

"By Helping Business You Help Yourself" The Floyd County Plainsman

NUMBER 16

FLOYDADA, FLOYD COUNTY, TEXAS, THURSDAY, AUGUST 2, 1945

NUMBER

Fertilizer Pays L. L. Jones on Farm

Interested in a first opportunity to see the effects of fertilizer use in West Texas, L. L. Jones farm in the community. Application of 20 per cent super phosphate in his first attempt at alfalfa, according to land which had been for a period of 7 years less and less productive until the average yield in the neighborhood 1-2 ton per acre. Immediately the first cutting this land was chiseled and applied with a fertilizer machine. Spreading was not quite as Mr. Jones would like to really get the job done the second cutting yielded slightly over a ton and the third cutting an even greater yield. He can show you plots that receive fertilizer. The results are definitely very wide of the observer. Just thinking about fertilizer doing quite what it consequently needs a farm so to speak.

Part of the story is that prepared to make a soil payment on the practicing fertilizer and if the farmer might want to which more than cuts cost of fertilizing. Figures on Mr. Jones' fertilizer shows a net cost of \$2.25 per acre and an increase in income per acre of \$10.00 after deducting fertilizer. These figures on the second cutting alone Jones expects to make 5 conditions are favor-

SELECTED FROM LOCAL SENT TO BLISS

Following selectees were announced at Fort Bliss, Texas: Carroll Westfall, Don Finkner, Kenneth Bain Allen Decker, Wil Martin, David Thomas James Luther Byerly, and others.

Pooler and Byerly, the transfer from Norman, Local Board, were to the Navy; others in

OF GAS COOKING HEATING STOVES JULY 31

August 2.—Rationing of gas and gas heating. On July 31, the District Administration has

Combination ranges, gas combinations, will be removed from rationing. Oil heating, combination gas stoves and oil heaters for stoves will be rationed.

It is explained that a substantial increase in production of gas and cooking stoves is expected for this quarter. Authorization appears great to remove the necessity of rationing gas stoves. The supply of kerosene is so short, that sale of oil burners cannot be permitted. Remain under the same restrictions as formerly.

Increased Enlistment Quota for 17-Year-Olds

New Orleans, Louisiana, Aug. 2.—A considerably increased enlistment quota for 17-year-old apprentice seamen, as well as Spars (Coast Guard Women's reserve), for the month of August has been received by Eighth Naval District Coast Guard headquarters, New Orleans, Lt. Comdr. E. B. Briggs, district recruiting officer, announced yesterday.

There is a pressing need for recruits in both classifications, and Coast Guard headquarters, Washington, D. C., has urged that all district quotas be met.

Lieutenant Commander Briggs said a mobile recruiting unit has been sent to San Antonio, Texas, where it will maintain headquarters during August in the U. S. postoffice building, with Thomas L. Williams, yeoman first class USCGR, in charge. Candidates in that area should apply to the San Antonio office.

The district recruiting office is located in the Custom House, 423 Canal street, New Orleans.

All-Risk Wheat Insurance to be Offered

Floyd County farmers and Uncle Sam are getting together to take the fear and gamble out of wheat farming. After a year's absence, wheat crop insurance again has become a part of local farmer's programs.

All-risk wheat crop insurance is designed to put the farmer on an equal with businessmen by protecting his operations. He can be assured that crop failures will not have the same disastrous results as in the past.

Wheat crop insurance is especially timely because of the demands for all-out agricultural production in 1945 and 1946. The 1946 wheat goal for Texas has been set at 5,200,000 acres compared with the 1945 goal of 5,028,000 acres.

During the last week, AAA county committees and community committees, and other sales agents has held meetings to set up sales and administrative organization in Floyd County to sell the 1946 wheat crop insurance. This will be the first opportunity since 1943 for Floyd County farmers to obtain all-risk insurance on winter wheat.

