HOME AND HEALTHY — Matthew Abel Thomason, born April 18 with less than a 50 per cent chance for survival, is now home and gaining weight rapidly. He was rushed to an Amarillo hospital where his condition was described as critical for several days. His older brother, Lucas Cain, 17 months, is making sure the newcomer to the Thomason home is welcome.

Baby Matthew Beat The Odds and Lived

By ANNABURCHELL

Nineteen days ago, Matthew Abel Thomason made his debut at Highland General Hospital two weeks prematurely with a respiratory problem called hyaline membrane, which gave him less than a 50 per cent chance for survival.

Matthew, son of Mr. and Mrs. Mike Thomason of 1224 N. Starkweather, is home and healthy today.

However, it has been only two short weeks since physicians described his condition as critical.

It is very serious, said an Amarillo pediatrician.

Matthew was rushed to Northwest Texas Hospital in Amarillo four hours after his birth on April 18 by Metropolitan Ambulance Service.

Enroute to Amarillo, the ambulance incubator heater went out and a helicopter from the Potter County Sheriff's Office was dispatched to the ambulance route on U.S. 80.

Ambulance attendants said they chose to warm towels and drape over the incubator instead of taking time to move the infant into the helicopter. However, they used radio contact with helicopter pilots and the City of Amarillo turned all lights on right while the helicopter made sure traffic was clear.

I knew the baby would be alive when we reached the hospital but didn't know if it would get too cold and take pneumonia, said an attendant.

Hyaline membrane is described by one physician as a condition of the lungs in newborn created by a barrier between the air sacs and blood stream which interferes with oxygen exchanges.

Matthew's problem is not unique among premature babies, but physicians say five years ago his chances to live would have been nil.

Advanced medical procedures along with specialized equipment have allowed thousands of infants to recover today with no fear of abnormality.

It was almost 12 years ago that this nation heard the news that Patrick Bouvier Kennedy son of the late President John F. Kennedy and his wife had died. The child's problem was diagnosed as hyaline membrane.

That announcement was made on Aug. 9, 1963 — two days after the infant was born prematurely.

Matthew was immediately placed under oxygen at the time of his birth, but his physician said his condition worsened quickly.

Nurses informed his 18-year-old mother four hours after his birth that her son would be taken to an Amarillo hospital.

I didn't know how serious it was, said Mrs. Thomason who called her husband to relay the news.

Thomason, 19, said he learned when he reached the hospital that the child's condition was critical.

For the first four days, Matthew hovered between life and death in the infant intensive care unit of Northwest Texas Hospital.

On the fifth day, Mrs. Thomason was told that her son was improving and that his oxygen supply had been cut from over 30 per cent to 35 per cent.

At home in Pampa, Matthew is rapidly gaining weight on a formula which might be that of any normal baby.

His parents' only problem now is helping Matthew's older brother, Lucas Cain, 17 months, realize that his brother is not yet ready to become a playmate.

Texas Senate Approves Utility Regulation Bill

AUSTIN, Tex. (UPI) — A utility regulation bill approved by the Texas Senate is stronger control than utility companies want, but considerably weaker than consumer groups prefer.

Sen. William T. Moore, D-Bryan, sponsor of the bill, said the proposal is a good start toward eliminating Texas status as the only state with no control over rates set by telephone and other utilities.

I think this bill has a chance of passing, Moore said. A great number of people want no regulation at all. On the other hand we have people that want regulation to be so strict that it would be financially impossible for the utilities to operate. When you take the consumer advocate position to the extreme you go into socialistic communism.

Katy Davis, a Common Cause representative, said Senate approval of the bill marked a black Monday for the state's consumers.

Sen. Ron Clower, D-Garland, considered a consumer advocate in the Senate, disagreed.

We have a workable bill that is good for the consumer good for the utilities and for the first time in the state of Texas, will allow us to regulate utilities, Clower said.

The bill creates a three-member appointed commission to regulate intrastate telephone rates, and rates of private electric, water and sewer utilities. It leaves regulation of natural gas utilities to the Texas Railroad Commission.

Rep. Raul Longoria, D-Edinburg, lost 19-11 an attempt also to give the utility commission power to regulate gas utilities.

Clower attempted to amend

the bill to allow public election of the members, but that proposal was rejected 21-8.

Speaker Bill Clayton said it will probably be next week before the House can begin debate on utility regulation.

House members voted 101-36 Monday for legislation by Rep. Joe Pentony, D-Houston, limiting the amount of money candidates may spend in statewide political campaigns in Texas.

Pentony said his bill limits spending in the governor's race to \$850,000 in the primary and general elections, and to \$325,000 in primary runoff.

I think \$850,000 is enough for anybody to communicate with the electorate, he said.

Above that you're buying the office.

In other action the House has tentatively approved legislation its sponsor says will keep rich Texans from dominating state politics.

This legislation is aimed directly at grossly buying an office, said Rep. Joe Pentony, D-Houston. I think \$850,000 is enough for anybody to communicate with the electorate.

Above that is buying an office.

Pentony said his bill tentatively approved by the House on a 101-36 vote Monday limits spending in most statewide races to \$850,000 in the first primary election, \$325,000 in a primary runoff and \$850,000 in a general election.

My bill puts the same limit on a candidate for governor that is already on candidates for U.S. Senator, Pentony said.

The spending ceilings in Pentony's bill could fluctuate with the number of persons old

enough to vote. The bill permits candidates to spend up to 10 cents for each voting age resident in general and primary elections and four cents per

voting age residents in runoffs.

If you raise \$450,000 in contributions and your opponent is limited to \$850,000, you've still got a fighting chance, Pentony said. But if you raise \$450,000 and that's a lot of money to raise, you don't stand a chance if your opponent can spend a million and a half.

Saigon Rulers Order Money, Guns Turned In

By United Press International

Saigon's ruling Military Management Committee broadcast its first order today—a demand that all military officers and servicemen, policemen and all former government workers register between May 8 and May 31 and turn in all money and weapons.

A Saigon radio broadcast said the order must be strictly carried out and that those who do not report by 2400 hours (midnight) May 31 but deliberately hide will be severely punished. In previous Communist terminology in South Vietnam, severe punishment has been a euphemism for death by execution.

With Saigon radio reports saying the city was returning to normal the Paris delegation of the Provisional Revolutionary Government hoisted their star studded red and blue Viet Cong flag over the stone mansion which previously housed the South Vietnamese legation.

Helped by a group of volunteers from the Vietnamese colony, they were busy cleaning up the offices of the embassy on Avenue Villiers, off the Arch of Triumph, for a mass ceremony scheduled in front of the building tonight.

The French Communist Party Peace Movement and labor union factions called the rally to demand that France recognize the PRG. PRG officials said their mission has not yet been officially granted consular privileges by France which has not yet decided when to exchange ambassadors with the new Saigon authorities.

The government of Australia, one of the American allies in the long war in Vietnam, announced today it was recognizing the new Communist government in Saigon.

Communist reports Monday said the new Viet Cong rulers had freed political prisoners from Tiger Cages on Con Son Island in the South China Sea and that the new regime was preparing a mammoth welcome for them in Saigon.

The military order broadcast over Radio Saigon today and monitored in Bangkok said. In reporting and registering all must surrender their identification cards, all personal documents, all weapons, files, documents, means, cash boxes and so forth.

The broadcast said the instructions were contained in Order No. 1 of the Saigon Gia Dinh Military Management Committee, dated May 5 and signed by Col. Gen. Tran Van

Tra as chairman. Saigon is the capital of Gia Dinh Province.

Saigon Radio also broadcast today a communique of the Revolutionary Government's Committee for the Recovery of Military Equipment which demanded preservation and return of all military materials, equipment and vehicles abandoned by the former government.

This order likewise was backed up by threats of severe punishment. It was issued by Tran Van Kim, chairman of the Central Committee for Recovery of Military Material and Equipment.

No one is allowed to destroy or burn any military material or equipment left behind by the U.S. puppets such as uniforms, shoes, machines, vehicles, the order said.

Radio Hanoi said in a broadcast today. In the past three days Hanoi continues to live in an exhilarating mood.

The streets resound with the sounds of firecrackers, drums and songs. At night most parks and crossroads and other public places are filled with cheering crowds who come to watch art performances.

Talks on the historic victory are being given. People are also going to clubs to play chess, watch cockfights and attend film shows and puppet shows.

Two documentary films on newly liberated Hue and Da Nang are now being screened here, the Hanoi broadcast said.

The Yugoslav news agency Tanjug in a dispatch from Hanoi said the new regime released all political prisoners held without trial on the island.

Weather

Clear to partly cloudy skies are forecast today through Wednesday with the high expected to reach the mid 70s today. The low tonight will be in the 40s.

and was organizing a ceremony to welcome them in Saigon.

Tanjug did not comment on the condition of the prisoners but said inmates freed previously from Con Son were often unable to walk erect because of muscles crippled by lack of use.

The Yugoslav news agency said the prisoners had been kept in cramped tiger cages on Con Son, an island 60 miles off the southern coast of South Vietnam.

Tanjug said the prisoners, jailed without trial for opposing the defeated Saigon government, were returning to their families.

The Soviet news agency Tass said Russian ships have begun carrying supplies to South Vietnam in the wake of the Communist takeover of the country.

Local Jails House Four From Canadian

Four persons from Canadian were overnight guests in the City of Pampa and Gray County jails Monday night.

The Hemphill County jail was filled to capacity authorities reported.

Deputies from the Hemphill County Sheriff's Office in Canadian were en route to Pampa at noon today to transfer the inmates to Canadian.

Three were held in the Gray County jail and one in the City of Pampa jail. Officials here reported the three in Gray County jail were charge with possession of marijuana as was the one female housed in the city jail.

Houston Man Charged Here With Possession

A Houston man, Martin Durwood Allen, 46, charged with possession of marijuana Monday afternoon, is in the Pampa City jail in lieu of \$5,000 bond.

Allen was arrested by Pampa Police Chief Richard Mills following a disturbance at Highland General Hospital.

Bond was set by Justice of Peace E. L. Anderson.

Police records show that Allen was attempting to see a patient in the hospital when the disturbance was reported.

Allen is an ordained minister, police said.

They Wouldn't Let it Die

Lefors Handles Problems Optimistically

By DONNA ROBERTS

News Lefors Correspondent

As one drives through Lefors it is apparent that the towns people did not give up after the disastrous tornado that ravaged their town more than a month ago.

