Laguna Const. Co. Gets Cleanup Contract In N.O.

Laguna Construction Company, owned by Jack Sanders, was awarded, within days after Hurricane Betsy, a contract by the Corps of Engineers to clean up the City of New Orleans.

The principal work consists of clearing of tree limbs and all other debris from city streets. Later it is expected to include private as well as public property.

Of particular interest is the massive size of the project and the rush to restore order. For instance, in terms of daily expenditure Mr. Sanders' contract is said to be the largest contract ever awarded by the Corps of Engineers. In terms of manpower, some 1500 Laborers, 45 foremen and 10 superintendents are working 84 hours per week. This force keeps in operation 250 — 14, 15 and 16 CY trailer dump trucks, 10 backhoes, five winch trucks, 10 chain saw crews and other miscellaneous dozers, tractors and related equipment.

Local employees of the company who have visited and assisted Mr. Sanders in getting this work organized report that projects now under contract will not be completed until about Dec. 31, 1965.

Third Grade Classes Hear Snakes Discussed

The third grade classes in the Rockport Elementary school have been studying about snakes in science. Mr. Nuckles from the Parks and Wildlife Department showed a film on snakes found in the United States.

The film showed pictures of the poisonous snakes and where they are found. It gave precautions to be taken when walking or working in the woods and also what to do if a person is bitten by a snake.

After the film was completed, Mr. Nuckles answered questions asked by the pupils. He cautioned the pupils not to play with snakes even though they may be nonpoisonous. If a person is bitten he said the bite or wound may become infected and cause serious trouble.

The classes of Miss Gilley, Mrs. James, Miss Sadler and Mrs. Sorenson wish to express their appreciation to Mr. Nuckles for the time he spent on the program. They also wish to thank Mrs. Freddie Geese for arranging the program.

ACHS Pirates To Host West Oso Here Friday

The Aransas County Pirates will be back on friendly soil this week as they entertain the West Oso Bears Friday night at 7:30 p.m. The local boys lost a 30-AA game to Aransas Pass last week by a frustrating score of 20-0.

West Oso, on the other hand, was mauling Gregory-Portland by the awesome score of 52-0. The Bears led by senior quarterback Larry Sims, ran and passed for 371 yards in winning their fourth straight victory of the season.

Coach Ben Bloomer has four lettermen back from last year's team that tied the West Oso team last year, 18-18.

West Oso is probably unique in the fact that they run from a multiple offense with emphasis on the T-formation and wing formations with an unbalanced line.

The Pirates showed much needed improvement defensively altthrough their offense failed to score. According to Coach Bloomer, the score could have been 13-6. Mistakes and penalties plagued the Pirates showing much needed experience with only three senior lettermen on the field most of the time.

With last week's game still with them, the Pirates are anxious to get back into action, and the West Oso Bears would like nothing better than to beat the Pirates on their own field.

The game should be a bone-crushing affair—and speaking of bones, the Pirates still have four lettermen out due to broken bones. Brian Barnard with broken ribs, Ray Brown with a broken collar bone, Theo Tippen with a broken leg, and Mark Meador with a broken hand.

Homecoming Barbecue for Congressman and Mrs. Young Set For October 13 In Sinton

A homecoming barbecue for Congressman and Mrs. John Young is in the planning stage following a committee meeting of area friends in Sinton last week. Tickets are being distributed throughout the 14th Congressional District for the affair which will be held at Rob and Bessie Welder Park in Sinton on Wednesday evening, Oct. 13, at 7 p.m.

G. A. "Dick" Gerdes of Sinton is overall chairman for the occasion and reports that over 5,000 friends and supporters of John Young are expected to converge on this centrally located district site. The spacious Rob and Bessie Welder Park, under the oak trees, proves to be a popular spot for such affairs. The location is some three miles north of Sinton on U. S. 181.

Gerdes said that the ladies are especially invited to attend the old fashioned barbecue, which will include barbecued beef, entertainment, refreshments and all the trimmings. Cong. Young, who has served the district since 1956, has become a very popular figure throughout the 18-county area especially due to his loyal and dedicated service to the people of South Texas.

The following local men were named as chairman and assistant chairmen of the various counties of the 14th Congressional District: Dick Picton, Emory Spencer, and John D. Wendell.

Tickets will be distributed by a ticket sales committee and various county chairmen. The price will be $2.00 for a fine evening of food, fellowship and entertainment. Tickets will also be on sale in various places of business throughout the 14th Congressional District. Tickets may be obtained in Rockport by contacting the above named men.

