"I don't even consider myself a novice," Sylvia Andrews of Midland said Saturday while braving the slopes of the city's Wadley Barron Park during a Flatlanders Ski Club demonstration. Club members said that while grass provides a slower surface than snow, it allows persons to get the feel of "snowplowing." The demonstration was designed to interest more Midlanders in skiing this winter. (Staff Photo by Mike Kardos)

Carter disputes talk of forecast recession

By JIM SERVATIUS
R-T Executive Managing Editor

WASHINGTON — President Carter Friday took exception to growing comment from members of the administration, particularly earlier comments by Alfred Kahn, chairman of the council on Wage and Price Stability, regarding the prospects of a recession in 1979.

During a meeting with out-of-town editors from across the country, Carter on three occasions during an informal press conference in the cabinet room of the White House stated he did not anticipate a recession in 1979.

Kahn, the president's chief inflation fighter, had been quoted as saying that unless President Carter's anti inflation program works, the nation faces only two choices — mandatory wage-price control or a "deep, deep depression."

He also has been quoted as saying the administration's new 7 percent voluntary guideline for wage increases is so high it is "absurd" and the White Hose must "screw down tighter" in a year or so.

During press briefings earlier in the day at the White House, Robert Russell, deputy director of the council, stated that the comments attributed to Kahn had been misquotes.

In meeting with editors, the president emphasized both his opposition to mandatory wage and price controls and his view that a recession will not occur.

"We do not anticipate a recession next year," the president said, and "I am not going to impose any mandatory wage and price controls."

"Although many economists have predicted that we are going to have a recession or depression next year, we don't think we will."

"On mandatory price and wage controls, I don't know of any case that it ever works. I have said I have no intention of asking Congress for that authority, nor to impose wage and price controls in a mandatory way even if I had the authority. Even if I asked Congress for mandatory controls, I don't think we could get 10 percent to support it. But it is an idle debate. As long as I'm in the White House, I have no intention of effecting mandatory wage and price controls."

Asked "Even on a limited basis?," the president replied "no."

On another issue, that of results of the recent general election, Carter emphasized that although he is not concerned about results of the election which might reflect unfavorably on his popularity, he believes both Democrats and Republicans "got a clear message from the electorate —

Redistricting proved to be classic rural-urban conflict

EDITOR'S NOTE: One issue which seems sure to come before the Midland County Commissioners Court during the next year is a reported population imabalance among the commissioners precincts. But whatever imbalances may be found, they can't begin to compare with the situation a few years ago.

By LINDA HILL
R-T Staff Writer

In the old days, the cattleman's biggest enemy was barbed wire.

But in more recent history, Midland County range bosses faced an equally formidable enemy — a city slicker mayor and his urban compatriots.

And, just as it turned out that barbed wire was here to stay, so must it have been destined for one-man, one-vote to come to Midland County.

On April 1, 1968, while the rest of the nation reeled under the bombshell announcement that Lyndon Johnson wasn't running for re-election, Midland County residents were absorbing a piece of news dropped on them that day by the U.S. Supreme Court: County commissioner precincts must be based on population, not miles of roads.

Hank Avery, then mayor of Midland, had won a six-year battle to redistribute the population among the four precincts. No longer would 3 percent of the county's population — the rural sector — elect the majority of the Commissioners Court.

A then-jubilant Avery told a San Angelo audience shortly after the victory: "To pursue something that's right and win — oh, that's the most satisfying thing in the world."

Yet, 10 years later, Avery — his dark hair having turned gray in the interim — is hardly enthusiastic about his victory.

"I wouldn't do it again for anything in the world," Avery said last week. "It just cost me a tremendous amount of money. But my mother never taught me how to quit."

Avery said he can't see how redistricting the commissioner's court has changed the quality of county government — with which, he goes on to note, he never had any real quarrel except for relative rural and urban tax valuations.

Avery reflects he had no idea it would be so hard to correct what he thought were clear inequities, particularly in the light of a progression of federal court decisions extending the concept of one man-one vote to ever-lower governmental levels.

"I thought I was trying to redistrict a little county in West Texas called Midland," he said in 1968.

He didn't realize he had started a wagon rolling that would knock down the structures of 81,000 governmental bodies throughout the U.S.

The 10 volumes of scrapbooks of clippings and letters Avery kept concerning the protracted litigation — material in great demand by researchers — testify to a Commissioners Court, and perhaps a county, torn asunder by the moving force of change.

The fight came straight down a since commonplace line of rural resistance versus urban push. Three rural commissioners, each elected by from 87 to 148 qualified voters, were aligned by the nature of their constituencies against a commissioner who represented the entire city of Midland (17,749 qualified voters at that time), with the county judge elected at large.

Population estimates indicated slightly over 97 percent of the county's 67,717 persons lived in the urban precinct.

Players changed during the six years of litigation, but the "program" of division never did. And all the time the case was inching its way through the court system, a battle of persona-

Three family members die in Big Spring mishap

BIG SPRING — Three of five members of a Big Spring family were killed and three others were seriously injured here late Saturday afternoon in a two-car crash 2 mile west of Coahoma, said a spokesman for the Texas Department of Public Safety.

Killed in the collision was Larry Travis Greenfield, 40, and his wife, Jacquelyn Greenfield, 26. They were pronounced dead at the scene by Howard County Judge Bill Tune.

Their 15-year-old daughter, Tami Greenfield, died en route to Malone-Hogan Hospital here about 6:30 p.m., the DPS spokesman said.

Injured were two Greenfield children, Joline, 6, who was in guarded condition late Saturday in Medical Center Hospital in Odessa, and Darin, 8, who was in serious condition in the Big Spring hospital. Both suffered head injuries in the 5:50 p.m. crash.

Also injured was Mike Asselin, a 28-year-old Big Spring mechanic, who suffered chest injuries when the car he was driving was in a broadside collision with the car driven by Greenfield, who works for a refinery here.

Asselin was in serious condition in the Big Spring hospital.

The mishap occurred at North Service Road along U.S. Interstate Highway 20 and Salem Road.

The mishap was investigated by DPS Troopers Ben Lockhart and Glen Redmon, both of Big Spring.

Water is key to economy of High Plains, Permian Basin

EDITOR'S NOTE: The question is: Are the quality and quantity of West Texas water adequate to support future growth? Today, in the first of a seven-part series, The Reporter-Telegram looks at the area's water situation as related to projected needs.

By MARK VOGLER
R-T Staff Writer

●Just about every time it rains hard in Odessa, the rainwater combines with effluent and pours down Monahans Draw — right through Midland County, sometimes washing out county roads and flooding private property. Midland County residents who live "downstream" claim there's no need for the mess they have to clean up.

Some of them contend the city of Odessa could use every drop of its treated effluent instead of discharging it into the draw.

●Alleged pollution of playa lakes in and out of the Permian Basin has raised serious questions about possible ground water contamination and damage to waterfowl. A few oil companies argue the environmental impact is minimal and say they should be allowed to discharge principally saline wastes into the lakes.

Meanwhile, farmers in the Texas High Plains are pumping water from playa lakes to irrigate their crops.

●In Big Spring, 40 miles eastward, the city is attempting to drain a lake, claiming the lake has become a source of mosquito infestation and increases the danger of flooding in a neighborhood area.

Critics of the drainage project would rather see the lake turned into a wildlife refuge.

In each instance, it is argued by someone that the water involved is a wasted, though valuable, resource.

Water in West Texas is life blood. No one doubts the importance of maintaining present supplies in order for the region to continue to be a major agricultural and oil producing center of the Southwest.

To the U.S. and to the world, the overlapping Texas High Plains and Permian Basin mean food on the table and gas to heat one's home, respectively.

The High Plains region consists of 56 counties, including Midland County, stretching over 38 million acres

Water
Texas lifeblood

from as far north as the Texas Panhandle to as far south as the Pecos region. The region is larger than an area covered by 31 U.S. states.

American economists recognize the Texas High Plains as one of the leading agricultural regions in the world. CIA officials, who forsee food as becoming more valuable than oil in international power plays, eyé the area as critical for national security reasons.

The major crops grown on the High Plains are wheat, corn, cotton and grain sorghum — a major form of cattle feed.

Water in the Texas High Plains helps to yield 18 percent of the nation's cotton and 25 percent of its grain sorghum.

Fertile land and good climate make the Texas High Plains an ideal area for agriculture. The growing season ranges from 178 days in the north to 226 days in the south.

On the southernmost end of the Texas High Plains sits the Permian Basin, one of the largest producers of oil and natural gas in the U.S. As of January 1977, the Permian Basin had produced 17 billion barrels of oil, almost half of all the oil produced by Texas.

The only complaint people have about this semi-arid region is that it seldom rains. The average annual rainfall over the High Plains is less than 21 inches. And the average is several inches less than that in the area's southern extremes.

Because it seldom rains in these parts, there exists a slim chance of recharge to the Ogallala Aquifer, the gigantic underground water formation which serves the Texas High Plains and parts of five other states.

Thus, the Ogallala is isolated from significant recharge. And continued depletion of the formation must eventually exhaust ground water supplies. State water resources officials have estimated the aquifer should reach its peak of delivery to the region's irrigation wells by the late 1980s.

Thereafter, agricultural and petroleum production gradually will decline unless the state manages to tap new water resources.

According to Herbert W. Grubb, director of planning and development for Texas Department of Water Resources, "In recent years, exports of agricultural commodities have made the greatest positive contribution to the nation's balance of trade. In recent years, cotton exports from Texas were valued at $255.5 million, feed grains had an export value of $497.3 million. Texas' exports of other agricultural commodities amounted to $362.9 million, bringing the total value of agricultural exports to $1.5 billion or about six percent of total U.S. exports."

"The economy of this region and its

DEATHS

Modesta Estrada

STANTON — Rosary for Modesta Estrada, 81, of Stanton will be said at 8 p.m. today in Gilbreath Funeral Home.

Services will be at 2 p.m. Monday in St. Joseph Catholic Church here. Burial will follow in St. Joseph Cemetery.

Mrs. Estrada died Friday in a Midland hospital after a short illness.

She was born June 15, 1897, in Monterrey, Mexico. She moved to Stanton in 1941 from Kennedy. She was married to Pedro Estrada March 22, 1922, in Fredericksburg. He died Dec. 4, 1969.

Survivors include seven sons, Merce Cortez of Houston, Abolonio Estrada of Stanton, Carmen Estrada of Andrews, Cande Estrada of Merignac, France, Augustine Estrada of Abilene, Emilio Estrada of San Antonio and Tanis Estrada of Stanton; four daughters, Mary Ramos of Stanton, Bessie Estrada of Midland and Lupe Chronister of Pearland; three half-sisters, Lorenza Mireles of Stonewall and Rosa Mireles and Louisa Mendoza, both of Aransas Pass; 24 grandchildren and four great-grandchildren.

K.W. Stephens

ANDREWS — Services for Kenneth Wayne Stephens, 38, of Andrews were Saturday in Singleton Funeral Home. Burial was in Andrews Cemetery.

Stephens died Thursday in a Midland County roping arena after a sudden illness.

He was married Oct. 24, 1959, in Earth. He was a rancher on the Aston Ranch southwest of Andrews. Stephens was a member of the Southwest Texas Team Ropers Association. He was a Baptist.

Survivors include his wife, Karen; two sons, Joel D. Stephens and Sidney Stephens, both of Andrews; two daughters, Kathy Renne Stephens and Deanne Kay Stephens, both of Andrews; his parents, Mr. and Mrs. Garland Stephens of Chiloquin, Ore.; his grandmother, Mary Murell of Earth; two brothers, Donald Allen Stephens of Clovis, N.M. and Wallace Gayland of Earth.

Emmitt L. Hogue

BIG SPRING — Services for Emmitt L. "Shorty" Hogue, 82, of Big Spring were Saturday in Nalley Pickle Funeral Home. Burial was in Trinity Memorial Park.

Hogue died Friday morning in a Big Spring nursing home.

He was born June 27, 1896, in Burleton in Falls County and moved to Big Spring with his family in 1905. He lived and farmed in Howard County most of his life.

He was married to Ruth Gulley Hicks Oct. 21, 1923, in Big Spring. She died Oct. 6, 1974. He was a member of the 14th and Main Street Church of Christ. He was a veteran of World War I.

Survivors include three sons, Merle Hogue and Bruce L. Hogue, both of Big Spring, and Ledford Hicks of Freindswood, and three sisters, Sally Callahan of Big Spring, Linnie Gross of Riverside, Calif. and Hattie Everett of Amarillo.

Edward Nelson

GORMAN — Services for Edward Nelson, 60, of Andrews were Saturday in the Andrews Church of Christ. Burial was in Andrews Cemetery.

Nelson died Tuesday in a Houston hospital after a lengthy illness.

Nelson was born Jan. 28, 1918, in the Kokomo community near Gorman. He married Bell Hager in September 1936, in Gorman. He was an employee of Tracy Trucking Co. in Andrews and had lived in the city since 1945.

Survivors include his wife, three sons, Jack Nelson of Andrews, Ted Nelson of College Station and Scotty Nelson of Odessa; his mother, Ollie Jane Nelson of Gorman; two brothers, Clifford Nelson of Carbon and R.A. Nelson of Lamesa, and five grandchildren.

Ralph Crockett

BALLINGER — Services for Ralph D. Crockett, 58, of Houston, brother of Walter Crockett of Midland, will be at 3 p.m. today in Rains-Seale Funeral Home here. Burial will be in Evergreen Cemetery.

Crockett died Wednesday in a Houston hospital after a sudden illness.

He was born Feb. 25, 1920, in Mills County. He was a veteran of World War II and a former resident of Ballinger. He had been employed with Monsanto Co. for 26 years.

Survivors included three sisters, three other brothers and a number of nieces and nephews.

Melesio Brito

BIG SPRING — Services for Melesio Brito, 69, of Knott community near Big Spring were Saturday in Sacred Heart Catholic Church. Burial was in Mount Olive Memorial Park directed by Nalley-Pickle Funeral Home.

Brito died Friday in a Big Spring hospital after a long illness.

He was born Feb. 19 1909, in Mexico. He was a retired farmer. Brito was married to Andrea Magana Feb. 26, 1928, in Midland. She died Jan. 4, 1952. He lived in the Knott community 45 years. He was a Catholic.

Survivors include two sons, Jesus Brito of Big Spring and Jose Brito of Knott; six daughters, Margarita Alvarez of Big Spring, Carmen Hernandez of Odessa, Lorenza Hernandez of Presidio, Maria Garza of Delano, Calif., Lonicio Moreno of Justiceburg and Juanita Silva of Garland; five sisters, Maria Gutierez of Lubbock, Juana Rodriguez of Stanton, Solidad Rodriguez of Sand Springs, Pascuela Garcia of Lenorah, Crensencia Rios of Big Spring, 37 grandchildren and 11 great-grandchildren.

Mary M. Thomas

KILGORE — Services for Mary M. Thomas, 66, of Andrews were Tuesday in Radar Funeral Home in Kilgore with burial in Kilgore Cemetery.

She died Nov. 11 in a Kilgore hospital.

Mrs. Thomas was born June 25, 1912, in Meridian. She came to Andrews in 1963 from Kilgore. She was a retired sales clerk with J.C. Penney Co. in Kilgore.

Survivors include her husband, D.E. "Sam" Thomas of Andrews; a son, Danny Thomas of Andrews; a daughter, Cloyce Williams of Sabine; two brothers, Bob Lester of Banquete and Bill Lester of Kerrville; a sister, Alma Page of Ranger; and seven grandchildren.

Mrs. Hopper

LUBBOCK — Services for Mrs. D.M. (Lena Fuller) Hopper, sister of John W. Walker of Midland, will be at 2 p.m. Monday in the First Presbyterian Church here.

She died Saturday in a Lubbock nursing home after a short illness.

She is survived by a daughter, a son, two grandsons, a granddaughter and two other brothers.

Upton County records compiled

RANKIN — The first complete inventory of Upton County records has been compiled and published as part of an ongoing statewide survey of records.

Rankin is the county city of Upton County.

Mary Pearson, director of the Texas County Records Inventory Project in Denton, said the "Inventory of County Records: Upton County" contains a descriptive listing of 398 record series found in the Upton County Courthouse.

The inventory was compiled in conjunction with the statewide Records Project at North Texas State University.

To date, the project, which began in 1973, has published 40 inventories, including Upton, and 50 additional counties in some phase of the inventory process.

The Upton County inventory began in 1974 under the direction of Mr. and Mrs. Roger M. Olien, professor of history at the Universituy of Texas of the Permian Basin. Verifying, rechecking and updating were done by the Project Field Director James E. Riney and Assistant Field Director Maurice Fortin.

The Upton County survey was funded by grants from the coordinating board, Texas College and University System, Title I, and the National Historical Publications and Records Commission.

The purposes for the inventory are varied, Mrs. Pearson said. One important reason for the work is documentation of historical records. The inventory also supplies essential data for the development of a records management system.

Under legislation passed by the 65th Texas Legislature, Senate Bill 831, county officials may now institute a records retention and disposal schedule based upon a County Records Manual developed by the Texas State Archives. The inventory is the first step required before the system may be implemented.

Though Upton County is a relatively young county, Mrs. Pearson said, the records within its courthouse are quite interesting.

She said the county was created in 1887 from Tom Green County, but was not organized until 1910. "Our inventory shows that Upton County has transcribed deed records as far back as 1887 and surveyors records dating back to 1876," she said.

She said the oil and gas history of Upton County can be plotted through courthouse records beginning in 1923. The railroad's impact on the county can be viewed through records of transcribed field notes of surveys for railroads beginning in 1926.

Plat records showing the community's growth begin in 1904, Mrs. Pearson said. All records in existence are listed in the inventory publication.

Complimentary copies of the Upton County inventory have been distributed to each county office. Citizens may purchase copies for $1 plus tax from the Texas State Library, Local Records Division, Box 12927, Austin, Tex. 78711.

Congressman shot, killed

WASHINGTON (AP) — The State Department said late Saturday it has been told Rep. Leo J. Ryan, D-Calif., and a number of reporters have been shot and killed after an attack on the congressman's fact finding mission at the airport in Port Kaituma, Guyana.

Ryan was leading a 13-person delegation investigating a controversial American religious settlement at Jonestown in the South American country.

State Department spokesman Tom Reston said the report reached Washington by a flash message from the U.S. embassy in Guyana, formerly a British colony. Reston said the shooting and Ryan's death have not been confirmed.

Reston said the report was relayed by a pilot who was flying Ryan, a group of reporters and a Ryan staff worker, to the People's Temple, a settlement of about 1,200 Americans established in Guyana a year ago by Jim Jones, a former San Francisco city official.

The pilot escaped by flying away from the attackers in one of two planes on the landing strip near the settlement.

Before leaving San Francisco five days ago Ryan said: "I am going to investigate the conditions of Americans (in the Jones settlement) who, I have been told, are working from dawn to nightfall, with terrible mental and physical punishments if they don't work hard enough."

The State Department said it is unclear when the shootings occurred.

Jeff Dieterich, of the department's Latin American desk, said the pilot, who has not been identified by name or nationality, reported it appeared an entire NBC-TV crew headed by correspondent Don Harris, was shot along with Ryan. It was unclear about the crew's condition, Dieterich said.

Union holds open house

Local Union 460 of the International Brotherhood of Electrical Workers, AFL-CIO, Saturday held open house at its new 3,750-square-foot Union Hall building at Midland Regional Airport.

The Union Hall includes a meeting hall, classrooms for the training of electrical apprentices, office, kitchen and coffee bar, according to Louis Garramone, the union's business manager.

SCHOOL MENUS

TRINITY SCHOOL

Monday — Tacos, chicken noodle soup.

Tuesday — Grilled cheese sandwiches, tomato soup.

Wednesday — Thanksgiving vacation begins.

Available daily — Peanut butter and honey sandwiches, tuna salad sandwiches, pimento cheese sandwiches, bologna sandwiches, tossed salad, milk and ice cream.

GREENWOOD SCHOOL

Monday — Burritos with chili, corn, tossed salad, brownies, milk.

Tuesday — Stew, vegetable sticks, cornbread and crackers, applesauce cake, milk.

Wednesday — Thanksgiving vacation begins.

MIDLAND ELEMENTARY

Monday — Breakfast: Orange juice, oatmeal, buttered toast, milk. Lunch: Hot dog with mustard and chili, whole kernel corn, cole slaw, chocolate pudding, milk.

Tuesday — Breakfast: Orange juice, cinnamon toast, milk. Lunch: Baked turkey, dressing and gravy, cranberry sauce, green beans, hot rolls with butter, pumpkin pie with whipped topping, milk.

Wednesday — no school.

MIDLAND SECONDARY

Monday — Breakfast: Orange juice, oatmeal, buttered toast, milk. Lunch: Hot dog, baked ham, hash brown potatoes, whole kernel corn, chilled peaches, cole slaw, chocolate pudding, ice cream.

Tuesday — Breakfast: Orange juice, cinnamon toast, milk. Lunch: Baked turkey, dressing and gravy, barbecue on bun, cranberry sauce, green beans, salad, pumpkin pie with whipped topping, ice cream.

Wednesday — no school.

Horton named as Dawson sheriff

LAMESA — Bill Horton, 46, chief deputy under Dawson County Sheriff Guy Kinnison since 1970, has been named to succeed Kinnison, who resigned earlier this month to go into business.

Kinnison had been sheriff since 1970, when the Dawson County Commissioners' Court appointed him to succeed Shorty Hancock, who resigned for health reasons.

Horton has been in law enforcement for 18 years and all but one of those years was in Dawson County.

Horton, appointed by the commissioners' court to succeed Kinnison, was sworn in by County Judge Leslie Pratt.

To each a Merry Christmas and a gift from S&Q

Aramis -the scent of the successful

Appearances are important. Yet appearance isn't everything. Possibly even more important is the way you smell. For your scent lingers in the mind long after you have departed. Ah, the importance of Aramis. It's a part of a total grooming system that not only helps you smell good but helps you look good, as well. Aramis...the man who wears it, knows!

Stop in and see our complete collection of Aramis grooming aids priced from 00.00

Use our convenient OPTION CHARGE PLAN

S&Q Clothiers

To each a Merry Christmas and a gift from S&Q

selections $or the fashion wise by Society Brand, Ltd. and Damon

Here, two superlative gifts designed for the man who knows the importance of a fashionable appearance.

The suit, one from our Holiday collection of tastefully elegant pin-stripes by Society Brand, Ltd. Masterfully tailored in a fine wool blend, it incorporates all the features of fashion leadership...a softer shoulder, slightly narrowed lapels and a more natural silhouette.

As a complement...the lusterous, silk-like luxury of Damon's Silcron dress shirt in an array of soft, pastel solids. Together, they will be a most fitting accent to the man who tops your Christmas gift list.

Society Brand suits from $265.
Damon dress shirt $18.00

Bell places phones 'where people want them'

Would you believe there is a working telephone on the ninth hole of the Midland Country Club Golf Course mounted on a large board?

That telephone situated north of the Tall City off Texas 349 is but one of the many ways in which Southwestern Bell is putting phones "where the customers want them," said Juanita Bryant, district manager for the firm.

She said Midlanders favor installing phones in kitchens and bedrooms most frequently.

"These two rooms of people's homes appear to be the most popular," said Ms. Bryant.

The company is not above installing the phones in barns or even between homes and in outdoor gardens.

"The firm has found that almost all people want phones where they do the most work," said Ms. Bryant.

She even cited the case of a Southwestern Bell employee who had to take a shower before he could make one installation.

"What made the installer a little unhappy was that the installation was in a pig pen," she said.

"In this case, he had to take a shower and change into sterile clothes because the area was a special breeding project, a germ-free farrowing area."

Then there was the installation of a phone in an outdoor garden for a retired man who spent most of his time tending half an acre.

Ms. Bryant said employees once installed outside jacks in several birdhouses for a customer who wanted the jacks in his large, landscaped backyard.

"By far the most work is done during presidential visits," said Ms. Bryant.

"One of the requirements is that the president have communications from the second he lands until the second he takes off. It makes for a lot of work for a lot of people. All of the equipment must be removed once he takes off."

She said press coverage is "something else, too." In this situation reporters seek instant access to a telephone during a presidential visit.

"Communications for the White House press corps are as urgent to them as they are to the president, his aides and security people," she said.

And, she noted, the massive installations for conferences such as governors' meetings occasionally require last-minute changes because of additional installation requests.

Phones on golf courses become necessary when tournaments are being held as television coverage requires such equipment. On some courses in Texas, practically every tee will have a telephone on a temporary site to give reporters access to a phone to file stories.

Man held in mercy killing of wife

LAKELAND, Fla. (AP) — A 79-year-old man was held Saturday on a first-degree murder charge in what police described as the mercy killing of his wife who was bedridden with arthritis.

George W. Hoffman was transferred to a hospital for psychiatric observation after his arrest Friday night, authorities said. He was not expected to be arraigned before Monday.

"Maybe he couldn't stand to see her suffer anymore," said a neighbor, Roland Samuelson. "I don't think anyone saw this coming."

Helen Hoffman, also 79, was shot three times in the head with a .32-caliber pistol while she slept Friday, police said. They said Hoffman told them that after the shooting, he telephoned his neighbors and the Hoffman children, saying he was unable to let her suffer any longer.

Police said they first believed Mrs. Hoffman had cancer, but later corrected their report to say she had severe arthritis.

At an appearance before Polk County Judge Dennis Maloney after the shooting, Hoffman was asked if he understood the maximum penalty for the charge was death. "Yes," he replied. "And I wish you would do that tomorrow morning."

Assistant State Attorney James G. Horrell said the murder charge was proper but that it would be up to a grand jury to decide whether to prosecute.

"We don't recognize mercy killings in the state of Florida," said Horrell. "On the face of the issue, from what I have heard of it, it is a first-degree murder case."

"She had been ill for quite a while," said Samuelson, a neighbor for 16 years. "He has been taking care of her alone all along. It just got to be too much for him to do. To be quite frank about it, I don't know how he held on this long. She has looked to be on the verge of death for a long time."

Samuelson said the Hoffmans were natives of Germany and were naturalized citizens.

Clubs set Thanksgiving meetings

Members of the Downtown Lions and Rotary clubs will hold their annual joint Thanksgiving meeting Wednesday noon in the ballroom of the Midland Hilton.

Dr. Lester L. Morris of Dallas, formerly pastor of Midland's First Baptist Church, will be the speaker. He is a former member of the Downtown Rotary Club.

The program will be in charge of Duke Jimerson, program chairman of the Lions Club.

George Weis, president of the Lions Club, will preside at the luncheon. J. Rudolph Wright heads the Rotary Club as president.

The two clubs have been meeting jointly on the Wednesday before Thanksgiving for almost half a century, since the regular Rotary meeting date falls on the holiday.

Large cities decline in population

WASHINGTON (AP) — Half of the nation's 10 largest cities declined in population from 1975 to 1976, according to new Census Bureau figures.

In a report released Saturday, the Census Bureau said Dallas has replaced Baltimore as the nation's seventh largest city, the only change among the top 10. Baltimore dropped to eighth.

Cities in the top 10 which grew, all in the Sun Belt, were Los Angeles, Houston, Dallas, San Diego and San Antonio.

Those declining were New York, Chicago, Philadelphia, Detroit and Baltimore.

Among the second 10 cities, Phoenix moved from 15th to 13th and Memphis from 17th to 14th, while Milwaukee dropped from 14th to 16th in the new ranking.

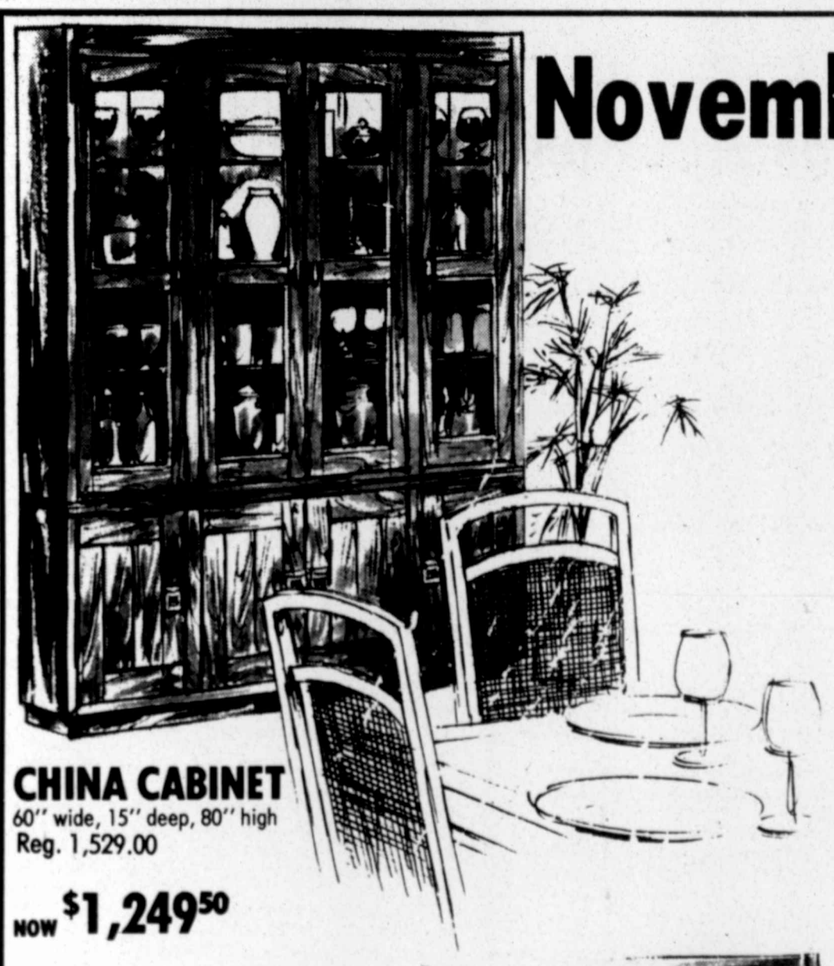

Only four of the second 10 cities gained in population while six lost.

Officials noted that in some of the cases growth resulted from annexations rather than natural increase. Houston was cited as an example of a city where significant annexations had taken place.

Generally, they said, the patterns of change followed the pattern of the last several years with growth in the Sun Belt and declines in the more northern cities.

Four cities passed the 100,000 population mark — Mesa, Ariz.; Pasadena, Texas; Boise City, Idaho; and Davenport, Iowa.

November Is Dining Room Month At Knorr's

WEATHER SUMMARY

The National Weather Service forecasts snow today for the Plains states, showers for southeastern Texas and southern Florida, and rain in the Northwest. It will be warmer in the Southwest and colder in the Midwest and East. (AP Laserphoto Map)

Saturday's satellite cloud picture shows broken frontal clouds through the Southeast, overcast low clouds blanketing New England, the Lakes and Midwest and clouds with underlying snow cover span across the northern tier of states from the Lakes through the Rockies. High clouds appear through the southern Texas and the Pacific Northwest. (AP Wirephoto)

Midland statistics

MIDLAND, ODESSA, RANKIN, BIG LAKE, GARDEN CITY FORECAST: Partly cloudy today through Monday. Cooler Monday. High today in the mid-60s. Low tonight, near 40. Light and variable winds becoming southerly at 5 to 10 mph Sunday.

ANDREWS, LAMESA, BIG SPRING, STANTON FORECAST: Partly cloudy today through Monday. Cooler Monday. High todayxin the mid-60s. Low tonight, near 40. Light and variable winds becoming southerly at 5 to 10 mph today.

Texas area forecasts

West Texas — It will be partly cloudy Sunday through Monday and cooler in the north Sunday and in most other sections Monday. Highs Sunday and Monday will range from the upper 40s in the Panhandle to the low 70s in Big Bend. Lows Sunday night will vary from the mid 20s in the Panhandle to near 40 in Big Bend.

North Texas — Partly cloudy through Monday with temperatures a little cooler in the north and west Sunday. Lows Sunday night will range from 40 in the northwest to 50 in the southeast. Highs Sunday and Monday will range from 58 in the northwest to 68 in the southeast.

South Texas — It will be considerably cloudy and mild Sunday with scattered light rain and drizzle mainly in the east and south. Partly cloudy Sunday night and Monday with scattered showers in coastal and southeast Texas. It will be a little warmer Monday. Lows Sunday night will be in the upper 40s in the extreme northwest to the mid 60s along the lower coast. Highs Sunday will range from the upper 60s to mid 70s. Highs Monday will be from the mid 70s to near 80.

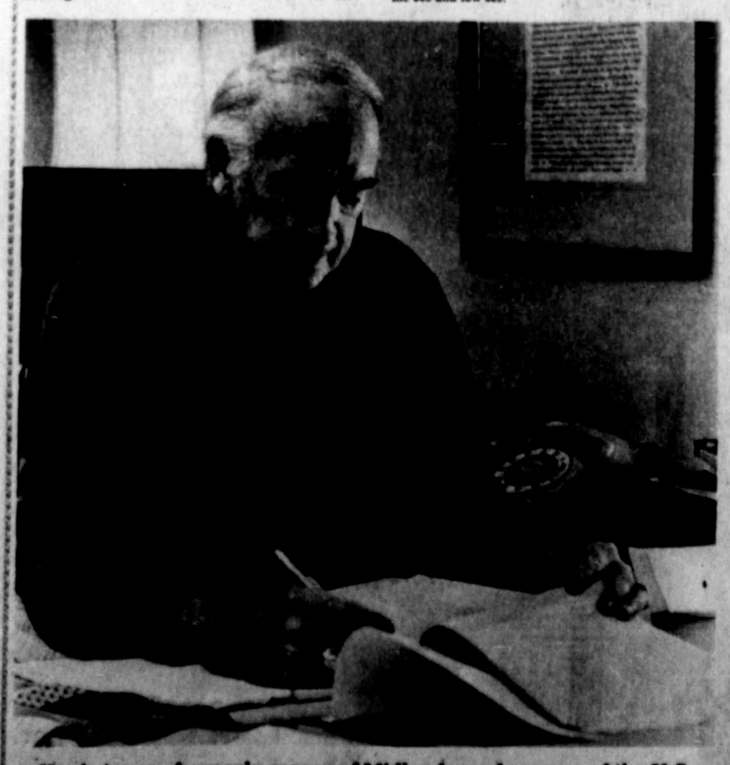

Extended forecasts

Tuesday Through Thursday

West Texas — Increasing cloudiness Tuesday through Thursday with a chance of rain in the west and north portions. Rain will become widespread after midweek. Highs will range from the 50s in the north to the 70s in the south. Lows will range from the 30s in the north to around 50 in the south.

North Texas — It will be partly cloudy and mild with a chance of rain on Thursday. Highs will be in the 60s and lows will be generally in the 40s.

South Texas — Partly cloudy and mild through Thursday with some showers and possibly some thundershowers. Highs will be in the 70s and low 80s. Lows will be in the 50s and low 60s.

Hank Avery, formerly mayor of Midland, reads a copy of the U.S. Supreme Court's 1968 decision in the Avery vs. Midland case. Avery in effect revamped much of the local government structure in this country with his landmark lawsuit begun in 1963. (Staff Photo)

Seeing anything but a somber expression upon Dr. Henry Kissinger's face is unusual, but he managed this wry look during a press conference Friday in Lubbock. He was in the West Texas city to speak at the Lubbock Chamber of Commerce banquet and to pay tribute to retiring U.S. Rep. George H. Mahon, visible in the background. (Staff Photo)

Kissinger's dry humor slips slyly into foreign policy talk

Foreign policy usually makes for a dull supper-talk topic.

But one of the country's experts on foreign policy, Dr. Henry A. Kissinger, can find a way to liven up a speech on the subject, if only for a short period.

Kissinger is known for his dry humor, manifested by a seeming slip of the tongue when one least expects it.

Speaking Friday at the Lubbock Chamber of Commerce banquet, Kissinger offered a sample of his humor to an audience of 2,000 persons before getting down to his favorite subject.

The face of the former secretary of state never breaks into a wide grin. But when he is about to pop something he considers funny, a half-smile eases into view.

Out comes his punch line, his smile becomes wider and a short low laugh slides from his throat.

George Mahon, in introducing Kissinger as the guest speaker, referred to the expert's German accent.

Not one to let an opportunity pass, when it was his turn to talk, the good doctor said, "When George spoke about my accent, I found it a little painful. I came here because I wanted to speak in an area where everyone speaks with an accent. We should all stick together."

Kissinger is writing his memoirs and said he already had written 2,500 pages. "Now I'm going to turn to the second chapter of it and...," he said before laughter stopped him from continuing.

To ease into his topic of foreign policy, Kissinger completed his praise of Mahon's work, then observed: "George said I should speak for 30 minutes, but that is ridiculous. Anyone educated in the German language will know it takes more than 30 minutes just to conjugate a verb.

"He also told me I should talk about a subject that interests me most," he added. He paused a few seconds before continuing with, "but I didn't think you would want to hear about me."

Maybe one has to be in Kissinger's presence in a very real sense.

Perhaps his jokes are *not* too funny. But they impress the immediate listener that way, coming as they drolly do from a man who otherwise exudes sobriety and formality.

Midland's case was 'classic'

(Continued from Page 1A)

lities and viewpoints raged at home.

At one point, feelings ran so high it looked as if the county's road and bridge budget might be jeopardized.

In 1966, Commissioner Bill Heck, having lost yet another attempt to equalize urban and rural taxes, threatened to block approval of that budget.

He claimed the law entitled a precinct to as large a percentage of road and bridge work as it paid taxes — which would mean 75 to 80 percent of the road work that year would have been done within the city limits of Midland.

At the root of the controversy was the tax structure. Proponents of redistricting harped on the fact that urban residents were being discriminated against in the tax set-up of the county.

One property owner in 1963 complained that his undeveloped land on the city limits side of Holiday Hill Road was valued at $5,680 per acre, 453 times as much as undeveloped land across the road and, importantly, outside city limits.

The commissioners, sitting as a Board of Equalization, "agreed." They reduced the value of the city land so the ratio was only 384 to 1.

By 1966, things hadn't progressed much. That year, the commissioners voted to reduce the valuation of all non-oil, non-commercial land outside the city limits by 25 percent.

County Tax Assessor-Collector Elmo Linebarger told the court then, "I've worked up 12 tax rolls in my life, but this will be the first one I'm ashamed of."

Opposition to changing the lines centered on "convenience," as testified by Clarence Scharbauer and Murray Fasken at the time. Almost all of Scharbauer's land had been valued at $12.50 an acre.

At a public hearing on the subject in 1963, according to a then-contemporary news account, opposition ranged from "'we're satisfied with the way things are now' to a threat that it was part of a scheme to create a 'super-duper metro system' of government run by a 'hotbed of socialism.'"

Avery won the first round in the courts when District Judge Joe Dibrell of Coleman, appointed to fill in for a self-disqualified Judge Perry D. Pickett of Midland, ruled population had to be the principal factor in determining the lines, not "mere political expediency."

That ruling came in 1964. The state Civil Appeals Court subsequently overruled Dibrell, and the case went to the state Supreme Court.

Nobody, including the U.S. Supreme Court justices who later heard the case, ever figured out what the state high court had in mind.

But when the dust cleared from the federal Supreme Court decision, there was no room left for confusion.

It was almost anti-climatic when, in June of 1968, the Commissioners Court in a 3-to-1 vote at last re-drew the precinct lines on a population basis.

Carter differs with recession forecast calls

(Continued from Page 1A)

that tight budget restraints are in order, that controlling inflation is the top priority among both poor people and those who are more affluent, that waste and corruption must be rooted out and an administrative capability and efficiency has to be demonstrated."

Although the president's comments indicated that no major concern is being felt by the admnistration in regard to results of the election, which included the re-election of Sen. John Tower in Texas and election of oilman Bill Clements as Texas' governor, both Republicans, the special press briefing was attended by a large number of editors from small and medium-sized newspapers in Texas.

Newspaper editors are invited to Washington, D.C., periodically by the President's Office of Media Liaison.

The Friday editors' conference is a program introduced by the Carter Administration in which groups of 20 to 30 editors and news directors from around the country are asked up to the White House for day-long sessions with administration officials and the president.

Amid unbaked potatoes, Henry Kissinger outlines faintly rosy U.S. future

By LANA CUNNINGHAM
R-T Staff Writer

LUBBOCK — With his mysterious aura of inpenetrable intrigue, Dr. Henry A. Kissinger spoke here Friday night at the annual Chamber of Commerce banquet.

Instead of giving the audience a revealing look at himself, Kissinger left the hall cloaked in more intrigue, even, than when he arrived.

The former secretary of state during the Nixon and Ford administrations came to Lubbock to pay tribute to retiring veteran U.S. Rep. George H. Mahon, who has served the 19th District 44 years.

About 2,000 people paid $12.50 a plate and crowded into the Exhibit Hall in the Civic Center here to eat salad from a throwaway plastic carton, tender steak, unbaked potatoes and melting cheesecake.

Chandeliers dangled from the ceiling, which nonetheless revealed air conditioning and heating ducts. The Texas Tech University Stage Band provided before-dinner music from the 1940s and 1950s while the audience busily watched 50 persons on the front platform chew their food.

Kissinger spent at least 10 minutes extolling the greatness of Mahon. But the major text of his speech dwelt on foreign policy.

After spending 20 minutes painting a not-so-pretty picture of a world in conflict, Kissinger ended by outlining his faintly rosy image of a future United States.

Mahon, in introducing Kissinger, remarked the world had changed greatly in his 44 years of public service. "We have made the world more dangerous," he said.

Kissinger, who has worked in American foreign policy for more than 25 years, added the situation today is one "in which mankind has the capacity to destroy itself."

Determining foreign policy is not an easy task, he said. Decisions must be made at the time on the basis of necessity.

Nothing is more important to those in the executive branch than to know there are a few people whose advice they can count on. Kissinger said that while secretary of state from 1973-1977, he believed foreign policy should be bipartisan.

"National interests can not be considered from a partisan angle or by a temporary leader," he said, pausing a moment before adding to the end of his sentence, "otherwise known now as the government in exile."

In making decisions, the government "faces the dilemma that decisions may take a long time to work themselves out. We can not wait for decisions to be proven right. For then we can do nothing about it if wrong."

Kissinger prefaced his opinions on various actions in the world today with a basic explanation of foreign policy.

"In this central heartland of America, it may be hard to accept the proposition that the fate of freedom thousands of miles away depends upon the actions of our country — that events affect our security, our freedom."

Speaking at a slow pace, enunciating each word in his heavy German accent, Kissinger paused frequently during his speech.

America's economy is substantial, he said. But the last 15 years has shown a change in that "the U.S. economy can be shaken to the core by upheavals in distant places."

Whenever the United States has become involved in activities in other countries, Kissinger said, "we are acting in our own self-interests."

If the activities in that country, though, pose no threat to America, then the U.S. should not be there, he added.

"There can be no security without American dedication. There can be no progress without American commitment," he said.

This past week's discovery of Russian MIG-23s in Cuba has brought America's attention to that country and its soldiers.

It is one example, according to Kissinger, of where the United States could have done something a few years ago and did not.

"When Cuban soldiers first appeared in Angola in 1975, some of us thought it would be a long-range danger to America. They (Cubans) are extolling a Communist government in a country that already has so much tension and confusion.

"If the U.S. can't stop it, it will have serious consequences for world order."

Kissinger said it was suggested the United States take a strong policy against these Cuban soldiers, "but Congress prevented us from doing what was essential.

"Today, there are 50,000 Cuban troops in Africa."

The Cubans have spread to other countries in Africa and are heading for "one of the most strategic areas in the world — the Middle East and its oil supply."

"We couldn't prove the menace was there in 1975," Kissinger said. "Today, everyone understands it."

Adding to that menace are the Russian MIG-23s spotted in Cuba.

Kissinger said the government does not know if these airplanes are capable of carrying nuclear weapons, but he hopes "our administration will make a judgment that we will not accept a nuclear threat from Cuba."

Just as the Cubans can threaten the U.S., they also are in the position of threatening "vast regions" by sending MIG-23s to Africa.

Kissinger said he believes negotiations in the Middle East between Israel and Egypt eventually will be successful. He then gave an account of activities leading up to the Camp David Accord.

"Eight years ago, we (the U.S.) made a decision we would not be blackmailed in the Middle East by Soviet forces; we would not accept blackmail by extremists.

"Through many years of turmoil, those who relied upon radical measures have failed. (Anwar) Sadat (president of Egypt) decided moderation was the road to peace. Friendship with the U.S. will lead to peace, he found, not with the Soviet Union."

If the United States had listened to radical urgings then, Kissinger said, there would be a completely different situation in the Middle East today.

"Americans can take pride that through three administrations, we have made a major contribution to peace in the Middle East," said Kissinger, also a consultant on world affairs for the National Broadcasting Co.

Even though the Crown Prince of Iran and that country's ambassador to the United States were in the audience, Kissinger talked about the recent riots in that Middle East country.

Iran's location with the Soviet Union on its western border and the Middle East on its eastern boundary puts it in an "exposed and dangerous position. It is indispensable to our security."

The Shah of Iran has stood by the U.S., according to Kissinger, citing the example of the Shah's refusal to join other Middle East oil countries in the 1973 oil embargo against the U.S.

The turmoil in Iran comes from within, he said. Kissinger, who is a good friend of the Shah's, said the major problem comes from the country trying to advance from feudalism to a modern economic system.

"They are trying to do in 15 years what it took Europe 200 years to do," he said.

"There are extreme conservatives on the right for whom the Shah is going too fast. And there are those on the left for whom the Shah is not going fast enough."

A coalition government in Iran has been suggested, but Kissinger questioned, "Who is supposed to coalesce with whom?"

While the rest of the world is having its problems, Kissinger was more optimistic about the United States, saying it could be going through a period of opportunity.

"We have the resources and dedication to enhance our freedom," he maintained.

The United States is unique above the rest of the world in that "the we can recognize our problems and solve them with our own resources.

"No other nation has the unassisted means to bring about peace. The U.S. can recognize its problems and turn them into opportunities."

Great day for outdoors fun

The Midland area will in for a relatively warm autumnish day better spent outdoors than watching football indoors from the old arm chair.

But many will let the afternoon just pass without taking in today's weather, which is to include temperatures in the mid-60s, partly cloudy skies and not a hint of rain.

The low tonight is to be in near 40, and the high Monday is to be near 60.

Winds today are to be southerly at 5 to 10 mph, said a weatherman at the National Weather Service at Midland Regional Airport.

Temperatures across Texas were a little warmer under mostly fair to partly cloudy skies Saturday.

Some clouds were reported along the Coast and parts of South Texas.

Early temperature readings ranged from 44 at Dalhart to 68 at both Brownsville and Corpus Christi.

Forecasts called for more clouds along the Coast, with some rainshowers. Skies elsewhere were expected to be fair to parly cloudy. Warmer temperatures were predicted statewide.

A blast of arctic air from Canada plunged temperatures below zero Saturday in the northern Rockies and upper Midwest, where up to 1 foot of snow, gale-force winds and sharp cold have claimed at least four lives.

Three persons in Minnesota died while clearing snow and one person in Michigan was killed in a traffic accident since the storm began Friday.

Montana bore the brunt of the storm, with readings as cold as 8 below zero in Cut Bank — the nation's low — and the 90-mile drive between Great Falls and Helena was made nearly impassible in places because of heavy drifting.

Midland rests on the southern tip of the Ogallala Aquifer, a gigantic underground formation which supplies water for much of those states comprising the Great Plains.

Water is 'life blood' of Texas High Plains

(Continued from Page 1A)

contribution to our state, the nation, and the world with respect to food and fiber production for a growing population is largely dependent on the availability of water supplies. Unfortunately, water supplies of this region will be severely depleted within the forseeable future."

Virtually all Texas High Plains agricultural water is pumped from the Ogallala.

Studies made by the Texas Department of Water Resources indicate that in 1974 the total quantity of water in storage in the Ogallala underlying the High Plains was 340.1 million acre feet. Pumpage in 1974 was about 8.4 million acre feet, of which about 8.1 million acre feet was for irrigation.

An acre foot is the amount of water needed to flood one acre with one foot of water. It amounts to 325,850 gallons.

Grubb said estimates for the year 2000 indicate that 3.5 million acre feet would be available annually from the Ogallala, and that this quantity of water can be expected to irrigate about 3.2 million acres in the Texas High Plains.

By 2030, water available from the Ogallala is expected to decline to about 2.2 million acre feet.

"Consumers share directly in water resources for irrigated production. Shortages of irrigation water will decrease the quantities of food and fiber produced. The food and textile processors will suffer corresponding production restraints resulting in reductions in number of workers and reductions in incomes of consumers," said Grubb.

"The quantities of groceries and clothing available to the consumers will decline. More dollars will be required to purchase less food and clothing. Historically, a reduction of 1 percent in the quantity of food to markets has meant more than a 1 percent increase in retail prices for the remaining quantity available. The ultimate effect will be felt throughout the marketplace."

What if the economy of the Texas High Plains was shaken by a serious water crisis?

The oil industry and agriculture possibly would wind up in a standoff fight for depleted water supplies. Both would eventually lose out, speculate water experts.

Such a catastrophe would have a larger, if distant, impact on the stability of major U.S. cities, Grubb suggested.

"New York has probably got a bigger stake in the water supply of West Texas than some West Texans do," he said.

"So, we ought to get busy and work toward a successful solution to the problem before the crisis begins."

Grubb calculated that over the next 20 years the Texas High Plains will lose half of its irrigation potential from the Ogallala.

The water is going to have to come from somewhere. Grubb forsees water importation from areas that currently have a surplus as a mandatory alternative to the shortage. Costs can be expected to escalate. Or the region can take no action, sit back and allow its agriculture and oil production to tail off, he implied.

And on top of the increased costs come complex issues to resolve which require the involvement of practically every layer of government — from local officials right on up to the president of the U.S.

Some of the questions which must be wrestled with in the quest for more water to continue the economic prosperity of the Texas High Plains undoubtly will create storms of controversy:

— Do we rely on federal funds in return for more federal intervention in matters involving local water problems?

— Does industry get preferential treatment on limited water supplies or do consumers come first?

— Does the environmental quality of water have to suffer while quantity increases or merely stays static?

— Do government regulations pertaining to environmental quality place a limit on available resources?

— Do we spend our money on more water projects or do we invest in more studies?

— Do we limit the use of "substandard" water to those cities which cannot afford or do not have access to alternate sources, or do we grant exceptions?

— Do we expand energy production and increase jobs or do we conserve a finite water source?

— What's more important, money or plenty of clean, safe water?

— Should we "undo" nature — seed clouds to make it rain or import water long distances from areas that have water reserves — or do we work with nature all the way?

— Where and when does water conservation begin; does thoughtful water management have to be an expensive, long-term proposition?

Immediate answers to these questions may not be available, but Grubb said there's really no time to waste — water is hyper-critical to the future prospects of the Texas High Plains.

"The time-rate of production anticipated from recoverable reserves and the associated value of production are major factors influencing the change in economic activity over time. Based on the interdependent relationships among the sectors of the economy and the anticipated rate of production, impacts measured in terms of real income, employment and taxes to local, state and federal governments will be estimated," he said.

"To fail to assure adequate future water supplies for our state's major producing area, the Texas High Plains, will relegate this area to economic and environmental ravages of dryland farming, with associated dislocation of some of our state's best farming expertise and loss of vital production for our consumers and for the nation.

"The measurement, timing and evaluation of impacts, both direct and indirect, is thus a major consideration in planning for continued economic vitality of the Texas High Plains area. Time is a luxury we cannot afford to misuse as we plan for the future water resources development of our state."

Congress has already taken a personal interest in the future of Texas High Plains water supplies. Through the water resources development act of 1976, it directed the secretary of the Department of Commerce, in cooperation with the Secretary of the Army through the Corps of Engineers, state and local agencies, the private sector and other federal agencies "to study the depletion of the natural resources of those regions of the states of Colorado, Kansas, New Mexico, Oklahoma, Texas and Nebraska" which overlay the Ogallala.

The six-year study, expected to be completed by 1982, will focus on the water problems facing the Great Plains of the U.S.

It studies the transfer of water from rivers in areas where water is plentiful, conservation of existing Ogallala water by agriculture and industry and cloud seeding and recycling as methods which could help avoid a major water crisis.

But officials note that it could be another five-year-period after 1982 before any measures could be passed by Congress.

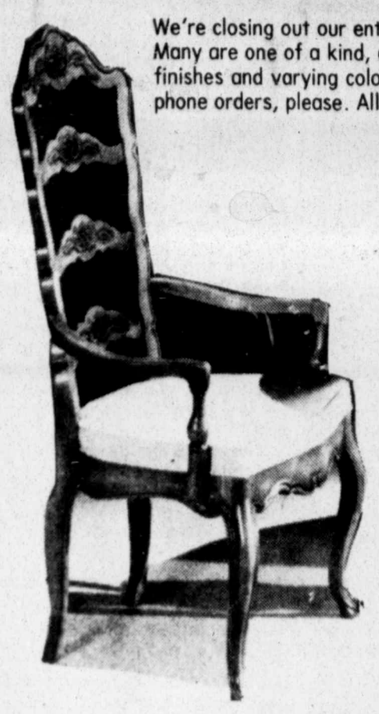

Grubb said recently the High Plains can't wait that long.

(Monday: The sky-rocketing cost of obtaining water.)

For right price, you can get out of Vietnam

Scores of Vietnamese families who fled to the United States when Saigon collapsed in 1975 have started paying middlemen to arrange passage for relatives out of Vietnam. It's called "the 10,000-mile connection." (AP Laserphoto Cartoon)

By PETER ARNETT

NEW YORK (AP) — A discreetly phoned solicitation to lonely relatives. A $2,000 check mailed to a Los Angeles post office box. A 16-week wait for the delivery.

That is the 10,000-mile connection.

But it is not hard drugs that moves along the new international pipeline linking California with Hong Kong and Ho Chi Minh City, formerly Saigon. It is human cargo, thousands of men, women and children who are being spirited out of communist Vietnam to neighboring countries and eventually on to the United States.

An inquiry by The Associated Press shows that scores of Vietnamese families who fled to the United States when Saigon collapsed in 1975 have started paying middlemen to arrange passage for relatives out of Vietnam.

Many people who have already fled admitted bribing their way out of Vietnam. But only in recent months, informed sources amongst the Vietnamese exile community report, have relatives with permanent American residency been able to specifically order the passage of a loved one from Vietnam. This development, has come for two reasons, the sources report.

The first is that some corrupt Communist officials in Ho Chi Minh City are aiding the exodus — at a profit. The Carter administration says this may even be government policy and has rebuked the Vietnamese government for "the practice of forcing the refugees to buy their way out. It is particularly reprehensible."

The second reason is that the now-decimated Chinese business community in Ho Chi Minh City is using its hidden assets to arrange the payoffs for boat people, in a financial operation — also highly profitable — that is similar to the money black market that functioned throughout the Vietnam War.

Parallel to this situation has been an easing of import restrictions by the Vietnamese government that is allowing relatives in the United States to regularly send hundreds of dollars worth of cigarettes, blue jeans, cosmetics and other items that are immediately convertible to cash on the black market.

Vietnamese in Washington, D.C., and New York who admit to having successfully used the 10,000-mile connection, or who already have money in the pipeline, say it works this way:

The exile grapevine has passed around phone numbers for contacts in Los Angeles who prove to be Vietnamese of Chinese ancestry. They accept names and addresses of relatives in Ho Chi Minh City selected for passage, along with the promise of $2,000 for each person, payment in advance, delivery guaranteed.

When the checks clear, the names are passed on to Hong Kong where Chinese who have lived in Vietnam take over. They have access not only to ships such as the Hai Hong currently anchored off the coast of Malaysia with 2,500 refugee aboard, but also to ethnic Chinese who are still in Ho Chi Minh City. Apparently, when Chinese businesses were closed down earlier this year the proprietors were able to hide most of their gold holdings.

Notified by coded letters of the people targeted for the trip out, these Chinese not only pay off the Ho Chi Minh City officials but arrange for small fishing boats to pick the passengers up and rendezvous with larger craft at sea. Generally, the transfer ships are small craft capable of carrying around 150 to 200 passengers.

They sail across the South China Sea to Malaysia where they have been landed secretly. From then on it is up to relatives in the United States to arrange further financing and the paper work to get them into America.

Estimates of the number of boat people handled through the 10,000-mile connection are hard to make, but the AP inquiry suggested that increasing numbers of Vietnamese are resorting to it. Dozens of exile families contacted recently admitted to have relatives newly landed in Malaysia and Thailand.

Students at this school are all new governors

By HARRY ROSENTHAL

ATLANTA (AP) — Eleven of the nation's newly elected governors went to school Saturday to learn from 14 veteran chief executives how to shift from saying "If I'm elected governor ..." to what comes after the swearing-in ceremony.

"A campaign is like a war and administering the government is like administering in times of peace," said Colorado's Gov. Richard Lamm, who attended a similar seminar four years ago and came back as an instructor.

"There's nothing that prepares you to be governor," said Lamm. "I made fewer mistakes because I spent two days listening to other governors," he said.

The campus was a plush golf resort by a lake about 30 miles north of Atlanta and the textbook was a down-to-earth 320-page manual. The $27,000 cost of the two-day seminar, including tuition and room and board, is borne by the Civil Service Commission, which is charged with providing training to elected officials at all levels.

Gov. Julian Carroll of Kentucky, chairman of the seminar, said it was to help the students — who for the most part are recovering from elections that saw 20 newcomers getting a lease on state mansions — learn how to cope with the transition period.

"When Nov. 7 came, I was like a marathon runner who passed himself to go across the finish line and then collapse," said Florida's Robert E. Graham, a Democrat with 12 years of experience in the state legislature.

The seminar teaches legislators like Graham how to get started as administrators.

The textbook, for instance, notes that "it is probably unreasonable to expect that all unethical conduct in government can be prevented" and then goes on to tell the new governors how to cope with it.

The novice learns how to offer jobs and avoid embarrassment when the offer is rejected; how to fire people without being splashed with venom; and how to avoid every old settlers' reunion.

The new governors are told to resist the temptation of bringing in the same team that got them elected.

Lamm quoted former New York Mayor Fiorello LaGuardia: "The biggest challenge in politics is learning to say no to your friends."

Lamm said: "Generals don't always make good governors or presidents, nor do campaign managers necessarily make good executive assistants."

The textbook urges that a governor appoint a "perspective keeper."

"The governor's office is an easy place in which to lose perspective. Governors seldom hear criticism, except from those on whose toes they happen to be stepping at the moment."

The textbook warns that "someone assigned fulltime to keeping perspective would probably be the first to lose it."

Nevada is now gold state

CARSON CITY (AP) — Nevada, the silver state, is now the gold state in this country, producing more bullion than any other part of the United States for the first time in many years.

And with more Nevada mines expected to start gold production in 1979, the title of No. 1 gold producer should remain here, mining industry and regulatory agency spokesmen say.

Tge Nevada production pales before the world-leading South Africa mines, which have yielded as much as 29 miilion troy ounces of gold annually in recent years, however.

Nevada's production, according to the U.S. Bureau of Mines, was 324,003 troy ounces in 1977.

South Dakota had been the longtime industry leader in gold yields but slipped into second place in producing 304,846 troy ounces in 1977. Utah ranked third with 210,501 troy ounces of gold.

The gold produced in Nevada amounts to more than 10 tons of the precious metal, with a value, at current prices, of more than $60 million.

Hospital strike over

TEXARKANA, Ark. (AP) — A 143-day strike ended Saturday when officials of Wadley Hospital and members of the Communications Workers of America, local 12271, reached agreement.

Armchair plot broken by army

MADRID, Spain (AP) — The army broke up what a high military source called an armchair plot to overthrow the government and a handful of right-wing military men and police were under arrest Saturday.

Nautilus OF MIDLAND, INC. PRESENTS
MYTH VS. TRUTH ABOUT PHYSICAL CONDITIONING
MYTH: Strong muscles are needed only if you are a professional athelte.
TRUTH: Strong muscles are firm and well toned. You move easily, more fleidly;, and you look better
MYTH: When you stop exercising your muscles will turn to fat.
TRUTH: Muscle is about 70% water and water cannot turn into fat. You store fat only when your caloric intake is more than your caloric expenditure. When you stop exercising that expenditure decreases. Unless your food intake is reduced, the calories which used to be burned off will be deposited in your body as fat. MUSCLES THRIVE ON ACTIVITY. FAT THRIVES ON INACTIVITY.
MYTH: Exercising once in a while is better than not at all.
TRUTH: You are unaccustomed to exercise, occasional strenuous activity can put undue strain on your body. A regular program--at least twice a week--is the least exercise you should do.
MYTH: The older you are the less you need exercise.
TRUTH: Proper exercise will help maintain strong joints and good circulation. Exercise, therefore, is more important for older and otherwise less active people.
MYTH: Proper exercise is very time consuming.
TRUTH: High-intensity exercises can get you in shape--and keep you in shape--with only 30 minutes a session three times weekly
MYTH: Women should avoid exercise because they will get large muscles and lose their femininity.
TRUTH: The capacity for large muscles is a matter of genes and hormones. One of the key factors in developing large muscles is the male hormone., testosterone, which is only present in minute quantities in most women. Conditioning can only work with the muscle capacity you already have. Women do not have the capacity to develop large muscles, therefore, no matter how much conditioning they do, they will not produce large muscles.

"In Dawson County," said Mayor Lloyd Cline, 'we've got three main crops – cotton, cotton and cotton."

Lamesa Mayor Lloyd Cline is pleased with the steady but not dramatic growth of normally cotton-rich Lamesa and Dawson County. "I don't have any problems," he says. Cline is a banker and farmer.

Lamesa—'next year' country

Story and Photos
By ED TODD
R-T Staff Writer

LAMESA — This is "next-year" country.

The farmers — and who doesn't farm in Dawson County? — figure that if their cotton crop hits rock bottom one year, well, it'll surely make a bumper crop next season.

Larry Arnold, who came down here from Idaho about a year ago to edit the twice-weekly Lamesa Press-Reporter, said recently: "If you don't make it this year, you'll make it next year."

Cotton is to Lamesa what oil is to Midland: It's the economic mainstay.

"In Dawson County," said Mayor Lloyd Cline, "we've got three main crops — cotton, cotton and cotton."

But cotton production is faltering this year. And "no thanks" for that is due, first of all, to the two-year drought and then by the recent rains and drizzle that broke the drought but which hampered the bringing in of what cotton is fit to be harvested.

Lloyd Cline, the 49-year-old mayor of this town of 12,000 folks, reckons the county will pull in an "average" crop next season. And here, average is a near-bumper crop of between 200,000 and 300,000 bales of cotton.

"Next year is going to be a good year," said Cline, "and I'll tell you why: the tremendous underground seasoning (soil moisture)."

That needed but untimely seasoning came via seven to 10 inches of rainfall, which has virtually blanketed the countryside since mid-September.

"It has fallen perfectly," said Cline.

But due to the overcast, the sun hasn't been out long enough to help the cotton fully mature and open up for picking this season.

Dawson County today is a virtual sea of cotton fields.

Back in 1903, the settlers here might have named this oasis on the High Plains "La Cotton" instead of La Mesa had they the foresight. But back then, this was ranching country.

Cattlemen are few nowadays.

"If we get rainfall in April or May (at planting time), we'll make an average crop — barring hail or insect problems," said Cline, who farms 5,000 acres in the east part of the county and who runs one of two competitive banks in town.

He's president of First National Bank, and likes to point out that assets of his bank, Lamesa National Bank and Lamesa Federal Savings and Loan Association total approximately $175 million.

Cline is also a man of some political clout and tact and is a cotton promoter. He is president of the 25-county Plains Cotton Growers, Inc. About four million acres of cotton are planted in those counties. He has been mayor since 1968.

"I love it; it's wonderful," he said of farming. "(But)...the only reason I farm is to make money. It's not a hobby. When it ceases to make money, I'll get out of it."

This county of 1,510 square miles of mostly sandy loam soil is thoroughly cotton country. Outside Lamesa, about 6,000 people live on the farm and in the many communities throughout the county.

Cotton is the economic mainstay, though petroleum production increasingly is making inroads.

Cotton and oil, coupled with other income-generating industries here, are omens for prosperity.

"I'm optimistic," said Cline, who attributes his success as a banker, farmer, mayor, cotton promoter and family man to "a lot of hard work," "long hours," the setting of goals and the blessings of God.

"The Good Lord has really smiled on me," said the cigar-chomping mayor, who grew up on a farm in the Key community. "I'll give Him credit for that.... He gave me the opportunity to do it."

He predicts a prosperous "next year" for Lamesa and Dawson County.

"I think business in '79 will be good because of the crop outlook and oil activity," said Cline. Oil activity is particularly heavy in the "well-heeled" Klondike area in the southern part of the county, but new wells are being brought in in other sections of the county.

Along with cotton and petroleum, Lamesa's economy is sustained by related industries, such as a cottonseed oil mill fed by the 32 gins across the county, manufacturers of cotton gin and oil field electrical control systems and part, sand manufacturers of farm equipment.

The city is experiencing a conservative growth, said Cline.

"It has been a slow, gradual, steady growth," he said. "We project now a 4 percent growth annually."

The city, which operates on a $2 million budget, is virtually debt-free, has a "great" school system, good water, has good police and fire protection, no social cliques to speak of, and holds crime and strife down.

"We've got great cooperation between the city and county government," he said.

"We're trying to improve," Cline said, "but nothing's going to happen here in great big flashes."

The rural people and the townspeople are "pulling for the same common growth." And in that regard, there is no dissension, such as in some other city-county relationships, where goals and economic dependence are not so acutely shared as they are in Lamesa and Dawson County.

Banker-farmer Cline and Editor Arnold project "the best" for Lamesa and Dawson County on the farm front.

"Of course, this next year, we're going to be the top cotton-producing county (in the state)," Arnold said.

Dawson County has been there before, such as in 1973, when farmers produced 323,094 bales of cotton on 270,000 acres. The low ebb, at least in the past three decades, came in the drought of 1953, when 12,300 bales were ginned.

And the most recent poor year was 1974, the year after the bumper crop, when 35,090 bales were produced in another dry year.

This year, County Agricultural Agent Joe Ed Wise projects 75,000 bales from 300,000 acres of cotton fields. However, only about 20 percent of the fields have been harvested and, due to the scrawny crop, much acreage has been and will be plowed under rather than stripped.

But the optimism that belongs to Lamesa and its farming communities holds that next year will be far better.

And that spirit, in part, is what helps make Lamesa Larry Arnold's kind of town.

"The people make up for the lack of scenic beauty," said Arnold, who moved here last January from the high desert region of south central Idaho.

The newspaper he edits seeks to bolster the community.

"We feel like we're a community paper," said Arnold, 27. "We're going to promote the community....

"Of course, we have problems in the community that we have to write about.... What brought me here was Mr. (Walter) Buckel (the newspaper's publisher), and the community spirit has kept me here."

Cotton is No. 1 in Dawson County. Petroleum is trailing.

Newspaper editor Larry Arnold came to Lamesa about year ago from Idaho, and "the community spirit has kept me here."

On cold, damp days in Lamesa, this bench on the courthouse square becomes pure ornamentation.

TV commercials wisely treating elderly better

WASHINGTON (AP) — Television commercials are treating old people better, but that is only because the elderly represent a big money market, according to a study released Saturday by a Maryland communications expert.

"The impact of the Gray Revolution is being reflected in televised commercials," said Kathleen Jamieson, an associate professor at the University of Maryland's Communications Research Center.

The survey said television advertisments are showing an increased awareness of the elderly — that 14 percent of the 300 ads studied portrayed this segment of the population last month, compared to 11 percent in January 1978.

"That increase reflects an awareness that the elderly constitute a $60 billion-plus market," said Ms. Jamieson.

She said the study was based partly on 899 characters portrayed in the 300 commercials broadcast in October. Also used in the comparison were congressional hearing Ms. Jamieson compiled while she was on the staff of the House Select Committee on Aging.

Elderly women "still do not fare well" in television commercials, according to the study, which was presented Saturday to a meeting of the Gerontological Society in Dallas.

"As the age of a female character advances," Ms. Jamieson's report said, "the likelihood that she will sell a digestive aid, a laxative, a pain reliever, or a denture product increases."

On the other hand, the study said, the older the female character, the less likely she will sell a beauty product.

"Older men function more often as authority figures (in ads) than do older women," it said.

The study said young women still appear more frequently in televised commercials than people of any other age group. But it said the number of older women used in ads has increased.

The study also found a greater sensitivity in the marketplace to the advertising of products not generally associated with the aged. For example, it said, a nationwide bus company advertises "senior citizen days" for older people wanting to travel more extensively.

The report also said four televised commercials last January "pivoted on the assumption that aging" signals a decline in one's mental capacities.

Rising prices force food stamp program to unpleasant crossroad

WASHINGTON (AP) — Higher grocery prices will drive the food stamp program almost $275 million over budget during the fiscal year beginning next fall, according to new estimates by the Congressional Budget Office.

And for the year following, the agency said, the program is expected to cost almost $762 million more than the spending limit imposed by Congress 14 months ago.

The unexpectedly high cost of the program leaves the administration with two unpleasant options: to cut benefits with an election approaching, or to ask Congress to raise the spending ceilings at a time when spending cuts are needed to help control inflation.

A cut in benefits to meet the fiscal year 1980 ceiling would equal between two and three weeks worth of benefits, which now amount to about $27 a person each month, the agency said.

The problem is developing because federal law requires food stamp benefits both to keep pace with inflation and to stay within dollar limits on total spending.

In setting the ceilings, Congress estimated how much food prices were expected to rise and how many people were expected to be eligible for food stamps, then added a buffer of 10 percent to the resulting cost estimate.

