

Jim Johnson Is Fatally Wounded On Public Square

Bullet From .32 Automatic
Causes Death of
Citizen

Austin Bond Made

Met Austin, Charged With
Murder, Released On
\$5,000 Bond

Jim Johnson, 19-year-old citizen of Wellington, was shot to death on the public square in Wellington Sunday afternoon at about 2:30 o'clock. The shooting took place on the northwest corner of the square near Snell's store, a bullet from a .32 automatic pistol entering Johnson's right hip and traveling entirely through his body. He was rushed to the Wellington hospital in the Goodson ambulance, but died immediately after reaching the hospital without ever speaking. According to Sheriff Claude McKinney only one shot was fired. Sheriff McKinney reached the scene of the shooting before Johnson had been picked up. Met Austin, a local painter and paper hanger, was arrested immediately following the shooting and placed in the county jail here to await a preliminary hearing Monday morning.

Austin appeared before a court of inquiry at the courthouse late Monday morning at which time he was formally charged with murder by Sheriff McKinney and his bond placed at \$5,000. Eight witnesses to the shooting were examined in the court of inquiry by Sheriff McKinney, County Attorney Luther Gribble and Justice of the Peace P. W. Myers. Mr. Gribble stated Monday afternoon that the evidence disclosed that the killing grew out of a quarrel between Austin and Ray Riddle, a brother-in-law of the slain youth.

Austin waived examining trial and Monday afternoon was released on \$5,000 bond to appear before the grand jury here November 18. His case will probably come up for trial during the November term of district court to be held here.

Austin has lived in Collingsworth county for many years and is well known. He is about 45 years old, married and has five children. Johnson moved to Wellington about two years ago from Memphis, Texas, and for a time had been working for his brother-in-law in the operation of a restaurant here. He was married about a year ago to Miss Vicie Burkhalter of this city who is well known in Wellington, having attended school here many years.

Funeral services for Johnson were conducted in Wellington Monday afternoon at 2:30 from the First Methodist church with I. A. Smith officiating. Interment was made in the Wellington cemetery with Ray Goodson in charge of burial arrangements.

Johnson is survived by his mother, Mrs. J. S. Forkner of Memphis; his father, Ernest Johnson of Dallas; six sisters, who are Mrs. Frank Hommel of Clarendon, Mrs. Roy Scott of Memphis, Mrs. Namon Hardman of Wellington, Mrs. Joe Fennel of Wellington, Mrs. Hubert Green of Clarendon and Miss Myrtle Johnson of Memphis, and his wife, Mrs. Jim Johnson of Wellington.

Tom Bryant Will Open New Cafe

Tom Bryant has announced that his new cafe, located in the building formerly occupied by T. B. Starkey's store, will be opened to the public Saturday of this week, at which time the cafe will feature a home-cooked chicken dinner. The cafe will be known as the Pullman Cafe, and will be thoroughly modern in equipment and arrangement.

Mr. Bryant has had a great deal of experience in the cafe business, having been engaged in this work for several years. He was at one time in charge of the Welcome cafe in this city.

Look Out For A Stampede, Mr. Hoover!

Worth Your Attention

An Editorial

A proclamation has been issued by the mayor of Wellington which deserves the attention of every individual who possesses either personal pride or civic interest. Friday, June 21, has been designated as Clean-Up Day for the entire city, but little or nothing can be accomplished unless the campaign is entered into sincerely by people of Wellington. If every business man will clean-up his establishment, both inside and out, and if every home-owner will clear all weeds and trash from his premises, then our clean-up day will be a success. Without this cooperation, our clean-up day will be nothing more than a printed proclamation. Why not do your part tomorrow?

Few Recognize Rights of Boys

Boy Has Right to Opportunity for Developing Character

BY I. F. JOLLY
(Scout Executive)

The boy in any community has certain rights. We have not always recognized them perhaps as we should. He has a right to demand something of you and I—that we be honest, upright and moral, meet our obligations, and set an example for him. He has a right to an opportunity to develop character. Character is not inherent. It is built and is a product of environment and training. A bad boy is the result of mistreatment and mishandling. A boy has the right to an opportunity for the developing and training of character.

The elements of character are intelligence, temperament, skill and morality. We inherent a super-structure of intelligence upon which character is built. You cannot develop character in a baboon. But you treat a boy like a baboon and you have just about as much character as a baboon.

Therefore every boy has the right to expect of us intellectual training—the training that will enable him to go out and meet life's battles with an equal opportunity with every other boy. Our schools are doing a great work here.

Every boy has the right to expect to contribute in a way that will develop his temperament.

Open Air Meeting Church of Christ

Series of Meeting Will Be Conducted Beginning On June 20

Beginning Tuesday night, June 20, the Church of Christ, will conduct a series of open-air gospel meetings on north Childress street, north of the railroad tracks, according to announcements made to the public by W. R. Wolfrum, minister of the Church of Christ.

Services will begin promptly at 8:30 each night and will not last longer than one hour. The meetings are being held out of doors because of the extremely warm weather, and the public is extended an invitation from the pastor to attend these meetings. Minister Wolfrum will be in charge of the services each evening.

No collections will be taken at any of these meetings.

POWER SECRETARY

WASHINGTON, June 15.—Frank E. Bonner of Piedmont, California has been selected to succeed O. C. Merrill as executive secretary of the Federal Power Commission.

Secretary Good announced the selection Saturday in formally making public the commissioner's decision that it had jurisdiction in the Cumberland Falls, Ky., power development case.

Wellington Club Holding Top In Baseball League

Mangum and Lone Wolf Tied for Second Place O.T. League

Wellington is now holding the top position in the Oklahoma-Texas baseball league, having forged ahead of five Oklahoma towns to roll up a percentage of .667 while Lone Wolf and Mangum were tied before Wednesday for second place.

Wellington played the Sayre nine at Wellington Wednesday of this week, but the game had not ended at press time.

The locals will play at Lone Wolf Sunday, June 23 and Cordell will play at Wellington next Wednesday, June 26. Wellington will return the Cordell game Sunday, June 30, and this will end the first half of the O-T schedule. Wellington has a most favorable chance to win the first half of the league schedule.

Wednesday, June 12, Wellington played at Sayre, winning the game by one point 7-6. The score was tied in the eighth inning but Wellington managed to run in an additional score late in the ninth to win. Sayre made ten errors in this game, some of which were costly to the Oklahoma club, since they had eight hits and Wellington was credited with only six hits. McKenna, Andree and Newman each hit twice. Wellington erred four times, two going to McMahon and one each to Newman and Holland. Batteries for Wellington were McDuffey and Holland; for Sayre, Markham and Dewey. Markham

Collingsworth Will Have Fair

Many Bankers of Five States at Childress Meet

Twenty-Fifth Annual Convention of Panhandle Bankers Is Held

Fires Is Speaker

Judge A. J. Fires, Pioneer Banker, Delivers Welcome Address

Bankers from Kansas, Missouri, Oklahoma, New Mexico and all parts of Texas were gathered at the Hotel Childress Monday and Tuesday for the Twenty-fifth Annual convention of the Panhandle Bankers' association. Judge A. J. Fires, pioneer Childress county banker, delivered the address of welcome to the delegates.

