# Texas Basks In Political Spotlight

**MASONIC TEMPLE CORNERSTONE**—The placing of this huge cornerstone of Midland's new Masonic Temple Wednesday afternoon is expected to attract a record number of area and state Masonic leaders to Midland. Inspecting the cornerstone, which weighs 2,200 pounds, are George Vannaman, left, worshipful master of Midland Lodge, and Houston Hill, contractor.

## Masons Set Cornerstone Program Here Wednesday

Wednesday will be an historic day for Midland Masons, who will lay the cornerstone for their new quarter of a million dollar Masonic Temple in an impressive ceremony scheduled at 4 p.m. at the building site, 1600 West Wall Street.

Officials of Midland Lodge No. 623, A.F. & A.M., said invitations have gone out to all lodges in this section of West Texas to be represented at the ceremony.

Gibb Gilchrist of College Station, chancellor of the Texas A&M College System and worshipful grand master of the Grand Lodge of Texas, will officiate at the cornerstone laying.

Charles Klapproth of Midland, grand orator of the Grand Lodge of Texas, also will represent the Grand Lodge in the ceremony.

Ed M. Whitaker, attorney and rancher of Midland and Santa Rosa, N. M., who participated in the laying of the cornerstone at the old Masonic Building in 1909, also will participate in the ceremony Wednesday afternoon. He will place a picture of the 1909 event and a newspaper carrying an account of the early-day ceremony in the cornerstone of the new temple.

Members of the Midland Lodge will open their meeting Wednesday afternoon in the old building, 215 1/2 West Wall Street, before proceeding to the site of the new temple.

Officers of the Midland Lodge, including George Vannaman, worshipful master; J. B. Richards, senior warden, and J. O. Nobles, Jr., junior warden, will participate in the ceremony, as will R. B. Cowden of Midland, a former grand commander of the Grand Commandery of Texas, and Hank Avery of Midland, building architect.

The cornerstone for the new temple weighs 2,200 pounds. Among the articles to be placed in the 11x18x18-inch niche in the cornerstone are a history of Midland Lodge No. 623, AF & AM; a printed program of the ceremony; current issues of The Reporter-Telegram; and a bottle of water from the River Jordan brought to Midland more than 50 years ago by the late John M. Cowden.

**Chartered In 1886**

The Midland lodge was chartered by the Grand Lodge of Texas Dec. 16, 1886.

Houston Hill of Midland has the general contract on the building project, which is scheduled for completion in February of next year.

Plans for the erection of the temple were launched several years ago. The late M. C. Ulmer, prominent banker and civic, church and fraternal leader, served as chairman of the building committee until his death early this year.

R. B. Cowden now is chairman of the building committee. Other members are Hank Avery, secretary, R. M. Barron, J. B. McCoy, O. J. Hubbard, Wallace Irwin, Charles L. Klapproth, G. G. Hazel, Frank Davidson, John P. Butler, Perry Collins, John Allen Sewell, Roy McKee and George Vannaman.

The new temple will contain two lodge rooms, a large banquet room, four offices, kitchen, rest rooms, storage rooms and practice rooms. It will be a two-story, cut-stone masonry building with 50 tons of air-conditioning. It is of the latest and most modern design, and will be one of the most attractive lodge buildings in West Texas. The furnishings and fixtures are said to be the best available.

The cornerstone laying is expected to attract one of the largest crowds of Masons in the history of West Texas.

## HUSBAND WINS IN THIS ONE

**Police have stood by while many a wife has tearfully packed up to "go home to mother."**

**Officers A. L. Shelton and D. M. Grayson ran into a new situation, however, shortly after midnight Saturday.**

**After answering a complaint about a disturbance on East Wall Street, they reported back to headquarters:**

**"Woman and father had argument. Woman packed up and went home to her husband."**

## Robber Bludgeons Man, Three Small Children To Death

CHESTER, CALIF.—(AP)—The bodies of a grocer and three small children who went with him on his weekly trip to the bank were found Saturday in the trunk of his car—beaten to death by a robber who apparently knew them.

A fourth child, covered with blood, was reported in fair condition but suffering from extreme shock.

Missing was the $7,100 which the grocer had obtained Friday afternoon from the bank at Westwood, 11 miles east of Chester.

The abandoned car and its trunkload of bodies was found in the woods six miles east of this Northeast California mountain community.

The dead were Gard Young, 43, his daughters, Judy, six, Jean, seven, and a neighbor boy, Michael Faile, four.

Young's third daughter, Sondra Gay, three and a half, was taken to the Westwood Hospital.

Young, who operated a good-sized supermarket, made a regular weekend trip to the Westwood bank to get money to cash loggers' paychecks.

Sheriff M. H. Schooler of Plumas County said this was known generally throughout the region.

**Took Children For Ride**

On Friday, he took the children along for the ride, while his wife stayed home with the Young's five-month-old son.

Young last was seen buying candy for the children across the street from the bank a little after 3 p.m. Then the happy little party vanished.

Although without a suspect, Sheriff Schooler theorized that whoever committed the crime was known to the children; otherwise there would have been little motive in killing them as well as Young.

When Young failed to return to Chester by 6 p.m., the sheriffs of Plumas and adjoining Lassen County immediately organized a search. One hundred loggers and business men were deputized and spent the night in a ground search in the high mountain forests along the Plumas-Lassen County line.

**Spotted From Air**

An aerial searcher, Don Nasson of Chester, spotted Young's 1951 green hardtop convertible on a lonely logging road early Saturday.

The bodies were left in the trunk pending arrival of state criminal investigation specialists from Sacramento. The Federal Bureau of Investigation also was asked to assist.

There was a possibility that they had been shot as well as beaten, but the sheriff's office reported that beating appeared to be the cause of death. Young's hands were tied behind his back and there was a gash on his forehead which the sheriff said appeared to have been inflicted with a blunt instrument such as a length of pipe.

## White Horse Hill Struggle In Sixth Day

SEOUL —(AP)— Tenacious South Korean infantrymen clung desperately to a knob 50 yards below the top of White Horse Mountain early Sunday while blazing Allied artillery fire pounded the battle-chewed crest into a seeming no-man's land.

Allied artillery spotters reported no trace of some 1,500 Chinese Communists who stormed the key western front peak late Saturday.

The battle for White Horse, which overlooks the Allied bastion of Chorwon and dominates the road hub to Seoul, raged into its sixth day Sunday. The fight is considered far from over.

**Changes Hands 23 Times**

More Chinese troops were reported grouping to the north, where the Reds have massed some 16,000 reinforcements. Valiant South Korean Ninth Division troops have pledged to keep White Horse "at all costs."

By midnight Saturday, the peak had changed hands 23 times in 125 hours of non-stop battle.

An Allied officer on the front reported the Chinese might have a few troops remaining on the peak but none could be detected.

The hilltop itself was a "mass of ruin," he said. Former entrenchments and bunkers "no longer exist."

## Republican Club Conducts Telephone Presidential Poll

The Midland County Young Republican Club is conducting a telephone presidential poll, President Cliff Wilderspin said Saturday.

Wilderspin said the poll is being made to determine the preference of the voters at this time and to remind them of the November 4 general election.

The disclosure of the telephone poll came after a spokesman for the Midland League of Women Voters said reports had been received that a poll was being conducted by persons who refused to give their names.

"At no time while conducting this political poll," said Wilderspin, "has there been any refusal on the part of those telephoning voters to refuse to identify who was calling or the the fact that the Young Republican Club was sponsoring the poll.

"Any voter who may be contacted by a caller who refuses to identify himself, when asked, can be certain it is some other individual or organization making the inquiry."

## Big Lake Approves Water, Sewer Bonds

BIG LAKE—By an overwhelming majority but with light voting, Big Lake citizens voted Saturday to approve a $300,000 bond issue for extension of the city's sewer and water system.

The vote was 103 for and seven against.

Of the amount, $116,000 will go to the sewer system, $100,000 to the waterworks and $84,000 for paying of indebtedness on old bond issues.

## Both Major Parties Woo State Voters

By DAVE CHEAVENS

AUSTIN—(AP)—Both Adlai Stevenson and Dwight Eisenhower are coming to Texas this week to see which can draw the fastest and shoot the straightest to get Texas' 24 doubtful but vital electoral votes.

It's the first time in history presidential candidates of both major parties have ranged the Lone Star State in an election year.

**CHAIRMAN** — Alfred (Red) Petty, Midland businessman, Saturday was appointed chairman of the Stevenson-Sparkman vote campaign in Midland County. The appointment was announced by state headquarters in Dallas, where Petty is conferring this weekend. County headquarters are expected to be established here early this week.

Almost always before, the Democrats ignored Texas because it was considered in the bag. The Republicans usually shrugged it off as hopelessly welded into the Solid South.

But this year the spectacle of around a million and a half voters teetering uncertainly between the parties gave both the Republican and Democratic high commands the political fidgets. They are gambling that their candidates in person can give those voters just enough shove in the right direction to count them in November 4.

Eisenhower gets here first. October 14, he will be at Houston, Waco, Lubbock and San Antonio; October 15 at Fort Worth and Dallas. Stevenson begins working on the Texas voters at Fort Worth October 17, visits Dallas the same day, and goes to San Antonio and Houston October 18.

Both vice presidential candidates will help. Richard Nixon has been to Texas once and is coming back late in October. John Sparkman will speak at Texarkana October 24. Senator Robert S. Kerr (D-Okla) will speak for Stevenson at Waco October 14 while Eisenhower is campaigning elsewhere in Texas.

Many political professionals believe what Eisenhower and Stevenson say and do here will be the decisive factor in Texas, and maybe elect a president.

**Revolted In 1928**

Presidential candidates have campaigned before in Texas, but never those of both major parties. Texas never has gone any way but Democratic except in 1928, when Herbert Hoover edged Al Smith. That stimulated some rugged campaigning, but nothing like the current uproar. This year's bare-knuckled brawling between top-flight leaders of two Democratic factions brings to a showdown the conflict between conservative Democrats, who started a revolt against Franklin D. Roosevelt as long ago as 1940, and a liberal branch of the party which upheld the New Deal and Fair Deal.

This year Gov. Allan Shivers controls the conservative state organization openly allied with the GOP in rebellion against the na-

## Texas Itineraries Revealed For Adlai, Ike Campaign Tours

By The Associated Press

Texas headquarters for Presidential Nominees Dwight D. Eisenhower and Adlai Stevenson Saturday annouced this week's itineraries for the candidates in their bids for Texas votes.

**EISENHOWER**

Tuesday—Arrive Houston, 7:25 a.m.; detrain, 8:45 a.m.; leave Houston, 10:30 a.m.; arrive Waco, noon; depart, 12:30 p.m.; arrive Lubbock, 2:45 p.m., leave, 3:15 p.m.; arrive San Antonio, 5:15 p.m., leave 11:59 p.m.

Wednesday—Arrive Fort Worth, 8:10 a.m.; leave 8:40 a.m.; arrive Dallas, 9:25 a.m.; leave Dallas 10:30 a.m.

**STEVENSON**

Friday—Arrive Fort Worth, 5:25 p.m.; depart Fort Worth, 5:45 p.m.; arrive Grand Proirie, 6 p.m.; depart Grand Prairie, 6:15 p.m.; arrive Dallas, 6:35 p.m. Speech at 8 p.m.

Saturday—Depart Dallas, 8:30 a.m.; arrive San Antonio, 10:30 a.m.; depart San Antonio, 2 p.m.; arrive Houston 3 p.m.; depart for Springfield, Ill., at time to be determined later.

Stevenson will be accompanied on his tour of Texas by Speaker of the House Sam Rayburn and Senator Lyndon B. Johnson.

## SWEETIE WILL TOUR WITH IKE

**Mrs. Hal (Sweetie) Peck of Midland, vice chairman of the State Democratic Executive Committee and chairman of the recently organized Texas Womenpower for Eisenhower, Saturday accepted an invitation to accompany General Eisenhower and his party on a flying tour of Texas Tuesday.**

**The Midland woman also will be a platform guest at the general's speaking appearances in Houston, Waco, Lubbock and San Antonio.**

**Mrs. Peck said she will fly to Houston Monday to join the GOP presidential candidate's party.**

## Timothy Taxpayer Sells Boss On Red Feather Drive Merits

By COPE ROUTH

Timothy Taxpayer peered into the tiny mirror over the water cooler, nervously straightened his tie, smoothed down what was left of the hair over his worried forehead and turned and knocked on the door.

"Come in!" growled the voice, and Timothy pushed open the door and stepped inside.

Cornelius J. Hardwhistle finished shuffling through some papers on his desk, jerked a big cigar out of his mouth and looked up.

"Well, Timothy," he muttered, his expression unchanging. "What is it?"

The little fellow shifted nervously and swallowed a couple of times.

"Mr. Hardwhistle," he said, "I've pretty well caught up with my work for today and there's nothing particularly pressing.

"I wonder if I could have the afternoon off."

The boss pulled himself up to his desk, a startled look on his face, and rested his elbows on his blotter pad.

"Well, Timothy," he said. "This is a bit unusual, isn't it? Nothing wrong, is there?"

"Oh, no, sir," answered Timothy. "Nothing at all. But it is something important."

Cornelius J. Hardwhistle swung around in his chair and stared thoughtfully out of the window, his eyes peering across the street at the Midland County Court House and down the way to the tall V&J Tower.

"If it's important," he finally answered.

"We have to be pretty careful, though, Timothy, about asking for time off like this. Have to keep on the ball, you know. Why I remember when I was just a youngster I had to work 16 and 20 hours a day. It was hard but you have to work hard to get ahead, you know."

**Hears Success Story**

Timothy shifted from one foot to the other and listened patiently to the Loss explain how he'd gotten where he is today.

"That's the way it is," Hardwhistle finally concluded. "So, if you think it's important enough, go ahead and take the afternoon off."

"Thank you, sir," answered Timothy. "I'll be here first thing in the morning."

**NEW YORK —(AP)— President Truman brought his whistle stop campaign to a climax here Saturday night with the charge that General Eisenhower has adopted "a new kind of isolationism" and a "me-too" approach on issues at home.**

## Pecos County Puts OK On Bond Issues Totaling $435,000

FORT STOCKTON—With a majority of the returns tabulated, Pecos County citizens Saturday apparently approved bond issues totaling $435,000.

One of the issues—$295,000 for park improvements—had 399 votes for and 232 against. The other issue —$140,000 for courthouse renovation and expansion—received 377 votes for and 239 against.

Only returns from four rural boxes remained to be tabulated Saturday night. These boxes have a potential of less than 100 votes and were not expected to affect the outcome.

Voting was extremely light, despite apparent considerable opposition to the issues as shown in the returns.

The Pecos County Chamber of Commerce backed the issues.

The park improvement bonds will provide for projects in Fort Stockton, Iraan, Imperial and Sheffield.

The other issue is to provide better facilities for the 40-year-old courthouse. Office space would be expanded, the building remodeled and possibly some additions made.

## Midland Will Vote Tuesday On Issue Of School's Needed Classroom Space

Hundreds of Midland school children, parading to classes in ever-increasing numbers, face the prospect of an acute shortage of classrooms next year.

That was the situation Saturday, a survey showed, as taxpaying voters of the Midland Independent School District, prepared to go to the polls Tuesday to decide a proposed $975,000 bond issue.

Even on the heels of an expansion program which has seen additional school buildings placed in use this year, the situation already is serious.

And the results of the voting Tuesday will determine whether it will get worse.

The cramped classroom space effects high school students, elementary pupils and extends into every section of the city.

And that is why the trustees of the school district have proposed the following bond issues:

1. For new elementary school in the southeast section of the city—$350,000.
2. For 18-room addition to Midland High School—$325,000.
3. For four-room addition to De Zavala School—$50,000.
4. For 15-room addition to Carver School—$250,000.

The school board, in issuing a rush call for the election two weeks ago, pointed out that the proposals represent the bare minimum of needs by the time school opens next Fall.

The school board has gone even farther, in ordering a study of needs beyond that, and this program probably will be presented in the Spring.

But school officials, now, are aiming only at meeting the needs for next year.

School enrollment figures bear out the need for additional school facilities before another school year rolls around.

Take the situation in the south part of the city, for instance, and school officials believe the situation there probably is the most acute.

The only elementary school in the area is South Elementary School at South Main and West Dakota Streets. According to the accepted school standards, it has facilities for caring for 762 students, utilizing three temporary buildings now being used.

Without the three temporary buildings, it has a capacity of 672 students.

Approximately 1,103 students now are crowded into the school.

And that's not the whole picture.

Living in the southeast area, where normally they would attend South Elementary School are 156 more students who are transported daily all the way across the city to the new Lamar Elementary School in West Midland.

Thus, these 156 students plus the South Elementary overload of 428 —a total of 684 students—would form the nucleus of the proposed new school, which would be built approximately one mile southeast of the present South Elementary.

Those figures are based on present enrollments, which obviously will be

# Texas AP Writer, Wife Author Novel

A Texas newsman and his wife are co-authors of a first novel by both to be released Wednesday by the Broadman Press of Nashville.

They are David A. Cheavens, chief of The Associated Press bureau at Austin, and his wife, Alice Dawson Cheavens.

The book, "As Love Knows How," is backgrounded in the life of a mythical Northeast Texas town called Morton's Mills. Its principal characters are a young high school teacher, a country editor, and a Latin American student.

Throughout, the book carries a deeply religious theme of universal appeal. It deals with religious conflicts, racial prejudices, small town gossip. It was written primarily for young people, but the publishers believe its appeal is to all ages.

**UN-LEVEL SEA LEVEL**

Sea level is not level. At Seattle, Wash., it is 1.18 inches higher than it is at Portland, Me.; at San Diego, Calif., it is 1.74 inches higher than at Fernandino, Fla.

Fat remains in the stomach longer than most other foods.

## Sigh-Bait Heston Wants Fling At Fishing For Belly Laughs

By ERSKINE JOHNSON
NEA Staff Correspondent

Guys and Dolls: Charlton Heston has joined Monty Clift, Marlon Brando and Gregory Peck in Hollywood's feminine heart - melting league. Now he's after laughs, not romatic sighs, on the career merry-go-'round.

Confiding that he wants a fling at comedy, Heston said that he hopes his next film will be "The Private War of Major Benson," the story of an Army major who lands in the Pentagon's doghouse and is sent as ROTC officer to a school for boys who range in age from four to 14.

"It's breadth of casting that makes an actor great," is Heston's claim. "An actor can't be controlled by his roles—he has to make the roles serve him."

Raymond Massey still may be typed as Lincoln by movie makers, but Heston isn't worried about his role of President Andrew Jackson in "The President's Lady" landing him in a casting rut—"Great parts can be learned only by playing them and Jackson is a great part."

About his hectic love scenes with Jennifer Jones in "Ruby Gentry" which have a bloody "Duel in the Sun" flavor:

"They should be something. Jennifer broke her hand on my head in one of them."

"It's murder when a young actress is stamped as a commedienne in Hollywood," says gorgeous Joyce Holden, U-I's pride and joy in the rib-tickler division.

Joyce, who's about to star in "Night Flower," is out to make her studio forget that she clicked as a clowness in "The Milkman" and "You Never Can Tell." Her new movie may be the way out of the comedy cage "because I wear costumes made out of fringe and get a chance to toss the sex around.

"My big mistake," she said, "was to show that I had a comedy flair. There's no chance in Hollywood for an actress who starts out in comedy. You graduate into it."

• • •

U-I's flower-petal-eating Piper Laurie can start blushing. Moira MacDanold, the three - quarters Polynesian and one-quarter Scotch gal in "Return to Paradise," eats raw fish.

Donald O'Connor, who never received a complaint about his footwork, is changing dance styles. It's "Look, ma, I'm dancing like Kelly and Astaire" in Fox's "Call Me Madam" for Donald, who always labeled himself as a hoofer and claimed that the ballet techniques of Gene and Fred were beyond him.

"But now, in my two numbers with Vera-Ellen, I'm doing a stylized work that I've never done before," he said. "It's turned out fine. Frankly, I didn't think I could do it."

Donald, cagily, about whether he'll continue in the "Francis" film at U-I:

"All I know is that I've done four pictures with the mule and that my contract calls for me to do three more films at the studio. The first will be a musical without Francis. I don't know about the other two. It depends on what the studio wants."

**Throws Slapstick Out**

Joan Davis is prettying herself up, discarding a big load of her famous slapstick comedy antics and turning the pointer to the "lovable" mark on the personality indicator in her new telefilm series, "I Married Joan."

With Jim Backus playing a judge of the domestic relations court who's spliced to her for life, Joan says, "We're a couple of normal human beings who get into broad comedy situations."

But her fans won't be ogling a new Davis beezer, as reported.

"I'm so upset about the story that I've had my nose remodeled," Joan sputtered. "I feel as famous as Durante all of a sudden. I wouldn't wish it on my plastic surgeon to take the rap for this nose of mine."

• • •

Bette Davis stands to make her biggest financial killing in "The Star." In addition to $75,000 cash and another $75,000 due next year, she'll collect 25 per cent of the net profits of the flicker.

*NEW WAVE OF HOME BUILDING—*

# Midland Construction Total For '52 Near $17,500,000

A new wave of home building last week sent Midland's building permits for the year to near the $17,500,000-mark.

During the week permits were issued for $1,319,950 worth of new construction and all of it was in the residential classification, with one minor exception.

Records in the office of R. S. Higgins, city superindentent of inspection, showed the year's total reached $17,441,742 by Friday afternoon.

Permits issued during the week included:

Bill Pace, addition to grocery store, 711 East North Front Street, $8,000. J. D. Henderson, dwelling, 1103 Sparks Street, $15,000. S. P. Clark, convert garage into den, 1801 West Indiana Street, $600. Frank Thomas, dwelling, 403 South Webster Street, $1,250.

Southwest Estates, residence, $6,-0, at 3802 and 3804 Anetta Street. Southwest Estates, residences, $6,000 each, at 3604, 3606, 3608, 3610, 3612, 3614, 3700, 3702, 3704, 3706, 3708, 3710, 3712, 3605, 3615, 3701, 3703, 3705, and 3707 Amelia Street.

Southwest Estates, residences, $6,-000 each, at 3502, 3504, 3609, 3611, 3613, 3615, 3617, 3703, 3705, 3707, 3709, 3711, 3713, 3715, 3717, 3801, 3803, 3805, 3807, 3809, 3811, 3708, 3706, 3704, 3702, 3700, 3608, 3606, and 3604 Anetta Street.

## Kermit High School Slates Annual Homecoming Event

KERMIT — Sixth Annual Homecoming for the Kermit High School Alumni Association has been set for next Saturday, when special activities are scheduled before and after the Kermit Yellow Jacket and the Andrews Mustang football game that night on Wilton Filed. This will be the first conference game for the Yellow Jackets.

Early arrivals for the homecoming will join in a big pep rally at 2:45 p.m. Friday. Registrations begin at 2 p.m. Saturday in the lounge room of the East Primary Cafeteria. Coffee and doughnuts will be served.

A downtown parade will get underway at 6 p.m., just before game time. At least one car carrying members of each of the senior classes from Kermit will be featured in the parade. The first students to graduate from high school here will carry placards of the year of 1932. At that time three seniors composed the entire class. Mrs. G. E. Thompson, now the wife of the superintendent of the Kermit schools was a member of the 1932 class. The others were Leo Barnard and Howard Butler.

A dance at the country club Saturday night will end the festivities.

The report of a nominating committee for election of officers for the next year will be presented to all former students attending the homecoming.

Members of this year's student council are assisting the alumni organization in planning and holding the homecoming.

## U. S. May Launch War At Any Time, Red Leader Says

MOSCOW —(AP)— Soviet Deputy Premier Nikolai A. Bulganin has told the 19th Soviet Communist Party Congress there is a real danger the U. S. will launch a war against Russia.

Because of this, the Soviet economy is kept in constant readiness to go on a war footing at a moment's notice, he said in a speech to the Congress Wednesday.

The text of his address was made public Saturday as party delegates prepared to wind up this historic Congress session—the Soviet Union's first in 13 years.

Only the last item on the agenda remained. This is the election of party officers, including members of the Central Committee's ruling secretariat. Prime Minister Stalin most likely will be reelected secretary-general.

### 'RANSOM' PAYMENT

Alexandria, Va., escaped bombardment by the British fleet in 1814 by paying a "ransom" of $100,000, according to the Encyclopedia Britannica.

**DROUTH AID HAY**—Joe Albright, Andrews County ranchman, left, is shown inspecting some of the federal drouth aid hay which arrived in Midland Wednesday. To the right is Perry Collins of the Farmer's Co-Op Gin, distributor of the hay for Andrews and Midland Counties. Charles Champion, secretary of the Production Marketing Association, is shown at the top. Two carloads of the hay, consigned for Andrews County, was received in the initial shipment. An additional five carloads for hungry Midland County cattle, are expected Monday.

## Wiley Calls On UN To Weed Out Reds

WASHINGTON — (AP) — Senator Wiley (R-Wis) said Saturday "quite a few" American Communists and security risks have been working for the United Nations Secretariat in New York.

He called on the UN to throw them out and announced that he had asked the American State Department to give him a full report on the matter.

Wiley, ranking Republican on the Senate Foreign Relations Committee, is a delegate to the UN General Assembly which opens Tuesday.

In issuing his statement, he said he did not want to "render more difficult the already immense tasks of the Assembly session."

But, he added, "I have a responsibility to make known to the leading officials of the UN what I feel to be the extreme displeasure of the American people over the continuance in the UN Secretariat of subversive Americans."

**Cold, Hard Fact**

"The Red infiltration," he said, "is not a matter of conjecture or a pipe dream, but a matter of hard cold fact, documented by top security officials—facts which, when revealed, will shock the American people."

The Senate internal security subcommittee is to open hearings Monday in New York on the question of possible subversive individuals in the UN.

Wiley is not on this group but he is the Republican with top seniority on the Judiciary Committee, of which the subcommittee is a part.

He said that some UN personnel already had refused to answer subcommittee questions on the ground that they might incriminate themselves and added, "Apparently more UN employes will similarly brand themselves next week."

## Methodists Approve Four-Year Program

FORT WORTH—(AP)—The Central Texas Methodist Conference approved a four-year building program estimated at $750,000 here Friday.

The program includes a nurses home at Harris Hospital here, new buildings at the Glen Rose Lake Methodist camp, a Texas Wesleyan library, a men's dormitory at Southwestern University, and a Wesley Foundation building at the University of Texas.

The approval was granted with the understanding that no assessments or goals would be placed upon any district or local church.

About 500 pastors and lay leaders attended the one-day session.

With slight variations of length, the 20.62-inch ancient Egyptian cubit was used by many ancient civilizations including, it is believed, one of those which built some of the now ruined structures in New Mexico.

## Southern Democrat Leaders Say Adlai Will Carry Dixie

NEW ORLEANS —(AP)— Democratic leaders from 10 Southern states—who heard Gov. Adlai Stevenson touch on the civil rights issue during a major address—expressed confidence the Democratic presidential nominee will carry the South.

Four governors and a governor-nominee were among top Southern Democratic leaders who participated in a giant political rally before Stevenson's address Friday night.

Police estimated 10,000 persons turned out to hear the Illinois governor.

Southern Democratic leaders who were interviewed said they believed Gen. Dwight Eisenhower's personal popularity and knotty campaign issues affecting the South could be overcome to put their states on the Democratic side November 4.

Governors attending were Fuller Warren, Florida; Hugh White, Mississippi; Gordon Brownings, Tennessee, and Johnston Murray, Oklahoma.

The Alabama and Kentucky governors sent emissaries. Judge Francis Cherry, governor-nominee of Arkansas, made a brief talk to the rally.

The baby of a large kangaroo is only about an inch long at birth.

# Federal Court Asks Binion Face Tax Charges In Texas

CARSON CITY —(AP)— Federal authorities have asked a court order to remove gambler Benny Binion to Texas for trial on charges of evading 1948 income taxes.

However, it probably will be some time before a hearing is set on the application.

U. S. Attorney Miles N. Pike formally filed the application here Friday. No hearing can be scheduled until it is decided which federal judge will hear the request.

Federal Judge Roger Foley has said he will disqualify himself because his son acted as Binion's attorney in a previous income tax action. He said he would write Chief Justice William Denham of the Circuit Court at San Francisco next week to request assignment of another judge.

Then the hearing on the removal application must be fitted into the calendar of the substitute judge. He probably will come here for the proceedings.

**Policy Racket**

Binion, operator of a big Las Vegas casino, is charged in Dallas with evading some $25,000 in 1948 income taxes for himself and his wife. He also is charged in a state indictment with having a part in a million-dollar-a-year policy racket.

Texas authorities plan to arrest him on the state charges if he is brought to Dallas to stand trial on the federal charge.

Last month Binion was fined $15,000 and placed on three-year probation here after pleading no-contest to a charge of evading 1949 income taxes. The no-contest plea allowed the case to be transferred from Texas to Nevada by an agreement between U. S. attorneys of the two states.

However, U. S. Attorney Frank Potter of Fort Worth has said he will not consent to a transfer of the current case.

## Greenville Woman Killed On Highway

DENISON —(AP)— Mrs. Evelyn Nalls Landreth, 30, Greenville, was killed Friday night in a pickup truck wreck about eight miles southeast of here.

C. D. Landreth, about 30, her husband, was injured critically.

The truck left the highway and overturned.

Animal husbandmen advise against breeding heifers until they weigh at least 700 pounds.

## Past President Of Rotary To Address Seagraves C-C

Harry H. Rogers of San Antonio, a past president of Rotary International, will fly to Midland Sunday enroute to Seagraves where he will address the annual banquet of the Seagraves Chamber of Commerce Monday night.

The distinguished service club member and civic leader will be met at Midland Air Terminal by a group of Seagraves Chamber of Commerce leaders. A number of Midland Rotarians also are expected to be on hand to welcome Rogers to West Texas.

Until his retirement from active business, Rogers was head of the law firm of Rogers, Stephenson and Dickason of Tulsa, Okla. A native of Missouri, he holds honorary LL.D. degrees from Phillips University at Enid, Okla., and Tulsa University. He taught school until he was 25 years of age. Later he was admitted to the bar and began practice at Wewoka, Okla., in 1903. He served as president of Rotary International in 1926-27.

Harry H. Rogers

**Civic Leader**

In San Antonio, he is president of the public school board and of the board of the Mexican Christian Institute. He also is a past president of the Community Welfare Council, the International Convention of Christian Churches, the Oklahoma Bar Association, the Tulsa Chamber of Commerce and the Oklahoma State Chamber of Commerce. Well known throughout the Southwest, he is said to be one of the state's most outstanding speakers.

A special program of music will be presented at the Monday night meeting in Seagraves. Bernie Howell of Lubbock will be at the organ, and a group of singers from the music department of Wayland College at Plainview will present several selections.

The banquet will be held in the Community Building.

## Texas Truck Crops May Top Harvests Of Last 10 Years

WASHINGTON—(AP)—The Agriculture Department says production of commercial truck crops for harvest this Fall is expected to be about three per cent more than last year and eight per cent higher than the 1941-50 average.

A production of 1,780,000 tons was forecast Friday for 1952 compared with 1,700,000 in 1951 and an average of 1,630,000 in the 10-year period on which production estimates were prepared as of October 1.

Fall production of carrots, cucumbers, eggplant, green peas and green peppers was expected to be substantially above last year's level, with cabbage, celery and lettuce showing a moderate increase.

Fall production of lima beans, snap beans, cauliflower, spinach and tomatoes was expected to be less than last year.

The prospective production of nine important truck crops for commercial processing was estimated at 5,790,000 tons compared with 6,940,000 in 1951 and 5,090,000 for the ten year average.

October reports from tomato canners and product manufacturers indicate a production of 3,253,140 tons for 1952, the report said, about 28 per cent less than the 1951 production but 11 per cent more than the 10-year average.

## Jury Gives Death In Texas Stabbing

HOUSTON —(AP)— The death penalty was given Gerhard A. Cordes here Friday for the July 23 stabbing death of Mrs. Cleora McCord.

The 12-man jury in Judge Langston G. King's Criminal District Court deliberated only 40 minutes.

J. W. Sears, Cleburne father of the 39-year-old victim, told an assistant district attorney that he thought the jury's verdict "as right as right can be."

Cordes, 41, took the verdict with a dazed expression.

---

Some of the famous Roman roads were more than 40 inches thick.

# Robbery Suspect Remains In Jail

FORT WORTH—(AP)—Sam Cresap, one of the two men indicted Friday in the $248,000 robbery here of two Cubans, posted bond but remained in jail under a federal charge.

The Tarrant County Grand Jury took up the robbery case after lunchtime and quickly returned an indictment against Cresap and Gene Paul Norris.

Norris, a former convict, is being held in jail at Chickasha, Okla.

Cresap is a 40-year-old Fort Worth car salesman.

The state indicted Cresap on a charge of robbery and two counts of advising, commanding and encouraging Norris to commit the offense and agreeing with Norris to aid in carrying out the robbery. Bond was set at $30,000, and Cresap's attorneys posted it.

However, bond was set at $20,000 for Cresap Thursday at his arraignment on a federal charge of transporting stolen goods across state lines. His attorneys explained that this bond cannot be posted until U. S. Commissioner R. F. Milam returns to his office Monday.

Bond for Norris is $50,000 on the state charge and $50,000 on the federal charge.

A third man charged in the robbery, Orvill Chambless, is free on $5,000 bond on a federal charge. His case was not presented to the Tarrant County Grand Jury. They have testified that money taken in the holdup last Friday was to be used in purchase of arms for a revolution in Cuba.

## Grain Investigation Closes Texas Elevator

GALVESTON —(AP)— Grain shipments through Galveston Wharves Elevator B has been suspended by the Commodity Credit Corporation.

CCC took the action, it announced Friday, pending outcome of a suit by the government for payment of grain it says is missing.

One third of the shipments on the wharves in 1950-51, totalling 90,903,108 pounds, was CCC business.

**CAKE FOR IKE**—One of hundreds of Midland housewives who are donating birthday cakes for Midland's celebration of Gen. Dwight Eisenhower's birthday Tuesday is Mrs. W. H. Price of 205 East Spruce Street. Free cake will be given away in downtown Midland. "Helping" in the kitchen are Price and the Price children, Michael Ryan and William Harold, Jr., who is "washing" the spoon.

# Free Cakes For Midlanders Due On Eisenhower Birthday

The eyes of Texas will be upon one of its great native-born sons, Tuesday when Texans will celebrate the birthday of Dwight Eisenhower, candidate for the presidency of the United States.

It will be 62 years ago Tuesday that Ike Eisenhower saw his first light of day in Denison, Texas. Significant, too, that the general will be touring Texas Tuesday in one of his campaign appearances.

Midland will celebrate Eisenhower's birthday Tuesday by presenting free pieces of birthday cake to everyone in the downtown area who stops by the Eisenhower - Nixon headquarters, 204 West Texas Street, or the Texas Democrats for Eisenhower headquarters at the Midland Tower.

Hundreds of housewives and merchants have made or donated cakes for the celebratiton and the event is expected to attract throngs to both headquarters' locations.

Organization and planning of the free birthday cake stunt is under the direction of the Young Republican Club of Midland County, together with the cooperatitoff of volunteer workers from both the Texas Democrats for Eisenhower group and the Eisenhower-Nixon headquarters.

Cake will be served beginning at 9 a.m. on Ike's birthday and will continue as long as the cake supply lasts.

## Texas Corn, Rice Output Estimates For 1952 Boosted

WASHINGTON—(AP)—Boosted estimates of the 1952 Texas corn and rice crops and a cut in the estimate of the 1952 Texas grain sorghum crop were announced Friday by the U. S. Department of Agriculture.

In its monthly report based on October 1 conditions, the department estimated the Texas corn crop at 39,117,000 bushels at 17 per acre, compared with the September estimate of 36,816,000 bushels and 16 bushels per acre.

Grain sorghum production in Texas this year was estimated at 38,038,000 bushels and 13 bushels per acre, considerably down from the September estimate of 40,964,000 bushels.

The Texas rice crop outlook was boosted just a bit, from 13,128,000 bags of 100 pounds in the September estimate to 13,402,000 bags in the new report.

The Texas wheat crop, already harvested, was estimated at 40,380,000 bushels and 12 bushels per acre. The Texas orange crop was estimated at 1,200,000 boxes and the grapefruit crop at 450,000 boxes.

**HOLDS REVIVAL** — The Rev. Joe Bishop of Yukon, Okla., is conducting revival services in the Church of the Nazarene, Big Spring and Indiana Streets, to continue through October 19. He will speak for both services Sunday in the church and for services at 7:45 p.m. each weekday.

**FISHERMAN DROWNS**

BONHAM —(AP)— Cliff Johnson, 62, Honey Grove negro, fell into Lake Crockett while fishing from a pier Friday night and drowned.

---

The world land areas have an average population of about 40 people per square mile although many areas have much denser populations and some far less dense.

# Baylor Takes Action On 141 Students In Bridge-Burning

WACO —(AP)— Disciplinary action against 141 Baylor students who have been identified as some of those involved in a bridge-burning incident here recently was announced Friday by the Baylor president.

Dr. W. R. White said six of the students were on strict probation and 135 were under supervision.

The school president said an investigation of the incident was continuing and when the "major offenders" are found, they will be expelled from school.

A city-owned bridge near the Baylor campus was burned partially on the night of October 2. A crowd of youths, many of them Baylor students, gathered. Policemen and firemen said the youths threw clods and stones at the officers and flouted their orders to clear the scene.

In his statement, Dr. White said: "No one has been able to identify the persons who set fire to the bridge and damaged the fire hose. x x x All diligence will be used to determine the indentity and guilt of the principals."

**Given Demerits**

He said the 135 under supervision of their dormitory directors were known to be spectators.

The six on probation were identified as ones refusing to cooperate with officers. They were given demerits—some as many as 24—and denied certain privileges such as attending football games and other activities. Twenty-five demerits against a student automatically means his expulsion from school.

Dr. White gave no names, saying it was done in fairness to the individuals and their families.

The report of the incident was made by Baylor's discipline committee, composed of personnel administrators, faculty members, dormitory directors and two students. Dr. White said they had sought the aid of policemen and firemen and asked their cooperation in the continuing investigation.

**HAIR LOSS**

From 38 to 106 hairs daily are shed normally by young men and women between the ages of 18 and 26; between the ages of 50 and 60, this number exceeds 120 hairs daily.

**BAYLOR EXES INVITED TO ATTEND LUBBOCK EVENT**

LUBBOCK — All Baylor ex-students who attend the Baylor-Texas Tech football game here next Saturday are invited to attend the Hub City Baylor Alumni Club reception from 1:30 p.m. to 6 p.m., in the Chimayo Room of the Caprock Hotel.

Hugh Harrell, president of the club, said all ex-students and their guests will be welcome.

# Sooners Jolt Longhorns, 49-20

DALLAS —(AP)— Oklahoma shocked fumbling, bumbling Texas with four touchdowns in the first period and went on to win this storied intersectional football game 49-20 Saturday in one of the greatest offensive shows the Cotton Bowl ever saw.

Eddie Crowder leveled the Texas defenses with slingshot passing and Buddy Leake, Billy Vessels and Buck McPhail riddled the Longhorn line as the Sooners slashed and tore in a display of power and finesse that awed the 75,504 fans.

Fumbles set up two Oklahoma touchdowns in the opening period and Crowder's mighty throwing accounted for the other two.

Texas came back gamely and dominated the second period but it was a foregone conclusion from the first six minutes that the Sooners were going to win.

T. Jones rallied the Texas forces in the final period to pass for two touchdowns but the Sooners more than matched it with three.

It was the most points ever scored in a Texas-Oklahoma game and the most Oklahoma had scored since 1908, when the Sooners beat Texas 50-0. It was the most decisive defeat suffered by a Texas team since 1944, when Randolph Field beat the Longhorns 42-7.

McPhail hammered and smashed through the big but futile Texas line for 149 yards. Vessels made 106 yards and Leake 74.

Oklahoma rolled up 296 yards on the ground and 133 in the air to 146 on the ground and 158 passing for Texas.

Texas couldn't do anything right in that disastrous first period while Oklahoma could do nothing wrong.

Oklahoma scored in less than three minutes. Texas had taken the opening kickoff and on the first play Jimmy Pace fumbled and Sooner Larry Grigg recovered on the Texas 26. McPhail and Leake plowed to the seven. Texas was penalized to the two for offside, then Vessels banged right guard for a touchdown.

Texas marched to the Oklahoma 31 but couldn't budge further and had to kick. Then Oklahoma rambled 76 yards for another touchdown, made on a 65-yard pass play. Crowder threw to Leake on the Texas 40 and he ran across.

Gib Dawson fumbled the kickoff on the Texas 29, Gene Calame recovered and Oklahoma had another score shortly afterward.

Vessels crammed into right tackle from the Texas 12, made seven and lateraled to McPhail, who ran over.

Grigg took a kick back 38 yards to set up the fourth Oklahoma touchdown, all made in 10 minutes and 50 seconds. Grigg raced to the Longhorn 29 and Crowder passed to John Reddell for the score.

Texas came back amazingly in the second period, scoring one touchdown and driving to the Oklahoma one-yard line on another occasion. The Longhorn touchdown was on a two-yard blast by Billy Quinn over right tackle, climaxing an 80-yard surge.

Oklahoma scored again early in the fourth period, rolling 66 yards. McPhail, Vessels and Leake alternated in hammering to the Texas three and here the Longhorns were penalized to the one for offside. Leake plowed right guard for the touchdown.

Texas took the kickoff and swept 70 yards to its second touchdown with the running of Dawson and passing of Jones pushing the drive along. The payoff was a 24-yard toss from Jones to Tom Stolhandske.

But Oklahoma came roaring back to splurge 69 yards for another score, made on a 60-yard gainer. McPhail took a lateral from Vessels on the Texas 40 and raced to the touchdown.

Texas then drove 80 yards for a touchdown with Jones passing to Quinn for 19 yards.

Oklahoma got its final touchdown when Texas tried an onside kick and the ball went to Oklahoma on the Texas 41 and the Sooners pushed easily to the score. Vessels made it from the one-yard line.

| | | | | |
|---|---|---|---|---|
| Oklahoma | 28 | 0 | 0 | 21—49 |
| Texas | 0 | 7 | 0 | 13—20 |

Oklahoma scoring: touchdowns, Vessels 2, Leake 2, McPhail 2, Reddell; conversions: Leake 7.

Texas scoring: touchdowns Quinn 2, Moon; conversions: Dawson 2.

# Razorbacks Upset Bears By 20 To 17

LITTLE ROCK— (AP) — Arkansas' Razorbacks threw four offensive formations and a host of pile-driving backs at the Baylor Bears Saturday night to score an upset, 20-17, Southwest Conference football victory.

A crowd of 25,000 watched the fired-up Razorbacks drive the previously unbeaten Bears crazy with the split-T, the tight T, the spread, and the deep split T formation. And, but for some butter-fingered pass receivers and untimely penalties, Arkansas could have had a larger margin.

Ralph Troillett, a third-string quarterback, herded the Razorbacks to a pair of second-half touchdowns that spelled the difference.

Entering the game when All-Southwest Conference Lamar McHan was carried out with an injured leg in the third quarter, Troillett's faking and passing featured a drive to the Baylor one, from where he sneaked over.

Then, in the final period, Arkansas marched 66 yards, mostly on line smashes by Jack Troxell, Murry Elton and Lewis Carpenter. Troillett flipped a 13-yard pass to Elton for the touchdown.

That put Baylor behind, 20-10, but the visitors scared the daylights out of Arkansas in the last four minutes as Billy Hooper carried the Bears 75 yards on two plays for one score and had them banging on the door again.

Hooper, a sophomore, reeled off a 40-yard run, the longest of the game, and then passed to Don Carpenter for six points.

## The Statistics

# Pittsburgh Upsets Notre Dame, 22-19, In Thrilling Contest

SOUTH BEND, IND. —(AP)— Pittsburgh's underdog Panthers stunned Notre Dame, a two-touchdown favorite, with a vicious first period clawing and then staved off the furious Irish, 22-19, in a football thriller Saturday.

It was Pitt's first victory over Notre Dame since 1937, following eight straight Irish wins. Notre Dame was eighth ranked in The Associated Press poll.

It was a contest of spectacular plays—a 78-yard touchdown run by Pitt's Billy Reynolds, 63-yard scoring Panther pass play from Rudy Mattiola to Johnny Jacobs, and a 92-yard touchdown punt return by Notre Dame's Joe Heap.

Heap's run midway in the final period put the Irish behind only 20-19, but the deadlock for which Notre Dame was striving collapsed on a point try, first marred by a penalty and then by a bad pass from center.

Even then, a successful conversion wouldn't have helped, because Pitt's Joe Zombek tackled Notre Dame's Ralph Guglielmi in the end zone for a safety with 30 seconds left.

As far as Notre Dame was concerned, the game started with the second half. Fresh from half-time rest, the Irish punctured what had been a iron-ribbed Pitt defense with a 78-yard touchdown drive in seven plays.

Fullback Neil Worden batted 12 yards through Pitt's middle. It was here Mavraides committed the first of his two conversion misses and Pitt, led 13-6.

Midway in the third period, the Panthers struck for their third touchdown, a 48-yard march in seven plays with Mattiola sneaking across from the one-foot line.

Paul Blanda, Pitt's conversion specialist, sent his placement neatly through the uprights for what was a mighty important point. That moved the Panthers in front, 20-6, and the party appeared over for the Irish.

But late in the same brisk quarter, Notre Dame rolled up its sleeves and paraded 75 yards for its second touchdown, Quarterback Guglielmi bucking across from the one-yard stripe.

Just when it seemed all Pitt had to do was waltz out the last period, Blanda punted to Heap on Notre Dame's eight. The Irish back swerved far across the field, picked up a phalanx of blockers and my midfield was home free on a 92-yard touchdown gallop.

## RED RAIDERS UPSET, 20-14

**LUBBOCK—(AP)—Texas Western scored the upset of the year in the Border Conference before 12,000 fans Saturday night whipping heavily favored Texas Tech 20-14 behind the brilliant quarterbacking of Dick Shinaut.**

**Shinaut was the whole show for the underdog Miners, flipping as 18-yard pass to end John Birkhead for the first touchdown and later throwing a 25-yard pass to End Gene Odell for third tally.**

# SMU Smears Missouri By 25 To 7, As Attack Finally Gets To Rolling

COLUMBIA, MO. —(AP)— SMU's Mustangs got their attack rolling for the first time this season and smeared Missouri's erratic Tigers, 25 to 7, Saturday.

An estimated 25,000 fans looked on in perfect football weather as the Southwest Conference Mustangs knocked out two long touchdowns in the second quarter for a 12-0 halftime lead then struck for single scores in each of the last two quarters.

Beaten by two powers in their first two games, Duke and Georgia Tech, SMU was not denied this time. Its offensive heroes were many. Fullback Al Hansen, who made two of the winners' touchdowns, scored first in the second quarter after a drive of 57 yards. The second one of the period came with Roy Pace diving over from the one to climax a 69-yard drive.

When Missouri junked its pet split-T formation for the wide spread passing plays, the Mustangs gave up their only Tiger touchdown.

With Tony Scardino passing expertly, the Tigers cashed in on a 26-yard toss into the end zone to former Army Star Bill Rowekamp.

Except for the Missouri touchdown, which cut SMU's lead to 12-7, the Mustangs were on top and well ahead all the way. With the chips down SMU pushed Missouri back to its one and turned a short Tiger punt into the clinching touchdown.

Hansen scored the third Mustang touchdown from the one-foot line. The last one came in the fourth period, came with Bill Forester cracking across.

The SMU defense, rugged up front and with Bill Orisler playing a great game in the secondary, met the challenge of several Missouri threats and met the test on all except one.

**Missouri Pushed Back**

SMU pushed Missouri back to the six after the Tigers had bulged down to the three late in the second half.

Missouri lost the ball four times on pass interceptions and one of them came deep in SMU territory, another in the end zone. SMU had a big advantage in rushing, picking up 241 yards to 67 for Missouri. The Tigers excelled in air yardage 209 to 101.

Missouri lost its chance of getting the jump early in the game. Ed Merrifield intercepted Duane Nutt's pass on the SMU 49-yard line. Nick Carras and Rowekamp bulled to the 19, where the Tigers took to the air and fizzled.

| | | | | |
|---|---|---|---|---|
| Missouri | 0 | 0 | 7 | 0— 7 |
| SMU | 0 | 12 | 7 | 6—25 |

SMU scoring: Touchdowns—Hansen 2, Pace and Forrester. Conversions—Stollenwerck.

Missouri: Touchdown — Rowekamp. Conversion—Fuchs.

## The Statistics

# Cadets Flash Amazing Life In 37-7 Win

WEST POINT, N. Y. —(AP)— Pete Vann, a sophomore quarterback in the tradition of Army's great football field generals, led the Cadets to an amazing 37-7 victory over Dartmouth Saturday.

This is the highest score run up by Army since the cribbing dismissals riddled the squad before the 1951 season and it was achieved over a Dartmouth team that last week held Penn, 7-0.

The flashing Army offense, looking like Coach Earl Blaik's irresistible teams of a few years ago, was concentrated entirely in the first half and was hightlighted by a 66-yard scoring play, Vann's pass to Fred Attaya. Attaya caught the ball on Dartmouth's 25 and ran the rest of the way.

Dartmouth's single touchdown resulted from a 23-yard pass from Ross Ellis to James Donohue in the third quarter.

Vann scored Army's first touchdown on a dive over the goal, and Lowell Sisson made the next in the first period on a 10-yard pass from Vann In the second quarter Mario Delucia ran 13 yards to tally, and Attaya, in addition to his 66-yard scamper, scored with an 18-yard gallop.

# Uclans Shoot Down Rice Owls, 20-0, With Narleski's Passes

LOS ANGELES —(AP)— Ready Teddy Narleski, who connected with two touchdown strikes, combined with a superb defensive wrecking crew Saturday to shoot down the Rice Owls, 20 to 0.

Tiny Ted, the 155-pound tailback, sent the Pacific Coast Conference Uclans into a 13-0 lead at the half with two touchdown throws, one for 12 yards to End Ernie Stockert, the other for 14 yards to opposite end, Ike Jones.

The win was the fourth straight for the Bruins, and their second over a Southwest Conference invader. Two weeks ago UCLA shut out TCU, 14-0.

A crowd of 30,926 watched the game.

The Bruins took to the air when their ground attack met stone wall resistance from Linebackers Don Rhoden, Leo Rucka and the rest of the Owl line.

**Aerials Collapse**

At the same time, the Owls' vaunted aerial game collapsed in the deadly ball-hawking of the Bruins, who four times staved off touchdowns with interceptions on or behind the goal line.

Third Stringer Primo Villanueva skippered the Bruins to their third touchdown, hitting Jones on an eight-yard scoring pass in the third period.

Narleski sent UCLA on its one long scoring move—72 quick yards in three throws. One traveled 52 yards to Stockert, another to Jones for six and the final 14.

In a duel of linebackers, Donn Moomaw and Terry Debay held their own against Rucka and Rhoden.

Debay and Moomaw set up a scoring chance the first time Rice got the ball. Moomaw blocked a punt by Dave Johnson and Debay recovered on the Owl 21.

Rice held firm but UCLA soon got another chance when two other linemen, Jack Elena and Johnny Peterson, teamed to intercept a Don Drake pass on the Owl 29.

Narleski passed to Jones for five, to Stockert for 10. Ted soon whipped his 12-yard strike to the towering Stockert in the end zone.

In the third, UCLA Center Ira Pauly belted Rice's safety man, Morris Stone, as he attempted to field a punt. The ball flew loose and UCLA recovered on the Texans' 38. Villanueva steered the team over in six plays, the longest a 16-yard pass to Jones.

The Owls got inside the 25- yard line in the closing minutes.

**Statistics**

| | Rice | UCLA |
|---|---|---|
| First downs | 10 | 12 |
| Rushing yardage | 172 | 33 |
| Passing yardage | 14 | 165 |
| Passes attempted | 14 | 20 |
| Passes completed | 2 | 12 |
| Passes intercepted | 5 | 0 |
| Punts | 11 | 12 |
| Punting average | 33 | 36 |
| Fumbles lost | 2 | 1 |
| Yards penalized | 35 | 50 |

# TCU Subdues Trinity Team

SAN ANTONIO — (AP) — TCU's Horned Frogs breezed to a 47-0 victory over ambitious little Trinity University here Saturday night before 8,250 fans even with their ace tailback, Ray McKown, on the bench except for kicking duties.

Playing reserves except for the first period and one play after the second half kickoff, the defending Southwest Conference champions merely toyed with the Gulf Coast Conference entry and won as they pleased.

McKown, the nation's leader in total offense until today, was kept out of the heavy action because of an Army injury, but Sophomore Ronald Clinkscale and Senior Gil Bartosh were able stand-ins at the tailback slot. Clinkscale passed for three touchdowns, in addition to scoring himself on a 65-yard breakaway. Bartosh, alternating between tailback and fullback in the second half, ripped over for three touchdowns.

## Mississippi State Downs North Texas

STATE COLLEGE, MISS.—(AP)—Mississippi State's 220-pound granite man, Joe Fortunato, bored through the line for two touchdowns Saturday to push his flagging Maroons to a 14-0 win over a tough North Texas State football team.

## Houston U. Jars Tulsa, 33 To 7

HOUSTON —(AP)— The University of Houston smashed unbeaten Tulsa, 33-7, Saturday night and used a defense that matched its offense as a touchdown threat to do it.

Two blocked punts and a fumble after a bone jarring tackle staked Houston to three of its five touchdowns and a dead-eye passer, Bobby Clatterbuck, accounted for the others.

Tulsa stayed in the ball game for the first quarter, but Houston made it a rout after that to jump into the favorite's role in the Missouri Valley Conference championship chase.

**COLGATE WINS, 13-7**

HAMILTON, N. Y.—(AP)— Undefeated Colgate's defensive-minded football team picked up two touchdowns on a pair of breaks in the second period Saturday then outlasted Rutgers last-period scoring threat to win, 13-7.

# Carver Wins Over Odessa

Wrapping up their first District 2-AA game, the Carver High School Hornets walloped the Odessa Steers from Blackshear High School, 32 to 6, Friday night at Memorial Stadium.

Coach Johnny Williams' Hornets took an early lead in the initial quarter when Broynee Hudson scooped up a blocked Steer punt and raced 10 yards to paydirt. Coleman booted the pigskin through the uprights for the extra point.

Later in the same period, following a sustained drive, Hornet Herman Pardue plunged over the double stripe from the five. Coleman's conversion attempt failed.

Odessa's lone tally came in the second quarter with Quarterback Hollins bucking the line for six yards to paydirt. An aerial attack had placed the ball in scoring position.

Melvin Upson accounted for two other Hornet touchdowns with a 65-yard gallop and a five-yard off tackle play. Theo Caruthers garnered the other tally on a 20-yard end run.

The Hornets will tangle with San Angelo Friday night in another District 2-AA game at Memorial Stadium.

## Long Syracuse Runs Whip Cornell, 26-6

SYRACUSE, N. Y.—(AP)—Ray Perkins' touchdown dashes of 73 and 78 yards set the pace for a thumping, 26-6, Syracuse football triumph over Cornell Saturday.

His running mate at left halfback Bob Leberman, also hit for two—one on a 54-yard romp and another from the six-yard line.

# American Legion's Entry Sets Major Bowling Loop Pace

The league-leading American Legion won two games from the Reporter-Telegram in the Major Bowling League last week.

Banner Dairies won three from Car-Truck Rental, Willig Engineering Company won two from Houston Hill, Inc., and Midwest Glass & Paint Company won two from Aluma Kraft Awning Company.

T. Wilson of the Aluma Kraft Awning Company team had high game of 233 and also high series of 582.

TEAM STANDINGS

| Team | Won | Lost |
|---|---|---|
| American Legion | 11 | 4 |
| Willig Engineering Co. | 10 | 5 |
| Banner Dairies | 8 | 7 |
| Midwest Glass & Paint Company | 7 | 8 |
| Car Truck Rental | 6 | 9 |
| Houston Hill, Inc. | 6 | 9 |
| Reporter-Telegram | 6 | 9 |
| Aluma Kraft Awning Company | 6 | 9 |

A stunned crowd of 80,345 watched the underdog Buckeyes outplay the Badgers in practically all departments, halting five Wisconsin drives inside the 20-yard line.

# Ohio State Stuns Ranked Wisconsin

COLUMBUS, OHIO —(AP)— Ohio State's once-beaten Bucks hit the heights of gridiron greatness Saturday as they defeated top-ranked Wisconsin, 3-14, and trampled the Badgers' Rose Bowl hopes deep in the cleat-torn sod of Ohio Stadium.

A stunned crowd of 80,345 watched the underdog Buckeyes outplay the Badgers in practically all departments, halting five Wisconsin drives inside the 20-yard line.

Ohio was regarded as the biggest stumbling block in Wisconsin's path to Pasadena and the Bucks proved too big for the visitors to hurdle. The Badgers entered the contest heavy favorites, as the nation's No. 1 team, but the unimpressed Ohioans took charge in the opening minutes and maintained control to win going away.

The Buckeyes left little doubt of their superiority. They marched 88 yards in 12 plays for a touchdown in the first period, 64 yards in six plays for a third-period touchdown and 55 yards in 11 plays for a fourth-period score. They tacked on a 68-yard drive in eight plays late in the game for a field goal to clinch the verdict.

**Buckeye Defense**

Wisconsin went long distances for its scores, moving 39 yards in seven plays in the second period and 70 yards in nine plays in the final quarter for touchdowns.

Despite the fine showing of the Buckeye defensive unit which frustrated the Badgers and provided the astounding upset. Five times the Buckeye defenders took the ball away from the Badgers after the invaders had struck inside the Ohio 20. Three times they took the ball on downs, once on the 12 once on the 17 and once on the 14.

The Badgers' vaunted ground attack was held to 166 yards while Ohio piled up 254. Jim Haluska, Wisconsin's fine sophomore quarterback, completed 18 of 27 passes for 184 yards, while John Barton, Ohio's sophomore signal-caller, completed eight of 12 for 141 yards. Wisconsin had an 18 to 16 on edge in first downs. But scored most in its own territory.

# Georgia Tech Surges Past Tulane To Hold Win String

ATLANTA—(AP)—Payoff surges by air and ground in the waning second and fourth quarters gave Georgia Tech a 14-0 victory over Tulane Saturday. The victory ran Tech's unbeaten streak to 18 games stretching across three seasons.

Tech added lustre to its rating as the nation's fifth best football machine in The Associated Press poll by counting on a pass from Bill Brigman to giant end Buck Martin with 57 seconds remaining in the first half. The precision-polished Yellowjackets then struck for a score via the ground with 41 seconds left in the game when reserve Fullback Jimmy Johnson bulled across from the two.

Pepper Rodgers added both extra points.

Maturing swiftly as a T-master, sophomore Quarterback Brigman took to the air brilliantly in the second quarter after a stout Tulane defense, stymied Tech's heralded running game.

The cool youngster found the lanky Martin alone at the Tulane five and hit him with a 39-yard pitch to send Tech ahead just before the half-time signal. In a series of downs just prior to the game's first score he passed successfully to Martin three straight times through a porous Tulane air defense.

In the fourth quarter, after Tulane gambled and lost on a fourth down bid for more time at its 27, Tech pounced on the opportunity and moved quickly to a score in seven plays. A 10-yard pass was the longest gain.

Tech's passing patterns, far more deceptive than those employed by Tulane, proved the difference—with a big assist from a tigerish Tech defensive line, which has done much to keep their legions unbeaten since November 1950.

# Bulldogs Jarred By Fired-Up Bobcats But Win, 24-12

## Bruising Michigan State Turns Back Texas Aggie Team

EAST LANSING, MICH. —(AP)— Michigan State added a sparkling pass attack to its bruisingly effective running game to overpower Texas A&M, 48 to 6, here Saturday for the eighteenth straight win by the Spartans.

A stadium crowd of 49,123 and a nation-wide television audience saw Michitgan State power to a 21-6 lead at the half and add four more touchdowns in the final quarter.

The game did not go as expected in that the only Texas A&M score, in the second period, came on a running play instead of a pass. Ray Graves, the Texas quarterback, was tossing passes from 16 yards out by cutting around end when the MS defenders ganged up on his receivers.

**Yewcic Connects**

Michigan State Quarterback Tom Yewcic carried off the passing honors with his most sensational throw —a pitch to End Ellis Duckett that carried 81 yards for a score.

