Spring training

They may not be too excited now, but these youngsters are getting an early lesson in how to be a hardy Midland Cubs baseball fan who braves adverse weather to attend an opening game. Fathers Gordon Schrank, left, with daughter Katie, 1½, and Bobby Burns with son Tyler, 15 months, bundled up their children and battled near-freezing temperatures, wind and sand for the Cubs home game. The Cubs lost to the Beaumont Gators, 12-2. Related story on Page 1B.

Senate panel has own ideas about budget

WASHINGTON (AP) — A rebellious Senate Budget Committee has redrafted much of President Reagan's domestic budget blueprint and is likely to further defy the president by providing for tax increases in 1984.

In a marathon session lasting almost 11 hours, the Republican-led committee voted Wednesday to leave intact tens of billions of dollars for welfare, food stamp, housing and other social programs that Reagan wanted to cut.

In a series of tentative budget decisions, the committee set spending limits for fiscal 1984 at $11.3 billion above Reagan's non-defense proposals for next year.

Last week, the committee voted to cut Reagan's proposed defense buildup in half despite last minute efforts by the White House to delay the vote.

Congressional sources, speaking on condition they not be named, said Wednesday the administration has now given up hope of changing the committee's decision on military spending. Instead, they said it plans to wage a new battle when the budget resolution reaches the Senate floor later this month.

Today, Democrats on the committee were expected to call for $30 billion in new taxes next year, enough to repeal the third of this year's federal income tax cut, and to also urge elimination of indexing of tax rates in 1985.

"If we don't do something (to raise taxes) in 1984, we are jeopardizing the economic recovery," said Sen. Lawton Chiles, D-Fla., the senior Democrat on the budget panel.

Realistically, the committee is unlikely to provide for a full repeal of the tax cut, but capping it to exclude higher-income taxpayers was a possibility.

There are 10 Democrats and 12 Republicans on the committee. And at least two Republicans, Slade Gorton of Washington and Mark Andrews of North Dakota, indicated they might be willing to support higher taxes to diminish the federal deficit.

Conservative Republicans in and out of the committee are sure to wage an intense battle, with Reagan's support, against any new taxes next year.

"Raising taxes is not the way to balance the budget," said Sen. Orrin Hatch, R-Utah, a member of the budget panel.

Withholding rates reflecting the third year of tax cut, enacted in 1981 on Reagan's urging, take effect July 1.

Indexing, setting tax rates so workers are not penalized by inflation when they get cost of living increases, takes effect in 1985, and is expected to be a target of Democrats.

Sen. Pete Domenici, R-N.M., the committee chairman, said the spending levels set this week are too high, and he was expected to push for reductions today.

In its decisions on Wednesday, the committee:

—With Democratic support, dramatically slowed Reagan's proposed cutbacks in Medicare, Medicaid and other huge federal health programs. The president wanted $31 billion in savings over five years; the committee set the figure at $14 billion with few direct reductions for elderly or poor beneficiaries.

The decision, if approved by Congress, would likely scuttle Reagan's plan to substitute a new catastrophic illness plan for higher hospital costs for many Medicare patients.

—Approved a six-month freeze on cost-of-living increases for military and civilian workers. Reagan wants a year-long freeze.

—Rejected most of Reagan's suggestions for a third year of cuts in welfare, food stamps and subsidized housing for the elderly and low-income families.

—Cast aside the president's proposal for reworking the Civil Service retirement system.

—Provided $300 million more next year than the president wanted for child nutrition programs.

—Ignored Reagan's call for eliminating more than $600 million in help for poor persons to pay their utility bills.

—Agreed to keep $1.7 billion over Reagan's budget for education programs, including $150 million for college student loans.

The panel also included $100 million for education grants poor young persons, $60 million for vocational education and $230 million for improved mathematics and science instruction.

Adelman confirmation likely

WASHINGTON (AP) — High-pressure lobbying by President Reagan apparently has convinced a Senate majority to ignore doubts about Kenneth L. Adelman and vote to confirm him as the nation's arms control chief.

Both supporters and opponents said late Wednesday it appeared all but certain the Adelman nomination would squeeze through its final Senate test today after three months of controversy over the nominee's qualifications, his commitment to arms control and his candor under fire.

Sen. Paul Tsongas, D-Mass., the leader of the Adelman opposition, told reporters only a groundswell of opposition by the public would change the outcome. He said he could predict no such development.

President Reagan, Vice President George Bush and Cabinet members phoned senators to drum up support for the nomination and Adelman himself continued to make the rounds of Senate offices.

"If senators are getting no calls from home, and they are getting calls from the president, we are lost, ... we'll lose this thing," Tsongas told reporters.

"The administration has the edge at this point," Tsongas said. "Republicans who might otherwise support us want to be loyal to the president."

Republican Leader Howard H. Baker Jr. of Tennessee said he believed Adelman would be confirmed but added, "It's going to be close."

Sen. Charles Percy, R-Ill., who put aside his own doubts about Adelman to lead the drive to confirm him, told reporters: "I just have the feeling Ambassador Adelman will win, but by a very narrow margin."

Percy said he made the decision to support the 36-year-old Adelman, now deputy U.S. ambassador to the United Nations, after getting administration agreement to a set of conditions he says will help move the arms control process forward.

"The responsibility is now the president's to prove that he is right and that with Ambassador Adelman he can put together this team that will successfully put forward arms control agreements faster than with any other team," Percy said.

"It is up to Ambassador Adelman and to the president himself to prove that he is the right person at this time to carry these policies forward," Percy said.

If confirmed as the new director of the Arms Control and Disarmament Agency, Adelman will succeed Eugene V. Rostow, who was fired by Reagan on Jan. 12.

Tsongas was interviewed shortly after Sen. John Chafee, R-R.I., one of a small group of undecided senators, announced he will vote for Adelman to end "confusion and chaos" in the agency and to enhance the chances for arms control progress.

"That's disappointing," said Tsongas. "The fact we lost Chafee is a bad sign ... We haven't picked up any today."

"I for one will not vote for a nominee who believes that arms control is a sham," Tsongas said, adding that Adelman's confirmation will further shake the credibility of U.S. arms control efforts among Europeans.

Supporters of the embattled nominee said they had the votes not only to gain confirmation by a narrow margin, but also to block any effort to kill the nomination.

House averts changes in nuclear freeze resolution

WASHINGTON (AP) — The House has rebuffed efforts to dilute a nuclear weapons freeze resolution adamantly opposed by President Reagan.

After more than six hours of floor debate Wednesday, key Republicans conceded that the House's Democratic leadership would be able to win passage of the freeze whenever the resolution comes to a final vote.

Further action on the measure — which calls for immediate negotiations with Moscow toward a "mutual and verifiable freeze" on nuclear arms — was put over to next week, with nearly 40 amendments still pending.

"They've got the votes to pass it any time they want to pass it," said Rep. James G. Martin, R-N.C.

However, Martin said he and other critics were encouraged by a statement of the resolution's chief sponsor, Rep. Clement J. Zablocki, D-Wis., spelling out what specific weapons systems would be covered by a U.S.-Soviet freeze.

Zablocki, chairman of the House Foreign Affairs Committee, said that even under a freeze, missile-firing submarines could be modernized or replaced because the vessels were considered "launch platforms" rather than actual "delivery vehicles."

The Wisconsin Democrat sought to assure the House that passage of the freeze measure would not necessitate any unilateral action by the United States. "If the Soviet Union does not agree to a mutual and verifiable freeze, there is no freeze," Zablocki said.

By a 229-190 vote, the House rejected a major modification proposed by Rep. Elliot H. Levitas, D-Ga., calling for a "guaranteed strategic build-down" rather than a flat freeze.

Under the Levitas plan, the United States and Soviet Union would be able to continue modernizing their strategic weapons — but would have to dismantle two older nuclear warheads for every new warhead added.

Later, the House turned back, 219-195, a bid by Rep. Hank Brown, R-Colo., that would have endorsed the administration's priority on reductions in U.S. and Soviet arsenals in advance of any freeze.

In its place, the House agreed to wording suggested by freeze proponent Rep. Jim Leach, R-Iowa, that any reductions in nuclear arms could only be negotiated after a freeze was in place.

Many of the remaining amendments were filed by Republicans and conservative Democrats who claim the proposal, although nonbinding, could undermine the president's ability to negotiate with the Soviet Union.

Sen. William Proxmire, D-Wis., said today that the nuclear freeze proposal raises "serious questions" about the adequacy of U.S. capabilities to verify Soviet compliance with such an accord.

"The Soviets will cheat under two related conditions — when they deem it of overriding value and when they think they can get away with it. Foolproof verification procedures are the only deterrent to this behavior," Proxmire said in remarks prepared for a Senate floor speech.

He noted that 'the case of Soviet violations is clear" concerning use of poison gas and toxin weapons in violation of the 1925 Geneva protocol and a 1975 convention against biological warfare.

"There is more ambiguous data with regard to the complex technical treaties verified by national means such as SALT I and SALT II. The issue there is in doubt," Proxmire said.

Rep. Edward J. Markey, D-Mass., a leading freeze advocate, called the Levitas proposal "just a public relations cover-for the arms build-up the Reagan administration wants."

The vote on Levitas' amendment was viewed by both sides as key, and perhaps the best chance freeze opponents would have to modify the proposal to make it more to the administration's liking.

The "build-down" concept may have a better chance in the Republican-controlled Senate, where it has been endorsed by Chairman Charles H. Percy, R-Ill., of the Foreign Relations Committee and more than 40 other senators.

Reagan, in a letter read during Wednesday's House debate, contended that the freeze proposal "would undercut our efforts to negotiate with the Soviet Union for real reductions" in weaponry.

Workers put up sidewalk barricades Wednesday around the site of Independence Plaza at Big Spring and Illinois. The 16-story parking and office building was permitted last month and is being constructed by Judwin Companies of Houston.

Downtown site readied for construction of 16-story office, parking complex

By JIM PRESNELL
Business-Energy Writer

Site preparation, including construction of protective walkways, is under way now for Independence Plaza, an office and parking structure that will rise 16 stories at 301 N. Big Spring St.

The $10 million project is expected to be announced before the end of April.

Construction is to begin before official announcement of the building because, said a Midland Chamber of Commerce official: "The Houston developers feel there have been too many projects announced in Midland that haven't been built. They wanted signs of the building activity to be there when they announced it."

The official said he had information on the construction plans but, "We've been asked not to release it."

Developers would not release information until financial arrangements for construction were completed. Those arrangements made, the Houston developers/builders — the Judwin Companies — have said a press release is forthcoming.

The building was to be named Estoril Plaza, after a local independent oil firm. An Estoril manager said the site was sold to the Judwin Companies, and he thought an office building would go there. He declined to reveal Estoril's future office-space plans or give information on the land sale.

New name for the building is Independence Plaza. Developers recently made a second filing of plans at the city Building Permits and Inspections Department with revisions including the name change. The building was permitted in March.

Estoril remains Judwin's major tenant in Independence Plaza, a Judwin representative said in a telephone interview Tuesday.

"We're waiting for a city permit for street use so we can put up our barricades on Illinois and Big Spring streets," the Judwin employee said. This is the only project Judwin has planned in Midland, the spokesman said. A former insurance office facing Illinois will be torn down and removed soon, Judwin's representative told the Reporter-Telegram.

The builders, Judwin Construction, are part of the Houston developer Judwin Companies. They are also part of a growing trend for large developers to do their own construction work on office and retail buildings. This trend has been noted in cities like Dallas and Houston, as well as with Midland's HBF Corp., building its structures through subsidiary HBF Construction.

Judwin Construction has offices in Midland Executive Center, and is taking applications for local construction personnel. The firm will start hiring in 1½ to 2 weeks.

The building is a project of "I.P.D. Limited," said building plans. The owner is listed as Judwin Companies.

Independence Plaza will have prismatic, V-shaped three-story atriums set into its roof. One atrium will face east and one will face west, according to elevation drawings.

Sides of the building will be light-colored concrete, poured sidewalls on steel beams, with glass panels inset on the face.

Above the first floor lobby and offices there will be five levels of parking for tenants and visitors.

The remaining 10 floors will be office space, with a top-floor penthouse.

Plans were drawn by Houston firm Morris-Aubry Architects.

INSIDE TODAY

The medical lab "is a discreet part of medical care," says Art Hauser, Midland Memorial laboratory director.

WEATHER SUMMARY

AP Laserphoto Map

The National Weather Service forecast rain and showers through Friday for Atlantic coast and Great Lakes regions, with snow flurries due in the upper Great Lakes. Clears skies are expected in most of the nation.

Temperature reaches record low

A 50-year record was broken last night when temperatures dropped to 29 degrees, stopping the previous record low of 31 degrees, set in 1933, cold in its tracks.

Those frosty temperatures should begin thawing by Friday, according to the National Weather Service at Midland Regional Airport. While tonight's low should drop into the lower 30s, Friday's high is expected to reach into the middle 60s.

Skies should remain clear and winds mild with tonight's breezes gently blowing at 5-10 mph from the northeast and shifting to southerly at 10-15 mph Friday.

Wednesday's high of 66 was 31 degrees cooler than the record low of 97, set in 1972.

Midland statistics

FORECAST

Clear and cold tonight, fair and warmer Friday. Low in the lower 30s and high in the middle 60s. North-easterly winds at 5-10 mph tonight, shifting to south-erly at 10-15 mph Friday.

Border forecasts

New Mexico: A slight chance of snow showers over the northern mountains and northeastern plains otherwise partly cloudy and cool today. Fair and cold tonight. Partly cloudy and warmer Friday. Highs today from the upper 30s and 40s mountains and north to the 50s and low 60s south. Lows tonight from the teens and low 20s mountains and north to the upper 20s and 30s south. Highs Friday upper 40s and 50s mountains and north to the 60s elsewhere.

Oklahoma: Partly cloudy north and fair south today. Clear and cold tonight. Fair and warmer Friday. Highs today mostly in the 50s. Lows tonight mid-20s northwest to mid-30s extreme southeast. Highs Friday in the 60s.

Louisiana: Showers and thunderstorms some locally heavy ending extreme southeast this morning. Otherwise clearing windy and turning cooler today. Fair and colder tonight. Friday sunny and mild. Highs today upper 60s to low 70s. Lows tonight upper 30s north to low 50s southeast coast. Highs Friday mid to upper 60s.

Weather cool, clear

By The Associated Press

Clear skies and cool temperatures dominated the Texas weather picture today.

Partly cloudy skies covered some sections of South Texas. There were no reports of rainfall before dawn.

Texas area forecasts

West Texas: Fair through Friday. A little warmer Friday. Highs 45 Panhandle to 60 southeast, 65 far west and near 80 Big Bend valleys. Lows near 30 Panhandle to 45 Big Bend valleys. Highs Friday 60 north to near 70 south and 85 Big Bend valleys.

North Texas: Freeze warning north portion tonight. Mostly clear with unseasonably cold temperatures through Friday. Highs 58 north to 68 southeast. Lows near 30 north to 38 southeast. Highs Friday 62 to 68.

South Texas: Mostly fair with cold nights and cool days through Friday. Highs mostly in the 70s. Lows 36 Hill Country to 52 deep south.

Port Arthur to Port O'Connor: Small craft advisory in effect. Northerly winds 20 to 30 knots decreasing to 10 to 15 knots tonight. Northeasterly winds 10 to 15 knots Friday. Seas 7 to 10 feet decreasing to 4 to 6 feet tonight. Partly cloudy skies.

Port O'Connor to Brownsville: Small craft advisory in effect. Northerly winds 20 to 30 knots decreasing to 10 to 15 knots tonight. Northeasterly winds 10 to 15 knots Friday. Seas 7 to 10 feet decreasing to 4 to 6 feet tonight. Partly cloudy skies.

Congress hears tranplant plea

WASHINGTON (AP) — Congress, considering help for those in need of organ transplants, is hearing the story of a Massachusetts family whose public pleas for a liver donor led to a successful transplant for their daughter.

Charles and Marilyn Fiske, accompanied by their 15-month-old daughter, Jamie, were scheduled to testify today before a House Science and Technology subcommittee.

The Bridgewater, Mass., family gained national attention last fall as the parents went public in their search for a suitable liver donor. A 10-month-old Utah boy, who died in an automobile accident, was the donor.

The subcommittee began its examination of organ transplant problems on Wednesday when Billie Hall of Walnut, Miss., described the difficulties she had obtaining money to pay for a liver transplant for her 13-month-old son, Brandon.

Mrs. Hall, Brandon and his surgeon left the hearing early to return to Memphis, Tenn., for surgery after learning that a donor had been found.

A spokesman for the University of Tennessee Center for Health Sciences, Clayton Braddock, said today that the new liver appeared to be functioning normally. The tot's physician, Dr. Peter Whitington, said, "We think he's got a good chance."

Mrs. Hall tearfully urged the subcommittee to alter federal medical programs so that they would pay for transplant surgery like that needed by her son's.

"There are so many people with children like Brandon who need the surgery as badly as my son does," she said. "There needs to be something done about Medicaid helping these children."

Brandon is covered by the federal Supplemental Security Income program, but his family has no private insurance. In order to raise the $30,000 needed to get him admitted to a hospital for a liver transplant, Mrs. Hall turned to a small religious radio station in her home town. About $81,000 was raised in five months through public appeals.