"We expect to contact every wheat grower so that he will have an opportunity to take advantage of this non-profit insurance which protects his crop investment," Ray S. McEntire, administrative officer of AAA, said. "Farmers wanting information before they are contacted by an agent should get in touch with their county AAA office."

Under the winter wheat insurance, farmers have a choice of two contracts, each for 3 years. One offers coverage up to 75 percent of the average yield—the other up to 50 percent. The amount of coverage varies with the stage of the crop's development. Premiums are payable annually by cash or by premium notes.

Any person with an interest in a wheat crop may apply for crop insurance through the county AAA office or a sales agent appointed by the county AAA committee.

The dead-line for receiving applications in Floyd County is August 31, 1945 or before the crop is seeded, whichever is earlier.

Three ways to handle your money

1. POUR IT DOWN THE DRAIN:
Sure, spend it like water. Easy come, easy go. Buy and buy, white market, black market, who cares? But, by and by, don't be surprised if you wind up broke.

2. SOCK IT IN THE WELL:
Not a bad idea, but not good, either. You put \$75 down the well today... pull it up in 10 years... and what have you got? \$75 and three frogs... which isn't much interest.

3. TURN IT INTO WAR BONDS:
Of course! Put your money to work! It helps the war effort, and the government needs every dollar it can get. It makes money for you: \$75 in Series E Bonds now will come back in 10 years as \$100. And you've got a swell "cushion" to fall back on in case of emergency. Buy all the Bonds you can—keep all the Bonds you buy!

WAR BONDS—to have and to hold

J. R. Teal Dies Friday Night in Local Hospital

J. R. Teal, 74, of Lubbock, a resident of the South Plains for the past 29 years, died about midnight Friday in a local hospital. Mr. Teal had been in ill health for several months.

Survivors include his widow; two brothers, W. T. Teal of Levelland, and John Teal of Birmingham, Alabama; five sons, Herb of Lubbock, Bill of Amarillo, Talma of Petersburg, Olie of Borger, and Buford of Big Spring; six daughters, Mrs. J. W. Hairston of Idalo, Mrs. A. T. Pricer of Floydada, Mrs. B. T. Davis of Ralls, Mrs. O. O. Turner of Coleman, Mrs. Noah Griffin of Corpus Christi, and Mrs. Ray Timian of California; 23 grandchildren; and two great-grandchildren.

Funeral services were conducted at 4 o'clock Sunday afternoon at the Idalou Baptist church, and burial was made in the Idalou cemetery.

Turkey shipments in Texas during June nearly doubled those of a year ago, but chicken shipments were halved, the University of Texas Bureau of Business Research reports. Sixteen carloads of chickens were shipped this year in June, and 35 carloads were shipped in June last year; turkey shipments increased from 9 carloads in June, 1944, to 17 carloads in June, 1945.

Soil Building Practices Must be Reported

Floyd County farmers have been notified that all soil-building practices carried out prior to August 1 under the 1945 Agricultural Conservation Program must be reported not later than August 15 if they expect payment for carrying out the practices.

"There will be no exceptions made. All farmers who have not turned in their reports by August 15 will be ineligible for payment under the 1945 program," this was the statement made by Ray S. McEntire, administrative officer of the AAA.

McEntire stated, "We know that all farmers are extremely busy with their work but this deadline and it will have to be met. Only a few minutes are needed to fill out the necessary reports. Farmers are urged to not wait until the last day to file their reports for there will be a last minute rush."

Farmers will be expected to file the correct acreage for each practice carried out. If the practice involves seeds or fertilizers, supporting evidence in the form of sales receipts will be necessary to substantiate the practice.

Thomas Alva Edison, with more than 11,000 patents to his credit, was America's most prolific inventor.

Let Cavanaugh do your Printing.

Flood Loans For Farmers of Texas' Low Lands

Loans will be available in 25 Texas counties to help flood-stricken farmers continue their production or restore property damaged by this year's floods, according to information received by Texas A. and M. College Extension Service from the U. S. Department of Agriculture.

