

Zoning Discussed By Texico Council

Ways and means of zoning the town were discussed by members of Texico town council when they met in regular session Friday night. Bob Lebow was appointed as chairman of a committee to look into ways to accomplish zoning the town. Others on the committee are Harry Patton, attorney and Gayle Doolittle.

Citizens of Texico are reminded of the ordinance covering the disposal of garbage and trash. They are reminded that all trash must be put into barrels in the alleyways in order that it may be picked up at regular intervals by the men who handle this service. Garbage should be wrapped before it is placed in the barrel. The council reminds citizens that an effort will be made to enforce this particular ordinance beginning immediately and all persons not complying with the ordinance will be reported at once.

The police magistrate report for the month of April was approved as were all bills for the month.

One building permit was issued with the permit going to J. D. Hammitt to add a room to his house, for an approximate cost of \$500.

Requisition forms for purchasing equipment for the city police car were approved. Several additional items were discussed and tabled until a later date.

All commissioners and the mayor were in attendance at the meeting.

FARWELL, TEXAS

THE STATE LINE TRIBUNE

"OFFICIAL PUBLICATION OF PARMER COUNTY"

10 PAGES

FIFTY - THIRD YEAR

10 CENTS

Top Students Listed By Texico

Names of top students in the Texico school were released by high school principal, James Pierce late last week. They are Wayne Hudnall, valedictorian and Gary Farmer, salutatorian.

Wayne, the son of Rev. and

Mrs. Harvey Hudnall has a grade average of 10.1 or A- for a four year period and Gary, son of Mr. and Mrs. E. L. (Ed) Farmer has a grade average of 9.98 or slightly less than A- for the same period. Jackie Hughes is third high

student with an average of 9.92 or B plus for a seven semester period.

Wayne has been an honor student for the past four years making the honor roll consistently. He is a member of the Texico chapter of the National Honor Society, has served as president of the student body, and as president of the eastern district of New Mexico student bodies. He has also been active in all sports, participating in basketball, softball, and track. He is also a member of the school's science club and FBLA (Future Business Leaders of America). He plans to attend college but has not made a definite decision on which school and has not chosen a major.

Gary has also been an honor student and is also a member of the Texico chapter of National Honor Society. He is an Eagle Scout, has served as a member of the civil air patrol and works at a local TV repair shop in the afternoons. He

was recently selected to represent New Mexico and the Texico school as "Mr. FBLA" at the national contest in Washington, D. C. later this summer.

WAYNE HUDNALL

GARY FARMER

Jane Bradshaw-Sherri Austin Phipps Valedictorian-Salutatorian In Farwell

Jane Ann Bradshaw, daughter of Mr. and Mrs. L. H. (Buck) Bradshaw with a grade average of 95.937 has been named valedictorian of the Farwell high school graduating

class. Salutatorian with an average of 91.866 is Sherri Austin Phipps, daughter of Mr. and Mrs. Partin Austin. She is closely followed by Janice Prince, daughter of Mr. and

Mrs. W. D. Prince with an average of 90.086.

Miss Bradshaw was recently named as DAR Good Citizen in the Farwell school, and has been class favorite for the past four years. She also won the honor medal and served as secretary of the student council, Future homemakers, pep club and the annual staff. She won first in the typing and ready writing contests in the Interscholastic League meet. Last year she was chosen as alternate to girls' state and attended the conventions for student council

and FHA. She also is winner of the Crisco award and has served as a class officer each year.

Future plans call for marriage in June and possible training in the business field.

SHERRI PHIPPS

Parmer County Has New Agricultural Agent

Joe Van Zandt 28, a native of Wheeler County, Texas and a 1959 graduate of Texas A & M will assume duties as county agent in Parmer County on May 21, according to County Judge Loyde Brewer.

Van Zandt will replace former county agricultural agent, Deryl Coker who resigned the position on April 1 to return to his ranch in Oklahoma. He is married to the former, Betty Dickerson, a native of Grey County. They have two daughters four and one.

Van Zandt comes to Parmer County highly recommended by district officials of the extension service. In college he was chairman of the state 4-H club council, and served as a member of the A & M Livestock judging team. Following graduation he was assistant agent in Travis County before being assigned to Live Oak County as agricultural agent. He has been making his

home in George West, Texas, since receiving the assignment in Live Oak County. He expects to move his family to Farwell in the near future.

Van Zandt will act as an ad-

visor to area farmers in his new assignment and will assist with county 4-H clubs. He was hired by the commissioners court in a special session held on April 24.

Texico mayor E. L. (Ed) Farmer and Firechief, C. H. Webb shown standing by the latest purchase of the Texico fire department, a 1964 Ford truck fully equipped, reflect on the town's good fortune in having the truck added to its fire fighting equipment. The new truck arrived Saturday. The truck which was traded in on the purchase was bought by Farwell bringing the Twin Cities fire fighting equipment to four trucks and an emergency unit.

Scout Workers Attend Banquet

Ten adult workers for Cubs and Boy Scouts in Texico-Farwell were in Clovis Thursday evening to attend the El Llano Grande district recognition dinner at Hotel Clovis.

New district officers were installed, and Dr. T. J. Glenn will serve as advancement chairman. Others than Dr. and Mrs. Glenn, others attending the meeting were Scoutmaster and Mrs. Ray Campbell and Assistant Scoutmaster and Mrs. Lee Hutchins. Those from Cub Pack 201 attending the meeting were: Mr. and Mrs. Charles Steele, Mrs. W. H. Graham and Miss Alcidine Bradley. Mrs. Campbell is also a Cub Scout den mother.

Mrs. Emery Artman of Clovis was honored for 25 years service as a den mother and leader, and other awards were presented during the evening. Mark Geeslin, county agent of Kent County, Texas dis-

cussed "Life's Dividends" and traced the stages of a boy's growth, as he explained "A man is the image of his boyhood." He discussed the theory that young people have more critics than models and that the foundation of America is family life, as he challenged his audience to "collect some of life's dividends."

Pvt. Epperson Killed In Germany, Services Pending

Word was received in Texico Tuesday of the death of Pvt. 1st Class Jimmy Epperson, son in law of Mrs. Allie Burris. Pvt. Epperson was killed in an accident at Badtolz, Germany where he was stationed with the army. Burial will be in Texico with funeral arrangements pending at Steed Funeral Home. Survivors include his wife,

Wanda Rae, Badtolz, Germany his parents, Mr. and Mrs. James Epperson, Newport News, Va., his mother in law, Mrs. Burris, two sisters-in-law and one brother-in-law.

Mr. and Mrs. Joe McGregor Clovis and Mr. and Mrs. Fred Barker Jr., Friona visited in the Fred Barker home Sunday.

County Returns Resemble State's

Moseley, Welch Elected

In a turn-out not much better than fair for a presidential election year, Parmer County voters Saturday settled down to the comfortable grooves of state returns with very few exceptions.

Lack of hot local campaigns probably kept the vote from setting a record. The only county-side races featured the one for assessor-collector which saw Hugh Moseley of Far-

well elected to a full term, and the re-election of Nelson Welch of Friona as county Democratic chairman.

Parmer County Democrats gave big endorsements to Gov. Connally and Lt. Gov. Preston Smith, as dopesters had calculated, but had more trouble deciding on the U. S. senate race. They picked Yarborough over McLendon when the smoke finally settled.

In the full stable for congressman - at - large they returned Joe Pool to Washington, and kept John White as commissioner of agriculture. Farm Bureau-backed Millard Shivers was scarcely in the running.

Jerry Sadler seems to suit the local voters for land commissioner as Parmer County gave him a big edge, but appointee Jim Langdon didn't find the popularity here he found elsewhere in the state, as Parmer County went with Jesse Owens.

Local residents selected Sears McGee over Jack Pope for the state supreme court, and stayed with Ernest Northcutt for the court of civil appeals. Herbert Martin was elected, however.

Dolph Moten, Bovina editor, made a strong challenge to Welch for county Democratic leadership. The race was interesting as it drew lines through the precincts between proponents of liberal versus conservative policies in the party.

Moten ran strong in his own bailiwick but did Welch and the large Friona vote tipped the scales. Besides Bovina, Moten carried Lazbuddie and Oklahoma Lane, but his cause there was hindered by a disproportionate Republican vote brought out by Frank Hinkson's candidacy for U. S. congressman.

In complete but unofficial returns (SEE GRAPH FOR BOX TOTALS), the GOP polled 176 votes in the county--easily a new record. Much of this was attributable to Hinkson's try for nomination.

The Lazbuddie farmer-stockman got 100% endorsements in his own and Oklahoma Lane's precincts, but the vote across the huge 18th congressional district did him in and the nomination went to Bob Price of Pampa.