Mrs. Hall said that finding a suitable organ often is difficult because too few people donate their organs or those of relatives for transplantation.

"Thank God, this morning we did get one," she said.

Army Capt. John H. Broderick and his 28-month-old daughter Adriane face a different set of problems. Adriane, like Brandon, suffers from the liver ailment called biliary atresia.

But she can't have a transplant because the Pentagon's Civilian Health and Medical Program of the Uniformed Services won't cover the cost.

Broderick, stationed at the Louisiana Army Ammunition Plant, said he was told that the program doesn't pay for such procedures because of the cost and because they still are considered "investigational." And, he said it would take $65,000 to get his daughter admitted to a hospital for a transplant.

"I personally find this argument repugnant because it places a dollar value on my daughter's life," he said.

Dr. James Williams, associate professor of surgery at the University of Tennessee College of Medicine, predicted that demand for organ transplants will grow because a relatively new drug, Cyclosporin, now reduces the chance that a new organ will be rejected by the body.

He called for hospitals to promote organ donations among patients and their relatives.

AP Laserphoto

Speaking with Billie Hall, Walnut, Miss., and her 13-month-old son Brandon prior to the beginning of testimony is Rep. Albert Gore, D-Tenn. Mrs. Hall addressed a House Science and Technology subcommittee on the need for aid in organ transplant surgery.

Boy's surgery begins just hours after hearing

MEMPHIS, Tenn. (AP) — Surgeons were giving a critically ill boy a new liver early today, hours after his mother took him before a congressional subcommittee to plead for federal aid to cover the huge cost of transplants.

The child, 13-month-old Brandon Hall of Walnut, Miss., was with his mother in Washington, D.C., on Wednesday when doctors found a liver for him from a 9-month-old girl killed in a traffic accident in Richmond, Va.

Clayton Braddock, a spokesman for the University of Tennessee Center for the Health Sciences, said the boy was taken to surgery at 4:45 p.m. Wednesday. The operation was expected to take seven to 12 hours.

Brandon's mother, Billie Hall, 38, testified before the House Science and Technology subcommittee about an hour after she was told that a donor liver had been found for her son.

"I was real surprised and happy and scared," she said late Wednesday as doctors operated on her son. "They say he's just doing real good. And I'm doing fine."

Mrs. Hall, who is unemployed and separated from her husband, told the House panel that federal medical programs must help cover the cost of organ transplants.

"There needs to be something done about Medicaid helping these children," she said in a tearful appeal. "It's so terrible to see a child die because he can't get the money."

Brandon, lying in her lap, could be heard gurgling fretfully during her testimony.

Residents of Mrs. Hall's home town, 75 miles from Memphis, helped raise $81,000 to pay for the surgery. She said she would launch a public speaking drive to help other children needing organ transplants.

"We've got our liver," she said. "We're in good shape. But what we want to do now is to work on these other kids who don't have a liver.

"Brandon is going to make it, but I want all these other kids to make it, too."

As Brandon returning from Washington with his mother and his surgeon, Dr. James Williams, another member of the University of Tennessee's transplant team, was on his way to Virginia to get the donor organ. It was flown to Memphis by commercial jet.

Brandon was born without bile ducts to filter his blood, a condition called biliary atresia, and doctors said his liver was deteriorating. Without a transplant he would be dead within weeks, they said.

The difficulties of finding a suitable donor were compounded because of Brandon's small size and rare blood type.

Warnings issued on Medicare

WASHINGTON (AP) — The Reagan administration is warning Congress that Medicare will go broke by 1991 even if the president's proposed cuts are enacted.

Carolyne K. Davis, head of the Health Care Financing Administration which runs the massive health program, told the Senate Aging Committee on Wednesday that setting hospital rates in advance under a system Congress passed last month will delay insolvency until 1990.

But even with the Medicare changes in the president's budget, which would mean larger out-of-pocket costs for beneficiaries, the trust fund which pays for the hospital insurance portion of the program will be exhausted by 1991, she said.

New projections presented by Mrs. Davis include use of a payment system calling for Medicare hospital rates to be set in advance. They also consider changes in Social Security that will affect Medicare. Using intermediate economic projections, they show that at the beginning of calendar year 1990, the Medicare trust fund will be short $8.4 billion.

If the president's Medicare changes are enacted, the projected shortfall would be $555 million at the beginning of calendar year 1991.

Projections from the Congressional Budget Office, which were made before the prospective payment plan was adopted, said Medicare would run out of money in 1987 or 1988.

"The passage of prospective payment, when coupled with the enactment of the National Commission on Social Security's recommendations, dramatically improves the short term financial situation of the health insurance trust fund," Mrs. Davis said.

"Nevertheless, it does not solve the basic solvency issue as, even with the passage of these revisions, the fund will still be exhausted by the end of this decade."

Alice Rivlin, director of the CBO, said any set of options for Medicare financing "poses difficult tradeoffs."

"Raising taxes could leave Medicare intact but only at considerable cost to taxpayers. Obtaining savings exclusively through increased Medicare cost-sharing or reduced reimbursements could lead to a second-class system of care for the aged and disabled," she warned.

"Systemwide attempts to contain medical care costs could ultimately result in slower expansion in services to most users of health care, although the impact on health care is unpredictable."

She projected that Medicare outlays will increase at an annual average rate of more than 13 percent between 1985 and 1995. But payroll tax income, which finances part of the program, will go up less than 7 percent.

Medicare serves 29 million elderly and disabled Americans. It is divided into a hospital trust fund and one which covers other services, such as doctors' bills. The hospital fund is paid for with a portion of the Social Security payroll tax. The supplemental program is covered by premiums and general Treasury revenues.

The Medicare changes which the administration wants would provide beneficiaries with coverage against catastrophic illnesses while forcing them to pay a larger share of routine hospital bills; offer vouchers, where beneficiaries could use a predetermined sum of federal money to buy private health coverage, as an alternative to Medicare; freeze Medicare physician payment rates for one year, and increase the premiums Medicare beneficiaries pay for insurance against some doctors' bills.

In the House on Tuesday, 21 congressmen led by Rep. Claude Pepper, D-Fla., proposed that a commission similar to the National Commission on Social Security Reform be created to plan a solution to Medicare's troubles.

The recommendations of the bipartisan Social Security commission were used as a basis for legislation to keep the retirement system from going broke.

Jury hears '23 minutes of murder'

BROWNSVILLE, Texas (AP) — Billy Staton slipped a tape recorder in his shirt before going to pick up his daughter for a picnic, planning to tape his ex-wife's hostility about his visitation rights.

Instead, Staton recorded his own slaying — in what a prosecutor called "23 minutes of murder" that a jury listened to Wednesday.

The defense will begin today trying to prove that a 21-year-old La Feria man accused of murdering Staton and his fiancee, and allegedly recorded on the tape, was insane at the time.

The state rested its case against Paul Wolf Wednesday after playing the recording that prosecutors say contains the sounds of Wolf bludgeoning the 26-year-old Staton to death.

Wolf is on trial for last summer's slaying of Staton's fiancee, teacher Leticia Castro, 26, killed as she waited for Staton in his car. Wolf and his wife, Sherry, also are charged with Staton's murder, although no trial date has been set.

Wolf has pleaded innocent to the slayings. His attorney, James Mardis, has filed a notice of intent to present the insanity defense.

Cameron County District Attorney Rey Cantu said Staton concealed a mini-cassette recorder under his shirt July 16, 1982, the day he last visited his daughter, Melanie, at the home of his ex-wife and her new husband.

Staton went inside the Wolf home where he was "ambushed" and beaten to death with a bar, Cantu said.

Miss Castro then was attacked in the car. Wolf choked her, and another man, Glenn Henderson, beat her with a hammer, Cantu said. The two bodies were dumped in Rio Grande Valley drainage canals, where the tape was recovered with Staton's body.

Henderson, 19, is serving a life prison sentence for Miss Castro's murder and testified for the prosecution.

The first few minutes of the tape contain a conversation between people identified as Staton and his daughter, then 2 years old.

Staton: Hello, little one ... What ya doing?

Melanie: (unintelligible) I'm not going.

Staton: You want to go ride in the boat?

Melanie: No, I'm not going.

Staton: Oh, yeah, you're gonna have to go with us for a little while. We're gonna go out and ride in the boat.

Melanie: (crying).

Staton: And go swimming, don't you want to go play in the water ... hmm?

Melanie: (crying) No.

Staton: You wanted to go last week. How come you changed your mind, hmm?

Staton continues to cajole his daughter, promising to bring sandwiches and have a picnic. She asks if she can go see "Kevin" and "Baby Bosco."

Staton: You want to go see him and Kelly?

Melanie: (unintelligible)

Staton: OK, we might ride down there and go see him.

Two hitting sounds. Staton groans.

Three more hitting sounds. Melanie cries and screams.

A voice identified as Wolf: Get him. Get him, hurry up.

After the thuds, there is a sound of heavy breathing.

About four minutes later, more moaning followed by an unintelligible comment from a voice Cantu said was Wolf's.

A voice identified as Mrs. Wolf: Get him up, get him out of here, the front door. Hit him again.

Staton: Moaning.

IRS expecting 15 million tax returns as deadline nears

WASHINGTON (AP) — The Internal Revenue Service is gearing up to receive about 15 million tax returns the rest of this week — and one of them will be from the boss.

Commissioner Roscoe L. Egger Jr. said his return is ready to drop into the mail, but he's waiting to receive some paperwork about an investment. He plans to mail it well before the Friday midnight deadline.

If you're one of the 25 million couples or individuals who waited until the last week to file, Egger doesn't hold that against you. "Why pay it until you have to?" he said in an interview Wednesday. "This may sound like heresy but, nevertheless, it's good money management."

Egger's advice does not apply, of course, to the nearly 80 percent of taxpayers who get a refund. The sooner you file, IRS always says, the sooner you get your money.

IRS expects between 96 million and 97 million couples and individuals to file returns this year, up about 1 million from 1982. Nearly 62.1 million had filed through last week. About 2.7 million are expected to ask for a four-month extension for filing, but they'll have to submit the request on Form 4868 by midnight Friday and accompany it with a check for estimated taxes.

Another 1.2 million or so will miss the deadline and have to pay a late filing penalty. Others, including Americans abroad, have different filing deadlines.

With the growth in population, IRS had expected that returns filed so far this year to have been about 1 million above last year's mark. In fact, the number is down about 800,000 and nobody has a sure-fire explanation.

However, Egger said, the drop-off in filings does not indicate more Americans are joining the ranks of tax cheats. He said public accountants tell him they have never seen a year in which people were so slow to have returns prepared.

"I suspect a lot of it is just people with a balance due who are just dragging their feet," Egger said.

Although the average refund paid so far this year is $723, up about 2.5 percent from 1982, the total amount of refunds is down about 6 percent. Egger attributes that mainly to the recession, speculating that many people reduced amounts withheld from their paychecks last year so they would have a higher take-home pay. That means the government has to refund less.

On another subject, Egger said there is no practical way, without withholding, for the IRS to stop cheating on interest and dividends. Withholding of 10 percent is due to start July 1, but Congress is under pressure to repeal it.

The IRS would have to add as many as 40,000 more people to its 88,000-person payroll to match all interest and dividend earning reports against tax returns in an effort to catch cheaters, Egger said.

Up to 20 million returns have some sort of discrepancy on interest and dividends, Egger said.

Mall home show features many unusual products, optimistic sellers

By JIM PRESNELL
Business-Energy Writer

Midland Park Mall's second annual "Ideal Home" show got into full swing Wednesday in preparation for the weekend. The show ends Saturday night. More than 40 local and national exhibitors are on hand, displaying everything from electric-generating windmills to life insurance.

Many of the merchandisers present are longtime Midland business people. Paul Anderson, of Anderson Tile Sales, noted that his business began eight years ago in Midland and has had a store in Odessa for four.

"We sell the tile, and help the buyer choose which color to use. We can find a contractor to install the tile, or we can list what to do to install it yourself."

Jan Kindel, a principal in Kindel & Co. Realtors, is showing slides and telling about the houses she has listed. "We're here to answer questions on financing, interest rates, or buying a home in general," she said. The company is also offering a free market analysis of one's present home.

John Burns, with Nimbus Drinking Water Systems, said "The home show is doing real well for us." Burns said the reverse-osmosis system his company markets gives unlimited clean water and costs no more than buying bottled water.

Nimbus leases the systems, and can install one in less than an hour, Burns said. "Anything that uses tap water, we can tap into."

Midland Stained Glass Center displays a few large windows and some smaller, ornamental pieces of stained glass.

Of his residential heating and air conditioning systems, laid out on a green carpet, Bill Drummond of Midland Sanitary Plumbing said his company sells only Coleman brand A/C but services all brands, as well as doing plumbing work.

"Most of the jobs we do are converting from evaporative cooling to refrigerated air," which provides more comfort, Drummond said.

Joe Bruzas, who's a pool designer and landscaper for Blue Haven Pools' local dealer, said he is competing with other pool builders in town for work. "I try to come up with extras (in planning the pool) that other companies don't offer."

Bruzas was disappointed in the slow people-flow at the mall, but said he expected the weekend crowds to "snowball."

Blue Haven was one of many dealers offering a sale or special at the home show, involving a lower-priced big item. Many of the exhibits offered a free drawing, giving away small water-treatment machines, lawn chairs, or a power drill.

An unusual exhibit was Windmill Electric of West Texas. Salesman Mike Kennedy said the strictly-supplemental electricity machines work "80 percent of the time" with the wind speeds present in West Texas.

Kennedy said the company just sold its first windmill, locally, and that it should be installed at a Midland home within a month.

The windmills, made by Fight Back, a Vermont firm, qualify for a 40 percent tax rebate for energy savings, as did many of the items for sale at the show — solar pool equipment, efficient air conditioning, and insulated windows.

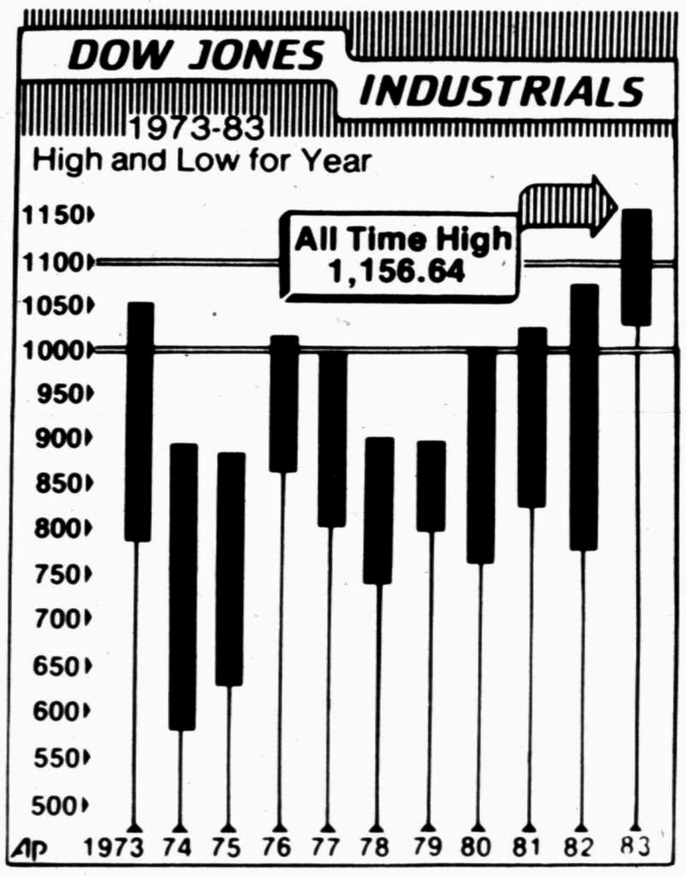

Robert Stuart, a life underwriting insurance man, said "People look for guarantees when a slowdown occurs. Life insurance usually doesn't suffer." Stuart was displaying diagnostic software on IBM and Radio Shack computers, saying "We're trying to attract the curious — those who like computers. We have one computer dedicated to a single new product — Universal Life.

"This is life insurance with a tax-deferred investment fund." Stuart said Universal Life is his company's most popular life-insuring program.

Phil Daw, of Tall City TV Cable Co., said "We're here in an informational role. We have new featured services, offered in our Dimension 4 package, that give everyone south of Andrews Highway an expanded range of programming." Daw demonstrated the Showtime service, playing "Star Trek II: The Wrath of Khan" for interested bystanders.

Larry Newsom offered other water-system equipment for an Odessa company, Water Purification Systems, showing a full line of purification, treatment, and distillation machinery.

Newsom showed samples of the soil and other particulates distilled from Odessa water. An unusual product WPS has is the Kreepy Krauly, a pool sweeper that makes its own way around the pool and up the sides, powered by the pool's drain system.

Fortune's list shaken up by glut, recession

NEW YORK (AP) — Exxon Corp. held on to its top ranking in the Fortune 500 directory of the largest U.S. manufacturing companies, but the rest of the list was shaken up, reflecting the impact of a world oil glut and recession.