Police Chief Hewes Reports 5 Accidents During September

Chief of Police Bob Hewes, reported that in September five accidents were recorded in the City of Rockport. This is three more than in September, 1963, and two more than in September, 1964.

Accidents for the first nine months of 1963 were 46, for 1964 there were 37 and for this year there have been 42 reported.

Injuries are up this year with 14 to date as compared with eight last year and 20 in 1963.

In vehicle damage so far this year, there has been an estimated $15,620.00 in damage with 1964's estimate being $16,105.00 and 1963's estimate being $16,130.00.

Chief Hewes stated that the outlook is not bright for the number of accidents this year to be less than last year. He estimated that the total will be around 50 with 42 already reported.

The only bright spot on the local accident scene, if you call $15,620.00 worth of estimated damages to vehicles a bright spot, is that for the first nine months of this year this figure is lower than that of 1963 or 1964.

DRAFT POLICY FOR STUDENTS IS OUTLINED

Austin—The man in charge of Texas draft boards said Friday because of doubled quotas Texas college students will have a harder time getting student deferments than during the past few years.

Despite increased draft calls, Col. Morris S. Schwartz, state Selective Service director, said he will still recommend deferment of undergraduates taking 12 semester hours or more.

Also, he said, students taking just nine hours may be deferred if they are "making satisfactory progress" toward acquiring a bachelor's degree in four calendar years, or five years if the course requires additional study.

Schwartz set out these tentative guidelines for deferment of graduate students: 15 months for a candidate to get a master's degree and three years for a doctor of philosophy degree.

Students who drop out of school, who are on scholastic probation of fall below the required academic loads should not expect a deferment, Schwartz said.

CHECK YOUR COMPASS

Before leaving home be sure to check your pocket compass so that in an emergency you can quickly locate the four compass points.

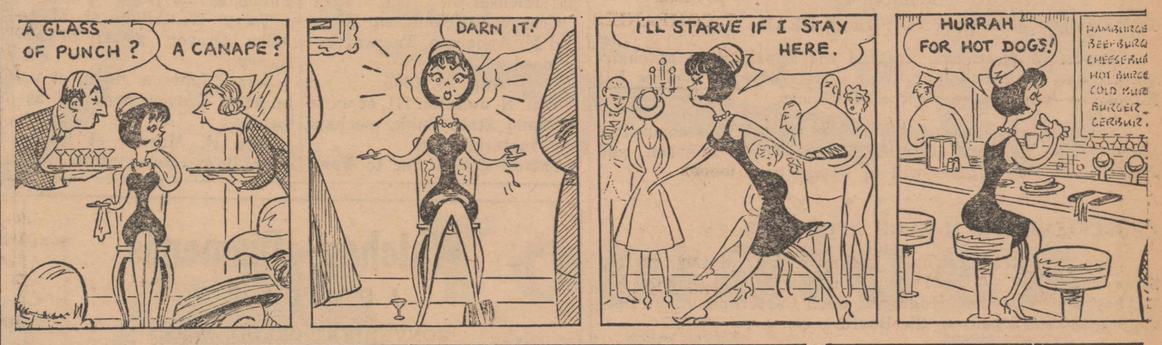

When in strange surroundings it is easy to become confused as to which end of the compass points North.

Since North and South are painted different colors on most compasses, it is wise before going afield to mark on the back of instrument which color represents North.

HIGH SCHOOL SCIENCE DEPT. NEWS

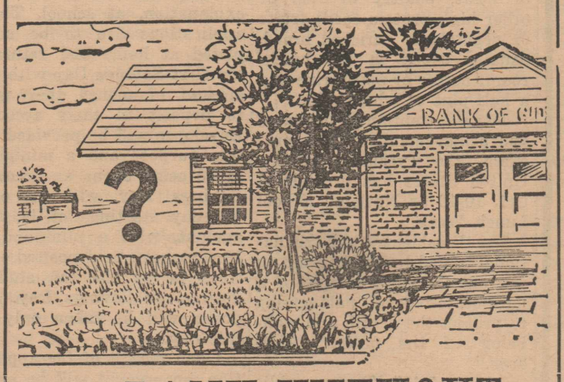

In the high school science department, there is an enrollment of 101 freshmen general science students; 101 sophomore biology students; 50 chemistry students (juniors and some seniors); and a class of nine senior physics students.

Many preparations for the year are underway in this department. Projects have already begun for the annual regional science fair that will be held in El Campo in early March. Preparations are also being made for the annual science UIL contest. This is a contest usually limited to the junior and senior level of high school work, however, freshmen and sophomores are encouraged to enter to gain needed experience for their junior and senior years.

