VOLUME 8

BURKBURNETT, WICHITA COUNTY, TEXAS (76354) TUESDAY, AUGUST 19, 1969

NUMBER 50

Editor's Viewpoint

By Lon Williams

Yes, Rhea Howard, publisher of the Wichita Falls Times and I do have something in common. The Coke machines in the Times Building have about the same income as my entire newspaper.

I met many more people this past week. One was Cloyd Adams at United Food Store. At the time Cloyd was sharpening a three-foot long knife in the meat department. I asked him what he used a big frog-sticker like that for? "To cut the legs off Texas-size frogs . . . and cutting smart-alec newspapermen down to size" came the reply. I suddenly remembered a previous engagement . . . and ran.

The Senior Citizen Club of Burkburnett held their regular meeting this past Thursday. I was asked to attend and did. Gained six pounds from the fine food and enjoyed meeting everybody there I asked one member how he was doing? "I'm still kicking" came the reply "but I'm not stirring up much dust."

The Burkburnett Bulldogs began workouts Monday afternoon. Burk has many avid football fans I am told. If this is so, let's see a good turnout come out to watch the '69 footballers work out. We're returning 14 lettermen from last years squad which means the varsity will have a lot of experience and talent. The '69 season could be the Year of the Bulldogs with some good luck, and spirit from all Burk Football fans.

The ole school-year is about to get underway again. You can always tell by the returning smiles to mothers faces and the frowns of the kids.

Moms usually on the first day of school brew a pot of coffee and for the first time in three months, are able to enjoy a quiet, leisure cup.

You will be happy to know that the Burkburnett Star/News has placed an order for twenty-four newspaper racks. These racks will be placed at businesses thru-out Burk so that you may be able to buy a paper anytime during the week. It will be about two weeks until we get them.

BURK MERCHANTS will stage their GIANT back to school sales event next Thursday. Watch the pages of the Burk Star this week. . . Remember, money spent in Burk . . . BUILDS BURK.

Star-News City Sales Show Gain

The Burkburnett Star showed an in-city rack sales increase of nearly 200 this past Thursday, according to new publisher Lon Williams.

"We have taken over our own in-city distribution now and with the new display racks (24 of 'em) we've ordered, we anticipate increasing the in-city sales of the Burk Star and News about three times. This first week showed an increase of between 175-200 just using the old locations only. Therefore, with the new locations where the Star and News will be available, we anticipate a total over-all increase in immediate circulation of about 500."

"We are pleased and happy and surprised," Williams said, "at such an increase in the very first week."

SHE'S A QUEEN — Miss Judy Klinkerman, Farm Bureau Queen of Wichita County, will represent the county in the District Farm Bureau Queen contest to be held in Vernon Thursday night. Judy, who will be a junior in Burkburnett High School this fall, is the daughter of Mr. and Mrs. Elmer Klinkerman. (Burk Star Photo)

POLICE INVESTIGATING FRIDAY NIGHT BURGLARY OF STATION

The Burkburnett Police Department is investigating the Friday night break-in at the Fina Service Station, at the corner of 3rd Street and Wigham. Officer L. W. Brumblow told the News that the Police Department was called to the scene Saturday morning by Manager

J. W. Hicks after Hicks had discovered the bathroom window had been pried open. Reported missing from the service station was \$2.00 in pennies left in the cash register, six packages of cigarettes, and two plastic keys that fit the Credit Card machine. Officer Brumblow reported that police had dusted for fingerprints and that several had been found. Investigation is continuing by the Burk Police Department.

Local Man Escapes Injury In Accident

A Burkburnett man luckily escaped injury in an accident that occurred Thursday morning in Mineral Wells, Texas. Ira James Daniel of 211 Walnut, Burkburnett, driving a PRESTON DAIRY truck, was proceeding on South Oak in Mineral Wells when a pickup driven by Bruce Warren, turned in front of the big truck.

Daniels was not able to stop the truck in time to avoid collision. Upon impact, the driver of the pickup, Warren, jumped out and fled the scene. Mineral Wells Police told the BURK NEWS that they have issued a warrant for the mans arrest. A passenger in the pickup with Warren, Bailey T. Mills of Graceland, was injured in the crash suffering a deep gash in the forehead. He was rushed to Palo Pinto County Hospital for emergency treatment and is in good condition.

Daniels was not injured in the crash. Estimates of damage were not available. The accident occurred Thursday at 11:15.

County Records 21 Accidents

The Texas Highway Patrol investigated 20 accidents on rural highways in Wichita County during the month of July, according to Sergeant D. S. Lawson, Highway Patrol supervisor of this area.

These crashes resulted in 13

persons injured and estimated property damage of \$14,880.00. The rural traffic accident summary for this county during the first seven months of 1969 shows a total of 110 accidents resulting in three persons killed, 61 persons injured, and an estimated

property damage of \$85,040. The 1969 Texas Legislature has provided for a year-round Motor Vehicle Inspection program. Beginning September 1, 1969, the present 1969 inspection stickers will have a numeral insert corresponding to the months of issuance that will be inserted on the face of the sticker corresponding to the month of issuance. The sticker will be placed in the lower left-hand corner of the windshield.

All 1969 stickers bearing a numeral insert will expire at the end of the month a year from now, 1970. All 1969 stickers bearing no numeral insert will expire on April 15, 1970.

Beginning January 1, 1970, the inspection stickers issued will have an orange background and bear an insert numeral corresponding with the 1970 month of issuance and will expire at the end of the month one year from the month of issuance in 1971. The inspection sticker design will change in January of

every year to a new base design. The Legislature added two items to be inspected — the exhaust system and the exhaust emission system. The new inspection fee will be \$2.00.

Police Investigate Two Accidents

The Burkburnett Police Department reported two minor accidents in the city in the past couple of days. One accident occurred at the Parker Plaza Shopping Center Friday afternoon about noon. No injuries or only minor damage to the vehicles involved.

Another minor "fender-bender" was reported to have occurred at Jiffy No. 19 Friday night about 8:35 p.m. Officer James McDonald investigated. No injuries and only minor damage reported.

SOONERS SHOCK TEXANS 17-7 IN OIL BOWL FRIDAY NIGHT

A stubborn defense that allowed only 9 yards rushing and an offense led by the bruising power running of Clinton's James Williams led Oklahoma to a 17-7 victory over Texas in the 32nd annual Oil Bowl Friday night in Wichita Falls.

The game, played before about 18,000 fans, saw a highly spirited Oklahoma team dominate the ball game after the opening series of plays for the Sooners backfired. An Oklahoma pass on the Sooner 35 was intercepted by Texas' George Collins who rambed to the Oklahoma 16 before being nailed. Two plays later John Harvey sluded the Sooner defense on a pitchout from Gary Keithley and put Texas in the lead 7-0.

