be observed in the gradual change of the type of grass. After several years needle grass will appear in certain areas and finally cover the entire field, meanwhile crowding out the "poor joe." At about this stage of restoration bermuda or some other desirable grass will begin to show in selected areas. Thus the procession of plants continues.

Clovers, Thornton says, offer excellent indicators of the amount of phosphate in the soil. Carolina clover, for example, is the only one which will grow on some of the worn out soils in east Texas, but in a few years a weak, stunted lespedeza will appear. From this beginning, unless interrupted, the evolutionary process will proceed through hop clover, white dutch clover to burr and yellow blossom sweet clover. Finally, if the phosphorus content becomes high enough, alfalfa will grow in these soils.

Thus, says Thornton, each individual can test soil for himself by studying the procession of plant growth and the character of plant growth on the land.

## Conserve Peaches By Drying Them

With this year's large surplus of peaches and a scarcity of sugar, homemakers are concerned with the problem of how to conserve this crop. Mrs. Winifred J. Leverenz, specialist in food preservation at the A. and M. College Extension Service, offers the reminder that it takes no sugar to dry peaches, and the results from this process will offer an attractive addition to the family menu during winter months ahead.

To prepare the fruit for drying,

prepare as for canning, either peel or halve, as desired. Treat with Sulphur to keep color and food value. One method is to dissolve 3 1-2 tablespoons of potassium metabisulfite or sodium sulfite in 1 gallon water, drop peaches as they are peeled or cut into this solution for 15 minutes. Drain and arrange on tray for drying.

The other method is to burn flowers of sulphur under the fruit. Use 1 teaspoon sulphur for each pound prepared fruit. Put the sulphur in a small piece of paper, roll it loosely and twist the ends. Arrange a place out of doors. Place fruit in a tray and put the roll of sulphur in a pan about 12 to 15 inches under the trays. Start burning the roll of paper containing the sulphur. After it has started burning, put a box or barrel down over the trays and pull some loose dirt

up around the edge of the box to hold the fumes. For peeled peaches, sulphur for 20 minutes, for unpeeled peaches, leave under the box with the sulphur fumes about three hours.

Complete the drying process by sun drying, or by controlled heat in an oven. If sun drying is used, arrange fruit on slatted or wire trays covered with cheese cloth; cover peaches with a layer of cheese or regular screen dryer. Place where air can circulate around fruit.

When the peaches are dry they are pliable and leathery and not sticky. Heat them to 150 degrees in an oven from 15 to 30 minutes. Place in hot, dry jars or cans and seal immediately. Store in a cool, dry place.

La Paz, capital of Bolivia was founded by the Spaniards in 1548.

**Your Electric Refrigerator IS A Priceless POSSESSION ...GIVE IT GOOD CARE**

Your electric refrigerator is built to give long service. Like all equipment, it serves you best if you give it proper care. To help your refrigerator operate better and last longer, here are some timely suggestions:

- Defrost your electric refrigerator regularly—at least once a week in the summer, or when the layer of frost becomes about as thick as a lead pencil.
- Your refrigerator needs breathing space. Be sure there is air space in back of the refrigerator, and over the top.
- Avoid using a knife, ice pick or other sharp instrument to loosen ice trays. You might puncture the freezing coil.
- If your refrigerator has an open type mechanism, it should be oiled according to the manufacturer's instructions.

Should your refrigerator need adjustment or repair, call the dealer from whom it was purchased, or some other reliable service man who is experienced with your make of refrigerator.

### S-Sgt. Carmichael Is Assigned To Occupational Duty

S-Sgt. James Emmitt Carmichael, 29, son of Mr. and Mrs. J. H. Carmichael of Star Route 2 in this county, has been assigned to the occupational air force in Europe as a member of the 99th Bombardment Group, 346th Bombardment Squadron, a veteran B-17 Flying Fortress unit of the 15th Air Force. Sgt. Carmichael has been overseas for 16 months as an electrician. He wears the Bronze Star in addition to other decorations.

The Distinguished Unit Citation was awarded his group for outstanding performance on a mission of July 5, 1943, against a Nazi airfield at Gerbini, Sicily. A cluster was added to this citation following the group's blasting of an important enemy target at Wiener-Neustadt, Austria, April 23, 1944, against heavy opposition of Jerry fighters and anti-aircraft fire.