But the estimates made early last year are turning out to be low.

The budget office expected food prices to rise by 4.8 percent this year; its new unofficial projections call for 9 percent. It had expected a 3.8 percent increase next year; it now expects an 8.1 percent jump.

In dollar terms, a bag of groceries costing $10 in 1967 had been projected to cost $21.97 by late 1981. However, the price already is at $20.58 and now is expected to reach $25.10 in late 1981.

In the year that ended Sept. 30, William Hoagland of the budget office said, the program cost almost $5.5 billion, well within the ceiling of $5.85 billion.

This fiscal year, it is expected to cost $6.12 billion, near the limit of $6.16 billion.

But in the fiscal year beginning next October, it will break the limit of $6.19 billion by almost $275 million. And in fiscal 1981, when Congress directed a $6.24 billion ceiling, the food stamp program now is predicted to cost almost $7 billion, he said.

Voters said behind anti-spending amendment

NASHVILLE, Tenn. (AP) — Conservatives drafting a proposed U.S. constitutional amendment that would limit federal spending were told Saturday that voters are in their corner.

This, Detroit pollster Robert Teeter said, will put pressure on Congress to approve the amendment because "the House of Represensatives will be responsive to public demand."

Speaking to about 300 politicians, businessmen and economists at a weekend meeting of the National Tax Limitation Committee, Teeter said, "The most important issues in this election were inflation and taxes."

The sponsoring committee grew out of tax reform efforts by Ronald Reagan when he was California governor in 1972. It is one of several organizations whose goal is to reduce taxes, government spending and the size of the federal government.

Milton Friedman, Nobel prize-winning economist with Stanford University's Hoover Institute, contends there is only one way to reduce the size of government, by limiting federal spending.

Paul Gann and Howard Jarvis, sponsors of California's Proposition 13 which reduced local property taxes by $7 billion, split over the issue of how to control federal spending. Gann supports the proposed constitutional amendment, and Jarvis favors grassroots pressure.

Friedman was keynote speaker for the three-day meeting. Gann is to speak Sunday.

The proposed amendment would tie increases in federal spending to the growth of the gross national product — the total of all goods and services produced in the United States.

The limit could be exceeded in times of emergency, such as war, by a two-thirds vote of the Senate and House. It could be increased permanently by a three-fourths vote of each house.

The committee plans to complete the draft by late January, present it to Congress in February and then lobby for Congress to pass it before the 1980 elections so that it could be submitted to the states for ratification.

Trial going to jury

CLEBURNE, Texas (AP) — The trial of a West Texas doctor charged with attempted murder of his mother is expected to go to the jury Monday.

Dr. Milton Rains, 51, of Littlefield, Texas, could get 2 to 20 years and a fine of up to $10,000 if he is convicted.

He is accused of trying to smother her with a "mask" of tape and tissue over her face and nose, in what some say may have been an effort at a mercy killing.

Rains said he moistened some tissue paper so it would soothe his mother's chapped lips and used some tape to hold it in place. Nurses at Johnson County Memorial Hospital walked into the room and pulled the tape loose, apparently after it had been in place just a short time.

His mother, Bertha Brown, died last month of cancer in a Cleburne nursing home, three months after the July 29 incident that led to charges being filed against Rains by his brothers.

Two pathologists had testified Thursday for the defense, saying the tape and tissue on Mrs. Brown's face could not have suffocated her.

District Attorney John McLean called the chief medical examiner of Dallas County and the director of respiratory services at Johnson County Memorial Hospital to the stand Friday.

Their testimony was just the opposite. They said considering that Rains' mother suffered from cancer, low respiratory rate and a heart condition and was heavily sedated.

They said it would have caused death within 10 minutes.

Defense motions for a retrial were denied twice Friday. The defense said television crewmen who filmed the jury outside the courthouse early in the week created undue pressure on the panel.

Banks ask for permits

AUSTIN, Texas (AP) — First Texas Savings Association of San Angelo and Citizens Savings and Loan Associaton both have applied for permission to open a branch offices at Midkiff Road and Farm 868 in Midland.

Commissioner L. Alvis Vandygriff of the Texas Savings and Loan Department set a hearing for Jan. 11.

He said the applicants contend that the proposed branch offices will not "unduly harm" any other savings and loan institution in the area.

Clements reign predicted to stir up criticism

AUSTIN, Texas (AP) — George Steffes, the Californian in charge of helping Bill Clements make the switch from private citizen to governor, predicted Saturday Clements want to — if at all possible — meet personally with all the Legislature" before the session convenes in January.

"Bill deals with people personally, will be a "very active" governor who can be expected to stir up criticism.

Steffes said Clements "is going to and he is certainly planning on doing that with the Legislature," Steffes said on the weekly radio show, State Capitol Dateline.

The Legislature includes 150 House members and 31 senators, as well as Lt. Gov. Bill Hobby.

Clements, a wealthy Dallas businessman, shaded Attorney General John Hill by approximately 16,000 votes out of 2.3 million votes cast on Nov. 7 to become Texas' first Republican governor in over 100 years.

He has already had over 300 invitations to speak, Steffes said.

He said one of the first things that caused Clements' campaign to go so well was that Clements "never doubted for a second that he could become governor of Texas ... He knew he could win and he passed that right down the line" to his supporters.

He said the fact that most Texans had not heard of Clements when he began the governor's race "probably made Mr. Hill most over confident." Clements' victory, too, said Steffes, could be attributed to the feeling of the average Texan that Clements was not a politician. "They see him as one of them," Steffes said.

Steffes also was in charge of California Gov. Ronald Reagan's transition office in 1966, and he said he came to Texas to help Clements because Clements is a friend. Steffes said, however, he would not join Clements' staff after he takes office in January.

Asked what kind of governor he expected Clements to be, Steffes replied:

"He'll be dealing with controversial issues, and it goes without saying that you're going to have problems. The only time you don't have problems is when you're not doing anything. He's going to be a very active governor, so there will be people criticizing him as well as people backing him."

Steffes also described Clements as "decisive," "direct," "very colorful," "very persuasive" and "very outspoken."

"There's going to be a lot of interest in what he has to say," Steffes predicted. "I obviously think he's going to make an outstanding, an excellent governor. He will be very good for this state. ... I think the thing he wants most in this world is to be remembered as a great governor of Texas because he loves this state so much ..."

FBI tapes make jurors witnesses

HOUSTON (AP) — A young prosecutor says FBI audio and video tapes played at the Cullen Davis murder-for-hire trial converted jurors into witnesses in an alleged conspiracy to commit murder.

"We've got 12 people crowded into the back of Cullen's Cadillac and looking and listening while the guy commits the crime he's charged with," said Jack Strickland.

"Essentially, it is a crime of words ... conspiring. Planning. And the jurors heard him do it. It's great."

Strickland, 35, is one of four assistant district attorneys prosecuting the millionaire Fort Worth oil heir on a murder solicitation charge.

Davis contends he was framed by his estranged wife, Priscilla, and others.

The state alleges that Davis, 45, ordered a onetime pool-shooting and drinking crony named David McCrory to hire a gunman to kill the judge presiding over his divorce case.

Instead, McCrory, 40, went to the FBI and cooperated with authorities in obtaining the tapes the jurors saw and heard last week.

The tape recordings capture two alleged parking lot conversations between Davis and McCrory last August in which the murder-for-hire scheme was discussed.

The videotapes permitted jurors to see the alleged exchange of a silencer-equipped pistol and $25,000 the state said was earmarked to pay a phantom killer.

The defense has not challenged the integrity of the tapes, nor has it attempted to show that the person seen and heard with McCrory was someone other than Davis.

Dallas man killed, two sons injured in area plane crash

VAN HORN — A 45-year-old Dallas rancher was killed and his two sons were seriously injured Saturday morning, when their single-engine Cessna 172 aircraft crashed on flat ranchland.

The accident occure in a mountainous region 10 miles north of Kent in Culberson County.

Killed on impact was William Charles Adams, who was piloting the plane in a Dallas-to-El Paso business trip with alayover in Pecos. The plane crashed about 8 a.m.

Injured were Adams' sons, Rodney Adams, 17, who was in "serious but stable" condition, and William Charles "Chuck" Adams Jr., 25, who was in critical condition and undergoing surgery late Saturday night. Both were admitted to Sierra Medical Center in El Paso.

They were airlifted by an U.S. Army helicopter from Culberson County Hospital in Van Horn to the El Paso hospital.

Justice of the Peace Cecilio Villalobos of Van Horn said the younger son was thrown from the aircraft on impact.

He said the plane took off from Pecos about 7:30 a.m. Saturday, and crashed at about a 45-degree angle, bounced and landed upside down. He said there was no fire.

Conservation proposal before school board

LAMESA — Consideration of an energy conservation proposal and updating and revising a number of board policies will get the attention of the Lamesa School Board Monday in its regular meeting.

Trustees also are scheduled to hear reports on tax collections and the hearing before the State Tax Assessment Practices Board at the 7:30 p.m. meeting in the high school library.

Donations taken for medical bills

Donations for the medical expenses incurred by Bill Drake, an area private surveyor, may be made through Tom H. Stovell, senior vice president of the Commercial Bank and Trust Co. in Midland.

The fund has been set up by the Permian Basin Chapter of the Texas Surveyors Association. Drake is an active member of the association and a native Midlander.

He currently is in Shannon Hospital in San Angelo after undergoing extensive surgery, tests and treatment.

Funds will be used entirely for medical expenses.

Capitol Hill employees try to sell services as a team to newcomers

By IRA ROSENFELD

WASHINGTON (AP) — Several Capitol Hill employees, bucking the axiom that sudden unemployment goes with political territory, are trying to sell their services as a team to a congressional newcomer.

Seventeen staff workers figured their team should not be broken up simply because the boss — Rep. Newton Steers, R-Md. — lost his bid for re-election.

So the 17 placed an advertisement in a Capitol Hill newspaper, seeking to hire themselves out as a single unit to a freshman lawmaker in need of an experienced staff. It is an apparent first in the nation's capital, where thousands of people risk shortened careers by working for politicians whose jobs are at the mercy of the voters back home.

Steers was upset by Democrat Michael Barnes, a member of the Maryland Public Service Commission. When Barnes arrives in January for the 96th Congress, the staff faces the prospect of joining Steers among the unemployed.

The advertisement was placed in the "Roll Call," a newspaper devoted to Capitol Hills news. It made this pitch:

"Super staff seeks legislator interested in innovative constitutent service, problem-solving legislation to replace super boss hit from behind in the Nov. 7 election. Staff called excellent by area newspapers.

"Comes complete with legislative assistants, special projects, press assistants and a beautiful black receptionist. Complete Set $228,000."

There have been no takers. But William Grigg, a former newspaperman and Steers' administrative assistant, says the ad has produced some 100 calls for more information. He said a few feelers are out for a couple of individuals on the Steers staff, but nothing so far for the entire group.

Many of the 17 staffers have been working together since the days of Republican Rep. Gilbert Gude, who held Steers' seat for eight years before retiring in 1976. Steers kept Gude's staff when he took office.

Then came Steers' Nov. 7 loss to Barnes. It shocked much of the staff — as well as the congressman — who had felt secure following summer polls showing him well ahead of his opponent.

Asked if the staff would work for Barnes if the opportunity arose, Grigg said he guessed it would be possible. "But we feel kind of awkward about it," he said.

Grigg said Steers' staff agreed to place the ad because "we've had a really great time for two years and I wanted to express from my standpoint how good the staff has been and how much I've enjoyed being a part of it."

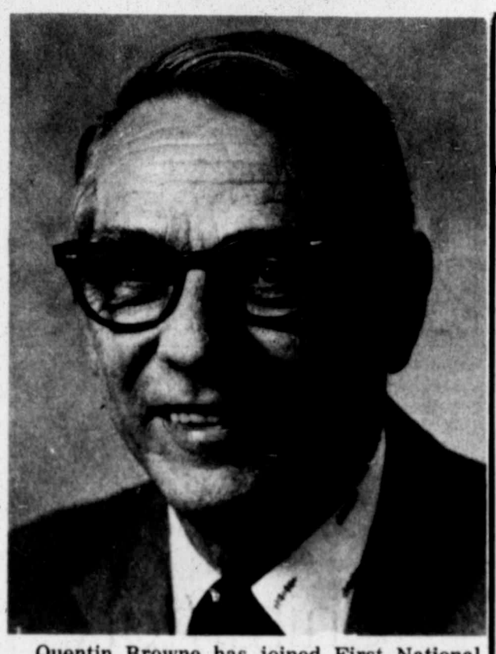

MC board sets Tuesday meeting

Review of the annual audit report and a discussion of liability insurance for Chaparral Center will highlight a routine meeting of the Midland College Board of Trustees Tuesday.

Trustees also are scheduled to discuss a personnel retention policy at the 4 p.m. meeting in the college board room.

Big Spring instructor named Teacher of Year

BIG SPRING — Mary Louise Deats, business administration instructor at Howard College, has been named College Business Teacher of the Year for District 18 of the Texas Business Education Association.

Mrs. Deats received her bachelor of business administration degree from Southern Methodist University and her master of business administration from Texas Tech University. She also has completed graduate work at North Texas State University, the University of Houston and The University of Texas at Austin.

Mrs. Deats has taught for 14 years. She currently is advisor for the Office Education Association and was Lass-O Club advisor for six years.

She currently is a member of the Texas Junior College Teachers Association, Texas Business Education Association, National Education Association and Texas State Teachers Association.

She was project director of a federally funded study of the manpower needs of Howard County for Howard College in cooperation with the Texas Education Agency.

Water shutdown results in loss of $292,615

BIG SPRING - A shutdown of water deliveries to oil companies has resulted in lost revenues totaling $292,615 by the Colorado River Muncipal Water District through the first 10 months of 1978 compared to one year ago, according to district officials.

Oil companies were cut off from deliveries as of May 1 because the district wanted to conserve supplies at Lake J.B. Thomas for municipal use.

Although revenues from municipal customers was up $140,000 in reaching $4,166,646 for the period, the $1,402,326 in sales to oil companies was down $728,000 through October.

The only relief from a financial disaster was the interest earned by trust funds, made possible by a refunding issue last year, which amounted to $271,673. The total revenues through October stood at $5,939,046, down $292,615.

Operating expenses of $2,766,101 were up $455,333 for the period. Of this, $1,594,966 was in electric energy charges, which was $373,000 more than for the same stretch last year.

Consequently, the district has been able to transfer $747,000 less into its net revenue fund for debt service and reserves than was the case a year ago.

Lap riding is dangerous

DETROIT (AP) — If your child is sitting on your lap in a moving car, his chances of death or serious injury in an accident are greatly increased, according to a University of Michigan study.

While many people believe they can restrain a child in the event of a crash, researchers say the child would probably be safer alone, even without a seat belt, and certainly safer if belted.

Researcher Lawrence Schneider of the university's Highway Safety Research Institute said Friday the worst combination of circumstances is a child sitting on the lap of an adult who is not wearing a seat belt.

"The child on your lap would be crushed between two forces, you and the vehicle. If the child were seated alone, at least it wouldn't be caught in the middle," Schneider said.

Pope John Paul II pledges battle for unity of church

VATICAN CITY (AP) — Pope John Paul II pledged Saturday to emphasize unity among Christians and said doctrinal teaching in the Roman Catholic Church must be renewed to stress this to new generations of priests.

The 58-year-old Polish-born pope said the church "not only wants to continue to go forward...toward the re-establishment of unity, but desires ...to intensify at all levels its contribution to this great movement of all Christians."

In his 15-year papacy, Pope Paul VI seldom spoke in such forceful terms about the need for Roman Catholics to fall into line with new doctrine in seeking unity with other Christians.

John Paul II made the statement to cardinals and others of the Secretariat for Christian Unity meeting here.

He called for greater efforts to promote the Christian unity called for by the Vatican Ecumenical Council of the early 1960s, saying the council demanded a special effort in the teaching of theology and the formation of the attitude of future priests.

Catholic and Anglican theologians have overcome many differences in the fields of papal supremacy and the Eucharist, or Holy Communion, without achieving full agreement. Their conclusions have been approved in principle by the Vatican but are often ignored in the training of priests at Catholic seminaries.

The pope criticized Catholics who celebrate the Eucharist jointly with other Christians. He called it a sign of "superficiality" ignoring the religious contents of the Eucharist in order to give the impression of thorough doctrinal unity.

There was a good balance of fun and games for all Saturday at Memorial Christian Church on Andrews Highway when area Boy Scout leaders had a pow-wow. Cub Scout Pack 231, Den 2 leader Linda Hammer of Midland, left, gets pushed off the jousting board by her friend, Bette Payne of Pecos, during the day-long event. (Staff Photo)

Pilot's body recovered from Mediterranean

ANKARA, Turkey (AP) — A Turkish destroyer recovered on Saturday the body of a U.S. Air Force pilot whose Phantom F-4 jet exploded and crashed into the Mediterranean, U.S. Embassy officials said.

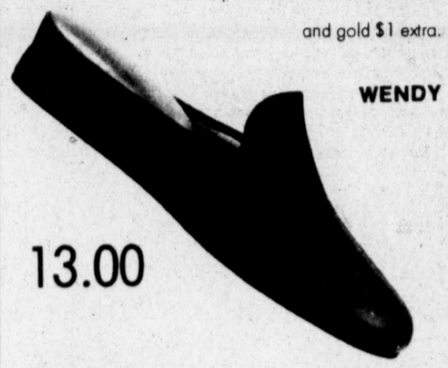

A second officer in the plane was injured when the jet went down Friday about 40 miles northeast of Cape Andreas, the tip of the Turkish-controlled northern part of Cyprus.

An Air Force spokesman in Spangdahlem, West Germany, identified the dead pilot as Maj. Charles R. Koster, 34, of Carrollton, Ill.

The spokesman said Koster was on temporary duty at the NATO base in Incidlik in southeast Turkey and was on a training mission when the crash occurred.

Russians question U.S. unanimity

MOSCOW (AP) — Many Russians seem bewildered by the lack of unanimity in American government, but their leaders have shown they realize that U.S. senators as well as presidents must be courted.

"Doesn't your president run your country?" one Soviet journalist asked an American newsman covering a 12-man Senate delegation that met with Soviet leaders here last week.

Trying and sometimes failing to restrain their indignation, Soviet leaders gave red-carpet treatment to the independent-minded group, which finger-wagged its way through three big cities, speaking in a dozen different voices on as many different issues.

"These men are poking a stick into the spokes, in the Russian proverb," the Russian added.

But the men in the Kremlin know that in order to gain a strategic arms limitation treaty with the United States they must not only reach agreement at the negotiating table but help get the treaty through the Senate.

The Senate group ended its week-long Soviet tour Saturday, flying aboard an Air Force plane to Budapest, where they met with Hungarian Communist Party chief Janos Kadar.

After a climactic meeting Friday with Soviet President Leonid I. Brezhnev, delegation leader Abraham A. Ribicoff said, "If we've done anything, we've helped to educate them in how the U.S. political system works.

"Every man was on his own. Every man expressed his own thinking," the Connecticut Democrat said.

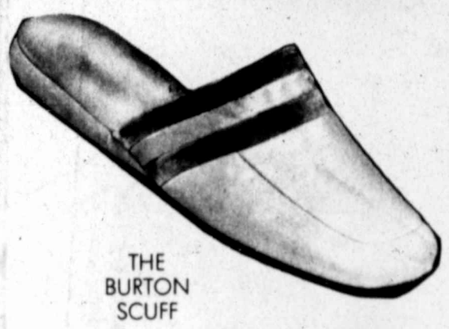

For six years Brezhnev and his arms negotiators have dealt with American presidents and their arms negotiators on the second round of SALT until, as both sides agree, only "a fistful" of issues remain.

Now both Moscow and Washington are focusing their attention on the 100 men in the Senate who must ratify their work, and last week the Kremlin's energies were focused on Ribicoff's 12-man group.

Presenting a $5,000 check from Gulf Oil Foundation to Midland College is Dr. J.L. Huitt, left, vice president of the Western Division of Gulf Oil Exploration and Production. Midland College president Dr. A.G. Langford accepts the check for the college. (Staff Photo)

Foundation gives grant to MC

A grant of $5,000 was received last week by Midland College from the Gulf Oil Foundation in support of its Petroleum Technology Program.

"Gulf has been an extremely good corporate citizen in Midland for many years," noted Dr. Al G. Langford, college president, "We are indebted to Gulf for its continual support of our growing Petroleum Technology program. They have provided financial contributions for purchase of necessary laboratory equipment. But they have been equally generous with their time and knowledge regarding the needs of the oil industry and in which Midland College can be of assistance in providing trained employees."

The grant is part of the Gulf Aid to Education Program, under which approximately $3 million will be distributed this year to further the educational programs of worthy agencies, colleges, and universities in the United States and its territories.

In addition to special grants of this type, other phases of Gulf's comprehensive program for both students and institutions of higher education include undergraduate scholarships, employee gift matching, capital grants, departmental assistance grants, and graduate fellowships.

The grant was presented to Dr. Langford by Dr. J.L. Huitt, Western Division vice president, Gulf Oil Exploration and Production Co.

Competition key to oil's strength

By MAX B. SKELTON
AP Oil Writer

HOUSTON (AP) — D. Truitt Davis and I. Frank Pitts are a couple of Texas independent oil operators who say the petroleum industry has no need for presenting a united front on all its many controversial issues and problems.

They say competition among its various segments is the key to the industry's strength and survival.

C. Alan Roberts

Pitts has just succeeded Davis as chairman of a group formed a year ago to advise the American Petroleum Institute, oil's largest trade group.

The Independents Advisory Forum resulted from some criticism API had become too preoccupied with major company problems. Formation of the advisory group was dedsigned to strengthen input by independents.

"It's not our purpose to reach accord on all issues, but rather to improve understanding and broaden our concern so as to avoid actions which unnecessarily infringe on others," said Davis, an Abilene independent.

Pitts, a Dallas operator, said he agrees.

"If leaders in all segments become more attuned to the legitimate needs of others, we will have made a giant step toward minimizing government interference in our affairs," Pitts said.

Davis said all oilmen have a fundamental unity of purpose in the sense they want the industry to function efficiently and profitably in providing national energy needs.

"But I've never fully subscribed to all the pleas for industry unity issued periodically by one industry voice or another," he said.

"Our diversity is after all fundamental to our survival as a free enterprise operation. If oilmen ever really got together on purpose and plan, or fully agreed on politicians and parties, I suspect we'd be quickly ground to bits by the political forces which have other motivations."

Pitts said the different segments of the industry are fiercely competitive even though they do not have many fundamental differences.

"Each segment has its unique role to play and our competitiveness sometimes leads to screaming at each other," he said. "But it's because we are competitive in a constructive sense that we succeed in getting energy products to American consumers at prices far cheaper than they would otherwise be available, and in quantities far exceeding those on which we could count under any other structure."

"The real impression we need to leave with the general public is we are truly competitive, able and willing to provide consumers with energy resources at costs far less than would be provided under any alternative economic system," Davis said.

He said the purpose of the advisory group was never to stifle that dissent within the industry based on genuine difference of objectives.

"This is a part of the competitive fabric of our industry and motivates each segment to compete in providing ample products at reasonable prices," he said.

"Competition is the best and ultimately the only protection the consumer has. It must be fostered and not thwarted. And we must lose no opportunity to demonstrate to consumers the virtues of the free enterprise capitalism."

Phillips adds to economy

BARTLESVILLE, OKLA. — The Texas economy benefited by approximately $170.2 million last year as a result of Phillips Petroleum Co.'s operations in the state.

Figures recently compiled by Phillips show that in 1977 the company paid $123 million in salaries to some 6,569 Texas employees plus more than $35 million in state and local taxes.

In addition, Phillips paid more than $6 million in annual dividends to Texas shareholders and $4 million in pensions to retirees.

The Lone Star State has been an important part of Phillips growth and diversity. In fact, the company has almost as many major facilities in Texas as in the other 49 states combined. These include a net total of 3,796 producing well, 2 refineries, 21 chemical plants, 21 natural gas liquids extraction plants, 2 helium plants and 5 petroleum marketing terminals. In addition, the company has 1,357 gasoline retail outlets, most operated by independent dealers.

Last year, Phillips produced enough oil and gas in the state of Texas to meet the total energy requirements of 2,248,000 average-sized homes for one year.

Major concentrations of employees are near Borger, where Phillips people operate probably the most complete concentration of diversified petroleum facilities in the world; and the Gulf Coast, home for much of the company's major petrochemical activities.

Kerr-McGee adds Roberts

C. Alan Roberts of Midland has joined Kerr-McGee Corp. as manager of the Oil and Gas Division's Southwest District, C.F. Miller, division president, announced.

Roberts has moved to Amarillo, and is responsible for all Kerr-McGee oil and gas production operations in West Texas, the Texas and Oklahoma Panhandle, New Mexico, Colorado and Arizona.

Prior to joining Kerr-McGee, Roberts worked four years as division production superintendent for Bass Enterprises Production Co., based in Midland. Previously he was a senior engineer with Chevron Oil Co., assigned to petroleum production operations in Wyoming, Utah and Texas.

Museum to establish Spanish commentaries

Through a grant from the Atlantic Richfield Foundation, the Permian Basin Museum, Library and Hall of Fame, will make available recorded tour commentaries for its Spanish-speaking visitors.

Explanations of the museum's exhibits will be recorded in Spanish on cassettes. These, together with portable players equipped with earphones, will be checked out to visitors who are more fluent in Spanish than in English.

The museum intends to make a special effort next year to invite Hispanic-Americans in the Permian Basin area to visit the museum. In addition, oil companies host visitor from Central and South American yearly who tour its displays.

The Spanish recordings and players are expected to be available late this year or in early 1979. An announcement will be made at that time.

In addition to the Spainsh tour helps, the Atlantic Richfield grant also has permitted purchase of additional audiovisual equipment that will be used in the museum's school tour programs and in temporary shows and exhibits.

Commenting on the foundation's gift, Russell J. Ramsland, museum president, said: "The Atlantic Richfield Foundation's generosity will help us do a better educational job for the people of this area and for our overseas visitors. We are truly grateful for this help."

Marketplace said better at regulating than feds

By CLYDE LA MOTTE
Reporter-Telegram
Washington Oil Correspondent

WASHINGTON - It may turn out that the marketplace could regulate natural gas prices better than the federal government. Which is what many domestic producers and some others have been saying all along.

It is somewhat ironic that the ink was barely dry on the President's signature on the energy bill before Energy Secretary James Schlesinger was saying that one way to reduce oil imports in the near future is to make greater use of natural gas. And that would include its use as a boiler fuel, something the government has been trying to discourage for the past eight years.

Schlesinger said at a press conference last week that industrial users would be encouraged to switch from oil to natural gas and thereby absorb some of the current natural gas surplus while at the same time reducing the need for oil from overseas supply sources.

Some natural gas companies are already out looking for new customers, including industrial customers, because they are facing the prospect of having more gas available to them than their current customers require. The companies say that unless they get more customers some of their pipeline capacity will be idle and that will mean higher prices for residential and other customers. If the lines are fully utilized, the customer will get a better price.

How did this current surplus come about?

For one thing, in many areas of the country the gas companies were not allowed to take on new customers. As a result new houses and other buildings turned to fuel oil or electricity for heating.

Also, of several years now gas producers in such states as Texas and Louisiana sought to sell their gas on the intrastate market because the price there was higher than the federal government was allowing on sales made to out-of-state consumers. As a result, a surplus of gas developed in the intrastate market.

Under the gas legisation recently passed, higher prices are permitted for interstate sales, and intrastate sales are being brought under federal control for the first time. Therefore, that surplus in the intrastate market will begin flowing to markets in other states.

Also, the gas scarcities of recent winters caused industrial and other big users to turn to other sources of supply, primarily fuel oil. And the higher price of gas caused homeowners and other users to slow down their consumption.

Finally, the higher prices for gas, especially in intrastate markets, caused producers to step up their exploration and drilling activities, thereby adding to supply.

The long-range picture is also looking brighter. In addition to increased drilling in producing states, the search for gas has widened. Offshore, a discovery of gas has been made by Texaco in the Baltimore Canyon area of the Atlantic off New Jersey. It still isn't known how much oil and gas is there but the initial discovery was encouraging.

New discoveries in western Canada boosted the supply there substantially, causing the Canadian government to look with more favor on increasing exports to the U.S. from the western provinces.

Discoveries of oil and gas in Mexico have boosted that country into the top ranks of nations with big potential reserves and Mexico is planning a substantial development program to boost its oil and gas production to such an extent that it will be able to export sizable quantities.

It is uncertain how much of that gas will move to U.S. markets because the U.S. government balked at the initial price of $2.60 per thousand cubic feet. It is entirely possible, however, that now that the energy legislation has been passed and higher prices permitted for domestic gas, negotiations may be reopened.

Down the road there is the prospect of natural gas from the North Slope as soom as a pipeline system is built to transport it. Meanwhile, there have been recent discoveries in the Beaufort sea off the north coast of Alaska and the government's drilling in a petroleum reserve in northern Alaska this year shows signs of producing good results.

With this improved prospect for additional gas supplies ahead it could be anticipated that the gas market will soften. But as long as government ceilings and price controls remain there will be the natural tendency to sell gas at the authorized ceiling. In the open marketplace, by contrast, oversupply normally brings prices downward.

That is, the old law of supply and demand often works better than laws made in Washington, D.C.

Sun buys plant interest

CALGARY — Sun Oil Co. Ltd. has acquired a 12½ percent interest in Amoco Canada Petroleum Co. Ltd.'s deep oil recovery project at Gregoire Lake in the Athabasca Oil Sands.

Although the primary objective of current operations is to preheat the oil sands for the recovery phase of the project, production has already been more then double that anticipated, according to Ralph Giguere, manager of new energy resources for Amoco Canada.

"This greater-than-forcast initial flow of oil could be significant in a future commercial operation," Giguere said. "It could provide a full-scall plant with cash flow earlier than previously anticipated, and thus improve overall project economics."

Construction was completed on the pilot project, and production operations began early this year. The pilot will test the economic and technical feasibility of deep oil recovery in the oil sands and could lead to the commencement of construction of a commercial facility in the late 1980s. Pilot project costs are estimated at $46 million (Canadian).

The oil recovered by a three-stage extraction process that includes the COFCAW (Combination of Forward Combustion and Waterflood) recovery technique developed and patented by the Amoco research staff. When the pilot recovery phase of the project is underway next year, production in the order of 1,000 barrels per day is expected.

After completion of this pilot project in the mid 1980s, a prototype plant may be built. Alternatively, Amoco could proceed directly to planning a commercial-scale facility.

Current partners are Alberta Oil Sands Technical and Research Authority (AOSTRA), 50 percent; Amoco Canada, 25 percent; Pacific Petroleums Ltd. and Sun, each 12½ percent.

Amoco Canada, the operator of the project, is a wholly-owned subsidiary of Standard Oil Co. (Indiana).

DOE names Dan Rambo

DALLAS — Secretary of Energy James R. Schlesinger has named G. Dan Rambo to be regional representative of the Department of Energy's Region VI in Dallas. Rambo's appointment becomes effective Tuesday.

He will be the department's senior spokesman in Region VI which included Texas, Louisian, Arkansas, Oklahoma and New Mexico.

As Secretary Schlesinger's regional representative, Rambo will coordinate DOE dealings with the public and with state and local governments in the region. He also wil be responsible for administering the Department's regional grant programs and coordinating the regional energy planning activities.

A native of Norman, Okla., he attended the University of Oklahoma and received a bachelor's degree in finance in 1951, a masters degree in geology in 1955 and a law degree in 1965.

Before his appointment Rambo practiced law in Norman, Okla.

Ed Skillern promoted

Forest Oil Corp. announced that Ed Skillern has been promoted to division manager of the Oklahoma Division office in Oklahoma City.

As division manager, Skillern is responsible for the company's exploration, engineering, drilling and production operations in Oklahoma and the Texas Panhandle.

Prior to this appointment Skillern was assistant director of Exploration Sciences, located in the company's headquarters in Denver, Colo.

The announcement was made by Jack D. Riggs of Midland, vice president and region manager.

Skillern joined Forest in 1973 as exploration manager of its wholly-owned subsidiary, Forest Petroleum U.K. Limited in London. His main activities during the yers overseas were directed towards the company's exploration interests in Europe and the North Sea.

Skillern attende Stephen F. Austin College, Nacogdoches, and received his B.A. degree in Geology with distinction from Texas Christian University.

J. G. Goodwin

Natomas adds to staff

Natomas North America Inc. has named Jack G. Goodwin division manager of its West Texas Division.

Goodwin, who is headquartered in Midland, is in charge of Natomas' exploration and development activities in West Texas and Southeast New Mexico.

He holds a B.A. degree in Geology from Texas Christian University. In 22 years in the oil industry, he has been employed with Seaboard Oil Co., Triad Oil & Gas Co. Inc. and Texaco Inc. His experience includes work over most of the eastern one-half of the U.S. and Trinidad, West Indies.

Goodwin has been in Midland since 1972. Prior to joining Natomas he was in charge of Texaco's Midland Division Geological Department.

Geophysics rescheduled

The Permian Basin Graduate Center has rescheduled "Practical Geophysics-II" for Tuesdays and Thursdays, Nov. 21-Dec. 12.

The classes will meet from 7 to 10 p. m. in the PBGC building in Midland.

The instructor is Edwin C. Woodruff and fee for the course is $150.

Count shows 10-unit decrease in rig work

Weekly drilling activity in the Permian Basin of West Texas and Southeast New Mexico showed a decrease of 10 rotary units working over the previous weeks tally.

The survey, conducted by Reed Drilling Equipment, showed the two-state area with 265 units at work, compared to last weeks tally of 275 operations. A year ago at this time the Reed survey counted 306 active rigs.

Leading the survey was Eddy County, N.M., as 28 rigs were spotted turning to the right. Last week the survey also showed 28 rigs.

Lea and Pecos counties tied with 25 operations at work. Last week Lea County reported 27 units making hole and Pecos County showed 25.

Activity in Andrews, Crockett and Gaines counties showed 10 units in each county.

Other drilling activity in the two-state area as recorded on the Reed survey is listed in the table below.

Oil AND INDUSTRIAL NEWS

Advertising And Publicity Sponsored And Paid For By Firms In These Columns

Pepe Ruiz, genial host at the bar in the Monterrey Cocina Mexicana, has many years' experience mixing potables for discriminating tastes in two countries. His Margaritas, Pina Coladas, and Monterrey Margaritas (12 ounces of refreshing deliciousness) are deservedly famous. Monterrey Cocina Mexicana, 523 East Illinois. Hours: T-Th, 11-10. F-Sat., 11-10:30. Closed Sundays.

Pepe mixes superb drinks at Cocina

George and Gloria Veloz, owners of the Monterrey Cocina Mexicana, would like their customers to know more about their bartender, Pepe Ruiz. Pepe mixed drinks in Juarez, Mexico, for thirty-seven years before coming to this country. Most of these years were spent working in the best-known night spots in Juarez, and his good drinks and cheerful self were familiar to many El Paso residents. He knows the formulae of over 450 drinks by memory. You are invited to come in and become one of Pepe's "regulars".

Besides mixed drinks, tap beer, Mexican beers, and house wines are served at the Cocina. Try their excellent Sangria with your meal.

There is a wide selection of Mexican food at the Cocina. There are appetizers to enjoy with a cocktail, perhaps. Fresh salads for the smaller appetite. A full a la carte menu, as well as a long list of combination dinners. There are steaks and hamburgers, as well, for those who would prefer.

For a happy atmosphere, good food and drink, and a warm welcome, come to Monterrey Cocina Mexicana, 523 East Illinois.

L.G. Simmons, Midland Lock and Safe Service, 611 North Big Spring, opens one of the safes he has available for the security of Midlanders. The shop has one of the largest inventories of locking devices and other security items in West Texas. Talk with Simmons about any security problems you have. He is an expert, and a nice man to do business with. Phone: 682-4202.

Secure home with Midland Lock & Safe

There are as many different kinds of safes as there are needs for safes. At the bottom of the list is the very inexpensive portable fire box for important papers and other small items. They range upward in function and price to the very large vaults. Fireproof safes protect from fires and from the non-professional burglar. Money chests or in-the-floor safes give good burglary protection and some fire safety if correctly installed. In both the fire and the money chests there is a very large variety of ratings, which is confusing to the layman. L. G. Simmons is a safe professional and can analyze your needs and recommend the right safe for you.

Midland Lock and Safe Service provides a huge selection of security locks including locks which take a metal card key and can be changed. If you feel your home or business needs more security protection, come by Midland Lock and Safe Service, 611 North Big Spring, or call 682-4202.

Craig Adams, fleet sales manager for Nickel-Williams Chrysler-Plymouth-Dodge, and Mark Felton, fleet salesman, proudly are pictured with the new, standard-size Chrysler Newport. This car has specifications which make it a standout candidate for fleet use. The individual prospective buyer will be delighted with the Newport, as well. Nickel-Williams Chrysler-Plymouth-Dodge, 3705 West Wall.

Two vets win tomcat suit

SEATTLE (AP) — Jurors listened to seven days of testimony about the life and death of Sasha, a tomcat, before clearing two veterinarians of negligence in the cat's death.

The King County Superior Court jury declined to award damages to the cat's owners and instead awarded the two veterinarians $171 for their services.

Dr. Jan Spiegel, an internist, and his mother, Louise Spiegel, originally asked for $30,000 in damages from Drs. William H. Sudduth and Donald S. Kent, but a judge ruled in May that it was up to the jury to determine any damages.

The Spiegels contended the two veterinarians were negligent because they were unaware abcesses in the cat's throat hampered its breathing. They alleged the veterinarians did not examine the throat.

The defense contended that Sasha, who was 6 years old, suffered from feline asthma, and that her problems may have been intensified after inhaling smoke when Mrs. Spiegel's mattress caught fire several weeks before the cat died May 14, 1977.

Indians planning own TV station

By ERIC NEWHOUSE

PINE RIDGE, S.D. (AP) — The Oglala Sioux are taking to the airwaves — they hope. In the works is the first Indian owned and operated television station, aimed at the 14,000 residents of the nation's second-largest Indian reservation.

The tribal council plans news in the tribe's native tongue, Lakota, and programs like "As Long as the Grass Shall Grow," modeled after "Sesame Street." It proposes "Unkita Oyate," a series about the Indian people, and programs on alcohol and drug abuse.

"Last week, we became the first Indian tribe in the United States to apply for a license to operate a television station on an Indian reservation," said Tim Giago Jr., a spokesman for the Oglala Sioux.

"We told the Federal Communications Commission that we had been ignored because of our vast size and our isolation," he said. "And they assured us that we were in the right place at the right time."

Nationally, a television station and a cable TV operation are owned and operated by blacks. But the Pine Ridge station would be the first for Indians.

The Pine Ridge Indian Reservation, some two million acres of rolling South Dakota prairie between the Badlands National Park and Nebraska, is home to about 14,000 Oglala Sioux.

"Lack of communication is one of the greatest problems on the reservation," Giago said. "And television is almost our sole source of entertainment and information, particularly during the winter.

"So we decided to go for the whole ball of wax, an Indian television station," he said.

Two Rapid City television stations — one an ABC affiliate, the other an NBC station — now broadcast to the reservation.

Last month, the tribal council voted unanimously to form the Oglala Sioux Broadcasting Co. After meeting with FCC attorneys in Washington, the corporation filed a petition this week for a station on the reservation.

In an interview Friday, Giago said the project would be funded by a $1.5 million loan from a Nebraska bank with a repayment guarantee by the Bureau of Indian Affairs.

The proposed station would broadcast from a 1,000-foot tower about 25 miles northeast of Wounded Knee, the site of the massacre of some 300 Indians in 1890 which was taken over by militant Indians five years ago. The station's signal would carry about 60 miles.

Giago said he plans to begin training reporters and on-camera personnel next month to produce an hour-long local newscast each night, half in English and half in Lakota. And the tribe is negotiating with CBS for a network affiliation.

The tribal council hopes to have the station on the air by next September.

"That's not impossible," said Robert Seaks of Wheeler & Wheeler, the Washington, D.C., law firm which represents the tribe.

Emigres go south

JOHANNESBURG, South Africa (AP) — More than one-third of South Africa's 564 immigrants in June of this year came from Rhodesia, says Louis le Grange, South Africa's deputy minister of the interior. Le Grange says thousands of people still want to come to South Africa.

Your Money Should Work As Hard As Your Vehicles

Your profits come from vehicle use, not ownership. In fact, we can show you how it's often more profitable not to own the equipment you use.

Leasing acts against inflation. Inflation guarantees that tomorrow's dollars will be worth less than today's dollars. So why pay for vehicles you will use in the future with today's high-value dollars? Leasing reduces inflation's effect on your equipment costs, because you pay tomorrow's cost with tomorrow's dollars.

Call today and let us show you how to put your dollars to work for you.

Gas big supplier of energy

ARLINGTON, VA—The natural gas industry currently accounts for nearly one third of all energy consumed in the U.S. and about 36 percent of all energy produced in the country. It supplies over half of all the energy consumed by residential and comercial establishments and more than 40 percent of the energy consumed by industry.

The gas industry has the potential for increasing supplies from domestic sources of natural gas and from the development of supplemental sources. Existing and potential gas supply sources include:

Conventional natural gas resources, liquefied natural gas, Alaskan gas, synthetic natural gas from petroleum, coal gasification, peat gasification, high Btu oil shale gasification, enhanced gas recovery from Devonian shale, natural gas from coal seams, Rocky Mountain tight formations, geopressured zones along the Gulf Coast, methane nnoconversion (land and oceanic).

ESTIMATE RANGE

There are a number of estimates of the remaining recoverable natural gas resources in the continental United States. Estimates ranging from 621 trillion cubic feet (TCF) to 1,341 Tcf. Current U.S. production is about 20 Tcf a year. The most frequently referenced estimates adjusted to December 31, 1977 are as follows: U.S. Geological Survey 722-1,055 Tcf, National Academy of Sciences 846 Tcf, Exxon Base 621-1,341 Tcf, Potential Gas Committee 1,139-1,189 Tcf.

Each of the above estimates include proved (known) reserves of natural gas in the ground. At year end 1977 U.S. proved reserves were 209 Tcf.

CONSUMPTION RATE

At the current U.S. consumption rate of about 20 Tcf a year recoverable resources are equivalent to between 35 and 65 years of conventional U.S. gas supplies.

Recognizing that natural gas supplies are finite, the gas industry has moved on a broad front to undertake development of supplemental supplies. Some time around the turn of the century supplemental gas sources could become a dominant factor in the U.S. energy supply picture. By the year 2000 supplemental gas sources could provide almost 15 Tcf of gas—supplying almost as much gas as conventional sources at that time.

SUPPLY SOURCES

These supplies are expected to come from the following sources: Alaskan gas, 3.6 Tcf per year; Canada and Mexico, 1.8 Tcf per year; liquefied natural gas, 3 Tcf per year; synthetic natural gas, 0.9 Tcf per year; coal gasification, 4.0 Tcf per year and new technologies: biomass, geopressured zones, etc, 1.5 Tcf per year.

Canada has significant natural gas reserves and has been supplying about five percent of U.S. requirements. The Canadian Petroleum Association has estimated that country's proved natural gas reserves as of year-end 1976 at 58.3 Tcf. In addition, major untapped natural gas deposits are believed to exist in Canadian frontier areas of the Arctic islands, Hudson Bay and the continental shelves of the Atlantic and Pacific. Canadian policy permits exports of natural gas to the U.S. to whatever extent those supplies are not needed in Canada.

SYNTHETIC GAS

Synthetic gas can be derived from such petroleum hydrocarbons as propane, naphtha, ethane and butane by gasification processes. Gasification plants have been built to convert these light hydrocarbon feedstocks into a natural gas equivalent and others are in various stages of development and construction. These supplies are espically valuable during winter heating seasons as a source of immediate peak demand gas.

Natural gas can be imported from overseas sosurces as Liquefied Natural Gas (LNG). In many areas of the world outside the United States gas is found in conjunction with oil and this gas is flared to the atmosphere for lack of an available market. Currently projects are under way to import gas from Africa and Asia. By the year 2000 these and other overseas sources are expected to contribute as much as three Tcf of gas a year to the U.S. supply base.

INTEREST GROWING

Since 1976 U.S. interest has been growing in Mexico as a potential source of natural gas. By the year 2000 it is expected that Mexican gas could contribute annually as much as a trillion cubic feet of gas to the domestic supply.

The Potential Gas Committee of the Colorado School of Mines has estimated that Alaska may hold 225 Tcf of natural gas, in addition to the 32 Tcf proven reserves. Approval of the natural gas pipeline route from Alaska to the lower 48 states offers the possibility that gas may be flowing to lower 48 markets from that area by 1983.

COAL RESERVES

Coal reserves represent approximately three-fourths of the U.S. fossil fuel reserves. The gas industry has been conducting coal gasification research since 1954 and commercial plants currently are being designed which will produce about 250 million cubic feet of gas per day from 25,000 tons of coal.

By far the largest and most dramatic potential of undeveloped gas resources lies in the Gulf Coast region of the U.S. deep underground geopressurized, geothermal zones are estimated to hold from 3,000 Tcf to 50,000 Tcf of methane, one of the chief components of natural gas. Exploration is currently under way to determine the validity and extent of these deposits. Should their potential be realized, only the technology necessary to bring this gas to the surface would limit the amount of gas recoverable.

RESEARCH CONDUCTED

The Gas Research Institute and the Department of Energy, in conjunction with General Electric, is conducting research on the development of marine biomass as a renewable resource of methane. In a research project off the coast of Southern California the researchers are examining the feasibility of growing kelp which can be processed into methane.

With all of the existing and potential gas resources in the offing, there is little reason to doubt the gas industry's confidence in its ability to supply the gaseous energy neets of the American consumer far into the future.

Oil Industry Notes

DALLAS — Texas Oil & Gas Corp. announced the promotion and transfer of Michael E. Cochran to district manager for its Denver District in Denver, Colo. Cochran was formerly vice president—Gas Supply for Delhi Gas Pipeline Corp., a wholly-owned subsidiary of Texas Oil & Gas Corp., at the corporate offices in Dallas. He joined the company in April 1976 as reservoir engineer for the Mid-Continent District in Oklahoma City and subsequently has served in various engineering capacities prior to being named district manager.

Texas Oil & Gas also announced the promotion and transfer of Jack E. Coffman to vice president—Gas Supply for Delhi Gas Pipeline Corp., in the corporate offices in Dallas. Coffman previously served as assistant district manager for the Southeastern District in Houston.

He joined the company in June 1977 as district production manager.

****

FINDLAY, OHIO — A series of new assignments in Marathon Oil Co.'s production accounting division have been announced by John M. Luther, assistant controller.

David W. Young has been appointed senior accounting representative on the staff of the production accounting division manager.

James C. Moses succeeds Young as manager of the production revenue accounting department.

Ronnie G. Essinger has been named manager of the financial and systems department, replacing Moses.

Hubert L. Ammons succeeds Essinger as supervisor of the financial reporting and analysis section.

The changes were effective Nov. 1.

****

HOUSTON — The promotions of Jack M. Oswald to exploration manager and William C. Melnar to production manager were announced by Joe B. Foster, president of Tenneco Oil Co. Exploration and Production.

The changes are part of the recent restructuring of Tenneco Oil Co. into two separate operating units—exploration and production, processing and refining.

Oswald joined Tenneco in 1959 as a geologist in Wichita Falls and became chief geologist in 1974. He received a B.A. degree from the University of Missouri in 1956.

Melnar had been production manager at the company's Mid-Continent Division in Oklahoma City. He joined Tenneco as a junior petroelum engineer shortly after graduation from the University of Texas in 1958 with a B.S. degree in Petroleum Engineering.

****

DENVER, Colo. - Powers Elevation, a subsidiary of Petroleum Information, has named Walter Brennan manager of sales and client services, Northern Region. He is headquartered in Denver. The Northern Region encompasses districts served from Williston, N. D.; Billings, Mont., and Newcastle, Casper and Green River, Wyo.

Jack D. Glenn

Promoted by Texaco

D. T. McCreary, division manager, Texaco Inc., has announced the appointment of Jack D. Glenn to the position of division development geologist, Midland Division. He assumed his new position Nov. 1.

Glenn was awarded a B.S. degree in Geology from Oklahoma State University. He entered service with Seaboard Oil Co. in January 1950 in Midland. In 1958, Glenn came to Texaco Inc. through the acquistion of Seaboard. He advanced through several assignments before being named senior development geologist in Midland.

Jay P. Simpson

Simpson joins firm

HOUSTON — Jay P. Simpson has announced he will become a part of the consulting firms of O'Brien-Goins Engineering and O'Brien-Goins-Britton.

The engineering firm is engaged in consultation on drilling and well completions while O-G-B provides on-site supervision of drilling operations and oil property management.

Offices are in Midland, Oklahoma City and Houston. Simpson, a registered professional engineer and a certified corrosion specialist, was with Baroid 32 years in management of oilfield research and technical service.

He has authored numerous technical papers and worked with industry and governmental committees as an advisor on drilling fluid technology.

The last year he has served as a Distinguished Lecturer for the Society of Petroleum Engineers. Simpson will be headquartered in Houston.

Huge outlay predicted

ARLINGTON, VA—Capital requirements of the natural gas utility industry from now to the year 2000 are expected to exceed $204 billion, nearly four times the current level of invested capital of $52 billion.

In addition to the historical capital outlays in utility and pipeline construction, the gas industry now is faced with huge demands for capital in finding and developing new sources of gas and developing supplemental gas supplies from such sources as coal gasification and other synthetic natural gas facilities, liquefied nautral gas, and Alaskan and Mexican gas.

In order for the natural gas utility industry to attract sums of this magnitude over the next 20 years, Federal tax policies must be developed which take cognizance of the long lead times associated with development of these supplemental sources.

These tax policies should include a permanent increase in the investment tax credit to 12 percent from the current 10 percent creation of a new tax classification for certain "energy properties" used in the search for a tax deferral for dividends reinvested by shareholders.

America's economic health depends on energy, and economic growth depends upon the development of new energy sources as well as conventional supplies.

DRY HOLES

ANDREWS COUNTY

Rial Oil Co. No. 1-24 University, Hutex (Dean) field, 660 feet from north and 1,980 feet from west lines of section 24, block 7, University Lands survey, 19 miles northeast of Andrews, td 9,702 feet.

BORDEN COUNTY

Cobra Oil & Gas Corp. No. 2-479 Don A. Jones, Myrtle, North (Wolfcamp) field, 186 feet from south and 660 feet from east lines of section 479, block 97, H&TC survey, 13 miles east of Gail, td 7,860 feet, converted to salt water disposal well.

Patrick Corp. No. 1 Conrad, wildcat, 1,350 feet from south and 467 feet from west lines of section 79, block 25, H&TC survey, 14 miles southwest of Snyder, td 6,838 feet.

CHAVES COUNTY

R.L. Foree No. 5 Midwest-Federal, Sams Ranch (Grayberg-San Andres) field, 660 feet from south and east lines of section 9-14s-28e, 13 miles east of Hagerman, abandoned location.

CONCHO COUNTY

Stanley H. Rosenthal No. 2 Fox-McIver, wildcat, 467 feet from north and 480 feet from east lines of section 307, block 72, T&NO survey, three miles southeast of Paint Rock, abandoned location.

CROCKETT COUNTY

Texoma Energy & Production Co., Inc. No. 1-76 Hudspeth, wildcat, 467 feet from north and 2,173 feet from west lines of section 76, block O, GH&SA survey, 37 miles southeast of Ozona, abandoned location.

Texoma Energy & Production Co., Inc. No. 1-91 Marley, wildcat, 467 feet from north and west lines of section 91, block O, GH&SA survey, 37 miles southeast of Ozona, abandoned location.

W&W Production, Inc. No. 1-W Shannon, old well plugged back, 330 feet from south and west lines of section 1, block Q, EL&RR survey, 27 miles northwest of Ozona, abandoned old well work over.

EDDY COUNTY

Eastland Oil Co. No. 1-P-A Harroun, undesignated (Delaware) field, 330 feet from south and 976 feet from east lines of section 29-22s-28e, four miles northwest of Loving, abandoned location.

Gulf Oil Corp. No. 1-B Keohane-Federal Communitized, Shugart, North (Morrow) field, 2,220 feet from north and 660 feet from west lines of section 28-18s-31e, nine miles southeast of Loco Hills, abandoned location.

Phoenix Resources No. 5 Gardner Draw Unit, undesignated field, 1,700 feet from south and 1,980 feet from east lines of section 20-19s-21e, td 8,254 feet.

FISHER COUNTY

Hanover Petroleum Corp. No. 1 Phillips, wildcat, 1,458 feet from north and 1,784 feet from east lines of section 206, block 2, H&TC survey, eight miles northwest of Rotan, td 7,142 feet.

GAINES COUNTY

Wessely Energy Corp. No. 1 Mathews-Grimes, wildcat, 660 feet from north and west lines of section 430, block G, CCSD&RGNG survey, 14 miles west of Seminole, td 8,200 feet.

HOCKLEY COUNTY

Estes Engineering Co. No. 1 Smitherman, wildcat, 660 feet from north and east lines of labor 3, league 14, Howard County School Land survey, six miles south of Smyer, abandoned old well workover.

KENT COUNTY

Marshall R. Young Oil Co. No. 2-18 Swenson, wildcat, 760 feet from north and 2,020 feet from west lines of section 18, block 2, H&GN survey, 17 miles northwest of Clairemont, td 6,303 feet.

LEA COUNTY

Sage Oil Co. No. 1-SA State, Saunders (Permo-Pennsylvanian) field, 660 feet from north and 1,980 feet from east lines of section 35-14s-33e, 24 miles southeast of Caprock, td 10,040 feet.

MITCHELL COUNTY

Musselman Petroleum & Land Co. No. 1-9 Nail-Bormar, wildcat, 660 feet from south and west lines of section 9, block 12, H&TC survey, 20 miles southeast of Colorado City, td 7,300 feet.

ROOSEVELT COUNTY

Enserch Exploration Inc. No. 1 El Paso-State, wildcat, 1,980 feet from south and 660 feet from west lines of section 8-6s-34e, three miles west of Highway, td 7,900 feet.

RUNNELS COUNTY

Gem Drilling Co. No. 1 Bryan Clayton, wildcat, 467 feet from north and west lines of section 135, ETRR survey, six miles northwest of Talpa, td 3,900 feet.

H.W. Whiteside No. 6-A Tounget, wildcat, 1,670 feet from north and 330 feet from east lines of section 32, Domingo Diaz survey 532, eight miles northeast of Ballinger, td 3,875 feet.

STONEWALL COUNTY

Hanson Corp. No. 1 Hall, wildcat, 1,320 feet from south and west lines of section 130, block F, H&TC survey, 15 miles north of Aspermont, td 6,540 feet.

TOM GREEN COUNTY

Esperanza Energy Corp. No. 3 Turner, wildcat, 1,471 feet from south and 1,320 feet from west lines of section 1115, TP&R survey, abstract 4308, four miles southwest of Carlsbad, td 7,500 feet.

B. Hanson gets award

Bernold "Bruno" M. Hanson of Midland was the recent recipient of a Sioux Award at Homecoming festivities on the campus of the University of North Dakota in Grand Forks.

The Sioux Award, which was presented by J. Emmet Judge, President of the University of North Dakota Alumni Association, is the highest honor given by the association to University of North Dakota alumni for outstanding career and community service achievements.

Hanson, a Mayville, N.D., native and a 1951 graduate of the University of North Dakota in engineering geology, was recognized for his work in the field of geolgy and petroleum.

He was named "All American Wildcatter" by the petroleum industry and has held many offices in the American Association of Petroleum Geologists. Hanson is president of Hanson Exploration Co., Inc. of Midland. The award citation also commended Bruno Hanson for his active involvement in the Boy Scouts of America in which he has served as a scout master, council president, chairman of the South Regional World Jamboree Committee, and the World Jamboree in Norway.

Hanson is a winner of the Silver Beaver Award and the Silver Antelope Award for Scouting.

Dr. Elam to teach class

The Permian Basin Graduate Center will offer "Well-Site Geology," from 7 to 10 p.m. Tuesday, at the PBGC Building, 105 W. Illinios St. It will be conducted by Dr. Jack F. Elam.

Among the topics to be discussed are: techinques of obtaining the best drilling samples; examination of drilling samples and evaluation of shows therein; drilling time plots and correlations; picking coring points; onsite and lab examination of cores; use of core analysis for proper evaluation in conjunction with electrical logs; duties of well-site geologist on drillstem tests; formation evaluation by hydrocarbon well logging techniques; and relative costs of various methods of well evaluation.

Dr. Elam, consulting geologist and president of the PBGC, received his A.B. and M.A. degrees in Geology from UCLA and his Ph.D. from Rensselaer Polytechnic Institute.

He worked for a major company and an independent in California and Midland before becoming a consultant in 1951. His teaching experience includes the University of California Extension Division, Rensselaer Polytechnic Institute, The University of Texas of the Permian Basin, and a recent appointment as adjunct professor of The University of Texas at Arlington.

Fee for the session is $30.

Charles W. Jones

C. W. Jones in new post

HOUSTON — Charles W. Jones has been named Permian Basin Area manager for Drilco, Division of Smith International. Jones was formerly district manager, Houston.

Jones joined Drilco in 1974 as an engineer working in non-destructive testing techniques. He was later promoted to inspection services manager, and set up inspection units for drill pipe and drill collars, as well as the training of inspection personnel in Syria, Iraq, and Poland. Jones was promoted to district manager, Houston, in 1977.

Jones holds a B.S. degree in Electronical Engineering and a M.S. degree in Business Administration from New Mexico State University. He is a member of the American Society of Non-Destructive Testing and the Society of Petroleum Engineers.

Prior to joining Drilco, Jones worked in the oilfields in West Texas and New Mexico.

Dr. Frank Wantland

Wantland on program

The Permian Basin Section of the Society of Economic Paleontologists and Mineralogists will hold its monthy meeting Tuesday in the Midland Hilton.

The meeting will get under way at 11:30 a.m.

Guest speaker will be Dr. Frank Wantland, Director of the School of Geology and Geophysics, University of Oklahoma. His topic will be "Holocene Carbonate Sedimentology and Ecology of the Belize Shelf, Central America".

Dr. Wantland will discuss the interesting aspects that make knowledge of the Belize shelf worthwhile which include: an extensive shelf margin Barrier Platform/reef complex, shelf patch reefs and "atolls", and an adjacent mainland that contributes terrigenous clays to the shelf lagoon and forms a coastal belt of quartzose sands.

Study of the Belize shelf allows petroleum geologists to sharpen their understanding of the sedimentary processes, stratigraphy, and play concepts for carbonate exploration.

The speaker is a graduate of the University of Cincinnati and Rice University, and was manager of Geologic Research for Cities Service Co. from 1970 to 1978.

Reagan areas draw new tests, field wells

Way & Mills of Midland announced locations for three new tests in the Farmer (San Andres) field, RK Petroleum Corp. of Midland spotted drillsites for three tests in the Calvin (Dean) field and Houston Oil & Minerals Corp. of Houston amended locations on three Spraberry Trend Area projects and announced plans to test the operations as wildcats. All nine projects are in Reagan County.

Way & Mills No. 1-8 University will be drilled itn the Farmer (San Andres) area 330 feet from south and 2,310 feet from west lines of section 8, block 49, University Lands survey.

The No. 1-9-A University is 330 feet from south and east lines of section 9, block 49, University Lands survey.

Way & Mills No. 1-10 University is 330 feet from south and 430 feet from east lines of section 10, block 49, University Lands survey.

The projects, eight miles southeast of Big Lake, will be drilled to 2,700 feet.

R. K. Petroleum will drill No. 1 Pam-Am in the Calvin (Dean) area 1,980 feet from south and east lines of section 23, block 37, T-5-S, T&P survey.

The No. 2 Pan-Am is 1,980 feet from south and west lines of section 23, block 37, T-5-S, T&P survey.

RK No. 1 Leonard is 1,980 feet from north and 660 feet from west lines of section 24, block 37, T-5-S, T&P survey.

The tests, four miles east of Midkiff, are scheduled for 9,000-foot bottoms.

Houston Oil & Minerals amended locations for No. 5-17 Merchant Estate, No. 6-17 Merchant Estate and No. 8-17 Merchant Estate.

The projects, originally scheduled as Spraberry Trend Area wells, will test as wildcats in the Clear Fork zone. They are surrounded by Spraberry Trend Area production and by Calvin (Dean) production.

All are scheduled to 8,500 feet and are 12 miles northeast of Stiles.

No. 5-17 Merchant Estate is 700 feet from the north and east lines of section 17, block A, L&SV survey.

No. 6-17 Merchant Estate is 1,500 feet from suth and 700 feet from west lines of section 17, block A, L&SV survey.

No. 8-17 Merchant Estate is 1,200 feet from north and 700 feet from west lines of section 17, block A, L&SV survey.

REAGAN WELLS

Hanley Co. of Midland has completed two wells in the Spraberry Trend Area field of Reagan County.

No. 1-10-11-A University finaled on the pump for a daily potential of 46 barrels of 75 barrels of water, through perforations from 6,567 to 6,696 feet. Gravity of the oil is 41.6 degrees and the gas-oil ratio is 1,326-1.

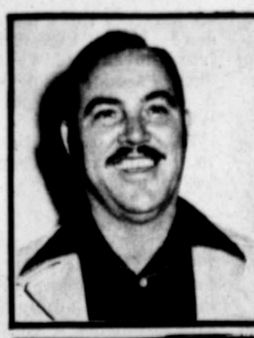

Total depth is 7,530 feet and the plugged back depth is 7,484 feet.

Wellsite is 1,320 feet from south and east lines of section 11, block 10, University Land survey and seven miles northwest of Big Lake.

Hanley No. 1-10-10-A University was finaled for a daily pumping potential of 45 barrels of oil and 75 barrels of water, through perforations from 6,576 to 7,348 feet. Gas-oil ratio is 1,593-1 and gravity of the oil is 41.5 degrees.

Total depth is 7,470 feet and 4.5-inch casing is cemented at 7,440 feet.

Location is 1,320 feet from west and 1,500 feet from north lines of section 10, block 10, University Lands survey and seven miles northwest of Big Lake.

FEATURING THESE COMPLETE RIGS:
1 - FRANKS 550 Series III Model 1357 - 160 DD drawworks S/N 78059-4, mounted on FRANKS 450-C 88 5-axle carrier powered by GM 12-V-71 engine, w/FRANKS 100', 250,000 lb. telescoping mast, EMSCO D-300 7-1/4" X 14" mud pump w/twin GR 6-71 diesels, REGAN 16", 2,000 lb. counter B.O.P., 4X2 hoist
1 - EMSCO D-300 7-1/4" X 14" mud pump w/twin 6-71 diesel Approx. 6,857' of 4-1/2" Grade, I.E.U. F.H. drill pipe RIG 14
1- EMCO B-37 double-drum drawworks, powered by GR 12V-71N engine, self-propelled, 5-axle back in GARDNER Model 5325, S/N 12V8-6309/206
1 - EMCO ER 103-224 ER 8-with-LOY telescoping mast
1 - EMCO V-8 X 14' 330', 130-ton sub-structure w/8'6" clearance
1-GARDNER-DENVER FXK, powered by twin 6-71 diesel
1 - REGAN 16", 2,000 lb. counter B.O.P.
1 - EMCO 17-1/2" rotary table
Approx. 7,300' of 4-1/2" full hole, 16.60, Grade E drill pipe
1- FRANKS 300 Series Explorer III "Rocket" Model 1357/160 double-drum well servicing unit S/N 73040-4, w/96', 215,000 lb. telescoping derrick, mounted on 4-axle CABOT carrier Model 300-C, powered by DETROIT 8V-71N diesel engine. (This unit was completely overhauled at CABOT yard in Lindsay, Oklahoma in June 1978).
1-FRANKS 300 Series Explorer III "Rocket" Model 1357/160 DTD-ST double-drum well servicing unit, S/N 73038-4, w/96', 215,000 lb. telescoping derrick, mounted on 4-axle CABOT carrier Model 300-C, powered by DETROIT 8V-71N diesel
1 - FARLINO 1500 SS double-drum drilling rig, w/GARDNER-DENVER 70-FXH mud pump, mounted on 1978 FORD T-800 truck, S/N F7WEW00F23
Approx. 900' of 3-1/2" FARLINO drill pipe
1 - FRANKS pole well servicing unit, 26 X 26 double-drum drawworks w/8 X 10 pole, mounted on 1962 IHC twin-screw truck.
PUMPS: GARDNER-DENVER FXH, gear through, w/new plates & covers removed for inspection.
1 - GARDNER-DENVER 12" FXH duplex powered by IHC diesel, skidded.
1 - NATIONAL C1500, twin through, w/all covers removed, skidded.
1 - EMSCO Model C16 16" pump.
1 - GARDNER 1000 Series 4 X 6 pump.
ROTARY TABLES: NATIONAL 60inch 261/2 X 37", completely gone through, open for your inspection, then closed & assembled.
1 - EMSCO 27 1/2 X 33 1/4, completely stripped.
1 - EMSCO 20" X 36"
SUBS: GUSHERSON 6" X 900, GUSHERSON 5" X 900" SNAPPER 5" double 900, SHULL PIPE: Approx. 3,000' of 5" X-hole, 19# 12,500' of 31/2" DS, 250 Jts. of 31/2" allen hole.
DOZER/GRADERS: CAT D6-B (S/N 37A3500), WABCO 777 (S/N 6007 5611).
COMPLETELY REBUILT ENGINES: 2 - DETROIT DIESEL V-12 & 6710, CAT & CUMMINS 855-300's w/90-day warranty by re-viewer.
GENERATOR: 150 kw, 220-440 AC generator w/DOLLNER 12-cyl. engine, mounted in 25' X 9' steel house, skidded. OILFIELD 855-DP
TRUCKS: 1967 GMC bob-cover, 7699 IHC D-2114A.
TRUCKS: 1972 FORD F-600 w/oilfield bed, 1977 & 1975 CHEV. pickups. TRAILERS & FLOATS: 1975 AZTEC 20' 20-ton float (S/N 3022), DOUBLE & CLASS 150 bbl tandem vacuum trailer.
AND: 35 bbl hot oil unit w/6-D triplex PE-3 pump on propane IHC truck WORTHINGTON 3" X 6" duplex water pump, pump parts, 4-PARMENTER 22" - 60" hydrostatic bailers, office cashiers & more!

Othal M. Plemmons

Plemmons joins MAPCO

Othal M. Plemmons has joined MAPCO, Inc. as a senior exploration geologist in the West Texas—Southeast New Mexico District office in Midland.

He is responsible for exploration efforts in the Texas portions of the Permian Basin.

Plemmons earned a B.S. degree in Petroleum Geology from Texas Tech University in 1949. He has extensive experience throughout the Permian Basin as well as East Texas, New Mexico, Oklahoma, Wyoming, Montana and North Dakota.

He is a member of the American Association of Petroleum Geologist and the West Texas Geological Society.

John A. Thompson

Thompson appointed

TULSA — I-R Compression Services, a Division of Ingersoll-Rand Co., has announced the appointment of John A. Thompson of Tulsa to the position of Division Sales Coordinator.

Most recently he was sales manager for Knight Industries in Broken Arrow, Okla. Prior to that, he served many years in sales and in engineering of oilfield compression equipment with Dresser Industries and White Industries.

Oil executives facing cash flow decisions

TULSA — U.S. oil executives are facing critical decisions on what to do with cash flows from present investments as opportunities in traditional exploration and production areas dwindle.

The biggest companies and many smaller firms also are taking steps to prepare for possible future embargoes and more unfavorable government fiats, reports the Oil and Gas Journal's Nov. 13 issue.

The weekly business magazine says for some companies, that means drastic changes from the way things have been done in the past. For others, it means no more than a new vice-president with "planning" somewhere in his title and formalization of precedures that have been under way for years.

"Some measures are quite visible, such as Sun Co.'s multidirectional diversidications or Ashland Oil Inc.'s proposed sale of its exploration and production assets," the Journal says. "Other measures are more subtle, like recent reorganizations at Atlantic Richfield Co. and Amoco Production Co.

"Still other companies, such as Gulf Oil Corp., are ridding themselves of non-energy acquisitions from past diversifications moves and concentrating on the business of energy—for the moment at least."

There's nothing new about planning, diversification, and reorganization, the magazine points out.

They're among the things companies do to adapt to changing business environments. But there's no doubt that, given the modern business environment's penchant for sudden twists and turns, these strategies are receiving new emphasis as corporate movers and shakers strive to keep from becoming the moved and the shaken.

Most major oil companies seem to be following the advice of economist and consultant Dr. Pierre Rinfret at a recent meeting of management engineers: "Corporate strategy that plans for disruptions is the key to survival and prosperity in this era of discontinuities."

Rather than try to predict the future, companies are identifying key variables in the future business climate—or, as Atlantic Richfield calls it, the "forward environment"—and trying to predict results of different conbinations of those variables.

It's not a new technique. But it's receiving more emphasis now than before.

A decade of good and bad economic and political news is at the root of the current shifts in the U.S. oil industry.

The Journal says the Organization of Petroleum Exporting Countries' crude pricing revolution has bootstrapped real prices of oil and gas in the U.S. to levels above the free market for oil and regulated prices for interstate gas at the start of the decade.

That has generated more investment opportunities in U.S. oil and gas exploration, as witnessed by the 20,000-well increase in drilling between 1970 and 1978. Returns on those U.S. oil investments are higher today than they were a decade ago, when the industry still was a recession that began in 1958.