Although the aerials added spice and variety, the running game was the bread and butter of the Michigan State attack. Michigan State powered 99 yards and a few odd feet in 14 plays for the first touchdown in the opening period.

An even dozen plays carried 74 yards for the second MS score after Graves pulled a cross-up by running for a touchdown instead of passing.

Pony Backs Leroy Bolden and Billy Wells did most of the carrying and Bolden scored around end from three yards out.

In the closing seconds of the half, Yewcic tossed the longest throw from behind his own 20 to Duckett, who outraced two defenders, caught it on his own 40 and scored standing up.

**Thrower Throws 'Em**

After a lull in the scoreless third period, Michigan State went on a wild spree to add four more touchdowns in the final quarter. In the final hectic two minutes, Willie Thrower, a reserve quarterback, hit two eager sophomore backs for touchdowns. Michigan State outpassed Texas A&M, 309 yards to 129 and outrushed the Aggies 283 yards to 72.

Yewcic, on his own 46, started the fun by looping one to Duckett on the Texas A&M 30. Duckett followed the well-worn path to the goal line.

A fumble recovered in midfield set up another score with Bolden breaking away for 25 yards of the distance. Evan Slonac went over from the two.

Thrower, the passer with the apt name, and a herd of third-string backs took over in the closing minutes. Thrower hit two of the sophomore reserves for touchdowns, one carrying 19 yards to Bert Zagers and the other from behind the 11-yard line to Bernie Raterink.

**Strike 66 Yards**

The bench warmers went 66 yards in 11 plays for their first score. The final tally came with one second left to go after a fumble gave the eager Spartans the ball. Only three plays were needed to go 33 yards.

The 13-7 Princeton setback by Pennsylvania after 24 straight wins gave Michigan State with its 18 wins in a row without a tie, the longest existing streak in present day big college football.

## Wildcats Win Over Marfans

MARFA — The Wink Wildcats chewed up the Marfa Shorthorns here Friday night in a touchdown rampage that ended by the lopsided margin of 59-20.

The raging Wildcats dynamited the Shorthorn defense three times in the first quarter for TD's, made by Timmy White, Kenneth Vinson, and Dan Villaral. Dale Dodd made two points after, and Tommy DeWitt missed one.

In the second stanza, Barna Richards tallied for Wink on a pass from Vinson. Villaral added another marker on a Vinson aerial. Both kicks failed.

In the third quarter, Dinson continued the violent assault on the crumblin Marfa defense with a 51 yard sally for a score. Dodd converted. Not to be outdone, Richards unwound an 80 yard ramble for another Wink TD. The attempted point after failed. Ralph Turner ended the Wildcat scoring spree on an intercepted Marfa pass good for 40 yards and a tally. Vinson converted.

George Dutchoved recovered a Wink fumble in the third quarter for the initial Marfa tally. The kick failed. In the fourth stanza, Sam Jimentz went 10 yards for another Shorthorn TD. Larry Pippen converted.

Warren Johnson added Marfa's last touchdown in the final period, and Pippen kicked the extra point.

## Denver City Gives Tulia 57-7 Lesson

DENVER CITY—Denver City's innocent little school boys grew up to full-fledged professors of the art of football when they dumped the Tulia Hornets, 57-7, here Friday night.

The Mustangs exploded in the first quarter and went boom, boom, boom, with Jackie Luton pulling the trigger each time.

Charles Lenamond invaded the Hornet's end zone twice, John Dale Curtis took a pass from Richard Souter for a total of 63 yards and David Brooks picked up one touchdown.

Tulia's lone tally came with Duane Luke going over from the five-yard line, and kicking the extra point.

## Fred Hogan Leads 23-Player Field In Billiard Meet

Fred Hogan led a 23-man field with three wins and no losses at the end of the first week's play in the Fall three-cushion Billiard Tournament underway at the Recreation Club here. James Hill was close on Hogan's heels with four wins and one loss.

Fifty-four games were played during the week. Play in the tournament will continue, beginning Monday.

Win and loss standings Saturday were: Hogan 3-0; Hill 4-1; Davis 2-1; Oliver 3-2; Jackson 1-1; Collins 2-2; Hanlon 3-3; Jones 8-6; McCrary 7-5; Sabath 2-3.

Dansby 5-4; Prince 3-5; Thompson 6-3; Hackney 1-3; Whatley 3-6; Ricker 1-2; Cowden 0-4; Neisal 0-3; White 0-0; Flood 0-0; Stallings 0-0; Walker 0-0; McGarr 0-0.

## David Crockett Wins

David Crockett bested DeZavala, 30-12, and Sam Houston's Bluejays topped West Elementary, 12-0, in Friday afternoon gridiron competition.

In kickball games Crockett won, 28-7, while Sam Houston and West Elementary tied, 17-17.

Next Friday at 2:30 p.m. Sam Houston will meet DeZavala and Crockett will play Terminal.

## San Angelo Kittens Pummel Red Devils For 14-6 Triumph

RANKIN—By a score of 14-6, the San Angelo Kittens scratched the Rankin Red Devils in a football game here Friday night.

A 65-yard gallop by Johnny Poiner gave the Kittens a touchdown in the initial quarter. Larry Abbott made the extra point.

Jimmy Yocham of the Red Devils struck pay dirt in the second quarter, when he returned a punt 50 yards for a touchdown. The conversion try was unsuccessful.

In the third quarter, after a sustained drive, Joe Mills pushed across the double stripes from the one yard marker to place the Kittens in the lead, 13-6. Abbott's kick was good to make the score, 14-6.

West Virginia University football players believe Jack Rabbits, a halfback, is the fastest man on the squad.

## Alpine Bucks Bury Stockton's Panthers In Touchdown Flurry

ALPINE—An invincible forward wall and a polished running assault clicked here Friday night for the Alpine Bucks as they buried the Fort Stockton Panthers in a touchdown flurry that ended 27-0.

The first period was deadlocked. In the second stanza, starting with a recovered Panther fumble on their own 40, the Bucks rolled to the 3-yard line. Marlin (Cowboy) Robinson scored from there. Point after failed. A blocked Panther kick set up another TD drive in the same quarter for the Bucks. Jack Richardson hauled it across from the 2, and Robinson converted.

After an exchange of punts in the third period, the Bucks worked the pigskin to the Panther 1-yard line, where Lee Matt Smith carried it over. Robinson made the extra point.

Fort Stockton threatened in the final quarter, moving to the Alpine 5-yard stripe, but a fumble recovered by the Bucks spoiled the effort.

Alpine sailed down the field again in the fourth quarter on a series of thrusts through the Panther line. Smith capped the drive for the final Buck rally, and Robinson again converted to end the contest 27-0, Alpine.

## South Elementary Drops Longhorns

A powerful South Elementary Wildcat eleven, engineered by Quarterback Henry Hardaway, marched through the Lamar Longhorns Friday afternoon for their third straight victory, 18-0.

It was the first loss of the season for the Longhorns dropping them from the undefeated ranks.

Don Boyce raced around end from the 35 yards stripe for the first Wildcat TD, and added another in the first half from the four. In the third quarter, he flashed 35 yards for the final South tally.

Fumbles plagued the Lamar team. Expert blocking by the Wildcats aided in the downfall of the Longhorns.

Henry Hardaway, Wildcat speedster left the game in the fourth quarter with a torn ligament in his knee.

## Amarillo Suffers Fourth Loss, 13-7

AMARILLO—Dropping its fourth straight game, Amarillo was defeated, 13-7, by the Pampa Harvesters in a District 1-AAAA game Friday night.

Robert Frazer intercepted a Pampa pass in the second quarter and ran it over for Amarillo's lone tally. Louie Flore's kick was good for the extra point.

The Harvesters went crazy in the fourth quarter, doing all their scoring for the game.

A crowd of 14,000 fans saw the game.

Jack Riester, Navy end from Auburn, N. Y., won numerals as a member of the St. Bonaventure freshman eleven in 1949.

## Abilene Drives For Funds To Retain WT-NM Franchise

**ABILENE—(AP)—A drive is on here to raise sufficient funds to keep the West Texas-New Mexico League franchise in Abilene.**

**Mack Epien and Dr. Jimmy Bridges, who own the club, have given a group of Abilene businessmen interested in buying the franchise until next Wednesday to raise the money. Epien said he must report his decision to the league official October 18 and that if the local drive was unsuccessful he would try to sell the franchise to outside interests.**

**The proposals were made. One is to raise $30,000 to buy the assets of the club except the land on which the park is located. The other is to raise $50,000, which would include the purchase price of the land. Under each proposal an additional $30,000 operating fund will be necessary.**

## 74-Yard Touchdown Pass Brings Lubbock Triumph

LUBBOCK—A bullet-like pass from Quarterback Jimmy Haynie to Co-Captain End Mike Brady, accounted for 74 yards and a touchdown to give the Lubbock Westerners a 7-0 District 1-AAAA triumph over the Odessa Bronchos.

The aerial onslaught connected in the first three minutes of play and while the Westerners romped up and down the field for the remaining 46 minutes, they were never able to muster enough power to reach the end zone.

The Bronchos were playing without the services of first-string Quarterback Carl Schlemeyer, sidelined with an injury, which may have attributed to Odessa's failure to gain ground.

The victory was the Westerners 17th straight, which ties the number of games ever won in a row by a Westerner eleven.

In the state quarterfinals in 1950, Lubbock was defeated by Wichita Falls.

While the 20,000 fans had settled back for a lopsided runaway, it did not materialize.

It was no go as far as points were concerned in the first half, but the Westerners drove to the Odessa 34, 25, 2, 29 and 45.

The Odessa line, paced by 195-pound tackle Edmon Gray and the Broncho secondary, sparked by Left Half Dale Sherrod, fought the favored Westerners off each time they threatened.

The best the Bronchos could do from an offensive standpoint in the first half was to reach the Lubbock 49 on an 18-yard pass from Wineburg to End John Held.

The second half was a repeat performance of the first, with the exception of the touchdown.

## Future Bulldogs

**FRIDAY'S RESULTS**

South Elementary 18, Lamar Elementary 0.

Sam Houston 12, West Elementary 0.

North Elementary 32, Terminal 0.

Crockett 36, DeZavala 6.

**TEAM STANDINGS**

| Team | W. | L. | Pct. |
|---|---|---|---|
| South Elementary | 3 | 0 | 1.000 |
| Sam Houston | 3 | 0 | 1.000 |
| Lamar Elementary | 2 | 1 | .667 |
| North Elementary | 2 | 1 | .667 |
| West Elementary | 1 | 2 | .333 |
| Crockett Elementary | 1 | 2 | .333 |
| DeZavala | 0 | 3 | .000 |
| Terminal | 0 | 3 | .000 |

## North Elementary Defeats Terminal

An improved North Elementary team continued on the winning trail Friday afternoon, submerging Terminal, 30-6.

It was the second victory for the North eleven, against one initial loss in their first game to Sam Houston. For Terminal, it was their third straight defeat, with no wins.

Richard Dorman paced the North aggregation, personally accounting for four TD's. Dick Jorgensen made the other tally for North.

Capable blocking by Mike Scobey, John Harris, Pat Powell, Charles Giesey, and Wade Parks helped to turn the tide in the North's favor on their offensive marches.

Vern Benson, who has been playing some third base for the St. Louis Cardinals, broke into the majors with the Philadelphia Athletics in 1943.

## Three Teams Tied For Lead Position In Women's Kegling

Three teams are tied for top position with 10 games won and five dropped in the Women's Bowling League.

They are Troy Cleaners, Neely Agency and Schlitz.

Kruger Jewelry is in second position with nine wins and six losses.

Team No. 4 and Miller's High Life are in third place with seven wins and eight losses.

Midland Office Machine Company and House of Beauty are in fourth place with six wins and nine losses.

In fifth place are Terminal Airway Cash Grocery and I. W. Hynd Company with five wins and 10 losses.

In games this week, Neely Agency took three from Midland Office Machines Company. Team No. 4 took two from House of Beauty, Schlitz took two of three games from Troy Cleaners, Miller High Life took three from I. W. Hynd Company and Kruger Jewelry took two of three from Terminal Airway Cash Grocery.

Schlitz had high game with 580 and high series with 1,712. J. Clark had high individual game with 205 and high individual series with 516.

## Seminole Wins, 6-0, Over Brownfield Club

SEMINOLE—In a largely defensive football game here Friday night, the Seminole Indians won, 6-0, over Brownfield.

Fullback Jackie Sparks made the Indian score in about the middle of the second quarter in an off tackle play.

**NM CHAMPS UPSET**

ALAMOSA, COLO. —(AP)— Adams State upset Eastern New Mexico, defending New Mexico Conference football champions, 19-12, Saturday.

## Stanton Buffaloes Reverse Losing Ways, Pick Up Trio

STANTON—Turning of the long, hapless trail of no touchdowns has been found by Coach Red Read and his Stanton Buffaloes of District 4-A, if the first three games of the 1952 season are an indication.

Currently, the Bisons have three wins and one defeat, and have yet to open conference play. Last Friday they had an open date, but they will challenge the Midland B team on October 17.

The Bisons have won over Big Spring B and the Grandfalls Cowboys, defeated Crosbyton, 13-7, and dropped a close one to Coahoma.

It was a different story in 1951 as the Buffs failed to win a game and scored less than 30 points throughout the season. They bettered this mark in the first game of the current season.

Running from a straight T, Read has Leroy (Scooter) Polk, 165-pounder at fullback and lanky Eldon Hopkins, who boasts a good throwing arm at quarterback.

Looming already as a major source of trouble for the Buffs are injuries. Johncal Woody, capable left end, suffered a knee injury against Grandfalls, and, while he has been playing and working out, his future is somewhat in doubt.

During a recent scrimmage session, Speedy conrad McKaskle, a third-year man at halfback, suffered a leg injury and will be out for several weeks.

Ronnie Gilbreath, a quarterback, was shifted into the halfback slot for the Crosbyton game. Norman Blocker, another junior, was at the other halfback position.

Maxie Davie, guard, had led the line play of the Buffs this year. Richard Lewis also has sparked the play up front at a guard position.

Every indication points to a much better berth than the cellar, which the Buffs rested last year.

## Stubborn Angeloans Throw Scare Into Surprised Foe

By COPE ROUTH

SAN ANGELO—The Midland High School Bulldogs pushed their way past the stubborn Bobcats of San Angelo High School here Friday night to make a successful 24-12 debut in the District 1-AAAA championship gridiron race.

It wasn't easy, though.

The fired-up Bobcats, who had been trampled on three times this season, kept the Bulldog's highly-regarded attack bottled up except for four quick explosions.

And they stalked behind within easy striking distance until the closing seconds of the game played before a comparatively small crowd of some 2,000 Midland and San Angelo fans.

Even little Jesse Hatfield, the Bulldog's sensational scatback, was throttled after an opening and exciting run.

But Hatfield, his running halted, cocked back his arm and tossed two touchdown passes which put the Bulldogs into the lead which they never relinquished.

The game opened in traditional Midland fashion.

**Hatfield Zips 48**

On the second play after the kickoff, Hatfield twisted through a hole in right tackle and zipped 48 yards downfield before he was finally overtaken on the San Angelo 27-yard line.

Two plays later, he lofted an aerial to End Bill Mims, who outstretched two Bobcats defenders, gathered in the ball and romped 10 more yards to the goal line.

For the remainder of the quarter, the spotlight was on San Angelo as the Bobcats, heartened by a 57-yard kickoff return by Stuart Vaughn, drove to the Midland nine-yard line before losing the ball on a fumble.

Dick Spencer and Roy Kimsey took turns in carrying the ball as the Bulldogs tried to drive back and they picked up two first downs on end runs.

But the drive finally stalled near midfield and San Angelo took over. Midway in the second quarter, the Bulldogs struck again as they reverted to the form which had gained them 149 points in three games.

Russell Rutledge started it off by slipping through left tackle and going 34 yards to the Bobcat 20-yard line.

After a penalty set the Bulldogs back to the 35, Hatfield shot a quick pass to Robert Keisling 10 yards downfield. As he was tackled, Keisling lateralled off to Spencer who sprinted the remaining distance to the goal line.

**Davis Goes Over**

Midland's third touchdown came three minutes later when Paul Davis, Midland's rangy end, intercepted Jimmy Clatterbuck's pass on the San Angelo 27-yard line and returned it for a touchdown.

Trailing 0-18, the Bobcats came fighting back in the third quarter.

Lon Slaughter and Vaughn teamed to pick up yardage around the ends and through tackles and it looked like they couldn't be stopped.

And, temporarily, they couldn't.

After they had worked their way to the Midland 35-yard line, with the help of a 15-yard penalty, Bobby Joe Walker, the sharpshooting Bobcat quarterback, faded back to throw a pass.

But, instead, he handed the ball off to Slaughter, who raced around the left side of his line and went all the way to score.

Early in the fourth quarter, the Bulldogs almost struck again.

On the second play after the quarter opened, Keisling took the ball on an end around and raced 57 yards downfield before being knocked out of bounds on the 16.

And there the Bulldog attack stalled again.

Backed to their goal line, the Bobcats punted but Midland was penalized 15-yard for roughing the kicker and San Angelo was off to another touchdown.

Slaughter, taking a pass from Clatterbuck ate up a 35-yard chunk of the distance. Two more passes carried them on down to the Midland 14-yard line.

**Slaughter Crashes**

After a penalty had pushed the ball on down to the one-yard line, Slaughter crashed over the middle for the touchdown and trimmed Midland's lead to 18-12.

With the Bobcats looming more dangerous then ever, Coach Tugboat Jones sent Larry Friday in for a field goal attempt five minutes before the end of the game.

Kicking from the 28-yard line, Friday booted it high and far but it missed the uprights by only a foot or so, just as had his other conversion attempts.

But it didn't matter too much.

A few seconds later, Ronald Jon intercepted one of Clatterbuck's passes and was downed on the San Angelo 12-yard line. On the next play, Rutledge slashed off tackle to go the remaining distance to the goal line.

### Game At Glance

| | Midland | San Angelo |
|---|---|---|
| First downs | 11 | 12 |
| Yards gained rushing | 304 | 119 |
| Yards lost rushing | 21 | 23 |

## Abilene Slips By Bulldogs

ABILENE—A stalwart crew of Eagles from Abilene sneaked by the Borger Bulldogs here Friday night with a slender one-point victory, 13-12.

The tilt was the initial District 1-AAAA fracas for both elevens.

At mid-point of the first quarter, Fullback Fred Welch of Abilene knifed through tackle and went 55 yards for a tally. Hal McGlothlin converted for the point after that provided the margin of Abilene's triumph.

In the second period, Eddie Wade of Borger rammed through center from the three for a tally, ending a 53-yard drive. A fumble spoiled the extra point try.

Abilene widened the gap in the third stanza with Welch hauling the pigskin across the goal line after a 53-yard drive. The point after try was wide.

Borger made a desperate attempt to come back in the fourth quarter. J. D. Wisenhunt plunged over from the four, topping a 61yard drive. But Ward's attempt to kont the score on the point after failed.

## Fighting Lamesa Down Determined Riverside, 14-7

LAMESA — A fighting Lamesa eleven exhibited the will to win here Friday night, shoving aside a determined Amon Carter Riverside of Fort Worth team in the fourth quarter to win 14-7.

In the second quarter, Quarterback Johnny Jones of Lamesa circled end from the 1 2-yard line for the initial tally. Leland Bartlett converted, putting Lamesa ahead 7-0. Riverside stormed back in the third quarter to make it a new game on a reverse play good for a TD from the Lamesa 15 by Right Halfback Neil Puxley. Fullback Boyd Dollar tie it up on his extra point.

But it didn't stay that way. In the fourth stanza, Jones legged the pigskin across from the three on a bootleg play for Lamesa's winning TD. Bartlett again converted.

## Barstow Ekes Out Close One, 24-20

BARSTOW—In a tight, 24-20, decision, the Barstow Bears dropped Marathon in the last three minutes of play here Friday night.

Marathon took a quick lead in the first half, but the Bears came lumbering back and turned the tide to victory.

## Princeton Win Streak Ends As Pennsylvanians Triumph

PRINCETON, N. J. —(AP)— The bulldozer rushes of Joe Varaitis and the pass-snatching wizardy of the Penn defense shattered football's longest winning streak Saturday as Pennsylvania defeated Princeton, 13 to 7.

Princeton had run up a string of 24 straight victories since losing to Cornell Oct. 22, 1949. But without the men like Dick Kazmier who made that string possible, the Tiger offense sputtered and stalled when it got within scoring range Saturday.

George Boessler, the No. 1 magician of the amazing Penn defense, snatched three Princeton passes and two of them were converted into touchdowns. Ed Surmiak and Noel Schmidt each grabbed one and once Princeton fumbled away a scoring chance.

But the defense wouldn't have meant so much if Varaitis, a hard-driving 205-pound fullback, hadn't pulverized the Princeton line early in the second quarter to gain the lead.

Penn scored again, on a 46-yard pass from Walt Hynoski to Jack Moses and Princeton matched the score on a heave from Dick Unger to Frank McPhee, but that first touchdown was the ball game.

Once they were behind, the Tigers had to gamble for their scores against the sturdy Quaker defense which smashed the Princeton ground game, and it was a losing gamble.

Princeton threatened a half-dozen times after Penn had completed it's scoring, and only one threat produced a touchdown.

## Three Teams Tied For Lead In Petroleum Bowling Loop

Three teams — West End Magnolia, Superior Oil Company, and West Texas Reproduction Company —are tied for first place in the Petroleum Bowling League with 12 wins and three losses.

Union Oil Company is in second place with 10 wins and five losses.

Al Boring Drafting Service and Standard Oil of Texas are tied for third place with nine wins and six losses.

Four teams are tied for fourth place with eight wins and seven losses. They are: Axelson Manufacturing Company, Midland Geophysical Company, State Exploration Company and Tex Harvey Oil Company.

Honolulu Oil Company and Tide Water Oil Company are tied for fifth place with seven wins and eight losses.

Five teams are battling it out for sixth place with six wins and nine losses. They are Rotary Engineers, Phillips 66, Core Laboratories, American Trading & Production and Sohio Petroleum Company.

Stuart's Photo Shop are in seventh place with four wins and 11 losses. Ohio Oil Company and Seaboard Oil Company are tied for eighth place with three wins and 12 losses.

Results of last week's games follow: Tex Harvey won two and lost one to Midland Geophysical, Union Oil won three over Phillips 66, West Texas Reproduction won three games over Rotary Engineers, Standard Oil won three over Axelson Manufacturing Company, Tide Water Oil won three from Honolulu Oil, West End Magnolia won three from Ohio Oil, Al Boring Drafting Service won three from Seaboard Oil, Sohio Petroleum won two and lost one to American Trading, State Exploration won two and lost one to Core Laboratories.

Al Boring Drafting Service had high team series of 2,807 and high game of 968. K. Johnson had a 598 for individual high series, and K. Baker had high game of 228.

# Big Schoolboy Grid Guns Smash Foes

By BRUCE HENDERSON
Associated Press Staff Writer—

The way the big four of Class AAAA high school football act you'd think they own the place.

It wasn't just that Lubbock, Baytown, Ray of Corpus Christi and Wichita Falls smashed all opposition Friday night. How those powers of AAAA went about staying in the undefeated-untied ranks without apparent effort was the interesting thing.

All but defending champion Lubbock polished off their opponents by overwhelming margins. Lubbock apparently had decided in advance against any unnecessary effort in whipping once-beaten but highly-regarded Odessa, 7-0, in a conference opener.

Lubbock simply scored the first time it got the ball and let things go at that, dangling Odessa outside the Lubbock 41-yard line the rest of the night.

**Touchdowns Galore**

But the other three evidently liked the touchdown practice. Baytown's powerhouse rolled over San Jacinto of Houston, 40-7, Ray smashed Laredo, 54-13, in another conference game, and Wichita Falls blanked AAA Denison, 32-0.

It was a big night out in District 1 of AAAA. All four games, including the Lubbock-Odessa event, were conference affairs. In the others, unbeaten Pampa stayed that way by beating Amarillo, 13-7, Midland, also undefeated, downed San Angelo, 24-12, and Abilene edged out Borger, 13-12.

In other top contests involving AAAA teams, an always-to-be-reckoned-with Highland Park (Dallas) eleven spoiled North Dallas' unbeaten record, 27-0, and AAA Lamesa rose up to down previously unbeaten Amon Carter-Riverside of Fort Worth, 14-7.

**Temple Rolls On**

Class AAA has its strong boys too, and they were acting just as high and mighty.

Temple flattened another AAAA team. This time the score was 46-14 over Arlington Heights of Fort Worth. It was Temple's fifth straight triumph and, as usual, it came on Doyble Traylor's appallingly accurate passing. Traylor passed for four touchdowns.

Meanwhile, defending AAA Champion Breckenridge was whipping Austin of El Paso, 37-14, and another possible AAA contender, Brownwood, knocked off Big Spring, 33-21.

Corsicana pushed Paris out of the AAA undefeated ranks, 21-20, and down in the Rio Grande Valley unbeaten McAllen got scored on but still remained undefeated in whipping Harlingen 53-13 in a conference game. In a neck-and-neck thriller involving two unbeaten AAA teams Alice nosed out Edenburg, 34-33, in another District 8 conference contest.

**Arlington Goes Down**

Defending AA Champion Arlington finaly got whipped this season—by Weather, an AAA outfit. The score was 13-7.

In top AA matches between undefeated teams Dumas outscored Littlefield, 33-0, and Huntsville smashed Mexia, 28-2.

Floydada, unbeaten AA team, blasted previously beaten Lockney of Class A, 32-0.

Wink whipped Marfa, 54-20, in a Class A conference game and AA Pecos blasted Ozona of Class A, 43-0. Alpine whipped Fort Stockton, 27-0, in another A conference contest.

Defending Class A Champion Giddings was idle this week.

## ARMY DRAFTS FROG CAGER

**FORT WORTH**—(AP)— **The only regular from last year's Texas Christian University Southwest Conference basketball team due to return won't make it.**

**Bryan Kilpatrick, veteran Horned Frog guard, has been drafted into the Army.**

**"We'll have a brand new group out here this Winter," commented Coach Buster Brannon.**

# Brownwood Beats Steers

BROWNWOOD—An enterprising crew of Brownwood Lions snatched a 20-0 half-time lead from the Big Spring Steers here Friday night, and then staved off a Big Spring rally to gain the triumph, 33-21.

The initial tally for the Lions came in the first quarter when Ray Masters slithered through left guard from the 17 for a TD. Leondus Fry converted. In the same period, Masters raced through center for 64 yards and another tally. The extra point try failed. A ramble from the 10-yard stripe by Masters in the second stanza made another TD. Fry converted.

**Big Spring revived in the third** quarter on a long pass from quarterback Bobby Hayworth on the Steer 11 to Raymond Gilstrap on the Lion 40. Gilstrap went the distance, and Don Richardson converted for Big Spring.

**Pass Pays Off**

Then Fry widened the margin for the Lions on a payoff pass to Don Earp for 44 yards and a marker. The point after try was no good.

Masters fought his way through right guard in the fourth quarter from the 5-yard stripe for another tally for the Lions, based on a recovered Steer fumble. Fry's kick for the point after was good.

Big Spring scored again on a 25 yard toss from Hayworth to Gilstrap. Richardson's kick was good. Their final tally came on a Hayworth plunge from the 14. Richardson converted to end the scoring.

# Cranes Fly By Big Lake

CRANE—The Golden Cranes outflew the Big Lake Owls here Friday night, winging in on a scant one-point margin, 14-13.

Crane fought its way from behind twice to win the game.

The Owls snatched an early lead in the first quarter on a 35-yard jaunt by Jackie Holmes, good for a TD. Holmes' conversion was good, giving Big Lake a 7-0 lead.

Crane wasted little time in making it a tie ball game. An 18-yard heave from Blackie Russell to Charles Lively brought the first Golden Crane tally in the second period. Lively kicked the extra point to knot the score.

In the same period, the Owls surged ahead a second time on a center plunge by Jerry Thompson from the six-yard stripe. Jackie Holmes missed the all-important point after attempt for Big Lake.

The Golden Cranes wrapped up the pigskin tilt in the third quarter on a two-yard surge through center by Russell. The crowd waited breathlessly for Lively's conversion. It was good, and Crane triumphed.

Big Lake gained more yards rushing than Crane, 212 to 169, but the Golden Cranes completed six passes out of nine for 62 yards against one out of four by the Owls for 32 yards. Each team made eight first downs.

# Monahans Beats Levelland, 47-6, In Runaway Game

MONAHANS—The Monahans Lobos humilated the Levelland Lobos, 47-6, in a non-district game here Friday night.

Monahans scored early with Ray Yeates galloping from the 26-yard line to pay dirt, climaxing a 43-yard drive. Ken Reamy added the extra point to make it 7-0.

Other Monahans scores came with Reamey taking the pigskin across from the two; Charlie Locke on four center smashes from the 12; a 76-yard gallop by Yeates; Locke again on a four yard buck; Dave Hughes from the two yard marker after intercepting a Levelland pass; and Bobby Greenlee on an eight-yard dash.

Levelland's lone tally came when Quarterback Dock Sewell passed to Larry Bishop, who went 56 yards for the score. Bishop failed to run over the extra point.

Syracuse University, in 58 games under Coach Floyd (Ben) Schwarzwalder, never has played a tie.

# Iraan Braves Take One-Sided Victory From McCamey Club

McCAMEY—The Iraan Braves went hunting here Friday night, and came off the gridiron with the pelts of the McCamey Badgers, in a one-sided tilt that gave the Braves a 32-7 triumph.

The first Iraan score came in the opening quarter when Neil Sconniers danced through the middle of the line from the 10-yard stripe. The extra point try failed.

In the second period, Locker tallied for the Braves on a 30-yard ramble after a handoff from Belcher. Again the conversion failed.

The solitary Badger TD came late in the second stanza on a quarterback sneak from the one by Jones. Bryant kicked the point after.

A McCamey fumble, recovered by Belcher, set up another Brave tally. Monroe took a handoff from Belcher and eluded Badger tacklers to go 40 yards for the TD. The conversion attempt was good.

In the opening play of the final period, Locker shook loose for 86 yards and the closing Iraan marker. The point after was made.

**TEXAS HARRIERS BEST**

DALLAS —(AP)— Texas Harriers bested North Texas State and SMU, in that order, in a triangular cross-country meet run over a 2.6-mile course here Friday.

# Big Maryland Surge Soaks Georgia

ATHENS, GA. —(AP)— A dose of pure split-T poison concocted by Jack Scarbath and Chet Hanulak, the deception masters of Maryland, broke apart Georgia defenses Saturday and gave the Terrapins their sixteenth consecutive football victory, 37-0.

The nationally fourth - ranked Marylanders were expected to win, but the mighty surge they put on against a better-than-average Georgia eleven was a true surprise. The game was supposed to go to Maryland by a touchdown not by any such score as this. Earlier this season against Missouri and Auburn, Maryland misfired, spluttered and barely won. Last week the Terps got going with strength against Clemson. Saturday they were devastating.

While Hanulak, Scarbath, Ralph Felton, Dick Bielski and Ed Fullerton ably took care of offensive chores, Maryland's defensive team did a job on unbeaten Georgia that no team was expected to do.

Until this game, Georgia's great passing by Zeke Bratkowski and running by four good backs made up a fine, well rounded offense. Maryland hardly let that offense see daylight. And Georgia fans in the crowd of 35,000 hardly found anything worth paying $4.30 to see.

Georgia was in the game for a quarter, but in the second Georgia practically was rocked out of the stadium.

Scarbath and Hanulak went to work, as if their power was turned on suddenly by Coach Jam Tatum. The Terrapins got the ball on the Maryland 36 and away they went. Scarbath ran, Scarbath passed, he faked, pitched out, handed off. Hanulak caught a couple of passes, ran, played the decoy.

And, Hanulak was right where he should have been when he was needed the most. With eight yards to go for a touchdown Scarbath ran right end. He was boxed up but pitched out to Hanulak who scored. Don Decker kicked the first of four conversions.

**AGGIE FROSH WIN**

WACO —(AP)— Bill Nickelson kicked the extra points as Texas A&M nosed out Baylor, 21-20 in a Southwest Conference freshman football game here Friday night.

The first Handsome Dan, Yale's bulldog mascot, had a 10-year reign beginning in 1890.

# Low Amateur In Texas PGA To Join Pro-Opposing Team

DALLAS —(AP)— The low amateur in the Texas PGA Open golf tournament at Galveston will be picked on the amateur squad that plays the professionals here October 18-19 in the Texas Cup Matches.

David (Spec) Goldman, non-playing captain of the amateur squad, made this announcement Saturday with the explanation: "We think so highly of the Texas PGA Tournament that we want any amateur who plays in it and rates up with the pros to be on our squad."

Johnny Foster, Fort Worth amateur, was fourth in the Texas PGA through the second round with a score of 140. Five amateurs were in the top 12.

If the low amateur of the Texas PGA already is on the 16-man amateur squad, then no amateur will be picked from the Galveston tournament.

The pros will take their low scorers to make up their team for the cup matches. Fred Hawkins, Jack Harden, and Jimmie Demaret, three of the touring pros, are expected to be on the team. Byron Nelson withdrew from the PGA Friday when he scored too high but he already is on the pro team for the cup matches.

# Price Daniel Plans New Approach In Texas' Campaign For Tidelands

By DAVE CHEAVENS

AUSTIN —(AP)— Texans who refuse to admit the Federal government finally has won the argument over control of the Tidelands will take up the fight all over again when Congress convenes in January.

One of them is Attorney General Price Daniel, Texas' aggressive Tidelands-minded new junior senator, who already is working on two bills designed to nail the question down once and for all—in Texas' favor.

Daniel has not been elected yet, but that's a formality. He is unopposed on the general election ballot.

U. S. Supreme Court decisions in suits against California, Texas and Louisiana, asserting the doctrine of paramount federal rights, and President Truman's veto of legislation passed by the last Congress restoring clear title to the states, have become one of the chief issues in the presidential campaign in Texas.

**Stevenson Repudiated**

Gov. Allan Shivers, former National Democratic Committeeman Wright Morrow and others have given the Tidelands stand of Truman and Gov. Adlai Stevenson as one of their main reasons for repudiating the Democratic nominee and their decision to back Dwight D. Eisenhower.

Daniel also has said he could not vote for Stevenson because the Democratic nominee has indicated he could not agree with Texas' Tidelands claim. But Daniel has not yet said flatly he would vote for Eisenhower.

He will try a new two-way approach:

1. He will join other senators in re-introducing a general bill confirming ownership of submerged lands to all 48 states.

2. He will offer another measure with the sole objective of confirming the agreement under which the sole objective of confirming the agreement under which Texas was annexed. It would, among other things, restore all submerged lands within the original boundaries of the Republic of Texas to the State of Texas.

Daniel told The Associated Press that all previous efforts to obtain quitclaim legislation had concentrated on a general bill on the theory that help of all the states would be needed to get it through.

Such a measure was passed by the last Congress and vetoed by President Truman.

"I agree that's a good plan but I think we need a special bill for Texas in view of the obvious threat to other provisions in the annexation agreement posed by this federal attitude," Daniel said.

He mentioned such matters as the state's right to subdivide itself into several states—if it should ever want to—and boundaries.

"Not only that," Daniel said, "but titles and property law which existed at the time of admission are now subject to question without special legislation confirming the annexation agreement.

"If the federal government can take the Tidelands from our schools, it can take farms, ranches, businesses, labor unions and anything else without compensation under the doctrine of paramount rights.

**Must Be Stopped Now**

"Maybe the government would never go that far, but the trend must be stopped right now. Some federal officials have said that even now they could nationalize all natural resources."

Daniel feels sure his legislation would pass and be approved if Eisenhower is elected. He feels equally sure it would be vetoed by Stevenson.

"I have asked him one question he hasn't answered," Daniel said.

"I asked him since he was for federal ownership, would he sue the 25 other coastal and lake states—including his own state of Illinois—just as California, Louisiana and Texas were sued. Those states meanwhile are getting revenue from such products as shell, sand, gravel and kelp.

"Governor Stevenson hasn't said. I have also asked Senator John Sparkman, the Democratic nominee for vice president, if he would approve a bill confirming terms of Texas' annexation. He hasn't answered yet.

Stevenson's backers in Texas, including members of the congressional delegation, have been saying the Tidelands issue is overemphasized.

Many of them have said they do not agree with Stevenson's position but that it is just one issue and not important enough to bring about wholesale shifts of votes to the Republican camp.

The Stevenson people have argued that cash realized from oil and gas leases and royalties in Gulf lands since the federal government took over Dec. 11, 1950, would have amounted to only $5 a year per school district in Texas, had the money still been available to Texas.

Those on the other side argue that while the cash income from the Tidelands has not been terrific, the potential is, and that the implications of the theory of paramount rights are far more serious.

The Supreme Court first asserted the theory that the federal government has such paramount rights in its June, 1947, decision in the California case. A year before that, President Truman had vetoed legislation giving title to the states, similar to that which died during the last session of Congress after his veto.

It was on Dec. 21, 1948, that the United States filed its suit against Texas.

A 25-month court battle followed, including 31 separate legal maneuvers in which Daniel and his aides attempted to overturn the California decision in general and assert Texas' own special claim in particular. They not only assailed the doctrine of paramount rights, but hammered at the annexation agreement.

It was on June 5, 1950, that the court ruled, 4 to 3, against Texas. It refused the Texas demand that evidence be heard before a special master. The decree putting the court's judgment into effect was entered Dec. 11, 1950.

# Mexican Convicted On Largest Opium Smuggling Charge

EL PASO —(AP)— A Chihuahua, Mexico, bar owner and state policeman was convicted Friday on charges of smuggling across the Rio Grande one of the largest hauls of opium ever seized in this area.

An El Paso federal jury took only 15 minutes to convict Ernesto Augustin Aguirre-Cano, 29, on charges of smuggling and selling 47 pounds and 5 ounces of opium at Presidio.

Custom agents said the opium was hidden in a suitcase and in a truck tire. Agent George Scales testified he arranged the meeting and sale with Cano in a Marfa tourist court July 8. Scales said when he was ready to make the arrest he signalled other officers who had been hiding all day in adjoining and opposite rooms of the tourist court.

Cano denied any knowledge of the opium but admitted wading the river while helping carry the truck tire and a box. He said he had come from the border to collect 30,000 pesos for friends who did not dare face murder charges in the shooting of a Mexican Ranger captain.

By use of artificial insemination it is possible to get 1,000 calves a year from a bull compared with 50 by natural breeding.

# Probers Ask Perjury Charge Against High U. S. Official

WASHINGTON—(AP)—The Senate internal security subcommittee said Saturday it was "gravely concerned" because (1) the Justice Department has not taken perjury action against John P. Davies, Jr., and (2) he continues to hold an important government post.

In a letter to Attorney General McGranery, the subcommittee requested that he advise Chairman McCarran (D-Nev) of the Justice Department's "position and intentions in this matter."

Involved in the case is a mystery-shrouded operation of the Central Intelligence Agency (CIA), the government's top counter-espionage organization, and the part played in it by Davies, a senior State Department official.

The subcommittee's letter to McGranery indicated the members feel that undisclosed evidence in the case should be made public now that Gen. Walter Bedell Smith, the CIA director, has said Communist agents may have infiltrated all federal security agencies.

**Interest Of Security**

"In our judgment," the subcommittee wrote, "the national security issue involved outweighs the narrower interest of any one particular agency."

The subcommittee charged in a report to the Senate on July 2 that Davies testified falsely "in denying that he recommended the CIA employ, utilize and rely upon certain individuals having Communist associations and connections."

Davies, now deputy political adviser to U. S. authorities in West Germany, denied it, but the subcommittee report recommended the Justice Department submit to a grand jury the question of whether he had committed perjury.

The subcommittee questioned Davies at closed-door sessions in August, 1951, asking him whether he had recommended in 1949 that the CIA employ six persons for consultation and guidance.

Of the six, the subcommittee said three had been named in its hearings as Communists.

Davies' testimony was made public Friday night for the first time. It disclosed he told the subcommittee he had recommended that the CIA utilize, but not employ, these individuals.

He said he couldn't say any more about the matter because "it touches on an operation which is only slightly less sensitive than that of atomic energy."

Describing it as a project with "A top secret classification," Davies told the senators "it is one which very few people in the government are clear to know about."

He testified that his action was "in the line of duty, within the framework of standing orders that "I had from my superiors." He said, however, that so far as he knew the project never was put into effect.

At the time he was on assignment at the State Department here. A few months later he became a member of the department's top-level policy planning staff. He previously had been a Foreign Service officer in China and at the U. S. Embassy in Moscow.

The subcommittee's letter to McGranery said "the Department of Justice has not indicated any intention of laying the facts in this case before a grand jury," adding that "meanwhile Mr. Davies continues to hold an important official position in an extremely sensitive area."

# Acheson To Ask Fresh UN Aid In Ending Korean War

WASHINGTON—(AP)—Secretary of State Acheson, presumably moving into his last round of international meetings as U. S. foreign policy chief, goes to New York Sunday to seek fresh United Nations support for ending the war in Korea in UN terms.

Acheson expects to propose first a resolution calling on the Chinese and North Korean Reds to agree to a truce, including voluntary return of war prisoners, within a limited time after the resolution is adopted by the UN General Assembly.

Should the Reds reject this peace bid, Acheson plans to follow up with a second resolution designed to put new presure on the Chinese Reds. The United States and Allied governments are consulting on what the resolution should say.

It is understood the United States has suggested to Britain, France and other friendly nations that the second resolution should call for an economic boycott of Red China and withdrawal of diplomatic recognition by those nations which, like Britain, have extended it to Peiping. The British government, among others, is understood to have been cool to such suggestions and the actual proposals of the second-stage resolution are highly uncertain at this time.

**Hopes To Force Issue**

Acheson will head the American delegation at the 1952 UN General Assembly session opening Tuesday. Informants said he hopes to focus the work of the meeting on issues between Russia and the free world. But they conceded this will be difficult because many of the smaller nations, notably those of South Asia and the Arab bloc, are more interested in doing battle on so-called colonial issues than in grappling with problems of Soviet communism.

Furthermore the opening weeks of the session will be complicated by the fact that the American presidential campaign, in which Acheson is a controversial figure, will be going on simultaneously.

TWO-GUNNED COMBINATION—Jane Russell and Bob Hope are the basis for all the rhythm, thrills and hilarity in "Son of Paleface," Paramount's actionful comedy which is being screened now and through Thursday at the Yucca Theater. Filmed in technicolor, the picture co-stars Roy Rogers and his horse, Trigger.

# Control Of House Foreseen For Winner Of Presidency

WASHINGTON—(AP)—The experts masterminding the Democratic and Republican campaigns for Congress fight shy of making flat predictions. They remember the seers who were burned in the 1948 national election upset.

A cross-check of private opinion of party officials concerned with electing a friendly Congress for their presidential nominee lends only to these conclusions:

House—Almost certain to be won by the party which captures the presidency, unless the national election is exceedingly close.

Senate—Likely to remain Democratic because the mathematics of this particular year favor that party. But a Republican landslide no doubt would carry the Senate with it.

Everyone of the 435 House seats is up for grabs this year. But only 35 Senate posts are being contested and of these the Republicans must risk 21, the Democrats 14. Five of the Democratic posts are in the South and are cinches for that party.

Of the 21 senatorships now held by the GOP which are up this year, only six are considered in the bag for that party. Ten of the Republican Senate candidates this year must run in states which went Democratic for president in 1948.

The 82nd Congress which expires at the end of this year is Democratic-controlled in both branches but it has the closest party divisions in 20 years with one exception.

The Senate is 49 to 47, although throughout the 1952 session it was 50 to 46. Senator Brien McMahon of Connecticut, a Democrat, died in July and a Republican, William A. Purtell, was named to succedd him.

The House now has 230 Democrats, 200 Republicans, one independent, and four vacancies.

GRIM BEAUTY—A beautiful, but mighty dangerous, iceberg of tremendous size makes a dramatic frame for the USCG Cutter Eastwind, on its way through Baffin Bay. The Eastwind carried personnel and supplies to Thule, Greenland, where a 90,000-acre, $263,000,000 Air Force base is nearing completion after two years of secret construction.

# Truman Says GOP Win Would Imperil Civil Rights Program

NEW YORK —(AP)— President Truman said Saturday the nation's whole civil rights program will be put in grave danger if Gen. Dwight D. Eisenhower, backed by such Southerners as James F. Byrnes, is elected to the White House.

In a major appeal to negro voters, Truman said the Democratic candidates, on the other hand, would fight for strong new civil rights measures.

Despite Eisenhower's "whispering promises," to negroes, the President said, a Republican administration could not be depended on even to preserve the civil rights program already in effect — and that one, he declared, is not good enough.

Truman gave his pledge of firm Democratic action toward equal rights legislation on behalf of both Gov. Adlai E. Stevenson and his vice presidential running - mate, Senator John J. Sparkman.

The President was introduced to the audience in Dorrence Brook Square in the heart of negro Harlem as "Mr. Civil Rights in person." The negro population of New York City numbers about 600,000.

Two high police officials estimated 100,000 persons heard him. Some newsmen placed the number nearer to 25,000. When Truman spoke in Harlem during his 1948 campaign, police said his audience was 65,000.

Thousands of persons viewed the motorcade in which the President and his daughter, Margaret, accompanied by many Democratic Party chieftains, rode from the Biltmore Hotel up Fifth Avenue to Harlem.

Truman claimed for his Administration the greater progress toward equal right that this country has seen since the abolition of slavery.

Then, accusing the Republicans of obstructing civil rights legislation, he declared "the progress we have been making in the field of human rights is in grave danger."

Truman said that Eisenhower, in testimony before the Senate Armed Services Committee while he still was in uniform, was against complete abolition of race segregation in the Army. The President went on to say:

"We are not going to turn the clock back, we are not going to turn this country over to the greedy interests that control the Republican party. They're not interested in equal rights."

## UT-Irish Football Films To Be Seen By Longhorn Club

Midland friends and ex-students of the University of Texas will see color films of the UT-Notre Dame football game at 7:30 p.m. Monday in the conference room of the Magnolia Petroleum Building.

The film will be sponsored by the Longhorn Club.

Organized in April, 1951, club members play a direct and important part in rounding out the university's athletic program within the framework of rules and regulations promulgated by NCAA and Southwest Conference.

The color films are a weekly event for members who see all of the plays in slow motion through telescopic lens and hold the advantage of running through the same play several times.

Former students of Notre Dame have been invited to the showing by the Longhorn Club.

## School Bond—

(Continued From Page One)

boosted with an expected increase next year.

At Midland High School, the need also is apparent this year.

Its enrollment of 924 students is considered high for the facilities which are available, but school officials have been able to carry on a normal program.

Next Fall, the situation will change.

Around 218 students will graduate next Spring but 462 will move up from the ninth grade, meaning a normal increase of 244 students.

In addition, there will be an undetermined number of new students, moving with their families into a rapidly growing Midland.

The proposed new 18 additional rooms, which will fit in well with the design of the present building, will be able to care for the anticipated increase.

**De Zavala Overloaded**

At DeZavala School, where most of the students are Latin Americans, the 439 students represent an overload of 95 at the present time, and with normal promotions—without counting the expected increase—there will be an overload of 130 students next year.

The proposed additional four rooms are expected to handle these.

The situation is worse at Carver School, for negro children.

Three temporary rooms now are used—even the cafeteria is housed in a classroom—there is an overload of 225 and promotions next Spring will boost this overload to 306 by next Fall.

Here again, the expected increase is not taken into consideration although Carver this year reported a 23 increase over last year.

## Nixon Says Thieves And Second-Raters Helping Run U. S.

ABOARD NIXON TRAIN, —(AP)— Senator Richard M. Nixon lashed at President Truman's foreign policies Saturday anti charged that thieves and "second-raters" were helping to run the federal government.

"Every dollar that gang steals down there comes right out of your pocket," the Republican vice presidential candidate told an estimated 1,000 persons at Olean as he rolled through GOP territory in South-Central New York.

It was the first of two whistle stop tours the Californian plans upstate.

Advising the crowd to vote for his running mate, Gen. Dwight D. Eisenhower, Nixon said:

"Don't settle for a bunch of second-raters. We've had enough of that with Harry Truman."

## Wounded British Peeress Improving

PRESCOT, ENGLAND— (AP)—Lady Derby, wounded in a wild machine gun attack in the ancestral Derby mansion Thursday night, underwent a minor operation Saturday and was reported making good progress.

The beautiful, 32-year-old wife of the Earl of Derby, one of England's wealthiest young peers, was shot in the neck by a 19-year-old apprentice footman who then slew two of the family butlers as they came to aid her.

Her assailant, Harold Winstanley, was captured in a Liverpool telephone booth shortly after the shooting. No motive was given.

# Ike Campaign Due Heavier Emphasis On 'Higher Level'

DENVER —(AP)— A strategy of a "high level approach," avoiding personalities and partisan retorts, was under study Saturday by Gen. Dwight D. Eisenhower's political high command for the final weeks of the presidential campaign.

The decision, an informant said, will be based on examination of reports coming in now from all parts of the country.

They deal, not only with Eisenhower's own sweep through the West, but more especially with reactions to President Truman's "give-him-hell" train trip. At some points, the general was only a few hundred miles behind the President, speaking in the cities a few days later.

On the basis of latest information, Eisenhower's top lieutenants are trying to determine the answers to two interlocking questions:

1. Has the President helped or hurt the Democrats by his attacks on Eisenhower?

2. Has the moment come for Eisenhower to emphasize the crusading nature of his campaign, leaving off any direct replies to Truman and Gov. Adlai Stevenson, while stressing his declaration, "I'm not a politician?"

**Day Of Rest**

Eisenhower scheduled a weekend rest.

Monday, Eisenhower resumes his hard-driving campaign, moving through Wyoming and then into Oklahoma, Louisiana. From there he swings into Texas—a glittering prize in the eyes of the Republicans. It is one of the three Southern states where they believe Eisenhower has his best hope of defeating the Democrats. The other two are Virginia and Florida.

Friday night in the Mormon Tabernacle in Salt Lake City, Eisenhower said:

"I regret that what was promised by the Democrats as 'education' has now been so far forgotten that we are being given name calling and a variety of assorted nonsense.

"I have not replied in kind. I do not intend to do so." He got his biggest reaction, a storm of prolonged applause, when he said he had not started his campaign as a politician—"and I'm not one now."

## NO COMPROMISE ON CIVIL RIGHTS—

# Stevenson Pictures Bolting Governors As 'Embittered Apostates,' 'Mugwumps'

NASHVILLE, TENN. —(AP)— Gov. Adlai Stevenson closed a two-day battle to keep Dixie Democratic with a sharp reminder Saturday night that a Republican victory will cost the South positions of power in Congress.

The Democratic presidential nominee, standing firmly on the Democratic platform, interpreted his difference with the South on civil rights as one of method only.

"I do not believe," Stevenson said, "that Southerners have less regard for human dignity than other Americans."

In an address at Berry Field, the Illinois governor took a parting fling at Democratic governors — Byrnes of South Carolina, Shivers of Texas, Kennon of Louisiana — who have abandoned his cause and jumped to the Eisenhower camp.

"Embittered apostates" he called them, without speaking their names —men who "proclaim themselves Democrats while supporting the nominee of the Republican Party."

Stevenson put in an 18-hour day on the political firing line, a busy day of campaigning here in Tennessee and at Miami and Tampa along a trail Gen. Dwight E. Eisenhower had followed in early September.

Eisenhower, he said in the Nashville address, has suggested to Southerners that the road to freedom from political captivity lies in following the "embittered apostates."

**Political Emasculation**

"I say," the Democratic nominee declared, "it can only lead to the political emasculation of a region which has played a tremendous role in shaping American policy from the dawning days of this nation.

"The suggestion that the South can obtain a national political influence only by bedding down with the GOP runs squarely counter to the record. I would refer these latter-day Mugwumps to a roster of the United States Congress."

How would they explain, he asked, how the South would be served better by Richard Nixon of California as presiding officer of the Senate rather than John Sparkman of Alabama; by Joe Martin of Massachusetts rather than Sam Rayburn of Texas as speaker of the House; by Senator Saltonstall of Massachusetts rather than Russell of Georgia as chairman of the Armed Services Committee; by McCarthy of Wisconsin rather than McClellan of Arkansas on the Expenditures Committee.

**Disagreement On Method**

Stevenson acknowledged what many of his Nashville listeners probably disagree with him because he accepts the Democratic platform and its declaration for continued efforts to end discrimination because of race, religion or nation origin.

But, he said:

"I refuse to believe there is any conflict between my viewpoint and yours in regard to the stated objectives of this platform plank . . . it is my conviction that our difference, such as it is, is no more than a disagreement over the method by which we should pursue a common end."

Southerners have contended that racial and other problems which concern them particularly are pretty much a matter for the states themselves to handle.

VOTE SHIRKER'S ALIBI

"IT INTERFERES WITH MY HUNTING"—Postpone your hunting for one day, it really isn't as important as this civic obligation. Your hunting days could be numbered if enough people don't vote.

## Texan's Horsemeat Savvy Starts Connecticut Probe

HARTFORD, CONN.—(AP)—A Texans' remark that he knows horsemeat when he eats it has touched off an investigation into the sale of horsemeat in Connecticut.

The Texan, unidentified, sat down to a "roast beef" dinner in a diner near Danbury.

"I come from Texas, and I've eaten a lot of horsemeat," he told the proprietor. "And that's what you just served me."

The proprietor got in touch with Theodore J. Richard, the state food and drug commissioner.

Subsequently, state police announced the arrest of Robert Stromeyer, 27, of Union, N. J., on four charges of selling horsemeat labeled as beef. He was put under $15,000 bond.

Richard said police are on the trail of two others.

Our hats are off to the oil industries of the Permian Basin—to the men who have built them and played such a vast part in the building of Midland and West Texas. They are part of a competitive industry whose constant progress means progress for you, for our community and for America. Today, this progress can be measured by hundreds of improved oil products which add to your comfort and convenience.

Salutes The

## Three Persons Die In East Texas Crash

DAINGERFIELD—(AP)—An automobile wreck near here Friday night killed three persons.

They were E. W. McClesky, 42, Lone Star, Texas; his daughter, Rosalee, 12, and Talmadge Ray Camp, 34, Winnsboro.

McClesky and Camp were employes of Brown & Root, Inc., contractors of a Lone Star Mill expansion job nine miles south of here.

## Midland Firemen Put Out Car Fire

Midland firemen made a run to 2501 West Wall Street at 8:20 p.m. Friday to extinguish a car fire.

Slight damage was done to a 1951 Ford automobile belonging to A. W. Watson. Firemen said the blaze originated from a cigarette.

About 75 per cent of U. S. families own life insurance of some kind.

# Most GI's In Europe Report Texas Girls Beat Frauleins

By GRACE HALSELL
Special Reporter-Telegram Correspondent

FRANKFURT, GERMANY—It's popular to report that American men prefer German girls to American girls.

Actually, no Kinsey statistics on the subject are available, but I asked a few Texans over here how they felt on the subject.

The answers varied.

One GI, Cpl. George Peredes of San Antonio, took a profound view:

"Oh," commented he, "women is women, any place."

Tall, handsome Jim Parrack, 21, of Houston felt different.

It's mularky to say American men prefer German girls to American girls. These girls are nothing, just nothing, compared with American girls."

The former Texas A&M student went further to add that in his opinion American girls don't compare with Texan girls."

(Has Texas seceded over the Tidelands since I've been away?)

Parrack, a private first class and personnel management specialist with the 97th General Hospital here, seemed a bit incensed at the idea anyone would even think of choosing a German girl over a Stateside girl.

"They are not as pretty, not as refined, and they aren't as intelligent," he stated.

**Back To Texas A&M**

The son of Mr. and Mrs. J. M. Parrack of Houston, the private is saving $56.75 out of his monthly $103 paycheck in order that he may return to Texas A&M. He plans to get his commission, and become a "career soldier." He likes personnel work, likes the Army, and likes the idea of early retirement, an inducement a career officer has.

On the other side of the German-versus-American female qualities, Corporal Paredes of San Antonio, said he couldn't distinguish too much difference.

Actually, however, the German girls chalk up a point here as Paredes plans to marry a German girl and take her back to San Antonio when his tour of duty is up. She speaks English—he doesn't speak German.

Paredes works as mail clerk with the 7772nd Signal Service Company of Frankfurt Military Post.

* * *

And while the subject of what men prefer in women has been discussed for years, the American woman in Germany has been just a little ignored.

One civilian employe here, who by the way is marrying a German man, supplying something of a new twist, said of American men in Germany:

"There are a few nice men here who are married. There are many men who are not so nice who are married. And there is a vast multitude of single men—and they are just horrible!"

Sgt. Virginia Smith of Childress, stationed here as physical therapy technician with the 97th General Hospital, said "Something happens to American men when they come to Germany."

**"More Like Men"**

She said in her opinion the men became "even more like men."

Not only do they become conceited, she continued "but more eager."

A girl (whose name escapes me as she hails from New Jersey) nodded agreement. "I can always tell," she asserted, "when a man is nice and has real gentlemanly manners that he's 'fresh' from the states."

Sergeant Smith, dressed in her taupe Hattie Carnegie-designed WAC uniform, said there were many advantages to being stationed in Germany. "I can travel easily, and live more cheaply here than in the States."

Despite these advantages, however, she said: "Give me Texas!"

She plans to return to Texas and make tours "of all the states in the union." After seeing Europe, she's decided she ought to see America.

A native of Childress, she lived in Houston where she worked for the Hughes Tool Company. A grandmother, Mrs. George E. Nies, lives in Fort Worth.

## Shell Plant Begins Recovery Of Sulphur

NEW YORK —(AP)— Shell Chemical Corporation announced Saturday that production has started in its new sulphur recovery plant at Houston.

The plant will recover up to 55 tons of elemental sulphur daily from wasted refinery gases, the company said. Annual output is estimated at 13,000 tons.

In the recovery process, hydrogen sulfide as contained in waste refinery gases is catalytically converted to 99 1/2 per cent pure sulphur, according to Shell.

## Freshman Rolls In Colleges Rise

WASHINGTON —(AP)— The U. S. Office of Education said Saturday early indications are that freshman enrollment in the nation's colleges is about 15 per cent greater than it was last year.

Commissioner Earl James McGrath made the estimate, based on Fall enrollment reports.

"If the trend in freshmen enrollments continues in reports still forthcoming," McGrath said, "we may expect approximately 540,000 students in the entering college classes this Fall.

## Perle Mesta Slates San Antonio Speech

SEGUIN —(AP)— Mrs. H. H. Weinert, Democratic national committeewoman from Texas, said Saturday Perle Mesta, U. S. minister to Luxembourgh, will speak in San Antonio October 26.

Mrs. Claude Hudspeth, San Antonio, past vice chairman of the State Democratic Executive Committee, and Bond Davis, Bexar County Democratic chairman, are in charge of arrangements for the luncheon at which Mrs. Mesta will speak.

# Grand Jury Questions Parr In Assassination Of Floyd

ALICE—(AP)—The grand jury investigating the slaying of Jacob S. (Buddy) Floyd, Jr., is in recess until Monday after a long session Friday with political kingpin George Parr.

District Attorney Homer Dean told newsmen the grand jury "may make an interim report" sometime Monday.

Parr talked with the jury an hour and 15 minutes Friday to climax the four-day probe in which some 70 witnesses have been questioned. Many of them, like Parr, were South Texas political figures.

Parr apparently took the probe in stride. "Glad to see you again," he said to Nago Alaniz, Alice attorney charged with murder in the Floyd killing. He and Alaniz shook hands.

Alaniz, named by the father of young Floyd as the man who told him he and Judge Sam Reams were marked for assassination, was taken into the grand jury room soon after Parr left. He remained only a few minutes.

Mario Sapet also is held in the shooting which the elder Floyd says was meant for him. Sapet, like Alaniz, is charged with murder although neither man is accused of actually firing the shot that killed the young University of Texas student.

Both Alaniz and Sapet had been called before the jury Thursday.

## Midland Fire Loss In September Set At $3,383 Figure

Midland had 23 fires during the month of September, resulting in an estimated damage of $3,383.89, Fire Chief Melvin Little said Saturday.

A breakdown of the September fires reveals that six were business firms, eight were residences and four runs were outside the city limits.

Little said the number of fires were slightly less than in September a year ago when 27 fires were reported for a total damage of $4,670.17.

