Moon Quakes Awaited

By BILL STOCKTON
AP SCIENCE Writer

SPACE CENTER, Houston AP — Scientists are waiting for a flurry of moonquakes this weekend that might help pinpoint a region deep in the moon where 80 per cent of the lunar temblors observed seem to originate.

They have speculated the regions might be pools of hot liquid rock.

If the shudders are recorded by all three seismometers now on the lunar surface, including the new one left at the foot of the Apennine Mountains by Apollo 15, the experts hope they will be able to determine the precise source of the moonquakes.

Dr. Gary Latham of Columbia University's Lamont-Doherty Geological Laboratory said he expects the temblors today or Sunday because the moon will be closest to earth.

This is when earth's gravitational pull on her satellite will be greatest. It has been during this passage each month, called perigee; that the moonquakes have been observed.

Using a seismometer left by Apollo 12 in the moon's Ocean of Storms in November 1969 and one left in the lunar highlands at Fra Mauro last February by Apollo 14; Latham has determined that 80 per cent of the temblors came from a single region.

The two instruments also located another 10 zones of smaller seismic activity.

"If the source of high activity is well to the south of the Apollo 12 and 14 sites rather than to the north and between the three stations, we may not be able to see it on the Apollo 15 seismometer," he said in a briefing. "But if it happens to fall between those three stations, then I think there is very little doubt we'll see it.

"And if we see it on all three instruments we will be able to locate it."

The Apollo 12 and 14 seismometers are 100 miles apart just below the moon's equator and form the base of a triangle. The Apollo 15 instrument 600 miles to the northeast is the triangle's apex.

The moonquakes; which occur "like clockwork" during each perigee; first were observed with the Apollo 12 seismometer. Based on those observations, Latham suggested that a rille or canyon near the landing site was interacting with earth's gravity to cause the temblors.

But after observing the quakes with two instruments when the Apollo 14 seismometer was erected, Latham discovered the regions of activity deep in the moon and discarded the rille idea.

He has proposed, as a tentative explanation, that the regions might consist of pools of hot liquid rock. During perigee; the earth's gravity forces the liquid rock, or magma, out into cracks in the surrounding lunar interior, causing the quakes.

Today In History

By THE ASSOCIATED PRESS

Today is Sunday, Aug. 8th the 220th day of 1971. There are 145 days left in the year.

Today's highlight in history:

On this date in 1940, Germany began its concentrated bombing of Britain in World War II.

On this date:

In 1588, British sea forces destroyed the Spanish Armada.

In 1673, the Dutch recaptured New York and New Jersey from the British.

In 1776, John Paul Jones was commissioned a captain in the American navy.

In 1815, Napoleon Bonaparte sailed for the island of St. Helena, where he died in exile.

In 1945, the Soviet Union declared war on Japan-seven days before the Japanese surrendered in World War II.

In 1963, a gang of robbers staged a train holdup near Cheddington, England getting away with more than $7 million.

Ten years ago: A New York psychiatrist, Dr. Robert Soblen, was sentenced to life in prison on charges of spying for the Soviet Union.

Five years ago: A 17-year-old girl, wounded during a shooting spree by Charles Whitman in Ausitn, Tex. died-making a total of 16 persons killed by the young man.

One year ago: A rare silence settled on the Suez Canal on the first day of a Middle East cease-fire.

WEATHER

SNYDER TEMPERATURES: High reading Friday, 84 degrees; low reading, 62 degrees; reading at 7 a.m. Saturday, 64 degrees.

Northwest Texas: Mostly cloudy, chance of thundershowers Monday. Partly cloudy Tuesday and Wednesday. A little warmer north portion Tuesday. Highest temperatures ranging from near 80 to near 90. Lowest temperatures from upper 50s to around 70.

North Central and Northeast Texas: Mostly cloudy, chance of thundershowers Monday. Partly cloudy Tuesday and Wednesday, chance of thundershowers north portion Tuesday. Little change in temperatures. Highest temperatures ranging from mid 80s to mid 90s. Lowest temperatures from near 70 to mid 70s.

Southwest Texas: Partly cloudy and mild with a chance of showers or thundershowers on Monday over the north portion. Highest in the upper 80s. Lowest in the mid 60s north portion to the low 70s south portion.

South Central and Southeast Texas: Partly cloudy and mild. Highest near 90. Lowest in the low or mid 70s.

New Mexico: A few locally heavy thundershowers in mountains and northeast plains tonight. Otherwise variable cloudiness with scattered showers through Saturday. Lows tonight in 40s in mountains and 50 to 65 lower elevations. High Sunday in low 70s mountains and 80s lower elevations.

Oklahoma: Mostly cloudy and mild with scattered showers and thunderstorms through Sunday. Low tonight in 60s. High Sunday in 80s.

S-Viets Advance Offensives

By GEORGE ESPER
Associated Press Writer

SAIGON (AP) — South Vietnamese troops in eastern Cambodia and Laotian troops in their country advanced today in monsoon offensives aimed at disrupting enemy supply lines, and the U.S. Command reported a mortar attack against an American unit in South Vietnam.

The command said 10 mortar rounds fell into the positions of a unit of the 196th Brigade, about 25 miles south of Da Nang. Some Americans were wounded but none were killed, it said.

The Saigon command reported that its forces killed 79 North Vietnamese and Viet Cong troops in two clashes Friday about 70 miles apart in eastern Cambodia, north and south of the Phnom Penh—Saigon highway. A communique said 14 South Vietnamese soldiers were killed and 32 were wounded.

South Vietnamese reconnaissance units guiding armored vehicles 12 miles north of Highway 1 came under heavy enemy fire and had to call in infantry reinforcements and tactical fighter-bombers.

Public Invited To Art Exhibit

Persons interested in taking Art or Crafts classes at Western Texas College, and the general public are invited to attend an introductory art exhibit Aug. 10, from 6 to 9 p.m., at the WTC offices, C. Warren Cullar, assistant professor of art, has announced.

The art work displayed will represent skills and techniques that will be taught in various courses in the Art Dept. this year. Works to be shown in the exhibit will include those items produced during the summer by Mrs. Carol Cullar, WTC instructor of art. Prof. and Mrs. Cullar will show such diverse works as watercolors, lithographs, drawings, macrame, weavings, batik, cast silver jewelry and ceramics.

Cullar stated that most of the items displayed can be produced by students through class work in the courses to be offered. The courses offered the first semester by the Art Dept. will be Art Appreciation and Freehand Drawing taught by Prof. Cullar. Another course in Freehand Drawing and a course in Crafts that will cover batik, macrame and weaving will be taught by Mrs. Cullar.

The public is invited to visit the introductory exhibit. Members of the faculty will be on hand to answer questions about other class work. There will be coffee and refreshments.

BODY FOUND

Youth Admits Drowning Girl

HOUSTON (AP) — Police said a body believed to be that of a Houston teen-aged girl missing since last Wednesday was discovered today in a remote bayou north of Houston.

Police Sgt. Jack Miller said there was no doubt that the body was that of Martha Cook, 16. Miller said however, that positive identification was withheld until a medical examiner could reach the scene, about one mile west of U.S. 59 in Green's Bayou.

Miss Cook disappeared last Wednesday and relatives reported a burglar had taken some of the family belongings for the second time in two days.

The discovery of the body was made by a police helicopter, which started searching the area after an 18-year-old admitted heroin user said he drowned the girl when she caught him burglarizing her home.

Juvenile officer P. W. Strickland said Terry Gene Simmons, 18, of Houston gave questioners a signed statement about the girl's death shortly before taking a lie detector test.

Strickland quoted the youth as saying he forced the Cook girl to leave with him after she found him inside her home but planned to leave her beside the bayou.

Instead, Strickland said, the youth related that she started screaming, he panicked and held her under water until she drowned.

No charge was filed at once in the girl's death.

Detectives had charged Simmons earlier with burglary at the Cook home and with possessing heroin.

The youth was arrested late Friday night after police questioned a teen-age boy and girl suspected of passing $66 in coins taken Tuesday from the Cook residence.

Officers had said earlier that they believed the missing girl was kidnaped by an intruder the next day.

Yearbooks To Be Distributed Mon.

The 1971 edition of the Tiger's Lair, Snyder High School's yearbook, will be distributed in the foyer of the auditorium Monday, from 9 a.m. to noon, and from 1 to 3 p.m.

All yearbooks not picked up Monday will be available in the journalism department at high school after school starts August 30. Extra yearbooks will go on sale Sept. 12.

STUDENT ARRIVES — Amelio Vargas Mena (second from left), was honored at a breakfast meeting of the American Field Service at the Steak House Saturday morning. He is a foreign exchange student from Costa Rica. Here, he is shown with his American family, from left to right, Mike Dennis, Jal Dennis, Pat Dennis and E. B. Dennis. They met him at the airport in Lubbock Friday night.

Snyder's AFS Student Honored At Breakfast

Amelio Vargas Mena, 17-year-old foreign exchange student from Costa Rica, arrived in Snyder Friday night prior to beginning a year of study at Snyder High School under the auspices of the American Field Service.

Amelio was met at the airport in Lubbock by his American family, Mr. E. B. Dennis, his wife, Pat, and their children, Mike, 17, and Jal, 15. Also present to greet the new student were Mr. and Mrs. Frank Taylor and Mr. and Mrs. Roy Carter. Frank is president of the local chapter of the AFS. Carter is vice-principal at Snyder High School.

The new student was honored at a breakfast of the AFS, held Saturday morning at the Steak House. Renal Rosson, state representative from Snyder presented Amelio an honorary Texan certificate on behalf of Gov. Preston Smith. Others present to give their official welcome were County Judge Preston Wilson, Mayor Bobby McCormick, Chamber of Commerce President Mel Gilbert and Roy Carter, who presented Amelio a high school annual.

Frank Taylor presided over the breakfast meeting. Cecil Boren gave a financial report. Anyone wishing to help with the foreign exchange program may make financial contributions to the local chapter of the AFS.

Mrs. Bob Hargrove, who recently visited Chile, gave a report on her trip to that country. She told of visiting four AFS students while there.

Amelio's father also is named Amelio. He is a retired telegraph operator. His mother, Virginia, is an assistant bacteriologist. An older brother, Francisco, 20, is a student at the University of Costa Rica where he is studying microbiology.

Amelio also plans to become a microbiologist.

His hobbies include soccer, mathematics, chemistry and biology. He would like to learn how to play the organ.

Following his welcome to Snyder by the local citizens, Amelio said that he was grateful for his reception and that it is "very nice to meet you."

Mrs. Roy Meador, who was host to Helga Burger, the foreign exchange student last year, told those present that she has received a letter from Helga. She said that she has arrived safely at home.

ON-MERRY-GO-ROUND

United States Loses Reserves

WASHINGTON (AP) — In a merry-go-round financial deal involving four other countries, the United States will lose almost one-thirteenth of its total international monetary reserves Monday.

The billion-dollar deal, reflecting continuing weakness of the dollar overseas, will cut the Treasury's gold stock further and bring the nation's international reserve position to the lowest level since 1937.

At the end of June, U.S. international reserve assets, including $10.5 billion in gold, totaled about $3.5 billion. On Monday, it will drop to $12.5 billion.

That's when the Treasury will draw the equivalent of $862 million from the International Monetary Fund in Belgian francs and Dutch guilders. The U.S. debt to the IMF will have to be repaid somehow.

The Treasury will exchange the francs and guilders for dollars the Dutch and Belgian governments have but don't want.

The Dutch and Belgian governments got the dollars from France and Britain, countries which badly needed the guilders and francs because they owed a total of $1.2 billion to the IMF.

The IMF wouldn't allow the French and British governments to pay off their debt in dollars because it is floodded with them already.

Each country has a quota of currency that can be held as reserve assets in the fund. The United States is some 4 per cent above that quota in dollars.

So the French and British swapped their dollars for guilders and francs to pay off part of the debt to the IMF.

Under IMF rules, a portion of that debt must be paid in gold. France needed its gold, so it used $191 million of its dollars to buy that much U. S. gold to give to the IMF.

What does that leave the United States? Shorter by $1.053 billion in international reserves, $862 million of it in foreign currencies and $191 million gold.

The complex deal has no relation to the continuing international currency crisis over the dollar, except in one sense.

WTC Is Given VA Approval

The Veterans Administration has given its approval to Western Texas College course work in order for Veterans enrolling at WTC to receive VA educational benefits, according to Mrs. Wilma Crawford, WTC financial aids officer.

Mrs. Crawford stated that "courses listed on pages 49-68 of the WTC catalog, as accepted by the Texas Education Agency for credit toward a teacher's degree or certificate, have been approved."

Also approved were those Technical and Vocational courses in Automobile Mechanics, Diesel Mechanics, Welding, Law Enforcement, Mid-management, Office Occupations and Vocational Nursing.

Previously, veterans who had applied for educational benefits at WTC were informed by the VA that the school had not yet been approved. Mrs. Crawford advises those veterans to write to her for the correct application procedure, and she will forward it.

The VA approval is issued under the provisions of Section 1775 (a) (2), and (3), Chapter 36, Title 38, and is based on the standards of the Texas State Plan for Vocational Education and the accreditation and approval by the Texas Education agency. Approval becomes effective Aug. 26, 1971.

With Rock Collection

ABOARD U S S OKINAWA (AP) — The Apollo 15 astronauts have ended their 12-day voyage of discovery with a splashdown in the Pacific Ocean about 330 miles north of Hawaii.

