### COOLIDGE WILL RECEIVE FLIER IN WHITEHOUSE

#### LINDBERGH TO RETURN ABOARD 'MEMPHIS' ABOUT JUNE 11

(By Associated Press) WASHINGTON, June 1.—Charles A. Lindbergh's welcome here will be a demonstration on behalf of the people of the United States extended in the National Capitol.

#### He Says "With Pleasure"

An invitation for Lindbergh to take the Memphis, Ind., was forwarded late yesterday by the cabinet committee appointed by President Coolidge to plan his reception.

The Memphis, Ind., flight across the Atlantic has brought upon him the admiration of the world, would come back to America on the United States cruiser Memphis, to be received personally by President Coolidge in Washington, and to be accorded all honors befitting his accomplishment.

Under present plans the Memphis will come into the Virginia cove, up the Chesapeake bay and Potomac to Washington, but details of the ceremonies when he steps ashore must still be worked out.

Thereafter, the scope of the celebration here remains to be determined, but the numbers of the organizations in and out of the government, seeking to show Lindbergh with honors it is apparent that the welcome home probably will equal in enthusiasm any of the historic triumphal entries into Washington of the past.

Although no official statement was forthcoming today as to plans of New York to welcome Lindbergh home, it was apparent that great

Cupid had an energetic day of it Tuesday, with four couples deciding that after all two can live cheaply as one.

Marriage licenses were issued to Onofre Paschco and Miss Isabel Olivares, C. K. Gaddis and Miss Ruth Reynolds, Elsie William Holloway and Miss Verbie Samantha Frizzell and Calvin F. Fine and Miss Ruth Wilson.

### THREE KILLED, 20 WOUNDED IN CONTINUED ASSAULTS BY MOB AGAINST FLORIDA JAIL

(By Associated Press) TAMPA, Fla., June 1.—With the casualty list standing three killed and more than a score wounded, national guardsmen today continued their defense of the Hillsborough county jail here against a mob which has sought for more than thirty-six hours to break into the prison to get R. F. Levins, confessed slayer of five persons. The three dead men are Hugh Edwards McRae, Hal Piper and Earl McGill.

The siege began Monday night when the mob sought to enter the jail despite assurances by Sheriff Hiers that Levins had been removed to another county. Other attempts having failed to dampen the determination of the mob, the sheriff finally ordered his deputies to open fire. National guardsmen immediately were ordered to the scene but before they arrived early eleven members of the mob had already been wounded.

Today five hundred militiamen were stationed in and about the building "to aid the civil authorities" in maintaining order according to Adjutant General J. C. R. Foster, who announced yesterday at St. Augustine that while martial law was not planned the situation seemed to demand a show of extra military strength.

For a time after arrival of the soldiers yesterday, the mob quieted down and no further disorders were anticipated. Last night, however, the rioting began again when a sergeant leading a detail of six soldiers, was felled by a brick thrown by a member of the crowd which had continued to mill about the jail throughout the day.

The sergeant ordered his men to open fire with their side arms. Six men fell wounded.

That was the signal for the battle to begin again and before the firing had ceased the casualty list had mounted to three known dead and more than twenty were wounded, some of them seriously. Many were removed to hospitals.

**Twenty Are Arrested**  
TAMPA, Fla., June 1. (AP)—Sheriff Hiers announced today that 20 persons had been arrested as members of the mob that attacked the county jail here, and added that every member that can be identified will be arrested. #### GREAT EXCITEMENT IS FELT IN N. JERSEY; DAMAGE SLIGHT

(By The Associated Press) ASBURY PARK, N. J., June 1.—Three earth shocks were felt today in a fifty mile area along the New Jersey coast between Toms river and Sandy Hook.

The shocks were recorded on the seismograph at Oxford university New York.

**Excitement Is Great**  
Great excitement prevailed in the city, residents running from their homes. Newspaper offices, police lines were swamped by telephone inquiries.

The shocks followed one another rapidly, and were described variously as sounding like "dull thuds" and "distant rolls of thunder."

Longbranch, about seven miles north of here, reported one heavy shock at 7:15 a. m. It sent chimneys flying and falling in the earth. At West Longbranch, three miles away, a heavy marble slab on a front porch was moved.

(By The Associated Press) NEW YORK, June 1.—The State Department has asked to investigate the alleged ousting of a Spanish citizen from Mexico under a guise of a deportation, whom he was needed there in a suit between American oil companies, William F. Buckley, president of the Pantapeo C. I. company, one of the parties to the suit, announced yesterday.

The man departed, according to Buckley, was Cecilio Velasco, who had been appointed and later removed as receiver in a suit by the Mexican Pantapeo company against the Trans Continental Oil company, a subsidiary of the Standard Oil company of New Jersey.

