

On The BEAM

J. W. KING, SR.

Isn't it wonderful? Up to now this part of the country has had only light and gentle rains this spring. We have had none of the violent weather that has visited so many parts of Texas. Many crops have been planted and farmers have been afraid a hard rain would come and cause them to have to plant over. Not many of the crops are up but with a few days of hot weather the gentle rains will help them to get up.

Just a little more than two weeks now until the runoff primary in which Texas Democrats will select a governor from the two men, Preston Smith and Don Yarborough, who were top men among the ten candidates. The man selected on Saturday, June 1, will be the Democratic candidate pitted against the Republican candidate for governor in November. Make up your mind for one or the other of the two and vote on June 1. The candidate you prefer might win or be defeated by your vote or lack of it.

The general public needs to get back to the principals when law and order were uppermost in their mind. We can't put the blame for the disregard for law and order on the young people of our day for there are too many older people who practice in more ways than one, almost every day, the breaking of some law. It may be a minor traffic infraction but many of us are guilty. And, of course, traffic laws are not the only laws that many disregard. Let's become law-abiding citizens again by refraining from doing unlawful things.

Q. How often do you get a bargain these days?

A. Every time you use electricity.

True, your electric bill probably is higher than it was a few years ago. That's because you use more electricity to enjoy added comforts and conveniences.

During the past 10 years, the average price per kilowatt-hour to residential customers of Texas Electric Service has come down 27%. At the same time, the average annual use of electric energy by our residential customers has more than doubled.

Electric service is a big exception to rising living costs. It's one of the few things that costs less than 10 years ago.

Electricity, the clean modern energy that does so many nice things for you, is the biggest bargain in your household budget.