Just three companies — Exxon, No. 4 Texaco Inc. and No. 9 Gulf Oil Corp. — were unchanged among the top 10 companies in the rankings based on revenues last year. Other leading oil companies lost ground in the list released Wednesday.

Mobil Corp. dropped to third, Standard Oil Co. of California fell from fifth to seventh, Standard Oil Co. (Indiana) dropped to 10th from seventh and Atlantic Richfield Co. toppled from 10th to 12th.

Some automakers gained at the expense of Big Oil.

General Motors Corp. moved up a notch to second place, regaining the spot it had lost in 1980 to Mobil, and Ford Motor Co. climbed to fifth from sixth.

But two companies that recently acquired oil businesses rose.

Du Pont Co. advanced from 12th to eighth place, returning to the ranks of the top 10 for the first time since 1955. Last year was its first full year of ownership of Conoco, the 14th largest industrial concern when it was purchased in September 1981.

U.S. Steel Corp., which acquired Marathon Oil Co. in March 1982, moved to 14th place from 19th.

International Business Machines Corp., whose 1982 profit of $4.4 billion was the most among the Fortune 500 companies, climbed to sixth place from eighth. Exxon was second in earnings, at $4.2 billion.

And although Exxon remained No. 1, its sales of $97.2 billion were down 10 percent from 1981, dropping below $100 billion for the first time since 1979.

Many leading companies, such as American Telephone & Telegraph Co., are not included in list of industrial companies. One notable departure was RCA Corp., ranked 44th a year ago. Fortune said revenue from service businesses, such as NBC, satellite communications, and Hertz automobile rentals exceeded manufacturing receipts from RCA's electronics business last year.

Oil bears big burden

AUSTIN (AP) — Comptroller Bob Bullock says a survey shows that about 40 percent of the state tax burden is borne directly or indirectly by the Texas oil and gas industry or their employees.

"When you understand the size of this burden, it's easy to see how dropping oil prices have had the major effects they have on our state tax revenues," Bullock said in a statement.

He said oil and gas pays 30 percent of the state sales tax alone.

The study quoted by Bullock said the sales tax impact of the oil industry and its employees was centered in Houston and Dallas.

"Together, these two urban areas accouont for more than 70 percent of the industry's total sales tax payments," he said. "Houston alone accounts for 52.5 percent of this total."

DRILLING REPORT

WILDCATS OPERATED BY MIDLAND-AREA FIRMS

Scouted by
THULA COX
and
SHARON SPIWAK

APRIL 13

ANDREWS COUNTY

ARCO Oil & Gas No. A-6 University 11 sec. 12 PD 7,200 drilling 2,695 feet, anhydrite.

ARCO Oil & Gas No. A-5 University 11 sec. 12 PD 7,200. Total depth 7,100 feet, plugback total depth 7,056 feet, pressured up the annulus to 500 pounds, had 520 to recover, shut in overnight.

William E. Hendon No. 3 University AZ re-entry, shut in building up pressure.

V-F Petroleum Inc. No. 1 GAO PD 6,000, pumping.

BORDEN COUNTY

Delta Drilling Co. No. 1-468 Don A. Jones PD 8,500, production testing.

Delta Drilling Co. No. 1-466 Don A. Jones PD 8,500, production testing.

Delta Drilling Co. No. 2 Roy Reeder PD 8,500, production testing.

CROCKETT COUNTY

International Oil & Gas No. 8 Vernon B. Cox A PD 10,500, waiting on completion unit.

DAWSON COUNTY

Robert Griffin No. 1 Cline PD 9,200, expect to spud on Friday 4/15/83.

Henry Petroleum Corp. No. 4-Y-82 Stuart Estate PD 8,500, 4 hours installed motor panels and belt and connected generator, set well to pumping.

Tipperary Oil & Gas Corp. No. 1-128 Eiland PD 12,300, prepped to acidize.

ECTOR COUNTY

Gulf Oil Corp. No. 1389-D C A. Goldsmith et al PD 8,200. Total depth 8,400 feet, plugback total depth 8,359 feet, limestone and dolomite, deviation 5 1/2 degrees at 8,365 feet, reached total depth at 7 a.m. 4/8/83, circulate, trip out of hole, had tight spot 61 stands off bottom, worked thru tight spot, finish trip out of hole, rig up Schlumberger, finish running open hole logs, trip in hole, circulate, trip out of hole, lay down drill pipe & drill collars, rig up and ran 203 joints casing set at 8,399 feet, FC at 8,359 feet, DV tool at 4,908 feet, cemented, dropped bomb, open DV tool, circulate 115 sacks cement for 4 hours, now cementing 2nd stage.

EDDY COUNTY

Amoco Production Co. No. State DS. Total depth 12,703 feet, pulling tubing.

Amoco Production Co. No. 1 State M-T. Total depth 10,405 feet, waiting on completion unit.

Cities Service Oil Co. No. 1 Federal X Com PD 12,700. Total depth 12,900 feet, plugback total depth 2,900 feet, ran 7 5/8 inch casing at 9,000 feet.

W. A. Moncrief Jr. No. 1 Guadalupe Federal PD 11,900, waiting on permit to drill.

Santa Fe Exploration Co. No. 1 New Year Federal PD 7,000, prepped to set pump.

The Desana Corp. No. 1-F Mayes PD 4,500, drilling 2,630 feet.

The Superior Oil Co. No. 1 Mayer Federal PD 14,300, waiting on potential.

GLASSCOCK COUNTY

Beach Exploration No. 2 Houston 'A' PD 11,300. Total depth 10,191 feet, waiting on completion unit.

Beach Exploration No. 1 Houston Estate PD 11,300. Total depth 10,171 feet, waiting on completion unit.

William E. Hendon No. 1 Powell 32-A, drilling 2,064 feet.

HOWARD COUNTY

G.W. Brock Inc. No. 1A Hamilton PD 3,300, plugged, abandoned.

TXO Production Corp. No. 3 Fryar PD 9,900, drilling 9,656 feet.

LEA COUNTY

Amoco Production Co. No. 1 State 'DV' PD 12,750, total depth 12,800 feet, waiting on completion unit.

Amoco No. 1 Federal 'DD' PD 15,800, total depth 16,109 feet, plugged back 14,217 feet, testing.

Great Western Drilling Co. No. 1 State 82 PD 11,000, ran pumps, rods, rigged down, released rig.

HNG Oil Co. No. 1 Pitchfork 36 State PD 15,700, drilling 15,493 feet lime, shale.

Pogo Producing Co. No. 1 Mosbacher '20' PD 20,000, contractor Cactus Drilling rig No. 23, ran temperature, Gamma Ray logs.

LOVING COUNTY

Amoco Production Co. No. 1 Haley Hill, shut in, total depth 23,314 feet.

Sundown Petroleum No. 1 Malcolm Madera PD 5,033, pumping, but no potential.

J.C. Williamson No. 1 Exxon PD 6,200, fracked w/5,000 gallons, 10,000 pounds sand 20/40, flowing back residue.

LUBBOCK COUNTY

TXO Production Corp. No. 1-A Macha PD 8,600, waiting on evaluation.

MARTIN COUNTY

Parker & Parsley No. 1 Caprock PD 11,500, prep to move in-completion unit.

Wilson Energy Inc. No. 3 Sprawls PD 11,000, waiting on completion.

Wilson Energy Inc. No. 1 Bobbitt 'A' PD 12,500, waiting on completion.

Wilson Energy, Inc. No. 1-R Sprawls, waiting on completion.

PECOS COUNTY

Cities Service Oil Co. No. 1-A Loper, total depth 11,229 feet, ran 9 5/8" casing at 4,501 feet.

Dinero Operating No. 1 Aminoil P1 Trees State No. 64, drilling 4,059 feet anhydrite, Dolomite.

Getty Oil Co. No. 1 White Estate "42" PD 9,600, drilling 8,796 feet.

HNG Oil co. No. 1 Hayter State 28, PD 16,500, total depth 3,822 feet.

C.F. Lawrence No. 1 McComb 'B' PD 3,200, waiting on completion unit.

Westland Oil Development No. 1 Sams-State-A, fishing.

REEVES COUNTY

Bass Enterprises Production Co. No. 1 J.S. Bridewell Estate PD 6,500, drilling 6,076 feet Delaware.

Maralo Inc. No. 1 Texaco '3' PD 18,000, drilling 494 feet w/cable tool.

TXO Production Corp. No. 1 Toyah 'B' PD 12,800, drilling 14,960 feet.

RUNNELS COUNTY

Brad Corp. No. 1 Vivian Hollice Workman PD 4,500, waiting on potential.

Petroleum Acquisition Corp. No. 1 W.J. Morgan, pump testing.

SCHLEICHER COUNTY

Newhall Res. No. 1 Mertz PD 7,300, drilling 3,890 feet.

SCURRY COUNTY

Woods Petroleum Corp. No. 1 Freytag PD 7,700, shut in for evaluation.

UPTON COUNTY

TXO Production Corp. No. 1 Neal 'E' PD 7,800, drilling 4,800 feet.

TXO Production Corp. No. 3 Lane PD 9,300, drilling 9,299 feet.

YOAKUM COUNTY

Tom Brown Inc. No. 1 Cook PD 9,700, pumping.

COMPLETIONS

ANDREWS COUNTY

Shafter Lake (San Andres)

John R. Parish No. 5R University 26, 4500 fsl, 487 fel of lease, sec. 26, blk. 13, ULS, 12 w Andrews, TD 4,781, Elev. 3,228. Completed 10/10/82.

Casing: 4 1/2 inch at 4,771. Perforations: 4,578-4,726. Acid: 1,000 gallons. Frac: 58,000 gallons and 132,000 pounds sand.

Potentialed 1/12/83. Pumping 12 barrels oil, 20 barrels water, 2 Mcf of gas daily. Gravity 31. Gas/oil ratio 166:1.

Cotton

NEW YORK (AP) - Cotton futures No. 2 were higher at mid-day dealings today.

The average prices for strict low mid- dling 1 & 1-16 inch spot cotton declined 43 points to 64.44 cents a pound Tuesday for the eight markets, according to the New York Cotton Exchange.

Nonferrous metal

Copper - 80¾-82 cents a pound, U.S. destinations.

Copper - 74.90 cents per pound, NY Comex spot month closed Tue.

Lead - 21-23 cents a pound.

Zinc - 38 cents a pound, delivered.

Tin - $6.9558 Metals Week composite lb.

Aluminum - 76 cents a pound, N.Y.

Gold - $429.25 per troy ounce, Handy & Harman (only daily quote.)

Gold - $431.90 per troy ounce, NY Comex spot month closed Tue.

Silver - $11.260 per troy ounce, Handy & Harman (only daily quote.)

Silver - $12.270 per troy ounce, NY Comex spot month closed Tue.

Mercury - $320.00-$336.00 per 76 lb flask.

Platinum - $406.00 domestic merchant troy ounce, N.Y.

Gold futures

London morning fixing $428.75, off $4.00

London afternoon fixing $429.25, off $3.50

Paris afternoon fixing $430.13, off $6.39

Frankfurt fixing $430.00, off $4.00

Zurich late afternoon fixing $428.25 bid, off $4.50

$429.25, asked.

Handy & Harman (only daily quote) $429.25, off $3.50

Engelhard (only daily quote) $429.25, off $3.50

Engelhard fabricated (only daily quote) $460.71, off $3.68

NY Comex gold spot month Tue. $431.90, up $0.40

Stock market gains

NEW YORK (AP) — Stock prices advanced broadly today, continuing to gain ground at historic highs.

Auto issues paced the advance.

The Dow Jones average of 30 industrials climbed 7.74 to 1,153.06 by noontime.

Gainers outnumbered losers by almost 2 to 1 among New York Stock Exchange-listed issues.

The Dow Jones industrials finished Wednesday a fraction below their peak reached on March 24. Most other market indicators established new highs.

A top executive of New York's Manufacturers Hanover Trust predicted today that the prime lending rate, which now stands at 10½ at most banks, would be down to about 9 percent by the end of the year.

And General Motors today reported a 55 percent increase in sales for early April. GM stock jumped 1½ to 61; Ford Motor rose 1⅝ to 41⅞; Chrysler gained 1¾ to 20⅛, and American Motors was up ¼ at 6⅛.

The NYSE's composite

MMH lab offers 'discreet' care

Lab divided into five distinct areas

By GAIL BURKE
Staff Writer

There's more behind the hospital laboratory's swinging doors than medical personnel garbed in white coats and and vials filled with blood.

The medical lab "is a discreet part of medical care," says Art Hauser, Midland Memorial laboratory director.

While many people usually only come into contact with the hospital lab for a blood test, there are five distinct areas in the MMH lab — hemotology, chemistry, microbiology, blood banking and tissue pathology.

"In the lab we perform tests on specimens from the body," Hauser said. "When your physician is making a diagnosis, he takes a history and physical exam. But there's a lot of things science only allows us to do through testing. And this is where we come in."

MMH's laboratory employs about 50 people during its 24-hour work period year-round. This week has been designated as National Medical Laboratory Week.

To bring an understanding of what takes place in the MMH lab, Hauser outlined the five areas:

"Hemotology is the study of blood," he said. "We analyze the blood for anemia, cancer (leukemia), coagulation or clotting abilities."

"We go through a tremendous amount of effort not to mix tests...(the lab) is probably safer to walk through than walking down the street and shaking somebody's hand you don't know."

Art Hauser

Hauser said for a patient who is having his tonsils removed, it is important for the physician to know ahead of time what to expect.

"The throat has many little blood vessels in it," he said, explaining that one advantage of testing the patient's blood is that it lets the doctor know if the patient has a tendency to bleed.

In chemistry, components dissolved in the blood are tested. After a heart attack, a component called cardiac enzymes usually are released.

"By testing the chemistry of the blood, we can sometimes measure if there is an abnormal number of cardiac enzymes in the blood and tell if the patient might have had a heart attack," Hauser said.

"We're not testing the blood itself, but testing what is in the blood."

The study of infectious disease, or microbiology, is Hauser's pet. As a microbiologist, Hauser explained that in this area of the lab, bacteria is grown and isolated, identified and tested against antibiotics.

Blood banking is probably the most familiar part of the lab.

"Most people who are going to be married come to the lab for a blood test," Hauser said. "The bank has less to do with testing in the overall scope of the lab. To simplify, in blood banking we mix a drop of patient's blood with a drop of a donor's blood to test for compatibility.

An area that may require a strong stomach is tissue pathology. Hauser said "usually when something is taken out at surgery, it goes to pathology."

Here, water is removed from the tissue, tumor or organ and is replaced with a type of wax.

"Then we do a gross section, or examine the material by cutting out small pieces for analysis," Hauser said.

According to Hauser, "the wax" makes the tissue stiff, so it's easy to cut. Then, because tissue is colorless, it is stained and examined by the pathologist who evaluates the tissue's health or disease.

Hauser said another procedure, which is faster, is a frozen section.

"The material is brought up from surgery and we 'quick freeze' it and then call back the results to surgery while the person is still on the table," he said.

Hauser, who administratively directs the lab, said precautions are stringently followed for accuracy.

"We go through a tremendous amount of effort not to mix tests," he said, adding that because of the personnel involved in the precautions taken and the elaborate instruments used, lab prices tend to be high.

He added that the hospital lab "is probably safer to walk through than walking down the street and shaking somebody's hand you don't know."

Linda Milam, Midland Memorial Hospital microbiology supervisor, drains a sample of blood from a pipette into a test tube.

PBRPC board favors PBS station for Odessa College

By VINCE GIORGI
Staff Writer

The Permian Basin Regional Planning Commission board of directors Wednesday gave favorable comment on a grant application to fund equipment for a television station at Odessa College.

The board also accepted the findings of a 15-month audit and gave favorable comment to a $1.5 million loan application by a Dawson County cotton gin. The action came during the board's monthly meeting in the PBRPC conference room at Midland Regional Air Terminal.

Odessa College is seeking $409,275 from the National Telecommunications and Information Administration to purchase equipment — including an antenna and transmitter — for a non-commercial, educational television broadcast station on its campus. The college proposes to match an NTIA grant with $136,425, bringing the total project cost to $545,700.

David Paterno, an Odessa College spokesman, told the directors that transmission of educational and PBS programming from Dallas to West Texas is in danger of shutting down. Paterno said the land-based microwave transmissions are subject to interference and have become too costly for many local cable companies.

THE COLLEGE'S station — KOCV-TV, Channel 36 — will be housed in an existing building beside the school's FM radio station. He said the station will offer PBS programming to the general public and local schools, along with locally produced programming, such as city council and commissioners' court meetings and continuing education classes.

He said the station's signal will cover much of the 17-county PBRPC area, including Midland and Ector counties, with an over-the-air signal that can be picked up in individual homes or by cable systems.

Paterno said long range plans may call for translator stations that could carry KOCV-TV's signal across an even larger area.

The college also has an application before the Federal Communications Commission for approval to complete the station. Paterno said the college is applying for permission to receive PBS programming via satellite.

Paterno said PBRPC was a necessary first step in the application approval process, and added that he sees "absolutely no hurdle" in the way of completing the station. He said the station could go on the air as soon as March 1984.

In other action, David Austin, PBRPC financial officer, told the board the planning commission is "fiscally strong" after making several adjustments to lend more efficiency to its auditing procedures.