Then a harassing Sooner defense went to work led by Ray Hamilton, John Carter, Marc Funk, Tom Speed and Gerald Clipp. The Oklahoma front four continually pressured the Texas quarterbacks.

In the second quarter, Lawson's Tom Speed got a hand on Texas quarterback Keithley causing a fumble which the Sooners recovered at the Texas 8 yard line. In three plays, big James Williams hit paydirt, Gary Rhynes converted and it was 7-7.

Williams scored again in the third period from one yard out. Rhynes, again converted to move Oklahoma in the lead 14-7. With just over a minute showing on the clock in the final period, Rhynes tagged a 34-yard field

goal on the scoreboard for good measure.

After last years 39-7 licking by Texas and four straight wins in the Oil Bowl by the Texans, The Sooners had done it. The Oil Bowl Championship has returned to Oklahoma.

And The Rain Came, 1.1 Inches Received Here

Rain, as welcome as can be, deluged Burkburnett early Friday morning, bringing an official 1.1 inches of needed moisture.

The downpour began at 5 a.m., and continued intermittently until 9:30 a.m., when the sun again appeared.

Mrs. E. E. Clack, north of town, said she did not measure the rain at her place, but knew that it was "heaven sent."

At the N. H. Zimmerman farm, two miles northwest of Burkburnett, Mrs. Zimmerman reported 1.25 inches. "A lifesaver," she said.

Another report, from Mrs. Elmer Klinkerman, stated that 1.5 inches was recorded there. The moisture may allow them to get another cutting.

Mrs. Klinkerman said the rain will be especially beneficial to hay growers, and will give cotton a great boost.

Nearer town, W. K. Clayton at Clayton's Bait and Tackle Shop reported one inch. "Just in time," he said.

The rain was the first measurable amount since August 2.

Lightning struck the steeple of the First Baptist Church in Holliday in the Friday morning rainstorm. Amount of damage caused is unknown at this time.

Burk Merchants Back To School Sale See Thursday Burk Star

LADIES' CLUBS of Burkburnett joined forces to make Boomtown Oil Park as attractive as it is interesting. These ladies, representing various clubs, toured the park during work day Monday. They are Mmes. Bill Crosley, Ray Stimpson, Lee Beckham, Jim Johnston,

Ralph White and Arthur Houser. In the foreground is Kathy Thomas granddaughter of Mrs. Crosley who joined the inspection tour. Trees and other plantings will be set out this fall.

RETURN TO FIRST PRINCIPALS

Not long ago, Mayor John V. Lindsay of New York urged scrapping of the present welfare system. In its place, Mr. Lindsay recommends a system "... which rewards families who work and encourages them to work." He warns that the present system encourages welfare recipients to avoid employment.

Thus, it is recognized that the all-important factor—incentive, is as essential to a successful welfare system as to any other human endeavor. Incentive—the profit motive—is what makes industries, as well as individuals progress. Where there is no incentive or profit, there is failure. Those who criticize profits are advocates of failure. The incentive of profit is as important to business and to American workers as it is to a successful welfare system. Mayor Lindsay's idea of rewarding families who work is but a return to a first principal of human existence—a principal too often derided by vote seekers and militants of every stripe.

NO LIMIT TAX PLAN

In a humorous vein, columnist Mike Royko asks, "What'll Uncle Sam do when taxes reach 100 per cent?" His rhetorical question, though facetious, has a hard grain of seriousness considering the spending philosophy that the nation has lived with for several decades. The idea has been that government helps people by raising their taxes. So why shouldn't taxes eventually reach the 100 per cent, how does the government then continue to help people after they are flat broke. Mr. Royko quotes hypothetical economists of the future who suggests ways out of the dilemma. These mythical economists believe we could sell off or pawn the Air Force or the Navy at a good price. Another of Mr. Royko's imaginary economists believes our government could help run some other countries—do a little moonlighting on the side. To the question, "Do you think anybody would hire us?" this economist answered, "Are you kidding? With our experience?" Nothing is too fanciful in a nation that sets no limit on taxation to help people.

FACT AND OPINION

The National Academy of Sciences reports that by the year 2000, the population of the United States will rise from the present 200 million to somewhere between 300 and 340 million. This magnitude of growth poses a serious environmental challenge.

College students who create campus turmoil and try to dictate policy are now running into much stiffer opposition from administrators and the public. According to the Gallup Poll, 8 adults in every 10 believe students who violate laws and regulations during campus demonstrations should be expelled.

U.S. Representative Odin Langen from Minnesota made the comment: "Remember back when the scientists used to tell us that the chemicals in the average human body were worth just 98 cents? Inflation seems to have hit that figure, too. A Northwestern University biochemist says those chemicals are now worth \$3.50!"

"He only is exempt from failures who makes no efforts." —Richard Whately

News From The County Agent

The price situation is causing many stockmen to ask questions about the possible use of wheat for feeding cattle.

County agent B. T. Haws says wheat can be fed to all types of cattle. Research has shown that on full feed best use can be made of wheat by limiting it to 25 per cent of the total ration, he explains. When fed in these amounts it is equal to corn in feeding value and no digestive problems are encountered.

When one is pressed for feed and needs to use more, it can be raised to 50 per cent for fattening cattle. Generally, it is not economical under any circumstances to increase it beyond 50 per cent for fattening. For wintering calves, where

only 3 or 4 pounds of grain are being fed along with a full feed of hay or silage, wheat can be used entirely. In fact, points out Haws, where four pounds of grain daily limit, 100 per cent wheat can be used.

The problem with wheat for cattle is proper preparation and its physical characteristics. If wheat is coarsely cracked or is rolled, it is more acceptable to the cattle. Often in preparation, wheat is ground into a flour and becomes gummy and sticky and quickly soils feed troughs.

Checking the type of equipment and finding the best method to roll or crack will help improve its feeding characteristics.

Knowing the quality of hay being fed, can cut winter feeding costs and increase profits for livestock producers, says county agent B. T. Haws. With the possibilities of limited hay production for the rest of the summer, hay quality becomes even more important, he adds.

For the quality of hay fed directly influences meat and milk production of livestock. The better quality, the better the animal production.

Hay quality is influenced by two main factors, fertilization and growth stage of the hay when harvested. Fertilizer increases production, quality and palatability. Early harvest helps conserve high quality. Most hay crops should be harvested before seedheads appear. This stage is reached in approximately four weeks of growth.