In order to gain an insight into all types of science, the students are encouraged to read 15 books that can be found in the high school library for this purpose. These books are read to acquaint the students with facts, but moreover with how to put these facts to unique and accurate analysis. The student is also encouraged to read current scientific articles to be found in science journals, popular scientific books, and newspapers.

G. C. Watkins is the instructor for all biology students and also one section of science. Mr. Watkins holds a BS Degree in biology from Lamar Tech and is currently working toward a Master's Degree in biology at Texas Tech.

E. G. Brooks is instructor in general science, chemistry and physics. Mr. Brooks holds a BS and MA degree from Southwest Texas State College.

Vets. Administration Explains GI Insurance Dividend

The Veterans Administration labeled "totally incorrect and misleading" recent reports that certain veterans may obtain up to $200 for a 1948 GI Insurance Dividend.

This insurance dividend has already been paid to more than 16 million World War II veterans and was concluded in 1950, according to Percy J. Mims, manager of the Veterans Administration Regional Office in Houston.

The dividend was highly publicized and nearly all veterans "who were eligible have received payment," Mims emphasized.

"For example, "he pointed out, "99.8 per cent of the 760,000 Texas veterans who had National Service Life Insurance at the end of World War II have received the dividend.

"Some few veterans with lapsed policies were not reached by the Veterans Administration due to incorrect addresses. While these few are still eligible, the passage of 15 years without contact indicates that a great many of these veterans may be dead," the VA manager added.

The Veterans Administration is carrying on a continuing program to locate the very few veterans who may still be eligible, he added.

The ruling about the GI Insurance "Bonanza" apparently has been fed by posting the misleading story on bulletin boards of industrial plants. It has been denied repeatedly by VA in press releases throughout Texas.

Mims urged all veterans to carefully review their individual GI insurance policies to make doubly sure that no previous application has been submitted.

Rotary Foundation To Support Candidates For Foreign Study

The Rockport Rotary Club and each of the 35 other clubs in Rotary District 593 of South Texas may propose four candidates for foreign study under a new Rotary Foundation educational program, according to club president, John E. Ross.

The new program is to provide technical training for outstanding young technicians and artisans who will be sent abroad to undertake training in a wide variety of technical fields for periods up to one year.

The technical Training Program, complementing the Rotary Foundation Fellowships Program, will make the foundation more effective than ever before in promoting international understanding within every segment of society, Jack H. Drake, Weslaco, district governor of 593 said.

"At the same time it will serve to foster and encourage the recognition of the worthiness and dignity of every useful occupation as a means of serving society," Drake said.

Past District Governor J. D. Moore of the Victoria Club is in charge of the Rotary Foundation "Awards for Technical Training." He is to supply application forms and explanatory literature for the program.

Rotary Clubs in 1965-66 are eligible to propose candidates for two groups of technical students. One group is to study in 1966-67 and the other in 1967-68.

Selection of the first group whose awards will be announced by the trustees of the Rotary Foundation in May 1966 will begin immediately, Drake said. Selection of the second group whose awards will be announced in August will be made later.

Each club may propose two candidates for each group. From among these club endorsed candidates, each Rotary District may select two candidates for each group. Trustees of the national foundation then make awards to not more than 25 district endorsed candidates in each group, Drake said.

Final date for individual students seeking technical training abroad to make application to local clubs is Jan. 1, 1966.

USDA SCHOOL LUNCH PROGRAM REACHES 31.1% OF TEXAS STUDENTS

What kind of lunch does your child have at school?

Around 30 percent—31.1 per cent—of all students enrolled in Texas public schools eat in lunchrooms operating under the national school lunch program of the U. S. Department of Agriculture.

This means your child has a wholesome and nutritious meal of meat, poultry or fish or other high protein food; fruits or vegetables; enriched bread, usually baked in the lunchroom; butter or margarine and a half-pint of whole milk.

To call attention to the value and achievements of this program, the President of the United States has proclaimed Oct. 10-16 as National School Lunch Week.

The President cited the national school lunch program as "an outstanding example of a local-state-federal partnership to protect the health and well-being of the nation's children."

About 3,415 Texas public schools are operating under the national school lunch program, which provides federal funds, foods and technical assistance to help keep the price of meals low to students.

Texas students pay an average of 31c per lunch, according to Mr. Charles Hicks, chief consultant, school lunch program, Texas Education Agency.