Parmer County Republicans appear united behind Goldwater, according to the preferential poll on their ballot. Lodge drew five write-ins from the county. They also are rigidly opposed to the civil rights legislation now pending in congress.

In Pct. 1 (Black) Pete Braxton was re-elected Democratic chairman with 9 write-in votes. Bill Carthel got 4. No precinct convention was held. Voting: 58.

In Pct. 2 (Friona) O. J. Beene was elected Democratic chairman. Delegates to the county convention are Frank Spring, Dan Ethridge, Hollis Horton, Nelson Welch, Bill Sheehan, O. J. Beene, Earl Chester, Jay Claborn, John Blackburn, Steve Messenger, and H. K. Kendrick. Bill Morgan drew six write-in votes for county sheriff. (Charles Lovelace was unopposed on the ballot.) Voting: 528.

In Pct. 3, (Bovina) Dolph Moten was re-elected Democratic chairman by write-in. Delegates to the county convention are Bob Wilson, Durwood Bell, Norvell Strawn, Mario Trevino, Johnie Horn, Wendell Garner, Travis Dyer, and Moten. Voting: 308.

In Pct. 4 (Farwell) Blackie Smith was elected chairman. Delegates are Ruth Berggren, Jeanne Graham, Sam Aldridge, Hazel Gast, Carrie Anderson, and Bob Anderson. At the precinct convention, the delegates agreed to vote by unit rule at the county convention. Guy Cox was unopposed as commissioner, but some write-in votes were recorded for other men. Dick Doshier drew 7, Floyd Embury 6 and Curtis Birchfield 2. Voting: 328.

In Pct. 5 (Lazbuddie), Wyle Bullock was returned as Demo chairman over 2 votes for Bill Brown by write-in. Delegates are Mrs. Wyle Bullock, Albert Fuller, Mrs. C. C. Matthews Jr., Don Shuman, and Joe Bullock. Voting: 121.

In Pct. 6 (Oklahoma Lane) Wendol Christian was elected chairman and the delegates included him, Jack Roach, and Harold Carpenter. Write-in votes for commissioner post included 10 for C. C. Christian, 2 for Walter Kaltwasser, and one each for Owen Patton and Dick Doshier. Voting: 96.

In Pct. 7 (Rhea) Raymond Schueler was retained as chairman. Delegate from Rhea is Cordie Potts. Voting: 36.

In Pct. 8 (Lakeview) Otho Whitefield was kept as chairman. No delegates were named. Voting: 43.

Wolverine Variety Show Scheduled

Wolverine Variety Show, an annual presentation of Texico High School is scheduled for Tuesday May 12, 8 p.m. in the high school auditorium. Mrs. Lillian Allman, journalism instructor and home economics teacher, is in charge of the production which will be MC'd by Donald Chandler and Ellen Callouet, co-editors of the

school annual "The Wolverine." Price of admission is 50¢ for adults and 25¢ for students regardless of classification.

Highlighting the variety show will be the presentation of "Most Beautiful Girl," and "Most Handsome Boy." They will be chosen from candidates listed by the various clubs and organizations in the school. Representatives of the various clubs are: FHA - Cynthia Spence-Allan Hill; band - Pamela Roberts-Joe Patterson; chorus - Susan White-Gary Farmer; science - Peggy Hughes-Terry Niece; FFA - Linda Campbell-Gary Skaggs; FBIA - Linda Hudson-Donald Chandler; student council - Veda Wilson-Tom Rickstrew; honor society - Kathy White and Mike Spearman.

Members of the first year journalism class will present a choral reading "Fat Wife," and second year journalism students will present a skit "Fun in the Country." Donald Chandler and Kay Bush will join in singing a duet "They Call the Wind Maria." Kay Bush will present a reading "I'm Looking for a Feller," and Ellen Callouet and Marquitta Wall will present a skit "Aunt Amanda's First Basketball Game."

The speech classes will join in presenting John Mansfield's "The West Wind," as finale of the evening.

Annuals will be distributed at close of the evening.

All's Quiet

All's quiet in Parmer County reports from the sheriff's office indicate--with the only criminal acts reported in recent weeks those of break ins of the petty type with nothing of importance reported stolen, according to Sheriff Charlie Lovelace.

Thank You

I want to take this opportunity to thank everyone from the bottom of my heart who worked and supported me for tax assessor-collector of Parmer County in the May 2 primary.

Leona Moss

Commissioners Work On Right Of Way

Parmer County Commissioners last week devoted almost the full meeting day to working out right of way for Farm to Market road 2013 in the Rhea community.

Settlement was reached with two people from whom right of way had been secured for the proposed road and they were paid for their land.

All other business transacted during the day was routine, says Judge Loyde Brewer.

STUDENTS --

(Continued from page 1)

Sherri has been an honor student for the past four years, has served as a cheerleader, is a member of the Farwell chapter of national honor society, has been a member of student council, FTA (Future Teachers Association), FHA (Future Homemakers of America) and was recently married to Glenn Dell Phipps.

TEXICO --

(Continued from page 1)

He plans to attend college but has not chosen a school at this time, however he will major in electrical engineering.

Both of the top students recently received math and science scholarships from ENMU at the annual scholarship day.

TO THE VOTERS OF PARMER COUNTY---

It is with heartfelt appreciation that I thank the citizens of Parmer County for the endorsement given my candidacy in the Democratic Primary last Saturday.

The confidence you have demonstrated in me by returning me to office without opposition is regarded as an implacable trust of public service.

I pledge to do my utmost throughout the elected term to merit this endorsement.

Mothers' Day Cards To Be Sent

Cammy Sue Henson, daughter of Rev. and Mrs. Jerry C. Henson who will be celebrating her first birthday May 23, is shown looking over the assortment of eight Mother's Day cards she will be sending this year. Her mother, her grandmothers, all her great-grandmothers and one great-great-grandmother are living. A grandmother, Mrs. Clay Henson and a great-grandmother, Mrs. Dora Johnson, live in Farwell. Cammy Sue lives with her parents, in Ft. Worth where her father is a student at Southwestern Theological Seminary.

Her maternal grandmother, Mrs. E. B. Reed, lives in El Paso. Great-grandmothers include Mrs. G. W. Henson, Brownfield, Mrs. W. L. Deal, El Paso and Mrs. J. G. Poovey, Granite Falls, N.C. Her living great-great-grandmother is Mrs. Sid Sharp, Donna. Cammy will spend her birthday in Farwell after attending the graduation of her uncle, Ronny Henson, from Farwell High School.

CAMMY SUE HENSON

Shower Honors Brice-Elect

Janice Prince, bride-elect of Tommy Williams was honoree for a miscellaneous shower Saturday afternoon, in the parlor at Hamlin Memorial Methodist church. Hostesses for the affair were: Mmes. Hardin Reed, Bob Anderson, Bill Moss, Oscar Hubbell, L. R. Vincent, John McFarland, L. H. Bradshaw, Darrell Norton, Prentice Mills and Bill Strain.

The honoree was presented with a corsage of white and yellow flowers. Mother of the honoree Mrs. Bill Prince and her fiancée's mother Mrs. Jack Williams were presented with white carnation corsages. They assisted the honoree with opening gifts.

Guests were registered in the bride's book by Vicki Moss.

Jane Ann Bradshaw and Jane Hubbell presided at the serving table which was laid with a white linen cloth and centered with an arrangement of yellow and white snapdragons and daisies in an epergne on which a cupid was resting. Flanking the floral arrangement were tall yellow tapers. Yellow napkins inscribed with the names "Janice and Tommy" in silver completed table decor. Crystal and silver appointments were used.

Attending and sending gifts in addition to those previously mentioned were: Mmes. Lee Meeks, John Lovelace, Hugh Moseley, M. A. Snider, Sr., Claude Coffey, Joe Helton,

Valeria Meier ENMU "Woman of Year"

Valeria Meier, and Eastern New Mexico University senior from Texico was named "Woman of the Year" at a breakfast for Associated Women Students in Portales, Sunday morning. Miss Joanna Black, instructor in English was named "Faculty Woman of the Year."

Miss Meier, daughter of Mr. and Mrs. Frank Meier, Pleasant Hill is a 1960 graduate of Texico High school. She has had an active four years at the university, where she has been a member of Zeta Tau Alpha, social sorority, serving as treasurer one year. She has been a member of Panhellenic Council two years and was secretary one year. Miss Meier has been a member of the Social Skills Committee and a participant in Leader's Retreat.