There are vacant lots where houses once stood. The rubble has been cleared off by bulldozers. On some lots are

homemade signs stuck in the ground stating to whom they belong. It may take awhile, but most people plan to rebuild.

Of all the people that received damage from the tornado only four or five families have chosen not to relocate their homes in Lefors.

The rest have found temporary housing to stay in until they can

rebuild or move ready-made houses onto their lots.

About 35 families are living in trailer parks that were set up by the Housing and Urban Development Division of the Federal Government.

The land was donated by local citizens who are to be paid one dollar by the City of Lefors for the lease of their land for one year.

It has been reported that the mobile homes that have been provided by HUD will be on sale after one year. They will be available only to those who occupy them now.

Other families are living in apartments or houses in Pampa that were provided by HUD.

The City of Lefors has drawn up plans for a new Civic Center and will start receiving contracting bids sometime this week. Construction is expected to begin within a month and a half.

The city council has been meeting weekly instead of

monthly in order to take care of mounting problems within the city.

The council is working on replacing street signs and lights as soon as possible.

Smaller problems include those people who are rummaging through the dumpground. The Council voted to post a sign stating that there is a \$200 fine for taking anything from the grounds.

The city also plans to take action on those able-bodied persons who have not made any effort to clean up their property. Their reasoning is that some of the remaining building and structures may be health and fire hazards.

There was an estimated \$12,000 damage to school-owned property including the superintendent's home and a house which belongs to the Home Economics Department. Repairs on these already have been completed.

It has not yet been determined

when the Post Office in Lefors will be rebuilt. Reports say that the Make-shift Post Office will remain there for approximately two years.

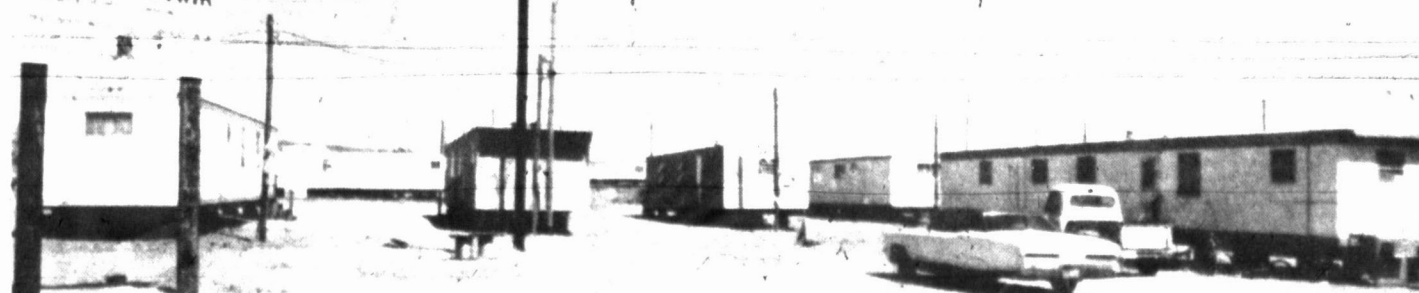

The First Baptist Church of Lefors is holding classes in the public school since their Sunday School Department was severely damaged.

Little League Baseball has begun in Lefors even though the baseball field received damage and there are no lights. Therefore, baseball games will be played early in the evening in order to take advantage of the sunlight.

It is evident that the town of Lefors will not die.

the cooperation of City of Lefors, Gray County, U.S. Department of Housing and Urban Development. It was named for John Archer, mayor of the town.

(Staff Photo)

HOUSING FOR LEFORS — The March 27 tornado that struck Lefors left many people homeless. The problem has been partially solved with the mobile homes in Archer Park. The mobile home community was developed with

the cooperation of City of Lefors, Gray County, U.S. Department of Housing and Urban Development. It was named for John Archer, mayor of the town.

Our Capsule Policy

The Pampa News is dedicated to furnishing information to our readers so that they can better promote and preserve their own freedom and encourage others to see its blessing. Only when man is free to control himself and all he produces can he develop to his utmost capability.

The News believes each and every person would get more satisfaction in the long run if he were permitted to spend what he earns on a volunteer basis rather than having part of it distributed involuntarily.

Front lines of defense

The concern voiced by Philippine President Ferdinand E. Marcos over the firmness of U.S. military commitments could — and should — be cause for equal concern among the American public.

U.S. installations in the Philippines, such as Clark Air Base and Subic Naval Base, are an undeniable asset to the nation's economy with their Air Force and Navy payrolls and civilian jobs. Recent events in Southeast Asia, however, have persuaded Marcos to weigh the benefits against the potential liabilities.

The shrinking U.S. defense perimeter, he notes warily, threatens to place the Philippines into the "front line" of Pacific security and make the islands vulnerable to attack by an adventurous U.S. enemy.

And he is increasingly doubtful of the American commitment to a 24-year-old U.S.-Philippines mutual defense treaty. A pledge of U.S. involvement in any assault on the Philippines, he points out, is contingent on conformance with "constitutional processes."

Marcos is skeptical of the congressional approval required for

such action under new legislation limiting presidential powers.

Other U.S. allies have been less blunt than Marcos in assessing the odds on the United States coming to their rescue in case of aggression, but they are no less nervous.

While the European nations have proclaimed publicly their faith in continued strength of U.S. world leadership, they do not hesitate to speculate privately on the risks of dependence on an America which is wavering in its purpose.

Erosion of confidence has also been evidenced in varying degrees in the Mediterranean, the Middle East and Japan.

The entire world, friend and foe, has its eyes on Washington as the free world lifeline. President Ford and Congress must act quickly to reestablish unity and purpose in foreign policy.

Even the most avid supporters of the Fortress America concept must shudder at the possibility of a national security line that claimed Key West, Atlantic City, Pearl Harbor or Nome as its most remote outposts.

A lesson from Britain

The exhortations of Britain's chancellor of the exchequer, Denis Healey, might have emanated from Washington.

In an interview on BBC-TV, Healey called for a "fitter, not fatter" nation.

"We must work more and waste less," he said in urging the British public to accept sacrifices in living standards to cope with inflation, business doldrums and a spiraling national debt.

But there is a paradox, too, in the national responses of the United States and Britain to economic crisis. In the United States,

which has been the shining example to the world of the glories of capitalism, there is a growing trend to condemn corporate profits and shackle private enterprise.

Yet in Britain, far down the road to socialism, Healey emphasized the need to provide incentives for increased private investment in nationalized industries to encourage greater productivity, new jobs and answers to energy shortages. "I believe we must get down to practical measures," he said.

There seems to be a lesson herein.

An unneeded customer

The fracas in Ethiopia between government troops and Eritrean guerrillas pursuing secession is one conflict that the United States can bypass gracefully.

Our aid program to the African nation was virtually suspended last year after a military council deposed Emperor Haile Selassie and shot 60 former government leaders without trial.

The \$30 million in ammunition and further aid now sought by

Ethiopia to put down the Arab-backed uprising in Eritrea province is greater by more than 30 per cent than all 1974 assistance given to that country.

With American arms and American bullets fueling combat in Southeast Asia, Cyprus and the Middle East, we need no more clients for our arsenal.

The Ethiopian request should be answered with a firm "no."

Rebate wait.

CONSERVATIVE ADVOCATE

New Party In The Making?

By WILLIAM RUSHER

Dr. Gallup's recent report that a solid 25 percent of American voters are ready, right now, to support a new political party more conservative than the Republican party has jolted a lot of people out of their previous smug hibernation on the subject.

Moreover, Gallup, as usual, wasn't exactly tilting the pinball machine in the conservative direction. On the contrary, the question his pollsters asked made it nearly impossible to answer "Yes" unless the voter being interviewed was almost ready to yank grandfather's sword off and wall and start carving up liberals personally.

"There is talk," he began, "of a new political party being represented in next year's presidential race. This new party would support policies that are more conservative — that is, more to the right — than those of the Republican party today." Not the double stress on the nature of the new party. Nobody really needs to be told that a party "more conservative" than the GOP would also be "more to the right." The next effect is merely to make the proposal sound, to the average ear, more "extreme." Having rolled his truck first forward and then backward over the idea, Dr.

Gallup finally inquired, "Would such a party be likely to win your support or not?"

And lo and behold, one out of every four people questioned was ready, nevertheless, to answer "Yes."

The most astonishing thing about the response, next to its size, was its uniformity. Republicans, Democrats and independents, young, middle-aged and elderly, East, Midwest, South and West — every single category voted "Yes" in a proportion never lower than 23 per cent and ranging up to 29 per cent.

One can only speculate what the response would have been if the good doctor had described the new party idea more fetchingly and then put it in some realistic context. There is talk of a new political party being represented in next year's presidential race. Those who favor it say the Democrats tend to be too liberal, and the Republicans too wishy-washy. They would like to run former California Governor Ronald Reagan for president, under the banner of a new party more conservative than the Republican party today. If they did, and if the Republicans nominated Gerald Ford and the Democrats nominated Edward Kennedy, which of the three

candidates would you support?

My guess is that the vote for Reagan would blow Dr. Gallup's mind. But apparently America isn't ready for that question yet. Certainly the pollsters aren't.

The strong support for a new party more conservative than the GOP comes as no surprise to organized conservatives, whose seismographs picked up rumblings to that effect as far back as last autumn. At their mid-February conference in Washington they appointed a broad-based committee to inquire into the possibilities. Nothing that has happened since has changed the minds of those who believe that the time is ripe for a new party effort.

The present lack of a declared and willing candidate is, to be sure, a handicap, but hardly a fatal one. No major political figure can reasonably be expected to swear undying allegiance to a party that hasn't even been formed yet. But both Ronald Reagan and George Wallace, who are currently pondering whether to run for the Republican and Democratic nominations respectively, each as the conservative champion, have discreetly left the door open for the new party alternative if they are blocked by liberal maneuvering in the national conventions.

The real problem of new party enthusiasts today is neither public support for the idea (which is impressive) nor candidates (who will, in due course, be forthcoming). It is organization. There is probably no more chance of stopping a major challenge to both the Republican and Democratic parties next year than King Canute had of stopping the incoming tide. But at present those working to organize it are an ill-assorted jumble of partly overlapping, partly antagonistic factions, none of which is big enough or skillful enough to do the job by itself. Who will draw these efforts together into a unified operation, and what candidate or candidates will ultimately benefit from its support? Those are the only questions truly open today.