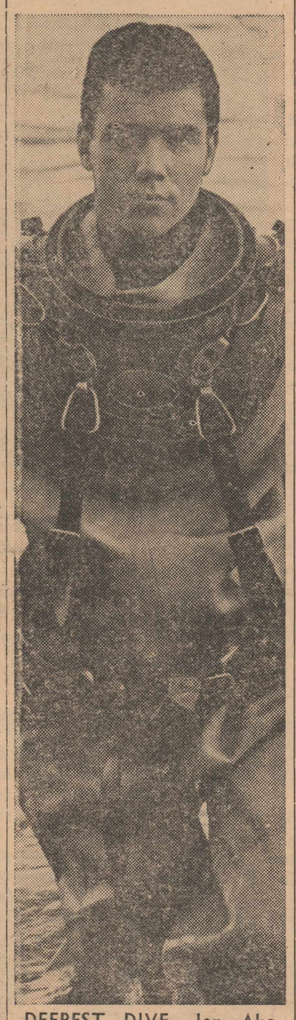

USDA-donated foods are distributed to schools by the Texas Department of Public Welfare.

The school lunch program is handled at the federal level by USDA's Consumer and Marketing Service.

Last year, Texas schools received about $6,660,000 in federal funds and 50,796,583 pounds of USDA - donated foods, according to John J. Slaughter, southwest area director, food distribution programs, C&MS, Dallas.

Educational Savings Program Established

Through the combined efforts of the Rockport, Fulton, and Sacred Heart Elementary school officials and United Savings Association, the students in Grades 1-6 will be given the opportunity to participate in a thrift education program. School Savings is designed so that with the help of the parents, the students can be taught the importance of planning and saving for the things they want in life.

The educational savings program is an Aransas County project designed to help the students living in Aransas County.

On Friday, Oct. 8, each student of elementary school age will receive an application for an account with a letter of explanation, at school. These applications are to be completed at home and returned the first Savings Day with the amount of money they wish to deposit in their account. Envelopes will be provided for this purpose and a minimum of 50 cents opens an account. Savings Day will be each Tuesday, starting Oct. 12. Any amount, with a minimum of 10 cents, can be deposited each week or as the the student desires, on Savings Day. Deposits will be taken only on this day.

Upon receipt of the application, an account will be opened at United Savings Association. A passbook and complete information will be mailed directly to the home.

Each savings account is fully insured and will earn the regular dividend when the account balance reaches $5.00 or more.

A coupon passbook will be utilized by the students. With the parents help, the student will make each entry in the passboook on the afternoon before Savings Day. A coupon will then be torn out of the passbook and enclosed in the envelope provided with the amount to be saved. On Savings Day the envelopes will be collected at the school and taken to the United Savings Association office for credit to the student account.

Delmar Hiller, of United Savings Association, Mr. Underwood of Fulton Elementary, Mr. Griffith of Rockport Elementary and Sister Alyce of Sacred Heart Elementary, have been working for several months to establish an educational service such as this. It is felt by those involved that there is a definite need for such a program whereby children can be taught systematic savings.

Poll Tax Payments Began Last Friday

Austin — Issuance of poll tax receipts began Friday, but in a much different atmosphere from previous years.

Some political leaders fear a pending federal court suit may discourage payment of the $1.75 head tax.

And if the federal court suit is not settled by next Jan. 31, when poll tax payments stop, these non-tax payers may not be able to vote on strictly state and local issues and candidates.

"As far as we are concerned this is just like any other year. Poll taxes go on sale Oct. 1," said an official in the state comptroller's office. "We assume every county tax collector is ready to issue receipts."

However, there were unverified reports that some counties might delay accepting poll tax payments until at least after a scheduled mid-November hearing on the federal court suit.

State headquarters of the Democratic and Republican parties said their parties are urging payment of the poll tax in order to avoid any possible disenfranchisement.

The Texas AFL-CIO has urged its labor union locals to continue the past practice of pushing poll tax drives.

Texas' poll tax problems began with the federal Constitution change of 1963 which prohibited the requirement of a poll tax receipt, or payment of any other tax, for votng. In the 1964 general election, about 84,000 persons voted "free," without poll tax payment, for president, vice president, U.S. senator and congressmen. However, the poll tax receipt was required to vote for governor or any other state, district or local officials because that requirement is still in the state constitution.

Then the 1965 voting rights bill strengthened the poll tax ban by directing that federal court suits be brought against the four states still maintaining the voting requirements—Texas, Mississippi, Alabama and Virginia. The suit against Texas' 63-year-old poll tax law was filed Aug. 10 and trial was tentatively set for the week of Nov. 14. Appeals could extend the litigation several months.