Austin said prior to the most recent audit — which covered the 15 months between July 1, 1981, and Sept. 31, 1982 — auditing of PBRPC operations and about 12 or 13 different individual grant programs administered by the commission was disjointed and often repetitive.

SEVERAL STEPS were taken to improve the audit procedures, he said, including extending the most recent audit period by three months to bring the PBRPC's fiscal year in line with the federal government's fiscal year, Oct. 1 to Sept. 31; converting from a manual to an automated accounting system in January 1982; and adopting a single-audit system as dictacted by the Office of Management and Budget in Washington, D.C.

"Basically, what I'm saying is that based on this audit, the planning commission is in a lot better financial situation than it has been in the past," Austin said. "It's stronger in the fact that it's more effective and more efficient."

The board approved the audit findings, which disclosed $4,176,993 in expenses and $4,175,161 in revenue — a $1,832 loss for the 15 months. Austin said the loss is not significant — considering all the auditing changes and the constant threat of Reagan administration program cuts — and will be covered by a general operating fund maintained by the PBRPC.

An application by Cotton King Gin Inc., of Dawson County, to the Farmer's Home Administration for a $1.5 million loan received favorable comment from the board.

Last year, Cotton King Gin undertook an expansion project that included adding 9,800 square feet of plant space, a 9,000-square-foot truck building and service area, the purchase of double lint cleaning equipment and addition of a fifth gin stand which boosts the gin's capacity by 20 percent.

Lamesa National Bank provided financing through short term notes, but cost overruns and an average 1982 ginning season forced the gin to seek the $1.5 million — for 10 years — to sustain day-to-day operations.

THE 10-YEAR LOAN will be provided through Lamesa National Bank beginning at 14 percent variable interest rate and adjusted quarterly. The gin — valued at more than $3.1 million — will serve as collateral for the loan.

Cotton King Gin, with $200,000 in annual payroll, employs 10 people year-round and 15 to 20 workers on a seasonal basis.

The PBRPC board gave favorable comment to an application by the City of Big Spring for funds to continue its Retired Senior Volunteer Program (RSVP). Big Spring is seeking $23,100 from ACTION and $9,400 from the state. Local matching money of $4,480 brings the total cost to $36,980.

RSVP offers senior citizens an opportunity to remain active through volunteer work in senior citizen centers, nursing homes, the Veteran's Administration hospital, day care centers and other community service facilities.

In 1982, 280 volunteers contributed 48,000 man hours through RSVP. For 1983, expansion could have as many as 325 person donating 49,500 hours of assistance.

The board also passed a resolution expressing its desire to remain a separate service delivery area for the federal Job Training Partnership Act.

Under a proposal to reorganize administration of the JTPA — a jobs and training program which replaces the Comprehensive Employment and Training Act — the PBRPC's program could be combined with the Concho Valley's program.

PRELIMINARY ESTIMATES indicate the PBRPC could receive $2.1 million and Concho Valley $700,000 under JTPA next year.

Willie Taylor, director of employment and training programs for the PBRPC, said administrators of the Concho Valley program may fight the proposal. He said the board will know, perhaps by May, whether they'll need to begin coordinating efforts with Concho Valley administrators.

Finally, Jerry Tschauner, PBRPC director of planning, told the board that plans are underway to develop a new Permian Basin Data Book. He said the book contains a variety of census and other data gathered from the 17 counties within the PBRPC.

He said the book, which now has 1970 census data, will be updated with 1980 census information and then continually updated with information concerning health, oil production and other pertinent statistics as they become available.

MC president opposes four-year status for UTPB

By HALLYE JORDAN
Staff Writer

AUSTIN — A bill providing four-year status at the University of Texas of the Permian Basin could hurt Midland College in two ways, according to the MC president.

Dr. Jess H. Parrish, following approval of the bill by the Senate Education Committee here Wednesday morning, said he fears potential MC students may be pulled toward the four-year university and many courses offered may be duplicated in the Permian Basin.

"I'm not talking about the total number of students," Parrish said. "I'm talking about academic transfers."

Senate Bill 1014, sponsored by Sen. John Montford, D-Lubbock, and who represents Odessa, calls for adding freshman and sophomore level classes at UTPB as well as emphasizing energy-related sciences and engineering courses.

The bill will be sent to the full Senate for consideration possibly as early as this week. A similar bill, sponsored by Rep. Jay Gibson, D-Odessa, is pending in the House.

WHILE OPPONENTS of the bill from Midland said they were disappointed but not surprised at the committee's ruling, Friends of UTPB, a group of about 2,000 Odessans and 1,000 Midlanders advocating four-year status, indicated they were pleased with the 6-2 vote.

Sen. Bill Sims, D-San Angelo, who represents Midland, and Sen. Oscar Mauzy, D-Dallas, cast the dissenting votes.

"We remain optimistic," said Aubrey Barlow, chairman of the Friends of UTPB. "We're hopeful the full Senate sees it as the subcommittee does."

According to Parrish, if UTPB offers an engineering degree program, they also will have to provide basic courses required for engineering degrees that currently are offered at Midland Collegeo.

Duplication of basic, lower-level courses would be detrimental to the Permian Basin, he said, citing concern about MC's foreign language, business, math and English classes.

"We're worried about the erosion of the kinds of programs we offer," he said.

If UTPB did provide the same lower level courses, Parrish said MC's academic offerings could gradually decline. He reasoned that if class loads diminish, so would the need for some personnel and the number of courses offered in the academic areas would drop.

"I'M GREATLY concerned about this college becoming something other than what it was designed to be."

About $19 million from the state has gone into the growth of MC while some $40 million of local money has been invested. Parrish said the community wants a college that offers a wide scope of academic, vocational and adult education classes. If, however, UTPB provides competition in the academic areas, MC could become primarily a vocational school.

Paul Harvel, executive director of the Midland Chamber of Commerce, also testified before the subcommittee.

"We in Midland are very proud of UTPB and use it as a means of recruiting," he said. "It's a fine school, a fine institution and we're glad they are there. But I think four-year status would cripple and hurt our academic courses at Midland College."

The financial strain on a weakening state budget was cited by several opponents of the four-year status. According to Robert Clinton, director of the Community College Association, which represents 47 community colleges, he did not believe it was financially "the proper time to expand the upper level university."

Besides the replication and duplication of the facilities, Clinton pointed out additional expenses to the state budget. Also, approval of the bill may entice other upper-level universities to expand.

A FISCAL STATEMENT indicated about $7.5 million would be needed to construct a library and classroom building to accommodate freshman and sophomore students at UTPB. Also, about $1 million would be required each year to maintain the lower-level programs.

"I fear the chances are during the next session we'll have four or five more (upper-level institutions) wanting to expand," Clinton said.

"I understand the Friends of UTPB wanting to have a free-standing four-year university," said Dr. Roger Griffin, immediate past president of the Texas Junior College Teachers Association. "But if the Legislature passes this bill, can it refuse to treat others in a like manner?"

If passed by both the Senate and the House, four-year status still could be denied by the Coordinating Board of the Texas College and University System or the UT System Board of Regents. In a statement issued in October, Chairman of the Board of Regents Jimmy Powell said regents were opposed to four-year status. However, a need for a four-year university is feasible by the 1990's if the population of the Permian Basin reaches 400,000, as expected, according to the statement.

Neighbors recount hearing screams from apartment

By RICHARD ORR
Staff Writer

In methodical, step-by-step fashion, Lubbock District Attorney Jim Bob Darnell is weaving a heavy rope of circumstantial evidence around the neck of Clarence Allen Lackey, on trial for the second time in the 1977 abduction, rape and murder of 23-year-old Texas Tech secretary Toni Diane Kumpf.

Neighbors of the slain woman, whose throat had been cut from ear-to-ear and whose scantily clad body was found dumped in a field south of Lubbock July 31, 1977, testified Wednesday of hearing pre-dawn screams coming from her apartment and of seeing a distinctive white pickup truck speed from the scene with a man at the wheel and a woman sitting beside him.

Mary Bookout, who lived in a three-bedroom apartment adjacent to Ms. Kumpf's, told jurors she was awakened "by a lot of commotion. The walls were shaking and she was screaming, 'Help me. Help me.' "

Ms. Bookout said she woke the brother of a female roommate and the two of them went outside in time to see the pickup truck drive away.

A PICKUP MATCHING the one that left the scene was later identified as belonging to Lackey, who is being retried after an appeals court threw out his 1978 conviction and death sentence on a technicality in the jury selection process.

The roommate's brother, Ricky Tomes, testified that he saw a tall man "with dirty blond hair" get into the pickup and drive off with a woman seated next to him. She appeared to be wearing a night-gown, said Tomes.

It was later found that Ms. Kumpf's apartment door had been kicked in and police said they discovered evidence of a struggle inside.

Tomes said the pickup "had lights and horns on top of the cab," was missing a rear hubcap and had a "big black bumper on the back."

Another trial witness, 28-year-old Dolly Moreno Caudillo, said she worked with Ms. Kumpf at Tech and the slain woman had mentioned being "watched" and possibly followed by a man in the weeks prior to her death.

"SHE WAS VERY nice," said Ms. Caudillo as tears started to form in her eyes. "She was very considerate and made friends quickly. Everyone really liked her."

A funeral home mortician testified that Ms. Kumpf's head was nearly severed by two long slashes across her throat and that her left hand had been "cut to the bone" between the thumb and index finger. She was clad only in panties and a pullover type jersey.

Lackey, a 28-year-old former construction worker, is alleged to have raped and murdered Ms. Kumpf after taking her to an apartment he shared with a 30-year-old woman at the time.

The woman, 30-year-old Carol Jean Johnson, testified Tuesday that she came home from work about 7:40 a.m. the day of Ms. Kumpf's murder and found "a big red puddle of wet blood on the bedroom floor."

Ms. Johnson said Lackey initially lied to her about how the blood got there, but later told her: "Baby, I've got something to tell you. I'm the one they're looking for. I didn't mean to hurt her."

Police were led to Lackey by another woman who tipped them that he matched the description of a man being sought for questioning in the case.

Officers testified they obtained a warrant for Lackey's arrest after finding blood stains in his apartment and after getting a statement from Ms. Johnson, who admitted on the witness stand that she at first lied to police and tried to help him hide evidence because she "was scared" of what would happen to her children by a previous marriage.

Former Lubbock County Chief Deputy Sheriff Albert Smith testified that he conducted an investigation in the field where Ms. Kumpf's body was discovered by a farmer on the day of her death.

SMITH TOLD the six-man, six-woman jury that due to the small amount of blood found around the body he concluded that she had been murdered "at another location" and that "a strong odor of decay" was coming from Lackey's apartment when officers went there to re-question Ms. Johnson on Aug. 2.

Smith said an investigation disclosed that the odor emanated from a box spring and mattress in the rear of Lackey's apartment, which was located about two miles from where Ms. Kumpf's body was found.

Another former Lubbock County deputy, J.B. Douglas, testified that heelprints on the door of Ms. Kumpf's small, efficiency apartment matched those of boots taken from Lackey at the time of his arrest. "They appeared to be identical," said Douglas.

The door, which was brought into court as evidence, bore heelprints just below the lock and Lackey's boots also were stained with blood, according to testimony.

Other evidence that is expected to link Lackey with the slaying include a pack of Marlboro cigarettes found on Ms. Kumpf's bed, and samples of hair, blood and saliva obtained during a comprehensive investigation of her death.

Testimony was to resume at 8:45 this morning in 238th State District Court. Lackey is being retried here on a change of venue. He originally was convicted and sentenced to die by a San Angelo jury in 1978.

Midland College President Dr. Jess H. Parrish testifies in Austin Wednesday before the Senate Education Committee, which voted 6-2 in favor of making University of Texas of the Permian Basin a four-year institution.

MC president opposes four-year status for UTPB

(Continued from Page 1C)

Friends of UTPB indicate they understood the statement as saying regents favor four-year status, while the bill's opponents say Powell's statement favors a cooperative effort between area community colleges and UTPB to provide a four-year education. Montford's bill asks for four-year status to be phased in beginning in 1986.

According to Rep. Tom Craddick, R-Midland, he will follow the recommendation of the Coordinating Board and the Regents when Gibson's bill reaches the House.

"To my knowledge, since the Coordinating Board has been put into effect, we've never had a program that the Coordinating Board opposed reversed by the Legislature."

The Coordinating Board was developed to provide input and recommendations, Craddick said. "If we have a Coordinating Board in existence to do that, to advise us what is best, and we ignore that, why even have them?"

San Antonio official won't let Klan 'dictate' to city

SAN ANTONIO (AP) - Members of the Ku Klux Klan have vowed to protect the Alamo from "Communist trash" despite the city's refusal to allow the white supremacist group to gather at the Texas shrine on May 1.

But City Manager Lou Fox said Wednesday that he would not allow the Klan to "dictate" to the city.

The Klan, he said, will be allowed to march only along a route prescribed by the city, which would snake through a small section of downtown and end up near City Hall and the police station.

"It's my responsibility to make sure we protect the peace," Fox said, "and I'm going to do that."

Charles Lee of Pasadena, Texas Grand Dragon of the White Camellia Knights of the Ku Klux Klan, blasted the city's stance and said Klan members would flock to the Alamo as "tourists" and "individual American citizens."

"What we basically want to do is make sure nobody messes with the Alamo," he said.

Individuals identifying themselves as Communists raised red flags above the Texas shrine in 1980 and 1981.

Robed Klan members peacefully appeared at Alamo Plaza last May 1.

An art group already has reserved the Alamo for the entire day of May 1, and allowing 50 to 250 Klan members to gather there would create "congestion and confusion," Fox and Police Chief Robert Heuck told Lee in a Tuesday letter.

The Klan immediately submitted a request for a permit for an alternate route near the Alamo, which was pending Wednesday. The city has five days to respond.

Eleven people were injured and six arrested during a Feb. 19 Klan rally in Austin. Six people were arrested and none injured during a heavily policed April 2 Klan march in Houston.

DEATHS

Charles George

ODESSA — Rosary for Charles J. George, 75, of Odessa and longtime oilman, was recited Wednesday in Hubbard-Kelly Funeral Home Chapel here. Services were to be today at 4 p.m. in St. Mary's Catholic Church of Odessa with the Rev. Kevin Hayburn and the Rev. James Bridges officiating. Burial was to be in Sunset Memorial Gardens.

George died Tuesday in Kingsland.

He was born Aug. 23, 1907, in North Java, N.Y. He married Sheila Christian June 3, 1940, in Odessa. He served on the board of directors of the Permian Basin Oil Show. He was the founder of Charles J. George Inc. Oil Well Service Contractors in 1947. He was founder and director of the Association of Oil Well Service Contractors in 1956. He was named the Grand Old Man of the Oil Service Industry during the 1981 Oil Show.

He was knighted by the Pope into the Equestrian Order of the Holy Sepulcher of Jerusalem, the highest honor the Catholic Church can bestow on a clergyman or layman. He was a fourth degree member of the Knights of Columbus and was a past Grand Knight. He was a member of St. Mary's Catholic Church.

Survivors include his wife of Odessa; three sons, Charles J. George Jr. of El Paso, and Fred D. George and Michael F. George, both of Odessa; three daughters, Sheila M. Denton and Mary Margaret Henderson, both of Odessa, and Madeline A. George of Austin; two brothers, Robert George and Raymond George, both of North Java; two sisters, Loretta Whitehead of Kenworth, N.Y., and Lillian Reding of North Tomawanda, N.Y.; and 13 grandchildren.

Sidney Glenn

Rosary for Sidney Erwin Glenn, 54, of 2300 Boyd, was recited Wednesday in Newnie W. Ellis Funeral Home Chapel. Services were to be at 2 p.m. today in St. Ann's Catholic Church with the Rev. Cliff Blackburn officiating. Burial was to be in Resthaven Memorial Park.

Glenn died Tuesday in a Midland hospital following a heart seizure.

He was born Oct. 29, 1928, in Champaign, Ill. He was raised in Illinois and graduated with a geology degree from the University of Illinois. He later earned his masters degree at Syracuse University in Syracuse, N.Y. Before that he served in the U.S. Navy during World War II and the Korean War.

After graduation Glenn worked overseas for Exxon. He moved to Midland in 1964 and became an independent oil operator. He married Virginia Foertsch in Chicago in 1954. He was a member of St. Ann's Catholic Church.

Memorials may be sent to the American Heart Association.

Survivors include his wife of Midland, a son, Sidney E. Glenn of Midland; two daughters, Margo Lewis of Albuquerque, N.M., and Kelly Glenn of Camp LeJeune, N.C.; and two sisters, Margo Johnson of Albuquerque and Kathleen Linnell of Weston, Mass.

Charley Medley

Services for Charley Medley, 73, of 612 Waverly, were Wednesday in Newnie W. Ellis Funeral Home chapel with the Rev. Ross Payne of Cotton Flat Baptist Church officiating and the Rev. Michael D. Buchman assisting. Burial was in Resthaven Memorial Park.

Medley died Monday afternoon at a Midland hospital following a brief illness.

The family requests memorials be made to Hospice of Midland, P.O. Box 2621, Midland, Texas 79702.