(Copyright 1975)

STOPOVER VISITS

MONTEGO BAY, Jamaica (UPI) — Tourism figures for 1974 showed an increase of 3.5 per cent in "stopover visitors" — those staying overnight or longer — over 1973, according to Jamaica's Minister of Industry, Commerce and Tourism P. J. Patterson.

The increase of visitors in all categories was two per cent, or 527,664 arrivals. This figure includes long and short stay arrivals, cruise ship passengers and armed forces visitors.

SMOKEY HONORED

SANTA FE, N.M. (UPI) — The 1975 session of the New Mexico legislature provided funds for establishment of a state historical park to honor one of its most famed citizens — Smokey the Bear.

Smokey, the longtime symbol of the U.S. Forest Service, was rescued from a forest fire in the Capitan Mountains of south-central New Mexico in the 1940s.

The proposed state historical park is expected to become the burial place for Smokey when he dies. The bear presently is in the Washington Zoo.

Teacher Blamed For Poor Reading Grade

By MAX RAFFERTY

Q — "Last fall when I went to a parent-teacher conference about my sixth grader, the teacher said, 'he likes to visit during reading class.' So I asked her whom he sat by. She told me and I suggested she move him (I've never heard of a parent having to tell a teacher to reseat a child, incidentally). She informed me he was behind in reading, so we prodded him at home. I called and asked her a month later how he was doing, to which she replied that he was 'keeping up.'"

When the report card came in January, he received a D in reading. He is in the "best" group and he failed to hand in a book report which I knew nothing about until it was too late (she could have sent home a note or called me). I wrote a note and told her he needed padding and to keep him in at recess and after school to finish his work. I also suggested she put him in the "middle" reading group if he can't keep up in the "best" one.

Do the teachers today really care if a child gets his work or not? I don't think they want to stay after school themselves. — Mrs. J.C. Sioux City, Iowa

A — Let's break this down into two parts:

1 — The teacher obviously should have put your son in the lower reading group long before January. His grade proves this. After all, if pupils in the "best" group are getting Ds, what on earth must those in the lower groups be getting?

2 — However, I think you're zeroing in on the wrong target. A teacher can't reasonably be expected to notify you personally every time your son receives an assignment. What's the matter with your son notifying you himself? If he's a sixth grader, he must be 12 years old — plenty

old enough to keep track of his own assignments and to turn in his own work. If I were you, I wouldn't give Junior a hard time because he's having trouble reading, but I'd darned well cloud up and rain all over him for shooting his mouth off when he's supposed to be listening to the teacher and for goofing off when he's got a book report to turn in.

Q — "Recently you went off half-cocked on the subject of acupuncture. Dr. Benica, whom you quoted, is not an authority on

acupuncture. He is a fine anesthetologist, but touring China and observing the insertion of needles in people he cannot communicate with does not make him an authority on their use. There are too many people being quoted as experts on acupuncture who have never inserted a needle or treated anyone with this modality. If you want the lowdown on it, why don't you get your information from someone who is using it?"

Dr. Benica is right about acupuncture for anesthesia not finding much usage in this country. But therapeutic acupuncture for treatment of certain pain problems and dysfunctions of the sympathetic nervous system is being used by many competent physicians in this country in the fields of neurology and psychiatry. Did you know the statistics indicate 70 per cent to 80 per cent good to excellent results with this usage? — Dr. J.R. McD., Bountiful, Utah

A — No, I didn't. And thanks for a very informative letter. One question, though: Has the American Medical Assn. made any definitive findings that acupuncture ever really cured any disease?

If so, my column was on the wrong track, and so was Dr. Benica. But if not, then I suggest you work on your own AMA and try to convince it of the value of acupuncture.

Potomac Fever

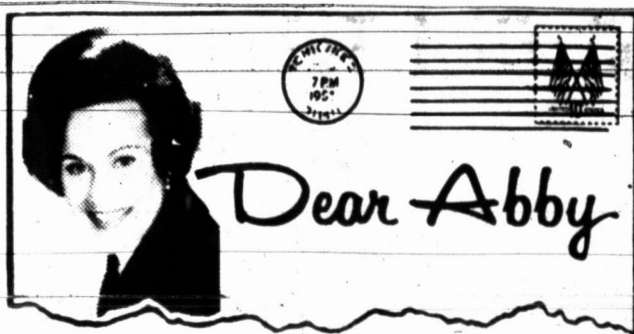

If the government continues to crack down on illegal political donations, pay-offs may become an endangered American species.

Ford reportedly reads a dozen newspapers a day — but only after he finishes the comics.

The Russians completed a naval exercise involving 200 ships. Sort of a Bolshoi water ballet.

Secretary Dunlop asked Congress to include local groups in unemployment programs, especially hardship cases in the GOP.

Turns the Other Cheek

By Abigail Van Buren

© 1975 by Chicago Tribune-N.Y. News Synd., Inc.

DEAR ABBY: I am from Houston, and the women down here do not ask the men to dance. At least I've never seen it done.

I date a man who takes me to a place where people sit around and drink beer. There's music, and every now and then one of the women will ask one of the men to dance.

Last night I was feeling pretty good, so for the first time I asked my man friend if he would dance with me. He said he didn't feel like dancing. In less than a minute, a strange woman came over and asked him to dance with her. He said "yes" without batting an eye. (The woman didn't know that he had just turned me down, so it wasn't her fault.)

When he started for the floor, I said, "Okay, you just turned me down. Now there's gonna be big trouble!" I really blew my top and asked to be taken home. He said I acted like a baby. (I'm nearly 50.)

I say, a man's lady friend should be more important to him than a stranger. He said he was just being polite. We may break up over this although I'm sure we love each other. Who was wrong?

HURT IN HOUSTON

DEAR HURT: Your man friend owes you an apology for accepting another woman's invitation to dance after having turned you down. And you owe him one for having made a scene in public. Kiss and make up. Maybe you both learned something.

DEAR ABBY: Having just read your answer to "NEEDS A REAR," I feel I must make a correction. A foam rubber fanny is not "the living end" — it's the dead end!

BAINBRIDGE, N.Y.

DEAR BAIN: Touche... which is also "the end."

DEAR ABBY: How do you feel about a man kissing another man — on the cheek?

When my daughter and her husband came to visit us, I first greet them by kissing my daughter, then kissing my son-in-law on the cheek. It seems a natural, friendly thing for me to do, and my son-in-law never seems to mind it. My wife now tells me to cut it out. She says it isn't right for a man to kiss another man.

Will you please tell me what is wrong with it? I do not go around kissing men as a rule, but my father used to kiss me (on the cheek), and I never thought anything of it.

AFFECTIONATE FATHER

DEAR FATHER: I think genuine affection, and any demonstration of it, is not only permissible, it's beautiful.

CONFIDENTIAL TO THE MATURE TEENAGER: The May issue of "Teen" magazine now on the newsstands has an excellent article entitled, "Your Body/His Body." I recommend it highly.

Rockefeller Builds CIA Case

WASHINGTON (UPI) — The Rockefeller Commission apparently is building a case that the White House, acting outside regular channels, was responsible for domestic spying by the Central Intelligence Agency.

That is the picture gained by

Stamps Need Millions More

WASHINGTON (UPI) — The White House says it needs \$898 million more this year for food stamp and children's milk programs because the recession has made more persons eligible.

More money will be needed next year. Rising prices have increased the food stamp allotment to about \$162 a month, which takes effect with the new fiscal year in July. The Agriculture Department says it will raise the income eligibility

fitting together the following pieces of the puzzle that are public: —Defense Secretary James Schlesinger told reporters Monday that as CIA director in 1972 he ordered a review of all CIA activities to determine if there had been illegal spying. "The

whole tone was indeed that this was senior officials in the White House," he said, refusing to give specific examples other than the orders by then White House aide John Ehrlichman that the CIA provide spy materials to the White House

plumbers. Schlesinger made the comment after testifying to the Rockefeller Commission Monday.

—Secretary of State Henry Kissinger, who also testified before the commission in closed session Monday, told reporters domestic surveillance was never ordered or authorized by him or the National Security Council —the White House agency with the responsibility for the CIA. He added: "In my period of being in Washington, the National Security Council did not concern itself with domestic intelligence and therefore this is not a subject that could be pursued" with the commission.

—Rockefeller, while not commenting directly on domestic surveillance, said the commission was trying to get the "flow of requests back and forth" between the White House, the NSC and presidential advisers.

Another Strip Mining Bill Moves Toward White House

WASHINGTON (UPI) — A strip mining bill similar to one vetoed by President Ford in December is on its way to his desk again — but this time a veto could provoke a congressional override.

The compromise legislation, which supporters say takes care of some of Ford's earlier objections, received final approval in the Senate Monday and is expected to be sent to Ford by the House later this week.

The modifications made by the conferees go a long way toward meeting the problems cited by President Ford as reasons for his veto, said Sen. Henry Jackson, D-Wash. "I see no reason why the President should not sign (the bill) when it reaches his desk."

But the President expressed

his displeasure with many of its provisions as late as last month.

If Ford again vetoes the bill, he would face a stiff congressional test to sustain the action. The original version this year passed the Senate by an 84-13 vote and the House by a 333-86 vote, both margins well over the two-thirds that would be necessary to override a veto.

Environmentalists have tried, so far unsuccessfully, to gain enactment of a federal surface mining law for five years. Strip mining is a method by which topsoil is scraped away by bulldozers, allowing easy extraction of the mineral by giant shovels.

Ford said he pocket vetoed the last bill because it would cut domestic coal production and would be inflationary.

The bill sets minimum federal standards for the extraction of surface-mined coal as well as criteria for reclaiming the land to its approximate original contour. Certain lands could be designated unsuitable for any strip mining.

The compromise bill rejects administration complaints against a ban on strip mining in national forests. It also retains language requiring the written consent of surface owners before any such mining, also opposed by the administration.

Modifications from the vetoed bill include provisions on citizen suits, hydrological disturbances, impoundments, stream siltation, a mined area reclamation fund and alluvial valley floors of the West.

McGovern Tours Cuba; Touts Cuba-US Trade

HAVANA (UPI) — Sen. George McGovern toured Havana today, dining on black beans and rice at an intellectual hangout and calling for an end to the U.S. trade boycott against Cuba.

The South Dakota Democrat arrived in Havana Monday evening on a three-day fact-finding visit and drove right from the airport to a lecture on farm reform.

"I have no powers to lift the embargo, but open trade is in the interest of both countries," McGovern said on arrival at Havana's Jose Marti Airport.

Later in the evening, he dined with a group of Cuban

intellectuals at La Bodegita del Medio — a quaint restaurant in the old section of Havana.