The federal suit is filed specifically against the state of Texas, the Travis County chairmen of the Democratic and Republican parties, the Mayor of Austin and election officals of a Northwest Austin precinct.

(Poll tax receipts for Aransas County are being printed and will be on sale shortly.)

PACE GEESE SKIP TEXAS FOR MEXICO

Better postpone licking your lips in anticipation of future goose dinners based on overhead nocturnal calls being heard these nights.

They're from migrating geese in all likelihood.

But C. D. Stutzenbaker, Texas Parks and Wildlife Department biologist, suspects the big birds are not for Texas dinners.

The waterfowl specialist said there is an unsubstantiated theory that the early Canadian and white-front arrivals from the northland may skip Texas and scoot on down into Mexico for the winter.

This is just one of nature's intriguing mysteries that challenge wildlife men. In time, it is hoped through banding and other studies that the factual story of the early flights will be determined.

Stutzenbaker pointed out that geese do not breed until two years of age and that the yearlings, lacking any parental responsibilities or family restrictions, might take off early, perhaps stop over once or twice along the flyway, and then high tail it farther southward.

The Department field man, whose base of operations is the Murphree Wildlife Management Area near Port Arthur, said it won't be long now, though, until the mighty goose flocks reach the coastal marshes and set up feeding routine in the vast rice fields.

Tom Waddell, retired game warden supervisor and unofficial custodian of the huge Lissie Prairie hunting areas in Colorado County, said the goose advance echelon are due any day and that the major buildup will occur around Oct. 15.

The tiger scores again!

It's dramatically fresh and new, but still very, very Pontiac. That's written all over it, from the no-doubt-about-it new front end to the trimly tailored rear. (Did you think for one minute that we'd leave out the unique Pontiac styling character you like so well? Never!)

Another nice thing about the '66 Pontiacs is that there are more of them—3 new super-sumptuous Broughams and 4 Venturas. And, of course, for you other Pontiac lovers we've got a bright new Grand Prix, new Catalinas, new Star Chief Executives—all with new Wide-Track ride and improved cat-quick handling. But you'll discover those things when you slip behind the wheel and turn a new '66 tiger loose. **Wide-Track Pontiac/'66**

WORK REQUIREMENTS FOR SOCIAL SECURITY NOW CHANGED

Some persons who has not worked long enough to qualify for social security payments will now be eligible under recent changes in the Social Security Act., according to H. M. Cleveland, Corpus Christi district manager of the Social Security Administration.

The new provision makes it possible for older workers to qualify with as little as three "quarters of coverage"; the previous minimum was six such quarters.

In commercial employment a quarter of coverage is a calendar quarter in which a worker was paid wages of at least $50; quarters are credited for farm work, and for the self-employed, on a different basis.

The following table shows the groups that the new provision affects:

Year Became 62 (woman), 1954 or earlier, quarters needed, 3; 1955 or earlier, quarters needed, 4 ; 1956 or earlier, quarters needed, 5.

Year became 65 (man): 1954 or earlier, quarters needed 3; 1955 or earlier, quarters needed, 4; 1956 or earlier, 5.

Workers who qualify under the special provisions will receive $35 a month; payments cannot begin, however, until the worker reaches age 72. Persons who think they may be affected by the change should check with the social security office, Cleveland said.

An average of 44,000 lightning storms occur a day around the world.

PHYSICIANS, DENTISTS, VETERINARIANS ARE BEING DRAFTED

About 450 physicians are currently being ordered to take physical examinations by Texas draft boards, Col. Morris S. Schwartz, state selective director, said Friday.

This is part of the preparation for anticipated calls for doctors, dentists, and veterinarians to enter on active armed forces duty in January.

The Texas share of a national call for 1,529 physicians, 350 dentists, and 100 veterinarians has not been received, Coloned Schwarts said. The Texas quota is expected to be about five per cent of the natialal total, he said.

Some dentists and veterinarians will also get physical examinations, but not so many as physicians because only those born in 1937 or later will be affected by the order at this time.

Local draft boards have been directed to obtain classification information from all physicians available in classes 1-A and 1-A-O and deferred in classes 2-A, 2-S, and 3-A.

After receiving this information, the boards will reopen all these cases and consider them anew. This processing, including any appeals, is scheduled for completion by Dec. 1.

Reclassification will opply only to dentists and veterinarians born in 1937 or later.