Although hay value can be visually estimated, a forage analysis is very valuable for determining the protein, energy, and other feeding values. Two bales of hay may have nearly identical visual characteristics but widely different feeding values when analyzed.

The greatest hazard to rangeland during the hot and dry summer months and into the fall and winter is fire.

Everyone has a stake in preventing range fires. The rancher depends upon range vegetation to produce livestock which ends up as steaks, lamb chops, and other meat products and which are enjoyed by Texans.

And fishermen and water enthusiasts want clear rivers and lakes for fishing and water sports. Fire denuded rangelands are conducive to soil erosion when the rains come, resulting in silt laden rivers and silt-filled muddy lakes.

Landowners can protect their ranges by building fire guards. Sprayers and other fire fighting equipment should be kept in good repair and readily available for any emergency. Communities and counties should have an up-to-date workable plan for fighting fires.

Top Squadron For Month Is Chosen

SHEPPARD AFB, Tex. — Two student squadrons of Sheppard's 3750th Technical School tied for the Outstanding Student Squadron Award for the month of July.

The 3758th and the 3776th Student Squadrons recently received the award from Col. George W. Call, deputy commander of the Technical School.

In a letter of appreciation and recognition to each of the squadrons, Colonel Call stated, "It is always heartening and gratifying to see a good job well done, and I am exceedingly pleased to extend congratulations and recognition for an excellent performance."

The presentation of the award was based on military and administrative proficiency, the disciplinary record and the appearance of the squadron areas, for the period.

EVENTS OF YESTERYEAR

From The Burkburnett Star 20 Years Ago

Mrs. J. H. Brumley spent last week visiting her niece and family. Mr. and Mrs. W. P. Parker, Preston and Gay in Nocona.

Mrs. Leo Foster has returned from Denton where she attended the School Luncheon Shop. How to use government surplus food and How to Prepare First Class lunches were two of the many discussions.

Miss Mattie Young of Edna is visiting her sisters, Mrs. E. E.

Clack and family. Miss Young is enroute to Denver, Colo., to visit another sister.

Mr. and Mrs. Ira Williams and girls of Hayward, Calif., spent last weekend with Mr. and Mrs. Hugh Williams.

Mr. and Mrs. Dick Chambers left Monday for Glenwood, Iowa and Park Rapids, Minn. They will be joined there by Mr. Chambers' brothers and wives and will go into Canada on a fishing trip.

Little J. T. Otis of Gladewater is spending the summer in Burkburnett with his uncle and aunt, Mr. and Mrs. J. T. Deckard.

Mr. and Mrs. Glen Bear and Jon Hi and Mr. and Mrs. Clifford Dodson and Norman drove to Dallas Sunday and took a plane to Mexico City. Enroute home they plan to visit Acapulco and Monterrey. They will be gone about ten days.

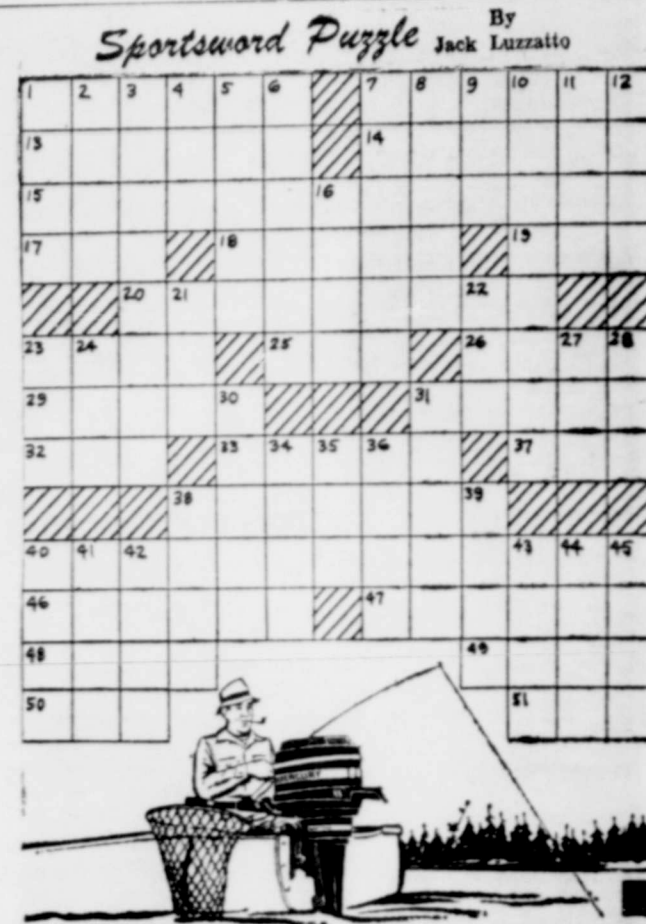

Mr. and Mrs. Fred Wallace of Des Moines, Iowa spent several days last week with Mr. and Mrs. J. A. Johnson. Mrs. Wallace is Mrs. Johnson's aunt, whom she had not seen in 24 years.

Clarence Newell Receives Degree

Those attending the Commencement Exercises Aug. 7 at Southeastern State College in Durant for Clarence Wayne Newell were his wife, Raylette, Mrs. J. D. Ellis, Mr. and Mrs. Dan Bales and children of Devol and Mrs. Raymond Simmons, Mrs. Mickey Simmons and children, Mrs. Lillie Tonubee and girls, all of Burkburnett.

Clarence is the son of Mrs. J. D. Ellis of Devol. He received his Bachelor of Arts Degree.

He and Raylette will make their home in Burk where he will be a teacher in the Burkburnett Schools.

THE Famous DEPARTMENT STORE

A WOMAN'S WORK—Sheppard AFB—Mrs. Ruth Horsley, a technical writer in the Medical Service School, is shown by the "cherry picker" which took her to the top of electrical poles in her research for the Electrical Power Line Specialist Technician course at Sheppard Technical Training Center. This is one of the many interesting aspects of Mrs. Horsley's work. She has written courses in comptroller, civil engineering and medical services, her lat-

est being the Dental Laboratory Specialist Technician course at Sheppard Technical Training Center. This is one of the many interesting aspects of Mrs. Horsley's work. She has written courses in comptroller, civil engineering and medical services, her latest being the Dental Laboratory Specialist Technician course. On that one she worked directly with an experienced technician. (Official USAF Photo by SSgt. Ronald Reimer)

LOCAL WOMAN HAS WORKED AT SHEPPARD FOR 26 YEARS

By BILLIE BURRELL
SHEPPARD, AFB, Tex. — A chain of educational assignments at Sheppard Air Force Base has proved interesting and challenging to Mrs. Ruth Horsley of Burkburnett, Tex., who began her work as a civilian employee at Sheppard in January 1943.