The commans ship "Endeavor" dropped into the water after a blazing re-entry through the Earth's atomsphere. During re-entry, the temperature on the protective heat shield reached more than 4,000 degrees. The re-entry began when the spaceship smashed into the atmosphere 76 miles high. . .at 24,600 miles an hour.

They returned with a rock chip they believe is part of the original lunar crust and with the first detailed photos of the hidden side of the moon.

Apollo 15 landed within about seven miles of their recovery ship.

Apollo 15splashed down at 4:46 p.m. EDT—right on time.

Astronauts David R. Scott, James B. Irwin and Alfred M. Worden reported moments later that all was well aboard the craft.

"Everybody's in good shape," said Scott.

Aboard their command ship Endeavour are science materials which are expected to take scientists years to completely understand. This includes a crystalline rock which may be part of the moon's original shell and the most detailed photos yet of the back side of the moon.

Endeavour came home to almost perfect weather and landed almost precisely on target, about 330 miles north of Hawaii.

The only flaw in the return to earth was failure of one of three main parachutes to deploy properly. However, the spacecraft is designed to land with only a single chute and the two which worked perfectly were enough for a safe splashdown.

There was no immediate explanation of why the chute did not open.

White-suited sailors lined the deck of the recovery ship to watch the return of the moon voyagers. They could easily watch the spacecraft's descent under its large parachutes and its splash into the ocean. Television cameras beamed pictures of the scene to the United States.

MARGARET HOLT

Rites For Mrs. Holt Set Today

Mrs. Wayland G. Holt, 56, wife of the district judge of the 132 district of Texas, died at 12:05 p.m. Friday in Cogdell Memorial Hospital. Funeral will be held at 3 p.m. Sunday in the First Baptist Church with the Rev. Raymond Hall, pastor of the church, officiating, assisted by the Rev. Jack Riley, associate pastor of the church, and Dr. A.B. Lightfoot of Brownwood. Burial will be held in Hillside Memorial Gardens under the direction of Bell-Seale Funeral Home.

Mrs. Holt was born September 26, 1914 in Jonesboro. She married Wayland Holt, March 29, 1942 at Gatesville. She had lived in Snyder for the past 22 years and made her home at 3102 Forty-first Street. She was a member of the First Baptist Church. She was active in church and civic affairs. She taught a Sunday School class at the First Baptist Church for 20 years.

Surviving are the husband of the home, two daughters, Mrs. Marguerette Shamburger of Big Spring, and Mrs. Anita March of Houston; one sister, Mrs. Irene Price of Security, Colo.; four brothers, Gorman Rutherford of Pasadena, Harrell and James Rutherford, both of San Antonio, and Garland Rutherford of Pampa; and two grandchildren.

Pall bearers will be Ray Lunsford, Lester Moore, Nathan Mearse, Sam Stephens, Mel Gilbert, R.C. Patton, Bob Melton, G.W. Ferguson, Roy Carter and M.P. Herring. All deacons of the First Baptist Church and the members of the Scurry County Bar Association will be Honorary pall bearers.

New Students To Register

Students who are entering the Snyder Public Schools for the first time this year and who will be in grades seven through twelve are asked to register on Thursday, August 12, between the hours of 8:30 - 12:00 noon and from 1 through 4:30 p.m.

These new students in grades seven, eight, and nine are to register in the office of the junior high school in whose attendance zone they live, while tenth through twelfth graders will register in the office of Snyder High School.

Every effort should be made by each student to register on this date in order to insure a smooth first day of school on Monday, August 30, school administrators said.

Pastor in a dilemma over 'other woman'

By Abigail Van Buren

(© 1971 by Chicago Tribune-N. Y. News Synd., Inc.)

DEAR ABBY: Mine is an overwhelming problem. I am a pastor in a small church in a small town, so no names, please.

When my wife and I were married we were very much in love, but little by little the romance went out of our marrige, until our sexual relations became mechanical and meaningless. Consequently I became very restless and frustrated.

A lady who is a member of my church has been coming to talk to me. I find her extremely attractive, and the feeling is mutual. She confessed she could love me if I were free to love her. Please understand, we have not committed any wrong. We haven't even kissed, but we have talked about our love and how happy we could be together. This has made us more miserable.

Any suggestions you or a clergyman of any denomination can offer will be greatly appreciated. ANONYMOUS

DEAR ANONYMOUS: I offer the following alternatives: [1] Sincerely try to repair your marriage. The excitement of a tired marriage can be revived if both parties are willing to work at it. You may have to consult a qualified marriage counselor, but don't let that discourage you. It indicates strength, not weakness. [2] You could ask for a transfer to another community, terminating your relationship with Number Two. Or Number Two could move away. [3] Ask Number One for a divorce and marry Number Two. I suspect this is what you would like to do since you are obviously physically attracted to each other, but the emotional repercussions would probably cost you more than you are prepared to pay.

I recommend the first alternative. God bless.

DEAR ABBY: My husband and I can never settle our differences by talking them over. To him any discussion is an argument, and he hates arguments. He will say, "All right, have it your way," then he clams up and hardly speaks to me for days. I always end up saying I am sorry in order to coax him back into a good mood.

I am sure both sides of the question are worthy of being heard, and even if the discussion turns into a knockdown-drag-out argument, it is better than both of us bottling up our resentments.

We both read your column. Please comment. M. H.

DEAR M. H.: Tell your husband to grow up. Harbored resentments frequently come out in strange forms. [Stomach ulcers, for instance.] I'm not for knockdown-drag-out arguments, but they beat ulcers.

DEAR ABBY: How important is dancing in a marriage? I am engaged to a man who loves to dance. Ron danced a lot before he met me. I have never danced and I don't care to learn. You see, I am sort of against dancing. I am also against going to places where there is drinking and Ron goes to nightclubs so he can dance. He's not a big drinker but he will have one or two because he has to order something.

Don't get the idea I am a stay-at-home. I'm not. I just don't care for nightclubs. Ron is 25 and I am 19 and we love each other, but I wonder if our marriage will work out with these differences between us. WONDERING

DEAR WONDERING: The big question here is not how important dancing is in a marriage, but how important it is to Ron. If he loves to dance and you are sort of against it, he will either have to give up dancing to please you, or go dancing without you. Either course is unhealthy for your marriage. I vote for a longer engagement.

What's your problem? You'll feel better if you get it off your chest. Write to ABBY, Box 69700, Los Angeles, Cal. 90069. For a personal reply enclose stamped, addressed envelope.

WTC Registration Schedule Issued

A reminder that registration at Western Texas College will be held Aug. 26-27, at Trinity Methodist Church, was issued by Dr. Duane Hood, director of admissions-registrar.

Activities will begin at 8:30 a.m., Aug. 26, with a general orientation for all full-time students at Trinity Methodist Church. Regular registration will begin at the church at 10 a.m., and those who have pre-registered will complete their registration on the first day. All part-time or evening students will register for their courses beginning at 6:30 p.m. All other students will register Friday, Aug. 27, between 9 a.m. and 5 p.m.

Dr. Hood said that the complete schedule for registration is as follows:

Thursday, Aug. 26, 1971

8:30 - 10:00 a.m. — General Orientation for all full-time students.

10:00 - 11:30 a.m. — Registration for pre-registered students whose surnames begin A–H.

1:00 - 3:00 p.m. — Registration for pre-registered students whose surnames begin I–Q.

3:00 - 5:00 p.m. — Registration for pre-registered students whose surnames begin R–Z.

Friday, Aug. 27, 1971

9:00 a.m. - 5:00 p.m. — Registration for all other students.

All fees are due at the timeof registration. The college registration will cap 55 years of community effort and mark the realization of a dream. Western Texas College will open its doors for the first time, and become West Texas' newest effort in public education.

Rainfall Lingers In Texas

By THE ASSOCIATED PRESS

Gag men call it good weather for ducks, the kind Texas keeps on having.

Showers and thunderstorms extended their stay in the Lone Star State today, but the amounts of rain generally were a bit lighter than the deluges which have flooded some sections the past week.

Prospects looked good for the rainfall to last at least another day, even in the Corpus Christi area where shallow flooding had forced several hundred persons from their homes.

Turbulence developed also in parts of South Texas and scattered other areas Friday afternoon. A tornado damaged a laundry on the south side of Corpus Christi and two other funnel clouds were spotted aloft, but there were no injuries.

Reports of other twisters came from Freer, in South Texas, and Abilene, in the west central part of the state.

Officials estimated about 300 persons had been unable to return to homes at Robstown, west of Corpus Christi, since muddy water rose as much as three inches deep in some dwellings.

Much of the shower activity during the night and early today extended from Central Texas into the south and east parts of the state. Thunderstorms developed in the Texas Panhandle as well, and a few showers popped up near Midland in West Texas and close to Gainesville and Greenville in North Texas.

BIRTHS

Mr. and Mrs. John Harty, Dunn, are the parents of a baby girl, born at 10:50 p.m. Aug. 6. She weighed 9 lb. 5½ oz.

HOSPITAL NOTES

ADMISSIONS: Janice Harty, Dunn; Leona Cadena, Rt. 2, Hermleigh; Florence Lindsey, 1512 Ave. R; Donna Roemisch, Rt. 1, Hermleigh; Margaret Hernandez, Rt. 2; Mary McCollum, 1905 Nineteenth.

DISMISSALS: Mrs. Jimmy Ballard and Baby girl, Mrs. Bobby Wilson and baby girl, Kelly Givens, Thelma Clark, Raymond House, Santos Larralde, Idolph Crooks, Mike Graves, Betty Palmer, Barbara Hopper, Harold Bowman, Mark McClure, John Davis, Sally Callazo.

Several Thefts Are Reported

City Police are investigating several thefts that occurred Friday.

Someone stole three truck batteries from McDonald Welding Company, 1110 Avenue S.

Golf equipment and a billfold containing $85 in cash were taken from Mitch Rambin's car while it was parked at 4001 Irving.

Someone stole a purse from the car of Marilyn Crownover, 2207 Forty-second Street, while it was parked at 3749 Sunset. It contained $2 and several credit cards.

Six rods and reels were taken from an abandoned service station next to the B&J Welding Service on the Lamesa Highway. The theft was reported by Bill Guynes.

Minor Mishap

Minor damage resulted from a two-vehicle collision in the 2800 block of Avenue L at 3:05 p.m. Friday.

Involved were the 1969 Model Plymouth of Terry Dean Butler, Arah Route; and the 1965 Model GMC pickup of Laurence James Smith, 3608 Avenue M. Officer Bill Roach investigated the mishap.

BEARBACK RIDER — This is how an ingenious youngster in Glendora, Calif., a Los Angles suburb, solved the problem of how to transport his oversized teddy bear from here to there. (AP Wirephoto)

IN JAPAN

Armstrongs At Scout Jamboree

ASAGIRI, Japan (AP) — Astronaut Neil A. Armstrong, in the words of U.S. Ambassador Armin Meyer, looked "a bit more like a Boy scout" today when he showed up in a scout uniform at the 13th world Boy Scout Jamboree.

Armstrong was accompanied by his 14-year-old son, Ricky, who was also in scout's uniform, and Meyer. The Armstrongs were guests of the Boy of Nippon, who helped to organize the jamboree at a 550-acre site on the slopes of Mt. Fuji, about 90 miles west of Tokyo.

The Armstrongs first visited the camp site Friday when it was covered with heavy mist and its ground was oozing with slimy mud and flooded because of a storm that began Wednesday afternoon, forcing camp officials to move about 23,000 scouts to drier shelter in nearby Fujinomiya city.

Today Japanese Crown Prince Akihito and his wife Michiko also were guests of the jamboree. They met and had a brief conversation with the Armstrongs at the campsite.

"We're very glad that you came to Japan," Akihito told Armstrong in English, after Meyer had introduced him to the first man to have walked the surface of the moon. Armstrong said: "It's a great pleasure to be here."

He then introduced his son to the royal couple.

The crown prince asked Ricky: "is this your first visit to Japan?" without waiting for an answer, he added: "I hope you will enjoy your stay here."

The astronaut's son smiled but didn't reply.

The meeting took place as the royal couple walked down a line of World Boy Scout movement officials and representatives of the 23,770 scouts and scouters from 96 countries who are participating in the jamboree.

The royal couple's visit was postponed by one day due to the storm. Japanese officials said Friday Ahikito and his wife will return to the campsite Sunday to watch a grand parade at an open air arena here.

Although still overcast, with frequent downpours, the weather at the camp site today was a great improvement over the previous three days. Some of the evacuated scouts and scouters were being transported back to the jamboree site when the royal couple and the Armstrongs arrived.

Former Snyder Resident Dies

Mrs. J. W. Templeton of Houston died Friday afternoon in Houston. She was the former Leona Strayhorn, a native of Snyder.

Private funeral services for Mrs. Templeton will be held this afternoon in Houston.

She was the daughter of the late Mr. and Mrs. Joe Strayhorn, earlyday settlers of Snyder. She was married to J. W. (Jim) Templeton, who was a citizen of Snyder. He preceded her in death in 1965.

She is survived by one daughter, Mrs. James Atkins of Houston; one son, James Richard Templeton of Houston; a twin sister, Neoma Strayhorn of Snyder; two other sisters, Mrs. Walter Cork of San Angelo and Mrs. Phil Boucher of Post; one brother, Rob Strayhorn of Rotan; and four grandchildren.

Del Rio, San Felipe Schools To Merge

TYLER, Tex. (AP) — Del Rio and San Felipe schools, which are next door neighbors on the Mexican border, are under court order to consolidate.