Poet Nicolas Guillen, who chatted with McGovern over a typical Cuban meal of black beans, rice, fried bananas and pork, said he liked the senator's "poetic sense of life."

McGovern set out today to visit a mental hospital, a school, a museum and a nightclub in Havana. But he has yet to announce a meeting with Cuban Premier Fidel Castro.

Jesus Montane Oropesa, a member of the Cuban Communist party's ruling Central Committee and a guerrilla

comrade of Castro during the 1950s, greeted the senator at the airport with a warm handshake.

"This is an educational trip," McGovern said. "I have felt for some time that we need to take a look at our relations. I'm also interested in taking a look at the government and economic systems here."

McGovern, the third U.S. senator to visit the island as part of a thaw in Cuban-American relations, flew to Havana on a charter flight from Homestead Air Force Base in Florida.

The senator was accompanied by his wife, Eleanor; his daughter, Susan; his son-in-law, James Rowan, and more than two dozen reporters.

McGovern denied carrying any message from the Ford administration to Castro but said he conferred with the State Department and Pentagon before making the trip.

Pythians Hold Competition

B.B. Altman Jr., state director of Grand Lodge Knights of Pythias committee on competitive rank work, will conduct an elimination contest at Weatherford at 7:30 p.m. Tuesday.

The Rank of Page contest will be between Lone Star Lodge No. 4, Weatherford, and Mineral Wells Lodge No. 212. Winner of the elimination contest will advance to the state contest where they will meet the rank team of Pythian Lodge No. 26, Longview.

State contest will be at the Grand Lodge State Convention in Houston on June 8. Judges for the contest will be Harold Brown, Abilene; Dewey Wright, Fort Worth; and Altman, secretary of Pampa Lodge No. 480.

'Amarillo is Dirtiest Town I Ever Lived In'

DENVER (UPI) — The lady who wrote the letter said "Amarillo is the dirtiest town I ever lived in" and she didn't want to see Texas dirty the Colorado Rockies.

"I think Texans are dirty birds," the letter writer said. "So they would like to move to Colorado."

Sen. Chris Wunsch, D-La. Junta, doesn't want Texas to own park land in Colorado, and he read the unsigned letter Monday to show there was at least one Texas resident who agreed with him.

Wunsch won preliminary passage of a bill banning other states from owning recreational land in Colorado after he read the letter sent from a woman now living in Texas.

Wunsch said the woman, who now lives in Amarillo, Tex., sent the letter to Rep. Forrest Burns, D-La. Burns initially introduced the bill in the House.

Basically, the bill prohibits any other state from acquiring, owning or operating any land in Colorado for park or recreational purposes. It was introduced after a Colorado Springs area land developer, Gil Felts, offered

40 acres of nearby mountain property to the state of Texas for a state park.

Wunsch said the letter writer from Texas, who scratched out her name, apparently lived in Denver at one time and now was a resident of Amarillo. She applauded Colorado legislators for protecting their land from Texas. Although there was no name on the letter, Wunsch said it appeared to have been written by a woman.

"They (Texans) won't keep it (park land) up because Amarillo is the dirtiest town I ever lived in," the letter writer said. "The people in Texas throw everything out of their cars into the streets."

"I live next to a vacant lot. You can't even get the city of Amarillo to keep it clean."

"If the Texans appreciate the Rockies, let them move up there," she wrote. "If they clean up their own state, they could find someplace to put a park."

The Senate approved the bill on a voice vote. Wunsch said the bill was serious. Not a joke, because other states could annex Colorado land through such a move.

Refugees Elect Mayor; Fed Denies Disruptions

United Press International

Refugees from Vietnam and Cambodia are trying to adjust to their new lives in America, and the government is trying to give assurances the refugees won't disrupt the lives of Americans.

Refugees settled into their American camps Monday, even setting up their own camp government at Camp Pendleton, Calif., and Fort Chaffee, Ark., including a "mayor" to act as spokesman.

Dean L. Brown, coordinator of the refugee program, sent telegrams to the 50 governors saying the refugees will be resettled so as not to become a burden on any community.

He said the United States will have to absorb or divert to other countries about 125,000 South Vietnamese.

The Pentagon said more than 11,000 refugees already had been sent to new homes in the United States, and another 11,000 or so were still at process centers.

One of the evacuees who feels most grateful for America's resettlement program is Pham Thi Muoi, 25. She says she is one of the lucky ones.

Miss Muoi was among the first refugees to finish process-

ing at Ft. Chaffee Monday and flew to Oklahoma City where she will settle.

Unlike most Vietnamese, Miss Muoi speaks fluent English which she learned as an employee of the U.S. embassy in Saigon for seven years.

"I would like to express the Vietnamese feeling," she said. "We want to thank very much the Americans for helping us during hard times. The people are very warm hearted. We are very happy for it. We don't feel that we are refugees now."

Diplomatic sources in Brussels said Secretary of State Henry Kissinger sent a note to the European Common Market last week asking help in resettling refugees.

The sources said Kissinger's note was delivered to Irish Foreign Minister Garret Fitzgerald, president of the Common Market's Council of Ministers, and was discussed in Dublin last week by ambassadors of the nine market nations.

At Subic Bay in the Philippines, a Naval spokesman said more than 60,000 Vietnamese refugees have been ferried in and out by the Navy and Air Force in the past two days.

With 8,751 evacuees in the

Camp Talega area of Pendleton and 3,323 more due Monday.

Brig. Gen. Paul G. Graham gave approval to an "infrastructure" — a government with the military command — headed by one of the best known refugees on the base, Khuong Huu Dieu.

Dieu was said to be planning to set up language "schools" to pass the time and give refugees in American life. There were also plans to start a post office.

A Marine spokesman said the "government" would handle internal problems in coordination with U.S. agencies — Immigration and Health, Education and Welfare — and help with placement.

Nearly all refugees who passed through the Philippines, including former South Vietnamese Premier Nguyen Cao Ky, went to Guam for processing into the continental United States.

Lawmakers Up Benefits

AUSTIN, Tex. (UPI) — The Texas Legislature has set itself up for biennial increases in retirement pay with an obscure amendment to the State Employees Retirement Act, according to a Dallas newspaper.

The Dallas Morning News said in a copyright story Sunday the increase could be as much as 66 per cent. The amendment — which lacks only formalities before going to the governor — would virtually guarantee biennial increases in retirement pay for elected state officials.

The newspaper said the amendment was an obscure provision buried in the middle of a long section to the State Employees Retirement Act in Senate Bill 90. It was never discussed or mentioned in either the House or the Senate, nor was there a record vote on it.

The sponsor of the amendment in the House officially was Rep. Bob Vale, D-San Antonio, whom the News said now claims he was not aware of what it included.

Says Bill Won't Up Tax

AUSTIN, Tex. (UPI) — Rep. Dan Kubiak, D-Rockdale, who does not agree with an estimate his school finance bill will cost \$1.8 billion, says the longer the state waits the more expensive school finance will become.

Kubiak said Monday he did not agree with predictions his bill will cause large increases in local taxes.

"Any rational analysis of this bill reveals it is funded largely

absolutely no local tax increases," Kubiak said. Kubiak said the biggest arguments over his bill involve the teacher salary

G. Wallace Attends Meet

The Pampa Assistant Police Chief, George Wallace, is attending a homicide investigators school in Austin this week.

The school is sponsored by the Texas Department of Public Safety.

Skelly Honors Six Pampans For Service

TULSA, Okla. — Six Pampa area men were among a group of Skelly Oil Company employees honored for their years of service at a special service recognition dinner here April 17.

The men are all members of the manufacturing department and were introduced at the dinner by Skelly Manufacturing Vice President Howard H. Belew.

John Simmons, field operator at the Kingsmill natural gasoline plant in Skellytown was honored for his 35 years of service with the company. Simmons joined Skelly on May 12, 1940, worked at plants throughout Oklahoma and transferred to the Texas Panhandle in 1958. He lives on Rural Route 1 in Skellytown.

Robert C. Heaton, utility II at the Schafer natural gasoline plant was presented a 30-year service award. Heaton, who also lives in Skellytown, joined Skelly in Oklahoma on June 1, 1945. He assumed his present position in 1969.

Twenty-year recipients included Bill Eddins, repairman B at the Watkins plant; Robert L. Eubanks, plant clerk at the Crawford plant; C.F. Lilley, a truck driver for the Watkins plant and Ralph McGee, chief repairman at Crawford.

Celanese Appoints Paul Duduit

Celanese Corporation has appointed Paul E. Duduit to the position of hydrocarbons planning engineer, with headquarters in New York City. He had been a manufacturing planning engineer with Celanese Chemical Company, an operating division of the corporation.

Born in Columbus, Ohio, Duduit is a 1966 graduate of the University of Cincinnati with a B.S. degree in chemical engineering.

He joined Celanese in 1966 as a process engineer at the Pampa chemical plant, later served in manufacturing assignments in Houston and at the Clear Lake, Tex., plant before his transfer to New York.

Hauls 50 Tons Debris

Approximately 50 tons of debris were hauled away Monday on the first day of Pampa's annual cleanup campaign, according to R.B. Cooke, public works director.

The drive, sponsored jointly by the Chamber of Commerce and the City, will continue through Friday in Ward 1 where pickups are being made in alleys west of May Ellen and north of W. Foster and Rham streets.

The cleanup crews will move into Ward 2, east of Mary Ellen

and north of E. Foster next Monday. Collections there will be made through May 16.

Residents are urged to place debris in alleys prior to pickup in each ward. Loose items should be sacked or boxed.

The public works director asked that residents plan so as to avoid call-ins.

Residents late in getting their trash into the alleys," Cooke said, "may have to wait until the entire city is covered before getting it picked up."

Giving Spirit Thrives Despite Inflation in US

NEW YORK (UPI) —

Recession and inflation in 1974 failed to reverse the ever-increasing philanthropy of the American people who gave a record \$25 billion to private nonprofit institutions, it was reported Monday.

The annual report of the American Association of Fund Raising Council said the figure represented a 7.4 per cent increase — \$1.7 billion — over giving in 1973. Individuals accounted for \$21.8 billion, or 86.9 per cent of the total, and the remainder \$3.2 billion was given by foundations and corporations.

Churches and religious institutions got the lion's share, as usual \$10.8 billion. Health and hospitals came in for \$3.9 billion, education \$3.7 billion, social

welfare including all United Way organizations, \$2.3 billion arts and humanities \$1.2 billion civic and public affairs foreign aid and foundation endowment \$2.3 billion. There were healthy increases in giving to all categories except education, which remained at the 1973 level.