Her other activities include being a member of the Top Five accounting majors in 1963, named in Who's Who in American Universities and Colleges, Yucca Blossom candidate in her sophomore and junior year, Snow Queen candidate in her junior year, first alternate in state Dairy Princess contest in 1961, and being awarded an internship in 1963 in accounting with a major accounting firm.

Miss Meier has a cumulative grade point of 3.0 or B for a four year period.

Other candidates for the honor were Jan Stratton, Portales, Jane Phillips, Clovis, May Dell Ross, Portales, Jerilyn Burns, Carrizozo and Kaye Kelly, Santa Fe.

ANNOUNCE DAUGHTER'S ENGAGEMENT -- Mr. and Mrs. Fred Gallman, Lazbuddie announce the engagement of their daughter, Twila to Gary Albertson, son of Mr. and Mrs. Roger Albertson of Muleshoe. Wedding vows will be read in August at the Lazbuddie Methodist Church with the Rev. Don Davidson officiating. Twila is a senior in Lazbuddie High School and her fiancé is a sophomore in Southwestern State College, Weatherford, Okla.

Uncle Ray's "Hot Air"

A little learning is a dangerous thing. Ask any kid who's just brought home a bad report card.

"I have come here to make an honest living," the stranger in town said.

"Well, you won't have much competition," the native replied.

Honest values are honest prices at Uncle Ray's.

Marriage Announced

Announcement has been made of the marriage of Drusella King of Plainview to Wade Mills, son of Mr. and Mrs. Prentice Mills, Farwell.

The couple exchanged vows on April 11 at St. Johns Methodist Church in Lubbock.

Mrs. Mills was honored for a miscellaneous shower on April 20 in Plainview.

Mr. and Mrs. Prentice Mills and Donna were in Lubbock for the wedding and Mrs. Mills later attended the shower for her daughter-in-law.

Visit Aunt

A2C and Mrs. Milton Johns, Sweetwater, accompanied by Mr. and Mrs. Glenn Cash, Hereford visited briefly in the home of Mr. and Mrs. F. S. Thigpen Wednesday. Johns and Cash are nephews of Mrs. Thigpen.

Mr. and Mrs. Jerry Henson and daughter, Jarilyn accompanied by Pat Collins were in Seymour over the weekend attending to business and visiting in the home of Mr. and Mrs. Jimmy Henson and children, Jay and Terry.

LaShawn D Ann Zahn

Arrives Tuesday

LaShawn D'Ann is the name given to the new daughter of Mr. and Mrs. John Zahn, who made her arrival May 5 at a Clovis Hospital. She weighed 6 lb. 9 1/2 oz. on arrival and is 19 1/2 inches tall.

LaShawn D'Ann is the third child for the Zahns. Their other children are Craig, eight and one half, and Mark, seven.

Maternal grandparents are Mr. and Mrs. J. R. Inklebarger, Spade, and paternal grandparents are Mr. and Mrs. Paul Zahn, Lazbuddie.

Visit Son

Mr. and Mrs. Tom Lindop and Danny visited over the weekend with their son, David Lindop and his family in Mesa, Ariz.

This is the first time the Tom Lindops have seen their new grandson, who arrived on April 11, and they spend much time making his acquaintance.

They returned home Monday night.

Officers of Delta Xi chapter of Delta Kappa Gamma Society installed at the brunch held for the chapter in Farwell Saturday morning are left to right: Pearl McClain-Friona, recording secretary; Gladys Legg-Hereford, 2nd vice-president; Alice Cowen-Dimmitt, treasurer; Hazel Merritt-Dimmitt, 1st vice-president; Hattie Boling, Farwell, president; Mary Whitley-Farwell, corresponding secretary and Hattie Coffey, Farwell, parliamentarian.

Delta Xi Chapter Is Honored With Brunch

Delta Xi chapter of Delta Kappa Gamma, was well attended Saturday when Farwell members were hostesses for a brunch.

An executive board meeting was held at 9 a.m. when the president, Miss Della Stagner, Hereford, brought to a close business pertinent to the year's work. Appreciation was expressed to Mrs. Merlin Kaul for excellent programs the past two years. Appreciation was also expressed to Miss Stagner for the efficient way in which she has conducted the work and business of the chapter during the same period.

Mrs. Joe Cowen, Dimmitt, conducted a quiz on the Constitution and by-laws of the society. Four major purposes are: 1. To unite women educators in a genuine spiritual fellowship. 2. To honor women who have given distinctive service in any field of education. 3. To protect the professional interests of women in education and eliminate unjust discrimination. 4. To sponsor and

support desirable educational legislation in the interest of women educators. Mrs. Opal Bookout, Hereford and Mrs. Fawn Welker, Dimmitt gave beautiful tributes to the Founders of the Delta Kappa Gamma Society which was begun by Miss Anne Webb Blanton in Austin 35 years ago. Mrs. Melton Richardson arranged for the commemorating of the seventh birthday of Delta Xi chapter.

Visit Son,

Grandson Arrives

Mr. and Mrs. B. L. Harding returned this week from Truth or Consequences where they had been visiting in the home of their son, James Harding and family.

While in the New Mexico city the Hardings made the acquaintance of their grandson, Gregory Kent who arrived on April 17. The little boy, son of the James Hardings, weighed 8 lb. 11 1/2 oz. on arrival. He has a sister, Titana, five years of age.

James Harding is guidance counselor in the Truth or Consequences school. He received his masters' degree in June.

Name Omitted

In the story of the pre-nuptial shower for Miss Sharon Thompson, bride-elect of Loyd Allen Cain, the name of Mrs. Anne Overstreet was not included in the list of those sending gifts. Her name should have been listed among the friends who remembered the young couple.

Mrs. Claude McDougal conducted the installation service, using the society's pattern of installation. Officers installed were: president-Mrs. John Boling, Farwell; 1st vice-president - Miss Hazel Merritt, Dimmitt; 2nd vice-president - Mrs. W. T. Legg, Hereford; executive secretary - Mrs. Claude Coffey, Farwell; recording secretary-Mrs. Pearl McClain, Friona; corresponding secretary - Mrs. Harry Whitley, Farwell; treasurer - Mrs. Joe Cowan, Dimmitt and parliamentarian - Mrs. H. V. Crawford, Hereford.

Guests were served coffee and nut breads from a table centered with 12 red roses in a gold vase, symbolic of the 12 Founders of the society on May 11, 1929. Mrs. A. C. Clarke served as chairman of the hostess committee which included Mmes. Loyd Cain, E. G. Williams, Claude Coffey, Harry Whitley and John Boling.

Dave Lindops Have A Son

Mr. and Mrs. Dave Lindop, Mesa, Ariz. announce the arrival of their first child, a son, on April 11 in a Mesa Hospital.

The little boy, who weighed 7 lb. 14 oz. on arrival has been named James Clayton.

Paternal grandparents are Mr. and Mrs. Tom Lindop, Farwell and maternal grandparents are Mr. and Mrs. Bill Fullerton, Mesa. Great-grandparents include Mrs. G. W. Atchley, Mr. and Mrs. George Lindop, all of Farwell, and Mr. and Mrs. N. L. Saylor, West Camp.

That tired sluggish feeling

If your car's battery seems unwilling or unable to get your car off to a fast start on cold mornings, it may need a re-charge . . . or need replacing.

In either case your Phillips 66 Dealer is prepared to help you. He'll help you get the most out of your present battery by servicing it carefully. But if you need a new one he can supply a powerful new Phillips 66 Trop-Artic* Battery.

In a battery it's performance that counts! You can depend on the performance of a Phillips 66 Trop-Artic Battery.

Lazbuddie Baccalaureate Sunday Top Students Named For 1964

Baccalaureate services for the Lazbuddie graduating class will be held Sunday, May 10, 8 p.m. in the high school auditorium and commencement exercises will be on May 15, 8 p.m. in the high school auditorium.

Top students listed for the senior class for 1964 are Gayla Roxann Seaton, daughter of Mr. and Mrs. R. B. Seaton and Twila Zolynn Gallman, daughter of Mr. and Mrs. Fred Gallman. Gayla, valedictorian, has a grade average of 94 for a four

year period. She has been active in all phases of school life serving as editor and chief of the annual, class officer for three years, a member of pep club four years and president of the club for two years.

She has participated in class plays and in interscholastic league. Gayla has served as an officer of FHA for three of the four years she has been a member, has received the home economics award, the Crisco award and Necchi sewing award, (second place in her sophomore

GAYLA SEATON

TWILA GALLMAN

year and first in her junior year). Miss Seaton also served as co-ed correspondent during her sophomore year. She is a member of the Muleshoe Assembly of God Church.