U. S. Dist. Judge William Wayne Justice issued the directive Friday night after a nine-hour court session.

He instructed the Del Rio school district and the Department of Health, Education and Welfare to submit plans for the consolidation at an Aug. 18 hearing.

Justice said he would hear any recommendations the San Felipe district might desire to offer on that date.

The jurist said no school or classroom should have more than 66 per cent of a minority group.

The combined districts would be about 75 per cent Mexican-American, with the remaining pupils Anglos except for a few Negroes.

Justice said if busing of school children is included in plans for integration, the two districts should share the burden equally and he did not want the San Felipe children to bear that burden.

In another case before Justice, the Texas Education Agency seeks to suspend the accreditation of 34 Texas school districts, including Del Rio, unless they stop accepting pupil transfers calculated to delay desegregation.

Loss of accreditation would deny the affected districts the state and federal money they now receive.

The TEA has refused to approve a request by parents of 729 pupils living at Laughlin Air Force Base to transfer from the San Felipe district, in which the base is located, to the Del Rio district.

In the 14 years since Laughlin opened, children of base military personnel have attended Del Rio schools.

The San Felipe district has about half the number of pupils that are in the Del Rio schools. Its enrollment is 98 per cent Mexican-American, with the remainder Negroes.

Dr. John R. Graham, acting assistant commissioner of the Texas Education Agency, testified that the proposal of the Del Rio district to consolidate appeared to be educationally and fiscally sound.

Lawyers for the San Felipe district, opposing the consolidation, told the court that the Del Rio district had received more than $3 million over the past three years under impact aid programs for the education of Laughlin children.

Counsel for the U.S. Justice Department introduced a 1956 agreement in which the San Felipe school board waived all rights to educate school pupils living in Laughlin Air Force Base housing.

3 Snyderites To Receive Degrees

Three Snyderites are among the 111 candidates for degrees in summer commencement to be held Friday at Hardin-Simmons University.

Receiving their Bachelor of Science Degrees are Karen O. Conners, Carol E. Minyard and Glenn Marcus Thomas.

Others in this area due to receive degrees are Erick James Conard of Colorado City, Robert Lee Pieper of Loraine, Rachel Galan of Roby, Richard E. Berry, Jimmy Ruth Crowder and Ronald L. Wade of Roscoe, and Patsy N. Cox of Rotan.

Snyderite's Mother Dies

Word has been received here of the death of Mrs. Viola Russell, 86, who died in DeQueen, Ark. at 8 a.m. Saturday, after a lengthy illness.

Mrs. Russell was the mother of Mrs. Ruel Stinnett of Snyder.

She is survived by two sons and three other daughters.

Funeral services are pending in DeQueen.

D.L. Bavousett To Get Degree

STEPHENVILLE, Tex. — Daniel Lee Bavousett of Snyder will be a candidate for the Bachelor of Science Degree in Agriculture Education at graduation exercises to be held at Tarleton State College Sunday, Aug. 22, at 3 p.m.

TSC registrar John Whiting has announced that 108 students will be candidates for graduation to conclude the second six weeks of the current summer session.

MRS. JAMES MYERS ALSUP

(Photo By Craft)

Jones, Alsup Wed In Double Ring Ceremony

Wedding vows were exchanged August 7 at 8 p.m. at the First Christian Church by Rebecca Jones and James Myers Alsup. Rev. William Parkey, former pastor of the church and now minister of Western Hills Christian Church in San Antonio, officiated at the double ring ceremony.

Parents of the couple are Dr. and Mrs. Wilton N. Jones of Snyder and Mr. and Mrs. Ace H. Alsup, Jr. of Temple.

Given in marriage by her father, the bride wore a gown of white silkened organdy over peau de soie, appliqued with white Venice lace and edged with white val lace. It had a wedding band neckline and cap sleeves. The attached train was full and chapel length. The headpiece was a chapel length silk illusion with blush veil, falling from a band of stephanotis and baby's breath. the bride carried a round bouquet of gardenias, stephanotis, baby's breath and ivy with white ribbon streamers.

Miss Penny Jones, sister of the bride, was maid of honor. She wore a formal gown of yellow and white dotted organdy. She carried a basket of yellow and white daisies with purple statice, baby's breath and ivy.

Miss Cheryl Arnold and Miss Vicki Mize, both of Snyder, and Miss Joan Jennings of Denver, Colorado were bridesmaids. They wore gowns identical to that of the maid of honor.

Ace Alsup, III, brother of the groom, of Galveston served as best man.

Rick Cherry of Houston, Fred Moore of Lockhart and John Jarvis of Temple were groomsmen. Keifer Marshall, Don Walker, David Shine, all of Temple, Rany Hagman of Austin and Tim Jones, brohter of the bride, were ushers.

The church was decorated with candelabras with white tapers, wild smilax and a kneeling bench.

The bride and groom took communion with a chalice and a loaf of bread baked by a friend of the bride.

Before the ceremony a concert of wedding music was presented by the organist, Mrs. Lynn Bethel. Selections were by Grieg, Tschaikowsky, Liszt, Schubert and Mendelssohn. The processional march was Trumpet Voluntary in D Major by Purcell. The recessional was TeDeum Laudamus. Included in the ceremony were verses from "The Prophet."

Mrs. Bethel also played a program of semi classical popular and love songs at the reception afterwards.

Following the ceremony a reception was held at the Snyder Country Club. The tables were covered with yellow chiffon cloths with appointments in silver and were adorned with wild similax and daisies. The three-tiered wedding cake was pale yellow topped with a nosegay of yellow, white and purple flowers. Mrs. Ace Alsup III, sister-in-law of the groom and Miss Carolyn Hall of Lubbock presided at the table.

For the wedding trip to Wyoming the bride chose a pale blue knit pantsuit with purple accessories.

Other members of the houseparty were Mmes. Ray B. Jones of Oklahoma City, Bob Crump of Ft. Smith, Ark., Ken Stainer, Donni Stainer and Amanda Stainer, all of Tulsa, Okla.

The bride is a 1968 graduate of Snyder High School and has attended University of Oklahoma and Texas Tech University, where she was a member of Chi Omega sorority. She is now attending University of Texas at Austin and will be a December graduate.

The groom is a 1968 graduate of Temple High School and attended the University of Texas. He is a member of Delta Tau Delta, Phi Eta Sigma and Phi Beta Kappa. He will enter the University of Texas Law School in September.

Out of town guests were from Texas, Oklahoma, Arkansas, Colorado and Maryland.

The groom's parents hosted a rehearsal dinner Friday night at the Snyder Country Club. A bridesmaid's luncheon was given by Mrs. Basil Arnold and Mrs Roger Mize Saturday noon at the Martha Ann Woman's Club.

Cullen House In Limelight

SAN AUGUSTINE, Tex. (AP) — Historic Cullen House, home of the Ezekiel Cullen Chapter of the Daughters of the Republic of Texas, has been nominated for inclusion on the National Register of Historical Places by the Texas State Historical Survey Committee.

Mrs. J. W. Richey, president of the DRT Chapter here, has been notified of the nomination by Truett Latimer, executive director of the State Historical Survey Committee.

The Cullen House is probably the best known of the medallion homes in San Augustine, the oldest American town in Texas. It was built in 1839 by Judge Ezekiel W. Cullen in Greek-Colonial style with a porch supported by massive Doris columns. The house was restored and presented to the Ezekiel Cullen Chapter of the DRT in 1953 by Hugh Roy Cullen of Houston, a grandson of Ezekiel. The house is the home of the DRT Chapter here and is used as a Community House and Museum. It also houses a collection of paintings by the renowned artist S. Seymour Thomas, a native of San Augustine.

Judge Cullen is often referred to as "Father of the Texas Public School System. As a member of Congress he authored the bill to set aside public lands for the support of public education and of the University of Texas and A&M College.

Plastics Burn

NEW YORK (AP) — Plastics can be incinerated safely in existing municipal incinerators, reports Professor Elmer R. Kaiser, senior research scientist at New York University.

QUOTABLE WOMEN

By THE ASSOCIATED PRESS

Some quotable quotes from women during the week:

"First of all I learned I'm not interested in drugs. To me it's a nothing existence and one has an eternity to be nothing ... At 16, kids may feel they have a few years to throw away. But it isn't throwing away a few years—it's throwing away a life." —Kitty Winn, who won the best actress award at the Cannes Film Festival for her portrayal of a young drug addict.

"Women are finally aroused enough (to use their vote in their own behalf). Politicians from the President on down had best realize that."—Alice Paul, former suffregette now fighting for the equal-rights-for-women amendment.

"Yes, you must have a passion for food to be a good critic. A sense of adventure is essential; none of this, 'It has too much cholesterol' or 'I don't like the white meat of chicken.' There can't be any don't in your vocabulary."—Gael Greene, self-described sensual critic of restaurants, in an interview.

"I'm putting my name on the list. I don't think the plans are definite yet. I certainly would like to go."—Pat Nixon, speaking of the President's plans to visit Communist China.

"I look forward to it not only because it will do something for other people but also because it will be a healing process for me."—Mrs. Whitney M. Young Jr., widow of the executive director of the National Urban League, assuming active duties as chairman of an education foundation named for her late husband.

"It didn't bother me to do it ... It is nothing special. I wanted to drop the robe farther. But there were objections. I wish people wouldn't make anything out of that scene in proportion to the rest. That is not in good taste."—Maralin Niska, who plays partially nude in the opera "The Makropoulos Affair."

Sunday Buffet

By CECILY BROWNSTONE
AP Food Editor

Baked Ham Rice Casserole
Asparagus Vinaigrette Rolls
Strawberry Shortcake Beverage

ASPARAGUS VINAIGRETTE

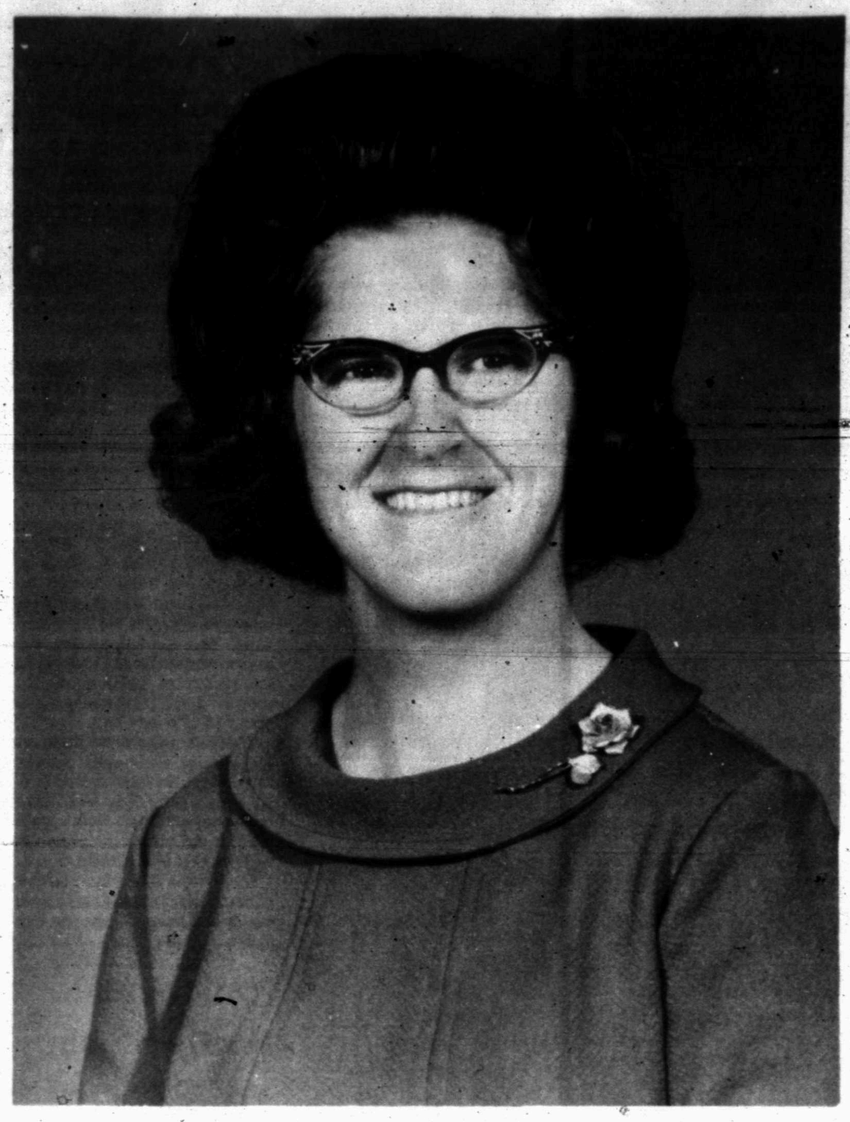

If Dijon-style mustard is at hand, use it in this recipe.

1 bunch (about 2¼ pounds) medium-thick asparagus, cooked
2 tablespoons strained lemon juice
½ teaspoon sugar
½ teaspoon prepared mustard
6 tablespoons olive oil

Chill asparagus. In a small bowl with a fork beat together the lemon juice, salt, sugar and mustard until no flecks of mustard show; add oil and beat to combine; let stand at room temperature. At serving time arrange asparagus in a large shallow serving dish; pour dressing over, lifting asparagus so dressing coats all the spears. Serve at once. (If asparagus spears are marinated in dressing for any length of time they may lose their bright green color.) Makes 6 servings.