The report noted that giving has more than doubled since 1964 when the philanthropic total was \$12.2 billion.

"The increase in a troubled year for America and her people is a tribute to the spirit behind the giving, a spirit that is part of our national heritage," said George A. Brakeley Jr., chairman of the association.

"Though not equal to the rise in the cost of living, it nevertheless shows a concern by all Americans for their private nonprofit institutions."

The largest philanthropic gifts listed by the association for 1974 were:

—\$20 million worth of South Carolina real estate, given by the Santee Club to the Nature Conservancy as a wildlife sanctuary.

—\$15 million worth of sculpture given by British sculptor Henry Moore to the Art Gallery of Ontario.

—\$15 million given by the Robert Wood Johnson Foundation to the National Academy of Sciences to improve emergency medical care.

—\$12 million given by the Ford Foundation to Resources for the Future for research on environment.

Hints from Heloise

Dear Heloise:
 My fitted sheet and mattress covers always got wrinkled and bunched up during the night and it drove me insane!
 Here's how I solved the problem:
 I got a pair of my husband's old suspenders (if your husband doesn't wear them, they are inexpensive to purchase), separated the two pieces of elastic and replaced the clasps on each end with garters from a discarded girdle.
 I stretched each piece of elastic under my mattress across the bed about ten to twelve inches from the center of the bed.
 This made one strip across the top and bottom thirds of the mattress to "garter" my sheet nice and snug.
 When sheet changing times comes, I just unsnap the garters (no need to remove the elastic), change the sheet and hook it up again.
 No more bunched-up sheets or pads... just the slumberland smoothness ever since.
 Try it... it works.
 Wanda T. Bryant

Dear Heloise:
 We prefer making coffee from ground coffee in a pot, and like many others, we sometimes tend to drink too much.
 Now I buy a pound of regular coffee and one pound of decaffeinated, open both pounds and mix them together.
 I then pour them back into the cans and label the coffee "half and half." Then I store them in my refrigerator.
 Good, good, coffee with half the caffeine.
 Mrs. Anna Eweler

Dear Heloise:
 One could save extra detergent bottle tops for replacements when they become clogged.
 You're a clever cutie to have thought of this one, Anna.
 Heloise

Dear Heloise:
 After buying a 7-pound shank end portion of ham, I weighed the rind, fat and bones and found that I had four pounds of ham and three pounds of waste.
 I divided four into the total cost to find the cost per pound of meat.
 Sometimes it may be more economical to buy semi-boneless or boneless at a higher price per pound.
 Rene

THIS COLUMN is written for you, the housewife and homemaker. If you have a hint or a problem write to Heloise in care of this newspaper. Because of the tremendous volume of mail, Heloise is unable to answer all individual letters. She will, however, answer your questions in her column whenever possible.

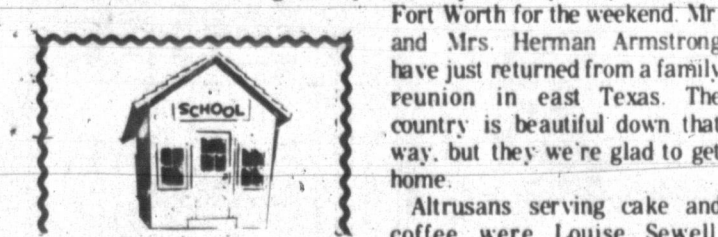

By GERTIE SHAW

Dear Heloise:
 Since I only have a "top door" freezer, I can't purchase a week's supply of bread and freeze some, so I buy five loaf packages of frozen bread dough as it takes up less room and I then make it as I need it.
 A week's supply fits in the freezer, and we always have fresh bread. Also, I don't have to run to the jiffy market late at night for tomorrow's lunches anymore.
 The bread can also be used for pizza dough; or cut the defrosted loaf into ten sections and let rise. Soon you'll have your own beautiful hard rolls.
 Marsha Crate

Dear Heloise:
 Did you know that the tops of dishwashing detergent bottles make excellent replacement caps on the popular white glue bottles?
 I've never found a glue cap

Dear Heloise:
 Another good day at the center Thursday, May 1 with 72 present. All had lots of fun. Was birthday month and we had a beautiful summer bouquet. Prizes went to Mattie Brown, Gerie McCoy and W.R. Cullison. W.B. Kretz and Joe Shelton.
 Reported on the sick list is D.C. Reed who had surgery in Northwest Texas Hospital in Amarillo. We all wish him a quick recovery. Elma Bailey is home from Highland General Hospital and is improving wonderfully.
 Ann Kay sent the beautiful flower arrangement for the day.
 Ruth Baxter had her sister, Edna Boyd as a guest.
 David Lee Shelton and Vicki Horton of Stinnett were accompanied by Ruby Sotvall to Fort Worth for the weekend. Mr. and Mrs. Herman Armstrong have just returned from a family reunion in east Texas. The country is beautiful down that way, but they're glad to get home.
 Altrusans serving cake and coffee were Louise Sewell, chairman, Lora Dunn, Katherine Sullins, Olive Hills and Lillian Snow.
 Ruth Sewell is wished a speedy recovery by every senior. She is a patient in High Plains Baptist Hospital in Amarillo.
 Understanding thoughts go out to the family of Melinda Scarberry who died recently.

PUDDING
 Even if youngsters like to stir and taste pudding with the same spoon, tell them it's a no-no! Using the same spoon for tasting and stirring may cause the starch to down and result in a thin, watery pudding.

Child Abuse
 Child abuse of ten occurs during times of crisis when a parent is angry and upset. Mrs. Ilene Miller, family life education specialist with the Texas Agricultural Extension Service, The Texas A&M University System, points out.

SEWING MACHINE
 Keeping a sewing machine clean and oiled according to instructions cuts down on machine maintenance costs, notes Mrs. Becky Culp, area clothing specialist with the Texas Agricultural Extension Service.

**Not The Newest . . .
 Just the Finest . . .**

A nursing home is more than just a pretty building; it is people serving people serving people. The experienced staff at Pampa Nursing Center is dedicated to serving the total needs of our residents, medical, social and emotional.

The nursing staff is under the direction of a Registered Nurse, Mrs. Margaret Rhoten. We are staffed and equipped to care for residents requiring custodial and intermediate care. Mrs. Rhoten's expertise in the delivery of quality patient care is continually passed to the LVN's and nurse aides who serve our residents.

Quality nursing care is the philosophy of our entire staff at Pampa Nursing Center. We provide the atmosphere of dignity and respect which our residents so richly deserve. Our experience and dedication has made us a leader in the nursing home profession. Let the most experienced nursing home in Pampa care for your loved one.

Affordable Art for Newlyweds

NEW YORK (UPI) — Walls are generally the last thing to be decorated in newlyweds' houses or apartments.

Wall decorations are not necessarily expensive, especially if you buy limited editions of graphics by recognized artists whose value is likely to increase with the passing of time. Most such works are in contemporary styles — abstract, pop, op, hard edge — that complement modern furnishings and give a mixed-period chic (popular with professional decorators) to period furnishings.

Prices run from \$75 on up into the thousands for newlyweds with generous wedding checks. Simple but attractive framing such as welded aluminum will add \$30 to \$70, according to size.

Andy Warhol's flower prints originally sold at \$250 apiece and now sell for \$6,000, said Richard Solomon, president of New York's prestigious Pace Editions. But speculation on prints is not what it's all about.

We try to give people a chance to enjoy the contemporary image by good artists! Since we are aiming at young people of modest means, we try to price things between \$100 and \$300. For the mass market there are posters, which cost even less.

Graphics are original works of art, unique in originality but not in availability. The artist either operates the press which makes the print or supervises the pulling of the print.

Lithographs, silk screen prints, serigraphs, etchings, collotypes and other types of graphics are produced in numbers ranging from 25 to 250. 125 impressions is an average edition. They bear the artist's signature and the sequential number of the print. Plates are destroyed when the limited edition is completed.

Graphics should be bought from reliable galleries, department store art departments, and framers who know the difference between a limited edition and a reproduction that can be reprinted endlessly. There also are collectors' groups that operate like a print-of-the-month club. A pioneer club was the Original Print Collectors Group Ltd in New York.

We price our prints at least 20 to 30 per cent lower than most galleries because of the volume of buying and selling, said Bruce L. Whyte, the group's founder. We have eliminated middlemen and deal directly with the artists. We guarantee our prints, and a purchaser can always return them and get back the original price.

Many galleries, collectors' clubs and graphic workshops will mail catalogues of available graphics with a current price list. Some prices include framing but usually not.

The graphic department catalogue of the Martha Jackson Gallery here offers more than 100 different prints by such big names in modern art as Johns, Lichtenstein, Sam Francis, Appel, Albers, Dine and Anuszkiewicz.

Artario, a project of the Ontario Council for the Arts, sells by mail order a boxful of prints: modular sculptures and other objects by 21 Canadian artists.

Posters come in limited editions, signed by the artist, and regular unsigned poster editions. They take up lots of wall space and usually abound in color.

Many of the best designed result from the Last Art Posters Program. It commissions major artists to design posters for important events sponsored by art museums and other cultural institutions. Most cost less than \$50 and some as little as \$10 — for Picasso, Ernst, Dubuffet, Leger and Mondrian.

Most people have to replace the junk they bought for their walls when they started out in marriage, said Solomon. They become more affluent and, although they may not move on to paintings, they'll acquire graphics. Why not start out with graphics and be ahead of the game?

And there's prestige in being a collector. A collector is someone who buys a second print because he liked his first.

Upsilon Group Attends Founder's Day Banquet

Members of Upsilon chapter recently attended the traditional Beta Sigma Phi Founder's Day Dinner at the Pampa Country Club. Presiding at the dinner was Pat Rich, president of BSP City Council. Upsilon president, elect Nancy Chase led the opening ritual. Reading the traditional Founder's Day speech from International Director Bill Ross, son of BSP founder Walter Ross, was Irvine Mitchell. The speech also revealed the Beta Sigma Phi International Theme for 1975-76, "Let Heritage Ring."

Rochelle Lacy read the Upsilon resume on the chapter's activities and socials for the past year. The resume was written by Nancy Chase, Vickie Moose, and Virginia Dewey and used a "traveling circus" theme.