Picturing briefly the history of banking in the Panhandle, Judge Fires told the organization of the First National bank in the Panhandle. "Now we are facing a new era," he told those who were present for the opening session, "I see a younger generation of bankers, men who have been trained by those pioneers of the early days, some of whom have already claimed their rewards."

W. C. Dickey, president of the Hall County National bank, Memphis, responded to the welcome by Judge Fires. He was followed on the program by J. H. Read, president of the Panhandle Bankers' association, and vice-president of the Hall County National bank.

President Read advocated in his address to the bankers, a program educating the citizens of this state as to the real meaning of taxation and sound industrial promotion in communities guided by the advice of the banker.

"A banker is measured by his usefulness to a community," Mr. Read stated. "He should be interested in all civic moves, and work for the welfare of his customers. All public problems should gain his attention."

James Shaw, commissioner of banking in Texas, was also one of the morning speakers. Declaring that the banker was a vital cog in the progress of any community, he urged that those who were present should strive to better themselves in order to serve their communities in a more profitable manner. The head of a financial institution should guard the resources of a community; he should act as an advisor to his associates and should weigh and determine all propositions of weight, Mr. Shaw stated.

"Bank failures are disastrous to a town or community. They work hardships on the customers and bring a general depression on the places in which they occur," Mr. Shaw told his fellow bankers. "It is then up to you to keep your people out of financial difficulties and to conduct your banks with sound conservative business methods."

The selection of Amarillo as the next meeting place for the Panhandle Bankers' association, the adoption of a resolution backing Amarillo in her efforts to obtain a branch bank of the Federal Reserve, and the election of officers were the high lights of the final session Tuesday.

Following an invitation from W. H. Fuqua, president of the First National bank of Amarillo, who has been one of the leaders in the move to secure a branch bank of

Stinson Buys Fine Jersey Cows

According to information received this week from C. C. Stinson, county agent of Collingsworth county who for the past several days has been in Kansas and Missouri buying dairy cattle for breeders of Collingsworth county, he will return to Wellington either Thursday or Friday of this week with a load of fine cattle.

Mr. Stinson's communication from Iola, Kansas, indicated that it might not be necessary for him

to go to Carthage, Missouri in order to complete his buying. He stated that he had bought two splendid Guernsey calves for Oscar and Jack Wells, as well as four good Jersey bulls for the second bull circle which was recently organized in Collingsworth county. Mr. Stinson also gave the information that he had purchased a good Holstein bull for Ray Walker, as well as ten Jersey heifers for club boys of this county.

Mr. Stinson indicated that he

Receives Degree

Miss Margaret Puryear of Wellington who was recently awarded her B. A. degree at the University of Oklahoma.

Margaret Puryear Receives Degree At Oklahoma U.

Daughter of Mr. and Mrs. J. E. Puryear of Collingsworth County

Miss Margaret Puryear, daughter of Mr. and Mrs. J. E. Puryear of Collingsworth county, returned from Norman, Oklahoma, to her home in Wellington last week to spend the summer with her parents. Miss Puryear received a B. A. degree in the 37th annual commencement exercises at the University of Oklahoma June 4. The commencement address was given by J. H. Kirkland, chancellor of Vanderbilt university, after which W. B. Bizzell, president of the University of Oklahoma, conferred 843 degrees.

The class of '29 of which Miss Puryear was a member was the largest degree class in the history of the Oklahoma institution, and the first Ph. D. ever given from this university was granted to a member of this class, which had representatives from practically every state in the United States as well as from several foreign countries.

Former Agent Is Recently Married

Miss Altee Smith, former home demonstration agent of Collingsworth county and the second agent ever employed in this county, was married June 8 to Armour Vilroy Baldwin at El Campo, according to announcements received in Wellington this week.

Miss Smith began her extension work in Collingsworth county in 1922, leaving here after one and half years to become home agent in Galveston county from which position she was promoted to the extension staff, serving since as district home demonstration agent in southwest Texas for the past two years.

Mr. Baldwin is a plantation owner in Fort Bend county where they will make their home. Their address will be Beasley, Texas.

Miss Smith is a graduate of Sam Houston State Teachers college and taught in the schools of Beaumont and Laredo before entering the extension service.

Fair Association Announces Dates September 12-14

All Plans for Exposition
Now Being Planned
By Directors

Catalogs Out Soon

Fair Catalogs Will Be Issued and Ready For Public in July

Collingsworth county's first community owned fair will be held on September 12, 13 and 14. At a meeting of the officers and directors last Tuesday evening, preliminary plans were announced. W. H. Goforth was selected as manager and Jack Knight was elected secretary and treasurer.

The fair grounds are now owned by the county and city jointly and two commissioners and two aldermen act as directors of the fair association. The directors are Pink Sullivan, J. E. Mattox, John E. Jones, and R. H. Templeton. C. W. Roberts is president.

Preparations for the fair have already been started by W. H. Goforth in order to give the various communities plenty of time to get their exhibits lined up over a month before the fair starts. The catalogs will be issued to the public during the latter part of July, giving the exhibitors part of July, all of August and part of September in which to plan and prepare the exhibits which they will show.

Full details of the entertainment have not been worked out, but Mr. Goforth is emphatic in stating that the entertainment program will far surpass that offered in any other previous years. Further information on the entertainment will be available at an early date.

Mrs. Bly Horn to Be Buried Today

Mrs. Bly Horn, perhaps better known in Wellington as Mrs. Lyndall Robinson Horn, died at Canyon Wednesday morning, June 19, at 1 o'clock, and will be buried in the Wellington cemetery Thursday, June 20, at 11 a. m. Funeral services will be conducted from the First Methodist church by I. A. Smith.

Mrs. Horn was born April 1, 1903, at Copel, Texas, but moved to Wellington with her parents while in her infancy and was reared in Collingsworth county. Practically all her education was received in Wellington schools and she was well known to the entire citizenship.

For the past twelve months she had been in declining health. She was confined to her bed in a Sanatorium hospital for a while, but her last days were spent at the home of her parents in Canyon.

Her husband, Bly Horn, preceded her in death by about one year. He died at Tucson, Arizona, but the remains were returned to Wellington. His wife will be buried beside him today.

Mrs. Horn is survived by her parents, Mr. and Mrs. R. W. Robinson of Canyon; four brothers who are Pat Robinson of Canyon, Buddy Robinson of Brawley, California, Jack Robinson of Canyon and S. L. Robinson of Canyon; and by two sisters who are Miss Zelma Robinson of Canyon and Mrs. W. A. Cook, jr., of Wellington. Her grandmother, Mrs. Sue Stansell of Wellington also survives.

County Federation Of Women's Clubs Will Hold Meeting

Announcement has been made by Miss Katherine Boverie that the county federation of women's clubs will hold its regular quarterly meeting Saturday, July 6, the program to be announced. Members of the county federation are requested to remember the date and to watch for announcements regarding the meeting.