"But, at regulated prices, returns already have began to shrink again from 1974-75 levels," the magazine reports. "With nationalization, opportunities for equity investment in production abroad have diminished sharply, but others have opened up."

All other uncertainties aside, U.S. oil companies are weighing the long-term interests of stockholders and looking ahead to the time when oil will be a shrinking business.

Some are moving farther and faster than others, based on their judgment of investment opportunities, the timetable for the production decline, and their own particular lease situation.

But even Sun, which is moving away from the oil business faster than any other major, expects to have 50 percent of its capital in petroleum at the turn of the century.

Courtney R. Clark

Long tour observed

Courtney R. Clark, with Exxon Co., U.S.A., recently observed his 30-year service anniversary. Assigned as employee relations coordinator in the Midcontinent Production Division, he is located in Midland.

He joined the company in the Exploration Geophysical Group with seismic crew locations in West Texas.

In 1952, Clark transferred to employee relations as a safety engineer in New Orleans. Four years later he moved to Tyler and in 1958 transferred to Midland.

Hawes earns ARCO award

Laurence H. Hawes, area geologist in Midland for Atlantic Richfield Co., has completed 25 years of service with the company.

He was presented his service awards by C. E. Cardwell Jr. of Midland, district manager.

Hawes is a graduate of The University of Texas with a B.S. degree in Geology.

He joined Sinclair Oil & Gas Co. in Fort Worth in 1953. He transferred to Midland in 1969 with Atlantic Richfield.

He then was transferred to Bakersfield, Calif., where he remained three years before moving back to Midland in 1975.

Hawes was named area geologist in January 1977 and is in charge of exploitation and training junior geologists.

Checking scheduled

AUSTIN, Texas (AP) — The Texas Department of Labor and Standards intends to inspect massive nuclear power plant boilers as they come on line in Texas

State labor commissioner Lynn Tate said Thursday if his agency doesn't do it, nobody with the "public interest" at heart will.

Boiler inspection is a duty of Tate's department, and state law requires periodic inspection of all boilers of 100 gallons or more.

"Nuclear reactors are nothing more than boilers," Tate said in brief remarks to the Texas Good Neighbor Commission, which wanted to know more about his agency.

"We'll ask the Legislature for money to assure that the people of Texas have adequate protection and adequate inspection where nuclear reactors are being constructed," Tate said.

He said the federal government does not "do the kind of inspection that is necessary on nuclear reactors."

After the talk, he told The Associated Press that his inspectors make sporadic checks on construction of the boilers but that he lacks the manpower to do a thorough job.

Tate's budget request to the Legislature includes almost $1.1 million over the next two-year fiscal period to hire 17 inspectors who would be assigned to two operating nuclear power plants and two under construction.

But the Legislative Budget Board has rejected the request, meaning Tate will have to fight for funds in legislative committees once the session begins Jan. 9.

First tests completed

BARTLESVILLE, OKLA.—Phillips Petroleum Co. Norway, operator for the Phillips Norway Group, has successfully completed testing of the first development well from a permanent offshore platform in the Eldfisk field. The test results indicated the deliverability for this well will equal or exceed the predicted performance.

The Eldfisk A-6 development well, located about 10 miles south of Ekofisk Center, was drilled to a depth of 10,240 feet in the Danian and Upper Cretaceous formations and tested at a rate of 6,914 barrels of 37-gravity oil and 7,908,000 cubic feet of gas per day, through a 36/64-inch choke.

The well is capable of producing at higher test rates but was restricted to a small choke setting during the test due to capacity limitations in the test separator.

An additional 45 to 48 wells are expected to be drilled from the two platforms located in the Eldfisk field during the next five years. Plans call for a platform to go to stream next spring, followed by the B platform which is expected to start producing later in 1979.

Eldfisk will become the fifth of seven fields to go on stream in the Greater Ekofisk area.

Coal gasification big source for gas fuel

ARLINGTON,VA. — One of the more important potential supplemental sources of gaseous fuel is coal gasification.

As the nation's energy requirements increase, the production of high quality pipeline gas from coal—our nation's most abundant source of fossil energy—offers one of the most economic, environmentally acceptable and secure energy supply options available to the United States.

There are 1,700 billion tons proven coal reserves and an estimated 2,300 billion tons of coal undiscovered.

Coal reserves presently represent approximately three-fourths of our nation's known total fossil fuel reserves, but account for only about 20.2 percent of the fossil fuel energy consumed. This is because much U.S. coal is of a high sulfur content, which poses major environmental problems.

Utilizing these vast coal reserves to produce a high-Btu gas will ease the nation's long-range fuel supply problems by converting a frequently environmentally unacceptable fuel into a cleaner burning form of energy.

Coal gasification is superior in several significant ways to electricity generated from coal. On a Btu basis, the end-use costs of coal gasification hold a better than 40 percent advantage over coal electricty, even assuming the most advanced electric heat pump technologies.

The overall efficiency of coal gasification is considerably higher than electrification by 20 to 30 percent. In addition, a coal gasification plant requires about one-half the capital investment of a comparable coal electric plant. In other words, for 250 billion Btu's per day, the capital cost is $1.3 billion for a coal gasification plant compared with about $2.7 billion for a coal electric plant with the same energy output.

On an air pollution basis, the generation of gas from coal is expected to be five to ten times cleaner than coal electrification. In addition, a coal gasification plant would use about one-eighth of the amount of water as a coal electric plant on an equivalent energy basis.

Advanced Lurgi coal gasification processes are being used commercially outside of the United States. Other coal gas technologies also are being developed, but the Lurgi process with methanation represents the only commercially proven high pressure approach to high-Btu gasification from coal at the present time.

An operational coal gasification plant normally would be located near the coal source. It would transform very large volumes of coal into a gaseous fuel to be mixed with natural gas and delivered through the existing million-mile underground pipeline system.

Initiating a major domestic coal gasification industry to be financed in the private sector and capable of providing several quadrillion Btu's (quads) of gas energy by the year 2000 will require an early and vigorous commercial coal gasification demonstration program.

A commercial demonstration of high-Btu coal gasification would involve several full-scale facilities using proven technology. Such a program must be financed in the private sector with federal government loan guarantees for the depth portion. The perceived risk and capital cost of such first-of-a-kind coal gasification plants are so high that individual gas companies have been unable to obtain adequate financing.

There are: 20 High Btu coal gasification projects. Six medium Btu coal gasification projects, 15 Low Btu coal gasification projects, and over 100 organizations including federal and state agencies sponsoring these studies.

At the present time, five active commercial high-Btu coal gasification projects are planned and three active demonstration high-Btu coal gasification projects have been announced.

On Feb. 27 President Carter signed the FY 1978 ERDA authorization bill, which now gives Department of Energy Secretary Schlesinger the authority to request Congressional approval of synthetic fuel load guarantees, including high-Btu coal gasification.

The gas industry estimates that the capital investment requirement between now and 1990 will be more than $15 billion for coal gasification projects—rising to as much as $60 billion by the year 2000.

The natural gas industry, through the Gas Research Institute, and the Federal government are now spending substantial sums of money to develop new technology to find ways to more economically produce high-Btu gas from coal.

Fossil fuels will continue to be the leading source of our energy supply will into the 21st Century. How well we develop a reasonable degree of self-sufficiency in energy in years to come will be determined partially by the growth of coal gasification, an important method of supplementing natural gas supply.

Kenneth L. Terry

Terry joins sales force

Century Pipe & Supply Co., headquarter in Midland, recently announced an addition to its Midland sales force.

Joining Century as sales representative is Kenneth L. Terry, a five-year resident of Midland. Prior to joining the Century sales force, Terry held sales positions with major oilfield supply and service companies in West Texas. He holds a B.A. degree in Economics from Houston Baptist College.

Wildcat, field work announced in West Texas, New Mexico areas

McClellan Oil Corp. and J. Penrod Toles of Roswell, N.M., spotted location for a 4,800-foot wildcat in Chaves County, 19 miles north of Dexter

The project, five miles northwest of shallow Grayburg-San Andres production in the Brown field, will be drilled 660 feet from north and west lines of section 6-10s-26e. Ground elevation is 3,694 feet.

EDDY PROJECT

The Malaga, West (Morrow gas) field of Eddy County, N. M., gained location for a new project.

It is HNG Oil Co. of Midland No. 1-16 State, one mile west of Malaga and 660 feet from north and 1,980 feet from east lines of section 16-24s-28e.

It is one-half mile south and three-quarter miles northwest of production in the six-well field.

Contract depth is 13,000 feet.

GAINES STEPOUT

Belco Petroleum, Inc., of Midland No. 4-2 Southeast Seminole San Andres Unit will be drilled 1/2 mile north of production in the Seminole, Southeast (San Andres) field of Gaines County.

The test, slated for a 5,600-foot bottom, is two miles southeast of Seminole and 500 feet from north and 860 feet from west lines of section 16, block C-44, psl survey.

HOMANN AREA

Mobil Oil Corp. No. 3 Patrick A. Donahue has been completed in the Homann (San Andres) field of Gaines County, nine miles east of Seminole.

It finaled on the pump for a daily potential of 50 barrels of 32.6-gravity oil and 55 barrels of water, with a gas-oil ratio of 320-1.

Completion was through perforations from 5,400 to 5,442 feet after a 2,000-gallon acid treatment.

The total depth is 5,500 feet in the San Andres and 5.5-inch pipe was cemented on bottom. The plugged back depth is 5,448 feet.

Location is 1,667 feet from south and 2,173 feet from east lines of section 75, block G, WTRR survey.

ESTORIL WELL

Estoril Producing Corp. of Midland No. 1-B Medlin, a re-entry project, has been completed as a 1/2-mile northwest extension to the V&S (San Andres) field of Gaines County.

Operator reported a 24-hour pumping potential of 52 barrels of 36-gravity oil, through perforations from 4,943 to 5,009 feet. The gas-oil ratio is too small to measure.

Operator drilled to total depth of 5,050 feet, and set 4.5-inch casing on bottom.

Location is 1,980 feet from north and west lines of section 44, block H, D&W survey and 20 miles east of Seminole.

HOCKLEY PROJECT

Ike Lovelady, Inc., of Midland spotted an offset to production in the three-well Anton, South (Strawn) field of Hockley County, five miles south of Anton.

Slated for a 10,200-foot bottom, it is No. 2 Hayden E. Baker, 1,980 feet from north and west lines of section 64, block A, R. M. Thompson survey, abstract 85.

The site is one location south and one location west of production.

MIDLAND WELL

Mobil Oil Corp. No. 809 Pegasus Spraberry Unit, former Fusselman well in the Pegasus multipay area of Midland County, has been re-completed from the Spraberry sand.

It pumped 18 barrels of oil and 30 barrels of water on 24-hour potential test through perforations from 7,591 to 7,997 feet.

Gravity of the oil is 34.6 degrees and the gas-oil ratio is 444-1. The pay section was acidized with 7,500 gallons and fractured with 100,000 gallons.

Total depth is 12,150 feet and the plugged back depth is 8,480 feet.

Location is 660 feet from north and 1,980 feet from west lines of section 29, block 40, T-4-S, T&P survey and 18 miles southeast of Odessa.

REAGAN TEST

Regal Development, Inc., of Eldorado spotted location for a 5/8-mile northeast stepout to the Eldorado (Canyon gas) field of Schleicher County, three miles north of Eldorado.

It is No. 1-A T. K. Jones Heirs, 660 feet from south and west lines of section 37, block LL, TCRR survey, abstract 600.

It will be drilled to 6,300 feet.

The project was announced earlier, but the fee name and well number were omitted.

WORKOVER

Costa Resources, Inc., of Dallas will re-enter an old Spraberry well in Reagan County and attempt completion in the Calvin (Dean) pool.

The re-entry is No. 2 E. B. Gidney, 1,980 feet from south and 660 feet from east lines of section 37, block 36, T-5-S, T&P survey and 18 miles southwest of Garden City.

GLASSCOCK TEST

RK Petroleum Corp. of Midland No. 2 Leonard is to be drilled as a 9,000-foot test in the Calvin (Dean) area of Glasscock County.

It is 660 feet from north and 1,980 feet from west lines of section 24, block 37, T-5-S, T&P survey. Ground elevation is 2,704 feet.

UPTON AREA

Frank Cass of Dallas will re-enter the No. 1-20 Braden, project in Upton County, two miles east of Midkiff and attempt completion as a producer in the Calvin (Dean) field.

It is 1,980 feet from north and 660 feet from west lines of section 20, block 37, T-5-S, T&P survey.

STERLING WELL

Koch Exploration Co. No. 1 Lively-Knight is a new well in the Jameson (Strawn) field of Sterling County, 11 miles northeast of Sterling City.

Operator reported a daily flowing potential of 33 barrels of 37.5-gravity oil, with a gas-oil ratio of 3,940-1, through a choke of unreported size and perforations from 7,187 to 7,218 feet.

The pay was acidized with 1,000 gallons and fractured with 80,000 gallons.

Total depth is 7,415 feet in the Strawn and 4.5-inch pipe is set at 7,414 feet. The plugged back depth is 7,370 feet.

Wellsite is 1,980 feet from south and 660 feet from east lines of section 142, block 2, H&TC survey.

GARZA WELL

Getty Oil Co. No. 2 Kirkpatrick has been completed as the second well in the Rocker A, Southwest (Ellenburger) field of Garza County, five miles northwest of Justiceburg.

One location southwest of the discovery well, it finaled for a 24-hour flowing potential of 100 barrels of oil and 50 barrels of water, through a 1/4-inch choke and perforations from 8,184 to 8,194 feet.

The pay was acidized with 500 gallons. Gas-oil ratio is 422-1 and gravity of the oil is 39 degrees.

Total depth is 8,250 feet and 5.5-inch casing is set on bottom.

The well is 660 feet from south and west lines of section 878, block 97, H&TC survey.

STRAWN OILER

Holly Energy, Inc., (formerly V-F Petroleum, Inc., of Midland), No. 1 Slaughter Estate has been completed as the second Strawn well in the Red Loflin (Strawn and Ellenburger oil) pool of Garza County, 13 miles south of Post.

On 24-hour potential test it pumped 15 barrels of 36-gravity oil and 86 barrels of water, through perforations from 7,780 to 7,788 feet after 1,000 gallons of acid.

Gas-oil ratio is 66-1.

Total depth is 8,275 feet in the Ellenburger, and 4.5-inch casing is cemented at 8,203 feet. The plugged back depth is 8,140 feet.

Wellsite is 990 feet from the south and 467 feet from the east lines of section 19, block 2, T&NO survey and one and one-quarter miles north of the only other Strawn producer in the field.

OFFSET FINALS

Texland-Rector & Schumacher of Fort Worth No. 2 Pauline Morgenstern has been completed as the second well in the Terryon (upper Clear Fork) field of Terry County, 15 miles northwest of Brownfield.

It completed on the pump for a 24-hour potential of 48 barrels of oil and 25 barrels of water, through perforations from 6,614 to 6,842 feet. The pay was acidized with 16,000 gallons.

Gravity of the oil is 29 degrees and the gas-oil ratio is 313-1.

Total depth is 7,100 feet and 4.5-inch casing was cemented on bottom. The plugged back depth is 6,920 feet.

The well is 2,400 feet from north and east lines of section 34, block D-11, SK&K survey.

China making effort to modernize farming

By DON KENDALL
AP Farm Writer

WASHINGTON (AP) — China is continuing to buy U.S. grain in what Agriculture Secretary Bob Bergland says is a major effort to modernize its agriculture.

A few hours after Bergland's remarks Friday about his recent 10-day visit to Peking and other areas, the Agriculture Department announced that China has bought an additional 400,000 metric tons of U.S. corn.

That raised to 1.9 million metric tons of corn plus 3.7 million metric tons of wheat the amount China has bought since re-entering the U.S. grain market this year after a four-year absence.

"I personally have no doubts there will be a noticeable expansion of agricultural trade between the two countries," Bergland told reporters.

"We believe the Chinese are likely to become regular and significant purchasers of U.S. grains and cotton," Bergland said.

Modernization of the livestock sector appears to be one of China's top agricultural priorities, Bergland said. To accomplish that, China will need to import animal feed "from us or others if their modernization plan succeeds."

China and the United States have set the groundwork for exchanging scientific and technical information, and teams of experts regarding agricultural matters, he said.

Bergland said it is difficult to assess what impact China's program for modernization will have on U.S. trade.

"The Chinese are exploring the world today," he said. "They're shopping for a long list of things. They need to modernize their agriculture, their industry and their sciences."

Bergland was asked why he was so interested in selling more farm products to China at a time when Americans are faced with further food price increases next year.

"We have more than adequate stocks on hand in the United States ... to meet any demand that may develop, whether it be China or in any other place," Bergland said. "There is absolutely no danger of running out of these commodities in the next 12 months."

Bergland said the Chinese asked about this country's long-term agreement requiring the Soviet Union to buy a minimum amount of U.S. grain each year.

The Chinese, he said, were "curious about what it meant" and also about international commodity agreements in general.

Also, Bergland said, Chinese officials inquired about recent legislation that would enable China to get U.S. credit to buy American farm commodities.

But they only "inquired as to how the program would work" and did not actually ask to get the credit, he said.

Bergland, invited to China by the Peking government, was the first U.S. secretary of agriculture to visit there. He was asked what he thought the history books might say 10 years from now about his trip.

"It depends on how astute the historian is," Bergland replied. "It certainly will be recorded in the annals of the Department of Agriculture."

****

WASHINGTON (AP) — Total red meat output by the nation's federally inspected packing plants rose this week but still trailed the output of the same week a year ago, says the Agriculture Department.

Production of beef, at an estimated 455.8 million pounds, was up 3 percent from last week and was the same as a year ago, the department said Friday.

Pork production was about 281.7 million pounds, up 8 percent from last week but was down 1 percent from the same week a year ago.

Production of veal and calf meat was about 8 million pounds, up 1 percent. That was down 34 percent from the same week last year, the report said.

Lamb and mutton production, at about 5.5 million pounds, was up 12 percent from last week but was 8 percent less than a year earlier.

****

WASHINGTON (AP) — Milk production last month was down slightly from October of last year, says the Agriculture Department.

Output was about 9.82 billion pounds in October, and in the first 10 months of 1978 totaled about 103 billion pounds, the department said Friday.

That put milk production at about 1 percent below the first 10 months of 1977.

Production per cow in October averaged 906 pounds, up 7 percent from a year earlier. There were about 10.8 million cows in milking herds last month, 1 percent fewer than in Oct. 1977, the report said.

Stephen V. Frisbee

Manager appointed

Stephen V. Frisbee has been appointed resident manager of the Midland Hilton Hotel, reports Richard Lowder, general manager of the Hilton.

Frisbee comes to Midland from Williamsburg, Va., where he was manager of conference services for The Williamsburg Inn, The Williamsburg Lodge, and Motor House/Cascades. These hotels, along with eight restaurants and extensive recreational facilities, are all part of the famed Colonial Williamsburg restoration.

The 1971 graduate of The College of William and Mary has an extensive background in hotel management. He is the former manager of the Lodge at Snowbird in Alta, Utah, and has also worked for the Marriott Corp. and Quality Inns.

Residences lead way

Cold wet weather early in the week apparently kept people from thinking about building as the permits for last week only hit the $600,000 mark.

The week's total of $681,242 brings the year's total to $81,115,650.

Only one permit was issued for a new commercial structure. That went to a firm called Town and Country to build a $40,000 metal warehouse at 1406 and 1408 Cotton Flat Road.

Permits for commercial alterations went to Gihls Realty, 310 W. Illinois, $64,592; J. Slictings, 605 S. Marienfeld, $6,800, and Farmers Insurance, 2814 W. Wall Ave. to install a sign, $600.

Permits for new residences were issued to:

Leprechaun Homes, 4707 Shadylane, $90,000; Wallace Construction, 3208 Loma, $45,000; Thomas B. King, 1001 Humble, $60,000; B&R Builders, 304 Oxford, $45,000; B&R Builders, 306 Oxford, $45,000; B&R Builders, 308 Oxford, $45,000; B&R Builders, 310 Oxford, $45,000; Concept Construction, 3616 Anetta, $37,000; Concept Construction, 3614 Anetta, $37,000; H.B. Shull, 3529 Humble, $45,000, and R.Q. Janes, 3206 Hill, $30,000.

Permits for residential alterations went to:

Joseph Rollins, 1606 N D St., $16,900; Roy Brown, 910 S. Connell, $700; Augustina Baltier, 800 N. Lee, $1,000; Julius Brooks, 112 E. Cedar, $15,000; Neb Higgins, 902 Citation, $9,000; Gene Benson, 4613 Erie, $2,200, and C.M. Cook, 3209 Baumann, #450.

Frame shop to open soon

A full range of do-it-yourself and custom framing features will be offeredin a new Frame Factory shop opening soon in Midland.

The 2,000-square-foot facility is at 3201-B N. Big Spring St.

Pete Swain and Carol Swain and Jim Carter and Kathy Carter are owners of Frame Factory here. It is one of 125 franchised shops in 25 states.

The Midland location is the 17th in Texas. The Ringold Corp. of Houston franchises Frame Factories through area developers who deal directly with owners.

Mrs. Swain said the shop will be open from 10 a. m. to 6 p. m. Monday through Saturday, with special evening hours each Thursday.

Opening date of the new business has not been announced.

The Frame Factory will offer dry-mounting and framing for a wide variety of items, including oil paintings, graphics, shadow boxes, watercolors, needlework, certificates and other mementoes.

Mrs. Swain said there will be space in the shop for those who want to do their own framing.

Seminar scheduled

ODESSA - The Permian Basin Chapter of the American Society for Training and Development will host a one-day seminar "The Job of Supervision" Tuesday.

The seminar will be presented by Practical Management Associates.

It will be held in the Holiday Inn in Odessa. Registration will open at 8 a. m. and the program will run from 8:30 a. m. to 5 p. m. The fee is $85 per person and includes luncheon, refreshments and course materials.

Persons interested in attending the seminar should contact Ken Jatko, El Paso Products Co., Odessa. The seminar is designed to answer three fundamental questions: Who are supervisors (as distinguished from managers and executives)? Why does an organization have supervisors? What is the job of supervision?

The seminar is for new supervisors, pre-supervisory nominees, experienced supervisors, managers and staff specialists.

Topics to be discussed include "Supervisors on the Management Team;" "Supervising vs. Managing;" and the "Outstanding Supervisor."

John S. Phipps

J. S. Phipps joins firm

John S. Phipps has joined Citizens Savings & Loan Association as assistant vice president. According to Citizens Savings president Ray Moudy, Phipps duties with the association will be to manage the Land Development Division within the association.

Citizens is currently in the preliminary stages of a major housing development, Meadowpark, located at the intersection of FM 869 and North "A" Street. The concept of Meadowpark is new to Midland in that it will provide for "cluster-housing" with individual units fronting onto landscaped walkways. In addition, the project will provide recreational facilities for the residents, including tennis courts, playgrounds and swimming pool, together with other green belt common areas, according to Moudy.

Prior to joining Citizens Savings, Phipps was marketing assistant for Midland National Bank. He previously has served as urban planner and director of planning and building inspection for the City of Odessa.

Phipps is currently vice chairman of the Midland Planning and Zoning Commission. He is active in the Downtown Lions Club and serves on the Retail Committee and M-Squad of the Midland Chamber of Commerce.

Phipps is a graduate of Texas Tech where he received his B.A. degree in Business Administration.

Borden to honor Mills

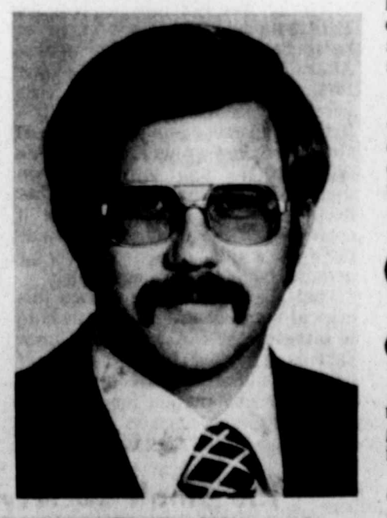

Borden, Inc., employees who have been with the company 25 years or more will be honored Tuesday at the firm's annual Quarter Century Club dinner in Midland.

The event will be held at Ranchland Hill Country Club.

Company-wide membership in the club, including the United States and Canada, is more than 7,200.

Thomas Claud Mills of 1502 W. Kentucky St. in Midland will be honored as a new member of the Quarter Century Club Tuesday. Hill, a retail route salesman, has spent all 25 years of his Borden tenure in Midland.

Borden, Inc., has approximately 38,000 employees worldwide and ranks as the 67th largest manufacturing corporation in the United States, with $3.5 billion in sales last year.

Dan Hutchinson

Hutchinson appointed

Dan Hutchinson has been appointed a sales representative in the Midland District office at Terminal for Employers Insurance of Texas.

He attended high school in Wichita, Kan., and was graduated from Texas Tech Universty.

Value of U.S. dollor remains on low side

By KRISTIN GOFF
AP Business Writer

NEW YORK (AP) — While analysts say it is be too early to tell whether the dollar's turnaround is here to stay, there are hopeful signs President Carter's defense strategy is taking hold.

Since Nov. 1, when the government announced a get-tough policy to help the dollar, the U.S. currency has gained about 15 percent against the Swiss franc; 10 percent against the West German mark and Japanese yen; and about 7 percent against the British pound.

Those rebounds came, however, against historically low rates because the dollar had been sliding badly before the Carter administration and Federal Reserve acted.

And, the dollar's value against major currencies at week's end remains far below those at the beginning of this year.

Still, traders noted a new confidence in the dollar this past week that may signal better times.

Importantly, said one New York bank trader, the dollar's gains this past week came with far less help from government banks than had been true the previous week, when they bought large quantities of dollars to provide a floor of support.

"There seems to be a shift in dollar-holding psychology," said the bank trader, who requested anonymity. Another predicted the Nov. 1 program would be successful in keeping the dollar bouyant for the remainder of the year.

"The dollar looks pretty stable to us and it looks as if it will continue that way for quite a while," added Vincent Teasy at James Sinclair & Co., a firm that trades currency and precious metal.

"I think the government will have to keep up with the effort to curb inflation. But I think everybody perceives the inflation commitment as strong."

In addition to a $30 billion inter-government currency arrangement to add to the U.S. government's ability to directly aid the dollar when needed, the Nov. 1 program included higher interest rates and tighter credit policies.

Because inflation, now running at an annual rate of about 10 percent, cuts into dollar buying power abroad as well as at home, it is cited as one of the fundamental reasons for the dollar's long decline.

President Carter gave the dollar an added boost this past week with some tough statements on his intention to stick with the administration's anti-inflation plan, including wage and price guidelines, despite complaints from some groups.

But, as Chase Manhattan Bank implies in its International Finance report this week, such promises must be translated into performance to have lasting impact.

"Although order has been restored to the market, it remains to be seen whether expectations as to U.S. growth and inflation have shifted sufficiently to put an end to nearly a year and a half of dollar weakness."

In that regard, Chase sees some improvement in reducing the huge U.S. trade deficits, which have also keep the dollar under downward pressure, but less reason to hope for quick results in slowing inflation.

It cites as one key factor, the question of whether the Federal Reserve can stay with the tight money policies traders abroad have come to expect.

There is a delicate balance involved because a policy that leads to higher interest rates and tight credit increases the risks of slowing investment at home, tipping the economy into slower growth or a recession.

In other business developments this past week:

—President Carter declaring, "I meant and I do mean business" on his anti-inflation and dollar programs, said that failure raises the threat of a "recession or even a depression." But Carter said he didn't see that as likely. With restraint in both the government and private sectors, Carter said he expected the program to be successful.

—The prime rate — a widely watched indicator of general credit conditions — was increased a quarter of a point to 11 percent by almost all of the nation's biggest banks. It was the 13th increase in the rate since Jan. 1, when the prime stood at 7¾ percent.

The prime is the interest rate commercial banks use on loans to their best corporate customers. It doesn't directly affect rates on other loans.

•

BUSINESS

•

But because it is an indicator of general credit conditions, it often signals either higher interest rates on other loans or stricter credit conditions for getting them.

—Seaboard Coast Line Industries Inc. and Chessie System Inc. announced plans for merger valued at $1 billion that would create a 27,000-mile rail system from the Gulf of Mexico to Canada. According to one estimate the merged companies would have the capacity to haul more than half of the coal now transported in the Eastern part of the country.

—The combined personal income of all Americans increased by 1.2 percent in October, the government reported. That was bigger than increases in the previous two months. Income gains in the combined three months have about kept pace with price increases in the same period. The Commerce Department said one major factor in the October income gain was that 325,000 people were added to the workforce in new jobs. Overall, personal income rose $21.3 billion to $1.764 trillion, on an annual basis in October. That would mean an average annual income of $8,060 for every adult and child in the country.

C&C presents certificates

The Big Brothers-Big Sisters organization in Midland has received a gift of 43 memberships to C&C Savings Discount Club.

Mrs. LaDoyce Lambert, executive director of Big Brothers-Big Sisters, accepted the memberships for the volunteer group from C. R. "Roy" Camarillo, vice president of C&C Savings.

The membership cards will allow each volunteer to receive discounted prices from the 66 merchant members of the C&C Savings program.

Big Brothers-Big Sisters provides time, friendship and trust to 33 children from one-parent families.

"The memberships were presented in appreciation of the time, effort and concern the volunteers of United Way show for the community," Camarillo said.

Large companies look for bargains in stock

By WILLIAM GLASGALL
AP Business Writer

NEW YORK (AP) — Large companies, like shoppers looking for bargains a month before the Christmas rush, increasingly are looking on purchases of their own stock as a good buy.

The list of companies saying in recent days they would purchase blocks of their stock includes conglomerates U.S. Industries and Gulf & Western Industries, and diversified food processor Anderson, Clayton.

The offers have come as the stock market has dropped sharply, with the Dow Jones industrial average off by 68.09 points since the beginning of October and the New York Stock Exchange's composite index of all its listed stocks down by 5.24 points in the same period.

In the past week, the Dow average dropped 9.36 to 797.73. Daily Big Board volume rose to an average of 24.82 million shares from 21.88 million the previous week, and the NYSE composite index finished at 52.54, down .18. The American Stock Exchange market value index fell .01 to 143.39.

There is nothing new in such repurchase plans. International Business Machines, for instance, bought back nearly 5 million shares between February 1977 and July 1978. Its total outlay for the stock, including its expenses, was about $1.35 billion, or an average of around $270 a share. IBM now is selling for around $261.

Among buy-up plans announced in the past week:

—Gulf & Western said it would buy 5 million of its shares — just over 10 percent of its stock — on the open market.

—U.S. Industries offered to buy up 2.5 million of its shares at $8 apiece — about 9 percent of the shares outstanding — and said it might buy 500,000 more.

—Anderson, Clayton announced plans to buy back 11 percent of its outstanding stock — 1.6 million shares — for $22 each or a total of $35.2 million.

According to Eldon Grimm of Birr Wilson Inc., "the companies are taking advantage of the drop in the market, of course," to pull in blocks of shares.

"Companies don't like to see their stock drop like this," he said. "They're somewhat proud."

That sentiment was echoed at Gulf & Western, which said its stock is "undervalued" at its current price of about $12 a share, down from a high in the past year of $16.25.

The buy-backs will boost a company's per-share earnings and may boost the remaining stock's market value, simply because there's less stock around.

The purchases also may "put some badly-needed cash in the stock market," Grimm said.

There are other possible reasons behind stock buy-up programs. A company with cash to spare might want to empty its coffers to acquire its stock in order to protect itself from an unfriendly takeover bid.

In addition, a company might be able to profit while raising new capital in the future by buying its stock at a low price now and then by reselling it later if the market turns higher.

BUSINESS NOTEBOOK

Multi-peril insurance undergoing boom

By Bill Kidd
Austin Bureau

AUSTIN — Mulit-peril insurance in Texas appears to be undergoing a "boom," due to changes in eligibility rules and more risks in the marketplace.

Lyndon Anderson, commercial multi-peril supervisor for the State Board of Insurance's Property Division, feels the changes in rules, along with the fact that three-year fire policies which are expiring are bing written under the Texas multi-peril policy instead, are involved.

In 1977, the premium on multi-peril was some $70 million--while estimates are that the amount will be $100 million or more this year.

It also appears that there is active competition among insurers for the commercial business--with 15 companies paying dividends of 7.5 to 25 percent on business.

****

Another section of the SBI reports that the Texas Automobile Insurance Plan continues to see fewer assignments this year than last.

In October, the assigned risk plan had 13,184 assignments, including 10,509 renewals, beinging the total for the year to 141,659, behind the 155,759 for the first 10 months of 1977.

In its interim report, the House Insurance Committee has recommended against any change in the assigned risk plan "at this time," concluding that while there appears to be an "availability" problem with auto insurance in some isolated areas, the problem isn't widespread.

Less than two percent of the state's drivers are in the plan, the report notes, adding that the SBI estimated over 28 percent of Texas drivers are uninsured.

But, the report comments, there's no way to tell whether these drivers can't purchase insurance in the voluntary market, or if they simply won't purchase insurance.

****

Bureau of Business Research, University of Texas at Austin, is offering the 1978-79 "Directory of Texas Manufacturers," with listings for 13,500-plus plants, with address, telephone, officers, products descpritions and related information.

Cost is $50 per set, plus five percent sales tax, and $2.50 postage and handling charges per set, from Box 7459, Austin, Tex. 79712.

****

The State Depository Board increased interest rates for State funds held in time accounts by banks from 7.5 to 8.5 percent, with State Treasurer Warren G. Harding noting higher interest rates are prevailing within the money market.

Harding says his office will be keeping an eye on the market to make adjustments as warranted.

****

New headquarters for the Texas Credit Union Department should be ready by the end of the year, Commissioner John "Pete" Parsons reports.

Formal dedication of the new facilities, financed by a special assessment of State-chartered credity unions, is set for Jan. 21.

TCUD believes that it can save money that would otherwise go for rent payments by owning its own building, and the credit unions approved the plan.

Parsons also reports the department's new annual operating budget, $605,000 for 1979, won't require any increase in examination fees, but that the question of future fee increases will be discussed at a meeting of State-chartered credit unions in April.

****

Because of what the Texas Employment Commission calls the "healthy state of the trust fund" which pays benefits to jobless workers, Texas employers will get a small rate reduction in their payroll taxes in 1979.

Administrator Ernie W. Tullis says the rate reduction will be 0.2 of one per cent.

The reduction is being made because of provisions for decreasing the rate when the trust fund exceeds $325 million--and in October the fund had exceeded $330 million.

PPG buys plant site

Announcement by Pittsburgh Plate Glass Industries (PPG) that it is purchasing 420 acres of land six miles west of Midland as a site for construction of a huge new fiberglass plant is great, exciting and most welcome news to residents of Midland and vicinity.

It is, in fact, one of the Tall City's most significant and far-reaching industrial development announcements ever.

Although the long-awaited news did not have the element of surprise it normally would have had, due to prolonged negotiation and speculation, it still was received with widespread interest and enthusiasm.

It certainly is just cause for jubilation, since the announced project will mean so very much to Midland and area cities and residents for a long, long time to come. Formal celebration will come later at a ground-breaking ceremony, or some like event.

The Tall City, becoming taller all the while, continues to move forward on all economic fronts in a most enviable manner. And the fact that the community is gaining this particular industrial plum further accelerates its pace along the path leading toward its goal of increased economic diversification.

This is the thrilling aspect of the whole business, the creation of hundreds of new jobs and the further broadening of the community's economy.

PPG and its personnel certainly will be received most cordially by residents of the Tall City, who will cooperate in every way possible in the construction and operation phases of the new industrial facility. PPG will be received with open arms as a corporate citizen of the community.

Congratulations also are in order for members of the Midland Area Sales Team (MAST), the industrial development arm of the Midland Chamber of Commerce; the Industrial Foundation of Midland, Inc., and others for their hard work and determined effort in bringing the PPG project to this particular stage.

Their assignments haven't been particularly easy ones, as is the case in most instances when going after new industry, but they never once have looked back. This project started back in 1973, when MAST made its first contact with PPG. It has required a great deal of effort in putting together the required acreage for possible plant sites, research work, getting and submitting information of various kinds, a great deal of travel, innumerable telephone calls and the like. There have been numerous delays and some disappointments, but those Midlanders involved in the program have forged ahead willingly; determined in their efforts, and never complaining. They have done a magnificent job and the community is indebted to them.

It is all a part of the industrial development puzzle, and now that the pieces are falling into place in the desired manner, it is time for rejoicing. The satisfaction of a job well done is all the reward that the team members expect or desire.

The Midland City Council and the Midland County Commissioners Court also have been most cooperative and helpful in the project. The council has given approval for utility service to be extended to the PPG site, and the court will be engaged in the paving of a road to the area from the Holiday Hill Road.

It takes a lot of doing on the part of a lot of individuals, organizations and agencies to wrap up a package of this size, but Midlanders thrive on such challenges.

Construction of the plant could begin in 1979, if approved by the PPG board of directors. Initial startup of the plant, then, could begin sonetime during 1980.

Initial plans call for a 750,000-square-foot plant, which would produce fiberglass for the plastic reinforcement market. Employment eventually could range from 1,000 to 1,200 persons.

Purchase of the Scharbauer Brothers land was negotiated with the Industrial Foundation of Midland, Inc., of which C. Winston Barclay is president. Joe Kloesel is chairman of the MAST setup.

It is hoped now that PPG will move ahead on its construction program as rapidly as possible.

CHARLEY REESE:

More 'I-Love-America' talks needed in America

By CHARLEY REESE
Sun Belt Syndicate

ORLANDO, Fla. — On the recent Veteran's Day, most cities and towns had little ceremonies and most of them were sparcely attended.

Some veterans no doubt blamed the small turnout on the media, but that is not the real problem. The media people are professionals at guessing what people are interested in and if they give such events minor coverage, it's because they sense not too many people care about honoring veterans.

Oh, if you corner an individual, even if he or she happens not to be one of our 29 million veterans, he'd likely say, "Yeah, I honor veterans," but that does not mean he will go watch a parade or attend a ceremony — especially on a weekend.

It is not a situation unique to the United States or even to our times. People generally do not concern themselves with soldiers or ex-soldiers when they feel safe.

God knows, no rational American should feel safe these days, but the great majority do for the simple reason that for the most part they get bombarded with trivia from us in the media and with fairy tales from their political leaders.

A war which would effect them personally seems remote to most Americans. War with the Soviet Union is like cancer — everybody knows it's a possibility but nobody believes it's going to happen to them.

Furthermore, patriotism is not fashionable. It is not encouraged by most politicians. It is not taught in most schools. The leftists have succeeded in selling the proposition that nationalism and fascism are synonymous.

If you do not believe that your country is something very special, then obviously it's no big deal to defend it or to die for it. That is all a verteran is, a fellow citizen who once offered to defend and if necessary to die for his country.

I have yet to hear President Carter make a "I Love America" speech. He is always talking instead about universal human rights or the new world order. Naturally, too, nothing you can do more graphically spits in the face of both veterans and patriotism than to pardon draft dodgers and deserters.

The movies are a good barometer of American culture. The prevailing image of the veteran portrayed in most movies is either a psycho or a criminal.

As a nation, we are making a big mistake. I will put it in the most selfish and calloused terms. From time to time, as history proves, it is necessary to fight wars. It is very difficult to persuade people to fight wars when you have spit on the ones who fought your earlier wars.

Going to war is almost never an advantage to the individual. Wars are nasty. You can get killed or horribly maimed. The people who actually enjoy taking such risks are so few in number that no nation can make an army out of them. No nation has ever survived which tried to depend on mercenaries.

That means the alternative is to persuade people to make a self-sacrifice, to convince them literally that their nation's survival is more important than their individual survival. That is difficult if you have sold people on the idea that their nation is less important than a new world order or some other internationalist baloney.

I'm not one of those who is amused by irony. Of course when the first bomb falls, the anti-war crowd, the internationalists, the liberals, the whole zoo of creatures who make careers out of belittling the military, will be on their hands and knees begging the military to save their sorry skins.

Technology being what it is, though, it will probably be too late. The leisurely pace of World War II and Korea, which allowed a disarmed U.S. time to re-arm, is as much a thing of the past as the English long bow. We will either have it at the beginning or we'll lose.

Now, one more point. If you went to one of those ceremonies, I'll bet you a six-pack you saw mostly grey hair. That is another danger sign, since war is a young man's game.

A nation which does not produce in each generation a new generation of patriots has had the course. Children who are not taught to love their country fervently, who are not steeped in its legends and familiar with its heroes, are very likely to be deaf to the notes of a bugle.

WASHINGTON MERRY-GO-ROUND

U.S. clings to Shah and Somoza

By JACK ANDERSON

WASHINGTON — The popular uprisings against American-installed autocrats in Iran and Nicaragua are new illustrations of an old sickness of U.S. foreign policy. Twice again we have pursued our diplomatic aims through the expedient of propping up dictators; twice again that policy has brought us to the edge of defeat and disgrace.

How easy it seems, in the beginning, to foster our interests in a foreign land by buying up one leader and arming him to the teeth, thus to maintain him against all opposition within his country. How much simpler this is for our diplomats and generals than to cope with the complex currents of a distraught society or to reconcile our tactics with our professed principles.

But how pathetic in the end, as we are reminded anew by the pell-mell flight of American citizens from Teheran, how isolated and discredited is our posture when mass hostility finally bursts through the dam of American-equipped repression and sweeps away our client kings.

In Nicaragua, where Anastasio Somoza once displayed on his currency the portrait of a former American ambassador, President Carter today seems to be making a twelfth-hour effort to broaden our support and to stave off the consequences of a long-term American policy that invented the Somoza dictatorship and has upheld it through decades of oppressing and looting the Nicaraguan people.

But in Iran, ruled by Shah Mohammad Reza Pahlavi, another creation of the United States, President Carter's policy is as one-dimensional as that of his predecessors. It can be summed up in a telephone message from presidential adviser Zbigniew Brzezinski to the beleaguered shah: Do whatever you must do to restore authority and stability; whatever that may be, we are 100 percent behind you.

Such words would make a fitting epitaph for the president's human rights policy had not its epitaph been written previously in a dozen other places. Usually our diplomats' rationale for going down with the ship is the same one they used to arm and provision it in the first place: It is the only alternative to a communist coup or the chaos that will end in a communist takeover. It comes as no surprise, therefore, that Zbigniew Brzezinski is deftly spreading the word that the Kremlin is behind the revolt in Iran, that Soviet agents are helping to foment the street fights and that the United States must rush anti-riot armaments to the shah.

Certainly there have been enough Kremlin-directed conspiracies and takeovers in our time to lend some credence to this claim. But it is also true that the rationale of "no other alternative" has been so often misused as a cover for diplomatic bankruptcy that it should always be scrutinized and especially so in the case of Iran.

Brzezinski notwithstanding, we can report that U.S. intelligence does not confirm any significant communist role in the Iranian protest movement beyond routine radio propaganda. The dominant element in the uprising, the right-wing Moslems, is more anti-communist than the shah.

Even the radical student opponent is marching to a different drummer than any on Red Square, which is as derided as Wall Street among today's radical students in Iran and elsewhere. U.S. intelligence describes the anti-shah National Front as an umbrella organization for about 30 diverse groups representing a spectrum that is wide but leans to the right, with minimal Soviet influence.

In this respect, it resembles the anti-Somoza revolution in Nicaragua where conservative business elements have taken a leading role and where even among the Sandinista guerrillas, communist sympathy is rare. We have the observations of our own reporter, Bob Sherman, who has traveled with the guerrillas in Nicaragua, sharing hardship and danger with them.

We do not minimize the Iranian crisis. Perhaps the bankruptcy of our Iranian policy is so complete, the hostility of the Iranian populace toward the United States so great, that we have no present alternative but to cling to the deflated shah. If so, it should be recognized as a confession of error, a proof of failure, not a demonstration of vigilance or steadfastness.

The State Department has behaved, meanwhile, as if the shah and Somoza would be permanent fixtures. No serious effort has been made to establish contacts and friendships in the opposition camps. A State Department official started to dispute this. "As a general rule," he told us, "our embassies keep in touch with all shades of the political spectrum." But under questioning, he acknowledged that the dialogue is confined largely to "social contacts that are above board."

The American adoration of the shah has gone beyond the bounds of reasonable policy. Under Democratic and Republican rule alike, the White House has pampered the shah, the Pentagon has attended to his wants and the State Department has been devoted to him.

All this has antagonized neighboring Saudi Arabia, whose oil has become essential to the well-being of all Americans. Yet Washington invariably has favored the shah over the more indispensable, more reliable Saudis.

It is said that God takes care of drunks and the United States of America. And it may be that a successor regime to the shah, faced with the menace of Russia looming on its border, will of necessity seek a continued alliance with the United States. If so, it will first have to overcome a national revulsion toward our complicitous past in Iran and a justified skepticism of our fitness to lead.

INSIDE REPORT:

Soviet Union is arming Cuba with MIG-23 aircraft

By ROWLAND EVANS AND ROBERT NOVAK

WASHINGTON — The Soviet Union is surreptitiously arming Cuba with MIG-23 aircraft of the type now deployed in Europe for nuclear attack against NATO, a development casting a long shadow on President Carter's hope for Senate ratification next year of a strategic arms limitation (SALT) treaty.

Evans

Novak

In a top-secret memorandum informing President Carter of this on Oct. 23, Defense Secretary Harold Brown specifically raised the question whether supplying Cuba with the high-performance MIG-23 violates the "understandings" between President Kennedy and the Kremlin that ended the Cuba missile crisis in October 1962. Those understandings forced Moscow to remove ballistic missiles and other nuclear-armed weapons from Cuba, including the Badger bomber.

According to U.S. intelligence findings on which Brown based his memorandum to the president, the Cuba-based MIG-23 has the configuration of the nuclear-attack aircraft that comprises the Warsaw Pact's most advanced nuclear-delivery tactical strike force.

There was no suggestion in Brown's memorandum to Carter that the Cuba-based MIG-23s — believed now to number some 12 to 15 aircraft — have actually been fitted or "wired," in the technical phrase, for carrying a nuclear payload. What can be said is that the MIG-23 now in Cuba appears to be the same Model D or F long observed in the Warsaw Pact's nuclear-delivery training exercises: an attack, not an air-defense, aircraft.

Top Carter administration officials, not concealing their shock at discovering the MIG-23 with its one-way 1,200-mile range based 90 miles off the Florida coast, are now hotly debating what to do and say about it. As Brown warned Carter in his memo, the totally unexpected Soviet move presents the president with a problem of "high political sensitivity."

To make the fact public poses this unpleasant choice: demand that Moscow immediately remove all MIG-23s, as the U.S. successfully demanded of the Soviet missiles and Badger bombers in 1962 when the strategic balance was overwhelmingly in Washington's favor; or try to explain it away as a mere upgrading or modernization of Cuba's air force, whose MIG-21s are now largely in the service of Cuba's African adventures.

If Carter chose the first option, odds are prohibitive that Mosocw would tell him to go jump in the lake, diplomatically or not, and probably make it stick. That would bring an instant crisis in detente and put the new SALT agreement in jeopardy.

But to accept the presence of the MIG-23 in Cuba, knowing its apparent capability for being fitted with nuclear-delivery, would violate the doctrine laid down by John F. Kennedy during the Cuba missile crisis and by the Nixon-Kissinger strategists in 1970.

In that year, Richard Nixon and his then-national security adviser Henry Kissinger delivered what amounted to an ultimatum against Soviet-Cuban construction of submarine pens at Cienfuegos capable of servicing nuclear-missile submarines. That ultimatium was based squarely on the Kennedy doctrine: any nuclear-capable weapon — whether it was actually fitted with nuclear armaments or not — was ipso facto intolerable in Fidel Castro's Cuba. The submarine pens were not built.

It is doubtful that even a signed Cuban "pledge" that its new MIG-23s would never be equipped for nuclear delivery would do much to solve Carter's political problem in the Senate when the new SALT agreement comes up for debate next year. With the U.S. Southland exposed to attack within the MIG-23's nonstop, 1,200-mile range, the SALT debate might well turn into an anti-Soviet free-for-all.

Indeed, long-headed analysts here are hard put to explain the surreptitious deployment of the MIG-23 in terms other than Soviet muscle-flexing, mixed with deterrence. It would seen to provide Moscow with a powerful option to be brandished when and if necessary as a counter to American policy anywhere in the world considered hostile by the Soviet Union.

U.S. defense officials say that the MIG-23 model now in Cuba has never before been delivered to a Soviet ally. After the Arab-Israeli war in October 1973, Syria received the air-defense version of the MIG-23 — essentially a fighter plane not equipped for tactical strikes against ground targets. The difference is similar to that between the U.S. F-4 and the F-5E: the F-4 has been denied to Taiwan because it could attack the Chinese mainland; the F-5E, a plane designed purely for defense, is being supplied instead.

That the Soviets have chosen this critical moment in off-again detente to threaten the U.S. in its own back yard is a vicious irony for Jimmy Carter. Unless he can conjure up a justifiable explanation for the MIG-23s where none appears today, his hopes for SALT II may turn to dust.

BIBLE VERSE

Many seek the ruler's favour; but every man's judgment cometh from the Lord. — Pro. 29:26.

THE BIBLE

CAN YOU QUOTE IT?

By LAVINA ROSS FOWLER AND ELIZABETH ROSS WIERSEMA

1. After Jesus had said, "A man's life consisteth not in the abundance of the things which he possesseth," what parable did he teach? Luke 12: 16
2. Name Jacob's oldest son. Genesis 49: 3
3. Why did Gamaliel remind his people of Theudas (THU-das)? Acts 5: 35-36
4. Who said, "In returning and rest shall ye be saved; in quietness and in confidence shall be your strength." Isaiah 30: 15
5. Name the king of Babylon, who built the pyramid of gardens, known as "the hanging gardens." Daniel 3

Four correct...excellent. Three correct...good.

AUSTIN NOTEBOOK

A Bill in the Governor's Mansion is worth a handful of conjecture

By BILL KIDD
Austin Bureau

AUSTIN — For the next four years, it appears Texas' political workings will be largely in the hands of four men named "Bill."

First, obviously, is governor-elect Bill Clements — who, as anyone who hasn't been doing a Rip Van Winkle routine knows, is the first Republican since the unlamented days of Reconstruction to be selected for the Governor's Mansion.

Next, there's Lt. Gov. Bill Hobby, who'll be the top-ranking elected Democrat in state government in January — and then comes (subject to what appears virtually pro forma action by the House of Representatives) Speaker Bill Clayton.

No. 4 is Bill (more formally William Wayne) Justice, Tyler's much-discussed (in various terms) federal district judge.

Bill the Governor obviously has his work cut out for him — and while he may feel like the Norman duke whose name he shares when that conqueror arrived in another capital back in 1066, he might do well to remember that other Bill started digging in at once.

Already, there are mutterings of discontent among some state agencies which see themselves as coming under some foreign overlord ignorant of or indifferent to their customs, rights and privileges.

As one put it, "if Clements appoints some turkey who screws up, do you think anybody is going to cover for him? They'll be giving copies of those reports out on Congress Avenue."

Clements does indeed carry a great deal of responsibility, not only for his own political future — but for the future of the Republican Party in Texas as well (or at least he is being perceived that way).

That means that the role of the other three Bills becomes more important than would have been the case under a Democratic governor.

And what Bill the Lieutenant Governor and Bill the Speaker do may determine who will be the Democratic candidate for governor in four years.

Both Hobby and Clayton are, and for some time have been, regarded as infected with the bug of gubernatorial ambition.

Both are in positions where they can maneuver for or against Clements — either openly or through more subtle, less obvious means.

And both will be able to offer explanations for whatever is done — that cooperation with the governor was for the good of the state, putting aside partisan differences or that there wasn't cooperation, because what the governor proposed wasn't good for the state, and party affiliation had nothing to do with it.

Initially, Hobby appears to be in a better position than Clayton as far as advancing any ambitions he may have for statewide office.

Voters gave Hobby what amounts to a vote of confidence in the recent general election, and he faced no serious threat in the primary.

Democratic Party officials appear to find Hobby acceptable, and during his tenure as the No. 2 man in state government, Hobby has come across as someone who has matured with service.

Not least important is the fact that he has come across as being not too liberal to offend the conservatives, and not to conservative to offend the liberals — not a bad formula for statewide office in Texas, at least in the past.

Clayton has appeared more conservative than Hobby — and his speakership has had some murmurings of discontent and has seen minor rebellions and insurrections, although Clayton can't be charged with the kind of tyranny that existed under some administrations, despite occasional outbursts from his critics.

Clayton, however, hasn't ever made a statewide race — and since Hobby has, Hobby has an advantage there, all other things being equal.

So, all in all, it's not unfair to say that while Bills Nos. 2 and 3 will be eyeing Bill No. 1, and running the affairs of their respective houses, they'll also be taking a glance or two at prospects for 1982. (What other candidates may be available is another story, of course.)

Bill No. 4's role is even more conjectural — but it may be a major one.

Judge Justice has been involved in legislative matters before (to the chagrin and unhappiness of many lawmakers) — and he may be again.

One good chance may come in 1981, when lawmakers must redistrict congressional and legislative seats following the 1980 census.

That redistricting will have to be done to the satisfaction of Bill Clements — and Bill Justice. That is no small order.

Judge Justice remains that joker in this political poker hand — where the state obviously doesn't have four of a kind — and where, when the Governor's Mansion is involved, one is good enough for a full house.

"Get off and walk-!"

POSITIVE THINKING

The Bible serves as foundation

By NORMAN VINCENT PEALE

I sat in the 20th floor office of an old friend gazing through a large picture window upon the great American city lying below. I studied my friend as he took a telephone call. Sturdy of build, relaxed in attitude, keen of mind, he was a good example of a mature and competent person.

Yet what a life he had lived; a poverty-stricken youth, left an orphan, frail in health. Everything seemed against him, but he had moved steadily ahead. With good humor, always with a goal, friendly, thoughtful of others, he was one of those real human beings who helps to keep alive your faith in human nature.

"Fred," I said when he put down the phone, "you've come a long way and I'm proud that you are my friend. As you know, I study people, especially the motivation that makes them what they are. I think that I know you, but can you state in a couple of sentences the chief factor that helped you overcome all your hazards and make something really fine of yourself and of life?"

"That's easy," he said in a crisp manner. He opened the top left hand desk drawer and laid three books on the table. They were two Bibles, one old and tattered King James version, the other the version called "Good News for Modern Man," and the third a Bible commentary or scholarly study book.

"This one," he explained, holding up the old Bible, "was given me by my parents the day I became a member of the church. I was 12 years old. They both died during the following two years.

On the flyleaf was this message: "To our dear son. Follow this book all your life and you will walk in the way everlasting. Your loving Mother and Father."

He looked at it tenderly. "This was all they left me, but it was enough. They pointed the way. I've tried to follow it."

Pointing to the new version and the commentary he said, "These are my working tools. Every morning first thing upon coming to my office I read a passage, then study the explanation in this commentary so that I may understand the fine shades of meaning. Then I have a prayer dedicating myself and asking guidance for the day. Following that I get to work, but I'd hate to try to live and work without these," he concluded.

I wonder why some people try to get through life without using the greatest source of downright common sense, strength and guidance we have — the Bible.

Since this coming week is set apart as National Bible Week, it seems an appropriate time to write a column on the Book of Books. A famous author, Henri Daniel-Rops of the French Academy, most impressively states the importance of the Bible:

"There is a unique and inexhaustible book in which all there is to say about God and man in said. Man can also see himself in it, in all his potentialities, his grandeur and his weakness.... It is as vain to claim to understand the principles of ethics and law as of sociology, ecomonics and even politics if one is unaware of the message contained in this book....

"Western civilization rests on three foundations: Greek intellectual curiosity, Roman order and Judaeo-Christian spirituality. Let one of these collapse and the whole edifice is threatened with destruction.

"And of these three foundation the third, and really the most important because it endows the whole structure with its true meaning, is the unique and inexhaustible book which gives it its character and initial impetus. Without it the world would not be what it is."

LETTERS TO THE EDITOR

No interference

To The Editor:

For some time I have been reading, listening and trying to understand the bilingual (LESA) program in the public schools.

The State Board of Education says bilingual education (should be provided) from kindergarten through grade three with options to go through grade five, yet the Midland Independent School Board has been ordered by HEW, HUD, PHEW or some other asinine federal agency to extend the program through the twelfth grade. This federal intervention into the state and local educational problems should scare the hell out of most people; but most don't know, and those who do don't care. In simple terms, this is best expressed by saying "our school board no longer answers to you and me (parents and taxpayers) but to the federal government."

I do not like the term Mexican-American for it denotes racism and classification other than plain old simple American. I would dislike Polish-American, Italian-American, and others for the same reason.

I would like to address muyself to the remarks made by Roger Robles at a recent meeting of the Mexican-American Committee on Education and reported by The Midland Reporter-Telegram on Nov. 10. Mr. Robles stated, "Everyone has the same learning potential." No sir, they do not; but all should be exposed to the same learning opportunities. "If the teachers do not expect and demand anything from children, that child is not going to achieve." This is true, but it can likewise be said that "if Hispanic parents do not care enough to speak and teach English to their small children in the home, then those children will find it difficult to achieve in an English-speaking culture."

There is much to be said about the pride of the Mexican-American (Hispanic) culture and, rightly so, there is much good and beauty in it but, if, in clinging to the old ways, a person is denied his or her rightful place in the sun, when one's destiny is not fulfilled to its depth, then I say that this is false pride.

Every parent of Mexican-American (Hispanic) children must realize that success for a good life in this country is greatly enhanced by the ability to speak and communicate in the English language. This is not to say that Spanish is to be forgotten or not used but that it must give way and become partners with the English language.

It is time to recognize the seriousness of the problem which involves us all, and the startling place is in the home and community, not the federal government.

J.M. Horton
Midland

Disco needed

To The Editor:

I think Midland should have a teenage disco like Danceland USA in Odessa. There are not any alcoholic beverages served, and it would give teen-agers something to do on Friday and Saturday nights. And it would be a good place for entertainment.

Wendy Pruett
2816 Frontier Drive

Note of thanks

To The Editor:

I was recently presented with my lost billfold by a local resident who found it and returned it to me before I became aware that I had lost it. I was so taken by surprise that while I expressed my thanks, I failed to get the name of the person doing me this great favor and feel that I did not adequately express my appreciation.

I am, therefore, writing this letter in the hope that the person who did this wonderful act will know that I have thought many times how lucky I was that my billfold was found by such an honest person and would like to express it to him verbally if he would give me a call.

More on 'Kiss'

To The Editor:

After my initial reaction of rage and disgust upon reading past published letters to the editor which heaped a barrage of insults upon the rock group, "Kiss," I sat back and rationalized my emotions. But although I am not a "Kiss" fan, I cannot help but stand up for these four young men who are influencing youth worldwide through their music and appearance.

"Kiss" member Gene Simmons is one of the few musical celebrities today who neither smokes, drinks, or uses drugs, and he proudly admits it. Mr. Simmons, as well as Paul Stanley, Ace Frehley, and Peter Criss, comes from a good family background and Gene was once an elementary school teacher.

The reason for their make-up and outlandish costumes is to disguise their true appearance so they can appear in public without being hounded by fans or the press. As for their music, I admit it's not the best in the world musically or lyrically, but by no means is it sex or drug oriented.

I am sorry that a young man died trying to breath fire, but Gene Simmons is not the first person to perform this feat and furthermore, he (Simmons) discourages anyone from trying that stunt, as well as the others they perform. The young man's death cannot be blamed on "Kiss." This tragedy is no different from past deaths and injuries brought on from attempts at feats performed by past teen-age idols like Harry Houdini and Evil Knievel and none of these performers are responsible for the accidents.

If I had children, I would be ecstatic upon their choice of "Kiss" as their idols. "Kiss" would be much more welcome in my home than groups like the "Rolling Stones" whose infamous leader, Mick Jagger, struts and slithers around the stage kissing Keith Richards in the ear and spitting out garbage he calls music.

I am tired of seeing the childish attacks being hurled against four men who have the right to say and believe in anything they want due to a near forgotten piece of paper called The Bill of Rights. Fortunately, they use their power wisely and cautiously. No one but God has the absolute authority to judge people, and I hope my letter will not cause another foolish written retaliation against "Kiss" to appear in next week's paper.

No trivial thing

To The Editor:

In reference to a letter from Michael McLeod in the Sunday, Nov. 5, Reporter-Telegram, I would like to point out a few facts to Mr. Michael McLeod and any other reader who thinks bicycle motocross races are a trivial thing.

There are several sanctioning bodies in the sport, with the major one being the National Bicycle Association. The NBA has over 10,000 members from every state in the union. Also, in March of 1979, there will be a World's Championship race at Indianapolis with contestants from Japan, Europe and other countries participating.

On a local basis, there are weekly races held at the Midland-Odessa BMX park with 70-100 riders and a like amount of spectators. These races are co-sponsored by Bicycle Moto-X of Texas, Inc., and the West Side Optimist Club. Likewise, in July of 1978, the NBA-Schwinn summer national tour came to the Midland-Odessa area with 220 plus riders participating. These riders came from all over Texas, as well as Oklahoma, Colorado, Arizona, Washington and California. Top professional riders competed for a $700 purse in the open pro race.

Given the above facts, along with the purpose behind BMX which is to promote bicycle safety and sportsmanship, while giving the kids of Midland and Odessa a worthwhile activity to participate in, I feel Mr. Michael McLeod was very uninformed in calling your much appreciated coverage of local bicycle motocross races trivial.

C.E. Boyd III
President
Bicycle Moto-X of Texas, Inc.
Midland

Empty houses

To The Editor:

We are members of the First Presbyterian Church in Midland, and we are concerned about something in our community.

Our concern centers around the abandoned homes around De Zavala Elementary School. Some of these burned last year and we were wondering if something could be done about this.

We hope that in the future years there will not be houses around De Zavala Elementary School that are abandoned and become fire hazards.

We would like for you to help destroy all abandoned houses in Midland that are a danger to the community.

Thank you very much for your support in our community.

Sarah Yuronka
Karen Eggleston

Another service

To The Editor:

There is a service that I would like to let the people of our city know about. It is called occupational therapy.

Occupational therapy is a health and rehabilitation profession. The services offered are provided to people of all ages who have physical, developmental or emotional disabilities and because of such conditions, are not able to live independent, productive and satisfying lives.

The occupational therapist evaluates a person's abilities to carry out necessary tasks and activities. A treatment program is based on the abilities, limitations, personal goals and demands of the person's environment. Actual activity experiences are performed by the person throughout the treatment and rehabilitation process.

The occupational therapists work with a variety of disabled persons. For example, they work with handicapped children by teaching them to feed themselves or to use their hands more effectively; they work with arthritis victims by teaching them exercises and ways of doing housework with as little pain as possible; they work with alcoholics by helping them develop ways to cope with their environment as a non-drinker.

There are many other types of disabled persons who are treated by occupational therapists. Some of the places where occupational therapists work are in rehabilitation centers, school systems, hospitals, halfway houses, mental health centers, nursing homes and home health agencies.

I feel that many people who could benefit from this service are unaware of its existence. Therefore, it is my hope that this letter will bring about the awareness of occupational therapy which is able to help people with these types of handicapping conditions.

Beth Ledbetter, OTR

Texas Occupational
Therapy Association

Not 'conned'

To The Editor:

A letter appeared in this column last Sunday by Mrs. M.G. Manning in response to a letter I wrote on November 4th, concerning the rock group, "Kiss." But after reading Mrs. Manning's letter, I still feel as if my point hasn't got across.

"Kiss" has in no way conned me into thinking they're the "most decent band in the business." I know this as a fact. No one has ever conned me into anything and as I've said, I know what I'm talking about. "Kiss" is not "selling" anyone's "children a lie."

Yes, it is a shame that kids have been hurt, or killed, by copying Gene Simmon's fire-breathing stunt. But, Mr. Simmons is always warning their fans not to ever try the stunt because of the danger involved. Simmons is a professional in the art of fire-breathing and knows of the danger. He's been burned himself seven times. Every "Kiss" fan has been warned many, many times and knows very well of the danger involved. Then some fool tries it, and gets killed, and "Kiss" get full blame.

When "Peter Pan" first came out, small children tried jumping out of buildings, thinking they could fly, but ended up dead or injured. Would you say that "Peter Pan," with all its credibility, shouldn't be shown again? But this has never happened.

It's a shame that people never listen to warnings. And it's a bigger shame when the people that gave the warning get blamed for what happened to those that refused the warning.

We interrupt...

To The Editor:

I would like to make several comments concerning a particular television station in West Texas, KMOM-TV, channel 9. Since moving to West Texas five years ago, I have found this station to be a complete embarrassment to this community. On the night of the Ali-Spinks rematch, the fight was interrupted several times by techinical difficulties. On the evening of the Holmes-Norton battle, both the picture and the sound were lost during the fifth round and the program was never returned to the air, only to be replaced by an anti-gun, anti-hunting program.

On Nov. 10, throughout the complete broadcast of the boxing special on this channel between Holmes and Evangelista and other fighters, the viewers had to contend with fluttering pictures, loss of sound and telephone company troubles.

On Nov. 11, while practically the entire nation witnessed the game between number 10 ranked Louisiana State and number 3 ranked Alabama, the people of West Texas got the great thrill of watching two virtually unknown teams play a totally insignificant game.

Also The Reporter-Telegram had printed in this publication that the game of Alabama and L.S.U. would be televised. It was not. With a call to channel 9 we spoke to a person who identified himself as the program director. This person stated that he had known all along that this game would not be shown.

These errors do not just pertain to sporting events. Channel 9 is equally inept in all of its programming. The above is simply what comes to mind.

Who causes the problems, channel 9, ABC, or both? Who knows, but the people of West Texas can certainly be assured that the service they are receiving from this station will steadily decline until something can be done to improve their actions.

Iranians in America fall into two distinct groups

By BARRY SIEGEL
The Los Angeles Times

LOS ANGELES — They call themselves Rozbeh and Kaveh, Maryam and Minoo, Ismail and Madjid, although those are not their real names. They helped plan the Iranian student demonstrations in Los Angeles, including the one downtown on Sept. 1 that led to 171 arrests and 30 injuries. They talk bitterly on occasion about the "American imperialistic presence" in Iran; they also talk of poverty, hunger and the Shah's rule in their homeland, and their desire for a "better society."

They object to comparisons with American college student protesters of the '60s. "Our movement is much deeper and more broadly based," they say. They prefer a comparision with the American Revolution.

Then there are the other Iranians in Los Angeles, the rapidly expanding, nonstudent, permanent Iranian community, made up primarily of well-to-do businessmen and their families. Depending on whose estimates are listened to, their number totals 100,000 or 70,000, or 17,000. Few if any are poor, or even of the blue-collar working classes.

Many made their money in Iran by selling land they owned that suddenly skyrocketed in value after oil prices quadrupled.

A good number decided to take their profits to California because of the weather, the freedom of life-style and the myriad business investment opportunities here.

They are active in Los Angeles in such ventures as real estate, the import-export business, restaurants, clothing and carpet stores. They are by no means a cohesive community, preferring independence and privacy.

There is no Iranian region in town, or widely based organization.

The contrast between the Iranian students who demonstrate and the Iranian merchants could not be sharper. The students live and breathe politics; the businessmen want nothing to do with the subject. The students talk of hunger in Tehran; the businessmen are proud of the good life they have achieved. The two groups seem to have no contact.

It is misleading to say that the businessmen oppose the student demonstators; it is more accurate to say that they ignore them.

Opposition, after all, is still a political position, and the Iranian businessmen more than anything wish to avoid political positions of any sort.

In a private moment, some may express sympathy for the students while shaking their heads at the students' "naivete," "rhetoric" or "foolish tactics." Others say they understand the students' objections but think the Shah is doing "the best possible job."

But finally, what concerns the Iranian businessmen is business. They are doing quite well with the status quo. For the most part they wish the students would not demonstrate, but it is not a politically inspired wish. It is a pragmatic wish. They are afraid the demonstrations may create trouble or arouse adverse publicity that will hurt business.

Kamran Broumand, 35, who drives a Rolls-Royce and is co-owner of Shane Carpets in West Los Angeles, puts it simply: "The students have their beliefs, and maybe they have no other outlet, but it should be done cleanly, with no problem....I don't want to talk about politics. I worry about business."

The six students gathered one night recently at the apartment where two of them live. Like many student apartments, this one is furnished with mattresses as sofas and boxes as coffee tables. A continuous roar from the nearby San Diego Freeway serves as backdrop for all conversation. The students sit at a Formica-topped kitchen table, sipping Cokes and hot tea, munching on nuts and vanilla wafers.

Five of the six are being supported by middle-class parents, and they are studying at colleges here because there are far too few openings in Iranian colleges for all those who seek admission. All plan to return to Iran after graduation.

Of the six, three are 23, one is 25, another is 27 and one is 34. They all speak English, having been taught the language for six years in high school. their parents are mainly merchants or state workers.

The students insist that their parents in Iran also oppose the Shah and would support their demonstrations here — if they knew their children were involved. The students admit that not all their parents know of their involvement.

The two women — Maryam and Minoo — have been at the University of California Los Angeles two years, studying sociology and economics.

Rozbeh, at 34 the oldest, provides theories of political economy that link American corporate activities in Iran with the Shah's manner of governing. Here since 1968, he studied economics at the University of California Berkeley and now teaches part-time at a local college.

Kaveh, 25, the only Jew among Moslems, possesses dark, piercing eyes and speaks with a single-minded passionate intensity. He will tell you that "when you want to change society, you cannot afford to fool around," and "if you don't take risks, you can't do anything." He has earned a bachelor's degree in engineering at UCLA and is now enrolled in the master's program at California State University Northridge.