Pallbearers were Ned Pilcher, James Hammett, Dan Simmons, Clawson Pipkin, Lowell Thurman and Mike Buckman.

J.C. Shamburger

STAMFORD — John Cecil Shamburger, 75, of Stamford and father of Doug Shamburger of Midland, died Tuesday morning at Anson North Lake of a sudden illness.

Services were to be at 10:30 a.m. today at First Baptist Church in Stamford, directed by Stanford Funeral Home. The Rev. Bruce Lambert, pastor, will officiate. Burial will be in Highland Memorial Cemetery.

He was born April 26, 1907, in Winsboro and was manager of C.D. Shamburger Lumber Company 30 years. He later owned a paint shop in Stamford for several years. He was married to Estelle Nicholson May 11, 1932, in Texarkana, Ark. He was a member of First Baptist Church of Stamford and former member of Stamford Exchange Club. One brother preceded him in death.

Other survivors include his wife, three brothers, two sisters and two grandchildren.

Senate studying 'water package'

AUSTIN (AP) — A Senate subcommittee is studying a "water package" of eight measures that sponsors hope will ease Texas' current water woes and prepare the state for the future.

"It's not going to do any good to postpone any of this until the next Legislature," Sen. John Montford, D-Lubbock, told the Senate Natural Resources Committee Wednesday in presenting the three proposed constitutional amendments and five law changes affecting Texas water.

Sen. Tati Santiesteban, D-El Paso, committee chairman, said all eight measures would remain in a subcommittee for at least a week.

Montford said the "water package" was drafted under the direction of Lt. Gov. Bill Hobby with the participation of seven different senators and their staffs.

"These proposals provide us with a systematic approach to developing the water resources we will need to meet Texas' future requirements, but, even more importantly, they put the stress on conserving the water resources we already have," said Santiesteban.

The measures would:

— Add $300 million to the Texas Water Development fund in order to finance water supply programs and water quality improvements.

— Authorize two new programs which would allow the state to guarantee bonds issued by local governments to finance water supply projects, and sell the bonds at lower interest rates, thereby reducing the cost of the projects.

— Create a program of low-interest loans to farmers who want to install newer, more efficient irrigation systems.

— Allow the Texas Water Commission to set aside enough water from the flow of a river to supply fresh water to bays and estuaries.

— Require local governments that ask for state loans to show they have developed water conservaton plans.

— Protect fresh water supplies from pollution.

Land Commissioner Garry Mauro spoke in favor of the bill guaranteeing fresh water to bays and estuaries.

"Acre for acre, our coastal area is more productive than any agricultural land," he told the committee. "It is just common sense to realize our bays and estuaries are priceless possessions."

Agricultural Commissioner Jim Hightower said he supported the entire package, particularly the proposition to help farmers finance irrigation projects that would be more efficient and economic.

"Overall the approach is very good," said Stuart Henry, representing the Lone Star Chapter of the Sierra Club.

House votes to hold the line on school teachers' salaries

AUSTIN (AP) — The House Appropriations Committee voted Wednesday night to hold the line on salaries for public school teachers during 1984-85 and rejected a proposal to boost salaries by 17 percent.

The committee approved, 15-10, a motion by Rep. Bil Blanton, R-Farmer's Branch, to leave salary schedules unchanged.

Gov. Mark White said earlier Wednesday he supports a pay raise in the range of 24 percent despite the state's tight budget, and added, "I'm going to insist that this Legislature not retreat from putting education as the No. 1 priority."

Homer Scace, deputy director of the Legislative Budget Board, said the committee vote would not affect a 9 percent increase in pay for teachers over the two-year period because those increases already are in the law to recognize experience.

Whataburger offers 'amnesty' to persons with overdue books

Whataburger, the hamburger specialty chain, will be getting into the book depository business via an "amnesty" program beginnning Sunday and ending April 30.

The program is to encourage Midlanders to return their overdue books to the Midland County Public Library through Whataburger resturants.

Each person who drops off overdue library books at any of the three Whataburger locations in Midland will be offered a free medium-size soft drink.

"We appreciate Whataburger's efforts in our behalf," said John Deats, library director, "and are excited because this combination of a free soft drink from Whataburger and no overdue charges being assessed by the library should encourage many people to return those books which we normally would never see again."

The library charges a 20-cent fine per day for overdue books.

Whataburger locations in Midland are at 1905 N. Big Spring St., 3206 Midkiff Road and 800 Andrews Highway.

A taxing situation

Some citizens will be up late tonight, but not for the usual Friday night partying. Midnight is the deadline for mailing the Internal Revenue Service its yearly dues. The Main Post Office, 100 E. Wall St., will burn the midnight oil picking up and postmarking those IRS forms dropped in at the last minute.

Taxpayers again make 11th-hour filing effort

By JIM LUTHER
Associated Press Writer

WASHINGTON — Millions of taxpayers are lining up in banks, accountants' offices and at post offices today to square things with Uncle Sam for another year.

Midnight tonight is the deadline for most couples and individuals to file their 1982 tax returns, and members of Congress seized the opportunity Thursday to assail the tax system as complex and unfair, and to offer their own plans for cleaning it up.

Sen. Bill Bradley, D-N.J., and Rep. Richard Gephardt, D-Mo., unveiled a refinement of their simplified tax that attracted widespread interest last year. It would wipe out most deductions, most people would pay a 14 percent tax rate and 70 percent of taxpayers would get a tax cut.

Sen. Dan Quayle, R-Ind., proposed a similar plan. And another proposal, by Rep. Leon Panetta, D-Calif., would allow a four-member family $13,333 income without paying taxes.

The system is "beginning to crumble under its own weight," Gephardt said. "But help is on the way."

Don't hold your breath. Sponsors of tax-simplification plans agree there is little chance Congress will approve any wholesale revamping of the income tax in the next several years.

In the meantime, between 5 million and 10 million couples and individuals faced the task of completing their returns and getting them postmarked before midnight.

The Internal Revenue Service estimated that instead of filing their returns, as many as 3 million others would file a Form 4868 with a payment of estimated taxes by midnight, and wait as late as Aug. 15 before filing a completed return.

When all 1982 tax returns have been filed, there should be between 96 million and 97 million of them, up about 1 million from last year. Close to 80 percent will get refunds.

If you think your taxes are a little lower, you're right — but not by much. The Tax Foundation, a nonprofit group, estimates the average worker will have to work eight hours a day through May 2 this year just to pay 1983 taxes. That's one day fewer than last year, due mostly to the phased-in reduction in federal income taxes.

Figured another way, the foundation estimates the average person spends two hours and 40 minutes of each working day just earning money to pay state, local and federal taxes. That is one minute less than last year. The federal share is one hour and 44 minutes — easily the biggest claim on earnings.

Housing takes 94 minutes a day; food, 67 minutes; transportation, 43 minutes; medical care, 35 minutes; clothing, 22 minutes, recreation, 21 minutes, and all other, including savings, 38 minutes.

The figures are somewhat misleading, however, because they assume that all taxes are paid by individuals and none by businesses.

The IRS, knowing from experience that the number of errors on tax returns increases sharply as taxpayers rush to meet the deadline, cautioned against carelessness.

"When your return is ready to mail, go through and check all the arithmetic once more," advised IRS spokesman Larry Batdorf.

Some other IRS tips for last-minute filers: Use the stick-on label that accompanied your tax forms; be sure to use the appropriate lines on your return; double-check to see that you look at the correct line on the tax table when you figure your tax, and don't forget to stamp the envelope.

Errors in arithmetic and similar miscues are caught quickly by IRS computers. But if you're expecting a refund, an error will cause a delay.

More than half of all taxpayers hire somebody to help fill out their returns. And many of the last-minute filers apparently were making trips to the bank to open an Individual Retirement Account to lower their tax bills.

Financial institutions have reported heavy interest in IRAs over the past several days. A worker may exempt up to $2,000 from taxation by buying an IRA ($2,250 for a couple with one non-working spouse). No tax is due on the money or interest it earns until it is withdrawn at age 59½ or later. The IRA may be purchased anytime before the tax return is filed.

Accountants will file past finish in '1040-K Tax Run'

ATLANTA (AP) — Hours after tonight's midnight deadline for filing income tax returns, accountants here will celebrate the end of the tax season by pounding the pavement in a "1040-K Individual Income Tax Run."

The "K" stands for "kilometer," although the race Saturday morning actually will be run over 10 kilometers and 40 yards. For those who find the "1040" run of six-plus miles too demanding, there will be a one-mile "Short Form."

And following the government's tax forms one step more, the organizers also plan an "EZ" event.

"That's just a fast walk to the bar," said Lily Grace Dozier of the Georgia Society of Certified Public Accountants Inc.

Race chairman Greg Hardwick, a CPA who came up with the idea, said the events may draw 800 runners, including "our friendly opponents" — local employees of the Internal Revenue Service.

The race benefits the Educational Foundation of the Georgia Society of Certified Public Accountants, so entry fees are, of course, tax deductible.

The public is invited to run, although many runners wouldn't have much use for one of the first-place prizes — "sub-chapter S corporation service" from one of the race's sponsors, Prentice-Hall Information Services Division.

The CPA group will provide a free tax consultation next year to the winner of the "1040-K."

Another sponsor, Trust Company Bank, will provide race T-shirts emblazoned with a Form 1040 on which a taxpayer reports income of $900,000 but tallies enough deductions to pay no tax. The preparer line is signed "Darn Good CPA."

Confirmation doesn't end debate

Kenneth L. Adelman

WASHINGTON (AP) — The 57-42 Senate vote confirming Kenneth L. Adelman as the nation's next arms control chief failed to end the dispute over whether his selection enhances or impairs chances for meaningful arms control.

In the aftermath of the Thursday vote, the culmination of three months of hearings and debate, President Reagan and Adelman called separately for bipartisan reconciliation to move arms control forward while some senators said the choice of Adelman makes such cooperation unlikely.

The Soviet Union's official news agency called Adelman "an outright hawk" and said his selection proves the Reagan White House is interested in amassing more arms, not controlling them.

Principal Senate opponents said Adelman prevailed because Republican senators who might otherwise have voted against him were subjected to intense presidential lobbying.

Some of Adelman's supporters said his victory puts clear responsibility on President Reagan to make headway in arms negotiations. They said they used their support to wrest concessions from the administration that were otherwise unobtainable.

The opponents maintain the administration's triumph in salvaging the Adelman nomination will turn sour as the Soviets move to convert Adelman's arms control views into a propaganda windfall in Europe.

Reagan told a news conference he hopes "that this positive step will mark the beginning of a new bipartisan consensus on the vital issue of nuclear arms reduction."

"I'm convinced that Kenneth Adelman will prove that the confidence which the Senate has expressed in him today is well-founded," Reagan said.

"And if we're met with reciprocal seriousness of purpose from the Soviet Union, 1983 can be a year of historic importance in securing a more solid and stable peace through arms reductions," the president said.

Adelman, who personally buttonholed many senators in his own behalf in the days before the vote, promised at a separate news conference in New York City to open immediate arms control consultations with key senators, including those who fought hardest to block his confirmation.

"I believe that such close consultations can help our arms control efforts, which, in my view, must be bipartisan in order to be effective," said the 36-year official who for the last two years has been deputy chief of the U.S. mission to the United Nations. Adelman said.

From Moscow, the Soviet news agency Tass labeled Adelman a foe of arms control and said his confirmation was due to "fierce arm twisting" by the White House.

First National: More conservative, more 'discerning'

By LESLIE HAINES
Business-Energy Writer

Reducing expenses and having a more "discerning" loan policy will be key elements in the First National Bank of Midland's plan to adopt a more conservative stance than it's had in the past few years. The move follows recent top-level management changes at the bank.

While not denying there are some loan problems, officers say the bank is sound and that there are no plans to change FNB's independent status.

The bank is looking economic reality in the eye, however. "You are going to see the bank a lot more conservative than it has been in the past," Donald L. McCall said Thursday.

Earnings have declined and loan charge-offs have increased, as they have in most other banks with large energy loan portfolios. Just as many of its customers have gone back to business basics while riding out the recession, First National, too, will be pulling in its horns.

"We've got to adapt ourselves to the environment we find ourselves in," McCall said. "We can't preach conservative business practices to our customers without doing it ourselves." Admitting the bank "built in a little fat" during its phenomenal growth spurt of the last 24 to 30 months, he said officers are making plans now to reduce expenses. He did not elaborate.

Last week, McCall, an executive vice president with the bank since 1981, was named chief executive officer and interim general manager following the sudden resignation of Charles D. Fraser, CEO, president and chairman.

Despite swinging to the conservative end of the scale, loans are still being made and the bank will show a profit for the first quarter of 1983, McCall said. The search for a new president is under way, he added.

Clarence Scharbauer Jr., new chairman of the board, told shareholders in an April 13 letter that the bank's directors declared the regular quarterly dividend of 30 cents per share. The checks were mailed Thursday.

In view of changes at the bank, Scharbauer told shareholders the annual meeting, originally scheduled for April 28, has been pushed back to May 26, "in order to properly prepare a comprehensive report on the condition of the bank."

McCall said First National's conservative posture will affect loan policy, which will become "a lot more discerning" than it has been in the past.

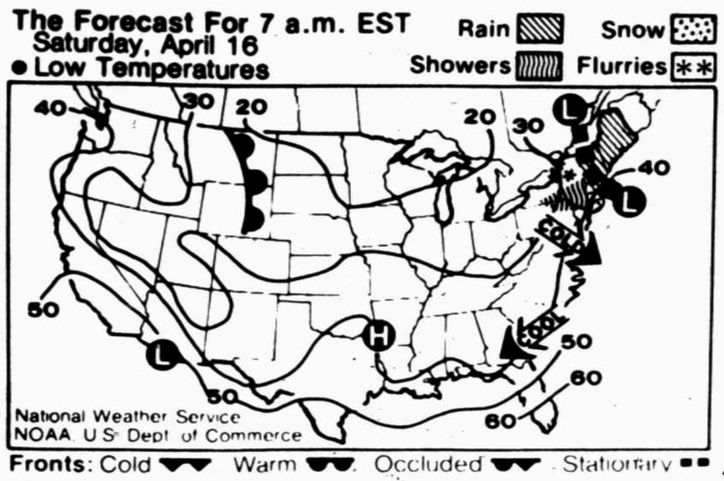

The bank has always prided itself on its strong committment to underwriting growth in the Permian Basin, not only for the oil and gas industry but for all business ventures. McCall said loan demand has been high over the last 36 months, "and we feel we have met these needs."

By making loans in an aggressive way and growing by leaps and bounds, the bank has carved a niche for itself in West Texas and attracted attention from other parts of the state. In the first quarter of 1980, First National reported deposits of $652 million. Three years later, deposits more than doubled to reach $1.41 billion, making FNB rank ninth among Texas' top 10 banks by Dec. 31, 1982.

Banking sources say a 1 percent return on assets, a measure of profitability, is considered good in a bank with more than $1 billion in assets. In 1981, First National's return was 1.65 percent; in 1982 it dropped to .68 percent. The capital-to-assets ratio, a measure of internal strength, is nearing 10 percent, while the industry standard for a bank of this size is between 6 and 7 percent.

WEATHER SUMMARY

AP Laserphoto Map

Sunny weather is forecast for most of the nation through Saturday, according to the National Weather Service. Rain and showers are expected for New York and New England.

Springtime weekend weather due

Sunny skies and springtime temperatures should supplement a pleasant weekend in Midland, according to the National Weather Service at Midland Regional Airport.

Skies should remain clear tonight and Saturday and temperatures are expected to be warmer through Saturday. The low tonight should drop near 40 with the high expected to climb into the lower 70s Saturday.

Southeasterly winds, breezing at 5-15 mph tonight, are expected to increase to 10-20 mph Saturday.

Thursday's high of 59 was 36 degrees cooler than the record high of 95, set in 1935. The overnight low of 32 was five degrees warmer than the record low of 27, set in 1933.

Midland statistics

FORECAST

Clear and not so cold tonight with a low near 40. Sunny and warmer Saturday with a high in the lower 70s. Southeasterly winds tonight at 5-15 mph, increasing to 10-20 mph Saturday.

Texas area forecast

West Texas: Mostly clear with a warming trend through Saturday. Highs 58 Panhandle to 68 south and near 80 Big Bend valleys. Lows 35 mountains and Panhandle to 45 extreme south. Highs Saturday 68 Panhandle to 75 southeast and 85 Big Bend valleys.

Transplant publicity questioned

WASHINGTON (AP) — Publicity brought money and aid for 16-month-old liver transplant patient Jamie Fiske. But it is an unreliable way of getting help, witnesses have told a House panel.

"It contradicts notions of fairness as well as good sense when organ availability depends upon the ability of particular recipients or their family members to generate publicity for their plight," said Alexander Capron, former director of a presidential commission which studied ethical problems in medicine.

"Moreover, this spectacle...is contrary to our usual proper norms of medical privacy and human dignity," Capron said.

Capron, now a professor of law and ethics at Georgetown University, said a regional or national system of organ transfer should be established to alleviate some problems.

Charles and Marilyn Fiske, parents of the Bridgewater, Mass., child whose case was spotlighted last fall as they searched for a liver donor, made a related proposal before a House Science and Technology subcommittee. They suggested that a national institute be established to raise public awareness of organ donations as a possible option.