Velasco, now in Laredo, Texas, Buckley said, was taken to the center of the border bridge by a party of men who represented themselves as secret police of the attorney general of Mexico, American immigration authorities held him when he crossed the border without a passport.

READ DANCES LIKE MUSIC

PARIS—One-two-three-dip One-two-three-kick. Eight feet forward, turn on the balls of both feet and start again. These, or the most intricate of dance steps, may be read like a music score from the system of "dansographie," a system invented by a Parisian dancing master. He "writes" his dances in strange markings, which heaves the plan will become a universal language of the dance.

HOUSES AND CARS ARE ALSO HARD HIT IN HEAVY DELUGE

Hail stones larger than hen eggs, accompanying a downpour of water from Pleasant Valley Tuesday evening about 2 o'clock unroofed houses, beat crops into the ground, injured stock and punctured automobile tops, over a strip about five miles wide, according to reports reaching here today.

RAIN IS HEAVY

McMakin stated that the stones were in many cases larger than hen eggs and were accompanied by a small cloudburst which amounted to over three inches of rain. Water filled the ditcher and in places was running across the highway over six inches deep he said.

About five million trees have to be cut each year to maintain telephone and telegraph lines.

light knocked out and other damage done, he said, by hail.

The Pleasant Valley lake, which was dry when the rain started, was entirely filled, and hail stones which covered the ground, drifting up in windrows against the fences; and at 6 o'clock many of them were still unmelting.

C. Broome, first to fly to South Africa. All of them attended to pay their respects to the world's greatest airman of all.

TOLD you you carry this stunt far, Hutch!" the taxi driver cried, his upraised hands clenching into fists, with which he seemed to have an urgent desire to...

"Phil Schultz is dead then?" Bob asked, interestedly. "Are you hearing this, Faith?" he called out. "Every word of it," the girl sang out exultingly. "And I have a marvelous memory for conversation."

"Listen mister, I got a proposition to make you," the dark-eyed, unshaven taxi-driver leaned toward Bob and spoke in a whining, confidential undertone, which Hutchinson was vain to interrupt. "This red Hutchison, has been engineering these big jewel robberies papers have been full of for the last six months. It was him that managed the Albright robbery, o. Been the brains of a gang, he is, and he roped me into it. I ain't sayin' how I got out, but he did—see? And when he croaked the lawyer, I thought he was just unging around the house to rob—see? I didn't have no idea he was going to croak the old boy, or wouldn't have done him there at night, all tricked out in his wigar's disguise."

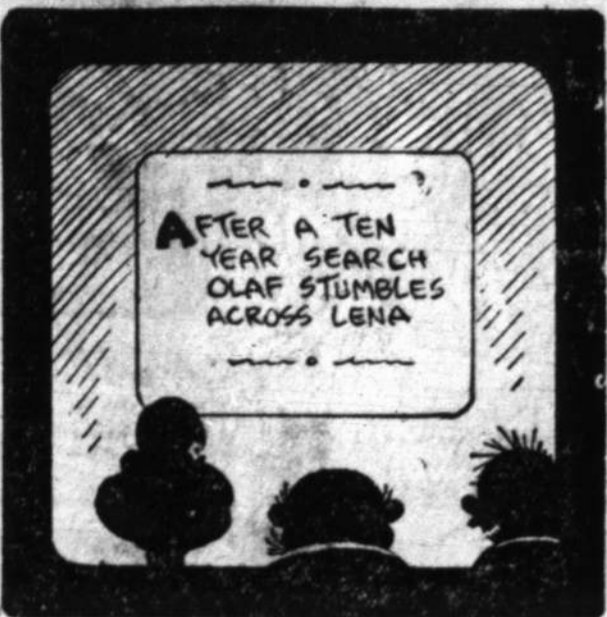

"Oh, Faith!" Bob called. Stop at the first drug store, get out and phone to Churchill. He'll probably be at his home by now. Try his office if he isn't. Tell him we'll wait near the drug store until he can join us. I've got to confer with him before I go any further with this. If it can't be located at once, get the district attorney."

THE PLAINSMAN

The Plainsman has heard a lot about working girls but after thinking the matter over carefully he feels that he has yet to see one. He doesn't mean by that statement that none of the girls who hold jobs and positions work. Some of them probably do for you'll no doubt remember that it is the exception which proves the rule. All The Plainsman wants to drive home is that he has never seen a working girl in her native haunts.