Ismail, 23, is the most somber, least friendly of the group; with blazing anger he announces that he plans, after he graduates with a master's degree in industrial education, "to demonstrate in the streets of Iran" because he is "part of the Iranian people" and cannot "sit in an airconditioned office while thousands of brothers and sisters are being killed." His father is a dentist in Iran.

The sixth, Madjid, 27, speaks not with defiance but with hesitation. He seems almost embarrassed to be talking, and keeps his eyes cast down at the table, but he is anxious to explain how he came to demonstrate in Los Angeles.

He earned a bachelor's degree in Iran before arriving here two years ago to study for a master's at California State University Los Angeles. He supports himself with savings from a job he held in Iran, and with loans from his brother, who works for a bank in Iran.

Ever since the demonstrations in Iran started, Madjid has no longer been content to demonstrate in Los Angeles. "I feel I should go back. Soon I will leave school."

Such thoughts and behavior are simply foreign to Kamran Broumand. He came here from Iran in 1969, at the age of 25, after graduating from high school and selling insurance in Iran. His brother was already here, working as a salesman in a carpet store.

Together, they started their own small carpet company in Culver City, then built it into what is now a large showroom in West Los Angeles. Over the years, they also invested steadily in shopping centers, apartment buildings and other California real estate.

Broumand speaks with pride about what he has accomplished; when he mentions that he bought his home at the age of 29, it is with more a satisfied than a boastful tone.

"It was not easy to leave my country," he says, "but you have to live only once. We knew we could make it. It is easier here to get a better life."

Like everyone other than students in the Iranian community, Broumand physically pulls back when politics are mentioned. "I worry about business," he says. "At night, I want to have fun."

Ali Reza Kianpour came here from Iran when he was 13, attended Hollywood High School and California State Polytechnic University Pomona, and served as deputy director of the local Iranian information office before launching his House of Iran business, a retail-restaurant complex, last year. The House of Iran has been the focal point of demonstrations by both Iranian students and Jewish organizations.

The Jewish demonstrations particularly bother Iranians, because they suggest a connection between Iran and the Arab states that many Iranian businessmen quickly point out does not exist.

"It takes a long time to educate people that Iranians are not Arab," says Kianpour. "We are really an Asian, not Middle East country, and we speak an Indo-European language, not Arab. Iranian Moslems belong to a different sect from Arab Moslems."

The suggeston of an Arab connection bothers Iranians, if for no other reason, because Arabs mean politics. "We are not political," Kianpour emphasizes again.

Although the Iranian students say they feel a stronger bond with Paul Revere and George Washington than with Tom Hayden and David Harris, their words are reminiscent of the American student movement of the '60s.

"When I see poor sections of Tehran," says Kaveh, "and people crying out for food, this makes me want to make a better society. We don't want to live only for ourselves. We risk imprisonment, but we have to take risks."

Iranian government spokesmen, on the other hand, frequently say that "foreign communists" are behind opposition to the Shah; some demonstrating students are called "Islamic Marxists."

Rozbeh's own denunciations of "American imperialism" do not suggest much enthusiasm for capitalism, but he insists he is for a "democratic" Iran and for any economic system "that the people choose."

Yet Rozbeh does acknowledge that the Iran student movement is comprised of "many different factions," some of which may advocate the violent overthrow of the Shah.

Estimates place the number of Iranian students in the United States at about 50,000, but it is impossible to say how many belong to the Iran Student Association, which is the umbrella organization for the several different protest groups.

It is difficult to pinpoint how many Iranian students live in Los Angeles. Estimates range from 3,000 to 65,000. Half of them might be demonstrators, or 10 percent, or 2 percent, depending on whom you listen to.

Certainly, there are many Iranian students who are not demonstrators, but they apparently are no more eager to talk politics than are the Iranian businessmen. They declined several requests for interviews. Many, say some of the professors who teach them, are here on government-paid scholarships. Others are the children of the local Iranian businessmen.

The objects of the students' protests are easier to discern than their numbers. The differing student factions clearly are united in their protests against American corporate and suspected CIA involvement in Iran on all levels, and against what they call the Shah's human-rights violations and his massive military expenditures.

American involvement cannot be denied. The United States sells large amounts of arms to Iran — $4.8 billion in 1975 — and buys substantial quantities of oil. Some 40,000 Americans are known to be involved in Iran's modernization.

Those who defend the Shah's rule and the United States' involvement say both are needed and justified because of Iran's oil resources and strategic position on the Soviet Union's border, a position that blocks Russia's access to the Persian Gulf and thus the Indian Ocean. Iran, they argue, must remain a stable, Western-leaning government.

They say that the students do not understand this, and are naive to think that control of the government would pass to them, or to "the people," if the Shah were overthrown. The Iran government's supporters believe that without the Shah's rule, and United States involvement, Iran could fall under control of the Soviet Union.

The students' anger at the Shah is almost matched by their unhappiness with American journalists, whom they feel either ignore or distort their views.

Rozbeh objects to suggestions that the Iranians' cause and aims are "distant and confusing" to the American people. "If there is any confusion," he says, "it is created by the press. There is no ambiguity in the Shah's oppression."

The students say they particularly object to "media myths" regarding their alleged links with and financial backing from "Communist terror groups." They say what money they need is collected from Iranian students who have a few dollars to spare because of part-time jobs and support from parents. They point out that they do not spend all their time demonstrating, that they are students who are carrying full class loads and earning A's and B's.

They also object to press reports that say the Shah's opposition comes mainly fom ultraconservative Moslems enraged by government efforts at modernization. The students insist such reports are fabricated by the Shah to obscure the issue.

So the Iranian students' days consist of school and studying, their evenings of conferences and meetings. With a Moslem upbringing, they drink little and use no dope.

They express no envy for their countrymen's expensive homes and Rolls-Royces, and they do not shrink from the confrontations going on in Iran.

DR. NEIL SOLOMON

New doctor group makes house calls

Dear Dr. Solomon: Is there anything we could do to get doctors back in the habit of making house calls? It certainly would be a blessing. Why is it so few doctors are willing to make them any more?—S.K.

Dear S.K.: There are two main reasons why house calls have become something of a rarity in the United States. One is that the modern tools needed for diagnosis and treatment are available at the doctor's office or the hospital. The doctor can't carry them around with him in that little black bag. In the great majority of cases, patients get much better care if they go to the doctor instead of having him come to them.

The second reason, of course, is that a doctor can take care of several patients at his office in the time it would take him to make one house call.

However, house calls are still essential in some cases, such as with older or disabled people who have trouble getting out of their house. And some doctors, including me, think that house calls deserve a more general revival.

I read just the other day in Medical World News about a system set up in Portland, Ore., by a British physician, Dr. Michael J. Ognall. It's patterned on what he had done in England before he moved to the United States.

It is called House Calls Inc. and provides nighttime and weekend medical care in the homes of patients of doctors who subscribe to the service.

Dr. Ognall feels that physicians need some time for themselves, and notes that many don't have arrangements with colleagues to cover for them during that period. On the other hand, patients may call any time day or night.

What has been happening, Dr. Ognall says, is that people have been using hospital emergency rooms for after-hour care. But these visits generally are not necessary, he says—House Calls doctors have hospitalized only 5 percent of people who call after hours.

House Calls Inc. works from 7 p.m. to 7 a.m. and around the clock on weekdays and holidays. If a patient calls his regular doctor after hours, the call is automatically switched to House Calls. A registered nurse answers and assigns priorities.

If a patient wants a house call, one of eight doctors on call is immediately dispatched. Later, a written report is sent to the patient's doctor. The fee is $37, and most insurance plans will cover it.

Dr. Ognall had built up a program in 26 cities—with a staff of about 750 physicians, with 800 doctor-subscribers making 800,000 house calls a year. So far 36 doctors have signed up for the service. It will be interesting to see how the system works out in this country.

Company helps get acts on road

By SOLL SUSSMAN

DALLAS (AP) — When rock stars are preparing to take their razzle-dazzle on the road, they don't always get the groundwork done in the glamour capitals of Los Angeles or New York.

Instead, they may head to the Dallas warehouse home of Showco for the sound and light wizardry of the music trade.

The multimillion-dollar production company started less than 10 years ago when some struggling musicians decided to rent their sound system. The garage that was their rehearsal hall served as headquarters.

This past summer, Showco had 30 semi-trucks rolling. They were loaded with sound equipment, lights and sets for nine acts ranging from country star Willie Nelson to the soulful O'Jays to the Rolling Stones.

The company, still run by the same three musicians, handles an average of 175 shows each month.

"It became clear we were the only company that did everything," said Showco's 34-year-old president, Jack Calmes.

Anything having to do with putting on a tour is arranged from the three-building headquarters, from making plane reservations to designing a computerized light show.

If an act wants to make a live album, as Wings and Jackson Browne did, Showco can record it. If a tour film is desired, the company can now take care of that too.

"Our story's kind of a Horatio Alger story," Calmes says. "All we capitalized the company with was $1,000."

Last year sales were at $5-million level, and Calmes predicted $8 million in sales by next year.

"I've never seen a business in such a state of growth as the music business," he said. "To me it's almost like the oil business — worldwide ... It's an infinite market."

Several years ago Showco could take a European rock tour to only about 20 or 30 cities. Halls in other locations were not equipped to handle the size and complexity of the equipment.

Calmes said tours this year could be booked to about 50 European cities, and business is increasing in Australia, New Zealand and Japan.

Showco's laser presentation is headed for Mexican and South American symphonies this fall. Called "Starship Encounters," it takes advantage of the success of science fiction films.

"We are a sound company definitely ... Sound is the most important thing to an artist, and that's what our primary strength is," Calmes said.

The company's foundation in sound for tours is being used to build a home market that may someday dwarf its present business in the entertainment world. Some stereo equipment that incorporates stage designs was recently introduced for the general consumer.

Separate lighting and sound workshops churn out almost all the parts necessary for the stage equipment, then assemble them.

"We have our own engineering and research department ... Everything from A to Z is done in this plant," Calmes said.

Real Estate Today

By DON HARVEY REALTOR
Owner, DON HARVEY REALTORS

WALL PERSONALITY

Decorating a newly bought home can be fun, but it can also present problems. Whether you paint or put up new wallpaper, the big question will confront you: "Do I take off the old wallpaper before putting something over it?"

The answer is...if the old paper is solid and tight against the wall, with secure seams and no bulges, chances are it's okay. You can probably paint or put new wallpaper over it. But you're wise to inspect it carefully. Don't fret if there's a few loose pieces. You can remove them and smooth down the edges with sandpaper, or even re-glue some of them back into place.

If it's all pretty loose, you have no choice but to pull all the old paper down. This can be done with a rented steamer, liquid wallpaper remover, or a wet sponge. It's quite a bit of work and somewhat messy. But it must be done to ensure a good base for the new paint or wallpaper. It's all worth it. Paint and paper can improve a home's personality faster and less expensively than anything else.

★★★★★★★★★★★★

If you have any questions on this subject or any other aspect of real estate, feel free to phone or drop in at DON HARVEY Realtors. 702 Andrews Hwy. Phone 683-5333. We're here to help! Come in for your free copy of "Home for Living" magazine.

Texas catching up

AUSTIN, Texas (AP) — In comparison with the rest of the nation Texas is below average in per capita income but it is catching up, reports the Texas Bureau of Business Research.

"While in 1971 the per capita income in the state was less than 90 percent of the national average, it has climbed steadily since the," said a report by Charles p. Zlatkovich and Rita J. Wright. "In 1973 the per capita average income in Texas was 92 percent; in 1975, 95 percent, and in 1976, 97 percent."

In 1976 the average per capita income in Texas was $6,201 and that for the nation $6,396.

The report said that Midland was the most properous metropolitan area in Texas with a 1976 income level of $7,701. The Midland area ranks ninth among all metropolitan areas in the country. Houston is ranked 12 nationally with $7,617, and second in the state. The Dallas-Fort Worth area is third in the state and 36th in the nation with $7,096. The next five metropolitan areas in Texas, in order of per capita income, are Galveston-Texas City, Amarillo, Wichita Falls, Beaumont-Port Arthur-Orange and Odessa.

The Brownsville-Harlingen-San Benito, Laredo and McAllen-Pharr-Edinburg areas rank last among Texas metropolitan areas and also have the lowest levels of all metropolitan areas in the nation, according to the bureau. The per capita figures for the three were $3,825, $3,575, and $3,338, in that order.

When per capita income is figured by county, the most prosperous part of Texas includes some of the state's largest counties with the least population, the report said. Loving County with less than 200 residents, came out with an average income of $15,710 for 1976. Kenedy County, home of the King Ranch, ranked second with per capita income of $10,624.

Two Panhandle counties, Roberts and Carson, ranked third and fourth in income level with $9,629 and $8,640.

For a big moment, give a big book.

IRA and KEOGH Retirement Plans at First Savings are the sure way to build for a secure retirement, and get a tax break at the same time.

With an Individual Retirement Account (IRA) at First Savings you can save for the future at the impressive rate of 8% (effective annual yield 8.33%). Deduct whatever you save - up to $1500 - from your gross income. And defer every penny in taxes on your IRA until you withdraw it, normally after retiring. Then, you'll probably have less income and possibly be in a lower tax bracket.
(NOTE: There are severe penalties for early withdrawals.)

Here's an example of what an IRA can do for you. If you start an IRA at age 30, and deposit the maximum of $1500 per year until age 65, at the current interest rate, your IRA will be worth over $300,000. That's a tidy sum to start retirement, if you want to retire that young. By the way, your IRA is in addition to standard social security benefits. But remember, the deadline is the date your tax return is due in order to get your full tax deduction.

A Keogh Plan works much the same as an IRA except that it is designed for the self-employed individual, whereas the IRA is designed for the individual not covered by a pension or retirement plan. A Keogh Plan permits an annual deposit of up to $7500. With a Keogh Plan, you get the same tax advantages and interest rate as an IRA. However, the deadline for starting a Keogh is December the 31st, and you can make your final deposit on the day you file your taxes.

So stop by the First Savings offices downtown or San Miguel Square and let the "FISCAL FITNESS PEOPLE" show you the sure way to save for your retirement. It's getting later than you think . . .

Chinese journalist sees U.S. transport system as decadent

By PHIL BROWN

TOKYO (AP) — Decayed railroads, costly air travel, too few buses and too many automobiles — that's the U.S. transportation system in the eyes of one Chinese journalist who visited America. But he was impressed by the Mississippi barge system, which he called an "inspiration."

Class differences in America "apparently are not reflected primarily by whether one has a car or not, but by whether one has a good car or a bad car, or one car or many cars," journalist Li Yen-ning told newspaper readers in mainland China, a country where personal use of autos is virtually non-existent.

Li, a member of a Chinese journalists' delegation that toured the United States for three weeks, wrote a series on American transport in Peking's official newspaper People's Daily.

He said he was told having a car was an unavoidable burden in the United States.

"A vicious circle has formed," he wrote. "The more public transportation remains undeveloped, the more private cars there are, and the more development of public transportation can't advance."

Li said that his only American train trip, from Washington, D.C., to Philadelphia, was "unforgettable." At the entrance to the Washington station, "you simply couldn't tell it was a railroad station, because you couldn't see any travelers going in or out," he wrote.

He enjoyed the train's air conditioning and found the seats comfortable, but riders were so few that "you could imagine it was running at a big loss."

"The train's speed was faster than our country's railroads, but the strong shaking was something we had not experienced in China or a number of trips on European trains. Coffee spilled out of the cups. The roadbed certainly was in rather a mess," Li wrote.

"Surprisingly, the American friends accompanying us said this Washington-New York section of railroad was America's best," he added.

"In Europe and America, because of competition from cars and planes, the railroads all are decaying. This wasn't news to us. But that they had decayed to such a degree in America, this was somewhat unexpected," Li said.

He said the "capitalists who grew immensely rich" from railroads in the past didn't see any profit in renovating them now, and the government was more interested in spending money on highways than on railroads.

Air transportation is frequent, with good and widespread connections, Li wrote, but flights are expensive.

In nine cities the Chinese visited, trolleys and buses were few, and it wasn't unusual to wait more than 10 minutes for a bus, he wrote. Only a few cities had subways, he said.

The area in which China has the most to learn from America is water transport, especially the Mississippi and the Great Lake systems, Li wrote.

Mississippi barge transport can move freight at one-fifth to one-half of the cost by train, and one-eighth to one-twentieth the cost by truck.

"For our country, with its vast river network and serious insufficiency of railroads and highways, the Mississippi River system's transport is a rich inspiration," Li said.

He said autos are a necessity for many reasons. In the country, for example, farmers live far apart rather than in villages and "there is no way to live without a car,' he wrote.

He noted that Americans can use time payments to buy cars, and he said they often scrimp in other areas while putting a large portion of their income into buying autos.

When Americans talk about their cars, Li wrote, they recite a long list of annoyances: hopeless rush-hour traffic jams when "you sometimes can't drive 10 miles in an hour," parking problems in city centers, intolerable prices for gasoline and insurance, serious air pollution, and accidents that kill 40,000 to 50,000 people a year.

Cars and highways have enabled many Americans from the upper classes to move to the suburbs, some commuting 50 miles or more to work, he said.

"Those left in the cities are blacks, Puerto Ricans, Mexicans and other minorities or other low-income groups .... City governments are poorer and poorer, even on the brink of bankruptcy, as in New York. One reason is that the rich have moved out, greatly reducing the city government's tax revenues," he said.

"In Manhattan, with its forest of skyscrapers, streets go years without repair and are quite bumpy. In the dock area, there was a large hole in the center of the street with a big oil drum placed in the hole to prevent accidents."

Viva signing off

NEW YORK (AP) — Viva magazine is calling it quits.

Viva announced Friday that it will cease publication after January, saying the magazine's image still suffered because it once ran photographs of nude men.

The monthly joins another magazine New Times in closing up shop. New Times said Wednesday it was halting publication after December because of dwindling circulation. Both magazines have operated for five years.

Autumn leaf colors not caused by frost

By CHARLES W. Green
Midland County Extension Agent

Small grains planted early in the West Texas area have made excellent growth, responding to the rainfall and moderate temperatures. Cotton harvest continues to wait on more favorable weather. A heavy freeze and dry, open weather is needed to allow cotton harvest to get underway.

DON'T FORGET to take those pecan nut samples and enter them in the Second Annual Midland County Pecan Show coming up Nov. 27 and 28. Deadline for entries is 5:00 p.m. Nov. 25. Entries, consisting of at least 40 nuts of each variety, can be left at the County Extension Office, Courthouse Annex; C. A. and L. Pecan Company, Rankin Highway, or the manager's office, Dellwood Plaza Shopping Mall.

SMALL GRAINS (oats, wheat, barley, rye) planted early this fall have made excellent growth during the past few weeks. Use of these crops for grazing of livestock requires proper management for optimum results. Here are some suggestions for getting the most out of winter pastures:

The first is to permit forage to make abundant growth before cold weather arrives. Forage plants grow very little during December, January and February, due to cold temperatures and inadequate amounts of sunlight.

Temporary winter pastures should not be grazed until they are at least eight inches tall, and livestock should be taken off the field when it is grazed down to a height of three inches. Grazing before the proper growth has been accomplished or grazing too short can reduce the total forage growth for the season by 50 percent or more.

Here's a "pasture stretching" management tip: Limit the time which animals have access to the pastures. This can be done in several ways. One way is to permit cattle to graze the pasture only one to two hours each day. When this 2-hour period is completed, cattle are removed to an area where good-quality hay or grazing of dry forage is available.

Small grain pastures produced high-quality forage (as high as 22-24 protein) which are best utilized by growing and high-producing animals, such as stocker calves and lactating beef cows.

THIS FALL has produced a gorgeous array of color or deciduous plants in the home landscapes in West Texas. What causes leaves to change color in the fall, resulting in the colorful display? Many people suppose that frost is responsible for the color change. Not so. Many leaves begin to turn before the first frost.

All during the spring and summer the leaves have served as factories, where the foods necessary for the tree's growth have been manufactured. This food-making takes place in countless tiny cells of the leaf and is carried on by small green bodies which give the leaf its color. These chlorophyll bodies, as they are called, make food for the tree by combining carbon taken from the air with hydrogen, oxygen and various minerals supplied in the soil moisture the roots gather.

In the fall when cool weather causes the slowing down of the vital processes, the work of the leaves comes to an end. The green chlorophyll is broken up into the various substances of which it is composed, and whatever food is on hand is sent to the body of the tree to be stored for use in the spring.

All that remains in the cell cavities of the leaves is a watery substance in which a few oil globules and crystals and a small number of yellow, strongly refractive bodies can be seen. These give the leaves the yellow coloring so familiar in the autumnal foliage.

It often happens that there is more sugar in the leaf than can be readily transferred back to the tree. When this is the case, the chemical condition with other substances produces many color shades of red. Trees noted for red coloration include dogwood, red maple, sumac and oak.

Tree leaf pigments are found elsewhere in nature. The same kind of chemicals produce the bright yellows, blues and reds of flowers.

Much interesting news comes in small doses

By BRIAN SULLIVAN
AP Science Writer

NEW YORK (AP) — Remember that shoot-out in "High Noon?" Gary Cooper didn't blink, did he? Well, yes, he did.

"It may come as a surprise to learn that even the most dauntless western marshal staring down the shifty eyed villain is no less shifty eyed than his adversary," says the Eye Research Institute of the Retina Foundation.

The research institute says that the healthy human eye is never really still, even when staring at an object as carefully as possible, "It seems to be the case that the nerve cells of the eye and brain require constant movement of the image on the retina in order to produce visual perception," the institute says.

The eye is constantly shifting the direction of its gaze, with microscopically small movements up down and from side to side. Without this movement, apparently, normal vision is not possible.

MORE WOMEN than men chose voluntary sterlization as their method of birth control in 1977, says the Association for Voluntary Sterlization.

About a million persons a year have been choosing this method for the last several years.

"A significant change, however, over the past years is the percentage of men versus women," the association says. "In the early 1970s, men represented 80 percent of the total. In recent years, 1973-76, about equal percentages of each sex chose voluntary sterlization, but last year numbers shifted with 220,000 more women than men opting for the procedure, so the ratio was 60 percent women to 40 per cent men," the association says.

IF YOURS is a family with a high risk of cardiovascular disease, get your children to a doctor to see if they have excessive levels of fat in their blood.

If they do, the American Heart Association recommends, they should be placed on a corrective diet.

A high risk family is defined as one in which either or both parents have excessive fat levels, or have high blood pressure or a family history of heart attack or stroke or peripheral vascular disease before age 50.

Excessive levels of the fats known as cholesterol or tryglyceride is a condition called hyperlipidemia and is related to atherosclerosis, the disease in which arteries become clogged with fatty deposts.

"Although the evidence does not yet support the recommendation that cholesterol and saturated fat should be reduced in the diet of all children," the AHA says, "the public should be advised that such modification appears safe and very likely to be beneficial" in cutting the risk of artherosclerosis when the child grows up."

There is growing evidence that a diet low in saturated fats and high in polyunsaturated fats such as corn oil lowers the amount of low-density lipoprotein, LDL, which appears dangerous because it seems to carry cholesterol into blood vessel walls. At the same time such a diet increases the amount of high density lipoprotein, HDL, which seems to protect against cardiovascular damage.

Dr. Charles Glueck, of the University of Cincinnati School of medicine, pediatrician and director of the Lipid Research Center there, urges routine screening of children if there is a family history of diabetes, gout, obesity or high blood cholesterol levels, high blood pressure, and heart disease.

A NEW DRUG for the treatment of high blood pressure, the first of its kind released for medical use in a decade, has been approved by the Food and Drug Administration.

The drug, called Lopressor and known generically as metoprolol tartrate, is marketed by Geigy Pharmaceuticals, which says it lowers blood pressure while producing fewer and milder side effects than others most of them temporary.

"Depression and sedation sometimes experienced with traditional hypertensives were minimal with Lopressor, and no sexual dysfunction has been reported," says Dr. Roy Ellis of Geigy. "Lopressor usually does not cause dizziness or fainting when the patient stands."

The drug is known as a beta-blocker, for its blocking action in reducing nerve impulses to the system, the beta-adrenergic system, that controls the body's cardiovascular and glandular responses to various stimuli.

THAT OLD MEDICINE chest staple, ipecac syrup, which induces vomiting may get new labeling requirements from the Food and Drug Administration.

FDA Commissioner Donald Kennedy says the labeling should urge users to call a doctor, poison control center or emergency room for advice before using ipecac. The labeling would warn the ipecac should not be used if styrchnine, corrosives such as lye and strong acids or petroleum distilates such as kerosene, gasoline, paint thinner or cleaning fluid have been ingested.

Kennedy said the FDA review of ipecac has found it to be safe and effective. "Ipecac syrup should be in every medicine chest, especially in homes with small children. In cases of accidental poisonings, ipecac syrup can be life-saving drug."

THE NEW YORK City Health Department has some tips on how to prevent burns in the home:

— Be sure pot and pan handles are turned inward on the stove.

— Do Not store cookies or other temptations in cabinets near or above the stove.

Artist uses diners as subjects

By PHIL THOMAS

NEW YORK (AP) — Several times a month John Baeder hops into his car and goes hunting for diners. To Baeder, they're more than eateries, they're subjects for paintings.

"I'm obsessed with diners," Baeder says. "Diners are my life. Diners are sort of isolated and unique and I guess I am too. And they are totally American. I see them as temples.

"A diner is sort of like a mother, sort of warm and tender.

For the past six years, Baeder has painted more than 100 pictures of diners — many displayed in his new book, called, logically enough, "Diners." When he isn't painting them he's out looking for them and taking pictures of them. He paints from the pictures he takes.

"They're part of our social culture, our background," he says. "I have to preserve them, they are rapidly being torn down. The fast food places, the superhighways, urban renewal are putting them out of business. Obviously I can't afford to buy them all and start a diner museum. The only way I can preserve them is to paint them.

"I think of myself as not just an artist but as an archaelogist and preservationist. Being an artist actually is rather secondary in a way."

"People tell me about some," the 39-year-old Baeder says, "but I'd rather find them myself. My greatest addiction is going to a small town I know nothing about in hope of finding a diner.

"Naturally I like to find them, but sometimes they find me. It's kind of a psychic thing. It's as if they knew I was there and they draw me to them."

Baeder works in an apartment in New York City, crowded with pictures of diners and diner memorabilia, like an old framed menu which offers, among other things, "Lam Stew 25 cents."

Walking restlessly as he talks, Baeder explains he left his job as an advertising agency art director in 1972 "because I wanted to paint. It was one of those things everybody talked about and nobody did anything about. I decided to do something. My feeling is that you have got to keep going and growing in life."

He began painting from postcards he had collected that "involved the roadside — its motels, diners, gas stations. Then I started doing just diners. What I do is called photo-realism, but I don't like labels. I call it representational painting because so much my love goes into a painting that comes out alive, always moving."

Baeder says he has cut down his painting time to 10 to 12 hours a day from 16 to 18.

Baeder declines to discuss the prices of his work. He says he works mostly in oil and watercolor, although he also has done etchings and lithographs. "Most people respond to my watercolors," he says, "but I enjoy all the forms, it's refreshing to change mediums." His work has been exhibited in a number of group shows and he has had about five one-man shows.

Although he feels compelled to paint diners, Baeder allows "that I don't go out of my way to eat in them. Some have excellent food, some are just so-so. But then I've had bad meals in what were supposed to be really fine restaurants.

"If I'm out looking and I find a diner I'll probably eat in it. Not long ago I found one that served the finest chicken salad sandwich I'd ever had in my life. I trusted that place as soon as I walked into it. I've walked into some diners that are fine to look at — they are perfect inside and out — but for some reason I didn't trust them. But I stayed and ate and I got a so-so meal. However, just the experience of being in a fine looking diner made up for the meal.

"If I can help it I try not to eat in fast-food places. They don't seem to have any humanity, which is what's so nice about diners, they do. They give a sense of camaraderie."

Baeder says that while the bulk of his work has dealt with the exterior of diners he has done some interiors recently.

"I may move into the interior now," he says, "I've been watching people in diners and I think it may be wonderful way to present human figures.

Susan Collins of suburban Park Ridge stands in front of a billboard which she rented at a cost of $7,000. She wants to be a cartoonist, and the billboard advertises characters for a cartoon strip she is trying to sell. (AP Laserphoto)

Budding cartoonist uses billboard in costly effort to sell her wares

CHICAGO (AP) — "I Wanna Be Discovered" say the two painted characters on the the huge billboard that overlooks busy Lake Shore Drive.

The characters are the work of 31-year-old Susan Collins who wants to be a syndicated cartoonist. To let the world know it, she has spent $7,000 to advertise her cartoon strip idea for two months on a rented billboard.

The billboard, 21 feet high and 66 feet long, is across from Soldier Field, home of the Chicago Bears.

The sign features Ms. Collins' two cartoon characters — a divorcee and a bachelor neighbor — who would star in her proposed cartoon strip called "Once Removed."

"Cartooning is a powerful medium and something I really want to get involved in," said Ms. Collins, a divorcee herself. "But there is fierce competition in the profession. The only feedback I've had so far (about her sign) is from the news media. No one has inquired about syndicating it, and that is what I'm after. Getting an agent aroused is tough, but the public is starting to talk about the sign now."

A free-lance commercial artist, Ms. Collins said she had to take out loans to rent the billboard from Triangle Sign Co. Any inquiries about the cartoon must go through the company since Ms. Collins has no identification or phone number on the sign.

"If anyone is really interested, he will find out who is behind it," says Ms. Collins.

She has a six-week backlog of her cartoon strip. Her characters don't have names because she feels people find it easier to identify with characters if they aren't named.

Ms. Collins says she has been an avid follower of cartoons and newspaper funnies since she was a little girl and explains that her strip is about "two basic people communicating with each other — their ways of thinking; their thoughts of the day based on news events or experiences; their complaints, their philosophies, and their way of coping with them.

"There is a funny side to everything, and I try to make the end of each strip leave the reader with a smile," said Ms. Collins, who said she started drawing her cartoons two years ago after getting divorced. "I needed an outlet for my feelings and this seemed to be it."

Chinese culture mellowing

By EDITH M. LEDERER

HONG KONG (AP) — In the 1960s, visitors to the Canton Cultural Park could test their marksmanship on a moving line of toy American soldiers.

Following President Nixon's trip to China in 1972, the toy Americans were replaced by nondescript-looking soldiers. Today, amateur marksmen have their choice of toy ducks, giraffes and lions.

Dr. Ross Terrill, an associate professor of government at Harvard University who recently returned from China, said the changing targets are a vivid example of "the terrific rollback of politics in culture" under the current Chinese leadership.

The downfall of the "Gang of Four" in October 1976 and the arrest of its leader, Chiang Ching, who acted as China's cultural czar and final arbiter of "revolutionary" taste, marked a turning point for the arts.

In the last two years, China has undergone a massive cultural rehabilitation with dozens of banned Chinese and Western books, plays, musical compositions and paintings reappearing for the first time in more than a decade.

No longer is the late Chairman Mao Tse-tung's little "Red Book" of quotations waved at the end of some theatrical performances. In fact, the "Red Book" has recently been criticized for taking Mao's thoughts out of context.

Love and marriage are back onstage, tragedy is also back and provincial music groups are singing local songs which had been banned for years.

In a typical report on the rehabilitation of love stories, a September article in Kwangming, a Peking newspaper, declared love and marriage important "social issues" — not sinister examples of "feudalism, capitalism and revisionism" which caused their banishment from the cultural world by the Gang of Four.

A one-act comedy called "Rendezvous," which tells the story of a young couple who meet by accident in a park where both have been stood up by their dates, is packing the house in Shanghai, according to a recent report in the Hong Kong Communist Party newspaper Ta Kung Pao.

Visitors to China have been enjoying the revivals and some contrast the current era to the early 1960s when as one put it: "You couldn't spend a night at the theater without getting politics rammed down your throat."

On Friday, a hovercraft skimmed the muddy waters between this British colony and China. It was the first ferry from Hong Kong to Canton in 30 years and forged a new link between the Chinese and the outside world.

Fishermen in red-sailed junks plying the river and seamen on freighters waved in astonishment as the hovercraft, its British and Chinese flags flapping in the breeze, whisked by on its 75-mile run north from Hong Kong to the port of Canton.

The voyage inaugurated a three-times daily trip, building another bridge between the two commercial centers that had been broken since the 1948 Communist takeover in China.

W.E. "Pete" Snelson

Tom Craddick

Midland lawmakers expect no problems in new Legislature

By LINDA HILL
R-T Staff Writer

"The $64 question" when the Texas Legislature convenes in January is how things will change with the first Republican governor in 105 years.

Midland's legislators, Republican Rep. Tom Craddick and Democratic Sen. W.E. "Pete" Snelson, don't see any real problem.

The two do disagree to an extent on how large the impact of the change will be.

They agree the primary impact will be in the area of gubernatorial appointments, though neither expects Republican Gov. Bill Clements to adopt a strict party line.

"It's going to be different," said Snelson.

Craddick put it a little more strongly: "It'll be good for the state to have a shakeup across the way (in state agencies)...I think he's got the guts to do it, too."

Neither expects any major problems in relations between the governor and the largely Democratic Legislature to be caused by the party difference.

"We're not structured on a partisan-type basis like they do in Washington...Everyone carries out their responsibilities whether they are Democrat or Republican," Snelson said.

"Occasionally, on both sides you'll find somebody who kind of wants to demagogue...Much of it is in good fun," he added.

Battles in the Texas Legislature, said Craddick, are "more conservative versus liberal than Democrat versus Republcan...There are very few party issues."

Thus, he said, Clements should be able to work with the conservative majorities in both hoses of the Legislature.

Republican Craddick, understandably pleased at the Clements victory Nov. 7, said he thinks Clements' party status will give him "more of a free hand in vetoing bills and really tightening the budget than a Democrat."

A Democrat "would have to go with more things," Craddick said, and would have less freedom to act.

Snelson believes party will not be as important as the man himself.

"It will all boil down to a matter of personality and how he views his job."

And, he said, if there's going to be a personality problem, it won't matter what the party designation is.

"The interesting thing to me is what kind of crash course he (Clements) is going to develop between now and January" to learn about the workings of state government, the senator said.

Wild turkey now making comeback

EDITOR'S NOTE — As we sit down to Thanksgiving dinner, we tend to take the turkey for granted. But two decades ago the turkey was disappearing. What follows are a few thoughts on the origin of the bird and its comeback.

By JOE WING
For The Associated Press

Wild turkeys, which graced the first Thanksgiving feast and are America's chief gift to the world of domesticated animals, have made an strong comeback after being threatened with extinction.

The eminent ornithologist, Edward Howe Forbush, once wrote that the turkey "is destined to vanish forever from the earth unless our people begin at once to protect it." As late as 1951, another naturalist reported the turkey gone from 70 percent of its original range and confined largely to the Deep South and the Southwest.

But in less than two decades, this biggest land game bird has spread north once more, and west into areas like Hawaii, where it never gobbled before. Present populations are estimated at well over a million and there's an annual kill of over 100,000 There are hunting seasons in about 40 states.

When the Pilgrims landed, the turkey was abundant in New England, and naive and easy to kill. But it learned quickly, retreating before the white man's guns and axes chopping at the forests. Still it remained so common in some areas that birds were hauled to market by the wagon load, and John James Audubon reported in 1807 that a 25 or 30 pound turkey might be bought in Kentucky for 25 cents.

As the turkey retreated, it got smarter. Alerted to danger by keen eyes and ears, it vanishes into the underbrush before the hunter is likely to get a shot. As one early observer commented, "It can run as fast as a dogge, and fly as well as a goose."

Hunters usually waylay it from blinds to which they attract the gobblers by immitating a hen's call. Even so, says Arthur J. Cone in his book on hunting, shooting a wild turkey is "one of the great tests of woodsmanship and hunting skills."

A Michigan Department of Natural Resources booklet admonishes hunters to enjoy the chase without counting too much on success. In the same spirit, Forbush wrote: "At the sound of my gun the great bird rose splendid from the grass, georgeous with metallic reflections, its broad wings throwing off sun rays like polished bronze and gold."

As the supply of turkeys dwindled gradually, hunting restrictions were clamped on, which was all to the good, and a lot of birds were released from game farms, which was futile. The farm-bred birds had forgotten all their parents ever knew about life in the wild and were too innocent to escape the hawks, owls, foxes, coyotes, coons, skunks, snakes and other predarors lying in wait.

Then in the 1950s, Pennsylvania authorities discovered a solution. Birds trapped in the wild and released in suitable habitat elsewhere multiplied nicely. State after state followed suit so that the call of the gobbler was again heard far and wide.

Pennsylvania birds spread into New York. From there Vermont obtained in 1968 a stock of 31 individuals which have multiplied in ten years to an estimated 6,000 to 10,000. Vermont has sent breeders to Maine, New Hampshire and New Jersey. And so it goes.

Michigan reports its transplanted birds thriving despite three hard winters in a row to a total of about 68,000. Such success is not universal. Kentucky's turkey population of 2,380 has not done much more than hold its own recently. Mississippi, always a turkey strongold, reports that hunters killed 19,192 of the birds in a year.

But the turkey has fared far better than the bald eagle, which nosed it out in the early days for the honor of being America's official symbol. Moreover its name surely is spoken more often than the eagle's. Turkey shoots were popular backwoods sporting events. "Talking turkey" is part of the vernacular. The turkey trot had its day. Dull dramas are often referred to as turkeys — a reference to the stupid domestic bird rather than the wild one. And U.S. fliers in World War II boasted of the great Marianas turkey shoot.

Scientists list several subspecies, which can scarcely be told apart. First encountered by Englishmen was the Eastern. The Florida bird lives where its name implies. The Rio Grande variety has spread over the high plains, and Merriam's thrives in the western mountains where Pueblo Indians domesticated it, considered it sacred, and kept it for feathers rather than for meat.

There is the Mexican variety, distinguished by white-tipped tail feathers instead of brown. It was domesticated by the Aztecs and is used now for breeding in farmyards. Europeans reportedly called it a turkey, after Spanish conquistadors introduced it there, because they thought it had come from the Middle east. Quite possibly, however, the bird named itself by calling "turk, turk, turk."

Turkeys are best spotted in the spring — mating time. "Displaying to impress the hens," says a New Mexico Wildlife Management writer, "the huge bird spreads his tail feathers in an upright fan, droops his wingtip to the ground and performs a strutting dance, punctuated by short pauses for deep throated gobbling."

Collecting a harem. a dominant male drives off rivals in combat and gets so involved in fighting and strutting that the slim, sleek female finally has to take the initiative, literally throwing herself at his feet. Once impregnated she steals away to hollow a makeshift, hidden nest and lays a dozen or so eggs, trying to evade or ward off predators and even her own mate.

The eggs hatch readily, if not nipped by frost, and the precocious chicks or pults start scrambling for a living almost at once. Many are lost, but within two weeks survivors can fly and roost in trees. Meantime the gobblers have gone off by themselves, while the pults and hens stay together.

In favorable territory, 15 or 20 birds can find a living in a square mile. Nuts are mainstays, although they may have to compete for them with deer, pigs and cattle. But turkeys will eat nearly everything, including nuts, fruit, berries, seeds, leaves, insects, animals and reptiles. Some are learning about corn and soybeans. It may be that such diets account for the renowned flavor of their roasted flesh.

Police brutality alleged in report

HARRRISBURG, Pa. (AP) — Police brutality in Philadelphia sometimes has "reached the level of homicidal violence," according to a special report by a Pennsylvania House committee.

And the report lays part of the blame with Mayor Frank Rizzo, himself a former cop: "The lack of action by the mayor ... has created a general public perception that the police are beyond control, and that the entire police department is a threat. ... That jeopardizes the lives of the entire police department."

The report says many city policemen "routinely engage in verbal and physical abuse of citizens," and that Rizzo and Police Commissioner Joseph O'Neill have refused to curb the misconduct.

Rep. Joseph Rhodes, chairman of the subcommittee, however, predicted that new state legislation aimed at fighting organized crime and official corruption will help provide a remedy.

"The key element in controlling police violence is leadership by the city political administration and top-to-bottom authority and disciplinary control within the police department, and both of those elements are missing in the city of Philadelphia," Rhodes said.

The report, released last week, also said the majority of police officers in Philadelphia are competent professionals who follow proper methods.

Rizzo and O'Neill have not been available for comment on the report. Rhodes said both men were asked in writing to participate in the probe, but that neither responded.

The subcommittee investigation was prompted last year by a series of Philadelphia Inquirer stories on police misconduct.

Council slates special session

Midland City Council will meet in a special session at 10 a.m. Tuesday in the Council Chambers at City Hall.

Major item on the agenda is a resolution authorizing a contractor for the exhibit hall to be located downtown. Bids were opened Thursday during a special meeting.

The exhibit hall was approved by voters in December 1976 and will be located in the block bordered by Wall, Loraine, Texas and Main streets. Plans and specifications were approved by the council during its Oct. 10 meeting.

Also on the agenda is the request to cut into the median on LaForce Avenue at Midland Regional Airport. The cut is needed to accomodate the Metro Bank being constructed at Air Terminal.

Methods of repairing a boiler at the airport building will be discussed.

Also on the agenda is an executive session to discuss personnel matters, possible land purchase and pending or prospective litigation.

The right signal to call is 682-6222

Texas Tech downs SMU in 19-16 tilt

LUBBOCK, Texas (AP) — Texas Tech turned two interceptions and a fumble recovery into an early 16-0 lead and then held off two furious scoring bids by Southern Methodist in the closing minutes to take a 19-16 Southwest Conference victory Saturday.

The Raiders' Bill Adams kicked field goals of 31, 53, 31 and 29 yards as Texas Tech took its fifth straight victory and raised its record to 6-3 for the year and 4-2 in SWC play. SMU fell to 4-5-1 and 3-4.

PHIL WEATEHRALL scored Tech's only touchdown with a one-yard plunge in the fourth quarter, but fullback James Hadnot again powered the Tech offense, gaining 160 yards in 31 carries to set a Tech record for a season.

Mustang quarterback Mike Ford, who was intercepted five times, directed SMU to two touchdowns in the second quarter to cut the lead to 16-14 at the half.

He hit Gary Smith on a 12-yard scoring pass and Emanuel Tolbert on a four-yard touchdown toss. Tolbert's catch set a conference record of 11 TD receptions in one season.

Another interception set up Adams' final field goal on the first play of the fourth quarter to put Tech ahead 19-14.

SMU recovered a fumble by Hadnot at the Tech seven with 5:52 to play, but SMU's Charles Lewis fumbled it right back to the Raiders on the very next play. Then D.K. Perry returned a punt 32 yard to the Tech 18 to give the Mustangs another scoring chance with 3:45 left in the game.

FORD PROMPTLY hit Tolbert at the seven for a first down. Three plays later, on fourth and two, the Raider crowd burst into pandemonium as Tech noseguard Jamie Giles dropped Ford at the seven.

However, the Raiders were called for holding on the play, giving SMU still another chance, this time from the one yardline. But safety Ted Watts stopped halfback Darold Turner cold at the line of scrimmage and the Raiders took over.

Tech then took a safety with 55 seconds to play, and after taking a free kick Watts intecepted Ford at the Tech 32 to nail down the victory.

Longhorns defeat hapless Froggies

FORT WORTH, Texas (AP) — Ninth-ranked Texas, ignited by safety Johnnie Johnson's 47-yard touchdown interception return, whipped Texas Christian 41-0 Saturday in a Southwest Conference game and accepted a bid to play Maryland in the Sun Bowl Dec. 23 in El Paso.

Texas, now 7-2 overall and 5-1 in SWC play, rolled up 31 first-half points against the hapless Horned Frogs and flooded the field with reserves.

Johnson was the catalyst for the aroused Longhorns with two interceptions and two punt returns.

WITH TEXAS leading 3-0 after Russell Erxleben kicked the first of his four field goals, Johnson stepped in front of TCU wide receiver Michael Milton and fled untouched for a touchdown.

Johnson had two punt returns that set up 10 points and intercepted a second pass that Texas cashed for another touchdown.

The Longhorns' rugged defense out-muscled the Frogs, who suffered the loss of wide receiver Steve Williams in the first quarter in a sickening collison with a concrete wall just outside the northwest end zone. Williams suffered multiple fractures between his nose and mouth and was hospitalized.

Williams was attempting to catch a poorly thrown pass that almost landed in the stands.

ERXLEBEN KICKED field goals of 41, 24, 48 and 30 yards to run his career scoring to 253 points, breaking Earl Campbell's school record. Erxleben also broke the school record for the most Texas field goals in one game.

TCU is now 2-8 for the year and 0-7 in SWC games. It was the 11th straight victory for Texas over TCU.

17. LSU (6-3-0) lost to Miss State, 16-14.
18. Pitt (8-2-0) beat Army, 35-17.
19. Ohio State (6-3-1) beat Indiana, 21-18
20. Georgia Tech (7-3-0) lost to Notre Dame, 38-21.

UCLA will face Hogs in bowl

PHOENIX, Ariz. (AP) — Arkansas and UCLA will meet in the Dec. 25 Fiesta Bowl, officials announced Saturday.

Arkansas said it would play in the annual game following its 26-7 victory over Texas A&M. UCLA accepted the bid following its 17-10 loss to Southern California. USC will represent the Pacific 10 Conference in the Rose Bowl.

Each team will get 11,600 tickets each for the Christmas Day contest. Jim Meyer, a Fiesta Bowl spokesman, said that the stadium where the game is played has been increased to 70,000 seats and that more than 35,000 tickets already have been sold.

This will be the third Fiesta Bowl played on Christmas Day and Meyer said the television ratings "have just gone dynamite" since the game date was changed.

He said the game attracted 33 million television viewers last year, the fourth highest in any of the bowl games.

Maryland to Sun Bowl

COLLEGE PARK, Md. (AP) — Maryland accepted a bid to play in the Sun Bowl on Dec. 23 after dropping a 28-24 decision to 12th-ranked Clemson Saturday.

The invitation was extended to the 11th-ranked Terps by Jimmy Rogers, past president of the Sun Bowl and a member of the selection committee for the game in El Paso, Texas.

"We are absolutely delighted to have Maryland," Rogers said.

A defensive jewell

LUBBOCK—For a game which boasted nine of the 10 individual leaders in the categories the Southwest Conference keeps statistics, ma8ybe Texas Tech's 19-16 victory margin didn't produce all the scoreboard points expected, and there wasn't even a conference title at stake or so much as a bowl bid in the offing, yet it was the kind of script long-suffering Super Bowl promoters fantasize about in their most erotic dreams.

And don't let the score mislead you. It was, as advertised, an offensive show, but strangely most of the excitement came after Tech's Bill Adams kicked a field goal, his fourth, on the first play of the fourth quarter to give Tech a 19-14 lead.

As for what happened thereafter, SMU Coach Ron Meyer wasn't exactly rhapsodizing when he labeled it something Shakespeare might have dreamed up, "a comedy of errors."

It made the 45,101 lucky fans who showed up glad they stayed after the 151,000 balloons were turned loose just before kickoff and the plot put them through an emotional wringer that would have made a Soap Opera envious. When it was over, there wasn't, or shouldn't have been, a dry eye in the house.

TECH'S JAMES Hadnot rushed for 160 yards and SMU's Mike Ford passed for 278, yet, it was defense that decided the game in that wild, suspenseful, error-littered final quarter.

And perhaps it was only fitting that an obscure free safety, Ted Watts, emerged with the game's two biggest defensive gems, but not before he tried on the dunce cap for size.

Watts, like cornerback Allan Swann, the hero of the Baylor game two weeks ago, isn't even listed in Tech's preseason brochure, or, for that matter, on its two-deep. A native of Tarpon Springs, Fla., he transferred in as a sophomore and was destined to sit this one out in a red shirt.

When he finally was called on in the A&M game, he discovered SWC football can be rough after suffering a broken jaw. As a result, the clean-cut, trim 6-1, 180-pounder wears a padded ear to ear cast on his helmet, which is how he broke his nose in the second period.

"I came up to meet Darold Turner and he lowered his shoulder," Watts explained, "it drove the guard into my nose and broke it."

AFTER SUFFERING this kind of adversity, something nice was bound to happen to Watts and it finally did.

In fact, Tech was about to ease the post-game traffic jam by pushing over the clinching TD after driving 45 yards to first and goal on the SMU one after a measurement so close that both sides leaped in the air in celebration. It would have sent fans scurrying to their cars with still almost 10 minutes to play.

Reeves, hit by linebacker Putt

(Continued on 2-C)

Rice Owls upset Baylor in SWC contest, 24-10

HOUSTON (AP) — Rice defensive end Jim Frith intercepted two passes including a 31-yard touchdown return and Wes Hansen kicked his first field goal of the season Saturday as the Owls upset error-plagued Baylor 24-10 in a Southwest Conference football game.

Baylor entered the game with a string of 21 turnovers in its last three games, and the Bears did nothing to slow down the miscues, allowing Rice to take a 14-7 halftime lead.

The Owls took a 7-0 lead in the first quarter on Earl Cooper's four-yard run, capping a 56-yard drive in which Cooper gained 54 yards.

Baylor tied it early in the second quarter on a one-yard dive by Walter Abercrombie, but moments later Frith intercepted a pass by quarterback Steve Smith and ran 31 yards into the end zone.

Rice took the third quarter kickoff and drove to the Baylor 11 before having to settle for Hansen's 31-yard field goal and a 17-7 lead.

Baylor moved to a 39-yard field goal by Bill Manness late in the third quarter, but the Owls, winning for only the second time this year, put the game away with 4:27 to play on a two-yard run by freshman Weldon Meeks.

Meeks' touchdown run was set up when David Darr recovered his second fumble of the day at the Rice 49 yardline.

Abercrombie fumbled the ball for Baylor's fifth turnover of the game, extending Baylor's turnover record to 26 in the last four games. The miscues have cost the Bears 62 points.

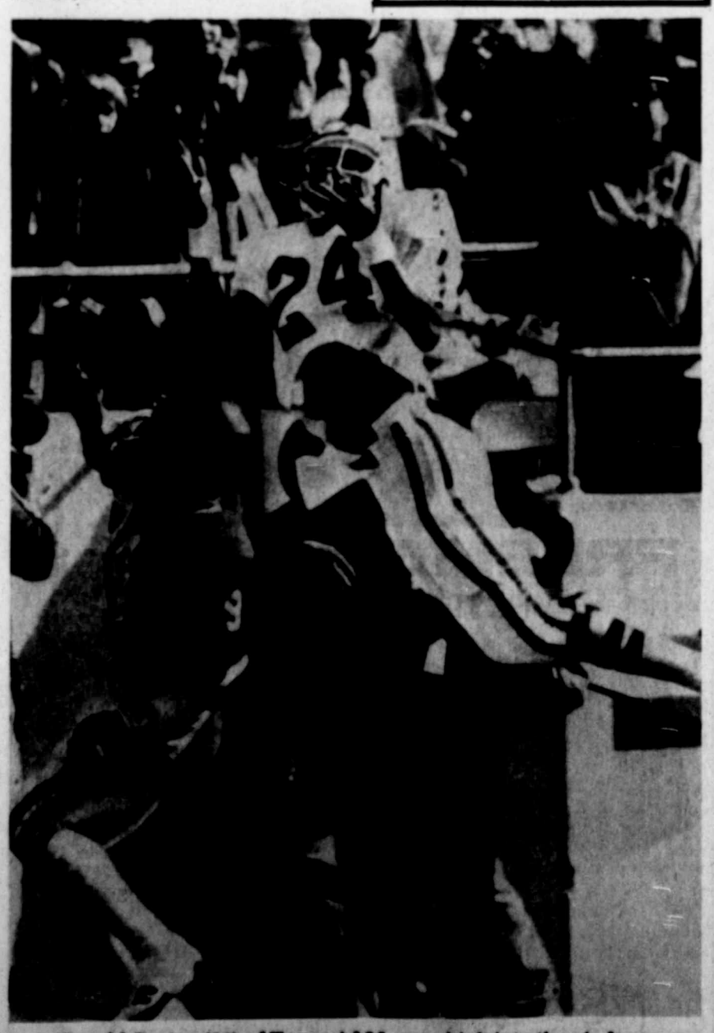

Rice is 2-9 for the season and 2-5 in SWC games, while Baylor dropped to 2-8 and 2-5.

Baylor missed a chance to get back into the game in the third quarter when the Bears' Andrew Melontree recovered a Randy Hertel fumble at the Rice 49.

Baylor got a first down at the Rice 12 and moved to the 11 on the next play before three straight losses and an offsides penalty forced the Bears to settle for Maness' 39-yard field goal

Gerald Carter (24) of Texas A&M, goes high into the air for pass from quarterback Mike Moseley in first quarter of SWC game with Arkansas in Little Rock Saturday afternoon. The ball fell incomplete, but interference was called on the Razorbacks on the play. (AP Laserphoto).

Porkers blast Aggies; going to Fiesta Bowl

LITTLE ROCK (AP) — After Arkansas agreed Saturday to play in the Fiesta Bowl, Coach Lou Holtz told his enthused Razorbacks, "Boys, they better button down Phoenix city, because we're coming."

Arkansas landed a berth in the Christmas Day bowl game by defeating Texas A&M, 26-7.

A&M won't be staying home for the holidays, either. The Aggies will play in the Hall of Fame Bowl in Birmingham, Ala. on Dec. 20

Two Fiesta Bowl representatives extended the expected invitation to Arkansas minutes after Saturday's game ended.

Jim Meyer, a member of the Fiesta Bowl team selection committee, said he believed that getting Arkansas to play will help the Fiesta Bowl achieve the No. 5 status that it aims for.

He said that he wants the Fiesta Bowl to be overshadowed only by the four new Year's Day bowl games.

Meyer said the Fiesta Bowl is trying to line up one of four teams to play the Razorbacks: Southern California, UCLA, Michigan or Ohio State.

Holtz was elated by Saturday's victory over the Aggies. "I just can't say enough good things about this team," he said.

Holtz said Arkansas' strategy was to force A&M quarterback Mike Mosley to play within a 20-yard area. "We could not allow him to run from one end of the field to another."

Defensive tackle Dan Hampton, who helped the Razorback defenders sack Mosley 13 times, said the Aggies did nothing the Razorbacks weren't ready for.

"I thought we could stop Mosley on the option and we did. I know we could stop anybody," he said.

A&M Coach Tom Wilson said the Aggies stayed in the game until early in the fourth period, when Arkansas safety Brad Shoup sacked Mosley for a 23-yard loss on a crucial fourth-down play.

"The Arkansas defense was a major factor," he said.

"Their tackles and ends harrassed us all day. We didn't protect the passer well at all."

Cowins broke the record on a 29-yard run that started the scoring drive that put Arkansas ahead. Twice on third and eight, Calcagni connected on big pass plays. The first was for 14 yards to a leaping Robert Farrell. The second was for 12 yards to a wide-open Donny Bobo.

Calcagni got the next drive going with a delay pass to Micheal Forrest that netted 18 yards. In the drive Calcagni carried twice on third down and got the first down both times.

After Calcagni's second touchdown made it 19-7, the Aggies drove from their 20 to a first down at the Arkansas 43. Dickey picked up the first down on a fourth and three situation, but on the following play, he was stripped of the ball by Marty Mitcham, and Larry Jackson recovered.

Dickey led the Aggies with 104 yards on 28 carries.

Irish will play in Cotton Bowl

DALLAS (AP) — Cotton Bowl officials announced Saturday 10th-ranked Notre Dame has accepted an invitation to play the Southwest Conference football champion in the Cotton Bowl New Year's Day.

The host spot has been all but clinched by No. 6 Houston, which needs to win only one of its two remaining games against Texas Christian and Texas Tech to win the bowl berth and at least a share of the SWC crown.

"Notre Dame was offered the invitation and they accepted," said John Thompson, president of the Cotton Bowl Athletic Association.

Notre Dame, 8-2, has been on a winning streak since losing its first two games to Missouri, 3-0, and Michigan, 28-14. It will be Notre Dame's fourth Cotton Bowl appearance in the last nine years. The Irish lost to Texas in 1970, but defeated the Longhorns in 1971 and 1978.

Notre Dame still must face No. 5 Southern California next week to complete its regular season schedule.

Tech-SMU grid tilt has great defense

(Continued from 1-C)

Choate, fumbled and SMU recovered, yawn, hopelessly buried. No one knows quite how SMU got out of it except that Ford cocked his arm and the Mustangs were suddenly at midfield. Then Ken Rosenthal turned the tables by dropping a 46-yard punt out on the Tech one. On second down, Hadnot, of all people, fumbled, later explaining, "I failed to concentrate and squeeze the ball," obviously hurting.

Coach Rex Dockery, scolding himself, said, "I probably shouldn't have had him in there after he hurt his ribs."

SMU, REFUSING, to accept charity, fumbled back on the Tech four and Emanuel Tolbert returned Maury Buford's punt 30 yards to the Tech 19. Soon it was fourth and two at the Tech two, enter Watts, disguised as Iago. Tech smothered Ford's fourth down pass attempt, but Watts was caught holding in the end zone, although pleading his innocence to the man in stripes. So the Mustangs got one more shot at it from the one.

Explaning his goat-horn shedding tackle, Watts said the secondary goes with the flow and "my assignment is to hit anything that comes through a hole. And that's what I did. But it surprised me that they ran, still it wouldn't have made any difference, I have to come up fast anyway."

With an assist from Jeff McKinney, Turner was stopped in his tracks, but even that didn't do in the Mustangs with 1:53 to play. The Ponies forced a fourth down and Dockery, remembering Tolbert's runback, opted for the safety and free kick even though it put SMU within field goal range of a tie.

This time Watts sealed the Mustangs doom by intercepting Ford, the fifth time Mike had been pilfered, at the Tech 32 with 34 seconds to go.

AP writer Charles Richards, pondering a lead, maybe summed up the finish best, observing, "It's frustrating trying to write a lead for a game when so much excitement occured after the scoring was over."

Trojans gain Rose Bowl berth with 17-10 win

LOS ANGELES (AP) — Paul McDonald threw two touchdown passes in the second period and tailback Charles White became Southern California's all-time leader in rushing Saturday, carrying the Trojans to 17-10 victory over arch-rival UCLA and a spot in the Rose Bowl New Year's Day.

McDonald, a junior, hit Calvin Sweeney with a 36-yard scoring pass and Kevin Williams on a 10-yarder for another touchdown to give Southern Cal the Pac-10 title. It will be the Trojans 22nd trip to the Rose Bowl at Pasadena.

White, also a junior, gained 145 yards in 33 carries for a career total of 3,739 yards, surpassing the 3,724 yards of Anthony Davis in 1972-74.

The 183-pound White, from nearby San Fernando, set a conference season record for rushing, and also has games against Notre Dame next week and Hawaii to finish out the regular season.

Southern Cal did all its scoring in the first half, and UCLA made all of its points in a comeback after the intermission.

Frank Jordan of USC kicked a 21-yard field goal in the first quarter and Peter Boermeester kicked a 22-yarder for UCLA in the third.

UCLA's touchdown came on an 81-yard pass play from beleaguered Rick Bashore to Severn Reece with 5:10 left in the game.

Prior to that, the USC defense, led by 225-pound Ty Spurling, had sacked Bashore seven times. Defensive back Herb Ward intercepted a Bashore pass at the USC 13 to thwart a UCLA scoring opportunity in the second quarter.

A crowd of 90,387 saw the No. 5 ranked Trojans put their season record at 9-1 with 14th ranked UCLA dropping to 8-3. In the Pac-10 Conference, USC finished at 6-1 and UCLA was 6-2.

After the nationally televised game, it was announced UCLA had accepted a bid to the Fiesta Bowl at Tempe, Ariz., facing Arkansas on Christmas Day.

Southern Cal was favored by a touchdown. The Trojans scored their field goal after 3:53 of the first period with fullback Lynn Cain contributing a 26-yard run reaching the UCLA 13.

Then it was Cain's fumble at the USC 6 that led to the Bruins' third-period field goal. Cain was hit by Manu Tuiasosopo and the ball was recovered by Billy Don Jackson of the Bruins.

James Owens ran off left tackle into the end zone but his touchdown was nullified by a penalty.

Southern California's first touchdown capped a drive of 59 yards in nine plays, but the Trojans had to go farther because of penalties for holding and illegal motion.

The second Trojan score came six plays after Garry Cobb recovered a fumble by Theotis Brown at the UCLA 17.

Brown, the UCLA senior running ace with 1,199 yards this season and a career total of 2,830 yards rushing, was held to just 18 yards in eight carries by the stingy Trojan defense.

McDonald hit seven of 10 passes for 97 yards with no interceptions. After the Trojans built their 17-0 halftime lead, Coach John Robinson became more conservative, relying mostly on a rushing offense.

Bashore connected on eight out of 15 attempts for 154 yards, including the 81-yard touchdown play. He deserved better, with receivers dropping good passes several times, including one that Owens missed at the USC 30 in the final period.

On UCLA's touchdown, Reece got behind defender Tim Lavender and caught the pass from Bashore near the 20-yard line.

Michigan rolls over Purdue

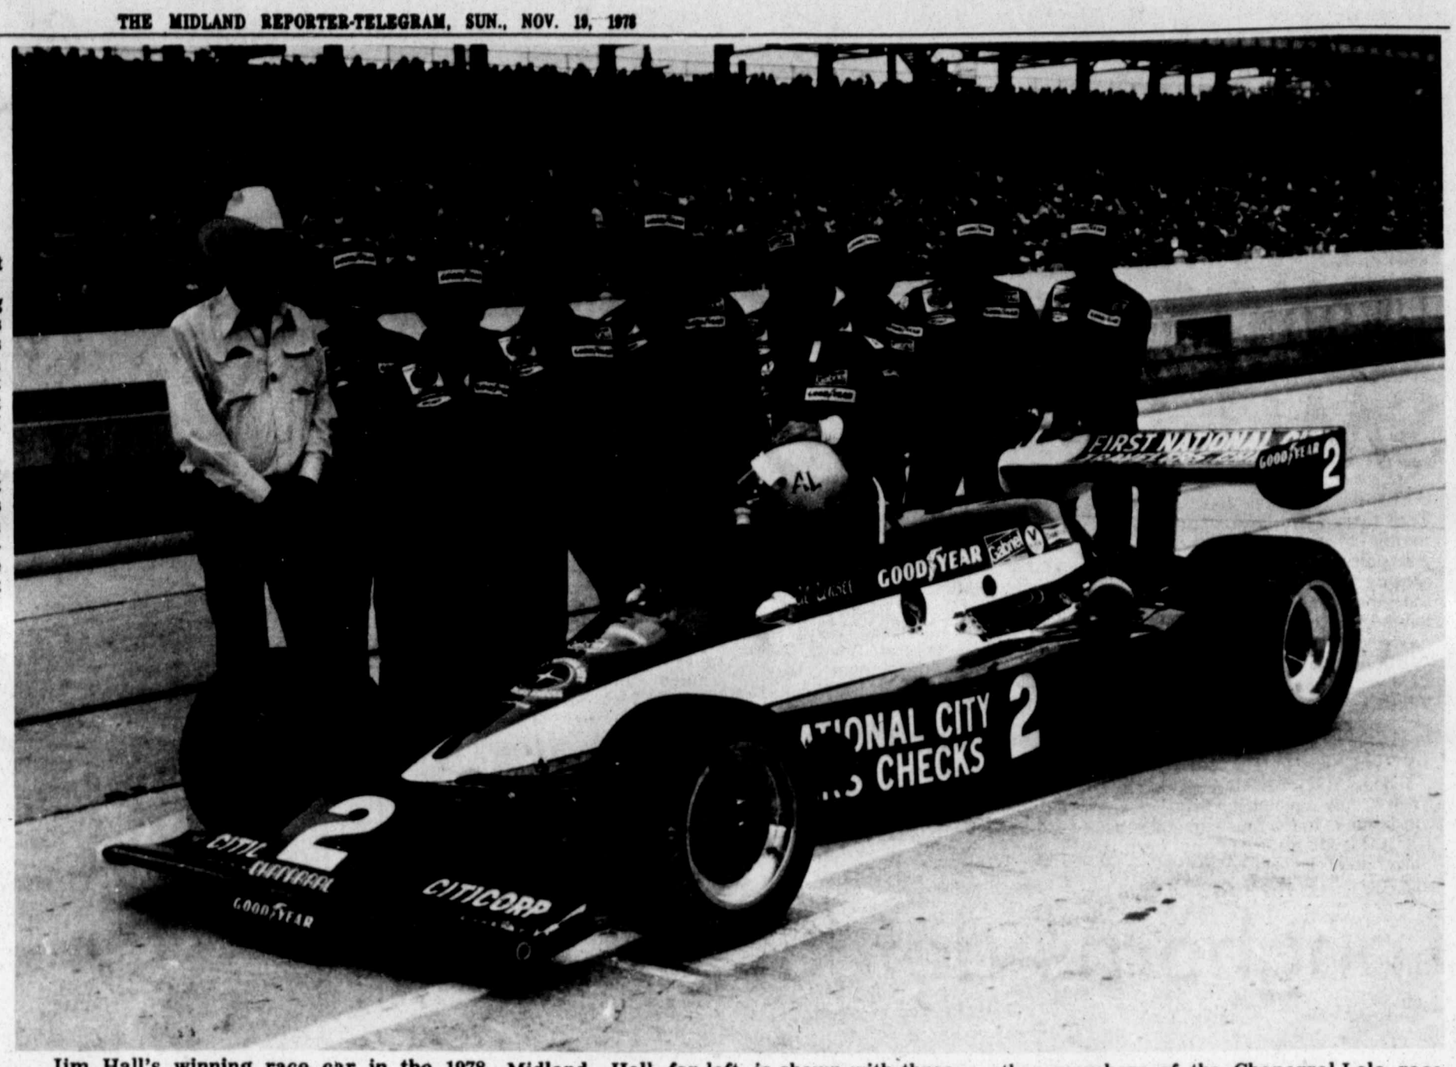

ANN ARBOR, Mich. (AP) — Rick Leach threw two touchdown passes and Russell Davis rushed for 127 yards Saturday as seventh-ranked Michigan rolled to a 24-6 Big Ten football victory over 15th-ranked Purdue.

Purdue, which was bidding for its first solo Big Ten championship since 1929, suffered a serious setback when quarterback Mark Herrmann went out with an injury in the first quarter and did not return.

Michigan led 10-0 at that point and easily handled freshman quarterback Chuck Oliver the remainder of the game to raise its record to 6-1 in the conference and 9-1 overall.

Purdue, which had owned a half-game lead, fell to 5-1-1 in the league and 7-2-1 overall with one game remaining.

Leach, who a week earlier set a National Collegiate Athletic Association record for most career touchdowns produced, threw an 11-yard touchdown pass in the first quarter to wingback Ralph Clayton and a 10-yarder in the second quarter to tight end Doug Marsh.

Jim Hall's winning race car in the 1978 Indianapolis 500 will be on display Thursday and Friday at the First National Bank of Midland. Hall, far left, is shown with three-time Indy champion Al Unser, in car, and the other members of the Chaparral-Lola race team prior to the 1978 Indy 500 race.

Winning Indy car on display

The winning race car of the 1978 Indianapolis 500 will be on display in the lobby of The First National Bank of Midland Thursday and Friday from 8 a.m. until 5 p.m. each day.

The car is the turbo-charged Cosworth V8 powered Chaparral-Lola that was driven by Al Unser for his third win in the prestigeous race.

The car is owned by Jim Hall's Chaparral Racing Team of Midland. The team won the Indy 500 in its first attempt at the storied race. Hall's team also won the triple crown of racing by winning all three 500 Indy-style races this year. That was the first time in history that had been accomplished.

Although it was the first year for the team in Indy racing, Chaparral has designed, developed and entered many winners both in this country and abroad for more than a decade in other types of racing.

Hall, whose career encompasses driving, designing and team management, is one of racing's most innovative and successful personalities.

The First National Bank will be closed for business Thursday for the Thanksgiving holiday, but the bank lobby will remain open so that the car may be viewed. Those interested in seeing the car Thursday are asked to enter the bank at the Colorado Street entrance.

The bank will obsererve regular business hours Friday.

Sun Devils in romp over Oregon State

CORVALLIS, Ore. (AP) — Freshman fullback Gerald Riggs came off the bench to score three touchdowns and rush for 156 yards Saturday to lead Arizona State to a 44-22 Pacific-10 Conference football victory over Oregon State.

The victory boosted ASU's record to 7-3 in all games and 3-3 in the conference.

Oregon State, which had won two in a row, dropped to 2-5 in the Pac-10 and 3-6-1 overall.

Arizona State quarterback Mark Malone rushed for 99 yards, scored three touchdowns and completed 10 of 19 passes for 133 yards.

The Sun Devils scored first after an Oregon State fumble, capping a 28-yard drive with an 11-yard run by the ASU quarterback. The conversion kick failed, and Oregon State grabbed a brief 7-6 lead on quarterback Steve Smith's 7-yard run. The score was set up by a 45-yard pass from Smith to Steve Coury.

After Steve Hicks kicked a 48-yard field goal, Riggs, a 226-pounder from Las Vegas, broke loose up the middle for 68 yards and a touchdown with 5:50 to play in the second quarter to give Arizona State a 16-7 lead.

Odessa College tops Chaparrals

ODESSA — Odessa College proved to be rude hosts here Saturday night as they thumped the Midland College Chaparrals, 99-78, to capture the championship of the 19th annual Odessa College junior college basketball tournament.