The Fiskes waged a systematic publicity campaign, involving reporters as well as politicians in a successful attempt to save their daughter's life.

"In our situation, the media were always fair to us," Fiske said. "There wasn't a massive invasion of privacy."

But he acknowledged that their strategy wouldn't be a realiable one for all families with similar problems obtaining money, insurance coverage or a donor. "That may happen once or twice, but after while, that may lose its effectiveness."

"I think what has to be in place is a system that is much more secure," he said.

Capron also urged the subcommittee on investigations to support the adoption by every state of a universal definition of death, not only because of organ transplants but also because of "the use of modern forms of treatment that can simulate the traditional 'vital signs' in patients who are actually dead."

Capron was director of the President's Commission on the Study of Ethical Problems in Medicine and Biomedical and Behavioral Research, which concluded its work March 31.

Fiske said the Nov. 5, 1982, surgery on his daughter at the Universty of Minnesota medical center saved her life.

Jamie Fiske was a lively distraction during most of the hearing as she sang and made a variety of baby noises while her parents talked.

Fiske said Jamie gained more than 10 pounds after she left the hospital in December and now weighs more than 24 pounds.

Meanwhile, a 13-month-old Walnut, Miss., boy who was rushed from the same subcommittee's hearing on Wednesday in order to receive his own liver transplant, was recovering after serious complications during his surgery in Memphis. Doctors gave Brandon Hall a 50-50 chance of survival.

His mother, Billie Hall, had described to the committee the inadequate coverage in federal medical programs for transplants and the difficulties she had raising money for the procedure.

Government health programs and many insurers refuse to routinely pay for organ transplants because of their immense cost. Federal regulations also list some transplant procedures as experimental and therefore inappropriate for reimbursement. The only exception is with kidneys. An extensive kidney dialysis and transplant program is part of Medicare.

Liver recipient in stable condition

MEMPHIS, Tenn. (AP) — A 13-month-old boy, who underwent liver transplant surgery within hours of his mother's appeal before Congress for federal aid for such operations, was stable after suffering cardiac arrest.

"The next 48 hours are crucial," Scott Kent, a spokesman for Le Bonheur Children's Medical Center, said Thursday night. "His vital signs are still stable. We just continue to hope for the best."

Brandon Hall of Walnut, Miss., was taken to Le Bonheur a few hours after doctors at the University of Tennessee Center for the Health Sciences completed the transplant at 5 a.m. Thursday.

The child was rushed to surgery hours after he appeared with his mother at the hearing before a congressional subcommittee in Washington, D.C.

A nurse who visited Brandon in the intensive care unit at Le Bonheur said the youngster apparently recognized his mother, Billie Hall, 38.

"His mom and I noticed right away that his eyes are great," said nurse Susan Shapiro. "He recognizes people he knows."

AP Laserphoto

Answering reporters' questions about the condition of her 13-month-old son is Mrs. Billie Hall of Walnut, Miss.

Mrs. Hall said she, too, was encouraged by her son's appearance.

"He's going to live," she said. "Yesterday, we didn't know whether he was or not."

Doctors said the child has a 50-50 chance of survival.

Mrs. Hall appeared Wednesday before the House Subcommittee on Science and Technology to tell lawmakers that finding donor organs is extremely difficult. She also complained that federal medical programs don't help pay for such operations. Brandon's surgery is expected to cost $60,000, not including fees for his hospital stay.

Brandon's new liver came from 9-month-old Sarah Cadora of Beverdam, Va., who was killed in a traffic accident.

Dr. Peter Whitington, a pediatric gastroenterologist, said Brandon required 25 units of blood during the transplant, and went into cardiac arrest during the operation.

The volume of blood pumped into the boy apparently caused the cardiac arrest, which may have damaged the donor organ, Whitington said.

The child weighs 18 pounds and normally has one pint of blood circulating through his body.

It will be several days before doctors know if the liver was damaged.

First National: More 'discerning'

(Continued from Page 1A)

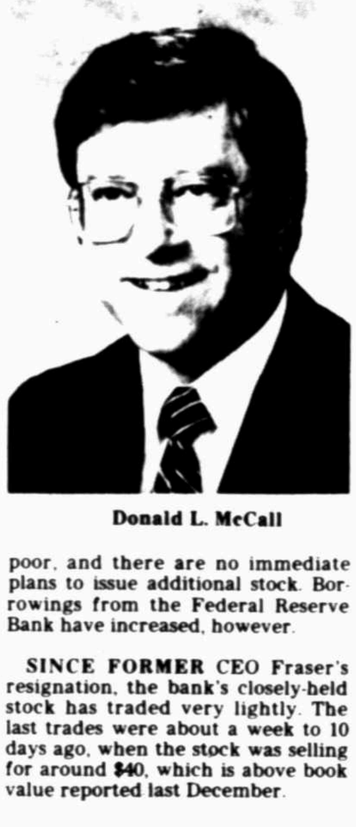

In the banking industry, this could be considered an enviable track record, but one not immune to the ups and downs of the oil industry.

"We are definitely an energy bank. Our fortunes ebb and flow with the energy business," McCall said. "It's well known that certain segments of the energy business have had a tough time, and we serve all facets of the business, so it's not surprising that our earnings would be affected."

McCall wouldn't release specific figures from the bank's upcoming financial statement for the first quarter of 1983, but he said the bank will show a profit. "Earnings, while not up to prior years, are still solid, and they are expected to be so for the balance of 1983. The bank is solvent; it's capital position is strong."

Comparing the first quarter 1983 results to those of the preceding quarter ended Dec. 31 is not viable, McCall said, because the bank always experiences a seasonal drop after the first of the year. More important, during the preceding quarter the bank gained income from the one-time sale of its main building, parking garage and motor bank, thus turning a non-earning asset into one which will earn a pre-tax gain of $35.6 million on the 1982 tax return, and create a deferred gain in future years of $12.7 million.

In the quarter just ended March 31, and in the one before that, net loans exceeded deposits at First National. Some sources say this means trouble, and could indicate the bank is short on cash, or that investor confidence has eroded. McCall says no, the bank is not cash-poor, and there are no immediate plans to issue additional stock. Borrowings from the Federal Reserve Bank have increased, however.

Donald L. McCall

SINCE FORMER CEO Fraser's resignation, the bank's closely-held stock has traded very lightly. The last trades were about a week to 10 days ago, when the stock was selling for around $40, which is above book value reported last December.

"I would say they (investors) haven't lost confidence in the bank, the institution," said Joe Liberty, manager of Midland's Rauscher Pierce Refsnes office, one of the largest single traders of the bank's stock. "I think their deposits are stable. From what I view, it's a pretty stable situation.

"There are a lot of energy banks that have problems. This is just one that is more close to home. Banking has changed for energy. The price of companies' inventory has fluctuated."

First National would prefer to have a lower deposit-to-loan ratio, McCall concedes. "The drop in deposits is partly seasonal. We always experience a decline in the first quarter.

"The deposit base in this area of the Permian Basin has probably shrunk somewhat, with lower oil and gas prices, and lower natural gas takes. Our customers' cash flow isn't what it was," he said.

First National's core deposits depend more on wholesale activity than on retail business, McCall said. "I don't know that we're seeing any significant change in retail deposits. I've talked to some retailers around town who say business has picked up, and others say their first quarter was so-so."

Based on a critical review of loan quality, the bank last year charged off $16.6 million worth of loans, and upped its reserve set aside for loan losses to $50 million. Most other Texas banks have increased their loan loss reserves since the first of the year.

"Our non-performing loans have increased," McCall said, without providing exact data. "It all ties together with the energy industry. We're no different than other banks with a lot of energy loans."

SOME SOURCES say the bank is sailing in troubled financial waters as a result, and that it is under examination by federal regulators.

McCall said the last formal and routine review was made in 1981, and follow-up examinations were completed in 1982.

"The banking industry as a whole has come under increased scrutiny by various regulatory agencies, and one particular area is energy banks, along with agriculture banks and banks with loans to undeveloped countries," he said.

"This bank being an energy bank, it is subject to the same review as other energy banks. I would hasten to add we do not have any loans to undeveloped countries, and we have very few agricultural loans."

First National's current plans are aimed at maintaining the bank's independent status, McCall said. InterFirst Bank Dallas, which has been a correspondent bank since 1929, has owned 4.9 percent of FNB's stock since the late 1970s. To McCall's knowledge, no other bank or financial institution owns any equity interest in First National.

Federal bank holding company law says if a company or individual owns 5 percent or more of a bank's stock, it can be said to have a controlling influence on the bank.

Some say First National is ripe for a takeover because it allegedly faces loan problems and needs money; others say because the bank is so large, it is an attractive plum any holding company would love to acquire. But, the directors' resolution to remain independent is intact.

"Yes, we think we can remain independent, and not join any of the large bank holding companies," McCall said. "We don't want to appear cavalier or flippant, but we think we're a great institution, and we hope people feel comfortable coming in here to do business."

Americans being 'conditioned' to nuclear war

MOSCOW (AP) — A top Soviet general says President Reagan is conditioning Americans to accept the idea of nuclear war, but he suggests Moscow would counter the planned deployment of U.S. missiles in Europe without basing nuclear weapons in Cuba.

Maj. Gen. Yuri V. Lebedev said he still believed in the "good will" of the United States not to deploy the new missiles in Western Europe starting later this year. But if the medium-range rockets were deployed, he said, the Soviet Union would not retaliate by placing its own missiles in Cuba.

Kremlin officials have warned repeatedly they will put the United States in an "analogous position" if the American missiles are stationed in five NATO countries, within a few minutes' striking distance of Soviet territory.

Those statements raised speculation in the United States that the Soviets were considering deploying mid-range rockets in Soviet-allied Cuba.

But Lebedev, 55, a military adviser to Soviet arms control negotiators, said, "There is no need to do it ...

"It's enough to deploy new systems in Soviet territory," he said in an interview Wednesday with The Associated Press.

In 1962 the Soviets tried to install missiles in Cuba but pulled them back in a nuclear showdown with the United States.

Lebedev was interviewed through an interpreter at a Foreign Ministry press center.

The interview was one of several by government, military and academic figures who have been unusually accessible to visiting American reporters at a time when the Soviet Union and the United States are trying to influence public opinion on the controversial question of nuclear arms in Europe.

The United States, under a NATO decision, plans to begin deploying 572 medium-range missiles, with ranges of up to 1,500 miles, in Western European late this year. The Soviets have a similar number of SS-20s and other intermediate-range missiles targeted on Western Europe.

The NATO decision calls for the deployment unless the United States and Soviet Union negotiate an agreement reducing medium-range missiles in Europe. Those negotiations, now 18 months old, appear deadlocked.

"I cannot predict, but I still believe there will be good will on the part of the United States ... not to deploy the new systems," Lebedev, a long-time commander of missile forces, said.

Talks create favorable opinion

WASHINGTON (AP) — President Reagan's recent speeches on arms control and nuclear weapons have again turned public opinion in his favor, say White House officials who are using polls to prove their point.

Several officials, some of whom leaked the latest data while requesting anonymity, sought to reverse reports of weakness that followed the Republican-controlled Senate Budget Committee's vote last week to slash the administration's proposed defense buildup.

The outlook at the time was in doubt on Reagan's nomination of Kenneth Adelman to be his arms control chief and on a House resolution calling for a nuclear weapons freeze.

Reagan won confirmation of Adelman on Thursday, and a final vote on the freeze comes up next week.

An ABC News-Washington Post poll said Wednesday night that for the first time since last October, more of those surveyed approved of the way Reagan was handling his job than disapproved.

ABC said 49 percent of poll respondents gave the president a favorable mark, up from 45 percent last month and 42 percent in January, the low point of his term.

Speakes and other sources who acted independently Thursday also offered reporters the results of portions of a private poll conducted by Richard Wirthlin on Reagan's foreign policy performance.

The data showed that since the end of January, there has been a marked drop, then recovery in the number of people interviewed who believe more should be spend on national defense.

The figures show that the number of people who want to spend more for defense, even if that means increased taxes, fell from 50 percent at the end of January to 35 percent in mid-March and rebounded to 43 percent after Reagan made three nationally televised speeches.

Mike Ramsey of the St. Louis Cardinals slides head first into home plate as New York Met catcher Ron Hodges puts the tag on, without the ball. The Cards scored all seven of their runs in the first inning and went on to defeat the Mets, 7-1.

Cubs suffer big-inning loss

By TED BATTLES
Sports Editor

A couple of more tail-whippings like the last two nights and the Beaumont Golden Gators may wind up as the sleezy green reptiles in the eyes of Midland fans.

Midland pitchers hung seven zeroes and a one on the scoreboard at Cubs Stadium Thursday night, but Beaumont spoiled it all with a Big Seven in the sixth for an 8-4 Texas League win over the Bruins.

"We haven't been able to avoid the big inning for the last three games," said Midland Manager Tom Harmon, "And it's killing us. That, and the bases-on-balls."

Although it was the Gators' second straight over the Cubs, leaving Midland 0-2 at home, Harmon found a silver lining in the way the Cubs refused to concede. "We didn't pull it out, but we battled back in the ninth," he said, referring to the fact that Midland loaded the bases.

OTHER HIGH points were left fielder Bill Hatcher, who collected four of Midland's 11 hits and the relief pitching of Ray Soff. "Soff did well in the one inning (ninth), but we've got to hold the opposition close until we can get him in."

And the addition of Mike Anicich, obtained from the New York Mets for "a player to be named later, add some power. Mike hit 22 homers in Jackson last year and that's a big park," said Harmon, not to mention a low altitude, not conducive to homers.

Anicich was involved in what probably was the game's crucial play in the Gators' seven-run six, an uprising that chased Midland starter Darrell Banks, who led 3-1 and had a four-hitter going before the roof collapsed.

With a man on first, first baseman Anicich dropped Mike Martin's foul pop up when Martin, running to first, made contact with the fielder. It was ruled the contact did not result from the contact, although the play brought Harmon out of the dugout on the run. Martin promptly doubled and before it was over 11 batters had paraded to the plate and the Gators had seven runs and an 8-3 lead.

NEIL BRYANT came in in relief with two runs in and runners on first and second and committed the cardinal sin for a relief, walking two batters to force in a run. Then Ozzie Guillen hit a bases loaded three-run double into the left-center field alley.

Bryant last year was a 7-8 starter for Amarillo and "this year we are in the process of making him a reliever," said Harmon.

Midland took a 3-1 lead when Rick Baker tripled and scored on a grounder in the first and added two more in the third when Anicich doubled, Jim Walsh beat out an infield hit and Trey Brooks and Tommy Johnson followed with singles.

But in the end, Beaumont's pitching savvy again paid off. When George Stablein, who hurled for AAA Hawaii last season, tired, in the sixth, Midland had one run in and two on base. Marty Kain, who was 10-8 at Amarillo last year, came in to give up a run-scoring infield hit to Hatcher, but then slammed the door on the Cubs for his second save.

Dan Purpura's three hits paced Beaumont's 10-hit offense, but the Gators' most impressive blow was Mike Gillaspie's solo homer over the right field barrier in the second. It was his second in two nights, fourth of the season and raised his rbi total to 11. No wonder the Cubs issued four walks to him Wednesday night.

BRUIN BREWIN'S—Harmon is counting on Carlos Gil to be his stopper tonight...The Cubs have lost three straight...Once again it was cold at Cubs Stadium, but without the wind, it was as though someone had jumped the thermostat from 50 to 70, not bad at all, if you were dressed for it...

Winfield hits pitch instead of pitcher

Weather rains on Texas' winning, brings down roof

By The Associated Press

Dave Winfield confined his aggressiveness to home plate and the basepaths and got the New York Yankees back on the right track.

Winfield, thrown out of Wednesday night's loss to Detroit when he jumped on pitcher Dave Rozema in the fifth inning after a pitch sailed over his head, jumped on a Jack Morris pitch in the fifth inning Thursday night. He ripped it for a tie-breaking single that led to a three-run burst and a 6-3 victory over the Tigers.

"We're 3-5. That's inconsistent," Winfield said of the Yankees' sputtering start. "We just haven't gotten untracked on offense or defense and our pitching hasn't been up to snuff."

It was Thursday night. Dave Righetti, who has two of the Yankees' three victories and none of the losses, scattered three runs and seven hits and fanned seven batters before George Frazier took over with two outs in the seventh and picked up the save.

"We played aggressively," said Winfield. We took it to them. And Righetti was right. He pitched good again. He pitched seven strong innings. And when we're ahead late in the game, we're in good shape."

"It's early, but it's good to get a game like that," said Righetti. "We needed the win."

American League Roundup

White Sox 12, Orioles 11

The temperature was near freezing, the wind was howling, rain and snow spilled down on Chicago's Comiskey Park.

"Let's face it, " said Baltimore Manager Joe Altobelli, "we're talking about a game that's supposed to be played in the summertime."

Rookie Ron Kittle, who had a three-run homer in Chicago's six-run fifth inning, hit a two-run single in the three-run eighth that finally subdued Baltimore. Kittle also had a first-inning sacrifice fly in the game, which took almost four hours to complete.

"I was glad to get the game over," he said. "I had plastic bags over my feet."