During this 26-year span of her career she has taught aircraft mechanics and data processing and has been a technical writer for the past 11 years. Her technical writing has been in the comptroller, civil engineering and medical career areas.

Now a technical writer in the Department of Dentistry, she began her work with Medical Service School two years ago. She coauthored the Dental Laboratory Specialist Technician course working directly with an experienced technician. She has also assisted with other courses in the medical career field.

Mrs. Horsley worked as a dental assistant in Wichita Falls prior to coming to Sheppard Field during World War II.

In January 1943 she was employed by the Army Air Force to be an instructor of students in aircraft engine mechanics. At that time the B-25 and B-26 aircraft were the large ones, and the B-29 was in the experimental stage.

In those early days of Sheppard Field Mrs. Horsley taught her students how to tear down a radial aircraft engine to the crankshaft, rebuild it, and make all the necessary adjustments to the electrical, carburetion and valve systems.

Four men usually worked on one engine. When they finished rebuilding the engine they would push it to another building to a test block. They then started and ran the engine and pulled all operation checks.

The mechanics instructor left Sheppard in December 1946 but returned during the Korean Conflict in 1951, teaching the same subject in the same building.

She has been at Sheppard continually since that time with the exception of eight months, from November 1954 to April 1955, when she taught organizational supply procedures at Francis E. Warren AFB, Cheyenne, Wyo.

In 1955 she changed career fields from mechanics to data processing and for three years she taught students how to wire and operate International Business Machines (IBM) accounting machines.

In 1958 she began her technical writing.

cal writing. She wrote extension courses that Air Force personnel in related career fields throughout the world are required to complete during their on-the-job training.

She is author of the current Data Processing Machine Operator/Supervise course and co-author of other courses in the data processing, programming and statistical career areas.

One of her most challenging assignments was that of writing the Electrical Power Line Specialist Technician course in the Department of Civil Engineering Training.

She was given this "pole climber" course assignment because of her past mechanical background. One of the greatest challenges was in getting to the top of the electrical poles to observe the instruction. This was accomplished by her going into the air in the electrician's "cherry picker" to the top of the electrical poles where she closely observed the students as they accomplished various phases of their lineman's work.

She particularly enjoyed this assignment but said that it would have been impossible to produce a worthwhile course without the help of three other Burkburnett residents who are also employed at Sheppard—Edgar Fulcher, Bobby Littlejohn and Melvin Crater. They answered all of her questions and provided transportation in the "cherry picker" for her.

As a career employee of the United States Air Force, Mrs. Horsley feels that her activities have been so varied that they have remained interesting as well as educational.

She has attended schools or gone to seek information relative to her work at air bases in Alabama, Illinois, Louisiana, Massachusetts, Oklahoma, Ohio, Texas, Wyoming and twice to the Pentagon in Washington, D.C.

During the period when Mrs. Horsley was not employed by the Air Force, she taught school in Antlers and Wilson, Okla., and was employed as a social worker for the Department of Public Welfare in Oklahoma.

She attended high school in Inola, Okla., and Wichita Falls, Tex., graduating from the latter school in 1933. She attended Wichita Falls Junior College and South Eastern State College in Durant, Okla.

Mrs. Horsley and her husband, Charles, reside at 115 N. Harwell in Burkburnett. They have two married daughters, Ruth and Kay, and three granddaughters.

KATHERINE DEA SYKES

ENGAGEMENT ANNOUNCED

Mr. and Mrs. D. L. Sykes, Burkburnett, announce the engagement and approaching marriage of their daughter, Katherine Dea, to Richard Haley, son of Mr. and Mrs. H. H. Haley, Sr., of Tulsa, Okla.

Katherine was graduated with the Class of '67 of Burkburnett High and will be a junior at Cameron State College this coming term.

She is presently employed at Ft. Sill. While attending Cameron she has been active in the Cameron Sings, having served as a member of the choir, assistant pianist and accompanist for the Men's Glee Club and Ladies Ensemble. Katherine is an active member of the BSU. She is organist for the Past Chapel at Ft. Sill, Okla.

Haley attended the Tulsa Public Schools and has served with the U.S. Army. Upon completion of his tour he will enroll in Tulsa Technological College and will be associated with his father in business.

The wedding will be January 23, 1970 at the Janlee Baptist Church, with Rev. Don Burks officiating.

The couple will make their home in Tulsa.

Deepest Shaft

Upon completion in spring, 1969, International Nickel's 7,150-foot Creighton No. 9 shaft will be the deepest continuous mining shaft from the surface in the Western Hemisphere.

Opposite Sides

The largest pure nickel coin ever minted was the 20 Franc piece of Belgium, weighing 20 grams. The smallest is the 1.5-gram 10-cent coin produced by The Netherlands.

LONE STAR GAS GRANTED INCREASE IN CITY GATE RATE

DALLAS, Tex. — Lone Star Gas Company announced recently that the Texas Railroad Commission has rendered a decision and order granting the company a six-cent increase in its intracompany city gate rate.

The order, not yet received by the company but expected to become effective Aug. 15, will increase to 41.4 cents per thousand cubic feet the intracompany charge for natural gas de-

livered at the city gate by the company's Transmission Division to its distribution divisions for sale to residential and commercial customers and for gas unaccounted for in the distribution system.

The old intracompany gate rate of 35.4 cents per thousand cubic feet of natural gas had been in effect since Feb., 1960. Now that the commission has rendered its decision, Lone Star will evaluate earnings in all Texas cities, towns and communities served by the company. Individual rate action will be pursued in those towns where earnings are adequate.

Lone Star petitioned the Railroad Commission for a 9.35-cent increase in May, and the commission held public hearings on the request in June. An additional hearing was held July 28 where a committee representing several cities served by Lone Star submitted direct evidence advocating a different theory of rate making and an increase of only 3.4 cents.

Social Security Tips Offered To Retired Persons

Social Security benefits don't start automatically when you retire. This may seem strange since the social security contribution comes out of the pay check without the worker requesting it, but the monthly retirement benefits do have to be requested. Along with the application certain proofs have to be furnished, according to Francis J. Stevens, social security representative for Burkburnett.

What does a person need to get his retirement check started? Stevens says that along with his social security card, proof of a person's age should always be brought with him when he files.

"Most people decide to file a claim that first trip to meet the social security representative after they see how simple it is," Stevens says, "even though they were just inquiring about how to file. Usually one visit is all that is needed if the necessary proofs are brought along. If the spouse and children are also claiming benefits, they will need proof of their ages."