Twila, salutatorian, with an average of 92 for a four year period has also been active in all phases of school life. She has participated in class plays, interscholastic league events, student council, library club and has been a class officer for two years. She has been a member

of FHA four years, serving as president during her junior year and secretary this year. She is also a member of pep club and has served as an officer two years and drummer one year. Miss Gallman was winner of the biology award as a sophomore and won the English award last year. She is presently serving as art editor for the annual. She is a member of the Lazbuddie Methodist church and plans to be married this summer.

Postmaster Explains Service Changes

Vast majority of the Farwell area residents will not be affected by the recently announced adjustments in parcel post and post office window services, Postmaster James R. Smart, assured local residents today, explaining that this statement was prompted by some misunderstanding about the scope of these changes.

Recapping the situation, he pointed out these facts:

1. Parcel post delivery will not be affected. Stamp sales, registry, delivery of COD packages remain the same as on any other day.

2. The only principal service affected by the consolidation of window services into one window on Saturday mornings,

at the Farwell office, is the domestic money order service. No money orders will be issued on Saturday; however rural carriers may take applications for the money orders and they will be handled early Monday morning.

3. Post office lobby will remain open on Saturdays for lock box service and the deposit of mail.

Marriage Licenses Issued

A marriage license was issued on April 27 to Ronald Dwain Sudderth and Linda Gayle Staley, both of Bovina.

Community Planning And Available Training

By Tommy Hollmig and Bobbie Riney

Fallout protection preparedness is both a family and community job. Every citizen should know about his community civil defense plans and how they fit into county plans. The responsibility of the local government is to provide warning systems and radiological defense as well as name persons to be in charge. In case of attack, individuals must depend on local civil defense and government officials to inform them on when to take shelter, when to leave and the situation in general. The community must also be prepared to assist those who have evacuated heavily stricken areas.

It is each individual's duty to support government officials in developing and carrying out the plan of the community. Where there is no community plan, people have an obligation to themselves to develop one. There are many educational programs or training opportunities to familiarize families with civil defense preparedness needs.

Most of the programs are free to the public and are offered throughout the state. The Texas Education Agency sponsors the Civil Defense Adult

Education Course through public schools and the State Department of Health sponsors the Medical Self-Help Course through local medical societies. The Agricultural Extension Service is involved in an educational civil defense effort at state and local levels. Courses in shelter management, radiological defense and other areas are offered by the recently or-

ganized Texas A&M University Extension Civil Defense Program.

Additional information about civil defense training opportunities may be obtained from county agents or by writing to the Extension rural civil defense specialists at Texas A&M University, College Station, Texas.

At Home In Parker County

By CRICKET B. TAYLOR
County HD Agent

Now that the County and District 4-H Contests are over, we may settle down to planning for future work to be done in 4-H.

Food Project groups will be finishing up that project soon. The leaders of these groups have done a good job teaching the subject matter in the Favorite Food guides, and have found their efforts rewarding. We will be starting cloth-

ing project work soon and 4-H Clubs need to organize work groups for the different age groups and there again Adult Leaders in Clothing Projects are needed. If you have some time to devote to this work, please let me know or contact your organizational leaders. Mrs. Ralph Broyles is the Organizational leader in the 4-H club in Lazbuddie, Mrs. John Bolling is Farwell Busy Bee Club and Mrs. Johnnie Rundell and Mrs. Leon Billingsley in the Farwell Country Club. In Rhea Mrs. Franklin Bauer is the leader.

I am planning a meeting of clothing leaders in May, and I will need to have a list of those who will work with 4-H girls in clothing. Training will be given leaders in this project. The District 4-H Dress Revue will be held July 24, so that work must get started soon. Call me at 481-3619 or come by my office for information if you want to be a clothing leader in 4-H work.

Fresh strawberries by the crates, shortcake by the hundreds of pounds, unusual baked and frozen dishes featuring strawberries, and sparkling jams, jellies and preserves made from strawberries were in the spotlight of Poteet recently as home demonstration club women, members of the Farm Bureau and Grange, Rotary Club and other area leaders and berry growers paid tribute to the community's top money crop during the 17th annual Poteet Strawberry Festival. The festival traditionally ushers in the area's strawberry harvest. Yields are expected to be better than average if the weather continues favorable for the next month, says Hollis Duke, Atascosa county agent.

There's no chemical difference between cane and beet sugar, food specialists with the U. S. Department of Agriculture report. The two kinds of sugar may be used interchangeably in cooking.

How Strong Is "Farm Vote"?

The general opinion in some political circles today is that the farm vote as a power at the polls is a thing of the past. And in this election year, the question on farm vote strength is a timely one.

It is true that the farm vote now represents only about 9 percent--and maybe less--of the registered voters on a national scale. But this figure does not present a true picture of agriculture strength or importance.

Actually, a total of 63 percent of our population is directly connected with the buying, selling, manufacturing or processing of our farm products. Legislative matters important to agriculture are also

vitaly important to all these persons.

If everyone who buys the raw products of the farm would vote with the farmer, the strength of the rural vote would increase

New Wheat Sign-Up Under Way

As per schedule, farmers in this county started signing up in the new voluntary wheat program this past Friday, May 1. At the close of the second day (Mon. May 4,) of the sign-up period 163 farms had been signed up to participate.

On the average farm that is participating in the program, the average acreage of wheat is 90 acres and the average diversion (lay-out) is 10 acres. The average payment earned on this size farm is \$1,506.00. These payments are, of course, in addition to the price that will be received for the wheat that will be marketed from each of these farms.

It would appear that most of the wheat producers in this county plan to participate in this program. Therefore, wheat producers are reminded that the final date for signing an intention to participate in this program in May 15, 1964, Participation (as this is a voluntary program) is not automatic.

Persons having questions concerning the program are invited to contact the ASCS office for an explanation of it's provisions.

AMMO NOTES

By Bill Bennett, Agronomist

Wheat is jointing. Sugar beets are up. Beds are being watered. A few farmers have started planting grain sorghum and cotton. Soil temperature is pushing 65 degrees. And there is still a lot of fertilizing to be done.

I estimate that 70 per cent of the fertilizer has already been applied in Castro County. In the Olton area, about 50 percent of the nitrogen has been applied and a large number still plan to apply phosphorus. About 50 percent of the fertilizer is still to be applied in the Clovis, Friona, Bovina and Hereford areas.

Sidedressing of nitrogen will soon be in full swing. Ammonia or any of the sources of nitrogen can be sidedressed in the middle of the furrow or placed to within 4 to 6 inches of the plant. Care should be taken not to get too close to the plants to avoid pruning roots. Since nitrogen will move after it changes to the nitrate form, sidedressing nitrogen in the middles or slightly offset from the middles will do just as much good as placing it close to the plant. Take the usual precaution of covering the chisel mark to be assured of a good application job.

Application of phosphorus can still be made. To do the most good, phosphorus should be applied preplant or should be sidedressed when the plant is still young, preferably by the four leaf stage. Phosphorus should be banded as close to the plant as can be done without disturbing the plant or the root system. The usual dual application system on 20 inch centers in the side of the bed can be used to apply phosphorus at this time. Some have sidedressed phosphorus when grain sorghum is knee-high and when cotton begins to square and it has done some good. However, better results will be obtained from phosphorus when it is applied preplant or sidedressed very early. A plant will take up about 40% of the total phosphorus it needs within the first 30 days of growth. Phosphorus is important in developing a good root system.

to 14 per cent. If those who pass these products through the channels of trade were counted, the total goes up to 24 per cent. The processors and manufacturers of these goods would swell the total to 37 per cent.

Retailers of the ultimate product increases the strength to 56 per cent. And finally, those who sell the farmer only those tools and materials needed to produce his crop brings the grand total to 63 per cent of

our voting strength. Of course, all of us rely on agriculture for our daily needs. Hardly another single industry affects the entire population so directly.

The primary conclusion to be drawn from this is that the fate of agriculture, its leaders and its legislation, is of concern to us all. For this reason, it is vitally important that every citizen know the men and issues which will guide and affect our agricultural outlook--and then VOTE!

Changing Agriculture Seen In Statistics

How times have changed! Not too long ago, when you thought of the agricultural industry, you thought of the farmer, Kenneth Wolf, Extension economist-agribusiness, points out that today, the agricultural industry is a network of interdependence. In fact, of each 10 Texans employed, four are in agriculture; but three of the four are off the farm.

On one side of the farmer and rancher, Wolf explains, are such businesses as chemical, farm equipment, fertilizer, financial, utility and many others. Each year, in Texas, they supply agricultural producers with \$1.8 billion worth of things needed to grow the products. The products grown are then sold for about \$2.4 billion.