NOTE: To cook asparagus, peel them up to the buds using a swivel-blade vegetable peeler; wash. Place asparagus in a large deep skillet or similar utensil; add 1 cup boiling water and 1 teaspoon salt. Boil, covered, just until tender-crisp and still a bright green color—about 7 minutes. Drain.

WOMEN

ENGAGEMENT ANNOUNCED — Mrs. Clarence Wade of Snyder, announces the engagement and approaching marriage of her daughter, Anita, to Prentice Donaghey, son of Mr. and Mrs. Cecil Donaghey of Abilene. The couple will exchange vows September 5. (Photo by Craft)

Teachers Increase

GLASGOW, Scotland (AP) — Graduates from Scottish Universities taking up teaching increased by 27 per cent from 1966 to 1969. Almost half—49 per cent—of girl graduates went into teacher training compared with 20 per cent of men.

Chicken Is Festive

CHICKEN IS FUN — Summer joys are special — picnics, boating trips, barbecues, outings — and one thing that makes them so special is the easy good-for-you food you take along to enjoy in the great outdoors. Chicken's on top of the eating list! It's a light meat with all the essential protein so necessary for good health. The low calorie and low fat content of chicken make it the perfect food to help you keep your healthy summer figure. You can enjoy out-of-doors chicken in so may ways from broiled chicken to chicken salad. Get in on the summer fund and eat well, advises the National Broiler Council.

MRS. JOHN WILLIAM SCHIEBEL

Pierce, Schiebel Are Wed Saturday In Clyde Church

Miss Patricia Ann Pierce and John William Schiebel exchanged wedding vows August 7, at 5 p.m. in the First Baptist Church of Clyde, Texas. Rev. Riley Fugitt, pastor of the church, officiated in the double ring ceremony.

The bride is the daughter of Mr. and Mrs. J. Edmond Pierce of Clyde. The groom is the son of Mr. and Mrs. W. J. Schiebel of Snyder.

Given in marriage by her father, the bride wore a formal length gown of white linen fashioned with wide bands of Venice lace outlining the high neckline and short sleeves. Narrow bands of lace outlined the front princess panel and gave an empire effect to the bodice. The softly gathered skirt was outlined at lower edge by two more bands of lace. A detachable chapel length train flowed from a self bow at the back waistline. A Camelot cap held the veil of imported silk illusion which was outlined in narrow Venice lace identical to that used on the bride's dress. She carried a colonial nosegay of yellow and lavender carnations with long streamer ribbons.

Carol Lane of Coleman was maid of honor and Mrs. Debbie Larson of Wichita Falls was matron of honor. They wore long empire dresses of daffodil yellow saki with satin ribbons outlining the waist. They carried nosegays of yellow and purple carnations with long streamer ribbons.

Little Miss Michele Ray of Big Spring was the flower girl. She wore a gown fashioned like that of the maid and matron of honor.

Miss Cynthia Schiebel, sister of the groom, was bridesmaid. She wore a gown fashioned similiar to the other honor attendants.

W. J. Schiebel of Snyder, father of the groom, served as best man. Dan Novikoff of Ft. Worth and John Oglesby of Pecos served as groomsmen. John Pierce, of Clyde, brother of the bride, and Ron Mercer of Odessa ushered guests.

Mrs. Leland Bratcher, organist, accompanied Mrs. Billy Ray Goldsmith as she sang "One Hand, One Heart."

A reception was held in the Fellowship hall of the church. Linda Bryan of Clyde presided at the table. Babe Wise of Clyde presided over the bride's book. For a wedding trip to Austin and San Antonio, the bride chose a navy blue dress with bodice accented by white braid trim, and navy patent accessories.

The couple will make their home at 2404 Tenth St., Lubbock.

The bride is a graudate of Clyde High School and Howard County Junior College. She is a senior at Texas Tech, majoring in home economics education.

The bridegroom is a graduate of Snyder High School and Howard County Junior College. He is a senior at Texas Tech, majoring in Physical Education.

The bridegroom is employed by Allied Radio Shack in Lubbock.

Less Icebergs

GREENWICH, Conn. (AP) — There are fewer icebergs in the heavily traveled areas of the North Atlantic this year, reports the U. S. Coast Guard Patrol.

They sighted only 61 bergs, attributing the low count to unusually frequent southern winds which affected the ocean's temperature so that the icebergs deteriorated as they drifted down Baffin Bay.

Great-Grandmother Tells How To Maintain Youth

By VIVIAN BROWN
AP Newsfeatures Writer

For quite a long time, Lizalotta Valeska, a former Miss Finland has been trying to explain to anyone who would listen how people can maintain their youth, and how, in particular, she does.

Most people are intrigued with her appearance—she is a great-grandmother 68 years of age, 116 pounds, size 12—and ask questions about how she keeps her 36-26-35 measurements, the skin tone of a young girl, and her good health.

She tells them her appearance requires constant work. Everyone wants a short cut to good looks. They think it can be bought in a jar, but it can't be, she explains. And now, particularly, in a pollution age, she says everyone must get down to the basics of good health ... proper breathing, eating, and exercise ... every day.

"I try to tell people they get old because their cells deteriorate unless they get a good supply of oxygen. They must take breathing exercises every day, but it is difficult to get people to believe it. It is so simple."

She travels the lecture circuit offering her thoughts on various health and beauty ideas she has gathered from trips around the world, reading scientific literature and in her contacts with people who are trying to solve problems. Last year, she gave lectures on physical fitness aboard a ship bound for Australia. In her New York apartment she gives lessons in breath control principles and in exercise principles. She has just written a second book, "Nature's Rejuvenation Principles," which is described as "a common sense approach to physical, mental, spiritual well-being." Her idea is to inspire a reader to explore the topics further.

She became interested in good health 15 years ago when she developed arthritis which she has managed to overcome now.

Like her discussions of health and beauty principles, the book is a collection of health and beauty ideas that includes information on foods as well as such chapters as one on "sex, sanity and the perfect mate."

In the matter of eyes, there are foods listed as good for eyes ... things that irritate eyes ... thoughts on reading in bed ... wearing sunglasses. There is an admonition not to "carry your baby with its face to your body. It should be turned so it faces open space...."

Hands intrigue Mrs. Valeska. To keep energy bottled up, one should keep the hands closed with fingers curved toward the palm, when they are not in use. If one wants to strengthen the five senses, she says, "they must rub their fingers upwards."

She is a fan of natural foods. These can be a beauty treatment.

"Honey is one of nature's great nutrients—the potassium in honey can kill harmful bacteria ... honey can relieve alcohol intoxication ... it can help insomniacs. Why don't more people use honey in cooking, and train their children to use honey?" she comments.

Her most important theories concern breath. She has taken breath lessons from a Yoga teacher, Dr. Roman Ostaja of Los Angeles. He introduced her to Kundalini, which teaches individual control over the autonomic nervous system.

Of breath control, she explains:

"Our breathing regulates the respiration center from which nerves run like wires to the muscles of the lungs, chest, diaphragm ... we use only 25 per cent of our brain power because we rely on shallow breathing which does not feed the brain enough oxygen. And many people keep their mouths open when they are awake or asleep and this promotes respiratory problems.... Breathing is the key to maintaining our youth."

It takes quite a while to learn to breathe properly, and a beginner should learn to breathe lying down. It might make one a little dizzy at first, she says, but here is the way she does it:

Lie down. Keep your eyes open and gaze at the tip of your nose. Close your mouth. Slowly, rhythmically, without effort, inhale through your nose. Fill upper lobes of lungs, then middle, finally lower portion. This should be done in one continuous breath as long as you can without any effort. 'By doing so you are giving the oxygen time to combine with the circulating blood, she says.) Now—begin slow exhalation through the mouth as if you are blowing out a candle. At first inhalation and exhalation will be short, but gradually it will become longer and longer.

Hotel-Style Broiled Fish

Line the broiler pan with foil to save clean-up time.

½ of a ¼-pound stick corn oil margarine, melted
⅛ teaspoon salt
Pinch of white pepper
2-pound whole fish (such as whitefish), cleaned and boned and split
1 tablespoon minced parsley
1 teaspoon lemon juice
Parsley sprigs

Lightly brush rack of broiler pan with some of the melted margarine. Stir salt and pepper into remaining margarine; brush some of this mixture over inside of fish. Place split fish, skin side up, on rack; brush generously with some of margarine; reserve remaining margarine. Broil fish 3 to 4 inches from heat source until fish flakes easily when tested with a fork—about 10 minutes. Place fish on heated serving platter. Stir parsley and lemon juice into reserved margarine and pour over fish. Garnish with parsley sprigs. Makes 3 servings.

4-H Jr. Leaders Elect Officers

The Scurry County 4-H Junior Leaders met Aug. 2 at the Union Community Center. The group elected camp officers for the annual camp which will be held Aug. 12-13. The new officers are as follows: Girl Chairman-Barbara Tate; Boy Chairman-Jimmy Wemkin; Secretary-Wilma Stirl; Treasurer-Danita Layne; Reporter-Connie Byars; Parliamentarian- Cathy Hess; Cleanup Chairman-Daine White.

The camp activities were discussed, and the Junior Leaders were assigned to the groups that they will be leading.

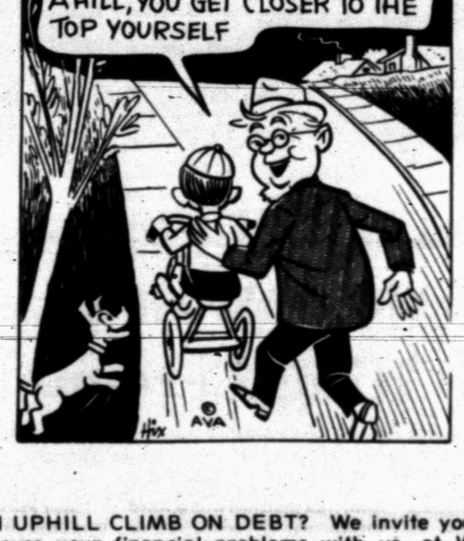

Those attending were Barbara Tate, Jimmy Wemkin, Wilma Stirl, Danita Layne, Cathy Hess, Daine White, Charles Kuss, Connie Byars, Mrs. Wemkin and Miss Butts.

Bluefield, W. Va., is called the air-conditioned city because of its height.

MR. AND MRS. JAMES NEAL HIGH

(Photo By Craft)

Martin, High Exchange Vows In Home Ceremony

Suzanne Martin and James Neal High exchanged wedding vows July 24, at 2 p.m. in the home of the bride's parents, Mr. and Mrs. S. Barber Martin, 2206 Thirty-second Street. Pat Abbananto, minister of the Thirty-seventh Church of Christ officiated at the single ring ceremony.

Parents of the groom are Mr. and Mrs. Charles High of Portales, N. M.

The home was decorated with a brass arch candelabra with green boxwood roping entwined with pastel flowers. The stairway was also entwined with boxwood roping and pastel flowers and accented at the foot of the stairway with large white satin bows.

The bride wore a gown of white embroidered batiste. The gown was designed with a fitted bodice, square neck, leg-of-mutton sleeves and a tiered skirt gathered at the empire waist with an attached self belt. Floral lace braid trimmed the neck and each tier of the skirt. She wore rosebuds in her hair and a bracelet belonging to the groom's mother, which she wore at her wedding.

Raleen Martin, sister of the bride, of Snyder, was maid of honor. She wore a floor length blue dotted swiss gown fashioned with an empire waistline and high neck and short puffed sleeves. She carried a nosegay of white feathered carnations and baby's breath with blue streamers.

Little Kristie Martin, niece of the bride, of Albuquerque, N. M. was the flower girl. Her dress was identical to that of the maid of honor. She carried a lace basket with rose petals.

Jon Tarbett of Marlin served as best man.

Piano selections were played by Amber Walker.

Following the ceremony a reception was held. The table laid with a white linen cloth and overlaid with lace, was centered with a candlelabra with pink candles, and the maid of honors flowers. The three-tiered wedding cake was trimmed with cascades of pink roses. Mrs. Sam Martin Jr. of Albuquerque and Miss Linda High presided at the table. Mrs. Jimmy Ramage of Odessa presided over the bride's book. Cathy Hurst was also in the house party.

Out of town guests for the wedding were from Portales, Albuquerque, N. M.; Junction, Cisco, San Saba, El Paso, Waco, Brownfield, Marlin and Odessa.

Cheese Bread Ring

4 ounces Fontinella cheese
1 wedge (5 ounces) Parmesan cheese
4¼ cups unsifted flour
2 tablespoons sugar
1½ teaspoons salt
¼ teaspoon pepper
½ cup (¼-pound stick) butter or margarine, at room temperature
1 cup warm (110 to 115 degrees) water
2 packages instant-blended dry yeast
6 eggs, at room temperature

Shred cheeses medium-fine and leave at room temperature. In smaller electric mixer bowl at low speed beat together flour, sugar, salt, pepper and butter. In larger mixer bowl dissolve yeast in water; add half the flour mixture, then the eggs. Beat at medium speed for 2 minutes. With a wooden spoon stir in remaining flour mixture, a little at a time, alternately with cheese. Cover and let rise in a warm place until doubled—60 to 90 minutes. Gently stir down batter. Let rest 15 minutes. Turn into well-buttered 10-inch tube pan; smooth top. Let rise again as previously until batter comes to within 1 inch from top of pan—about 45 minutes. Bake in a preheated 375-degree oven on rack below center for 20 minutes; cover with foil or brown paper to prevent excessive browning and continue to bake 20 to 30 minutes longer. Place bread in pan on wire rack to cool for 5 minutes. With a metal spatula loosen sides and around tube; turn out onto rack; with another rack turn right side up. Serve warm. Leftover bread will taste delicious toasted.