EFFICIENCY BS&B RELIABILITY

**Welcome** to our exhibit — Booth B-13 at the Permian Basin Oil Show . . . October 16th through 19th.

# This is BS&B's 60th Year in the oil patches...

The Permian Basin and surrounding oil country in West Texas is very important to the oil industry . . . and very important to BS&B: so important that we maintain one of our 5 plants at Odessa.

It's only logical that BS&B, as one of the oldest manufacturers of oil and gas equipment, is very much at home in these local oil patches. Too, the people representing BS&B are very much at home in the West Texas communities where they work and have their homes.

This year the BS&B Odessa plant was relocated and expanded to better serve in this area of increasing oil producing activity. Additions totaling 21,000 square feet include a new welding shop, wood shop and combination office-warehouse.

Here in West Texas, as in any spot where oil and gas is brought from the ground and processed, BS&B is on the job. Operators look to BS&B as the company with the "know-why", the "know-how" and the equipment to follow it through.

# ...and here's BS&B's big modern plant at Oklahoma City

Pictured here is part of a business started in a man's spare time. It began with A. H. Black building wooden tanks for oil storage. In 60 years BS&B has grown to recognized leadership and top ranking strength . . . looked to for the latest methods, the most efficient equipment — time proven and field tested.

As at Odessa, major expansion of BS&B's Oklahoma City plant was completed this year. This gives 57,000 sq. ft. of additional manufacturing area. Included is a new 600 x 80 ft. heavy pressure welding bay. (In picture note long building with BLACK SIVALLS & BRYSON painted on roof.) This bay is served by a heavy plate oven and a new stress-relieving oven—one of the largest in the nation. A new steel plate bending roll will handle plate up to 3 in. and thicker when plate is heated. Twenty-five and 50 ton cranes have also been added. A new railroad track speeds up receiving and shipping operations.

As in all major BS&B plants, storage facilities were improved this year to provide for better inventory control and handling.

## 59 Texans Named To Serve On State Safety Committee

AUSTIN — (AP)— A 59-member citizens traffic safety committee was appointed by Governor Shivers Saturday. Cecil Burney of Corpus Christi, former president of the State Bar, was named chairman.

The committee will meet October 30 at Austin to act on the governor's plea for a traffic study and recommendations to cut down highway deaths.

Recommendations for improving highway safety will go to the governor, who will relay them to the Legislature in January.

Committee members include Houston Harte, San Angelo; Bailey Choate, Sweetwater; Don Conley, Pampa; John Womble, El Paso; Mrs. H. G. Stinnett, Plainview; Bill Morgan, Lubbock; Fred Finch, Amarillo; Rep. Gordon Bristow, Big Spring, and State Senator-elect J. T. Rutherford, Odessa.

## Veteran Oil Man Henry Ashby Dies

DALLAS —(AP)—Henry Ashby, long-time oil "wildcatter" who drilled discovery wells that opened several East Texas fields, died Friday night in a Greenville hospital after a 10-day illness. He will be interred here Monday.

He had helped finance the discovery well drilled by C. M. (Dad) Joiner in 1930 in Rusk County which opened up the entire East Texas Field. Later Ashby wildcatted the Talco, Ham-Gossett and Sulphur Bluff Fields in East Texas.

## Texas Pilot Dies When Jets Collide

ST. CLOUD, FLA.—(AP)—One pilot was killed and another parachuted to safety Saturday when two F-80 Shooting Star jets collided about two miles north of here and crashed in flames.

The planes were from Pinecastle Air Force Base.

The Air Force identified the dead pilot as Lt. Alexander Ortiz, 24, formerly of Brady, Texas. His widow and daughter survive.

The other flier, Richard B. Kelley, 22, Ranger, Texas, parachuted to safety.

## Rayburn Says Texas Doesn't Want Change In Administrations

BIG SPRING—(AP)—Speaker Sam Rayburn asserted Saturday night Texans will answer with a "thunderous no" to any suggestion that it is time for a change in the Administration.

Rayburn, head of the Democratic campaign in Texas, speoke before 1,200 in the Big Spring Auditorium. He was introduced by Rep. George Mahon.

## MAMIE GIVEN TEXAS OVATION

**DEL RIO —(AP)— Mamie Eisenhower got unexpected ovation from a crowd of 2,000 persons, an orchid, and a membership card in the Wildcat Band Booster Club when her husband's campaign train stopped here Saturday.**

**Eisenhower, campaigning by plane, will rejoin the train to continue his tour through Texas this week.**

**Mrs. Eisenhower autographed gloves, dollar bills and books, and listened to the music of the Wildcat Band.**

## PSS-S-T, BUD, WANNA TICKET?

**DALLAS —(AP)— There were 60 good tickets to the Oklahoma-Texas football game that no one got to use Saturday. The police had them.**

**Plainclothesmen mingled with the football crowd in Dallas Friday night and started buying tickets from scalpers with marked money. For some tickets they had to pay as much as $40. As soon as they got their tickets and paid off, they showed their badges and carted the scalpers off to jail. The 60 tickets came from 11 scalpers.**

## Cowden Junior High Drops San Jacinto

—Cowden Junior High broke the spell of a first quarter lead by San Jacinto here Saturday to go on and capture the contest 21-7 in a tilt between seventh grade elevens.

San Jacinto scored early in the first quarter on a sustained drive from their own 30 to pay dirt. The extra point was added for a 7-0 lead.

In the same stanza, Lupe Hernandez went over from the 15 for Cowden, and Gary Samford converted to tie the score. The second period was dead-locked, but Samford sent Cowden ahead in the third quarter on an off tackle plunge from the 8. He also made the point after. Lupe Hernandez put the game on ice for Cowden in the fourth stanza on an end sweep from the 30 yard stripe, good for the distance. Samford again converted and Cowden walked off the field with the victory.

Joe Espinoza, Eddie Bush, and Jerry Claybrook starred on defense for Cowden with some skillful tackling that broke up San Jacinto plays.

## New Delay Hinted For Parsons Trial

WICHITA FALLS. —(AP)— A defense attorney said Saturday, "I don't know yet," whether he'll seek a second postponement of trial for blonde Mary Jean Parsons, charged with murdering her soldier-husband.

There is a strong possibility such a move will be made Monday when the state starts its second attempt to bring to trial the 21-year-old Tulsa socialite.

Lt. Richard Parsons, 24, of Pleasantville, N. Y., was shot to death as he lay in bed in their El Paso apartment February 16. The couple had been married less than a month previously in a big Tulsa social event.

The case was moved here because of publicity the shooting received in El Paso.

## Insect Stings Lead To Death Of Woman

FORT WORTH—(AP)—Edith Ellis died Saturday after complications arose from multiple bee stings. Miss Ellis was checking yard work at her home Wednesday when she stepped into a nest of bees.

She was taken to a doctor for treatment and Thursday admitted to a hospital.

## West Texas Buffs Run Over Aggies

CANYON —(AP)— The West Texas State Buffaloes ran rampant on the ground and in the air Saturday in handing the New Mexico Aggies a 45-7 Border Conference defeat.

On the first play from scrimmage Orville Copeland ran 80 yards for the first Buffalo touchdown. Robert Welchel went over from the six in the first period and from the two in the second to give West Texas State a 19-0 halftime lead.

# Texas Political Spotlight—

(Continued From Page One)

tional party leadership. Shivers, the Democratic nominee for re-election, is working shoulder-to-shoulder for Eisenhower with Jack Porter, the Republican national committeeman. A close sympathizer is Attorney General Price Daniel, the unopposed Democratic nominee for the U. S. Senate.

**Rayburn Backs Adlai**

On the other side the generals are House Speaker Sam Rayburn, veteran Administration wheelhorse, Senator Lyndon B. Johnson, retiring Senator Tom Connally and the ardent New Dealer, Rep. Wright Patman.

Shivers is the first Democratic governor of Texas ever to renounce the presidential candidate of his party. Such action testifies to the seriousness of the revolt. Shivers became the third Southern governor to come out for Eisenhower when he joined James Byrnes of South Carolina and Robert Kennon of Louisiana.

Stevenson's friends are counting on these factors in November:

1. Democratic tradition dating back to Civil War days with most citizens still voting just like pappy and grandpappy did.

2. Unwillingness of many Democratic leaders, especially on the influential local levels, to rub out the party label and encourage rebellion at the grass roots. Some candidates for state offices are riding out the political storm silently. One, aggressive young John White, candidate for reelection as commissioner of agriculture, is working hard for Stevenson.

3. The farm vote, which they believe will stay put. Stevenson speakers are bearing down on advantages of REA and reminding farmers of the tough time they had in the depression.

4. The labor and federal employe vote, including a host of workers in expended defense industries.

The Republicans are banking on these factors:

1. Alliance with such influential Democratic leaders as Shivers, Daniel and former National Committeeman Wright Morrow, who resigned because he said he couldn't conscientiously work for Stevenson and party principles alien to what he believed.

**Write-In Urged**

2. Cross - nomination of Shivers, Daniel and other Democratic candidates for state office as Republicans.

3. Perhaps a plan to permit Democrats to scratch Stevenson and write Eisenhower in his place, in the Democratic column. There is plenty of space on sample ballots for this procedure and its legality is being studied.

4. Full use of the established and definitely-legal method of ticket-splitting. An individual voter may scratch Stevenson and his running mate John Sparkman in the Democratic column, but vote for all the state and local candidates in that column. Then the voter may jump over to the Republican column, leave Eisenhower and Richard Nixon at the head of the ticket, and scratch everything else.

5. Votes gathered one-by-one by two separate but cooperating organization: The Republicans and the Texas Democrats for Eisenhow. The latter is packed with Shivers' friends and aides and many of its leaders are from the State Democratic Executive Committee roster.

# Timothy Taxpayer Sells Boss—

(Continued From Page One)

He turned to go.

"Oh, Timothy," apologized his boss, "I hope you don't mind my asking, but what do you have to do that's so important?"

Timothy turned around and came back to the desk.

"Well, it's this way, Mr. Hardwhistle," he explained, "I promised I'd try to help with the Community Chest drive."

**Desk-Banging Spree**

The old man turned red in the face and banged his fist down on his desk.

"By George, Timothy," he shouted. "What's got into you? You told me it was something important. Community Chest! Some man came in here yesterday from the Community Chest. Wanted a donation from me and the firm both."

"I suppose you made one," stated Timothy.

"Oh, I gave him $5 to get rid of him," answered the boss. "What do they think I pay taxes for, anyway. The amount of taxes I pay, you'd think they'd be able to take care of all the poor people in the country. Have some left over, too."

Timothy, bless his big and patient soul, turned red in the face himself.

"I'm sorry, Mr. Hardwhistle," he said bravely, anger replacing his nervousness. "You've got it all wrong."

"Huh," came the surprised retort. "What's that you said, Timothy?"

**Had It All Wrong**

"I said," clearly intoned the little fellow, "you've got it all wrong."

Cornelius J. Hardwhistle, an almost hidden twinkle coming into his eye, relaxed in his chair.

"Okay," he said, his voice mellowing a little. "Go on."

Timothy stuck his chest out like a little bantam rooster and cleared his throat.

"I know the government spends a lot of money and a lot of it is wasted and a lot of it does some good," he began.

"But, Mr. Hardwhistle, there are some things that are the responsibility of the community. We here in Midland have those responsibilities and, I think, you'd be the last one to ask the government to shoulder them."

**Important Program**

Cornelius J. Hardwhistle shifted impatiently.

"Come, come, Timothy," he said. "Come to the point."

"Well, sir," Timothy continued, "that's what the Community Chest is for. It's a program through which every citizen of the community contributes what he can once a year to meet its program.

"It's pretty important program, too. It finances the Boy Scouts and the Girl Scouts . . .

"But that's not all,' said Timothy. "Actually there are six other agencies which participate in the Community Chest program.

"There's the Midland Youth Center, across from the high school, which provides a wholesome, well-supervised social and recreation program for our youngsters. They get $10,730 from the Chest.

"There's the Colored Day Nursery at 302 South Carver, where negro mothers can leave their children when they go out to earn a living. That costs only $2,527.

**Guadalupe Youth Center**

"And then there's the Guadalupe Youth Center, located at 414 East Illinois, which provides a program for the Latin American children, similar to the one carried on by the Midland Youth Center. That's another $5,605.

"And, of course, there's the Goodfellows, the Salvation Army and the USO."

Cornelius J. Hardwhistle growled.

"Never heard of them working here," he said.

"The Goodfellows do. Every year they make up Christmas baskets, complete with toys for the unfortunate families here. It only costs $850. The USO funds go into the Texas fund, which is providing a home-away-from-home for the scores of Midland men and women in the armed forces. A Midland banker, John P. Butler, is a state vice president of the organization.

"And the Salvation Army fund of $3,000 is being used throughout the year in caring for hardship cases and, many cases, and many times, helping some unhappy souls rehabilitate themselves."

Timothy, out of breath, watched his boss' reaction.

"How much is this Community Chest?" asked the big man.

**$68,250 Quota**

"Well, this year it's $68,250," answered Timothy.

"Is that all? That shouldn't be hard to raise. Why I know men, who could give that much themselves and not feel it."

Timothy was thoughtful.

"I do, too," he answered boldly, "but they give only $5."

Cornelius J. Hardwhistle cleared his throat warningly.

"What I mean is, Mr. Hardwhistle, the workers have to keep coming back and begging the money. Out of 750 sources listed for special and advance gifts, only 200 have responded.

"And in the employes' drive, only a few of the 12,000 or so workers in Midland have been contacted. That's why I wanted the afternoon off. I've already given a day's pay to the drive, but I figure I'd like to give a little time, too.

**More Workers Needed**

"In fact they're going to need another 100 workers for a whole day or a half-day Monday to try to contact every worker in town."

Cornelius J. Harwhistle stood up from his desk and stuck out his hand.

"That's fine, Timothy," he said, "You go ahead. If they need you tomorrow, too, well you stick with them."

Timothy grinned and turned to leave.

"And, Timothy," said old Cornelius J. Hardwhistle, "When you get over to the headquarters, tell them to send that man around again. I'd like to substitute something better for that $5 I gave."

## SUTTON TALKS OPEN MONDAY

**Dr. Willis A. Sutton, superintendent emeritus of the Atlanta, Ga., schools, is to make five speeches for the Midland Public Schools Monday and Tuesday.**

**The past president of the National Education Association will talk to the Kiwanis Club Monday noon and to the lay citizenry at 7:30 p.m. the same day in the high school auditorium.**

**During Monday and Tuesday, he will talk to the senior high school, Cowden Junior High, and San Jacinto Junior High student assemblies.**

## All Texas Revels In Indian Summer

**By The Associated Press**

Most of Texas basked in Indian Summer weather Saturday after an expected norther fizzled out.

The norther proved only a feeble one with barely enough strength to crawl over the state line. It managed to keep Dalhart's temperature down to a cool 75 but it hardly made a dent in the rest of the state.

Temperatures in the 80's prevailed over most of the state. Presidio recorded a 93. Salt Flat and Wink both reported 90.

Not a drop of rain was reported Saturday.

## 72-Hour Coma Ends For Waco Newswoman

WACO —(AP)— Mrs. Frank Baldwin, society editor of the Waco News-Tribune and Times Herald, regained consciousness Saturday after a 72-hour coma.

She was injured in an automobile accident Wednesday afternoon. Her condition still was listed as serious, and she is permitted no visitors.

A milch cow which takes eight to 10 gallons of water a day in normal weather may drink 15 to 18 gallons or more in very hot weather.

Although some forms of insects live near or in the sea at the shoreline, there are believed to be no truly marine insects.

When measles are introduced to peoples who have not known the disease, disastrous epidemics can result.

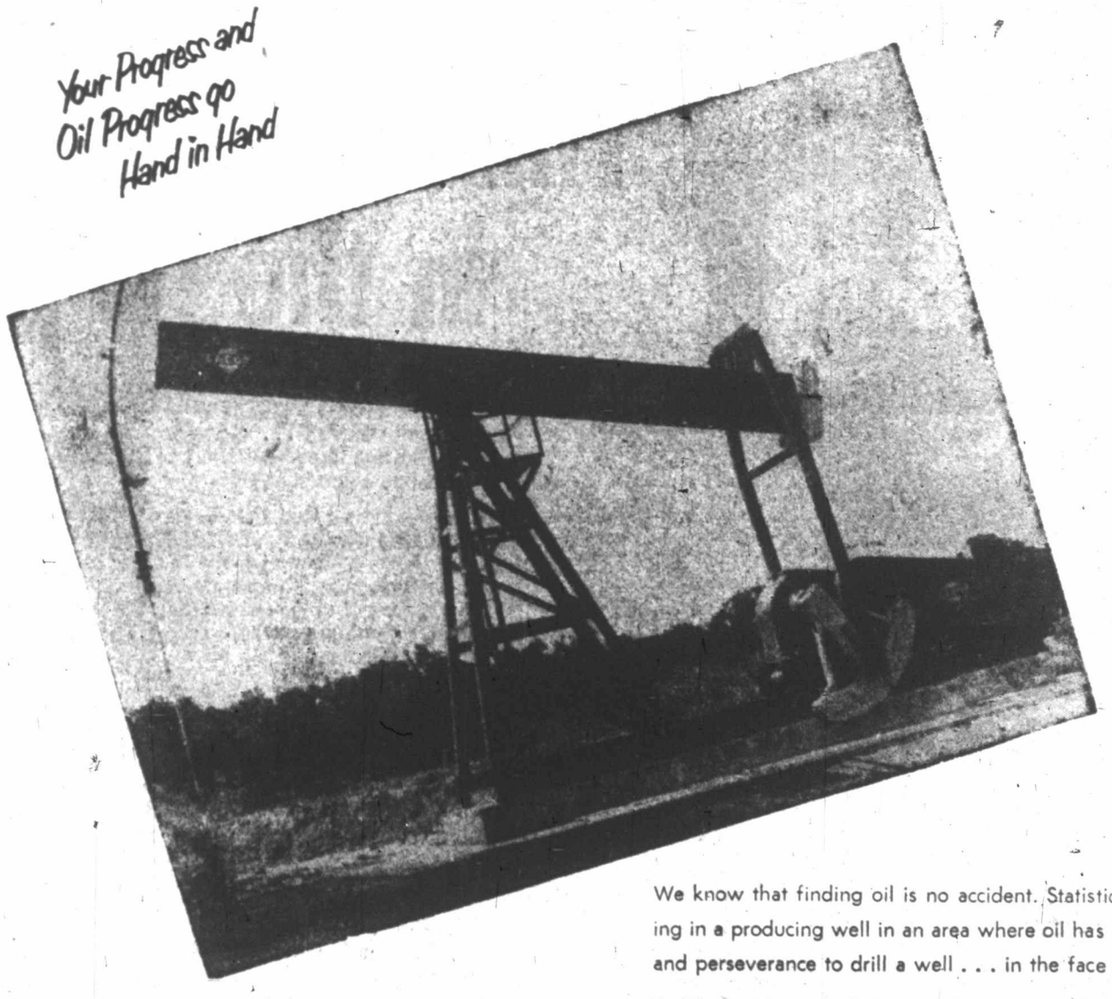
Your Progress and Oil Progress go Hand in Hand



Oil Progress Week is October 12th-18th

WE PAY TRIBUTE

to the oilmen of West Texas

We know that finding oil is no accident. Statistics prove that the odds are 9 to 1 against bringing in a producing well in an area where oil has never been found before. It takes real faith and perseverance to drill a well . . . in the face of such risks.

To those of you who have contributed so much to the progress of West Texas' oil industry . . . with your money, hard work and scientific knowledge . . . we wish to extend our congratulations and say we are proud to work with you.

CABOT

# Meaning Of Costly Red Push In Korea Puzzles UN Experts

WASHINGTON—(AP)—The Pentagon considers the Communists capable of putting on a series of limited but fiercely fought offensive like the one with which the Reds are harassing the Central Front in Korea now.

So far, no grave concern has been shown here over the offensive which is almost a week old. It has netted the Reds only heavy casualties and shifting tactical positions in contests over hill tops.

But, on the basis of information reaching here, it is believed the Chinese forces have accumulated terrible ammunition, well distributed along the front, and have their usual abundant supply of manpower to launch similar efforts later.

The possibility of a full-scale, major attack is not ruled out. However, no troop movements suggesting a buildup for a major enemy effort have been reported.

**No Reasons Known**

Military men point out that they can assess only the capabilities, not the intentions, of the Communists. Similarly, they do not claim to know the reason for the decision of the Reds to beat, in a limited offensive, against Allied positions which have been strengthened heavily during the more than a year of comparative quiet on the Korean front. There are several possible reasons, among them:

1. To provide psychological pressure behind the now suspended truce talks.

2. To counter the effect, on troops and in the homelands, of the unrelenting Allied air attacks and the high ratio set recently in the duels of UN jet planes with the Soviet-made MIG-15's. Reports say UN jets have knocked down 15 enemy MIG's for every UN craft destroyed.

3. A hope to shove a sector of the Allied front back and use this as another bargaining factor in truce negotiations.

The Pentagon is pleased at one result of the Red offensive. It has shown the highly improved combat capability of South Korean forces, which have received some of the heaviest onslaughts.

How is it that after months-long constant "interdiction" air attacks on the supply depots and the highways and by-ways behind the Red lines the Communists have enough ammunition to pour 50 or 60 thousand rounds of artillery fire on Allied lines in a single day?

Among the reasons is the apparent fact there are not enough planes in the UN Comamnd to choke off completely the flow of supplies to the enemy front. And there is no indication of intention to expand the unit strength of the Far East Air Force by drawing more planes from other danger areas in the world.

**Reds Learn Lessons**

The Reds appear to have learned some lessons from earlier heavy Allied air attacks on big ammunition and fuel dumps. Now the enemy appears to be using a large number of small dumps, easier to hide from air attackers and less costly if located by the raiders. It is probable, moreover, that these dumps are close to the line.

Although Allied air officers report day after day and week after week the bombing out of bridges, rail lines and highways, artillery and small arms ammunition continues to reach the Communist lines in what is obviously adequate quantities.

Airmen say that as long as there are the hordes of Asiastic laborers and packers with strong backs this can never be cut off completely. Damaged transport lines are repaired quickly, often in a matter of hours.

Coolies, using hidden trails or moving cross-country, tote supplies by night and under cover of storm to the front, in never-ending, ant-like files of men.

## Communists Protest Truce Talks Recess

MUNSAN, KOREA—(AP)—Communist truce negotiators charged in a formal protest Saturday that indefinite recess of the armistice talks by the UN Command was a "premeditated action" to pressure the UN General Assembly and extend the Korean War.

The Red protest, signed by North Korean Gen. Nam Il, senior Red negotiator warned of "grave responsibility" for the suspension. It said the Allies "must bear full responsibility for all the consequences arising from your action."

Nam leveled his blast in a letter address to Lt. Gen. William K Harrison, senior UN truce delegate.

The Reds appeared particularly incensed that the truce talks adjourned last Wednesday without consideration of a "reasonable proposal" they made in answer to three Allied plans for exchanging war prisoners.

## Churchill Neutral On U. S. Election

SCARBOROUGH, ENGLAND —(AP)—Prime Minister Churchill said Saturday the danger of war has receded since he came to power a year ago. The free world's resistance to Communist aggression, he added, will grow even stronger with either Dwight D. Eisenhower or Adlai Stevenson in the White House.

Churchill described British-American solidarity as "the foundation of our foreign policy." He told 3,000 cheering delegates at a Conservative Party conference that Russian maneuvers to separate the two Western nations will fail.

"We intend to preserve faithfully and resolutely in strengthening the ties of friendship and kinship whic have brought us into such effective aalliance with the gerat English-speaking republic across the Atlantic Ocean," Churchill said.

Churchill did not imply any comparison between President Truman and the two presidential candidates. Then tenor of his speech was that the free nations, with the passage of time, were gathering momentum in the task of defending themselves.

The British leader maintained a careful neutrality in the coming U. S. presidential election. Saying both Eisenhower and Stevenson were among America's finest men, he continued:

"Whichever wins, the United States will not abandon the mission of leading the free nations in resistance to Communist aggression and the underlying unities of the English-speaking world will grow broader an ddeeper an dstronger as the years roll by."

## Bus Driver Dies, Many Are Injured In Crash, Plunge

LOS ANGELES —(AP)— A big Pacific Electric bus plunged 50 feet to the bottom of an excavation Saturday after colliding with a butane tank truck at an intersection. The bus driver was killed and almost a score of passengers were injured.

The driver, Leland H. Wilson, 31, of nearby Alhambra, was thrown through his windshield. He died of a fractured skull, crushed chest and other injuries in Santa Fe Hospital.

Police said the impact hurled passengers to the front of the bus with terrific force. Several riders reported they were thrown through side windows.

Possible disaster was averted when the truck, teetering on the brink of the excavation, failed to tumble in atop the bus.

## Walter C. Dean, Oklahoma City's Former Mayor Dies

DALLAS —(AP)— Walter C. Dean, 87, former mayor and business leader of Oklahoma City, died Friday night at the home of his daughter, Mrs. Walter C. Shorton, Dallas.

Dean served as Oklahoma City mayor from 1927 to 1931. He was a jeweler. He was the father-in-law of the late Gen. Walter Campbell Short, Army commander at Pearl Harbor when the Japanese attacked December 7, 1941.

Besides the daughter, survivors include the widow; a grandson, Lt. Col. Walter Dean Short, Washington, D. C.; two sisters, Mrs. Ella Casey, Collingswood, N. J., and Mrs. Ida Payne, Camden, N. J.

Funeral services will be Sunday at Paris, Texas, Dean's former home.

## Former Midland Minister Assumes Kermit Pastorate

KERMIT — The Rev. Aubrey Smith was to arrive here this weekend from Roscoe to assume the pastorship of Kermit Grace Temple Church.

Mr. Smith has been serving as pastor of the First Baptist Church in Roscoe. He succeeds the Rev. C. B. Harper, who resigned late in September to become associated with an insurance company in Waco.

Mr. Smith a first pastorate was in Royalty, 10 years ago. He has held pastorates in Midland, Fort Worth and Penwell, and is a graduate of the Southwestern Baptist Seminary in Fort Worth.

# Temple Groups Stand Firm On Veterans Hospital's Use

TEMPLE —(AP)— Publisher Frank Mayborn of the Temple Daily Telegram says veteran and civic groups here will continue to oppose efforts to secure McCloskey Hospital for state tuberculosis patients.

But Mayborn added that the groups would abide by decisions of the Veterans Administration.

McCloskey, one of the Army's greatest amputation centers during World War II, is now a VA hospital on Temple's southern outskirts.

"Our stand is this," Mayborn said. "There is no room at McCloskey for 900 state TB patients or any other hospitalized group. Governor Shivers' arithmetic is misleading. Subtracting the 1,000 beds in use now from the hospital's 3,100 capacity pictures McCloskey as a 1942 Army hospital, but not McCloskey as a 1952 VA hospital.

**'Force Vets Out'**

"We do not want McCloskey as a state eleemosynary institution. We want it to continue as a VA hospital, which it cannot do under the governor's plan. After examining McCloskey's operation closely, which the governor apparently has not done, we feel certain that state TB patients coming in one gate will force veteran patients out the other."

Mayborn said that four vacant buildings at the hospital have been offered the Agriculture Department for use in consolidating its agencies in the state. These four are among a few not in use, he said, and were Army nurses' quarters during the war.

"Since the state soil board and U. S. Soil Conservation Service state headquarters already are located here," he said, "we believe these four buildings offered a logical site for Texas' combined USDA headquarters, with a saving to the government, and without keeping any additional veterans from moving in at McCloskey as governor Shivers claims."

Meanwhile, L. J. Cappleman, state director of the Farmers Home Administration, said in Dallas that he would fight any move to transfer some 400 FHA workers in Dallas to Temple.

"The fact that TB patients are Latin-Americans is not a consideration," Mayborn said. "The governor raised the possibility of racial discrimination in his Thursday press conference. We agree TB is not a segregated disease. But a veteran is also a veteran. McCloskey VA Hospital has treated some 23,000 veterans of all races since 1946 with help from more than 600 Central Texas volunteer hospital workers."

Advertise or be forgotten.

## State May Close TB Hospital Doors In Space Shortage

AUSTIN —(AP)— The state may be forced to halt new admissions of tuberculars to its hospitals for four months or more.

That is what will happen, State Hospital Board Executive Director Larry O. Cox said Friday, if unused space at McCloskey Hospital at Temple cannot be secured temporarily. The space is sought for care of patients that must be moved from the Weaver H. Baker Memorial Hospital near Mission.

Cox reported after a trip to Washington that the head of the Veterans Administration regarded state use of McCloskey space for tuberculars as "not feasible." Temple citizens also have opposed the project.

If the space cannot be secured, Cox said, state tuberculosis hospitals at Tyler and near San Angelo will have to halt new admissions until patients from Weaver Baker can be absorbed. That will take four to six months at the present rate of turnover, he estimated.

# Trueland To Hold Open House Sunday

**TRUELAND DEVELOPERS**—C. Allen True, right, of Midland and Fort Worth, and Frank True of Midland head True Enterprises, which Sunday afternoon will unveil the new Trueland Addition in Northeast Midland. Allen True is president of the firm and Frank True is vice president. Frank True also heads the Midland Realeteria, which is in charge of house sales in Trueland.

## *Public Invited To Inspect New Tru-Bilt Homes*

Midland's Trueland Addition will be the center of attraction here Sunday as the attractive and well-designed residential division is thrown open for public inspection.

And as a special feature of the occasion, one of the fine Tru-Bilt homes in the addition will observe open house, with citizens of Midland and other Permian Basin cities invited and urged to attend.

Frank True, vice president of True Enterprises, addition developer, said the purpose of the open house is to afford people the opportunity of seeing how the addition's homes will look after completion.

"In other words, the new house will have a ready-to-move-in appearance," True stated.

According to True, the flooring in the home is furnished by the Knight Carpet Company.

"The well-arranged, well-designed and well-built home will be a delightful sight to behold," the vice president of the developing firm declared. "Everyone who possibly can should visit the new home Sunday."

**Open House Hours**

Open house hours will be observed from 2 p.m. until 7 p.m.

In addition to the above-mentioned home, one house each of the 14 basic plans being erected in Trueland will be open for inspection.

Trueland homes are two and three bedroom units of five and six rooms each. They have both VA and FHA approval.

Special features of the Tru-Bilt homes include Truscon steel double-hung windows, Youngstown kitchens, automatic washer connections, range hoods, forced air heating, and complete air conditioning. Contemporary in style, the houses are equipped with carports. They are of brick and frame construction.

"These homes are designed for tomorrow," Frank True said.

**On Golf Course Road**

Trueland is located on Golf Course Road, immediately south of the Ranchland Hill Country Club.

The addition has 108 acres within its confines. A total of 346 building sites and two parks are provided. The lots average 60 by 130 feet each. One hundred and sixteen homes are planned in the first section, which now is being developed. Forty-eight homes now are under construction.

Curvelineal streets are a special feature of the attractive and well-designed addition. The streets are paved and all utilities are available.

The house plans were drawn especially for the Midland site, and are said to be the best and most modern to be found anywhere in their particular price range. Purchasers may select the colors for interior walls, ceilings and floors.

C. Allen True, a long-time resident and building contractor of Fort Worth, is president of True Enterprises. He is a cousin of Frank True, who has been engaged in the real estate, loan and insurance business here since 1946. Frank True, who also heads the Midland Realeteria, has developed Loma Linda and Lynnside Additions in Midland and the Clardy Addition in Stanton.

C. Allen True, who built the first home in Fort Worth under the GI home program, has developed Urban Oaks, Truedale and True Acres Additions there.

Construction of the houses in Trueland is handled by Tru-Bilt Homes, while sales are in charge of the Midland Realeteria.

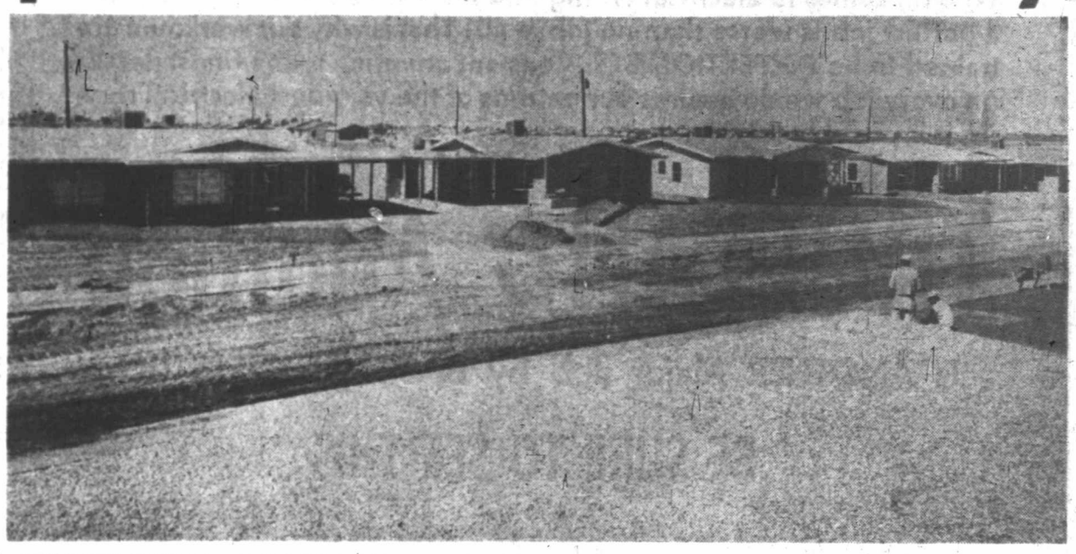
**Bright Future For Midland**

Representatives from the developing, constructing and sales concerns, as well as from the furnishing companies and sub-contracting firms, will be on hand at the open house Sunday afternoon to explain any and all features of the new home.

Frank True said Saturday he believes the prospects for continued home expansion in Midland are exceptionally good and that Midland will continue to forge ahead.

"Our faith in the future of Midland is unsurpassed," True declared. "We are doing our best to provide Midlanders with the kind and type of new homes they desire.

"I hope everyone will visit Trueland Sunday afternoon to see the new homes we are erecting there," he stated.



**IT'S OPEN HOUSE DAY IN TRUELAND**—Trueland, the attractive addition in Northeast Midland, is all set to welcome the hundreds of Midland and are residents who are expected to visit the new residential district Sunday afternoon. The Tru-Bilt homes shown in the above photograph are typical of the scores of dwellings now under construction in Trueland, which is located on Golf Course Road immediately south of the Ranchland Hill Country Club. The addition will observe open house from 2 to 7 p.m. Sunday. Many of the two and three-bedroom living units will be open for public inspection during the open house hours. The public is invited and urged to visit Trueland Sunday afternoon.

## Drouth Setbacks Vary Range Feed Outlook In State

AUSTIN—(AP)—Sharp contrasts in range feed prospects developed in Texas last month as drouth continued over much of the state, the Agriculture Department said Saturday in its monthly range and livestock report as of October 1.

Torrential rains revived hopes in northeastern plateau, south central and coastal areas, with annual grass, clovers and weeds starting there. Perennial grass was again green but still short.

In other areas, Fall and Winter range feed prospects deteriorated as drouthy conditions intensified. Winter hay and roughage reserves were being consumed and exhausted.

Condition of all range feed was reported at 64 per cent on October 1, a one-point improvement during the month primarily because of improved feed prospects along the Colorado and Guadalupe River sheds where torrential rains fell.

The 10-year average range feed condition is 83 per cent and a year ago it was reported at 72 per cent.

Condition of cattle was reported at 76 per cent, comparing with 75 per cent on September 1 and 85 per cent for the 10-year average.

Sheep and lambs were reported at 74 per cent, compared with 70 per cent September 1 and 84 per cent for the 10-year average.

## Attorneys To Study Texas Election Code

COLLEGE STATION —(AP)— A committee of the State Bar Association will make a study of the new Texas election code.

The study, authorized by bar directors here Friday, would be aimed for possible recommendation for improvements and changes in the laws.

## Abilene Policeman Killed In Collision

ABILENE —(AP)— City Policeman Billy A. Rose, 25, was injured fatally here Friday in the crash of his motorcycle and an automobile.

Rose died about four hours after the 3:30 p.m. accident.

## National Guardsmen To Stand Inspection By Colonel Weston

Midland's only organized military group, Company E, 2nd Battalion, 112th Armored Cavalry Regiment, is scheduled to have its annual command inspection at 8 p.m. Monday. The National Guard outfit will be inspected at its armory at Midland Airpark by Col. Frederick H. Weston, regimental commander from San Antonio.

Colonel Weston will be accompanied by Capt. George E. Utermohle, battalion adjutant from Pecos. The 112th Regiment has its headquarters in Pecos.

Capt. Max A. Schumann, Jr., is commanding officer of Company E in Midland. Other officers of the group are Lt. Roy Bourland, plans and training; Lt. Paul Jones, Jr., Bob Drake is the first sergeant of the company.

Two other officers who train regularly with Company E will be present for the inspection. They are Capt. Edward N. Gideon, battalion S-4, and Capt. James Frank Johnson, battalion communications officer.

The 112th Regiment is a non-divisional unattached branch of the National Guard that serves as a striking reconnaissance force. The inspection Monday will not be open to the public.

# Classified Ads

## WHY

ARE CLASSIFIED ADS SO LITTLE?

Classified Ads are little because they need not be big to get attention. Classified Ad readers are interested only in what the Classified Ads offer—not their size. Besides, a small Classified Ad costs very little. A 15 word ad four days costs less than a carton of cigarettes.

## KEY, WILSON & MAXSON'S REAL ESTATE Bulletin Board

REPORTING THE TOP NEWS IN REAL ESTATE

DISCONSOLATELY TRANSFERRED from Midland—and their greatest regret is leaving their newly purchased home. Located in high Loma Linda, where all the streets are paved, this attractive home has two lovely bedrooms, comfortable living room, and tile bath. The immaculate kitchen has a nice breakfast space, washer connection, YOUNGSTOWN metal cabinets, Vent-A-Hood, distributed heating, central air-conditioning, nice closets, and in excellent condition thru-out. Attractive lawns and attached garage. Can be handled for about $2,000 down. Full price is $10,500.

AFTER CHAOS, CAME ORDER . . . and now comes beauty and graciousness. One's finer taste is first expressed in one's home. And here is a home which eloquently compliments the best in attainment. Low slung and staid, this brick rambler magnificently divides itself into 3 large bedrooms, den, and 3 ceramic tile baths. The living room is a luxurious pride, and the kitchen is one which you would design if you had all the money in the world. Angled wood-burning fireplace, luxurious carpeting thru-out, central heating and cooling, large utility room and 2-car attached garage. Water well, tile fence, and comparable surroundings. It will be our pleasure to show you the other too-numerous-to-mention features. $36,500.

LET'S PUT IT THIS WAY: The rental unit in the rear will bring in about $50 per month which cuts your monthly payments that much. And the main house, located in TOWN NORTH, is constructed of Johns-Mansville asbestos siding. It has two nice bedrooms, comfortable living room, convenient and clean kitchen. Four years old and in excellent condition. Can be handled for about $2,500 down, and priced at a low $10,500.

MY OLD KENTUCKY (ST.) HOME. It ain't really old, but it sure is inviting. 2 good-sized bedrooms, full dining room, nice living room, neat kitchen, and attached garage. Fenced yard to keep the pet or the kiddies from being foreign ambassadors—or prevent foreign invasion. Nice lawn, trees, paved street. We'll process the loan, but believe that it could be handled for as little as $1,580 down. Full price: $9,081.14 (The $1.14 is publisher's fee for using song title).

"THEN WE MOVED TO STOREY STREET," is what you'll be proudly saying. Then invite them to see your 3 lovely bedrooms, 1½ baths, and the way that you've arranged your furniture in the inviting living room. But they will congregate in the beautiful kitchen-den combination. There is 32 feet in it, with panaling and a picture window in the den portion; with natural-finished cabinets and rustic hardware in the kitchen area. Distributed heating, central air-conditioning, some carpeting, large water-softener. Attached garage, large corner lot, nice lawn. $17,500.

HERE'S THE LONG OF IT. The short of it is in the price. If you've longed for lots of living space, hear yell It's got 3 bedrooms and a den, one bath, living room, full dining "L", and nice kitchen. Front and rear covered porches, huge detached garage, on a 75x140 lot on Kentucky. Two floor furnaces, 2 air-conditioner units, washer connection, and very expensive carpeting in the living room and hallway. Attractive lawn in front and rear, fenced yard, and paved street. These are some of the statistics. Attractively priced at ONLY $14,750.

VISIT OUR NEIGHBORING CITY of Odessa during Oil Progress Week. Then resolve that some progress shall take place about your securing a home in Midland. A lot of you nice people missed some wonderful opportunities because you've neglected calling us. Here's one that you shouldn't overlook: 3 bedrooms, ceramic tile bath, huge living and dining room combination, lovely and big kitchen with YOUNGSTOWN metal cabinets (with Lazy Susan), compact utility room with washer connection, and attached carport. Central heating, asbestos shingle over asphalt squares, oak floors, attic insulation. They are new, on a paved street, near grade school, and can be handled for as little as $2,000 down. FHA financing, and priced at an amazingly low, low $11,450. Surely, this deserves your calling us right NOW!

THE KEEPER OF THE KEYS can be reached by calling 2-1693. Keeper Rita, Steve, Lynn or Henry will be very happy to show you one of the cutest homes for the money that we've been able to secure for you. From the eye-appealing exterior to the exquisite interior, you'll find yourself awe-struck with the charm of this 2-large bedroom home. Extremely roomy kitchen with natural-finish cabinets, spacious living room, front and rear porches. The 100x140 yard is carpeted in green grass, and the front yard is encompassed with a stone and wrought-iron fence. Immediate possession. Priced at an amazingly low $7,900.

THE KEYS TO THE KINGDOM. Happiness comes from the mundane, also, because terrestial things can be beautiful. Here is one phase of man's gift to man: a beautiful home. This one has 3 large bedrooms, secreted den (paneled), and two tile baths. The kitchen is fit for a king, with washer connection, tile wainscoating, and unlimited breakfast space. Lovely living room and full dining room, 2-car attached garage. It rambles, in cream velour brick, over 80 feet across the front of the lawn. Central heating and air-conditioning, lusciously carpeted, large closets, TOUCH-PLATE lighting system with MASTER-CONTROL for each light in the house. Vehement water well in the huge, brick, storage house. The beautiful lawns are tile fenced. This kingdom is priced at an earthly $26,500.

ONE KEY FOR $1,800 DOWN. And just to show that we're good sports, we'll throw in a house with it. The key is brass, but the house is a home—with 2 larger bedrooms, delightful kitchen, inviting living room with adjacent dining room. Solidly constructed of hollow tile with cream stucco veneer, this BETTER home is located on Nobles Street, between Crockett Grade School and Big Spring Street. Oak floors, Panel Ray heating, attached carport. Green is the grass, and paved is the street. ONLY $10,000.

KLEENER THAN A HOUSE KEYPER'S home could ever be—because of the immaculate habits of the owners. Forest green exterior with white trim. It has 2 lovely bedrooms, comfortable living room, huge tile bath, and attached garage with storage space. There is a breakfast bar between the kitchen and the dining room. Washer connection, Vent-A-Hood, central heating. Beautiful lawn and magnificent, tropical-looking trees (and fence) blend beautifully with outdoor relaxation. Could be handled for $2,500 down. Priced at $10,500.

NOTE THAT WE HAVE KEYED this home to the man with modest means. Located on East Hamby, this attractive home has two nice-sized bedrooms, lovely living room, clean kitchen, and one bath. It's 14 months old, in excellent condition throughout, and can be bought for ONLY $1,900 down. Assume the 4% GI loan, and pay only $52 per month for principal, interest, taxes and insurance. Full price is a low $7,500.

KEY, WILSON & MAXSON desperately needs new listings, especially three bedroom homes. Our sales force has been increased, and we have a long list of culled prospects eagerly waiting to settle in Midland as home owners. Why not do what you should have done in the first place: List with KWM.

KEY-PING UP WITH THE FAMILY as it expands is the perrenial problem of more room. That it may be resolved without sacrificing beauty in the home, we proudly offer this home on Cuthbert. Slightly French provincial in design, this modified two-story, brick home has four bedrooms and den, and two baths. Large dining room, and a spacious, sunken living room with wood burning fireplace and beamed ceiling. Wonderfully large kitchen with modern features, and adjoining utility room with connections for washer, dryer, and deep-freeze. Two-car attached garage and maid's room. Central heating and cooling, fully carpeted. Tile fence surrounds the lovely lawns. Water well. Sorry, but Tojo (the cocker pup) does not stay with the house. You'll meet Tojo when you see the home. Please, by appointment only.

FIRST WITH THE NEWS — MIDLAND, TEXAS, SUNDAY, OCTOBER 12, 1952 — SECTION TWO

## TIPRO Executive On API Program

E. I. (Tommie) Thompson of Austin will address the October meeting of the Permian Basin Chapter of the American Petroleum Institute in Odessa Wednesday night.

Thompson is an independent oil operator and also is executive vice president of the Texas Independent Producers & Royalty Owners Association.

His address Wednesday night will deal with the Tidelands situation.

The meeting will be held in the Ector County Auditorium and it will start at 6:30 p.m.

Early N. Spiars of Midland, chairman of the Permian Basin API chapter, will preside.

**Entertainment Planned**

Following Thompson's address some of the talent who will be in Odessa to participate in the programs of the Permian Basin Oil Show will give a short entertainment session.

After that feature of the program is completed a barbecue supper will be served.

**Need Tickets**

Spiars said Saturday that all persons who plan to attend the Wednesday night meeting should secure their tickets by 6 p.m. Tuesday.

On account of the oil show being scheduled Thursday morning after the API meeting on Wednesday night a record attendance is expected at the session.

The committee in charge of arrangements for the API meeting must have a definite idea by early Wednesday morning as to how many persons to provide food for.

That is the reason for the request that the tickets for the meeting be bought early. They may be secured in Midland at the reception room of The Western Company in the Midland Tower and from M. R. Hays at Phillips Petroleum Company.

## Dixilyn Sets Exploration In W-C Ward

Dixilyn Drilling Company will drill No. 1 W. E. Estes as a 5,000-foot rotary wildcat in Central-East Ward County.

Operator staked location 467 feet from north and east lines of the southeast quarter of section 4, block B-29, psl survey. It is on a 160-acre lease, 14 miles southeast of the town of Monahans.

Operations are slated to start by Wednesday.

## Governor Shivers Slated To Talk At TIPRO Meeting

Governor Allan Shivers will be the luncheon speaker at the mid-year directors meeting of the Texas Independent Producers and Royalty Owners Association in Austin October 20.

"At a time when independents are faced with a struggle for survival," declared TIPRO President Ivan W. Payne of Tyler, "it is especially appropriate that our feature speaker should be a man who has come to symbolize the fight for state and individual rights—Governor Allen Shivers."

**Policy Decisions**

Out of the meeting to be attended by approximately 200 directors from every part of Texas, is expected to come policy decisions on such issues as imports, natural gas, and price controls. The TIPRO legislative program will be formulated, particularly with reference to natural gas.

Consideration will be given the reopening of the battle on oil imports, called off in late 1950 after the Korean outbreak. And the Association is expected to recommend some new procedure for obtaining price decontrol on all commodities.

## King Executives Are Announced; Jenson Is Prexy

The new executives of Carl B. King Drilling Company of Texas, with headquarters in Midland, have been announced by Carl B. King, chairman of the board.

C. J. (Dutch) Jensen was named president, succeeding the late Bruno R. Schabarum. New vice president is R. C. (Bob) Schmidt, in charge of contracts.

J. D. (Jack) Fogerson is new vice president and general superintendent. H. D. (Don) Johnson was named secretary and treasurer.

## OPS Asks Wellhead Gas Price Protest Dismissal By Court

WASHINGTON—(AP)—The Emergency Court of Appeals has been asked to dismiss two big oil companies' protest against the ceiling price for wellhead gas in the Woodlawn Field near Tyler, Texas.

The Office of Price Stabilization set a ceiling of 10 cents per thousand cubic feet on natural gas sold at the wellhead in the field.

OPS Friday asked dismissal of an appeal in which Stanolind Oil and Gas Company, Tulsa, and Continental Oil Company, Houston, seek a 12-cent ceiling. The companies have eight days in which to reply to the government motion.

The emergency court was set up under the Defense Production Act to rule on price control matters.

The case involves the general regulation issued in April, 1951, covering sales of natural gas at the wellhead and a special order issued by OPS in August 1951, rejecting the companies' plea for a 12-cent ceiling. That order fixed the ceiling at 10 cents.

The government asked dismissal of the appeal on the ground that the companies had failed to file protests with OPS against the natural gas order within the six months allowed. The government also challenged the companies' argument that offers to buy at the higher figure should be considered in fixing the ceiling. The companies said they had such offers from the Mississippi River Fuel Company.

## Plans Completed For Mid-Co Annual Meet In Fort Worth

Some of America's top business and industry personalities will join leaders of the Texas petroleum industry in Fort Worth at the Texas Mid-Continent Oil & Gas Association's thirty-third annual meeting, Tuesday and Wednesday.

The association's speaking panel will include Dr. Charles F. Kettering, Detroit, inventor and scientist, who is a vice president of General Motors Corporation; Reese H. Taylor, president of Union Oil Company of California; Dr. Raymond Rodgers, professor of banking, New York University; Hines H. Baker, president of Humble Oil & Refining Company, and R. F. Windfohr, Fort Worth, president of the Texas Mid-Continent Oil & Gas Association.

Kettering, inventor of the automobile starting, lighting and ignition system, will speak on "Fuel and Engine Relationships" at the opening session Tuesday in the Texas Hotel. He will be introduced by Frank M. Porter, president of the American Petroleum Institute.

Windfohr will deliver the president's address Tuesday morning.

At a dinner for the association's directors Tuesday evening at River Crest Country Club, Rodgers, lecturer and advisor on financial affairs, will speak on "Who Shall Control Our Money?"

Committee meetings concerning vital industry problems on depletion, social security, and Railroad Commission of Texas forms will be held Tuesday afternoon.

At the Wednesday session, Taylor will speak on oil shales, which is the object of pioneering research by his company in the search for more oil sources. Baker's address will be on "Statesmanship in Industry."

**Second Day**

A highlight of the second-day meeting will be the presentation of the Texas Mid-Continent Oil & Gas Association's Distinguished Service Award to an outstanding independent oil operator and a major company executive.

The association's annual golf tournament, preceded by an exhibition by golfing champion Ben Hogan, will be held Wednesday afternoon at River Crest Country Club.

The two-day meeting will be closed with the all-membership dinner Wednesday evening in the Texas Hotel. Entertainment will be made up of a series of top-flight acts gathered from shows and night clubs over the nation.

BOARD PRESIDENT — Lloyd French, Odessa and Midland oil and supply man, is president of the Permian Basin Oil Show.

OIIC CHIEF—Joe T. Dickerson of Midland is West Texas area chairman of the Oil Industry Information Committee, sponsor of Oil Progress Week and other activities which tell the story of the contribution of the petroleum industry to the economic and social well being of the United States. The West Texas area includes 24 counties. Dickerson is vice president of Shell Oil Company in charge of that concern's Midland area.

## PBGS Slates October Meet For Tuesday

The October meeting of the Permian Basin Geophysical Society will be held Tuesday evening at 8:00 p.m. in the Cowden Junior High School Cafeteria in Midland.

H. M. Thralls, vice-president in charge of domestic operations for Seismograph Service Corporation, Tulsa, will be guest speaker for the evening. Thralls holds a Oklahoma Masters Degree in physics from Oklahoma University and has been with SSC since 1934, having progressed through the ranks of the organization to his present position.

Thralls will present a paper entitled "Sources in Velocity Surveys," written by R. S. Finn, R. W. Mossman, S. W. Schoellhorn and Thralls, all with SSC at Tulsa.

Coffee and doughnuts will be served before the meeting, and a film, "1951 Southwest Conference Football Highlights," presented by Humble Oil and Refining Company, will be shown.

Lester M. Johnson, Honolulu Oil Corporation, Midland, president of the society, will preside. Members and all non-members who are interested in geophysics and related sciences are invited to attend.

## Sulphur Recovery Unit is Operating At Houston Plant

A unit which will recover up to 55 tons of elemental sulphur daily from waste refinery gases went into operation last week at the Houston plant of the Shell Chemical Corporation.

Construction of the plant was a move aimed at alleviating the critical shortage of sulphur and its most important compound, sulfuric acid. Sulfuric acid is so fundamental a chemical with so many varied commercial uses (chemicals, oil, steel, paper, fertilizer, paint) that its total consumption provides a pertinent index of the industrial activity of any nation.

The new sulphur recovery unit, certified by the government as a necessary defense project, was constructed by the Ralph M. Parsons Company of Los Angeles.

In the recovery process hydrogen sulfide as contained in waste refinery gases will be catalytically converted to 99 1/2 per cent pure sulphur at an annual rate in excess of 13,000 tons.

An unusual feature of the unit is that the sulphur will be stored in molten form in an underground tank at a temperature of 300 degrees Fahrenheit. It will remain in this state throughout loading and transporting in specially insulated railroad tank cars.

Sulphur recovery is not generally a part of petroleum refining operations, but with annual U. S. sulphur production trailing domestic consumption industry has moved to take up the slack. Over 40 plants for recovery of sulphur from hydrogen sulphide are either planned, under construction or in operation in the U. S. today.

## Human Relations Institute Starts Monday In Midland

Permian Personnel Association is sponsoring an Institute on Human Relations for foreman and supervisors in the oil industry in Midland from Monday through Friday.

The institute, in the past, has been held on the campus of Southern Methodist University.

Instructors for the five-day institute include Dr. A. Q. Sartin, professor of psychology SMU; F. Franzolino, director of training at Temco, Inc., Dallas; Willis Tate, vice president of SMU; J. M. Claunch, director of Dallas College, branch of SMU.

James Herring, Jr., SMU, is coordinator for the institute and C. A. Schumacher, SMU, is its director.

Sessions will start each day at 9 a.m. in the conference room, fifth floor Magnolia Building.

## Plymouth To Acidize Zone In Midland

Plymouth Oil Company was preparing to acidize the Strawn zone through casing perforations at 11,100-150 feet and test in No. 1 Foster, wildcat in Central-West Midland County.

This wildcat, which failed to find production in the Bend, where hole is bottomed, indicated as a flowing discovery from the Strawn on a drillstem test when that section was drilled through.

Operator cemented casing at 11,220 feet.

After making the above perforations, operator did not try to swab the wildcat natural.

The Strawn drillstem test was taken in the interval from 10,599 to 10,640 feet. Operator estimated a flow of 20 barrels of oil hourly on that test.

Location is 1,980 feet from south and west lines of section 11, block 41, T-2-S, T&P survey.

## Price Will Drill Deep Wildcat In Cochran As Result Of Deal

An 11,700-foot wildcat is slated to be drilled in extreme Southwest Cochran County of West Texas as a result of a deal which has been made between L. T. Price of Dallas and Magnolia Petroleum Company.

Price has taken a farmout of 640 acres from Magnolia in the Cochran County region and in return for the farmout has agreed to start drilling by November 1 on a wildcat at some point on the 640-acre tract.

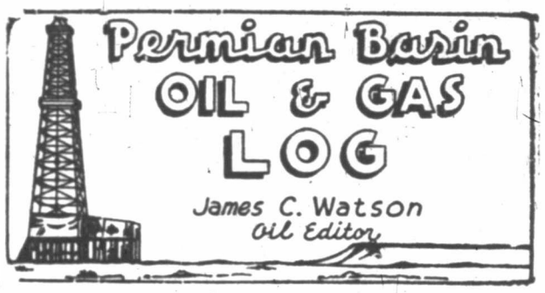
**11,700 Feet**

It is understood that under the terms of the farmout Price is obligated to drill to 11,700 feet or a test of the Devonian at a lesser depth.

Price has the right to set the location for the wildcat at any place on the tract he has secured which he considers advisable.

The Magnolia to Price farmout covers all of section 10, block Z, psl survey. Fee owner of that property is Emma Hoover Culp.

The acreage is 10 miles west and slightly north of the multipay Landon field which has production from the Devonian, the Pennsylvanian and the San Andres-Permian. It is 16 miles south and slightly west of the town of Bledsoe.



## Glen Cove Discoveries Put Texas Area On Feet Again

By D. J. EATON
Abilene Reporter-News Oil Writer

GLEN COVE, TEXAS—(AP)—Once this little community was called the garden spot of Coleman County but oil drilling rigs fast are changing its landscape.

In the western part of the county, Glen Cove has new oil production as prolific as can be found in just about any part of West Central Texas.

Glen Cove got its first discovery well in August, 1951. Thirteen months later, in and near the community, were 76 producing wells for a daily lease allowable of 4,312 barrels.

Within a half-mile radius around the community, the total population totals about 75 persons. Practically everyone here is benefiting from either royalty, leases or jobs provided by oil.

Up until August of last year, this was a quiet place surrounded by rolling hills and trees. Today it is busy and noisy. Drilling rigs and tank batteries, along with the trees, dot the country side.

**Sleep A Problem**

"For a while there were so many drilling rigs and their lights around here at night that trying to sleep was about as hard as trying to sleep in the daytime," said M. W. Young, postmaster who has the post office in his general store here.

"People didn't mind losing a little sleep though — the noise meant money coming in."

The discovery well for Glen Cove, Luling Oil & Gas Company No. 1 I. G. Whittington, was completed only 300 yards southwest of Young's store. The Jennings sand producer was completed for a daily potential of 422 barrels of oil. For 14 years Whittington operated a road maintainer here.

"At one time there were six rigs drilling within hollering distance of my store," said Young.

Young has had a first-hand interest in watching the local oil development. Every day he can see trucks hauling oil field equipment past his store. He has seen producers and dry holes drilled. Dry holes were drilled on Methodist and Baptist church lots.

"Oil has saved us," said Young. "No crops were made this year, and people have had to sell a lot of their stock because of the drouth. I don't know what we would have without the oil."

When the first discovery was completed here, people were excited by the flowing oil.

"At first we couldn't believe this was the real thing," Young said.

Prior to the present boom, the nearest oil was at Goat Hill, three miles north of Glen Cove. The several dry holes which previously had been drilled caused discouragement.

**Knew It Was There**

This community has one citizen who believed oil had been here for many years. He is George Stinson, who has two producers. Standing on a hill overlooking Glen Cove, Stinson said: "I just knew for years that oil was down there in the valley." He has lived here 46 years. Stinson quit farming four years ago.

"This year we have had a drouth, but oil is keeping us on our feet," said Stinson. "Back in the 1918 drouth we didn't have any oil. Many of the people here went to Ranger to work."

Generally speaking, people still are doing the same things they did before oil was found. Some new neighbors have moved in. New homes and businesses are being built.

**Sheep And Oil**

Those with oil flowing from their land include W. H. Davis. He spent 19 years with a drilling crew before taking up farming. Registered sheep breeder C. F. Sappington also has production. And there's Charlie Duncan who has sheep and oil.

Glen Cove now has four separate fields. The Glen Cove Jennings Field, the first, now is consolidated with the Glen Cove Jennings South Field. The two linked together. The Glen Cove Jennings Field on September 1 had 65 producing wells for a daily lease allowable of 3,779 barrels.

The Railroad Commission September 1 proration schedule showed the

(Continued On Page Seven)

## Western Drilling Slates 5,500-Foot Yoakum Test

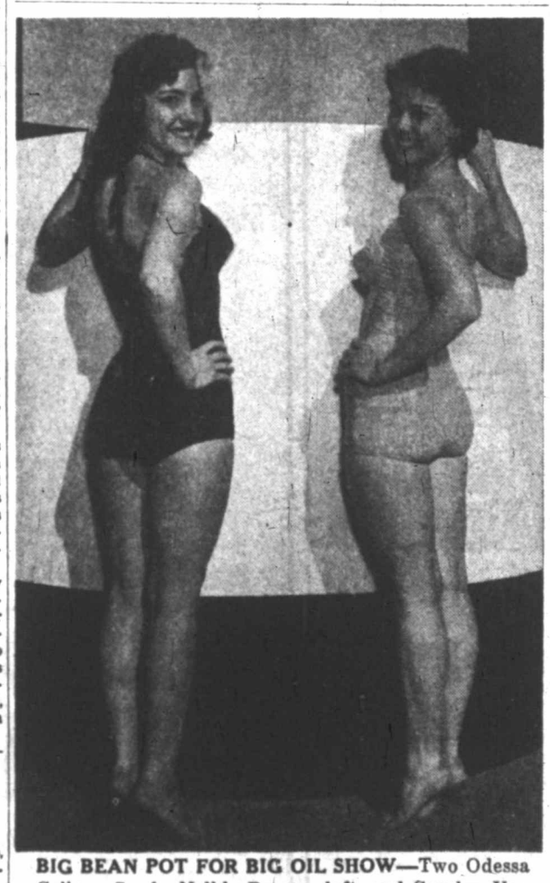
Western Drilling Company, Inc., of Lubbock is to start operations at once on its No. 1 Margaret Wright, which is to be a 5,500-foot wildcat in Northwest Yoakum County.