Brewers 5, Blue Jays 4

Jim Gantner's tie-breaking two-out homer in the ninth inning gave Milwaukee its victory over the Blue Jays. The Brewers pulled into the 4-4 tie with two runs in the eighth on Robin Yount's single, Cecil Cooper's triple and Ted Simmons' single.

Willie Upshaw had an inside-the-park homer for Toronto, a looper to short left that skipped past diving Ben Oglivie.

A's 5, Mariners 3

Wayne Gross' two-run homer and RBI single carried Oakland to its fifth victory in the past six games.

Gross' first-inning homer came after Bill Almon, who had singled, was safe with a stolen base when shortstop Todd Cruz dropped the throw. His infield single drove in the first of three runs in the third inning. Chris Codiroli was the winner with relief from Dave Beard, who gave up Ken Phelps' homer.

Elway sends message to Houston, Baltimore

NEW YORK (AP) — John Elway's agent has informed the Baltimore Colts and Houston Oilers that if they draft the Stanford quarterback, he would be inclined to pursue a career in baseball.

The New York Times reported in its Friday editions that Elway's agent, Melvin Demoff, told the Colts and Oilers — who have the first two picks in the National Football League draft — that Elway wants to play for an NFL team on the West Coast.

"John has an extremely strong preference to play in California or at least on the West Coast," the Times quoted Demoff as saying. "I have a strong feeling that if John finds his football alternative unreasonable or unacceptable, he would be more than willing to play baseball."

Elway, considered one of the top quarterback prospects in a decade, is almost certain to be the first pick in the draft, which will take place in New York April 26.

If the Colts don't take Elway, they would be likely to trade the pick for a combination of players and draft choices. One possible prospect would be the San Diego Chargers, whose quarterback Dan Fouts, a free agent, has been seeking a million-dollar contract.

Demoff said he believes that if Baltimore trades its choice to a team Elway prefers, he would have little difficulty negotiating a contract. He said reports that Elway would seek $7 million over five years were "about right."

Elway is also considered an excellent baseball prospect. An outfielder, he played last year in the New York Yankees' farm system on a one-year contract paying him $140,000. He hit .318 for Oneonta of the Class A New York-Penn League.

Court 'raids' NFL for $49.5 million

LOS ANGELES (AP) — As the Raiders and Los Angeles Coliseum Commission celebrated a $49.5 million damage judgment against the National Football League, a judge denied a separate attempt to halt the deal that brought the team from Oakland.

The Raiders and Coliseum got their seeond victory in two days when two Los Angeles area taxpayers sued Thursday to invalidate the pact that brought the Raiders from Oakland, but failed to get an immediate injunction.

Attorney Dana Cole and John Shur of Marina del Rey, claimed in their suit that the $6.7 million the Raiders are to get in rent credits and other payments in their first four years of tenancy is an illegal gift of public funds.

They asked Superior Court Judge John L. Cole to issue a preliminary injunction prohibiting any further payments and occupancy by the Raiders in the Coliseum until the issue can be tried.

But Cole said that nothing warranted an immediate injunction, although he declined to dismiss the suit.

AP Laserphoto

Los Angeles Raiders owner Al Davis puts on his $11.5 million dollar smile as he talks to reporters outside the courthouse.

"The court cannnot, either now or at trial herein, determine whether it is wise or proper for the Coliseum Commission to contract with the Raiders. That is not a matter for judicial determination," Cole said.

"It is highly unlikely that plaintiffs will prevail in this action. There is no reasonable probability of injury to support the issuance of an injunction."

Attorneys for the Coliseum and the Raiders had asked Cole to throw out the suit on the ground that the commission had acted properly and legally.

Last Dec. 9, William Robertson, leader of the Coliseum Commission negotiating team that reached agreement with the Raiders last July, said that the $6.7 million in payments to the Raiders was not really the loan it was said to be and would never be fully repaid. He explained that it was called a loan "only for tax purposes" for Raiders' managing general partner Al Davis.

While Thursday's court action was taking place, the NFL said in a statement that it would appeal Wednesday's jury award in the antitrust suit as well as the initial verdict that the league had violated federal law in holding up the Raiders' move.

"In attempting to require the Raiders to remain in Oakland, the member clubs were adhering to a long-standing NFL policy favoring franchise stability," said a statement from the NFL.

"The league will appeal the jury's verdict on damages, as it has already appealed the earlier jury trial decision."

Jim Murray

Marfa is no California phony

The Los Angeles Times-
Washington Post News Service

California has a king-size inferiority complex when it comes to Eastern-classic thoroughbred horse racing. Cal-breds have won only four Kentucky Derbies and no Preaknesses or Belmonts in the more than 100 years those stakes have been run.

In the 45 years of the Santa Anita Derby, only six of its winners have gone on to win the Kentucky Derby and only one has won the Triple Crown.

What has probably happened is that we've been sending the wrong kind of characters back there: horses that confirmed the East's worst feelings about California racing, nice, polite, well-bred, mannerly horses, little gentlemen all, the kind that would use the right spoon, go to the right schools, get up to let a lady sit down on a bus, never spit on the sidewalk.

I mean, they were the make-believe kind of horses, part-Disney, part-donkey, over-publicized glamour types. Hollywood-and-Vine horses owned by movie moguls, pampered refugees from cowboy movies. In short, phonies.

"Next you'll be telling me they can talk," sneered the hardboots. If these horses were human they'd be wearing gold chians, loafers without socks, shirts open to the waist, dark glasses and be telling you about their last picture.

The Eastern writers were properly derisive. "Nice little California sprinter," they would sneer about the state's latest entrant. "Another Midnight Cowboy from the land of the downhill tracks." A writer would say of a track-searing performance elsewhere that it was really a record "unless you count times taken in California." And so on. Humiliating.

Well, now, a Hollywood trainer who parts his name in the middle like any self-respecting movie figure, D. Wayne Lukas, who has an astonishing record of getting California horses ready for the Triple Crown classics in his few years around the West coast barns, has revised the script. He is getting a horse ready who is about as gentlemanly and courtly as Huntz Hall or Erich Von Stroheim. In a picture, he'd play a Nazi. If he was human, he'd be mugging people in Central Park, drowning cats. He makes a Cagney character look like a mama's boy, Bogie look like a sentimental slob.

He's named after a rough, tough Texas town – Marfa – but some think that's too polite for him, that he should be named "Saturday Night in Milano Junction." Or "Badwater."

Marfa's a bully, is what he is. Lukas has a great deal of trouble convincing him that what goes on at the track is a race, not a brawl. Marfa thinks it's a tag-team match. He's there to break legs, not win derbies. He'd make a great linebacker. In hockey, he'd be the enforcer.

He'd rather eat the competition than beat it. That horse alongside just looks like a trayful of filet mignons to Marfa. He takes a "no, thanks, I'll eat it here" attitude to a horse race.

Wayne Lukas is not exactly scared of him. It's just that he never knows what he's going to do next. "He thought about putting Noble Home in the lake at Latonia," Lukas says. In post parades, he "gets into personality conflicts with the lead ponies." Says Lukas: "In the stretch at Latonia, I covered my eyes. When he came to Noble Home in the lead, I didn't know what he was going to do." Mug him and strip his wallet was a distinct possibility, Lukas admits. Instead, Marfa beat him by eight lengths.

Another thing Marfa does is beat his opponents. Not fancily. His time in winning the Santa Anita Derby Sunday was the slowest in 26 years. But he intimidates his competition. They run slower, he doesn't run faster. They're afraid of what he'll do to them. His name probably should be "Mafia," not Marfa.

"He has no finesse at all," concedes Lukas. "He's not going to end up in ballet. He's a corner-bar type. A bouncer. An alley fighter. He's a biter, a kicker and he hates to be told what to do. He'd get kicked out of Harvard. He'd probably misbehave on TV, insult the Queen Mother. He's got a terrible temper. He hates horses."

In short, Marfa hardly fits the Hollywood image of Trigger, the wonder horse, or Champion or Silver, one of those kindly sound-stage steeds who would fan the fallen cowboy with his hat or rescue the leading lady from a burning barn. Marfa would probably carry her in.

He creates trouble wherever he goes. This year, to get into the Kentucky Derby, a horse must win enough money to qualify as an elite of the turf. The Derby means to keep the ribbon clerks out, to hold the field to 20 horses, no more, based on earnings. Marfa was so so-so, so inconsistent in his early races that he came up with only $28,000 or $30,000, depending on which balance sheet you read last month. Lukas shipped him to Latonia Downs to pick up some badly needed scratch. He won the race contemptuously. He had never seen such a collection of glass jaws in his life.

But the defeated horses were so resentful of this no-goodnick, this lowlife who beat them, that they complained that he didn't belong in the race, which, like the Derby, was restricted to the top 12 money earners among the entrants.

As a matter of fact, Marfa didn't belong in the race. Not for the reasons they cited. It was like Man o' War in a claimer, as it turned out.

But Marfa comes off as an operator of a sting, like a guy who sits in on a no-limit game with an ace strapped to his sleeve and stage money.

West coast horses have never had reputations as hustlers before. They always seemed more the product of makeup, of press agentry, rhinestone horses but not ever dudes who might be known as "Slick."

Louisville has never seen a rough rider like this one come from the Coast. This is no easy rider, no laid-back "Let's have lunch" character. This guy will fit right in with the drifters in the rooming houses along the Ohio. As a matter of fact, he might pick your pocket. Just don't get in any card games with him. And, above all, don't go down any dark alleys with him. He's the kind of guy who might carry piano wire.

Garvey plays numbers game

By The Assoiated Press

The numbers tell the story for Steve Garvey, but not for Ruppert Jones.

Garvey, playing in his 1,116th consecutive game, one shy of the National League record, doubled home the Padres' winning run in the fifth inning as San Diego toppled the San Francisco Giants 6-4 Thursday.

Jones' consecutive-game streak doesn't come close. But the Padres' All-Star center fielder, who was batting an anemic .156 entering the game, slammed a three-run homer in the victory.

"I really feel good, better than everything indicates," said Jones, who hit .324 in April last year. "I'm not worried about the slow start. I've been hitting the ball well. I'm just not finding the hole."

Jones' smash off rookie right-hander Andy McGaffigan snapped a 2-2 tie in the fourth inning.

"The ballpark is so big, I didn't know it would go that far," he said of his first homer of the year.

McGaffigan, making his first major league start, also was touched for a two-run homer by Terry Kennedy, a two-run shot in the first inning.

"He looked all right," Giants Manager Frank Robinson said of McGaffigan, who gave up seven hits and six runs in 41-3 innings. "If it hadn't been for two big hits, he would still be in the game."

Former Giant John Montefusco, 1-0, went six innings and was touched for six hits, all singles.

National League Roundup

Expos 4, Cubs 3

Tim Raines tripled home two runs and Scott Sanderson tossed seven-hit ball over seven innings as Montreal stopped Chicago.

Andre Dawson also homered for the Expos, his first of the season, a solo blast into the left field seats in the fifth.

Pitcher Dan Schatzeder, who came on for winner Scott Sanderson, 2-0, to start the eighth, was struck on the right arm by Jerry Morales, the first batter he faced.

"It hit my index finger first and tore the nail back a bit," Schatzeder said. "Then it went up and struck my arm. It left my finger numb. We'll just have to see how it feels tomorrow."

Cards 7, Mets 1

St. Louis chased Mike Torrez with a seven-run first inning highlighted by David Green's two-run triple as the Cardinals won their fourth in a row and the Mets dropped their fourth straight. Torrez lasted only two-thirds of an inning and gave up six hits.

Bob Forsch pitched a four-hitter for the Cards, losing his shutout on Hubie Brooks' fifth-inning homer. Forsch also had an RBI double in the big first inning, as did Darrell Porter.

NFL no haven for free agents

By BRUCE LOWITT
AP Sports Writer

There hasn't been a rush by National Football league teams to take advantage of loosened free-agency compensation and the chief lawyer for the players union calls the inactivity "a conspiracy of silence."

The deadline for teams to make proposals to the 252 players who became free agents following the truncated 1982 season is today.

Of those 252, 23 have been signed by their present teams, seven have retired and 13 have jumped to the United States Football League — leaving 209 unaccounted for, including San Diego quarterback Dan Fouts (who was to have talked to the USFL earlier this week but was a no-show) and wide receivers Harold Carmichael of Philadelphia and John Stallworth of Pittsburgh.

"The activity in the past has come in the last couple of days," said Dick Berthelsen, legal counsel for the NFL Players Association. "To get the total picture, you have got to wait until after the deadline."

There has been some activity, Berthelsen said, "but in effect, it's a conspiracy of silence. They don't bid. They want to leave well enough alone."

The new contract also allows free agents to sign for more money but still generate the same draft choices as they did previously.

Kentucky's Hall told to play ball

By The Associated Press

LEXINGTON, Ky. — Overseers of the **University of Kentucky** Athletics program, in a resolution passed Thursday, ordered Coach **Joe B. Hall** and Athletics Director Cliff Hagan to negotiate terms of a basketball game with the University of Louisville.

Hall lobbied against the resolution at the beginning of the meeting saying a rivalry with Louisville or any other state school would erode the "border-to-border support" the UK program enjoys, Hall said...

Sports in Court

LOUISVILLE, Ky. — A federal jury has convicted two men of conspiring to violate federal anti-racketeering laws in a thoroughbred race-fixing scheme. The jury found **Oacus Donald Oakes** of Indianapolis and **Donald Eugene Bowers**, a trainer who at the time of the indictment was under suspension by Louisianna's Jefferson Downs stewards, guilty of the scheme that included the attempted substitution of a "ringer" at Churchill Downs in June, 1981...

COLUMBUS, Ohio — Lawyers for four men charged with gambling in a case involving **Baltimore Colts** quarterback **Art Schlichter** say they don't plan to ask that the case be moved from Ohio, where Schlichter made his reputation as a candid farm boy with extraordinary athletic abilities.

The four men, Samuel R. Alascia of Catonsville, Md., and Joseph A. Serio, Charles T. Swift and Harold E. Brooks Jr., all of Baltimore are accused in a federal grand jury indictment of crossing state lines to promote gambling, pleaded innocent Wednesday in U.S. District Court. Judge John Hoischuh set a trial date of June 6...

Baseball

NEW YORK — Spring training attendance reached an all-time high of 1,463,345 this year, major league baseball said, setting a record for the third straight year.

According to figures compiled by the commissioner's office, 1983's total exhibition attendance surpassed last year's by 34,597. The record was set despite a wet Florida spring, which limited the number of Grapefruit League games to 335, 38 fewer than in 1981 and the same as in 1982...

Auto Racing

LE CASTELLET, France - **Alan Jones** of Australian a former world driving champion, will not compete in Sunday's French Grand Prix auto race because the Arrows team has not found sufficient sponsorship.

Arrows Managing Director Jack Oliver said, "At present we are unable to pay Alan the fee which a driver of his ability can command."...

Sonora softball

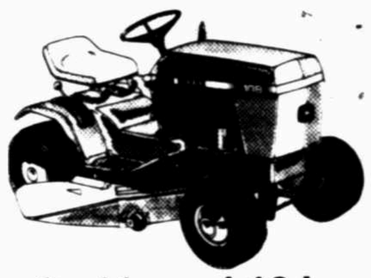

SONORA — The Sonora Mens Softball Association is sponsoring an American Softball Association sanctioned softball tournament April 29 through May 1.

The double elimination tournament is for division II and under teams and carries an entry fee of $80 per team, limted to the first 16 teams. Deadline for entry April 25th.

For more information call Virgil Burge 387-5397 or Lynn Bolton 387-2307.

Boston wants garbage fuel plant

BOSTON (AP) — The city of Boston is looking for a new kind of garbage collector — a private developer willing to build a plant for making energy from 600 tons of garbage tossed out every day.

The plant would cost at least $150 million, and Public Works Commissioner Jospeh A. Casazza said it would represent the biggest contract ever awarded by the city.

Mayor Kevin H. White announced Thursday that the city will receive proposals from developers.

Hosing it down

Midland Fire Department Captain Frank Merritt uses a garden hose Thursday afternoon to spray the charred remains of a mobile home after fire destroyed the trailer, located on County Road 1130 about a half mile north of U.S. Highway 80. The trailer, owned by Armond Bunch, caught fire about 2:40 p.m. when bacon frying on the stove ignited a nearby rag, according to Fire Department reports. When Bunch's teen-age daughter attempted to beat the flames with magazines, the fire spread and eventually destroyed the trailer, along with a truck and a car.

Jury to begin deliberations in capital murder retrial

By RICHARD ORR
Staff Writer

Jury deliberations were to get under way today in the capital murder retrial of Clarence Allen Lackey, accused in the July 31, 1977, abduction, rape and slaying of Toni Diane Kumpf.

The six-man, six-woman jury will be asked to decide if Lackey should die for allegedly killing and raping the 23-year-Texas Tech secretary who was kidnapped from her Lubbock apartment about dawn that Sunday morning. Her partially clad body was found about three hours later in a cotton field, her throat slashed from ear-to-ear.

During three days of testimony in the case, Lubbock County District Attorney Jim Bob Darnell tightened a thick web of circumstantial evidence around the 28-year-old former construction worker whose 1978 conviction and death sentence in San Angelo was set aside by an appeals court on a technicality in the jury selection process.