Since most people in this area do not have a birth certificate recorded near the time of birth, they usually need at least two old documents showing their ages, the older the document the better. Baptismal records, family Bibles, school records, insurance policies, marriage licenses, and practically any other old document showing the person's age can be used to establish his date of birth. If the person was baptized near birth and this was recorded by the church, this baptismal record is considered excellent proof by the Social Security Administration and must be obtained.

Stevens says that your last year's W-2 forms, or your tax return if you were self-employed, should also be brought with you when you plan to apply for social security. The W-2 form is the statement of earnings furnished to employees at the end of each year by the employer. The retirement claim should be filed during the three months before the month one reaches 65, and it may be so simple you will think the checks did start automatically.

Get The Picture

The principal metallic components in the gun of color TV picture tubes are nickel stainless steel. The material has low magnetic response, meaning less picture interference.

SLOW, THE SIGN says, and that is exactly what it means—15 miles per hour for auto traveling along Avenue D in the vicinity of Burk Junior High and Hardin Grade Schools. The reduced speed limit is in effect while the yellow lights are flashing, and the Burk police department promises strict enforcement during the school season. Donald Wayne Morgan, 9, who will be a fourth grader at Hardin this fall, stands by. Donald is the son of Mr. and Mrs. Donald Morgan. (Burk Star Photo)

DRIVERS ARE REMINDED OF SCHOOL ZONES; CITY CURFEW

Chief of Police Buck Abbott today reminded all Burk drivers that with the beginning of school on August 26, drivers will be expected to observe the School Zone speeds. "Drivers should slow to 15 m.p.h. in school zones" Abbott said "or we will be forced to remind them."

Chief Abbott told the Burk Star that radar will be used in the School Zone areas to assure the proper observance is being given by all drivers. "The importance of enforcing the School Zone speeds could easily mean the difference between safety and danger to the life of one of our children. We ask for the public's cooperation in this matter."

Modern Mowers

Starting a power mower is easier when it is done with a rechargeable nickel-cadmium battery-powered ignition system. A built-in generator recharges the battery while the motor is running.

The Police Department will also be enforcing the City Curfew beginning the first day of school. The Curfew rule is: When there is school the next day, no school-aged child is allowed out at night without parent accompaniment from 11 p.m. to 4 a.m. When there is no school the next day the curfew runs from 12:30 a.m. to 4 a.m.

IT'S AN OLDIE—Jingle Hays points out an old flow meter, one of the interesting oil exhibits in Boomtown Oil Park. Moving the meter to a permanent location are Bill Crosley, Charley Hicks, Hayes and Hubert

Smith. The Oil Park, a project of the Burkburnett Chamber of Commerce, is rapidly progressing toward becoming one of the tourist attractions of this area. (Burk Star Photo)

Outstanding Unit Award Presented To 3630th Sq.

SHEPPARD AFB, Tex. — In order of the Secretary of the Air Force, four units of Sheppard Air Force Base, Tex., are to be presented the Air Force Outstanding Unit Award.

The 3630th Flying Training Wing, the 761st Air Force Band, the 3750th Technical School and Sheppard's Medical Service School, each have been cited for exceptionally meritorious

service in support of military operations from Jan. 1, 1967 to Dec. 31, 1968.

Presentation of the awards is tentatively set for early September.

Citations for the awards for each unit state in part, "The 3630th Flying Training Wing . . . distinguished itself by exceptionally meritorious service by providing critically required

United States Air Force helicopter pilots on a timely basis during the crucial expansion of the mission effort in Southeast Asia, trained helicopter pilots for allied nations and inaugurated the only undergraduate pilot training program in the United States for the Federal Republic of Germany."

"The 761st Air Force Band . . . distinguished itself . . . by maintaining an unsurpassed record of sustained high quality performances of national and international significance. The 761st Air Force Band's outstanding professional skill, competency, management, and devotion to duty have contributed immeasurably to the successful accomplishments of the missions of the Information Program and the Technical Training Schools of Sheppard AFB and affiliate military installations."

"The 3750th Technical School . . . distinguished itself . . . when faced with an increasing demand for its training services, with but normal increase in resources, the 3750th Technical School demonstrated unusual management acumen in responding quickly and efficiently to the changing needs of the ma-

or commands. This responsiveness required rapid expansion and diversification of sustained and peak performance level for a period of time."

"The United States Air Force Medical Service School . . . distinguished itself by successfully accomplishing all of the assigned missions, including a marked increase production in support of Southeast Asia, under difficult conditions during an relocation of the School, its complete reorganization, and major changes in the training concepts and operations."

Helicopter School Officers Receive Decorations

SHEPPARD AFB, Tex. — Three officers of the Helicopter School at Sheppard AFB were decorated Thursday afternoon during ceremonies conducted by Lt. Col. Robert B. Hamel, deputy commander for operations (Helicopter), 3630th Flying Training Wing.

Colonel Hamel presented the Distinguished Flying Cross (DFC), First Oak Leaf Cluster, and the Air Medal, First through 13th Oak Leaf Clusters, to Maj. William H. Waters and the Meritorious Service Medal to Lt. Col. Albert L. Holcomb.

The DFC, First Oak Leaf Cluster went to Major Waters for service as aircraft commander of a CH-3 helicopter in Southeast Asia Oct. 20, 1968; when, according to the citation with the medal, he "twice flew his helicopter into heavily defended areas to deliver his ordinance precisely on target. In spite of accurate and intense ground fire Major Waters descended to tree-top level to insure that his ordinance would be on target."

He received the Air Medal, First through 13th Oak Leaf Clusters for participating in aerial flight in Southeast Asia from Sept. 19, 1968, to May 20, 1969.

The Meritorious Service Medal, recently introduced by the Air Force, was presented to Colonel Holcomb for service as a supply staff officer at U.S. Air Force Headquarters, from July 1, 1966, to June 12, 1969.

5 From Sheppard To Appear In 'The King And I'

SHEPPARD AFB, Tex. — Five Sheppardites were selected for the cast of the Summer Youth Musical final production, "The King And I," scheduled for Aug. 22 and 23 at Rider High School auditorium, announced by Mr. Todd Lane, producer-director, Saturday.

Acting, singing and dancing the part of the king will be AIC Stanley R. Jones, a cryptographic equipment repairman with the 2054 Communications Squadron. This will be Airman Jones' first production with Summer Youth Musicals.

In Greenville, Tenn., his hometown, Airman Jones appeared in a "Little Theater's" productions of "South Pacific," "Guys and Dolls," "Kiss Me Kate" and "The Teahouse of the August Moon."

Playing Anna, the English school teacher, will be Ann Gilbert. In her third season with Summer Youth Musicals, Miss Gilbert has played in "The Music Man," "Annie Get Your Gun," "Once Upon a Mattress" and the "Sound of Music."