Two million dollars has been made available under a recently enacted federal law. This amount is to take care of the needs of 198 counties in the U. S. Texas will receive a share according to its needs as determined by the Farm Security Administration which will supervise this program.

Farmers who need financial aid in order to keep their land in agricultural production this season, and who are unable to meet their credit needs from other sources, may apply to the F. S. A. for these loans if their farms are in the following counties: Bowie, Camp, Cass, Franklin, Harrison, Marion, Morris, Red River, Titus, Ppshur, Cherokee, Gregg, Henderson, Pannola, Rains, Rusk, Shelby, Van Zandt, Wood, Polk, San Jacinto, Nacogdoches, Trinity and Montgomery.

Congressman George Mahon was in Floydada Tuesday visiting among friends.

Your quota is bigger bonds.

Corn Yield Trend Downward For 1945

The 1945 Texas corn yield may be the smallest since 1934, according to the July 1 crop report of the U. S. Department of Agriculture. Quoting this report, the Bureau of Agricultural Economics at Austin, gives the estimated corn acreage as 4,123,000, or 17 per cent below that of 1944. The indicated yield on July 1 was 15.5 bushels an acre for a total production of 63,984,000 bushels. This would be more than 5,000,000 below the 1944 yield, and more than 13,000,000 bushels less than the 10-year average.

Fat Salvage Committee Quotes Sec of Agriculture

One of the most significant statements made by a government official regarding shortages and food difficulties comes from Clinton P. Anderson, Secretary of Agriculture. Mr. Anderson underscores the fats and oils shortage in an appeal to women and has authorized the American Fat Salvage Committee to release his message.

In asking women's help in the fats and oils shortage, the Secretary of Agriculture sees increased household fat salvage as aid to meeting needs. Mr. Anderson says:

"The scarcity of fats and oils is one of the most serious problems confronting our Nation. But it is one shortage which the women of America can help to meet.

"There is little hope of major improvement in the domestic supply of fats and oils in the near future, nor can we expect a rapid increase of imported oils from the Pacific.

"Farmers have responded to the call to produce more animal and vegetable fats and oils. But we are still unable to meet wartime demands.

"During the war years we have changed from an importing to an exporting nation on fats and oils. Our domestic stocks are at a low ebb and our war, industrial and relief needs are at a peak.

"In 1945 we need 250,000,000 pounds of used household fats to help fill our existing deficit. If American Housewives don't meet this goal, we will have to further curtail the allotments for civilian, industrial and military uses.

"This is an important job for women! Homemakers all over the land—in cities, towns and villages, and on farms—should save and turn in every available drop of used kitchen fat. It means cash and extra red ration points.

"But above all, it's a real War Service women can perform for themselves and for their country."

FIVE COUNTY FIFTH SUNDAY SINGING CONVENTION HAS LARGE ATTENDANCE

The Fifth Sunday Five County Singing Convention which met at the Lockney City Auditorium Sunday, July 29, drew singers from ten Panhandle and Plains counties. C. M. Lyles, president of the convention, estimated that about 1000 people attended. Basket lunch was served during the noon hour.

The large crowd enjoyed good singing during the day. Several quarters were in attendance, including a Girls Quartet from Amarillo, Swisher County Quartet, Plainview Radio Quartet, and Mr. Law from Childress.

Dairy Payments Contribute to Farmers Income

Payments on dairy products since January 1, 1945 have totaled \$38,656,71 up to July 26 and represented payments to 1253 dairy producers, such was the announcement from the AAA office week.

Payments on January, February, March production amounted \$18,728.80 on 657 payments. Figures to date on April, May, June production have amounted \$19,927.91 on 596 payments, it is expected that some 100 more payments are yet to be made.

These payments represent small change in the pockets of Floyd County farmers.

Ray S. McEntire, AAA administrator, said, "These payments designed to help offset the increased cost of production of milk. Especially are the payments beneficial when pastures are dry and prospects for forage crops slim."