Sgt. Carmichael, who is a former student of the Mt. Olive and Liberty Schools, entered service on May 7, 1943.

### Heat Exhaustion, Sunstroke Reduce Farm Work-Days

Every hour's labor on the farm will be valuable this year when help is scarce, and farm leaders are hoping that there will be a reduction in the number of farm workers who are annually overcome by heat exhaustion and sunstroke, says E. C. Martin, State chairman for the Farm Safety Week program, and Assistant State Agent for the A. and M. College Extension Service. National Safety Week has been set for July 22-28.

"According to the National Safety Council, heat exhaustion and sunstroke are two entirely different things, although both may seem to result from exposure to high external heat. It is easy to tell one from the other. With heat exhaustion the patient's skin is cold and clammy, while with sunstroke, the skin is hot and dry," Mr. Martin said.

"A simple rule may serve as a guide and avoid confusion regarding the treatment," states Mr. Martin. "Briefly, it is this: If the patient is cold, make him warm; if he is hot, make him cool."

In sunstroke, place the patient in a cool shady spot, remove tight fitting clothing and place him on

his back with head and shoulders raised. Apply ice cold cloths to his head and cool the body gradually with a cool bath. Call a doctor as soon as possible and administer cool drinks, not cold, if the patient is conscious.

The National Safety Council suggests several measures to prevent heat exhaustion among farm workers: Avoid alcohol and ice water; drink cool water and lemon or other citrus fruit juices. Eat vegetables and light easily digested foods; wear light, loose clothing; avoid over-fatigue; bathe daily; get plenty of sleep.

Replace body salts lost through perspiration by salting food, drinking salt in water, or by taking salt tablets (8 or 10 ten-grain tablets daily). Keep the head covered, while in the sun, and the body, including arms and legs with loose fitting comfortable clothing.

### THE TAIL GUNNER? GO AHEAD AND ASK

MIAMI BEACH, Fla. (AP) — Capt. Edward J. Sawberger, of Baytown, Texas, awaiting reassignment at an Army Air Forces rehabilitation center here, described how his Liberator made a crash landing on an Adriatic island.

"Any one hurt?" he was asked. "The nose gunner," Capt. Sawberger replied. "He injured his nose."

"And the—"

"No," said the captain. "the tail gunner wasn't injured."

### H. Brown Played Dead, Survived Shelling In Italy

WITH THE FIFTH ARMY, Italy —The story of how three American soldiers survived German machine-gun fire and friendly tank and mortar barrages by playing dead as they lay exposed within a few yards of enemy emplacements was told after the final Fifth Army drive in Italy.

The men were Private First Class Horace E. Brown, whose mother is Mrs. Leotte Brown of Lamesa; Staff Sergeant Ennis M. Beeson of Oklahoma; and Private First Class John A. Foley of Pennsylvania, all members of Company E, 363rd Infantry Regiment of the 91st "Powder River" Division.

Beeson, a squad leader, Foley, an automatic rifleman, and Brown, a rifleman, were part of a platoon attacking a strongly defended hill. They were fired on from a well-

camouflaged machinegun nest while other machineguns opened from the flank.

The officer in charge and key non-coms were wounded. Beeson, Foley and Brown remained motionless and the Nazis machine gunners ceased fire. When Beeson attempted to crawl forward to throw a hand grenade, the gun cut loose again. The rest of the platoon withdrew, but each time Beeson and his two comrades attempted to inch their way backward, bullets hit the dirt around them.

Their packs were ripped off their backs. They decided to play dead and fire ceased. Unaware the three had not withdrawn with the rest of the platoon, friendly tanks and mortars placed fire on the enemy positions.

For hours, under the hot sun, Beeson, Foley and Brown pressed closed to the ground. Finally, darkness came and they cautiously moved away from the Nazis emplacements.

### Yellow Fever Ammunity Lasts A Cool 77 Years

By HOWARD W. BLAKESLEE  
AP Science Editor

NEW ORLEANS — Dr. Rudolph Matas, of Tulane School of Medicine, is still immune to yellow fever, due to an attack of the disease 77 years ago.

The lengthy immunity is interesting information for the more than 10 million American soldiers who have been vaccinated against yellow fever since the war began. Dr. Matas' experience is an indication that the new yellow fever vaccination may be expected to afford real protection, and perhaps for a long time.