The roles of the ill-fated lovers will be played by Will Robertson, 17, son of Lt. Col. and Mrs. William J. Robertson, as Lun Tha and Debra Delaney as Tuptin. This will be Robertson's first show with the Musicals.

Portraying Prince Chulalongkorn, heir to the throne, will be played by Jimmy Saurage, 17, son of MSgt. (Ret.) and Mrs. Cecil G. Saurage.

Playing the roles of Captain Orton and Sir Edward Ramsey will be Bruce Story, son of Mr. and Mrs. Edward Carl Story.

Michael Dehan, 11, son of Lt. Col. and Mrs. Edward T. Dehan, is playing the role of one of the king's royal children.

Tickets for this production are now on sale and can be bought from any member of the Summer Youth Musicals or the Altrusia Club.

Rites Held For Former Resident

Graveside services were conducted Wednesday at 4 p.m. at the Burkburnett Cemetery for former Burk resident, Mrs. Zeffie Gilreath, 77. Mrs. Gilreath passed away Wednesday in Texas City, Tex. She was born May 29th, 1982, in Indiana.

Mrs. Gilreath is survived by two daughters: Mrs. Helen Yates of Texas City, and Mrs. Florence Canfield of Galveston; one son: Richard of Texas City; one step-son: L. H. Gilreath of Wichita Falls; two sisters: Mrs. Frank Simmons of Burkburnett and Mrs. Mildred Fields of Archer City.

Services were conducted Wednesday under the direction of Owens and Brumley Funeral Home of Burkburnett, Rev. Roy C. Morrow, pastor of the Calvary Baptist Church, officiating.

ANYTHING MAY HAPPEN when the Burkburnett Jaycees and Allied students from Sheppard Air Force Base get together for a donky softball game. But that is what will happen here on the night of August 25. The Jaycees will meet the foreign students for the thrilling and exciting contest at the high school baseball diamond at 8 p.m. Even

though the visitors will be mostly from China and other Far East nations, a close game is expected. The proceeds of this game will go to finance projects of the Jaycees such as painting of the Youth Center, donations to Little League Baseball and Girl's Softball League, Labor Day Rest Stop and various other youth projects.

CECIL CURTIS, of Burkburnett, receives a name tag from Mary Marr at a recent training seminar held in Los Angeles, California.

LOCAL MAN WINS AWARD AT RECENT TRAINING SCHOOL

A special award was granted by Bestline Products, Inc., during a three-day intensive training seminar held in Los Angeles recently, to Cecil Curtis from Burkburnett, Texas.

He was among 400 individuals who met at the Statler-Hilton Hotel to attend business sessions conducted by high level personnel.

Bestline Products, Inc., manufactures and distributes household and commercial cleaning products throughout the United States and Canada.

They have experienced meteoric success within the past three years, going from \$16,000 volume a month to over \$6 million in June, 1969. National headquarters are located at 556 North First Street, San Jose, Calif., with manufacturing and warehouse facilities at 1095

North Fifth Street, San Jose. Expansion is now underway for a \$1 million fully-equipped plant which will provide 60,380 square feet at the outset in San Jose, Calif. The company recently established a manufacturing plant in Chicago, Ill., at Elk Grove Village.

Supervender

A new type of office vending system consists of centrally located production and storage facilities with beverages directed to each floor in nickel stainless steel pipelines.

People in high income areas pay the same prices for groceries as those in low income areas, shows a recent U.S. Department of Agriculture survey. The study used stores of the same chain.

Longtime Leader
Since 1905, Canada has been the world's largest producer of the metal called nickel.

Underground Forest
International Nickel's underground mining operations in Ontario require some 40,000,000 board feet of timber each year.

Prices in stores of the same chain located in low and high income areas are about the same, shows a recent U.S. Department of Agriculture survey.

Plentiful foods which will be featured in food stores include pork roasts, apples, potatoes, rice, dry beans and cheese.

Stubblefield Services Held Here Saturday

Funeral services were conducted Saturday afternoon for longtime Burkburnett resident, James Walter Stubblefield, 77, who resided at 711 Park Street. Mr. Stubblefield lived in Burk for the past 40 years and was a former employee of Tucker Oil Company and later Mobil Oil Company. He passed away at his home Thursday afternoon, Aug. 14, following a lengthy illness.

Mr. Stubblefield was born April 3, 1892, in Stone County, Arkansas. He attended Central Baptist Church and was a member of Odd Fellows Lodge.

Services, under the direction of Owens and Brumley Funeral Home of Burkburnett, were conducted at 2:30 p.m. Saturday afternoon with Rev. Max Dowling officiating. Interment followed at the Burkburnett Cemetery.

Survivors include: the wife, Bessie of the home in Burkburnett; one son, Von of Burkburnett; 2 daughters, Mrs. Mary Bishop of Velma, Okla.; and Mrs. Luella McComie of Johnson Bayou, La. Also surviving, three sisters, Mrs. Laura Stewart of Lancaster, Calif., Mrs. Ada Camster of Waxahachie, Tex., and Mrs. Rosie Anderson of Arlington, Tex. Eight grandchildren and 11 great grandchildren also survive.

Pallbearers were: Cotton Kinard, Dave Breuer, T. D. Chapman, Charlie Martin and A. A. Welborn of Burkburnett; and Orin Hofack of Iowa Park.

Food prices will show their rapid climb by the last half of 1968, according to the U.S. Department of Agriculture. Reason: larger supplies of fruits, vegetables and meat and slower rise in income.

Fresh pumpkins on the markets remind that Halloween is near. Pumpkin makes puddings, pies and cakes. Since it is in the squash family, stew it to serve as a side dish.

HERE and THERE AROUND BURKBURNETT

Mrs. Cordie Lawrence and son, Fred left Saturday morning for Daingerfield, Tex., to join their daughter and sister and drive to Ft. Preece, Fla., to visit their son and daughter, Mr. and Mrs. Henry Lawrence and family.

Mr. and Mrs. Dean Duffrey of Midland visited, Mr. and Mrs. Ray Mills one day last week. They are former residents of this community as Mr. Duffrey was connected with the Texas Company and was a co-worker with Mr. Mills.

Mrs. Marjorie Hofack and Mrs. Opal Senkbiel spent a few days last week in Chickasha, Okla., with Opal's aunt, Mrs. K. V. Faris.

Little Miss Carla Ann Greene, daughter of Mr. and Mrs. James Greene and great granddaughter of Mrs. Lillie Cashwheeler of this city, had the misfortune of falling four bleacher steps at

the Frederick Football Stadium Tuesday night. Burkburnett was playing football against Frederick. Carla has a badly bruised hip and leg which is painful but is progressing nicely.