He stated further, "The next period will be October 1 through November 30. This payment period will cover July, August, and September production and rates will be 13c per pound but fat and 55c per hundred weight for whole milk."

To be eligible for payment tickets or stubs must be turned in between October 1 and November 1.

McEntire also called attention to the fact that those individuals who have not applied for payment on April, May, June production should do so at this time. A dead-line for this payment August 31.

Pvt. Delvin F. Smith at Hot Springs, Ark.

Hot Springs, Arkansas.—Reporting to the Army Ground Service Forces Redistribution Station at Hot Springs, Arkansas, Pvt. Delvin F. Smith, 629 W. Jacks Street, Floydada, Texas, is enjoying a vacation resort surroundings while meeting appointment which will determine his next assignment.

A liberated prisoner of war, Pvt. Smith spent 5 or his 7 months overseas in a German prison camp. Prior to reporting to the Redistribution Station, Pvt. Smith spent a 60 day furlough at his home. Mrs. Smith accompanied her husband to Hot Springs and is enjoying the many facilities available to the wives of returnees.

During his reassignment period of approximately two weeks, veteran is quartered in one of the Redistribution Stations resort hotels. After receiving a complete physical examination and meeting an appointment at which his military records will be brought up to date, he will be interviewed by classification experts who will determine the Army job for which he is best qualified.

These appointments, together with a few discussion periods designed to familiarize the veteran with events with which he has lost touch during his tour duty overseas, will require a total of only about ten hours of time.

During most of his stay in Hot Springs, the returnee will be able to enjoy the resort facilities available at the Redistribution Station and its lodge on scenic Lake Catherine. An extensive program of entertainment and recreation available seven days a week.

TEXAS STATE COLLEGE PLANNING ADDITIONAL STORY SPACE

North Texas State College has instituted for one additional dormitory and tentative plans for two have been made, although arrangements have not been completed.

Plans for the new residence will be near the Oak Street and will be an addition to the building. As to when construction will be started, Dr. McConated this week that further

plans will depend upon materials and labor.

Nearly ten per cent more electricity was used in the first half of 1945 than was used in the same period of 1944. Statistics show that there was a substantial increase in electricity used by industrial plants, commercial firms, and in residences.

Two Texas war correspondents have been killed on the battlefronts.

Your quota is bigger bonds.

Franklin County Youth Top Dairy Producer

College Station, August 2.—Sixteen year-old Billy Jack Flowe has won the admiration of his Union community neighbors as a result of his record in the development of a dairy herd during his four years in 4-H Club work under the supervision of Loy M. Hendley, county agricultural agent for Franklin County.

Billy Jack exhibited the grand champion cow at Franklin County's livestock show last month and at that time refused \$300 for this outstanding registered Jersey. His champion was milking 40 pounds daily and paying approximately \$1.12 per day profit, says Hendley.

Billy Jack started 4-H Club work in 1941 and today has four registered Jersey cows and three Jersey heifers. He has been able to acquire this fine stock through good management and careful breeding practices, his county agricultural agent says. However, his best cow was given him as an award for winning first place in a county-wide cow-sow-hen contest in 1943, the county agricultural agent said. He now has a heifer calf from this cow that he expects to equal the fine record made by its dam.

Plenty of Variety In Fresh Food Buys

Variety and versatility feature the list of fresh food buys on the market this week. Included are eighteen vegetables suitable for salads, relishes and main course dishes, for use in raw or cooked form, either fresh or canned. In addition, the list names nine fruits, to add color, taste appeal and food value to meals from breakfast to dinner desserts.

Top ranking buys include peaches, tomatoes and carrots, followed closely by onions, oranges and cabbage. Other good buys are lettuce, squash, beets, cucumbers, potatoes and corn and apricots, watermelons, cantaloupes and lemons for fruit selection.

Whey Not a Waste Product; the Milk Sugar Remains

"Don't waste the whey that is left in the process of making cottage and neufchatel cheese with your excess milk," says Miss Gladys Martin, dairy specialist for the Extension Service of Texas A. and M. College.