Dr. Matas' immunity came from the yellow fever virus when he had the disease. The vaccine uses this same virus, and the exceedingly long protection it afforded the physician is possibly, an inherent property of the virus which will last a long time in the milder dosage of vaccination.

The New Orleans physician tells how his present immunity was proven in the New Orleans Medical and Surgical Journal. Two groups of mice received yellow fever inoculations. The amount of yellow

fever given to all these mice was 50 times more than enough to cause their certain death.

Half of the mice received also some of Dr. Matas' serum, the white, watery part of his blood. All except one of the mice receiving the doctor's serum lived. All those unprotected by his serum died.

The case is even more remarkable than the mouse test indicated. Dr. Matas is 84 years old, an age where physicians expect the protective effects of an immunity, like that to yellow fever, to be wearing off.

Americans have forgotten to be concerned about yellow fever until American boys entered areas swarming with yellow fever mosquitoes, whose bite transmits the disease.

One of the world's highest waterfalls, 2,000 feet, is at Kukuenaam, British Giana. Niagara is 167 feet high.

One by one, medical science is finding the keys that unlock the secrets of diseases and infections that for centuries have barred the way to healthy longevity. Insulin, Vitamins, Sulpha Drugs, Penicillin—all were unknown a few short years ago. Today, they are opening up new vistas of health . . . offering new hope to the afflicted. Prescriptions calling for them, and for other wonder-working drugs of modern medical science and therapy, can be filled at McCALL-PARSONS. Someday, there may be a key for every lock, but in the meantime, each persons holds the key to a longer, healthier life—frequent health check-ups by the family physician.

### Subscribers Are Asked To Check Expiration Date

Courier readers are asked to watch the expiration dates on their paper in order that they may not miss a single issue of The Dawson County Courier, your home town newspaper.

In other words, if the number following your name on the paper read 8-45 that mean that your subscription will expire on August 1, 1945 and that unless your subscription is renewed your paper will be stopped at that time.

The subscription price of the Courier is \$3.00 a year in Dawson, Martin, Gaines, Borden and Lynn Counties, and \$2.00 for six months. For a limited time only a 2 year subscription will be offered for \$5.00, or you can save one dollar by taking a two year subscription. The subscription price outside this territory is \$4.00 a year, except for men in the armed services which remains at \$3.00 a year.

## SAVE MONEY...

If your car is in first class mechanical condition you will save the cost of an overhaul in gas and oil, as well as having confidence in it for a long trip or the needed hot weather driving.

We have expert mechanics on the job at all times and you are assured of the best work obtainable in this section.

**BRACES, SPLINTS SAVE PRIZED MARE**—Rosine Princess, registered brood mare belonging to B. R. Barfield, Amarillo, Texas, hobbles around on braces and splints applied by Dr. L. M. Griffin after an accident which fractured a shoulder. Dr. Griffin said the treatment will be successful, and he plans to remove brace in a week or two.

**P. Yonge, A Former Lamesan, Promoted To A Liuet. Colonel**

Promotion of Philip Yonge, former county judge of Dawson County, to the rank of lieutenant colonel on the judge advocate staff at Camp Hood was announced recently.

Col. Yonge, was a former Sweetwater attorney and a member of the law firm of Beall & Yonge in that city for more than five years before he went into service in December, 1942. He moved to Sweetwater from Lamesa in 1937, and was county judge of Dawson County from 1930 until 1937. He was reared in Post, and served two years in the army during World War I. He had held a reserve commission since 1926.

Col. Yonge has been at Camp Hood since the fall of 1943. He and his wife have an apartment in Temple.

Mr. and Mrs. C. O. Magee and children of San Angelo spent the week end here visiting with her parents, Mr. and Mrs. L. F. Kennedy.

**Lubbock Field To Stage An Open House August 1**

An "Open House" that is "different" is promised by Lubbock Army Air Field on the occasion of the 38th Anniversary of the now gigantic Army Air Forces. Air Force Day, Wednesday, August 1, will be a regular work day for the men and women who staff the big AAF instrument school but the public will be invited in for a day long "look-see" into the operations of the base.

Included in the program will be a chance to listen in to the air-to-ground conversations between pilots flying "under the hood" overhead and the regular control tower staff.

The gates of the field will be open to the public starting at 9:00 Wednesday morning and will not be closed to visitors until 6:00 that night.