Highlight of the evening was the presentation of the "Girl of the Year" awards for all six chapters. Each chapter had voted by secret ballot for the member they considered their outstanding worker for the year. Upsilon selected Cile Taylor.

Installing the incoming City Council officers were Georgia Mack and Jewell Walker. 1975 Woman of the Year, Outgoing chapter presidents were honored with a corsage and a gift from their chapter. Upsilon president Vickie Moose was given the traditional gavel pin-guard.

Upsilon members attending were Cile Taylor, Nancy Chase, Sue Hoggatt, Jan Ott, Judy Walls, Alyce Bridges, Rochelle Lacy, Andrea Wyatt, Virginia Dewey, Vickie Moose, Mary Ann Anderson, Dena Whistler, Kay King, Patsy Strawn, and new member Kathy Folmsby. Honorary member Thelma Bray attended as a guest of Upsilon.

Hansen Should Get Better With Age

By PAUL SIMS

Noel Hansen didn't meet his goal on the Pampa High track team last season but he ran fast enough to almost assure himself of seeing future goals, college ones, realized.

His initial goal during his senior year was to qualify for the state track meet in the 880. He missed by seven-tenths of a second.

But in that race at the regional track meet in Lubbock, Hansen proved he is capable of keeping pace with whoever his competition is, and that will likely be to his advantage as a college half-miler.

Hansen describes his dream simply: "I just wanted to make it to state."

He wanted it bad enough that he ran and ran and ran — cross country in the summer and fall, at night after basketball practice in January, in the morning and during track workouts in the spring.

Now that he's readying for college, whether it be at Oklahoma State or Texas Tech, Hansen is doing the same — running and running and

running.

"I imagine this summer I'll run quite a bit every day, mostly cross country," Hansen said. "I'm going to work in Kansas, to farm with my granddad. I'll run with some of the guys up there, that go to junior colleges."

Actually, Hansen began his serious preparations for the half-mile at Kansas, in Hill City to be exact, several years ago. He moved to Pampa in 1972, just prior to his sophomore year.

In that year, before Hans Hansen, the father and a lawyer, took a job in Pampa, Noel turned in a pair of 1:59.5's in the 880. That was as a freshman and the times were good enough to make Hansen the Kansas State Junior Olympic Champion and the Missouri-Kansas freshman champion.

As a sophomore at Pampa, Hansen's 1:59 clocking won the district championship for him and was good enough for sixth in the regional meet. The following year, Hansen was fourth at regional with a 1:57.5. During the summer,

Hansen ran a 1:57.2 in the Kansas-Missouri Junior Olympics, qualifying him for the National Junior Olympics. Injured, he did not run.

Hansen's 1:55 at regional last month was a lifetime best but it was only good enough for third place. First and second qualify for state.

Tommy Glass of Odessa Permian set a national best for the season with a 1:52.9, and Lubbock Monterey's Randy Yates was second with a 1:54.3.

"I don't think my third 220 was fast enough," Hansen recalled. If he could run it again, "I think I'd try to stay with them on my third 220. Coming down the backstretch I think I probably could have caught that guy (Glass)."

Hansen usually his slow in his third 220, but, according to the Pampa senior, that's the way he likes to run.

"I start off, and the break point (you can then leave your lane) is 110. I try to be in the top three or four, at that point. Then, for the first quarter, you can be fifth or sixth, as long as you're in contact with the leaders. Your third 220 is your

slowest."

Hansen's style often found him trailing going into the final 220 but rarely was he behind with a hundred yards left. In fact, there have been few races during his Pampa High career where he wasn't 20 yards ahead at the finish line.

That was due to two things — the lack of many good half-milers in the state, particularly in District 3-A, and Hansen's tremendous foot speed, which, says his track coach, Scott Dunham, "was equal to Glass."

Hansen is not, however, impressed with his foot speed. "I think my future might be in the mile. I don't know if I have enough foot speed to be a half-miler."

Most close followers of Pampa High track last season disagree. Hansen himself said, "I think I can lower my time. With good weather, good track, good day and good field, I think I could probably run a 1:50."

If that's not foot speed, he surely must be pumping his arms fast.

Good Half Miler

Teams Battling For 'Territory'

SAN ANTONIO, Tex. (UPI) — The owner of a minor league professional football team is trying to drive the World Football League out of town through competition and a \$3-million lawsuit.

Businessman Henry Hight, owner of the San Antonio Toros of the Mid-America Football League, said Monday he will win the battle of territorial rights because the new WFL franchise does not have any money.

Hight said his team has the support of the city's football fans, especially among the Mexican-Americans who comprise a solid percentage of the city's population and an overwhelming majority of those who attend football games in San Antonio.

"We have charisma here," Hight said. "A thousand 'oles' and a bunch of dreams would go down the drain" if the Toros were forced to disband or leave town.

Hight said he planned to file a \$3 million suit against the WFL charging the league's new San Antonio franchise is infringing on the Toros' territory.

"I want to see if they have all this money," Hight said.

He said he was suing the WFL and not the local franchise, owned by businessman Norm Bevan, because he doesn't believe the local WFL franchise has any money.

Hight said if he wins his suit, \$1 million will go to the Mid-America Football League.

\$600,000 will go to present and past team members, \$400,000 to the staff, \$400,000 to the Toros' shareholders, \$200,000 to the Toros' booster club and \$400,000 either to construct a stadium in San Antonio or to high schools for athletic programs.

Soon after the WFL announced it was establishing a

team in San Antonio. Hight agreed to sell the Toros to Bevan for \$150,000 and 8.3 per cent of the stock in the WFL team. Then the deal was changed with the price for the Toros being \$250,000 and no stock.

Hight said Bevan offered him \$20,000 for the team last Friday. This offer, Hight said, made him certain the WFL franchise does not have any money.

"I'm very leery of plans without money," he said. "They've got a plan, but they don't have any dollars. I've seen a million plans go down the drain."

His other attack on the WFL is coming in the form of competition. Hight said if he can get a schedule together, the Toros will play again this summer.

If there are two teams in San Antonio, it will do nothing but destroy one or the other, or both of them," Hight said.

Hight said his team has won seven league championships and has compiled a 92-7 record making it one of the best football teams in the nation outside of the National Football League.

Baseball Roundup

Palmer Trims Catfish As Baltimore Wins, 3-1

UPI Sports Writer
Jim Palmer is back in his role as the Baltimore Orioles' "stopper" — and handling it as gracefully as when he was a Cy Young Award winner.

Palmer, the American League's pitcher of the year in 1973, suffered a sore arm last season and finished it with a 7-12 record. He started the 1975 season as a question mark inasmuch as he was the Orioles' natural staff leader — provided he was healthy — to compensate for the New York Yankees' acquisition of Jim Hunter.

Hunter beat Palmer in their first confrontation last Thursday but the Orioles' star reversed the decision Monday, night in a 3-1 triumph over Hunter, and the Yankees.

Significantly, Palmer's triumph ended a string of six consecutive victories which Hunter had scored over the Orioles in regular season competition.

"I can't pitch much better than that," said Palmer, whose record is now 4-2 compared to

Hunter's 2-4. "My control was good to excellent in spots, plus a good breaking ball and changeup."

A pleasant fellow but not above putting people on at times, Palmer then discussed the question about which everyone was thinking — his confrontations with Hunter.

"I suppose in some people's minds there's a natural rivalry between me and Catfish, but I don't look upon pitching against him as anything special," he said. "I don't see where either of us is trying to prove one or the other is the greatest or anything. What I do think is that pitching matchups like this, and team matchups by the way, is what baseball is all about."

The Orioles snapped a 1-1 tie with two runs in the eighth inning when the Yankee infield failed to handle two bunts and Hunter added a wild throw to the circus on the bases.

Paul Blair led off the eighth by bunting safely and Bob Grich followed with another bunt single in which Hunter threw wild into right field. Blair scored from second base when rightfielder Bobby Bonds threw wild to the plate and Grich scored on a sacrifice fly by Ken Singleton.

The Yankees scored off Palmer in the second inning on singles by Thurman Munson, Chris Chambliss and Lou Piniella's ground ball. Palmer struck out six in the five-hitter and didn't walk a batter.

The Texas Rangers defeated the California Angels 4-3 and the Boston Red Sox beat the Cleveland Indians 7-5 in the other American League games. The Los Angeles Dodgers downed the Houston Astros 2-0, the St. Louis Cardinals walloped the Philadelphia Phillies

11-3 and the Montreal Expos shaded the Chicago Cubs 3-2 in National League games.

Rangers 4, Angels 3
Cesar Tovar's two-run single in the eighth inning capped a three-run eighth inning rally which lifted the Rangers to their ninth win in their last 11 games. Ferguson Jenkins allowed nine hits and four walks but went the distance and raised his record to 4-2.

Red Sox 7, Indians 5
Fred Lynn, Jim Rice and Rico Petrocelli hit consecutive doubles in a four-run fourth inning which enabled the Red Sox to extend their winning streak to three games. Luis Tiant received credit for his third win although Diego Segui and Dick Drago finished up.

George Hendrick and John Lowenstein homered for the gundians.

Dodgers 2, Astros 0
Doug Rau pitched a two-hitter against Houston, striking out two and walking two, in raising his record to 4-1 for the Dodgers. Willie Crawford doubled and scored the Dodgers' first run on a sacrifice fly by Ron Cey and Joe Ferguson singled in the other run.

NO CONTEST — When Noel runs, Noel usually wins. And, most often, it's by margins of 20 or 30 yards, like this particular victory in the half-mile. Hansen did not qualify for the state meet but, all season long, showed potential in the

880 and likely assured himself of competing in college track. One thing hurting Hansen, who owns a season-best 1:55 flat, is the lack of good competition in his high school career.

(Staff Photo)

Chicago Nips Warriors

OAKLAND (UPI) — The Golden State Warriors must forget game two of their Western Division playoff with the Chicago Bulls if they hope to win game four tonight.

After winning the first game with ease, they handed Chicago game two. With the Warriors ahead 89-88 and less than 24 seconds to go, Rick Barry missed a shot he should not have taken and Chicago scored with two seconds to go to win 90-89.

The Bulls then took the third

Baseballers Visit Sandies In Last Game

Pampa's baseball team, although alone in last place in the district standings, can accomplish two important things today when it visits Amarillo High in both teams' final game of the season.

First, the Harvesters can tie Palo Duro, should the Dons lose to Caprock, for fifth place in the final standings. Secondly, Pampa can eliminate Amarillo High from a shot at the title. If the Sandies win and Caprock loses, Amarillo will tie the Longhorns for the title.