Heat Operation For Automobiles Difficult Work

Automotive Engineers Accomplish Task In Controlling Heat

Heating a room to suit the various temperature preferences of a mixed group consisting of Eskimos, Arabs, Icelanders and Fiji Islanders would seem an easy task compared to maintaining the temperatures of different parts of an automobile engine at the most efficient point. Yet this is what automotive engineers are called upon to accomplish, according to V. A. Watts of the Watts Bros. Oldsmobile company of Wellington.

The greatest heat is generated around the combustion chamber, valves, piston head and top of cylinder where the gasoline vapor burns at a high temperature. The cooling system at this point must be so designed that the engine can be warmed up quickly; yet kept from getting too hot regardless of how fast it is operated. The same cooling system must be so designed that the lower portions of the cylinder, where there is no such action to generate heat, will be kept moderately hot.

Oldsmobile engineers who designed the new Viking, the 90-degree, V-type eight cylinder companion car to the Oldsmobile Six, devoted much thought to the cooling system. They were not satisfied until they had a system which would permit quick starting warm-up and efficient engine operation in below zero temperature as well as perform perfectly when the engine was driven at high speeds in mid-summer heat.

The cooling agency is water pumped from the radiator to each of the two blocks of cylinders which form the V-eight engine. The water is forced through a manifold extending the length of each block and fitted with graduated outlets which correctly meter out the amount of water distributed to the points of greatest heat. These are the cylinder walls, valves, valve stem guides and combustion chambers, all of which are water-jacketed to permit rapid

Fly High Over Chicago

Here's a tip to aviators—fly high over Chicago! Pilot Rickard W. Pears is shown pointing to the damage done to his Fairchild cabin monoplane by a load of buckshot and slugs as she was flying over Cicero, gangsters' stronghold and suburb of Chicago. Pears was unable to explain whether the shot was fired at his plane intentionally or was a shot that went wild.

heat dissipation.

The water spaces in the Viking engine extend far down on the crankcase wall and assist in cooling the lubricating oil. The movement of the water in these lower spaces is slower and is controlled by heat connection so that it is kept at an even temperature while the engine is operating.

The water is returned to the radiator where it is cooled while passing down through the radiator core. Automatic radiator shutters thermostatically controlled are standard equipment. This feature is of value in quickly bringing and holding the engine to a proper operating temperature, particularly when first starting and during extremely cold weather.

The Viking cooling system was tested throughout the entire temperature range which any automobile would be called to face before it was finally approved by the engineers.

As an additional service to dri-

vers, the exact temperature of the engine is registered on a dial located on the instrument panel and connected with a thermometer embodied in the cylinder block. This dial not only shows the engine temperature, but indicates the proper temperature when idling and driving.

MUCH BUILDING

Winkis building for the future and assuming more substantial proportions. Some of the latest accomplishments of the group of young men who have formed a chamber of commerce is the securing of a new Vitaphone theatre and the construction of a \$225,000 school building with an auditorium seating capacity of 650.

Alfalfa hay should not be put in the barn too green, as it is likely to heat and in extreme cases to burn.

Clean-up Campaign At Clarendon Is Making Progress

The citizens of the city of Clarendon are taking great pride in their premises these past few weeks and the list of those with trash piles to be removed is growing. Mayor Taylor states that he is inaugurating a new plan to be continued through the entire year of hauling trash whenever a load is ready. All the officials of the city ask is that they be notified of the location of such a pile and the wagon will call for it.

In addition to hauling trash, the city has men working on the borders of the ditch, cutting weeds and making the sides of these places as clean as possible in order to allow excess waters to pass out of the city with little effort. Mayor Taylor is placing especial emphasis on the cleaning of vacant lots that are adjacent to improved property. There are a number of these in the city, with the owners living for the most part in other towns. The city is especially desirous that these be given attention and cleaned of their accumulation of weeds and trash. Marshal Pyle stated that he made a trip to some neighboring towns

Reports Indicate Childress Gasser

Childress County has a gasser, if an official report for the gas and oil division of the State Rail Road Commission can be taken as authoritative.

The report came in the form of and that the appearance of Clarendon was far ahead of those he visited. He stated that there was room for improvement in Clarendon, but that the citizens of this city were far ahead of those in the towns he had visited.

an Associated Press story listing the producers and gassers brought in during the month of May. One gasser was listed for Childress County.

The well mentioned is thought by those acquainted with the oil situation here to be the Texas well which was plugged a few weeks ago, as the Sun well is in Cottle County.

"There is gas in the Texas well," C. C. Adams, who has visited there recently stated yesterday. "Several men have been there and have heard it 'wheezing'."

The Texas well was closed down and plugged recently when 3,000 feet of casing was left in the hole Mr. Adams said.

Reduction in Electrical Rates

Lower rates for electricity for domestic and commercial purposes have been made voluntarily by the West Texas Utilities company. The cost per kilowatt-hour has been reduced and the number of kilowatt-hours in each block before the next lower rate applies has been lessened. Based on the number of rooms in residences the new rate gives the small householder the same advantages of a lowering scale, as consumption increases, that larger users enjoy. The new rate enables consumers to make economical use of the many convenient and labor-saving electrical appliances.

The New Rate for Residences

- 12 CENTS per kilowatt hour for first four kilowatt-hours used per room per month.
 - 9 CENTS per kilowatt-hour for next four kilowatt-hours used per room per month.
 - 5 CENTS per kilowatt-hour for all energy used in excess of the above amount.
- (Minimum Monthly Bill \$1.50 per Month)

Determination of Number of Rooms

The room count is based upon the ordinary real estate rating, and in making the count, alcoves, unfurnished attics, bathrooms, cellars, hallways, laundries, closets, pantries, open porches, garages, barns and outbuildings will not be counted. Premises with less than three rooms, real estate rating will be classed, will be classed as 3-room premises; those with more than seven rooms will be rated as 7-room premises. THE NUMBER OF OUTLETS AND APPLIANCES DO NOT EFFECT THE RATE.

Table Showing the New Net Rate and Number of Kilowatt-Hours In Each Step

Size of Residence	First step 12 Cents per kilowatt-hour for FIRST	Second step 9 Cents per kilowatt-hour for NEXT	Third Step the NEW FIVE CENT RATE
3 Rooms or less	12 kilowatt Hours	12 Kilowatt Hours	5 CENTS For all kilowatt-hours used each month over total of first and second steps, per kilowatt-hour
4 Rooms	16 Kilowatt Hours	16 Kilowatt Hours	
5 Rooms	20 Kilowatt Hours	20 Kilowatt Hours	
6 Rooms	24 Kilowatt Hours	24 Kilowatt Hours	
7 Rooms or more	28 Kilowatt Hours	28 Kilowatt Hours	

(You will note how few kilowatt-hours per month need be used before you reach the new low five cent rate)

COMMERCIAL RATE

12 CENTS net per kilowatt-hour for the first 45 hours of maximum demand.
10 CENTS net per kilowatt hour for the next 45 hours of maximum demand.
5 CENTS net per kilowatt-hour for all energy used in excess of the above amount.
The new rate makes liberal use of electricity for all purposes in commercial establishments inexpensive. Minimum Monthly Bill \$1.50 per Meter.
(Further explanation of rates will be gladly given upon request.)