Also included on the program are: An opportunity to see AT-6s, B-17s, B-25s and other military aircraft at close view. A ride in a Link Trainer for those who want to try a little "instrument flying" without leaving the ground. Informational films, shown free of charge in both the post theater and the ground training department. Displays of "mock-ups" or cut away models of instruments and airplane parts. Displays of equipment used in the arctic, the jungles; for escape when downed at sea, and that carried in all types of modern fighting craft.

The days program will close with the regular evening retreat ceremonies with at least two squadrons drawn up for the customary evening respect to the flag. Decorations, awarded overseas, will be presented at the retreat ceremonies to several of the fields complement of officers and men.

**Lt. J. Trahan, Glider Pilot, Returned To States On July 25th**

Second Lieutenant Jack Trahan arrived in the United States Wednesday, July 25, after serving overseas in the European Theatre of War for approximately 17 months as a glider pilot.

He landed at Camp Miles Standish in Massachusetts, and from there was released for a furlough.

His wife who has been employed at Painter & Mayfield in this city, left Lamesa Friday for Kaple Louisiana, where she will meet Lt. Trahan, and they will visit there for several days.

Captain and Mrs. Perry Cox are visiting with her parents, Mr. and Mrs. Robertson in Crosbyton this week.

**Pfc. Baker Gets Purple Heart For Recent Wounds**

WITH THE 32ND INFANTRY DIVISION IN NORTHERN LUZON—Making an advance on a strongly-fortified enemy pillbox under small arms fire and a barrage of hand grenades during the fighting in Northern Luzon, Private First Class Curtis B. Baker, son of Mr. and Mrs. C. Baker of Lamesa, was wounded by grenade fragments and has been awarded the Purple Heart. Villa Verde Trail, despite heavy of the famed 32nd (Red Arrow) Infantry Division have cleared the Villa Verde Hrail, despite heavy enemy resistance from deep cave positions in the Caraballo Mountains.

Recovering from his wounds Pfc. Baker has returned to his outfit, Company K of the Division's crack 128th Infantry Regiment. He also holds and Combat Infantryman Badge and Philippine Liberation Medal.

**C. Batson, S 2-C Back After Patrol Duty In Atlantic**

Coy. C. Batson, 29, seaman, second class, USNR, the son of Nathan L. Batson, Lamesa, is a gunner aboard a big Navy PBM search plane, and has chalked up 75 patrols in 22 months of overseas duty.

Now returned to the United States on leave, he was attached to Patrol Bombing Squadron 210 which was based in the Atlantic area.

He and his squadron mates flew on long day and night sorties in all kinds of weather on a constant vigil for enemy U-boats which threatened the steady flow of men and supplies to European fighting fronts.

Batson, whose home is on Route 1 in Grand Prairie, is married to the former Lola Day, Knoxville, Tenn. The couple have two children, Bobby 9, and Larry, 7.

Batson has been in the Navy since September, 1942.

**Lt. V. D. Wade Taking B-29 Training Now**

Ready for transition training in E-29 Superfortresses, 2nd Lt. Vernon D. Wade, son of Mr. and Mrs. Elmer L. Wade, Route 1, Ackerly, has reported as a student at Randolph Field.

At the AAF Training Command installation, B-29 commanders, pilots and flight engineers master operation of the giant superbombers preparatory to combat assignment.

Bill Harrington, son of Dr. and Mrs. J. M. Harrington of this city arrived here Friday, July 27, after receiving his discharge from the Army Air Corps. Harrington, who served as a captain while in service, was credited with 109 points according to standards of the Army's demobilization plan. In service since 1942, he served overseas in the Pacific area for 18 months, where he was pilot of a C-47 Transport. He holds the Air Medal and 3 Oak Leaf Clusters, as well as 6 battle stars. Harrington, his wife, and child, Louise, will make their home in this city.

### Latest News From THE HOME DEMONSTRATION AGENT

MYRTLE DICKIE NEGY  
County Home Demonstration Agent

Peaches are going to waste for the lack of sugar. This statement is true in large parts of the South. But they can be canned without sugar. They have as much food value, but usually do not have as nice a texture, color and flavor. Plain boiling water or fruit juice is used instead of syrup if the sugar substitute is not available. To make the fruit juice, wash the softer peaches. Crush and grind them; then strain if a clearer juice is desired.

For canning, select fresh, firm ripe peaches. Wash and peel. To peel, scald the peaches one or two minutes in boiling water. Then, put them in cold water immediately. The skins slip off easily. Cut into halves and removed seed.