It marked the second consecutive year the Wranglers have walked off with top honors in their own tournament. OC improved their season record to 4-0 with the win while the young Chaps suffered their first loss in five outings this season.

Midland College took a 16-13 lead over the Wranglers in the early going, but OC caught fire at that point and streaked to a 52-43 halftime lead. They were never really headed after that.

After trailing by as many as 13 points, MC managed to pull within five of the Wranglers at 77-72 with four minutes left in the contest, but Odessa College managed to stave off that minor threat to pull away in the final minutes.

Forward John Savoie paced the Wranglers with 26 points as all five OC starters hit double figures for the contest. Playmaking guard Kelly Kitchens, who was nam ed the tournament's Most Valuable Player, chipped in 13 points, 11 of those in the first half. But it was Kitchens' defensive play when the Chaps got close in the second half that made the difference.

Billy Ray Ennis added 14 points for the Wranglers while Malcolm Edwards ripped the cords for another 15. Tom McLemore hit 14 points and reserve guard Al Taylor came off the bench to become the sixth OC player in double figures with 10 points.

Scrappy guard Cullen Mayfield topped Midland College scorers with 22 points, 16 of those coming in the second half. Mayfield telegraphed several field goals from up to 25 feet out in the second half to enable MC to pull as close as they did. Ken Young and Henry White were the only other Midland College players in double figures with 16 and 14 points, respectively.

One of the big differences in the contest was at the free throw line. Odessa College collected 19 points at the charity stripe on 30 attempts while MC garnered only eight points there. The Chaps had only 14 attempts at the free throw line.

Young and Mayfield were both named to the All-Tournament team for Midland College, joining OC's Ennis and Savoie on the select squad. New Mexico Junior College and Howard College also placed two men on the all-tourney team. NMJC was represented by Rod Williams and Rod Camp. Bobby Randolph and Michael Wallace were named from Howard College. Also honored for their play in the three-day tourney were Ranger Junior College's Kenneth Green and St. Phillips' Mark Taylor.

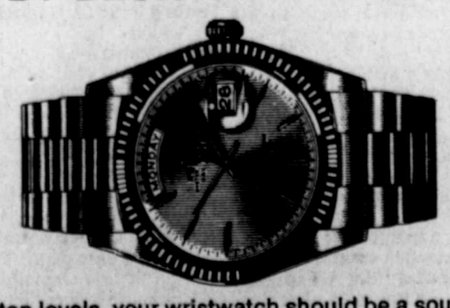

In other action Saturday, New Mexico Junior College captured third place in the tournament by downing St. Phillips, 100-76. The consolation championship went to Howard College, 96-85 victors over Ranger Junior College.

ODESSA COLLEGE (99)
Savoie 9-8-26; Ennis 7-0-14; Edwards 7-1-15; Kitchens 6-1-13; McLemore 6-2-14; Taylor 4-2-10; Ivy 0-3-3; Anderson 1-0-2; Smith 0-0-0. Totals — 40-19-99.

MIDLAND COLLEGE (78)
White 6-2-14; Shelby 1-0-2; Young 8-0-16; Mayfield 10-2-22; McGill 3-2-8; Tate 1-2-4; Alvarado 4-0-8; Murdock 1-0-2; Bennet 1-0-2; Hicks 0-0-0. Totals — 35-8-78.
Halftime — Odessa College 52, Midland College 43.

Cowboys to try Saints in Texas Stadium today

DALLAS (AP)—As if the New Orleans Saints needed any more adversity, they have to play the suddenly rejuvenated Dallas Cowboys at home today--a team they've just beaten once in eight tries.

It's a National Football League homecoming game of sorts for Saint Coach Dick Nolan, a former player-coach under Tom Landry before Nolan left for the top jobs at San Francisco and now New Orleans.

Nolan uses the Landry flex defense and the two coaches are good friends.

"I try to confuse him when I talk to him," jokes Landry. "I try to give him a lot of false keys."

Nolan couldn't have been any more confused than he was after Sunday's 20-17 loss to Atlanta in which the Falcons scored a last second touchdown on a batted pass.

"That's the hardest way in the world to lose one," said Landry.

Nolan said "It was one shot in a million."

The Saints are 5-6 and if they should upset the 12-point favorite Cowboys it would mark their winningest campaign ever in the NFL. The most games New Orleans has even captured is five.

Dallas is 7-4 and locked in a race for the National Conference Eastern Division flag with the Washington Redskins. The two teams play Thanksgiving Day for what could be the division championship game.

The soldout Saint-Cowboy game in Texas Stadium will feature the NFC's No. 1 quarterback, Archie Manning of the Saints, against No. 2 Roger Staubach of the Cowboys.

Nolan said Manning has been especially effective this year because "he is running when he has to not because he wants to."

New Orleans has beaten two Super Bowl quality teams--Minnesota and Los Angeles. The Vikings and Rams have beaten Dallas this year.

Dallas is riding the momentum of a club record offensive outburst against the Green Bay Packers in a 42-14 slaughter that was even worse than the final score.

"It's the best thing that could have happened to us," said Landry. "We needed a game like that for our confidence. We kept hearing a lot of negative things and we were starting to believe it. Not only were we reading it in the newspaper but I was hearing it at the grocery store."

Landry said he has been seeing a lot more intensity in Cowboy practices.

"Our offensive line has been really attacking the defense, for example," he said.

The only Saint victory against Dallas was at Tulane Stadium in 1971 when the then rookie Manning led the Saints to a 24-14 upset.

UT-Arlington tops McNeese, 20-17

LAKE CHARLES, La. (AP) — Roy Dewalt rushed for 132 yards and a touchdown and passed for another score to lead Texas-Arlington to a 20-17 victory over McNeese State in college football Saturday night.

Dewalt keyed a Texas-Arlington rushing attack that piled up 327 yards. He scored on a three-yard run in the third quarter and passed 15 yards to Gary Lewis for a second-quarter touchdown.

Tom Skoruppa accounted for the other Texas-Arlington points with field goals of 23 and 35 yards.

McNeese scored on Theron McClendon's five-yard run, a 27-yard Don Stump field goal and a four-yard pass from Wendell Lejuene to Richard Ellender.

The Ellender touchdown pass was set up byy a 52-yard pass from Lejuene to Randy Branch.

Texas-Arlington now has a 5-2 overall record and a 3-2 Southland Conference mark. McNeese is 6-4 and 1-3.

Michigan State rips Wildcats

EVANSTON, Ill. (AP) — Kirk Gibson and Andy Schramm scored two touchdowns each Saturday to lead Michigan State's high-powered offense to a 52-3 victory over Northwestern that lifted the 16th-ranked Spartans into a first-place tie in the Big Ten football race.

The triumph was the sixth straight for the Spartans, who are 6-1 in the Big Ten, tied with Michigan State and Ohio State, and 7-3 overall.

Michigan State needs a victory over Iowa next Saturday to assure itself of at least a tie for the conference championship.

Texas A&I wins, 48-21

KINGSVILLE, Texas (AP) — Quarterback Martin Stroman passed for 197 yards and two touchdowns and ran for another 122 yards and two more touchdowns Saturday, leading Texas A&I to a 48-21 win over Southwest Texas State.

The game was tied at 7-7, 14-14 and 21-21 until A&I went ahead for good in the third quarter on Stroman's six-yard scoring run.

The game was a Lone Star Conference finale for both teams. Texas A&I finished the season 6-5 overall and 4-3 in league games to tie for third place with Sam Houston State. Southwest Texas ended 6-4 and 3-4 and was knotted in fifth place in the conference with Stephen F. Austin.

Missouri shocks Huskers, 35-31

LINCOLN, Neb. (AP) — Missouri's James Wilder and Nebraska's Rick Berns played the football game of their lives Saturday. But, when the game was over Berns would gladly have traded his personal glory for the team victory that Wilder basked in.

Wilder set a school record, scoring four touchdowns to lead the unranked Tigers to a 35-31 upset victory over second-ranked and Orange Bowl-bound Nebraska. The Tiger win also deprived NU of that outright Big Eight conference title, forcing the Huskers to share that honor with Oklahoma.

"I'd gladly trade everything I got today for one touchdown or some more points," said Berns, who became Nebraska's single game and all-time rushing leader. "It was a tough loss, but I think we'll come back in the bowl. We've got to go out in style like the Huskers are known for. I wanted a Big Eight championship and a national championship and that's gone now."

Wilder, surrounded by Missouri teammates who had accepted a Liberty Bowl berth against Louisiana State were happy, loud and laughing.

"You gotta give that offensive line some credit, man," Wilder said. "They were the ones that made the holes, man."

"They (Nebraska) just couldn't stop us, no way, because the (Tiger) backs were too powerful," Wilder said. "Their defense was pretty tough ... well, not that tough. It was the best game I ever played."

The Tigers made their last post game appearance in the 1974 Sun Bowl.

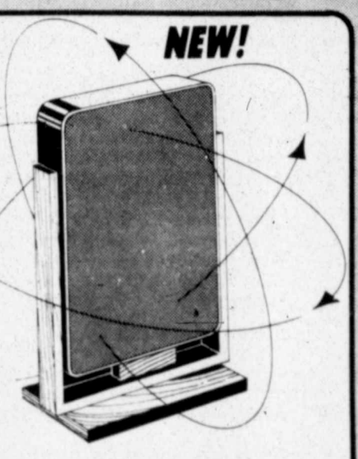

The Tiger triumph also took the luster off the performance of Nebraska I-back Berns who scored two touchdowns and rushed for 255 yards, to become the University of Nebraska's all-time leading ground gainer. The 255 yards surpassed by 1 yard the single-game rushing record set by I.M. Hipp against Indiana in 1977.

Rockets down San Antonio in NBA contest

HOUSTON (AP) — Rick Barry tallied a season-high 38 points and Mike Dunleavy added 22 off the bench to lead the Houston Rockets to a 126-120 National Basketall•Association triumph over the San Antonio Spurs Saturday night.

Barry, who scored 14 points in the second quarter, led a Rocket charge that boosted Houston to an 8-point halftime lead at 61-53. Barry came back with 12 points in the third quarter as Houston shot 75 percent from the floor and built its lead to 93-79 by the end of the stanza.

The Rockets led by as many as 18 points in the final quarter before Larry Kenon led a late San Antonio rally that brought the Spurs to within 3 points, 111-108, with less than four minutes to play. The Rockets, however, reeled off the next 8 points and were never headed.

Kenon led San Antonio with 33 points. George Gervin, the NBA's leading scorer, was held to just 6 points, his lowest offensive output in his last 46 regular season games.

James Silas tossed in 24 points for the Spurs, who fell 1½ games behind the Rockets, who are first in the NBA Central Division.

Evert captures convincing win

RANCHO MIRAGE, Calif. (AP) — Chris Evert made a bid to reclaim the No. 1 spot in the world of women's tennis Saturday, with a convincing 6-3, 6-3 victory over Martina Navratilova to win the $250,000 SeriesChampionships at Missions Hills Country Club.

The victory was worth a record first prize of $75,000 and a new automobile to the 23-year-old Evert, who was rated as the top women'ss women's tennis player for four years before losing to Navratilova in the Wimbledon finals last July.

Navratilova, 22, the Czech ex-patriot now living in Dallas, earned $40,000 for her second-place finish in the richest-ever women's tennis tournament, in which the top eight point-scorers in a 28-event tournament schedule over the past year competed.

Navratilova took over the No. 1 spot after her 2-6, 6-4, 7-5 triumph over Evert at Wimbeldon. Evert now has a 22-6 lifetime record against the powerful left-hander in tournament competition but each player has won twice against each other this year.

There was only one service break in the first set of the nationally televised match, by Evert in the six games. The Fort Lauderdale, Fla., resident took advantage of two unforced errors to take a 40-15 lead and then returned a second serve out of Navratilova's reach to end the game.

Evert rallied from the 15-40 deficit to break service in the third game of the second set, and trailed by the same score before holding service in the fourth game.

Evert broke again in the fifth game to take a 4-1 lead, but Navratilova broke back to trail 4-2 before Evert broke again.

Navratilova broke again, but Evert had no trouble in breaking service for a fourth time in the second sét to end the match.

Virginia Ruzici of Romania and Virginia Wade of England meet for third place in the singles competition and a prize of $22,000 Sunday.

The doubles championship and consolation matches were also to be placed Sunday as the tournament ends.

The doubles semifinals were played later Saturday. Australians Kerry Reid and Wendy Turnball faced Ruzici and Mima Jausovec of Yugoslavia and Navratilova and Billie Jean King met Wade and Franciose Durr of France. The winning doubles team will divide $30,000.

The tournament is sponsored by the Colgate-Palmolive Co.

Cardinals accept Bluebonnet Bowl

STANFORD, Calif. (AP) — The Stanford Cardinals accepted a bid Saturday night to play in the 20th Bluebonnet Bowl at Houston Dec. 31 against an opponent yet to be named.

Stanford's 30-10 victory over California earlier Saturday gave the Cards a 7-4 season record, with a 4-3 mark in the Pacific-10 Conference.

The other Bluebonnet Bowl team will be decided after next Saturday's Southeastern Conference game between Alabama and Auburn and is expected to be one of those two teams or Georgia.

Stanford beat Louisiana State 24-14 in the Sun Bowl last year in its first bowl game other than the Rose Bowl.

The Pac-10 Conference, then the Pac-8, was represented in the Bluebonnet Bowl last year by Southern Cal, which beat Texas A&M 47-28.

North Texas rips Memphis State

DENTON, Texas (AP) — Bernard Jackson rushed for 158 yards and scored one touchdown, powering North Texas State to a 41-24 intersectional football win over Memphis State Saturday night.

Jackson, the No. 8 rusher in the nation, carried the ball 29 times for North Texas, which recorded its second consecutive 9-2 season. The sophomore from Dallas now has 1,453 yards for the year.

Memphis State, 4-6, fell behind 31-10 at the half but narrowed the gap in the second half as its passing game got on track. Halfway through the final period, Memphis State's Ernest Gray caught a 35-yard touchdown pass to reduce the margin to 34-24. But the Tigers could get no closer.

North Texas intercepted three passes and turned two fumbles into scores in the first half alone.

Memphis State's Eddie Hill was the Tiger's top rusher with 80 yards on 11 carries. He scored one touchdown on an eight-yard run.

Southern Miss in 37-3 win

HATTIESBURG, Miss. (AP) — Quarterback Dane McDaniel passed for two touchdowns and ran for another Saturday night as Southern Mississippi's Golden Eagles outclassed Louisville 37-3.

McDaniel scored on an eight-yard run in the fourth period after passing nine yards to Marvin Harvey and eight yards to Larry Harrington in the third period.

Southern opened the scoring with a 22-yard field goal by Randy Boyette in the first period. The Eagles also had touchdowns on a one yard run by Sandy Winder in the second period and two-yard run by Ricky Floyd in the fourth period.

McDaniel held a hot passing hand as the third period opened and his completions powered both of the marches that put the game beyond reach for Louisville. During one stretch, he hit on eight in a row.

Matt Mager kicked a 32-yard field goal for Louisville just before halftime to narrow the intermission margin to 10-3, but the Cardinals were never able to muster any offensive punch afterwards.

Dartmouth wins Ivy League title

PRINCETON, N.J. (AP) — Quarterback Buddy Teevens ran for touchdowns and passed for a third to lead Dartmouth to a 28-21 victory over Princeton University and its first Ivy League football championship since 1973.

Teevens hit sophomore wide-receiverZDave Shula, son of Miami Dolphin head coach Don Shula, on a 23-yard scoring pass with 5:02 left in the first half to put Dartmouth ahead to stay 21-14 after the two teams traded early touchdowns.

The Big Green put the game out of reach when Jeff Dufresne plunged 1-yard with :44 left in the half for a 28-14 halftime edge.

Teevens, who led the league in pass completion percentage going into the game, completed 16-26 passes for 244 yards, with Shula catching eight of those for 191 yards, a team single-game yardage record.

Teevens nearly fumbled away Dartmouth's title hopes with 2:28 left in the game, but recovered the fumble himself on his own 20-yard line to clinch the victory.

Princeton's Pete Funke blocked a punt on Dartmouth's first possession and Ken Foote fell on the ball in the end zone to put Princeton ahead 7-0.

The Tigers held Dartmouth scoreless in the second half, and scored in the third quarter on a 3-yard pass from quarterback Ken Barrett to Gary Larson in hopes for a late comeback.

Dufresne's clinching TD plunge was setup by a razzle-dazzle 62-yard Teeven to Shula bomb, after a double flea-flicker in the Dartmouth backfield.

Dartmouth ended its season with four consecutive league wins losing only to Harvard in compiling a 6-1-0 Ivy League record. Princeton, 1-4-2 in league play, ended a bridesmaid season under first-year coach Frank Navarro with a 2-5-2 overall record.

Lee cagers top Del Rio, 76-52

DEL RIO — The Midland Lee Rebels evened their 1978 basketball record at 1-1 here Friday night with a 76-52 victory over the Del Rio Rams.

Four Rebels soared into double figures as the Rebels took an easy victory. Ken Van Hoozer led the way with 18 points, his best showing of the year, while Ernest Merritt contributed in a big way with 15 points. Tyler Alcorn pumped in 14 markers while Tyler Alcorn managed 12 points to round out a solid Rebel attack.

Tim Walker managed six points while Forrest Allan dumped in five. Arthur Pertile, Bruce Crawford and David Hatfield rounded out the Lee scoring with two points each.

Lee never trailed in the contest and won going away. Lee does not play again until 11:30 a.m. Friday in the Tall City Invitational Tournament at the Chaparral Center against El Paso Parkland.

The Lee junior varsity also took an easy victory over Del Rio with a 70-51 victory Friday night.

Arizona downs Cougars despite great passing

TUCSON, Ariz. (AP) — Washington State quarterback Jack Thompson broke the NCAA career passing yardage record but threw three interceptions, including one returned for a touchdown, as Arizona took a 31-24 Pacific 10 Conference football victory Saturday night.

Thompson completed 17 of 28 passes for 290 yards, giving him 7,571 career yards, bettering the mark of Florida's John Reeves, who passed for 7,549 from 1969 through 1971.

Thompson was leading a WSU comeback in the fourth quarter, when he rolled to the right with less than two minutes left in the game and Arizona tackle Cleveland Crosby reached up and stole the ball from him to end the threat and secure the victory for the Wildcats.

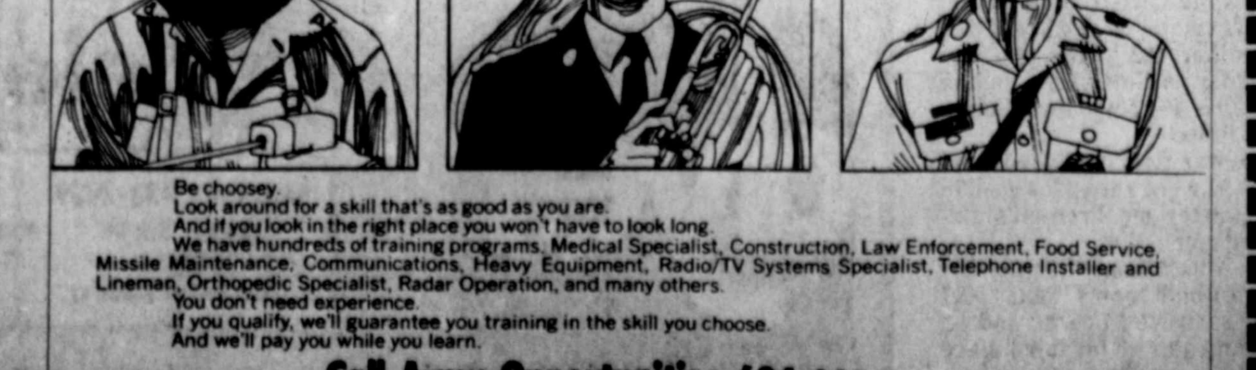

Arizona built a 31-7 lead by the end of the third quarter.

Washington State mistakes and a hard-rushing Arizona defense hampered the WSU offensive attack through much of the game. Beside the three pass interceptions, Washington State lost the ball four times on fumbles.

Vanderbilt blisters Air Force by 41-17

NASHVILLE, Tenn. (AP) — Junior tailback Frank Mordica set a Southeastern Conference record and two Vanderbilt marks Saturday, running for five touchdowns and 309 yards, as Vanderbilt defeated Air Force 41-27 in a non-conference college football game.

Mordica scored on runs of 77, 69, 6, 30 and 48 yards as Vanderbilt won its second in 10 games this season, the Commodores' first victory since beating Furman 17-10 Sept. 23.

His 309-yard total broke the SEC individual rushing record of 267 yards set by Kentucky's Bob Davis versus Washington & Lee in 1937.

The tailback notched two fourth-quarter touchdowns to insure the victory after visiting Air Force rallied to within seven points.

The Falcons, now 3-8, moved to an early 3-0 lead just 2:21 into the game when Vanderbilt fumbled away the game-opening kickoff. Air Force's Jim Sturch booted a 21-yard field goal. But tailback Terry Potter and Mordica ran for touchdowns to give Vanderbilt a 14-3 lead for the first quarter, which stood through a scoreless second period.

Mordica scored two more touchdowns in the third quarter and Air Force's Mike Fortson scored to cap a 71-yard Falcon drive as the period ended with Vanderbilt ahead 27-10.

Mordica's 309 yards broke the Vanderbilt rushing record for a single game, 214 yards, set in 1969 by Doug Mathews against Tulane. And the tailback's five touchdowns shattered the Commodore single game mark of four touchdowns set by Dean Davidson against Tennessee Tech in 1947.

Miss. State upends LSU

JACKSON, Miss. (AP) — Quarterback Dave Marler fired two touchdown passes and tailback James Jones rushed for 162 yards as the Mississippi State Bulldogs upset 17th-ranked Louisiana State 16-14 Saturday, but the Tigers retained hopes for a bid to the Liberty Bowl.

Liberty Bowl representatives in the stadium reportedly were considering the Tigers, now 6-3, for their game whether LSU won or lost the Southeastern Conference match.

Marler hit first-half touchdown passes of 20 yards to Mardye McDole and 18 yards to Jones as the Bulldogs, now 6-4, sought to keep alive their own hopes for an invitation to the Peach or Hall of Fame bowls.

The Tigers made it close when Heisman Trophy candidate Charles Alexander barged 2 yards for a touchdown, his second of the game, with 3:40 left in the fourth period.

But the Bulldogs won with the big-play punch provided by Marler and Jones while their swarming defense stymied Alexander throughout most of the afternoon, holding him to 57 yards on 20 carries and denying him the 95 he needed to go over 1,000 yards for the season.

Marler wound up hitting 10 of 27 passes for 149 yards while Jones rushed 30 times for his 162-yard total.

Linebacker Rusty Martin kicked his first field goal, a 21-yarder, in the fourth quarter to put the game out of the Tigers' reach.

Colorado woman captures honors in cross country

DENVER (AP) — Colorado's Mary Decker was the individual winner and Iowa State captured team honors Saturday at the fourth annual Association for Intercollegiate Athletics for Women Cross Country Championship.

Decker placed first over the 5,000-meter course at the Kent Country Day School in 16:59.4. She was the only runner among the 234 entrants to break 17 minutes for the event.

Finishing second was Julie Shea of North Carolina State in a time of 17:01.2. Third was the 1977 individual champion, Kathy Mills of Penn State, 17:01.7.

Iowa State captured its fourth consecutive team championship in AIAW cross country by placing five runners in the top 63. This group was headed by Cyclone junior Debbie Vetter, who came in seventh in 17:30.2. Iowa State, coached by Chris Murray, has been beaten in women's cross country only once in the past seven years — in an invitational meet in Boulder, Colo., in October.

Like most of the coaches who brought teams here Saturday, Murray was concerned that Denver's high altitude would create problems for his runners.

"But," he said, "I didn't want them to think too much about the altitude, so I didn't talk about it with them that much. I didn't want it to outplay us."

Iowa State's other placers were Diane Vetter, younger sister of Debbie, 23rd, 17:58.3; Bridget Seip, 49th, 18:21.6; Mary Seybold, 61st, 18:29.0 and Katy Schilly, 63rd, 18:30.

Iowa State's winning total was 119 points, based on its top five finishers' positions in a field of 23 full five-member teams.

North Carolina State finished second in team competition with 144 points, followed by Penn State, 145, and host Colorado at 147.

Pitt downs Army with bowl invite on minds

PITTSBURGH (AP) — After beating Army 35-17 Saturday under gray skies, the 18th ranked University of Pittsburgh football team accepted a fun-in-the-sun trip to the Tangerine Bowl.

"No other bowl can give you what the Tangerine Bowl can give you — Disney World, Sea World, Cypress Gardens, and the weather," said Coach Jackie Sherrill, pealing a tangerine moments after Pitt accepted the bid to play North Carolina State in the Dec. 23 game in Orlando, Fla.

"This is where the players wanted to go. The Tangerine Bowl was their first choice," Sherrill added.

Before the bowl trip, Pitt will close out its regular season with a game next Friday against No. 1 Penn State.

"We are very fortunate in that we get to play the No. 1-rated football team in the nation," said Sherrill. "They are the best football team right now in the country and they worked awful hard to get there."

Pitt, making its fourth-straight bowl trip, has an 8-2 record marred only by losses to Notre Dame and Navy.

"It's not hard to conceive that if things hadn't happened at Notre Dame, there wouldn't be two teams 10-0," said Sherrill.

The pivotal play for Pitt Saturday came in the first quarter — a 99-yard fumble return touchdown by safety Jeff Delaney.

"That was the real back-breaker for us. It was a 14-point play. We might have had them," lamented Army Coach Homer Smith, whose team fell to 4-5-1 in advance of its season finale with Navy.

Army quarterback Earle Mulrane's 15-yard touchdown pass to halfback Jim Merriken gave Army a 7-0 lead on the first series of the game. After grabbing an ensuing onsides kick, the Cadets drove to the Pitt 1-yard line.

But halfback Jimmy Hill lost a first-down fumble, which Delaney grabbed from the air and returned the length of the field to get Pitt a 7-7 tie.

Wildcats rout Jackets

ABILENE, Texas (AP) — Abilene Christian quarterback John Mayes hit receivers 22 times out of 38 tries Saturday afternoon to lead the Wildcats to a 38-7 rout of Howard Payne in a Lone Star Conference football game.

The game ended the season for both clubs. ACC, 7-3 overall and 5-2 in league play, finished in third place in the LSC.

Tennessee rips Miss

KNOXVILLE, Tenn. (AP) — Cornerback Roland James took a pair of pass interceptions and a punt return to score one touchdown and set up two others as Tennessee rallied from behind to dump Mississippi 41-17 in a Southeastern Conference football game Saturday.

The 190-pound junior intercepted Ole Miss quarterback John Fourcade's fourth down pass for Curtis Weathers on the Vols' 10-yard line and raced 90 yards to end the Rebels' hopes of a comeback with less than four minutes remaining.

The Rebels jumped to a 17-7 halftime lead on a 13-yard touchdown by Freddie Williams, an 11-yard run by Fourcade and a 19-yard field goal by Hoppy Langley.

But the Rebels scored no more as Tennessee rallied in the third quarter with two 80-yard drives and touchdowns by quarterback Jimmy Streater and tailback Kelsey Finch that put the Vols ahead 21-17.

Tennessee is now 1-3 in the SEC and 3-5-1 overall. Ole Miss dropped to 1-4 in the SEC and 4-6 overall.

Hawks topple 76ers, 124-116

ATLANTA (AP) — Dan Roundfield scored 23 points and blocked seven shots Saturday night to lead the Atlanta Hawks to a 124-116 victory over the Philadelphia 76ers in a National Basketball Association game.

Roundfield's spectacular performance outshone the 76ers combination of forward Julius Erving and guard Doug Collins, who scored 32 and 31 points respectively.

The Hawks combined rugged defense and a powerful offense into a potent attack in the beginning of the second quarter. They outscored the 76ers 24-5 in eight minutes to build a 57-39 lead with four minutes left in the first half.

Trailing 103-87 at the beginning of the fourth period, the 76ers rallied to cut the lead to 118-112 with 1:48 remaining.

But Roundfield hit a 10-footer with 1:05 left and blocked two Erving shots in the waning minutes to secure the victory.

During Atlanta's second-period rampage, the Hawks capitalized on 10 Philadelphia turnovers.

Midland netters capture wins

ODESSA — The University Gardens Fall Adult and Junior Classic Tennis Tournament will conclude here today with several Midlanders figuring in important singles matches.

Midland College's Tony Luttrell will face Jeff Bramlett in the Men's semifinals while Midland High's Pierre DeChaud will take on Peter Barton in the other match.

In the Men's 35 and over division, Raymond Yell will face Dennis Brittain in a Midland semifinals match while Mike Bustilloz will take on Richard Naworski.

In the Men's 45 and over division, Lloyd Henderson will face Bill Mills in a semifinal matchup while Jay Cummings will test Bill Cope in an all Midland match.

Team to be determined vs. Louisiana Tech (6-4-0), 2:30 p.m.

Smith paces Clippers' win

SAN DIEGO (AP) — Randy Smith scored 36 points, including seven in the final 1:12, to give the San Diego Clippers a 114-111 National Basketball Association victory over the New Orleans Jazz Saturday night.

Smith hit a 15-foot jumper to tie the game 109 with 1:12 remaining. Smith scored on a layup 10 seconds later and was fouled. He sank the free throw to give the Clippers a 112-109 advantage.

After a basket by Jazz forward Len Robinson cut the lead to 112-111, Smith hit a pair of free throws with 38 seconds left to put the game away for San Diego.

Lloyd Free, the NBA's second leading scorer who was held without a point during the entire first half, scored 18 to pace the Clippers' comeback.

Pete Maravich led the New Orleans scoring with 23 points, while Robinson added 19 and Gail Goodrich came off the bench to score 18. Center Rich Kelley also had 18 points, all of them in the first half.

The Clippers, who trailed by as much as 17 points in the first half, outscored the Jazz 20-4 at the start of the second half to take a 74-61 lead. But Goodrich paced a New Orleans third-quarter comeback with five baskets to cut the Clippers' advantage to 86-80.

It was the fifth consecutive loss for the Jazz, and puts their record at 6-12. The Clippers, who took their third consecutive victory, are now 9-12.

Houston Whips Windsor five

HOUSTON (AP) — The University of Houston's Victor Ewing dropped in 29 points and grabbed 10 rebounds to lead the Cougars to a 107-71 win in an exhibition college basketball game Saturday over the University of Canada at Windsor.

Ken Williams supported Ewing with 22 points as the Cougars ran to a 13-point lead at the half, 53-40, and continued to pull away in the second stanza by shooting 63 percent from the field.

Wayne Allison was the leading scorer for Windsor with 25 points.

Houston plays its next game Nov. 27 at home in Hofheinz Pavilion against the University of Nevada at Reno.

Iowa State takes win over Buffs

BOULDER, Colo. (AP) — Junior quarterback Walter Grant ran for one touchdown and passed for another, and Iowa State withstood a fourth-quarter Colorado rally to beat the Buffaloes 20-16 Saturday in the season finale for both Big Eight football teams.

The victory boosted Iowa State's overall record to 8-3 and conference mark to 4-3, brightening the Cyclones' bowl hopes. The loss was Colorado's fifth in its last six games and dropped the Buffs to 6-5 and 2-5.

Grant passed 27 yards to slotback Ray Hardee in the first quarter and ran 5 yards in the second period to account for ISU's two TDs. His running and passing also set up two field goals by Steve Johnson as the Cyclones held a 20-10 lead in the third quarter.

But freshman quarterback Charlie Davis came off the bench late in the third quarter to ignite the sluggish Colorado offense. Davis promptly drove the Buffs 93 yards for a touchdown, with fullback James Mayberry scoring from 1 yard out with 10:22 left in the game.

Davis, however, was thrown for a loss by Cyclone rover Tom Perticone on the two-point conversion attempt.

Steve Bayuk (12), TCU quarterback, and running back Craig Richardson (18) reach for the ball that Bayuk lost during pitch-out in game with the Unversity of Texas in Fort Worth. Bill Acker of the Longhorns is on the ground during play. Texas won, 41-0 and will play Maryland in the Sun Bowl. (AP Laserphoto).

Class AAA playoff here

The bi-district playoff match between unbeaten Fort Stockton and once-beaten Lubbock Estacado will be staged in Midland's Memorial Stadium Friday at 7:30 p.m., Sam Cox, Athletic Director for Midland public schools, said Saturday.

District 3-AAA champ Fort Stockton is 10-0 on the year and ranked third in the state in the latest Associated Press poll while District 4-AAA champion Estacado is 9-1 and unranked.

Tickets for the contest will go on sale Monday in Lubbock and Fort Stockton, but Midlanders will have to wait until Friday night to buy tickets at the gate. Tickets are $3.50 for adults in advance and at the gate, while student tickets are $1 in advance and $2 at the gate.

El Paso Bel Air wins cross country crown

LUBBOCK — El Paso Bel Air and El Paso Bowie captured team titles here in the Region I AAAA Cross Country meet as El Paso schools dominated the event.

Belair won the girls' division with 71 points. Midland High placed 11th in the team standings, but defeated all of the other District 5-4A entries.

Donna Repman led the Bulldogs with a 47th place while Lisa Harrison was 69th in the field of 101 runners. Other Midland High girls were Renee Ramsey, 80th; Angela Ochoa, 89th; and Mary Ann LaCaff, 100th. Midland Lee's Holly Franz, the only Rebel runner to earn a regional berth, finished in the 58th position. None of the local girls won state berths.

El Paso High's Patsy Norman, who won the state meet as a freshman last year, easily took the girls' title with a fine time of 12:15. Norman was also the winner of the Midland Invitational earlier this year.

Bowie was the top winner in the boys run, but point totals were unavailable. Lubbock Monterey's Curtis Conway did break the El Paso domination, however, by winning the race. Abilene Cooper's David Nelson placed ninth and was the only District 5-4A runner to advance to the state meet.

The Lee boys failed to earn a state berth for the team or any of the individuals as Steve Hooper finished 19th with the best Tall City showing. Other Lee boys included Keevin Harper, 87th; Jeff Ryan, 90th; Robert Samuels, 94th; David Harwell, 97th; Alan Jones, 105; and Ramon Molinar, 109th.

Midland High's Gene Tuttle, the lone Bulldog runner in the event, finished 50th.

Sam Houston in 37-13 win

HUNTSVILLE, Texas (AP) — Arthur Louis scored on runs of one and 90 yards and passed for 257 yards as Sam Houston State defeated Stephen F. Austin 37-13 Saturday to end the Bearkats' first winning season since 1970.

Sam Houston, 6-5 for the season and 4-3 in the Lone Star Conference, broke up a 7-7 game midway through the third quarter on an 18-yard touchdown run by Tony January.

Oklahoma batters OSU behind Sims by 62-7

NORMAN, Okla. (AP) — Billy Sims piled up 209 yards on 30 carries and scored all four Sooner touchdowns in the first half as fourth-ranked Oklahoma sped and muscled its way over Oklahoma State 62-7 in Big Eight football Saturday.

The junior speedster broke several long runs on quickness alone and at other times picked up yardage by dragging defenders in a show of power running.

Sims boosted his season rushing yardage to 1,762 yards, breaking the Big Eight season rushing record of 1,680 yards set last year by Oklahoma State's Terry Miller.

The Sooners scored on 1, 35, 2 and 9-yard runs by Sims, a 59-yard pass play to tight end Victor Hicks, a 20-yard run by fullback Kenny King, a 50-yard run by quarterback Thomas Lott, a 26-yard scamper by reserve quarterback J.C. Watts and a 1-yard run by reserve halfback Jay McKim.

Oklahoma State restrained the Sooners through most of the first and second quarters, once holding Oklahoma on a fourth-and-2 at the Cowboy 2-yard line. Earlier, the Cowboys took a Sooner fumble and turned it into a 74-yard scoring drive.

Oklahoma State managed its only score on a 1-yard charge by running back Worley Taylor.

The game got out of hand when Sims scored his final TD in the first half, sending the Sooners to the dresssing room with a 28-7 lead. Quarterback Thomas Lott opened the second half by capping a four-play drive with the long scoring pass to Hicks.

Sooner kicker Uwe von Schamann and defensive back Darrol Ray supplied their share of the heroics during the contest.

Von Schamann kicked his 125th consecutive extra point and his 58th of the season, setting a season school record. He failed on his final attempt because of a low snap from center.

Near the end of the contest, the Cowboys tried some desperation passes, helping Ray tie a school record. He intercepted a Scott Burk pass to give him seven interceptions on the season. That gave the Sooner team a conference record 28 interceptions in one season.

The Oklahoma offense picked up 629 yards in total offense. The stingy Oklahoma defense yielded only 163 yards.

The loss of four fumbles and 70 yards in penalties couldn't damper the Sooner onslaught.

Indiana State whips Shockers

TERRE HAUTE, Ind. (AP) — Freshman Reggie Allen passed for four touchdowns and ran for another Saturday as Indiana State completed its football season with a 42-18 triumph over Wichita State in Missouri Valley Conference play.

Touchdown passes of 8 and 61 yards, plus Allen's 2-yard scoring run helped the Sycamores jump to a 28-0 advantage early in the second quarter.

Allen, who completed five of six passes for 176 yards, threw his 8-yard scoring pass to fullback D.A Daniels on the first play of the second quarter. Then he and Kirk Wilson combined for a 61-yard scoring play in the second quarter.

Scott Burger passed for two touchdowns as the visiting Shockers cut their deficit to 28-18 after three periods. But then Allen and Wilson teamed for a 68-yard scoring play and Allen tossed a 33-yard scoring pass to Hubert Moore to insure the triumph.

Indiana State, which had lost four straight, finished its season with a 3-8 overall record and a 2-3 conference mark. Wichita State wound up at 4-7 and 2-4.

Ohio State struggles past Indiana, 21-18

BLOOMINGTON, Ind. (AP) — Second-half touchdown runs of 3 yards by Art Schlichter and 46 yards by tailback Ricky Johnson rallied Ohio State to a 21-18 Big Ten victory over stubborn Indiana Saturday.

The Hoosiers, on a 1-yard touchdown run by Mike Harkrader and a 30-yard field goal by David Freud led 10-7 until late in the third quarter.

Schlichter, a freshman, then led the comeback starting the first drive after a 60-yard Hoosier punt. The Buckeyes, aided by an Indiana facemask penalty, held the ball for 20 plays, all on the ground with Schlicter scoring the go-ahead touchdown with just three minutes left in the third quarter.

The Hoosiers got the ball back with about two minutes to go, but a long pass by backup quarterback Tim Clifford was intercepted by Mike Guess and the Buckeyes ran out the clock.

Ohio State, which led 7-0 on a 4-yard touchdown run by fullback Paul Campbell, moved into a tie for first place with a 6-1 Big Ten record and boosted its overall record to 7-2-1. The Hoosiers, who have not beaten the Buckeyes since 1951, fell to 3-4 in league play and 4-6 overall.

K-State rips Kansas

MANHATTAN, Kan. (AP) — Tony Brown scored two touchdowns and Dan Manucci hurled a 45-yard scoring pass and uncorked an 82-yard run, longest in the Big Eight this year, to lead Kansas State to an emotion-packed 36-20 victory over Kansas and lame duck head Coach Bud Moore.

Moore, who was fired Thursday, watched helplessly as the Wildcats defeated Kansas for only the third time in 23 years and plunged Kansas' record to 1-10, one of its worst ever.

The ambulant Wildcats, playing before a school record crowd of 45,115, finished the year at 4-7, their best in four years.

Kansas struck for three touchdown in a four-minute span late in the fourth period after Kansas State had mounted a 30-0 lead.

Blackshear wins title

Odessa Blackshear won the Midland-Odessa eighth grade football championship Saturday with a 22-0 victory over Odessa Bowie. Blackshear lost only one game this season.

On the Tall City front, the season went out with a bang as all three local teams ended the year with victories.

Alamo had the easiest time of it with a 31-6 rout of Odessa Bonham while San Jacinto rolled past Odessa Crockett by a 28-14 margin.

Goddard had a rough time against Odessa Hood before pulling out a second base 7-6 victory.

Neveda blanks Miners by 27-0

LAS VEGAS (AP) — Fullback Leon Walker rushed for 179 yards and one touchdown while quarterback Doug Robertson passed for 179 yards and two touchdowns to spark Nevada-Las Vegas to its sixth consecutive football victory Saturday, trouncing Texas-El Paso 27-0.

It was the first shutout by the Rebels in 61 games dating back to 1973, and gave independent UNLV a 6-3 record on the season with two games remaining. UTEP fell to 1-10 with one game to go. It was the sixth time the Miners' of the Western Athletic Conference were shut out this year.

UNLV scored 21 points in the final period to lock the victory away, and broke a string of eight consecutive quarters without scoring a touchdown. The Rebels, who join the Western Athletic Conference next fall, defeated another WAC opponent 12-10 last Saturday on four field goals.

Walker's scoring run was a 67-yard dash with 12:04 to play and Robertson completed 53-yard and 24-yard touchdown passes to flankers Henry Vereen and Sam Greene, respectively.

Iowa surprises Wisconsin, 38-24

IOWA CITY, Iowa (AP) — Split-end Brad Reid ran the end-around play for two touchdowns on bursts of 10 and 80 yards to help Iowa to a 38-24 victory over Wisconsin in Big 10 Football Saturday.

Reid also caught four passes for 96 yards, two of which set up Hawkeye touchdowns.

Freshman Phil Blantcher, a third-string fullback, carried 6 and 5 yards for a pair of fourth quarter touchdowns as the Wisconsin defense broke down.

Blantcher's second score came after strong safety Dave Becker picked off a Wisconsin pass.

Defensive back Mario Pace had two interceptions, but Iowa was not able to capitalize on those opportunities.

Iowa, 2-8, added a touchdown on a 12-yard pass from Jeff Green to tight-end Jim Swift, and Scott Schilling kicked a 22-yard field goal.

MHS, Lee girls lose three tilts on road trip

DALLAS — The Midland Lee and Midland High girls' basketball teams made a two-day sweep of this area Friday and Saturday with games against Dallas South Oak Cliff and Arlington, and came away with one victory in four games.

Saturday Lee defeated Arlington, 53-41, as Patty Adams led the way with 11 points. That was the only victory the two teams could muster, but both coaches were pleased with their showings against two good teams.

Debra Ledbetter contributed nine points against Arlington while Dee Dee Poole and Debra Kittle both had seven points. Gail Wilson dumped in eight points.

In Saturday's other game, Midland High dropped a 45-26 decision to Dallas South Oak Cliff, the No. 1 AAAA team in the state the last two years. The Bulldogs showed good defensive strength. Karen Cook paced the MHS attack with eight points while Jana Trolinder had four. Gina Rasmussen and Sandra each contributed with three points each.

Both teams lost Friday's matchups as Lee fell to the Dallas squad, 62-38. Ledbetter led the way with nine points as none of the Lee girls hit in double figures. Leshia Watkins had eight while Poole managed seven counters. Kittle and Wilson had six and five points respectively.

Midland High fell to Arlington by a narrow 47-42 margin as Margaret Christian led the way for the Pack with 13 points. Karen Cook dumped in 12 while Sandra Rock added 10 points.

It was the first games of the season for both teams. Lee is now 1-1 on the year while Midland High is now 0-2.

The two teams will not play again until Friday and Saturday when they travel across the state for a similar series in El Paso against Parkland and Ysleta. Lee will face Parkland Friday while Midland tests Ysleta, and the two teams will switch opponents Saturday.

Lee does not play a home game until Dec. 4 against Lake View. Midland, however, will test Lake View in the home opener Nov. 17.

Stanford defeats California, 30-10

BERKELEY, Calif. (AP) — Darrin Nelson, Stanford's game-breaking sophomore tailback, rushed for 177 yards, scored two touchdowns and fell just short of his own season record as the Cardinals destroyed California 30-10 Saturday in the Pacific-10 rivals' 81st Big Game.

The 5-foot-9 Nelson ran for 114 yards in the first quarter and scored the game's first points on a one-yard run. In the third period, he caught Steve Dils' 22nd touchdown pass of the season, breaking two tackles on a 6-yard play that sent Stanford into a 30-3 lead.

Nelson finished the season with 1,061 yards rushing, eight under the Stanford record he established last year.

Meet Kermit the Frog and his creator, Jim Henson

Kermit is a fine example of just how far a frog can go in show business.

He is the oldest and best known of all the Muppets. He operates as "The Muppet Show" host. Backstage, he acts as the director, stage manager, friend, adviser and straight man for all the other Muppets.

Kermit is played by Jim Henson, the creator of the Muppets. The name "Muppet" was chosen by Jim over 20 years ago.

Jim grew up in Maryland, near Washington, D.C. He became involved with a puppet club while in high school.

Kermit Jim Henson

Kermit is the host on "The Muppet Show" created by Jim Henson. The show is seen throughout the U.S. and in 103 other countries. A Muppet is a cross between a marionette and a puppet.

After high school graduation, he built his first puppets and got a job at a local TV station.

He went to the University of Maryland, where he met his wife. She joined him as a working partner.

They soon appeared on many TV shows. Then their Muppets joined "Sesame Street" as regular characters.

"The Muppet Show" recently won an Emmy for the best comedy-variety show.

Jim, his wife Jane and their five children live in Bedford, N.Y.

The Star of Macy's Thanksgiving Parade

Here Comes Kermit

Last year, the new balloon in the famous Macy's Thanksgiving parade was Kermit the Frog.

He will be up in the air again this Thanksgiving as the big, blown-up star, along with such favorites as Snoopy, Mickey Mouse, Smokey the Bear and Bullwinkle Moose.

This is Kermit's story.

The project engineer from the Goodyear Company inspects a wax model of Kermit. The model will be used to make the pattern. The balloons are made in Rockmart, Georgia.

Using a huge cardboard pattern, workers cut out the inside of Kermit's mouth. Kermit is made up of 72 pattern pieces.

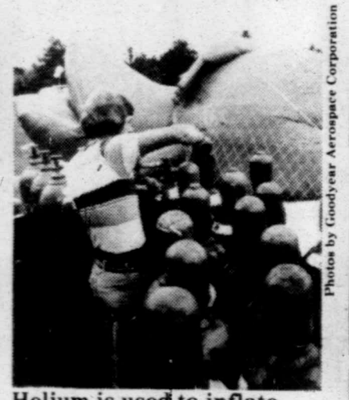

Workers cement the seams together. Kermit is made up of 14 compartments. Each one is blown up separately.

The paper-thin rubberized fabric is black. It gets a coat of white paint. Then it will be painted green.

Men unload Kermit for a test flight in Rockmart in October. He can be stored in a big box. He weighs 200 pounds when empty.

Helium is used to inflate Kermit. It takes from $600 to $900 worth of helium to blow up each balloon in the parade.

Photos by Goodyear Aerospace Corporation

The Rockmart High School band leads the way at the test flight on a golf course.

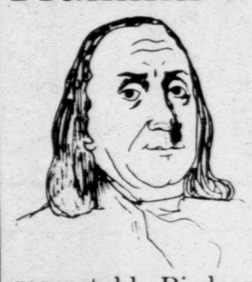

Just before the parade, Kermit is taken to New York City, unpacked and inflated the night before the parade. He is held down by a net.

Here comes Kermit. He is 63 feet tall and 24 feet wide. He is guided by wires held by marching Macy employees. All of the balloons stay inflated for about three hours. They cost thousands of dollars.

The Great American Thanksgiving Turkey

Franklin wanted the turkey

Ben Franklin wanted the turkey to be the symbol of our country.

"I wish the Bald Eagle had not been chosen as the representative of our country; he is a Bird of bad moral character; like those among Men who live by Sharping [cheating] and Robbing he is generally poor and often very lousy.

"The Turkey is a much more respectable Bird and withall a true original Native of North America."

We have no written record from the Pilgrims that they really ate turkey at their feast.

One Pilgrim did write: **"Our harvest being gotten in, our governor sent four men on fowling [out to shoot birds], that we might rejoyce together after we had gathered the fruits of our labors."**

We just think they must have served turkey because we know that turkeys were out in the wild.

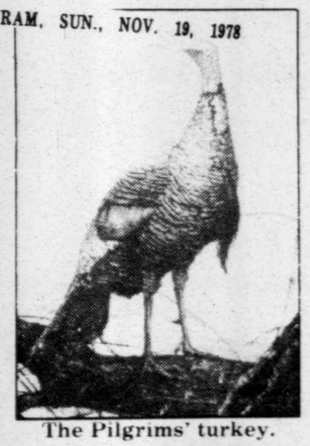

THE MIDLAND REPORTER-TELEGRAM, SUN., NOV. 19, 1978

The turkeys of the Pilgrims' day were much smaller than the turkeys of today.

They also tasted different.

Today's turkeys are fed a special diet of corn, soybean meal, minerals and fish meal.

The wild turkeys of the Pilgrims' time ate what they could find. They ate wild berries, seeds, insects and fruits.

The Pilgrims' turkey.

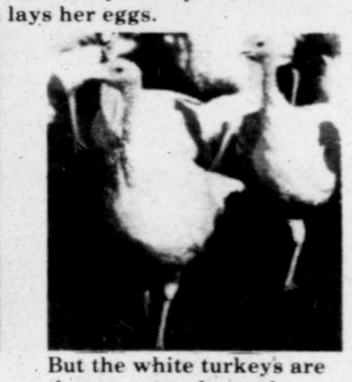

Next week The Mini Page gets ready for the holiday season with gifts and decorations you can make yourself.

See the fluffy yellow poult or baby turkey. It is only a few days old. It will be about five months before it weighs 14 to 16 pounds and is ready to eat. Baby turkeys hatch in about 28 days after the hen lays her eggs.

Most of us think of a Thanksgiving turkey looking like this . . . and many of them do!

But the white turkeys are the most popular and probably what you will eat for your Thanksgiving feast.

Hot Turkey Salad

Here's a way to use leftover turkey. (Get an adult to help you slice and chop.)

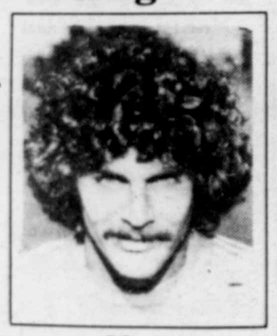

You'll need:

- 2 cups cooked and cubed turkey
- 2 cups diced celery
- 1 cup mayonnaise
- ½ cup toasted slivered almonds
- 2 tablespoons grated onion
- ½ teaspoon salt
- ½ cup grated Cheddar cheese
- 1 cup crushed potato chips

What to do: ©UPS

1. Mix all ingredients except cheese and potato chips.
2. Put into baking dish.
3. Sprinkle with grated cheese and crushed potato chips.
4. Bake at 450° F. for 15 minutes (Makes 5 to 6 servings.)

Supersport: Shep Messing ©UPS

Shep Messing is one professional soccer player who gets a big kick out of life.

He is the captain of the Oakland Stompers and one of the top-ranking goalies in the North American Soccer League.

In six pro seasons, the strong, 28-year-old Messing has 20 shutouts to his credit.

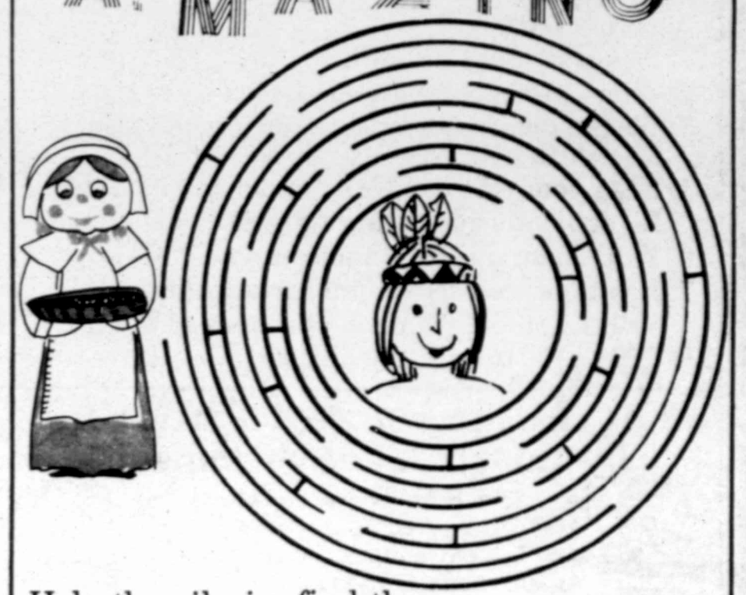

Before turning pro, Shep was an All-American at Harvard. He was also on the U.S. Olympic team in 1972.

Shep has made many TV commercials.

He has an unusual pet. It's a snake!

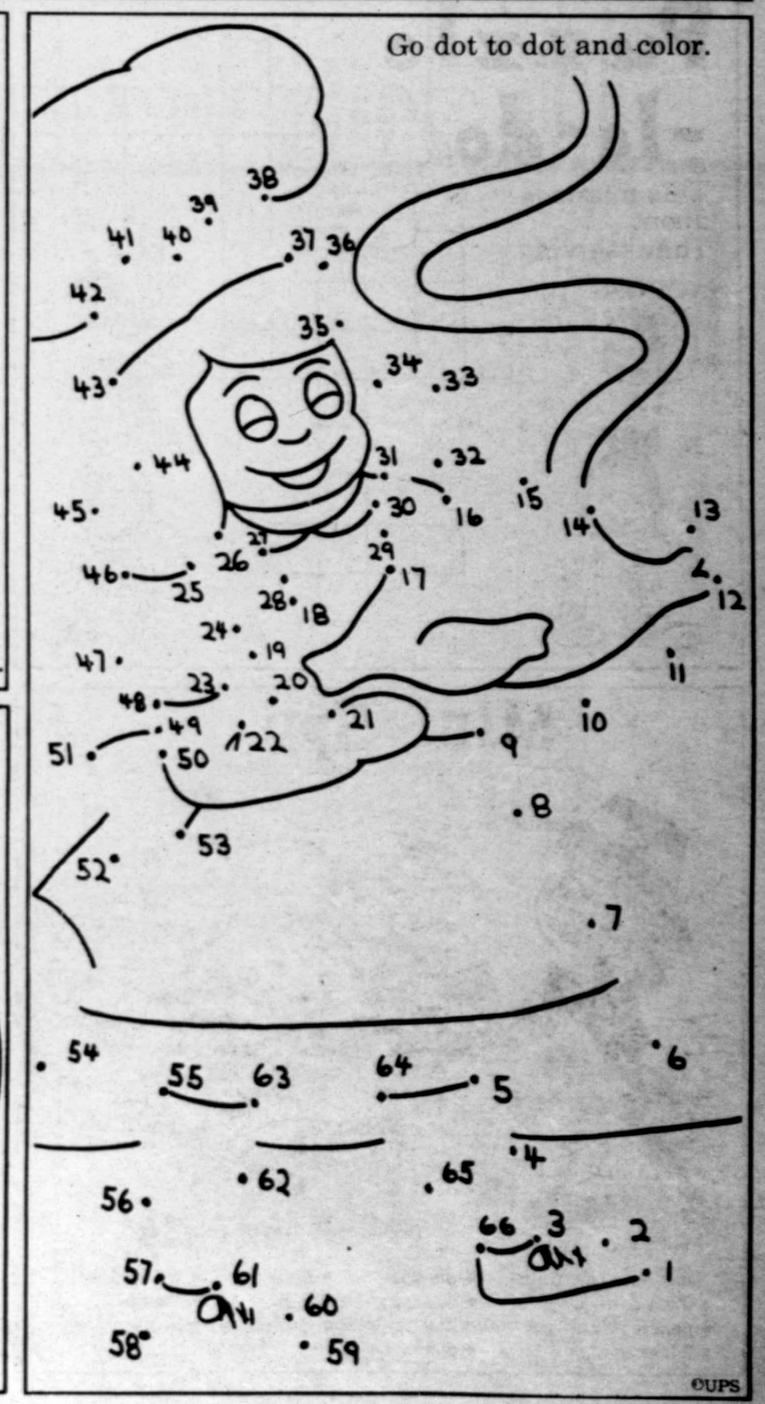

Shep has also written a book about soccer.

Oilers to battle Dolphins Monday

HOUSTON (AP) — The Houston Oiler defense, adept at stopping "name" running backs, will take a shot at Miami's Delvin Williams Monday night while the Dolphins will go after Oiler rookie Earl Campbell in a key National Football League game.

Kickoff is at 8 p.m., CST, before a nationally televised audience in the Astrodome, with the loser taking a back seat in the race for the playoffs. The Dolphins go into the game with an 8-3 record and the Oilers are 7-4.

Williams, a former Houston schoolboy, will return as the hometown kid who made good. He's the league-leading rusher with 1,057 yards since he arrived at Miami and got the benefit of the Dolphins' ¾ elite offensiv line.

Campbell, the 1977 Heisman Trophy winner from the University of Texas, is the No. 3 rusher in the league behind Williams and Dallas' Tony Dorsett with 944 yards on 201 carries, putting him near the 1,000 yard mark in only his 12th pro game.

Williams will be running into the teeth of a stauch Oiler 3-4 defense that leads the American Football Conference against the rush and has shown a penchant for stopping the top NFL rushers this season.

San Francisco's O.J. Simpson earned only seven yards on seven tries during an early season game. Cleveland's Greg Pruitt got 13 yards and Franco Harris netted 56 yards in Houston's first game with Pittburgh.

"A guy from Dallas told me the same thing about the Cowboys and I got 26 yards against them," Williams said. "I guess I'd better pay attention. The 3-4 defense is great against the run and Houston plays it as well as anybody. They've got the players to make it work."

Williams operates behind an offense line headed by Bob Kuchenburg, Jim Langer and Larry Little.

Houston's young offensive line, anchored by center Carl Mauck, hasn't gained the acclaim accorded the Dolphins line but the Oilers have developed a consistent running game, with Campbell leading the way.

The Oilers will go into the game shallow at running back, a position where they had the most depth in training camp. Starters Campbell and Tim Wilson are healthy along with free agent signee Larry Poole. But backup sparkplug Rob Carpenter has been lost for the season.

Clemson in 28-24 win over Terps

COLLEGE PARK, Md. (AP) — Steve Fuller's touchdown pass plays of 87 and 62 yards twice rallied Clemson from seven-point third quarter deficits and the 12th-ranked Tigers beat 11th-ranked Maryland 28-24 Saturday on Lester Brown'4s 5-yard fourth-period run.

The victory gave Clemson a 9-1 record and its first Atlantic Coast Conference championship since 1967 with a 6-0 record. Maryland finished the regular season with a 9-2 mark, including 5-1 in the ACC.

The Terps, who took a 21-14 lead on Steve Atkins' 98-yard scoring run in the third quarter, had a chanceUto win in the closing minutes. But the Terps stalled after reaching the Clemson 7 and had to settle for a 35-yard field goal by Ed Loncar with 1:56 remaining.

Clemson, which trailed 14-7 at halftime, tied the score when Fuller hit split end Jerry Butler on the Maryland 35 and he ran the remaining distance for an 87-yard score.

After the TD run by Atkins, who gained 197 yards on 28 carries, Clemson came right back to score on its next possession. Flanker Dwight Clark took a third down pass from Fuller on the Maryland 40 and ran unmolested for a 62-yard score.

The Tigers drove 70 yards in 10 plays for the winning touchdown. Brown, who carried only once in the third quarter, gained 34 yards on five carries. The touchdown was his 14th of the season.

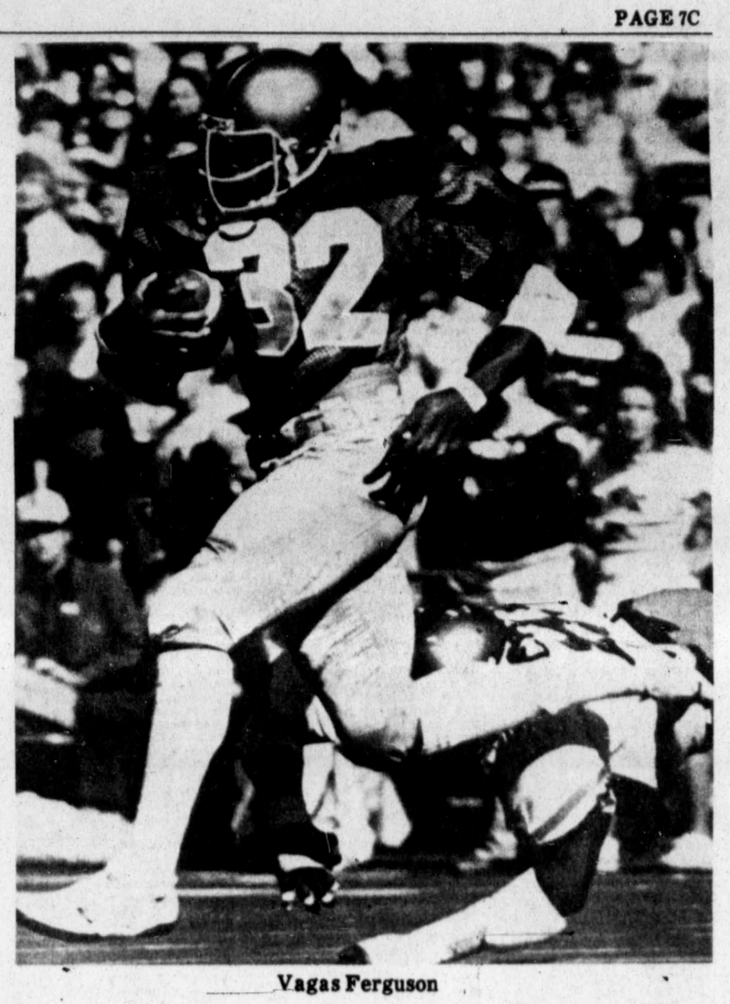

Fuller scored Clemson's only touchdown of the first half, reaching across the goal line on fourth down after the Tigers had started the series at the Maryland 2.

Maryland scored on a 3-yard run by Alvin Maddox and took a 14-7 lead when Neal Olkewicz blocked a punt by Clemson's David Sims and Mike Carney recovered in the end zone with 22 seconds left.

Tigers to Gator Bowl

JACKSONVILLE, Fla. (AP) — Clemson University, the Atlantic Coast Conference championa after a 28-24 victory over Maryland Saturday, accepted a bid as host team for the Gator Bowl football classic to be played here Dec. 29.

Clemson came from behind on the efforts of quarterback Steve Fuller and wide receiver Jerry Butler to run the Tigers current record to 9-1 with only a final non-conference game against South Carolina last week.

Vagas Ferguson

Jordan's passing sinks Midshipmen for Florida State

TALLAHASSEE, Fla. (AP) — Jimmy Jordan came off the bench to throw four touchdown passes and spark Florida State past Navy 38-6 in a regionally-televised college football game Saturday.

The victory was expected to draw the 7-3 Seminoles a Hall of Fame Bowl bid. Navy fell to 7-3 with its third straight loss.

Jordan, used as a reserve since FSU's fifth game, replaced starter Wally Woodham midway through the second quarter with Navy leading 3-0. On his second series, Jordan moved FSU 48 yards on a pair of passes setting up a 12-yard run by Greg Ramsey.

Jordan threw scoring passes of 51, 36 and 4 yards, to wide receiver Sam Platt and added a 23-yard touchdown pass to Grady King. He finished the day with 15 completions in 27 attempts for 279 yards.

Nose guard Ron Simmons forced Navy tailback Mike Sherlock to fumble at his own 10, and Mark Macek's recovery set up the first Jordan touchdown pass early in the third quarter. Simmons also recovered a first quarter fumble at the FSU 6.

Dave Cappellen kicked a 38-yard field goal for FSU, while Bob Tata accounted for Navy's scoring with field goals of 43 and 46 yards.

Both teams were without key offensive players. FSU wide receiver Jackie Flowers and Navy tailback Steve Callahan were sidelined with knee injuries.

Arkansas State too tough for Lamar, 6-3

JONESBORO, Ark. (AP) — Tailback Larry Lawrence scored on a 2-yard run and Arkansas State's defense kept Lamar University of Beaumont, Texas, in check Saturday as the Indians beat Lamar, 6-3.

The victory gave Arkansas State a 4-1 Southland Conference record and a share of the conference title. The Indians will not represent the conference in the Independence Bowl, however, because co-champion Louisiana Tech beat Arkansas State last week.

Lawrence scored with 7:46 remaining in the game to put the Indians in front for the first time.

Florida nabs 18-16 victory

LEXINGTON, Ky. (AP) — Berj Yepremian shrugged off the only conversion failure of his college career and booted four crucial field goals, including a 38-yarder with 42 seconds remaining to give Florida a 18-16 victory over Kentucky in Southeastern Conference football Saturday.

Yepremian, who earlier kicked field goals of 37, 33 and 37, capped a 68-yard scoring drive after Kentucky's Rod Stewart had plunged one yard off left tackle to give Kentucky a 16-15 lead.

Florida linebacker Scott Brantley killed Kentucky's last hopes by intercepting a Larry McCrimmon pass.

Stewart's blast came one play after David Little had batted away a Larry McCrimmon's fourth down pass at the one-yard line, but a pass intereference penalty against the Gators gave the Wildcats new life.

Tarleton State loses

FINDLAY, Ohio (AP) — Frank Molinaro's 18-yard interception return for a touchdown wrapped up Findlay College's 13-6 football victory over Tarleton State (Texas) in an NAIA Division III quarterfinal game Saturday.

Findlay led 7-6 when Molinaro pulled off his defensive gem with 4:30 remaining.

Notre Dame pounds Tech

ATLANTA (AP) — Vagas Ferguson rambled for a school record 255 yards and scored one touchdown as 10th-ranked Notre Dame pounded Georgia Tech 38-21 Saturday for its eighth consecutive victory.

Joe Montana, who scored one touchdown and passed for two others, also edged his way into the Fighting Irish record book by completing 10 straight passes in the game.

The game was delayed for about five minutes when fans behind the Notre Dame bench began throwing objects at the players, and Coach Dan Devine took his squad to the center of the field while order was restored.

Ferguson, a 192-pound junior, got the Irish victory under way on the second play of the game when he raced 68 yards to the Tech 6, setting up a field goal.

Ferguson got his yardage on 30 carries, breaking his own single-game record of 219 yards set earlier this year. It lifted his season total to 1,160, breaking the Notre Dame record of 1,058 set two years ago by Al Hunter.

Ferguson scored his touchdown on a 20-yard run and had three other runs of 20 or more yards in the game.

Montana, who completed 14 of 19 passes for 190 yards, connected with Pete Pallas on a 26-yard scoring play and hit Kris Haines on a 5-yarder for another. He scored on a 1-yard keeper in the third quarter.

Notre Dame, 8-2, got its other scores on Jim Stone's 5-yard run in the final three minutes and on Chuck Male's 23-yard field goal.

Tech, 7-3, scored on a 10-yard pass from Eddie Lee Ivery to Bucky Shamburger, on a 64-yard pass play from Mike Kelley to Drew Hill and on Kelley's 6-yard pass to George Moore.

Angelo State romps over Lions

COMMERCE, Texas (AP) — Quarterback Mark Embry threw three touchdown passes and tailback Jerry Aldridge topped the 100-yard mark rushing for the 14th straight time as Angelo State romped to a 35-14 Lone Star Conference victory over East Texas State.

Angelo State, ranked number one in NAIA Division I, ran its season record to 11-0 while the Lions fell to 4-7 for the year.

Angelo State wrapped up an NAIA playoff berth last week.

Embry tossed scoring strikes of 51, 22 and 15 yards and Aldridge rolled up 144 yards on 24 carries to lead all rushers.

Quarterback Tinker Stewart accounted for both Lion touchdowns with scoring runs of two and one yards.

ASU had a 20-14 halftime lead after Embry hit Alvin Garrett with a 22-yard pass for a score and a 51-yard toss to Johnnie Jackson.

Pitt to bowl

ORLANDO, Fla. (AP) — The University of Pittsburgh and North Carolina State accepted invitations Saturday to meet in the Tangerine Bowl here on Dec. 23, Bert Lacey, bowl executive director announced.

Pittsburgh, with an 8-2 record, beat Army Saturday, 35-17, while North Carolina State, 7-3, defeated Duke by a score of 24-10.

FOREIGN OPPORTUNITY for DRILLING SUPERVISORS WORKOVER FOREMEN

American owned oil company with extensive operations in SouthEast Asia seeks top caliber rig supervisors with prior oil company experience in drilling or workover operations. Positions are family status, based in Singapore, a very modern city offering, living conditions comparable to any U.S. city, including excellent schools. Top compensation including U.S. base to $3000/month. Total compensation package exceeds $4500/month and substantial housing allowance. North Carolina State gains bowl with victory

RALEIGH, N.C. (AP) — Prolific Ted Brown ran for one touchdown Saturday and Nathan Ritter added three field goals of more than 30 yards each to lead North Carolina State to a 24-10 Atlantic Coast Conference win over hapless Duke, locking up a berth in the Tangerine Bowl.

Brown, the 5-foot-10, 199-pound running back whose No. 23 jersey was retired in pregame ceremonies, rushed for 96 yards to boost his season total to 1,219 and push him past Earl Campbell of Texas as the NCAA's fifth leading all-time rusher with a career total of 4,471 and to keep him well atop the ACC as the top runner in the league's history.

N.C. State, now 7-3 overall, 3-2 in the league and facing Virginia in its finale, accepted the berth in the Tangerine Bowl in Orlando, Fla., immediately after the game. It was not immediately known who will play opposite the Wolfpack.

The Blue Devils fell to 4-6 on the season and 2-3-in the ACC and still must play conference opponent North Carolina next week.