Mankins Worker Praises Orgatone

"I've Gained 10 Pounds And Feel Better Than In Years," He Says

"I have taken two bottles of Orgatone and have actually gained 10 pounds," was the statement made by Mr. J. C. Shugart, living in Mankins, Texas, a local oil field worker there.

"I had lost a lot of weight and if you had seen me the day I started taking Orgatone, you wouldn't take me for the same man now. I began having troubles with my stomach several years ago," he continued, "and nothing I have ever taken did me any good. I was in a very weak and run-down condition and did not have any appetite at all, and what little I did eat, I just forced myself to do so to keep me going. I didn't rest at all of a night and food would sour on my stomach, and wouldn't digest. I was constipated and was gradually losing what strength and energy I did have."

"Orgatone was advertised so highly and I knew several of the people who had taken it and thought it wouldn't do me any harm, so I got a bottle. It was a very lucky day for me. I eat anything I can buy, and sleep and rest fine. I'm glad I bought Orgatone for it has certainly been worth a lot more to me than it costs. I've taken a lot of medicine but Orgatone has done the work for me. I feel like a different person and look it, too. I am glad to say what I can for this medicine and anyone would not be making a mistake to take it, if they suffer as I did."

Genuine Orgatone may be obtained at Wellington by the Palace Drug Company.

Shamrock Paper In New Building

The Shamrock Texan, located for 20 years in the frame building 308 North Main, moved into its new brick home at 405 North Main, the first door North of the First Baptist church, last week.

The Texan home is one of the finest in the Panhandle, being especially designed to meet the needs of a newspaper. It was planned by Ted Bones, one of the owners of The Texan, and was built by Blake and Blake, Shamrock contractors.

The front office will be occupied by editorial, advertising, and business departments and will be cut off from the mechanical department. Special features are a darkened stock room where paper stock may be well preserved, a stereotyping department which is shut off from the rest of the shop and a dressing room equipped with a shower. A large skylight in the center and factory windows on the south and west sides will furnish plenty of light.

Mr. and Mrs. Joe Fuller and small daughter, and Mrs. J. A. Askey and Mrs. Helm visited in Childress Sunday.

To Avoid Mistakes at the Bathing Beaches

Young men who go to the beaches seeking romance would make no mistake if the girls would wear the insignia shown on the five beach girls above. In the picture are five Springfield, Pa., misses, with labels, left to right: Mlle. Mendez, wedding ring, married; Elsie Craig, broke nengagement; Helen Reletto, broken wedding ring signifying divorce; Eleanor Halloway, plain heart, single and free; Bertha Leux, pierced heart, engaged.

Subscriptions To Wellington Leader Are Still Coming

Subscriptions to The Wellington Leader are still coming in every week, including new and renewal orders. Subscriptions which have been taken at this office during the past two weeks include the following:

Mrs. H. P. Thomas, Noel Cudd, H. Fourmentin, Frank Shields, A. L. Nowlin, L. W. Harrison, C. S. Kesler, E. L. Wilson, Jr., D. W. Thompson, B. A. Peoples, G. L. Farrar, A. E. Watson, Leslie Woolridge, G. Rummel, W. S. James, Bert Miller, J. W. Langford, Joe Beard, O. L. Porter, S. C. Tipton, T. W. Fuller, L. A. Smith, A. R. Hargraves, D. W. Harrell, B. J. McKenna, Mrs. J. B. McMahon, and Fred Patterson.

J. Claude Wells of Memphis was in town Friday transacting business and visiting relatives and friends.

Mr. and Mrs. S. T. Smith of Arlington, were the guests of their son, A. B. Smith and family the past week.

George Spann went to Wichita Falls last week-end on a business trip.

Memphis Fair Dates Are Set

Actual work in preparation for the Hall County District Fair got underway Thursday night of last week, when directors of the organization met at the chamber of commerce to lay plans for this year's edition of the annual exposition. According to George A. Sager, secretary of the fair association, it is desired to have the work started earlier this year than is generally the case, in order that the few weeks prior to the opening of the fair may not result in any confusion.

September 10 to 13 have been decided upon as the dates for the exposition this year. Department heads were selected at the meeting Thursday night and the fair fully organized. It is hoped to have the annual catalog, containing the list of premiums and other information pertinent to the fair, ready early in July, in order that communities may begin work in planning their exhibits.

Mrs. C. E. McKinney and brother, Darwin Nix, left Thursday for points in Colorado, Arizona, Montana and other places of interest for an extended vacation.

Luther Dobbs And Stella Archer Are Married Recently

Announcement has been made in Wellington of the marriage of Luther Dobbs to Miss Stella Archer which was solemnized at San Angelo Sunday June 2.

Both of the contracting parties are well known in Wellington where they formerly resided. Miss Archer was head of the home economics department of the Wellington high school during the 1926-27 and 1927-28 terms of school. She was a splendid instructor and won many friends during the time she lived in this city.

Mr. Dobbs was formerly an employe of The Collingsworth Standard, where he worked in the mechanical department for several years. He gave up his work in Wellington more than a year ago and moved to San Angelo where he has been employed since that time.

Mr. and Mrs. C. W. Fritts of Plymouth were in town Saturday shopping and transacting business.

Mrs. Jewel Nowlin and son, Reece, and W. W. Clark spent last week-end in Dallas visiting her sister and father.

Marriage Ideas In New Picture

The problem of the woman whose life is a constant search for happiness in marriage is exemplified in "Marriage by Contract," the John M. Stahl special production featuring Patsy Ruth Miller and Lawrence Gray which is the attraction coming to the Ritz theatre on Saturday, June 22.

Edward Clark's story concerns the successive marriage on the so-called companionate or contract basis, for a year's trial, of a typical American boy and girl. Their first disagreement breaks up their contract and the boy marries again immediately afterwards. The girl has disagreeable experiences with men who seem to regard her companionate theories as condoning unconventionalities. After several years she marries a self-made man, the contract to hold for two years and to be renewed or dissolved at the end of that time.

This time she decides she would like to renew their marriage and have a real home and children, but the man, complimenting her roughly on having been a fine pal, decides he prefers to end it. Her return to her parents' home is further embittered by the knowledge that their finances make her presence an embarrassment, and so she marries a wealthy man twenty years her senior, only to leave him at the entreaty of a gigolo. The gigolo's affection wanes when he learns he has spent all the money her last husband settled on her.

A surprise climax is said to round out a story of exceptional entertainment. James Flood directed "Marriage by Contract" and the cast besides the featured players includes such well known names as Robert Edeson, Shiley Palmer, Ralph Emerson, John St. Polis, Claime McDowell, Ruby Lafayette,

Mr. and Mrs. Elmer Willingham of Hollis were in Wellington Friday to attend the Kiwanis banquet.