CAMERA Angles

By IRVING DESFOR
AP Newsfeatures

There have been nuggets of photographic information, news of new developments and photo personalities in a variety of recent publications. Let's look at some of them:

"The first rule of lens care is to clean a lens as infrequently as possible," says Anton Wilson in the "American Cinematographer," April issue. He warns that repeated cleaning eventually will wear away the anti-reflective coating. Dust particles on the lens do not affect image quality and photographers should not be overly concerned about them.

He adds, however, that a fingerprint on the front element is one of the few cases that demands instant cleaning. That's because a fingerprint contains body oils that will tend to etch the lens coating if not removed immediately.

Recommended: a lens cap for all times the camera is not in use.

Not recommended: carrying a camera in an auto trunk because of the vibration as well as the heat. Lens cement begins to soften at temperatures above 100 degrees F.

PTN "Photographic Trade News" for June 15 reports that Crimpco Engineering is marketing a two-bath process for color printing which is compatible with all type B color printing papers. It is available in one, two and four quart sizes.

Color printing news also is in the February issue of "Camera," Swiss magazine. It reports that Pavelle expects to have its Caldwell, N.J., plant producing fast (five minutes), dry-to-dry color paper by year's end. Perfected by Dr. C. Jacobson of Epsom, England, it uses a 90-second development, bleach-fix and two-minute wash at 85 degree temperature. Tabletop roll processors are foreseen.

In its April issue, "Camera" also described an advanced universal enlarger produced by an engineering student of the School for Industrial Design at London's Royal College. To save space, the column is located at one corner instead of at the back of the baseboard. It uses reflex mirror lighting, and motorized focusing. Power for lamphouse and focusing is supplied via sliding contacts riding conductor strips in the column. The baseboard is of lightweight, rigid foam plastic.

The 1971 Pulitzer Prize for news photography went to the youngest photographer ever to win a Pulitzer, John P. Fio. He was an undergraduate student at Kent State University when he took the series of photos of the campus shooting in which four students were killed by National Guardsmen. He also received a George Polk Memorial Award and the Sigma Delta Chi Award in Journalism for outstanding photography. A story of the 22-year-old senior appears in "Quill" magazine for June.

While these items all concern photography, they have another common bond. They all appear, with hundreds of other photo items, in a single pamphlet arranged in a cross-indexed, alphabetical list of articles involving photography. All are digested from about 30 magazines of the past three months. The pamphlet is "Infill-Phot," a newsman's jargon in abbreviated cablese for "Fill-in on Photography."

Issued as a quarterly, the selection and compilation is the brainchild of William C. McLaughlin, ex-Associated Press photo editor. He felt photography had a need, similar to medicine and law, for an abstract of relevent articles from various publications for ready reference. Each worthwhile item is summarized, listed and cross-indexed so anyone can determine where the original article was published. The source can then be obtained for full study since all sources are listed and their addresses given.

The sources cater to photographers with amateur, professional, industrial, commercial and cinematic interests and also include those in journalism, art, electronics and related fields.

For further information, write: "Infill-Phot," 220 N. El Camino Real, Oceanside, Calif. 92054.

UNION NEWS

Visitors this week in the home of Mr. and Mrs. Loyd Holley were Mr. and Mrs. Cecil Cowan and son from San Marcus, Mr. and Mrs. George Page and Mr. and Mrs. Willard Gladson and Ronald of Snyder.

Rev. and Mrs. Jess Ramsey and girls attended the Ramsey reunion in Seminole this week.

Mr. and Mrs. Loyd Webb and Jerry and Mrs. Lizzie Webb are visiting this week in Bowie, Texas with Mr. and Mrs. Eubanks.

Mr. and Mrs. Howard Hogue visited Monday with Mr. and Mrs. David Connell in Lubbock.

Rev. Tommy Smith of Snyder filled the pulpit Wednesday night in the absence of the pastor, Rev. Jess Ramsey.

Mr. Cecil Rasberry and family moved this week to Houston.

More Beans

NEW YORK (AP) — The city's Department of Consumer Affairs announced that a study of 10 leading brands of pork and beans showed that the pork content in cans ranged from 7 per cent down to zero.

A spokesman for one firm whose "pork and beans" product contained no pork said: "The pork has been ground up and is not visible to the naked eye."

Chickens Are Good Buy

A good buy means good eating when the food is chicken. Broiler-fryers receive a lifetime of special care to assure the highest quality meat product, nutritionally excellent for the entire family, according to the National Broiler Council. Today's eating chickens are specially bred for that purpose. Designed to be meatier and juicier, they are raised differently from egg-producing chickens, much as beef cattle differ from dairy cattle. The modern chicken's diet is a nutritious one, surpassing even our own on occasion. It consists of geneous portions of corn, soy bean meal, other meals, and vitamin and mineral supplements to assure an excellent and meaty broiler-fryer for the consumer. Today, only half, the amount of feed necessary 30 years ago is needed to produce the same amount of meat. Before it is sold, each chicken is inspected by the Department of Agriculture so that the shopper can be assured she is buying a wholesome product. It is meticulously cleaned and all of the inedible parts are removed. The giblets are washed, trimmed, wrapped and placed inside the body cavity or under the cut up parts.

SNYDER'S HAIR - CARE SPECIALISTS!

A beautiful new you — what a wonderful way to keep the whole country beautiful. Try a new hairstyle. Try a new haircolor. Pop into a little something different. If your own hair is short, be adventurous with a long, romantic wig. If it's long, cap it with a coif of curls. Rather be blonde? Brunette? A redhead? It's time to be fancy-free. Stop in to your Beauty Salon this week. It could change your whole life.

The Elite Beauty Salon

The Elite Offers Experienced Styling

The Elite Beauty Salon, owned by Bess Fish and located South side of the square, has been operating in Snyder for the past six years. The Elite still has some customers that started with them as well as many new ones.

Mrs. Fish, wife of Walla D. Fish, retired railroad employee, resides at 3110 Ave. U. They have one son David. Mrs. Fish is somewhat of a pioneer in the beauty profession and has operated two other shops in Snyder, besides the Elite. Says Mrs. Fish, "I have been in the profession a good many years."

Mrs. Fish trained at Marinello Beauty School in Dallas and has had special training in permanent waving. An award she won in Dallas, is displayed in the shop for excellence in the field of permanent waving and hiar styling.

Olga Barboza, has been at the Elite for three years. She recieved her training at Charles and Sue's School of Beauty here in Snyder.

Bobbie Stokes, is the wife of Homer Stokes. He is employed by Sun Oil Company. The couple resides at 400 33rd. Bobbie has been a beautician six years, receiving her training from Charles and Sue's. She has worked at the Elite for four years.

Frances Harty is at home at 210 38th. Her husband, Herman is employed by Lone Star Gas. She trained at Jessie's School of Beauty here in Snyder seven years ago and has been at the Elite since it opened. Frances believes in "plain old hairdos".

Frances Roberson has been a hairdresser for several years. She has been to school twice, both times here in Snyder. The first time attending Holdren, the second time Jessie's School of Beauty. She has one daughter and lives at Lake Champion in Colorado City.

Mavis McHaney has been an operator 36 years. She trained in Abilene and has been employed by Mrs. Fish for ten years. Her husband Harry is engaged in farming in the Hermleigh community.

Esther Dishman, recieved her training in Altus, Oklahoma. She is a part time employee at the Elite, and has only been in Snyder for one year. Her husband, Hubert is employed by Amaco. They are at home at 4500 Ave. U.

All the operators at the Elite are experienced stylists and all attend shows in Lubbock and Dallas to brush up now and then.

They would like to invite you all in to try their styling methods, permanent waving, finger waving and other various types of hair fashion.

SILVER BAT FOR RICO — Atlanta outfielder Rico Carty kisses the silver bat presented to him by Georgia Gov. Jimmy Carter, left, prior to Thursday's game with the New York mets. Carty, who has been sidelined all year with a knee injury, returned to the active roster. The bat is symbolic of winning the National League batting championship in 1970. (AP Wirephoto)

Starr Wants To Make Comeback

ROCHESTER, Minn. (AP) — His playing days may be numbered but Bart Starr, the 37-year-old quarterback of the Green Bay Packers, tries not to think about quitting football.

"I don't want to quit lying on a stretcher," Starr said earlier this week.

He was interviewed after his discharge from St. Mary's Hospital, where he underwent surgery on his right shoulder. The operation may determine whether Starr will ever play pro football again.

After talking about the surgery and his football future, Starr flew home to Green Bay to continue recuperation.

"I really love the game of football and I still think I will play this season," said Sarr. "But I'll be the first to know if I can't, and then I'll admit it."

Starr has missed portions of the last three seasons with an assortment of injuries.

He expressed confidence the operation performed last July 28 by Mayo Clinic doctors was successful.

"The doctors have told me it was a success and I feel that way too," said the 15-year veteran of National Football League wars, accompanied here by his wife, Cherry. "All I can do now is wait, It's a gradual thing, and a slow process. I guess 12 weeks is as good an estimate as any."

The Packers' team physician who sent Starr to the Mayo Clinic, Dr. James Nellen, said 'It will be 12 weeks until Bart is able to throw again with full authority."

The operation, performed by Dr. Edward D. Henderson, an orthopedic surgeon, involved repairing a biceps tendon in Starr's right arm—his throwing arm.

"Surgery was a completely new experience for me," Starr said.

"Despite all the times I've been hurt, I've never been on an operating table before."

Starr preferred to talk about football, golf or anything but his surgery.

Starr said one of the reasons he's anxious to get back into the lineup again is new Packer Coach Dan Devine.

"He's really something special and has opened up a whole new dimension for our ball club. I was only at training camp a few days before I was hurt, but I felt like I'd been playing for Devine for three years. You can say he's the big reason I wanted to have this operation and make a comeback."

Starr said the only other time in his career that he thought of quitting was after the Packers won the 1967 Super Bowl.

"We were the world champions we had achieved something that we had set our sights on, and there seemed to be great advantages to quitting when I was on trop," he said.

"But then Coach Vince Lombardi stepped down, and I didn't feel I could run out on Coach Phil Bengtson. Now, of course, we can't enjoy the stature we did then, and that makes it even more difficult to quit."

What if Starr tries his comeback, though, and finds he can't throw the ball as he used to? What if he's told he's hurting the club more than helping it?

"Then I'd quit," he said firmly. "I wouldn't stay around. I have no intentions of hanging on just to tutor someone else. I have too much pride. If I can't play, I don't want to just serve time. I know that day comes for everybody, but I don't think about it unless someone asks me about it. I don't think it's happened to me yet."

Starr did indicate that he might like to try his hand at coaching after his playing days are over.

"I love the game and would like to stay close to it," he said. "When you've put the amount of time into a profession that I have, certainly it can have an effect on what you want to do. If you've been content to play that long, certainly you have enjoyed it and learned a great deal. From that standpoint, I would like to coach. However, I have some business interersts I'm considering and I'll just sort of let things work themselves out."

Melville Nips Rosie Casals

HOUSTON (AP) — Kerry Melville of Melbourne knocked off defending champion Rosie Casals of San Francisco 7-6, 6-4, Friday night to advance to the semifinals in the Virginia Slims $40,000 Women's Tennis Open.

Miss Melville, seeded seventh, never trailed Miss Casals, who was seeded second behind Billy Jean King.

In other quarterfinal matches, Mrs. King downed eighth-seeded Mary Ann Curtis of St. Louis 7-6, 6-2, and Judy Dalton of Melbourne, seeded sixth, downed third-seeded Francoise Durr of France, 6-7, 6-2, 6-4.

Oilers To Meet New York Giants

By MICHAEL A. LUTZ
Associated Press Sports Writer

HOUSTON, Tex. (AP) — The Houston Oilers may have to reintroduce themselves to the local fans Monday night when they play before the home crowd for the first time this pre-season.

New Oiler head Coach Ed Hughes has already demonstrated he's not afraid of change, and although the derrickmen lost 17-6 to Los Angeles last Saturday, there's hope that the Oiler face-lifting will improve on last season's 3-10-1 finish.

The Oilers meet the New York Giants and scrambling Fran Tarkenton in the Houston Post's annual charity game Monday night.

Hughes proved he's willing to shake things up when he traded away Jerry Levias, one of the team's best-known stars, to San Diego for a pair of husky linemen.

The move didn't set well with some of the Oiler fans who figured pound for pound, the 5-9, 178-pound Levias was the most exciting product the Oilers had.

But excitement doesn't always win football games, Hughes reasoned, so he's sticking by his guns that it was a wise trade.

"Jerry didn't put the Oilers in a division championship," Hughes said. "Jerry could help me right now, but we needed some other people and I thought it was for the best interest of the ball club.

"This is not taking anything away from Jerry, but the best receiver in the world is no good if you can't keep the defense off the quarterback."

Hughes referred to the Oilers' porous pass protection of last season. In exchange for Levias, Hughes got Gene Ferguson, 6-8, 300, and Ron Billingsley, 6-8, 290.

Ferguson is helping to shore up the Oiler's offensive line as a tackle, and Billingsley is working at defensive end. The defensive front four also has come under Hughes' scrutiny.

Other Oiler offensive changes came about when tackle Glen Ray Hines was traded and guard Ken Gray retired. On defense, Dave Rowe, acquired from New Orleans, will be inserted at tackle, linebacker Olen Underwood was traded along with Leroy Mitchell and two-year starter Johnny Peacock was waived.