Many persons consider the whey from skimmed and whole milk as a waste product after the curd is removed. "However," says Miss Martin, "while only 1 per cent of the fat is left in the whey, the milk sugar remains without material change."

In these days when sugar is such a precious item, whey can be used as a welcome substitute in the making of a delicious syrup that is good on hotcakes, waffles, puddings and vanilla ice cream.

"The recipe for this syrup and its preparation are simple," Miss Martin says. "The only ingredients needed are one cup whey, one-third cup honey, and one-half cup white corn syrup. Simply boil this mixture until fairly thick."

Another use for whey, one which requires a little sugar this time, is the making of whey punch, recipe as follows:

5 cups whey, 1 cup sugar, 1 cup shredded pineapple, 2 lemons. Boil the sugar and 1 cup of whey together for five minutes. Cool the mixture, and add the remaining whey, the juice of the lemons and the shredded pineapple. Serve the punch with cracked ice or very cold. Mint may be added. Any fruit juice or fruit may be used instead of the pineapple.

THE TEXAN'S SHARE IN THE WAR AND UNITED WAR CHEST OF TEXAS

News flashes from a dozen war theaters show Texans everywhere still in the thick of the fight, and still racking up new records:

Lt. T. F. Pierce of Taylor, a graduate of Bartlett High School and of the University of Texas, piloted his Navy Privateer plane over Korea recently to help wreck a gasoline dump, two Jap ships and a Nip bomber factory.

Chief Yeoman Robert Carrell of Martindale has been cited by Adm. Halsey for heroism during the Battle of Leyte Gulf.

Col. Sam Myers of Marfa, hero of fighting in Europe, has been awarded the Distinguished Service Medal.

Pfc. Rex Riddle of Corpus Christi is now a guard watching the Nazis in Berlin.

1st Lt. Howard (Buddy) Clark, Goliad scrapper, has been awarded his fifth Oak Leaf Cluster for his Air Medal.

S. Sgt. Rudolph Perkins of Abilene, veteran of many Pacific battles, helped capture Luzon and now is teaching Filipinos to say "Welcome" in the good old Texas way, and now the Texas twang is heard on all sides, from native lips, incidentally, the hardy people of the Philippines, who never gave up the fight against the Japs, now are receiving clothing, medicine and other relief supplies from Texans, through their gifts to the National War Fund last year. This relief is one of the most important factors in the job of reestablishing the people of these loyal American islands.

Other National War Fund supplies, made possible by annual war chest drives in every county, are going to our own fighting men and their allies all over the world.

CATTLE SHIPMENTS IN TEXAS DURING JUNE TOTALED 5,446 CARLOADS

Austin, Texas, August 2.—Cattle shipments in Texas during June totaled 5,446 carloads, the University of Texas Bureau of Business Research has reported. This compared with 5,953 carloads shipped in June, 1944.

Shipment of calves was higher in June than in June, 1944, with 922 carloads shipped this year, and only 914 shipped last year.

Hog shipments dropped far below the June, 1944 total of 1,262 carloads, with only 466 carloads shipped this year.

Sheep shipments reached a total of 3,111 carloads, as compared with 3,386 carloads in June, 1944.

INTERNATIONAL SHORT SNOORTER SOCIETY GROWS

Miami, Fla. August 2.—More Texas men today were added to the roster of the International Short Snorter Society—the exclusive organization made up of men and women who have flown transoceanic. They were landed at Air Transport Command's Miami Army Air Field after flying here from overseas in ATC planes.

Camp Blanding, Florida was their next step. From there they go to reception centers nearer their homes for separation or furloughs prior to reassignment.

Latest Texas "Short Snorters" clearing this ATC Caribbean Division hub included:

S. Sgt. Oley H. Olson, 31, Ordnance, 37 months service terminated in Germany, five battle stars

Lt. Audie L. Murphy of Greenville and Farmersville, Texas, has more medals than any other man in the entire Army.

living costs - Up!