It is 10 miles northwest of the town of Plains and 660 feet from north and east lines of section 161, block D, John H. Gibson survey.

Rotary tools will be used to drill the project. It is being undertaken as a test for production in the San Andres-Permian lime.

The Western Drilling No. 1 Wright is on acreage on which Honolulu Oil Corporation has held the lease.

It is indicated the project is being drilled as the result of a farmout having been made between Honolulu and Western Drilling Company.



BIG BEAN POT FOR BIG OIL SHOW—Two Odessa College Coeds, Nellda Bynum, left, and Carolyn Van Meter, prepare for a close inspection of the big bean pot which will be used to cook beans at the Permian Basin Oil Show Barbecue in Odessa. The pot, five feet high and six feet across, was designed by S. P. Kroeker of Sivalls Tanks, Inc. The girls are both 18-year-old freshmen.

## New Field In W-C Gaines Is Extended

Aurora Gasoline Company of Midland No. 1-A M. S. Doss has been completed as a one-location east extender to the Jenkins, North (Devonian) field, recently opened in West-Central Gaines County.

The new well was completed for a daily flowing potential of 529.92 barrels of 34-gravity oil through a one-inch choke and from perforations at 9,660-697 feet.

Completion was natural. Gas-oil ratio was 75-1 and tubing pressure 30 pounds.

Location is 660 feet from south and 1980 feet from east lines of section 398, block G, CCSD&RGNG survey.

## Dansfield Is New District Geologist For Bankline In PB

W. B. (Bill) Dansfield is the new district geologist for Bankline Oil Company for the Permian Basin of West Texas and Southeast New Mexico.

He resigned a position on the geological staff of the Permian Basin district office of Skelly Oil Company to form the association with Bankline.

He had been employed by Skelly for 10 months and previous to that time had worked for Gulf Oil Corporation for about five years.

He is a graduate in geology of Texas Technological College at Lubbock and served in the U. S. Air Forces during World War II.

Dansfield succeeds William A. Adent as Permian Basin district geologist for Bankline. Adent resigned from that company a few weeks ago to join another oil industry organization in Midland.

## GCOC Gets Show Of Gas In Permian In C-N Hudspeth

General Crude Oil Company No. 1 Merrill and Voyles, slated 5,500-foot wildcat in Central-North Hudsepth County had developed a very slight show of gas in a drillstem test at 1,800-41 feet in a Permian lime, possibly the lower Yeso.

The tool was open 65 minutes. Recovery was 40 feet of very slightly gas cut drilling mud. There were no signs of oil or of formation water.

The prospector now is making hole below 1,930 feet in lime and shale.

Location is at the center of the northeast quarter of the northeast quarter of section 8 block 69, T&P survey, T-2. It is six miles southwest of Dell City and 65 miles east of El Paso.

## Ashby, Et Al Fail To Get Reef Oil In SE Lynn Test

C. M. Ashby of Dallas and associates No. 1 Garza Land & Cattle Company, Southeast Lynn County exploration, on the outside of the proven area of the O'Donnell field, which has one producer from the Pennsylvanian reef lime and one from the Mississippian lime failed to develop any possibilities of production in the reef.

That zone was drillstem tested at 8,580-8-628 feet. The tool was open five hours. A small amount of gas appeared at the surface in four hours.

**Had Salt Water**

Recovery was 180 feet of slightly oil and gas cut drilling mud and 5,580 feet of salt water. Those shows were not sufficient to make an oil well.

The project was originally started to dig to 9,200 feet to test into the Mississippian.

Drilling will be continued until that objective has been realized.

Location is 600 feet from south and east lines of the south half of the northwest quarter of section 431, block 9, EL&RR survey. It is 12 miles east of the town of O'Donnell.

## Lawless Wildcat In E-C Hale Is Digging In Permian Shale

Lawless Drilling Company No. 1 Harmell estate, East-Central Hale County wildcat, 12 miles south of Plainview, had reached 3,150 feet in middle Permian lime and shale and was making more hole.

This exploration is contracted to drill to 10,500 feet or a test of the Pennsylvanian reef lime at a lesser depth.

Location is 330 feet from south and west lines of the northwest quarter of the southeast quarter of section 5, block R, EL&RR survey.

It is 1,320 feet due north of Ray

(Continued On Page Seven)

## Gile Leaves Rotary; Goes To Canada

Richard E. Gile, pioneer Permian Basin oil man, is moving to Canada. He will reside at The Latch, Sidney, British Columbia, Canada. The Latch is on Vancouver Island.

Gile has withdrawn from a partnership with Olin R. Prather and Jack E. Bliss in the Rotary Engineering Company. That association started in 1946.

At the time the Prather, Bliss-Gile partnership was formed the concern was operating four oil well logging units.

Currently it has 31 units working in the United States and its affiliates in Canada and Mexico have additional portable logging trailers at work.

The Rotary Engineering Company partnership has been reorganized. Prather and Bliss will retain their previous interests.

An interest in the partnership equivalent to that formerly held by Giles will be taken by a group composed of W. C. Hammitt, Hugh B.

Richard E. Gile

Gilmour, Arthur J. Joseph, John W. Rahlfs, R. W. Mangum, Dwight Fleming and Mary Cosar.

All those persons are executives and/or employes of Rotary Engineering Company. Each of them had previously held minor interests in the partnership.

Gile is to continue work in the oil business in Canada. He, together with R. F. Buckle, will own and operate Rotary Engineering of Canada.

**Former Affiliate**

That concern is a former affiliate of Rotary Engineering Company of Midland. It now will be operated as a separate and individually owned business.

Rotary Engineering of Canada is doing well logging in the Canadian oil fields.

With the withdrawal of Gile from the Rotary Engineering Company partnership and the business operations it is carrying on, a new executive and administrative set up for the organization has been put into effect.

**Co-General Managers**

Joseph is manager of manufacturing and radio; Hammitt is manager of operations; Gilmour is manager of accounting; Rahlfs is sales manager; Fleming is purchasing agent and Victor Reinholz is personnel manager. Those assignments are now operative.

Mr. and Mrs. Gile and their two sons have disposed of their home in Midland and expect to be established in their new home in Canada in a few weeks.

**Came To Midland In 1929**

Gile came to Midland in 1929 as a geologist for the Independent Oil & Gas Company.

He had taken his degree in geology from the University of Minnesota and had done graduate work at Columbia University.

Gile joined Tide Water Associated Oil Company in Midland in 1933 as assistant district geologist under the late Cary P. Butcher.

In 1937 he became district geologist for British-American Oil Producing Company in West Texas.

He left that concern in 1941 and worked as an independent oil operator and consulting geologist for one year.

**Was Manager For Bay**

In 1942 he joined Bay Petroleum Corporation, when that concern opened an office in Midland. He was division manager for Bay until 1946 when he resigned from that organization to form the partnership with Prather and Bliss in Rotary Engineering Company.

Mr. and Mrs. Gile have been active in social, civic and religious organizations in Midland.

## University Lands Lease Sale Scheduled For December 12

University Lands oil and gas leases are to be offered by the board for lease of The University of Texas Lands at its Thirtieth Public Auction December 12.

Included in the leases are eight blocks with drilling obligations. They are: tract 19 and 56 in Andrews County tract 80 in Crane, tract 97 in Crockett, No. 119, No. 120 and No. 129 in Winkler County and No. 145 in Hudspeth County.

Other acreage up for sale is in Dawson, Gaines, Martin, Upton, Pecos and Loving Counties.

The two Andrews tracts, No. 19 and 56, each call for a wildcat to 13,000 feet, or to commercial production of oil or gas at a lesser depth, or into sulphur water in the Ellenburger formation at a lesser depth. The wells are to be started within 180 days after the sale. Tract 19 contains 2,560.60 acres and No. 56 contains 2,606.77 acres.

The Crane County tract, No. 80, is made up of 1,280 acres and calls for a wildcat to 3,500 feet within 180 days after the sale.

Tract No. 97 in Crockett County is made up of 1,937.75 acres and calls for a wildcat to 4,000 feet within 180 days from date of sale.

Winkler County tract No. 119 contains 2,562.80 acres and calls for a wildcat to 5,400 feet within 180 days after the sale.

Winkler's tract No. 120 is made up of 2,562.80 acres and calls for a 5,200-foot wildcat.

Tract No. 129 in Winkler County is made up of 2,562.80 acres and it calls for a wildcat to 5,500 feet.

The Hudspeth County drilling block tract No. 145, calls for a 5,000-foot wildcat.

The sale will be held in the Stephen F. Austin Hotel in Austin, starting at 10 a.m.

# 100,000 Expected To Attend Vast Permian Basin Oil Show

Approximately 100,000 are expected to attend the Permian Basin Oil Show which will be held in Odessa October 16-19 in conjunction with the national Oil Progress Week observance.

The show, which is staged every other year, will have about 350 exhibitors representing all phases of the petroleum industry. The 1950 show had 208 exhibitors and attracted between 60,000 and 70,000 persons.

Exhibits at the exhibition will include those of service, supply and specialty companys, drilling companies, refining, transportation and marketing companies as well as oil company and educational groups.

One of the special attractions of the show will be a theater sponsored by the Oil Industry Information Committee. The OIIC theater will feature films on every aspect of the oil industry which have been produced for the general public. Between film showings, the theater will serve as a lounge for oil show spectators.

**Top Name Artists**

In addition to the exhibits, a full slate of top name entertainment has been scheduled.

Celebrities in a variety show to be given twice daily will include the original Hollywood Bumstead family with Blondie, Dagwood, Alexander, Cookie and the pups. The variety show also will feature Preston Foster and seven other nationally-known acts.

Four orchestras will play for nightly dances. The bands include Will Osborne and his orchestra, Leio Pieper and his Aragon Ballroom orchestra in addition to Andy Schroeder's Western Band and Bob Goebert's Gentlemen of Note. An old-fashioned barbecue also has been scheduled for Saturday, October 18.

The Permian Basin Oil Show has been scheduled to coincide with the national observance of Oil Progress Week and will be launched October 16 in Odessa by what is expected to be one of the largest parades ever assembled in West Texas.

The oil show, a non-profit undertaking, is directed toward the oil field worker with the intent of showing him the latest in oil field equipment. The exhibits also will be slanted toward informing the general public about the oil industry.

**Non-Profit Show**

Sponsors of the oil show, a non-profit enterprise, are a group of oil men in the Permian Basin. Representing the board of directors which have guided the planning of the show are the officers. They include, Lloyd French, Midland, president; Early Spiars, Midland, vice president; W. D. Lane, Midland, vice president; Roy Carter, Kermit, treasurer and Carlos Clover, of Odessa, manager.

Sale of ticket books for entertainment is under the direction of the Ticket Sales Committee with Lane as chairman and John Cooper of Midland, co-chairman.

Ticket books which sell for $2 each are available throughout the Permian Basin and include admission to the variety show, each of the dances and the barbecue for the single price.

In Midland, tickets may be obtained from the Chamber of Commerce or from The Western Company in the Tower Building.

Aptly called "the oil field workers' show," the Permian Basin Oil Show will have more than 350 exhibits of interest to the oil worker.

**OIL SHOW WORKER**—Jesse Owens, manager of the Odessa Chamber of Commerce, is helping with hotel reservations and other aspects of the Permian Basin Oil Show.

There are pictures of a dragon vulture, bull and giant on the flag of Iceland.

The gendarmerie of France are rural policemen; those of Paris, agents de police.

Goats are used for pack animals in some sections of the Himalaya Mountains.

Menhaden fishermen, using a 1,200-foot net, often catch 100,000 fish at a time.

# New Mexico Areas Gain 45 Openers During Year

A fantastic producer-dry hole ratio was compiled in the Southeast New Mexico portion of the Permian Basin during the last 12 months period ended October 1.

Out of 130 wildcat explorations drilled in Lea, Eddy, Chaves and Roosevelt Counties, 45 of them were completed as discoveries, with 43 of them being for oil producers. The other two were gas wells.

That is at the phenomenal rate of one producer for every three wildcats drilled.

Twenty-one of the 45 openers were completed from the Pennsylvanian and lower formations.

The tubular goods shortage during the middle months of 1952 did not curtail the drilling activity in Lea County to a great degree. That area, as it is doing now, leads all other counties in the Permian Basin from the standpoint of number of rotary rigs drilling. That sector, for several months, has had 115 rigs in operation on the average.

**Three Deep Fields**

Highlighting the year's discoveries in Lea County was the opening of three important deep fields. They are the East Caprock and Moore (multipay) area in Northwest Lea County and the West Dollarhide (multipay) field in the southeast portion.

The year's discoveries are as follows:

Lea County—

Amerada Oil Corporation No. 1 Fred Turner, section 17-20s-38e, completed from the McKee for a daily flowing potential of 827 barrels of oil, January 3, 1952.

Continental Oil Company No. 5-S Wantz, section 21-21s-37e, finaled from the Wichita for a daily flow of 524 barrels of oil, January 22, 1952.

**Gulf Opener**

Gulf Oil Corporation No. 1-H Lea-State, section 19-15s-33e, completed from the Pennsylvanian for a daily pumping potential of 15 barrels of oil, February 11, 1952.

A. G. Carter No. 1-D Hill, section 34-23s-37e, finaled for a 24-hour flow of 823 barrels of oil from the Devonian, February 11, 1952.

Shell Oil Company No. 1 Chester, section 12-21s-37e, completed for a daily flow of 144 barrels of oil from the Wichita, February 25, 1952.

Skelly Oil Company No. 3-J Mexico, section 32-24s-38e, finaled from the Fusselman for a daily flowing potential of 1,196 barrels of oil.

**Deepest Test**

Buffalo Oil Company No. 12-B Baish, completed to set a new producing depth record for New Mexico and the Permian Basin from the Devonian at total depth of 13,750 feet for a daily flow of 578 barrels of oil. It was completed January 31, 1952. It is located in section 22-17s-32e.

Fullerton Oil Company No. 2-L Federal-Elliott, section 1-21s-37e, completed from the Blinbry for a daily flow of 135 barrels of oil, March 3, 1952.

Jackson, Douglas & Ritchie No. 1 State, completed as a Pennsylvanian discovery February 22, 1952, for a daily flow of 240 barrels of oil. It is in section 27-10s-32e.

Phillips Petroleum Company No. 1-B Pello, section 26-14s-32e, completed from the Pennsylvanian for a daily flow of 178 barrels of oil, February 25, 1952.

**Moore Area**

The Texas Company No. 1 Moore, section 25-11s-32e, completed from the Devonian for a daily flow of 2,904 barrels of oil, April 5, 1952. This is the opener of the Moore (multipay) area.

Stanolind Oil & Gas Company No. 11-AX State, section 4-19s-38e, finaled from the Drinkard for a daily pumping potential of 65 barrels of oil, April 15, 1952.

L. E. Elliott No. 1-H Elliott-Federal, section 31-24s-38e, for a daily flow of 490 barrels of oil from the Devonian, March 6, 1952.

L. E. Elliott and Hall No. 1-R Federal, section 31-24s-38e, finaled as a Queens discovery for a daily flowing potential of 264 barrels of oil, September 11, 1952.

**Magnolia Well**

Magnolia Petroleum Company No. 1-D Santa Fe, section 29-9s-36e, completed October 1, 1951, from the Pennsylvanian for a daily flow of 243 barrels of oil.

Phillips Petroleum Company No. 1 Fort, section 34-14s-37e, finaled for a daily flow of 1,344 barrels of oil from the Devonian, October 3, 1951.

Forest Oil Corporation No. 1 H. L. Lowe, section 25-13s-37e, completed for a 24-hour flowing potential from the Wolfcamp for 385 barrels of oil, November 26, 1952.

Fullerton Oil Company No. 1 Elliott-Federal, section 1-21s-37e, for a daily flowing potential of 245 barrels of oil from the McKee, November 29, 1951.

**Drinkard Opener**

Skelly Oil Company No. 1-K Mexico, section 29-24s-38e, for a daily flowing potential of 145 barrels of oil, December 2, 1951. It was completed from the Drinkard.

Aurora Gasoline Company No. 1 A. O. Davis, section 29-18s-39e, finaled from the San Andres for a daily flow of 720 barrels of oil, Noverbem 15, 1951.

The Ohio Oil Company No. 1 Caruth-Federal, section 25-9s-37e, completed for a 24-hour flow of 27 barrels of oil from the San Andres, December 7, 1951.

Magnolia No. 1 Black, section 9-15s-36e, pumped 156 barrels of oil from the Pennsylvanian, December 13, 1951.

Skelly No. 9-0 State, section 31-16s-37e, finaled for a daily flow of 882 barrels of oil from the Wichita, December 14, 1951.

Texaco No. 1-AT State, section 10-14s-33e, completed for a daily pumping potential of 36 barrels of oil, December 20, 1951.

Phillips No. 1-A Pello, section 2-15s-32e, finaled for a daily pumping potential of 49 barrels of oil from the Pennsylvanian, April 18, 1952.

Skelly No. 1-0 Mexico, section 6-25s-38e, pumped 82 barrels of oil in 24 hours from the Queens, April 26, 1952.

Barney Cockburn No. 5-A Corbin-Federal, pumped 12 barrels of oil from the Yates, April 25, 1952. Location is in section 9-18s-33e.

Humble No. 1 Elliott-Federal, section 1-16s-34e, flowed 257 barrels of distillate and 4,540,000 cubic feet of gas daily from the Devonian, May 6, 1952.

**Wilshire Test**

Wilshire No. 1 Townsend, section 5-16s-35e, flowed 263 barrels of oil from the Pennsylvanian, May 12, 1952.

Texaco No. 1-AW State, NCT 2, flowed 899 barrels of oil from the Devonian, May 29, 1952. Location is in section 21-10s-33e.

W. D. McBee No. 2-H State, section 12-17s-36e, flowed 204 barrels of oil from the Glorieta, June 11, 1952.

Phillips No. 1 Chem-State, section 4-15s-32e, pumped 36 barrels of oil in 24 hours from the Pennsylvanian, July 10, 1952.

Fullerton No. 4 Elliott-Federal, section 9-21s-38e, pumped 41 barrels of oil in 24 hours from the San Andres, June 18, 1952.

Tide Water No. 1 Montieth, section 20-16s-37e, completed for 754 barrels of oil daily, August 11, 1952, from the Strawn.

Texaco No. 1-BN State, section 25-11s-32e, flowed 72 barrels of oil in 24 hours from the Pennsylvanian, August 18, 1952.

**From Pennsylvanian**

Texaco No. 1-BH State, section 14-12s-32e, finaled for a daily flowing potential of 949 barrels of oil from the Pennsylvanian, September 18, 1952.

Continental No. 1-3-S-B Hawk, section 3-21s-37e, finaled for a 24-hour flowing potential of 600 barrels of oil from the McKee, October 11, 1952.

Eddy County—

Martin Yates, III, No. 1 Cordie King, section 22-23s-26e, finaled from the Delaware for a daily pumping potential of 58 barrels of oil, August 11, 1952.

Buck Jones Drilling Company No. 1 V. L. Gates-Federal, on potential pumped 20 barrels of oil from the Rustler, August 22, 1952. It is in section 29-26s-26e.

**Gertrude-Duffield**

Conoco No. 1 Gertrude-Duffield, flowed 3,800,000 cubic feet of gas and 30 barrels of distillate on 24-hour potential May 14, 1952. Location is in section 21-16s-27e.

Riggs No. 1 Welch, section 5-21s-27e, pumped 100 barrels of oil from the Trinity sand, February 10, 1952.

Roosevelt County—

Austral Oil Exploration Company No. 1 McGrail, section 18-8s-38e, flowed 104 barrels of oil from the San Andres, February 24, 1952.

## Cardinal Chemical To Set Up Three Oil Show Booths

The Cardinal Chemical Company is one of the few exhibitors in the 1952 Oil Show to maintain three booths. The theme of each booth will be "Serving the Oil Industry."

Of special interest will be Cardinal's "service booth" in building "D." For the convenience of the visitors and exhibitors, this booth will offer a direct wire to Western Union, two telephones for local and long distance calls, and messenger service to all points on the show grounds.

Also included in the booth will be facilities for making change, lounge chairs, blackboard for messages and bulletins, and a quart jar of aspirin to relieve a common ailment "crania dolorosa petrolea" or Oil Show Headache.

It is emphasized that the Cardinal booth, number 28, in building "D" (the new barbecue barn), is operated as a public service. You may wish to keep a copy of these telephone numbers: 7-9613 and 7-9598. The booth will be maintained Wednesday through Sunday during all regular show hours.

**OIL SHOW PLANNER**—Bud Knight, a member of the Board of Directors of the Permian Basin Oil Show, is chairman of entertainment for the event.

## C. Of C. Directors Set Monday Meeting

The October meeting of directors of the Midland Chamber of Commerce will be held at 4 p.m. Monday in the council chamber in City Hall, President Jack Wicker announced Saturday.

"A number of important and interesting items will be on the agenda," Wicker stated in urging a large attendance of directors at the meeting.

A feature of the Blondie and Dagwood Bumstead show will be Daisy and her five pups at the Permian Basin Oil Show in Odessa.

### OIL ROYALTY

**ONE HUNDRED ACRES, non-participating, in Peck field, southwest Midland Co. Located in northeast quarter sections nos. 3, 5, 7 and 9, June Sanders ranch. Forty acres in 9, and ten acres each in 3, 5 and 7. N. E. quarter of 9 has an Ellenburger well. Section 9 has three offsets. Well No. 10, an Ellenburger, well No. 12 a Pennsylvania, well No. 13 an Ellenburger location now drilling at about 11,600 ft. This well showed for production in the Pennsylvania. Plat mailed upon request by owner. Broker services solicited. Price $400 per acre. Box 674, care Reporter-Telegram.**

Odessa, Texas
Phone: Odessa 7-3573

# The Tool Pusher

## Abercrombie, Latimer Named Top Texas Oil Industry Men

J. L. Latimer

J. S. Abercrombie

Two veterans of the oil field ditches and rig floors—J. S. Abercrombie, Houston, and J. L. Latimer, president, Magnolia Petroleum Company, Dallas—Saturday were named Texas' outstanding petroleum industry members for 1952.

The two oil men will receive the Texas Mid-Continent Oil & Gas Association's Distinguished Service Awards Wednesday morning at the thirty-third annual meeting of the association, Fort Worth.

The awards are presented annually to a major company executive and to an independent operator for outstanding service to the petroleum industry. A committee of former award winners makes the selection.

**Widely Known**

Now widely known as oil man, philanthropist, and sportsman, Abercrombie was born in Huntsville. At 17 he headed for a roughnecking job in the Gulf Coast's oil fields. He was a field superintendent for Crown Oil Company by the time he was 26. Abercrombie borrowed money, bought a rig, and started in the drilling contracting business during the Wichita Falls boom. He drilled over Texas, in Columbia, and put down one of the first off-shore wells in Louisiana.

In 1920, Abercrombie bought a small machine shop at Houston, which under his guidance became one of the oil country's most prominent tool and equipment companies, Cameron Iron Works.

**Latimer Climbs**

Latimer started his climb to the top office of Magnolia, one of the nation's major oil companies, from the job of helper on a loading truck at Thrall, Williamson County, Texas, 36 years ago.

A native of Olean, New York, an early oil center, Latimer began his lifetime career with Magnolia at the age of 18. He became a member of a pipe line crew, then held other jobs in Texas and Oklahoma oil fields. After a World War I hitch in the United States Navy, he returned to Magnolia for assignment in the booming Ranger field. He was gauger, district foreman, oil solicitor, and then construction superintendent of the company's first welded trunk line linking the Luling field with the Corsicana-Beaumont line.

After promotions to district and general superintendent, Latimer was made assistant general manager of Magnolia Pipe Line Company in 1937.

In 1946 he was elected president of both Magnolia Petroleum Company and Magnolia Pipe Line Company. He has been a director of both firms since 1938.

## Total Deafness is No Handicap To Terminal Evangelist

Evangelist Roy Loney of Ottawa, Kan., who is engaged in a three-week gospel meeting in the Church of Christ at Terminal, spends his daily life in preaching the gospel, yet he lives in a world of total silence.

The evangelist began to lose his hearing when he was a child and his deafness became more acute as he grew older. He has been totally deaf more than 20 years, yet he is an active and effective evangelist.

He is the author of several books and is a correspondent for a large religious newspaper.

Mr. Loney has traveled extensively over the United States, preaching in numerous states, but his work chiefly has been in Kansas and Colorado. Sponsors said his success equals that of the average preacher without physical handicaps.

"I cannot remember the time when I did not want to preach and I never felt that my deafness was an insurmountable handicap," Mr. Loney declared. "I cannot hear the people but they can hear me, and I'm always happy when they come and listen to the old story of redeeming love."

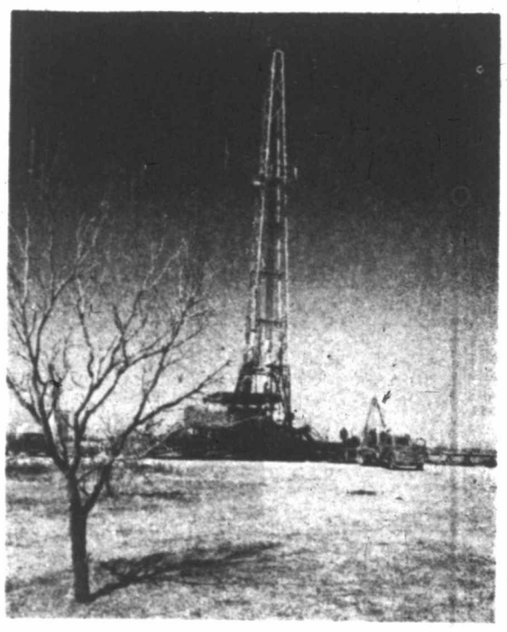
The evangelist will speak in Midland October 19 and 26. The meetings are scheduled at 2:30 p.m. in the Cowden Junior High School Auditorium.

**CO-CHAIRMAN** — Tom Brandon is serving his second year as co-chairman of the Exhibits Committee for the Permian Basin Oil Show.

SERVING THE PERMIAN BASIN

PARTNERS IN

Oil Progress



*This Shell "jack knife" mast rises above the sandy prairie south of Midland. This rig was drilling Shell Barnett C-9 in the Benedum (Spraberry) Field when photographed.*

EXPLORATION and PRODUCTION...

The search for oil is a risky business. There are plenty of costly dry holes. But every time we find new oil it means more gasoline for your car, more power for farm and ranch, and more of all the hundreds of oil products which add to your comfort and convenience.

The high quality of Shell petroleum products is assured through the continuous efforts of petroleum specialists in our laboratories. Shell Oil Company and its more than 1100 employees in the Permian Basin are proud to be a part of the great oil industry.

*Pictured above is one of the modern, spacious Shell retail outlets.*

MARKETING...

Taking care of your car means more to your Shell dealer than just keeping it supplied with Shell products. It means top-flight service that adds thousands of miles to the life of your car.

Your Shell dealer enjoys seeing that your car gets the care it deserves. He offers you the finest kind of service and the best of Shell products. Get acquainted with your local Shell dealer today!

**Westex Oil Company supplies Shell products to retail outlets in the following cities in the Permian Basin:**

- COLORADO CITY
- BIG SPRING
- LAMESA
- ODESSA
- MONAHANS
- McCAMEY
- GARDEN CITY
- PYOTE
- DENVER CITY
- ANDREWS
- SEMINOLE

In New Mexico:

- EUNICE
- HOBBS
- LOVINGTON

and in Midland:

- K&K TIRE COMPANY, West Wall St.
- BURKETT SHELL SERVICE, West Wall St.

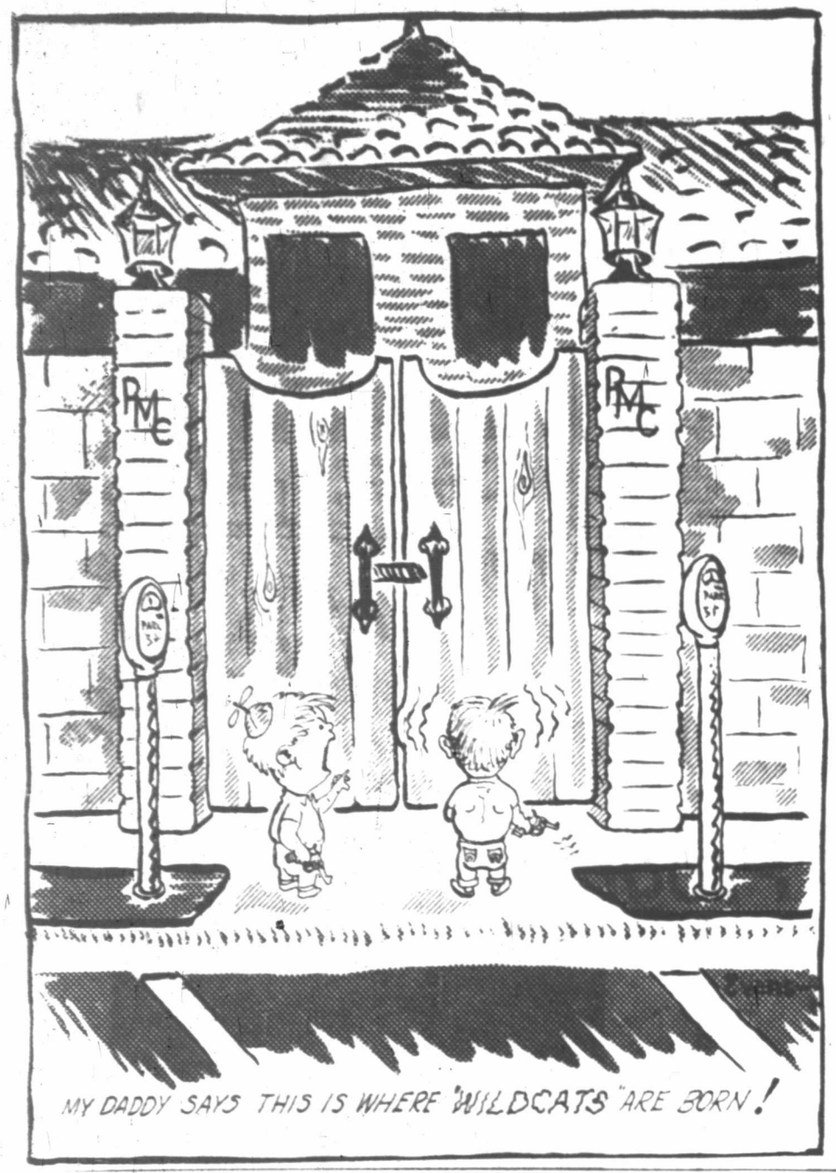
## Permian Pete — By Bob Evans



## Noiseless Electricity Aids In Fight Against Pipe Line Corrosion

A noiseless technique used by allied agents during World War II to generate electricity for radio broadcasting behind enemy lines has been adapted to combat corrosion, which annually takes a five billion dollar toll of U. S. industrial installations.

According to the October issue of World Oil, the device is a thermopile generator which takes electricity directly from a flame. Its working principle is simple — although not well known. When two pieces of dissimilar metals have been joined together are heated, they generate a small quantity of electricity. The design of the thermopile generator exploits this phenomena through use of hundreds of bonded metallic strips.

El Paso Natural Gas Company has installed three of the generators on pipe lines in the rugged vastness of New Mexico and Arizona.

**No Maintenance**

The wartime value of the device was that it made no noise that would alert the enemy. The peacetime value is that it requires almost no maintenance. The generator has no moving parts, but operates off a gas flame which creates enough electricity to light up a small bulb. The electricity goes from the ground into the pipe line—reversing the process which causes corrosion—and protects about 25 miles of five-inch line in the highly resistant soil of Southwest Arizona..

A maintenance man comes by once a month, but so effective are the generators that the only trouble he can expect is from rattlesnakes, which in cool weather seek warmth in the lonely little huts housing the little gas flames.

### Beall Now With Warren-Bradshaw

William B. Beall, formerly associated with The Carter Oil Company as assistant landman at Oklahoma City, has joined the staff of Warren-Bradshaw Exploration Company in the capacity of land superintendent.

Beall will be in charge of all land and leasing activities of the company with headquarters at Tulsa, Okla.

**MOST DUCTILE METAL**

Gold is the most ductile metal known, and can be beaten to leaves of extreme thinness, one ounce providing as much as 300 square feet of leaf.

HEADS COMMITTEE — Bob Durrett, Odessa supply store manager, is chairman of the Operating Committee for the Permian Oil Show.

## Well Completions Continue Decline

AUSTIN —(AP)— Oil well completions, still on the decline, totaled only 110 in Texas last week.

The Railroad Commission reported the year's total was 8,427 compared with 8,524 at the same time a year ago.

Gas well completions also were down. Two last week brought the year's total to 658 compared with 679 a year ago.

There were 115 dry holes.

Wildcat drilling led to 10 oil wells and 80 dry holes.

Plugged wells included 115 dry, nine gas, and 70 oil.

The total average calendar day crude allowables as of Saturday was 3,284,705 barrels, up 2,812 from week ago.

*Classified Ads Get Results!*

## Livestock

FORT WORTH —(AP)— Cattle and calf prices were highly uneven during the week. Steers and yearlings were steady. Cows were sharply lower by $1 to $2 per hundred and some spots more. High quality stockers were steady to weaker, and very little demand was noted for others. High grade fat calves cleared at about steady prices, with others from steady to unevenly lower. No hogs or sheep were received here last week as the yards remained closed to those classes as cleaning and disinfection of the facilities was completed following the outbreak of vesicular exanthema late the preceding week.

Comparative prices: slaughter steers and yearlings $10-31; slaughter cows $6-16; slaughter calves $10-$26; stocker calves $26 down; stocker yearlings $24.50 down; stocker heifers $21.50 down; stocker cows $12-$16.50.

*Attend the Permian Basin Oil Show, Odessa, October 16-19*

PROGRESS and PETROLEUM GO HAND IN HAND!

We salute the Petroleum Industry and the progress it has made. Without petroleum the wheels of progress could not turn. So when we say "PROGRESS AND PETROLEUM GO HAND IN HAND," let us all join hands in making our salute to a great industry.

WASHINGTON OIL—

# 'Cartel' Issue May Result In New Federal Legislation

By JOSEPH HUTTLINGER
Reporter-Telegram Washington Oil Correspondent

WASHINGTON—The final solution to the "oil cartel" issue now before the U. S. courts and a federal grand jury may prove to be passage of a law by Congress, perhaps as early as next year.

The purpose would be to set out clearly what is legal and what is not as regards foreign oil operations. It could apply, also, to other industries.

Already there is some talk along these lines. If the talk turns into action, the paramount legislation, as regards oil in the next Congress, may be just a measure of this sort.

A wealth of precedent makes clear that Congress can legislate in virtually any field it likes. In fact, it has legislated several times to make even cartels legal.

Bruce K. Brown, former deputy petroleum administrator, pointed out this week in Tulsa that tobacco growers have a "pure cartel" in acreage and marketing quotas. The same might be said for cotton, wheat, corn and other crops. Specific legislation permits the agreements.

The U. S. State Department has given its active support, if not leadership to the creation of specific cartels. Thus, as Brown points out, we have the Schumann plan, to pep up Europe's steel industry, as a prime example.

In petroleum, specifically, there are precedents. For one there is the now defunct Anglo-American oil treaty of 1944, revised a year later. As the Independent Petroleum Association of America pointed out, this was "the design for the progressive germination of cartels under government blessing." Upshot was the Senate refused to approve the treaty, and President Truman withdrew it this Summer.

**Proration System Cited**

Under the proration system, U. S. crude oil production is limited to market demand to prevent waste. Despite this laudable end, the system would be illegal but for specific legislation enacted in the 1930's.

The need for the government to get together and tell the American companies exactly what the rules are is apparent from the disaster stemming from the split-personality of government today. State, Defense and Interior Departments, generally, believe American companies abroad have done a magnificent job. They shudder to think what the nation would face without the oil under their control.

On the other hand, the Federal Trade Commission, the Justice Department and, perhaps only before elections, at least two committees of the U. S. Congress are accusing the foreign oil operators of a variety of misdeeds.

The "great immaturity and recklessness" in government is pointed up by allegations of Senator Thomas J. Hennings (D-Mo) according to Brown. While he did not name the senator, said of him:

"By a remarkable straddle overbage he managed to suggest (1) that the 'cartel' had flooded the United States with imported crude, thus impairing the interests of domestic producers and, at the same time, (2) that the catrel had refused to permit any shipments of foreign crude to this country to meet the need of independent refiners and consumers generally."

**Higher Court Appeal**

A new law, if it comes, need not wait upon completion of government actions against oil in the courts and before the grand jury. That might take long time.

At the end of the week, the stage had been set for an appeal to the U. S. Supreme Court—not on the main issue of the case, but on whether the proceedings should be moved to New York.

Federal Judge James R. Kirkland turned down the companies on that Monday. Later in the day, by fast footwork, the companies persuaded the U. S. Court of Appeals to see if the judge had made the proper decision. The appeals court will hear arguments October 15.

A U. S. Supreme Court appeal of the ruling, however it goes, is predicted. Meanwhile, the federal grand jury, called in six weeks ago, is finding little to do, as the courts, generally, keep extending the time companies must turn in their subpoenaed records.

ON SHOW BOARD — Charles Foster, Odessa production man, is a member of the Board of Directors of the Permian Basin Oil Show.

**SPIDER-WOMAN TRIBUTE**

The Navajo Indians believe that a "spider woman" taught them the art of weaving and for many years every blanket was woven with a spider-hole in the center as a tribute to her.

About one-fifth of all life insurance in the United States is owned by women.

**OLDEST?**

The oldest continuously inhabited community in the United States is held to be Oraibi, Ariz., which has been the home town of generations of Hopi Indians since 1200 A.D.

Some kinds of May flies achieve mature form in the evening, mate, lay eggs and die before morning.

**MIDLAND BANKS WILL BE CLOSED MONDAY**

The two Midland banks, The First National and The Midland National, will be closed Monday in observance of Columbus Day, which this year falls on Sunday, officials of the two financial institutions announced Saturday.

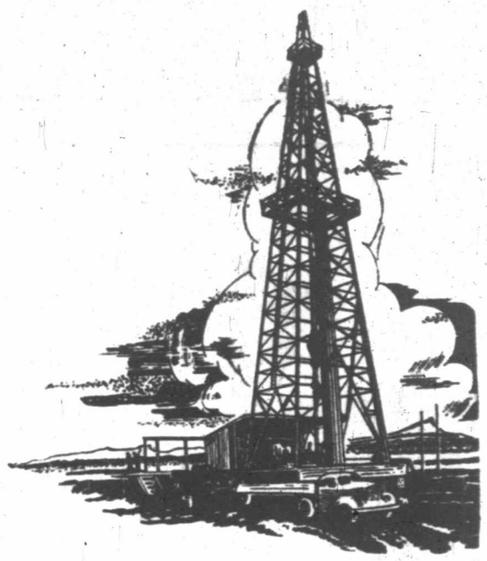
OIL FOR FREEDOM



LOOK TO WEST TEXAS
*Our Part in Freedom:*
- 1/3 of the estimated oil reserves of Texas.
- 1/5 of the estimated reserves in the U. S.
- The most active oil area in the world.
- West Texas consistently has more new discoveries than any other region.

Our future security and the security of many nations aligned with Freedom depends upon petroleum. To win any kind of war, hot or cold, it depends on us—the oil industry—planning and working to be ready to meet any demands and any difficulties.

Our greatest peril today is that we and the nation, abandon too far the Freedom of Enterprise without which we could not have achieved our present superior ability to fight.

Let us continue, during this emergency, to get ready for the worst while hoping for the best—keeping pace with the ever-increasing needs of the people, at the same time mobilizing with fighting efficiency our vitally needed product—oil, for Freedom.

CARL B. KING
DRILLING COMPANY OF TEXAS

. . . . THE VITAL FLUID THAT FLOWS THROUGH THE VEINS OF INDUSTRY . . . FUNDAMENTAL SOURCE OF POWER FOR THE MYRIAD MACHINES THAT MEANS BETTER LIVING FOR ALL AMERICANS AND A STRONGER DEFENSE AGAINST OUR ENEMIES.

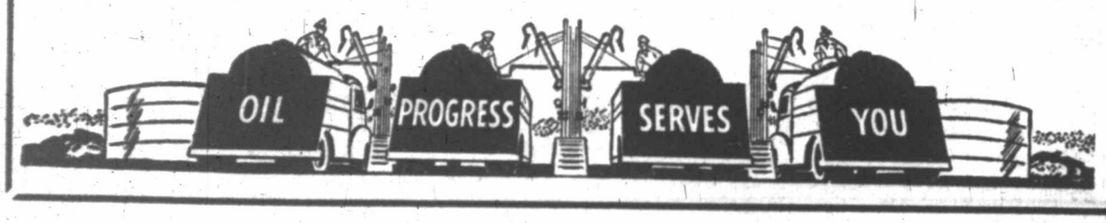
U. S. Oilmen Meeting Biggest Petroleum Product Demands In History

Defense authorities have issued an urgent call to U. S. oil companies for sharply increased supplies of jet fuel, as a result of greatly stepped-up air activity.

Since jet fuels are made from the same base stock as heating oils, this new demand adds to oilmen's present problems in meeting this winter's record heating oil need. Motorists are also using more gasoline than ever before.

In spite of these sharply increased demands, U. S. oilmen are presently meeting all military and civilian needs. They are able to do this because they have constantly planned ahead, plowed back much of their profits into expansion, and taken great risks.

This is the only way America's demand for more and more oil can be met: under a system of free competition where privately-managed oil companies have a chance to stay in business by earning a profit while serving you.



During "National Oil Progress Week," we take this opportunity to salute the oil industry and say we're proud to be playing a part in its progress.

## Mrs. Ingram Aids Red Feather Unit

Mrs. C. E. Craig, chairman for the south side for the Residential Division within the General Gift Division of the Community Chest Drive, has announced that Mrs. L. Ingram will serve as her co-chairman.

Mrs. Craig and Mrs. Ingram now are selecting captains and workers for their division: Any woman living in the south section of the city who would like to volunteer to assist with the solicitation for the drive are asked to contact Mrs. Craig, telephone 2-1425.

# Oil Field Activity Increases Garden City's School Rolls

GARDEN CITY — Enrollment at the Garden City school has climbed to new heights this year. Supt. John F. Jones attributed much of the increase in students to expanded oil field activity in Glasscock County, with many new families moving in. High school attendance has grown from 42 last year to 64 students at present, and the grade school has increased from 176 to 196.

Jones reports all but one of his high school teachers now have masters' degrees. Many of the faculty improved their educational backgrounds through Summer courses in teacher training.

New credits are being offered this year in beginning and advanced shorthand. Superintendent Jones is conducting these classes. Three adult students are studying typing and shorthand as part of an adult educational program and future expansion of the adult courses is under consideration.

Principal R. T. Newell of the Garden City High School reported that Dorothy Leonard, Odessa, has taken charge of the homemaking classes at the school.

The vocational agriculture program, under the guidance of M. A. Barber, is going ahead with the addition of a new barn at the Garden City school. Plans already are under way for the annual stock show in February. Boys from the school bring lambs, calves and other stock for the event to be auctioned. This assignment is a required project for agriculture students.

Richard Dodd, head teacher of the grade school, has three new instructors in his department. They are Mrs. Oscar Pettit, third grade; Mrs. R. C. Dodd, second grade; and Mary Alice Mitchell, fifth grade.

There are 15 teachers at the Garden City school now, including the superintendent and the principal.

**Hot Lunch Program**

The hot lunch program, administered by Mrs. A. H. Self, now is providing lunches for more than 200 students each day. A minimum fee is charged to help defray expenses.

Principal Newell said that two bus routes have been added for the school system in Glasscock County. Two new buses have been purchased, making a total of nine buses for eight routes. One bus is used as a spare.

New lockers have been constructed for student use, and Mrs. Rube Ricker, librarian, has added new reference works to her collection.

Four modern residences for teachers at the Garden City school have been built in Garden City. They all have been located near the main educational plant.

In the athletic department, new football equipment already has been purchased for the football team, and basketball uniforms are on order for the girls. The Garden City A team, a six-man aggregation in District 8, has had four straight victories so far this season. The B team has played one game, and won it.

The Garden City school is a recognized member of the Southern Association of Secondary Schools and Colleges.

We are proud to have a part in the great progress of oil that brings better living to our nation . . . grateful to the American system of free enterprise and keen competition on which oil progress is founded.

## Price To Drill Deep Wildcat—

(Continued From Page One)

A. Albaugh of Midland, No. 1 Marmell, 9,079-foot wildcat which has been temporarily abandoned since January, 1951.

The Albaugh project has never been plugged and no official information on it has been released.

**Good Indications**

Unofficial sources had reported that it had shown good indications of production in the Pennsylvanian lime and also in a lower Permian formation.

It is reported by some observers that the Lawless No. 1 Harmell topped the San Andres-Permian lime approximately 30 feet high to the same marker in the Albaugh No. 1 Harmell.

Those same sources also have reported that the Lewless wildcat logged some interesting shows of oil and gas in the San Andres.

So far as has been reported those shows have not yet been tested.

## Two New Oilers Are Completed In Spraberry Fields

Cities Service Oil Company No. 2-16 Merchant has been completed as a Spraberry producer in the Weiner-Floyd field of Northwest Reagan County.

It was finaled for a daily flowing potential of 457 barrels of 38.1-gravity oil plus 1.25 per cent basic sediment through a 30/64-inch tubing choke and from perforations at 6,545-80 feet. Pay was fractured with 3,000 gallons. Gas-oil ratio was 629-1 and tubing pressure 400 pounds.

Location is 1,988 feet from east and 662 feet from north lines of section 16, block B, L&SV survey.

**Benedum Area**

Hewgley Drilling Company No. 1 University is a new oiler in the Benedum (Spraberry) field of Central-East Upton County. It was finaled for a daily flowing potential of 222.68 barrels of 40.5-gravity oil plus 3.4 per cent water. Gas-oil ratio was 532-1.

Production was through a 22/64-inch tubing choke and from open hole at 7,359-7,430 feet.

Tubing pressure was 150 pounds. Pay was fractured with 3,000 gallons.

Location is 654-18 feet from north and 673 feet from west lines of the southeast quarter of section 13, block 58, University survey.

Hanley Company of Midland No. 2 Frances Moeller is a new 7,900-foot Spraberry test in the Driver area of Southeast Midland County. It was staked 660 feet from north and west lines of section 10, block 37, T-5-S, T&P survey and five miles northeast of Midkiff.

## Midland Concern Slates Wildcat In W-C Crockett Area

Taber, Colefman & Carr of Midland spotted location for a 2,600-foot cable tool wildcat in West-Central Crockett County, five miles east and slightly north of Sheffield.

It will be drilled as No. 1 H. B. Cox, 330 feet from south and 1,980 feet from west lines of section 42, block GG, HE&WT survey.

Location is three miles northwest of the Clara Couch field.

## Wilshire Extends Production North In W-C Upton Pool

The Wilshire Oil Company, Inc. extended Ellenburger production one-half mile to the north in the Wilshire (Ellenberger) area of West-Central Upton County, 18 miles northwest of Rankin.

The new producer is No. 32-130 McElroy Ranch Company. It was potentialed for a 12-hour flowing gauge of 1,001 barrels of 53.8-gravity oil through a three-quarter-inch choke. Gas-oil ratio was 599-1 and tubing pressure was 325 pounds. The Ellenburger was topped at 12,259 feet.

Location is at the center of the northeast quarter of the northeast quarter of section 130, block D, CCSD&RGNG survey.

## Magnolia Stakes Parks Explorer In Midland Sector

Magnolia Petroleum Company No. 10 Roy Parks is to be a new exploration in Central-West Midland County. It is inside the proven limits of the Parks (Pennsylvanian) field.

Location is 10 miles southwest of the city of Midland and 660 feet from north and east lines of section 9, Matt Daugherty survey, A-884.

Drilling to 11,000 feet or a test of the Pennsylvanian at a lesser depth is to be started at once. Rotary tools will be used.

## No Oil Developed In Ellenburger Top At Andrews Project

Phillips Petroleum Company No. 1-FF Texas University, one-mile east outpost to Ellenburger production in the Embar field of Central-South Andrews County, was preparing to take a re-test in the Ellenburger on total depth of 12,576 feet.

The Ellenburger was topped at 12,500 feet, elevation 3,223 feet.

A drillstem test was taken from 12,547 to 12,576 feet. Tool was open 90 minutes. Recovery was 4,175-foot water blanket, 2,640 feet of gas-cut mud and 4,916 feet of slightly salty sulphur water.

Location is 2,033 feet from west and 664 feet from south lines of the northwest quarter of section 28, block 10, University Lands survey.

## Muth Completes Reef Producer In Kelley-Snyder

E. J. Muth of Dallas No. 1 Moore Creek Missionary Baptist Church has been completed as a pumping producer in the Kelley-Snyder field of Scurry County.

It was finaled for a daily potential of 70.72 barrels of 42.2-gravity oil and no water through perforations at 6,848-6,870 feet.

Pay was topped at 6,832 feet, elevation 2,442 feet. Total depth is 6,921 feet.

Surface location is 208.335 feet from north and west lines of the lease in section 246, block 97, H&TC survey.

When the application asking permission to drill the well was filed with the Railroad Commission of Texas, operator listed proposed bottomhole location at 341.67 feet from north and west lines of the section.

## Western Natural Amends Location For Terrell Test

Western Natural Gas Company has amended location for its No. 1 M. H. Goode Estate, wildcat in the Goode Gas field in Central-East Terrell County.

It will now be drilled 1,980 feet from west and 600 feet from north lines of section 27, block 161, GC&SF survey. It is 38 miles southwest of Ozona.

Projected depth is 6,500 feet. It is one-half mile south of a gas producer, completed at total depth of 9,410 feet.

## Standard Abandons Hobo Project In SE Borden Field

Standard Oil Company of Texas No. 6-D-13 T. L. Griffin, project in the Hobo field of Southeast Borden County, has been plugged and abandoned on total depth of 7,199 feet in the Pennsylvanian.

The reef was topped at 7,189 feet on a minus datum point of 4,825 feet.

Salt water developed at total depth.

Location was 1,018 feet from south and 467 feet from west lines of the southeast quarter of section 39, block 25, H&TC survey.

## Atlantic Abandons SE Reagan Tester

The Atlantic Refining Company No. 1-E-48 University, project in the South Barnhart field of Southeast Reagan County, has been plugged and abandoned in the Ellenburger on total depth of 9,625 feet.

Location was 660 feet from south and west lines of northeast quarter of section 22, block 48, University Lands survey.

## NE Lea Pool Is Given New Test

Magnolia Petroleum Company No. 1 Hooper is to be drilled as a 9,800-foot project in the Bough (Pennsylvanian) area of Northeast Lea County.

The project will be dug 330 feet from east and 2,310 feet from north lines of section 11-9s-35E.

Operations are to start at once.

## Glen Cove—

(Continued From Page One)

Glen Cove East Jennings Field to have four wells for a daily allowable of 320 barrels. The Glen Cove Fry Field had six wells for a daily allowable of 210 barrels, and the Glen Cove Serratt Field, one well for a three barrels daily allowable.

**DR. LORING IN CHICAGO**

Dr. Milton J. Loring, opthamologist, 304 North N Street, left Saturday to attend the annual academy meeting of American board specialists in Chicago. The study of opthamology and otolaryngology will continue through October 20.

OIL SHOW BOARD—Don Payte, president of an Odessa and Abilene machinery company, is a member of the board of the Permian Basin Oil Show. He has underwritten $500 of a $1,000 college scholarship for an Oil Show-sponsored essay contest on the oil industry.

## New Resident Breaks Tradition Of Family In Westward Move

A modern trek westward from Elizabethtown, Pa., ended here last month. J. L. Nissley, a former Pennsylvanian who now lives in Midland, proved once again that new Midlanders come here from all parts of the United States. It was the first time in generations that any of his family had left Pennsylvania.

Nissley lives at 311 North G Street with his father, H. H. Nissley, and his aunt, Mrs. Kate E. Putt. Both of his relatives came with him when he made the move, and neither one had ever lived permanently outside Pennsylvania. Both are in their 80's, and the younger Nissley is the only one of the three who has toured the United States extensively.

The new Midlander will serve here as land man for the Wilcox Oil Company of Tulsa, Okla.

Entertainment at the Permian Basin Oil Show will be geared to the entire family with ticket books priced at only $2 to cover all entertainment.

## McCamey Baptists Break-Ground For New Auditorium

McCAMEY — Ground-breaking services for a new auditorium for the First Baptist Church of McCamey will be held Sunday.

Immediately following the morning worship service, the congregation will march to the selected site of the new auditorium where ground-breaking ceremonies will proceed under the direction of the Rev. A. L. Teaff, pastor.

M. J. Woodson is chairman of the building committee, and W. H. Carter heads the finance committee. Cecil Sullivan of Abilene will supervise the building project. Construction will get underway Monday.

The auditorium, which will seat 622 persons, will be of brick veneer construction.

Mr. Teaff assumed the pastorate of the church here earlier this year, coming to McCamey from Midland, where he was pastor of the Calvary Baptist Church.

# Drouth Hay Not For Relief Of Politicians, Shivers Says

AUSTIN —(AP)— Governor Shivers asked Saturday why the federal government is granting drouth disaster relief to Texas in "piece-meal fashion."

"As I understand it, this program is for relief of farmers and ranchers and not of political candidates," Shivers said in a tart telegram to Raymond A. Foley, Housing and Home Finance Agency administrator.

Foley's agency is responsible for the program, which is providing cheaper hay for Texas livestock in counties that have been designated as drouth disaster areas.

Shivers, who has questioned political implications of the federal aid hay program, again called on Foley to declare all of Texas a drouth disaster area.

Thus far, 172 counties of Texas' 254 have been included in the program.

The governor suggested to Foley that "announcements of the inclusion of additional counties should come from the state-wide Production and Marketing Administration Committee, which handles the hay program, rather than through a political party's campaign headquarters."

Shivers was referring to the fact that the Texas Stevenson-Sparkman Headquarters claimed it was Sam Rayburn's request to President Truman that got the 65 additional counties designated drouth relief areas.

# Industry Girds Operational Plans For Atomic Progress

By SAM DAWSON

NEW YORK—(AP)—The atom still wears a military uniform. But industrialists are getting ready for the day they may be able to put it in civvies.

"An aggressive company ought to be allied to atomic development," says E. J. Thomas president of Goodyear Tire & Rubber Company.

His company will run for the government a new atomic plant now in its first stages in Pike County, Ohio.

Already the by-products of atomic bomb making are being used in peace-time pursuits. Medicine has benefitted. And so have laboratories, notably those doing agricultural chemistry research, using some of the spawn of the A-bomb to make better plants and more nutritious food.

**Cheaper Power Seen**

Steps are well underway to hitch atomic energy to engines running submarines, airplanes and air carriers. Scientists say much cheaper and more efficient atomic-powered engines could be developed with more study.

Atoms also might one day not too far off be used to produce electric power at an economical cost for the nation's industries.

Thomas, however, shies clear of predictions along this line.

"We don't know how far reaching will be the effects of atomic energy on industry, or just how industry may ultimately make use of it," he admits. "But we feel that this is a development we should be in on from the start."

Key men in Goodyear already are being trained for their new jobs in the $1,250,000 plant which will be completed within four years in Southern Ohio.

**Training Underway**

They're getting their training from another industrial company already a veteran in the field—Union Carbide & Carbon, which plays the same role for the government at the Oak Ridge Tenn., and Paducah, Ky., atomic plants.

When the Goodyear key technicians have learned their lessons from the chemical company men, they in turn will teach another group of rubber company men, and so on, until about 700 technicians, many of the highest skills, are trained for their top-secret chores.

In full operation the Ohio atomic plant will employ 4,000 persons. Thomas says the majority will be hired from outside his company. But the key men will be chosen from its many wide-spread plants.

Although creating an A-bomb and making a tire are entirely different operations, Thomas says his men have all the basic knowledge and background in chemistry and physics, and all the general technical skill needed.

Many are eager to get into the new field.

**Changes Not New**

"Every employe we have approached with the idea of transferring to the atomic plant has accepted without reservation," he says.

Thomas sees nothing odd in a tire-making company getting into the atomic development field.

Goodyear started out making rubber tires for the buggy. When the auto replaced the surrey with the fringe on top the company swung over to auto tires.

When the plane came along, Goodyear went air-minded. During the war it made fighter planes and blimps.

Now it's going atomic.

"The one really new problem is that of the security aspects for the personnel," Thomas says. "Even during the war, the top secrets were nothing like these now ones will be.

"But industry can learn to live with it in the atomic age."

Half of North Carolina is forested.

## Bids On Midland Farm Roads Asked By Highway Bureau

AUSTIN—(AP)—Bids on 439 miles of highway and farm road improvements have been called by the State Highway Department for October 21 and 22.

Cost will run an estimated $9,500,000.

Projects on which bids will be opened October 21, by counties include:

Ector, Midland, and Upton—Farm Roads 1787 and 1788; 26.1 miles; grading, structures, base and surfacing from State Highway 51, 12 miles south of Odessa, east to State Highway 349; from Farm Road 1787, nine miles west to State Highway 349, to four miles south.

Taylor—Farm Road 604; 6.2 miles; grading, structures, base and surfacing from Guion to Farm Road 688.

El Paso—Farm Roads 258, 1505 and 1110; 3.7 miles; grading, structures, base and surfacing from Farm Road 76 through Clint to Farm Road 258 at San Elizario; and Franklin Canal bridges and island feeder canal pipe.

Projects on which bids will be opened October 22 include:

Hale and Floyd—Farm Roads 784 and 579, 11.9 miles; grading, structures, base and surfacing from Farm Road 1314 north of Petersburg to U. S. 62 south of Floydada.

Scurry—Farm Road 1606, 7.4 miles; grading, structures, base and surfacing from 8.7 miles southwest of U.S. 180 to Ira.

# WTCC Convention Cites Conservation As Major Subject

WICHITA FALLS—Soil replenishment and conservation of water and oil will be major subjects of the program of the thirty-fifth annual convention of the West Texas Chamber of Commerce here October 19-21.

The keynote address will be given Monday morning by J. Evetts Haley, director of the Institute of Americanism of Texas Technological College. His subject will be "Americanism Without an Apology."

Soil restoration in West Texas will be discussed by Joe S. Bridwell, Wichita Falls, a former WTCC president, and Paul Walser, Temple, state soil conservationist.

J. B. Thomas, Fort Worth, chairman of the governor's state-wide water committee, will discuss objectives of that committee. His address will follow a panel on water management and conservation projects in operation in West Texas.

Panel members will be Joe Pickle, Big Spring, secretary of the Colorado River Municipal Water District; Sam W. Cooper, Coleman, manager, Central Colorado River Authority; Fred Brown, Mineral Wells, director of the Brazos River Conservation and Reclamation District, and Tom McFarland, Lubbock, manager of High Plains Underground Water District No. 1.

General Ernest O. Thompson, member of the Texas Railroad Commission, will speak Tuesday morning on the significance of oil production and conservation in the economy of West Texas.

Other speakers will be Dr. James W. Fifield, pastor of the First Congregational Church, Los Angeles; Dr. W. R. White, president of Baylor University, Waco; and State Senator Dorsey B. Hardeman, San Angelo.

# Long Beach Sinks Into Sea As Oil Wells Pump Foundation Out From Under City

By JACK QUIGG

LONG BEACH, CALIF. —(AP)— This oil-rich city and its harbor industries are spending well over a million dollars a month—to keep dry.

For almost a quarter-century an area roughly six miles by 12 in the heart of the multi-billion dollar harbor—one of the world's biggest and busiest—has been sinking into the sea.

The center of this saucer-shaped depression in the earth's crust has dropped 17 1/2 feet and still is subsiding at the rate of two feet a year. Geologists expect it to continue dropping until about 1965, when the center will be down about 23 feet.