And when the local fans get all the new veterans fixed in their memories, there also is a flock of bright rookies who likely will be around.

Running backs Leroy Sledge, a Canadian Football League refugee, and Andy Hopkins, the speedster from Stephen F. Austin, and defensive end Allen Aldridge all have been impressive.

It will be Hughes home debut as head coach and it will be against his former teammate on the Giants, head Coach Alex Webster. The pair was teammates on the world championship team in 1956.

It will be the first meeting ever between the Oilers and Giants.

Dallas Cowboys Rip Rams, 45-21

By JACK STEVENSON
Associated Press Sports Writer

LOS ANGELES (AP)—Judging by their showing in the first pre-season game, the Dallas Cowboys could have a vastly improved passing attack this season while the Los Angeles Rams obviously need more work.

Champions of the National Football Conference last season, the Cowboys opened their play for 1971 with a resounding 45-21 victory over Los Angeles Friday night.

Ball Hawking defense coupled with some fine passing by quarterbacks Craig Morton and Roger Staubach brought the victory and Coach Tom Landry commented, "I was a little surprised at how well the passing game worked since several of our recivers had been hurt."

Defense and running had been the keys for the Cowboys a year ago, carrying them to the Super Bowl where they lost 16-13 to Baltimore.

Defense proved strong again this time with a blocked punt run in for one touchdown, an intercepted pass returned 102 yards by Mark Washington to produce the finale and two interceptions of passes by reserve Karl Sweetan in the first half by Charlie Waters leading to crucial scores.

Morton, the former University of California star, opened the game and completed 10 of 14 passes for 121 yards and the first touchdown — statistically three yards to Mike Ditka but far longer than that since the tight end was well back in the end zone.

Staubach, the ex-Navy star who won the Heisman Trophy and then saw four years of military service, connected on nine of 18 throws for 109 yards and had a 25-yard scoring aerial to Bob Hayes.

Calvin Hill, who gave up his starting role to Duane Thomas last season, scored two touchdowns on runs of nine and one yard and brought the Landry comment, "He was running much like he did two years ago."

The reference was to the rushing that brought the former Yale star "rookie-of-the-year honors for the 1969 season. When Thomas refused to report this season in a salary dispute, Hill took over again.

"We just played bad football," commented the Rams' new coach, Tommy Prothro, who had his home debut spoiled with a crowd of 87,187 looking on at the 26th Annual Times Charity game. Bright spots were two touchdown passes to Jack Snow—covering 67 and 49 yards.

Prothro did substitute freely and it was a punt attempt by rookie Gary Loyd that was blocked by the Cowboys' first-year man John Fitzgerald that could have been the turning point. Fitzgerald flipped the ball to D. D. Lewis who ran 14 yards for the fourth Dallas touchdown.

"The blocked punt put us far enough ahead where that could be considered the turning point," Landry commented. "We got four touchdowns on breaks."

Los Angeles lost the services of offensive guard Tom Mack for a couple of weeks as he undergoes treatment to correct a toe that goes out of joint. All-League defensive end Deacon Jones was kayoed, but is expected to return to action for next Friday night's game against Cleveland in Los Angeles.

Dallas, meanwhile, breaks its California training camp and heads home to meet New Orleans on Saturday.

Wyatt, Buffs Slip Past New Orleans

By BEN DE FOREST
Associated Press Writer

BUFFALO (AP) — Alvin Wyatt is a punt return man for the Buffalo Bills. And he sings while he works.

Even after the ball is in the air and Wyatt is waiting for it to drop, he sings. Even with all those big defenders stampeding down on him, he sings.

"I sing to myself so I won't have to worry about the ball," Wyatt explains. "I sing a song called 'I Like Your Lovin' only I change it around and sing, 'I Like Your Running.' I stop singing when I get the ball."

Wyatt stopped singing and started running Friday night when he gathered in a punt on the Bills' eight-yard line and returned it 92 yards for a touchdown that helped propel the Bills to a 14-10 victory over New Orleans in a pre-season National Football League game.

It was the longest punt return in the Bills' history, but it won't go into the record book because only regular season games count. Thus, Haygood Clarke's 82-yard return against the New York Jets in 1968 is still the official Bills' record.

Wyatt's run before 35,758 fans at War Memorial Stadium was the most exciting play of the night.

But Jim Harris, who played to second-fiddle to Dennis Shaw at quarterback last year, provided the winning scoring drive. He hit Haven Moses with a nine-yard touchdown pass in the fourth quarter that put the Bills in front to stay.

The Saints scored first on Tom Dempsey's 22 - yard field goal in the first period. They fell behind after Wyatt's run, then got another temporary lead in the third quarter on quarterback Edd Hargett's one - yard TD sneak.

Wyatt, starting his second season in the pros, came to Buffalo from Oakland. In his rookie year with the Raiders, he returned four punts for touchdowns in preseason games, but all were nullified by penalties.

And in the season opener against Cincinnati, he uncorked a 72 - yard punt return for a score, only to have it called back because of a penalty.

"The way I run, I draw clipping penalties," he said. "That's why tonight when I got into the end zone I didn't jump for joy until I looked back over the field and didn't see a penalty flag."

Harris said he doesn't want to be "a backup quarterback all my life. I have more confidence that I did last year, and now I'm going to go out and do my best every time I get a chance."

Camping Climbs

LONDON (AP) — Caravanning is growing in popularity in the British Isles. More than one million families—a total of nearly four million people—went camping and touring with their caravans in 1970, according to a survey by the British Tourist Authority. A higher figure was predicted for 1971.

World's Biggest Airport Being Built In Texas

EDITOR'S NOTE: The world's biggest airport is under construction now—naturally in Texas. The impact on the North Central Texas area, the airpline industry and aviation in general will be staggering.

By JIM BRIGANCE
Associated Press Writer

ARLINGTON, Tex. (AP) — The men give the orders and the machines obey, stripping and gouging the land here for the world's biggest airport.

The Dallas-Fort Worth Airport is one of man's largest aviation undertakings-18,000 acres of concrete, glass, steel, people and airplane.

Ultimately, it will cost a billion dollars.

It will employ 80,000 people serving 40,000 passengers daily.

It will utilize the most sophisticated aviation technology available to man—some of it still on the drawing boards.

Such as ambitious project has not been without its problems and its tragedies.

Several men already have died in construction accidents.

Acquisition of international passenger routes still remains to be resolved.

Foreseeing aviation requirements of the future has been a key point in development of the new airport.

At a recent safety forum in Dallas of the Air Line Pilots Association, Dr. E. L. Murphee, Jr. of the Army Corps of Engineers conceded that basic structural design of airport runways has changed little since World War II when heavy bombers like the B29 and B24 appeared. Since then, aircraft have become heavier and heavier but, according to pilots, runway design has not kept up.

Additionally, five state senators have introduced legislation Banning supersonic flights —whenever they become reality —in Texas.

The reason, according to one sponsor, Sen. A. R. Schwartz of Galveston, "is that we can do without the SST and its sonic boom."

While most agree there is little chance for passage of such a bill, approval would wreck the future of the new airport because its whole concept is build around the SST and other aircraft of the future.

The Dallas-Fort Worth area is served by Love Field what amounts to a regional airport now.

But in 1964, the Civil Aero-Aeronautics Board ruled out that the Dallas and Tarrant County area must be served by a single regional airport sufficiently large to accomodate—in safety and convenience—present and future air needs of the public.

Dallas and Fort Worth were given six months to come up with a site and plan or the CAB would do it for them.

Love Field, unable to expand because it is surrounded by the City of Dallas, will, city fathers hope, become a major center for private and corporate aircraft and related industries.

One official said there already are more orders on file for corporate planes than existed four years ago. Love Field will be their airport.

Greater Southwest International Aiprort, a showcase when it was built near the regional airport site, will cease all flights operations.

Greater Southwest is used now as a training field for airline pilots, general aviation and flight training.

The new airport is being built with tax supported bonds approved by voters and various grants from the Federal Aviation Administration.

Financial advisors say that by 1975 it is hoped airport revenues will pay operation and maintenance expenses, meet annual debt service requirements with enough left over to absorb the expenses being paid by tax income.

The airport is envisioned as a major international air hub.

The international routes are subject to approval by the U.S. State Department in agreements with foreign nations.

"We have nobody with the expertise needed in Dallas to deal with the State Department on these international routes," said Warren Woodward of the Dallas Chamber of Commerce.

"I don't know why this wasn't thought of before but we're working on it," added Gar Laux, president of the chamber.

Airport planners have met with little opposition from surrounding land and homeowners.

"We've purposely carried out a campaign of educating the public to the benefits of this airport," said Tom Sullivan, director of the overall operation. "Our planning has been with the surrounding communities in mind. This airport will be nothing but an asset to all of us."

Sullivan was responsible for the design and development of Kennedy & LaGuardia airports in New York and for the preliminary design of the Newark, N.J., airport. He has served as a consultant at major airports throughout the world.

Sullivan says the Dallas-Fort Worth Airport is the biggest anyone has ever tackled.

The terminal will consist of a row of large, modular buildings bisected by a freeway and surrounded by a horizontal elvator track. Air line passengers may step into a car and be whisked to their gate.

The design emphasizes on serving supersonic transport passengers in the year 2,000.

"We'll be ready even for the hypersonic planes," Sullivan said.

Hypersonic planes of the future would travel five times the speed of sound.

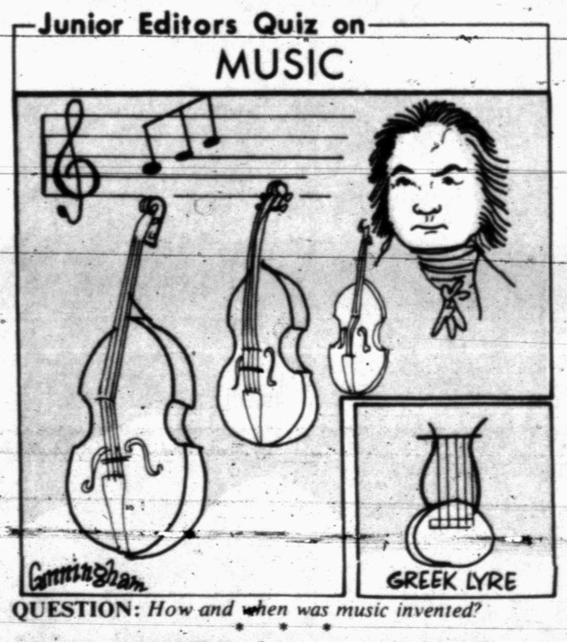

The airport will be an equal distance between Dallas and Fort Worth, 30 miles apart. Plans call for a main runway 20,000 feet long. The control tower will be 185 feet high. The airport will be truly an air city with a major hotel, restaurants, shops, service facilities and the myriad support items needed to serve 120,000 people daily.

John Shaffer, administrator of the FAA, says it's a "curiosity of 20th century life that people want an airport convenient, but not close, busy but not congested, seen but not heard. Today, anything that clashes with the environment is fair game for protest. Technology has become a scapegoat for whatever is bad about our society and even progress has acquired a bad name."

Medicaid Costs Cut

FRANKFORT, Ky. (AP) — A state experiment that "locked in" Medicaid clients to only one doctor and one pharmacy has nearly halved costs. The Health Department adds that the participants received the same medical attention they had before the test program.

Junior Editors Quiz on MUSIC

QUESTION: *How and when was music invented?*

ANSWER: Music is as old as civilization. Early man expressed his emotions through melody and rhythm. The Egyptians and the Babylonians, also the ancient Jews, had all been great lovers of music and used rudimentary instruments. The Greeks like to hear the poetry of Homer recited with a lyre playing in the background. The lyre is the simple string instrument thought to be the forerunner of the guitar.

The Romans were very gay and liked music at their parties. They invented most of the instruments which we use today and loved orchestral music. The early Church despised this form of music, which was identified with Paganism. The bishops encouraged singing of the congregation. Many sang out of key, so the organ was introduced as a guide for the choir. The organ, which appeared in the 2nd century, was a combination of pipes and bellows. In the 11th century, the first instrument with keys and strings appeared. It was a rudimentary piano. This was a handier instrument than the organ. During this century, Guido, a Benedictine monk, gave us our modern system of annotation. Music was added to dramatic performances of the theatre and then opera emerged. By the middle of the 18th century, the musical life of Europe was in full swing. Music became part of the education of every well-bred person. 8-7

(Steve Clark of Charleston, S.C., wins a prize for this question. You can win $10 cash plus AP's handsome World Yearbook if your question, mailed on a postcard to Junior Editors in care of this newspaper, is selected for a prize.)

Chances Small On "Strike"

Career Corner

by Joyce Lain Kennedy

what job would you like to see explored in this column?

Dear Joyce: I read about a book recently which tells you where to look for diamonds and other precious gems that you can just pick up from the ground in the U.S. Is there anything available that tells where and how to prospect for gold during summer vacations? – R.H.C., Odessa, Tex.

William Newman, geologist with the U.S. Geological Survey, says that in answering inquiries, "we try to point out some of the difficulties and disappointments related to amateur prospecting for gold, while, at the same time, we do not wish to imply total discouragement for prospectors."

He adds that probably fewer than one in each thousand persons who have prospected in the western part of the country have ever made a "strike." Limited amounts of gold have been found in the eastern states. For free booklets, write to the Information Officer, U.S. Geological Survey, Washington, D.C. 20402.