ELECTRICITY IS CHEAPER THAN Ever Before!

Living costs have skyrocketed in the past few years... but the cost of electricity? No!

Electric rates in the area served by Southwestern Public Service Company have been going down consistently. Our last rate reduction makes your electric dollar a mighty big dollar when you invest it in the comforts and conveniences of electric service.

OFFICE OF DEFENSE TRANSPORTATION GENERAL ORDER 52 Effective 12:01 am, June 30, 1945

"No carrier shall reserve, assign or allocate seating or sleeping space on a passenger train more than 120 hours in advance of scheduled departure time of such train. No carrier shall issue a ticket for a reserved seat or sleeping space on a passenger train more than 120 hours in advance of scheduled departure of such train, except in the case of tickets for reservations made prior to the effective date of this Order which have not been picked up."

OFFICE OF DEFENSE TRANSPORTATION GENERAL ORDER 53

"On and after 12 o'clock noon, July 15, 1945, no common carrier by railroad or sleeping car company shall operate or transport any railway car containing sleeping space or sleeping accommodations to a point of distance 450 miles or less from the point of origin of such car, such distance being measured by the shortest distance by railroad over which sleeping cars are operated between such points. Each common carrier by railroad shall forthwith cancel all reservations for space after 12 o'clock noon on July 15, 1945."

What about Travel now....

under the new Government rulings?

The Government has curtailed civilian travel by ordering the railroads not to make reservations on passenger trains more than five days in advance of departure and by banning sleeping car service on trips of 450 miles or less.

A lot of people are assuming that, with the European war over, the travel situation on trains should have eased up by now.

But they are finding out that it's harder than ever to get space. They're asking themselves, "Why?"

The reason is simply that the railroads are being called upon to repeat a job of moving over 3,000,000 soldiers. But this time it is to be done in 6 to 9 months whereas originally it took more than 2 years to move these men.

The railroads are still operating with the same number of passenger cars that they had when the war started. Building new passenger cars has not been permitted since Pearl Harbor.

Many Pullman cars have been converted into

hospital cars, and, of course, more Pullmans and coaches than ever are being withdrawn from civilian service to use in the movement of men to the Pacific.

The great bulk of traffic for the Pacific funnels into 4 railroads to ports of embarkation in California. Santa Fe, with its improved facilities, is carrying a large part of this traffic.

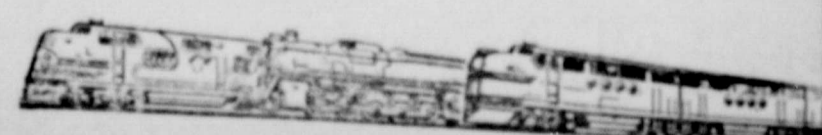

This all adds up to the fact that only a very limited amount of space is left over for civilian travel.

Of course we like to accommodate our friends and make new acquaintances. But you, too, agree that the troops and materials needed to whip Japan must come first.

New cars are now on order. Santa Fe has enough new chair cars on order to seat 3186 people. 16 new lunch counter-diners are also on order. A substantial number of new sleeping cars will be placed in service on the Santa Fe as soon as War Production Board orders permit.

...ing ways of conserving the peach crop this year, with shortages offering an acute problem, suggests the idea that peaches can be dried satisfactorily. More important still, it is no sugar to dry peaches, says Winifred J. Leverenz, special food preservation of the A. C. College Extension Service. The method of preparation of fruit is similar to that for canning. The peaches may be dried at peeling, or if desired, the peaches dry more quickly to make a good product.

...at with sulphur to keep color and food value. One method is to use 3 1-2 tablespoons of potassium metabisulfite or sodium metabisulfite in 1 gallon water, drop as they are peeled or cut in solution for 15 minutes, drain, and arrange on tray for drying. The other method is to use flowers of sulphur under fruit. Use 1 teaspoon sulphur to each pound prepared fruit. Put sulphur in a small piece of roll paper and twist the paper around the fruit. Arrange a place out doors.