Tar Heels take win over Cavs

CHAPEL HILL, N.C. (AP) — Freshman quarterback Chuck Sharpe came off the bench to score a pair of touchdowns and halfback Amos Lawrence ran for 131 yards and a score Saturday to lead North Carolina to a 38-20 Atlantic Coast Conference victory over Virginia.

Sharpe took over for Matt Kupec in the second quarter and scored on two 7-yard runs in the second and third periods as North Carolina boosted its record to 4-6 on the season and 2-3 in the ACC. Virginia dropped to 2-8 and 0-5.

North Carolina got its first touchdown less than five minutes into the game after Ricky Barden intercepted a pass and returned it 33 yards to the Virginia 18.

Georgia ties Auburn

AUBURN, Ala. (AP) — Eighth-ranked Georgia, shredded for a school record 250-yard rushing effort by Auburn's Joe Cribbs, settled for a 22-22 tie Saturday by kicking an extra point with 5:18 remaining, leaving the Southeastern Conference Sugar Bowl berth undecided for two more weeks.

Willie McClendon's 1-yard plunge brought Georgia within a point and Rex Robinson booted the conversion as Coach Vince Dooley disdained a two-point attempt.

The outcome left Georgia, 8-1-1 overall, with a 5-0-1 SEC record. Third-ranked Alabama, 5-0 in the conference and idle Saturday, can represent the SEC in the Sugar Bowl by defeating Auburn on Dec. 2.

Cribbs gained his 250 yards on 34 carries and scored on runs of 60 and 2 yards. Quarterback Charlie Trotman, benched for awhile in the second period, scored on a 60-yard run in the third quarter and threw a 44-yard pass to Mark Robbins that set up Cribbs' second touchdown, which put the Tigers in front 22-15 late in the third period.

Alice running back sets schoolboy mark

By The Associated Press

Alice running back Arnold Serrata sailed for eight touchdowns and a two-point conversion Friday to tally 50 points in a game that likely left winless Robstown thankful he didn't kick field goals.

Serrata's performance paced Alice to a 66-0 thrashing of Robstown and shattered a 25-year-old modern Texas Schoolboy Record.

Kenneth Hall of Sugarland set the old record when he galloped for 49 points in 1953, a record later matched by Chris Weems of Idalou in 1964.

Serrata galloped 87 yards with the opening kickoff for his first score and added touchdowns on pass plays of 34, 36, 25, and 75 yards and on runs of 2, 4 and 4 yards.

Four teams and confusion reign in District 30-AA in South Texas. And for Taft, Odem, Mathis and Refugio a season of hard work came down to a coin flip Saturday in Aransas Pass.

Odem had a one game lead going into Friday's action, but Taft upset the Owls 17-7.

Playoff pictures around the rest of the state clarified as only three teams ranked in The Associated Press Schoolboy Football Poll lost Friday.

In Class AAA, 2nd ranked Hebert dropped from the race by losing 16-10 to Crosby in a playoff for the district 9-3A crown.

Winneboro rallied to win a 30-27 seesaw battle that drops 10th-ranked Mount Vernon from the Class AA competition. And Groveton defeated No. 4 Class A Lovelady 19-14.

Temple blasted Bryan 39-6 to keep a firm grip on its top billing in AAAA, and second-ranked Garland trounced South Garland 35-12.

In other Class AAAA tilts, Houston Stratford, No. 3, outscored Westchester, 41-22; San Antonio Churchill, No. 4, blanked San Antonio Lee, 27-0; and sixth-ranked Odessa Permian remained undefeated in two years of regular season play, edging Odessa, 14-6.

John Tyler, No. 7, fought off an impassioned Tyler Lee squad, 14-6; Plano, No. 8, blanked Richardson Pearce, 16-0; Conroe, No. 9, pasted McCullough, 26-0; and Plainview secured its first playoff berth ever, clobbering Lubbock Coronado, 40-14.

In Class AAA, Brownwood, No. 1, topped Marlin 28-14 in a zone playoff; Bay City, No. 3, thumped Wharton, 22-7; sixth-ranked Carthage shelled Jacksonville, 31-0; Belton, No. 8, crushed Leander, 64-0; Gainesville, No. 9, routed DeSoto, 31-7; and Gregory-Portland bombed West Oso, 51-12.

Newton, top-ranked in AA, overpowered Kirbyville, 26-8; Cameron, No. 2, dumped Rosebud Lott, 28-3; Port Isabel, No. 3, beat Rio Hondo, 28-14; Breckenridge, No. 4, lashed Cisco, 41-0; fifth-ranked Childress manhandled Seymour, 45-10; No. 6 Sealy defeated Magnolia 32-14; No. 7 East Bernard beat Edna, 13-3; and West, No. 8, nudged LaVega, 29-26.

In Class A, Lexington, No. 1, crushed Somerville, 38-14; Iraan, No. 2, trounced Clint, 41-0; third-ranked Franklin pasted Bremond, 30-8; China Spring, No. 5, drubbed Meridian, 22-7; DeLeon, No. 7, pummeled Early, 35-6; Holliday, No. 8, thrashed Boyd, 32-7; and 10th-ranked Seagraves clobbered Ropes, 28-7.

Here is how the top ten fared in The Associated Press Schoolboy Football Poll. Season records are in parentheses.

CLASS AAAA

1. Temple (10-0-0) beat Bryan, 39-6
2. Garland (10-0-0) beat South Garland, 35-12
3. Houston Stratford (10-0-0) beat Westchester, 41-22
4. San Antonio Churchill (10-0-0) beat San Antonio Lee, 27-0
5. Arlington Lamar (10-0-0) did not play
6. Odessa Permian (10-0-0) beat Odessa, 14-6
7. Tyler (10-0-0) beat Tyler Lee, 14-6
8. Plano (9-1-0) beat Pearce, 16-0
9. Conroe (9-1-0) beat McCullough, 26-0
10. Plainview (9-1-0) beat Lubbock Coronado, 40-14

CLASS AAA

1. Brownwood (11-0-0) beat Marlin, 28-14 (zone playoff)
2. Beaumont Hebert (9-1-1) lost to Crosby, 16-10 (zone playoff)
3. Fort Stockton (9-0-0) plays Odessa Ector Saturday
4. Bay City (10-0-0) beat Wharton, 22-7
5. New Braunfels (10-0-0) did not play
6. Carthage (10-0-0) beat Jacksonville, 31-0
7. Gonzales (9-1-0) did not play
8. Belton (10-0-0) beat Leander, 64-0
9. Gainesville (9-1-0) beat DeSoto, 31-7
10. Gregory-Portland (9-1-0) beat West Oso, 51-12

CLASS AA

1. Newton (10-0-0) beat Kirbyville, 26-8
2. Cameron (10-0-0) beat Rosebud Lott, 28-3
3. Port Isabel (10-0-0) beat Rio Hondo, 28-14
4. Breckenridge (9-1-0) beat Cisco, 41-0
5. Childress (10-0-0) beat Seymour, 45-10
6. Sealy (10-0-0) beat Magnolia, 32-14
7. East Bernard (10-0-0) beat Edna, 13-3
8. West (9-0-1) beat LaVega, 29-26
9. Hondo (10-0-0) did not play
10. Mount Vernon (8-2-0) lost to Winnsboro, 30-27

CLASS A

1. Lexington (10-0-0) beat Somerville, 38-14
2. Iraan (10-0-0) beat Clint, 41-0
3. Franklin (10-0-0) beat Bremond, 30-8
4. Lovelady (8-2-0) lost to Groveton, 19-14
5. China Spring (9-1-0) beat Meridian, 22-7
6. Celina (9-1-0) did not play
7. DeLeon (9-1-0) beat Early, 35-6
8. Holliday (10-0-0) beat Boyd, 32-7
9. Farmersville (9-1-0) did not play
10. Seagraves (10-0-0) beat Ropes, 28-7

Duke voted No. 1 cage team in preseason poll by coaches, writers

By The Associated Press

Duke's Blue Devils are the nation's No. 1 college basketball team in The Associated Press preseason poll for 1978-79.

Last year's runners-up to the Kentucky Wildcats in the NCAA finals, the Blue Devils made it to the top of the poll Saturday on the strength of 38 first-place ballots and 918 points.

The Atlantic Coast Conference power established a formidable lead over UCLA, the No. 2 team with 764 points. The Bruins were given eight first-place ballots by a nationwide panel of sports writers and broadcasters.

The defending national-champions Wildcats lost four of their top six players and were dropped to No. 11 by the voters, picking up no first-place ballots and a total of 199 points.

Notre Dame, one of the Final Four in last year's championship round in St. Louis, will start the season ranked third. The Irish collected one ballot for No. 1 and 685 points.

Louisville and Kansas, the only other team to collect a first-place vote, followed in voting. Louisville landed the No. 4 spot with 492 points while Kansas gained the No. 5 position with 429 points.

Texas, winner of last year's National Invitation Tournament, gained the No. 6 ranking with 390 points, followed by two Big Ten teams, Michigan State and Michigan. Michigan State was accorded 348 points for No. 7 while Michigan was close behind in No. 8 with 342.

Syracuse, with 243 points, and Indiana, 210, finished out the Top Ten.

After Kentucky, the remainder of the Top Twenty included, No. 12 North Carolina State; No. 13 Southern Cal; No. 14 LSU; No. 15 Rutgers; No. 16 North Carolina; No. 17 San Francisco; No. 18 Marquette; No. 19 Alabama and No. 20 Nevada-Las Vegas.

Arkansas, the other member of last season's Final Four which lost stars Ron Brewer and Marvin Delph, was given honorable mention in the voting.

Last season's final Top Twenty poll, taken before the NCAA finals: Kentucky, UCLA, DePaul, Michigan State, Arkansas, Notre Dame, Duke, Marquette, Louisville, Kansas, San Francisco, New Mexico, Indiana, Utah, Florida State, North Carolina, Texas, Detroit, Miami (Ohio) and Penn.

The Top Twenty teams in The Associated Press college basketball poll, with first-place votes in parentheses, season records and total points. Points based on 20-19-18-17-16-15-14-13-12-11-10-9-8-7-6-5-4-3-2-1:

1.Duke (38)	27-7	918
2.UCLA (8)	25-3	764
3.Notre Dame (1)	23-8	685
4.Louisville	23-7	492
5.Kansas (1)	24-5	429
6.Texas	26-5	390
7.Michigan State	25-5	348
8.Michigan	16-11	342
9.Syracuse	22-6	243
10.Indiana	21-8	210
11.Kentucky	30-2	199
12.North Carolina St.	21-10	182
13.Southern Cal	14-13	142
14.LSU	18-9	128
15.Rutgers	24-7	108
16.North Carolina	23-8	104
17.San Francisco	23-6	95
18.Marquette	24-4	74
19.Alabama	17-10	72
20.Nevada-Las Vegas	20-8	62

Others receiving votes, listed alphabetically: Arizona, Arkansas, Brigham Young, Dayton, Detroit, Cincinnati, Florida State, Furman, Georgia Tech, Houston, Illinois State, Indiana State, La Salle, Maryland, Minnesota, Mississippi State, Nebraska, Nevada-Reno, New Mexico, New Mexico State, Ohio State, Oregon State, Providence, Purdue, Rhode Island, Rice, South Carolina, Southern Illinois, St. John's, Utah, Virginia, Virginia Tech, Washington State.

Cincy batters Stars in exhibition, 9-1

FUKUOKA, Japan (AP) — Home runs by George Foster, Champ Summers, Vic Correll and Mike Grace sparked the Cincinnati Reds to a 9-1 triumph over a combined Yomiuri Giants and Crown Lighter Lions team Saturday.

The victory was Cincinnati's 10th in a row and the 12th against two losses and one tie in its 17-game tour of Japan.

Foster's homer was a two-run shot while the others were solo blasts.

Pete Rose collected a single to left field to stretch his hitting streak to 15 games.

Dave Tomlin and Pedro Borbon scattered four hits for the Reds. Tomlin worked the first four innings and Borbon, who relieved in the fifth, was the winner.

The Reds took a commanding a 7-0 lead in the top of the fifth inning before a crowd of 34,000 at Heiwadai Stadium in southern Japan.

Summers started the inning with his fourth homer of the tour and Foster's fourth home run of the trip capped the outburst. Dan Driessen also had a two-run double in the inning.

Japan's only run came in the bottom of the fifth.

Correll slammed his first homer of the tour with one out in the eighth to give Cincinnati an 8-1 lead. Grace belted his second homer in the ninth.

The Reds will play the Giants for the eighth time at Kokura in southern Japan today.

Canto places title on line

HOUSTON (AP) — Mexico's Miguel Canto places his World Boxing Council flyweight championship on the line a record 13th time Monday night and is confident about the outcome.

Canto meets Tacomron Viboonchai of Thailand in a scheduled 15 rounder promoted by Pro-Mex at the Sam Houston Coliseum.

Canto won the 112-pound title in 1975 by defeating Shogi Oguma of Japan. The 12 successful defenses of the title have included two decisions over Oguma in Canto's most recent fights.

Upon arriving in Houston, Canto said he has lost a bit of his early speed while building a career record of 53 wins, four losses and three draws. He said any loss of speed, however, has been offset by his experience.

Jesus Rivero, Canto's manager, said the champion has trained vigorously for the Viboonchaf match.

Canto, 29, said he has never seen Viboonchai fight but described him as a boxer who prefers to stay in close.

Monday's card includes four 10-round preliminaries.

Rose gets counter offer

CINCINNATI (AP) — The Cincinnati Reds, in a last-ditch effort to keep Pete Rose, are prepared to offer the free agent third baseman a counter offer.

Rose, who will meet with Reds President Dick Wagner in Cincinnati on Wednesday, will be offered a reported $1.2 million, according to The Cincinnati Enquirer.

Wagner was flying back from the Reds tour of Japan early to meet with agents for pitcher Tommy John. John went to the veterans re-entry draft following a salary dispute with the Los Angeles Dodgers.

The reported offer by Wagner would be the largest contract offered a player by the Cincinnati Reds.

Although comparable, it is less than the reported offer made to Rose by the Philadelphia Phillies. The Phillies were said to have offered Rose $600,000 a year for three years. There also was speculation that the Phils indicated employment for Rose after his career, possibly as manager, The Enquirer said.

Paul Owens, Philadelphia general manager, has gone deer hunting for the weekend. Reuven Katz, Rose's attorney and adviser, is on vacation in Arizona.

"We don't expect anything to happen until Rose gets back," Owens said before departing. "I don't think we'll get an answer until after Thanksgiving. I wish we could get on with it because he is holding a lot of clubs back" in making plans for next season.

Rose had said previously he might be willing to accept an offer from the Reds that might not be as high as that offered by some other teams.

The Cincinnati native indicated he might prefer to play out his career in his home town with the team he started with.

Rose, 37, hit .302 last season while setting a 44-game hitting streak, matching a National League record.

Floyd new AD

BLOOMINGTON, Ind. (AP) — Ralph Floyd, assistant athletic director at Indiana University since March 1976, has been named to succeed Paul Dietzel as athletic director, President John Ryan announced Saturday.

Approval of Floyd was made at Saturday's meeting of the Indiana Board of Trustees.

Floyd, 51, spent 19 years at South Caolina, where he served in a variety of positions.

Nicklaus keep lead

SYDNEY, Australia (AP) — Jack Nicklaus, saying "it was a very diffucult day to play golf and I didn't play that well," shot a 2-over-par 74 Saturday but still held a 4-stroke lead after three rounds of the $253,000 Australia Open Golf Championship.

Playing in strong winds, Nicklaus notched one birdie on a faultless front nine. But he then bogeyed the 11th, 16th and 18th holes, coming home for his 74 that, with a 73 and a course-record 66 Friday, gave him a 213 total.

The wind wasn't Nicklaus' only problem. He had a sore back and Thursday night he injured a shoulder plyaing tennis.

Second at 217 were Ben Crenshaw and another U.S. pro, Bruce Lietzke. Crenshaw matched Nicklaus' 74 Saturday while Lietzke fired a 70, the lowest round of the day.

"I haven't been hitting the ball well all week, but the birdie on 14 that made me even-par for the day gave me confidence," said Lietzke."

Lietzke also birdied the 15th and 17th holes and missed a four-foot putt for a birdie on No. 16.

Tom Kite was alone in third after shoting a 77 for 221, 1 stroke ahead of Australian Graham Marsh, who shot a 76 for 222.

Tied at 223 were Greg Norman and Ed Sneed after shooting 76s. There were six golfers bunched at 224. One of them was American Bob Byman, who was in second place after rounds of 72-71 before soaring to an 81.

What's GOING ON...

around town

by Patsy Gordon

the doings, diversions, deeds and destinations of multifarious Midlanders?

"around town" is people, personal, local! It's who? what? where? when? And it's men, women, students, visitors, guests, awards, honors, activities. Trips, clubs, meetings....virtually anything that Midlanders are doing or planning to do, not normally constituting a formal news story.

...AND YOU CAN BE THE REPORTER!

You know a lot of things your friends, neighbors an others would like to know about things going on in your community.

So, please CALL, WRITE or BRING your news items to

Yiddish festival helps revive dying language

By MANUEL SCHIFFRES

NEW YORK (AP) — Yiddish, a language given up for dead because of the Holocaust, the creation of Israel and the assimilation of American Jewry, is in the midst of a revival.

Colleges and Jewish organizations are offering Yiddish language courses and Yiddish studies programs in record numbers, and there is increasing interest in Yiddish films and plays.

And now, to underscore and further fuel the renewed attention toward the language of Eastern European Jewry, several groups have banded together to produce the First New York Yiddish Cultural Festival.

The festival, which runs through next June, includes, among other things, six films, three concerts devoted to Yiddish songs, a dance program, a poetry reading, a play, lectures and two photo exhibits.

Ironically, the festival began shortly after Yiddish-language writer Isaac Bashevis Singer was awarded the Nobel Prize for literature. For some, it was a sign that Yiddish, a German-sounding language that uses the Hebrew alphabet, may be on the verge of renaissance.

"The Nobel Prize carries so much prestige that those people who have said Yiddish is a jargon and Yiddish is a bastardized German, who have been derogatory, are going to be muted by an event like this," says Moishe Rosenfeld, assistant education director of the Workmen's Circle, a Jewish workers' organization that is co-sponsoring the festival.

Rosenfeld, who calls himself a "Yiddish activist," says he believes the renewed interest in Yiddish is a sign the culture will flourish even after its best-known, living practitioners — mostly people who were driven from Europe by the Nazis — retire or die.

Of course, not everyone shares Rosenfeld's view. For example, Sima Mittman, assistant education director of the 92nd Street YM-YWHA (the "H" stands for Hebrew), another festival co-sponsor, says she does not "foresee another golden age of Yiddish culture."

Instead, she views the festival as a forum for a "rich" culture that "has something to say to people. And specifically, as far as the American Jewish community is concerned, it's part of the 'Roots' syndrome."

On the eve of World War II, 11 million Jews worldwide spoke Yiddish, the Encyclopedia Judaica says. The Holocaust cut that figure in half.

Many survivors of Hitler's "Final Solution" went to Israel, where Yiddish took a back seat to Hebrew and where a new generation of Jews looked with shame on their Eastern European heritage. Other survivors came to the United States, where their children, like the descendants of the earlier waves of immigrants, assimilated into American society and, more often than not, forgot their Yiddish antecedents.

The result is that the number of Yiddish-speaking people dwindled to about 3.7 million today, says the New York-based YIVO Institute for Jewish Research, also a festival co-sponsor. The overwhelming majority are in the United States, the Soviet Union and Israel.

In the United States, especially in New York, home to more Jews than any other city in the world, third- and fourth-generation Jews "are recognizing that they are part of an ethnic group, part of a nationality with a history and a culture, and they're looking into various aspects of that culture," says Rosenfeld.

Among the reasons for this new awareness, he says, is a trend toward greater emphasis on pluralism, rather than the ideal of the melting pot, and "a feeling among American-born adults that their Jewish lives were empty."

Says Miss Mittman: "Unfortunately, because their families were so interested in becoming Americans, a lot of younger people have been cut off from their Eastern European Yiddish experience. Now those people are suddenly looking back and saying, 'Wait a minute; I missed a lot.'"

The highlights of the festival are the films — all with English subtitles — the Yiddish song concerts, a production by the Yiddish Drama Group of the Montreal-based Saidye Bronfman Centre and a performance by the Pearl Lang Dance Company.

The photo exhibits at the "Y" deal with Polish Jewry and Manhattan's Lower East Side, a bargain-hunter's paradise where many immigrants once lived and where Jews still own the most of the shops.

It's difficult to pinpoint any common denominator that runs through all aspects of Yiddish culture, but Rosenfeld suggests that "pathos as an expression of the pain" of the Jewish experience might be one.

For example, he points to one of the festival's films, "Tevye," based on a story by Sholem Aleichem, who was considered the Jewish Mark Twain. The same work served as the basis for "Fiddler on the Roof."

"If the synopsis of 'Tevye' was presented to someone who hadn't read the novel or seen the theater production, it would seem like a tragedy," says Rosenfeld, who himself acts in Yiddish plays.

Rosenfeld says the festival's "ultimate" significance is that it marks the end of the decline of Yiddish and he hopes it will serve as a jumping off point for a nationwide "Year of Yiddish" theme in 1981 — the 100th anniversary of the first wave of Jewish immigration from Russia.

Business week ends on optimistic note

By WILLIAM GLASGALL
AP Business Writer

NEW YORK (AP) — The stock market ended the week on a broadly higher note Friday as encouraging news about the domestic economy and the dollar outweighed predictions of higher interest rates and an oncoming recession.

The Dow Jones industrial average finished ahead by 3.55 at 797.73, and New York Stock Exchange volume rose to 285.17 million shares fron Thursday's 21.34 million. Gainers outnumbered losers by about 3-1 among NYSE-listed issues.

Oil issues paced Friday's market gains as several news stories and brokers' reports predicted good times ahead for the industry. A Bache Halsey Stuart Shields report cited the "essentially recession-proof nature" of the industry, and said it should benefit from both higher prices and improved domestic production next year.

Among oil issues, Gulf led the NYSE most-actives, gaining ¼ to 24⅞, and Texaco rose ⅞ to 23⅞.

Among economic indicators cheering investors were a higher dollar on foreign exchange markets, and government reports that personal income and housing starts showed strong gains in October. But the 11 percent prime rate spread as Bank of America and Citibank joined others in raising their charge on loans to top-rated borrowers by ¼ point.

Several bankers said the upward interest-rate spiral is far from finished. Citibank's economic policy committee chairman, Leif Olsen, said "a much higher prime rate" is a virtual certainty, while Bank of America Vice Chairman Leland S. Prussia predicted a 12 percent prime within six months.

Salomon Brothers General Partner Henry Kaufman said, meanwhile, that "the sharp escalation of interest rates, which is ahead of us, will take its toll," and "a delayed, rather than an imminent recession, starting perhaps at the end of 1979, is likely.""

Higher interest rates traditionally are a stock market depressant. But they are seen as a weapon against inflation because they can cut consumer demand by slowing the growth of credit. The most recent money-supply report, showing a moderate $1.1 billion increase, may indicate the Federal Reserve's tighter-money policy is having an effect, some analysts said.

Among actively-traded NYSE issues, Mallory, which agreed with Dart Industries on a $51-a-share merger offer, rose 3⅞ to 49¾. Carrier, which is fighting United Technologies' takeover bid, rose 1¼ to 24⅛. Boeing rose ⅜ to 63¼ and General Motors gained ⅛ to 54½.

Standard & Poor's index of 400 industrials rose .79 to 104.88; the S&P 500-stock composite index was up .71 at 94.42. The NYSE's composite index rose .45 to 52.54; at the American Stock Exchange, the market value index gained 2.35 to 143.38. The NASDAQ composite index of the over-the-counter market gained 1.48 to 113.69.

Pittsburgh suburb defies anti-fluoridation decree

PITTSBURGH (AP) — Some 160,000 Pittsburgh suburbanites are still drinking fluoridated water today, despite a ban issued by a judge convinced the process may cause cancer.

A spokesman for West View Water Authority, Joseph Dinkel, said powdered fluoride was added to the water supply for 27 communities Friday. Attorneys for the firm said the ban issued by Allegheny County Judge John P. Flaherty was appealed the same day, effectively suspending the ruling.

"We made no modification whatsoever," said Dinkel, plant manager for West View Water Authority.

"We think that we ultimately will win this case on jurisdictional grounds or other grounds," said Fred E. Baxter Jr., a West View attorney.

Fluoridation became widespread after it was discovered tooth decay was less prevalent in areas where the water naturally contained the chemical. But it has many opponents, some of whom charge fluoride endangers health.

Flaherty ruled after hearing five weeks of testimony by research scientists from the United States, Canada and Britain.

He said he based his decision on a study conducted by Dr. Dean Burk and Dr. John Yiamouyiannis that concluded cancer rates increase with fluoridation.

"Anyone with proper scientific credentials who reviews the Burk-Yiamouyiannis study would question its validity," said Dennis Doris, a spokesman for the National Cancer Institute in Bethesda, Md.

And State Health Secretary Leonard Bachman called Flaherty's decision "reckless." He said the department has found "not a shred of evidence that fluoride in any way hurts the health of people."

Anti-fluoridation forces called the ruling "courageous."

"We finally found a court which was willing to listen to testimony instead of the self-serving endorsements of groups like the U.S. Public Health Service, which were wrong about swine flu and are wrong about using fluoride," said John Graham, an attorney who represented a citizens committee and several businessmen in the suit.

"This case is the Gettysburg of the fluoride fight," he said.

Longtime Midlander Fran Birdwell: dedicated backer of the arts

Midlander Fran Birdwell is surrounded by manifestations of her special creative interests — photography and painting — in her home here. The ribbons are for prizes she has won through the years for her salon photography and her paintings, one of which hangs on the wall behind her. She holds a trophy which she won several years ago for her photography. (Staff Photo)

By ROGER SOUTHALL
R-T Staff Writer

Longtime Midland resident Fran Birdwell is a devoted mother and grandmother — and proud of it.

She's also a dedicated photographer, painter, parliamentarian and avid backer of the arts in Midland — and likewise proud of it.

Mrs. Birdwell obviously believes that if you get a lot out of life in Midland, you have an obligation to give something — or many "somethings" — back to the city. And she has done just that through the years.

The gracious and soft-spoken Mrs. Birdwell has been identified with numerous arts endeavors in the city during her more than 30 years' residence here. She was one of the organizing members of the Midland Camera Club back in 1952, and continues as an active member to this day, having served the club at various times as secretary, treasurer or parliamentarian.

spotlight on the arts

She also is a charter member of the Midland Arts Association, organized here in 1964 with 44 members, and she has been its secretary and parliamentarian. She has been a member of the Palette Club here for 30 years or more, and has served the club as vice president and secretary.

She has long been active in Midland's Museum of the Southwest, organized in the mid-1960s, and was one of the charter member of Las Manos - "The Hands" - volunteer service organization for the museum. She was the first secretary for Las Manos and through the years has worked in the Las Manos-sponsored Shop of the Southwest inside the museum. She also serves as a museum hostess on a regular monthly basis — "something that I enjoy very much," she says.

Mrs. Birdwell was a charter member of the Midland Woman's Club, which came into being in 1949 and was one of the original members of the club's Book Review Unit, organized in 1967. Through the years, she has served on the Woman's Club's board of directors and has held various offices. She has been a member of the art exhibit committee for the club.

She also is a longtime member of the Midland Society of Parliamentarians (and, in connection, is a member of the State Association of Parliamentarians and the National Association of Parliamentarians). In her parliamentarian capacity, she has helped draft by-laws for several Midland organizations.

Mrs. Birdwell, the widow of Joe V. Birdwell, who died 14 years ago, served as secretary of Midland's First Methodist Church (now First United Methodist Church) in 1948, and she is treasurer of the Mary Scharbauer Circle of the United Methodist Women at First UMC.

She is a longtime member of Midland Community Theatre, the Friends of the Library organization of the Midland County Public Library, the Midland-Odessa Symphony and the Midland Community Concerts Association.

But it is as artist and photograher that Fran Birdwell is perhaps best-known to many Midland and area residents.

Mrs. Birdwell has long believed that "photography and painting go together," and she has demonstrated that theory quite effectively over the years with her prize-winning works.

She recalls that she took her first photography course under Midland photographer Randy Rubin years ago when he offered a public instructional course at Midland High School. She has studied art with Dorothy Peterson at Midland College, has had additional study with artist-teacher Wanda Hurley here, and has participated in several special art workshops in the city and area.

Mrs. Birdwell has won many awards for her black-and-white photography (she prefers black-and-white over color as a creative medium for her photography). She is proud of the many awards she has received through the years in salon shows in the Southwest and elsewhere.

She was a winner in a national photo contest sponsored by The National Observer two years ago, and she has won awards in two international exhibits of salon photography.

Mrs. Birdwell also has sold her photographs in the commercial markets, and she has had photographs published on the covers of The Midlander Magazine, the Prompter of Midland Community Theatre and The Lone Star Gardener Magazine. In past years she has done the photography for several front pages of the women's newssection of The Reporter-Telegram.

A native of Sherman, Mrs. Birdwell recalls she had the desire to draw and paint from the time she was a child, and she still owns some examples of her childhood creativity. She has exhibited in numerous fall regional art exhibitions sponsored here by the Midland Arts Association, winning awards in several of the annual shows. She also has won "Painting of the Month" honors several times at the Midland Palette Club where she is a member of the main organization as well as its Tuesday painting group. She is proud of the fact that she won one of the top prizes in a special Bicentennial art exhibition sponsored by the Odessa Art Association two years ago.

Mrs. Birdwell and her late husband and son Joe Jr., moved to Midland from Big Spring in the early 1940s. Previously the family had resided in Dallas and Texarkana.

Joe Jr., who with his family recently moved to Midland from Casper, Wyo., was deeply interested in photography even as a teenager, and when he was 13, his mother had a small, completely-equipped darkroom built for him. This triggered her own interest in photography, and it was not long afterward that she took her first course in photography.

The son's interest in photography continued during his student days at The University of Texas, where he took a degree in business. After graduation, he joined the Air Force and was sent to the Air Force photography school in Denver. He was an Air Force photographer, stationed in England, in the early 1950s.

Joe and his wife, Josie, are the parents of two sons, Brian, 15, and Bret, 11.

Smithsonian to display memorabilia for 75th anniversary of teddy bear

WASHINGTON (AP) — In a salute to the 75th anniversary of the teddy bear, the Smithsonian Institution will display the original and other memorabilia in an exhibition opening Monday.

The show includes the first teddy bear made by Ideal Toy Co. in 1903 and presented to President Theodore Roosevelt, who saved a bear cub's life and started a wave of enthusiasm that became a part of American folklore.

"The story of the teddy bear is traced to November 1902, when President Theodore Roosevelt was hunting in Mississippi," says Herbert R. Collins, curator of political history and organizer of the exhibit at the Museum of History and Technology.

"After an unsuccessful day, the hunting party brought a small bear cub for the president to shoot. He refused, saying the small animal did not have a chance to defend itself."

Clifford K. Berryman, cartoonist for the Washington Post at the time and later a famous political cartoonist for the Washington Star, sketched the incident and the country was soon flooded with teddy bears.

A company, strangely named the Theodore Bear Co., promoted the toy and produced large quantities of a less angular bear for children to cuddle.

Lionel Hampton subject of public radio salute on 50th anniversary

WASHINGTON (AP) — Lionel Hampton, described by a colleague as the "most combustive personality ever in jazz," is the subject of a National Public Radio salute on his 50th anniversary in the business.

Hampton, vibraphonist, drummer, pianist and band leader, started his professional career with Louis Armstrong, and he has played with nearly every other jazz great of the past generation.

He has always seemed indestructible but now, at 69, he has been sidetracked at least temporarily by stomach pains and gastric bleeding, which came on during an airplane flight to Mexico City from Bogota, Colombia. The remainder of a November tour was canceled, but Hampton was said to be recovering.

The two-hour public radio program highlights the 1978 jazz parade in Nice, France, featuring Hampton on vibraphone and drums with a name band. More than 15 musicians, many of them alumni of his band, are featured.

One of them, bass player Chubby Jackson, was the man who described Hampton as combustive. There are also comments by jazz writer Leonard Feather and Billy Taylor, the pianist and doctor of music who hosts many public radio jazz programs.

The program is being carried on the National Public Radio feed on Sunday night, although some of the more than 200 public radio stations may choose to air it at a different time. Listeners should consult local schedules.

Students getting introduction to museum

Fourth grade students from Bonham Elementary School try their hands at creating abstract art works at conclusion of a visit to the Museum of the Southwest to view a collection of abstract expressionist paintings. Karen Hall, a docent, or tour guide, of the Junior League of Midland Inc., admires their creative efforts. (Staff Photo)

Fourth grade students in the city are being introduced to abstract expressionist art through visits to the Museum of the Southwest. And they're being encouraged to create their own abstract art works at the end of their museum visit.

Docents (tour guides) of the Junior League of Midland Inc., are conducting the special tours for students to view the almost two dozen abstract expressionist paintings currently on exhibition at the museum.

The collection is on loan from the Sarah Campbell Blaffer Foundation of Houston and includes important paintings by such noted 20th Century American abstract artists as Robert Motherwell, Jackson Pollock, Mark Rothko, Helen Frankenthaler and Robert Goodnough, as well as world-famed Willem deKooning.

League leaders say the primary purpose of the tours is to help students understand that paintings can be experienced emotionally as well as visually. The docents use music, charts and other means to accomplish this purpose.

Tour guides show the students how line, shape, color and texture can be used to express feeling — with special emphasis on color — and also to teach the meaning of the terms "abstract expressionism" and "non-representational" as well as showing how the ideas expressed by these terms aid artist and viewer in experiencing the painting.

At the end of each tour, students are given the opportunity to try his or her hand at creating an abstract art work of his or her own.

The Blaffer Foundation collection will remain on view at the Museum of the Southwest, 1705 W. Missouri Ave., through early December. It is open to the public daily. Weekday hours are 10 a.m. to 5 p.m., while Sunday hours are 2 to 5 p.m. Admission is free at all times.

MC faculty members to present piano-vocal recital on Monday

A vocal-piano recital by two members of the Midland College music faculty will be presented at 8 p.m. Monday in the Fine Arts Building recital hall.

Featured artists will be Robert LaFontaine, vocalist, and Robert Poer, pianist. LaFontaine is head of the college music department and Poer is an adjunct faculty instructor in piano.

The recitalists have programmed works by Handel, Mozart, Schubert, Schumann and Ralph Vaughan Williams. The recital will be open to the public without charge.

LaFontaine, a bass-baritone, will offer arias from selected Verdi operas and also will present German lieder and Ralph Vaughan Williams' "Songs of Travel."

Poer, who has been organist and choir director for Midland's First Presbyterian Church for a number of years, will present the complete "Scenes From Childhood" by Robert Schumann, a musical work consisting of 12 descriptive pieces portraying events in the life of a child.

LaFontaine, a native of Rochester, N.Y., had special study at the well-known Eastman School in that city and later earned bachelor's and master's degrees in music from the University of Southern California.

He has been a public school music teacher and an instructor in a community college and has been a church choir director and soloist. He has toured with the noted Roger Wagner Chorale and was a member of the Los Angeles Master Chorale.

He has been featured as a French horn soloist and has composed music and done musical arrangements for choirs and instrumental ensembles.

Poer, a native of Pecos, received a B.A. degree in music from Texas Christian University and a master of sacred music degree from Southern Methodist University. He served as organist-choir director for churches in Breckenridge and Dallas before moving to Midland.

Fallen pro football hero subject of Gent book

TEXAS CELEBRITY TURKEY TROT. By Peter Gent. Morrow. 239 Pages. $9.95.

Popular idols seem to rise and fall with monotonous regularity in contemporary society. Perhaps it's because there are so many of them.

One field cluttered with yesterday's heroes is professional sports. In "Texas Celebrity Turkey Trot," former pro football player Peter Gent tells the story of one such toppled celebrity.

His name is Mabry Jenkins. Mabry, a defensive back, has been playing pro football for about 10 years and as his story opens he is having what he thinks is his best training camp.

Management, however, doesn't think so, and Mabry is cut from the squad. At age 30, he is turned out to shift for himself with only one skill — knowing how to play football. When other football teams don't pick him up, Mabry despairs, "I don't know if I can make not being anybody."

Completely at a loose end, Mabry gets involved in various celebrity sports competitions, does a stint as a disc jockey, and hangs out with a wealthy Texas oil crowd. All these various backdrops give Gent a great opportunity to satirize aspects of contemporary society and he does so with a vengeance.

Gent's jabs at, among other things, pollution, television, porno movies, pro sports, contemporary music, marriage, etc., are amusing at first. But the going gets heavy as he indulges in verbal overkill, and interest flags, then dies.

First book a winner

ASSAULT ON THE MAVIS A. By Norman Stahl. Random House. 258 Pages. $8.95.

This is one of the best thrillers to hit the book racks in a long, long time, and if it can be filmed, it will make a very dramatic movie.

The backdrop is the turbulence of Northern Ireland and the plot involves the latest act of violence by the terrorist Irish Republican Army.

It is an interesting plot:

A group of IRA terrorists quietly seizes control of a supertanker loaded with oil and head into the North Sea. The ship's crew willingly goes along because it thinks the ship is merely being held for ransom.

However, the terrorists are on a suicide mission. They plan to plow the ship into the legs of a giant off-shore oil platform.

Ostensibly, this will be a final blow to Britain's shaky economy because it will destroy the richest and largest oil well the country has. Also, the crude oil spewing forth from the smashed well is highly pressurized and could not be capped, thereby sending billions of barrels onto European and other Atlantic shore beaches.

It is the author's first novel and he delves into the IRA mystique with a touch reminiscent of Gerald Seymour's "Harry's Game," and Leon Uris' "Trinity."

But first, this is a thriller and an excellent one. In telling the story, Stahl uses an accelerating tempo that enhances the excitement of the dramatic events.

There are some weaknesses — an undeveloped characterization or two, a distracting subplot — but the weaknesses are small when compared to the full enjoyment "Assault on the Mavis A" provides.

Mickey Mouse betrayed, not his age at birthday

BY RUTH LANDA

NEW YORK (AP) — His whiskers betraying not a trace of gray, Mickey Mouse, a timeless hero, returned Saturday to the scene of his debut 50 years ago.

In celebration of Mickey Mouse's birthday, about 2,000 men, women and children jammed mid-Manhattan's Broadway Theater, where exactly a half century ago America's favorite rodent appeared in "Steamboat Willie," the first sound cartoon.

Mickey, spiffy in tuxedo and tails, made a guest appearance accompanied by cast members of "The Wiz," which is currently playing at the theater. Stephanie Mills, who plays Dorothy, led the party guests in singing Happy Birthday.

In the lobby, Mickey was greeted by smiling children perched on their parents' shoulders — some screaming, "Mickey, Mickey" and some sporting mouse ears that bobbed over the crowd.

In addition to "Steamboat Willie," "Plane Crazy," "Mickey's Service Station," "The Band Concert" and "The Sorcerer's Apprentice" were among the features of the Mickey Mouse 50th Birthday Extravaganza.

Mickey arrived in New York aboard the "Mickey Mouse Special," a train chartered by Disney officials for a cross-country trip as part of the nationwide birthday celebration.

On Friday, he was in Washington as the guest of honor of President and Mrs. Carter and their 11-year-old daughter, Amy.

In Anaheim, Calif., Disneyland officials said they they expected 30,000 persons Saturday — more than triple the usual turnout for a winter season. Admission to the park and a special firework display was free for those born in 1928, and anyone with a Nov. 18 birthday was eligible for a personal photo session with Mickey.

Visitors to Walt Disney World, near Orlando, Fla., also saw the reenactment of "Steamboat Willie," including the arrival of yet another Mickey and Minnie at the Main Street cinema in an old fashioned touring car. There were also two parades, featuring more than 100 Disney characters.

In St. Louis, a department store began a Mickey Mouse birthday party which, with the addition of Santa, will run until Christmas. Children can talk by telephone to an 18-foot Mickey in the store auditorium.

New York Mayor Edward Koch signed a proclamation calling Mickey Mouse "an authentic folk hero and one of America's most enduring ambassadors of good will, joy and laughter to he world."

"He's nice and he's cute," said 11-year-old Randall Brooks of Manhattan, a member of the cast of the musical "Annie."

"I like Mickey and I like his cartoons," said 10-year-old John McMorrow of Queens.

Through the years, Mickey, ever the Renaissance rodent, has variously starred as fireman, fisherman, gaucho and Arab, a sorcerer's apprentice, mechanic, concert pianist. He has inspired a wristwatch, a telephone and countless T-shirts.

"The only part he never played was that of a mouse," said Henry Geldzahler, New York's Commissioner of Cultural Affairs. "He is the greatest mouse in the history of art."

Willie Morris writes touching book on friendship with writer

JAMES JONES: A Friendship. By Willie Morris. Doubleday. 259 Pages. $8.95.

In a note at the beginning of this touching book, Willie Morris observes: "This is not a work of scholarship or of literary criticism. Rather it is an illumination of a friend, and perhaps of myself and others of us, and I hope it tells something about writing, especially about being a writer in America."

Morris need not concern himself. What he hopes the book will do, it does — extremely well.

James Jones, best known perhaps for his first novel "From Here to Eternity," died in 1977. He was 55. He had suffered from a heart condition for some time, but he refused to let it rule his life.

He considered himself a writer and he kept at his writing until they took him to the hospital for the last time and even while confined there, during the last painful days, he kept up work on a book he had been trying to finish for years, "Whistle." He did this by tape recorder, confiding his plans for the end of the book to the man who had been his close friend for some 10 years, Willie Morris.

This book tells of that great friendship, but it also tells much more. Jones' early years are here, so are his Army days, and so are the early days when he was struggling to write his first book. It tells also of the good days after the book was done and Jones was famous, living in France, and enjoying life.

And then it tells of the final days, and there was much happiness then also, although the end was sad. Morris has written a highly personal mini-biography of a beloved friend, and it is very good, a most engaging portrait of a most engaging man.

Phil Thomas
AP Books Editor

Freeman signed to ABC 'Roots' miniseries

HOLLYWOOD (AP) — Al Freeman Jr. has been signed to appear as Malcolm X in the ABC miniseries "Roots: The Next Generations."

Freeman joins James Earl Jones, who plays Alex Haley in the 14-hour continuation of the original "Roots."

It will air in early 1979 on ABC.

Film rights acquired

HOLLYWOOD (AP) — Warner Bros. Television has acquired the rights to "Hanta Yo," a book by Ruth Beebe Hill about the Dakota Indians in the 1800s.

Stan Margulies will produce for executive producer David Wolper.

Comedian Steve Martin having special this week

The Washington Post

They're calling his first television special "Steve Martin: A Wild and Crazy Guy" (Wednesday night, NBC) and considering what is being done with show titles these days, that one will have to do. The suspicion remains, however, that Steve Martin is neither wild nor crazy. He's more like a tame and wily guy who just happens to understand why people laugh.

He's had a big run of success the last couple of years. He did a major concert tour of the United States, and it was highly successful. He cut his first album, "Let's Get Small," and all that happened was that he won a Grammy award for the "Best Comedy Recording." He's filled in for Johnny Carson on the "Tonight" show (who hasn't?), but he explained how he managed to get the job: "Well. . . . I have hostages."

More recently he played a nine-day engagement at the huge Universal Amphitheater (which is near Universal Studios in Universal City, Calif.) and sold out the place for all nine days.

So it's about time he had a television special, no matter what they call it. In this one the theme is provided by Martin going to celebrated entertainers and getting advice about comedy, stage fright and (what else?) his first television special.

His advisers are persons such as Milton Berle, George Burns, Johnny Cash, Bob Hope and Strother Martin. Who is Strother Martin? you ask. He just happens to be one of the finest character actors around, an ornament in hundreds of television dramas, including support for James Stewart in the "Hawkins' series.

Steve Martin has been a fixture in the national magazines during the past two seasons. Just about everyone wants to explain why he is successful with a comedy act that isn't filled with topical humor, and that appears to be working new territory.

He does not, for example, appear as the professional, big-city wise guy, such as Bob Hope. He doesn't, for another example, have George Burns' marvelous, slow, deliberate style of telling a story. And (thank heaven) he doesn't have Milton Berle's pushy, domineering ("I know you're out there. I can hear you breathing.") way of forcing an audience to think it enjoys being shoved around.

No one seems able to identify the success pattern of Steve Martin. When he played the Kennedy Center in Washington in 1977, reviewer Don Shirley wrote: "His looney tunes are most striking when they interrupt his mock attempts at sophistication. . . .

"He doesn't attempt the depth or the range of a (Lily) Tomlin or a (Richard) Pryor, and he probably would be more successful on TV right now than either of them. He's snappy and quick and slightly juvenile.

The What-In-The-World-Is-It Clock!

It has no face and no hands. But this Wonderful Electric Clock tells time with unfailing accuracy to thousands hour after hour, day after day-year after year. And its unique continuing action is so fascinating to watch you will hardly be able to take your eyes off it!

HOW IT WORKS!
A rotating electric pendulum scoops up one of 32 steel balls every minute, and starts it in motion down a series of precisely balanced "tracks." Each ball changes the balance of the mechanism, causing the balls to roll from one "track" to down to another. And you can instantly read the time in minute, five-minute, and hourly units, by looking at the number of balls stacked on each of the three numbered time tracks.

ACCURATE RELIABLE CLOCK!
It's all utterly absorbing to watch. And your family and friends will find it hard to believe this is really an accurate, reliable clock. But it is-a unique, highly efficient timepiece that never needs resetting. The rotating pendulum is powered by precision-made motor. The nickel plated steel balls roll in scientifically engineered tracks that snap-fit together. The dust cover is included. Simple illustrated instructions show you how to assemble your Wonderful Clock in as little as an hour.

UL APPROVED MOTOR!
The Wonderful Clock is 5 1/2" Deep X 9 5/8" High. It is made of rich Jet Black plastic and has a UL approved motor. Just plug it in and let Wonderful do the rest!

Rayburn Home controversy ended

AUSTIN, Texas (AP) — The Texas Historical Commission chairman says a four-month controvery over the Sam Rayburn House in Bonham is over.

"I hope all of us ... can accept this as a fair and impartial look at the facts in a tiring and trying matter," Cecil Burney said Friday after the commission upheld John Jameson's firing as the Rayburn House director.

Truett Latimer, commission executive director, dismissed Jameson in August for alleged negligence, inefficiency and insubordination in running the state museum.

The late U.S. speaker's home became state property in 1973 and was restored and reopened as a museum in 1975. Rayburn died at age 79 in 1961.

Jameson appealed the firing to a three-member committee of the commission. After a Nov. 10 hearing in Bonham, the committee voted to support Latimer's action.

The committee said it found evidence that Jameson once called his supervisor "a liar," was disrespectful in correspondence, failed to make required monthly museum reports and mishandled federal funds by placing them in a private bank account instead of the state treasury.

During a closed session, the full commission accepted the committee's recommendation.

In addition to approving Jameson's firing, the commission adopted a resolution clearing Latimer of any misconduct allegations in the Rayburn House matter.

Jameson had charged that Latimer sent a $35,343 check to a restoration firm, despite a written agreement with the First State Bank of Bonham that all project funds be sent to the bank.

"We find all of the charges and allegations without truth, force or merit," the resolution said.

Special wheelchair serves quadriplegic

NEW YORK (AP) — Until recently, Blanche Turoff's horizon was the four walls of her room at Brooklyn's Kingsbrook Jewish Medical Center.

A quadriplegic, with no use of her arms or legs, she was confined to her room unless someone was available to wheel her around the hospital grounds.

Today, Ms. Turoff is able to move around by herself, thanks to an electronic wheelchair which has been adapted specifically for her needs.

While electric wheelchairs are ordinarily controlled by buttons which are pressed to move forward, backward, left or right, this system does not work for Ms. Turoff, since the only strength she has lies in her neck and jaw.

Roy Jordan, a technician in Kingsbrook's dental department, constructed a special mouthpiece which she uses as a gearshift; she goes forward or backward when it is moved up or down, and left or right when it is moved in those directions.

One of her other problems had been her inability to communicate by telephone. Recently, a system was developed for her which involved a basic telephone set, a sensitive switch used normally with the "nurse call" system and an operator's headset.

The switch is taped to the lower part of Ms. Turoff's neck and, by using her chin, she can activate the switch, which in turn activates the telephone programmed to automatically dial an operator, whom she asks to dial the desired number. She can receive a call by depressing the chin switch when the phone rings.

The number of people in the United States who may be considered handicapped is growing, says Dr. Asa Ruskin, director of rehabilitation medicine at Kingsbrook. Included are those who are physically handicapped, blind or vision-impaired, deaf or hearing-impaired, severely retarded and those with orthopedic handicaps.

More people are living past age 70 and falling prey to age-related problems and many persons suffer from degenerative diseases such as muscular dystrophy or multiple sclerosis, Dr. Ruskin says, adding that the life expectancy of the disabled is rising.

"Innovative mechanical and electronic products that have been developed make life easier for such individuals," Dr. Ruskin points out.

Among them are self-propelled wheelchairs; automatic door openers activated by wall switches, radio controls, photo cells or doormats; typing sticks, paintbrushes and other articles designed to be strapped to the hand or held in the mouth, and eating utensils with large, bicycle-grip handles for those who can't grip traditional flatware.

Army starts proceedings against Spanish plotters

MADRID, Spain (AP) — The army has begun judicial proceedings against a handful of military and police officers who reportedly were plotting to overthrow the Spanish government and kidnap King Juan Carlos.

The government said late Friday that proceedings had begun against "some chiefs and officers of the armed forces and police" for possible crimes under the military code but did not specify what the crimes were.

However, the liberal Madrid newspaper Diario 16 said several military men were arrested by the Defense Ministry for discussing entering Premier Adolfo Suarez' official Moncloa Palace on Madrid's outskirts while the Cabinet was in session.

The newspaper added the military men also talked over the possibility of kidnapping King Juan Carlos before he left Friday on a two-week trip to Mexico, Peru and Argentina.

Diario 16 said the army discovered the plot Wednesday when a colonel at an armored unit near Madrid informed superiors he had been asked if his troops would back up the dissidents once they had Suarez and his Cabinet trapped in the premier's palace.

A high ranking military source said the dissidents were faithful followers of Gen. Francisco Franco, Spain's right-wing dictator who died three years ago.

Fresh calls for the army to seize power were expected over the weekend at a mass rally called by rightists to commemorate the death of Franco.

Rightists shouted for a military dictatorship at the funeral Friday of a Franco-era judge assassinated three days ago by Basque guerrillas, the 68th victim of Spanish political violence this year.

OC slates mini-term

ODESSA — Odessa College will offer a midwinter interim session Dec. 26 through Jan. 5.

The mini-term will allow a student to take one course for regular college credit in eight days. Each class will meet in two sessions from 8:30 a.m. to 11:30 a.m. and from 1:30 p.m. to 4 p.m. each weekday.

Credit earned for these classes is equivalent to that of the regular session, according to Berhard Sedate, dean of instructional administration.

Registration will begin Monday and continue through Dec. 7. Registration for those classes not filled will be permitted Dec. 26.

Fourteen courses will be offered ranging from Marine Ecology to Creative Dramatics.

Interested persons should contact the counseling center at Odessa College for more information.

Missing persons cases spur action by lawmen

By GUY SULLIVAN
R-T Staff Writer

Missing persons.

It's a seldom discussed situation people might prefer to ignore.

Missing persons reports are rare in Midland.

Midland Police Department officers said the case last week of a woman and five children was unusual to say the least.

However, to police officers, all missing persons cases are a call for help by citizens.

And officers of the Midland Police Department respond to such calls for help daily — as do Midland County Sheriff's Department deputies and other lawmen.

Although the MPD may receive several calls per week from parents seeking help to find a son or daughter, not all such cases require the mobilization of manpower evident in last week's instance, said Capt. B.D. Ray, in charge of the Detective Division.

He said juvenile officers handle most of the "runaway" cases involving a teenager who leaves home.

"In most cases, they usually return a short while later."

He described young people who have left home voluntarily as "runaways," adding, "These are not true missing persons cases."

In fact, Capt. Ray said most of the cases the department responds to "are because people are concerned about their missing persons. Normally, within a few hours, they have been located."

He said in most situations there are no unusual circumstances surrounding the disappearance and the length of time since the persons have been seen by anybody.

And Capt. Ray said help in such major cases as the Midland woman and five children "is always welcome from other law enforcement agencies."

In fact, he said, "We always welcome any law enforcement agencies to assist us in such cases. We have a very good working relationship with the FBI here and other area law enforcement agencies."

He said, "I think it would be safe to say that there have been very few missing persons cases here in recent years."

In a week's time, he said, the department experiences several cases where people do not appear where they should have been at a certain time.

"We diligently try to find these people and make sure they are safely returned home. Like I say, normally, these people return home in a very short time."

He estimated 50 percent of the missing persons cases are adults in Midland and the other 50 percent are young people.

However, he said, veteran investigators can distinguish a major case from one in which the person likely will return home within a few hours.

"The Briscoe case is the only missing persons situation we've had where we have invested a tremendous amount of time and effort in the search, because of the circumstances surrounding the disappearance and the length of time the people had been missing."

He said he does not expect missing persons to become a major problem in future years, adding, "But there is no way of predicting that."

When a missing person becomes a major case, the Detective Division is called in.

"We deal mainly with criminal cases," Capt. Ray said.

If there is anything suspicious about the disappearance, he urged citizens to promptly report that to police.

The Briscoe case had "obvious suspicious circumstances" relating to it, he said.

Capt. Ray said he especially is proud of his fellow officers during the unusual case recently, in which a Midland woman and five children were out-of-pocket for three days.

"In fact, I think the Midland Police Department did a fine job in the Briscoe case and I'm proud of the people on this staff," said Capt. Ray.

"Basically, I'm proud of the work our officers do each day in all cases they are involved in, but especially in successful cases such as the Briscoe situation."

Mrs. Tom Briscoe, 36, and the children, three of them not hers, were located Tuesday in Las Cruces, N.M., after they were reported missing Saturday. The group was supposed to have attended a local children's play but never showed up there.

"The parents are worried in such circumstances and these guys (policemen) back here are worried and concerned.

"There were about 12 detectives working on this case and when they were all told the woman and children had been found safe, why you've never seen a happier bunch of guys," declared Capt. Ray.

He paused, his eyes bloodshot from four straight days without sleep.

Capt. Ray finally said: "You know, getting those kids back safe and sound is the bottom line."

Captain G.W. Thompson of the Midland County Sheriff's Department Criminal Investigation Division said the agency combines both missing persons and runaway cases in a master coding system.

"We had 46 missing persons cases reported to us during 1978," he said. However, he said, "37 of those were kids who ran away from home."

And, he said, 31 of the 37 were runaways. Out of the 31, eight runaways were repeaters, he said.

And only five of those actually were missing persons cases, he said. In other words, "They didn't just run away from home.

"That leaves nine adults who were reported as missing to us this year. And of that figure, six of these cases were where a spouse got into an argument with another spouse, left the house and didn't return until 12 to 24 hours later," he noted.

In addition, two of the nine were people who were either "taking off" or were headed out-of-state.

Missing persons cases provide interesting dramas, Thompson said.

He recalled a case in which a man was reported missing between Baton Rouge, La., and Sacramento, Calif.

"He was a truck driver," said Thompson. "His company found his truck in Odessa and he was last seen at the Warfield Truck Stop in Midland.

"He is the only missing persons case which is still outsanding. In other words, we haven't found him since he disappeared May 26, 1978," he explained.

He categorized the types of calls the department receives as including attempt-to-locate cases.

"When a person is gone and there is no good reason for them being gone, that's under suspicious circumstances," he said.

Thompson said the department has only received four such calls for help thus far this year.

In each case, he said, "They were all unharmed."

In an attempt to locate people, he said the department policies and procedures include sending a message to all West Texas law enforcement agencies of a description and other aspects.

"We ask them to have the person call us or call the missing person's family. In the case of runaways, we put out an immediate broadcast of the person in all West Texas," he said.

"In any of these cases we put out a statewide broadcast."

He described attempt-to-locate cases as occasions on which people who do not return where expected within 24 hours.

"Real" missing persons cases are "where foul play is feared," said Thompson.

He said the department seeks out any vehicles, if involved, and then "processes" them via lab work and fingerprint tests.

"We had one case that kind of gave us a scare," recalled Thompson.

"We received a report from someone who suspected a husband had done bodily harm to his wife and daughter.

"We found we had responded to a couple of disturbance calls at that residence in a two-week period. We sent officers there and they found the front door open, glass broken, furniture overturned and a wash rag covered with blood."

At that time, he said foul play was feared and it took two days before investigators discovered the husband and wife in Louisiana at the home of a sister.

They were attending a family reunion, of all things.

"This was a three-state investigation covering a three-day period involving about seven law enforcement agencies," said Thompson.

"But we were happy," he remembered. "We were glad it turned out like it did."

Preregistration under way at OC

ODESSA — Preregistration for the spring semester at Odessa College is under way now and will continue through Dec. 7 in the registrar's office on the second floor of the Student Union Building between 9 and 11 a.m. and 1:30 and 5 p.m. Evening registration sessions are slated from 6:30 to 8:30 p.m. Nov. 29 and 30 and Dec. 6 and 7.

Students entering OC for the first time must make appointments with counselors before preregistering. Returning students can go directly to the registrar's office.

The college has scheduled more than 600 classes in 56 fields of study for the spring semester.

An Ector County resident can expect to pay about $50 in tuition and fees for a three-semester-hour course without any lab fees. Two three-hour courses can be taken by the same student for about $60, and a full load of 15 semester hours for about $115.

Residents of other counties pay slightly higher fees.

Students who preregister can pay fees at the time they sign up early or can wait until Jan 4, 1979.

Registration for students who did not preregister will be Jan. 9, 1979.

Band candy sale set

The annual Lee High School band candy sale will begin Monday.

The Lee Rebel Band members will be selling "World's Finest" chocolate-covered almonds and chocolate bars. Each box or bar will include a coupon for a hamburger at a local fast-food restaurant.

All profits from the sale help students pay for their spring trip.

SANTA'S SECRETS

The Exciting ALL NEW Santa Contest!

$400 IN PRIZES

1st Prize	$200
2nd Prize	$125
3rd Prize	$50
4th Prize	$25

WIN CASH FOR CHRISTMAS!

Watch For SANTA'S SECRETS Five-Part Contest

The Midland Reporter-Telegram

Editions of NOV. 29, DEC. 3, 6, 10 & 13!

It's Simple and Easy!

In five issues of The Reporter-Telegram pictures of Midland merchants you know and trade with will appear on SANTA'S SECRETS special double page. With each picture, space will be provided in which to write SANTA'S ITEM you will find in that merchant's ad elsewhere in the same edition.

This is a sample of the picture space as it will appear on SANTA'S SECRETS special double page.

READ the advertisements of each participating business to be found in each of the five issues,

FIND a line or heading in which the words, "Santa's Item" is used in the ad to feature an outstanding value or service,

TURN to SANTA'S SECRETS contest double page in the same edition and write that item in the space adjacent to the picture (as illustrated above).

EVERY SPACE MUST BE FILLED WITH THE CORRECT "Santa's Item" FROM THAT STORE'S AD ELSEWHERE IN THE NEWSPAPER.

WRITE YOUR NAME AND ADDRESS IN THE SPACE PROVIDED ON THE CONTEST PAGE AND BRING IT TO THE REPORTER-TELEGRAM OR MAIL TO BOX 1650, Midland, Texas, 79702

ENTER EVERY TIME AND INCREASE YOUR CHANCES TO WIN!

ALL ENTRIES MUST BE RECEIVED BY THE REPORTER-TELEGRAM NOT LATER THAN SATURDAY, DECEMBER 16, TO BE ELIGIBLE FOR PRIZES.

DRAWING WILL BE HELD WEDNESDAY, DEC. 20

J.W. McCullough
City Secretary

(November 19, 1978)

ORDINANCE NO. 5381

AN ORDINANCE AMENDING CHAPTER ONE, TITLE XI, OF THE CITY CODE OF MIDLAND, TEXAS, BY PERMITTING THE PROPERTY DESCRIBED IN SECTION ONE HEREOF, A PORTION OF WHICH IS PRESENTLY ZONED "PLANNED DISTRICT" FOR A TOWNHOUSE HOUSING PROJECT AND A PORTION OF WHICH IS PRESENTLY ZONED "1F-1", ONE-FAMILY DWELLING DISTRICT, TO BE USED AS A "PLANNED DISTRICT" FOR A HOUSING PROJECT; PROVIDING FOR SUCH USE TO BE SUBJECT TO CERTAIN SPECIAL CONDITIONS AND RESTRICTIONS AS SET OUT HEREIN; PROVIDING THAT THE PROPERTY SHALL BE IMPROVED ACCORDING TO THE SITE PLAN, ORDINANCES AND OTHER SPECIFICATIONS SET OUT AND REFERRED TO HEREIN; CONTAINING A CUMULATIVE CLAUSE AND EXPRESSLY REPEALING ORDINANCE NO. 4733; CONTAINING A SAVINGS AND SEVERABILITY CLAUSE; AND ORDERING PUBLICATION

1-3-1: GENERAL PENALTY; CONTINUING VIOLATIONS: Whenever in this Code or in any ordinance of the City an act is prohibited or is made or declared to be unlawful or an offense or a misdemeanor, or wherever in such Code or ordinance the doing of any act is required or the failure to do any act is declared to be unlawful, where no specific penalty is provided therefor, the violation of any such provision of this Code or any such ordinance shall be punished by a fine of not exceeding two hundred dollars ($200); provided, however, that if the minimum or maximum penalty provided by this Code for any such offense is less or greater than the maximum penalty provided for the same or similar offense under the Laws of the State, then the minimum or maximum penalty for violation as provided by State Statute shall be mimimum or maximum penalty under this Code. Each day any violation of this Code or of any ordinance shall continue shall constitute a separate offense.

Any person who shall aid, abet or assist in the violation of any provision of this Code or any other ordinance shall be deemed guilty of a misdemeanor and upon conviction shall be punished as provided in the preceding paragraph.

In any prosecution for the violation of any provision of this Code, it shall not be necessary for the complaint to negative or for the State to prove any exception contained in this Code concerning any prohibited act; provided, however, that any such exception made therein may be urged as a defense by the person charged by such complaint.

ADVERTISEMENT FOR BIDS
NOTICE TO BIDDERS

Sealed proposals addressed to the Honorable Mayor and City Council of Midland, Texas will be received at the office of the City Secretary, City Hall, Midland, Texas, until 2:00 P.M., December 12, 1978, for furnishing all necessary materials, machinery, equipment, superintendence, and labor for constructing certain improvements at the Midland Regional Airport, Midland, Texas.

Immediately following the closing time for receipt of bids, proposals will be publicly opened and read aloud. Any bid received after closing time will be returned unopened.

The project consists principally of the construction of approximately 8,500 square yards of flexible pavement with aggregate base for a general aviation taxiway, construction of drainage structures, excavation, fencing, marking, and other related items of work.

A bid or proposal guaranty is to accompany the bid, thereby guaranteeing the good faith of the bidder and that the bidder will enter into the written contract. The guaranty is to amount to five percent (5%) of the total bid and must be in the form of cash or certified check, issued by a bank satisfactory to the City of Midland, or a bid bond. If in the form of cash or certified check, it is hereby expressly understood and agreed that the City of Midland is given the right to retain such as liquidated damages if such bidder withdraws its bid anytime after such bid is opened and before official rejection of such bid or, if successful in securing the award thereof, such bidder fails to enter into the contract and furnish satisfactory performance bond and payment bond. If a bid bond is submitted, it shall be executed on forms contained in these contract documents by a corporate surety authorized to do business in the State of Texas, and acceptable to the City of Midland.

The successful Bidder will be required to furnish a Performance Bond and a Payment Bond each in the amount of the contract, written by a responsible Surety Company authorized to do business with the State of Texas, and satisfactory to the Owner, as required by Article 5160, V.A.T.C.S., as amended by H.B. 344, passed by the 56th Legislature, Regular Session, 1959.

All lump sum and unit prices must be stated in both script and figures. The Owner reserves the right to reject any or all bids and to waive formalities. In case of ambiguity or lack of clearness in stating the prices in the bids, the Owner reserves the right to consider the most advantageous construction thereof, or to reject the bid. Unreasonable (or "unbalanced") unit prices will authorize the Owner to reject the bid.

Bidders are expected to inspect the site of the work and to inform themselves regarding all local conditions.

The proposed contract is under and subject to Executive Order 11246 of September 24, 1965, and to the equal opportunity clause, and the Bidder must supply all the information required by the proposal form.

The successful bidder will be required to submit a Certification of Nonsegregated Facilities prior to award of the contract, and to notify prospective subcontractors of the requirement for such a Certification where the subcontract exceeds $10,000. Samples of the Certification and the Notice to Subcontractors appear in the specifications.

Women will be afforded equal opportunity in all areas of employment. However, the employment of women shall not diminish the standards or requirements for the employment of minorities.

For bids relating to contracts of $50,000 or more, a contractor having 50 or more employees and his subcontractors having 50 or more employees and who may be awarded a subcontract of $50,000 or more will be required to maintain an affirmative action program.

Minimum wages and labor rates for the construction of the proposed work have been established by the Secretary of Labor, and a schedule of labor classifications and wage rates to be paid are included in the specifications and will be made a part of the contract. The bid form shall contain a statement that the prices bid are based on such wage rates.

Information for bidders, proposal forms, specifications and plans are on file in the office of the Director of Public Works, City Hall, Midland, Texas, at the office of the Director of Aviation, Midland Regional Airport, Midland, Texas at the office of Parkhill, Smith & Cooper, Inc., Consulting Engineers, 4010 Avenue R, Lubbock, Texas 79412.

Copies of the Plans and Specifications may be secured from Parkhill, Smith & Cooper, Inc., Consulting Engineers, 4010 Avenue R, Lubbock, Texas 79412, upon a deposit of FIFTY DOLLARS ($50.00) as a guarantee of the safe return of the plans and specifications. The full amount of the deposit will be returned to the Contractor on submission of a bona fide bid on the work, with such plans and specifications; or upon returning the plans and specifications immediately after examination of same, and advising the Engineer that bid will not be submitted; otherwise, the deposit will be forfeited.

CITY OF MIDLAND, TEXAS - Owner
By: J.W. McCullough
City Secretary

(November 19, 26, 1978)

The Texas Department of Human Resources will receive proposals for medicaid transportation services in Dawson, Borden, Martin, and Upton counties. Proposals will be received until 5:00 p.m., December 10, 1978, at 3803 Andrews Highway; Odessa, Texas. Proposal requirements may be obtained from Landre Doan, Regional Transportation Officer; Texas Department of Human Resources; P.O. Box 4636; Odessa, Texas 79760; (915) 367-7201. Service for these four counties will be covered in one (1) contract so that the State of Texas can pay the lowest possible administrative costs.

(Oct. 23,24,25,26,27,28,29, 1978)
(Nov. 19,20,21,22,23,24,25,26,27,28,29, 1978)

Cap Rock Electric Cooperative, Inc. P.O. Box 158, Stanton, Texas 79782, has filed an application with the Public Utility Commission of Texas requesting a Certificate of Convenience and Necessity to construct a substation in Upton County, Texas.

The proposed facility will be a 7500 KVA 69/14.4KV substation to be located in Section 47, Block 38, T-5-S, T&P RR Co., 4.5 miles south of Midkiff.

Copies of the application may be obtained from the Cooperative office Stanton.

(November 19, 26, 1978)

LEGAL NOTICES

ORDINANCE NO. 5390

AN ORDINANCE CHANGING THE ZONING USE CLASSIFICATION OF CERTAIN PROPERTY DESCRIBED IN SECTION ONE HEREOF, WHICH IS PRESENTLY ZONED "LR-2", LOCAL RETAIL DISTRICT, BY PERMITTING SAID PROPERTY TO BE USED UNDER A SPECIFIC USE PERMIT FOR THE SALE OF BEER AND WINE ONLY FOR ON-PREMISES CONSUMPTION; MAKING SAID PERMIT SUBJECT TO CERTAIN CONDITIONS AND RESTRICTIONS CONTAINED HEREIN; AND ORDERING PUBLICATION

1-3-1: GENERAL PENALTY; CONTINUING VIOLATIONS: Whenever in this Code or in any ordinance of the City an act is prohibited or is made or declared to be unlawful or an offense or a misdemeanor, or wherever in such Code or ordinance the doing of any act is required or the failure to do any act is declared to be unlawful, where no specific penalty is provided therefor, the violation of any such provision of this Code or any such ordinance shall be punished by a fine of not exceeding two hundred dollars ($200); provided, however, that if the minimum or maximum penalty provided by this Code for any such offense is less or greater than the maximum penalty provided for the same or similar offense under the Laws of the State, then the minimum or maximum penalty for violation as provided by State Statute shall be mimimum or maximum penalty under this Code. Each day any violation of this Code or of any ordinance shall continue shall constitute a separate offense.

Any person who shall aid, abet or assist in the violation of any provision of this Code or any other ordinance shall be deemed guilty of a misdemeanor and upon conviction shall be punished as provided in the preceding paragraph.

In any prosecution for the violation of any provision of this Code, it shall not be necessary for the complaint to negative or for the State to prove any exception contained in this Code concerning any prohibited act; provided, however, that any such exception made therein may be urged as a defense by the person charged by such complaint.

Restaurant

MANAGEMENT..... NOW !!!

Why wait for a promotion? If you have a special flair for a management career, talk with Denny's.