* * *

Dear Joyce: My son was injured in an accident 2 years ago and it is unlikely he will have the use of his legs again. We had heard there was a school for watchmakers run by a watch manufacturer that does not charge tuition to handicapped persons. Do you know about it and where it is? – C.P., Camden, N.J.

You must mean the Joseph Bulova School of Watchmaking (40-24 Sixty-Second St., Woodside, N.Y. 11377). The school opened in 1945 to offer tuition-free courses to veterans, and in 1950 began accepting disabled civilians on a tuition-free basis also. (Non-disabled students pay $60/month for tuition.)

There's a dormitory for out-of-town students ($120/month for room and board). The student or sponsoring agency must pay for his own tools, as well as room and board.

About 80 of the 90 students now enrolled at the Bulova school are handicapped to some degree – paraplegia, polio, arthritis, amputation, hemophilia, deafness, cardiac conditions and other disabilities. Each student works at his own pace, but average completion time is 18 months for the regular watch repair course, 1 year for the junior watch repair course, and about 9 months for the precision technician course (this is not watchmaking, but an introduction to basic industrial procedures).

The school has had no difficulty placing graduates. Starting salaries are about $120-25/week for a 40-hour week. Disabled experienced watchmakers earn about $135/week, and can boost earnings by moonlighting or working overtime. Many used this skill to enter the jewelry business, aiming to own their own jewelry establishment or department-store watch repair concession. Prospective students and counselors should write the school for more information.

SNYDER
AMBULANCE
SERVICE

25 YEAR SERVICE AWARD — Van C. Mills, right, Range Conservationist with the Snyder SCS, recently received a plaque in recognition for completion of 25 years of federal service. The plaque was presented to Mills by Von Kleibrink, District Conservationist.

Black Panthers Are Acquitted

NEW ORLEANS (AP) — Twelve Black Panthers have been acquitted of charges of attempted murder of policemen in a shootout at the Desire Street Housing Project. All were returned to jail to await trial on other charges.

The 12-man jury of 10 blacks and two whites, deliberated a half hour Friday before returning a unanimous decision of innocent. Nine votes would have been sufficient for acquittal.

The defendants—three women and nine men—still face charges of aggravated battery in connection with the alleged beating of two police undercover agents the night before the shootout.

Federal authorities earlier Friday issued a hold order on the 12 for possible violations of federal firearms statutes, court officials said.

More than a dozen firearms and several hundred rounds of ammunition were confiscated at the defendants' barricaded apartment following the shootout Sept. 15.

The jury's decision followed six days of testimony and 24 days of jury selection.

When polled by the prosecution Friday evening, each juror stood and said, "Not guilty."

"In the spirit of Martin Luther King," said white juror Kenneth Weaver, "Not guilty."

When the verdict was read a shout went up from the courtroom, jammed mostly with blacks. Presiding Judge Israel Augustine, the only Negro on the Criminal District Court bench, was besieged by well-wishers who kissed and hugged him.

"If ever there was a fair trial in this community, this trial was it," Augustine said.

Boy Receives New Kidney

SAN ANTONIO (AP)—A Cuero boy who has undergone more than 120 six-hour kidney treatments on Bexar County Hospital kidney dialysis units, finally received a new kidney this week after waiting over a year for an organ to suit his rare blood type.

The condition of Jerry Hess, 13, was reported as stable Friday night in the hospital's intensive care unit where he is recovering from surgery Tuesday afternoon.

An attending physician said the first 72 hours after surgery are the most critical.

Jerry was suffering from a hereditary-type nephritis. His longer-than-usual wait for transplant surgery was caused by his comparitively rare "B" blood type.

Suregons said the operation was "a success" and the main thing now is whether the youth's body does not "reject" the new kidney. If the organ is "accepted," Jerry will be able to reenter a normal life in Cuero without concern over the time-consuming dialysis treatments.

Jerry and his parents, Mr. and Mrs. Vernon Hess, have received $12,000 from Cuero and Point Comfort citizens to help pay for expenses.

Indefinite Terms Are Assessed

SAN ANTONIO (AP) — U. S. Dist. Judge Adrian Spears has assessed indefinite prison sentences to four young men charged in connection with an attempt to smuggle two pounds of cocaine into the United States from Peru.

The sentences under the Youth Corrections Act will permit Gary Duven, 24, of Fort Lauderdale, Fla.; Allen Russell, 24, John Mealy, 23 and Harry Hurley, 25—to emerge from prison without records of conviction if they successfully complete a six-year period of prison time and supervised parole with no violations.

Duven was arrested May 23 by customs agents at the San Antonio airport when almost 900 grams of cocaine powder were found concealed in the clothing of a Mexico city girl whom he had accompanied on a flight from Mexico City.

Russell and Mealy were arrested two days later in Laredo when they tried to enter the U.S. from Mexico.

Hurley was arrested near Key West, Fla., June 8. The Mexico City coed, Laurie Ann Cohen, 18, was charged in the conspiracy case but has not been tried. She is free on $25,000 bond.

V.C. Mills Receives Plaque

Van C. Mills, Range Conservationist with the Snyder Soil Conservation Service, was recently awarded a 25-year service plaque signed by the Secretary of Agriculture, Clifford M. Hardin.

Mills began his SCS career at Clarendon, Texas in 1950. Prior to this, he served four years in the United States Navy during World War II. He was graduated from Texas A & M University in 1950 with a BS in Range and Forestry.

Mills has worked for the SCS in Donley, Lubbock, Carson, Armstrong, Potter, Lipscomb, Gray and Scurry Counties. He came to Snyder in 1967 from Pampa, Texas. During his years of service, Mills has received a certificate of merit and several letters of commendation for outstanding work.

He is also a member of the American Society of Range Management and the Soil Conservation Society of America.

As Range Conservationist assisting the Upper Colorado Soil and Water Conservation District, Mills has the responsibility of assisting Ranchers plan and apply Conservation practices such as proper range use, deferred grazing systems, farm ponds, fences, brush Control, and range Seeding.

Tallest Man In World

STANTON, Mo. (AP) — Ed Carmel, who claims to be the world's tallest man at 9 feet, 1 inch, has much ground to cover.

He is traveling up and down 2,200 miles of U.S. 66 this summer making speeches, public appearances and distributing literature on two Missouri tourist attractions.

Strangler Is Freed

MIAMI (AP) — A Miami Beach executive who said his "mind was on fire" when he strangled a neighbor he said sexually attacked his five children was freed Friday by a justice of the peace.

Justice Jason Berkman dropped his first-degree murder charges against 39-year-old George A. Herzer. He ruled temporary insanity.

Herzer summoned police to his home July 29 and told them he killed Dr. Hall Kaighin, a University of Miami oceanographer.

He said Kaighin took his five children and seven others to a ranch in Indiantown for a weekend campout. After returning, Herzer said his children acted strangely and told him "a story I just couldn't believe."

Herzer testified he went to Kaighin's home "to see if it was true—what my kids told me." He said the professor laughed at him and admitted the story was true.

"I punched him in the mouth and he started laughing and that is all I can remember—I lost my mind," said Herzer.

After holding several hearings, Justice Berkman said he "did a great deal of soul searching" before deciding to drop the charges.

Berkman told police and the state prosecutor they "should take the case to the grand jury if they are not satisfied or in accord with the decision."

"I believe that after learning what had happened to his children he went completely out of his mind because of what the deceased said to him," Berkman said.

Nixon To Attend VFW Convention

DALLAS (AP) — President Nixon plans to appear here Aug. 19 at the national convention of the Veterans of Foreign Wars, the Dallas News reported today.

It said information about his visit came from unnamed sources.

The convention is expected to draw more than 35,000 delegates and guests. They include Secretary of Defense Melvin R. Laird, Sens. Henry M. Jackson, D-Wash., and Herman E. Talmadge, D-Ga., Kansas Gov. Robert B. Docking and Louisiana Gov. John J. McKeithen.

Kidnap Victim Holds Record

MONTEVIDEO, Uruguay (AP) — British Ambassador Geoffrey Jackson has become the longest held kidnap victim in recent history, passing a total of 209 days in captivity of the Tupamaro guerrillas.

Jackson, 56, passed the mark Friday, topping the 208-day imprisonment of U.S. agronomist Claude L. Fly, who was released by the Tupamaros March 2 after he suffered a heart attack.

Little has been heard of Jackson since he was seized Jan. 8.

Coast-to-Coast NEWSPAPERS SELL THE MOST!

CLASSIFIED ADS. DIAL 573-5486

SOME ENGINEER — Miss Janis Hote, New Orleans, La., and Andre Sagot, Petraki Pau, France, look over notes at a coastal and ocean engineering short course on Texas A & M campus. Miss Hote, employe of the U. S. Army Corps of Engineers in New Orleans, is the only woman in the 41-member international class. She is a hydraulic engineering graduate of LSU, 1969. (AP Wirephoto)

Debate On Gun Control Continues

EDITORS: The debate over gun control continues, intensified by each new outbreak of violence (the gunning down of a policeman, a man with a rifle going berserk). This week's AP Roundtable presents the views of a gun control supporter, Patrick V. Murphy, New York City police commissioner, and an opponent, Rep. Robert L. F. Sikes, D-Fla., a retired major general and one of Congress' most ardent voice's against gun laws.

By PATRICK V. MURPHY
For THE ASSOCIATED PRESS

What wife would place a $50,000 value on her husband's life? What child would regard any amount of money as a substitute for his father? These questions need no answer for no person can place a price tag on the life of a loved one.

Recently after a widely publicized White House conference summoned to discuss ways of coping with the wave of police shootings, the single suggestion advanced by the federal officials who presided was a proposal for federal legislation authorizing a $50,000 payment to the family of any policeman slain in the line of duty.

The causes of violence in our society, including violence directed at police officers, are indeed complex; and tragic slayings of policemen will not be eliminated as long as crime, tension, and bitterness survive. But there is one step that can be taken immediately to reduce the level of violence and the number of lethal confrontations, both with policemen and with other law-abiding citizens.

More stringent controls ordained by the federal government over the manufacture, distribution and sale of handguns and parts for handguns are vitally necessary if there is to be a serious and sincere effort to protect the lives of citizens, including policemen, who deserve protection from murderous attacks.

The Nixon administration, however, for reasons best known to it, has reiterated firm opposition to any new controls on handguns.

This question has been studied and restudied, and each time the conscientious conclusion has been the same:

—In 1967, the President's Commission on Law Enforcement and Administration of Justice—The Katzenbach Commission—called for registration of all handguns, rifles and shotguns, permits to carry handguns, and the prohibition of interstate sales of handguns.

—In 1968, the National Advisory Commission on Civil Disorders—The Kerner Commission—called for federal, state and local controls on handguns. It supported tight federal legislation.

—In 1969, the National Commission on Causes and Prevention of Violence—The Eisenhower Commission—called for restrictive licensing of handguns through federal legislation if states fail to enact their own laws within a minimum time period.

—In 1970, in the nation at large, 100 police officers were killed, 93 of them were shot to death, with handguns used in 73 of the killings. Already this year, 56 officers have been killed, 45 of them with pistols. Of the 717 law enforcement officers killed since 1960, 535 were murdered with handguns.

Nowhere else in the world are people permitted willy nilly to amass caches of arms and ammunition without difficulty, and nowhere else in the world does the rattle of illegal guns reach such enormous proportions.

For too long have we indulged in the gun maniacs. The name of the game is human life, and it is a game we dare not play.

What we need is the urgent concern of both legislative and executive branches of the federal government to provide us with the tools athat will enable the police to choke off the sources of the basic instruments of violence in our society.

Timothy Leary Released On Bail

BERN, Switzerland (AP) — Dr. Timothy Leary has been released on bail by the Swiss government on the ground that no official request for extradition has been received from the United States.

The American drug advocate escaped from prison in California last September while serving a 10-year sentence on a drug conviction.

He was arrested by Swiss police June 30 in the resort of Villars-sur-Ollon and held in a Lausanne jail.

If no extradition request is received by Aug. 30, Leary will be released as he cannot be held longer than 60 days under the U.S.-Swiss extradition treaty.

Ducks have flattened beaks for shoveling their food from the muddy bottom of streams.

Widespread Rains Set Records In Texas Areas

COLLEGE STATION, Tex. (AP) — Widespread rains have fallen, setting records or near records in South and Southwest Texas. Director John Hutchison of the Texas Agricultural Extension Service said many crops were ready for harvest and that damage could be heavy.

The rains will greatly benefit ranges and leave moisture for planting late crops and give hay a chance to produce badly needed forage. Local flooding was being reported. Runoff has been heavy due to the lack of ground cover.

The last round of excessive rains started in Far West Texas and moved southeast. Rains have been generous in other areas of the state but have fallen with less intensity, Hutchison noted. The High and Rolling Plains of Northwest Texas got spotted rains, making the moisture just about statewide.

District agents listed their conditions:

Panhandle: Rains from .50 to 2.00 inches have fallen, the heaviest north of the Canadian River and east of the area. Forages are being planted on previously unplanted dryland farms and weeds are being controlled on wheat land prior to planting. Corn and grain sorghum are being irrigated. Insects are decreasing on cotton, corn and grain sorghum. The vegetable harvest has been slowed. An excellent peach crop is being harvested. Ranges generally are below average but are improving.