...fruit in a tray and put the sulphur in a pan about 12 inches under the trays. Start with the roll of paper containing the sulphur. After it has burned, put a box or bar over the tray and pull loose dirt up around the edge of box to hold the fumes. For peaches, sulphur for 20 days, and for unpeeled peaches, under the tight box with the fumes about three hours.

...From the University of Texas Bureau of Business Research comes the report that the average weekly production per unit was 199,866 board feet, and the average weekly production per unit was 199,866 board feet, and the average weekly production per unit was 206,139 board feet. Unfilled orders as of June 30 totaled 1,502,443 board feet per unit.

...Place where air can circulate around fruit. When the peaches are dry the peaches are pliable and leathery, and not sticky. They have a springy feel. Heat to greens in an oven from 15 to 20 minutes, place in hot, dry jars and seal immediately then in a cool dry place.

...715 carloads of Texas eggs were shipped in June, compared with 1,222 carloads shipped in June, 1944, Bureau of Business Research.

...at 100,000 pounds of raw rubber will be produced at Mineral Wells, Texas, this year.

Passenger Car and Small Truck Tire Quotas Stand

Lubbock, August 2.—Passenger car and small truck tire quotas for the nation and for the Lubbock District remain the same for August as for July, but the quota of large truck tires was decreased, according to District OPA Rationing Executive William G. Williams.

The reduction of more than 34,000 in the large truck tire quota will require the most rigid conservation of tires in this category, WPB and OPA said. The District Emergency Truck Tire Board will screen all applications with the greatest care to assure that purchase certificates are issued to only the most essential applicants. Truck owners and drivers are urged to do everything possible to stretch the life of their truck tires.

Production of both large and small truck tires was reduced by the recent strikes in Akron, Ohio. Fortunately, production of passenger tires was not greatly cut by the shutdown of rubber plants.

Despite curtailed production, substantial inventories of most small size truck tires permitted the July quota to be repeated in August. Only exceptions are the 700-20 ten-ply and the 750-20 ten-ply that were short prior to the strikes and are now critically short. Because of the limited number of these size tires, the WPB have given OPA a separate quota for them and each application must show the size requested.

LUMBER ORDERS MOUNTED AT SOUTHERN PINE MILLS IN JUNE

Austin, August 2.—While unfilled orders for lumber mounted at Southern pine mills, production and shipments dropped in June in Texas.

From the University of Texas Bureau of Business Research comes the report that the average weekly production per unit was 199,866 board feet, and the average weekly production per unit was 199,866 board feet, and the average weekly production per unit was 206,139 board feet. Unfilled orders as of June 30 totaled 1,502,443 board feet per unit.

Garden Plans of Farmers Hampered by Drouth

Many farm families have been unable because of the extended drouth to carry out their usual garden plans. Quite frequently fall gardens are the equal of, if not superior to spring gardens and it is suggested that a good way to meet the food shortage is to spend any odd moments one might have planting some of those garden seed you bought but didn't get to plant this spring.

Now is a good time to plant carrots, beets, onions, lettuce, mustard, swiss chard, early planting of turnips, radishes, squash, all varieties of beans, collards, field peas and sweet corn.

Let's talk about lettuce—New York 12 or Iceberg lettuce if planted now will make a slow growth until cool weather approaches at which time growth will increase rapidly and the family can enjoy the leafy "thinning" plants and with luck uniform heads of lettuce will be ready for the table before frost. The Black-

seeded Simpson would give adequate leaf lettuce if that is what is desired, however, it does not form heads. Heading types of lettuce sometimes bring disappointment to the grower if planted in such a way that they are forced to head during hot weather, under those conditions the lettuce is said to "bolt" forming seed stocks instead of heads. Late summer plantings do not "bolt" quite so badly.