Since writing the above paragraph The Plainsman has interviewed several young ladies who insist that they are 'working girls' in fact as well as in name. 'A girl has to do more work than men because it has gotten to be a habit with men to joke about how little a woman works at a position,' one of them said. 'If we don't do more work than the men we get the name of being loafers and not worth our money.' Statements derogatory to women's working powers are in a class with those made by a few old fops against bobbed hair and short skirts—two feminine styles which are more comfortable, more practical, more healthful and more efficient in every way. It's just the same principle as the man who first jested about what a 'devil' he was when he was young and then turns around and decries the present generation.

After thinking the matter over carefully for the second time The Plainsman hesitatingly admits that perhaps the subject is open to discussion, after all. He doesn't want to be an old fogey.

President Calles has officially ordered a boycott against American manufactured products. Which reminds The Plainsman of the legend of Mohammed ordering the mountain to come to him. Both cases are of identical importance and it is doubtful if 'The Calles' order will be remembered as long as Mohammed's command.

The man who loudly boasts that he doesn't care anything about publicity is the very fellow who gets mad if his name is accidentally omitted from a paper not carrying the names of a hundred people.

It has been from this sturdy independent stock that some of the country's biggest men have come. It is to pass away, the country as a whole is the loser in a way that cannot be computed in the millions of dollars and cents of crop values. It is a factor that should figure prominently in any attempted program of farm relief.

Livestock Slumps... In these days of hard-up Europe, generally, it is a good thing to know that what prices registered on the hoof will bring. A cow's suit now running in Paris, in which the former Alms' Crocker, a Bostonian, (Chilly) woman of the five times married, seeks separation from her prince husband, and gives the latest available market quotation. The price is \$25 a month.

Evidence introduced in the divorce suit indicated that Miss Crocker, wanting a companion, married her prince on the agreement that she was to receive \$250 a month as long as the comely bride desired to remain attached. In case of a divorce, the salary was to go down to \$125 a month.

With prices as low as this, it is a wonder that some husband-traveling agency has not rounded up and supplied the supply of pennies and shillings for the tourist season. With prices ranging only \$250 a month a good count should find plenty of takers at not much more than his toilet and cigars.

A Lesson for Home... Admiral Latimer, commanding American forces in Nicaragua, has issued notice that dismission of all functions is necessary to restore peace in the troubled Central American republic. Ten dollars will be paid for every firearm turned in.

It is just too bad that some such simple measure cannot be adopted here at home. Think what a world of trouble would be saved if this disarmament business were put to work on the gun-toting aristocracy of our all too efficient crime belts.

Eddie In Bad... That interesting young man, the Prince of Wales, is in bad again. Now his troubles arise in Spain. He has refused to attend a bull fight. He has ignored Spanish legislation in order that he might dance with young women of European and American. He attended a general military review in golf pants.

For high crimes such as these surely a social climber has lost his head but it is a fair wager that the good Prince Eddie will somehow manage to survive. The business of royalty, like the old gray mare, 'aint' what she used to be.

WASHINGTON LETTER

HARD TIMES FOR AGRICULTURE MEAN GOOD TIMES FOR INDUSTRY... By RODNEY DUTCHER, NEA Service Writer.

WASHINGTON, June 1.—Let's try to take the soft pedal off the real reason of the industrial east has so vigorously opposed the hopes and plans of the agricultural west for federal farm relief.

Millions of farmers must have put it down to plain cussedness, but there is much better reason to believe that it is traceable to an intelligent self-interest.

For a government analyst has just advanced the theory that agricultural prosperity means industrial depression, and agricultural depression means industrial prosperity. This theory is said to be based on the experience of this country over a period of 50 years.

All this, of course, is directly opposite to common belief. Hard times for the farmer, it was reiterated again and again, meant hard times for everyone. With loss of the great rural market through the farmer's inability to buy, factories would curtail millions be thrown out of work and the country be in a bad way.

Old Theory Blasted... It was a great theory and the farmers prayed it for all it was worth, but it now appears that the farmers were only kidding themselves and the public, while industry knew all along that it just didn't work out that way—or industry would have been as hot as anyone for farm relief.

The department of agriculture has found through the study of its economist, L. H. Bean, that business and manufacturing interests have been as prosperous if not more prosperous in periods of low agricultural prices. It has found, furthermore, that whenever low farm product prices have been accompanied by industrial expansion and prosperity, high agricultural prices have forecast industrial slumps.

The last five or six years, as everyone knows, have seen industrial prosperity and agricultural distress. Bean points out that similar conditions existed in the years following 1875-8, 1884-5, 1896-7, 1914-5 and 1921-22, all periods of relatively low crop prices followed by industrial recovery. The only 'apparent exceptions' noted were 1904-5 and 1908-9.