On the other side of the farmer and rancher, he adds, are those businesses engaged in

marketing the product. A few of these are storage warehouses, textile plants, railroads and trucking lines, packing plants, wholesale grocers and supermarkets. These off-farm businesses add about \$3.9 billion to the value of the products raised by the farmers and ranchers.

This changing picture of agriculture has resulted in changes not thought possible 30 years ago. In 1930, for example, one farm worker produced enough to feed 10 people. Today he produces enough to feed 28. The average wage earner had to work 60 hours 15 hours ago to buy a month's food supply for his family. Today it takes him 38 hours, Wolf says.

Business management in our present agricultural industry has played a major role in making the industry so efficient, believes the economist.

YOUR BEST BET IS P-A-G 665

If you're looking for a hybrid grain sorghum seed that will produce top yields, heavier grain, more profits per acre, and backed by a proven company, then by all means plant P-A-G 665. When 665 is planted with adequate moisture and fertility, you'll get a sorghum crop you can count on.

A SUPPLY OF P-A-G 665 IS AVAILABLE AT YOUR NEAREST P-A-G DEALER

SCIENCE SKETCHES

WHALES, largest animals ever to inhabit the globe, come in many varieties including sperm, killer, humpback, narwhal and bottle-nose. But most curiously named, reports the Chicago Natural History Museum, is the "right whale." It was dubbed "right" by whalers because it contains large amounts of the precious oil they seek, has the longest and best whalebone, is a slow swimmer and conveniently floats when killed.

A POSSIBLY EXTINCT animal is being tracked in the rugged forests of Tasmania, an island Australian state 200 miles south of the mainland. Object of the hunt: the mysterious Tasmanian tiger. Once found in large numbers, the beast was brought to the verge of extinction in the late 19th century when the government put a bounty on its head. The last positive identification was in 1939.

'INSTANT' citrus juice crystals will be processed for the first time in South America at a 500-ton-per-day Argentine processing plant. Votator vacuum dryer equipment produces pure crystals by removing more than 90 per cent of the water from orange, tangerine or grapefruit juices. The crystals are light to ship, require no refrigeration and reconstitute instantly with the addition of cold water.

Beef Stands At Top Of May Plentiful Foods List

"Flowers that bloom in the spring, tra la" are being joined by an abundance of beef for tasty menu attractions.

Beef heads the list of May plentiful foods, reports the Texas Agricultural Extension Service.

The five-item list also points to huge supplies of turkeys, canned ripe olives, salad oils, milk and all dairy foods.

All cuts and grades of beef will be plentiful all month, as the cattle inventory on farms stands at the peak of a six-year buildup. Beef output the first two months of this year was 9 percent higher than a year earlier.

So watch for special values in beef as retailers provide attractive displays and prices. May will be an excellent time to serve beef often and generously. The Service suggests starting the outdoor barbecue season with beef.

"Spring salads will be enhanced by generous use of salad

oils, dressings and canned ripe olives. Supplies are huge.

Count on turkeys, too, to provide the light touch to spring days. Marketings in May will run about one-fourth greater than a year ago. March storage holdings were up 12 million pounds.

Milk and all the delicious dairy foods will be abundant as production reaches toward its early-summer peak. In January and February, milk output ran slightly higher than a year earlier.

USDA's Agricultural Marketing Service compiles the list of monthly plentiful foods as a guide for consumer buying. Items listed usually are available in a wide choice of quality at attractive prices.

Sometimes, even extravagance can be a blessing in disguise. . . . It proved to be exactly that for Dr. Edward Robinson Squibb, founder of the mammoth drug-manufacturing complex known as E. R. Squibb & Sons. . . .

In 1857, Dr. Squibb, a physician in the United States Navy, was experiencing great difficulty in making ends meet on his annual salary of \$1,800. . . . That was because his wife—whom he adored—insisted on living beyond their means by buying expensive furniture, imported clothes and a summer house, among other costly things. . . . In order to increase his income, Dr. Squibb was forced to resign his commission and take a post in a commercial drug laboratory in Louisville, Kentucky. . . . But even the higher income he derived there was not adequate to meet his wife's spending proclivity and he felt that the only solution was to go into business for himself. . . . He established his own small laboratory in Brooklyn, New York, and at first experienced all manner of hardships. . . . On three different occasions his plant had disastrous fires and he was badly burned in one. . . . He refused to accept defeat and eventually managed to get his company started on the upward climb that was to win it a place among the world's leading drug manufacturers. . . . Dr. Squibb's success was principally due to the extreme care his company used in the preparation of their drugs and his insistence that only the purest of ingredients be used. . . . He was an unrelenting foe of quackery in medicine as well as in the concoction of drugs and played a prominent role in the fight for enactment of pure food and drug regulations in the states of New Jersey and New York. . . . These statutes served as models for the comparable federal act which became law in 1906, six years after Dr. Squibb's death.

The top four communities in the Texas Community Improvement Program will be known by the latter part of May. The judging process, first on the county basis, then on the district and finally on a state basis will determine the winners, reports Reagan Brown, Extension rural sociologist. He said 251 communities participated in this year's program. Awards to winning communities on each of the three levels of competition will be provided by the electric utility companies operating in Texas.

GARDEN SCHEMING

Annuals may be used for garden scheming just as may the larger trees and shrubs. Here hollyhocks in the background, snapdragons in the middle and petunias for an edging make an attractive border planting against a dark brown woven fence.

Many people sow seeds of annuals in rows for cutting. While this may serve their purpose, annuals have a far wider use in garden scheming—that is planning a garden design using annuals for their height, form of plant and flower, and color of bloom.

In the picture above thought has been given to the forms and colors of annual flowers used in a border planting in front of a woven fence.

Powderpuff hollyhocks are used in the background because they are tall. Their rounded, double flowers are borne in clusters along the stems and show off well, with their bright shades of white, yellow, pink or red against the dark brown of the fence.

The next row, as you see, is of Rocket snapdragons which are not as tall as the hollyhocks nor as short as the petunias used as a border. Snapdragons form is upright, each plant growing several stems and resembling a small bush. Flowers are borne in spikes thus offering a contrast in form to the hollyhock flowers. Colors are red, pinks, rose, yellow, tawny apricot and white.

The petunias are the newer hybrids, loaded with flowers. The plants are low and spreading, ideal for the front of a border. As you know, petunia colors now are legion. They may be lavender, lavender-blue, purple, many shades of pink and rose, scarlet, salmon, cream-vel-

Ask \$6.5 Billion Slash In Johnson Spending Request

The National Association of Manufacturers has called for a \$6.5 billion cut in spending authority requested by President Johnson in his recent budget message to Congress. Such a reduction in spending authority would result in a drop of \$3.9 billion in presently estimated expenditures for fiscal 1965.

The NAM proposals would bring the President's new spending authority down from \$103.7 billion to \$97.2 billion, and his 1965 administrative budget down from \$97.9 billion to an even \$94 billion.

In urging the slash in federal spending the NAM said it is gratifying that President Johnson had submitted a budget estimating actual spending in fiscal 1965 slightly below the estimate for 1964. But the Association said it is disturbing that the President requested new authority which, if granted, would result in significant increases in spending totals after 1965.

The NAM pointed out that the spending cuts should be made in order to:

1. Compensate for the tax reduction that has just been enacted;

2. Prevent a build-up in spending in fiscal years after 1965;

3. Assure final spending in fiscal 1965 below the President's estimate.

The Association emphasized that its economy proposals covering 127 line items in the budget did not involve the appropriations for national defense.

The NAM proposed deepest spending cuts in foreign aid, agriculture, space, education, public health, and welfare.

The Association urged that government economy moves be based on:

1. Stringent congressional screening and reduction of executive requests for new

spending authority;

2. Congressional refusal to enact proposed legislation or expand existing legislation which would increase federal participation in areas of state-local, or private, function and responsibility;

3. Executive and congressional action to curtail the scope and improve the management of existing programs.

The NAM's economy proposals are based on a study conducted by its Government Economy Committee composed of industrial executives from all sections of the country.

Consult An Architect

Using the copyrighted slogan, "Consult An Architect," the National Association for Indiana Limestone of Bloomington, Ind. is scheduling an expensive national advertising campaign in 1963 and 1964. Initial insertions will begin this fall although the bulk of the budget will be scheduled for 1964.

Trade publications will get the bulk of the space promoting architecture and Indiana limestone, according to Fred M. Bar-

rett, pres., Matthews Bros. Company, Bloomington, a director and promotion chairman for the association. "Although some consumer magazine and newspaper space will be included."

Announced to the architectural trade only recently, the theme brought many letters of congratulations from all over the nation. One "official" expression of appreciation came from one of the largest organizations of registered architects.

The campaign will be expanded in advertising in 1964.