Pampa also wants to win to prove its district season was somewhat fluke. Pampa was picked first in a pre-season coaches' poll but have managed only a 1-8 record.

Probable starting pitcher for Pampa (10-13 overall) is Dennis Edmondson (2-4). Amarillo High will likely counter with Chip Biggers (6-2, 2.29 earned-run average).

Pampa's leading hitters are outfielder Mike Fraser (.398) and catcher Tylor Drinnon (.390). Several sophomores are also playing well for Ronnie White's Harvesters.

Amarillo High's batting strength lies in Biggers (.329 and 27 runs batted in), brothers Chuck and Jim Poole (.378 and .371) and Jim Buckley (.307).

Amarillo is 16-6 for the season and 7-2 in district.

Other games today find Palo Duro (3-18 and 2-7) at Caprock (17-6 and 8-1) and Tascosa (11-12 and 5-4).

Monday, Pampa was scheduled to play Altus, Okla., in a doubleheader at Optimist Park, but the Oklahoma team called the affair off.

Oh, when the ospreys return...

The rare pair attracted more than 50,000 visitors in 1974. + CNS

SPORTS

PAMPA DAILY NEWS
Pampa, Texas 69th Year Tuesday, May 6, 1975

home in game six.

One thing in the Bulls' favor is the physical condition of Warrior stars Barry and Keith Wilkes. Wilkes has an infected blister on his left calf while Barry is limping, also with a calf problem.

But the cloud of game two seems to be what bugs the Warriors most.

"I didn't see the clock," explains Barry. "I heard the team yelling. They were yelling 'move the ball,' but the way they were yelling and waving, I thought they were yelling to shoot."

"I was planning on standing there in the corner and dribbling, but when I saw them waving, the thing that went through my head was the shot clock was running down. I made a move to the basket, got hung up and looked for someone to pass to. I tossed-up a shot. I thought I'd hear the buzzer."

"Yes, I felt terrible. I pride myself at making the right play at the right time. That was just stupid."

The winner of the series takes on the Boston-Washington winner for the NBA title.

Aggies End Workouts

COLLEGE STATION, Tex. — "It was by far the best spring training we've had at Texas A&M," was the way Coach Emory Ballard summed up the situation as the Aggies completed spring football work.

"We're very pleased with the progress we made. The defense is very solid. Replacements came through in good shape. Ed Simonini and Garth Ten Napel are as good as any linebackers in the country. The defense has a lot of quickness and the starters are extremely sound. Some people will have to come along, though, to provide good backup."

The offensive line made great strides. Seniors became solid blocking group. We're especially pleased with Henry Tracy at center. Richard Osborne is a sound, solid tight end, as good as anyone around. We have solid running backs (Bubba Bean, Skip Walker, Ronnie Hubby, Bucky Sams) but we can't afford to sustain injuries.

"We have a solid kicking game. Mark Stanley returns as the punter and Robert Stringer and Jon New both are good place kickers."

"We'll be more experienced, have a lot of senior leadership and the squad had a great attitude all spring."

"We spent an awfully lot of time on the passing game and we're very pleased with the progress we made. We want to throw when we want to, not when forced to, and we want to catch it a majority of the time."

"At present we do not have a No. 1 quarterback. We have three good ones (David Shipman, Mike Jay, David Walker) fighting for it. All made progress in the spring and we'll name a No. 1 man there at a later date."

"We came through spring training in good physical shape in our front liners. Two sophomores - to be linebackers Danny Klaus and Kevin Monk

had cartilage damage operations and both will be ready for the fall."

In the final game, the Maroons beat the Whites, 69-0. The Maroons had 32 first downs, 402 yards rushing and 287 passing, completing 12 of 17 passes without an interception. The Maroon defense limited the Whites to 6 first downs, 46 yards on the ground and 20 yards in the air.

Bean ran 18 times for 174 yards. Shipman gained 92. Skip Walker 58 and day 45. Shipman completed 8 of 13 for 183 yards and 1 touchdown. Jay hit 2 of 2 for 31 and 1 TD and David Walker completed 2 of 2 for 73 yards and 1 TD. All three played for both units, but the figures given were with the Maroon unit.

The Aggies open 1975 play against the Ole Miss Rebels at Kyle Field on Sept. 13 at 4 p.m.

AWARD WINNERS — The Pampa Dolphin swim team capped a successful season Monday with its annual awards banquet. Several Dolphins were awarded trophies for improving times this past season. Those included (front row, from left) Julie Turner, Robbie Hill, Richie Hill, Clay

Douglass, Reid Steger, Stacy Ward, (back row) Cary Smith, Rhonda Woodard, Tammy Glasscock, Robin Hill, Kim Campbell and Richard Steger.

Parent Conference Draws Teachers

A discussion of the find of art parenting drew 175 home economists, teachers, students and school administrators from across Texas to Dallas during April for a conference on "Parenting - Priority - The Adolescent." Funded by the National Foundation - March of Dimes in cooperation with the Texas Home Economics Association and Texas Woman's University, this is one of four pilot conferences planned by the March of Dimes and the Center for the Family of the American Home Economics Association.

Designed to identify and promote family life education within the school system, participants in the conference were recipients of the most updated information on parenting that is available. Topics covered included the importance of parenting in our changing times; teenage pregnancy; birth defects; the tragedy and the hope; genetic counseling; and the battered child.

According to Texas Home Economics Association President, Betty Alford, Ph.D., the Preparation for Parenthood Conference has been directed at the adolescent because of the following statistics: (1) over one-half million teenage girls marry each year in Texas; (2) teenagers are marrying at a rate four times greater than other Texas; (3) one out of 10 girls in the United States will have a baby before she is 18 years old; (4) in Texas, births to mothers 19 years and younger are increasing at a rate five times faster than other Texas births; and (5) one third of the first born are born to teenage mothers.

She further explained that as teachers of the parents of tomorrow, home economists instructors would be better prepared to answer young people's questions and assist educators in helping their students approach marriage and parenthood with warm, intelligent understanding of their responsibilities, if they knew the facts.

ATTEND CONFERENCE — Elaine Houston, extension agent for Gray County, right, was one of 175 home economists to attend the recent conference entitled "Parenting - Priority - The Adolescent." The conference was sponsored by the Texas Home Economics Association and the

March of Dimes. Dr. Jon Aase, speaker and researcher, left, discusses the problem of birth defects with extension agents Cula R. Nowlin, Perryton County; Donna Huffaker, Canadian, and Mrs. Arla Felts, Wellington.

Kissinger Denies Orders to CIA

WASHINGTON (UPI) — Secretary of State Henry A. Kissinger Monday denied that the National Security Council ever ordered the Central Intelligence Agency to perform illegal domestic spying activities.

"Since I've been in Washington, the National Security Council and the National Security Council staff did not concern themselves with domestic intelligence," Kissinger said after a 2½-hour appearance before the Rockefeller Commission. The panel is investigating charges of illegal CIA domestic spying.

Kissinger came to Washington in 1969 as a foreign policy advisor to former President Richard M. Nixon. Kissinger refused to say

whether he discussed alleged assassination plots involving the CIA with the commission but he said, "None of these allegations occurred during my period."

"I do not want to go into any further details of what I discussed. But what I said (about domestic spying) is unqualified."

Kissinger was asked about testimony by former CIA director Richard Helms who said that presidential pressure led to domestic spying activity by the CIA.

"No such presidential concern was transmitted through me or through the NSC," he replied.

Our Men In Military

WESLEY S. MURRAY
WICHITA FALLS — A Pampa man has graduated at Sheppard AFB, Tex., from the technical training course for U.S. Air Force telephone exchange specialists.

Airman Wesley S. Murray, son of Mr. and Mrs. Vernon Bell, 1209 Mary Ellen, was trained to maintain automatic telephone equipment.

Completion of the course enables him to receive academic credits through the Community College of the Air Force. The airman now goes to Lowry AFB, Colo., for duty with a unit of the Air Force Communications Service.

Airman Murray is a 1974 graduate of Pampa High School.

operation which involves some 23,000 uniformed men.

The 26 year old soldier lives in Plainview with his wife Mary and two children La Gayla, age 7, and 3 year old William. His mother Nellie Larkin and his wife's parents Mr. and Mrs. W.S. Boykin reside in Pampa.

STEVE TREAT

FT. BLISS — Getting involved is what it's all about. And, Sergeant First Class Steve Treat is involved with the Texas National Guard. Not only does he attend weekend drills and summer camp with Company C, 2nd Battalion (Mechanized), 142nd Infantry, but he works full time for the Texas National Guard.

This year his two-weeks are spent at Ft. Bliss in an exercise called "Gallant Shield 75." The operation brings together forces of the regular and reserve components of the Army and Air Force. The units then function under battlefield like conditions testing their readiness. The Navy and Marine Corps personnel are also involved with evaluating the program.

The sergeant lives in Pampa with his wife Francis and two children. Treat entered the Army in 1958.

ROBERT A. WOOD

LUBBOCK — Robert A. Wood, son of Mr. and Mrs. Robert A. Wood of 2220 N. Sumner, has received a three year U.S. Air Force Reserve Officers Training Corps (AFROTC) college scholarship.

Wood, who submitted his application after enrolling in the AFROTC program at Texas Tech University, will receive full tuition textbooks laboratory fees and a monthly subsistence allowance.

Upon graduation and completion of the AFROTC program, Wood will be commissioned an Air Force second lieutenant.

The cadet is a 1974 graduate of Pampa High School.

JAMES D. SMITH

FT. ORD, CALIF. — Army Private James D. Smith, 20, whose parents, Mr. and Mrs. Robert V. Smith, and wife, Patricia, live in Pampa, completed a mechanic course here.

He was trained to repair engines and automotive chassis components.

Coping with Recession

Chasing Dreams on Welfare Checks

MEMPHIS, Tenn. (UPI) — Bobby Kendrick spends his welfare check for spare ribs at the butcher shop and his days chasing dreams.

"It ain't doing me no good," the 32-year-old transplanted Texan says of the \$99 he receives each month from the Tennessee Department of Public Welfare.

Out of each check, \$30 or so goes for "the best spare ribs money can buy."

Bobby Kendrick's dreams is that somehow he can make a living converting the meat into that Southern delicacy known as barbecued ribs.

The investment is for practice and publicity, not for profit.

Kendricks is working to perfect his art and to find the financial backing to market his product. His only present income is from the state.

