HOW'S The Electric Company DOING?

Let's ask Henry Hamilton, Plant Manager
HARRINGTON STATION

"We're building this coal plant to offset the dwindling supply of natural gas, which has become very expensive. This way we hope to balance the lower cost of coal to offset the higher cost of gas..."

... just one of the things the electric company is doing to keep your electric service dependable. And, even though your electric bill may be somewhat higher these days, we think you want electricity ready when you need it.

The Future **IS** Electric!

Cook of Week

COOK OF THE WEEK--Mrs. Leslie (Phil) Earnshaw is a native of England and is in Stratford for about five weeks while her husband serves as pastor of the First United Methodist Church. Phil has a wide variety of interests, including hill walking, swimming, crocheting and knitting.

Here From England

We are honored this week in having the wife of Rev. Leslie Earnshaw of Taunton, England as our cook.

Phyllis, better known to all as Phil, is a native of England, having been born and raised in York, England. Both Phil and her husband, Leslie, are natives of York.

The Earnshaws met when they were about 15 years old

and married when they were 25 years of age. They will have been married for 32 years come September.

They have two sons, Michael John, and David Leslie. Both of the boys are married--the eldest, Michael, to a Florida born and bred girl. Michael is a Doctor of Philosophy living in Manchester, England and David teaches French and physical

education in Chester, England. Leslie and Phil have been in Stratford a little over two weeks having arrived here to serve as exchange pastor at the First United Methodist Church for about five weeks.

The Earnshaws were also in Florida in 1969 on an exchange of pastors.

Phil lists her favorite hobby as one that both the Earnshaws enjoy, that of hill and mountain walking. From listening to them, we find that their country is full of hills, mountains and bountiful beauty. They have walked many hours in the Swiss Alps, Austrian Alps and Northern Italian Alps.

In addition to doing lots of work in the church in Taunton, Phil also finds time to swim, knit, crochet, sew and read.

The Earnshaws have expressed their appreciation to all the kind people in Stratford and state that they are enjoying their visit to Texas very much.

Phil has given us four recipes--one from England, Yorkshire Cheese Cake; one from Scotland, Scotch Shortbread; a recipe from Wales, Welsh Cakes; and a family recipe, Coffee Surprise. We hope that all our readers will enjoy trying one of these fine recipes.

ENGLISH YORKSHIRE CHEESE CAKE

1/2 lb. cream cheese, curd cheese or cottage cheese
2 large eggs
2 oz. sugar
1/4 lb. currants
few drops of lemon juice to taste

Mix all ingredients together. Smooth into 1 inch deep pie plate, lined with shortcrust pastry and bake for 30-40 minutes at 350 degrees until filling is set.

SCOTCH SHORTBREAD

1/2 lb. plain flour
2 oz. margarine
2 oz. caster sugar
3 oz. butter

Rub margarine into flour. Add sugar and pinch of salt. Mix together with melted butter. Divide the dough into two parts. Flatten each piece to 1/2 inch thickness on baking sheet. Bake at 300 degrees for 30 minutes.

WELSH CAKES

1 lb. self-rising flour
8 oz. margarine
5 oz. sugar
2 eggs
3 oz. currants
a little milk if necessary

Cream margarine and sugar. Add currants. Mix with eggs, milk, flour into stiff dough. Roll out and cut into rounds. Bake on

a griddle, hot plate or heavy flat pan.

COFFEE SURPRISE

Line a 1 lb. loaf tin with slices of home-made sponge or bought sponge fingers.

3 oz. butter
4 oz. caster sugar
2 egg yolks
Cream butter and sugar and beat in egg yolks. Gradually add

1/4 pint cold black coffee, (made with 2 desert-spoonfuls of instant coffee and 1/4 pint water). Pour over sponge cake base and top with more sponge. Cover with paper. Press with heavy weight. Chill in refrigerator, seal and freeze. Unmold and cover with whipped cream and chopped nuts.

NOTE: Caster sugar is made by refining regular granulated sugar for several seconds in a blender.