How to fatten your dollars for market

Dollars you invest with us are "growth dollars"... fattened by excellent earnings year after year after year. Because these dollars work harder, you can make major family purchases, such as a car, easier. It's smart to buy with "growth dollars." Stop in. Open a savings account with us, where your dollar works harder... grows bigger... buys more.

Is The Boll Weevil Marching North?

There is a grave possibility that the destructive cotton boll weevil has developed enough strength to push into previously uninfested areas of the Texas Panhandle, Agriculture Commissioner John C. White said this week.

The threat is serious enough to launch a proposal for a federal - state program that may cost an estimated two million dollars.

In the 50 years since the boll weevil first came into Texas from Mexico, the insect never migrated beyond a natural barrier known as the Caprock which marks the beginning of the Great Plains. Last summer and fall, the insect was discovered to have penetrated into cotton fields several miles beyond this barrier.

Commissioner White said a number of the boll weevil pupae have been collected in the newly infested area. The hibernating insects are being kept in traps to see if they will survive the winter weather. If they do survive, it may mean that the insect has developed enough strength to get a foothold in the Great Plains area which is the biggest producer of cotton in the state.

The destructive history of the boll weevil is a well known story. The insect is believed to have first entered the southernmost tip of Texas around 1914. Within five years, it had pushed north and east along the Gulf coast as far as Florida, nearly ruining the cotton industry in parts of Georgia and Alabama.

Strangely, it did not move west at first. The first boll worm was not found at Presidio until about five years ago, and it did not arrive in El Paso until three years ago. Commissioner White said studies have not yet proved that the boll weevil can survive the winter in the El Paso area but that it may migrate into the fields in the summer and fall.

The battle lines are being drawn on the Great Plains in an effort to halt any threatened spread. A million dollar appropriation is being sought from the federal government, to be matched by farmers in the area and by state help.

This year, the plan is to spray the fields three times

at 20-day intervals at about the time when the insect normally starts accumulating fatty tissue to carry it through the winter. About 175,000 acres of cotton land are involved in the program. It is hoped that the northward march can be halted in this manner and that new techniques of boll weevil prevention will be learned for use in areas where the pest is already an annual problem.

Texas 4-H Members To Travel

European agriculture will be the primary course of study for a group of Texas 4-H Club members this summer. The Texas youth will participate in a 21-day Goodwill People-to-People tour of agricultural areas in Northern Europe June 23-July 13.

Marshall Crouch, assistant state 4-H Club leader, will act as leader and host for the Texas delegation. While in Europe the 4-H members will visit members of their counterpart youth organization and participate in numerous meetings with U. S. and foreign government representatives. The members will see England, France, Belgium, Czechoslovakia, Hungary, Berlin, Scotland and Denmark.

Purpose of the mission is to give agricultural youth of Texas an opportunity to carry a message of goodwill to farm youth and associated trades people in Europe. Also, it will give them a chance to inspect, in person, typical foreign agriculture and learn something of conditions that exist on foreign farms. Through such programs, American youth can do much to improve foreign relations and feelings toward American people and the American government, Crouch believes.

Interested 4-H youth should contact their county agent for more information or submit letters of application to Marshall E. Crouch, assistant state 4-H Club leader, College Station, Texas.

Boll Weevil Control Measures Planned

Operational plans for carrying out next fall's giant "Diapause" boll weevil control program on the High Plains were laid in Lubbock April 16 at a meeting of the boll weevil Steering, Area-wide and Technical Committees, sponsored by Plains Cotton Growers, Inc., of Lubbock.

Entomologists at the meeting reaffirmed their statement that such a program is an urgent necessity for the Plains area, and discussed plans on exten-

sive surveys this summer for determining the extent of acreage to be sprayed this fall. Forty-five persons attended the meeting, including entomologists and other top officials from both State and Federal levels. The boll weevil experts have recommended the Diapause program to the Plains as the best known method to keep the weevil from invading the entire High Plains as he has other areas, and they are working closely with area

committees and Plains Cotton Growers to assure the program's success.

In a report on the progress of weevil overwintering research, W. L. Owen, Entomologist at the Texas Agricultural Research and Experiment Center, said a total of 35 live weevils have been recently collected from the weevil "cages" that were installed last fall. Of the total, 16 were found in Crosby County, seven in Garza, nine in Dickens and three in cages on top of the Caprock near Close City. According to Owen, research so far has given the definite indication that Shiner Oak is the habitat in which most weevils hibernate below the Caprock.

Early "trap" crops of cotton are being planted to give more information on weevil overwintering, and the information should be complete before commercial cotton crops begin to square, Owen said.

Dr. J. C. Gaines, head of the entomology department at Texas A&M emphasized the importance of in-season weevil control below the Caprock. He explained that this would reduce the number of weevils migrating to the High Plains and thus minimize the acreage needing treatment this fall. Donald Johnson, Executive Assistant of Plains Cotton Growers said PCG is laying plans for an educational and informational campaign in this area that will touch as many people

in as many ways as possible.

Committee members also discussed some of the details of contracts that will be made for chemical suppliers and applicators with Archie Geiser, Chief Pilot for the Plant Pest Control Division, Agricultural Research Service, U. S. Department of Agriculture. Geiser stated that contracts would be let on a competitive bid basis and that the area would be divided into units, with contract applicants being allowed to bid on one or more units. He said the method and time for bidding would be widely publicized when details were complete.

Vinyl plastics that stay flexible even at low temperatures have been made of chemicals prepared from fatty acids of crambe. Crambe is a member of the mustard family and is now under development by USDA and state agricultural experiment stations including the Texas Station as a new oilseed crop potentially valuable for both oil and meal. A USDA chemist said that many of these crambe chemicals called plasticizers, proved equal to best commercial products for use in making polyvinyl chloride (PVC) sheets.

Beef heads the USDA's plentiful foods list for May. The five-item list also includes turkeys, canned ripe olives, salad oils, milk and all dairy foods.

European agriculture and its farm youth will be the primary course of study for a group of Texas 4-H Club members this summer. They will participate in a 21-day Goodwill People-to-People tour of agricultural areas in Northern Europe from June 23-July 13.

By Vern Sanford

George Fin, an Ohio bait processor, says post mortems prove bluegill will eat anything that moves or fits into its mouth.

"Furthermore," says Finn, "the bluegill is hungry all the time and you don't have to wait for a special lunch period to feed him."

The bluegill, in this instance, takes in all the perch family. Most of us call 'em perch, but others like the name of bluegill. And still others call 'em bream. But by whatever name, ounce for ounce, there is nothing quite as rewarding for an afternoon of fast and furious pleasure than taking bluegill.

Mainly, the bluegill is a worm fish. Perhaps more of them have been caught on worms than all other baits combined. We used to dig worms in the back yard. Now we buy them put up in ice cream containers.

Some fishermen string a whole worm on their hook. Others break the worm into bits and put only a small part on a small hook to be sure and catch the bait stealers.

If You're Interested In Buying FARM MACHINERY Call Big Nick Trienen at Machinery Supply Hwy. 60 Bovina Phone 238-4861

Now, thanks to scientific breakthroughs, there are methods of preserving natural baits, such as garden worms, crickets, grasshoppers, grubs and grass shrimp. All these are ideal bluegill baits and will help you catch a basket full with very little trouble.

Biologists encourage bluegill fishing. They urge you to take as many as possible and not throw any back. Reason is . . . impoundment soon can become overrun with them.

Although most of us picture bluegill fishing with a cane pole and a small float, there are other methods that will prove as much or more fun.

For instance, there is nothing better than a flyrod for catching them, especially if you are working from a boat. A light flyrod or ultra-light spinning outfit is ideal for tossing the various baits close to the rock banks, which seem to be the best spot to catch bluegill.

I know two fellows in Austin who sometimes forget about their big bass fishing and take out after those fighting bluegills with casting equipment. They fish a great deal on Lake Marble Falls, where there are high rock banks. By casting directly against the rock banks and jiggling the lure a time or two after it hits the water, perch will attack it.

I've seen them bring in perch smaller than the lure they cast. During the course of an afternoon they'll fill a wire basket with bluegill the size of your hand. And who can deny these are not good eating!

Others using spin or casting equipment carry along several of those little plastic bubbles. They are fastened to the line about two feet from the end. On the terminal there will be one or two small hooks. These can be baited with worms or some of those preserved baits. By casting the bubble near the rocky shore, the bait is sure to attract fish.

Sometimes when fishing in this manner for bluegills you will come up with a crappie or even a big bass.

This type of fishing is especially good on short float trips down some of the streams of Texas. You get a mixed creel on trips of this kind. Many of them however, are various subspecies of perch. Sometimes you get those big goggle-eyed ones.