To keep tidewaters from inundating docks and waterfront industrial plants, government and private enterprise have undertaken what is probably the greatest harbor salvage operation of all time.

Barges literally are moving a mountain across the 21-mile channel from Catalina Island. Uncounted millions of tons of rock and gravel from a hillside quarry on the island are being molded into levies or dumped on low spots.

Another million and a half tons of fill material is dredged every year from the harbor bottom.

What causes the sinking?

Ironically, experts attribute it to the same sticky black stuff that has financed much of the harbor building program—oil.

Since the rich Wilmington Oil Pool underlying the harbor was tapped in 1932, close to 600 million barrels of crude, some 200 million barrels of water, and countless trillions of cubic feet of gas have been removed from its depths.

Geologists believe withdrawal of these fluids and gas, and the resulting decrease in underground pressure, is what has caused the land to settle slowly. Bolstering this belief is the fact that the area of subsidence coincides almost exactly with the area of the Wilmington Pool.

Subsidence began almost imperceptibly. It received little attention until 1938, when crews noticed tides weren't checking with recording gauges.

**Tide Gets Higher**

No one became alarmed until the 1940's, when the rate of sinking increased. Tidewaters began lapping uncomfortably close to the tops of docks and bulkheads. In some places it slopped over into city streets.

Spurred by necessity, industrial plants began walling themselves in. The Southern California Edison Company plant, on man-made Terminal Island near the harbor's main channel, lay exactly at the center of the depression. It now is rimmed by high earthen levies.

Other companies followed suit. The Union Pacific Railroad, with tremendous oil producing acreage on Terminal Island, has erected miles of bulwarks on its frontage.

**Costly Measures**

The Navy, which once considered abandoning its vast receiving station and shipyard for fear of water enroachment, has built four and one-half miles of concrete bulkheads for protection.

The City of Long Beach, piers awash, and sheds, warehouses, bridges and roads threatened, has done much already. But it recently had to earmark another 30 million to continue the work.

Freak effects accompanied the sinking. Compare the harbor area to a cake which has fallen, due to a sudden jar. Near its sunken center the cake's surface is wrinkled from compression. Near its edges there may be cracks from tension. The earth's crust behaved the same way.

In the compression area an 800-foot building was shortened 13 inches, fracturing columns and beams. The same effect buckled roads and railroad tracks. Two towers on a bridge were tilted toward each other. The structure was out of service for months while they were realigned and the span raised.

**Quake Plugs Wells**

In the zone of tension, sewer and utility pipe has been broken.

Probably the most costly damage was due to still another effect. Earth layers about the 1,700 foot level slipped inward toward the center of the depression, aided in part by earthquake jars.

The displacement was about 13 inches, enough to pinch off the casings of more than 200 producing oil wells. No one has attempted to compute the loss.

The estimate that more than a million a month is going to fight subsidence comes from R. H. Shoemaker, chief engineer for the Long Beach Harbor Department, considered the leading authority on the problem.

**Playing It Safe**

Shoemaker says the rate of sinking, which had been increasing steadily through the years, started to decrease about nine months ago and now is down about 10 per cent from the maximum to two feet per year.

The rate should continue to decrease until subsidence stops entirely, he says.

Shoemaker, in making his calculations, is playing it safe and using 1972 as the year it all will end. Instead of the predicted 23 foot depth he's using 25 feet. And he's building as city's protective bulkheads with a wide safety-margin—just in case.

**Plenty To Spend**

Fortunately, Long Beach can afford to spend plenty combatting the sinking. Its 624 city-owned wells last year producer 18,222,601 barrels of oil, worth 41 million dollars. It derives additional millions from participation oil deals with private firms.

Despite the city's riches, Shoemaker feels it would be impractical to attempt to halt subsidence. The method given the most consideration is injection of water deep underground. The theory is the water would restore pressure lost through oil well pumping. One survey estimated the cost of such a project at 323 million dollars. There is no guarantee that it would work.

Shoemaker can think of only one bright spot in the picture of the sinking harbor.

"It has deepened ship channels," he says.

REAMERS and STABILIZERS

Lit'l Oscar design and manufacturing features plus sound marketing policies virtually eliminate the risk of reamer operation.

FEATURES

- No welding in manufacture of the reamer and stabilizer bodies.
- Heat treating following final machining.
- Bodies furnished at "no charge"—complete maintenance and inspection service.
- Improved mounting of cutter assemblies and rollers.
- Free rotation of pin in blocks equalizes wear.

WE'RE EXHIBITING AT THE
PERMIAN BASIN OIL SHOW
ODESSA, OCT. 16th thru 19th
and would like to show you the Lit'l Oscar Reamer and Stabilizers and explain their advantages.

# Better living for you ...through OIL PROGRESS

***To visualize the effects of oil prosperity one does not have to go farther than your front door . . . the prosperity of Midland, The Permian Basin and for that matter the entire state of Texas is vitally dependent on the Oil Industry . . . Texas largest.***

## *Oil Progress Is Planned Progress . .*

The growth of this industry to its present immense proportions has not been a happen so or a miracle. Behind this phenomenal progress lies a story that is typically Texan . . . typically Free American. It is a saga of men of vision, tenacity, and ambition going all out in an atmosphere of freedom . . . a freedom which has been handed down to us from the pioneers who first settled this rugged domain and made it do their will. The laws which fostered and governed this development were the natural economic laws of supply and demand, profit and loss, and of reasonable gain as an incentive to bold venture.

## *Oil and Texas . . .*

We, as members of the great fraternity of Texas oilmen, are proud of the part the industry has had in developing the general welfare of the state, the school systems and all phases of industrial activity. The Oilman has left no stone unturned to promote a Free Enterprise system that will prove a spur of ambition to those who oppose the yoke of regimentation and price fixing. Texas Oil and Texas Oilmen will continue to meet the challenge of normal progress, furnishing power for factory, foundry and farm, fuel for ships, trains, trucks and planes. The Oil Industry has full faith that the United States of America will continue to be a going concern under the Free Enterprise system and that Texas Oilmen will continue to do their part to keep it so.

# Seven States Represented In Oil Progress Week Exhibits

Twenty-nine communities in seven states are represented in the 200 exhibitors signed up for the Permian Basin Oil Show in Odessa October 16-19.

They run the gamut of oil and related products and services from mud to motors and rigs to regulators. Admission will be free to the oil show grounds in Ector County Park from 10 a.m. to 10 p.m. daily Thursday, Friday and Saturday and from noon to 10 p.m. Sunday.

Kickoff event will be the big downtown parade at 10 a.m. Thursday. Bands from as far away as Jal, N. M., will participate along with floats, oil field rolling stock and mounted groups.

Cotton Clover, show manager, is making plans for visitors totaling 75,000 to 100,000 at this major West Texas event during Oil Progress Week.

Youth education day has been announced for Thursday when special invitations will be out for young people to visit the show. Further interest in youth has been shown in the announced $1,000 college scholarship essay contest sponsored by the oil show's Board of Directors.

Prize money totaling $1,000 will be given for the three top papers written by juniors and seniors in high school on the subject, "What the Oil Industry Means to ". Winning papers from each school in the Permian Basin are to be mailed to the Oil Industry Information Committee, Box 4232, Odessa, by November 21.

The OIIC, sponsors of Oil Progress Week, has helped make arrangements for the contest.

**97 Odessa firms**

Odessa is the leading city in oil show exhibitors with 97 firms and organizations listing Odessa as their headquarters or the place of residence of the man handling arrangements for their booths.

Included are Brown Well Service of West Texas, Weathermasters Inc., A. D. Appleby Industries, Michelin Tire Company, Cooper-Bessemer Corporation, Alvin Hall Machinery Company, Duke Electric Company, L & M Building Specialties, Baash-Ross Tool Company, Garrett Oil Tools, Inc., Downs and Clark, Brandon Company, Camco Gas Lift Company, William Cameron and Company, Cardinal Chemical, Inc., Cavins Corporation, Cody and Teague, Columbian Steel Tank Company, Continental Products Corporation, Corrosion Proof Fitting Company.

Daniel Orifice Fitting Company, DeFee and Wells, Harry W. Denton, Dia-Log Company, Diamond Bit Company, Dixon Water System Company, Dodson Chemical Company, Drilling and Service, Inc., Eastman Oil Well Survey Company, Electric Service and Supply, Empire Machinery Company, Engine Life Company, Engine Service and Supply, Equipment Engineers, Inc., Filter Queen Company, France Packing Company, French Tool and Supply Company, Fuller Equipment Company, Gates Rubber Company, General Machine and Supply Company, Geolograph Company, Inc., Grant Oil Tool Company, Great Lakes Corporation, Green Contracting and Engineering Company, Guiberson Corporation, Happy Company, Harbison-Fischer Manufacturing Company, Heap Equipment Company, Hercules Motor Corporation, Huffman Company, A. J. Hunt Contracting Company, Independent Eastern Torpedo Company and Chemical Process Company, Industrial Instrument Corporation.

J & J Steel and Supply Company, K-G Oil Tool and Service Company, Kerotest Manufacturing Company, Lufkin Foundry and Machine Company, Mallard Supply Company, Mid-Continent Plastic Company, National Tank Company, Odex Engineering and Equipment Company, Oil Base, Inc., Permian Mud Service, Petroleum Tool Company, Plains Machinery Company, Production Specialties Company, Rector Well Equipment Company, Rockwell Manufacturing Company, Rol-Pak Filter Service Company, Security Engineering Company, Inc.

Shaffer Tool Works, Sievers Company, Sivalls Tanks, Inc., W. L. Somner Company of Texas, Spencer Safford Loadcraft, Inc., Sperry-Sun Well Surveying Company, Stentz Equipment Company, Stewart and Stevenson Services, Sunshine Iron Works, Superior Paraffine Scraping Company, Technical Oil Tool Corporation, Texas Flange Company, Thaport Supply Company, Tillery and Parks, Tuboscope Company, Tucker and Morris Valve Service, United Magneto Service, Vance Supply Company, Vaughn and Company, Inc., Vinson Supply Company, Waukesha Sales and Service, Inc., Welex Jet Services, Inc., Western Chemical and Supply Company, Charles Wreatley, Inc., Worth Well Surveys, Inc., Odessa College and Oil Industry Information Committee.

**Midland Has 21**

Houston is second in the number of exhibitors with 22, while Midland is close behind with 21.

Representing Houston are A-1 Bit and Tool Company, Atlas Engineering Works, Bettis Corporation, Bower Specialty Company, Gribbin and Baylor, Grove Regulator Company, Hillman-Kelley, T. F. Hudgins, Kinzbach Tool Company, Inc., Lane-Wells Company, McCullough Tool Company, McEvoy Company, Oil Center Tool Company, Oil and Gas Directory, Rolo Manufacturing Company, Schlumberger Well Surveying Corporation, Texstream Corporation, Tom Wheatley, W-K-M Co., Warren Automatic Tool Company, Well Equipment Manufacturing Corporation and Wilson Supply Company.

Midland companies in the show include B. J. Service, Inc., Baroid Sales Division, Black, Sivalls and Bryson, Inc., Midland Mack Trucks, Cameron Iron Works, Diamond Oil Well Drilling Company, Drill Collar Service Company, Houston Oil Field Material Company, Hycalog, I. W. Hynd Company, Johnston Testers, Inc., V. A. Kelley, Lynes, Inc., MWL Tool Company, Mud Control Lab, Muldrow Aerial Surveys Corporation, Murray-Young Motors, Ltd., Parkersburg Rig and Reel Company, Shell Oil Company, Western Company and Western Inspection Company.

Tulsa has the fourth biggest representation in the show, 13 companies, including Baird Manufacturing Company, Petroleum Specialty Company, Dowell, Inc., Enardo Manufacturing Company, Franks Manufacturing Corporation, Moran Furnace and Sheet Metal Company, Mud Products, Inc., Murdock Tank and Manufacturing Company, Orbit Valve Company, Pacific Pumps, Inc., Snyder Company, Specialty Sales and Service, Inc., and United Supply and Manufacturing Company.

Fifth in exhibitors is Dallas with 10. These include American Association of Oilwell Drilling Contractors, Bell Rubber Company, Buda Engine and Equipment Company, Climax Engine and Pump Manufacturing Company, Fairbanks Morse and Company, Jones-Blair Paint Company, Magnaflux Corporation, Otis Pressure Control, Inc., Rhinehart Oil News Company and Varel Manufacturing Corporation.

The only other cities with more than two exhibitors are Los Angeles with four and Fort Worth with three.

**California Exhibits**

Here from Los Angeles will be exhibits of Howard Supply Company, Kraloy Plastic Pipe Company, Inc., Pelton Water Wheel Company and J. P. Ratigan, Inc.

Fort Worth exhibitors include General Industrial Supply Corporation, Double Seal Ring Company and Maloney-Crawford Tank and Manufacturing Company.

Austin has two, Robert McIntrye and Texas Department of Public Safety; Oklahoma City two, American Iron and Machine Works and Fluid Power Corporation; Lubbock two, Anderson Young Electric Company and Clowe and Cowan, Inc.; Hobbs two, Christensen Diamond Products Company and Sweet Oil Well Equipment, Inc., and Amarillo two, Young Sales Corporation and Phillips Petroleum Company.

Texas cities with a single exhibitor include Big Spring, Cosden Petroleum Corporation; Denver City, Frontier Chemical Company; Borger, J. M. Huber Corporation; Longview, LeBus International Engineers, Ltd., and LeBus Rotary Tool Works; Mineral Wells, Perry Equipment Corporation; Breckenridge, Rust-Oleum Corporation; Iowa Park, Thompson Tool Company; Wichita Falls, Kirklee Production Engineering Company and El Paso, Boyd Industrial Engineers, Inc.

Others with single exhibitors are Chicago, National Safety Council; Libertyville, Ill., Anchor Coupling Company; Toledo, Ohio, Champion Spark Plug Company; Beloit, Wis., Fairbanks Morse and Company Magneto Sales; Duncan, Okla., Halliburton Oil Well Cementing Company; Huntington Park, Calif., Kobe, Inc.; Okmulgee, Okla., New Deal Specialty Company, and Bartlesville, Okla., Reda Pump Company.

## McCamey Ike Unit Begins Operations

McCAMEY—A "Texans for Eisenhower" branch headquarters, staffed by women supporters of Ike, will be opened in McCamey Monday.

Mrs. David Johnston, chairman of the women's Eisenhower organization here, will head the new office. Included in her group of workers are Mrs. Jim Langdon, Mrs. E. W. Thorpe, Mrs. W. L. Van Atta, Mrs. L. E. Windham, and Mrs. J. C. Guyton.

Space for the new office was donated by C. W. Brown. The Ike enthusiasts already have mailed campaign postcards to all voters on the poll tax list of Upton County, and they are providing absentee ballots for McCamey voters.

The ancient Egyptian cubit was 20.62 inches long.

Texans have a natural interest in the oil industry, which is so important in their State, and in the progress made since Oil Progress Week was last observed.

Here are a few quick facts:

**NEW WELLS**
During the twelve months ending August 31, 1952, the Texas oil industry drilled 17,000 new wells, at a cost of over $700 million. Most of the heavy expense of drilling these new wells was paid from earnings plowed back into the development of the State's oil resources.

**RESERVES**
Proved oil reserves in Texas of 18 billion barrels represented 57 per cent of the U. S. total at the beginning of 1952. During 1951, the last year for which figures are available, proved reserves increased two billion barrels. These are *developed* oil reserves and the figure is important: developed reserves supply our needs currently and provide reserve capacity that is immediately available when we need it.

**REFINING**
The Texas refineries will have a big year. They now employ, in round numbers, 46,000 Texans, and process about 28% of all the oil refined in the U. S. The daily refining capacity of all Texas refineries exceeds 2,000,000 barrels. A program to expand and improve these facilities has been general throughout the industry.

**PRODUCTION**
Production has reached a record level. Texas currently is producting about 46 per cent of all the crude oil produced in the U. S. In the year ending August 31, Texas production totaled about 1,015 million barrels. There are now 133,800 producing oil wells in Texas.

**TAXES**
The Texas oil industry continues to be the largest tax-payer in the State. Through the year ending August 31, gross production taxes alone on Texas oil and natural gas amounted to more than $137 million; in addition, the industry pays large amounts in other taxes.

**TRANSPORTATION**
The total mileage of Texas' trunk pipe lines for oil and finished products is over 29,000. This low-cost transportation system is a major factor in the maintenance of the low prices you pay for petroleum products.

**HUMBLE**

**TEXAS OPERATIONS**

**Twelve Months Ending August 31, 1952**

| | |
|---|---|
| Wells Drilled | 891 |
| Average Production, in barrels daily | 330,100 |
| Employees in Texas, August 31 | 17,775 |
| Baytown Refinery: Average crude runs to stills, barrels daily | 249,310 |

**Humble Pipe Line Co.** operates 5,895 miles of trunk lines for oil and finished products, which had transported a daily average of 722,600 barrels in the year ending August 31.

In brief, the Texas oil industry during the past year continued to do its part in meeting the demand for oil. It has expanded pipelines to provide low-cost transportation. It has improved facilities for making more and better petroleum products for your use. Today, two gallons of gasoline do work that required three gallons in 1925; and the gasoline costs no more than it did then.

THE BEST INVESTMENT FOR YOUR ADVERTISING DOLLAR

Telephoto And Best Features | MIDLAND, TEXAS, SUNDAY, OCTOBER 12, 1952 | SECTION FOUR

## ☆ Midland Camera Club ☆

**ENLARGING PRINTS**—Mrs. A. V. Reid, left, and Mrs. Joe V. Birdwell, both members of the Midland Camera Club, practice enlarging prints in the Palette Club Studio where the "shutter-bugs" hold regular Thursday meetings. Along with programs, lectures and critical discussions, the group sponsors photography field trips.

**'NOW ON THIS CAMERA'**—Each photographer has his own favorite type of camera. Here, A. J. Six points out the merits of a press camera to Larry Hecht who favors a twin reflex type. Looking on is Mrs. Six. The club's next program will be on flash photography, with Randy Rubin of the Midland Studio and Camera Shop in charge.

**AND AFTER THE PICTURE IS TAKEN**—Mrs. Robert Turpin watches while C. J. Zabcik, left, develops a roll of film. Meanwhile, F. A. Douglass sets up the enlarger. The club studies all phases of photography, including composition, lighting, developing, enlarging and displaying the finished prints.

**STUDY SALON PRINTS**—Members learn many of the good and bad elements of photography through analyzing pictures taken by others. Criticizing the salon prints are, left to right, Jay H. Frazier, Betty Lewis and I. W. Hynd. The members are working on an exhibit of their work to be held next Spring.

**MEMBERS HELP EACH OTHER**—A. J. Six gives Maria Spencer some practical advice on adjusting her camera. Six is the club's vice president. Membership in the group is open to both beginning and advanced students of photography.

**PICTURE-TAKING SESSION**—Mrs. W. H. Rhodes poses for a portrait to be taken by A. V. Reid, club treasurer. Adjusting the light is E. E. Reigle. Officers, in addition to those mentioned, are G. G. McNary, president; Mrs. A. V. Reid, secretary, and Larry Hecht and I. W. Hynd, program chairmen.

# Elizabeth VanBuskirk, G. S. Leachman Wed

Elizabeth Ann VanBuskirk became the bride of George Situs Leachman II in a ceremony at 8 p.m. Saturday in the First Methodist Church.

The bride is the daughter of Mr. and Mrs. H. M. VanBuskirk of the Magnolia Camp. She attended Ward-Belmont College for Women, Nashville, Tenn., and was graduated from Southern Methodist University, Dallas.

In college, the bride was a member of Pi Beta Phi Sorority; Phi Theta Kappa, honorary fraternity; Beta Kappa Gamma, comparative Literature honorary fraternity; Arden Club; and Zeta Phi Eta, professional speech fraternity for women.

**To Live In Dallas**

After October 20, the newlyweds will be at home at 3509 Westminister Street in Dallas, where the bridegroom is employed as chief development engineer for Peerless Manufacturing Company.

He is the son of Mrs. L. S. Leachman of Dallas and the late L. S. Leachman. He attended Tulane University, New Orleans, La., and was graduated from the University of Texas, Austin. He is a member of Sigma Chi Fraternity, Alpha Chi Sigma, honorary chemistry fraternity, and is a Mason.

Palms and four large sunburst bouquets of white mums and stock banked the church altar for the wedding ceremony. The altar bench was decorated with greenery and white tapers, and pews were marked with white tapers mums and greenery.

Officiating for the double-ring ceremony was the Rev. Luther Kirk, First Methodist pastor.

**Musicians Named**

Preceding the ceremony, George L. DeHart played a group of organ selections, including "Trumpet Tune" (Purcell), "Jesu, Priceless Treasure" (Bach), "I Call To Thee, Lord Jesus Christ" (Bach), "Air" from "Water Music Suite" (Handel), "A Lovely Rose is Blooming" (Brahms), "Night" (Jenkins), "Autumn Song" (Elmore) and "Communion" (Purvis).

Mrs. Wilson Blurton, soprano soloist, sang "Draw Near to Me" (Bach) immediately preceding the ceremony, and "The Lord's Prayer" (Malotte) during the ceremony.

Honor attendants for the couple were Carol Ceirco of Houston and Earl Y. Bateman, Jr., of Dallas. Serving as bridesmaids were Janet Myers of Oklahoma City, Okla., cousin of the bride, and Patricia Hamman. Ushers included John VanBuskirk, brother of the bride, Tom L. Carter of Camden, Don Sillers and Thomas Wassell, both of Dallas.

**Wears White**

The bride was given in marriage by her father. She was wearing a wedding gown of white, imported Italian silk taffeta. The fitted bodice was fashioned with petal point sleeves and had a square neckline trimmed with Alencon lace embroidered with seed pearls. The full skirt ended in a chapel-length train.

The bride's finger-tip veil was caught to a bonnet of embroidered lace and she carried a white orchid with garlands of white mum petals on a prayer book.

Dresses for the bride's attendants were in coral. Vertical rows of net ruffles adorned the ballerina-length, net skirts and the fitted bodices were of velveteen. The brides attendants wore hats of coral net ruffles and satin brocade shoes dyed to match their dresses. They carried bouquets of French pink carnations fashioned as wedding rings.

Mrs. George Situs Leachman II

Mrs. VanBuskirk, mother of the bride, wore a dress of ice-blue lace and chiffon with pink gloves and hat and an orchid corsage.

Mrs. Leachman, mother of the bridegroom, was gowned in mauve lace and chiffon with matching hat, white gloves and purple orchid corsage.

**Reception Held**

Assisting the couple in receiving guests for the reception in the Ranchland Hill Country Club were Mrs. VanBuskirk, Mrs. Leachman, Miss Ceirco, Miss Myers and Miss Hamman. Others in the houseparty were Mrs. Malcom Powell, Mrs. William Kotch, Mrs. Leroy Butler, Sally Carter and Peggy Rich.

The bride's table was decorated in white, with silver appointments. The center arrangement was of white carnations and silvered lemon leaves around two large silver wedding rings.

When the couple left on a wedding trip to New Orleans, the bride was wearing a white and black silk suit with black velvet trim. Her accessories were black and she wore a white orchid corsage.

Out-of-city guests included Mrs. C. R. Stewart, Mrs. M. T. Myers, Mr. and Mrs. C. E. Stewart and Elizabeth Czako, Oklahoma City; Peggy Rich, Odessa; Annie Morgan, Mrs. C. M. Selby, Mr. and Mrs. H. J. Plath, Mrs. Charles E. Turner, Betty Turner, Mr. and Mrs. Earl Bateman, Don Sillers and Mr. and Mrs. Tom Wassell, Dallas; A. J. Toole, Mineral Wells; Mrs. Aubrey Carter, Houston, and Mr. and Mrs. Tom Carter, Camden.

## Ortons To Establish Midland Residence

Mr. and Mrs. Dean Orton will be at home in Midland following their marriage Friday in the First Methodist Church in Odessa. The Rev. E. W. Parker, Methodist pastor, officiated.

Mrs. Orton is the former Doris V. Crawley, daughter of Mr. and Mrs. F. L. Elam of Sweetwater. Orton is the son of Mrs. A. Orton of Salt Lake City, Utah.

As nuptial music Dean Baker played "I Love You Truly." The bride chose a blue-grey suit with navy accessories and a corsage of red roses.

Hazel B. Winters, bridesmaid, wore a beige suit with pink accessories and a corsage of pink carnations. Sid Paulas served as best man for the bridegroom.

Orton is associated with radio station KCRS in Midland.

Your coffee maker should have a smooth surface that can be kept clean easily. Seams or crevices may store sediment which will become rancid and spoil the taste of your coffee.

## New Homes Boost Pecos Construction

PECOS—Wholesale building activities here in the latter half of September hiked the total valuation for the first nine months of 1952 to well above the building total recorded here the entire year of 1951, according to permit records at the city hall.

Two contractors, Wendell Faulkner and R. B. Atwood, obtained permits in late September for $63,000 and $35,000, respectively.

Faulkner purchased permits for nine $7,000 homes while Atwood obtained permits for seven $5,000 homes.

Valuation of new construction during the month of September was estimated at $126,750, bringing the 1952 total to date to $1,271,201. This represents an increase of almost $100,000 over the total 1951 figure of $1,173,318.

A radio-isotope is a radioactive atom that can be followed or measured by Geiger counters.

## The MATURE PARENT

### Prolonged Moral Disapproval Harmful Way To Punish Child

By MURIEL LAWRENCE

Mrs. N. and the children had been spending a month in the country with her sister.

When Mr. N. came up for a weekend, his son showed him a magazine ad of a fishing rod. After a dinner of steak, fresh corn and blueberry pie, Mr. N. was feeling expansive. "Okay, boy," he said, "if your mother tells me you've behaved when I phone her next Thursday, I'll bring up that rod for you. Now what do you say?"

Steve said, "Gosh, dad, thanks."

The following week Steve took his little pest of a cousin swimming with him every day. He emptied the garbage voluntarily. He remembered to hang up his swimming trunks on the line himself. He swept up dirt he tracked in four times—but when Friday came, there was no rod.

In the car driving home from the station, Steve did not talk much. His father poked him jovially and said, "Aw, come on, wipe that sour look off your face. You know that I like people to look happy around me."

"You lied," said Steve. He said it under his breath, but his father heard him. Steve was spanked and has been in disgrace ever since.

Now Mr. N. really cannot afford his indignation at his son. It is his personal problem—his belief that he could not help breaking his promise to Steve.

His habit of breaking promises has cost him progress as a person and several promotions in his work. His need to have "happy" people around him hides an unwholesome dependence on their goodwill and approval, so that to get them, he has come to rely upon bribery by promises of favors.

At the same time, Mr. N. violently resents this dependence on what others think of him—and indulges this resentment by breaking the promises he has made.

Of course, nobody in his office would dream of saying to Mr. N., "Look, Jim, you're wrecking your chances in this firm by your habit of asking clients to lunch—and then forgetting to set a date." Nobody ever mentions the quiet, but cruel fun made of Mr. N.'s custom of promising cases of liquor to customers that he never sends.

If they did try, Mr. N. would be furious, because he is so proud of the disposition that wants "happy" people about him and is absolutely unconscious that he wants them "happy" because he dreads their criticism.

Not even his wife would dare expose this miserable condition to Mr. N.

Only his child has dared.

Only the children dare tell us the truth, if we will let them. Our business friends, our neighbors, and relatives just tell the truth about us to each other.

Once there was an emperor who went parading through his capital without any clothes on. His tailors had said, "Only very clever people will be able to appreciate the wondrous garments we have made for the emperor." So, though he was naked, all the grownups clapped their hands as he passed, crying, "How gloriously is our emperor clothed!"

Only one of his subjects dared to say, "But look, the emperor is wearing no clothes at all!"

This subject was a child, Hans Christian Andersen tells us.

It is sad that the truthful child, like Steve, was unappreciated. It is sad because the emperor was making such a fool of himself. The stupid creature just held himself higher, threw out his chest and paraded on in his kingly robes of nothing at all.

DON'T STARVE TO TAKE OFF FAT

Here is an inexpensive home recipe to take off ungainly weight and help bring back alluring curves and graceful slenderness. Just get from any druggist, four ounces of liquid Barcentrate. Pour into pint bottle and add grapefruit juice to fill bottle. Then take just two tablespoonsful twice a day. Wonderful results may be obtained quickly. Now you may slim down your figure and lose pounds of ugly fat without back-breaking exercise or starvation diet! It's easy to make and easy to take. Contains nothing harmful. If the very first bottle doesn't show you the simple, easy way to lose bulky weight and help regain slender, more graceful curves, return the empty bottle for your money back.

LOST 20 POUNDS

"I have lost 20 pounds taking Barcentrate," writes Locele Campbell, Route 1, Grandview, Texas. "I feel so much better and am losing weight right along. No more bloating and puffed up feeling, since taking Barcentrate."

And Vira Belcher, Route 3, Box 167, Bowie, Texas, writes to say:

"I am well pleased with Barcentrate. It not only took off 18 pounds around my hips and abdomen, but it has made me feel so much better."

# College Girls Should Include Fragrance In Wardrobe Needs

By ALICIA HART
NEA Beauty Editor

Three excellent good-grooming accessories that should play an important part in your college life are scented dusting powder, matching scented soap and a generous bottle of cologne.

If you are in the mood for a different fragrance, you will find one particularly lovely French scent incorporated in all three of these preparations.

To be sure your fragrant additions to your wardrobe arrive on the campus safe and sound, pack them carefully.

For one thing, the bottles never should be more than three-quarters full to allow for expansion that usually is caused by heat or heights.

Of course, the top must be closed securely. Should you be taking along a bottle of perfume that has a ground glass stopper, seal it with wax (use one of the family candles) or get an inexpensive cork from your druggist.

To prevent the dusting powder from spilling, put a tissue over the power with the tissue edges extending over the sides of the box. Place the powder puff on top of the tissue and push the top of the box down over the tissue.

Always give these beauty preparations a final test for leakage. The extra time spent in packing will save you irritation, and will allow you to start your good-grooming ritual as soon as you arrive on the campus.

The smart co-ed should bring along such fragrance accessories as dusting powder, soap and a bottle of French cologne.

# Miss Schmid Is Wed To Donald Devenport

Betty Louise Schmid of Midland, daughter of Mr. and Mrs. R. E. F. Schmid of Dallas, was married to William Donald Devenport of Stanton, son of Mr.and Mrs. Silas Devenport of Snyder, Saturday in Dallas.

The wedding was held at 7:30 p.m. in the Gaston Avenue Baptist Church, with Dr. W. Marshall Craig, church paster, officiating for the double-ring ceremony.

The traditional wedding music was played by Bobby Cobb, organist. Mrs. O. G. Collins of Altus, Okla., violinist, played "Venetian Love Song" (Nevin) as the candles were lighted, and Gale Dunn sang "A Dream" (Bartlett), "Give Me Your Hand" (Dorothy Stewart) and "The Wedding Prayer" (Dunlap)

**Wears Satin**

Given in marriage by her father, the bride wore a dress of crystal white satin. The pointed basque bodice was designed with a dutchess wing collar and long sleeves tapered to petal points at the hands. The voluminous satin skirt, worn over double hoops and crinolines, swept into a fan-shaped train.

The bride's veil of Chantilly lace, sent by her sister from Paris, France, was caught to a halo of French illusion accented with pearls and drifted below her finger tips. She carried a white orchid with stephanotis and carnations.

Mrs. Howard P. Wiman of Lubbock attended her cousin as matron of honor and bridesmaids were Mrs. James E. Irion of El Paso and Mary Lou Davenport of Graham, sister of the bridegroom. Sherry Wiman of Lubbock was flower girl.

The matron of honor and bridesmaids wore ballerina-length dresses in rosewood net and velvet. The full net skirts were worn over taffeta in matching color and net stoles were attached to the velvet bodices. Fan-shaped bouquets in a lighter rose shade accented the costumes.

**Attendants Named**

Serving as best man was Eugene Morris Collins, Jr., of Floydada. Joe Devenport, brother of the bridegroom, and Lloyd McGluan, both of Snyder, were groomsmen. Ushers and candlelighters were E. W. Babb, Jr., of Midland and Howard P. Wiman of Lubbock.

The reception was held in the home of the bride's parents. Assisting in the houseparty were Mrs. Donald Ballard, Mrs. Clyde Welch of Fort Worth, cousin of the bride, Mrs. C. H. Irion of El Paso, Sally Toll of Kermit, Mrs. Russell Feeser of Dallas, Mrs. E. W. Babb of Snyder and Dana Pirtle and Hazel Ruth Schneider of Midland.

When the couple left on a wedding trip to Colorado, the bride wore a suit of Dior blue shadow tweed with a Melusine original hat in matching color, black accessories and a white orchid corsage.

**When they return, the newlyweds will establish residence in Stanton.**

**Lives In Midland**

The bride has been a resident of Midland for the last 18 months, employed by Phillips Petroleum Company. She was graduated from Texas State College for Women, Denton, where she was a member of Delta Phi Delta, national honorary art fraternity, Sigma Tau Delta and Philomathia.

The bridegroom is employed by Stanolind Oil and Gas Company. He attended Texas Technological College, Lubbock, where he was a member of Socii and the American Institute of Electrical Engineers.

Out-of-city guests for the wedding were Mr. and Mrs. Silas Davenport of Snyder, parents of the bridegroom; Mr. and Mrs. C. H. Irion, El Paso; Mrs. Bess Wilkie, Harrah, Okla.; Mr. and Mrs. Clarence Ford, Oklahoma City, Okla.; Mr. and Mrs. E. W. Babb, Snyder; Mr. and Mrs. O. G. Collins, Altus, Okla.; Ike Burnaman, Freeport; Mr. and Mrs. G. B. Ross, Mr. and Mrs. L. M. Gulleson and Mr. and Mrs. Clyde Welch, Fort Worth, and Nona G. Akard, Weatherford.

Mrs. William Donald Devenport

**BEE GRAVEYARD**

Each bee colony has its own graveyard, located near a stream of water. When a bee knows death is approaching, its duty is to walk to the graveyard, so is doesn't contaminate the other bees.

The First Continental Congress authorized the U. S. Marine Corps in 1775.

If you find a cigaret smoldering on your rubber flooring after the guests leave, there's no need to worry. One advantage to easy-to-care-for rubber flooring is that it won't burn. The cigaret will go out, leaving only a nicotine stain. A quick rub with a rug or mop, dampened in clear water, will remove the mark in short order.

# Nu Phi Mu Members Hold Program Meet

A program on Girlstown was given when Nu Phi Mu Sorority met Thursday night in the home of Anne Klebold, 1701 North Fort Worth Street.

Mary McKenzie spoke on Girlstown, telling how it was founded in 1949 by Amelia Anthony. A film on Girlstown was shown by Mr. and Mrs. Rudy Rubin, guests for the meeting.

During a business session, plans were made to hold a banquet in the Cactus Restaurant observing Founder's Day, October 20.

Refreshments were served by the hostess to Mr. and Mrs. Rubin, Marie Thompson, Bert Fuget, Billie Sinclair, Miss McKenzie, Stella Day, Clara Marks, Violet McNew, Jean Wadill and Ruth Ann Rhodes.

Let your toaster cool before you store it away. Either roll the cord up loosely or hang it over a hook.

## SO THIS IS NEW YORK

BY ROBIN CALLAHAN

NEW YORK—The clamor lately about all the crime in New York City is alarming and the hundreds of new policemen which have been added should help the situation a lot. But this condition is not new. It has been going on ever since the days of one-legged Peter Stuyvesant. Today crime gets more publicity. Just a hundred years ago when Walt Whitman worked on a Brooklyn newspaper, he wrote: "Don't go wandering about the streets or parks unnecessarily in the evening. New York is one of the most crime-haunted and dangerous cities in Christendom. If you have evening errands, go circumspectly through respectable streets. Don't be in haste to make city street acquaintances. Mind your own business and let other people mind theirs."

• • •

Lunching with Howard Carswell and Harry Hall, I was interested in their stories about famous men they know. Howard, who is from Kansas, is a public relations man in Wall Street and daily comes into contact with the world's leading financial figures. Harry, from West Virginia, now lives in Tennessee but spends much of his time in Washington, D. C., grew up with the Holts in his native state and is a good friend of Happy Chandler. He said the Treasury Department once got a letter from a woman in Arkansas which said: "I understand the Government is to give loyalty checks to its employes. I worked for the War Department during the war and had an excellent rating. Please don't overlook me when the Government starts to hand out these checks."

• • •

When Kenneth Keyes, Jr., was honorably discharged from Naval Intelligence after the last war, he turned happily to civilian life, his charming wife and children. But not for long. Polio struck him down and left him paralyzed in his lower limbs. As soon as he could, however, he got himself a motorized wheel chair, a dictating machine and a special desk at which to work. There for years he studied modern logic. The result: a fine book published by McGraw-Hill entitled, "How to Develop Your Thinking Ability." Instead of asking for more help, he spends his life helping others.

• • •

In the silk-stocking district of Manhattan, a young attorney named Harry Grossman is running for Congress against his better-known opponent. I was in the Army with Harry and have watched his campaign with more than ordinary interest. With typical efficiency and thoroughness, he is going after the weak spots of the other candidate. For instance, he found that his opponent was absent 75 per cent of the time from Washington when important votes were taken. So Harry has labelled him "the man who wasn't there," made an empty chair the symbol of his vigorous campaign and is asking the voters to "fill that chair with Grossman."

• • •

My hat is off to Roy Rogers, the movie star, and his wife, Dale Evans. On Sunday morning when most performers of the rodeo here were sleeping, Roy and Dale appeared on a television show in connection with the appearance of the new standard version of the Bible. Roy urged all boys and girls to go to Sunday School each Sabbath, said he and Dale went regularly, and announced that right after telecast, they would go to church. Needless to say, if we had more people like the Rogers family, show business would be more praised than criticized. Incidentally the new Bible sold more than a million copies before it was published—a record. Times can't be so bad in a country with that many "good" customers.

• • •

Manhattan Musings: attracted by signs here, one in a barber shop, "We need your head in our business" . . . about men's belts, "So nice to have around you" . . . in a bedding store, "Can you sue your mattress for non-support?" . . . printed on free packages of matches, "For our matchless friends" . . . in a furniture store, "This is your business but our concern" . . . and a serious one especially worthy of thought," The satisfaction and inspiration of living derive from journeying in the direction of our heart's desire, not from reaching journey's end."

### UNDERGO OPERATIONS

Laura Rassman, five, and Neal Rassman, three, children of Mr. and Mrs. E. C. Rassman, 1904 West Tennessee Street, have been admitted to Midland Memorial Hospital for tonsillectomies.

Mary Jane Miller

## Mary Jane Miller Heads United Youth

Mary Jane Miller, daughter of Mr. and Mrs. Milward Miller, has been named president of the United Christian Youth Movement of Midland.

The council is composed of the following seven Protestant Churches: Trinity Episcopal, First Presbyterian, First Christian, Asbury Methodist, First Methodist, St. Andrews Presbyterian and St. Mark's Methodist. The group's purpose is to promote fellowship among the youth of the different churches.

Miss Miller, a senior in high school, also is secretary-treasurer of the Episcopal Youth Fellowship and treasurer of the District of North Texas. She also serves as president of the Young People's Altar Committee and secretary-treasurer of the senior class.

Other officers are Dick Spencer, vice president; John Petty, chairman of Christian Fellowship; Frances Hefren, chairman of Christian faith, and John Casner, secretary-treasurer.

Eleanor Dunnham is the adult advisor.

Vacuum fiber porch rugs on both sides before they are stored. Dirt seeps through to the underside and causes wear.

A blueberry cobbler is delicious served with a soft custard sauce, a lemon sauce, or with plain or whipped cream.

# Silhouette Trim And Slim

**European designers show their hand in these haute couture designs in wool from Italy and England. Coat in anthracite gray wool (left) is by Bellenghi of Florence. It is bordered with astrakan and worn over a matching late day dress embroidered in black braid. Digby Morton of London does a lumber jacket travel suit (center) in shaded gray check suiting. Fabric is tucked to form a hip band and create a bloused look. With it is worn (right) a coat in soft blue poodle cloth that has the cocoon look, tapering at the hemline.**

By GAILE DUGAS
NEA Woman's Editor

NEW YORK — In England, Spain and Italy, top designers are making a bid for both business and fashion names with their Fall design.

European designers are adhering, generally, to the lines that have gained acceptance thus far in Paris —the suit with the bloused back, the slim, wrapped coat and the ensemble. But they are also imparting their own feeling to these lines and thus creating clothes of real interest.

The bloused back suit sometimes has a lowered martingale; in other instances, the back is defined by a series of tucks or a snug hipline band. It is by no means "the" only suit look coming out of Europe. It is merely one of many but it's important.

The very slim, wrapped coat that creates a cocoon look is liked by European as well as American designers for Fall. Often, it has no buttons at all and must be wrapped across the front, tucked securely under one arm and held there.

It is believed that China had its first windmills before the year one and that Europe's first windmills appeared in the 12th Century.

# ★ Daddy Ringtail ★

By WESLEY DAVIS

## Daddy Ringtail And What If - - -?

Daddy Ringtail was safe and sound asleep in his bed, high in the top of the very tall tree, there in the middle of the Great Forest. This was up in his monkey house, of course.

He opened up one of his eyes: blink. He opened his other eye: plink again. The night all around had a look of very late at night. Everything smelled like late at night. The night was late at night indeed. But what had happened to wake him up?

"Daddy Ring-tail!" came the sound of a voice calling. "Daddy RINGTAIL!"

"I'm coming, Mugwump!" called Daddy Ringtail.

He hurried into Mugwump's room.

"Did you want something, Mugwump?" asked Daddy Ringtail.

Mugwump sat up in bed before he answered. Outside his window—away across the trees of the forest, and far away in the sky—the moon was the color of yellow gold.

"Uh, Daddy Ringtail," said Mugwump.

"I hear you, Mugwump," said Daddy Ringtail.

"Daddy Ringtail, is the moon sick or something to make it look so yellow?"

Daddy Ringtail sat on Mugwump's bed and thought about this. He knew the moon wasn't sick to make

it look like yellow gold. He explained that the moon was thinking the night was so late that no one was looking. That's why the moon had taken the notion of looking the way it did, perhaps.

"Suppose?" asked Mugwump.

"Could be," said Daddy Ringtail.

"Daddy Ringtail," said Mugwump, "what if the moon were really made of gold?"

Ah me, and what if it were? Why, people would find a way to fly there, I'm sure. They would cut off pieces of moongold, and fly back to earth with the moongold, and bury it in the ground to keep it safe. And sometime at last the moon would be gone and all buried beneath our ground to keep it safe—but really, it is safest of all where it is, I guess, I think, don't you?

"What if—?" is always fun to imagine.

Happy day!

# Designer Seeks Individual Usage

The exciting, creative possibilities of jewelry are never underestimated by one of the leaders in the field, Madame Majeska. She urges women to be daring with their pearls, rhinestones and beads. For the slender, fragile-type woman, the designer suggests a nine strand bib of graduated pearls. The bib pictured at the left has a gunmetal colored baroque pearl in the center of each strand and a teardrop gunmetal pearl hangs from the center of the last strand. Cluster earrings of white pearls match the necklace. The mature woman, in the opinion of Madame Majeska, should wear two choker necklaces, while her younger friend adorns her throat with a three strand bib necklace combined with a longer necklace inspired by the Elizabethan revival in fashion (center). Both key their earrings and bracelets to the necklaces. All figure types, and especially the mature figure, will be flattered by the two choker necklaces pictured at the right. They are easily adjustable to any neck size because of a special adjustable closing. The top necklace is of clusters of white pearlized vari-shaped flowers, while the lower collarette type necklace is of colored carved beads between two rows of white pearls linked with a small chain of gold. Madam Majeska firmly believes jewelry must suit your individual beauty.

By ALICIA HART
NEA Beauty Editor

"Stop thinking of jewelry as just another fashion accessory," asserts designer Madame Majeska. "Chosen to suit your own individual personality and figure, it can create a most exotic and beautifying effect."

Madame Majeska is a pioneer in the realm of unusual jewelry combinations. She refuses to accept the mediocre and mundane. She challenges the accepted theory that small women must wear delicate, petite jewelry, while the women who are tall must choose large, chunky pieces.

"The important thing to learn," explains the designer, "is how to treat your individual proportions so they become an asset rather than a liability."

One way to accomplish this, in her opinion, is to wear large pieces of jewelry to accentuate your tiny figure, and just the opposite if you happen to be tall and slender.

The designer is also firm in her ideas about the mature figure. "There's nothing wrong with being full-blown," says Madame Majeska, "as long as you don't go around trying to give the impression that you are really slender."

She recommends that women with large figures wear heavy chunks of jewelry. That includes necklaces, bracelets and earrings. Madame Majeska has created many pieces with adjustable closings that will adjust to any neck size. This is certainly good news for the large woman.

If you have a long thin face, Madame Majeska suggests that you create a dramatic impression by wearing jewelry with a lengthing effect. On the other hand, she recommends rounded designs to accent a full face.

Madame Majeska likes to combine jet beads with gold and rhinestones. She connects pearls with gold links and large rhinestone medallions. Fringes of colored, carved beads dangle on gold links from strands of pearls.

One of her favorite bracelet combinations is of colored, carved beads trimmed with a fringe of gold-tipped pearls. All the pearls and gold are simulated. Madame Majeska also advocates the grouping of different and unusual stones for earrings.

There is much to be said in favor of Madame Majeska's ideas on jewelery. In fact, it is refreshing to hear so many new and unconventional theories expressed.

Every woman tires of wearing the same type of jewelry in the same old way. Madame Majeska offers exciting changes. It would seem more than worth your while to adapt any of her ideas to your particular needs.

Make an inventory of the jewelry you already have on hand. Combine pieces for dramatic effects. If your collection looks generally unexciting, add pieces that featuer color and unusual stones.

"Think of your jewelry just as you do your make-up and clothes," says Madame Majeska. "It can have a dominant influence on the over-all impression you give as a smartly dressed, chic-looking woman."

## Pecos Encampment Of VFW Scheduled For October 25-26

PECOS—Fall encampment of the Veterans of Foreign Wars District 25 has been slated at the Reeves county Servicemen's Club on October 25-26.

J. A. Shoemake, chairman of the entertainment committee, said the post is expecting 300 guests from the large VFW district.

Delegates from the West Texas cities will register here at 1 p.m. October 25, with F. F. Bell of Pecos handling the registration activities. At 8 p.m. a bingo party will be staged, followed at 10:30 p.m. by a dance featuring the Five Professors.

On October 26 church services will be arranged at 11 a.m. by Drew Hopkins. C. T. Mount of Pecos is arranging a chicken barbecue from noon to 1:30 p.m.

Business session is slated at 2 p.m., keynoted by a welcoming address by Mayor Emmett Beauchamp of Pecos. Calling the meeting to order will be District Commander Pat McMullin of Midland.

Commander of the Pecos post is Jimmy Morrison.

**MEETING POSTPONED**

The meeting of the Chi Omega Alumnae club scheduled Tuesday has been postponed until October 21, it has been announced. It will be a luncheon at 12:30 p.m. October 21 in the home of Mrs. Malcolm Powell in the Magnilia Camp.

Always disconnect your iron by pulling at the plug, not the cord. Wrap the cord loosely around the iron as soon as it cools, and store it away on its heel rest.

## ★ RUTH MILLETT ★

### Housewife's Life Often Isn't As Tough As She Thinks It Is

Writes the wife of a government worker who resents the fact that her husband had such an easy life compared with her own: "I would really enjoy reading a few columns blasting 40-hour-a-week husbands into some useful activity around their homes."

Instead of writing that blast, I'd like to ask the woman who would enjoy reading it, a few questions:

Did you ever really stop to figure out if your working hours are so much longer than your husband's? Keep track for a few weeks—and you may be surprised.

Maybe your working day does start when his does, and lasts longer. But don't forget to subtract time out for an afternoon nap, the time spent gossiping on the telephone, the hour or two spent in a neighbor's back yard, the afternoon shopping trip—where actual purchases could have been bought in half an hour—the session at the beauty shop, and so on.

Count those out of your working hours, and you may find that your actual working time is cut considerably.

Also, give this a little thought: If your husband can earn a good living for his family in 40 hours a week—and you say he does have a good job—what's so disgraceful about that?

Maybe you can figure out ways to cut your own work to a minimum, instead of feeling sorry for yourself because your work never is done and his is done in 40 hours a week.

One more thing. If your husband's life is as easy as you think, you're a lucky woman. You should have him with you for a long, long time.

It's the wife whose husband is overworked that you should feel sorry for. Her chances of being left alone when she is still comparatively young are a lot greater than yours.

So quit resenting the fact that your husband isn't having too tough a time earning a living. And stop feeling sorry for yourself because your life is so hard. It probably is not as hard as you like to think. And if it is, get busy and figure out how you can make it easier.

(All rights reserved, NEA Service Inc.)

To properly clean your washable window shades, take them down and unroll them on a flat surface. Use a cloth or a sponge wrung out of warm, sudsy water in a circular motion. A damp cloth that has been wrung out of clear, cool water will wipe off the suds. Concentrate on a small section at a time, and make sure you overlap each area. After you have washed both sides of the shade, hang it back up to dry.

# Mrs. Hodge To Attend GFWC Board Meet, Safety Congress

Mrs. J. Howard Hodge will leave by plane Tuesday to attend a series of meetings in Chicago and on the East Coast in connection with her work as chairman of the Safety Division for the General Federation of Women's Clubs.

She plans to attend the President's Safety Conference and the Safety Congress in Chicago and the GFWC board meeting in Washington, D. C. She also will attend two sessions of the annual forum of the New York Herald Tribune in New York City.

Workshop sessions and plans for the work of the next two years will head the agenda for the GFWC board meeting October 16-19 in Washington, D. C.

**To Give Luncheon**

Mrs. Hodge will be hostess to board members and will preside for a safety luncheon Saturday. Luncheon speakers will be John Scott, chief of the Test Development Section of the Civil Service Commission, and Donald Buck of the Department of the Army.

Highlights of the board meeting will include a tea Friday afternoon in the White House and a tea Saturday afternoon in the Statler Hotel, headquarters for the meeting.

Also attending the board meeting from Texas will be Mrs. Van Hook Stubbs of Wortham, president of the Texas Federation of Women's Clubs.

**Named To Committee**

Mrs. Hodge has been named to the Safety Organization Subcommittee on Organized Public Support for the President's Safety Conference Friday and Saturday in Chicago. An annual event, the conference stresses highway safety.

On October 19 and 20, Mrs. Hodge will be in New York for two sessions of the Herald Tribune's annual forum on world affairs. Eisenhower and Stevenson are expected to be among featured speakers for the event this year.

Mrs. Hodge is a member of the Board of Directors for the Safety Congress, which will be in session October 20-24 in Chicago. While in Chicago, she has been invited to appear on Tom Moore's "Ladies Fair" at 10 a.m. October 21 over Station WGN, a Mutual Broadcasting affiliate.

# Maria Spencer Leads Program For Altrusans

Maria Spencer, International Relations chairman, led the program for the meeting of the Altrusa Club Thursday night in the lounge of the Elks Club.

She spoke on Altrusa's plan of aiding women of the Latin-American countries through grants-in-aid. To date, she said, 70 young women have received gifts of money to help them do graduate study in the United States.

Mrs. Lucille Johnson, recently-elected secretary of the Texas Organization of County and District Clerks, spoke on her recent visit to Mexico. A brief history of Altrusa was given by Mrs. James Noble, who also read the principles of the organization.

A report on a new Altrusa Club, organized in Pampa, was given by Mrs. Grace Wallace, district chairman of extension. Mrs. Wallace was to meet with the new club Friday to complete the organization.

Voluntary contributions totaling $18 were made to the club's college girl scholarship fund.

Mrs. George Park, president, presided for the meeting. Mrs. Ellen Sherwood was a guest and Mrs. Laura Furgason of Kermit was recognized as a new member. Twenty members attended.

**BRIDE-ELECT**—Mr. and Mrs. Earl Fain of Midland announce the engagement and approaching marriage of their daughter, Wanda Dolores, to Airman 3/c Russell F. Fuller, son of Mr. and Mrs. K. C. Fuller, 300 West Hart Street. Fuller now is stationed at Scott Air Force Base in Illinois. Both Miss Fain and Fuller are graduates of Midland High School.

**YOUNGEST SYMPHONY**

The Philadelphia Orchestra, which gave its first program in 1900, is the youngest of the Big Three symphony orchestras of America. The New York Philharmonic-Symphony, originally the New York Philharmonic, celebrated its centenary in 1942, and the Boston Symphony Orchestra gave its first season in 1881-1882.

**DEVELOPED JU-JITSU**

The Lama monks of China first developed the ju-jitsu form of combat, to protect themselves against armed robbers, according to the Encyclopedia Britannica.

Relieve insect stings with a baking soda paste or calcium lotion.

**WTCC PREACHER**—Dr. W. R. White, president of Baylor University, will deliver the sermon in a union church service in Wichita Falls' First Methodist Church next Sunday evening. The service will open the thirty-fifth annual convention of the West Texas Chamber of Commerce, which will end at noon Tuesday, October 21.

**FRESHWATER SALT FISH**

Only freshwater lake in the world containing man-eating sharks is Lake Nicaragua, in Central America, which was cut off from the Pacific Ocean by lava from volcanoes but still contains salt water fish.

**A HANDY TIP**

Handy tip for brides: A cake is done when, if touched lightly with the finger, it springs back; when it is evenly raised and evenly browned; when it shrinks away from the sides of the pan; and when a toothpick inserted in the center, comes out clean.

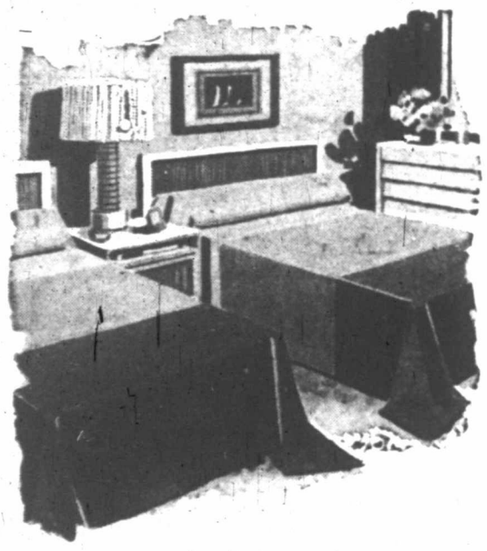
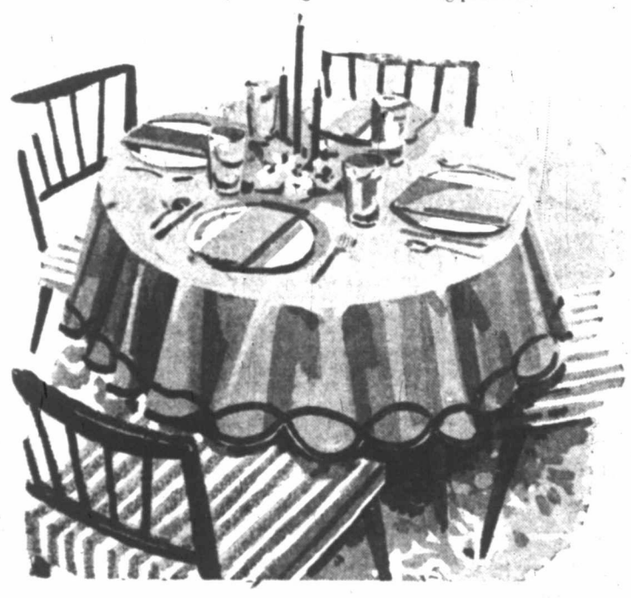
Sew INDIAN HEAD®
"Quick-Makes" for every room in the house
the answer to your budget and decorating problems



Stunning bedspreads. Simply seam three shades of Indian Head together for dazzling effect. Each throw takes 2 yds. each of Moss Green, Orange Ice, and Blondine. Each spread costs about $5.35.



A "miracle-stitch" table cloth. Come in and ask for free printed instructions. Takes only 4 yds. of Flamingo Indian Head and 24 spools of J & P Coats heavy duty thread. Costs only about $4.75 to make.

Because Indian Head never shrinks or fades, it's a bargain-buy for long-wearing, compliment-getting home fashions.

Indian Head's 39 colors give you a choice of hundreds of combinations. Its permanent finish lasts forever.

A "miracle-stitch" table cloth. Come in and ask for free printed instructions. Takes only 4 yds. of Flamingo Indian Head and 24 spools of J & P Coats heavy duty thread. Costs only about $4.75 to make.

89¢ YARD
As Seen In October Woman's Home Companion

You can transform a whole room with these easy-to-make tailored curtains. Use the length of the fabric for the width of the curtain. Each of 4 tiers takes 1⅓ yds. Emerald Indian Head. 2 center tiers take 3 yds. each. Total cost about $10.65 without trim.

GUARANTEE: "If any article made principally of Indian Head Cotton fails to give proper service because of the fading or running of Indian Head colors or if the fabric shrinks more than 1%, we will make good the total cost of the article."

# Fashions For Your Home Are Fun To Make And Provide Many Budget-Wise Additions

Simple sewing plus a small amount of time are all that's needed to transform a corner of your kitchen into a breakfast nook. A breakfast nook, these days, is a time-saver and a short cut to easier living. You may use a table (left) or just a long shelf fastened to the wall. We used a print fabric, working with shirring tape, to make place mats, chair backs and seat covers, cafe curtains and even a lamp shade (lower right). For trim, we used cotton fringe in bright colors. The result is a rich, co-ordinated look at a tiny cost.

By GAILE DUGAS
NEA Woman's Editor

NEW YORK—In these times of cramped apartments and tiny houses, with the accompanying need to utilize every inch of space, the informal breakfast nook is a mighty handy thing to have.

If you can possibly squeeze out space in your kitchen for one, it's a step-saver and time-saver, too. To start, use a table if you can fit it in. If not, just attach an adequate sturdy shelf to the wall and you're in business.

Now, to remove any possible chance of the homemade decor look, give the chairs, table (or shelf), windows and nearby lamp, if you have one, some real window dressing. You'll need just a few yards of fabric, print or plain, plus some shirring tape and inexpensive trim.

We made cafe curtains because they're attractive and simple to do.

In measuring and cutting material to fit your windows, allow double width for fullness. Then fold the fabric at the top, three-eighths of an inch down the wrong side. Use inch-wide shirring tape, available at the trimmings counter in the drapery department of any large store, at top and bottom on the wrong side of the fabric, concealing the hem.

Shirring tape comes with two cords woven in. By pulling these cords to whatever fullness you want, the curtains fall into perfect miniature cartridge pleats. Just tie the cords at the sides. Then, when you're ready to launder the curtains, fabric will lie flat when you release the cords.

Using the right side of the material, stitch on the heading along top fold. Heading comes in bright colors with the cotton loops woven right in. Match the color of the fringe trim to the heading and stitch the trim to the bottom of the curtains. Here again, just fold fabric for a hem and attach trim on the right side.

Now, you're ready to do the seat covers and chair backs. For seat covers, put your material over knife-edge pillows. Cut two pieces of fabric to fit the shape of the pillow, allowing an extra half-inch on each side of the hem. Using the wrong side of the fabric, insert trim between the two pieces.

Be sure that the correct edge of the trim shows through on the right side. Stitch trim and fabric together, leaving one side open. Insert snap tape or zippers there so that seat covers can be easily removed for washing.

Next, the chair backs. Take measurements and cut your fabric, again allowing for hemming. Sew the two pieces together on the wrong side and attach trim on right side.

Place mats may be cut any shape you prefer, then trimmed with the same cotton fringe used for the chairs and curtains.

A finishing touch for your breakfast nook can come from a fringe-trimmed lampshade. You can make it yourself, using the shirring tape.

Measure the top circumference of your lamp, then double the figure to get correct width. For length, add one-half-inch length plus an inch for trimming. Use shirring tape at the top of the fabric, hem at the bottom and attach fringe.

When you're finished, you'll have an indispensable corner that your family and friends will like for late snacks and light meals as well as for breakfast.

The United States bought Alaska from Russia in 1369 for $7,200,000

## Doomed 'Blue Baby' Has Sixth Birthday

ROCHESTER, N. Y. —(AP)— Little Nicholas LaVilla, Jr., recently celebrated his sixth birthday, a day his doctors never expected him to when he was born as a blue baby.

Now said to be one of the oldest such children in the country, Nicholas's main blood vessels are crossed irretrievably. His lungs don't get enough oxygen to circulate to the rest of his body, giving him a bluish tinge.