#### METHOD ONE FOR CANNING

Pack the raw peaches into a clean jar or can. Bring fruit juice or water to a boil and pour over the packed fruit. Leave 1-2 inch headspace. Steam before sealing:

Pints—10 minutes.  
Quarts—15 minutes.  
Half gallons—20 minutes.

#### METHOD TWO FOR CANNING

Drop the firm fruit into the fruit juice or water. Bring to a good boil. Pack into boiling hot clean jars. Leave 1-2 inch headspace. Seal according to type of container being used. Process in a boiling water bath.

Pints and quarts—15 minutes.  
Half gallons—25 minutes.

Sgt. Charles H. Mitchell who recently returned from the European Theatre of War has been visiting here with his brother and wife, Mr. and Mrs. Jack Mitchell.

Mary Lou and Katie Kay Keathley of Lawton, Oklahoma are visiting here this week in the home of Mrs. George Keathley.

Mr. and Mrs. J. M. Russell of Muleshoe spent the week end here visiting with their daughter, Mrs. Franklin Dennis.

Miss Jean Painter of Plainview spent the week end here visiting in the home of her parents, Mr. and Mrs. Amos Painter.

Miss Dorothy Lee McReynolds of Sweetwater spent the week end here visiting with her parents, Mr. and Mrs. Marion McReynolds.

## C.E.D. Chairman Gave Interesting Talk For Lions

E. W. Renner, local chairman of the Committee of Economic Development, presented an informative address at the regular meeting of the Lamesa Lions Club which was held on Thursday, July 26.

His remarks concerned the setting up of the Committee of Economic Development and Lamesa's part in such an organization. His talk involved facts about prospective post-war jobs.

Several guests were present for the Thursday session, including Mr. Burkett who is connected with the Internal Revenue Department with headquarters in Odessa, Pvt. First Class Stancell Clement, who is a member of the club, and Sergeant Oliver Cates.

## Sgt. Richardson, Who Has Battle Stars, Now Here

Sgt. Curtis A. Richardson, son of Mr. and Mrs. J. A. Richardson who reside on Route C in this county, arrived here July 18 to spend his thirty day furlough visiting with his parents.

A member of the Medical Corps, Sgt. Richardson left for overseas service on October 10, 1944. While across he served in France, Belgium, Holland, and in Germany where he participated in two battles. He was attached to Patton's Third Army for a time, and was later transferred to Simpson's Ninth Army.

Sgt. Richardson underwent an operation while overseas, and was hospitalized in England until February 17. He was sent home on a hospital ship, and transferred to a hospital in Santa Barbara, California, where he underwent two operations. After recovering he was given a furlough to visit home.

Sgt. Richardson entered service in April, 1943, and received his training at Camp Barkeley, Texas; Camp White, Oregon; and at Camp Pickett, Virginia.

He is a former student of Lamesa High School, and prior to entering service farmed here and was employed for the Britt Trucking Company.

## T-4 Armstrong And Pvt. Womack Flown To States

MIAMI, Florida—More Texas men today were added to the roster of the International Short Snorter Society—the exclusive organization made up of men and women who have flown trans-ocean. They were landed at Air Transport Command's Miami Army Air Field after flying here from overseas in ATC planes.

Camp Blanding, Florida, was their next stop. From there they go to reception centers nearer their homes for separation or furlough prior to reassignment.

Latest Texas "Short Snorters" clearing the ATC Caribbean Division hub includes T-4 Byram O. Armstrong, 27, of Ackery who served in the Infantry for 28 months in Europe and who has five battle stars; and Pvt. Guy D. Womack, 24, of Lenorah who served with the Infantry for four months in Italy.

Pud Moss of Hobbs, New Mexico spent the week here visiting with his parents, Mr. and Mrs. Elbert Moss.

### HE DIDN'T EVEN ASK FOR A CHANGE OF VENUE

MOLINE, Ill. (AP)—When Police Magistrate Ralph Stephenson, who hears traffic code violation cases, walked out of City Hall, he found an overtime parking ticket on his car. He returned to his office, fined himself \$1 and, he says, tossed in a silent lecture.

## History Of Roads Discussed Friday By M. C. Lindsey

"History of Roads in Dawson County," was the topic of discussion at the Rotary Club meeting held Friday, July 27, at the Plaza Hotel. M. C. Lindsey, prominent Lamesa resident, presented the discussion giving the history of roads as far back as the year of 1872, and presenting highlights of the activities in connection with roads of the early settlers of the county.