And don't sell perch short as to their eating qualities. Just scale 'em, clean 'em and toss them into a skillet with plenty of hot grease and let them cook until they are thoroughly brown. This way, on the smaller fish at least, you are not bothered with the bones. You chew them along with the meat.

On the larger ones you can peel off the very delicious flesh and throw the bones away.

Perch fishing isn't just for the kiddies. Grownups find it equally as enjoyable.

Agricultural Adjustments Must Continue

Farming and ranching are dynamic businesses and as long as our economy continues to grow they will constantly change, say agricultural economists at Texas A&M University.

Farmers and ranchmen must make changes in their operations for a number of reasons, according to Cecil A. Parker, and Rex Kennedy, farm management specialists with the Texas Agricultural Extension Service, and Dr. K. R. Teffertiller, associate professor, Texas Agricultural Experiment Station.

They list several areas where change may occur. The price producers get for the crop or livestock they produce, the cost of their production items, technology, or institutional arrangements such as control measures or rental

agreements are among them. Farmers can react to these changes in several ways, the economists point out. The first adjustment that may be made

is to increase the size of the operation. Trends toward larger machinery capacity, decreased profit margins, and technology breakthroughs point

to larger farms and ranches. Though the size may be increased by purchasing or renting land, renting may be impeded by long established customs associated with the practice.

Another adjustment in production would be indicated by a relatively high price for a commodity where little or no in-

crease in the production cost was found. This situation would call for more production of this commodity, the economists say. Improvements in technology for particular crops also suggest a shift toward these crops.

Two other changes that can be made are to change production methods, and employment of the operator off the farm. Though the economists predict little change in the acreage

farmed in the state, they say that added income from agriculture of the coming years will be received by fewer farmers.

In the future, banks and lending institutions will demand more responsible use of credit. Thus, it will become more important for ranchmen and farmers to be good financial managers. To do this, they will need to be willing and able to change, the economists say.

Quality Beef Remains A Good Headliner

Now's the time to "beef up" your menus, says Mrs. Gwendolyn Clyatt, Extension Service consumer marketing specialist.

Ample supplies of top quality beef will be available for the next few months, and should be one of the best values at the supermarket.

Large supplies of fryers also are on the market.

Consumers are enjoying what economists call a "buyer's market" with plenty of competition for food dollars tending to drive prices downward.

Owners of home freezers may want to give consideration to current low meat prices. Indi-

cations are that as the year advances, prices will go up to more normal levels.

At the vegetable counter, look for good values in carrots, cabbage, beets, green onions, dry yellow onions, mustard, collards, turnips and greens. Head lettuce and celery are other good choices. Asparagus, broccoli and cauliflower are available at moderate price levels.

Apples, coming from storage, continued to be moderately priced. Good quality strawberries are available, but prices vary. Other fruit choices are pineapples, bananas and pears.

FACTS ABOUT STROKE

LOUIS PASTEUR (1822-1895)
HE SURVIVED A "BIG STROKE" AT 45 - THEN WORKED PRODUCTIVELY 27 MORE YEARS DURING WHICH HE HAD 50 "LITTLE STROKES"

Dine On Duck Orientale

FROZEN MIXED FRUIT AND FROZEN PEACHES combine in an exotic sauce that is marvelous with roast duck or other fowl. A rice stuffing for the duck would carry on the oriental theme. When it comes to the accompanying vegetable, go modern with one of the new combinations. Frozen peas with pearl onions is an excellent choice.

CURRIED FRUITS

1 package (12 ounces) frozen mixed fruit, thawed
1 package (12 ounces) frozen sliced peaches, thawed
1/2 teaspoon curry powder
2 tablespoons brown sugar
1 tablespoon vinegar
4 teaspoons cornstarch
2 teaspoons butter

Place fruits, curry powder, brown sugar, and vinegar in saucepan. Blend cornstarch with a little of the fruit liquid to form a smooth paste. Stir into fruit mixture. Cook and stir over medium heat until thickened and clear. Stir in butter until melted. Serve hot as an accompaniment to duck, roast pork, or beef. Makes 3 cups.

Senate Weighs, House Votes Fallout Shelters

The Nation's military leaders gave strong support to an expanded fallout shelter program in recent testimony before a special subcommittee of the Senate Armed Services Committee.

Speaking for the Joint Chiefs of Staff, General Earle G. Wheeler, Army Chief of Staff, backed a House-passed bill authorizing Federal support for 11 million more fallout shelter spaces. He told the subcommittee, headed by Sen. Henry M. Jackson of Washington:

"A FALLOUT PROTECTION-oriented civil defense is clearly a necessary element of the total United States national security effort. Our potential enemies have a clear capability for nuclear warfare, and we cannot discount the possibility that such a war may occur. . . . An adequate program of civil defense should give our population a reasonable degree of protection as well as increasing the credibility of our military deterrent posture."

General Thomas S. Power, Commander-in-Chief of the

Air Force's Strategic Air Command, sent a statement to the subcommittee describing civil defense as "one of the most important aspects of our overall deterrent posture."

The Senate subcommittee's hearing on the pros and cons of the fallout shelter bill was completed in December, 1963. If committee and Senate action to authorize the program is favorable, as it was in the House, Stuart L. Pittman, Assistant Secretary of Defense for Civil Defense, has indicated that he will seek a supplemental appropriation from Congress to get the program underway.

THE BILL would amend the Federal Civil Defense Act of 1950 to:

1. Enable the Federal Government to contribute up to \$25 per individual shelter space to incorporate public fallout shelters for about 10 million persons in buildings owned by nonprofit institutions, such as schools, hospitals, and state and local government facilities; it authorizes, but does not appropriate,

\$175 million in this fiscal year toward the program.

2. Require incorporation of public fallout shelters in most new and existing Federal structures. The bill authorizes \$15.6 million in this fiscal year to shelter about a million persons.

3. Remove Federal legal restrictions on the use of state and local civil defense personnel and equipment, established with Federal financial aid, in meeting natural disasters.

The bill was passed by a voice vote in the House after a move to send the measure back to committee was defeated 172 to 67. Its passage came after the House Armed Services Committee had approved the bill by a 32-4 vote, with nearly all members reversing their stand on fallout shelters after comprehensive testimony last summer from 108 witnesses.

FIRST SUPPLIES for fallout shelter areas sanitation supplies, and radiation detection kits, Puerto Rico are loaded aboard a van at Brook when over 200 vanloads are placed in shelter lynn, N. Y., Army Terminal for shipment to Sanareas, will be enough for about 260,000 persons for Juan. The civil defense food, water, medical and 14 days in fallout shelters. Dept. of Defense Photo

"Jitterbug Diets" Vs. Teen-Age Nutrition

Texas teen-agers, with a record amount of allowance money to spend, are the most undernourished age group in the state, Agriculture Commissioner John C. White revealed recently.

White blamed "jitterbug diets" of hot dogs, soft drinks and candy bars as the big robbers of proper nutrition.

"With a plentiful supply of the best food available, recent studies show the age group from 13 to 18 years has the worst eating habits of any," Commissioner White said. "They can be characterized as a generation addicted to the 'skipped breakfast', the 'cola and candy lunch' and the 'TV dinner'."

"I think it is astounding that the State of Texas distributed over 27 million dollars in food and services on school lunch programs in the past school year; yet statistics show that our teen-agers, as a group, are sadly undernourished," said White. "It isn't the fault of the school lunch program, however. The food is there for them but the young people have too many temptations to divert their lunch money for other items."

"In view of this, it might be a wise idea for our school systems to ban soft drink and candy dispensing machines from school property," White maintained.

Poor eating habits developed at school and in the home will carry over into adult life and cause us even greater concern for national health in later years, he added.

"It is a sad paradox that we produce a tremendous amount of beef in Texas, yet fully 10 percent of our teen-agers are deficient in protein, the important food element in meat," said Commissioner

White. "We are a major producer of citrus fruit and yet 20 percent of the young people do not get their required amounts of vitamin C. And though we have a tremendous surplus of milk and dairy products, fully 40 percent of them need more calcium in their diet."

White said a number of schools have removed vending machines from the property in recent months.

"It is vital," he said, "that proper eating habits be encouraged among our young people. The vigor of our young people depends upon what they eat. The record isn't so good, right now."

There's a new instant dehydrated pumpkin mix on the market in flake form. Pumpkin for the product is specially grown at the new plant of Produce Processors Inc., at Windsor, North Carolina, and selected for color, flavor, and optimum rehydration properties. Efforts to produce pumpkin flakes have up to now been unsuccessful because of the high water content of fresh pumpkin, which ranges from 90 to 93 per cent. The flakes are made possible by controlled amounts of starches and sugars added to the cooked puree.