Dr. Richard Melzer of Strong Memorial Hospital reports that Nicky's general condition is improved this year. The child has been bedridden virtually since birth but now he spends about four hours a day in a kiddy car and in other physiotherapy exercises to learn to use hands and feet.

Add glamor to a long rope of pearls by winding them around your neck twice, and then bow-tieing the dangling loop with an inch-wide ribbon.

If you plan to make a dress, press the pattern before laying it on the material. This will permit you to cut it to size much more accurately than will a wrinkled pattern.

## It's Oil Progress Week! —

The 1952 observance of Oil Progress Week opens Sunday throughout the nation.

Certainly it is fitting and proper that this special week should be observed on a nation-wide scale, but here in Midland and throughout the great Permian Basin Empire—where residents fully are aware that Petroleum Means Progress—every week actually is Oil Progress Week.

Nevertheless, it is fine that here in the oil country we pause on this occasion to consider the progress and development which have come our way as a result of petroleum's progress. It also is proper that we take this opportunity to salute the oil industry and the men and women who make it tick for the amazing job they have done and are doing for mankind.

• • •

Yes, Petroleum Means Progress, and surely no person or group of persons anywhere know better the full and all-inclusive meaning of that important phrase than do the people who live, work and enjoy life in this great and progressive section of the Lone Star State.

Our hats are off to the oil industry this week and every week of the year.

But oil men do not seek praise for their efforts and accomplishments. Rather, they ask only the opportunity of telling their story of "doing things" during the observance of Oil Progress Week. And surely all Americans will listen with interest to the important story the oil man has to tell.

• • •

It is a story which has no equal in American history. It is a story of service which points up the old axiom to the effect that progress is only what you make it. It is a story of the thousands of oil companies of all sizes which make up this vast industry, with its 2,000,000 workers and its traditional adherence to the principles of free enterprise and competition. It is a story of the American way.

We all are proud of the record of progress made by the oil industry and the people engaged in it during the last 93 years.

The tremendous expansion program which has been underway since the end of World War II is an excellent example of the way modern oil men are "making progress." To assure the American people of an abundance of petroleum today, and to prepare for their demands tomorrow, the oil industry builds, expands, modernizes and develops as fast as man, money and materials can make it possible. The bulk of the money, too, has come from their own earnings—money plowed back by progressive, farsighted leadership.

• • •

As a result of this progress, we Americans today are using more oil in more ways than all the rest of the world combined. Significantly, the growth and development of the petroleum industry parallels that of the United States—and vice versa.

It goes without saying that our way of life has been bettered consistently as a result of oil industry progress.

This week we honor the oil industry and its personnel—from filling station attendant to top executive—for their progress and achievements through the years.

Yes, it's Oil Progress Week. Let's all join in celebrating this special occasion.

**CARNIVAL**

"Okay, so you think grocery prices are highway robbery! You don't have to be so dramatic about it!"

## Greatest Show On Earth, Plus A Sideshow

## The Washington Merry-Go-Round

By Drew Pearson

(Copyright, 1952, By The Bell Syndicate, Inc.)

*Drew Pearson says: Russians have trick Korean peace proposal up their sleeve; Stevenson will give down-to-earth speeches; Kefauver is only candidate to file primary campaign expenses.*

WASHINGTON — Two proposals to solve the most important foreign-relations problem of the day—peace in Korea—will be aired in the United Nations Assembly when it meets this week. But there's little chance that the peace talks ever will get beyond the propaganda stage.

No. 1—Russian Foreign Minister Vishinsky is expected to make a spectacular but phony peace offer, calling for the withdrawal of Chinese troops from Korea, the return of the Kurile Islands to Japan, and the withdrawal of American troops from Japan — thus leaving Japan unprotected and ripe for Communist invasion.

No. 2—Secretary Acheson will counter the Russian proposal with a dramatic appeal to Communist China and North Korea to end the fighting in Korea. This will be signed by a majority of UN members.

A rough outline of the appeal already has been drafted and agreed upon by Britain, France and the United States, plus most of the smaller nations. It will be a direct plea to Peiping and Pyongyang to accept the UN truce terms at Panmunjom, endorsing the principle that no prisoner should be forced to return home against his will. Since this is the last remaining stumbling-block in the way of a military truce, the appeal will offer a face-saving formula for ending the war.

It is always possible that the Russian and American delegates might be able to sit down behind closed doors and settle the Korean war in New York City—a long way from Panmunjom. However, the American estimate is that Russia wants to prolong the war and talk about peace only for propaganda purposes.

**Adlai—Down To Earth**

Adlai Stevenson will bring his lofty phrases down to earth and try out a few "give 'em hell" speeches on a barnstorming, whistle-stop swing through the populated East, beginning shortly.

The Democratic candidate decided to adopt, in part, President Truman's strategy in order to put some life into the party and bring out the Democratic vote in the big cities.

Stevenson agreed to roll up his sleeves and come out slugging after reports of party apathy from the big Democratic strongholds in the East. His campaign manager, including top adviser Wilson Wyatt, argued that Stevenson already had made a strong impression on the independent voters and had better concentrate for a while on rank-and-file Democrats. If they stay at home in November, Wyatt argued, it will mean that the East's big electoral-vote states will go to Eisenhower.

As a result, Stevenson agreed to a Truman-type, whistle-stop tour, complete with off-the-cuff, back-platform speeches.

**Ike's Campaign Expenses**

The Senate Elections Committee has been unable to get an accounting from General Eisenhower on how much he spent to win the presidential nomination. Last August, the committee asked all the presidential candidates to submit a financial report. The only one who reported was Senator Kefauver.

All the others, except Eisenhower, promised an accounting as soon as they got their records audited. But Eisenhower ignored the request. The committee then sent a second request by registered mail to Eisenhower aboard his campaign train. The letter was signed for—but still no reply.

**Flying Saucer Rings**

The Navy is saving the scoop for Life magazine, but Navy scientists have photographed "phantom" flying saucers in the Arctic. They believe this will explain, in part, the flying-saucer mystery.

The Navy saucers were produced during experiments in cosmic-ray research, but were kept secret because of the project's highly classified nature.

However, the Navy finally has decided to declassify these pictures and slip them first to Life magazine.

The pictures show rings resembling flying saucers, which the Navy scientists say were caused by firing small guided missiles through cold air masses. The missiles are fired from balloons high in the Arctic stratosphere as part of the cosmic-ray experiments.

The missiles, themselves, do not look like flying saucers. But as they penetrate the cold air masses, they produce rings of light, which are nothing more than a natural phenomena caused by the atmospheric conditions.

The rings plainly are visible and could be seen in some parts of the United States.

**Politico-Go-Round**

The Republican National Committee has made a secret analysis of the fight for the Senate. As of today, here's how it looks to the Republicans—they think they'll lose Senate seats in Montana, Washington, Indiana and Missouri, but will keep Senate seats in New York, Utah and Wisconsin. Their closest races—the ones they're most worried about — are Ohio, Connecticut, Massachusetts and New Jersey . . . A Democratic research crew has been assigned to run down all of General Eisenhower's past statements on foreign policy . . . Some GOP strategists now fear Ike has gone too reactionary. In his attempt to make peace with the Taft forces the experts say he's become so right wing that he's in serious danger of losing the important middle-of-the-road independents . . . Top government economists agree that between now and next June the record-breaking cost of living will climb another three per cent. This new increase alone will take $6,000,000,000 from the already hard-pressed consumers. Higher rents will account for much of the increase. . . . Ted Braun public relations firm has prepared a special political course for business executives. The idea is to encourage top executives to take an active part in politics, even run for office. Safeway stores has bought the course, is teaching it to more than 5,000 Safeway managers across the country.

**Boss Of OPS**

Price Boss Tighe Woods has been in office less than six weeks, but already his superiors are talking about dumping him.

The man who got him the job, Economic Stabilizer Roger Putnam, now is under pressure to ease Woods out as gracefully as possible.

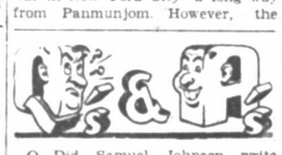
Woods has been under fire by Senator Willis Smith, North Carolina Democrat, also inside his own agency over decentralizing price-control activities.

Woods has been working on a plan to turn price control over to local boards in all cities of more than 100,000 population. This was the way he controlled rents when he was rent stabilizer.

Although he did a good job of cracking down on rent violators, many of his division heads fear that decentralizing price control would wreck the stabilization program. What it would do is turn over the mechanics of price control to local stabilization boards.

The consumer advisory committee, which has tried to represent the consumers before the price agency, has threatened to resign if Woods carries out his plan. But Woods may be the one to leave.

Note — Economic Stabilizer Putnam will recommend a six-month extension of price controls past the April 31 deadline, regardless of the outcome of the November 4 election.



Q—Did Samuel Johnson write any novels?

A—His only novel, Rasselas, was written in 1759 to pay the expenses of his mother's funeral.

• • •

Q—From what part of the world do the finest pearls come?

A—From the waters of the Persian Gulf and the South Pacific Islands.

## So They Say

The military approach to procurement too often is one of favoring the big, established suppliers and overlooking the small producers who can do just as good a job sometimes even faster and better.

—Senator John Sparkman (D., Ala.).

• • •

This campaign was harder on me than the war.

—Walter Alessandroni, who was defeated for job of National Commander of the American Legion.

• • •

Let us strive for big men, not big government.

—Gov. Adlai Stevenson.

• • •

When the average American thinks of the Administration's foreign policy he thinks of Dean Acheson and when he thinks of Acheson, he thinks of failure.

—Senator Richard Nixon (R., Calif.).

• • •

If Hitler had consented to the constant urging of German rocket explorers, the war would have had a different outcome.

—German rocket expert Dr. Wernher Von Braun.

## Have A Laugh

By BOYCE HOUSE

Brown was telling about a golf game with a new member of the club: "That fellow almost burned up the course. He got distance; he would land close to the green and his putting was superb." A friend asked, "How bad did he beat you?" "Oh," Brown said, "he didn't beat me; I won six up and five to go."

No matter how thrilled a woman may be, she's never pleased beyond words. © NEA

## JACOBY ON BRIDGE

By OSWALD JACOBY
Written for NEA Service

When you begin to play a hand, you make some sort of plan; and, when the hand is not a laydown, you probably have to hope that a certain opponent holds a key card or that a certain suit breaks in a particular way.

The plan and your hopes may change as you continue to play the hand, and if your plan is a good one you don't have to hope for very much.

The point is illustrated in the hand shown today, played by Larry Hirsch, who would be a famous bridge expert if he didn't waste so much time attending to his business as a dress manufacturer.

Larry began by hoping that East held the king of clubs and that the suit would break 3-2. After a few plays he didn't care about the break of the clubs, but just hoped that East held the king. And after a few more plays he didn't care how the suit broke nor who held the king.

Opening lead—♦ 3

West opened the three of diamonds, and declarer ruffed. It was at this moment that he wanted East to have two or three clubs headed by the king.

Instead of barging ahead blindly on this assumption, Hirsch drew two rounds of trumps, cashed the top spades, and ruffed a spade in the dummy. This set up the ten of spades, so that declarer no longer needed a club break; he just needed two club tricks.

Declarer returned to his hand by ruffing dummy's remaining diamond and cashed the ten of spades, discarding a low club from dummy. And now it didn't matter who held the king of clubs, since declarer could be sure that East held a singleton club at most.

West had opened the three of diamonds, Hirsch remembered, which meant that West might have started with either four or five diamonds. (The lead was obviously fourth-best, and West might or might not have the deuce of diamonds as a fifth card in the suit.) Hence East had started with the rest of the diamond suit, either six or seven of them.

East had already followed to four spades and two trumps. Hence there was room in his hand for one club if he had only six diamonds; and for no clubs at all if he held seven diamonds.

After working this out, Hirsch led a low club from his hand, prepared to play low from the dummy. If East won the trick, he would have to give declarer a ruff and a discard. If West won the trick, he would then have to lead away from his king of clubs and give declarer a free finesse for the rest of the tricks.

## ★ WASHINGTON COLUMN ★

## Full Story Behind Denial Of McCarthy's Colonelcy

By PETER EDSON
NEA Washington Correspondent

WASHINGTON — An earlier dispatch by this correspondent on how Wisconsin Senator Joe McCarthy was turned down for promotion from major to lieutenant colonel in the Marine Corps Reserve only told the half of it. But it was publication of this earlier story which uncovered the full story.

The other half of the story is that Major Joe actually was approved for promotion last April. The report of the Marine Corps Selection Board which recommended this promotion was thrown out on a technicality after a six-week hassle among the Navy and Marine Corps top brass.

Involved in the dispute were Under Secretary of the Navy Francis P. Whitehair, Gen. L. C. Shepherd, Jr., commandant of the Marine Corps, and Rear Adm. George L. Russell, judge advocate general of the Navy.

It was Admiral Russell's opinion that the precept creating the April selection board made it operate under conflicting authority of two regulations. One was the Naval Reserve Act of 1938. The other was the Personnel Act of 1947.

The Navy's judge advocate general ruled that these two regulations did not go together very well. All the recommendations of the selection board for the promotion of several hundred Marine Reserve majors to lieutenant colonel therefore were thrown out.

A new selection board was set up in August, to operate under a much tighter precept. This was the board which turned down McCarthy for promotion—on the grounds of "PI" —or political interference—as revealed exclusively in the earlier story by this writer.

**Story Behind A Story**

So much for the official version of what happened. Behind this official version there is another story which Navy and Marine Corps headquarters aren't talking about. It is a story, however, which has been fully confirmed after careful investigation.

The recommendations of the April selection board were sent to Navy headquarters for approval before going to the White House for transmittal to Congress and final confirmation. They came to the attention of Under Secretary of the Navy Francis P. Whitehair. Secretary of the Navy Dan Kimball was out of the country at the time, so Whitehair was acting secretary.

Today, Secretary Whitehair says that the proceedings of a selection board are a good bit like those of a grand jury. Nobody tampers with its findings.

The recommendations go to the commandant of the Marine Corps. He certifies them to the judge advocate general of the Navy. The JAG then transmits the report to the secretary of the Navy with a comment to the effect of, "I have examined the proceedings of this selection board and find they are legally sufficient."

Only sometimes, says Whitehair, the judge advocate general, in reviewing the proceedings, finds that the precepts under which the selection board operates are not legally sufficient. In that case, the recommendations of the board have to be rejected.

**Commandant Stuck By Board**

The inside story that this promotion list was sent back to General Shepherd for reconsideration. The Marine Corps commandant stuck by his board. If this was what they recommended, it was all right with him.

The members of this April board were Brig. Gen. R. McC. Pate, director of Marine Corps Reserves, Brig. Gen. L. B. Cresswell, Col. S. S. Jack and Reserve Colonels A. G. Skelton, E. F. Venn, J. L. Winston, F. C. DeSantis, W. E. Glantz and H. F. Brown. Recorder was First Lt. C. F. King.

Balked here, an effort then was made to find some grounds on which the selection board's report could be set aside. These grounds finally were found in the fact that eight of the reserve majors recommended for promotion to lieutenant colonel had been called to active duty.

The board had been set up to consider only the promotion of inactive reserve majors to reserve lieutenant colonels. So on this basis the whole report was thrown out.

Actually, while many Marine officers feel that McCarthy's position as a senator should have nothing to do with whether he is given a reserve promotion, they also say there are plenty of reasons why Major McCarthy should not be promoted.

He was commissioned from civilian life without ever having gone to boot camp. He was commissioned as an intelligence officer, for a special job. He never commanded troops. He just has undergone a serious operation and his physical condition is uncertain. None of these things has anything to do with the political motives which under the circumstances appear to have influenced his rejection for promotion.

## CARD Sense

Q—The bidding has been:

| West | North | East | South |
|---|---|---|---|
| 1 Diamond | Double | 1 Heart | ? |

You, South, hold: Spades K-Q-7-5-2, Heart 4, Diamonds 6-3, Clubs A-9-7-5-2. What do you do?

**A—Bid two spades. You are willing, and eager, to bid game opposite the sort of strength needed for a takeout double. This jump bid is forcing, assuming that your partner has not seriously overstated his strength with his double.**

**TODAY'S QUESTION**

The bidding is the same as in the question just answered. You, South, hold: Spades 8-7-4, Hearts K-J-9-5-2, Diamonds 6-3, Clubs K-5-2. What do you do?

**Answer Monday**

## What's RIGHT?

You receive an announcement of a wedding rather than an invitation to the wedding.

**WRONG:** Feel it is obligatory to send a gift.

**RIGHT:** Send a gift only if you wish to do so.

Advertise or be forgotten.

## SECOND MAN on the Ticket

By Edwin Lanham

Copyright by Edwin Lanham. Distributed by NEA Service, Inc.

XXX

I HAD not known it. I had only known that the telegram Clyde received had been signed by Melvin Fisher. But Ginny must have told Fisher that Miss Hattie had a story to tell.

"You got here ahead of me," Clyde went on. "You slipped in here and buttoned her up."

I shrugged.

"Mrs. Warburton tipped me off," he went on. "Why should she fake pneumonia? To get the Governor in Hydetown a day ahead of schedule. That's why. And why should he get here a day ahead of schedule? Because he was already here, that's why. And why was he already here—"

The girls returned then, and Lucy said, "Oh, let your eye alone, Clyde. It looks all right."

I was already on my feet, saying to Ginny, "How about a dance?" She put down her handbag and we moved to the dance floor. The music was loud. I put my lips close to her ear and whispered, "So it was you who sent for Clyde McDonald?"

She drew her head quickly back. "It was Mel Fisher," Ginny said. "Oh, I suppose in a way I was responsible. I happened to mention to him that Miss Hattie was so mad at the Governor she was planning to tell something pretty terrible about him, and the first thing I knew Mel called me up and told me Clyde was coming to Hydetown."

"But you arranged for Clyde to stay at your house and talk to Miss Hattie."

"No, that was Mel, too. It was his idea." She smiled at me. "But anyhow, Aunt Hattie changed her mind, and Clyde was furious. Have you ever seen a fat man mad, Roy?" She whistled softly. "He was mad at me, too, because I said it was up to Aunt Hattie to tell him, not me."

When the music stopped I felt that a reminder was necessary and said, "Ginny, we're going to have lots of fun in Washington."

"I'm looking forward to it, Roy." Her hand squeezed mine.

I felt that everything was under control, and back at the table I called the waiter and ordered more setups. He had hardly left the table when Ginny said in an unaffected, conversational tone, "Clyde, where's a good place to live in Washington?"

• • •

MY mouth dropped open. It was a thunderbolt. Clyde said, "Who's going to live in Washington? Not Roy. Not Governor Warburton."

"Oh, yes we are," I said.

"I am too," Ginny said.

The Piedmont Sextet had resumed its music, and I jumped to my feet. "Ginny, let's dance."

"Not this time," Clyde cried. "She's my date." He said it with determination, and got up from his seat in a surge that nearly lost him his balance. He took a firm hold on Ginny's wrist, and his eyes gleamed with a bright light.

I met Ginny's mischievous eyes. She had done it deliberately, I was sure, and her faint, sly smile was confirmation. Clyde asked, "What's this about your going to Washington, Ginny?"

"Isn't it exciting?" Ginny smiled innocently at me. "Roy promised to get me a job."

"Oh, did he?" Clyde scowled at me. "Ginny, I didn't know you wanted a job. I can get you a better job than he can."

"Not with the Vice President of the United States," I said. I was angry. Ginny had put the whole thing on the auction block and was encouraging bids.

Clyde pulled her toward the dance floor, but I caught her other wrist and said, "Ginny, stay here. You can't trust this guy."

Clyde's meaty hand pushed at me and I looked into his angry, squinted eyes. He gave me a shove and my grip was torn loose from Ginny's arm. I reacted as Governor Warburton had, almost by reflex. I took a step backward with my right foot to regain my balance, then I took a step forward with my left foot and let fly with my left in a wild haymaker that caught Clyde on the forehead. It also caught him off balance. He staggered back, struck against a chair, and fell.

I was as surprised as Clyde. I stood staring down at him, and I was not particularly angry. In fact, I felt like laughing, and I did laugh when Lucy said, "Clyde, now you've got mice, you rat."

There was a quick white flash of light, and a moment later was thrown out of the Route One Casino. It was the heave-ho, metropolitan style. A squad of waiters appeared at my elbow and hustled me toward the door. There was another bright flash, and I recognized the thin man with the camera—the photographer from Ego Magazine. He grinned at me as the waiters pushed me past. At the door the manager met us, saying, "Has he paid his check?"

Two waiters held me while a third went to manufacture a check, and there by the door Lucy Strawn joined us and began a fierce and loyal argument with the manager. The fat man had hit me first. If anybody was thrown out, it should be the fat man. As this went on the Ego man took another photograph.

• • •

LUCY STRAWN'S pleas were rejected, on the theory that in case of a fight one contender should be eliminated and the other allowed to remain and spend his money. I paid my check and the waiters released me outside the door; where the Ego man stepped up to me and asked, "What was the argument, Mr. Mason?"

"Are you going to print that picture in Ego Magazine?"

"Sure. A little Warburton Day sideline." He grinned.

"With one of those cosmic captions?" Lucy asked. "Public Strikes Back at Clyde McDonald. How's that?"

"I'm trying to find out what started it all," the Ego man said. "It was a pretty thing, and I enjoyed it. But why?"

"A dispute over the check," Lucy said.

(To Be Continued)

# International Quartet To Entertain Club

The International Quartet from Wayland College in Plainview will present the program Thursday at the meeting of the Midland Woman's Club, Inc.

The group will meet at 3 p.m. in the home of Mrs. C. M. Dunagan, 1508 West Missouri Street, with the Twentieth Century Study Club as hostess.

Consisting of musical selections and a symposium on "Education for Peace," the program will be under the direction of Sam Choy, who is in charge of religious activities and overseas students at the college.

**Members Listed**

Members of the quartet are Bill Nakahira, Hawaii; Harriett Poon, China; Fred Sahhar, Palestine, and Sue Arashiro, Japan. A junior student, Nakahira came to Wayland College in 1949. He is president of the Baptist Student Union. Following his graduation he plans to do educational work in Hawaii.

Miss Poon was born in Canton, China, where she was graduated from Lingman High School. Also a junior student at Wayland College, she plans to return to China after graduation for a teaching career.

Fred Sahhar, of Syrian nationality, was born in Bethlehem of Judea, Palestine, and came to the U. S. in 1950. Sahhar is a junior at the college where he is preparing himself for medical missionary work in his own country.

A missionary student at the college, Sue Arashiro was born in Hawaii of Japanese parentage. She was graduated from McKinley High School and Honolulu Business College.

Mrs. W. Harry Rhodes is president of the Woman's Club and Mrs. Paul Crandell is the program chairman. President of the hostess club is Mrs. J. B. Bain.

All former members and prospective members are invited to attend.

Mrs. Rensis Likert

Mrs. John L. Brewster

# League Of Women Voters Sets Its Regional Finance Institute

The regional finance institute, conducted by the League of Women Voters of Texas, will be held in Midland Saturday, according to Mrs. Douglass Edman, president of the Midland League.

Representatives from Odessa, San Angelo and Abilene Leagues will attend the meeting, which is one of six institutes to be held in Texas during October. Mrs. H. E. Rothrock, Midland finance chairman, is local chairman of the institute. Mrs. K. A. Moore, treasurer, is assisting Mrs. Rothrock.

Mrs. Rensis Likert, finance chairman of the League of Women Voters of the United States, will come from Ann Arbor, Michigan, to conduct the day-long session. Mrs. Likert's experience includes League board service in the District of Columbia, research for the National Education Association, and adult education study in various parts of the country. During the Summer of 1949 she attended the UN-UNESCO committee meetings in Paris.

Mrs. John L. Brewster of Dallas, is Mrs. Likert's co-chairman for the Midland meeting. Mrs. Brewster, who is finance chairman of the Texas League, has had volunteer experience with the American Red Cross, the Dallas Counsel on World Affairs, and the city-county hospital auxiliary.

The institute, open to all Midland League members, will be held at Ranchland Hill Country Club from 9:30 a.m. to 4 p.m. The program will cover training in League budget making and finance campaign planning. Reservations may be made by telephoning Mrs. H. R. Busby, at 2-2967, after 4:30 p.m.

# Parties Honor Bride-Elect

Two pre-nuptial parties were held Thursday and Friday for Jean McMillian, bride-elect of Joseph Pluta.

The first event was held in the Petroleum Club with Mrs. Edwin F. Alstrin, Mrs. Jack Bliss and Mrs. Harvey Herd as hostesses.

The table was centered with an arrangement of carnations ranging from frosty pink through deep maroon, and surrounding a tiny winding stairway on which stood the miniature figures of a bride and bridegroom.

• • •

The honoree was feted with a coffee Friday in the home of Mrs. Y. D. McMurry.

Other hostesses were Mrs. W. Dave Henderson, Mrs. Eugene H. Davidson and Mrs. James C. Velvin.

Receiving the guests were the honoree; Mrs. J. Guy McMillian, mother of the bride-to-be, and Mrs. Joseph Pluta of Kirkland Lake, Can., mother of the prospective bridegroom.

Mrs. William Bosworth and Mrs. John Perkins, sister of the honoree, alternated at the coffee table which was centered with an arrangement of fruit and Fall flowers.

**TO MEET MONDAY**

The Belle Bennett Circle of the First Methodist Woman's Society of Christian Service will meet at 3 p.m. in the home of Mrs. Nettie Crawford, 402 West Holmsley Street.

**SPIDER SILK**

The cocoon silk of spiders was used to make gloves and stockings as early as 1709 in France. Seven thousand spiders were required to weave a pound of the silk, and the experiment proved disappointing.

True plants must have light to exist.

# Different Colors Used On High And Low Roof Levels

If you have a house with more than one roof section and if the sections are at different levels, Howard Ketcham, color and design engineer, has some suggestions that might help to make your home more attractive.

Ketcham does it with color. These are his ideas:

"Use different shades of the same basic asphalt shingle color on different roof levels," he says.

"Assuming that a house has two roof levels, it's possible to make the two seem more nearly the same or it's possible to accentuate the difference. You can call attention to the difference or not, depending upon how good-looking this architectural feature is.

"First, take a case where you want to minimize the difference in height. The thing to do would be to select a dark asphalt shingle blend for the higher level and then use a lighter shade of the same color on the lower level.

"The dark shade would make the high roof seem lower, and the lighter shade would make the low roof seem higher. That would create a visual illusion to bring the two together.

"You might use a dark blue-green blend and a light blue-green. Another pleasing combination would be pink-gray and a tint of the same blend.

"Reverse the color combinations for the opposite case, where you want to make the difference on height more pronounced. Use the lighter one on top and the darker below.

"In that situation, the visual effect would be reversed.

## Tips On Painting Wall Cited By Expert

The home-owner who paints his own house will find the best system for covering a wall is to start at the top and work down. Colorizer paint authorities advise painting in wide horizontal bands or strips from top to bottom. Brushing should, of course, all go in the same direction.

Exterior paint is not merely laid on the surface; it should be brushed in, with an easy, free stroke. The brush should be dipped into the paint to a depth of about two inches, then wiped and dipped again until the paint has been worked into the bristles. The brush that is too heavily loaded, however, will drip. The last few strokes of each brushful of paint should be worked back into the part previously painted. When stopping work at lunch or at the end of the day, stop painting at a window or door-frame, or, preferably, at a corner of the house.

The under-coat should dry for several days before applying the finish coat. The fewer coats applied the better.

# New Floors Gives New Look To Home At Moderate Cost

Today's homemaker likes to change, refurbish and renew her interior decoration schemes more often than homemakers of other years. New styles in color come almost as often as seasons of the year; furniture and fabric designs change frequently.

To give the home a new look often, to keep up with the trend of the times, without discarding the basic furnishings, demands resourcefulness and ingenuity.

Kentile floor designers have devised a way to re-decorate a room easly and inexpensively by changing the floor treatment. Suppose a room with pastel green walls and leaf-green woodwork has leaf-green draperies, natural blond wood furniture and Toledo red upholstery fabric. Underline this gay scheme with a floor of Greek Skyros beige tile with a modern-design linear pattern of Cardinal red stripes. Later, give the whole room a completely different look by installing over the old tile floor a new one of Lamartine yellow tile with maple leaf border in yellow and Toledo red; or Gardenia tile, white with pastel green marble veining, set off with picture tiles forming daisy or ivy borders.

**New Floor, New Look**

With a few minor changes in accent colors of cushions, woodwork and trim to carry out the new floor colors, the whole room has a fresh, new appearance at small cost.

By installing his asphalt floor himself, the householder saves half the cost of a new floor. By this new method devised by Kentile floor designers, acquiring a new floor now is made so easy that the floor can be changed as often as desired; and at far less cost than if buying other floor coverings.

The old floor makes a perfect subfloor. The only preparation needed is to wash and dry the old tile before laying the new over it. Installing the tile is easy. With chalk-lines, find the exact center of the room. Then, beginning at the center and using the chalk-lines as a guide, cover sections of the floors with adhesive and lay one tile at a time in straight, even rows. Build from the center of the room toward the wall until half the floor is covered; repeat in the other half.

**Proper Underlay Important**

Wood floors in most homes are suitable for any type of resilient floor covering, but sometimes it may be necessary to smooth off rough spots in a concrete floor with a quick-set underlayment. On wood floors, springy places can be corrected by nails driven here and there. In case of uneven floor boards, an underlayment board may be necessary. Boards should be well seasoned, not more than three inches wide, tongue-and-grooved and firmly nailed.

## Decorative Wall Trick Can Be Used To Beautify Room

A bed with large outmoded headboard, a studio couch, or a bed consisting only of mattress and springs without headboard, all can gain style and add character to the room, by means of a new decorative wall trick.

Push the bed against the wall (in the case of the large out-of-date headboard, first cut it off flush with the top of the mattress) and measure off a large panel on the wall, like a frame across the top and down either side of the bed. The frame should be about 12 inches wider than the bed on either side, 18 inches to 24 inches higher than the bed at the head.

After drawing the outline of the panel on the wall, push the bed aside and cover the wall panel with asphalt tile. Choose colors to harmonize with the room, and apply the tile in a decorative design that will frame the bed attractively.

**Shell-Pink Room**

In a white and shell-pink room, use grey Luma Chelle tile, with delicate marble veining in white and shell-pink. A frilly bedspread in one of the three colors will be charming. In a modern room with blond wood furniture and strong colors, Toledo red or Genoa green might provide the color accent needed. A tailored bedspread in neutral beige will be appropriate. In a sophisticated black and white scheme, the panel might be in all-black asphalt tile against a white wall. Outline the panel with an inch-wide border of Aspen green; make a spread of Aspen green and white.

To make the panel even more decorative, border it with a picture tile. A panel of Gardenia white with its delicate green veining, may be bordered with ivy or with daisies. This will give the room a charming Spring-like air.

Applying the asphalt tile to the wall is a simple process which the homemaker can do herself, with considerable saving. It is essentially the same as when installing a floor of asphalt tile.

# Plumbing Problems Are Simple To Solve

By MR. FIX
Distributed by NEA Service

The plumbing in a new home should give the owner little or no trouble during the "breaking-in" period. Homeowners readily can handle minor plumbing problems that crop up later on.

One such problem is the annoying dripping of faucets. To remedy this, simply remove the whole valve assembly of the faucet and examine it and the valve seat for minute chips from the cuttings of tubing or pipes.

The valve may not be closing properly because of the chips, which of course should be removed. These tiny cuttings get into the water lines of every new home, and are washed into the faucets by the flow of water, naturally.

Another likely cause of the dripping faucet is a worn washer. Washers are fastened at the end of the valve assembly by a small screw—are easily removed and replaced.

Care should be exercised in closing faucets, says the National Association of Home Builders. They should be closed just hard enough to shut off the flow of water. Apply too much pressure in closing a faucet and you weaken valve washers before their time.

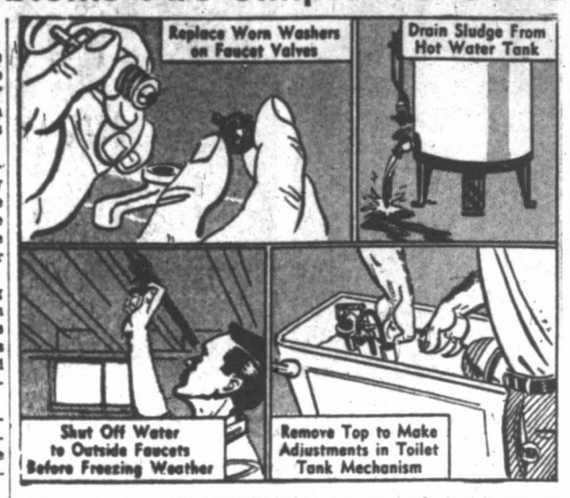
From time to time you may find that the toilet tank flushing mechanism has gone awry. Remove the top of the tank to uncover this simple mechanism. A test or two will show you how it works.

The rubber-ball valve plunger—it moves vertically, opening an exit for the water—is subject to deterioration. New plungers can be had at hardware stores, the old one removed by unfastening the screw holding it to the end of the vertical rod, and the new one inserted.

The larger ball float—made of plastic or metal—which maintains the water level in the tank, also can be replaced easily. The float then should be readjusted to the proper water level shown by markings at the end or rear of the tank.

Hot water heaters normally collect small quantities of scale and sludge. This brown-colored water can be drained off by opening a valve found at the bottom of all water heaters.

Hot water heaters, whether gas, electric or oil operated, have heat control mechanisms — they look something like thermostats—which normally should be set at about 125 degrees, but where automatic washing machines are used may be set for 145 degrees.



**Plumbing adjustments illustrated above are commonly done by owners of new homes without calling in expert assistance.**

The lower setting is preferable in order to avoid possible scalding where children have access to the faucets.

Finally, here are a few hints for owners of new homes:

Don't flush hair, grease, lint and bulkier materials down the toilet drain. They'll surely clog the toilet and sewer lines.

If wood shrinkage occurs in the bathroom, the result usually is a small separation between the tub and wall tile or between the tub and floor. Fix this condition by filling the crack with inexpensive white cement, available at any hardware store.

In houses having linoleum sink tops, years of life can be added to the top by periodic application of a coat of spar varnish.

# Better Deal and a Better Buy

WITH CHEVROLET TRUCKS!

You get more work done for less money with Chevrolet trucks! That's why we say you can't get a better deal or a better buy. And that's the reason, too, why more users buy Chevrolet trucks than any other make.

What's more, a Chevrolet truck is always *right—factory-matched* to the job it will do—with the right power, the right capacity, the right engine, transmission, springs, axle, and tires to do its work at the lowest possible cost to you.

So come in and see us. See for yourself what a wonderful deal, what a wonderful buy you'll get when you buy one of these great Advance-Design Chevrolet trucks.

**Better buy now!**

## A better buy because . . .

**THEY LIST FOR LESS**

Production economies, made possible because Chevrolet is the world's largest truck manufacturer, make Chevrolet trucks list for less than comparable models of any other make.

**LOWER OPERATION AND MAINTENANCE COSTS**

Valve-in-Head design means extra gas and oil economy. Chevrolet's 4-way engine lubrication system reduces wear. Hypoid rear axles, rigid channel-type frames, Flexi-Mounted cabs, recirculating ball-gear steering, Synchro-Mesh transmission and many other special features assure your Chevrolet truck low-cost operation and upkeep.

**TRADITIONALLY HIGHER TRADE-IN**

Chevrolet trucks keep their value longer—positive proof of greater value and a wonderful plus measured in dollars and cents savings at trade-in time.

## A better deal because . . .

A Chevrolet truck lists for less than others in its field. Chevrolet economy means lower costs throughout a long and dependable life. You get exclusive extra-value features—get *more* truck for *less* money. Join the hundreds of thousands who are enjoying *a better deal and a better buy with Chevrolet trucks!*

# THE BULLDOG

Written By The Journalism Class Of Midland High School

TEXAS HIGH SCHOOL PRESS ASSOCIATION FOUNDED 1923

## Kulture Korner

By JAMES JOHNSON

There are many persons in MHS who are talented in some field of art. Quite a few are future artists while others are potential musicians. The purpose of this column is to inform you of newly discovered talent and keep you informed about the old.

Congratulations are due to Janice Michener for winning an award recently in the Ford Company's craft contest. Janice' winning piece was a copper tooled clown. Janice is not limited to copper tooling in ability, but she is also a capable water colorist. Two of her water paintings are on display in the display case next to the superintendent's office.

Speaking of the display case; many people have asked us the name of the person whose charcoal drawing of a matador appeared in the case a few weeks ago. After inquiring around we learned that it was drawn by a new member of our faculty, Miss Story. She teaches the beginning classes of art.

The art classes have been trying their hands at commercial art, techniques, ads, etc. Elaine Conger painted an ad, doing the background with an airbrush. An air brush is a spray gun aparatus used to obtain a spatter effect in picture backgrounds. Elaine's ad consisted of a picture of a girl with beautiful hair and advertised a popular shampoo. These advertisements were done for practice and not for commercial use.

Since the nomination for Catoico queen have been made the Halls of MHS have begun to look like an art gallery. Posters requesting votes for certain candidates for queen adorn the walls of the entire school. Much time and effort were put into the making of these posters.

## Three Clubs Elect Officers For Year

Roddy Braun, Elaine Conger and Gerry Geisler are presidents of MHS clubs following elections last week.

Roddy is president of the National Honor Society. Others officers are Robert Stubbeman, vice president; Ruth Nell Kuykendall, secretary; Bill Robitsek, treasurer, and Patsy Yeager, reporter.

Elaine is president of Art Club II with Kay Washburn vice president; Mary Odom, secretary, and James Johnson, reporter.

Garry is president of the Pan American Club. Tom Dyer is vice president; Grace Boles, secretary; Janna Murray, reporter, and Roger Coil, sergeant-at-arms.

## Past Bulldog Editor Congratulates Staff

I have seen both of the editions of the Bulldog that you've printed, and I want to tell all of you how proud I am of the grand job that you're doing! All of the new columns you started certainly add to the paper.

Peggy Simmons and I are roomin together, and both of us certainly do miss good ol' MHS—but we're having lots of fun here at SMU.

Tell everyone "hello" for us — Congratulations on the fine job you're doing.

Mary Ann McRae

## VIA THE GRAPEVINE

By BETTY BOLTON and NELL CURRAN

Well, now that we all passed our six weeks tests? ? We'll get on to the brighter side of life around MHS.

We heard some extra good news the other day. It seems that one of the grads of '52, Donald Webb, has been elected cheerleader at TCU where he is a freshman this year.

Royce Raye McKee, grad of 1949 and also Catoico queen of '49 is one of 11 girls at SMU in the run-offs for homecoming queen. Royce Raye is a senior this year and is a member of Zeta Tau Alpha sorority.

Peggy Whitson, graduate of '49 has been elected campus queen of McMurry College. Peggy is a member of Delta Zeta.

Congratulations to all these exes who have really made their old alma mater proud of them.

Betty Bolton, Grace Boles and Ardith Campbell went to Texas Tech this weekend to see what there was to see.

---

Jim Ervin, Pat Douglass, and Jon House, freshmen at Texas University came home this weekend. Sure were glad to see all you people.

The added attraction of the teenage program Saturday night was Faye Henshaw who sang "Blue Moon" accompanied on the piano by Elaine Johnson!

It sure didn't take long for all the posters for queen to group in the halls, did it? We think it looks like a close race and we sure hope the best girl wins.

We will all have to bid a fond farewell to Carol Garrison for a few days. Next weekend she is going to her old home town, Wichita Falls, for a visit. We hope she has a real good time.

Dona Ingham is going to Fort Worth this weekend to see Nancy Steedman who goes to school at TCU.

Now for a last-minute reminder. Annuals have gone on sale and will remain on sale until November 15. Remember to get your annual early and avoid the last minute rush.

## Junior Classmen Study Their Cues For Costume Play

"Seven Sisters," the junior play, has been cast, director Verna Harris announced Monday. The cast was selected by a committee of teachers including Miss Bess Thurman, Mrs. Theresa Klapproth, Mrs. Edith Odom, and Miss Verna Harris.

The play is set in a town near Budapest, Hungary. The time is modern. Because of the foreign setting, the play will be costumed, and Elaine Conger is in charge of this part of the production.

The parts and cast are: Mrs. Gyrurkovics, Anne FitzGerald; Katinka, Frances Hefren; Sari, Marilyn Dunagan; Ella, Dona Ingham; Mitzi Virginia Kroenlein.

Terka, Roberta Stewart; Liza, Margaret Gibson; Klara, Nona Lynn; Colonel Radivany, Tom Dyer; Gida Radivany, Bill Crenshaw; Ferenz Horkoy, Dwayne Chestnut; Toni Teleki, Don Roderick, and Janko, Bobby Hudson.

Rehearsals began October 6, and will continue until production time. A tentative date for this has been set for November 13 and 14, student director Joan FitzGerald said.

## CHUCK WAGON BILL OF FARE

Monday—Braised beef, potatoes, cooked in jacket, spinach, Harvard beets, hot rolls, cake squares, milk.

Tuesday—Baked ham, potato salad, green beans, carrot strips, hot rolls, cookies, milk.

Wednesday—Fried chicken, gravy, mashed potatoes, English peas, combination salad, hot rolls, Jello, milk.

Thursday—Meat balls and spaghetti, pinto beans, cabbage slaw, cornbread, doughnuts, milk.

Friday — Salmon loaf, scalloped corn, beets, lettuce salad, hot rolls, fruit cobbler, milk.

## Memory Lane

One year ago many Midland High School students were recuperating from a big weekend at the Dallas Fair. The lost and found was full of odds and ends. Though one could bet dollas to doughnuts that most of the lost items were books. Charles Whitmire was featured as the student of the week. Murray-Young Motor Company donated a new Ford to the Driver's Education course. When some of those novice drivers got behind the wheel it was every pedestrian for himself, a case of the survival of the fittest.

"October 31???" was a big mystery to most MHS students. Another "Memory Lane" was called, if we remember correctly, "Remember When?"

Two years ago the teachers had to go to school too, for a short time anyway. They were attending In-Service Training. The question of the week was "Who do you think will win the World Series?" Does that sound familiar?

"Warm up," "Sit up" and "Shut up" were signs posted in the band hall by the band director. That advice was short and to the point. Then, as now, students were gazing at the ceiling, walls and most everywhere reading Catoico Queen posters. Students could be seen drinking cokes from the coke machine which was operated by the Student Council. Students this year can be seen drinking water.

A thermometer was used to see how much spirit we had at pep rallys. The more spirit shown; the higher it went.

Three years ago, Memory Lane was called "The Merry Morticians." Looked up mortician and found out that he is one whose life is a grave undertaking. Members of the Bulldog Staff had official press cards. Wish we had some this year!

Miss Gordon's senior English classes wrote imaginary headlines on the Puritan and Restoration Periods. Maybe one of the headlines read, "Mayflower Lands In America." All we know about the Mayflower is that it was a small ship on which several million Pilgrims came to America. We also saw in the paper that many people are very tempermental. We know some tempermental people, too—90 per cent temper and 10 per cent mental. About the only thing students were interested in were the results of the six weeks test. That holds true for this year and any year about this time.

## Two Report On Convention Of U. S. Student Councils

Although few people know it, two members of our Student Council attended the National Convention of Student Councils last Summer.

Roberta Stewart and Betty Sivalls, both juniors and active members of this years council, traveled the way to Evanston, Ill., a suburb of Chicago. The convention was held at Evanston Township High School from June 18-21.

Its purpose was to create mutual understanding among the councils of all sections of the country, and to help solve any problems they might have.

All but four states were represented, with Texas having the largest delegation. Hawaii had two representatives.

The agenda included various discussion groups, general assembly meetings and a tour of Evanston and Chicago. A particular point of interest on the tour of Evanston was Bahai Temple, a temple of the Islam religion. This is the only temple of its kind in this section of the world.

A general assembly was held the last night of the convention, with a dance following.

Two especially interesting speakers were Branch Ricky, business manager and part owner of the Pittsburg Pirates, and Coleman Brown, president of NASC.

The girls returned to Midland by train, and from all reports, the convention was a definite success.

Jimmy were Crow instead of Crain?

Raymond were Clack instead of Click?

## Cast Chosen For Operetta By A Cappella

The tryouts for the A Cappella operetta, "Down in the Valley," were completed last week.

Sally Breeze will carry the female lead of Jennie Parsons. The male lead will feature Charles Whitmire playing the part of Brack Weaver, Jennie's lover. The preacher and leader will be Robert Stubbeman and Dwayne Chestnut with Steve Thorson playing the part of Jennie's father. Thomas Buche will be Roy Thomas and the two women are Jean Ann Watts and Yvonne Shain. Royce Measures will play the part of the guard.

The story takes place in Birmingham jail and the surrounding countryside. The characters are typical of those found in hill countries.

The music for the operatta was written by Kirt Weill and the words by Arnold Sundgaard. It had a long run in New York and has been presented by many colleges and community groups although it had not been presented by any of the surrounding High School groups.

Sally Breeze, is a junior this year and studied voice for a year in Colorado before moving here two years ago. She has been in the A Cappella choir for the past two years and was in the chorus last year when "Erminie" was presented.

Charles Whitmire is a senior and has never studied voice although he has been in the choir for three consecutive years and had the male lead in "Erminie" last year.

## Television Almost As Old As Phones, Exhibition Reveals

"You see, television is almost as old as the telephone," commented Mr. Don Hanson, as he explained the workings of television Tuesday to the student body.

The program included an explanation of the television camera, photoelectric cells, television towers, coaxial cables, and a demonstration of television first by coaxial cable and then by tower transmission. An educational record was played during part of the demonstration, featuring "Maestro Philip Hagris and his orchestra."

Mr. Hanson is a representative of the Southwest Bell Telephone Company and was well qualified to speak on the subject, as he is a Texas University major in radio, and a graduate of a television school conducted by the Bell laboratories in Baltimore.

Mr. Roy Golston, another Bell representative, introduced Mr. Hanson.

## Tired Crew Returns From Fair At Dallas

Those bloodshot eyes and droopy heads last Monday were the result of a wonderful trip to the Dallas Fair.

The FHA and FFA girls and boys returned from their trip Sunday but were still recuperating Monday.

The girls reportedly saw a magnificent fish acquarium, various exhibits of foods, clothing, and furniture, and the antique auto show.

The boys saw livestock exhibits, cutting-horse contests and an exhibit of farm machinery.

## Calendar

Monday—Clubs Group I.

Tuesday—Advisory Rooms.

Wednesday—Assembly - Speaker.

Thursday—Advisory Room.

Friday—Pep rally, Borger game (there).

## BULLDOG EDITORIAL

A bell rings, and they're off! Just like the races. Only this isn't the races, it's lunch time at Midland High School and that galloping you hear isn't horses, it's students running to the cafeteria.

Every day at lunch time students run at breakneck speed down the hall trying to be the first to get their lunch. Three years ago before the new cafeteria was built, we had to run home every day to eat. Now that we have the new cafeteria, what do we do going to lunch? You guessed it, we run!

Risking life and limb, these fugitives from a race track are not only endangering themselves, but anyone else who is caught in the rush.

Remember what Ben Franklin said in his poor Richard's Almanac about "haste makes waste?" It's much nicer to take our time going to the cafeteria, than wasting time in a prolonged visit to the hospital. Don't be one of the murderers in "murderers row!"—Don Dwight.

Larry Friday

Bobby Cast

## Bulldog Co-Captains Agree On Outlook For Grid Squad

Bobby Cast, better known as "Red" Cast, and Larry Friday, co-captains of the Midland football team have the duo thought that the Bulldogs are championship material this year.

Red, five feet, 11 1/2 inches tall, says that blue is his favorite color and coming first on his menu is fish, while football and boxing are his favorite sports. His hobby is art, and he tools leather like a professional. Red is quoted as saying in favor of the Bulldogs. "We don't have a big team, but they have a good spirit and that's what it takes to win."

Larry Friday, standing five feet, 10 inches, claims steak as his favorite food and purple and white as his favorite colors. Favorite sports for Larry are football and baseball and art is his hobby also. Larry is quoted as saying, "The team has a desire to win and we believe we will."

With these two boys leading the 1952-53 Bulldogs and with the team spirit it looks like this year's football season will be a success. A hot news tip is out that we will beat Borger.

## Choir Makes First Public Appearance

The A Cappella choir made its first public appearance by performing for a Masonic meeting at North Elementary School on October 7.

"Brother James' Air," arranged by Gordon Jacob, opened the program, and "Lead Me, Lord" came next with Wanda Moore singing the solo. Following, the choir sang "Rain and River" by Oscar Fox and "Cool Water" with Charles Whitmire doing the solo work. Ruth Ann Rhodes carried the solo in the next number, "I Wonder As I Wander."

"Almighty God of Our Fathers," by Will James, followed with the choir then closing their program with the traditional benediction, "The Blessing of St. Francis."

## Dr. Willis A. Sutton To Address Students

Dr. Willis A. Sutton, superintendent emeritus of Atlanta, Georgia, public schools, will speak to Midland High School students Monday.

Dr. Sutton, the past president of the National Education Association and former guest lecturer for the Reader's Digest probably has spoken to more teachers and students in the United States than any other living man.

He is interested in young people and their problems, and after the assembly program all students will be given an opportunity to talk to him personally.

Dr. Sutton also will speak to the teachers while he is here.

## The Question Of The Week

What would you do if you were elected President of the U. S.?

Larry Pierce — "Drop an atom bomb."

Phillip McFadden — "Sit in a chair and rest."

Rex Greenstreet — "Ha! Ha! Ha!"

Lanetta Early — "Be the first woman President."

Rose Tindal — "I don't know."

Othanna Gadberry — "Oh, that would be funny, wouldn't it?"

Stanley Putnam — "Pass a law making loud mufflers legal."

Yvonne Shain — "Make Jerry Ball secretary."

Ellis Long — "Move the national capital to Texas."

Shirly Pugh — "Learn to be a doctor without an education."

Bill Aldrich — "Ask John L. Lewis for a raise."

Carlton Bell — "Ban all six weeks and final exams."

Dan Hudson — "Make all women slaves."

Anne Billingsley — "Let Terry be first lady."

---

Everyone was sailing smoothly once more Wednesday afternoon at the close of school, reason—death six week's test finally had "blown" over!

## Band Puts Modern Recorder To Use; Stage Group Named

Walking into the band hall these days is like walking into a deluxe recording studio. The new recording equipment, the finest the band has ever used, has arrived.

A Magnecorder recorder was purchased last year and a professional boom stand, NBC microphone and a speaker system are new additions this year. A record player that works through the Magnecorder and speaker system also was purchased.

A stage band has been organized within the band by director, Ralph Mills. Selected were Larry Lindsley, Bill Fannin, Jack Michener, trombones; Horace Greenstreet, Pat Groves, Edward Black, Jimmy Smith, Ellis Long, saxophones; Sonny Hopper, Harry Hinkle, Bob St. Clair, cornets; Gene Atkins, bass; Jackie Matthews, string bass; Eddie Halfast, piano, and Phillip McFadden, drums.

The officers of the band for 1952-53 were elected last year. They are Bill Aldrich, captain; Larry Lindsley and Horace Greenstreet, lieutenants; Ellis Long, Bill Mayfield, Ed Patterson, and Anna Bess Doyle, sergeants. Claudine Hamner and Betty Needham are librarians.

The band traveled to San Angelo October 11, for its first trip of the season. It will also attend the Pampa and Odessa games.

The band parents club, the Band-Aides, met October 9, for their first meeting of the year. Principal Don Mitchell spoke.

## Sideline Sidelights

By JACK PENNINGTON

Who would have thought at the beginning of the football season that Midland would, in three non-conference game amass a total of 149 points and become a leading contender for the 1-AAAA crown? Not very many Bulldog supporters would have bet on it!

Last Spring when Coach Jones stated he would have a fast team, everyone scoffed at the "fast backs" but "no line." But that line has held opponents to 32 points and the large part of those were scored against the reserves. Just how good the team really is has not been shown yet, what with the reserves being rushed in after a good lead has been accumulated. These reserves have looked good enough so far to have beaten Ysleta or Poly by themselves.

It is doubtful, however, that they could have defeated Lamesa without the help of the first string. Standouts on the reserves include Dale Jobe, William Brooks, Kenneth Schrum, Clinton Nobles.

---

The Bulldogs journeyed to San Angelo Friday for their first conference win of the season. Midland, favored by several touchdowns did not let the statisticians down.

The Bulldogs are still outnumbered in games won and lost with San Angelo. The Bulldogs have won but 5 in 14 attempts.

| | Midland | San Angelo |
|---|---|---|
| 1931 | 0 | 7 |
| 1932 | 0 | 61 |
| 1939 | 18 | 7 |
| 1940 | 18 | 7 |
| 1941 | 7 | 13 |
| 1942 | 7 | 33 |
| 1943 | 0 | 27 |
| 1944 | 6 | 49 |
| 1945 | 7 | 13 |
| 1946 | 7 | 14 |
| 1947 | 13 | 33 |
| 1948 | 26 | 20 |
| 1951 | 21 | 6 |

---

About two weeks ago new basketballs were bought for the boys' PE classes here at MHS. These balls cost approximately $30 each. Last week, one PE class, in a jovial mood, had a vigorous game of kickball with them. As of Wednesday, one of them is flat and the other's cover skinned badly. We hope they had fun tearing up the school's equipment and will be the first to laugh when they complain of "no basketballs" about mid-term.

---

The "B" squad had an open date this week after losing to Odessa's "Bees" last Saturday. Coach Jones took about 10 of them to San Angelo Friday to give them practice in the "A" game.

## Have You Met...

. . . Sonny Hopper from Clarance, Missouri?

Sonny is a 5' 10" Senior who has been here since school started. He is interested in football and basketball and plays in the band.

---

. . . Martha Murphy from Rantoul, Illinois.

Martha lived in Rantoul before moving to Midland in July. She is a 5' 5" Junior with light brown hair and blue eyes. Football is her favorite sport, blue is her favorite color, and "anything" is her favorite food!

---

. . . Paul Moran, from Abilene?

Paul, a senior, moved to Midland in June, and his schedule consists of biology, typing, English and PE. He is interested in football and plans to go out for track this Spring.

## Bulldog Requests

"Wish You Were Here," to Jimmy McClatchy and Jim Ervin from Grace Boles and Dona Ingham.

"Chew Tobacco Rag," to Jimmie Counts.

"Woodman, Woodman Spare That Tree," to Timber Forrest.

"Home Sweet Home," to Carol Garrison, Mary Jo Hannon, and Sylvia Smith.

"Chattanooga Shoe Shine Boy," to Sally Kelly.

"Tumbling Tumbleweeds," to Ardith Campbell and Barbara McMillan.

"There's Been a Change In Me," to Harold "Goosey" Wallace.

"Five Foot Two," for Jan Scott from Billy Burt.

"Jr's a Big Boy Now," to Ronnie Rone.

"Hot Rod Race," to Clayton Tatom.

"All I Want For Christmas is My Two Front Teeth," to James Reagan.

"Jambalaya," to Margie Miller, Jane Miller, and Sally Breeze.

"Dad Gave My Dog Away," to Bulldog Petty.

"It's In the Book," to Sherry Page.

"Mr. Touchdown, U. S. A.," to Jay Schlitcting.

"Headin' Down to Mexico," to Darrell Spivey and Giff Alstrin.

## Stage Gets Gory, Catsup Flows Free In Safety Program

"Fire!"

"That was Jane's voice!" The play raced on! The plot thickened! And so did the catsup.

When did all this happen? It was last Wednesday when the dramatics class put on a fire prevention play in assembly.

The play, called "The Rehearsal," took place in the attic of the home of George Mason, and a few lines of Marlowe's immortal "Dr. Faustus" were included (no extra charge.) A bottle of blood (catsup) figured prominently in the production.

Those included in the cast were Marilyn Dunagan, Anne Kennamer, Judi LeFever, Joycelyn Newberry, Dwayne Chestnut, John Petty, Bill Robitsek and Steve Thorson.

Student director for the skit was Dan Ratcliff.

It's a good thing the Eisenhower and Stevenson campaign chariots are headed in the same direction or there might be a head-on collision. If Ike is going to veer in away from the Republican Old Guard and Stevenson does the same from the Democrat Left-Wingers, the middle is going to get mighty crowded.

— FARM, DAIRY AND RANCH NEWS —

The cattle market continued slow and weak at the Midland Livestock Auction Company sale Thursday. Only good quality butcher calves and yearlings showed strength over recent declines. Receipts were 302 head.

Fat calves and yearlings, choice grade, drew $22 to $26, medium to good $18 to $22, common to medium $15 to $18, cull to common $11 to $15. Medium to good grade slaughter cows brought $12 to $14, canners and cutters $8 to $12. Bulls sold for $13 to $16.

Stocker steer calves cleared at $20 to $23 and heifer calves at $19 to $21.50.

This is Oil Progress Week, Pardner, and all of us should take time out to express greetings and all best wishes to our friends and neighbors engaged in the great and progressive oil industry which has meant so much in the development of West Texas, Texas and the nation.

So, a great big, friendly West Texas greeting is extended to the oil fraternity, and may this year's Oil Progress Week observance be the biggest and best in history.

Let's all join hands as we work together for continued progress in the Permian Basin Empire.

Another week has gone by without moisture, but October still may be that wet month we have been looking for so long now.

Better keep that slicker handy, Pardner.

• • •

Billy Wyche was in town from his Van Horn ranch one day last week. The former Midland rancher, who still has holdings in this section, says he got some rain recently, but not nearly enough.

Four an hour, that is the number of farm buildings burning somewhere in the nation. Experience shows that only about 50 per cent of the loss is covered by insurance and the remainder is a complete loss to farmers.

With replacement costs for buildings, machinery and equipment high and in some cases in short supply, agricultural producers, says E. C. Martin, state leader for the Texas Agricultural Extension Service, cannot afford to let fire hazards go unnoticed on their properties. Martin points out that 90 per cent of all farm fires can be traced to one or more of the following hazards: improper storage and use of gasoline and kerosene; unsafe wiring, overloaded electrical circuits, failure to replace worn cords and defective electrical appliances; defective stoves and furnaces; careless smoking habits; spontaneous ignition of hay or other stored materials; sparks from chimneys or bonfires falling on flammable roofs; defective chimneys and failure to protect buildings with lightning rods.

**Periodic Checks suggested**

Periodic checks of all farm buildings should be made, says Martin, to make sure that the stage isn't being set for a destructive fire. Finding the hazards, however, is not enough. They must be removed.

Prevention should be the number one item in any program aimed at reducing the number of fires, but despite all human efforts fires may strike and provisions should be made for these emergencies, says the state leader.

Bonnie Cox, organization specialist for the Agricultural Extension Service of Texas A&M College since 1949, has been appointed acting state home demonstration leader. She succeeds Maurine Hearn who is on a one year leave of absence from the Extension Service under a Point IV assignment in Bolivia.

From headquarters at College Station Miss Cox will supervise work of the home economics specialists and assist with program development. She also will continue organization work with the Texas Home Demonstration Association.

Miss Cox was born in Hamilton County, attended high School at Hico and in 1928 received a degre in home economics from Texas State College for Women. Subsequently she did graduate study at the University of Texas, Colorado A&M College and the University of Wisconsin.

Angus enthusiasts from all sections of the United States, Canada, and South America are in store for a colorful and eventful 69th annual meeting at Chicago December 2 and 3. The American Aberdeen-Angus Breeders' Association has announced plans for the greatest session in the group's history.

Heading the program, which is held each year during the International Livestock Exposition, will be an informal gathering at the Palmer House on Tuesday evening, December 2, for all Angus breeders. Frank Richards, secretary of the national association, has announced that the session is intended to create a closer bond of friendship among breeders of the dogies. The "get acquainted" night was inaugurated at last year's meeting and proved very successful.

• • •

Texas' two billion dollar agricultural industry is featured at the 1952 State Fair of Texas, which ends next Sunday, in 12 exhibits which graphically illustrate the big story. The Story Book of Texas Agriculture idea, which proved popular with last year's 2,000,000 fair visitors, again is used but with redesigned displays featuring sound effects, animations and live animals.

The Agricultural Extension Service of the Texas A&M College System is responsible for the story book phase of the agricultural exhibits. Each of the 12 Extension districts present a large show-window type exhibit depicting agriculture in the area.

# Land Prices In Texas Hit New Peak, A&M Report Says

COLLEGE STATION—(AP)— Land prices in Texas reached a new peak in 1951.