Miss Evelyn Rogers of Vernon is the guest this week of Mr. and Mrs. Ben Boston and Mr. and Mrs. S. R. Pinkston.

J. B. Robinson of Quail was a business visitor in Wellington Saturday.

Mr. and Mrs. Carlos Grissom of Memphis were the guests Sunday of T. M. Little.

Every Driving Convenience
Every Provision for Comfort
Oldsmobile is

**RESTFUL
TO DRIVE**

Not only does this finer Oldsmobile give you brilliant all-round performance—not only does it combine exceptional speed, power, and acceleration with stamina, long life, and economy of operation—but it is wonderfully restful to drive, no matter how long you remain at the wheel.

Come prove it yourself. Take an Oldsmobile for a trial drive. Make your own tests and comparisons.

Relax in the comfortable, deep-cushioned driver's seat. It is instantly adjustable to the most natural position for your height. The steering wheel, too, may be adjusted to suit your individual preference. Gear-shift, starter, clutch, and brake are easy to reach and easy to operate. Instruments are conveniently arranged on the dash.

Drive through traffic. Note how Oldsmobile's flashing getaway and quick response to the

controls simplify city driving—how fingertip steering and a short turning radius make parking easy, even in small spaces.

Try it on the open highway. Observe how Oldsmobile's smoothness, quietness and, splendid roadability permit restful relaxation at any speed. Test its swift, sure acceleration, its remarkable handling ease, its powerful four-wheel brakes. Drive over rough roads and see how four Lovejoy hydraulic shock absorbers cushion your ride.

Then, when you know what Oldsmobile can do, and how it does it, compare it with other cars. You'll find that Oldsmobile gives you every driving luxury—every desirable convenience—every provision for comfort. That's why it is so restful to drive. That's why it is unsurpassed in value at its low price.

WHITE MAN'S COUNTRY

This is a free land and I intend to keep on writing about what I think. As a citizen entitled to my own opinion, I do not plan to stomach the precedent the Hoovers have established in Washington.

As to the Hoover Democrat I have no criticism and never have had. Those who voted for Hoover, regardless of their previous party affiliations, were honest and conscientious about it. They exercised their privilege of citizenship and above everything else regular Democrats and the erstwhile Democrats should get together.

The biggest enemies of the Democratic party right now are not the erstwhile Hoover Democrats but those "regulars" who seek to humiliate and to punish the Hoover Democrats. It's terrible, in my opinion. Above everything else there should be harmony in the Democratic party. If it cannot be brought about we might as well turn stock and barrel.

This is a white man's country. I refer to the entire United States. The white people are in a large majority and regardless of President Hoover and the politicians in the North there will be no social equality.

The recognition given that negroes in the White House has not helped the negro race. Instead it has made their problems more difficult and has intensified the bitterness that now exists. The large majority of the white people have no intention of accepting social equality with the negroes.

The lot of the negroes is hard and they can best help themselves by establishing culture and social contacts among themselves instead of trying to shove themselves into white circles. There have been awful and terrible riots in this country and Congressman DePriest and his type are storing up trouble for their own race. They are encouraging others of their race. They are encouraging others of their race to become more bold; they are inflaming the white men who will go to any extremes to prevent the advent of a day when there will be an intermingling of the races.—Gene Howe in Amarillo News.

SHORTWEIGHT GASOLINE

Last year shortweight in gasoline cost American motorists \$20,000,000, according to E. N. Smith general manager of the American Automobile Association who spoke recently before the national conference on weights and measures at Washington. He declared that shortweight had been established one-sixth of all gasoline sales, the shortage of course, varying.

Mr. Smith asserted that the American petroleum code adopted last year by gasoline wholesalers is no remedy for shortweight in the retail trade. In fact, he criticized the industry for not exhibiting greater concern with this factor in the gasoline business, and in behalf of the association of automobile owners of which he is general manager suggested three measures of protection of the consumer. The first involves more stringent state laws on weights and measures where the present laws are weak. The second recommendation is a revision of state and local enforcement machinery "with a personnel able to administer the law," and the third proposal is of an increase in state enforcement appropriations by Legislatures to enable its officers to enforce the laws.

The difficulty perhaps is neither so great nor so hard of solution as Mr. Smith indicates. The measures he recommends, with the exception of the first carry a threat of increasing taxes, a threat which should cause motorists pause. It is probable that already there is a trend in course which soon will curb much if not all the ill. Obviously regular inspection of gasoline measuring devices is essential with penalties for proved fraud. But unless we are to charge that a whole industry is essentially tainted with brigandage, we must believe that the increasing competition in the retail sale of gasoline will result in forcing out the crooked dealer who seeks to increase his profits by tampering with his pump.

Fort Worth Star-Telegram.

TEXAS & TEXANS

By Wall H. Mayes

STATE HIGHWAY FUNDS

The Texas highway department has spent about \$80,000,000 during the 29 months of the Moody administration and has spent about \$15,000,000 more available. The average taxpayer feels that even \$3,000,000 a month is more than a commission that does not stay in session regularly and that is not composed of expert road builders can spend judiciously over a territory as large as Texas. For that reason there is strong opposition to any proposition for increasing highway revenues. Especially are the people opposed to a huge bond issue, and it is an expensive waste of time to submit such a measure to the vote of the people. Texans want good roads and want those they have well maintained, but they are becoming shy of heavy taxes and larger bond issues.

COLORADO RIVER POWER PROJECT

There are reports afloat that the Syndicate Power company expects an early date to close negotiations for the building of the proposed dams on the Colorado river above Austin. The transaction is said to be in abeyance pending the legislative session. If matters are so settled that priority rights will be given for domestic and irrigation uses Texas people will welcome the Colorado river development to the fullest extent possible.

Doubtless among the earliest results of Syndicate power activities will be the completion of the Marble Falls cotton mill, which is being delayed because of the river water controversy. The proposed cotton mill has an ideal location and when it is in operation will make Marble Falls one of the busiest little cities of Texas.

GIVING AWAY COWS

To encourage the development of the dairy industry the chamber of commerce at Hubbard City has arranged to give away a registered Jersey cow to some neighborhood farmer once each month. The merchants will have a monthly "Trades Day" on which special bargains will be offered and a cow will be given away that day. While that is a valuable gift, the cost will be light upon each of the merchants. Think of the valuable advertising that will result and the crowds that will be drawn to Hubbard City.

PLAINS CHEESE FACTORY

Abernathy is in what was once known as the longhorn cow country, where cattlemen thought that milking cows was too small a business to be considered except by "poor farmers" of other sections. But that enterprising town of the South plains country would have the world know now that it has a cheese factory and is making a strong bid for milk with which to keep it on constant operation. The development of the dairy industry in the Panhandle section of Texas in the last few years has been a great surprise even to the people who have brought it about.