Welfare is a new —and demeaning —experience for Kendrick, who lives rent-free with his wife, Mary, and a 1-year-old son, Chuckie, in an apartment carved from a dilapidated orphanage.

In exchange for the apartment, Kendrick and his wife help keep an eye on the smaller residents of the Porter Leath Children's Center.

"I'm the kind of fellow that can't take anything from anybody," Kendrick said over

a plate of his hot and spicy ribs.

"Sometimes we are sitting up here hungry and I'll tell my wife, 'you go on over to your mother's and take the kid and get you something to eat.'"

"But I don't go myself," he said. "I figure a man ought to be able to provide for himself."

Kendricks provided until February, 1971, when he decided to visit a local nightclub. As he got out of a car, he noticed two men nearby, struggling over a shotgun. The gun fired.

Kendricks, who had been in Memphis only two months after moving here from Dallas, was hit in the chest, stomach and both arms. He woke up four

weeks later in a hospital.

"I decided since I was here and didn't die," he said, "I wasn't going to be a cripple, either."

Four years and four operations later, Kendrick still has only limited use of both arms. He would be eligible for disability payments under Social Security, he said, except he did not have enough eligible work experience before the shooting to qualify.

"So here I was, setting around and just making it when I thought about what I did have — the barbecue," he said.

Kendricks built a barbecue pit out of a discarded oil drum

and mounted it on the roof of the orphanage. As he refined his art, he wrote and is now having printed a booklet telling how to construct a similar pit and how to buy and prepare ribs.

The "rib man," as he is known in his north Memphis neighborhood, also promoted himself and his ribs. He talked his way onto two local television shows and became something of a neighborhood celebrity.

"Hi, Bobby, how's the rib business?" the clerk at the supermarket and an elderly woman who stopped him on the street both asked during a recent outing.

But Kendrick's dreams are bigger than Memphis — he wants national exposure. "If I could just get on Johnny Carson," he mused.

The rib man's ultimate dream is to sell his ribs in his own restaurant. But that takes money he does not have.

"I applied for a Small Business (Administration) loan," he said, "but they told me I would have to have \$10,000 myself."

"Where in the world is a man living on welfare going to get \$10,000?"

On April 25, 1968, Congress formally declared war on Spain in the battle over Cuba.

Pampa Youth Center To Enroll Swimmers

The day for enrollment for the summer swim lessons is at hand. This date is Thursday, May 8 at 1:00 p.m. Enrollment will start promptly at 1:00 and continue thereafter until all classes are filled. Enrollment is free to Youth Center members and \$5.00 for non-members.

Yes parents, we will have the baton lessons again this summer. Enrollment is now going on. Classes will begin on June 2 at 1:30 p.m. and continue on Monday, Wednesday and Fridays for six weeks. Classes will be divided into various degrees of difficulty by the instructor at the first meeting. Each participant needs only to be a Youth Center member to enroll.

The Conservation Party. Join In.

Do your bit for conservation while you do your thing. A gas grill lets you cook outside and take the heat with you. You don't put an added tax on your air conditioner with cooking heat. A gas grill is so convenient (no charcoal mess or bother) eating "out" will become an everyday affair. And, it will add a charisma to your outdoor living that will last all year long. Get the voters "out" and that wonderful charcoal taste will earn you a vote of confidence from family and friends. You'll receive a mandate for more gas grill cooking. Ask any Pioneer employee.

Pentagon Reduces Men in Thailand

WASHINGTON (UPI) — The Pentagon Monday announced a more than 25 per cent reduction of U.S. troops in Thailand and disclosed that over Thai objections it will bring back about 130 U.S. aircraft flying into that country by fleeing South Vietnamese airmen.

The number of authorized U.S. troops in Thailand will be reduced from 27,000 to 19,500 by June, officials said. There are actually only 25,000 servicemen there now, mostly from the Air Force.

The troop reduction, disclosed earlier in Bangkok, was described in a Thai ministry statement as the first step in an effort to phase out American military presence in Thailand by March 1976.

The decision to bring South Vietnamese aircraft to the United States had not been disclosed previously.

A spokesman said the Pentagon had no immediate word on how many of the more than 300 U.S. planes based in Thailand would also be removed.

He also declined comment on

the Thai statement that all remaining Americans would be forced out of Thailand by next spring. "The negotiations are continuing," he said.

Defense officials have been saying for months they want to keep a residual force of about 10,000 men in Thailand.

Another spokesman said the aircraft carrier Midway arrived in the Thai port of Sattahip during the weekend. He said the carrier was picking up helicopters and small planes that were abandoned by the defeated South Vietnamese air force. Larger planes, like C-130 cargo planes, will be flown out, he said.

The Thai government announced last week that it would turn the planes over to the new Communist government in Saigon. But Defense Secretary James H. Schlesinger insisted the United States holds title to the aircraft.

Thailand, which has 1,000 miles of frontier with Cambodia and Laos, is trying to improve relations with North Vietnam, which has trained insurgents operating in Thai territory.

North Vietnam, however, has said American troops must leave Thailand before relations between the two countries can improve.

The Thai government announced in March all American troops would be withdrawn within a year.

FBI Man On Extortion Of Helen Reddy

FREEHOLD, N.J. (UPI) — The FBI Saturday refused comment on an unsuccessful \$30,000 extortion attempt and death threat against Australian pop singer Helen Reddy.

A 17-year-old New Jersey youth who allegedly telephoned the singer's husband and threatened her life was held without bail.

A spokesman for the FBI in Newark said the youth, Gerald E. Hall, was arrested late Friday, as he waited at a local Western Union office for the money to arrive.

The spokesman said Hall, who lived with his father in Asbury Park, N.J. and apparently did not have a police record, called Miss Reddy's husband, Jeff Wald, in New York Thursday and Friday.

"At that time," the spokesman said, "he (Hall) reportedly threatened her life and demanded that \$30,000 be sent to the Western Union office in Asbury Park."

Hall faces a hearing in U.S. District Court on Monday.

Local police and the Monmouth County prosecutor's office also declined comment on the incident because the youth is a juvenile.

Your Horoscope

By Jeane Dixon

WEDNESDAY, MAY 7

Your birthday today:

This year's experience defines for you the line between fate and free will, so you know where you stand. In most enterprises you're on your own and possibly pioneering new methods or ideas. Relationships are worth special attention. Today's natives are usually able to influence society easily. Their own prosperity rises and falls in long, uneven tides.

Aries [March 21-April 19]: Your impulsive actions test people's patience and limit your chances to get your way in more important matters tomorrow. Associates have different ideas about what should happen next.

Taurus [April 20-May 20]: Accept some troubleshooting as normal and useful. Keep financial details confidential while a check of figures is pending. Take care of your health.

Gemini [May 21-June 20]: You can join forces with practically anyone on almost anything but money. Business as usual requires extra effort but is worth it.

Cancer [June 21-July 22]: Secret or lost information can be uncovered. Investigate possible new ventures in career or business, but don't neglect home and loved ones. Plan a welcome surprise.

Leo [July 23-Aug. 22]: Technical advice plus some common sense helps put your intuition into workable form. Seek further contacts but retain those you have. Plans need reevaluation.

Virgo [Aug. 23-Sept. 22]: What seems to be a short cut isn't, although you learn something valuable by trying to make the experiment work. You throw friends a little off balance today.

Libra [Sept. 23-Oct. 22]: Distant affairs are interesting, but you must cope with those that are near at hand first. Get legal assistance where it's needed. Work steadily despite temptations and social distractions.

Scorpio [Oct. 23-Nov. 21]: Be ready to assert yourself and display your accomplishments as soon as the opportunity arises. Intuition leads you to say the right things. Financial breaks are made, not found.

Sagittarius [Nov. 22-Dec. 21]: Matters go so well that you're apt to take success for granted and say too much too fast. Money changes hands swiftly. Be sure you have details settled to your liking.

Capricorn [Dec. 22-Jan. 19]: Travel of any kind is favored provided its purpose is serious. Avoid dilly-dallying en route for superficial reasons. Evening changes give you reason to meditate.

Aquarius [Jan. 20-Feb. 18]: Now that you're in such a gung-ho mood, proceed ambitiously with new methods. Make introductions and enjoy a touch of romance in later hours.

Pisces [Feb. 19-March 20]: As long as no one else is involved and it's your money you're investing, go ahead with that speculative urge. Tonight is a good time to reorganize your programs.

Senator Says Economy Needs Restraint Now

DALLAS (UPI) — The key to curing America's economic woes is restraint, according to Sen. Dale Bumpers, D-Ark.

"In the midst of our current difficulties with the economy, the temptation to be hasty is well-nigh irresistible," he said Friday. "But the greatest need of this nation is not for speed, but for patience, patience for time to let ideas mature."

Bumpers spoke before the Southwestern Legal Foundation made up of attorneys from Arkansas, Louisiana, Oklahoma, New Mexico and Texas.

"I'm wondering what happens next," he said. "If after the U.S. spends \$70 billion, it doesn't have, nothing happens and the recession is still on. We can at least be certain we have been treating the symptoms rather than the disease."

Bumpers said restraint should also be the guiding word

for U.S. foreign policy.

"If the U.S. should overreact to a problem not vital to our interest, we would have failed to benefit from one of the most costly ventures in our history," he said of the war in Vietnam.

"We plunged into the war because of our impatience; we must now measure our reactions very accurately. Restraint is not incompatible with great strength."

Bumpers said the American system will thrive in contrast to the highly regimented systems in other countries if independence is stressed.

"Our blend of freedom and equality can survive only if individual Americans feel that choices are still open to them—that they have some measure of control over their own destinies," he said.

Margo's LaMode

"If we all stick together, work for each other and for Pampa, we will all prosper," commented Jimmie Jordan of Margo's LaMode.

Mrs. Jordan has been working for the store for 28 years. Originally Bentley's Clothing, 113 N. Cuyler, Margo's LaMode of Dallas bought the store in 1973. When the store changed owners Mrs. Jordan became manager.

Margo's is one of 76 member store located in Texas, Arkansas, Georgia, Alabama, New Mexico, Arizona and Oklahoma.

"Margo's is a great company to work for," said Mrs. Jordan. "Anything the downtown merchants want to do we are always more than happy to participate. I think that's good."

"This is my life," she said. "Some days I go home tired but I'm ready to come back the next day."

"I love people," she added. "I don't think I would be happy if I were to retire."

"This business has been good to me and for me. Business is staying up. We have a lot of good people in and near Pampa."

Jimmie Jordan, manager