The State average jumped from $49.95 in 1950 to $62.15 in 1951, the report of the agriculture experiment station of Texas A&M College showed.

The report noted that Texas voters had approved a constitutional amendment to furnish a revolving fund of 100 million dollars to enable veterans to buy farms at low, long-term interest rates.

The program started in 1950 with 25 million dollars.

The report said: "If these additional funds should be loaned at a rate equivalent to that of the first 25 millions, the veterans program would become the dominant factor in the land market in many areas if not in the state as a whole. The consequences could only be inflationary in a market which already is booming."

Increased land prices in 1951 were attributed to the high price of cotton, together with the pre-season removal of acreage allotments, and greatly expanded activity in oil and gas leasing and development.

Prices went up in all but two of the State's 17 major type-of-farming areas. In the Grand Prairie the average price dropped 13 per cent and in the high plains and trans-Pecos grazing area a decrease of 22 per cent occurred.

The report said drouth conditions probably influenced prices in both areas.

Prices went up the most in the north-central grazing area, with an increase of 65 per cent. The coast prairie registered a 61 per cent increase; the Edwards Plateau and central basin, 46 per cent, and the Rio Grande plain, 31 per cent.

## Record-Smashing Growth Predicted For Oil Industry During Immediate Future

The outlook for continued expansion and enlargement of the oil and gas development and producing industry in the United States is extra bright according to arren L. Baker of Houston.

Baker, editorial director of World Oil, gave his views in an address before the annual meeting of the Petroleum Electric Power Association in Tulsa held in Tulsa last week.

Excerpts from that address follow:

* * *

"Exceedingly sharp growth has characterized the petroleum and natural gas industries in recent years. Tremendous expansion has been necessary to meet sharply increasing demand for petroleum products and natural gas. Never before has a single industry made such huge expenditures for expansion and development as have American oil and gas companies during the last five years.

"Ahead lies further vigorous growth at record-smashing rates. Mechanization of the country continues to rise, indicating additional sharp gains are likely in consuming rates.

"To provide adequate future supplies, the industry is confronted with the task of increasing its prospecting efforts, drilling more wells, maintaining a larger number of producing wells, discovering a growing number of additional new fields, expanding secondary recovery operations, enlarging pipe line facilities, and adding to its natural gasoline and refining plants.

"Consequently, prospects are exceptionally bright for the sale of oilfield equipment and electrical power to the petroleum industry.

"An amazing increase in demand for petroleum products and natural gas has occurred since the war. U. S. use continues to rise rapidly, with the result consumption is expected to attain an all-time peak of 7.4 million barrels of oil daily in 1952.

"Thus, the U. S. now consumes almost one million barrels more per day than in 1950, uses two million more per day than in 1947, and over three million barrels more each day than it did 10 years ago. The current consuming level is over twice as much as the average for 1936-1940.

"Consumption of natural gas has shown an even more spectacular gain. Exclusive of vast quantities of natural gas used for various oil field operations, natural gas consumption in 1952 should reach almost 22 billion cubic feet daily, two billion above last year, one-third more than in 1949 and three times greater than the average between 1936 and 1940.

**Further Gains Ahead**

"Further gains in consumption, and therefore in the need for oil and gas in the years ahead, is indicated by the very sharp growth in principal oil and gas consuming units since the war.

"Oil and gas consuming units have been growing at faster rates than before the war. The growth in both 1950 and 1951 was especially large. These trends presage further growth in petroleum and natural gas consumption.

"Motor vehicles (passenger cars, trucks and buses) operating in the U. S. reached an all-time of about 52 million at the end of 1951. This was almost three million more than a year previous, seven and one-half million greater than two years ago and, believe it not, 21 million bigger than at the end of the war.

**Gas Customers Increase**

"There has been an amazing increase in natural gas customers. The 17.2 million natural gas customers at the end of 1951 was two million more than a year ago, and almost twice the quantity at the end of 1946.

"At the same time, there has been a surprising gain in domestic or home oil burners. So far, contrary to earlier expectations, distribution of natural gas into many new areas has failed to retard the use of oil for home heating purposes. Displacement of coal and new home construction have been significant factors in the rapid growth of both oil

SHERLOCK HOLMES AT WORK—Only the babbling of the stream and the clink of his hammer on outcropping rocks break the tranquility of the countryside as a Humble geolgist looks for clues of hidden oil.

## Unique Laboratory Enables Geologists To Improve Work

See Picture On Page 15

An oil service business that had its start in the bedroom of a Midland home in 1946 is now a growing concern here.

The Residue Research Laboratory at 2405 West Indiana Street, owned and operated by E. W. Vanderpool, is engaged in the geologists' specialist field of stratigraphy—the study of strata, or layers, deep within the earth.

Vanderpool has developed a special technique in the study of residues, and he says his laboratory is possibly the only one of its kind in the United States or the world. Previously, stratigraphic work was conducted primarily in colleges and universities for the purpose of study and experimentation.

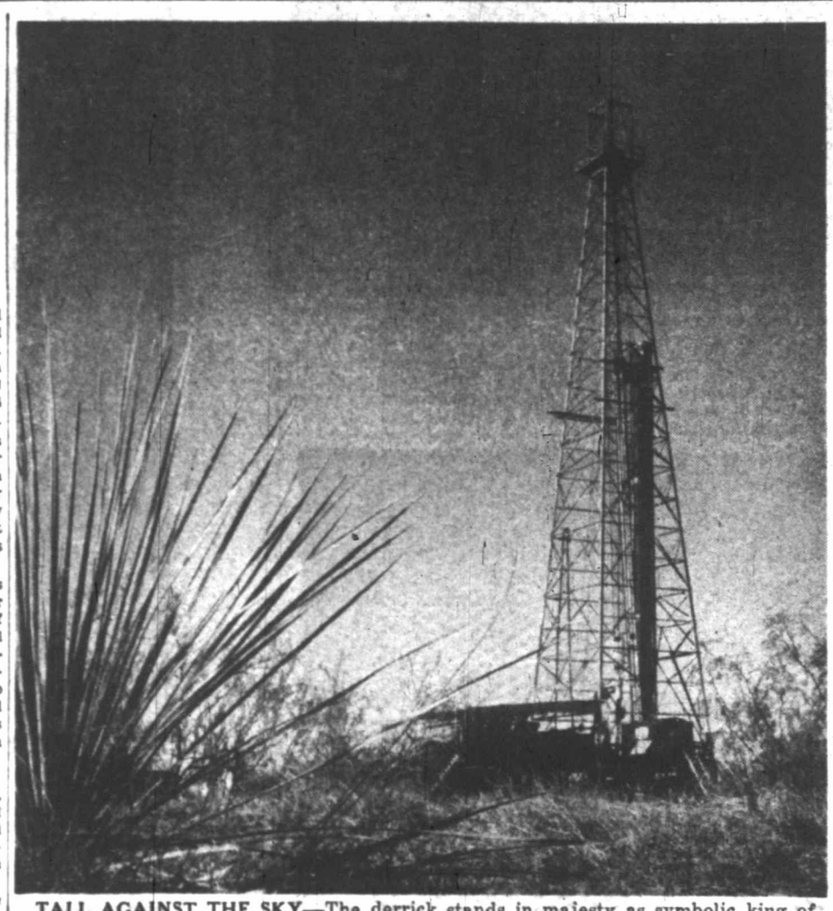
The idea of a commercial laboratory was conceived in 1924 by H. S. McQueen in the School of Mines at Rolla, Mo. Development of the idea into practical application was Vanderpool's contribution. His training in the field came as a student at the University of Nebraska and more than nine years service with Stanolind Oil and Gas Company.

The lab's work begins when well cuttings from new wells are brought into the laboratory. Drillers provide samples from each layer through which they drill. The cuttings, through Vanderpool's technique, are reduced to their insoluble elements.

Examination of the insoluble residues reveal ages of the strata may date back hundreds of millions of years. Information thus obtained reveals how formations run far below the surface and help other geologists to determine more about the structure of the earth. Data is coordinated with that of other wells in order to obtain a more complete picture.

Vanderpool's lab has on file residues from more than 600 West Texas wells, and more than 1,000 samples are tested each month. Currently he is assisted by his wife and two geologists, but he indicates that the growing business will require added personnel in the future.

TEETH THAT CHEW ROCKS—Down into the hole at a Humble rig goes a jet rock bit. Drilling mud under high pressure helps the tough, spinning teeth gnaw through hard rock formations in search of oil.



TALL AGAINST THE SKY—The derrick stands in majesty as symbolic king of the vast Permian Basin Empire. This well, but one of many, is Shell's 1-A-1, eight miles south of Andrews—a wildcat whose bit dug straight to oil.

## Oil Men Report To Nation; Forward Strides Are Cited

First-hand reports on the progress of oil men everywhere in keeping this nation supplied with an abundance of petroleum products will highlight this year's observance of Oil Progress Week, October 12-18, inclusive.

The reports will be made by thousands of oil men (and women, too), in virtually every community of any size in the country. They will be hometown reports, made by local oil men to people with whom they share civic responsibility and trust.

The sole objective of this unique operation is public understanding. By focusing attention on the industry—what is it, what it does and how it handles the growing problem of satisfying the American appetite for petroleum products—oil men hope to give the people a clearer picture of what free men and free competition are contributing to social and economic progress.

The reports will be made at luncheons, dinners and other special gatherings. In addition there will be special radio and television shows, exhibits, displays and open houses. Some communities will have big street parades, and many will have other special events. Pamphlets, booklets, leaflets, lapel buttons, banners, billboards and many other special materials also will be used to tell the story of oil.

**'Two Equals Three'**

The general theme for this year's observance will be "Your Progress and Oil Progress Go Hand in Hand."

The specific theme is built around "Two Equals Three." This unmathematical equation symbolizes the progress made in gasoline quality alone. It pinpoints the series of laboratory and road tests which have proved that two gallons of modern gasoline will do the work which required three gallons of gasoline in 1925.

In other words, it will emphasize that motorists currently are getting an over-all quality increase of 50 per cent as one direct result of the oil research and development to improve its established products and create new ones for the American

(Continued On Page 13)

## Oil Pours Out At 1,360,000 Barrels Daily

By JAMES C. WATSON
Reporter-Telegram Oil Editor

All indications continue to point to the Permian Basin of West Texas and Southeast New Mexico remaining at the top of the oil areas of the United States and the world.

This enormous region which extends from Colorado City on the east to El Paso on the west; from Plainview on the north to the Rio Grande River on the south; and from Sonora on the southeast to Roswell, N. M., on the northwest is and has been for more than five years the most active drilling region in the world.

There are many reasons to support the conclusion that it will continue to hold that position for many years to come.

During the first seven months of 1952 a total of 105 new discoveries were made in the two-state Permian Basin territory.

West Texas had 77 new oil discoveries and three new gas discoveries. Southeast New Mexico had 24 oil discoveries and one gas discovery.

Those 105 discoveries in the Permian Basin came as the result of the drilling of 496 wildcat explorations. The fact that 105 of these 496 wildcats were completed as producers and the openers of new fields or new pays is extremely significant.

That gives a 21.16 per cent success rate for wildcat prospectors. That is considerably higher than the all-time national average for successful wildcats in the United States.

That record shows that there is a better opportunity to find new sources of petroleum production in the Permian Basin at the present time than there is in any other region in the world.

That has been the case for the last five years—and there still are many large areas yet to be explored—especially the deep formations.

During the first six months of 1952 a total of 2,681 new oil and gas producers were completed in the Permian Basin of West Texas and Southeast New Mexico.

At the beginning of 1952 there were 40,174 producers in the region. Adding the 2,681 new wells to the 40,174 wells which were on production at the start of the year would give a total of 42,855 producing wells in West Texas and Southeast New Mexico.

In arriving at that total no ac-

## Oil-Trained Army Personnel Provide Needed Know-How

An army school that probably would have seemed fantastic to an iron-pants cavalry-man of the old army is functioning in Jersey City, N. J., turning out a new type of trained soldier—one who can handle oil as well as a carbine, who can figure octanes as well as a firing problem.

Since November, 1948, the Quartermaster Petroleum School has been a going concern training both officers and enlisted petroleum specialists.

A large share of the training actually takes place at oil company facilities, although there is no charge to the taxpayer for the additional aid and instruction.

The school has three aims: (1) to teach selected personnel how to operate the army's petroleum facilities; (2) to insure that, in the event of war, the industry will not be short of men needed to keep the oil flowing to the fighting forces; and (3) to build up a unit of specialist instructors who can swiftly train an expanded corps of military petroleum experts in case of war.

## Model Plane Fans Try Flying Discs

AKRON, OHIO—(AP)—Model plane flyers are tinkering around with flying saucers now. A model flying saucer was launched in this area for the first time and spun successfully over the heads of hundreds of spectators.

In other events at the model plane meet a glider took first prize in a spectacular flight in which it disappeared from sight and was not found. In a speed event another model plance reached a speed of more than 141 miles per hour.

# Consumer Demand For Oil Products Rises As Texas Producers Study Economy Check

A glimpse of the part that Texas may play in the United States' civilization during the next quarter century is contained in a five-volume, seven-pound government report which in itself could serve as a bible for Oil Progress Week celebrations.

In an analysis of the President's Materials Policy Commission report, "Resources for Freedom," the Texas Mid-Continent Oil & Gas Association calls attention to several phases of the report pertaining to Texas' oil-based economy.

The report is an inventory of the world's resources available to the U. S. with forecasts for demand by 1975.

Significant to Texas—with 36 per cent of the known U. S. crude oil reserves and 55 per cent of the natural gas reserves—are estimates that the nation's need for crude oil will be increased 109 per cent, natural gas, 142 per cent.

The need for more oil and gas is based on estimates which include:

A doubling of the country's energy needs.

A 75 per cent increase in motor fuel for passenger cars; two and one-half times current requirements for trucks and buses.

**Five-Fold Increase**

A five-fold increase for conventional aircraft fuel and a 10-fold increase for jet fuel.

A 150 per cent increase for heating oils for home burners and a tripling of the requirements for natural-gas heated homes.

Prepared at the President's request for recommendations to assure long-range supply of vital materials, the report is generally optimistic—with some "ifs"—on petroleum supplies.

The petroleum industry's past performance record is cited:

"For years some people have been predicting that the nation's crude oil supply was going to be exhausted within 10 to 20 years. Yet discoveries and output have continued to rise. In 1951, two barrels of oil were found for every one extracted and two cubic feet of gas found for every one extracted."

The report warns that imports of oil probably would grow in supplementing domestic supplies.

Two economic aspects—taxes and price—both significant to Texas, are discussed. The commission flatly urges that the current depletion allowance should be maintained to stimulate wildcat drilling in order to find new supplies.

"If the present price of crude oil should be increased two to four times, the economic limit of the productive life of 'stripper wells' in older fields would be prolonged by as much as a quarter century," the report states. Texas has thousands of wells in this category.

**Price Variations**

As Texas oil men themselves have pointed out to federal price officials, the report calls attention to the fact that "traditionally, a variation in the price of oil 25 cents per barrel or even less has been sufficient to produce a noticeable change in rate of exploration and discovery."

The report also takes cognizance of the economic considerations for increasing the natural gas supply.

Again, contrary to some current government thinking, the report urges that a long-range policy be adopted to "encourage economic discovery and recovery of the nation's natural gas resources." It is predicted generally that "strong market forces" in a free economy would upgrade the use of gas from current low cost—and sometimes inefficient uses—to take advantage of special qualities of natural gas which other fuels don't have.

The commission predicts increased reliance on petroleum for raw material to feed the growing petrochemical industry. Cautions, however, that only about two per cent by weight of the probable domestic petroleum and natural gas requirements will be needed for chemical raw materials in 1975.

**VICE PRESIDENT**—First vice president of the Permian Basin Oil Show in Odessa is Early N. Spiars, Midland oil field equipment man. He is a past chairman of the Permian Basin chapter of the American Petroleum Institute.

**JAPS AID UN CHILDREN**

TOKYO—(AP)—The Japanese government will send $100,000 in relief goods to the United Nations International Children's Emergency Fund this year. Kyodo News Agency said the goods will be distributed to children in Southeast Asia.

## ANCIENT WORD STILL CORRECT

The word "gas" is derived from the word "chaos."

Chaos was used by the Greeks to define the confused state of matter before the earth was created. Later the word was worked into meaning either "ghost" or "wild spirit."

"Wild spirit" was the term used by a young Brussels chemist, John Baptist Van Helmont, for describing gas in his experiments during the early 1600's.

He gave the elusive matter the Greek name, chaos. As the letters "ch" are given a "g" sound in Van Helmont's native language, the word has become "gas."

—Hot Tap

**HEAVY DRINKERS**

# West Texas Paces Industry In Steady Show Of Progress

West Texas was the state pacesetter for the oil business last year, and indications are that it will continue to be the leader for a while. Since West Texas is most typical of an outsider's impressions of the state, it's almost to be expected that more oil should come from its wide open spaces than from any other area.

The Railroad Commission Districts 7C and 8 make up "official" West Texas in the petroleum industry. From gleaming, modern offices in Midland to trailer camps in towns like Hadacol Corner, West Texas prospertiy rests on oil and on another traditional livelihood, ranching.

Although West Texas has its boom towns from time to time, things soon settle down to a more moderate pace. The citizens of Hadacol Corner, so called for the patient medicine which was a rage two years ago, have dignified their young city by naming it Midkiff, after the oil field in which it lies.

As of Jan. 1, 1952, West Texas had seven oil refineries and 36 natural gasoline and cycling plants. The refineries had a combined capacity of 84,445 barrels daily. The natural gasoline plants ,where liquefied petroleum gases such as butane and propane are produced, could turn out 64,300 barrels of products a day. The latter plants also perform cycling operations; that is, they return dry gas to underground formations for storage or to aid in the production of oil.

West Texas pushed ahead of the former leader, North Texas, last year in the total number of producing wells. At the start of 1952, there were 33,980 in District 7C and 8, an increase of 3,973 over the previous year.

Almost half of the state's 1951 average daily production of 2,767,082 barrels of oil came from West Texas, which produced 1,045,184 barrels a day. West Texas production made a bigger jump than did production in any other area, too, with an increase of 257,781 barrels daily over 1950 figures.

Only six counties in West Texas failed to come up to 1950 production in 1951—all the others produced more. Borden County was a shining example, for 863 barrels of oil a day come from it in 1950 and 19,849 in 1951.

The amounts are even more impressive in view of the fact that drilling was considerably cut back everywhere in 1951. Only 5,113 West Texas wells were completed, as compared with 5,258 in 1950. Of these, 1,035 were dry holes last year.

West Texas drilling is apt to be extremely expensive, for extra hard formations there use up rock bits fast. Besides that, sometimes a well goes down a few feet a day and rig time amounts to fancy figures for the company or operator paying the bill.

Despite that fact, drilling depths in West Texas were greater and greater just as they were in the rest of the state. Total footage drilled last year in District 7C and 8 was 28,233,325 feet, an average of 5,522 feet per well.

The following is a table of West Texas production figures by counties:

**Crude Oil And Condensate Production, 1951**

| County | Production |
|---|---|
| Andrews | 114,862 |
| Borden | 19,849 |
| Cochran | 24,341 |
| Coke | 12,999 |
| Concho | 26 |

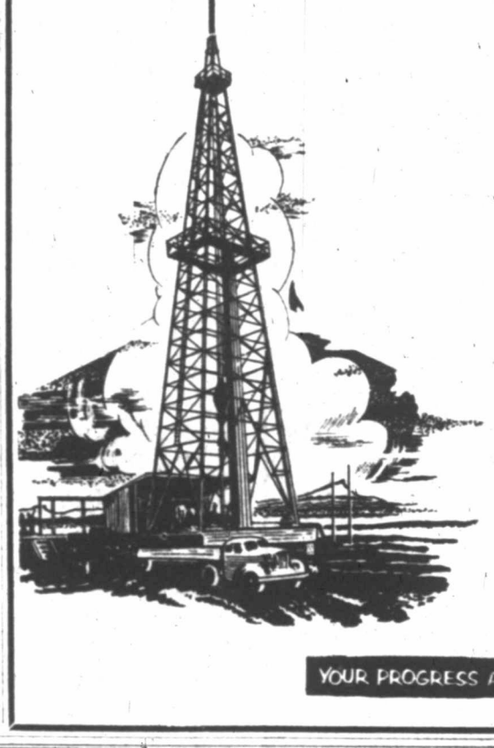
OIL PROGRESS WEEK
OCT. 12-18



# Oil . . .
## For Texas Progress

In every branch of the oil industry, there is constant planning and building for tomorrow, contributing to the progress that has marked the oil industry for more than 90 years.

West Texas has kept pace with this phenomenal development. Here in the Permian Basin potential resources of oil and gas are enormous. Cities are growing by leaps and bounds . . . Midland has become a great oil center.

We take justified pride in being part of all this and offer our continued cooperation in the future program of progress.

# Record Smashing Growth —

(Continued From Page One)

and gas in the home heating field.

"Domestic oil burners rose 600,000 during the last year. The five and three-fourth million in operation at the end of 1951 was more than double the 1946 quantity.

**Railroad Use Increases**

"The most phenomenal growth in recent years has occurred in railroad diesel locomotives. Aside from terminal switch engines, not included in figures presented here, approximately 16,500 mainline diesel locomotives were operating at the end of 1951, more than double the number operated at the close of 1948 and four times greater than the volume five years previous. Diesel railroad locomotives operating today are 16 times greater than before the war.

"Rapid dieselization of the nation's railroads is a very significant development for the oil industry. Because of their year-round use and large consuming rate, each diesel locomotive uses an average of about 8,000 barrels of distillate fuel oil per year. In contrast, during normal winters the average consumption per oil burner is less than 50 barrels, while the average use per automobile is only 29 barrels a year.

**Big Jump In Farm Tractors**

"Likewise, farm tractors in use continue to increase. The 4.4 million at the end of last year was almost twice the 1946 quantity and almost three times larger than at the beginning of the war.

"Numerous other oil-consuming units also are undergoing constant enlargement.

"Continued growth in mechanization, plus making natural gas available in larger quantities to new sectors of the country, presages additional sharp gains lie ahead for both oil and gas consumption.

**More Production Needed**

"Since every increase in consuming rate requires greater supply, production needs will continue growing.

"Despite greater importation of foreign produced oil and larger output of natural gasoline, the U. S. has found it necessary to enlarge its crude production to provide adequate supplies to meet skyrocketing consumption. This year, the U. S. is expected to produce six and one-half million barrels of crude oil daily, almost twice as much as it produced 10 years ago.

"To provide greater quantities of oil, the industry is steadily expanding the number of producing wells. The number of producing oil wells attains greater peaks each year, despite the annual abandonment of 5,000 to 10,000 former producing wells which have been uneconomical to operate.

**Big Gain In Wells**

"Almost 500,000 oil producing wells will be in operation in the U. S. by the end of 1952, close to 100,000 more than in 1941 and 80,000 more than in 1949.

"Consequently, producing oil wells constitute a steadily expanding equipment market. Each new producing well completed must be fully equipped with casing, tubing, an array of control valves, flow lines and many other items. In addition, equipment maintenance needs are constantly being boosted by the increased age of more and more wells.

"Bulk of the producing oil wells are operated by artificial means. 88 per cent or 423,500 being on artificial lift at the end of 1951. Most of the wells employ the pumping method. Besides pumps, these wells require sucker rods, surface units and prime movers. Many use electrical power.

**Must Find More Oil**

"Enlarged production requirements now make it necessary to find four billion barrels of new oil each year within the U. S. merely to maintain the nation's normal relationship between proved crude reserves and current producing rates. Only two and one-half million barrels of new discoveries annually were sufficient 10 years ago. Such large discovery rates never have been maintained in the past, so the job ahead is far greater than ever before.

"Greater production can be supplied only if sufficient drilling activity is undertaken to provide enough wells to produce more oil and gas.

Swiftly rising oil and gas requirements, and the constant necessity of offsetting the inevitable decline of production from old wells, make it axiomatic that drilling operations to expand constantly.

"Consequently, in their vigorous postwar expansion, oil and gas companies have pushed drilling activity to all-time peaks. Total wells completed in 1951 reached a high of almost 45,000. This level was far above the 30,500 completed yearly between 1936 and 1940 and 32,500 wells drilled in 1941.

"Prior to the steel strike it appeared 50,000 wells would be completed in 1952. However, lack of steel put such a serious crimp in ability to drill, far fewer wells will be drilled despite the record volume in the first half of the year.

**Goals Stepped Up**

"Realizing the need for additional productivity, the Petroleum Administration for Defense has established a drilling program calling for 50,000 wells in 1952, 55,000 wells in 1953, and 60,000 wells in 1954.

"The immensity of this program will require that the industry spend larger sums for equipment than ever before.

"Several factors make expanded drilling rates necessary. Increased drilling volumes have not brought about a corresponding gain in number of producing oil wells completed.

"Although 14,000 more total wells were completed in 1951 than in the yearly average during 1936-1940, the number of producing oil wells rose less than 4,000. Due to a great growth in wildcat wells, far more dry holes are completed today.

**Dry Holes Increase**

"Nearly three times as many dry holes were drilled in 1951 as the yearly average during 1936-40. Dry holes accounted for only 20 per cent of all drilling prior to 1940, but steady growth boosted this to 31 per cent in 1947 and to 39 per cent in 1951.

"Such changes in the nation's well completion picture further substantiate the assertion that ar even larger number of wells than current peaks must be drilled in the U. S.

"Although the industry has stepped up its drilling rates to all-time records since the war, fewer wells are being drilled in relationship to producing rates than prior to the war. The recent great increase in drilling has not been sufficient to keep abreast of the growth in production.

"The record completion of 45,000 wells in 1951 represented but 20 wells per million barrels of production. Completion of far fewer wells between 1936 and 1940 constituted the drilling of 24.8 wells for each million barrels produced.

"The decline in relationship of drilling to production becomes more pronounced when the number of new producing oil wells completed is compared with production volumes.

"In view of record drilling, it is startling to realize only 9.8 new producing oil wells were drilled last year for each million barrels produced. This was far less than customary prior to the war, when an average of 15 producing wells were drilled per million barrels of production.

**Further Enlargement Is A Must**

"Further enlargement of drilling above current peaks is a must. Consequently, the industry's equipment needs are certain to be greater than ever before in the years ahead.

"Confronted with the necessity of moving larger and larger volumes of both oil and gas, new pipe line construction has been at all-time peaks in recent years. New lines placed in operation have been ranging from 12,500 up to 16,100 miles per year, despite limitations imposed by the shortage of pipe. Additional high construction rates are assured for the next three years by advance booking of mills to full capacity.

**Construction Increased**

"These construction rates have steadily increased the volume of pipe lines operated in the U. S. The 312,000 miles of oil and gas pipe lines operated at the end of 1951 was 100,000 more than existed 10 years ago.

"Natural gas transmission pipe line construction has been particularly heavy in recent years. Today, natural gas comprises half of the total U. S. pipe line mileage.

"Oil and natural gas companies have made tremendous expenditures to provide funds for drilling a larger number of wells, operation of more producing wells, and for construction of new pipe lines and refineries.

**Record Expenditures**

"Capital expenditures for U. S. property, plants and equipment have been at record levels in recent years, but continue to increase. Expenditures are expected to reach a peak of four and two-thirds billion dollars in 1952. This will be one billion dollars greater than the 1950 volume, which surpassed any previous year. It will be five times greater than the annual expenditures made in the 1936-1940 period, and one and one-half times larger than the yearly average for the 1946-2949 period.

"Oil companies account for the bulk of the expenditures, although natural gas companies are making an increasingly heavy capital expenditure in recent years. Oil companies have been investing so heavily they have almost doubled their total assets in facilities and properties during the last seven years.

"Capital expenditures totaling more than $17 billion have been made since 1945, although gross investment was little more than $20 billion at the end of World War II.

**Further Growth In Prospect**

"Prospects of still further growth in consuming rates presage the need for additional enlargement of facilities in the future, indicating the industry must continue its expansion at unabated rates in the years ahead.

"Particularly heavy expenditures have been made in production facilities, wells and leases. Almost two and one-half billion dollars worth of expenditures anticipated in 1952 will be made in the producing division of the industry. The same proportions have existed in earlier years.

"Investment in additional pipe line facilities also have increased sharply. Although the one billion dollar expenditure for pipe lines in 1952 is slightly less than the amount spent for this purpose in 1951, it is 10 times larger than the annual average rate of investment in pipe lines during the prewar 1936-1940 period.

**Consumption To Gain**

"Prospects of further gains in consuming rates, faces the industry with the task of continuing its vigorous growth at record-smashing levels. The outlook is indeed bright for the sale of oilfield equipment and electrical power to the oil and gas industry.

"The need for continuing to invest heavily in new wells and facilities during coming years confronts the industry with a terrific financial burden.

"There has never in the history of this country been a more imperative need for increasing the incentives for oil and gas exploration and development. The government now controls these factors, just as it controls the allocation of steel.

"Under today's conditions there is a greater need than ever before for retention of the 27 1/2 per cent depletion allowance and right to expense intangible drilling and development costs.

**Needed For Future**

"Furthermore, trends indicate the present need is not anywhere near as great as it will be in the near future. The government should assure the industry that these tax provisions will be maintained.

"For another, the government should permit higher petroleum prices so as to correct a situation in which oil prices have not kept abreast of advances in operating costs. Drilling volumes, and consequently producing ability, invariably follow price trends because of the difference in profit incentive.

**Deterrents To Expansion**

"The greatest deterrent to continued expansion of the petroleum industry—and all other businesses—is the prospect that future conditions will not provide worthwhile financial returns for individual enterprise. This is most unfortunate, for people are moved to real creative and productive effort only by the hope of individual reward.

"Consequently, the most essential element for continued progress is to leave industry free to develop, on a tried and proved basis, and to shun the adoption of all measures which would attempt to regiment or retard research, destroy the incentives of invention, or prevent the free play of competition and opportunity.

**Open Door Needed**

"In other words, we must maintain an open door to opportunity, where energetic men who take risks can hope for rewards. We must not permit the doors of opportunity to close and thereby stifle man's initiative and ingenuity, his energy and courage. Such a policy is this country's best possible insurance against the future.

"The need for providing greater amounts of oil than ever before constitutes a challenge to the industry's ability and ingenuity, the like of which it has never faced before. The magnitude of the task is truly gigantic. However, the huge quantities needed will be made available by the industry if given the proper incentives and working conditions."

TICKET PUSHER—John E. Cooper of Midland, vice president of a Permian Basin acidizing and perforating firm, is co-chairman of ticket book sales for entertainment at the Permian Basin Oil Show.

## Parents To Check English Of Pupils

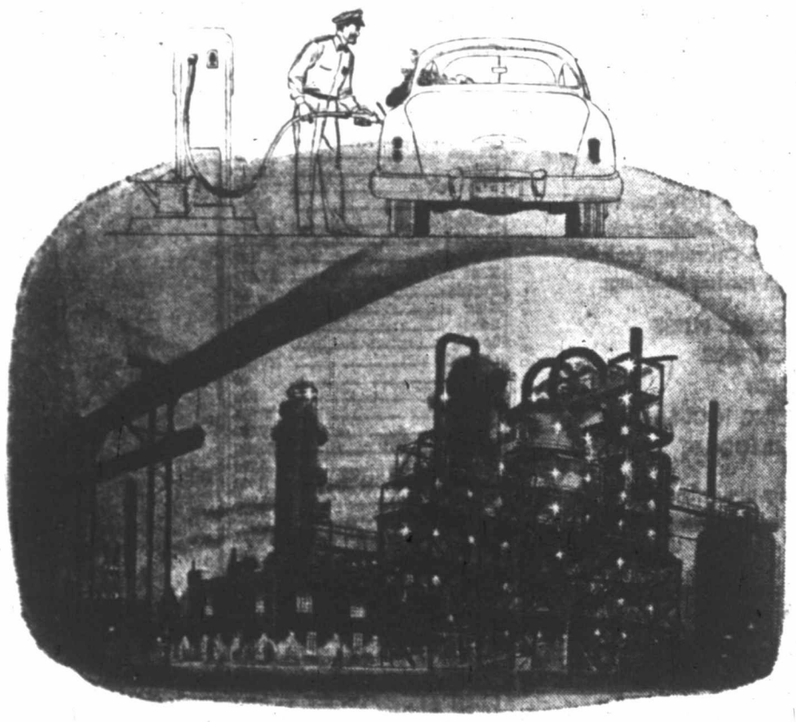
BINGHAMPTON, N. Y.—(AP)—Parents of pupils in grades seven through 12 of the city schools will have a better chance to keep tabs on their children's progress in English because of a new plan adopted this year.

Pupils are required to submit pertinent copies of their English curriculum to their parents. The plan developed when parents attending a meeting of the secondary education council admitted they didn't know just what their children studied in school.

**INCREASED DEMAND**

According to the report of the President's Materials Policy Commission, a 110 per cent increase is expected in U. S. demand for oil products by 1975.

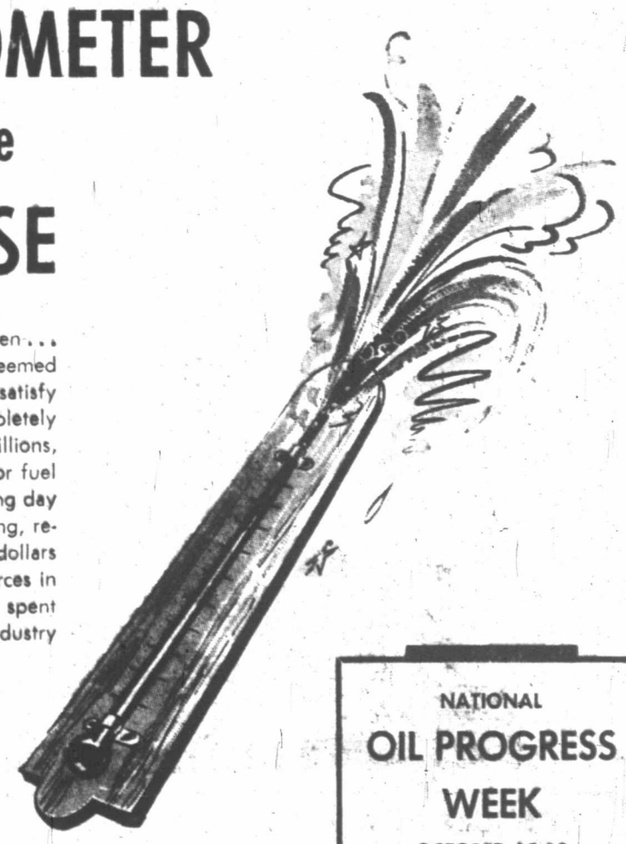
MORE! MORE! MORE!



Is the Unprecedented Demand for OIL— But OIL Is READY!

THERE IS NO BAROMETER That Can Measure OIL ENTERPRISE

It's just about impossible to measure the records set by U. S. oil men . . . they make them and break them too fast! During World War II it seemed that we had surely reached the peak of refining capacity, but to satisfy the increased demands of today, those records have been completely shattered. Bombers, tanks, battleships, fuel burners by the millions, and many more millions of motor vehicles . . . ALL look to oil for fuel supply and NONE is ever disappointed! While oil men are working day and night producing for the present they are constantly exploring, researching and spending to prepare for the future. Billions of dollars have been plowed back into the development of U. S. oil resources in the few short years since World War II . . . billions more will be spent along with the blood and sweat of the men who keep this great industry progressing.



We Proudly Accept the Challenge!

Because we have great faith in the oil potential of West Texas, we are proud to accept the challenge of today's world. The increase in oil consumption will involve great problems, but the members of the oil fraternity will continue to work together and together they will accomplish and reaccomplish their miracle of oil production!

NATIONAL OIL PROGRESS WEEK OCTOBER 12-18

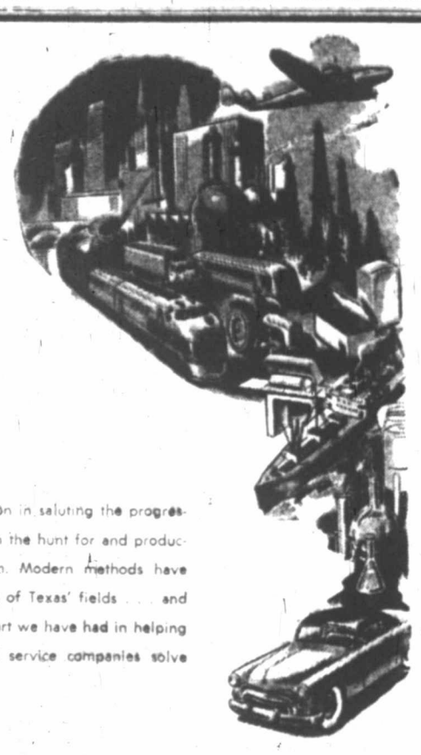
Plymouth Oil Company

Texas Headquarters Sinton, Texas

District Office Midland, Texas

EXECUTIVE OFFICES – BENEDUM-TREES BLDG. – PITTSBURGH, PA.

Your Progress and Oil Progress Go Hand in Hand!



. . . and so we join the nation in saluting the progressive-minded men engaged in the hunt for and production of powerful petroleum. Modern methods have greatly increased the output of Texas' fields . . . and we are proud of the small part we have had in helping the drilling, producing and service companies solve their mapping problems.

OIL PROGRESS WEEK OCT. 12 TO 18

# Science Of Petrochemistry Takes Big Role In Industry

Fascinating . . . surprising . . . amazing . . . breathtaking.

These and many other adjectives just like them can be used without hesitation (and without exaggeration, too) in describing the new petrochemistry industry.

Like a twentieth century beanstalk, this vast new industry has sprung up so fast that it seems to have occurred overnight.

It has contributed directly and indirectly to an astounding flow of chemicals and compounds. The list, in fact, is almost endless already—and the men of test tube science agree that the industry is just in its infancy!

These chemicals and compounds are winding up in devices, contraptions, conveniences and joys that seem like modern-day miracles. They help to make clothes, for example, that won't wrinkle or shrink in the worst rain-storm; they have helped to open the door on a whole world of plastics—for toys and combs, household fixin's and eye-glass frames, telephone fixtures, radio cabinets, and many, many others.

They're also being used in the manufacture of adhesive tapes, printing inks, lacquers, synthetic rubbers and synthetic fibers, nylon, detergents, cosmetics, explosives, agricultural sprays and fertilizers—on an on, the list goes.

**Competition And Prices**

Because of the abundance of oil and gas, and the fierce competition which permeates the entire petroleum industry, petrochemistry has had a steadying influence on prices. In addition, its ability to produce in abundance has taken many chemicals and substances off the critical supply list.

As an industry, petrochemistry is about 25 years old. But for all practical purposes, the last decade or so embraces the real story. In this short period of time, its capital investment increased from the million to the billion dollar-plus class, and its output of raw materials and products skyrocketed from the multi-million to the multi-billion pound category.

Despite the mushrooming growth of petrochemistry, it poses no supply problem for the petroleum industry. So far, less than one per cent of the petroleum industry's total output is involved in petrochemical operations. The scale of the petroleum industry's operations is so great that it can continue to absorb all of petrochemistry's requirements without dislocation of any other product.

The development of petrochemistry is nothing short of amazing. Capital investment requirements have been exceedingly heavy, because the plants and equipment are very expensive. But the industry long since has passed the billion dollar mark and is now around two billion dollars. Forecasts indicate that by 1962 capital investment will have increased to five billion dollars or more.

## Israel Declines Russian Exchange

TEL AVIV—(AP)—The Israel government is not able to import Russian wheat in exchange for citrus fruit, according to a foreign office spokesman here.

It was stated that the wheat price asked by the Soviet authorities "was considerably higher than that which Israel pays under the International Wheat Agreement or on the free world market."

# Relics Of Prehistoric Life Give Clues To Oil Sources

Hob-nobbing with tiny, shell-like animals that lived more than 200,000,000 years ago earn a living for employes of the Paleontological Laboratory at 611 West Missouri Street, an organization owned and operated by R. V. Hollingsworth.

Geologists use the information furnished by the concern as an aid in analyzing rock formations encountered in oil well drilling operations.

Tiny fossils recovered from well cuttings reveal forms of life from the Pennsylvanian period, which began 270,000,000 years ago, down to the more "modern" Permian period, which ended only 185,000,000 years ago.

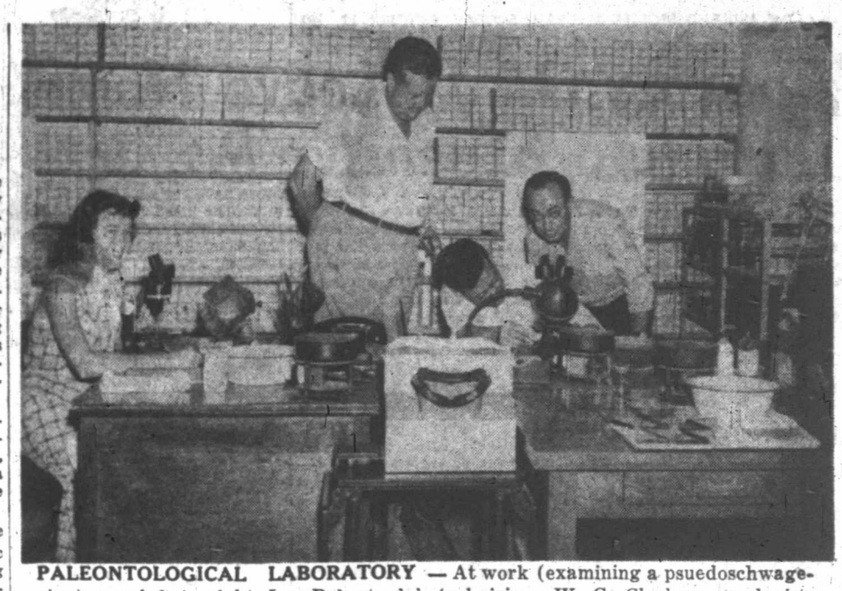
Before opening his lab here, Hollingsworth received his master's degree at the University of Oklahoma, did further graduate work at the University of Chicago, taught at the University of Tulsa, and served nine years with Shell Oil Company as paleontologist. His present business opened in 1944.

Within each mass of crushed rock brought into the laboratory are found minute shell forms, usually smaller than a fingernail. The protoplasm contained in the shells has disappeared, of course, but the outer shells reveal to the researchers the historical period in which it lived.

Placing each shell in its proper historical category and coordinating it with similar specimens gives valuable information on the probability of oil in or near a given formation.

To process the samples, Hollingsworth has a competent, well-organized staff. Two trained geologists, seven laboratory assistants and a sample clerk are employed by the firm.

Hollingsworth estimates that he has more than 90,000 microscopic slides of samples filed away, giving a complete historical record of formations encountered by oil wells in all parts of the Permian Basin.



**PALEONTOLOGICAL LABORATORY** — At work (examining a psuedoschwagerina) are, left to right, Lou Roberts, lab technician; W. G. Clarkson, geologist; Harold L. Williams, geologist, and R. V. Hollingsworth, owner of the concern.

## Adams To Head Hospital Board

CRANE — F. F. Adams has been elected president of the board of Crane Memorial Hospital.

Other officers are L. D. Lockhart, vice president, and J. D. Foster, secretary.

A board meeting will be held November 5 to name a permanent superintendent to fill the vacancy created by the recent resignation of Mrs. Hugo Huffman.

Mrs. C. R. Keaton is serving as temporary superintendent.

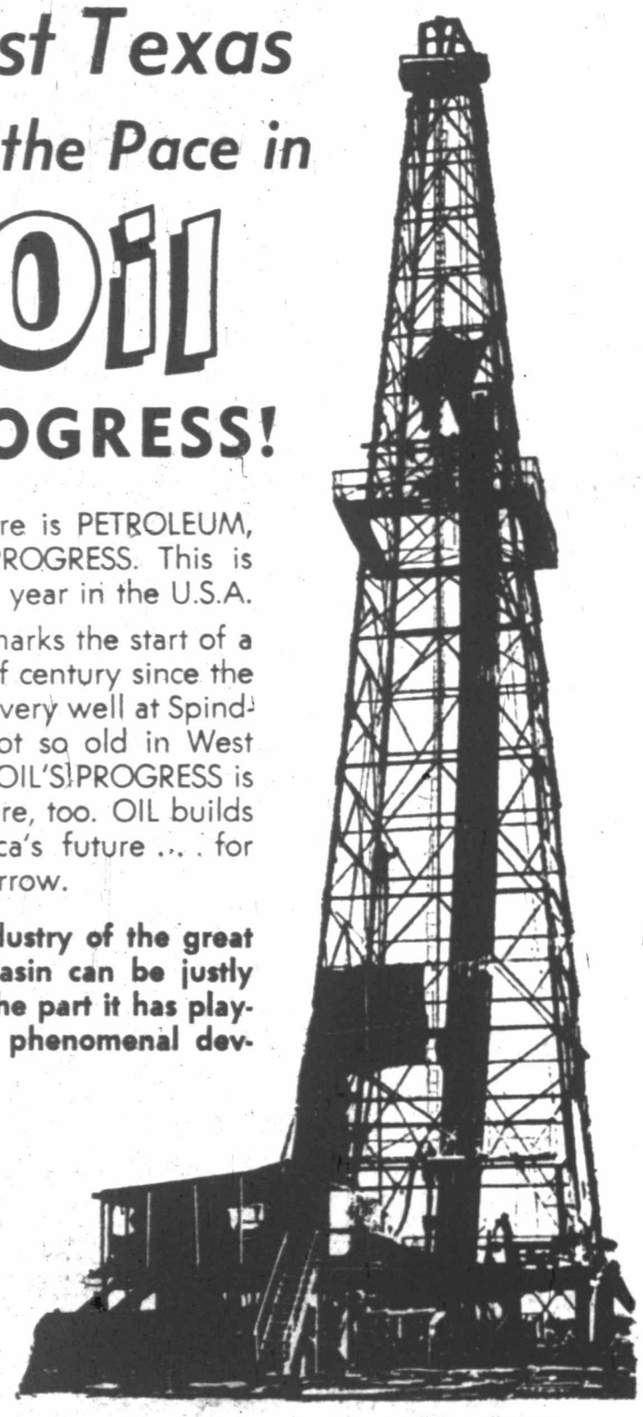
## Propaganda Sheets Help French Forces

HANOI, INDOCHINA—(AP)— The French Union forces are showering millions of leaflets over enemy-held territory in Northern Indochina, urging Vietminh soldiers to give up the fight.

Six million are scattered each month—mostly by the air force, but some by troops during field operations and in commando raids against the Vietminh.

The propaganda "bombings" seem to be producing results. It no longer is uncommon for hundreds of badly fed, badly clothed, and war-weary Vietminh soldiers to turn up each week at a French post and surrender voluntarily.

West Texas
Sets the Pace in
Oil
PROGRESS!



Where there is PETROLEUM, you see PROGRESS. This is OIL'S 93rd year in the U.S.A.

. . . 1952 marks the start of a second half century since the giant discovery well at Spindletop . . . not so old in West Texas but OIL'S PROGRESS is marked here, too. OIL builds for America's future . . . . for your tomorrow.

**The oil industry of the great Permian Basin can be justly proud of the part it has played in this phenomenal development.**

# Coaxing Oil To Leave 'Home' Runs Into Expensive Project

A multi-million dollar prize awaits the inventor of a method to break the stay-at-home habit of oil in its natural reservoir.

Texas oil men have located millions of barrels of oil only to find it is difficult—and in some cases impossible—to bring the liquid to the surface.

"One of the great challenges of the petroleum industry is recovery of oil known to be in the rock formations," Charles E. Simons, executive vice president of the Texas Mid-Continent Oil & Gas Association, stated. "Millions of dollars are spent annually by Texas operators in treating wells, repressuring fields and carrying on expensive laboratory research to increase production."

Cited by Simons as a few examples of problems being dealt with this year were the aged Corsicana field, the Spraberry formation, Scurry County fields, the Anton-Irish field, and the University of Texas' Block 31 Devonian field.

"Recognition of gains which have been made in Texas for higher percentages of produceable oil certainly should be a part of any Oil Progress Week observance," Simons said. "Such steps in conservation benefit the land and royalty owners of Texas as well as the millions of customers of Texas oil all over the nation."

**Upped 35-Fold**

It has been estimated that production in the oldest commercial field west of the Mississippi, the 58-year-old Corsicana field, has been upped 35-fold on some leases since the beginning water flooding operations two years ago. With more than 2,000 acres under flood, comparative quarterly production has grown to almost 175,000 barrels from 8,000—this from a field that was in the stripper stage in 1920.

Contrasting the Corsicana field is the more recently discovered spraberry Trend in West Texas where primary production lags behind costs of wells. The Spraberry has been termed as probably the world's largest reservoir of unrecoverable oil. The tight formations of the Trend severely restrict the flow of oil to the well bore.

Because of costs involved in drilling, some operators this year pressed harder for 80 acre spacing of wells instead of the usual 40 acre spacing. Many claim wells in the 40 acre pattern will not pay out.

Methods of facturing the Spraberry formation have resulted in some production hike, but the industry continued searching for newer methods. One producing company recently proposed a water experiment called imbibition. By this method it was hoped water would soak into the Spraberry sands to displace imprisoned oil. Admittedly experimental, effects of imbibition will be watched by Spraberry operators who have invested more than $174 million in wells that have produced only $68.5 million worth of oil.

The Canyon Reef reservoir in the Diamond M and Kelly-Snyder fields of Scurry County soon will undergo water injection to recover oil left behind during regular production days. The Kirk field of Eastland and Comanche Counties will recover more than 22 per cent of the stock-tank oil remaining in place because of water flooding, according to estimates. Ultimate primary recovery was estimated at more than 600,000 barrels. Water probably will displace some 2 1/2 million barrels.

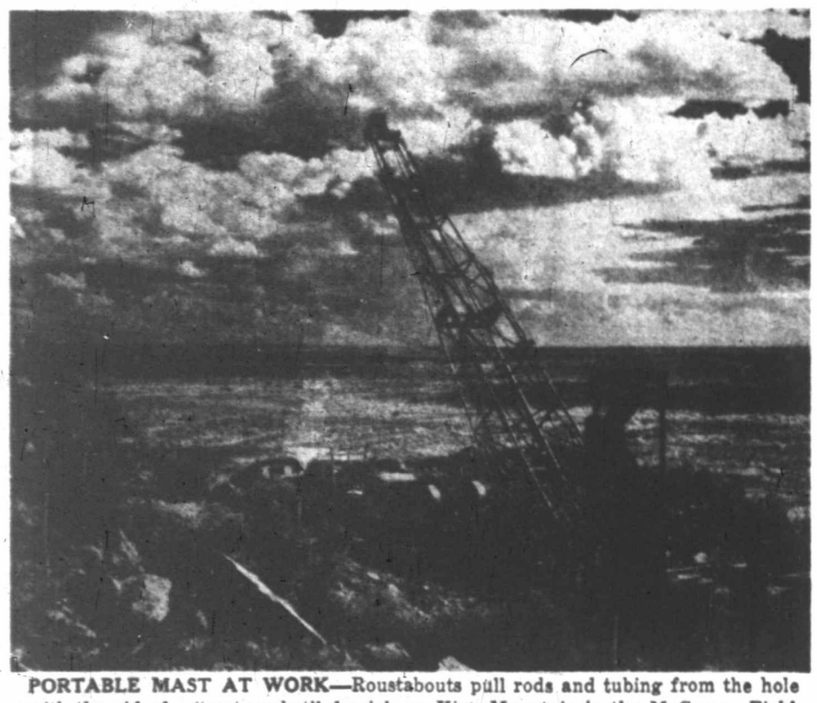
**Crane County Project**

Repressuring of the Anton-Irish field north of Lubbock and the University of Texas' Block 31 field, Devonian reservoir of Crane County, is being done with natural gas.

The Anton-Irish program was in the planning stage three years before the first gas injection in January 1952. It was recognized that fluid expansion and the gas dissolved in the oil where the chief sources of energy, so natural gas was the logical means of repressuring. Allowables for wells in the field were raised to 100 barrels daily in February from the previous 42 barrels allowable. Involving more than 6,000 acres, the field's compressor has an initial capacity of 2,000 mcf a day. After initial projection, casinghead gas will be utilized for return to the reservoir.

In-place oil recovery of the 6,000 acre Block 31 Devonian field has been estimated at 42 per cent because of natural gas injection to maintain pressure. Two years after operations began, accumulative production in the field has risen to more than four million barrels for the period, compared with more than three and one-half million barrels accumulative prior to injection.

Cycling plants in Texas have done much to increase oil recovery through gas injection. Water injection methods have aided recovery of untold millions of barrels that otherwise might have been lost forever. Petroleum industry technologists, however, continue research on oil's stay-at-home habits.



**PORTABLE MAST AT WORK**—Roustabouts pull rods and tubing from the hole with the aid of a "vest pocket" derrick on King Mountain in the McCamey Field. The well is Shell Oil Company's Rogers No. 2. The job completed, the rig is lowered to its moorings.

### Petroleum Opens Automatic Doors

Petroleum soon may help to open the doors in supermarkets, banks and department stores automatically.

In the form of vinyl resin, which contains petroleum derivatives, an electric mat can take the place of photo-electric cells in controlling the opening and closing of doors.

When stepped on, even by a 20-pound child, electrical contact is made in a harmless six-volt circuit and the door is opened by an air compressor.

After the person passes through the door is closed.

**TWO EQUALS THREE**

Road tests have proved that two gallons of modern gasoline will do the same amount of work that required three gallons in 1925. This is a quality and performance increase of 50 per cent.

Scientists who have dated the last ice age in the world through the use of radioactive carbon, believe it occurred about 11,000 years ago and not 20,000 to 25,000 years ago as previously believed.

**SMALL DEER**

Key deer of the Florida islands, approaching extinction, are sometimes called "pigmies," being less than 30 inches in height and weighing less than 35 pounds.

**WELL PATENTED**

Since the U. S. Patent Office was established in 1836, more than 8,000 patents have been issued for improving the manufacture of leather soles and shoes.

**U. S. RAILROAD MILEAGE**

With less than six per cent of the world's land area and about six per cent of the world's population the United States has about 20 per cent of the world's railroad mileage.

# wheels of progress...

... It's not far from the day when we were the first truckers on the scene of the Scurry County boom. Since then Canyon Trucks and the drilling industry have worked together. Starting in 1949 with one old Army truck "Old Faithful," we've grown to more than fifty employees and 22 trucks . . . a truck for every oil field hauling need. Service is a treasured tradition that we work night and day to preserve; we know what is wanted by the drilling industry and where it can be obtained. We are always ready with information and know-how.

Ours is an infant company but a growing one. It is another instance of free men at work in a land of free competition . . . the wheel of opportunity going around with the wheel of progress.

Around the clock, night or day regardless of circumstances there is a Canyon truck within a few hours of your operations anywhere in the Permian Basin. Call us. Dial 2-1002.

# Smaller Companies Do Most Work In American Industry

Oil, fourth biggest industry in the nation, still is a "little man's business.

Despite talk of cartels and monopolies, most U. S. wells still are being drilled by thousands of small companies and individuals who, compared with the big fellows, are better endowed with courage than with cash.

According to the 1953 edition of the World Market Data Book, a service of World Oil magazine, 75.1 per cent for the 23 largest operators and drilling contractors, leaving only 24.9 per cent for the 23 largest producing companies. In exact figures, the small companies drilled 33,666 wells and the big ones, 11,160.

When it is considered that approximately 12,830 of the wells drilled by small companies and individuals were dry holes, and that it costs approximately $40,000 to drill an average well in the U. S., it will be seen that the "little" people of the industry lost $513,200,000 last year in their gamble to increase U. S. oil reserves. Little and big, oil seekers poured about $683,000,000 into dry holes in 1952.

But this is only part of the story.

The World Oil data book estimates that the industry spends more than $300 million annually for seismograph and gravity meter work and $52 million annually for equipping wells for artificial lift. Then, once above ground, the oil must be transported to market. According to The American Petroleum Institute, capital expenditures for pipe lines in 1951 totaled $250 million.

According to the Data Book, capital expenditures in oil and natural gas operations by American companies will total five billion dollars during 1952, after attaining a previous peak of four and one-third billion in 1951. With the demand for oil going steadily up and the wells going steadily deeper in search of new oil, the industry's expenditures will again reach a new high in 1953.

**GAS BURNERS**

Motor vehicles alone are consuming more than 39 billion gallons of gasoline a year — and indication of the big job the petroleum industry faces constantly. Home oil burners are accounting for another 10 billion gallons of fuel oil.

## Greater Petroleum Sources Are Sought

Year after year, oil continues to be found in new places. Last year, 1001 new oil fields were discovered in the United States. At the end of the year, the U. S. had two and a half billion barrels more petroleum reserves than it had when the year began.

The nation's real oil resource does not lie in its proved oil reserves. Rather, it lies in its vast area of yet untested potential oil land, its vigorous technology for finding oil, and its climate of free economic enterprise that stimulates the search for oil.

## Oil Also Assists Railroad Progress

One of the major railroads in this country credits its substantial earnings in the past few years to a new fleet of diesel-electric locomotives.

The greatest operating saving resulting from dieselization was in fuel costs.

Oil promotes progress on railroads as well as highways.

**PROLIFIC USERS**

The American people are the world's most prolific users of petroleum products. In the last 10 years alone, consumption has increased 73 per cent.

# Southwest Texas Maintains Steady Oil Output Ratio

The steady, dependable supply of oil which comes to the nation from Southwest Texas doesn't make a startling story, even though there are some wells to be seen mixed in picturesquely with the houses in Western Corpus Christi. In general, however, Southwest Texas production is orderly, quietly progressive, and constantly increasing.

Texas Railroad Commission Districts 1, 2, and 4 comprise the Southwest Texas area for oilmen. Most of the oil and gas in the region is produced along the Gulf Coast and down to the border of Mexico.

Unlike most of the rest of the state, where drilling was cut back because of the shortage of steel, Southwest Texas was the scene of more drilling activity in 1951 than in 1950. A total of 3,084 wells were completed last year, as compared with 2,911 the year before.

Of the wells completed in 1951, dry holes made up 1,274. The previous year's number of dry holes was 1,142.

**Wells Getting Deeper**

Wells are getting deeper all the time in Southwest Texas, as they are in other areas. Total footage drilled in the area last year was 14,913,635 feet—almost 2,825 miles, or about the distance from Houston to Washington, D. C., and back. The average well completed in Southwest Texas in 1951 was 4,836 feet deep, 128 feet deeper than the year before.

Deeper drilling is the result of the search for oil in old fields where shallow formations already have been produced, and on land previously unexplored.

Southwest Texas produced 452,090 barrels of crude oil and condensate a day last year, a sizeable portion of the state's daily average of 2,767,082 barrels daily. It also was 79,194 barrels more than Districts 1, 2, and 4 turned out each day in 1950.

## $130,000,000 Seen As Research Cost

The petroleum industry ranks second among American industries in research to develop new products and processes. According to Dr. Gustav Egloff, research director of Universal Oil Products Co., the entire oil industry will spend $130,000,000 in 1952 on research as compared with $120,000,000 in 1951.

Continuous research is a vital necessity not only for the industry itself, but for the continuing discovery and improvement of comfort and convenience which America has come to expect from petroleum and petroleum products.

The first Permian Basin Oil Show was held in Odessa in 1950 as a revival of the "Little International Oil Show" of prewar years.

# WILSHIRE OIL Co. Inc.

# Gulf Coast Oil Activity Includes Many Industries

HOUSTON — "Oil" is the word that usually comes to mind when people in other parts of the United States think of the Texas Gulf Coast. And there's good reason, because petroleum and its allied industries play a vital role in the growth and prosperity of the region.

A large chunk of the 874,000 people in Houston's metropolitan area work for oil companies, independent operators, and oil field equipment and service companies. Others receive royalties from oil property. The financial structure of the city is based in many ways upon oil.

The Railroad Commission District 3 is the area generally thought of as the Gulf Coast. Besides a great deal of oil production, it has far and away the largest number of refineries with the largest operating volumes of any district in the state. It also has a number of natural gasoline and cycling plants.

As of Jan. 1, 1952, there were 19 refiners in District 3, with capacity for processing 1,640,500 barrels of oil daily. The refineries together averages a volume of 1,491,000 barrels daily last year.

At the first of this year, District 3 had 24 plants where liquefied petroleum gases such as butane and propane are produced, and where dry gas is injected back into the ground or sold for home and industrial use. The plants turned out 55,200 barrels of liquefied gases daily in 1951.