SMALL HOTELS PAY

When they are properly conducted small hotels in towns near larger cities of Texas pay well. Georgetown has lost much business to Austin in the last few years because of lack of hotel facilities, but has contracted for a modern hotel of a kind good enough to hold the commercial trade overnight that has been going into Austin. Burnett is another town that will no longer suffer for hotel facilities, as its new hotel is completed and will soon be in operation. The Rogers hotel at San Marcos has been open only a short while but has all the business it can well handle. Many travelers prefer the small-town hotels.

AUSTIN LACKS HOTEL ROOM

A contractor who has to visit Austin frequently on road business writes this columnist to say that while it is all right to prod the state to erect an office building large enough to keep people who have business with state officials from having to stand out in the rain and cold, there is as great a need for places in which visitors can sleep comfortably, and that Austin needs more hotel rooms. Austin can take care of the ordinary run of business travel, but when the legislature is in session, the university has a commencement, and the highway commission meets, all at the same time there are just not enough rooms for the crowds. That will soon be overcome, however, for plans are under way to double Austin's hotel facilities in the next two years.

PLEASING LETTER WRITER

Once in a while, but not often, this columnist gets a kick from some reader who does not agree with him, but he seldom gets a letter like that received from Editor Chamberlain of the Burnet Bulletin recently. He enclosed a blank check signed, with instructions to fill it in for whatever the columnist thinks he owes. To that he adds: "I think your matter very valuable to all country papers and I expect to continue using it as long as it is furnished." Letters like that warm a fellow's heart, as well as helping to meet the monthly bills. It is recommended as a model for subscribers in paying subscriptions to their papers. If you do not write it, tell the editor as much when you pay your bill and watch him smile.

HOMER WADE RESIGNS

Texas business interests are going to miss Homer D. Wade who resigns the position as manager of the West Texas chamber of commerce to become manager of the Dallas chamber. One may not always agree with Homer Wade—no one could with a man who does so many things as Wade does—but every one admires him for his untiring activity and boldness in fighting for what he thinks is right. He has been a great factor in building up West Texas and has been a help to the entire state, for his energy and efforts have been reflected in every Texas community. It will be hard to find a man to fill his place as well as he has done, and especially to find one who knows as much about the needs of every part of the territory covered by his organization.

Great American Home

Press Clips

It is related, in all seriousness, that a hunter recently shot a horse mistaking it for a rabbit. Persons owning elephants are hereby warned to keep their pets in the house when this guy goes gunning for cats.—Clyde Warwick in Canyon News.

The modern tendency of government to set up bureaus and commissions and indulge in expensive luxuries at popular expense has resulted in causing a tax burden which grows steadily more heavy.—J. A. Neill in Briscoe County News.

It's surprising how much can be accomplished in any town where a few men work together.—Fred Landers in Estelline News.

Working one's way through school may not be easy, but it beats working poor old dad for the money.—L. D. Shaw in Higgins News.

Now it has developed that Hoover and the senate are unable to agree. With the last named executive, the debenture has caused the rupture. Presidents Wilson and Coolidge found the senate stubborn and Hoover is no exception. Verily, it seems that the senate is demonstrating its independence of the president.—Carl Gallagher in Quana Tribune-Chief.

Some of our local citizens are going to have to keep close watch on their weed crops. They are going to do all right just as long as the rains continue, but when it turns off dry, they are going to suffer. They are entirely too thick for a city of this size.—J. D. Meriman, Jr., in Panhandle Herald.

We are for the fellows who have the nerve and willingness to drop everything at a second's notice and give the best that is in them to protect the homes and property of Eldorado from fire, day or night, rain or shine, hot or cold.—S. A. Cook in Eldorado Courier.

More building means more employment, better working and living conditions in the greater building trade, a greater volume of freight traffic and hauling, a more impressive array of homes, and a more permanent city as those living under satisfactory conditions move to better homes.—Olin Hinkle in Pampa News.

Once America's pride, "the little red school house," with its barn like shingle roof and primitive equipment, is slowly but surely passing. More than 10,000 of these small districts were abandoned in the last five years, their places being taken by modern consolidated schools.—Bob Bennett in Kerrville Mountain Sun.

Death and taxes aren't the only sure things. There's the magazine salesman who tells you he wants to win a chance to go to college.—Thos. T. Waggoner in Claude News.

Now that the old theory that trees, flowers and shrubs will not grow in Floyd county has been so thoroughly exploded by so many and different people who have various and sundry kinds of shrubs, trees, flowers growing about them to beautify their surroundings and intensify the pleasure of living, it is well that the rest of us awake to the possibilities of adding our efforts along this line.—Homer Steen in Floyd County Hesperian.

One writer has made the broad statement that all experiment has been taken from flying and that it is the safest, fastest and best mode of travel today.—E. A. Carlock in Paducah Post.

Hereafter when Colonel Lindbergh uses the pronoun "We" he won't be meaning himself and the Spirit of St. Louis.—Sam A. Roberts in Haskell Free Press.

Texas has surpassed Ohio as the leading Jersey cattle state in the union. Hale county within the past few years has surpassed all other counties of the state in the per cent of increase of Jersey cows and today is looked upon as one of the best counties to secure high bred foundation stock for the further advance of the dairy increase.—E. Q. Perry in Plainview News.

The subject of farm relief is a live one today. It has been for several years past. We anticipate when a method of farm relief is finally worked out it will be entirely different than any proposed by the politicians.—Mack Stanton in Clovis News-Journal.

DECK'S Didactics

By H. D. W.

The Mayor has designated Friday, June 21 as Clean-Up Day in Wellington. It may not produce much tangible results, but it will call attention for the need of such a day. The process of cleaning up a town is one that takes more than a day. The process of cleaning up day on which to start the work is worthwhile. Clean-Up day should have the entire cooperation of every person in Wellington.

I pay a colored boy to keep my lawn, and then I have to spend about two hours every afternoon working on it to keep it even decent, but it is gradually becoming more attractive. Two years ago, I had a first class gravel patch, and now it is a lawn and has some shrubs, but it has taken lots of water and some work to get it that way.

Folks, here is the lowdown on the bankers. Last Monday every bank in Wellington closed up. The signs on their doors said they were attending the bankers convention in Childress. However, a check up on the banks showed that two of the younger members of the First National bank were the only ones who went to Childress, and it is understood that these young men went to fill dates with two Childress flappers. I have always suspected that bankers were like that, but this is the first time I ever got definite proof.

Wednesday was Emancipation Day, and it came at a rather appropriate time. Appropriate in that it will remind the Hoovers that the bitter pill they have had to take in the entertainment of Mrs. De Priest by the wife of the president. Not only is it gall and wormwood to these people of the south, but it is also probable that it does not sit so well with President Hoover. He is finding that the prejudices which he welcomed during the campaign may also turn against. Prejudice looked like a soaring eagle when it carried him to victory last November, but now that it has come home to roost he knows it is a vulture.

September 12, 13 and 14 has been selected as the time for the Collingsworth County fair. The fair grounds now belong to Collingsworth county and the city of Wellington. In short the fair belongs to every tax payer in this county, and it should be called "our county fair" for that is really what it is. It can be made to promote the agricultural and livestock interests of this county in a wonderful degree providing that every community gives it the proper cooperation.