One of the prime reasons Denny's restaurants are increasing at the rate of more than one new unit every week is the imaginative, success-minded men and women in our management program. More important than a college degree we're looking for ambition, decision making ability and an extraordinary amount of human relations skills.

Immediate opportunities are available in the Midland area.

We offer a good starting salary, bonuses, profit sharing, liberal vacations and company paid benefits that include medical, dental and life insurance. If you're the career-oriented person we seek, and would like further information, please call or write:

WE'RE LOOKING FOR AIRCRAFT MAINTENANCE SPECIALISTS WHO HAVE CONSIDERED OVERSEAS EMPLOYMENT

...but want to know more about living and working overseas

You are right! If you have never worked a civilian overseas assignment, you should have the opportunity to check it out before you ship out. That's why we have prepared an audio/visual program that brings the sights and sounds of Iran to you. You'll see typical living quarters, work sites, recreational facilities and important details such as the local shopping facilities.

If you have strong civilian or military maintenance or manufacturing experience in any of the areas listed below... plus experience or the ability to train others in an On-The-Job Training program, there may be an opportunity with BHI in Iran for you.

- **HELICOPTER/AIRCRAFT MECHANICS - with at least five years recent Aircraft Maintenance experience.**
- **TECHNICAL INSPECTORS - with five years Helicopter or Aircraft Inspection experience. NDI inspectors also needed.**
- **DYNAMIC COMPONENT MECHANICS - five years experience maintaining Helicopter Powertrain and Rotor Systems.**
- **GSE MECHANICS - five years experience maintaining Aircraft Ground Support Equipment.**

We offer outstanding overseas premium income program including paid foreign tax credit, housing allowance, relocation and household goods storage, and many paid benefits...with an additional bonus to individuals who can work at remote sites on a no-children basis. Full family facilities are also available in major cities in Iran for some people.

ENGINEERS

Join our Engineering Staff in Anchorage, Alaska

and you'll be part of our most important project – the development of Prudhoe Bay...

one of the world's newest and largest oil fields.

Your assignments will be anything but routine.

You'll be confronted by environmental conditions that demand new operating procedures. By production requirements that call for totally new approaches to facilities and equipment engineering. You'll work with complex and large systems, custom-built for our Alaskan operation. You'll apply your expertise – and extend it in solving totally new engineering production problems.

You'll work closely with management and make decisions that directly impact on profitability.

A top caliber engineering staff and our management's day-to-day involvement clearly reflect our concern for the success of this history-making venture. Individual contributions and achievements will be recognized and rewarded. You will have promotional opportunities and the flexibility of moving from reservoir and operational assignments to project and production engineering work.

We offer top benefits.

Excellent starting salaries will be augmented by an Alaskan allowance of 45% of the first $2,000 per month plus 25% of any monthly amount over $2,000. We also provide complete benefits including a special Alaska moving plan, and an annual family vacation travel allowance. You'll be based in Anchorage, a growing metropolitan city, featuring excellent cultural attractions set against a breathtaking background of unspoiled Alaskan countryside.

Drilling Engineer

Requires BS in Petroleum, Mechanical or Chemical Engineering, or other technical degree (or equivalent experience). One to three years of experience in drilling phase of the petroleum industry necessary. Background in field or well safety programs desired. Will plan and engineer drilling, completing and workovers on North Slope oil and gas wells. Includes preparation of permits, cost estimates and AFE's, directional analysis and well plans. Will also perform studies and prepare technical reports on drilling operations, equipment and services.

Project Engineer

Requires an Engineering degree and 4 or more years of project engineering experience. Background should include work in construction and modification of oil and gas production and support facilities. Process engineering experience desired. Will take charge of projects from conceptual phase through completion – coordinating project engineering efforts with other District Staff and Co-owner groups involved in major facility installations and modifications. Will also participate in large volume waterflood design studies and provide technical support to field operating groups.

Facilities Planner

Requires Engineering degree and 4 or more years of experience in field development planning for surface production facilities – with emphasis on assessment of low pressure and artificial lift system requirements. Will plan studies related to long-range facilities needs in Prudhoe Bay. Responsibilities will include conducting analysis of alternatives for low-pressure production systems and initiating cost studies and estimates.

Reservoir Development Engineer

Requires a BS in Petroleum or Chemical Engineering and 4 or more years of experience in petroleum engineering, including at least 2 years in reservoir engineering. Experience in applied reservoir simulation and economics necessary; knowledge of computer programming and fluids phase behavior desired. Will work closely with operations and facility personnel and conduct a broad range of development and reservoir studies. Assignments will focus on optimization of well spacing and drilling schedules; artificial lift, waterflood gas compression and other major facilities timing and justification.

Local interviews can be arranged for qualified candidates.

Interested and qualified applicants should send their resume, indicating position of interest and including salary history and requirements, to: **Mr. Robert B. Jackson, Atlantic Richfield Company, 711 West Eight Street, Anchorage, Alaska 99510.**

OWN YOUR OWN BUSINESS

SEW E-Z, Inc.

Manufacturers of Pre-Cut

FEMALE FASHIONS

is building a national network of successful independent dealers, trained in a proven program to service eye-catching displays in a chain of high traffic retail outlets that we turn over to you. Our display is stocked with the latest SEW E-Z kits including a catalog with color pictures of the newest fashions and colors. Fabric swatches are also attached.

We manufacture pre-cut kits for female high fashion separates, dresses, sportswear, lounge wear and evening wear. All a customer does is sew, by machine or hand, pre-cut fabric pieces that are notched for matching seams. All necessary thread and trimmings such as ribbon, braid, elastic, buttons and zippers are included in the kit.

The directions are simple enough for a beginner to follow. Finding your size and color coordinate is SEW E-Z with a savings of 50% to 75%. Women will never have enough--- and it's a all SEW E-Z.

AMC SPIRIT

1979 AMC SPIRIT DL LIFTBACK

Sporty styling, loads of standard features and a smooth, comfortable ride—that's the Spirit!

Introducing the sporty new AMC Spirit! As fresh and lively a little car as any that's ever taken to the highway. From the new ladder-type grille and quad rectangular headlamps to the swept-back styling of the rear hatch, the Spirit DL Liftback shouts sportiness. The rear hatch flips up for easy access, too, making it ideal for load-and-go lifestyles.

The Spirit DL Liftback is more than just sporty. It's luxurious, too. There's a surprisingly high level of standard features, inside and out. Like bucket seats in Caberfae corduroy or Sport vinyl; woodgrain instrument panel overlays; electronic quartz digital clock; luxury woodgrain steering wheel, white sidewall tires, color-keyed styled wheel covers and much more.

You'll like the way the Spirit moves you, too. The standard 4-cylinder engine is surprisingly peppy. And the ride and stability are excellent (Spirit is wider and has a longer wheelbase than both Chevette and Pinto).

All in all, we think the Spirit has more to offer—and is a better value—than any other subcompact on the road. See for yourself. Get in the Spirit today.

Chandelle is a Nice Place to Call Home...*

WHY BUY A CONDOMINIUM?

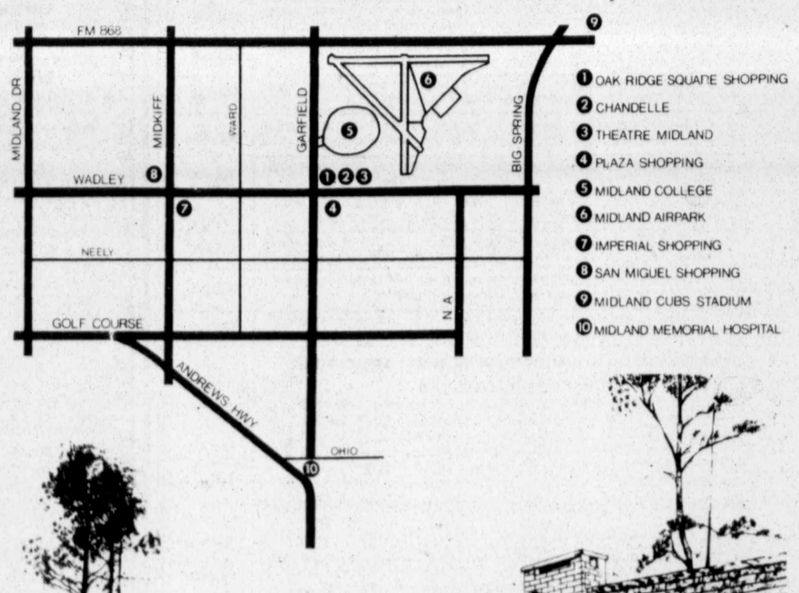

Condominiums afford quality living in prime locations. They allow the owner all the financial and tax advantages of owning a home without the headaches.

Condominiums are designed for a more flexible lifestyle. Most important, you have greater control over your housing costs when compared to renting.

WHY BUY A "CHANDELLE" CONDOMINIUM?

"CHANDELLE's" location at 2100 West Wadley is within minutes of downtown, theatres, recreational areas, shopping, restaurants, schools, churches, the college, and Airpark. At "CHANDELLE" you get an equity investment, the same tax breaks as a home owner, and greater control of your housing costs. "CHANDELLE" is the only real alternative people have to get away from the maintenance problems of home owning, and doing it with style.

Come out to 2100 West Wadley or call 684-7884 to find out why "CHANDELLE" is a nice place to call home. Models are open from 12:00 noon until 6:00 p.m. seven days a week.

Chandelle

Where real estate is a profession .....
2000 West Wall.

A HOME THE FAMILY CAN REALLY ENJOY: A play room large enough for a pool table. A convenient den to be used for TV viewing, a large three car garage with lots of storage plus two work shop areas. Three bdrms., refg. air, fireplace, and excellent location. See floor plan above. $72,000.

CIMMARON: A real good location. A real comfortable home with a nice covered patio and gas grill. A fireplace to enjoy these cool nights, a convenient kitchen with breakfast area, three bdrms., den, and plenty of closets. Call Mary Jo. $53,500

HUGHES: Be sure to see this fine three bdrm. and den home because it is priced to sell. A very convenient room arrangement, pretty step-saver kitchen with bay windows in breakfast area also a nice large laundry room, fireplace and a large covered patio. Large shade trees, excellent location. $59,900.

LOUISIANA: A good location in Dellwood, close to shopping areas, churches, and schools. All the interior has just been painted and the carpet shampooed, so it is ready to move in. Three bdrms., 2 baths, REFRIGERATED AIR. Be sure to see this one. $44,500.

PASADENA: You will really be surprised when you see the LARGE den and fireplace in this home because you don't expect to find something like this in a home for this price. Three bdrms., 1¾ baths, breakfast area in kitchen, double garage, REFRIGERATED AIR, large screened-in porch. Call Mary Jo. $49,500.

ROOSEVELT: The owner acquired this home on a commercial lot in the downtown area and moved this two bdrm. home to this corner lot, then repaired the home. It is in a good location and is a good buy. Call Goodrich. $18,000.

RURAL: Located 3 miles South of I-20 on Rankin Hwy. Approximately 2 acres of land and some fruit trees. The home has 3 bdrms., 1¾ baths, a separate dining room, a den and another room that can be used as a sewing room or a guest bedroom. Call Wanda. $36,000.

SHELL: A beautiful bay window in the breakfast area looking out on a pretty yard helps you start the day right. A covered patio to enjoy on summer evenings, a cozy fireplace to enjoy these cool evenings. REFRIGERATED AIR CONDITIONING, three bdrms., 1¾ baths, double garage, excellent location. Call Mary Jo. $55,950.

COMMERCIAL LOCATION: 600 block of South Big Spring. One quarter of a block or 21,000 sq. ft. and zoned C-3. $40,000

COMMERCIAL LOCATION: 7 lots for a low, low price of only $6,500.

RURAL ACREAGE: Approximately 157 acres North of City near Midland Country Club. Call for information.

Civil defense decision carries note of urgency recalling alarm of 1960s

By FRED S. HOFFMAN

WASHINGTON (AP) — The Carter administration's decision to improve civil defense programs carries none of the overtones of urgency that characterized the nation's initial nuclear war preparations in the early 1960s.

Following reports of major Soviet civil defense preparations and the release of a National Security Council study, Defense Secretary Harold Brown recommended that this year's $97 million appropriation for civil defense be nearly doubled next year. He also called for an administration plan to spend approximately $1 billion over the next five years to hone evacuation plans.

President Carter approved that proposal for submission to Congress, although some State Department and U.S. Arms Control and Disarmament Agency officials reportedly feared a stepped-up civil defense program could unsettle the Russians at a time when the goal is supposed to be soothing tensions between the two superpowers.

The present atmosphere cannot compare with the tensions of 1960 and 1961. The Russians had threatened to kick the Western allies out of Berlin; the United States mobilized 150,000 military reservists; and Americans began worrying about the possibility of nuclear war.

In this climate of fear, U.S. civil defense flourished as never before or since.

Many Americans built their own backyard fallout shelters, and several hundred million dollars were spent identifying public and private buildings as havens against fallout and stocking them with emergency supplies. Civil defense officials designated some 235,000 buildings as fallout shelters before public interest began to fade.

In the ensuing years, though, U.S. intelligence specialists and military leaders have been concerned with increasing Soviet civil defense activity, along with a major surge in Soviet missile striking power.

Four years ago, the civil defense approach swung from refuge in fallout shelters to the l target areas to lightly inhabited communities in the countryside.

Officials admit that it may take years to draw plans—on moving, housing, feeding and providing medical treatment for so many people.

Police fire on crowd

MADRID, Spain (AP) — Police fired smoke grenades and rubber bullets at demonstrators in the tense Basque region Friday following the assassination of a Franco-era judge by presumed Basque terrorists.

China modernized in different ways

EDITOR'S NOTE — AP Correspondent Edith Lederer rode a hovercraft from Hong Kong to Canton's Whampoa harbor last week, the first ferry service between the two points in almost 30 years. Here are some impressions of her visit to southern China's commercial hub.

By EDITH M. LEDERER

CANTON, China (AP) — The modernization of China comes in many guises — even bread has a humble role.

The Cantonese, who are known for paying special attention to their stomachs, have switched from traditional home-cooked rice gruel to store-bought bread for breakfast. As a result, they are getting to sleep a little later.

Finding a place to eat breakfast on the way to work is a common problem in China, and the government recently launched a nationwide campaign promoting bread, rather than rice dishes that must be cooked.

"It's very much welcomed by workers and government employees because if ready-made bread is available, they can get up a little later and don't have to worry about where to get breakfast," says Foreign Ministry interpreter Lu Chih-an.

China has embarked on a massive program to transform itself into a modern industrial state by the year 2000. Says Lu: "Eating more bread is a universal, unavoidable result of modernization. You can mass-produce it and it reduces the burden on the housewife."

IN THE PARK at White Cloud Mountain, the highest point overlooking Canton, dozens of little girls in colorful blouses and pigtails play a Chinese version of skipping rope called the "rubber band dance."

Instead of jumping and skipping through a rope to songs as American girls do, four or five Chinese girls perform synchronized dance steps with a rubber band eight feet long.

"Playing that game has political significance," says Lu. "Several girls must play it together and we encourage it because we want to encourage collectivism — not individualism."

THE BICYCLE BOOM in Canton has created so many traffic headaches that local officials are beginning to fine cyclists who run red lights.

Streets are being widened and special bicycle lanes added to avoid accidents. But there seems no stopping the estimated 1.5 million cyclists, who all seem to be on the road at the same time.

Bicycles are the main means of transportation in this city of 2 million, though a growing number of buses and trucks — all with their horns honking — are constantly vying with the cyclists for space on the road.

Lu says buses and trucks have the right-of-way but because there are no policemen in the streets "someone can perform acrobatics in the streets and one bike can carry two or three persons."

Because of traffic problems, Lu says, the government "is beginning to set up fines for bicycles riders if they cross on red." The amount of fines depends on the cyclist's "attitude" when the police point it out, "whether he shows a willingness to mend his ways," Lu explains.

MAKEUP AND Western clothes are taboo on the streets of Canton, but onstage the Cantonese dress in the latest fashions and even the men wear lipstick and rouge.

An audience including several hundred Cantonese, mostly dressed in traditional grays and blues, attends a special variety show in which singer Yeung Man-sau appears onstage in a stylish floor-length black evening gown and costume jewelry.

Tse Chong-hing sings a medley of Chinese and Western music in a gray Western-style suit and Yau Kwok-ping does the Italian "Te Bella Cosa" in a brown Mao suit. Both men have rosy-rouged cheeks and wear bright red lipstick.

IDA WU OF Hong Kong took the first passenger ferry to China since 1949 and found two younger sisters she hadn't seen in almost 35 years waiting for her in Canton.

"I haven't heard from them since I went to Hong Kong — we never corresponded," she said. "I did write and tell them I was coming and I'm quite relieved to have seen them and their husbands and children.

"They told me they are very happy. We heard rumors in Hong Kong how they lack food and have other problems but things are better than I thought," Mrs. Wu said. "They told me they have enough money and work is not so strenuous at all."

Marshall contends KKK 'laying traps' for blacks

WASHINGTON (AP) — Supreme Court Justice Thurgood Marshall said Saturday the Ku Klux Klan and its allies are still "laying traps" for blacks.

"We have them in every phase of American life," said Marshall, the only black member of the nation's highest court. He advised young blacks to "be careful of those people who say you've made it" because more work to end prejudice remains to be done.

"Don't listen to this myth" — that the problem of prejudice has been solved, Marshall told a group of black law students, lawyers and educators. "Take it from me, it has not been solved."

The justice was the keynote speaker at the investiture of Wiley A. Branton, a veteran civil rights lawyer, as dean of Howard University law school. Marshall graduated from the university in 1933.

Among those attending the ceremonies was Chief Justice Warren E. Burger.

Marshall said that although everyone in America is "doing better" now than several decades ago, the gap between whites and blacks is "getting bigger" as too many blacks cannot get jobs or enough food.

"They are still laying traps for us," Marshall declared at one point. "... When I say 'they,' I think we know who they would include. We have them in every phase of American life."

Marshall said he keeps hearing that the Ku Klux Klan is making a comeback.

Tour of Lincoln Memorial basement offered

WASHINGTON (AP) — For the tourist who has already seen such landmarks as the Washington Monument and the Jefferson Memorial, the National Park Service is offering guided trips through the eerie cave-like foundation of the Lincoln Memorial.

Beneath the strong, serene statue of Abraham Lincoln seen by millions of tourists a year, on land where the Potomac River once flowed, is a cave-like world where water seeps through the cracks and falls in darkness with an eerie drip, drip, drip.

The tour is free and it is the only one in town where the government recommends old clothes and hands out flashlights.

Limestone formations prosper, doing in 60 years what might take millions in a natural cave.

"You don't expect to see stalactites and stalagmites in the nation's capital underneath the Lincoln Memorial," says Sandra Alley, a Park Service official.

"You get a sense of history mixed with limestone drippings," she added.

Whatever the reason, the tour has been popular since the Park Service opened the Lincoln Underground to visitors a year ago.

Officials say the eight-times-a-week tour is booked solid through the end of the year, although the National Park Service will be able to accommodate more tourists beginning next spring.

It is not all limestone drippings, either.

The Lincoln Underground is a cave with cave drawings.

Wander among the concrete piers and you will find a gallery of delicate charcoal drawings, executed with a flourish by an unknown artist.

There is Mutt and Jeff of comics fame. There is Warren Harding, president at the time the memorial was dedicated in 1922, and Woodrow Wilson, chief executive when the building was under construction, and a woman of no known identity.

The construction employees left behind other artifacts that the Park Service is picking over — old ladders, chunks of concrete and the usual construction debris.

And there are more than a few whiskey bottles, long-since empty, that apparently helped the workers make it through the day.

Junior Achievers learn the ins and outs of the business world while they are students. They held a trade fair Saturday at Dellwood Plaza, selling their wares — and Junior Achievment. Susie Ellis, left, a freshman at Edison Freshman, engraves a nameplate which Lee High School junior Vickie Mizzles will coat with a tarnish preventer. (Staff Photo)

Can anyone with normal hearing understand the frustration a person with impaired hearing feels when trying to perform tasks most of us take for granted?

In Midland, a service organization is trying to help the deaf with their problems.

There are approximately 20 persons in the Tall City benfiting from a service project of the Downtown Lions Club—the conversion of teleprinters into telephones for the deaf.

This unique project is allowing deaf people to communicate with emergency services and with each other.

The teletypewriter, called the TTY, is simple to operate. A teleprinter is attached to a standard telephone through a shoe box-sized acoustic coupler. To place a call, the telephone receiver is placed on the coupler. Then the number is dialed on the telephone. A monitor light indicates ringing signals. When the answering party places his receiver on a coupler, conversation can begin by typing words on the teleprinter.

The Downtown Lions Club, chartered in 1928, has installed 20 of these teletypewriters in the homes of deaf people on a loan basis. They are looking forward to installing many more.

Wally Schmidt of 3702 Tanner St. is the man who converts the machines for the club. He volunteers his services.

"We take the basic machine, clean it and strip it of all wiring and moving parts," explains Schmidt. "We then rebuild it completely."

Schmidt has set up a workshop in a small trailer behind his home.

The machines, said George Weis, president of the Downtown Lions, are the old mechanical teletypewriters that Western Union donated to the club. "A generous contractor from West Texas who was in Chicago and had a flat bed truck hauled them back to Midland for the club."

"A generous contractor from West Texas who was in Chicago and had a flat bed truck hauled them back to Midland for the club."

The project was started by the Lions club about four or five years ago, said Weis.

"We have shipped 25 TTYs to the Odessa Club for the price of the couplers. This part alone costs $150," explained Weis.

"We deal primarily with people not financially able to handle the cost of the TTY. All the equipment is loaned as long as their is a need," he added.

Weis has been the hearing conservation chairman for Lions District 2-A1 for five years. The district stretches from Midland, Sweetwater, Ballinger and Brownwood to Buchanan Dam around to Junction. In the area of hearing conservation, the district has collectively invested in excess of $7,000 in this program.

The local hearing conservation committee of 11 members is chaired by Bob Milam, who is assisted by Arnold Adams. Other committee officers are Jerry Speck, vice president, and Eddie Klatt, director.

One of the 20 machines in service is at Lamar School for use of the deaf children there. Five of them are in homes of deaf children and the rest are in homes of adult deaf, interpreters and other hearing people.

The deaf can only call other people who has one of the teletypewriters in their home.

The TTYs were put in for the children "for communication with each other," said Schmidt. "It is a part of their growth and development."

Schmidt learned to repair typewriters when in high school.

"Primary mover of the project was John Berry of Fort Worth, formerly of Midland and a member of the Downtown Lions," said Weis. Berry was transferred by Texas Electric Service Co. to Fort Worth a year ago.

Berry's wife, Sandra, was the founder of the Permian Basin Council for the Deaf and Hearing Impaired two years ago.

As of Aug. 31, Lions Club International had 1,231,620 members in 32,372 clubs and 605 districts in 151 countries and geographic areas. Of the top 10 clubs in the world, Midland places ninth with 294 members. In Texas, they are topped only by Dallas and Lubbock.

The Lions International program for 1978-79 places special emphasis on hearing and speech action and work with the deaf.

She adjusts to no sound

Do you know the world of silence? No because sound is all around you that will forever be.

Do you know the world of sound? No, because you have never been without it.

Do you know the beauty of sound? No, because you haven't stopped long enough to enjoy it.

Now do you know how it feels to be deaf? No, because you haven't been a part of this world.

So take time to enjoy all that's around you, the sound of sweet music of all God's creations.

Mary Bess-

By PATSY GORDON

"When you go to bed you never know what will happen when you wake up. Thank God for your blessings."

Mary Bess of 1601 E. Pecan Ave. is one of the first residents of the Tall City to receive benefits from the teletypewriter service project of the Downtown Lions Club. She went totally deaf last year after teaching the handicapped children of the Midland school system for 12 years.

She woke up last July to a world of complete silence. "It's a different change for me all of a sudden to go from world of hearing to one of silence," said the now cheerful and very pleasant woman.

"People in general won't believe I am deaf. I have always been independent. It was a great shock to me. I enjoyed working with the kids at school and hated to give it up.

"I told the superintendent I could still do it (teach), but he said the parents might not like it."

She was aided in her search for love and acceptance of herself as she is when a friend urged her to attend services at First Baptist Church, which has a ministry for the deaf. "This was the beginning of a new life for me," explained Mrs. Bess.

This was where she learned about the Downtown Lions and their TTYs. They loaned her one and "I was so happy when I received this because I used to talk so much on the telephone."

She also goes to an Odessa rehabilitation center to learn lip reading and sign language.

Mary admits she "has so much fun doing more recreational activities than before." She still makes many things at home for a hobby, like ceramics, aprons and flower pots. Things she used to do for her students.

Helen Miller, a services provider for the Permian Basin Council for the Deaf and Hearing Impaired, an outreach of the Texas Commission for the Deaf, also is helping Mary adjust to her new world where "My eyes are my ears and my hands are tools for communication."

Helen is a person those in the hearing world can call for information about the deaf or arrange for interpreter for the deaf.

"They can arrange for interpreters to attend parent-teacher conferences, anything that is a basic need and not for social groups or parties," explained Mrs. Miller.

Mary is learning to be independent as she was before, but she still lives with hope "my hearing will come back."

Mary Bess could be either answering a call on her TTY or placing one. Neither person needs to say a word.

Officers for the Lee High School Hero Club this year are, from left, Evelyn Bynum, treasurer; Tracy Bevers, secretary; Gordon Daman, reporter; Gaye Hollis, vice president, and Laurie Buresh, president. Club members explore home economics and related occupations. (Staff Photo)

Civil defense decision carries note of urgency recalling alarm of 1960s

By FRED S. HOFFMAN

WASHINGTON (AP) — The Carter administration's decision to improve civil defense programs carries none of the overtones of urgency that characterized the nation's initial nuclear war preparations in the early 1960s.

Following reports of major Soviet civil defense preparations and the release of a National Security Council study, Defense Secretary Harold Brown recommended that this year's $97 million appropriation for civil defense be nearly doubled next year. He also called for an administration plan to spend approximately $1 billion over the next five years to hone evacuation plans.

President Carter approved that proposal for submission to Congress, although some State Department and U.S. Arms Control and Disarmament Agency officials reportedly feared a stepped-up civil defense program could unsettle the Russians at a time when the goal is supposed to be soothing tensions between the two superpowers.

The present atmosphere cannot compare with the tensions of 1960 and 1961. The Russians had threatened to kick the Western allies out of Berlin; the United States mobilized 150,000 military reservists; and Americans began worrying about the possibility of nuclear war.

In this climate of fear, U.S. civil defense flourished as never before or since.

Many Americans built their own backyard fallout shelters, and several hundred million dollars were spent identifying public and private buildings as havens against fallout and stocking them with emergency supplies. Civil defense officials designated some 235,000 buildings as fallout shelters before public interest began to fade.

In the ensuing years, though, U.S. intelligence specialists and military leaders have been concerned with increasing Soviet civil defense activity, along with a major surge in Soviet missile striking power.

Four years ago, the civil defense approach swung from refuge in fallout shelters to the l target areas to lightly inhabited communities in the countryside.

Officials admit that it may take years to draw plans—on moving, housing, feeding and providing medical treatment for so many people.

China modernized in different ways

EDITOR'S NOTE — AP Correspondent Edith Lederer rode a hovercraft from Hong Kong to Canton's Whampoa harbor last week, the first ferry service between the two points in almost 30 years. Here are some impressions of her visit to southern China's commercial hub.

By EDITH M. LEDERER

CANTON, China (AP) — The modernization of China comes in many guises — even bread has a humble role.

The Cantonese, who are known for paying special attention to their stomachs, have switched from traditional home-cooked rice gruel to store-bought bread for breakfast. As a result, they are getting to sleep a little later.

Finding a place to eat breakfast on the way to work is a common problem in China, and the government recently launched a nationwide campaign promoting bread, rather than rice dishes that must be cooked.

"It's very much welcomed by workers and government employees because if ready-made bread is available, they can get up a little later and don't have to worry about where to get breakfast," says Foreign Ministry interpreter Lu Chih-an.

China has embarked on a massive program to transform itself into a modern industrial state by the year 2000. Says Lu: "Eating more bread is a universal, unavoidable result of modernization. You can mass-produce it and it reduces the burden on the housewife."

IN THE PARK at White Cloud Mountain, the highest point overlooking Canton, dozens of little girls in colorful blouses and pigtails play a Chinese version of skipping rope called the "rubber band dance."

Instead of jumping and skipping through a rope to songs as American girls do, four or five Chinese girls perform synchronized dance steps with a rubber band eight feet long.

"Playing that game has political significance," says Lu. "Several girls must play it together and we encourage it because we want to encourage collectivism — not individualism."

THE BICYCLE BOOM in Canton has created so many traffic headaches that local officials are beginning to fine cyclists who run red lights.

Streets are being widened and special bicycle lanes added to avoid accidents. But there seems no stopping the estimated 1.5 million cyclists, who all seem to be on the road at the same time.

Bicycles are the main means of transportation in this city of 2 million, though a growing number of buses and trucks — all with their horns honking — are constantly vying with the cyclists for space on the road.

Lu says buses and trucks have the right-of-way but because there are no policemen in the streets "someone can perform acrobatics in the streets and one bike can carry two or three persons."

Because of traffic problems, Lu says, the government "is beginning to set up fines for bicycles riders if they cross on red." The amount of fines depends on the cyclist's "attitude" when the police point it out, "whether he shows a willingness to mend his ways," Lu explains.

"It's very much welcomed by workers and government employees because if ready-made bread is available, they can get up a little later and don't have to worry about where to get breakfast," says Foreign Ministry interpreter Lu Chih-an.

China has embarked on a massive program to transform itself into a modern industrial state by the year 2000. Says Lu: "Eating more bread is a universal, unavoidable result of modernization. You can mass-produce it and it reduces the burden on the housewife."

IN THE PARK at White Cloud Mountain, the highest point overlooking Canton, dozens of little girls in colorful blouses and pigtails play a Chinese version of skipping rope called the "rubber band dance."

Instead of jumping and skipping through a rope to songs as American girls do, four or five Chinese girls perform synchronized dance steps with a rubber band eight feet long.

"Playing that game has political significance," says Lu. "Several girls must play it together and we encourage it because we want to encourage collectivism — not individualism."

THE BICYCLE BOOM in Canton has created so many traffic headaches that local officials are beginning to fine cyclists who run red lights.

Streets are being widened and special bicycle lanes added to avoid accidents. But there seems no stopping the estimated 1.5 million cyclists, who all seem to be on the road at the same time.

Bicycles are the main means of transportation in this city of 2 million, though a growing number of buses and trucks — all with their horns honking — are constantly vying with the cyclists for space on the road.

Lu says buses and trucks have the right-of-way but because there are no policemen in the streets "someone can perform acrobatics in the streets and one bike can carry two or three persons."

Because of traffic problems, Lu says, the government "is beginning to set up fines for bicycles riders if they cross on red." The amount of fines depends on the cyclist's "attitude" when the police point it out, "whether he shows a willingness to mend his ways," Lu explains.

MAKEUP AND Western clothes are taboo on the streets of Canton, but onstage the Cantonese dress in the latest fashions and even the men wear lipstick and rouge.

An audience including several hundred Cantonese, mostly dressed in traditional grays and blues, attends a special variety show in which singer Yeung Man-sau appears onstage in a stylish floor-length black evening gown and costume jewelry.

Tse Chong-hing sings a medley of Chinese and Western music in a gray Western-style suit and Yau Kwok-ping does the Italian "Te Bella Cosa" in a brown Mao suit. Both men have rosy-rouged cheeks and wear bright red lipstick.

IDA WU OF Hong Kong took the first passenger ferry to China since 1949 and found two younger sisters she hadn't seen in almost 35 years waiting for her in Canton.

"I haven't heard from them since I went to Hong Kong — we never corresponded," she said. "I did write and tell them I was coming and I'm quite relieved to have seen them and their husbands and children.

"They told me they are very happy. We heard rumors in Hong Kong how they lack food and have other problems but things are better than I thought," Mrs. Wu said. "They told me they have enough money and work is not so strenuous at all."

Marshall contends KKK 'laying traps' for blacks

WASHINGTON (AP) — Supreme Court Justice Thurgood Marshall said Saturday the Ku Klux Klan and its allies are still "laying traps" for blacks.

"We have them in every phase of American life," said Marshall, the only black member of the nation's highest court. He advised young blacks to "be careful of those people who say you've made it" because more work to end prejudice remains to be done.

"Don't listen to this myth" — that the problem of prejudice has been solved, Marshall told a group of black law students, lawyers and educators. "Take it from me, it has not been solved."

The justice was the keynote speaker at the investiture of Wiley A. Branton, a veteran civil rights lawyer, as dean of Howard University law school. Marshall graduated from the university in 1933.

Among those attending the ceremonies was Chief Justice Warren E. Burger.

Marshall said that although everyone in America is "doing better" now than several decades ago, the gap between whites and blacks is "getting bigger" as too many blacks cannot get jobs or enough food.

"They are still laying traps for us," Marshall declared at one point. "... When I say 'they,' I think we know who they would include. We have them in every phase of American life."

Marshall said he keeps hearing that the Ku Klux Klan is making a comeback.

Tour of Lincoln Memorial basement offered

WASHINGTON (AP) — For the tourist who has already seen such landmarks as the Washington Monument and the Jefferson Memorial, the National Park Service is offering guided trips through the eerie cave-like foundation of the Lincoln Memorial.

Beneath the strong, serene statue of Abraham Lincoln seen by millions of tourists a year, on land where the Potomac River once flowed, is a cave-like world where water seeps through the cracks and falls in darkness with an eerie drip, drip, drip.

The tour is free and it is the only one in town where the government recommends old clothes and hands out flashlights.

Limestone formations prosper, doing in 60 years what might take millions in a natural cave.

"You don't expect to see stalactites and stalagmites in the nation's capital underneath the Lincoln Memorial," says Sandra Alley, a Park Service official.

"You get a sense of history mixed with limestone drippings," she added.

Whatever the reason, the tour has been popular since the Park Service opened the Lincoln Underground to visitors a year ago.

Officials say the eight-times-a-week tour is booked solid through the end of the year, although the National Park Service will be able to accommodate more tourists beginning next spring.

It is not all limestone drippings, either.

The Lincoln Underground is a cave with cave drawings.

Wander among the concrete piers and you will find a gallery of delicate charcoal drawings, executed with a flourish by an unknown artist.

There is Mutt and Jeff of comics fame. There is Warren Harding, president at the time the memorial was dedicated in 1922, and Woodrow Wilson, chief executive when the building was under construction, and a woman of no known identity.

The construction employees left behind other artifacts that the Park Service is picking over — old ladders, chunks of concrete and the usual construction debris.

And there are more than a few whiskey bottles, long-since empty, that apparently helped the workers make it through the day.

Junior Achievers learn the ins and outs of the business world while they are students. They held a trade fair Saturday at Dellwood Plaza, selling their wares — and Junior Achievment. Susie Ellis, left, a freshman at Edison Freshman, engraves a nameplate which Lee High School junior Vickie Mizzles will coat with a tarnish preventer. (Staff Photo)

This teletypewriter printout reflects a silent dialogue.

Wally Schmidt is converting the teletypewriters in his workshop.

Silent network created for deaf

Can anyone with normal hearing understand the frustration a person with impaired hearing feels when trying to perform tasks most of us take for granted?

In Midland, a service organization is trying to help the deaf with their problems.

There are approximately 20 persons in the Tall City benfiting from a service project of the Downtown Lions Club—the conversion of teleprinters into telephones for the deaf.

This unique project is allowing deaf people to communicate with emergency services and with each other.

The teletypewriter, called the TTY, is simple to operate. A teleprinter is attached to a standard telephone through a shoe box-sized acoustic coupler. To place a call, the telephone receiver is placed on the coupler. Then the number is dialed on the telephone. A monitor light indicates ringing signals. When the answering party places his receiver on a coupler, conversation can begin by typing words on the teleprinter.

The Downtown Lions Club, chartered in 1928, has installed 20 of these teletypewriters in the homes of deaf people on a loan basis. They are looking forward to installing many more.

Wally Schmidt of 3702 Tanner St. is the man who converts the machines for the club. He volunteers his services.

"We take the basic machine, clean it and strip it of all wiring and moving parts," explains Schmidt. "We then rebuild it completely."

Schmidt has set up a workshop in a small trailer behind his home.

The machines, said George Weis, president of the Downtown Lions, are the old mechanical teletypewriters that Western Union donated to the club. "A generous contractor from West Texas who was in Chicago and had a flat bed truck hauled them back to Midland for the club."

"A generous contractor from West Texas who was in Chicago and had a flat bed truck hauled them back to Midland for the club."

The project was started by the Lions club about four or five years ago, said Weis.

"We have shipped 25 TTYs to the Odessa Club for the price of the couplers. This part alone costs $150," explained Weis.

"We deal primarily with people not financially able to handle the cost of the TTY. All the equipment is loaned as long as their is a need," he added.

Weis has been the hearing conservation chairman for Lions District 2-A1 for five years. The district stretches from Midland, Sweetwater, Ballinger and Brownwood to Buchanan Dam around to Junction. In the area of hearing conservation, the district has collectively invested in excess of $7,000 in this program.

The local hearing conservation committee of 11 members is chaired by Bob Milam, who is assisted by Arnold Adams. Other committee officers are Jerry Speck, vice president, and Eddie Klatt, director.

One of the 20 machines in service is at Lamar School for use of the deaf children there. Five of them are in homes of deaf children and the rest are in homes of adult deaf, interpreters and other hearing people.

The deaf can only call other people who has one of the teletypewriters in their home.

The TTYs were put in for the children "for communication with each other,"said Schmidt. "It is a part of their growth and development."

Schmidt learned to repair typewriters when in high school.

"Primary mover of the project was John Berry of Fort Worth, formerly of Midland and a member of the Downtown Lions," said Weis. Berry was transferred by Texas Electric Service Co. to Fort Worth a year ago.

Berry's wife, Sandra, was the founder of the Permian Basin Council for the Deaf and Hearing Impaired two years ago.

As of Aug. 31, Lions Club International had 1,231,620 members in 32,372 clubs and 605 districts in 151 countries and geographic areas. Of the top 10 clubs in the world, Midland places ninth with 294 members. In Texas, they are topped only by Dallas and Lubbock.

The Lions International program for 1978-79 places special emphasis on hearing and speech action and work with the deaf.

She adjusts to no sound

Do you know the world of silence? No because sound is all around you that will forever be.

Do you know the world of sound? No, because you have never been without it.

Do you know the beauty of sound? No, because you haven't stopped long enough to enjoy it.

Now do you know how it feels to be deaf? No, because you haven't been a part of this world.

So take time to enjoy all that's around you, the sound of sweet music of all God's creations.

Mary Bess

By PATSY GORDON
R-T Lifestyle Writer

"When you go to bed you never know what will happen when you wake up. Thank God for your blessings."

Mary Bess of 1601 E. Pecan Ave. is one of the first residents of the Tall City to receive benefits from the teletypewriter service project of the Downtown Lions Club. She went totally deaf last year after teaching the handicapped children of the Midland school system for 12 years.

She woke up last July to a world of complete silence. "It's a different change for me all of a sudden to go from world of hearing to one of silence," said the now cheerful and very pleasant woman.

"People in general won't believe I am deaf. I have always been independent. It was a great shock to me. I enjoyed working with the kids at school and hated to give it up.

"I told the superintendent I could still do it (teach), but he said the parents might not like it."

She was aided in her search for love and acceptance of herself as she is when a friend urged her to attend services at First Baptist Church, which has a ministry for the deaf. "This was the beginning of a new life for me," explained Mrs. Bess.

This was where she learned about the Downtown Lions and their TTYs. They loaned her one and "I was so happy when I received this because I used to talk so much on the telephone."

She also goes to an Odessa rehabilitation center to learn lip reading and sign language.

Mary admits she "has so much fun doing more recreational activities than before." She still makes many things at home for a hobby, like ceramics, aprons and flower pots. Things she used to do for her students.

Helen Miller, a services provider for the Permian Basin Council for the Deaf and Hearing Impaired, an outreach of the Texas Commission for the Deaf, also is helping Mary adjust to her new world where "My eyes are my ears and my hands are tools for communication."

Helen is a person those in the hearing world can call for information about the deaf or arrange for interpreter for the deaf.

"They can arrange for interpreters to attend parent-teacher conferences, anything that is a basic need and not for social groups or parties," explained Mrs. Miller.

Mary is learning to be independent as she was before, but she still lives with hope "my hearing will come back."

Mary Bess could be either answering a call on her TTY or placing one. Neither person needs to say a word.

...MRS. GEORGE KNOX of Midland was elected to serve as secretary of the American Hereford Auxiliary when the group met in Kansas City, Mo., during American Royal activities.

The auxiliary sponsored a full day of activities which led off with a seminar especially designed to better acquaint wives of Hereford breeders with their roles in livestock operations. Areas such as taxes, regulations, beef promotion and estates were explained.

Worldwide advances seen for women in equal rights, altering male dominance

By JEFF BRADLEY
Associated Press Writer

Divorce, for long a taboo subject in parochial southern Europe, is now legal in Catholic Italy and Portugal and is expected to win approval in a national referendum in Spain next month.

LONDON (AP) — Luxury hotels in London no longer advertise for chambermaids. They're known as "chamberpersons" these days, one result of a new British law banning sex discrimination.

In Holland, women volunteers in the armed forces will soon be sharing combat roles with men, and in West Germany newlyweds can adopt the bride's maiden name as the family surname.

These and other European advances in women's rights mirror similar advances in the United States, where the sex-discrimination debate currently is focused on ratification of the Equal Rights Amendment.

An Associated Press survey of recent changes worldwide showed much progress in altering the laws of male domination. But Women's Liberation remains a dream in much of the world. And even in places where feminists have scored victories, the age-old customs making women subordinate to men have not died quite so easily.

"Parliament can change laws but it cannot change minds," said Lady Birk, Britain's undersecretary of state for the environment.

"Today's discrimination may be more polite than it was but it is still a barrier to full equality."

Nevertheless, important changes have been made. Divorce, for long a taboo subject in parochial southern Europe, is now legal in Catholic Italy and Portugal and is expected to win approval in a national referendum in Spain next month.

Sweden has six women Cabinet ministers — 30 percent of the total and a record for Western Europe. But Birgitta Wistrand, a prominent Swedish women's leader, commented: "We are not impressed. The proper quota should have been 51 percent women, as we constitute slightly more than half the population."

The nine European Common Market countries have agreed in principle to abolish sex discrimination in jobs and promotions, and to require equal pay for equal work. A follow-up directive on pensions and social security is under study.

In much of Western Europe, therefore, basic women's rights are here or are on their way: equal pay, job opportunities and community property provisions in marriage. Women's activists have moved on to such issues as discrepancies in the taxation system.

But backwaters of male chauvinism remain in Europe and elsewhere.

Portugal's two-year-old constitution, enacted after the 1974 revolution that ended decades of right-wing dictatorship, bars sexual discrimination. But a recent television documentary there showed that attitudes may not change so quickly. It pictured rural women hoeing fields and washing clothes in a river, just as they have always done. Their husbands sipped brandy at a local cafe. "Help my wife with the chores?" said one. "Why should I? When she earns as much as I do, then I might help her."

In staunchly Roman Catholic Ireland, divorce is still banned, abortion is illegal and moralists debate the wisdom of a December 1973 high court ruling permitting married couples to import contraceptives from abroad for their personal use.

Japanese labor laws discriminate against women in pay, hours and promotion prospects, and widows can expect to receive only one-third of their husbands' estate — the rest goes to the children.

"The Japanese women's movement as a whole is not powerful and widespread enough to amend laws," said Fuyuko Makisaka, a leading feminist. "But it's taking root here, too. Demands now are directed primarily to labor problems."

Critics say South Africa remains a male bastion. White women complain of unfair taxation, unequal pay and discrimination in hiring. Blacks, men and women alike, must endure a rigid system of racial segregation.

Jihan Sadat, wife of Egypt's president, leads a group of 15 educated women in her country trying to amend the divorce law under which a Moslem man can marry as many as four wives and divorce at will by saying "I divorce you" three times.

In Europe, the new laws do not abolish all inequities. Women may be guaranteed equal pay, but in Belgium, Britain and West Germany most still work as store clerks, typists and the like, and earn an average of 30 percent less than men.

Even in the Soviet Union, where the constitution's Article 35 begins "Women and men have equal rights," and where 80 percent of practicing doctors are women, men still run the country — there are no women in the all-powerful Politburo.

Most Soviet women work, but also do the chores at home. Official praise is more often for their homemaking skills than for their shop-floor output.

Anyone rearing 10 children gets a "mother-heroine" award.

Marijke van Hemeldonck, chairwoman of the Women's Work Committee in Belgium, calls her country's divorce law "the most medieval in Europe, along with Spanish and Portuguese laws." Belgium is the only European country where women and their doctors can be jailed for abortion, and the only Common Market nation with no woman Cabinet minister in charge of women's affairs. One breakthrough: women volunteers were accepted into the armed forces three years ago and now number 2,652 out of about 85,000.

A series of British laws beginning in 1969 has allowed women to enter into legal contracts in their own right, guaranteed them equal pay, given both parents equal rights to their children and safeguarded the jobs of pregnant women. "No-fault" divorces are now easy to obtain in Britain.

Mrs. Christopher W. Bess

Miss Henry weds Bess

Margaret Denise Henry, daughter of Mr. and Mrs. A.L. Henry, of 910 Weatherford, and Christopher Wayne Bess, son of James Bess of San Antonio and Mrs. Mary A. Bess of 1601 E. Pecan, Ave. were wed in a double ring ceremony Dec. 6.

The wedding was held at the Macedonia Baptist Church. Officiating was the Rev. O.J. Archie.

The bride was given in marriage by her father.

Attendants were Larry Thomas, cousin of the groom from Austin, Andrew Stewart, Angela Wade and Cathy Henry, sister of the bride, from Midland.

Organist was Norma Lewis and soloists were Cathy Henry, Catherine Bess and Lela Archie.

The bride wore a gown of white chiffon organza and lace. She carried a stylized cascade of talisman roses.

Reception was in the fellowship hall of the church.

The couple will reside in Waukegan, Ill.

Dr. Henry G. Cisneros

Cisneros to speak here

Dr. Henry G. Cisneros, author, urban studies specialist and environmental expert, will speak on volunteerism in Midland Tuesday.

Cisneros, of San Antonio, will address the Junior League of Midland Inc., at the regular monthly meeting of the group in Theatre Midland, 200 W. Wadley Ave.

His talk is entitled "The Pendulum Swings Back to Individuals in Cooperation."

The meeting is open to the public, according to Junior League officials, and persons who are involved in voluntary social service work are particularly welcome.

The meeting begins at 9:30 a.m. For further information, contact Margaret Purvis at 697-3206.

Cisneros received a BA degree from Texas A&M University in 1968 and a master's degree in urban and regional planning from that university in 1970.

He also received a master of public administration degree from the John F. Kennedy School of Government at Harvard University in 1973. He holds a doctoral degree in public administration from George Washington University and has done special doctoral research in the Department of Urban Studies and Planning at the Massachusetts Institute of Technology.

Currently, Cisneros is assistant professor in the division of environmental studies at The University of Texas at San Antonio. He also is a member of the San Antonio City Council and serves as chairman of the Area Manpower Planning Council.

He is a former assistant to the Secretary of Health, Education and Welfare in Washington, D.C., and before that served as assistant to the executive vice president of the National League of Cities in Washington, D.C.

Government will not seek surgery regulations

WASHINGTON (AP) — Despite the recommendation of a national advisory commission, the government declined Wednesday to seek federal restrictions on use of brain surgery to alter behavior.

HEW Secretary Joseph A. Califano Jr., in an announcement published in the Federal Register, said he would prefer voluntary regulation of psychosurgery by the medical profession over federal controls governing the controversial procedure.

Company has table troubles

CHICAGO (AP) — Sears, Roebuck and Co. said Friday that some 38,000 table tennis sets with a special playback feature may be faulty, and it is contacting the owners to give them modification kits.

The company said the table has a stability problem when one side of it is folded up in the playback position, which allows a solitary player to hit the ball back and forth by himself. There have been four reported incidents of the table falling forward when pulled, resulting in minor injuries, a spokesman said.

The tables involved were sold from June 1977 through September 1978.

Model numbers 527.827.26199, 527.836.26186, and 527.837.26189 were offered through retail stores and the catalog.

Two models were sold through the catalog only — 527.835.26187 and 527.836.26198.

Model numbers are stamped on the bottom of the table. The tables were sold throughout the country except in the western states of Arizona, California, Idaho, Nevada, Oregon, Utah and Washington.

THE FAMILY COUNSELOR

Husband's transient job root of problem

By the Staff of Family Services of Midland

Q. For as long as we've been married, my husband's job has meant more to him than his family. We've moved around a lot and he's always away because of it. When he's gone, the children act up, he sometimes has to come home. It's gotten so that I want to say, "It's either us or the job." What can I do?

A. This is a very prevalent problem here in Midland with the demands of oil and gas industry and Midland's transient nature. You are feeling unimportant to your husband. You lose friendships when you move. You're concerned about the children and have some helpless feelings about your marriage. Certainly many wives and mothers have faced similiar feelings when a job keeps a husband away from home and family a lot. Perhaps your expectations of family and marriage were quite different from your husband's.

You've had to make new friends, the kids have attended new schools, and your husband is often gone. This is bound to be a hardship on one's marriage and family life because of the frequent adjustments and changes. You, as wife and mother, have had to carry a lot of the load. You've had to deal with the children as the "only" parent a lot of the time, listening to their everyday ups and downs, fulfilling their needs for nurturing and discipline. This is very demanding of you, especially when you feel that you need your husband there to control the kids. Your "ultimatum" is fairly strong and suggests there may be some discussion needed between the two of you to clarify feelings.

If you haven't tried talking and listening to him, you may learn something new about how your husband really sees things. Perhaps he sympathizes and cares more than you assume. Perhaps he, too, feels very frustrated over not being home. Perhaps he finds you hard to be with as angry as you are, and is a bit angry himself. It may not be what you are saying to him, but how you are saying it, that may be causing the problems in your relationship. Since he does come home when you need him the chances are good that he really cares about you and the family. The pattern of your criticism and more withdrawal needs to be halted by one or both of you, at any rate.

If your husband is in the Service, or with a large company, or has a career like a doctor or lawyer, he may not feel he is spending that much time "away." Career men feel the responsibility of their jobs, yet their families are important. Check this out with your husband. Talk with him about how his job is going, see how important it may be to him to give this much of himself, take a look at how he feels. This may help you realize something new about your husband and give you a different perspective. Apparently, he has not allowed his job to separate him from you entirely. If he agrees to being "on call" for you at home, then he really is putting a lot of energy into both his job and his family.

The loneliness, hostility and resentment about what he's doing cannot be hidden from him or from your children. Yet these are real feelings and you're asking for help in handling them. You're asking him to help you by listening and trying to be more available. Perhaps you can help him and the family if you can change your attitude regarding the inherent demands of his work. Talk with your husband about this. He may have heard you complain about his job before, but has he ever heard you try to understand, or ask for some help adjusting to it?

Perhaps to best help your family in the adjustment to the job, the different places, his absence, you might need to find some outside intrests. You might get a job, working part-time while the kids are in school, and be there when they return. Your own self-confidence and feelings of worth will increase. You might find yourself with new feelings of independence and a fullness that will help you deal with the kids, enjoy your home, and better understand your husband when he gets home.

Often times problems such as these are difficult to work out on your own. There is professional help available to you in the community.

If you need help or have a question you would like to ask this column, write: The Family Counseor, c/o Family Services, 2101 W. Wall, Room 9, Midland, Texas 79701. We are a United Way agency.

Viva magazine ends because of sex image

NEW YORK (AP) — Viva magazine announced Friday that the January issue will be its last because it cannot shake its image as a sex magazine.

The 5-year-old magazine for women was founded by Bob Guccione, who also publishes Penthouse magazine. Viva had an audited circulation of 361,266 copies — 95 percent of which were sold on newsstands, it was said.

Guccione attributed the decision to halt publication of Viva to what he termed "continued prejudicial treatment on the part of the industry."

Associate publisher and editor Kathy Keeton said male nudes were dropped from its pages in March 1976 but most newsstands continued to display Viva with Penthouse, Playboy and other sex-oriented publications. Viva was attempting to compete with Cosmopolitan, Vogue and Glamour for an audience of young career women.

A spokeswoman said Guccione would attempt to relaunch Viva as an internationally minded fashion magazine with secondary emphasis on beauty, health and general service.

No exact timetable was given for its reappearance, but she said several one-shot magazines under the Viva logo would probably appear before regular publication resumes.

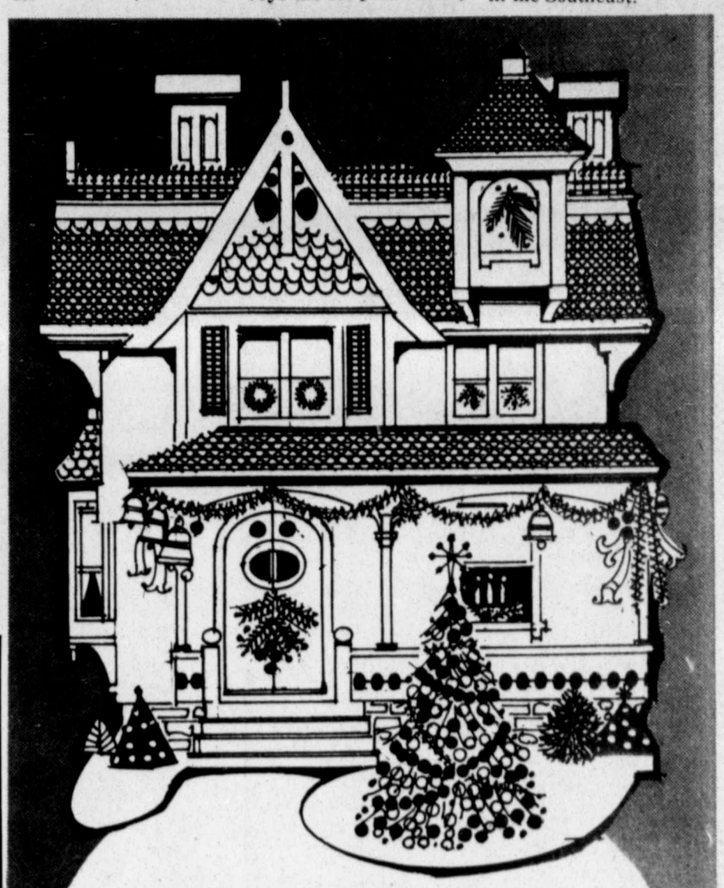

The staff of 16 editorial employees was told of the decision Friday morning. Viva said it would attempt to find them jobs in the parent organization, Penthouse International Ltd.

Photos exhibited in New Orleans

NEW ORLEANS (AP) — "Diverse Images," an exhibit of 400 photographs, will be on view at the New Orleans Museum of Art through Dec. 17.

The photos were selected from the museum's permanent collection, and over 230 photographers are represented in the show "which surveys the 140-year history of this art form."

The museum says it "began actively to collect photographs in early 1975 and now has the most extensive collection in the Southeast."

Country club plaza lights up for holidays

KANSAS CITY, Mo. (AP) — What looks like Seville, Spain, has 152,000 multi-colored Christmas lights and draws hundreds of thousands of visitors each year?

It's Kansas City's Country Club Plaza, with its half-century tradition of celebrating the Christmas seascn by outlining its Spanish architecture with a spectacle of lights and color. According to Plaza officials, this year's Christmas lighting will require almost 50 miles of electrical wiring throughout the nine-square-block Plaza shopping district.

The Christmas lighting began in 1925 with a single strand of lights above one shop's doorway, and Plaza spokeswoman Catherine Reynolds believes that it was one of the first outdoor Christmas lighting displays in America. She gives credit for the idea to the late Charles S. Pitrat, an executive of the J.C. Nichols Company, developers of the Country Club Plaza.

"The lighting was so popular that nearby residents began to place colored bulbs in front-yard trees and shrubbery — a practice that gradually spread to the entire nation," she said.

Select right pumpkins for cooking, growing

By EARL ARONSON
AP Newsfeatures

What do you do with all those pumpkins you raise, as a food crop, for Halloween, as a novelty, or just to determine whether you can get them to grow? The answer may lie in the type or variety of pumpkin you raise.

Helen and Emil Dandar of Langhorne Gables, Pa., know a lot about pumpkins. They've even written a "The Complete Pumpkin Cook Book," with more than 320 recipes you can make with fresh or canned pumpkin, including soups, breads, cakes, cookies, pies, muffins, puddings or main or side dishes. They have applied for record cookbook status in the Guinness Book of Records. They claim to have written the greatest number of recipes using the same single ingredient — pumpkin, of course.

But back to some basics about pumpkins. Many brand names are used for the same variety of pumpkin seeds. Example: Connecticut Field is also known as Big Tom and Jack O'Lantern by various seed companies. Connecticut Field and Sugar pumpkin are those commonly displayed at the roadstands in the fall.

The Sugar pumpkin generally weighs about six pounds and measures about six inches in diameter. Connecticut Field weighs from 15 to 30 pounds and grows about 18 inches in diame8ter The variety labeled Big Max can reach 100 pounds and measure up to 70 inches in diameter.

Sugar pumpkin is the sweetest and makes fine pies. Connecticut Field is excellent for Halloween carving and can be used for pies and canning. You can use Big Max for your local fair or just for boasting.

The Dandars, a husband and wife team, note that apple seeds and the apple tree itself were brought to America from England in 1628 by John Endicott of the Bay Colony Pilgrims.

Mr. and Mrs. J. D. McCaleb

McCalebs celebrate

Mr. and Mrs. J. D. McCaleb of 2710 Franklin Blvd. Saturday will celebrate their golden wedding anniversary with a party in their ome.

Hosting the event will be the couple's children. They are Mrs. Gladys Emmons ofLittleton, Colo.; Mrs. Charlcie Laws of Houston; Billy J. McCaleb of Port Neches; Mrs. Glenda Rhea of Midland; Mrs. Nona Tarver of Lubbock and James Gary McCaleb of Dallas.

The honorees were married Dec. 22, 1928 in Marlin. They lived in Reagan until July 1960 when they moved to Midland. McCaleb has been in custodial employ, while his wife has been in nursing field. Both are members of West Kentucky Baptist Church. He is a Woodman of the World.

Mrs. McCaleb is the former Jocie Mae Johnson.

The couple also has 16 grandchildren and three great-grandchildren.

Wright works to be shown in Chicago

CHICAGO (AP) — "The Decorative Designs of Frank Lloyd Wright" will be exhibited at the David and Alfred Smart Gallery of the University of Chicago Jan. 10 through Feb. 25, 1979.

The university says, "The exhibition documents Wright's concern for both design and arrangement of architectural ornament, furniture, windows, and decorative accessories from the late 19th century, when he began his architectural practice, until his death in 1959."

Seventy examples of these designs as well as a selection of Wright's graphic work wi l be on display.

Fat people die earlier than slim companions

By LEW SCARR
Copley News Service

Fat people die earlier than thin people from almost everything that kills man, except tuberculosis and suicide, says a University of California, Irvine, endocrinologist. "Fat people die before they should more frequently than thin people in ways you would never think about," Dr. Grant Gwinup said in an interview. "They die more often as pedestrian victims on the street because they are slower moving targets. They die more often from falls in the shower because of their awkward weight, and the list goes on." Gwinup said the only causes of death that claim more thin persons than fat ones are tuberculosis and suicide, and no one knows why. He said life insurance data and clinical studies support his claims. "There are hard data and clinical studies to show that the fat you are carrying around is actually killing you," he said.

And, according to Gwinup, almost everyone is obese. It is only a matter of degree.

He said 1978 standards ascribe the best quality of life to persons who have from 6 to 10 percent of their body weight in fat.

This is a rigid standard approached only by marathon runners and cross-country skiers. But he said it is a goal for everyone else to shoot for.

How do we get fat? According to Gwinup, only one way: By taking in more energy (stored in fat) than we expend.

Glandular problems rarely are significant causes, said Gwinup, an endocrinologist or specialist in glandular disorders. The only glands that contribute, he said, are the salivary glands.

Crash diets promising eight-pound weight losses in three days do nothing but take off pounds by dehydration and these pounds will come right back after body fluids are stabilized again.

"It is not possible," Gwinup said, "to have a diet that satisfies hunger and does not produce fat. We don't need college educations to eat balanced diets."

He said the brain's thalamus automatically tells how much of what to eat: 40 to 45 percent fat, 40 to 45 percent carbohydrates and 12 to 15 percent protein.

"If we change those proportions our hunger will not be satisfied. An unbalanced diet in any direction is the only way to lose weight by nutrition alone and anyone doing that must put up with hunger.

"Everyone wants to lose weight but no one wants to be hungry. You can't have it both ways."

Gwinup said it is a common myth that fat persons eat more than thin people. He said documented studies have shown, in fact, that thin people most often eat more than fat people.

"Apparently, fat people do not take in more food, but rather they expend less energy. People who are willing to exercise for the rest of their lives are few and far between, but that is the kind of program that is needed for most of us if we are to keep our fat under control.

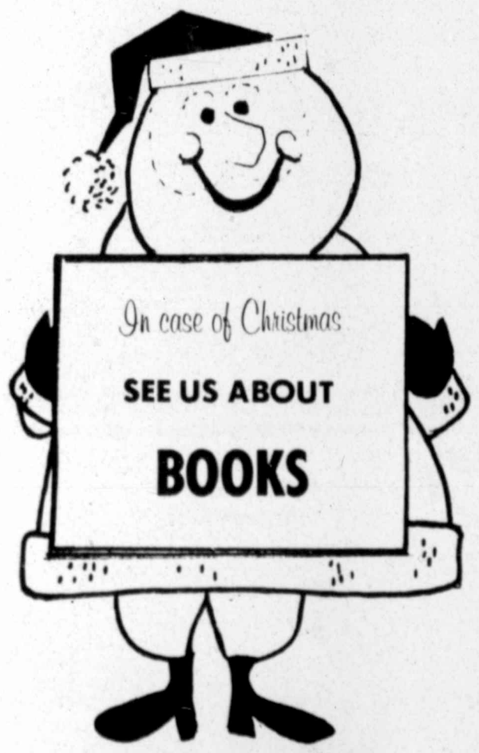

"This is what it takes. There are no drugs worth anything you can give for obesity," Gwinup said.

"You must make your patients aware of the grim realities. They are going to have to put up with hunger if they want to lose weight and keep it off, or they are going to have to get on some kind of aerobic exercise program for the rest of their lives."

But, he said, few who use dieting alone are successful.

"Very few people are successful at losing weight and maintaining proper weight if they don't get a lot of exercise," Gwinup said.

He said daily exercise lasting at least a half-hour is needed to influence weight loss at all. And no significant weight loss can be realized unless a person exercises vigorously from two to three hours a day, he said.

Couple marks anniversary with dinner

Mr. and Mrs. Bud Hanson of Garden City marked their 50th wedding anniversary with an anniversary dinner in Midland and a vacation trip.

They were married Nov. 3, 1928 in San Angelo. Lifelong residents of Garden City, they have been active in ranching, raising sheep, cattle and Appaloosa horses.

They have two sons, Leonard Hanson of Midland and Bruce Hanson of Big Spring; six grandchildren, and four great-grand children.

Mr. and Mrs. Bud Hanson

Mother's milk stimulates growth

By WARREN E. LEARY
AP Science Writer

WASHINGTON (AP) — Scientists have discovered a powerful substance in human breast milk that stimulates the growth and division of cells, but they don't know yet what its function might be in a baby's body.

Researchers at Harvard Medical School and Children's Hospital Medical Center in Boston say the breast milk factor is five times more powerful than similar growth factors found in the blood.

"There is something in milk — a protein — that stimulates the growth of cells, but we don't know which specific cells yet or how important it might be," Dr. Michael Klagsbrun said in a telephone interview Thursday.

"When we talk about growth in this case, we are not talking about the growth and development of the whole organism," he continued. "We are talking about the effect on certain tissues and cells and not the whole body."

In an article in the current issue of Proceedings of the National Academy of Sciences, Klagsbrun says the milk factor is in highest concentration immediately after birth. Early milk contains 15 times more growth factor than samples taken two months after delivery.

"It seems that the baby might need it more at the beginning and then perhaps its body takes over the function on its own." Klagsbrun said. "We know this happens in the case of some antibodies."

After finding the growth factor in human milk, the researchers looked for it in other mammals. Klagsbrun said similar chemicals were found in cow and sheep milk.

Klagsbrun said the chemicals, called polypeptides, were very similar in human and cow milk and probably served similar functions. But he said it was too early to tell if the human body could use the factor in cows' milk.

Referring to the current controversy over whether breast feeding is better for babies than bottle feeding, Klagsbrun said he could not comment one way or the other based on his work.

The report said that in the laboratory the human milk factor stimulated cell division and synthesis of DNA, the fundamental genetic component of life, in human lung cells and connective tissue cells called fibroblasts. The factor has yet to be tested on other cell types.

The milk factor was found to remain active in a relatively acid environment and to be resistant to certain enzymes and agents that break down similar chemicals in the body.

Because the factor therefore could survive in the digestive tract, two doctors at the medical center, David Tapper and Judah Folkman, speculate that it could play a role in stimulating the growth of the mucus lining of the tract or in preventing abnormalities in this membrane.

The physicians say the next step is to further purify the milk factor and study its mechanism of action. After that, they say, the factor may prove useful in treating newborn infants following surgery on the digestive tract.

Brandy handy in cooking, increases life expectancy

By TOM HOGE
AP Newsfeatures Writer

Did you ever hear of brandy increasing the life span? Some people in the French town of Cognac think it does.

It seems the equivalent of 25,000 bottles of cognac evaporates every year while aging in oak casks in this picturesque town in southwestern France. As a result, the citizens inhale a lot of pungent fumes.

Link this to the fact that a number of Cognac's inhabitants live to be a hundred years old or more and you can see where they got this bizarre theory.

Gerard Sturm, international director of the Cognac Bureau, doesn't make any longevity claims, but he believes his product does contribute to the good life, not only as a drink but as a cooking ingredient.

"There are more people cooking with cognac today than ever before," says Sturm, who has visited 80 countries checking on cognac sales.

"Time was when most cooks used cognac only for flaming a fancy dish," he said. "But today it is used as an ingredient in soups, stews and desserts, not to mention sauces and gravies."

This has boosted the sales of cognac over the past decade. Last year alone, 130 million bottles were sold.

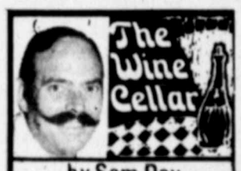

As a drink, cognac covers a much wider field than in the old days, when it was sipped almost exclusively after dinner from a snifter.

"Today," says Sturm, "lots of people take cognac as an aperitif with orange or lemon juice.

by Sam Day

Although French and American wines may have different names, they often have the same type of grape at their base. French wines are usually named for their vineyard and region in which they are grown, whereas American wines usually go by the vineyard name and type of grape. Some examples: what is known as a Pinot Noir in the United States would be known as a Red Burgundy from France. The wine from a Chardonnay grape would bear that name in the United States, while in France it would be labelled a white Burgundy. A Cabernet Sauvignon in the United States is from the grape by that name, as are the Bordeaux of France.

Watever the name, if it is a quality "spirit" and meets the discriminating taste of our customers then it will be found on the shelves at IMPERIAL LIQUORS, 3209 W. Wadley. Come over today and see Sam and his friendly moustache as you select the distilled spirit of your choice. Open 10a.m.-9p.m. Mon.-Sat. Tel. 694-4256.

HELPFUL HINT:

Pinot Noir is great with stews or meats served with rich sauces.

AT WIT'S END

Wrinkles have character?

By ERMA BOMBECK

The First Lady of Candidness has done it agains.

Betty Ford has done for facelifts what the YWCA did for belly-dancing. She has given it respectabilyt.

But, as I was telling my friend, Mayva, the other day, "What's so bad about wrinkles? My goodness, they're beautiful! They give you character and depth."

"I couldn't agree more," said Mayva. "Wrinkles are the jewels awarded surviors."

"That's beautiful, Mayva," I said, "but be fair! We're lucky. We haven't aged like our friends. I mean some of them look like an unpaved road."

"Don't I know it," said Mayva. "Florence uses that cream to erase bags under her eyes. The other day she erased her entire face."

"Oh Mayva," I laughed, wiping tears from my eyes, "I wouldn't belive we'd spend so many years togther, you look so young. Sometimes, I forget about your neck."

"What about my neck?" asked Mayva sobering up.

"You've said yourself every time you look into a mirror it reminds youto defrost the chicken."

"I never said that! At least I don't have laugh lines that I can plant winter wheat in."

"I'm not laughing," I said evenly.

"I can never tell," she said cooly.

"Mayva, at least my whole body isn't suffering from erosion."

"EROSION! I never thought I'd hear that from a woman who wore ponytails until she was 35 just to pull back the extra skin around her face.'

"I never did that!" I said defensively.

"You always told me my face was interesting," I said.

"I said the same thing about the Pyramids."

I'd consider taking a tuck here and there," I said.

"I know, I'd like to look like anyone's sister just once before I go. Incidentally, what happened to 'wrinkles are beautiful and create character and depth? The jewels that are awarded survivors'?"

"That's before we got them. Incidentally, I wonder what Betty Ford did with what she didn't want?"

GRAMMER-MURPHEY

Where there's smoke, there's ire

By GEORGE E. CONDON JR.
Copley News Service

Johnny Carson has been doing it on his show for 16 years. Tony Randall has been complaining about it for five years. Paul Loveday — with the help of a few million Californians — plans to do something about it.