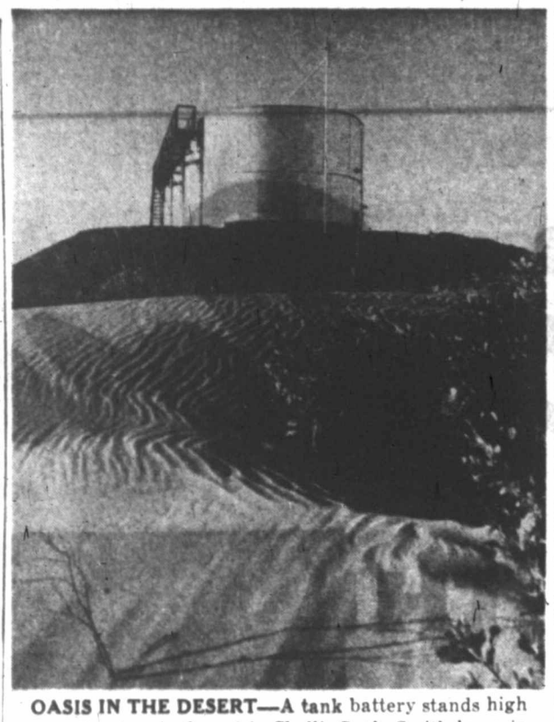
**State-Wide Trend**

A state-wide trend of higher oil and gas production but fewer new wells drilled was reflected on the Gulf Coast during the last year. Drilling was deeper than ever before as oilmen searched for new producing zones in old fields and on lands previously unexplored.

As of January 1, there were 10,972 wells, 435 more than there were a year earlier, producing oil and condensate in District 3. The state as a whole had 131,203 wells at the start of the year.

There were 1,538 wells drilled in the district in 1951, a decline of 66 from the previous year. Only 501 were dry holes, however, as compared with 541 in 1950. Despite the fact that fewer wells were drilled, total drilling depth was 9,703,057, an increase of 119,743 feet over the year before. Average depth of wells was 6,309 feet. Gulf Coast drilling is the deepest in Texas, the state's average being 4,610 feet per well.

Daily Gulf Coast production of oil and condensate averaged 499,847 barrels last year, as compared with 414,061 the year before. Daily production in all of Texas was 2,767,982 barrels daily.



**OASIS IN THE DESERT**—A tank battery stands high over the dunes of sand in Shell's Sealy-Smith lease in Ward County, near Monahans. Asphalt-caliche roads were constructed here by Shell at considerable expense to make the tanks accessible to trucks and equipment.

## Harvard Increases Student Assistance

CAMBRIDGE, MASS.—(AP)—Harvard College undergraduates will participate in almost a million dollars worth of scholarships, loans and part-time employment in the coming school year, the largest program of financial aid in the college's history.

Wilbur J. Bender, dean of Admissions and Financial Aids, says that $633,000 are earmarked as scholarship aid to 1,048 students. About 700 students working as porters, in dining halls and libraries and other jobs are expected to earn $175,000. Long-term student loans are another major item. More than one-third of Harvard's 4,460 undergraduates will be assisted by the program.

**FOUR-LEGGED CHICKEN**

PROVOST, CANADA —(AP)— A chicken on the farm of Mrs. Allan Shurner here has four legs. The chicken is quite lively and gets along very well with the extra equipment.

The famed Damascus steel of ancient times was shipped from India to Damascus by boat and camel caravan.

# 'Blood Veins' Of Nation Are Pipe Lines Interlocking 40 States, Carrying Fuels

Beneath the soil of all but eight of the 48 states lies one of the most unique transportation systems ever devised. Typically American in origin, design and construction, it also is one of the most extensive transportation systems in the world.

This modern transportation marvel is the vast "underground" created by the petroleum industry to move crude oil and finished products from tens of thousands of wells to collection centers, refineries, bulk stations and—eventually—to the millions of users of petroleum products.

It is an intricate system, yet it is so versatile that different products can be shipped, one right after the other, without appreciable mixing. In addition, shipments can be sidetracked at will to make way for those with higher priorities, in much the same way that trains are shunted to sidings to allow expresses to speed by.

Oil pipe lines had their genesis in the 1860's. The first successful one was only four miles long. Progress and competition spurred their development. Today, there are more than 162,000 miles of oil pipe lines serving the American people.

The network is being expanded constantly, as fast as men, materials and dollars are available. In 1951, for example, more than 3,600 miles of oil and gas pipe lines — enough to span the continent—were completed in the United States.

The network of pipe lines enables the petroleum industry to move liquid oil and products at low cost—benefits that are reflected along to the American people in the form of reasonable prices and an abundance of supplies at all times.

They are the petroleum industry's most important means of transportation. Together with tank trucks, railroad tan kcars, and water transport, they deliver about 295 million gallons of oil and oil products to the nation daily.

**Construction Costs Heavy**

Construction costs are high, but the industry is pushing its program without let-up. An indication of the financial problems which the industry must face continually is the fact that pipe line construction now runs about $25,000 a mile—roughly double what it costs per mile before World War II.

Oil and oil products move through these underground pipe lines night and day. Their speed is about three or four miles an hour, and the lines are inspected constantly to guard against leaks or danger points. Strategically-located pumping stations enable the liquids to move uphill and down, beneath rivers and bays and past other natural obstacles.

The pipe lines vary in diameter from as little as two-inches to 24 inches or more.

They are common-carriers, and their rates are regulated by the Interstate Commerce Commission. This means that any shipper of oil, provided he has sufficient quantity and can move it to the pipe line terminal, can use the pipe lines to transport his oil or products.

**EXPANSION DUE**

The oil industry has a four billion dollar capital expansion program scheduled for 1952. This is the largest one-year spending program of any industry in history.

MEN AT WORK...for You!

• Every time one of our drilling crews brings in a new oil well, it means more gasoline for your car, more power for farm and ranch . . . more of all the hundreds of oil products which add to your comfort and convenience today and in the future.

We're proud to be part of the competitive, progressive oil industry that brings better living to our community. This is our pledge that we will continue to serve you and the nation well.

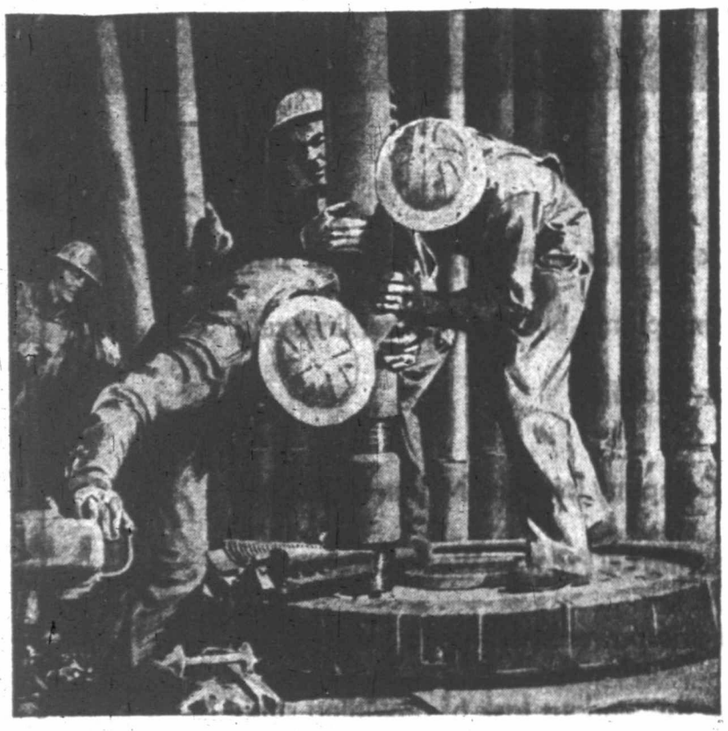
# REMEMBER—It's Your Oil, Too!



TWO AND ONE HALF BILLION DOLLARS worth of crude oil brought out of the soil of Texas last year was new wealth that went into your tax economy.

A sizeable share of it—nearly one-seventh of the state's entire production—more than ONE THIRD OF A BILLION DOLLARS (minus taxes) went into the pockets of thousands of Texas landowners, leaseholders and royalty owners.

Oil wages put another THREE QUARTERS OF A BILLION DOLLARS (minus taxes) into Texas homes.

Oil and gas accounted for 31 per cent of the State tax collections, a $126,000,000 tax load lifted from the backs of other Texas taxpayers.

Yes, billions of dollars worth of Texas oil is truly yours, fellow Texans, as well as ours associated with the petroleum industry.

But, there are organizations and individuals in the United States who would hobble, weaken and possibly destroy the free enterprise system under which the oil industry is and has been operating. Every Texas citizen should militantly oppose any and all efforts which might decrease the efficiency and effectiveness of this vital support of the American way of life.

Protect your share of the Oil Business by helping to protect our Free Enterprise System.

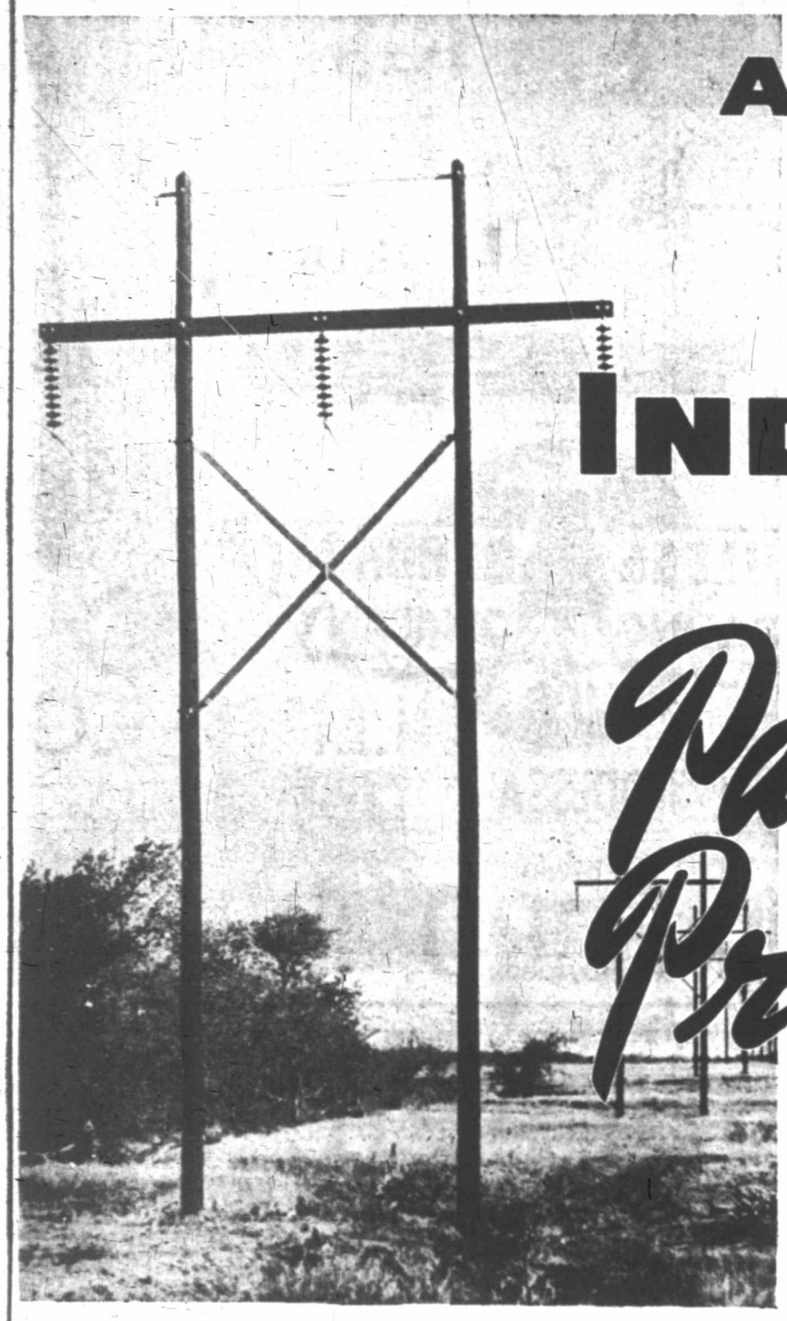
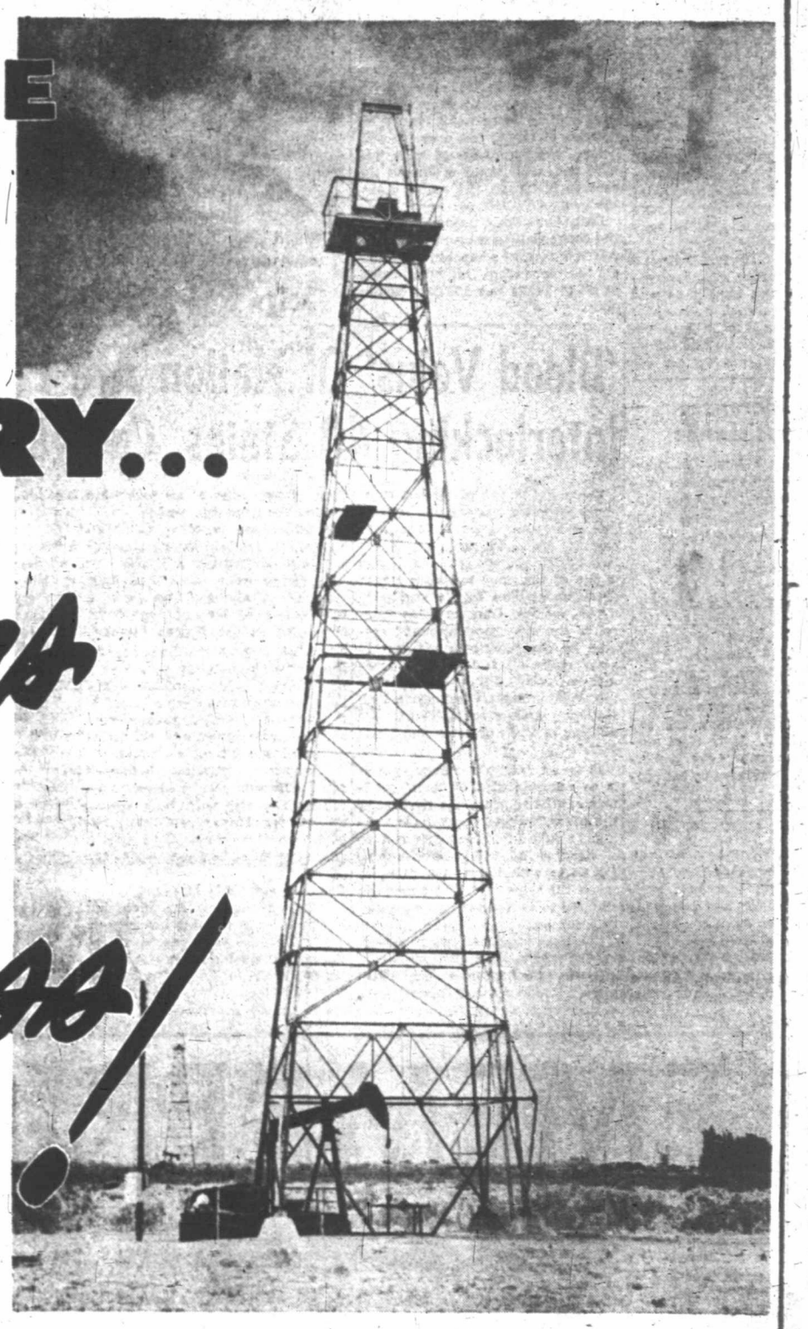
# Electric Power



## AND THE OIL INDUSTRY...

## Partners in Progress!



The investor-owned electricity supply industry has long been a working partner in all phases of the oil industry – production, transportation and refining.

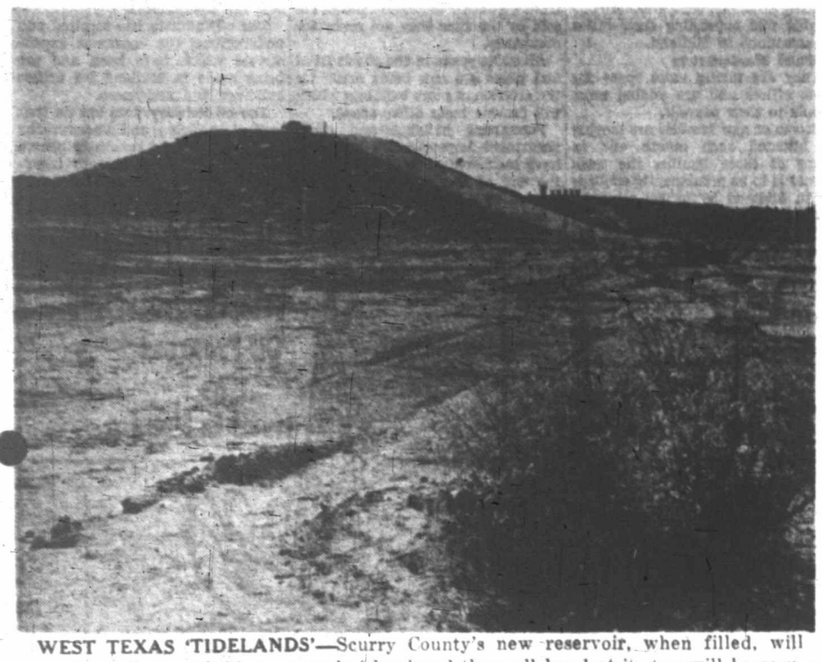
Since the first oil strike in the West Texas area, electric power has played an important role in drilling and pumping wells, operating pipe line pump stations and refineries.

As the oil industry developed and expanded, so did the entire West Texas area. To keep abreast of this overall growth, Texas Electric Service Company has built new steam-electric generating plants, built new power lines and enlarged its substation facilities.

Texas Electric Service Company joins the Nation in saluting the great oil industry during Oil Progress Week, October 12th through the 18th. Electric power and the oil industry are indeed partners in the tremendous task of providing sufficient oil for the nation's defense and civilian needs.

**TEXAS ELECTRIC SERVICE COMPANY**

R. L. MILLER, Manager



**WEST TEXAS 'TIDELANDS'**—Scurry County's new reservoir, when filled, will reach to the top of this man-made island and the well head at its top will be serviced by boat. Many of the Shell Oil Company producers in this area have been raised 45 feet on similar mounds in orde: to continue work after the lake is filled.

**WATERBOUND CHRISTMAS TREE** — The water isn't there yet, but in the near future it will cover more than 12 square miles of Scurry County. Metal casings protect the well inside the earthen "pyramid" which will become an island in the lake.—The "Christmas Tree" is the well head, tapping oil from a pool deep underground.

*ANCHOR MEN ON PETROLEUM'S TEAM—*

# Service Station Personnel Do More Than 'Fill 'Er Up'

When the service station salesman pulls your crankcase gauge out from under your car hood and says, "Your oil is low," he is doing more than just trying to make a sale. He's helping you to keep your car running right and he's reflecting the training he has received.

Today's service station salesman is more than a "pump jockey" or "grease monkey" of days gone by. He may be any one of the men, including the manager, who works at the station and greets you on the driveway.

He could be a college graduate training for his life's work in the petroleum marketing field. In the years ahead he plans to take his place in the community as a businessman, just as the druggist, the clothing merchant, and the hardware dealer have done.

As a manager, he possesses real business acumen. He must make a substantial financial investment to get into the business, and you'll usually find the station manager among the civic leaders of his community.

This service station salesman may be a young man working to further his business experience by selling. Or the man who asks, "Shall I fill it?" may be a salesman who, because of his experience and training, makes a career of selling on the driveway.

Whatever his background or title at the service station, to become efficient and adequately trained as the public expects him to be as a driveway salesman, he must be a man of many parts.

He must know his products; he must know automobiles, and their needs; he has to try to be a public relations man, answering the thousand and one questions which you as a motorist ask him from day to day; and he aims at helping operate the business in a highly competitive petroleum market.

That's a large order, and not all driveway salesmen in the nation's thousands of service stations measure up. But with competition for your business as keen as it is, more and more progressive marketers are offering training programs designed to help their driveway salesmen meet these specifications.

Some oil companies maintain strategically located training stations for this purpose where not only new driveway salesmen are trained, but refresher courses are offered to experienced salesmen. Their training benefits the customer who may not realize the salesman on the driveway must know a great deal about automobiles, petroleum products, and product application to be effective.

For instance, in some passenger cars, there are as many as 54 different points of lubrication to be filled with six different lubricants. In the case of some trucks, there are 46 points of lubrication with seven different lubricants. Each model differs slightly from all others.

One supplier has as many as 14 different types of lubricants, and the service station salesman must know each one's use and its advantages such as whether or not the compound withstands heat, does not foam, withstands water, withstands shock loading, lubricates, and so on.

The service station manager comes to his job with years of experience in automobile servicing or with training in service station management, oil products, and product application. In many instances he has had both.

As soon as the driveway salesman starts to work, his training begins. He learns the techniques of a friendly approach to you. He learns the techniques of servicing your car in an efficient routine. He must keep up with the needs of new model cars as well as remember how to service the older ones.

Both the manager and his salesmen keep in training by attending courses given periodically by the supplier of their products. Such courses introduce new service techniques brought about by changes in products, station equipment, and car design such as the introduction of the new automatic transmission.

Actual demonstrations and picture projections are brought directly to the service station by supplies for the man on the driveway.

His training does not stop with these formal methods; he gathers helpful information from bulletins and other correspondence sent to him by the company whose products he sells. He reads trade and house magazines or papers that discuss products and sales techniques. At frequent intervals he attends sales meetings with other men in his business where they exchange ideas and discuss mutual problems.

So when you drive into your service station and seek information from this friendly, confident man on the driveway, you usually can be assured that his advice is backed by training and experience in the modern practices of his art, the servicing of your automobile.

## Little Models Help Solve Big Problems For Petroleum Men

Scale models—fascinating miniatures that look and sometimes operate like their real counterparts—are used by engineers and research technicians of the oil industry for operational studies, planning and demonstration purposes.

Some of the miniature models are so exact in design and construction that they duplicate the operation as well as the appearance of the original.

For instance, one industrial model has a jet rock drilling bit so tiny that it fits into the palm of the hand, yet so accurately made that it drills a hole in rock exactly like a real bit drilling through a hard formation hundreds of feet below the earth's surface.

Scale models like this have been important in developing improved drilling equipment. The miniatures, tiny by comparison, make a huge contribution to petroleum progress as oil men use them in their constant efforts to provide more and better oil products.

**HOSE GOES TO WAR**

A synthetic rubber hose may some day be used to supply gasoline to front-line fighting equipment from safe positions in the rear. Designed to replace metal piping, the rubber pipe-line can be laid from a truck traveling at 15 miles an hour. It is made of a synthetic, containing oil derivatives, and resists deterioration better than hose made of natural rubber.

**DEISEL POWER**

An increasing number of American railroads have turned to diesel power to cut their fuel costs. Of 1,739 locomotives on order at the beginning of 1952, all but 20 were for the diesel - electric type.

Some 200 exhibitors will show products of more than 500 manufacturers in 350 exhibits at the Permian Basin Oil Show in Odessa, October 16-19.

# Petroleum Firms To Spend Billions In New Expansion

By FRANK M. PORTER
President, American Petroleum Institute

Earlier this year, a survey showed that American oil men had earmarked more than four billion dollars for capital expansion, modernization and development in 1952.

This is believed to be the greatest one-year capital expenditure program of any industry in history.

More recently, a review of activities for the first six months of 1952 compared favorably with the first six months of record-breaking 1951, despite the extraordinary difficulties encountered this year.

Right now, its operations are moving along at a pace designed to give to the American people and the armed forces petroleum products in abundance, when and where needed, limited only to the availability of materials and manpower.

**Definite Milestone**

Facts like these give substance and meaning to the reports that oil men everywhere are making during this year's observance of Oil Progress Week (October 12-18).

They are definite milestones of progress.

They are positive proof of what free men can do with their energies and talents, given the opportunities and incentives of free enterprise.

And they are of personal interest to the American people who are now being reminded again of the importance of petroleum to our social and economic well-being and to the national defense.

**For Better America**

For me, it is a privilege and a pleasure to be able to participate once more in this great demonstration by the oil industry. It represents a sincere effort by oil men throughout the country to tell a factual story of accomplishment. Its purpose is to give the people a clearer view of one of the great American industries in action; of its 'round-the-clock efforts to help build a better America.

Oil Progress Week is definitely a local effort. The reports and displays of the industry's progress and achievements are made to customers and consumers, relatives and friends, neighbors and fellow townsmen by local oil men—by and to people who know each other and share civic responsibilities and common trust.

Both the industry and the public benefit from this unique observance. Not only does it provide those who have come to depend upon us with more information about the oil industry, but also it brings home to oil men themselves, an awareness of their industry which becomes intensified and personalized by their participation.

Oil Progress Week has come a long way since its inception in 1947. Its stature has increased with each passing year. Oil men's enthusiasm in preparing for this year's observance—the fifth—leaves no doubt that it will be the biggest and the best of the series to date.

For the record, I think it is interesting to note that more than 20,000 oil men are volunteer members of the Oil Industry Information Committee, which sponsors Oil Progress Week itself, participation by oil men will expand into the tens of thousands. The number of people who will hear, see, or read about the oil industry and Oil Progress Week activities will run into the millions. I hope and believe that this tremendous audience will retain for many years the understanding and good will which can be generated by these special activities.

# Permian Basin Sets Pace —

(Continued From Page One)

counting was made of old, depleted producers which might have been abandoned in the period between January 1 and June 30 of this year.

However, it safely can be said that the Permian Basin had at least 42,000 producing oil and gas wells as of June 30, 1952.

The oil workers and the steel workers strikes during the Spring and early Summer of 1952 slowed all forms of oil development and production activity in the entire United States.

Those strikes are held responsible for a major drop in drilling activity and in the production of the completed wells in the territory.

Had it not been for those two strikes the Permian Basin would have set a large number of new records for the oil industry during 1952.

A record for total production would have been set. A record for number of wildcat wells and for number of development wells would have been set. A record for total footage of hole drilled would have been set.

It does not seem likely that the oil industry will be able to recover from the effects of the strike during the remainder of 1952 to the point where the goals which had been set at the first of the year can be realized.

The shortage of tublar goods and other steel needed in oil field work is still felt in a major way.

**Banner Year Due**

However, it is anticipated the 1953 will be a banner year in the Permian Basin — barring more strikes or other similar hinderances.

The goals being set by the Petroleum Administration for Defense and by the National Petroleum Council for drilling during the next three years should keep activity in the Permian Basin at a high point and on a fast pace for an indefinite period.

There are several areas in both West Texas and Southeast New Mexico where important discoveries have been made in the last 12 months where the drilling activity is expected to be stepped up during the immediate future. The only hold up on that program is the shortage of drill pipe, casing and tubing.

As soon as those items are in better supply the drilling in those regions and in others of the Permian Basin will increase in a major manner.

Currently the most interesting area in West Texas from the standpoint of the possibilities for finding new production are in Crockett, Andrews and Yoakum Counties.

The spotlight regions in Southeast New Mexico are all in Lea County. They are the East Caprock and the Mascalero regions in the northwest part of that county; the Tulk, Saunders and Townsend regions in the central part and the Echols, Gladiola, King, Denton and Lovington areas in the northeast and central-east sectors of the same county.

The Delaware Basin area of far West Texas and of the central-south part of New Mexico is coming in for more and more attention and that district is due for more development—and in all probability more production in the next few years.

While production from the Spraberry Trend area of the Midland Basin in West Texas has proven to be disappointing—it is expected to be a reasonable and conservative drilling program will be continued in the undeveloped areas of that trend during the future.

Many persons expect improved methods of recovering the oil and gas from that formation will be developed soon—and they think that if and when that has been done that the Spraberry will be a much more interesting and profitable reservoir than it now is.

Efforts to develop means of getting more petroleum from the Spraberry are continuing in an intensified manner and some interesting and beneficial results are expected from those efforts.

A major activity in all of the Permian Basin at this time and one which is due to be continued in a place of importance in the development and production picture in the region for many years is the more efficient production and utilization of the gas resources of the territory.

**High Daily Output**

Many new gas pipe lines, gas treating and compressing stations and natural gasoline plants have been built and more are being planned.

Until recently the gas production in the Permian Basin has been given a secondary place in the program of the industry.

That condition is changing and the changing is due to bring more revenue and more activity to the entire territory.

During the last week in September daily production in the Permian Basin was approximately 1,360,000 barrels of crude oil.

West Texas accounted for 1,171,000 barrels of that and Southeast New Mexico produced the other 165,000 barrels.

The daily production is to show an appreciable increase during October as the Railroad Commission of Texas has increased the allowable of practically all fields in the region by adding an extra day to the producing pattern.

One of the strongest evidences of the fact that the Permian Basin is to continue to have an active, widespread and prolonged development program is furnished by the manner in which the oil companies and oil operators are organizing their program.

Many of the oil companies are enlarging and expanding their office organizations in Midland.

**Midland Headquarters**

They are taking more space for their offices and are adding more people to their payrolls.

Scores of new families are moving to Midland each month and in many of those families the wage earner is to be permanently employed in Midland by an oil company or an oil operator.

Scores of new residences are being completed in Midland each month and all of those houses are sold by the time they are ready for occupancy.

All office space in the city is filled and plans are now being made for the erection of more buildings which will provide more office space.

Permanent buildings and other permanent improvements such as have been erected in Midland since the end of World War II are not erected as a "happen so."

Such construction is not undertaken until there is rather definite assurance that the returns will justify the investments.

The oil industry has inspired and underwritten the enormous expenditures which have been and are being made in Midland for offfice buildings and residences.

The oil industry does not do that sort of inspiring and underwriting unless it has good reason to believe that the obligations thereby incurred will be justifiable and profitable.

The future looks bright for petroleum in the Permian Basin of West Texas and Southeast New Mexico.

## Mother, Son Earn Academic Degrees

CARBONDALE, ILL.—(AP)—Among those awarded bachelor degrees by Southern Illinois University recently were a mother and her son.

Braxton Williams, 26, said his mother, Mrs. Corrynne Williams, "worked hard to finish with me." Braxton supported his wife and three children while earning his degree.

His mother taught school at Salem, Ill.

# Estimating Underground Oil Reserves Is Job For Expert

Ever try to figure out how many gallons of water are in a lake or reservoir?

It's a toughie, all right, but with the necessary experience and knowledge it can be done; and the answer can be as accurate as though every gallon had been bailed out and counted individually.

The oil industry has a similar, although far more complex, problem every year when it checks up on the nation's proved reserves of liquid petroleum and natural gas.

But like the water calculation, it has worked out a procedure which is as accurate as human skill and ingenuity can make it.

Proved reserves of liquid petroleum and natural gas are at their all-time high, despite the highest production rate in history. The status of these reserves provides a note of comfort and assurance for the American people.

What makes the petroleum industry's check-up problem very difficult is the fact that the oil and gas are not lying on the surface, like the lake or reservoir waters. They are buried in the ground, at depths varying up to and exceeding 15,000 feet.

They cannot be seen by the naked eye, and their dimensions must be calculated by inter-related tests and studies.

One of the first steps is to determine the thickness of the sands which contain oil and gas. Then the outlines of given fields or areas become established in the course of drilling wells.

Close study of the porosity of the sands by geologists, geophysicists, petroleum engineers and other specialized technicians disclose how much oil or gas can be extracted per acre by presently known means.

By combining these factors, together with other calculations, oil men can estimate the potential yield of a field very closely. Then by subtracting the amount of oil or gas that has been produced already, they know what's left in the ground. All of these operations are carried out by men who are acquainted with localized conditions and production problems.

Proved reserves for the nation as a whole are computed by the Reserves Committee of the American Petroleum Institute and the American Gas Association. The API Committee accounts for crude oil, the AGA Committee for natural gas, and they jointly assay the natural gas liquids situation.

**HIGHER TAXES**

State and federal gasoline tax collections in 1952 are expected to exceed $2,75,000,000,000 — an all-time high. The anticipated total is 10 per cent above 1951's former record.

OIL INDUSTRY'S 'KITCHEN'—A typical scene at Humble Oil & Refining Company's Baytown Refinery includes a pipe still, center, one of the units which helps process some 260,000 barrels of crude oil daily. A still is an installation in which crude oil is heated and distilled to extract its lightweight elements.

# Oil Men Report —

(Continued From Page One)

people.

For the fourth year in a row, a new motion picture will make its debut in connection with Oil Progress Week. This will be "Crossroads, U. S. A.," and it will be shown to tens of thousands of persons throughout the country at meetings, open houses, schools and via television.

"Crossroads, U. S. A.," tells the dramatic story of a boy's decision at a critical moment in his life. The setting is a suburban service station on a storm-swept night and from the little group of persons gathered there emerges a striking picture of freedom and free enterprise, and of how they made this country the greatest in the world.

Another motion picture which will be available during Oil Progress Week will be "Two Equals Three." This will feature Dr. Roy K. Marshall of science and television fame. He will take the audience into his laboratory and give it a specific demonstration of how two gallons of modern gasoline do the work of three gallons of 1925.

Both motion pictures were produced by the Oil Industry Information Committee, which sponsors Oil Progress Week. "Crossroads, U. S. A." was shot in the studios of Columbia Pictures, and features such well-known screen personalities as Elisabeth Risdon, Regis Toomey, Rhys Williams and Darryl Hickman. "Two Equals Three" was produced in the East.

**'20 Questions'**

The Oil Progress Week souvenir booklet "20 Questions" is modeled after the old parlor game. With a series of questions, answers and clues, it provides the reader with a thumbnail sketch of the petroleum industry before the final answer is revealed.

A leaflet which will receive wide distribution during Oil Progress Week is "What's Your Petroleum IQ?" The leaflet lists a series of utilizes a boxscore form to check their source. It is in the form of a quiz which challenges the reader's knowledge.

The leaflet, in a few short paragraphs, underscores the meaning of Oil Progress Week and oil progress generally.

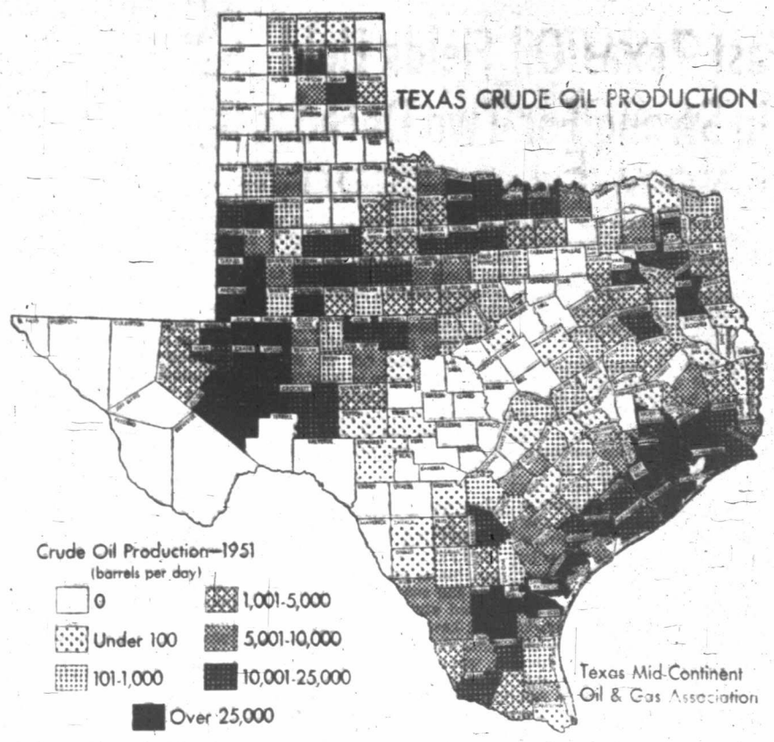
## Electronics Terms Fill New Dictionary

NEW YORK—(AP)—A recently compiled dictionary of radio, television and electronic words and phrases which science has been adding to the language, puts in simple words many terms that might otherwise seem like Greek. It was compiled by the staff of RCA.

An example is an "electrical transcription," defined as a "a disc recording of a complete program or message made specially for broadcasting."

Another is "zoom lens," or an "optical lens with some parts made moveable so that the focal length or angle of view is continuously adjustable without losing focus on an object or scene."

In 1951 Canada produced more than 90 million pounds of molasses.



CRUDE PRODUCTION SPREADS—Of Texas' 254 counties, oil and gas has been discovered in 194, compared with 42 counties in 1920. There are 33 counties having daily crude oil production of 25,000 barrels, according to the Texas Mid-Continent Oil & Gas Association. One-third of the state's total area, or 60,000,000 acres, are under lease for oil and gas exploration.

# Persons Working In Oil Industry Record Own Stories Of Courage, Drama, Heroism

The howling wind and the flying snow sent chills up and down the spines of the 40 persons trapped in their blizzard-stalled bus in the Rocky Mountains. It was almost 4 a.m., and the blackness outside did little to relieve the tension inside.

The raging storm showed no sign of abating. The bus' fuel supply was dwindling rapidly. When that was gone, the engine would gasp and choke, and then there'd be no more heat. Only marrow-biting cold and discomfort—perhaps agony and death.

Whether all of the passengers were aware of their critical predicament is not known. But whether they survived at all was strictly in the lap of the gods.

From out of the darkness, there suddenly emerged a snow-plow. Behind it was an oil truck on a mission of mercy. The driver could have stayed home that night, but like other oil men when emergencies arise, he voluntarily answered the call. He followed the snow-plow for miles, despite the blinding storm and its inherent driving dangers.

The bus actually was down to its last gallon of fuel when the oil truck arrived. Its tanks were filled, and passengers were kept warm and comfortable until the storm let up and they could continue on their way. What could have been a tragedy became only a narrow escape for 40 persons.

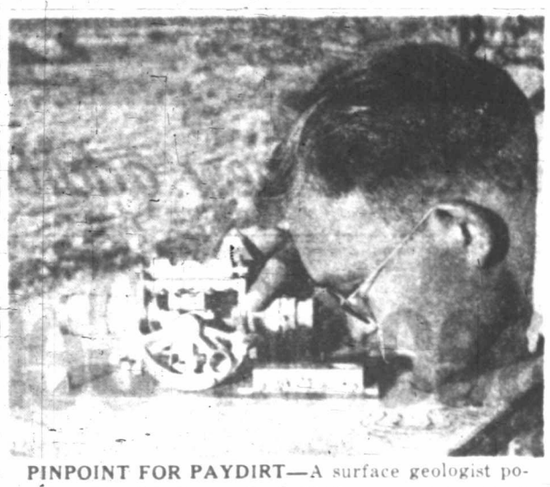
The oil truck driver who followed that snow-plow was only one of the many unsung heroes of the oil industry. Time and again, oil men—particularly drivers—have fought storms and floods, icy roads and blizzards to deliver supplies of petroleum to those who need it or are depending upon it.

Another heart-warming incident of this kind took place in New Mexico. Two oil truck drivers were on their way home after making a series of deliveries on an icy night. They were thankful that they'd soon be warm and comfortable again.

At their last stop, they were advised that the highway was blocked about 16 miles away by skidding cars unable to get over a hill. They could have gone on home and forgotten about it. But both were experienced in Winter mountain driving, and they set out in a pickup truck equipped with skid chains to see if they could help.

When they arrived at the scene they found 20 automobiles stalled at various points along the slope, mostly crosswise and jammed against the guard rail. Using tow chains and skill, the two oil men began to unsnarl the tangled mess. When state highway men finally arrived at three o'clock in the morning, they found two exhausted but happy oil men—and no traffic problem at all. The motorists all had been extricated.

Events like these are typical of the way oil men respond to emergencies and the public interest. Good citizens all, they take little dramas like these in stride, and plug away constantly at the ever-growing job of keeping America supplied with petroleum products.



PINPOINT FOR PAYDIRT—A surface geologist positions his alidade as a Shell Oil Company prepares a map of 6666 Ranch terrain. Careful mapping enables wells to be spotted accurately for the most likely production of oil.

*Equipment available to handle any type of heavy hauling . . . oil field equipment, pipes, rigs, etc.*

HEAVY OIL FIELD HAULING

Southwest Front St. at City Limits — Dial 4-7575

MODERN REFINING METHODS MEAN BETTER PETROLEUM PRODUCTS

New and better products to meet the needs of a mechanized world are the twin goals of research laboratories and modern refineries throughout America. Better lubricants for farms and factories; aviation gasolines for Korea; diesel fuels for trains and tractors; and fuel oil for giant ships because power driven machines have taken over 90% of our burden. Asphalt for roads, synthetic rubber, plastics, insecticides, paint, cosmetics and modern medicines are but a few of today's better known products originating from petroleum.

You may measure it in miles . . . in the size of its resources or in the planning of the men who help to make it grow. An idea or a business can be big regardless of size! It's the job to be done that counts. This vast Southwest, with its cattle, cotton, oil and growing industries has yet to place a ceiling on success. We call it free enterprise . . . the freedom of opportunity to forge ahead for a man or a business . . . big or little! Here in the Southwest, its people would never agree to substituting controls for freedom or regulations for competition. Southwesterners know that growth is both normal and healthy.

The oil industry, its little and big companies, is a vital part of the growing economy of the Southwest.

OIL PROGRESS IS YOUR PROGRESS!

Americans should know that, with the government's knowledge and encouragement, the American oil industry has helped to keep open to the free nations most of the world's oil reserves.

Oil, plus unending research, plus skilled men and women, plus the invested savings of Americans everywhere, have created an industry able to do a big job! In the Southwest and throughout the world, people of the oil industry have rendered distinguished service in finding and improving the manufacture of petroleum products. We are proud of our part in oil's growth and its development of the Southwest.

MAGNOLIA PETROLEUM COMPANY

One of the Flying Red Horse Companies

# East Texas Oil Fields Hold Up Strong For Two Decades

The contributions oil can make to an area are nowhere so apparent as in East Texas, the beneficiary of revenue from the huge East Texas Field and from other fields for more than 20 years now.

Wide, neatly paved streets, modern buildings, and lovely homes characterize many East Texas towns which might, without oil, lack funds for such things.

Texas Railroad Commission Districts 5 and 6 make up the East Texas area, from which came 443,450 of the state's 2,767,082 barrels of oil produced daily last year. The East Texas Field alone accounted for 272,800 barrels of oil a day.

East Texas has 27,271 producing wells as of Jan. 1, 1952, an increase of 239 over the same date a year earlier. The number of wells drilled as well as the number of dry holes was somewhat higher than the year before.

Deeper drilling in the search for new producing zones showed up in the 1951 total amount of footage drilled, 5,602,632, and in the average depth per well, 4,772 feet. Figures for 1950 were 4,369,813 feet drilled, for an average of 4,724 feet per well.

Natural gas has been a big story in East Texas, especially during the past few months. At the start of this year there were 40 plants where liquefied petroleum gases such as butane and propane are produced and where dry gas is returned to the ground or sold for home and industrial use.

An addition to gas facilities in the Pickton Field is under construction by Humble Oil & Refining Company as a step in Humble's $40,000,000 postwar program for putting casinghead gas to productive use. (Casinghead gas is that which is produced along with oil from a well).

## Liquor Gathers Dust Awaiting Court Order

BUFFALO —(AP)— Down in the basement of police headquarters 35 cases and one suitcasefull of choice assorted whisky are gathering dust —and have been since 1944.

The whisky, which had been stolen, was recovered by police and ordered held pending disposition of the case. According to police records, no disposition has ever been made.

*Did You Know That:*

**Odds are 8 to 1 against bringing in a producing well . . .**

**in an area where oil has never been found before. Yet in spite of the great risks involved, U. S. oilmen last year found the greatest volume of oil in history.**

Searching for oil is a risky business. And it is only one of the many things we oilmen must do to keep your family car rolling and to meet other record demands for fuels and lubricants. We're proud to be part of the competitive, progressive oil industry that brings better living to this community.

# Oil Industry Bears Major Part Of Texas Tax Burden

The gauges of the Texas petroleum industry provide a good barometer to the level of state services and public education enjoyed by Texans, a recent report by the State Comptroller indicates.

At the end of the state's business year, Aug. 31, 1952, the Comptroller figured that Texas oil and gas producers had provided probably $138,000,000 of the state's income for the year.

Two big items in the sizable number of imposts against the oil and gas operators were crude oil production tax, $120,000,000; natural gas $18,000,000.

During the 1951 fiscal year, the Texas petroleum industry paid 35 per cent of all state taxes and licenses. Oil and gas production taxes alone were $126,000,000. In addition, the industry paid ad valorem, regulatory, carbon black, oil and gas well servicing, and franchise taxes, among others.

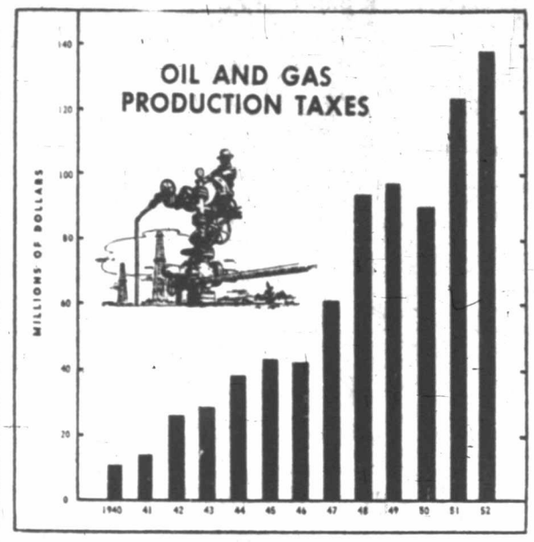
The heavy production tax is actually an occupation tax under the law. Present rate of taxation is 4.6 per cent of the value of the oil produced by an operator and 5.72 per cent of the value of natural gas produced. An additional levy of 3/16 of one cent on each barrel of crude oil is used by the state in financing the cost of administration of the Railroad Commission. The production tax is on the gross sales of the producer. No deductions of any kind are possible under its provisions.

The Texas oil and gas operator's role as the star performer in the state tax picture is indicated by his rising share of the tax load over the last decade in ratio to the cost of state government. Since 1940 the cost of state government has tripled, while oil and gas production taxes have multiplied almost eight times.

The question sometimes is raised as to the relationship of taxes levied on the petroleum industry to those levied on other businesses and industries. State taxes can be divided into two general categories: (1) consumer taxes — gasoline, liquor, cigarettes, etc., — and (2) the various taxes directly borne by business and industry. Of the latter, the petroleum industry pays 67 per cent of the total collected by the state.

The advances made by the Texas oil and gas industry have had a tremendous impact on the quality of state services and the public welfare program. According to the president of the Texas Mid-Continent Oil & Gas Association, Robert F. Windfohr:

"The many services Texas renders its citizens through taxes — services such as public school education, farm-to-market roads, old age assistance and state hospital care, to name only a few—must place their effectiveness on the amount of tax revenue available to them. The Texas petroleum industry, as the largest state taxpaying group supporting these services, feels it is making a good citizen's contribution toward progressive Texas living."



**PRODUCTION TAXES CLIMB**—Texas oil and gas production taxes have increased 750 per cent in the last 12 years, according to the Texas Mid-Continent Oil & Gas Association. The state treasury collected $688,000,000 from this source between 1940 and 1951. Another $138,000,000 was collected from oil and gas producers in the 1952 fiscal year, an all-time high.

**Borne Directly**

Oil and gas production taxes are borne directly by the producers and royalty owners. They cannot be passed along to the consumer.

The Texas petroleum industry shoulders the major part of the funds necessary for the education of Texas children. During 1951 the industry paid 38 per cent of the $62 per scholastic received by Texas public schools from the Available School Fund and provided taxes for 55 per cent of the Foundation School Fund.

The important general revenue fund, on which the state depends for many of its vital appropriations, received 41 per cent of its total volume from oil and gas tax money.

The tax on gasoline, the industry's chief product, is not included in the analysis of taxes paid by the industry, because the gasoline tax is paid by the consumer. This tax is collected at the filling station and passed along to the state.

**Money For Schools**

The University of Texas last year received 41 per cent of its fund from oil and gas taxes. Appropriations to other state colleges also contained similar shares of petroleum tax money.

In the 1951 fiscal year the industry paid the permanent school and university funds over $30,000,000 in lease rentals, bonuses, and royalty payments. The industry has paid into these funds a total of $231,994,152.

Permanent school fund and university fund money is invested in municipal, state, and United States government bonds. During the 1951 fiscal year, the University Fund earned $2,605,884 in interest, while the Permanent School Fund earned $4,089,467.

The public welfare program is a major item of expense to state government. Petroleum industry taxes are a big factor in maintaining these services.

During 1951, the state old age assistance fund received $17,800,000, or 57 per cent of its total from oil and gas revenues.

The teachers retirement fund was the beneficiary of $6,400,000, or 58.5 per cent of its total.

Over 40 per cent, or $8,700,000, of the state hospital fund was paid by oil and gas industry taxes.

The farm-to-market road fund received 58.5 per cent of its total from levies on oil and gas.

## Texas Production May Surpass Mark For 1952 Peak Year

Texas crude oil production in 1952 may equal or surpass the mark set in the peak year 1951 when the state produced 1,010,000,000 barrels, the Texas Mid-Continent Oil & Gas Association has estimated.

Using September allowables in calculating production throughout the fourth quarter of this year, the Texas Mid-Continent estimated 1952 crude production in Texas as reaching 1,037,000,000 barrels.

Production for the first nine months of 1952 was 755 million barrels, compared with 747 million barrels for the same period in 1951, a strike-induced production cut in May dropped daily average production to 2,163,000 barrels, as against the previous month average of 2,920,000 barrels.

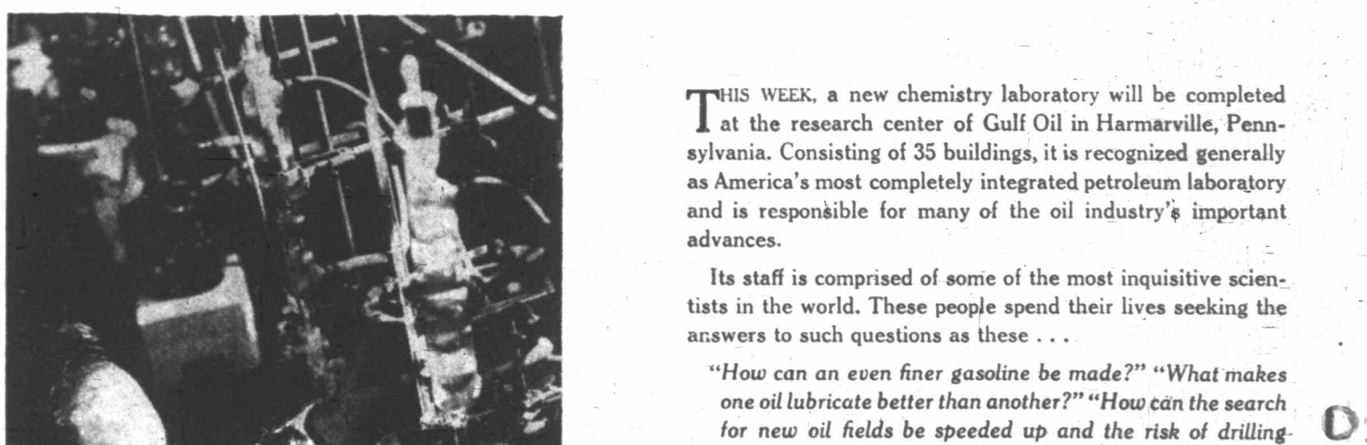
For September of this year the daily average ran over 3,000,000 barrels, or seven per cent above September 1951. With demand at high levels, the state's petroleum industry could pass the 1951 mark, the Association said.

## Free Banana Splits Reward Good Pupils

HOUSTON—(AP)—Joe A. Simmons, who owns an ice cream store, has given children a good reason to get A's on their report cards.

He is offering free banana splits to children who can show him an all A card. Every time report cards come out all the youngster has to do is bring it around to the store.

As a consolation prize those who get two A's plus an A in deportment get a free ice cream cone.



*Opening this week— a new addition to*

# Gulf's Research Center

THIS WEEK, a new chemistry laboratory will be completed at the research center of Gulf Oil in Harmarville, Pennsylvania. Consisting of 35 buildings, it is recognized generally as America's most completely integrated petroleum laboratory and is responsible for many of the oil industry's important advances.

Its staff is comprised of some of the most inquisitive scientists in the world. These people spend their lives seeking the answers to such questions as these . . .

*"How can an even finer gasoline be made?" "What makes one oil lubricate better than another?" "How can the search for new oil fields be speeded up and the risk of drilling dry holes reduced?"*

Finding the answers to these and hundreds of equally important questions is the aim of the nearly 1,200 scientists and technicians of Gulf Research who devote their time and talents to one goal—more and better oil products for you.

But this newest addition to Gulf's research center is only one phase of the company's current 200 million dollar expansion program. Other activities include the discovery and development of additional crude oil reserves, increasing refinery capacity, and expansion and replacement of transportation and marketing facilities.

The huge expansion programs of Gulf and other companies in the petroleum industry are being accomplished with one important thought in mind:

The free world depends on oil. And for it, the free world can depend on America's independent petroleum industry.

# North Texas Area Continues To Hold Prominent Position

North Texas is one of the oldest oil-producing areas in the state, and for many years had more wells than any other comparable region. In 1951 West Texas totaled up more wells, but North Texas still holds a prominent position in the petroleum picture.

Texas Railroad Commission District 7B and 9 make up the "official" North Texas area for oilmen. Production fairly well scattered throughout the districts, but there is some concentration in the central and upper counties.

Abilene, Wichita Falls, Breckenridge, and many smaller North Texas cities depend for much of their income on the petroleum industry. A number of prosperous farms and ranches in the area are dotted with oil wells.

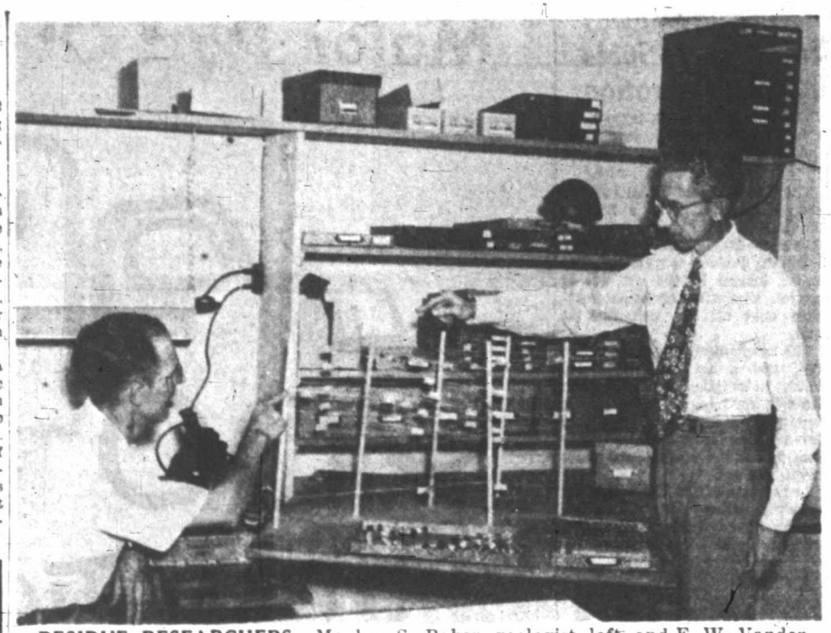
Production of crude oil and condensate last year in North Texas amounted to 241,041 barrels daily, almost 10 per cent of the state's average daily production of 2,767,082 barrels. There were 31,441 producing wells, about one-fourth of the number in Texas, 131,203.

**Shallow Production**

Production in North Texas generally is shallower than in other parts of the state. In 1951 the average depth of wells drilled was, 193 feet, as compared with the state average of 4,610 feet. Still, North Texas drilling was deeper in 1951 than in 1950, when it averaged 2,797 feet per well. Total footage drilled in North Texas last year was 16,016,988.

The deeper drilling reflected a state-wide trend resulting from the search for new producing zones in old fields, and from attempts to find oil in heretofore untried areas.

The relatively shallow depth of North Texas wells encourages drilling, so in 1951 the number of wells completed was second only to West Texas, where there were 5,113 completions.



RESIDUE RESEARCHERS—Maylon S. Baker, geologist, left, and E. W. Vanderpool, right, owner and operator of the Residue Research Laboratory, study a peg model of the Fowler Field in Lee County, N. M., a field in which six wells have been cut by the same thrust fault. (See Story on Page 1.)

## Outlays For More Plants, Facilities Pass $750,000,000

Additional plant and facility expenditures of the Texas petroleum industry, spanning the first eight months of 1952, passed the three-quarter billion dollar mark, according to certificates of necessity granted by the Defense Production Administration and tabulated by the Texas Mid-Continent Oil & Gas Association.

Although many projects are not in the building stage, the 321 certificates granted Texas firms for defense purposes totaled more than $790,000,000 for the eight-month-period, the Texas Mid-Continent reported.

Projects costs based on certificates ranged from $3,500 to $80 million.

Expenditures by industry suppliers and certificates involving transportation of crude oil, other than pipe line, are not included in the compilation.

Divisions of the industry covered were pipe line, petro-chemicals, refinery projects, field processing, storage, and carbon black.

There is no admission charge to the show grounds or exhibits at the Permian Basin Oil Show in Odessa.

# Drawing Accurate Oil Maps Is Long, Painstaking Task

Steps in the production of a county ownership map are as numerous as the wells that dot the map.

Personnel at the Midland Map Company, 412 North Big Spring Street, are kept "on the double" turning out fine examples of cartography.

Ed Prichard, manager of the concern, said that the average county map takes six months to produce correctly.

Research in compiling reports and bulletins necessary for making an accurate map, plus the expert services of draftsmen, makes map-making a big business, Prichard pointed out.

The project of mapping counties in the West Texas area has been underway by the firm for three years.

While map-making is interesting work, it also is a long, tedious process, Prichard said.

**Map Never Completed**

"The average title checking time spent on a map is six weeks, and more than 500 hours of drafting time is required for completion," he said.

"Actually, a map is never completed," he said, as daily changes are made on the finished product to keep it up to date."

First step in the production of a map is research, Prichard said.

A title man is sent by the map company into the field to check the various abstract plants and county clerks office and get information from them. Abstract offices send supplementary county filings to the map firm during the period a map is being constructed.

**Landmarks Are Last**

A draftsman then draws section lines and block and section numbers on a large sheet of linen mapping cloth. Section lines and block and section numbers are then inked in. Lease and fee information, including the owner and leasee, are carefully checked.

Next step in making a map a finished product is a draftsman drawing in landmarks on the map. These landmarks include rivers, dry and producing wells, communities, highways and other identifying objects.

Commercial oil reports furnish "completion and location" cards. These cards are checked against the Railroad Commission of Texas "pool maps." After the well information has been checked for accuracy, it is drawn on the map.

A commercial aerial service in Midland does the reproduction work for the Midland Map Company. Van Dyke negative is made of the master map, with reproductions made from the negative.

Oil activity in a county determines the extent of map sales.

## New Safety Valves Trip Trouble Spots In 'Wet' Operation

Wells producing oil in lakes, bays, or in the Gulf present some singular problems, one of which is solved with a safety shut-in valve.

The device proved useful recently when a barge ran into a Humble Oil & Refining Company well in Galveston Bay, bent the casing, broke the surface connections, and for an instant let the well out of control. The safety choke automatically shut off the well flow at once.

The mechanism, set down in the well, has a flow-sensitive valve which automatically closes when the well fluid begins to flow more rapidly than it should. Not only does it make for much safer operations, but it also prevents the waste of oil and gas.

In the case of the Galveston Bay well, the casing was straightened, other well repairs made, and normal production was soon resumed.

**MAPPERS CHECK LATEST WORK**—Part of the office force gathers around to inspect a new map turned out by the Midland Map Company. Left to right, are Ed Prichard, manager; Virginia Armstrong, Richard Teague, James Ligert, Ronald Parker and E. S. Skidmore.

## Recovery Of Scrap Steel Eases Pinch

The supply of steel, an item vitally necessary in the oil business, is being boosted these days by the sale of scrap from oil industry installations.

At Humble Oil & Refining Company's Baytown Refinery, 4,766 tons were sold to scrap dealers in 1951. By the end of July this year, 6,100 tons had been sold from the refinery.

**MORE STATIONS**

There are more service stations than drug stores or postoffices in this country. 95 per cent of these service stations are owned independently or operated by local business men.