There is talk now that the Katy and the Santa Fe will contest the right of the Denver and the Rock Island to build through this territory. The section in which we live is developing more rapidly than any other part of Texas. In fact, it has grown six times as fast as the state during the past few years. The railroads have concrete figures showing this development and they want to get the business that such a flourishing section affords.

The new sized currency is being put on display at the banks all over the country. The reduction in size doesn't worry us half as much as getting hold of some of the money. We would not care if it was the size of a postage stamp if we had a hat full.—T. L. Rouse in Vernon Times.

With much that the philosophers have to say in the newspaper columns about contentment, one may be at variance; one may deny that the man who has attained greatness in business, politics, or profession is any more competent than another to define the steps by which that success was attained, but each of us can see the beautiful truth and the gratifying consolation of the practice of such tolerance.—Merkel Mail.

Carl Saye of Clarendon is in Wellington this week in charge of the Little Mercantile store in the absence of T. M. Little.

Mrs. Chas. Jackson is spending her vacation in the home of her parents in Grandbury, Texas.

Mr. and Mrs. W. H. Vaughan were in Wellington Saturday attending to business matters and visiting friends.

Miss Lola Ricketts returned home from Abilene last week after attending school there the past term.

Mr. and Mrs. Henry West of Dodsonville were in Wellington Saturday transacting business.

SOCIETY

By MRS. DESKINS WELLS
Phone 16

C. L. Geesey Entertains T. Association

Mrs. C. L. Geesey, chairman of the East Ward school entertained the officers and chairmen of the different committees, with a delicious luncheon on Tuesday, June 11 at her beautiful country home south of Wellington.

A membership drive was planned and it is our hope that this will be accomplished before our coming school term and that each parent will be enlisted. Parents who have children attending school in the different wards, are members of each unit by paying dues of fifty cents each year. Mothers and fathers of children of pre-school age, prospective mothers, and young women interested in home making, who join with the mothers of the present generation to consider the age-old problems in the light of today; professional people, closely allied with parents in child welfare work and any one interested in the little child, should be members of the Parent-Teacher association.

Although the congress of parents and teachers is more than thirty years old and has a very large membership, it is in a comparatively early stage of development. I say this for although the congress is a great power for good even now, its influence today is only a small part of what it is destined to be.

It was voted to take a correspondence course in Parent-Teacher work, with Mrs. Cleo Templeton as chairman, and each parent is urged to attend these meetings and become better acquainted with this phase of work. The organization must be non-sectarian, non-political and non-commercial.

Members as well as officers in the organization, may not use their names to promote a church, a commercial business or a political candidate. These associations may not even take a stand for or against a proposed building site for a school.

Mrs. Cleo Templeton, who has served as chairman of the city council of the Parent-Teacher association for the past year, has not only caused one membership to grow in size, but thanks to her fine work, they have held almost universally to the principles of the state congress. She is a natural leader and her strength as leader is the fact that she is not a driver. Women followed her because she was logical and it was a pleasure to follow her. There is to be a meeting of the city council of the Parent-Teacher association next Tuesday morning at nine o'clock at Miss Veda Swafford's office and each member is urged to attend. The East Ward school is recommending that we work on the same plan of work as last year and it is our hope that Mrs. Templeton will be reelected.

Here reference to the great need of parent education was met with enthusiasm on the part of each one attending. Certainly this organization never will be stagnated through any selfrighteous, know-it-all attitude. In fact the understanding of the whole meeting was to build the foundation of the great tower that could be built upon it. Many women are reached in this way, that could not be reached by women's clubs, for there are so many mothers, who, through necessity or preference, are so engrossed in helping their own children that it is only an appeal through them and for their good that the mother can be reached.

But the Parent-Teacher associations are doing a great deal more good than educate the parents and relieve Johnny of being the only one between in his circle of activities between his home and school. This association is taking an important hand in our educational legislation and many of the individual mothers are conducting a school appraisal.—Reporter.

Miss Hayhurst Entertains With Picnic Monday

Monday afternoon a number of young crowd were entertained with a swimming party and picnic at the Wellington country club by Miss LaVerne Hayhurst. The party was chaperoned by Mrs. A. V. Coker and Mrs. J. W. Gimmell. The swimmers met at the home of Miss Hayhurst and were driven to the country club where they enjoyed

swimming. The following were present: Misses Mary Lewis, Patti Lee Lewis, Julia Slough, Carrie Nola Campbell, Pauline Payne, Argen Hix, Erlis Manzer, Dorothy Ray, and Cora Coker. Messrs. John H. Parker, Alfred Emanuel, Jim Bob O'Hair, Dean Durfee, Merritt Durfee and Robert Lucas, Mrs. A. V. Coker, Mrs. J. W. Gimmell and hostess.

Mrs. L. J. Campbell Hostess to Grayson Club Tuesday

The Grayson Club met Tuesday afternoon in the home of Mrs. L. J. Campbell. A pleasant afternoon was spent in sewing and different kinds of needle work. The club voted to disband during the summer months. A picnic will be given on next Tuesday evening as the closing event, and meeting will be resumed again on October 8.

After the business session an iced course was served to the following: Mesdames E. C. Cayton, J. H. Plemmons, Bert Starkey, R. C. Dryden, V. A. Porter, C. C. Bishop, and guests, Mrs. L. C. Jones, Mrs. J. H. Campbell and Miss Mabel Cox of Happy, Texas, and the hostess and daughter, Carrie Nola.

Martha Jean Henry Entertains With Birthday Party

Little Miss Martha Jean Henry entertained last Saturday afternoon with a birthday party. Miss Henry was assisted by her mother, Mrs. S. G. Henry, and brother, Silas. The guests assembled in the foyer of the Ritz Theatre where they were the guests of Mr. Callahan, manager of the Ritz. After an enjoyable picture show favors of balloons, all-day suckers, and Andy Gump packages were given to each guest. The birthday cake was cut and served with ice cream at Joe Hardy's Drug store.

The following were present: Beth O'Neil, Winifred Small, Zula V. Porter, Frances Stevenson, Patricia Sullivan, Nancy Sullivan, Joe Mae Payne, Katherine Lynn, Silas Henry and Hostess.

Round Dozen to Sponsor Tournament Friday, June 21st.

Members of the Round Dozen Bridge club have made their plans to sponsor a bridge tournament at the Alamo club Friday afternoon June 21, at 3 o'clock. Each person will be charged fifty cents admission and reservations can be made through any of the members of the club. The funds will go to the City Federated clubs as a donation to the Club house fund. Every one is invited but reservations should be made as soon as possible.