Loveday, a San Francisco basketball player-turned-lawyer, plans to make Carson stop smoking in view of 15.3 million Americans each night on the Tonight Show.

Carson, of course, is not the main target of Loveday, the co-author of Proposition 5, but the television talk show host is among 5.5 million smokers in California whose daily lives would be noticeably altered by passage of the controversial "Clean Indoor Air" measure on the November ballot.

Just as Proposition 5 reaches into Carson's studio in Burbank, the anti-smoking initiative would be felt by factory workers, newspaper reporters, lawyers, retail clerks and all other workers in the state.

Workers who now smoke on the job — to the possible distress of non-smoking colleagues like Loveday — would find themselves segregated in designated smoking sections behind partitions or prohibited from smoking while working if the measure is approved.

It is a prospect that does not delight most smokers and downright terrifies those who earn their living by making, distributing or promoting cigarettes.

To demonstrate its strong feelings, the tobacco industry now seems headed toward spending more than $3 million in an effort to shift public opinion and defeat the measure that is threatening to become the most controversial and emotional of the ballot issues facing California voters in November.

Loveday, 34, a 1969 graduate of law school at Berkeley, said in a recent interview that he was bothered by some of his fellow students who refused to douse their cigarettes during exams.

"I had a couple of times when I lost my temper, and I never liked to lose my temper," he said. "I always feel terrible and kick myself."

An infuriated 6-foot-10 student usually wins such arguments.

When Loveday returned from a brief stint with the Baltimore Bullets and a year spent dribbling a basketball around Austria, he decided, however, that he needed more than his size to aid his fellow non-smokers.

"There are a number of other people who have the same reaction to smoke that I do," he said. "I decided that something needed to be done about this. I didn't want to get into situations again where I lost my temper, because that bothers me to death."

Proposition 5, however, has not brought peace to Loveday. Instead, he finds himself locked in a heated political contest in which he is trying to match his anti-smoking zeal and medical reports against a high-powered tobacco industry.

While Loveday marched into the battle with allies like the American Cancer Society, the Lung Association and the California Medical Association, the heavy hitters of the political world are aligned with the tobacco companies.

Almost daily, Californians for Common Sense, a group formed to fight Proposition 5, churns out bright goldenrod-colored press releases announcing new opponents of the measure.

The anti-5 group so far has enlisted the aid of 1974 Republican gubernatorial nominee Houston I. Flournoy and Democrat John F. Henning, the influential head of the state AFL-CIO — the two co-chairmen of the committee — and the heads of the Los Angeles Teamsters Union, the California Teachers Union in Los Angeles and various locals of the Carpenters union and the Building and Construction Trades Council.

In fighting what Loveday calls the "Clean Indoor Air Initiative," the opponents have essentially adhered to the theme struck in anti-5 commercials that have been liberally aired on television and radio since midsummer.

That theme — "They're at it again!" — is designed to make Californians feel that the proposition is filled with laughable absurdities, moves the heavy hand of government more oppressively into the daily routines of persons and is too costly to enforce and implement.

Against this barrage of advertising, Loveday has been trying to center the debate on questions of health and heavy contributions of the tobacco industry.

"Our whole campaign is based on the philosophy that you have a right to smoke and you have a right to breathe clean air," Loveday said. "In instances when those two rights clash, we believe that the right to breathe clean air supercedes the right to smoke.

"We're not taking away the right to smoke. We're creating smoking sections. Please don't smoke around us. Give us some smoke-free areas where we can breathe in peace."

Michael D. Meyers, a spokesman for Californians for Common Sense, said the anti-5 campaign has not taken an official stand on that philosophy because "essentially it's a constitutional issue."

"My personal view is I think it's presumptious and arrogant," he said in an interview. "I don't see how they can state that one person's rights supercede another's.

"How do you determine that a non-smoker's rights have been infringed? Is it simply at the sight of a burning cigarette, or is it in close quarters or what?

"These are phony issues in this whole thing. The real issue is, okay, there is a problem and how do you deal with that problem? The real problem is that some people are bothered by other people's smoke in close quarters."

Meyers dismisses Loveday's contention that "secondhand smoke" — the smoke exhaled by smokers or emitted by a burning cigarette resting in an ashtray — has been proven medically harmful to non-smokers.

"There are conflicting medical reports on that," he said. "You can get a clinical report to say anything you want."

Meyers' statement was challenged by Dr. Stan Glantz, assistant professor of medicine at University of California, San Francisco, Medical School.

In an interview, Glantz said: "The statement he made is ridiculous. It's true there's certainly a lot of junky research published in the medical community, but our very thorough review of all the literature certainly indicates that secondhand smoke causes some medical problems and exacerbates others.

"There's very good evidence that it aggravates people who are already sick and that it causes respiratory distress in children ... and it certainly produces short-term effects like making you nauseous and giving you headaches and your eyes blurring.

"I think anyone who says that the evidence indicates that there's no health effect to secondhand smoke either didn't know the evidence or, frankly, is an idiot."

To Glantz, health "is the real issue in this campaign."

To Meyers, however, that is a side issue. He said:

"Our campaign is essentially focusing on the initiative as written: The fact that it's too costly, its penalties are too extreme, it's discriminatory and it's an infringement on civil liberties.

"That's our campaign right there — those four points.

"What this initiative does is take away the right to smoke in public places and doles it back out piece-meal like in private offices and in certain concerts."

It is in the way that the amendment cites exceptions to the general prohibition to smoking that the opponents have made their biggest points, Meyers said.

Loveday specifically excluded bars, tobacco stores, hotel rooms, private one-person offices, taxicabs, sections of factories designated by the state, rock concerts, professional boxing matches, professional wrestling and roller derby and pool halls.

Loveday said the exclusions were based on his belief that enforcement of no-smoking laws would be impossible in such places, and he did not want to encourage disrespect for the law.

Artist's work on display

WASHINGTON (AP) — Works by 18th-century French artists Jean-Honore Fragonard and Hubert Robert will be on display at the National Gallery of Art through next Jan. 21.

The shows, "Drawings by Fragonard in North American Collections" and "Hubert Robert: Drawings and Watercolors," will be complemented by a third exhibit titled "French Printmaking in the Time of Fragonard and Robert."

1978 Revenue Act is explained

By ANDY LANG
AP Newsfeatures

Q. — I have read several interpretations of the new tax laws affecting the sales of homes by persons 55 years and older, but I have to admit that I am somewhat confused. As I understand it, the old law said that anyone 65 or over would not have to pay tax on the profit realized from a house that sold for $35,000 or less. I believe that sales price has now been raised to $100,000 and the age lowered 10 years. Yet I recently read that there would be no profit on the sale of a house even if it were sold for half a million dollars as long as the profit was $100,000 or less. It seems to me this is a horse of a different color or perhaps I should say a house of a different color. Am I right or am I getting dense in my old age?

A. — You aren't getting dense no matter how old you are. Since the law was signed the night before election day, I have heard discussions among tax experts as to the exact provisions of the Revenue Act of 1978. There were differences of opinion, too, so I did some research on the subject. First, let's start with the old law. Yes, it said that anyone 65 or older who sold a house would have to pay no tax on the profit realized from the first $35,000 of the sale. That meant that if you sold a house for $50,000, there would be a tax only on the profit from the amount over $35,000; that is, on $15,000. The new law, as far as I have been able to tell, says nothing about the sales price of a house sold by anyone 55 or older. It says such a person may exclude from gross income up to $100,000 of the GAINS realized from the sale of a principal residence. To put it another way, the sale price has nothing to do with the matter; the profit does. Of course, the seller must meet some other requirements besides age, so if you plan on selling a house, better check with the Bureau of Internal Revenue to see whether you fall into the right category. Another change in the law affects home sellers whatever their ages. Previously, you paid no tax on the profit from the sale of a house if you bought another house at the same or a higher price during a period of 18 months. While that provision still applies, an additional clause says that you can do this more than once in an 18-month period if you are relocating for employment reasons.

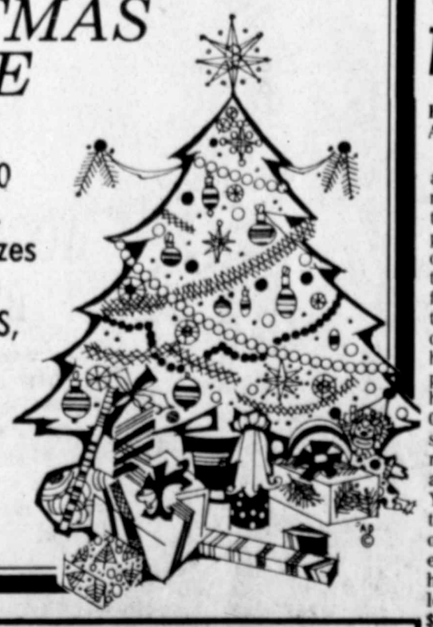

Q. —I need more humidity in my house, but do not want to have a central unit installed. Will one of the console models do for a five-room house?

A. — There are some large humidifiers on the market that will handle a number of rooms on one floor, depending on the square footage. To get the proper one, take the measurements of all the rooms to a dealer and see what his chart shows regaridng the coverage of different models. If the five rooms are on two floors, not very likely but possible, you will need one humidifier for each floor for best results.

Female professor blasts holes in macho myth

By RUDY MAXA
The Washington Post

WASHINGTON — "Everyone," says Dr. Estelle Ramey with a poker face, "has always known men are the weaker sex. Big and strong and boom!...They fall like oaks in the forest. Go to Florida, and there are all these blue-haired ladies running around and no men."

For some years now Ramey, 61, a professor of physiology and biophysics at Georgetown Univerity, has blasted holes in the myth of macho. Her first public salvo was in 1972, when Hubert Humphrey's former physician and political adviser, Dr. Edgar Berman, told a Demoratic task force that women's leadership capabilities were limited by their hormones.

When then Rep. Patsy Mink, D-Hawaii, protested, Berman labeled her a woman acting under "the raging hormonal imbalance of the periodic lunar cycle."

Enter Ramey, an endocrinologist who knows about hormones the way Hubert Humphrey knew about politics. With wit and medical data, she attacked Berman, becoming a public figure in the process.

She also grew more interested in the physiological differences between men and women. Why, she wondered, did tests with animals show females withstood stress better than males?

That curiosity led to research that might interest males who thought Ramey was some kind of rabid man-hater. For the past six years she and another Georgetown University researcher have been trying to learn how to increase the life span of males, who die an average 10 years earlier than women.

"I asked why the hell more research hadn't been done by males — who do the bulk of medical research — on why males die earlier, why males are less resistant to cardiovascular disease. I was told, 'Maybe we don't want to know.' Or — and here's science at work for you — I was asked if I wanted to castrate all males.

"We were dealing with a little conundrum," says Ramey. "The little woman who outlives men...the weaker sex that is so physically enduring."

Ramey's preliminary findings indicate that when male animals are treated with estrogen, or female sex hormones, they seem to recover fom such thigs as stress and blood-vessel damage faster. One common substance, aspirin, has been reported helpful in preventing a recurrence of strokes in men while offering no corresponding effect for females, which suggest females already have a stronger kind of internal protection than men.

At any rate, Ramey says her research points up the importance of finding out "how to protect men as they're growing up by using agents that don't interfere with the reproductive hormones." The result could be a male hormonal system more resistant to stress and other factors that lead to disease and death. Noble for a woman of science once called "the Mort Sahl of feminism."

Nonsense, says Ramey.

"Every feminist I know who is a mature woman wants at least **some** men to live. I want my grandson to live and my son, and I'm fond of the man I've lived with 38 years. There's emotional poverty in outliving your life's companion. Women desperately want their men to live. I will say I think the fact I want to go full-stream ahead in this is that as a woman I have no hangups about discovering weaknesses. As a woman, it's my interest in protecting and nurturing men.

"It's a funny kind of business, this war between the sexes," says Ramey, who argues that society should value the different perceptions each sex brings to the world. Instead, women, who are generally regarded as having better manual dexterity, for example, find themselves nudged toward needlepoint instead of neurosurgery.

"Nobody says, 'Who'd want to run a railroad that way?' Linguistics skills? That means she talks too much. Samuel Johnson was once asked who was superior, men or women. He said, 'Which man and which woman?' The biological differences aren't the real problem. We're dealing with an attitude.

"You perceive strength and weaknesses as it suits you. 'Women are gentle' but 'Hell hath no fury like a woman scorned.' 'Women aren't aggressive' but 'Have you ever seen women at a bargain basement sale?' 'Men are strong' yet 'They need a nest to come home to.' Well, it's double bookkeeping. We're much more alike than we are different."

"Everyone has always known men are the weaker sex. Big and strong and boom!...They fall like oaks in the forest. Go to Florida and there are all these blue-haired ladies running around and no men."

Found: A new sandwich filling

By CECILY BROWNSTONE
AP Food Editor

DEAR CECILY: A friend of mine and I opened a small lunchtime coffee shop where we serve sandwiches and desserts. Our customers seem satisfied with our desserts, but we feel we need to add an interesting new sandwich to our menu. Any suggestion? — RESTAURANT BEGINNER.

DEAR RESTAURANT BEGINNER: The delicious sandwich recipe I'm offering was devised by a sailing enthusiast who is also a fine cook. At racing time, when she feeds a crew of six, this specialty of hers is always devoured. The filling is not inexpensive, but it is certainly satisfying and interesting. To boot, these sandwiches may be made several hours before serving; they may also be frozen, then thawed as needed.

PAT CHRISTY'S SHRIMP SANDWICHES

1 pound fresh shrimp in the shell
3 tablespoons drained Major Grey chutney
3-ounce package cream cheese, soft
cup commercial sour cream
2 teaspoons curry powder
½ teaspoon ground ginger
16 slices firm-type white sandwich bread

Cook shrimp as directed below; shell and devein. Put shrimp and chutney through a food grinder (using the fine blade) or chop until very fine in a food processor or by hand with a chef's knife. Beat together the cream cheese, sour cream, curry powder and ginger until blended. Add the shrimp mixture and mix well. Spread about 4 tablespoons of the filling on each of 8 bread slices; top with remaining bread slices; cut each sandwich in half. Place each sandwich in a plastic sandwich bag, then reassemble sandwiches in a loaf shape and return to original bread wrapper or wrap with foil. Sandwiches may be prepared several hours ahead of serving and stored in the refrigerator. Or they may be frozen and thawed as needed. Makes 8 sandwiches (about 2 cups filling).

To Cook Shrimp: Bring 1 quart water with 1 teaspoon salt to a boil. Add shrimp and, if you like, a few lemon or onion slices. Bring to a boil again; simmer uncovered for 3 to 5 minutes or until shrimp are opaque inside — cut one and test it. Drain at once to prevent overcooking.

NOTE: If sandwiches are prepared in advance or frozen, be sure to butter both slices of bread to prevent the filling from soaking into the bread.

FTC defies judge

WASHINGTON (AP) — Despite a court setback, the Federal Trade Commission decided Friday to continue to consider regulating television commercials aimed at children.

The 3-0 vote came two weeks after U.S. District Judge Gerhard Gesell banned FTC Chairman Michael Pertschuk from the proceedings, saying there was evidence that Pertschuk had prejudged the issues in the rulemaking proceeding.

The FTC vote means the rulemaking will continue on schedule, with the deadline for public comment Nov. 24 and with hearings beginning Jan. 15 in San Francisco.

Neither Pertschuk nor Commissioner Robert Pitofsky participated in Friday's vote. Pitofsky had disqualified himself because he did legal work in the past for a group that is participating in the case.

The proposed government regulation raises the possibility of a ban on all commercials aimed at children under the age of 8, whom the FTC staff found to be too young to understand the selling purpose of the advertisements.

Another possibility is a requirement for industry-financed "corrective advertising" on such subjects as good nutrition — the idea being that these ads would balance commercials for cereals that are high in sugar content.

Cartoonist advertises her wish to be noticed

By CHARLES CHAMBERLAIN
Associated Press Writer

CHICAGO (AP) — Susan Collins wants to be a cartoonist, and to let the world know she has spent $7,000 to advertise her cartoon strip idea for two months on a huge billboard.

The rented billboard, 21 feet high and 66 feet long, is on busy Lake Shore Drive across from Soldier Field, home of the Chicago Bears.

The sign shows Ms. Collins' two cartoon characters — a divorcee and a bachelor neighbor — and tells the world "I Wanna Be Discovered."

"Cartooning is a powerful media and something I really want to get involved in," said Ms. Collins, 31, who is herself divorced. "But there is fierce competition in the profession. The only feedback I've had so far is from the news media. No one has inquired about syndicating it, and that is what I'm after.

"Getting an agent aroused is tough," she said. "But the public is starting to talk about the sign now."

Ms. Collins, a free-lance commercial artist, said she had to take out loans to rent the billboard from Triangle Sign Co. Inquiries about the cartoon must go through the company, since there is no identification or phone number on the sign.

"If anyone is really interested he will find out who is behind it," says Ms. Collins, who has a six-week backlog of her cartoon strip entitled "Once Removed."

She says she has been an avid follower of cartoons and newspaper funnies since she was a little girl and explains that her strip is about "two basic people communicating with each other — their ways of thinking; their thoughts of the day based on news events or experiences; their complaints, their philosophies, and their way of coping with them.

"There is a funny side to everything, and I try to make the end of each strip leave the reader with a smile," said Ms. Collins, who said she started drawing her cartoons two years ago after getting divorced. "I needed an outlet for my feelings and this seemed to be it."

AMERICAN GEM SOCIETY
THE SPECIAL EFFECTS DEPARTMENT

Gemstones have unique personalities. Some are subdued, others boast blazing colors, an still another group clamors for special attention. This last group is that of phenomenal gemstones which we began to discuss in my last article. Their interaction with light produces particularly eye-catching effects.

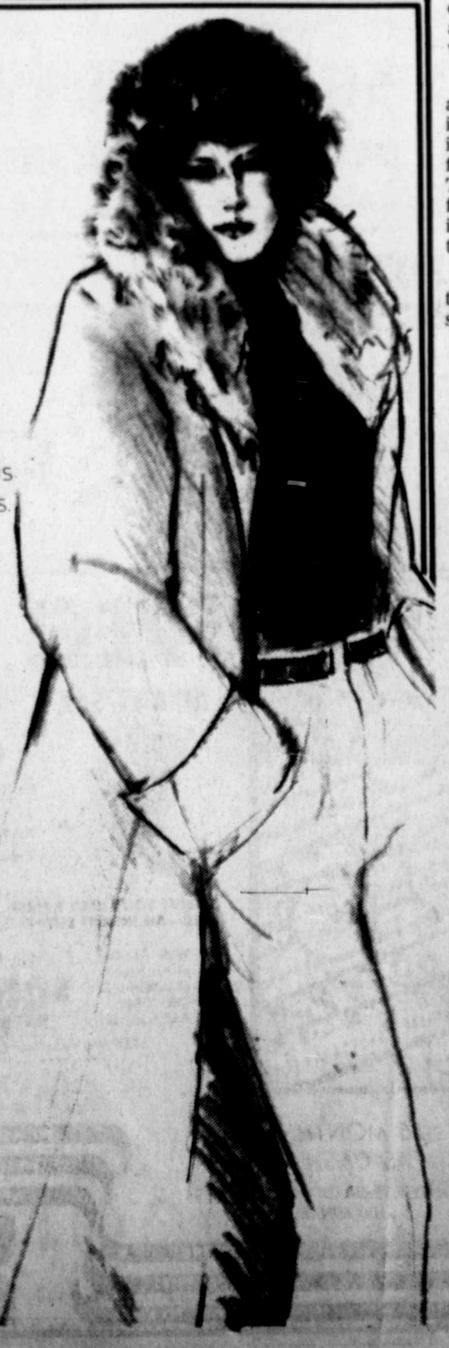

Light absorption is responsible for all color in gemstones just as it is for color in everything else. But in gemstones a particularly striking effect can occur -- change of color. The finest example is shown by the alexandrite. It changes from green in daylight to red in incadescent light. The stone has an equal ability to absorb the wavelengths that produce both these colors, so the predominance of ultraviolet or infrared light is the deciding factor.

Light interference produces the familiar play of color in opal, the flashes of iridescence in labradorite, and the swirls of color in fire agate. Opal is made up of small particles of silica, arranged so that they form a three-dimensional diffraction grating. The size of the particles, the voids between them and their interaction with different wavelenghts of light give rise to particular colors and patterns. Labradorescence and the fire agate effect are due to similar interactions with layers of plates or curved surfaces within the stone.

It took several years of study in the science of gemology before we earned membership in the American Gem Society. The Society stresses education as the finest consumer protection the concerned jeweler can provide.

Judith Ochler married to McGookey Saturday

Fredericksburg—Judith Gay Ochler, formerly of Midland, and Daniel Earl McGookey of Midland were wed in a double ring ceremony Saturday at 4 p.m. at the Zion Lutheran Church.

Parents of the bride are Mr. and Mrs. Alton R. Ochler of Fredericksburg. Parents of the bridegroom are Mr. and Mrs. Donald P. McGookey of Midland.

Officiating were the Rev. Ardene Wuthrich and the Rev. Clark Lennard.

The bride was given in marriage by her father. Attendants were Douglas McGookey, brother of the bridegroom from Austin, and Joy L. Ochler, twin sister of the bride from Fredericksburg. Bridesmaids were Dianna J. McGookey, sister of the bridegroom from Dallas, Donna J. Ochler, sister-in-law of the bride from Midland, Leslie G. Klinksiek, cousin of the bride from Fredericksburg, and Doreen E. McGookey, sister of the bridegroom from Midland.

Flower girl was Shelly Reaves and Scotty Reaves of Abilene.

Groomsmen were Gregg L. Ochler, brother of the bride from Midland, David P. McGookey, brother of the bridegroom from Austin, Donald G. McGookey, brother of the bridegroom from Midland, and Ben A. Culpepper of Austin.

Ushers were Reagan Rowe of Houston and Lee Otis Taylor of Austin.

Organist was Cindy Olfers and soloist was McGookey, father of the bridegroom.

The bride wore a formal white gown of Quiana knit fashioned with a high empire bodice and featuring a Queen Anne neckline and waistline accented with scalloped satin Venice lace. The waltz-length mantilla was embroidered with a lace covered scalloped-edged cap. Her bouquet was of roses, stephanotis, baby's breath and ivy carried on a white Bible presented to the bride by the bridegroom's parents.

Reception was held at the Pioneer Pavilion at Lady Bird Johnson Municipal Park.

Following a wedding trip to Hawaii, the couple will reside at 1506 Delmar in Midland.

Mrs. Daniel E. McGookey

Tammy Smith, Walker pledge vows

Tammy Lynn Smith of Colorado Springs, Colo. and Toby D. Walker, 415 W. Scharbauer, pledged wedding vows at 7 p.m. Tuesday in Temple Baptist Church. The Rev. Curtis Hollis officiated at the double ring ceremony.

Their parents are Senior Master Sgt. and Mrs. Joe W. Smith of the Air Force Academy, Colorado Springs, and Mr. and Mrs. Milford Walker, 1107 S. Connell St.

The bride was attended by Patty DuBose of Boulder, Colo., Leslie Webber of Colorado Springs and her twin sister, Pamela Smith of Colorado Springs. Ernest L. Gibson of 4401 Cardinal Lane was best man for the bridegroom. Groomsmen included Johnny Walker of San Angelo and Michael Smith of Colorado Springs and David Fobes of Pueblo, Colo. was usher.

Music was provided by Mrs. Judy Swails, organist, and Mrs. Dixie Bagwell, soloist.

Presented in marriage by her father, the bride wore a floor length gown of nylon knit with lace on the neck and sleeves. She carried a bouquet of pastel silk flowers in green, peach and blue.

A reception was held at the home of the bridegroom's parents.

A graduate of the Air Force Academy High School and a former student at the University of Colorado and Cragmore College, the bride is employed by Speedy Pac grocery stores. Her husband, a graduate of St. Mary's High School in Colorado Springs and a former student at El Paso Community College, is manager of a Speedy Pac store.

Last chapter in life was writing best-seller

By CAROL DEEGAN

NEW YORK (AP) — At the age of 18, Linda Palmer Weintraub headed for New York City "to have an interesting life." Now, at 38, she's a successful photographer and writer, author of a new novel, "Runaways."

"I've always felt that you can do whatever you want to do, you just have to have the courage to go out and try," she said. "Life is full of risks, but the greatest risk of all by far is ending up at the age of 40 with maybe 25 or 30 years of life left and have it all seem empty. That would be horrible to me.

"When I was a teen-ager, I thought, 'This is my life, and I'm going to have an interesting life, whatever that is.' I didn't know what it held out there, I just was going to go out and find out.

"I moved to New York as an 18-year-old, had $500 in the world, two years of college, didn't know a soul, had no one to call, no letters of introduction, a family that couldn't afford to help me if anything happened to me. I had to be a success," she said.

Ms. Weintraub had her own television show when she was 15. Three years later, she moved from West Palm Beach, Fla., to New York City. When she was 19, she received her first commercial assignment to take photographs of an African safari. She toured East Africa on and off for almost three years, working in Tanzania, Kenya and Uganda. She taught herself Swahili and how to cope with an attack by a 170-pound lioness, among other things.

"I've had very difficult times. I've been down to not having bus fare, all kinds of things," she said. "But people do, you survive somehow, and you make it to that next pay check, you make it to that next assignment. It all adds to the picture puzzle that is all of us, a piece here, a piece there, and it makes the colors more vivid, I think, than for the people who didn't leave their hometowns."

Part of Ms. Weintraub's "picture puzzle" includes falling into the Nile River while on a photography assignment in Egypt and contracting malaria while on another assignment in Uganda.

She also studied the martial arts with Bruce Lee, learning to break boards with her feet.

"The more gifts you're given, the more responsibility you have to use them to the fullest," she said. "And to appreciate them. To appreciate being alive. To appreciate that you're not languishing in some terrible political prison, that you're not in the Indian caste system, that you're not in some country where you can't leave without government permission."

Ms. Weintraub moved to Hollywood in the 1960s. She was first married to Warner Brothers Chairman Ted Ashley and then to film producer Sy Weintraub, from whom she is now separated. She continued her interest in photography but also became interested in writing.

"I learned to write with a camera," she said.

Ms. Weintraub contributed stories to major magazines, as well as to the top-rated television series, "Family." Then, she decided to write her first novel. "Runaways" is the story of three young people whose destinies collide in Hollywood.

Ms. Weintraub did eight months of research for her novel. She read books and Senate Committee transcripts. She interviewed inmates and law officers of juvenile detention centers.

"I was horrified to learn that for a crime as petty as truancy, a child can be locked up for an indeterminate sentence, while a murderer is given a specific amount of time to serve," she said.

Ms. Weintraub is now at work on her second novel, and has plans for a third book, based on the years she lived in Africa as a wildlife photographer. Then, she might write a sequel to "Runaways."

"Writing is what I want to do more than anything else," she said. "Everything in my life before seems to have worked up to this. With photography you can only go so far in capturing what I want to capture, which is moments of time, real experience in the loosest sense of the word.

"I want to share an experience with someone. I can do it to a limited extent with a photograph. I can do it to a much greater extent with a book and a character.-And that's what I want to do now."

Joggers clog down streets

LOS ALTO HILLS, Calif. (AP) — Joggers are running town officials ragged.

Weekly "fun runs" involving hundreds of joggers are clogging the narrow streets of this San Francisco-area community, and the town council Wednesday accused the runners of "flagrant misuse and abuse" of the thoroughfares.

"The council will consider issuing future permits to them, but based on past performance, it's doubtful that they will get any more," Town Manager Bob Crowe said Thursday.

The council voted 5-0 to send a letter to Bob Anderson, publisher of "Runner's World," which sponsors the fun runs, to protest the undisciplined way the event is conducted.

Dexterity researched

LINCOLN, Neb. (AP) — Eight women will enter a special cold chamber and use tweezers to grab tiny objects for up to an hour, as part of a research project on the manual dexterity of women.

"As more and more females participate in the work force and are therefore active in a cold environment, more guidelines and standards of performance will be needed," said Mike Riley, professor of industrial engineering at the University of Nebraska.

The performance of men in cold temperatures has already been tested, he said, but little research has been done on women.

"Some physiological characteristics have tended to say women should be better and other characteristics say they should not do so well," Riley said.

The experiments, to be conducted by Riley and fellow professor David Cochran, will take place in the new environmental chamber at the university's engineering center in Lincoln. Temperatures in the chamber can be varied from 32 degrees to 150 degrees Fahrenheit.

No additives makes good bread

By CECILY BROWNSTONE
AP Food Editor

Whenever I come on a remarkably good recipe, one better than others of its kind I have tried, I like to ferret out the story behind it. This time around, the special recipe is for four marvelous loaves of bread with a "soul" of their own. Their base is unbleached white flour, but the inclusion of other grains produces a flavor and texture hard to come by.

MARY BAREFOOT'S NINE-DAY COLE SLAW

3-pound head cabbage, thinly shredded
1 medium green pepper, finely chopped
2 medium onions, finely chopped
1 cup plus 2 tablespoons sugar
1 cup salad oil
1 cup cider vinegar
1 tablespoon celery seed
1 tablespoon salt

Stir together the cabbage, onion, green pepper and the 1 cup sugar. Bring to a boil the salad oil, vinegar, celery seed, salt and the 2 tablespoons sugar; immediately pour this hot mixture over the cabbage mixture. Chill overnight before serving. Keep stored in the refrigerator. Makes about 2½ quarts.

Similar to the recipe made popular by the old Fred Harvey railroad restaurants.

Texas A&M develops 'electro-tender' beef

CORPUS CHRISTI, Texas (AP) — Sending high voltage shocks through the carcasses of freshly slaughtered cattle may not be an appetizing thought, but officials of Sam Kane Beef Processors, Inc., say it makes for much better steaks.

It is a new process developed by Texas A&M researchers, and scientists say it makes meat much more tender and reduces the cold storage time — thus saving energy.

The technique went into effect for first time this week at the Kane plant, where manager Jerry Kane says it makes beef 30 percent more tender.

Kane said the technique, which was developed by an A&M study that began two years ago, is so far used by only three other meet processers in the country.

Full scale production started last week when $30,000 worth of new equipment was installed. After the beef is slaughtered and skinned, the carcasses are moved by conveyer through an enclosed chamber where they rub against electric-charged bars.

Dr. Jeffrey W. Savell, Texas A&M meat specialist, said electrical stimulation allows enzymes already in the meet to break down muscle tissues. Those enzymes normally don't work until the meat has been in cold storage for several days, he said.

Kane and Savell said grocery shoppers shouldn't expect electro-tenderized beef to look different in meat counters.

Couples announce engagements

PEARCE-MOREHEAD

Mr. and Mrs. Gary B. Pearce, Route 4, announce the engagement of their daughter, Rhonda Kaye of Hurst, to Larry Joseph Morehead of Euless. He is the son of Elwyn H. Morehead of Euless and Eleanor Morehead of Irving.

The wedding is planned for 3 p.m. Jan. 6 at the home of the future bride's parents.

Miss Pearce is a dental hygiene student at Tarrant County Junior College in Hurst. Her fiance attended TCJC and is operations agent with Southwest Airlines in Dallas.

HOLDER-LONG

Mr. and Mrs. Lynn T. Holder of 1212 Humble announce the engagement of their daughter, Lynda Kay, to Jimmie Wayne Long, son of Mr. and Mrs. Donald B. Long of Big Spring.

The wedding will be held at 7 p.m. Jan. 5 in the Trinity Baptist Church at Big Spring.

The bride-elect and her fiance are both attending Coahoma High School.

RUSTECKA-COFFIELD

FARNBOROUGH, England — Mr. and Mrs. Zdzislaw Rustecki, of Farnborough, Hampshire, England, announce the engagement of their daughter, Teresa Marya Rustecka, to Conrad Eugene Coffield, Jr., son of Mr. and Mrs. Conrad E. Coffield, of 2813 W. Dengar.

The wedding will be held at 4 p.m. Dec. 30 at St. Ann's Catholic Church in Midland. The bride-elect is a graduate of Salesian School in Chertsney Surrey, England, and also of Ealing Technical College in London, England, where she received a higher national diploma in business studies. She has been a stewardess with Gulf Air Bahrain. Her fiance is a graduate of Lee High School and attended Washington & Lee University, The University of Texas and Old Dominion College. He is a member of Pi Kappa Phi fraternity and is currently in the U.S. Navy.

SCOTT-WILLIAMS

Mr. and Mrs. George D. Scott, 1209 W. Tennessee Ave., announce the engagement of their daughter, Debra Frances, to John Thomas Williams. He is the son of Mr. and Mrs. C. L. "Bill" Williams of 2211 Seaboard Ave.

The wedding is planned for 3 p.m. Dec. 16 in Trinity Presbyterian Church.

The bride-elect attends Midland High School where she is a member of the National Honor Society. She is employed by Bonanza. Her fiance, who was graduated from Midland High and is a member of Pi Kappa Alpha fraternity, is self-employed.

JARNAGIN-VATANKHAH

Mr. and Mrs. Floyd T. Jarnagin of 2603 W. Wadley Ave. announce the engagement of their daughter, Valerie, to Hamid Vatankhah, son of Mr. and Mrs. Mohammad Ali Vatankhah of Ahwaz, Khozetan, Iran.

The wedding will be held at 7:30 p.m. Dec. 2 at the Grace Lutheran Church.

A graduate of Midland High School, the bride-elect attended Midland College. She is employed with Sipes, Williamson, Aycock, Inc. Her fiance is a graduate of Ahwaz, Khozetan, Iran High School. He attended Beeville County Junior College and is currently attending Midland College.

CLUB NEWS

MIDLAND GARDEN CLUB

Midland Garden Club executive board met Thursday in the home of Mrs. Robert Patteson, president.

Members voted to hold a Food and Plant Sale in March in the home of Mrs. Ellison Tom, 2009 Neely St. Mrs. Ike Hynd is Ways and Means chairman.

The group also voted to honor Mrs. A.P. Shirey, local member, for her Texas Golden Garden award which is the 50th anniversary project of Texas Garden Clubs Inc. Mrs. Shirey was Midland Garden Club's first president in 1941-42 and again in 1976-77. She is also a life member of Texas Garden Clubs Inc., a national master flower show judge, a landscape design critic and horticulture instructor for National Council of Garden Clubs. She has also presented many programs and directed workshops for garden clubs locally and throughout the statey.

The group made plans for the Dec. 7 Christmas party to be held in the home of Mrs. Louis Bartha, 905 Bedford St.

PERENNIAL GARDEN CLUB

The Perennial Garden Club met Tuesday night at the home of Mrs. Nita Stovall at 1604 Bedford Ave.

Maria Spencer, president, presided for a brief business meeting. She reported on the Lancaster dwarf evergreen shrubs plot at Lancaster Garden Center the club sponsors. Mrs. Stovall showed members the new patio just completed at her home.

Mrs. Faye Ashmore will host the gift exchange and Christmas party Dec. 5 at her home at 808 W. Tenn. Ave.

Christmas decorations and arrangements were displayed by each member and some were from foreign countries where various members had been during the past year.

Mrs. Hazel Ethridge was recognized and welcomed as a new member.

Fourth: Mrs. H. H. Miller and Mrs. R. L. McCarroll
Fifth: Mrs. Charles Dellenback and Mrs. J. L. Fortin
(No game next Friday.)

Big Bird to solve mystery

NEW YORK (AP) — The mystery of how a rotund Santa gets down a skinny chimney may be solved this Christmas Eve by the residents of the country's famous imaginary thoroughfare, "Sesame Street."

With the help of his friends, Big Bird attempts to uncover the secret on a special holiday TV program sponsored by the Children's Television Workshop for the nation's public broadcasting stations.

The huge yellow bird meets with opposition from the disbelieving Oscar the Grouch, but is encouraged by Kermit the Frog, who tries to help out by interviewing children to see if they can explain how Santa delivers his presents.

Delia Paiz, Carruth pledge wedding vows

Delia Holquin Paiz and Ronald Wayne Carruth of Midland exchanged wedding vows at 10 a.m. Saturday in Our Lady of Guadalupe Church. Father Charles J. Hassenauer, OMI, officiated the double ring ceremony.

Parents of the couple are Mr. and Mrs. Joe L. Paiz of 303 E. Wadley and Mr. and Mrs. Theron Walker of Hobbs, N.M.

The bride was attended by her sister, Anna Marie Holquin Paiz of San Marcos as matron of honor and Renee Carruth of Hobbs as maid of honor. Flower girls and escorts included the bride's sister, Corina Paiz, with the bride's brother, Joe Henry Paiz, and Marlo Brackens with Mark Brackens. Ring bearers were Michelle Heredia and Robert Paiz.

Damas and escorts included the bride's sister, Alice Paiz, and LeRoy Avila; Irene Estrada and Jerry Lopez, and the bridegroom's sisters, Katheryn and Kristen Carruth. Train carriers were Linda Laing and Adam Ramos. Bridesmaids and escorts were Lucie Paiz, the bride's sister, and Joe Louis Valles; Diana Paiz, the bride's sister-in-law, and Joe Paiz Jr., the bride's brother; Julie Mancha; Mrs. Elena Heredia, the bride's aunt, and Juan Heredia, the bride's uncle; Margaret Cortez and Joe Garcia; Rosemary Ocho and Melton Olqin; Gracie Fuentes and Jimmy Avila; Mrs. Erma Rhodes and Harlin Rhodes; Mrs. Magie Holquin, the bride's aunt, and Author Holquin, the bride's uncle.

Monte and Charles Carruth, the bridegroom's brothers, both of Hobbs, were best men.

Music was provided by Henneita Ferro, organist.

Given in marriage by her father, the bride wore a gown of snow white organza with cathedral train. She carried a bouquet of asares and red roses with baby's breath.

A reception was given in the Parish Hall of Our Lady of Guadalupe.

Following a wedding trip to Cloud Croft, N.M., the couple will reside in Midland.

Both graduates of Lee High School, the bride is employed by Texan Drive In and the bridegroom is an employee of Midland Truck Equipment.

Mrs. Ronald Wayne Carruth

Mrs. David Harrison Pace

El Paso church setting for wedding ceremony

EL PASO—Rhonda Lee Robins and David Harrison Pace, both of Odessa, were married in a candlelight service at 7 p.m. Saturday in Western Hills Methodist Church. The Rev. Robert W. Brooks officiated the double ring ceremony.

The bride is the daughter of Mrs. Foye C. Robins of El Paso and the late Maj. Robins (ret.). Parents of the bridegroom are Mr. and Mrs. Harrison W. Pace of 3403 Boyd Ave. in Midland.

Attendants for the bride included her sister, Rita Robins of El Paso; the bridegroom's sister, Debbie Pace of Arlington; Billie Nixon of Poth, and Mrs. Terry D. Gentry of El Paso. Chris Dunn of Odessa was best man for the bridegroom. Groomsmen included David Hood of Corpus Christi, Steve Perry of Midland and John Farris of Lubbock. Ushers were J.D. Fulton of El Paso and William P. Ofield of Midland. Joel Brooks and Bryan Brooks, both of Odessa, were candlelighters.

Music was provided by Susan Coles, organist, and Michael Dunn of Odessa, soloist.

Given in marriage by her brother, Richard C. Robins, the bride wore a floor length white chiffon satin gown with mandarin neckline and an empire bodice appliqued with guipure lace and seed pearls. She carried a bouquet of five butterfly orchids with sonia buds, wheat and pheasant feathers.

A reception followed the service at Fort Bliss Officer's Club.

After a wedding trip to Santa Fe, N.M. and Aspen, Colo., the couple will reside in Odessa.

Blood pressure attacked

DALLAS (AP) — Scientists have isolated an elusive chemical from the human kidney in a breakthrough promising a potent new weapon to attack high blood pressure, which threatens about 34 million Americans.

Medical teams at two universities announced Thursday they have extracted and purified a human enzyme called renin, produced by the kidney in minute quantities, but which has a crucial role in many cases of high blood pressure, or hypertension.

High blood pressure can lead to stroke, heart failure, kidney failure and other medical problems, but its cause remains a virtual mystery.

With isolation of renin, however, researchers now can begin to "understand what the enzyme looks like and how it behaves," said Dr. Eve Elizabeth Slater of Massachusetts General Hospital.

It provides an invaluable tool for discovering the causes of high blood pressure and how it progresses, she said, adding it may eventually permit identification of potential victims so the disease can be prevented.

"I'm sure that hypertension will turn out to be a whole spectrum of diseases with a host of causes," Ms. Slater said.

The purification was accomplished independently by Ms. Slater and co-workers at the Boston hospital and by a group led by Hideyoshi Yokosawa at Vanderbilt University in Tennessee. Both teams described their work at the American Heart Association's annual scientific session here.

Renin is quickly converted — through a series of biochemical steps in the blood — into a new substance that constricts blood vessels and raises blood pressure.

DEAR ABBY

'Sunday saints' count

By ABIGAIL VAN BUREN

DEAR ABBY: I am studying for the ministry. My father (now deceased) was also a minister.

Some years ago my father read a letter from the pulpit that he had clipped from your column. I was a very young boy then, but I recall that it made a big impression on me.

It had to do with a 13-year-old boy who didn't want to go to church with a bunch of hypocrites.

Can you find it and run it again? Thank you.—DAILY READER

DEAR READER: Is this it?

DEAR ABBY: I am a 13-year-old, and my parents force me to go to church every Sunday.

I hate going to church because I see people there who I know are drunkards, gossips, liars and cheats, and they are right there every Sunday saying their prayers and singing the hymns. I don't have any respect for hyprocrites and our church is full of them, my own parents included.

I am only 13, so maybe my opinion doesn't count, but I don't see any sense in my going to church with a bunch of hypocrites.—ONLY A BOY

DEAR ONLY: Christ became a man at 13, and you are not too young to become a man either. One goes to church to learn about the Bible and the word of the Lord, although God dwells in one's heart, and it's not necessary to go to church to communicate with Him. And as for the hypocrites you see in church—what better place is there for them to be?

A church is not a museum for saints. It's a hospital for sinners.

DEAR ABBY: I'm a telephone operator for a rather large and busy company. We have two nice young fellows who do a good job. But they could do better if their wives would quit calling them at work so much.

I can understand emergency calls, but these wives call up to say, "We got a letter from your mother—should I read it to you?" Or, "Guess what the baby said today?"

Abby, I know both these wives and I wouldn't hurt their feelings for the world, and I certainly wouldn't say anything to their husbands, but if you print this, they may get the hint. Besides, it's not fair to call a person at work to just gab about nothing on company time.—VERMONT READER

DEAR READER: Your point is well taken. And may I add that when a man comes home from work and asks his wife, "What's new?" it gives them something to talk about.

DEAR ABBY: When a lady comes to your table at a restaurant and is offered a chair but refuses, saying she is going to stay only a minute, then stands there talking, how long should a gentleman remain standing?—R' R. R. in S.F.

DEAR R. R. R.: Two minutes. If she's still standing and talking, sit down. She's no lady.

If you need help in writing letters of sympathy, congratulations or thank-you notes, get Abby's booklet "How to Write Letters for All Occasions." Send $1 and a long, stamped (28 cents) envelope to Abby: 132 Lasky Drive, Beverly Hills, Calif. 90212.

Working wives not aided much around house by husbands

By ELAINE Q. BARROW
AP Newsfeatures

Housework has become a unisex labor — theoretically.

In practice, it's a different story, says an expert in home management.

"Studies show that men married to working wives are doing less of it than we supposed," says Virginia Habeeb, author and home economist.

A university study has found, she says, that the so-called non-liberated woman is getting more help from her mate than the wife whose time is constricted by a job outside the home.

Figures show that husbands of full-time homemakers spend about one and a quarter hours each day helping their wives. But husbands whose wives bring in a dollar from outside employment pitch in only about 36 minutes a day.

While the typical hausfrau averages 40 hours a week at housework, Ms. Habeeb says, statistics show working women spend 26 hours a week at it, in addition to their 36 to 40 hours devoted to the salaried job.

This topsy-turvy situation probably indicates, according to Ms. Habeeb, that employed women organize their time better as well as simplify home tasks. But it must also reflect the fact, she adds, that most employed homemakers have fewer children underfoot, especially smaller children.

These and other considerations of efficiency were explored in a recent talk by Ms. Habeeb on cleaning methods. She told the group:

"Managing a home is the art of juggling. With continually changing priorities, you juggle people, activities and clutter (often chaos). Finding an easier way to gain more time for yourself is more than a right. It's the major goal."

It's basic to decide first what type of housekeeper you are. Values vary as do standards of cleanliness. It's your decision.

Ms. Habeeb recommends rating one's self on a scale she calls the "Homemakers' Barometer." She explains she had taken an unofficial poll of homemakers who graded themselves on a scale of 100 as a median, ranging from 25 percent to 200 percent — the peak, of course, being the perfectionist who "spends hours, regardless of priority."

Rated at 150 percent was the compulsive person who constantly cleans, cooks and sews, and doesn't have much time for outside activities.

Descending along the scale are the organizer who can't function without a list, the "take-it-as-it-comes" cleaner who cleans when necessary, and the "lick-and-promise" person who takes too many shortcuts. At the bottom, at 25 percent, is the self-acknowledged "slob" who couldn't care less.

Of all the women she interviewed, she said, seven out of 10 fitted into either the "organizer" or "take-it-as-it-comes" categories. The "organizer" is usually the working woman holding down two major jobs — one at home and one outside.

Emphasizing this point, Ms. Habeeb said "no matter what category, the first essential is to get organized. Decide your priorities. Make schedules. Then, get busy.

"Best of all, run your home like a business."

She favors conducting your personal time-and-motion studies. Wear a pedometer and find out how many steps you take and how many of them are really necessary.

Applying a business-like assessment, don't budget more time than necessary for doing routine cleaning. Studies show that a child's room should be cleaned in 15 to 20 minutes, a kitchen in 45 minutes, a bathroom in 30 minutes.

As you move from one room to another, carry your equipment with you in a step-saving basket containing cloths, whisk brooms, glass cleanser, all-purpose scouring powder, sponges and other items.

Separate household activities into four segments: Daily (requiring a quick run-through), weekly, monthly and seasonal. You can reduce clutter considerably if you toss into the garbage any piece of furniture or garment you have not used in two years. Make it a rule.

The distasteful chores are rated by the survey, too. The most tiresome from the woman's view is cleaning the oven. Next, cleaning a bathroom.

"The most interesting discovery," Spraggins says, "was that mildew is a major problem in all parts of the country — dry or humid — in locales as different as Arizona and Westchester County, New York."

But to many housewives, the most interesting revelation was no revelation at all. In Ms. Habeeb's words:

"Even if it is a liberated household, a woman is still primarily responsible for keeping up the house."

Scientist develops male fertility test

HONOLULU (AP) — A biochemist at the University of Hawaii has developed a male fertility test in which human sperm fertilize hamster eggs in the laboratory.

The test takes just 24 hours, requires no elaborate equipment and could be available for clinical use in about a year, said Dr. Jane Rogers, assistant professor in the obstetrics and gynecology department of the University's School of Medicine.

The hamster method, she said, is the first test for the male involving actual fertilization of an egg. The fertilized egg will not develop beyond the two-cell stage because the chromosomes of the species are incompatible.

Sperm tests could have been conducted on human eggs in the laboratory, but such experiments would raise moral questions of creating test-tube babies, she added.

Unique view of British farm life

BEASTS AND BABIES. By David Creaton. St. Martin's. 240 Pages. $8.95.

What a poor title for such a nice book! "Beasts and Babies" conjures up an image of some sort of horror tale and nothing could be farther from the truth.

This is a unique view of life on a British farm, unique in that the author has a gentle but deep affection for the farm and also has the ability to describe that affection in a highly readable style.

"Farm" means far more to the author than a simple collection of buildings and animals. It is the whole inter-relationship of the farm family, community, animals, seasons, problems, achievements, minor and major events, etc.

David Creaton has a special talent for seeing deeply into ordinary, everyday occurrences and putting them in a new perspective. He can create a permanent and treasured memory by writing about something the reader had seen before, but never really noticed.

For example, as his preschool son began to venture into the barnyard, he discovered the enthusiastic response he could get by feeding the chickens. Creaton described the joy experienced by the boy during the frenzy of the feeding, but he also wrote about how his son began to punish the aggressive chickens who, in typical bully fashion, tried to get all the feed. The boy would tie them up until the weaker had eaten. Unfortunately for the aggressors, the boy sometimes forgot to untie them and Creaton would occasionally have to pause in his usual chores to free some starving chickens.

Creaton's skill in sharing such simple adventures is exceptional, giving readers a comforting treat comparable to wearing a warm sweater on a cool fall day.

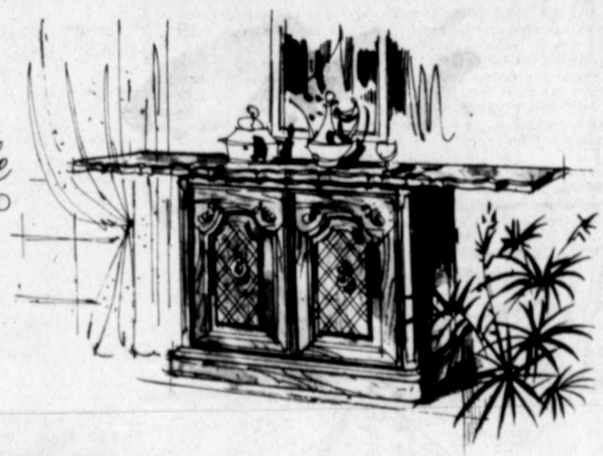

Check vine leaves for insects

If your potato vines turned brown early and died, potato leafhoppers (hopperburn) may be the cause. Snapbeans and eggplant also may suffer from the leafhopper. The immature insects feed on the leaves, injecting a toxin that kills the leaves. Check the underside of leaves for small, wedge-shaped insects that run sideways or backwards when disturbed and treat with insecticide.

Thomasville
NATIONALLY ADVERTISED

Camille
by
Thomasville

Thomasville now brings new life to its popular Louis XV furniture collection. All the charm, grace and splendor of this historically significant period in furnishings are brought to this interpretation of court style French furniture. Graceful serpentine fronts of cases, richly carved cabriole legs, and door moldings with floral detailing and delicately-shaped drawer moldings are handsome design embellishments which give this collection its distinctive custom look. Fine craftsmanship is seen in the artful selection of figured pecan veneers, pecan solids and wood products. Parquetry veneer work of African mahogany is featured throughout the collection. New dining room pieces include a double pedestal table with beautiful olive ash burl parquetry treatment. A new custom finish, a mellow fruitwood tone, is hand-rubbed to a sparkling patina. Camille offers a variety of sizes to permit perfect scaling for today's apartments and condominiums as well as more grandly proportioned homes. This collection reflects French styling with tasteful detailing and "that Thomasville look."

HOROSCOPE

By CARROLL RIGHTER

(Sun., Nov. 19)

GENERAL TENDENCIES: Don't allow yourself the luxury of feeling put upon or being a martyr as everyone is being tested as to his or her ability to solve annoying problems. Use constraint and control not to show annoyance.

ARIES (Mar. 21 to Apr. 19) Conditions at home are not to your liking, so quietly see how to improve them. Not a good day for socializing.

TAURUS (Apr. 20 to May 20) Use particular care in travel. Do not be overly sensitive to what others say or you get into serious arguments. Hit upon the right philosophy to follow in the future.

GEMINI (May 21 to June 21) You think that money will best solve any problems you have, but this is not the case. Try not to be extravagant and you win the game.

MOON CHILDREN (June 22 to July 21) You have a martyr complex today so snap out of it and think constructively, get much done. Avoid gossips.

LEO (July 22 to Aug. 21) You want to solve problems and can do so best if you first decide the right principles under which to do so. Don't argue with closest ties.

VIRGO (Aug. 22 to Sept. 22) Your friends could prove trying so avoid them until the planets are more favorable. Be tactful in going after personal aims.

LIBRA (Sept. 23 to Oct. 22) Not a good day to approach bigwigs you know, since they are in an irate mood. Study credit and know where best to make improvements.

SCORPIO (Oct. 23 to Nov. 21) You are tempted to go out to new places but would encounter problems. Take it easy and make other plans. Improve your life in the future. A new contact could cause discord.

SAGITTARILUS (Nov. 22 to Dec. 21) Keep your word with everyone. If a loved one is in an irate mood, say nothing, and it will all blow over. Think constructively.

CAPRICORN (Dec. 22 to Jan. 20) One who is highly emotional could be troublesome now, so avoid for the time being. Plan how to gain more prestige in the outside world. Avoid a tendency to overspend.

AQUARIUS (Jan. 21 to Feb. 19) Express your gratitude to one who has done you favors in the past. Make plans to get your work done more efficiently. Follow every rule and regulation that applies to you.

PISCES (Feb. 20 to Mar. 20) You want to go out for recreation that will relieve tensions, which is fine, provided you do not take others with you. A nice gift to a loved one brings more harmony.

(Mon., Nov. 20)

GENERAL TENDENCIES: An excellent day to make positive plans to increase activities far beyond present boundries and thus gain more abundance in the days ahead. New secrets come to light at this time.

ARIES (Mar. 21 to Apr. 19) Plan recreations for the future early in the day and then handle important business matters that need your attention.

TAURUS (Apr. 20 to May 20) Concentrate on home affairs that could improve conditions there. A creative idea now could prove worthwhile.

GEMINI (May 21 to June 21) Take the right steps to obtain valuable data you need for future use. Schedule your time and activities wisely.

MOON CHILDREN (June 22 to July 21) Concentrate on how best to add to your present income and make life brighter. Take no risks with your health.

LEO (July 22 to Aug. 21) Go after goals that are appealing and that have been difficult to attain prior to now. Sociability pays off handsomely now.

VIRGO (Aug. 22 to Sept. 22) Good day to analyze just where you are headed careerwise and financially. You can easily gain the cooperation of others at this time.

LIBRA (Sept. 23 to Oct. 22) An excellent day for following your hunches. Study approved ways of gaining greater abundance in the future.

SCORPIO (Oct. 23 to Nov. 21) Contact higher-ups in the morning who can be of assistance to you. Show them your finest talents. Think constructively.

SAGITTARIUS (Nov. 22 to Dec. 21) You can look into new interests and put your good ideas to work for greater success. Sidestep one who is working against you.

CAPRICORN (Dec. 22 to Jan. 20) You are able to keep promises to others and maintain their goodwill at this time. Take no risks with money.

AQUARIUS (Jan. 21 to Feb. 19) Situations now arise that can be fine for you. You can reach agreements with others now since you understand their views.

PISCES (Feb. 20 to Mar. 20) Planetary aspects are good now and you can handle matters easily that have been difficult in the past. Use care in motion.

What's new on the market?

By ANDY LANG
AP Newsfeatures

What's new on the market?

THE PRODUCT — Electrical outlet insulators.

Manufacturer's claim — That these insulators prevent the passage of 93 percent of the air that usually enters the house through electrical receptacles...that they are made of resilient synthetic material that provides a snug fit on electrical outlets and switch plates...that they will not interfere in any way with the movement of electricity...that installation is simple and can be done in a few minutes...and that each sealer is designed to fit the most common size cover, but can be trimmed easily if used on a smaller cover.

THE PRODUCT — A spray-on mildew stain remover.

Manufacturer's claim — That this product will remove all traces of mildew stain without scrubbing, rinsing or wiping.. .that it is ideal for bathroom tiles, grout, shower stalls, painted surfaces and wallpaper, but also can be used for vinyl car roofs, boat tops and building exteriors...that it is not recommended for fabrics...that, on the average, a little more than two one-pint bottles a year will keep mildew away.

THE PRODUCT — A do-it-yourself organizer for clothes closets.

Manufacturer's claim — That this item consists of steel, baked-enamel tubular poles in six different lengths, brackets, pole arms and related hardware accessories...that combinations of various components fit any closet ranging from 29 to 121 inches wide...that the organizer increases hanging space by more than 50 percent and more than doubles existing shelf space...and that no special tools or skill are required for installation.

THE PRODUCT—A device for visibly identifying house numbers, day or night.

Manufacturer's claim — That this product connects to your doorbell with two low voltage wires and gives off a soft glow for continuous, positive residential identification...that the operating cost of its three watts is about half-a-cent per day.. .that it comes with waterproof address numbers which are notched for perfect alignment...and that it is made with a white acrylic plastic that is waterproof.

Do-it-yourselfers will find much valuable information in Andy Lang's handbook, "Practical Home Repairs," available by sending $1.50 to this newspaper at Box 5, Teaneck, N.J. 07666.)

Electrical outlet insulators are manufactured by Armstrong Cork Co., Lancaster, Pa. 17604; the stain remover by White Laboratories, Orlando, Fla. 32858; the closet organizer by Wessel Hardware, Erie Ave. and D St., Philadelphia, Pa. 19134; and the house identifier by Volan Associates, 244 N. Main St., Spring Valley, N.Y. 10977.)

Rothko's art exhibited

NEW YORK (AP) — The Solomon R. Guggenheim Museum says "Mark Rothko, 1903-1970: A Retrospective" is "the largest and most comprehensive exhibition of this 20th century master's work ever to be mounted."

The show is on display through Jan. 14.

Rothko was a pioneer of abstract color painting. The show consists of some 150 of his painting and works on paper "which trace Rothko's career from its beginnings in the 1920s to shortly before his death in 1970."

Alaskan plans 13,700-mile Jeep trip to Argentina

By TOM GORMAN
The Los Angeles Times

Bill Barriere has things just about lined up for his vacation.

He has the route planned (with the help of a couple of Eskimo guides and the Panama national guard) and his car is equipped with some basic essentials — six batteries, a 100-gallon gas tank and a winch.

It is the kind of stuff you need to drive yourself into the record book.

Barriere hopes to become the first person to travel alone from the northernmost point of North America — Point Barrow in Alaska — to the southernmost point of South America — Ushuaia, Argentina.

He plans to leave on Christmas Day and arrive about a year later, give or take a couple of days, at his destination 13,700 miles south.

The trip, he said, has been accomplished only once — by a British expeditionary force of 80 men, 30 of whom came down with malaria and yellow fever while crossing the jungles of Central America.

Barriere will do it alone, however, figuring that the fewer people, the fewer complications.

"The logistics of setting it up has still been a nightmare," he said, "and I've got about 200 people along the way to help me."

Barriere, a resident of Alaska who is part owner of a small nursery near Escondido, Calif., has purchased a custom Jeep for his adventure.

The 1971-model vehicle was built in La Jolla, Calif., for a man who had planned to make a trip from London to Singapore. But the man's partner died just before the start and the owner ran out of money. So the excursion was scuttled and Barriere bought the vehicle.

Except for its basic outward appearance, the vehicle is hardly a Jeep.

The 258-cubic-inch, high torque, four-barrel, six-cylinder engine was custom designed — even to the degree that if Barriere should be involved in a head-on collision, the engine would ram forward, not backward into his lap.

There are two sets of shocks on each axle (plus air shocks to raise the car when its gas tank is full), the roll bar is solid rather than tubular, the chassis has a double frame ("Once I hit a bridge beam doing 65 miles an hour, I damaged my oil pan and the bridge was destroyed") and the whole car is sealed to keep it buoyant.

And so on. "I guess there really isn't anything stock on it any more,' he said with a smile.

The original owner had both doors sealed shut, "to help protect him from aborigines in Australia," Barriere said. But he had the driver's door put back on hinges so, in case of fire, he has a quick escape route.

The vehicle cost him $27,000; the total bill for the trip is expected to approach $100,000, with no help from sponsors.

"I wouldn't mind having some, but I'll manage," said Barriere, who got his money "from gambling in real estate."

The 42-year-old adventurer is sure to see a lot of real estate on his trip — and about every climatic condition in the Americas.

"When I leave Point Barrow I'll go across the Arctic Sea to Prudhoe Bay (the start of the Alaskan oil pipeline). I picked December because that's the coldest time and the sea should be easier to cross then.

"I'll have a couple of Eskimos on snowmobiles to serve as guides and to watch out for protruding icicles," he said.

Taking into account the chill factor created by the cold winds, Barriere figures the temperature will be the equivalent of 70 below zero.

"That's so cold that even with the engine running, the antifreeze in the radiator would freeze." To counter that problem, hot air will be blown by a fan onto the radiator.

But, he said, he won't run the heater inside the car. "That would cause condensation inside the Jeep, and as soon as I'd open the door it would freeze. Then it would be all over, finished."

Barriere will simply wear parkas, saving the heater for "warmer" temperatures of around zero.

Once he reaches Fairbanks, it will be basically all downhill on the Alcan Highway to Vancouver and from there to Seattle, Sacramento, Palm Springs, Tucson, Hermosillo, Guaymas and Mexico City.

Then the adventure begins, to hear him tell it.

"I've already got the support of Gen. Omar Torrijos (president of Panama), who said the national guard will help me get through the jungles of the Darien Gap."

There are no roads through the jungle and the vegetation is so thick, he said, that with the help of the national guardsmen he will literally pull the Jeep through the growth with the winch.

"When I get to that point I'll disassemble the car so all that's left will be the wheels, chassis, motor and gas tank," he said., "We've got to cut down on the weight."

The jungles are primeval "with growth so soft and thick that you can literally sink in it. The British actually lost a vehicle that sank into the vegetation like it was quicksand," he said.

Driving through the thicket will be only half the problem, he adds. Throughout the trip he'll be camping beside his Jeep in Panama. That means sleeping with 30-foot boa constrictors, foot-wide spiders and inch-long ants "that get beneath your skin."

Once past Central America he'll go through still more jungle before crossing the Andes at an elevation of 12,000 feet.

"I'll take the Pan American Highway through South America — if, depending on rain, there is a highway. At some points the road is only one lane wide and if I run into a sheepherder I may have to back up 10 miles till they pass by. You can't argue with thousands of sheep."

By trip's end barriere will have traveled through 14 countries. Most have already pledged their cooperation in one form or another, thanks to trips Barriere has made to South and Central America to set up arrangements.

So why, it has to be asked, is Barriere making the trip?

"I love driving. It is a form of relaxation. In an average year I'll drive 100,000 mile. I've driven across the country countless times and I've been around the world — though by ship or plane — seven times.

"This trip is a combination of driving and adventure. I'm simply an adventurer and I love to travel. And my trip will be something people can relate to. How can you relate to walking on the moon?

"But everybody can relate to being behind the wheel."

What part of the trip does he fear most?

"The freeways. They're full of maniacs — people racing, passing. I'm at one with nature, but I get really paranoid when I get on a freeway.

"That's the worst jungle of all."

Bill Barriere stands next to the specially equipped $27,000 Jeep he plans use in a year-longBtrek from Alaska to Argentina. (Los Angeles Times Photo by Tom Gorman)

U. S. official teaching staff effective writing

WASHINGTON (AP) — Ernest L. Boyer, the U.S. commissioner of education, is teaching again for the first time in 20 years. His mission: to give some of his employees a crash course in effective writing.

"I'm delighted to see you and admire you for your bravery," the 50-year-old commissioner told his 27 students Thursday.

Talking for 90 minutes on the poor quality of writing in the bureaucracy, he told the class at one point that language "should convey meaning, not obscure it."

Boyer, a speech pathologist, has been a college administrator most of his career.

He asked his students to hunt for specimens of poor writing in their own offices and bring them to the second and final 90-minute session next Tuesday.

Boyer, who will instruct three more groups during the next two months, read the class some cluttered tidbits from letters he has been asked to sign.

They included this memo: "This workshop is part of an RFP issued by IOC aimed at helping SEAs better serve LEAs with reference to the LEA-Prime Sponsor agreements called for under the YETP portion of YEDPA."

Boyer lamented, "A foreign language builds up in the bureaucracy....When I read through this, I know about half the references, no more."

Another memo referred to "the raw material we are inputting." In that instance the "raw material" meant students.

"I don't know if students are still raw if you boil them," quipped Boyer, former chancellor of the State University of New York.

Gobbledygook, he added, reinforces citizens' opinions that government is faceless, nameless and without feelings.

"This leads to an erosion of credibility...and that's why people don't vote," said Boyer.

Bureaucratic writing seldom reveals the emotions of the author and tends to be legalistic and wordy, he added.

"You overdescribe and undercommunicate," complained the commissioner.

He encouraged members of the class to interrupt if they weren't getting his message. One older man took up the offer when Boyer told of trying to get his wife's car fixed. The diminutive commissioner joked that he was in a "macho" mood when he marched into a car dealership to get the "lemon" fixed.

"What' that word 'macho'? How do you spell it?" the man challenged Boyer. "You didn't communicate when you said that to me."

Husband, wife star in opera

By MARY CAMPBELL

NEW YORK (AP) — Richard Kness and Joann Grillo met while singing "Carmen" in Central City, Colo. They were married in 1967, the beginning of a relationship Miss Grillo calls "a great tempestuous love affair, with highs and lows and explosions.

"We've been called the Elizabeth Taylor and Richard Burton of the opera world," she says. "It's never boring."

Their careers are ascending. Kness' voice, a strong, dramatic tenor, is the kind that matures about 40, which he is. Her voice, a dramatic mezzo-soprano, is the kind that blossoms at about 37, which she is.

Sometimes they sing in the same opera house, sometimes continents apart. "This year we're going to find out if our marriage is meant to last," Kness says, "because we're here working together."

He made his Metropolitan Opera debut on opening night this fall. She has been singing at the Met since 1963.

The Brooklyn-born star will make her debut in the Vienna Staatsoper in January. "But the place I've been saving is Italy," she says. "I'm totally of Italian descent. I have not wanted to sing in Italy until I felt I was able to make my big splash ... I hope to invade Italy."

Kness is a native of Rockford, Ill., and lived there until he was 17, when his father retired from his car agency and moved to Chula Vista, Calif., a suburb of San Diego.

Kness' interest in singing developed during five years in the Army Chorus. After discharge, he took lessons in New York.

"Like many Americans, I saw that for the type of career I really wanted, the necessity was to go to Europe and prepare my roles over there and create a standing, then come back," Kness recalls.

He made his European debut in Hamburg and was offered a five-year contract there, but turned it down. "I was a young, beginning singer. I'm under the opinion that young singers need a house they can go to to be bad, where they can perform and work the snarls out of themselves, I went around and auditioned."

Hamburg, he reasons, was simply too big. He found what he wanted in Osnabruck. "I told my wife, who was singing in Frankfurt, 'I found a house. It's a long way away, no airport and no autobahn.'

She told me if I took that contract she'd divorce me, but I took it anyway. Obviously, she didn't do it. We had two of our happiest years in that little town. She ended up commuting."

Their son, John Richard, 10, spent his first five years in Germany. "He has a fantastic voice," his mother says. He almost beat his father to a Met debut after he auditioned last spring for part in 'Gianni Schicchi.'

"He came home singing up our driveway in Brooklyn, 'I got in before you did.' I didn't like that very much," Kness recalls. But they decided that getting out of school for the Met's spring tour wasn't in the boy's best interest, so that family Met debut was postponed.

RINGING THE BELL

Awards honor Aaron, Bailey

Hank Aaron, Pearl Bailey Win Awards: They were two of the nine men and women from the United States and Canada who were recently honored with the 1979 Encyclopedia Britannica Award for Achievement in Life. Aaron received the Achievement in Sports Award and Miss Bailey was honored for achievement in the Performing Arts. Recipients for the 1979 Award were selected on the basis of notable contribution in the fields of public service, business, the arts, science, sports and education, as well as attitude and accomplishments.

Hank Aaron became a start baseball player from the moment he joined the Milwaukee Braves in 1954. Although a rookie, he was named the team's Most Vauluable Player that year. Today he is looked upon as one of the greatest performers in the history of baseball. He is best known for having broken Babe Ruth's career home run record of 714, a feat he accomplished while a member of the Atlanta Braves in April 1974.

Aaron also bacame the first player to total more than 3,000 career hits and more than 500 home runs, and is one of only five players ever to hit more than 30 homers and steal more than 30 bases in a season. He was named to the National League all-star team 16 times, was the league's Most Valuable Player in 1957 and was named Player of the Year by the Sporting News in 1956 and 1963. Today, he is a vice-president with the Atlanta Braves.

Pearl Bailey began her singing career i small coal-mining towns in Pennsylvania but soon moved up to some of the best known nightclubs in New York. In 1964, she made her state debut in "St. Louis Woman" and was honored with the Donaldson Award as the best newcomer on Broadway—only the first of many awards she has received. She has appeared in a number of Broadway plays, including "Hello Dolly!" for which she won a special "Tony" in 1968. She starred in her own television show in 1970 and 71. She has five books to her credit. She has traveled abroad extensively and has been honored by many governments of the world, including Egypt and Jordan.

United Methodism's national communications agency has been challenged to provide "creative" leadership for the denomination in the mass communications area such as investigating the ownership of radio and televison stations, increasing its influence in national communications policy-making and in general representing the church's point of view in all sections of the nation.

"I find that the evangelistic zeal is missing in many of our mainline Protestant churches..Mainline Protestant churches appear to be on the defensive and are losing membership...Television seems to have become the main enculturing tool of our society, rather than the home, the church or the school. Where the church is missing the boat is in television, "Charles Cappleman, general manager of CBS Televison City, told United Methodist officials in Communications recently.

Our congratulations to The Black-Oriented Oklahoma Eagle for recently publishing the largest single newspaper in the 150 year history of the black press in America. The publisher, Bob Goodwin Jr., commenting said: "There is so much history recorded in so many places throughout the state of Oklahoma, that it would take several publications of like size to even touch the surface. The issue marked the 60th anniversary of the North Tulsa based, twice-weekly publication.

And until later, be a good neighbor. Remember they come in all colors.