"On the other hand," he says, "years marked the close of periods of industrial prosperity, suggesting that a shortage of foodstuffs and agricultural raw materials may be an important factor in a business depression."

Bean points out further that abundant farm production, generally meaning low farm prices, means ample business for transportation companies and handlers of farm products; that by furnishing industry with cheap raw materials, it strengthens manufacturers in their struggle for markets; that large crops moved at low prices are a stimulus to many lines of business; that cheap farm products release purchasing power that would otherwise be absorbed in living expenses, and that the great proportion of industry profits when money that the consuming public saves on food is spent for clothing, automobiles, radio sets and a thousand other things.

Farmers Admit It... Having had the old theory of economic equalization so thoroughly blasted after hearing it for so many years, your correspondent dashed around to some of the lead-

ers of farm organizations here who had so earnestly voiced it in the past. Surely they would kick and squirm at the department of agriculture's heresy.

It was said that this was the new trend of thought among many of the most intelligent and best-informed leaders of agriculture, who realized that ours had become a highly industrial civilization and that the American manufacturer had a distinct preference for cheap raw materials and cheap food for the public.

This admission is made on the eve of what is likely to be a successful battle for government aid in the next congress. The old theory probably will not be used any more in vain attempt to inveigle the industrial east. The farmer's case will be fought on its merits—and with plenty of attention to the political exigencies.

Men are outnumbered by women in Paris by 300,000, the cables reveal. The American Legion might change it to 'Ladies, we are here!'

Discovery that 52 insane persons were driving automobiles in Detroit puts the estimate much lower than most of us would have expected.

A strike followed when pebbles were found in the bean soup at Sing Sing. Convicts, seeking for beans in the bean soup at Sing Sing certainly haven't lost their sting, anyhow.

### Two New Bakeries Open At Big Spring

Big Spring, June 1.—Among the many new stores coming to Big Spring during the past few weeks has been two bakeries. One being installed by G. W. Elliott who is just completing the brick store buildings on East Third street. Mr. Elliott will occupy one of his buildings on East Third street adjoining the Big Spring Ice Cream factory and is being operated by Charles Powell, formerly of the bakery business in El Paso, L. J. Lechone of Fort Worth has built on East Second Street an up to date plant mill that is equipped with all modern devices for doing high class finishing work. The Carpenters and General Contractors of the city are finding this mill a great saver of time and an improvement in character of finishing work they are able to put into the many buildings that are being erected here at this time.

Versatility OSTER BAY, N. Y.—In the versatile Roosevelt family the wife can pinch hit for the husband. Colonel Theodore was ill Memorial day. In his place Mrs. Roosevelt made an address at the exercises of the American Legion.

A Slight Error LONDON—As Norman Leslie Derham, British star, has understood it, there is to be a swim on Labor day from Youngtown, Ohio, to Toronto. When he announced cancellation of his plans to compete he found out that paddling over much land and Niagara Falls would have been necessary for the route he thought would be taken. The swim will start at Youngtown, N. Y.

Getting Good NEW YORK—The middle east side is getting good. For the first time in 14 years not one prisoner was arraigned in Yorkville court on Memorial day. Magistrate Brodsky shut up shop in order to see the parade.

All Kinds WASHINGTON—The reason for Mr. Coolidge's coming sojour in the Black Hills seems to have been given in his holiday speech: "The true American contemplates the shores, the mountain and the plain." The president has spent one vacation at Swampscott, Mass., and another in the Adirondacks.

Sacrifice CESAREE, Turkey—This town in eastern Turkey has a railroad connection for the first in history and has 100 sheep and one less camel than before modernity arrived. The animals were sacrificed in ceremony when the railroad was opened.

Sponsors Babies SOFIA—King Boris, who, like the Prince of Wales, is causing everybody to wonder when he will get married, is sponsoring a campaign for more and better Bulgarian babies.

### Medicine Rated As Performing Near Miracles

Thousands of former sufferers from stomach trouble—many of whom had given up hope of ever being well—unqualifiedly endorse "Gordon's," the discovery of a well-known Indian pharmacist, as a medicine for the successful treatment of stomach and bowel troubles. Some go so far as to rate it as performing "near miracles."

"Gordon's" relieves constipation, gas on the stomach, dyspepsia, heartburn, bloating after meals, excess acid, bad breath, sick headaches, nervousness, and stimulates the stomach and bowels to their normal functions.

"Gordon's" is sold by good druggists—\$1.50 for 64 doses—less than 2 cents a dose. Your druggist will refund your money if one bottle fails to benefit. Ask for "Gordon's."—Adv.