Thursday, Department of Public Safety chemist Jack Benton testified that blood found on Lackey's boots and in his apartment matched Ms. Kumpf's, but although there was evidence she had had "sexual contact" the day of her death, a definite time factor could not be established.

The state contends Lackey kidnapped Ms. Kumpf and raped her in his apartment before murdering her and dumping her body in the field, which is located about two miles from where he lived. The door to her apartment had been kicked in and police said they found evidence of a struggle inside.

Heelprints on the door coincided with the pattern on Lackey's boots, and fingerprints on a package of Marlboro cigarettes found in her apartment matched those of Lackey, according to other testimony.

"There is no way this fingerprint could have been made by anyone but Clarence Lackey," said FBI-trained fingerprint expert Claude Stevens, who acknowledged the somewhat smeared print obtained from the cigarette package was "difficult to identify."

A knife recovered from Lackey's apartment was not allowed into evidence after Lackey's court-appointed defense team of three lawyers objected to its admission on grounds the Aug. 3, 1977, indictment by a Lubbock County grand jury did not specify what type of weapon had been used in the slaying. The indictment only referred to a "sharp instrument," according to testimony by grand jury foreman and Lubbock real estate salesman B.C. McMin.

(See JURY, Page 2C)

This file photo of Clarence Allen Lackey, right, was taken in 1978 as he was leaving a San Angelo courtroom. He was convicted of the capital murder charge then, but is being retried in Midland after an appeals court overturned the conviction on a technicality involving jury selection.

Toni Diane Kumpf, the 23-year-old Texas Tech secretary who was murdered in Lubbock in July 1977. Clarence Allen Lackey is being retried on the capital murder charge in Midland's 238th District Court.

TP&WD to help desert bighorns regain foothold

By PATRICK DEAREN
Staff Writer

VAN HORN — Desert bighorn sheep breeding stock will be added to Sierra Diablo Wildlife Management Area north of here in June by Texas Parks and Wildlife Department in the hope the animals will get a firm foothold on the craggy slopes of Trans-Pecos mountains.

The sheep will be acquired from Nevada and will be kept in newly constructed breeding pens, according to Jack S. Kilpatric of Marfa, wildlife biologist with TP&WD.

The wildlife management area is composed of 7,000 acres, though free-ranging desert bighorns have access to more than 200 square miles of mountains.

"We're trying to give the sheep that are roaming up there already a shot in the arm so that added production doesn't matter," said Kilpatric.

Native West Texas desert bighorn became a thing of the past in 1960, when the last two ewes were sited in their final stronghold: the Sierra Diablos. They once ranged throughout the rugged mountains of the Trans-Peccs, with 1,500 estimated in existence in the early 1880s.

With the completion of a railroad through the Trans-Pecos in 1881, however, man invaded the area, marking the beginning of the end of native desert bighorn. Hunters slayed the animals, hauling the meat to Van Horn by the wagonloads to be loaded on refrigerated rail cars and shipped to northern markets. It was not until 1903 that bighorn hunting was outlawed in the state.

"We're trying to give the sheep that are roaming up there already a shot in the arm so that added production doesn't matter.

"In the Black Gap Wildlife Mangement Area, lions killed 21 bighorn sheep, forcing us to move the sheep out except for a few stragglers — maybe 10 head are left there."

However, the influx of domestic sheep is regarded as the main factor in the eventual decline of desert bighorns, according to Kilpatric. "Factors such as food competition, net wire fences, domestic diseases and parasites took a heavy toll," he noted in a paper he delivered at a desert bighorn council meeting last year in California.

In 1938 West Texas domestic sheep ranchers began to stock the final strongholds of the Trans-Pecos bighorn range. Within three years, the total bighorn population in Texas was estimated at 150 head.

That dramatic decline in bighorn population led to the establishment in 1945 of Sierra Diablo Wildlife Management Area as a sanctuary. But their numbers continued to fall. In 1955 only 25 remained in Texas — all in the Sierra Diablo. TP&WD officials sited the final pair in the Diablo Mountains Victoria Canyon five years later.

Bighorn were re-introduced in the Sierra Diablo in 1971, said Kilpatric. For two years, the breeding stock was in an eight-acre holding pen. Seven sheep were released to range free in the mountains in 1973 and seven more in 1979. They have survived thus far and have reproduced and now number about 25 head.

Kilpatric noted that mountain lions may be preying to some extent on the re-introduced bighorns.

"In the Black Gap Wildlife Mangement Area, lions killed 21 bighorn sheep, forcing us to move the sheep out exeept for a few stragglers — maybe 10 head are left there," he noted.

The only other location in Texas where desert bighorn are located is on the Chilicote Ranch in Presidio County. They were introduced at that private ranch in 1977-78 and now number 12 head.

According to Kilpatric, predation is blamed for the slow increase in bighorns at Chilicote.

TDoA listens to residents' concerns over funding

By GAIL BURKE
Staff Writer

ODESSA — Stretching public dollars over a 17-county area and supplementing public funds with private donations were among the concerns and ideas expressed by Permian Basin residents at the Texas Department on Aging (TDoA) public hearings here Thursday.

The TDoA's Citizens Advisory Council, which listened to the residents, assists the department to ensure involvement by the elderly in the state planning process by holding eight public hearings once a year. The council encourages community comments on plans and programs for the elderly.

Thursday's hearing at the Ector County Health Department attracted about 35 Permian Basin residents.

The primary concern in the wide-open spaces of West Texas is the "distance" the state dollars must be stretched to provide adequate services for 45,900 elderly persons in the 17- county area.

The TDoA has developed a plan with goals and objectives for programs funded under the Older Americans Act. This plan includes assessing the needs of the older population and developing formal, written plans, such as nutrition, social and community services.

The funding formula for these programs is based on overall population 60 and over, the minority population 60 and over and the poverty level of people 60 and over.

But, according to Bill Smith, director of the Permian Basin Agency on Aging, the formula does not consider distance in the "rural areas."

"What we've asked them (council on agency) to include is a factor for distance," Smith said. "We're not saying we need extra attention, but federal and state dollars are not coming in proportionately. There ought to be a more equitable way of distribution."

Smith told the council that transportation dollars are depleted more quickly in the Permian Basin's 17-county area than in other places where there may be only three or four counties with comparable population.

"These dollars must be spread out over 23,515 miles," Smith said.

James Roberts, a member of the TDoA and the council on aging, said this information will be given to the TDoA board.

A suggestion to supplement state dollars was presented by Allen Baca of Austin. Baca told the board that "a legal foundation would be a good vehicle to bring in more money for the elderly."

He explained that in Tulia (Swisher County) the people are in "the final stages of developing a foundation. If we're going to keep our (senior) programs going, we're going to have to increase local funding. The government dollars can't do it all.

"In Swisher County, we're utilizing community resources to build up a fund," Baca said. "If each community, city or county would formalize, legalize a foundation, people could give donations for senior activity programs.

"The Older American's Act sends seed money to start programs," he said. "When we create a legal entity, a foundation, in the community, others see and people will want to make contributions. If you don't have a legal entity, there's no place for people to donate."

The Council on Aging board said it would take Baca's "self-supporting" program suggestion to the TDoA.

According to Roberts, the nine-member TDoA board will consider all comments from the eight hearings held throughout Texas. From these hearings a preliminary plan will be be developed and then approved by the TDoA board, the governor and the legislature. Roberts said the entire process takes about eight months.

Cattle auctioneers Jack Howell, left, from Dimmitt, and John Waldrop, from Austin, conducted the Amarillo Livestock Auction on Thursday with everything there except the animals. Television screens took the place of cows; besides Amarillo, they were installed in hotels in Oklahoma City, Okla.; Jackson, Miss.; and Lake Placid, Fla., where buyers could bid by telephone.

Calves, yearlings star in Amarillo auction

AMARILLO (AP) — When the auctioneer stepped to the microphone at the Amarillo Livestock Auction and began talking away at his usual clip, the routine was familiar but the cattle were missing.

Entire lots of calves and yearlings were being placed on the sales block, bidders' hands were waving frantically and the competition was fierce.

But there wasn't a cow to be seen in the auction ring. The stars of the event appeared only on 40-inch television screens as the livestock auction conducted its first-ever video sale.

More than 40,000 cattle — 10,000 calves and 30,000 yearlings — were auctioned Thursday as buyers competed for livestock being sold for future delivery.

"We were pretty pleased with the business," said video auction director Jack Tompkins. "We ran all the cattle through, and the people at the auction seemed interested in the idea."

Special TV screens also were placed in hotels in Oklahoma City, Okla.; Jackson, Miss., and Lake Placid, Fla., where buyers also could hear the auctioneer and make their bids through a telephone link.

Jury to begin deliberations

(Continued from Page 1C)

Other testimony during the week included a contention by Lackey's former girlfriend that he admitted the slaying to her, and that a pickup truck spotted leaving the seene of her apartment was identified as belonging to the suspect.

The state rested its case at 5 p.m. Thursday. Outside of making routine objections to procedural methods, and pointing out that Lackey's blood type is shared "by 40 percent of the population" at large, the defense offered little or no resistance to the state's allegations and Lackey did not take the stand.

Lubbock District Judge Robert Wright denied a routine defense motion for an instructed verdict of innocent, and final summations were to be heard this morning before the jury commences deliberations.

DEATHS

Sidney Glenn

Services for Sidney Erwin Glenn, 54, of 2300 Boyd, were Thursday in St. Ann's Catholic Church with the Rev. Cliff Blackburn officiating. Burial was in Resthaven Memorial Park, directed by Newnie W. Ellis Funeral Home.

Glenn died Tuesday in a Midland hospital following a heart seizure.

Pallbearers were Wayne Piette, John Ketter, Robert Spears, James O'Neil, John Dawson and Doyle Butler.

Honorary pallbearers were Mark Schweinfurth, John Seay, Gene Abbott, E.J. Raskie, John Kimberly, Joe Salman, James W. Richards and Brock Appel.

Mary Scott

BIG SPRING — Services for Mrs. Walter (Mary) Scott, 44, of Big Spring, will be at 2 p.m. Saturday in Nalley-Pickle Rosewood Chapel with burial in Mount Olive Memorial Park.

Mrs. Scott died Wednesday morning in Pampa.

A resident of Big Spring most of her life, she had worked as a nurse at Big Spring State Hospital for 13 years. She was a Baptist.

Elnora Bracy

McCAMEY — Services for Elnora Bracy, 81, of California, sister of the Rev. Worthy Gilbert of Midland, will be at 10 a.m. Saturday at Hobbs Chapel Aimie in McCamey. Burial will be in Garden of Memories Cemetery in McCamey, directed by James Denis Funeral Home.

Mrs. Bracy died Monday.

She was born Jan. 11, 1902, in Bedias.

Other survivors include three sons, a daughter, a sister, two brothers, an aunt, an uncle, 38 grandchildren and 15 great-grandchildren.

John L. Sides

McCAMEY — Services for John Lewis Sides, 82, of McCamey, were Thursday at First Assembly of God Church with the Rev. Gene Russell and the Rev. Weems S. Dykes officiating. Masonic graveside services were in Resthaven Cemetery in McCamey, directed by Richard W. Box Funeral Home.

Sides died Tuesday in a McCamey hospital.

He was born Dec. 18, 1900, in Breckenridge. He married Mary Dulice Bentley Aug. 28, 1923. She died in 1974. He was a pumper for Texas Pacific Oil Co. until his retirement in 1962. He was a deacon of the First Assembly of God Church and a member of the Oil City Masonic Lodge No. 1256 of McCamey.

Survivors include a daughter, Johnnie M. Adkins of Hobbs, N.M.; a son, Lawton Sides of McCamey; three sisters, Mrs. C.E. Roudon of Fort Worth, Mrs. E.E. O'Keefe of Denver City and Mrs. Hugh Salters of Albany; a brother, O.F. Sides of Tahlequah, Okla., and three grandsons.

Anita Gonzales

BIG LAKE — Services for Anita Gonzales, 70, of Big Lake, will be at 2 p.m. Saturday in St. Ann's Catholic Church with Gilbert Rodriguez officiating. Burial will follow in Sonora Cemetery, directed by Kerbow Funeral Home.

Mrs. Gonzales died Wednesday in San Angelo.

She was born July 26, 1912, in Mexico. She moved to Sonora in 1913 and lived there until she moved to Big Lake in 1975. She married Francisco Gonzales in Sonora in 1928. He died in 1953. She was a member of the Catholic Church.

Survivors include a daughter, Frances Tijerina of Big Lake; three sons, Santiago Gonzales, Raul Gonzales and Omero Gonzales, all of Sonora; two sisters, Viviana Reyna of Mineral Wells and Rosario Ibarra of Sonora; a brother, Lazaro "Big Boy" Martinez of Sonora; 13 grandchildren and eight great-grandchildren.

Weldon L. Stell

ODESSA — Services for Weldon "Bill" L. Stell, 54, of Odessa, son of Mr. and Mrs. William Luther Stell and brother of Joy Sue Graham, all of Midland, were to be at 4 p.m. today in Hubbard-Kelly Funeral Home chapel with Dr. Clyde Childers and the Rev. Bill Cook officiating. Burial was to follow in Sunset Memorial Gardens.

Stell died Wednesday at an Odessa hospital following a lengthy illness.

He was born Feb. 7, 1929, in Memphis. He married Marilyn Davidson Nov. 4, 1955, in Mound. He was vice president of Ace Specialties and a member of the Baptist church.

Other survivors include his wife and three sons.

The family requests memorials be directed to Weldon L. Stell Memorial Fund at InterFirst Bank for local cancer treatment.

Senators approve bill to finance public schools

AUSTIN (AP) — Senators have approved a bill that educational officials have assured will finance public schools but avoid local property tax increases.

Lt. Gov. Bill Hobby said Thursday the bill would give local districts more control over expenses and would offer property tax relief.

The measure was the Senate's response to a House committee vote Wednesday night holding the line on salaries for schoolteachers during 1984-85.

One senator said the 30-0 vote on the Senate measure was "on faith" that the Texas Education Agency was correct in its claims of what the bill would do.

Hobby said the bill was worked out by all major Texas educational organizations and would retain automatic teacher pay raises in current law, totaling 9 percent — or $923 million — over the next two years.

The measure would funnel more state aid to poorer school districts, Hobby said.

The bill also would provide that no district would receive less state aid than it is currently receiving.

"The most important concept" of the bill, Hobby said, would be the creation of an Education Excellence Fund, built on state tax money appropriated by the Legislature. This would be in addition to the Foundation School Program, which provides state aid to districts.

All districts would share in the excellence fund, with 35 percent going for "any legal purpose" and 65 percent for increases in salaries for classroom teachers and other school personnel.

Minimum salaries for teacher aides, secretaries and administrators, as well as teachers, would go up 1 percent a year for each $150 million appropriated by the Legislature.

Heckler: Department to depend on 'word of mouth' to fight abuse

HOUSTON (AP) — The Department of Health and Human Services will rely on "word of mouth" to change American attitudes about alcoholism, the secretary of the agency says.

Margaret Heckler said at the opening session of the National Council on Alcoholism's annual conference Thursday that the government plans no major push toward solving alcohol abuse, which was called the worst health problem facing the country.

"What the government says is one thing, but what the captain of the high school football team says is another, especially if that team has had a winning season," Ms. Heckler told reporters after her address to the conference.

Children's Fair set for Saturday at Dennis the Menace Park, city gym

Parks and Recreation Department and the West Texas Association for the Education of the Young Child are sponsoring a Children's Fair Saturday from 10 a.m. to 1 p.m. at Dennis the Menace Park and city gymnasium, 300 Baldwin St.

Purpose of the fair, free and open to the public, is to increase public awareness of the type of activities that help young children grow and learn and also to provide an enjoyable and fun experience.

The fire department is providing a truck for children to examine and climb on. Other activities include carnival games, make-up, nutritious refreshments, dress-up, story hour, art, water play, music, parachute play and other games.

Parents are encouraged to take part in the activities with their children. Any organization or club that has literature concerning children is invited to display this at the fair.

For further information call the Parks and Recreation Department, 683-4281, extension 316.

Seismographic vessel still grounded

PORT MANSFIELD (AP) — A seismographic vessel remained grounded on rocks at a jetty today after a collision during heavy seas that forced the evacuation of 20 crewmen, officials say.

"I don't know what's going to happen to it," said U.S. Coast Guard Seaman Louis Ruiz at the Port Isabel search and rescue station.

A dispatcher for the Willacy County sheriff's office said the boat, owned by Western Geophysical Co., was resting on its side near the jetty.

Company officials toured the site earlier, but had not determined the extent of damage to the vessel, the Coast Guard said.

The Houston-based Western Gulf smashed into the jetty near this Gulf Coast community in stormy seas Thursday while exploring for oil and gas deposits off Padre Island, officials said.

Pounded by 12-foot seas, the 100-foot-long craft sent out a distress signal just before 8 a.m. as it was forced sideways onto rocks, the Coast Guard said.

There were no injuries, officials said.

A helicopter from the Coast Guard station in Corpus Christi aided in a rescue of two crew members. The others escaped by climbing a rope stretched precariously between the crippled boat and the jetty, officials said.