Mrs. John Brookman returned home Thursday from a ten day trip to Abilene, Midland, Houston and Austin.

Mr. and Mrs. W. T. Muhlinghouse of Houston visited his sister and husband, Mr. and Mrs. W. R. Stimpson in Burk last weekend.

Mr. J. B. Ady who suffered a light stroke last week is feeling much improved.

Mr. J. T. Brady, Sr., has returned to his home here after a several days stay in the Wichita General Hospital.

Mrs. and Mrs. Neal Howell of San Antonio arrived Friday for a short visit with his aunt and uncle, Mr. and Mrs. Will Teal.

Mr. and Mrs. Doyle Andrews and children of Marshall, Tex., spent last weekend with her grandmother, Mrs. Lula Neal of 612 E. College. They also visited her aunt and uncle, Mr. and Mrs. Dink Lawson of 709 E. College St. in this city.

Miss Martha Beth Utts of Tyler arrived Wednesday night to be with her mother and attend the funeral of Mr. Grady Fuqua in Grandfield.

Among the out-of-town friends attending funeral services for Mr. Grady Fuqua in Grandfield Thursday were — from Burkburnett, Mr. and Mrs. D. C. Dodson and granddaughter, Ruth Ann; Dr. and Mrs. C. J. Morrison; Mr. and Mrs. Howard Clement; Mr. and Mrs. H. C. Preston Sr.; Mr. and Mrs. Wayne Lax; Mr. and Mrs. C. M. Archer; Mr. and Mrs. R. H. Henry; Mr. and Mrs. Al Lohofener; Mmes. E. E. Clack, J. C. Adams, E. R. Burns, F. T. Felty, Sr., Lewis Brocker, A. C. Houser, A. R. Bunstone, L. J. Foster, J. C. Cauthorn, L. W. Mathis, J. H. Rigby, I. E. Harwell, Gene Robertson, C. C. Gilbert and granddaughter, Gay and friend, Sarah Collins of Crowell, also Roy and Polly McLean of Eunice, N.M., and daughter, Sherry and husband of Albuquerque, N.M.

Baby Shower Honors Mrs. Byron Key

Mrs. Byron Key was complimented with a surprise baby shower Friday evening, August 15th in the home of Mrs. Robert Williams.

Games were played under the supervision of Mrs. I. R. Reagan, followed by the unwrapping of many useful and beautiful gifts for the mother and baby to be. Refreshments were served from a table covered with white lace over a blue cloth. A tall blue stork enhanced the center of the decorations which were all blue and white.

Mrs. Ed Michna presided over the punch bowl, serving punch, coffee and cake to approximately 30 guests and hostesses. Mrs. Key's mother and sister were among those attending. Hostesses were mesdames; Robert Williams, Carl Nelson, F. G. Jeffers, Ed Michna, I. R. Reagan and Rogers Michna.

The TIE that binds

A true love for our Lord and Saviour binds our hearts in Christian love.

This love encourages us to put our energies and efforts together

to serve our Lord at home, at work, and at Church.

A truly wonderful fellowship exists for those who believe and
Worship together. Attend Church and worship with kindred minds.

"That I may come unto you with joy by the will of God,

and may with you be refreshed."

The Church is God's appointed agency in this world for spreading the knowledge of His love for man and of His demand for man to respond to that love by loving his neighbor. Without this grounding in the love of God, no government or society or way of life will long persevere and the freedoms which we hold so dear will inevitably perish. Therefore, even from a selfish point of view, one should support the Church for the sake of the welfare of himself and his family. Beyond that, however, every person should uphold and participate in the Church because it tells the truth about man's life, death and destiny; the truth which alone will set him free to live as a child of God.

Mrs. Gary Yates Moore

WHITNEY-MOORE WEDDING VOWS READ IN LUBBOCK CEREMONIES

In a double ring ceremony at Lubbock's Highland Baptist Church, Saturday evening, August 16 at 7:30 p.m. Miss Lettisha June Whitney became the bride of Gary Yates Moore. Officiant was Rev. I. D. Walker, pastor of the church.

Parents of the bride are Mr. and Mrs. Floyd Whitney, Lubbock, (former residents of Burkburnett). Groom's parents are Mr. and Mrs. Donald Y. Moore of Detroit, Mich.

For a wedding trip to Santa Fe, N.M., the bride chose a suit of red, white and blue. Blue accessories completed her attire.

After returning from the honeymoon, the couple will reside

at 2108 Amarillo, Apt. 3, Plainview. The bride, a 1965 graduate of Lubbock's Monterey High School and 1969 graduate of Wayland Baptist College, will teach English at Plainview High School this fall. While a student at Wayland, she was a member of "Travelers Three" singing group and Sigma Tau Delta, national honorary English fraternity. She also served as president of Baptist Student Union.

The groom will be a junior religion and philosophy major at Wayland this fall. A 1960 graduate of Ottawa Hills High School, Grand Rapids, Mich., he served four years in the United States Air Force. He is employed at O. K. Radio-TV, Plainview.

COUNTY H-D AGENT NEWS Red Cross Offers Swim Courses

Clothing from shirts to raincoats to pants now are available in permanent press fabrics of man-made, cotton or blended fibers. The permanent press finishing process pleats and creases permanently and eliminates wrinkles for the normal life of a garment.

But selecting permanent press garments may be a problem. The only way to know the garment or fabric has the finish is to read the hangtag or label, says Thelma Wirges, county home demonstration agent.

The garment may be higher priced than a similar garment without the finish. However, extra cost may be offset by the need of fewer garments since they can be quickly and easily laundered.

When selecting a ready-made garment with a permanent press finish, ask yourself questions:

1. Does the hangtag give fiber content. Brand name? Washing instructions?
2. Are the seams, pockets, plaques and zippers flat and smooth? Puckers will not come out in laundering.
3. Are there any wrinkles in the garment?
4. Is the color even, with no streaks or mottling?
5. Does the garment fit. Alterations are different to make in permanent press garments.

To improve natural and synthetic fibers for clothing, finishes are invented to improve service qualities and enhance aesthetic qualities of fabrics.

Each textile product undergoes a number of finishing processes. Some are basic, explains Thelma Wirges, county home demonstration agent, such as bleaching cotton, singeing wool and degumming silk.

Other finishes make a fabric more functional. Water repellent, shrink resistant and minimum care are examples, she points out.

Finishes may be added to the fiber, yarn or fabric before or after weaving or knitting to change the appearance, bond or performance of a fabric.