In his talk, he paid tribute to the early settlers and their efforts and work in developing roads, and the rich heritage they left the county.

Two guests were in attendance at the Friday meeting, including Roy Baskin, instructor at Ranger Junior College in Ranger, and Major Cleve Austin of San Antonio.

## Car And Small Truck Tire Quota For August Set

Passenger car and small truck tire quotas for the nation and for the Lubbock District remain the same for August as for July, but the quota of large truck tires was decreased, according to District OPA Rationing Executive William G. Williams.

The reduction of more than 34,000 in the large truck tire quota will require the most rigid conservation of tires in this category. WPB and OPA said. The District Emergency Truck Tire Board will screen all applications with the greatest care to assure that purchase certificates are issued to only the most essential applicants. Truck owners and drivers are urged to do everything possible to stretch the life of their truck tires.

Production of both large and small truck tires was reduced by the recent strikes in Akron, Ohio. Fortunately, production of passenger car tires was not greatly cut by the shutdown of rubber plants.

Despite curtailed production, substantial inventories of most small size truck tires permitted the July quota to be repeated in August. Only exceptions are the 700-20 tenply and the 750-20 tenply that were short prior to the strikes and are now critically short. Because of the limited number of these

## Odessa Again Handles Sea Freight In Big Volume

LONDON (AP)—The great seaport of Odessa, on the Black Sea, now handles as much cargo as before the war, writes Peter Shari, a native of the city. Odessa was freed from German-Romanian occupation April 10, 1944, after 30 months of bondage.

Shari, in a story distributed by Soviet News, writes that "knowing how vitally important the harbor is to the city, the Germans and Romanians took particular care to reduce it to ruins."

Much progress has been made in the past year, however:

"The harbor lives today. Ships sailing in from British and American ports load and unload cargo at its moorings. . . . The harbor is being both reconstructed and expanded. In the very near future it will be possible for such ocean

size tires, the WPB has given OPA a separate quota for them and each application must show the size requested.

Flight Officer and Mrs. Gordon F. Young of Big Spring spent the week end here visiting with her parents, Mr. and Mrs. M. H. Crawford.

Present day Northern Ireland was once part of the ancient Kingdom of Ulster.

liners as the Normandie to anchor here."

Reconstruction of Odessa's shipyards is also in progress.

## Freeze Your Surplus Fryers

Fried chicken is always a favorite American delicacy, and with modern freezing methods, it is a dish we can now enjoy all the year round. Too, with meat shortages an ever-present problem, and costs of chicken feed high, freezing the surplus fryers for family use is a good way to add to the meat supply and insure your family fried chicken later in the season.

There are a few points to remember in preparing your fryers or quick freezing, suggests Mrs. Winfred J. Leverenz, specialist in food preservation of the A. and M. College Extension Service. The first of these is proper dressings, with emphasis on getting a good bleed. Care in dressing the fryers will go a long way in preventing any off-flavor, and will help keep the frozen fowl fresh. A quick chill is also important in this process as bacterial changes can take place rapidly in the moist, warm body cavity. Cut the chickens into pieces ready for frying before freezing.

Proper packaging is the next important step in freezing your fryers. Of course cellophane bags, sealed with a hot iron are best, but cellophane paper may be used as second best. In case neither of these is available, a heavy waxed carton may be used. The chickens, cut and chilled, may also be packed tightly in tin cans and sealed. Glass jars are not recommended, as they are easily broken and hard to pack into the storage locker.

The packages should then be stored at zero degrees temperature, and the temperature should not be allowed to fluctuate more than 3 degrees. Some locker plants are allowed to run at higher temperatures, even up to 10 or 15 degrees, and this practice cuts down the length of time the food will keep without getting rancid. Under the best conditions—proper preparation, packaging and temperature, food may keep from 8 months to a year, but the temperature in the locker should be carefully checked at intervals.

If conditions are not such that you can be assured of airtight packaging and zero degrees temperature, some people prefer to place the chicken in a leak-proof container and cover with a brine solution made with 1 teaspoon salt dissolved in 1 cup water.

Since the chickens are thoroughly cleaned, and already cut before freezing, the only preparation necessary when you get ready to cook them is to let them thaw slightly, salt, flour and fry.