The four or five servings of enriched or whole grain breads or flour products or cereals you include in your daily menu planning do much toward insuring adequate amounts of B-vitamins and iron in your family's diet.

It costs no more to buy breads, flours and cereals labeled enriched, restored, or whole grain. These foods are all inexpensive sources of the B-vitamins thiamine, niacin, riboflavin and the mineral iron.

Doctor of Science Honorary Degree To Pfeiffenberger

For only the twentieth time in its 29-year history, Texas Technological College this spring will award an honorary degree.

The degree, Doctor of Science, was voted by the Board of Directors to George W. Pfeiffenberger, Executive Vice President of Plains Cotton Growers, Inc. of Lubbock, for outstanding service to the High Plains cotton industry, to Texas Tech, and for his accomplishments in cotton research and marketing. Presentation will take place during the 1964 spring graduation ceremonies at Tech.

According to Harold Hinn, Tech Director of Plainview and Dallas who nominated Pfeiffenberger for the singular honor, "he has, through his work, brought about hundreds of millions of dollars of additional funds into the South Plains economy." He pointed out that through the investigation of light spot cotton utilization the local executive was largely responsible for area cotton producers getting from \$18 to \$24 more per bale for cotton in that grade since 1958.

After an extensive background in cotton technology, during the course of which he developed new methods and new instruments for use in the cotton industry, Pfeiffenberger assumed his present position as head of the giant Plains producer organization in 1956. Since that time he has had full responsibility for PCG's research programs, legislative vigilance, educational programs and other activities in behalf of the High Plains cotton producer. He majored in chemistry at the University of Dayton, Ohio in the city of his birth and studied textile courses at Texas A & M University.

As Cotton Research Director for the Chicopee Manufacturing Corporation of Lubbock and Chicopee Falls, Massachusetts, he was charged with the setting up and operation of a pilot spinning plant at Texas Tech. The spinning laboratory was operated until 1953 carrying out large-scale research operations and converting the results into commercial mill operations in five Chicopee mills in New England and the Southwest. As Executive Vice President of Plains Cotton Growers, Inc., Pfeiffenberger has maintained a keen interest in Texas Tech's Textile Research Laboratory and partially as a result of this interest and financial support from PCG the Tech Pilot Plant is now one of two completely modern spinning laboratories in the United States. The Textile Research Laboratory at Tech is used extensively by Plains Cotton Growers on a contract basis in conducting investigations of High Plains cotton fiber qualities and spinning performance. The results of these investigations are an integral part of PCG's promotion program for the area's cotton.

He began his cotton career in 1930 as one of the first technologists in the newly formed cotton fiber laboratory of the U. S. Department of Agriculture. He was with the Department of Agriculture in various positions connected with cotton technology and research until 1945, and has since served as a member of the National Cotton Advisory Committee. In 1963 he acted as cotton producer representative of the American delegation to the International Cotton Advisory Committee in Bangalore, India, a meeting of delegates from 47 countries.

In his connection with Chicopee Manufacturing, later as Research Director for Otto Goed-

ecke Company of Hallettsville, Texas, and recently as Executive Vice President of PCG, Pfeiffenberger has become known around the world as a writer and lecturer on cotton

and cotton technology. He was chosen "cotton's Man of the Year" in 1961 by Cotton Digest Magazine, and many of his lectures and articles have been translated into three languages for foreign use.

Will Your Chicken Lay a Golden Egg?

Start a 4-H poultry project and find out

Shown here are starting salaries and potential earnings in five of the poultry sciences

The 4-H Club members enrolled in a poultry program soon learn that to raise even a small flock successfully requires some knowledge of the poultry sciences related to feeds, breeds, disease control and production.

They get this information from extension poultry bulletins, from the local 4-H Club leader and from the extension worker. And applying what they learn often produces the "golden egg" that discloses a future career.

Project Determines Career

High school students say that experience gained in tending a flock of birds determined their choice of college courses to prepare them for a career in the poultry industry.

The \$6 billion industry in the United States involves scores of specialized fields such as engineering, genetics, nutrition, pharmaceuticals, and large-scale production. And, according to a recent survey made by the Western Poultry Congress, there is a shortage of college trained young people to fill these jobs.

Among 500 commercial firms surveyed recently, the lowest starting salary for college graduates was \$5,000 (see illustration above) and potential earnings over \$30,000.

Jobs Go Begging

What's more, the survey reveals that in one year less than 100 students were graduated with a bachelor's degree in poultry science. There were more than 250 jobs waiting to be filled.

One prospective employer, Heisdorf & Nelson Farms, Inc., helps to get 4-H'ers started in a poultry project, and offers incentive awards along the way.

Through arrangements made with the National 4-H Service Committee and the Cooperative Extension Service, the firm annually provides six national \$500 college scholarships, educational trips to the National 4-H Club Congress and medals for high ranking poultry members in the county.

Statistics forecast that many boys and girls will leave the farm to earn a living elsewhere. There appears to be a golden egg in the poultry industry.

SPORTS AFIELD

By Ted Kesting

Blue geese, which are simply a color phase of lesser snow geese, are increasing their numbers at the rate of two percent a year. Fifty years ago blue geese were a rarity and mostly of eastern distribution.—Sports Afield.

While the kit fox is usually regarded as a vanishing species, it is currently undergoing a population explosion in parts of Southern California. In Kern County especially, this diminutive fox has reached an all-time high.—Sports Afield.

The Arizona Cooperative Wildlife Research Unit has recorded the calls of female bobwhite and scaled, Gambel's and Mearns' (or Massena) quail. The recordings lure in the bachelor birds. This system of locating males has good potential in census work.—Sports Afield.

Why a deer should calculatedly kill a house cat is hard to say. But it happened in Berks County, Pennsylvania, and Dr. John Focht was there. Driving out of his lane, he saw the doe chasing the cat and striking with her hoofs.—Sports Afield.

The common sand flea is a jumping bug, which is usually found in the sea wrack and under the debris at the high-tide mark.—Sports Afield.

The first lures used in sea fishing consisted of a spoon-type device, made from a shell, and a jig, made from bone.—Sports Afield.

Choosing a boat can take time, but it need not be a chore; if properly done, it can pay rich dividends in safety, sport and satisfaction.

First, it's important to examine the boat ashore. Then ride in it and drive it. But for best results, we must realize just what can and what can't be checked should be recognized. A test ride or drive, particularly, should be planned beforehand.

This examination and trial of the craft should be done only after you have decided the type you need. The first considerations should be the size and nature of the waterways on which you plan to use the boat, the load to be carried, what sort of fishing is planned and what else the boat may be used for. These will determine your choice of boat size, type and power; and your examinations will then seldom include boats varying greatly from one another.

Much information about the strength of a wood or metal boat, and its durability, can be gained from examination, according to Willard Crandall, Boats Editor of Sports Afield Magazine. Check on the frequency and size of rivets or screws and nails; the number of frames or substitutes; the thickness of the material used for planking. Check on fore-and-aft framing as well as the crosswise ones. Don't worry about getting a boat that is needlessly strong; that's better than getting one too weak.

Boats are no longer used principally in calm water; they meet many more waves from other boats now. And today's higher speed means that a boat hits each wave harder. The simplest way for a manufacturer to meet price competition in today's boat market is to use fewer frames or fastenings, or thinner material. So be on the watch. Check neatness of construction details, too: if the builder insists on quality in the parts you can see, you can be pretty sure he'll insist on quality in the parts you can't see.

Judging from evidence of prehistoric stone tools, primitive man was right-handed.

SCIENCE SKETCHES

FAMILY LIFE, says the Population Reference Bureau, is more popular than ever. Nine out of 10 Americans—177 million out of 190 million—live in the country's 47 million families. (The Bureau of the Census defines a family as two or more people living together related by blood, marriage or adoption.) Average family size in 1960 was 3.7 persons, up from 3.5 in 1950 and reversing a downward trend of more than 150 years' duration.

PHOSGENE, a colorless gas that smells like new-mown hay, plays an important role in the manufacture of polyurethane foams which have rapidly growing insulating and cushioning applications, reports Chemetron Chemicals, Chicago, a major phosgene producer. The name comes from the Greek words for "light" and "to produce" since it was first made in 1812 by the action of light on a mixture of carbon monoxide and chlorine.

HARDENING of the arteries is being studied in hogs by the University of Illinois because a swine's circulatory system is similar to man's. Half a group of hogs get regular workouts on a treadmill; the others do not. Theory being tested: exercise increases the size of certain blood vessels reducing the danger of arterial disease.