How can buyers tell about finishes on clothing and fabrics? Read the label, is the only answer. Finishes are durable, renewable or temporary, Miss

Wirges explains. A durable finish is permanent and should last the life of the garment.

Dry cleaners are equipped to replace such renewable finishes as water repellency.

One of the biggest concerns on the fabric market today is soil release finish. All washable fabrics will soil and most of them can be washed with good results; but polyester and cotton treated for permanent press performance resist water and often attract oil.

If you are planning to travel you may be interested in tips from Thelma Wirges, county home demonstration agent:

1. Use sheets of aluminum foil as layer dividers in luggage. The sheets are handy for wrapping damp or soiled articles when repacking.
2. Anytime you pack at night for an early morning departure, leave the bag open overnight. The air will keep things from wrinkling.
3. If your bag has ties or slide a piece of cardboard or straps to keep clothes in place, tissue under the buckles or knots when you tighten them. This avoids creases and musing clothes.
4. When packing, wrap your jewelry and other fragile items in tissue paper or in a pair of socks and pack into shoes.
5. If you are carrying an umbrella against the threat of rain, hook the handle to the inside sleeve of raincoat or overcoat. You won't forget it someplace.
6. When a hat gets rain soaked, shake off excess water, not rubbing it in. Turn up brim and push out the dent. Pull the inside leather band out and stand the hat on it. After the felt has dried naturally reshape it.

Let wet shoes dry naturally on good shoe trees.

SHEPPARD AFB, Tex. — The American Red Cross (ARC) will offer three swimming courses to military personnel at Sheppard AFB beginning Monday, Aug. 11 through Aug. 22.

Advanced survival swimming will be taught at the Airman's Pool by Bob Hayes, pool supervisor. This course is open to military personnel and family members (17 years or older) who have completed the senior life saving course. Lessons will be given from 5 p.m. to 7 p.m., Monday through Friday.

Senior and junior life saving will be taught by Bill Missman at the Officers Open Mess Pool between 6 p.m. and 9 p.m., Monday, Wednesday and Friday.

Registration may be made for the advanced survival swimming during normal duty hours except Saturday and Sunday, until 4 p.m. Monday. Anyone wishing to enroll should telephone ext. 6494.

Persons wishing to register for the junior or senior life saving should contact Missman at the Officers Open Mess pool, or telephone the ARC office, exts. 2308 or 4101.

HIDDEN BEAUTY

Rough sawn siding — sawn textured lumber that adorns exterior walls — is best known for making a home seem part of the trees and greenery around it. The hidden beauty is low maintenance. Exterior stain finishes — combining pigment, water repellants and preservatives — have proven extremely durable on rough sawn Southern Pine.

What's A Cheesecake?

The question was cheesecake. "What's a cheesecake?" was the question asked thousands of women in three major cities. The answers indicated that when it comes to cheesecake, there are "traditionalists" and there are the "moderns." The traditionalists prefer a thick, rich variety. Younger women and their families prefer a lighter, fluffier cream base with a fruit topping. To please the younger group, the Kitchens of Sara Lee perfected a new processing technique which for the first time preserves the fresh fruit flavor of specially grown strawberries throughout preparation and storage. The new fruit-topped variety was added to the company's line of blueberry, pineapple and cherry cheesecakes. (And for the traditionalists, there's still the original cream cheese cake.)

POCKET COMPUTER? — Sheppard AFB, Tex. — Maj. Richard N. Mead, chief of the 3630th Flying Wing's Academic Branch, demonstrates the use of a six-foot "pocket computer" used in Sheppard's Undergraduate Pilot Training program. The size of the actual computer is no more than 122 inches long, but the "six-footer" is an important academic aid in the program. It is used for quick aviation computations. (Official USAF Photo by SSgt. Ron Reimer)

Sheppard Pilot Training Program

SHEPPARD AFB, Tex. — Piloting an aircraft from a classroom chair sounds like a difficult task to perform indeed, but actually it is an every day occurrence for the students of Sheppard's Undergraduate Pilot Training Program.

Classroom academics play as much a part of learning to fly as does flying itself. With the use of academic training aids student pilots can easily stay in pace with the fast moving pilot training program and benefit from it.

Maj. Richard N. Mead, chief of Academic Training Branch of Sheppard's 3630th Flying Training Wing, recently explained the importance of academic training aids in the pilot training program.

Before students enter the cockpit of a T-37 jet trainer for the first time, they go through a six-week indoctrination period in which they are tested for aviation physical adaptability, primarily in altitude chambers. They are acquainted with the life support systems aboard the aircraft, are trained in communications techniques, and in parashut training, in case of in-flight emergencies. After these six weeks, school begins for the future Air Force pilots.

As Major Mead stated, "Academic training aids are essential in a training program as we have at Sheppard." It not only saves time and money for the Air Force, but also patience on behalf of the pilots and instructors as well.

Electronic diagrams of aircraft systems, flight and navigational computers that stand six feet tall, portable wind tunnels and classroom response indicators, are all aids designed for efficiency of the course in which they are used. They minimize the time required for the subjects taught while at the same time increase the ability of the student to absorb the study material. "Academic aids contribute greatly to the student's comprehension of the subject," says Major Mead.

Classroom response indicators for example, electronically controlled by computers or visual manual indicators, are easy and time-saving devices for classroom questioning and testing.

After the instructor has given his presentation of a subject and offers questions to the class, students select answers on the indicators on their desks. These answers are easily seen (visually or electronically) by the instructor and can immediately tell which students are answering correctly. The entire procedure takes little time and gives the instructor a means of knowing the progress of each one of his students simultaneously and also his own presentation of the subject. The process also provides a review and confirmation of subject matter and keeps at a high level the student's retention capability.

In another phase of academics is training in communications techniques. Communications is a vital part of flight training. Without proper training in this area, the pilots may waste possibly vital time while in flight, and also hinder the safety of himself and others in the aircraft.

While comfortably seated at a private booth with a headset and frequency selector, the student may practice his voice contact with simulated controllers. An entire mission may be flown in which the pilot can make voice contact using the various frequencies to be found throughout an actual mission flight. In this training, the simulated controllers can "talk" the student pilot through taxiing, take-off, approaches, landings and in-flight communications.

Throughout the entire 53-week training program, each pilot rehearses his mission communications prior to actual mission take-off. This practical experience gives the pilot confidence in his communications and a chance to "polish" his technique.

So before "cockpitting" his way through the skies with silver wings on his chest, the student pilot at Sheppard must receive approximately 540 hours of academic training in 16 various subjects. So when it's said that flying is done by the "seat of your pants," it is not only in the cockpit of a T-37 or T-38 jet trainer, but also in Sheppard's UPT classrooms.