## In A Word, Cloth

AP Newsfeatures

DONVILLE, Va. — Denim, chambray and plaid are all very well, but how about such terms as bag-

herra, pronon, tussag, bandri, monofil, cupprammonium?

Those are a few of the 800 new words the textile industry has exploded into the language in the last few years.

With so many new fabrics coming into the market, the Dan River Cotton Mills, of Danville, discovered its salesmen were having a hard time getting the new mill jargon across to the customers.

In solving this problem the company produced a new dictionary of trade and technical names, many of them totally foreign to the average American.

Basil Browder, company vice president, says that requests for copies of the glossary have come from universities, chemical manufacturers, brokers and other cotton mills.

The expansion of terms began with the introduction of synthetic fibers which could be mixed with cotton. At the same time new forms of dye and new ways of stamping fast colors on white cotton also were coming out.

A new name was found for every new product, says Browder, when it was necessary for the developing company to protect it by patent.

The Berber language is spoken by thousands in Morocco and other North African communities.

FIRST BALE FROM PARIS, TEXAS, TO NEW ORLEANS — This tank lighter is carrying the first bale of cotton to be sent by river from Paris, Texas, to New Orleans, where it arrives July 5. The engineer is John Marshall. (AP Photo).

In the United States meat which is not federally inspected may not legally be shipped across state lines.

One hundred and twenty-two million pigs were raised in the United States in 1943, almost double the prewar average.

Kathleen Windsor, author of "Forever Amber," read 356 books on the Restoration in the preliminary research for her novel.

### OFFICE OF DEFENSE TRANSPORTATION GENERAL ORDER 52

Effective 12:01 am, June 30, 1945

"No carrier shall reserve, assign or allocate seating or sleeping space on a passenger train more than 120 hours in advance of scheduled departure time of such train. No carrier shall issue a ticket for a reserved seat or sleeping space on a passenger train more than 120 hours in advance of scheduled departure of such train, except in the case of tickets for reservations made prior to the effective date of this Order which have not been picked up."

### OFFICE OF DEFENSE TRANSPORTATION GENERAL ORDER 53

"On and after 12 o'clock noon, July 15, 1945, no common carrier by railroad or sleeping car company shall operate or transport any railway car containing sleeping space or sleeping accommodations to a point of distance 450 miles or less from the point of origin of such car, such distance being measured by the shortest distance by railroad over which sleeping cars are operated between such points. . . Each common carrier by railroad shall forthwith cancel all reservations for space after 12 o'clock noon on July 15, 1945."

# What about Travel now....

*under the new Government rulings?*

The Government has curtailed civilian travel by ordering the railroads not to make reservations on passenger trains more than five days in advance of departure and by banning sleeping car service on trips of 450 miles or less.

A lot of people are assuming that, with the European war over, the travel situation on trains should have eased up by now.

But they are finding out that it's harder than ever to get space. They're asking themselves, "Why?"

The reason is simply that the railroads are being called upon to repeat a job of moving over 3,000,000 soldiers. But this time it is to be done in 6 to 9 months whereas originally it took more than 2 years to move these men.

The railroads are still operating with the same number of passenger cars that they had when the war started. Building new passenger cars has not been permitted since Pearl Harbor.

Many Pullman cars have been converted into

hospital cars, and, of course, more Pullmans and coaches than ever are being withdrawn from civilian service to use in the movement of men to the Pacific.

The great bulk of traffic for the Pacific funnels into 4 railroads to ports of embarkation in California. Santa Fe, with its improved facilities, is carrying a large part of this traffic.

This all adds up to the fact that only a very limited amount of space is left over for civilian travel.

Of course we like to accommodate our friends and make new acquaintances. But you, too, agree that the troops and materials needed to whip Japan *must* come first.

New cars are now on order. Santa Fe has enough new chair cars on order to seat 3186 people. 16 new lunch counter-diners are also on order. A substantial number of new sleeping cars will be placed in service on the Santa Fe as soon as War Production Board orders permit.

## SANTA FE SYSTEM LINES

"ALONG THE ROUTE TO TOKYO"

I had such good luck with my first chicks that I've started some late ones. Sure they're getting Dr. Salebury's REN-O-SAL in the drinking water for its tonic benefits... and even late chicks can get cecal coccidiosis so I bought a good double supply. My older birds still get it as a tonic, too.
