STATE CAPITAL Highlights AND Sidelights by Vern Sanford TEXAS PRESS ASSOCIATION

San Antonio, Texas — County tax assessor-collectors are meeting to try to untangle the poll puzzle.

It seems that the Legislature passed a law which will hit county tax assessor-collectors about October 1. That's the time when people begin paying taxes and getting exemptions.

A special election on November 9, voters will decide whether or not they want to repeal the poll tax as a prerequisite to voting.

If they repeal it, a new law will go into effect, setting up a registration fee.

To make matters more complicated, the November 9 vote really would not repeal the poll tax. In theory, it still would be due and payable. But not many are expected to pay the tax if the voting privilege is removed from it.

If the tax assessor-collectors solve their problem this fall, by waiting until after November 9 to fill out and mail poll tax receipts, they may face another crisis in the spring. This because 36 states already have passed a proposed amendment to the U. S. Constitution outlawing the poll tax as a requirement for voting for president,

vice president, U. S. senators and congressmen.

In January, Arizona and South Dakota legislatures will meet and if they pass the amendment, it could be carried to law. In that event, a provision by the Texas Legislature would set up a system by which voters would apply to their harassed county tax assessor-collectors for special registration certificates—at no charge—to vote on races involving only federal offices.

Texas Employment Commission reports that 3,567,700 out of the state's estimated 10,317,000 population were employed by someone other than themselves during the month of May.

Number of employed was way up from April's 3,542,200.

So too was the estimated population of the state. Population in April was figured at 10,297,000.

Thirty day gain in population was 20,000 persons. Employment increased by 25,500 persons.

AN APPEAL!

Since the time families banded together to form communities, problems common to all have arisen from time to time.

Goldthwaite is a community that has a problem. It is not a new one but no effective solution has been adopted to correct it.

We are short of water which not only brings about some inconveniences but also endangers life and properties.

A big part of our community is completely out of water from 7 a. m. until 10 p. m.

A responsive community realizes its problem and finds some means to correct it.

Apathy and ignoring that such a situation exists is an immature and unrealistic approach and will never solve any problem.

Let us act positive! We have waited long enough to find a way to get water.

There might be a good well in your backyard but how about your neighbor? For once, let us think not only of ourselves but try to give a little thought to others who are less fortunate.

The water bond, as you probably know by now, will again be presented for vote in the near future.

Should you have any questions concerning the water bond please let people who know answer them for you.

The Water Improvement Committee has been formed for such a purpose.

The committee, starting with the next issue of the paper will have a question and answer section covering questions most commonly asked. They will welcome and answer any question you may have.

Let us solve our water shortage by VOTING YES for the water bond.

Is there an adolescent in the house?

If you're a parent, there are times when nothing in the world seems more unhappy than the trials of adolescence. And if you're a young person, the desire to be "all grown up" fights with the feelings of love and respect that you've always held for your parents.

Where's the common ground that can ease this difficult period in life? Often it's at the place where you worship.

Faith does move mountains—of misunderstanding, anger, frustration. It helps parents to see, understand, and have tolerance for their youngsters' problems. It helps young people have a sense of worth about themselves now—and about the adulthood they'll soon assume.

Worship—together—this week . . . and add new, true values to your life!

You can get them to 50 lbs. FAST!

Your best bet is to get fast, efficient growth on pigs farrowed now. You can have them at 50 pounds fast on Purina's famous "Fast Start Twins"—Purina Baby Pig Chow and Purina Pig Startena. And they'll have the growth they need to go on to market sooner than the average hog.

Purina Baby Pig Chow and Pig Startena keep pigs gaining because they supply vitamins, minerals and antibiotics baby pigs need for health and growth. They're palatable, too—pigs go to them early.

Give our program a trial this spring. Let us show you how we can help you get them to 50 pounds fast, and at low-cost, with these top-quality Purina Chows—the "Fast Start Twins"—Baby Pig Chow and Pig Startena.