South Plains (Lubbock): Showers helped dryland cotton and late sorghum but generally were too late for sorghum. Irrigated cotton and sorghum look good but need warmth for growth. Light to medium bollworm infestations were noted in some areas. Corn is making good progress but southern corn leaf blight has been noted. Alfalfa is above average with the third cutting about complete. The vegetable harvest is on. Ranges improved. Livestock generally are in good condition.

Rolling Plains (Vernon): rains up to 5.00 inches and less were general but more moisture is needed. Dryland cotton generally is poor but improved some. Insect damage has been reported in seven counties. Ranges are poor and furnishing limited or no grazing. Recovery will be slow. Stock water is low or non existent. Cattle are in fair condition with feeding.

North Central: Eight counties are still short on moisture. All others report rain adequate. Rains have been very spotted. Grass and hay crops are making good growth. Cotton has reacted and is looking good. The Sorghum harvest has been slowed or stopped by rains. Peanuts look much better. Ranges are below average and stock water is low. Livestock are in fair to good condition. The market is very good and marketings have slowed.

Northeast: Moisture ranges from short to adequate with the showers continuing. Additional hay cuttings are now a certainty due to rains. Rains were too late to help most vegetables. Fall plantings have already started. Peaches and pecans are responding to the moistures. Livestock are in good condition and ranges are responding to moisture. The stock water situation has materially improved.

Far West: Rains from 1.00 to 6.00 inches fell over the area and ranges and dryland crops improved. Moisture is now generally adequate over the Edwards Plateau. Livestock and ranges are improving. Marketing of calves and lambs slowed, prices improved. Crops are growing well, but the vegetable harvest has been slowed.

West Central: Good general rains fell but most sorghum was too far gone to get much benefit. Some will improve and be harvested. Second hay cutting and cotton prospects materially improved. Peanuts also got a badly-needed moisture. Ranges will improve and stock water supplies are now good.

Central: Variable but good amounts of rain fell throughout the area. They were too late to make much difference in sorghum yields but cotton, peanuts and forage crops will benefit greatly. Much needed stock water is now available and ranges improved. Plowing for small grain seeding has started. Culling and movement of livestock to market slowed.

East: Moisture improved. Hay yields will improve and more cuttings are assured. The vegetable harvest is about over but some late plantings have benefitted.

Public Notice

The Board of Equalization of the Hermleigh ISD will be in regular session Monday, August 9, 1971 at 7:30 P.M. Any taxpayer may meet with this Board to discuss his property evaluation at this time.

H. E. Herrara, Secretary
Hermleigh ISD
Board of Equalization

Public Notice

NOTICE

Effective August 30, 1971 all marks and brands of livestock recorded in the office of the County Clerk will expire. If you wish to re-register your mark or brand you have six (6) months to do this. After February 29, 1972 if you have not re-registered your brand or mark, then it will become null and void. The new registration will be good for 10 years. The fee for registering is $2.00.

The local FHA office is located at 1601 Avenue "N", Lubbock, Texas.

Snyder Schools Announce Dress Code For Students

The student dress code for the 1971-1972 has been approved by the School Administration and Board of Trustees.

STUDENTS DRESS

Students of the Snyder Public Schools have consistently been recognized as being a well dressed and well groomed student body. This enviable reputation is recommended as a continuing goal for each student.

Not only has the quality of clothing been involved, but also the manner in which this clothing has been worn. Common good taste and cleanliness, not the cost, have given students a wholesome, business-like appearance at school and school functions. Students should take pride in exhibiting good taste and proper grooming in keeping with acceptable standards and appropriateness of the local business community and school functions.

The purpose of the following information is to present advisory guidelines for dress and grooming which will be appropriate and accceptable to students, school personnel, and parents. The school administration believes that these guidelines are realistic, reasonable, and easily interpreted. It is impossible to list every item on which there might be a question, but attached are the guidelines on items most often mentioned. Included also are what have been found to be the most important aspects of dress and grooming which affect students in a school environment. The administration of the school has the responsibility to make the decision on questions of dress and grooming and while these may be highly controversial problems, the continued and consistent cooperation of students, parents and school personnel can resolve them. Cooperation will be of great assistance as all strive together to provide the best possible atmosphere for learning within the schools.

Boys Guidelines

1. Hair should be neat, clean, and well-groomed (combed) at all times. Extremely long hair shoud be avoided.
Specifically:
a. Hair Should be tapered above the collar line of standard dress shirts.
b. Hair should not obstruct vision.
c. Afro hair styles are permitted if extremes are avoided.
d. Sideburns may extend no further than the bottom of the ear, be neatly trimmed, and avoid extreme flaring.
e. Mistaches are acceptable is neatly trimmed and extended no further than the corners of the mouth.
f. Beards are not permitted.
g. In any case, boys shall shave regularly.
2. School clothing shoud be clean, neat, in good taste, and styled for school wear.
Specifically:
a. Shirts tailored for wearing inside the trousers should be worn inside the trousers at all times. Shirts should be standard length and have sleeves.
b. Clothing with unoffficial lettering or decorations should not be worn to eliminate any doubt concerning controversial subjects.
c. T-shirts of the underwear type are not acceptable.
d. Socks must be worn with shoes, including sandals, at all times.
e. Sun glasses and dark tinted prescription glasses may be worn in the classroom only if a doctor's authorization is on file in the office.

Girls Guidelines:

1. Hair should be neat, clean, well-groomed, and styled so vision will not be obstructed.
2. The combining and or brushing of hair and the putting on of makeup should all be done previous to the student's arrival in any classroom.
3. School clothing should be neat, clean, in good taste, and styled for school wear.
Specifically:
a. Blouses tailored for wearing inside the skirt should be worn inside the skirt at all times.
b. Dresses or skirts should be of a length that presents a well-groomed and suitable appearance.
c. Low-cut sun dresses, jump suits, bloomer dresses, shorts and similar fads of wearing apparel are not accepted.
d. Sheer blouses, unless worn with a full slip, are unacceptable.
e. Pant-dresses and culottes may be worn so long as the length is skirt length, and the appearance is of a skirt rather than of shorts. This appearance should hold true whether the views is from front or back.
f. Properly fitted pant suits, dress slacks and jean style slacks with appropriate tops are permissible. The pants or slacks should be loosely fitted and should be at least ankle length. Appropriate tops shall be interpreted as loose fitting ones designed to be worn on the outside and long enough to extend to the bottom pocket line.
g. Sweatshirts may be worn only during physical education classes and when approved for specific activities.
h. Sun glasses and dark tinted prescription glasses may be worn in the classroom only if a doctor's authorization is on file in the office.

In cases where pupil behavior, dress and or grooming fail to meet the standards as suggested, the school administrator has the responsibility to request the student to correct the element involved. Cooperation on the part of the pupil is an evidence of maturity; but if the pupil does not wish to cooperate, the administrator may send the pupil home until cooperation is achieved. His absence in such case would be unexcused. Suspension of the student would be for his failure to cooperate.

Elementary children may be permitted to wear knee length or longer pants.

ATTENDS CONFERENCE — Ed Cumbie, left, of Bronte, the Field Representative of the Texas Farm Bureau, is shown with Mrs. Gilbert Merrit, Gilbert Merritt and Morris Light.

Texas Farm Bureau Sponsors Conference

Scurry County Farm Bureau sponsored two couples to the Area Ledership Conference for Young Farmers and Ranchers Aug. 5-6 at the Scurry County Coliseum in Snyder, according to Leon Sterling of Ira, President of the local orgainzation. They were: Mr. & Mrs. Gilbert Merritt of Arah Route and Morris Light, 3001 32nd St. Snyder, Tex.

Conducted by the Texas Farm Bureau, the two-day meeting was one of three such conferences being held over Texas this summer. Purpose of the sessions is to provide an opportunity for young farmers and ranchers to understand the objectives, programs and operations of the Farm Bureau and the roles that they perform in the organization, Sterling said.

Discussion topics include history and purpose of Farm Bureau, legislation, commodity activities and marketing programs, and the role of young farmers and ranchers in the county Farm Bureau. TFB staff personnel conducted these discussions sessions.

Texas Farm Bureau President J.T. Woodsen of Gober gave the welcome at the opening of the conference. Millard Shivers, Dallas, rural development director, Blue Cross-Blue Shield, was the dinner speaker that evening. O.R. Long, Waco, TFB executive director, spoke to the group at the closing session next day.

The area leadership conferences resulted from a recommendation made to the TFB Board of Directors in April by the organization's Young Farmer and Rancher Advisory Committee.

Murders Increase In New York

NEW YORK (AP) — Homicides in the city have risen 30.1 per cent for the first six months of 1971 as compared with a similar period last year, says Dr. Milton Helpern, chief medical examiner.

The borough of Manhattan led with 389 murders. Brooklyn was next with 388. Homicides from January to June totaled 714. Most of those murdered were Negroes.

Ira Schools Are Ready To Open

The Ira Public Schools are ready to begin the new school year, with the staff completed, according to Roy Sallee, superintendent.

All employees of the school will assemble at 9 a.m. Monday, Aug. 16, to begin a two-day work schedule. Classes will start Wednesday, Aug. 18, with a full day's schedule planned. Busses will run on their regular scheduled routes and lunch will be served in the cafeteria.

The staff remains the same as last year with the exception of one teaching position. Mary Killam, commercial teacher for the past four years, has accepted a teaching position in the Snyder system, and she will be replaced by Mrs. O. B. Trulock, Jr., a graduate of Baylor University. Mrs. Trulock, a Colorado City resident and former Snyderite, has had two years of teaching experience.

The first semester will end on Dec. 22, with a faculty work day scheduled for Dec. 23. The second semester will begin Jan. 3 and end May 18.

The school holidays for the year are: Thanksgiving - Nov. 25-26; Christmas - Dec. 22-Jan. 3; Easter-March 31-April 10.

In-service and or work days are scheduled for Oct. 18, March 3, and March 20. May 19-20 will be teacher work days. There will be three other days scheduled for in-service training. The dates of these will be determined later.

Federal Grant

FRANKFORT, Ky. (AP) — A $460,000 federal grant has been made for a Western Kentucky pilot project which seeks to treat acid water from strip mine sites and use it to irrigate vegetation on reclaimed land.

Fluvanna Is Ready For School Year

The Fluvanna School will begin on Monday, Aug. 23, at 8:25 a.m. Busses will make their usual routes on this date, and the routes will be reversed from what they were last semester.

The first day of school will begin with an assembly at 8:30 for all students, teachers, and parents. Following the assembly, a mini-schedule will be followed for the remainder of the day, with school being dismissed at 3:30.

Regular school hours during the year will be 8:25 - 3:30.

The teachers will attend a Cultural Awarness Seminar at the Ko Ko Inn, in Lubbock, Aug. 16-17. A workshop will be held in Fluvanna Aug. 18-20.

The faculty will be the same as last year, with the exception of Mr. Dunlap, who has retired.

The faculty will be as follows: Mrs. Laura Baker, Grades 1 & 2; Mrs. Shirley Jones, Grades 3 & 4; Mr. Fred Ridenour, Grades 5 & 6; Mrs. Sharron Kensing, English and Business Education; Miss Charlene Pennington, Math and Home Economics; Mr. Vernon Smith, Social Studies and Driver Education; Mr. Wilson Stewart, Coach, Physical Education and Science; Mr. Mike Otto, Science; Mr. Keith Kensing, Vocational Agruculture; Mr. Bill Baker, Superintendent.

The bus drivers will be Mr. Vernon Smith and Mr. Mike Otto. The cafeteria employees will be Mrs. Frankie Thorne and Mrs. Rosa McDonald. Mr. Robert White will be the custodian.

Congress Recesses For Month

WASHINGTON (AP) — Congress has started a month-long summer recess, setting the pattern for a government-wide exodus likely to make Washington a virtual ghost town for the rest of August.

The Senate finally quit at 7:34 p.m. Friday night, more than six hours after the House let out at 1:19 p.m., and after passing an $18 billion higher education aid bill and three key appropriations measures.

President Nixon, currently spending the weekend in Maine, and many federal agencies will be manned by only a limited force this month.

The summer recess lasts until Sept. 8, two days after Labor Day.

Congress left with a good record on appropriations bills—nine of 14 have been passed.

The ninth, a $20.8 billion measure for the Departments of Labor, and Health, Education and Welfare, was passed on a 79-0 vote Friday. It is $581 million above President Nixon's budget—bringing the total for the year to $2.2 billion above the budget.

BombHoax Loot Found

SYDNEY (AP) — Police swinging sledgehammers smashed open a bricked-up fireplace in a shop today to recover $224,000 of the $556,000 paid by Qantas Air line in a bomb hoax.

The money was discovered after a builder renovating the shop in suburban Annandale reported to police that a recent cement job on the fireplace was not his work.

Detectives with sledgehammers and chisels found two plastic garbage bags stuffed with the loot. Officers continued to search the shop for any more money that might be stashed there.

Police believe they now have accounted for $392,000 of the money Qantas paid out May 26 after the mysterious "Mr. Brown" demanded payment. He claimed to have hidden a barometric bomb aboard a Qantas Boeing 727 jetliner carrying 130 persons. No bomb was found aboard the plane.

The Secret of ELIMINATING EXCESS BODY WATER!

Don't feel overweight, puffy, bloated because of water retention and water build up that may come on during the strenuous days of your pre-menstrual period.
Amazing new X-PEL "Water Pills", a gentle diuretic, helps you lose water-weight gain, and relieve body-bloating puffiness: Waist enlargement, and water retentive "swelling" of thighs, legs and arms.
Stay as slim as you are! Guaranteed or money back without question. Get your X-PEL "Water Pill" today at