### MULLICAN OIL TEST HOPEFUL

Shallow Sand Struck About 450 Down In Wildcat Near Hale Center

Thoroughly convinced that a pool of oil underlies at least certain portions of the Platte, and encouraging in this belief after striking an oil sand at a depth of about 450 feet in the Mullican No. 1 wildcat ten or twelve miles west of Hale Center, Judge Clark M. Mullican, with his father and brother, are now awaiting arrival of smaller casing to complete a part of the formation in which the drill bit is now resting in a favorable sand. It was announced today.

The test, purely a wildcat, is on the ten section tract owned by the Messers, Mullican, and several wells will be drilled if such is necessary to thoroughly prove the territory either with or without oil, it was said.

**Depth Undetermined**  
The depth of the oil sand in the present test has not been determined pending completion of the test of the formation, but the well will be brought in if oil of any quantity is found from a gallon on up, Judge Mullican said.

Other oil sands are known to prevail, one at about 200 feet, and another at about 1,200, both of which formations are to be thoroughly tested, along with all other encountered, if any.

Owners of the tract, who are in complete charge of operations, with no one deriving any profit without production, including the driller, said that if oil is not found in the present formation, the sand will be cased off, and the well drilled deeper, until "we find the pool that we are confident underlies the tract." Other wells also will be drilled if necessary, it was said. The contract depth on the present well is for 3,500 feet.

### Scoutmasters Are To Be Given Full Instruction Here

A scout master's training course will be opened in Lubbock next Tuesday evening at the Baptist church where three nights' instructions will be given to persons interested in boys' work here. A. H. Watts, scout executive, will have charge.

Old scout masters as well as some who have just joined the force are expected to attend the courses which will elaborate upon up-to-date methods of handling scouting activities. Anyone interested in scout work is asked to attend. About 14 have signified their intention of joining so far.

Tuesday evening the purposes of scouting, programs recommended for troops, instruction methods and the requirements which being a scout demands of a boy will be discussed. Drills, games and scout amusements will also be talked over, and the nine methods commonly employed in teaching members of the troop scouting will be brought up.

Wednesday evening the work of the troop committee will be taken up, the duties of the committee determined, and the functions and work which a committee should perform outlined. Methods of getting the troop committee to work will be related to the scout masters.

Thursday evening the patrol system will be studied, including the organization of patrols in accordance with the "gang" spirit, selection of leaders and methods of securing co-operation of patrol leaders and scouts.

Drills, games and a little comedy promise to prevent the school from being monotonous.

### Menfolks Lovers Of Dogs Reports Keeper Of Pound

Menfolks are the owners and lovers of dogs, according to the records of the city offices, which shows that 73 dogs have been registered since Monday when the new dog ordinance went into effect. Of this number eleven were registered by women and the remainder by men.

Under the terms of the city ordinance the dog to legally exist must be vaccinated against rabies and must have a city license tag bought for him.

Between forty and fifty dogs have been captured and impounded by the poundman, Kerby McDonald, since Monday. Owners wishing to ransom them out may do so provided they act within the next day or so.

Names and descriptions of the dogs would indicate that they are kept for the sake of companionship, and that the mongrel is as dear to the heart of the owner as is the pedigreed animal.

For instance T. E. Taylor possesses a white spitz dog by the name of Snowball, of which he is very fond. R. M. Little calls his dog Boby—it is just dog, while L. F. Hinesner's airlead goes by the name of Pal. J. M. McGinnis's fox terrier is also named Pal, while J. E. Hamilton calls his brindle dog Pat. Bob Pressley's Jumbo is also just dog, while Chas. Whitacre's Lady is the best of pedigreed Boston bulls. Mrs. D. Johnson calls her white French poodle "puppie" and A. H. Chase has bestowed the title of "Buddy" on his Boston bull. C. D. Chase prefers the English bulldog and named his Jack.

**CHICKEN HAS FOUR LEGS**  
ORANGE, Texas—Maggie Knox, negro, entered her chicken house the other day, stared open mouthed at a tiny creature that scuttled about the floor. It was a four legged baby chick, healthy, even stronger than the others of the new brood. Maggie smacked her lips at the prospect of four drumsticks to each fowl, longed for a way to perpetuate the species.

Retiring after 45 years' service as a lamp-lighter in England, George Way is a son and a grandson of lamp-lighters, while his son and a cousin also follow that occupation.

**CLOROX removes scorched spots**

Dread of scorched spots no longer makes ironing a burden to the housewife who keeps a bottle of Clorox, the modern bleach, always at hand. Scorched spots on napkins, table cloths, and other white linen or cotton clothes, vanish when treated with Clorox. Be sure to follow the directions on the Clorox label.