Ace of Clubs Meets at Taylor Home Thursday

Ace of Clubs met with Mrs. Fred Taylor last Thursday afternoon with additional guests present. Mrs. Carl Langmack won high score for guests, Mrs. Leonard Merritt high score for club members, and Miss Eva Glenn low. After the bridge games two refreshing courses were served to the following Mesdames Floyd Shields, Leonard Merritt, Sandy Parson, Jr., Ansel McDowell, Clarence Hunsaker, Ray Goodson, Carl Langmack, Morris Wells, A. L. Cochran, Joe Fuller, John Wallace, John French, Bedford Harrison, Creed Hill, Mannon Nix of Shamrock, Ralph Paxson of Shamrock, J. D. Wilson, Misses Evelyn Conner, and Eva Glenn.

Picnic At Country Club Tuesday Evening

Tuesday afternoon Mr. and Mrs. Morris Wells entertained their guests, Mr. and Mrs. George Melton and daughters, Helen Louise and Jean of Johnstown, Colo., with a swimming party and picnic at the Wellington Country club. After swimming the crowd enjoyed a picnic supper.

Those present were Dr. and Mrs. C. E. High, Miss Florence Bobo, of Rome, Texas, Mr. Pat Bobo of Muleshoe, Texas, Mr. and Mrs. Budge Harle, Mr. and Mrs. George Melton and daughters, Helen Louise and Jean of Johnstown, Colo., Mr. and Mrs. Deskins Wells, Marshall Wells, and Mr. and Mrs. Morris Wells.

Mrs. J. D. Wilson Entertains Round Dozen Wednesday

On Wednesday afternoon June 12, Mrs. J. D. Wilson was the charming hostess to the Round Dozen Bridge club at her home 1106 South Dalhart. After several games of bridge scores were totaled with Mrs. S. G. Henry, high for guests, Mrs. Ray Goodson, high for club members, Mrs. Peyton Smith of Dodsonville, low guest and Mrs. Joe Fuller low club. Cut prizes went to Mesdames N. L. Jones, Fred Taylor, S. G. Henry, Peyton Smith, and L. A. Manzer. The delightful odor of summer flowers perfumed the living room of the Wilson home.

Twenty-four guests were served a delicious salad course. The guest list included Mesdames Morris Wells, Clifton High, Johnny Wallace, Joe Fuller, Carl Langmack, L. A. Manzer, Ray Goodson, Bedford Harrison, Budge Harle, Dewey Malone of Dodsonville, Peyton Smith of Dodsonville, N. L. Jones, Creed Hill, Goldwyn Milner, John French, W. H. Lynn, Lee O'Neil, A. L. Cochran, E. W. Alley, Fred Taylor, S. G. Henry, E. W. Jones, and hostess.

Baptist Womens Missionary Program For June 24th.

B. W. M. U. program for June 24 at the Baptist church at 3 p. m. Hymn. Prayer—Mrs. J. L. Burt. Scripture Reading—Mrs. T. T. Fain. "Youth and World Problems"—Mrs. J. W. Harper. "Youth and War"—Mrs. Jess Cook. Hymn. Poem—"God Mend Thine Evil Flaw"—Mrs. Otto Berger. "Women's Missionary Union, Auxiliary to Southern Baptist Convention"—Mrs. E. L. Winn. Hymn. "Closing Prayer"—Mrs. V. A. Porter.

Be Jolly Meets At Wilkerson Home Tuesday

Tuesday afternoon Mrs. Ross Wilkerson entertained the Be Jolly club at her home. Seven tables were placed for bridge games at which Mrs. J. L. Montgomery won high score for club members and Mrs. Ray Goodson low score for members. Mrs. S. R. Pinkston held high for guests and Mrs. S. K. Parsons low for members. Dainty powder puffs were given at each table for high cut prizes.

Refreshments were served in two courses to Mesdames Clifton High, Ray Goodson, J. L. Montgomery, S. R. Pinkston, Sandy Parsons, sr., W. R. Orr, Ben Boston, E. W. Jones, Travis Heatley, N. R. Coker, Clarence Hunsaker, Pink Sullivan,

E. N. Lewis, R. L. Scott, S. P. Buser, Aubrey Dobbs, John French, L. A. Manzer, Creed Hill, N. L. Jones, A. L. Cochran, Bob Glenn, Bedford Harrison, Joe Fuller, Johnny Wallace, Misses Lenora Sherwood, Bess Royal, and Evelyn Rogers of Vernon.

Many Bankers—

(Continued From Page 1)

The Federal Reserve for that city convention bankers voted unanimously to meet in Amarillo in 1929.

J. C. Anderson, jr., vice-president of the First National bank, Plainview, was elected president of the bankers' association. Other officers chosen were: first vice-president, J. M. Crews, vice-president of the First National bank, Childress; second vice-president, Holman Kennedy, cashier of the Donley State bank, Clarendon, secretary, L. B. Steele, vice-president of the Citizens State bank, Dalhart, treasurer, C. A. Gibner, cashier of the First National bank, Spearman.

Few Recognize—

(Continued From Page 1)

body along with his intellectual body. Many an intellect has been ruined by the mistreatment of an individual. The biggest thing that a boy gets out of college is the ability to meet other individuals. The line between intelligence and temperament is marked. Intelligence is the power or ability to learn, to accumulate knowledge, the response to the stimulation his environment. Temperament is the response to internal stimulation. I may be grouchy because I have indigestion; or the life of my environment may be disturbed. Here is where a boy's camp plays a large part, for it teaches him to live together and get along with his fellowmen.

Skill is that thing that we do in life's activities for the purpose of contributing to the social betterment of the world. The boy has the right to expect us to advance his training and to make him skillful. Only about one out of four men are satisfied with their chosen life work, therefore if the boy wants to become something, his community is responsible in seeing that he has the opportunity to do so, for when he has received his training he will contribute much to the community and will receive himself only a comparatively small return. Through the merit badge work of the Scout, a boy tries out some eighty vocations, and is in contact with men who have become successful in each vocation. In these lines he may find his life work. Therefore, the boy has the right to expect us to encourage and stimulate in him an interest in

Frozen Dainties Are Salvaged From Ruins

One would scarcely look for frozen dainties in the salvage of a home destroyed by fire, but a quantity of ice cream was found in the smoking ruins of the M. G. Brock home in Childress recently.

While working with electric connections among the smoldering timbers of the home, employees of the West Texas Utilities company opened a charred refrigerator and from its porcelain lined chambers found two trays filled with ice cream and ice cubes. Refreshments of ice cream and ice water were enjoyed by the searching parties.

some business or profession.

Every character has its moral side. We have certain attitudes toward life and people. That is our temperamental attitude. Every boy has a skill in some particular thing, but above all is our moral attitude as an element in character development. Boys are hero worshippers. Every man is some boy's ideal. We should set for him an example that we would not be ashamed to have him follow. Every boy picks out a man he hopes to be like. He has an ideal in mind created by training and is looking around for a body in which he can introduce it.

I am the average citizen. I come into contact with boys and leave traces of things he hopes to be. The boy shapes his ideal and hunts for a man to shape it around. He puts that ideal into some man and that man becomes his hero.

Any program that fills the boys spare time with things worthwhile for him to do should be supported by the average citizen. The Boy Scouts of America have such a program and should be supported by individuals and institutions.

Every man who opposes the paying of highways is cutting off his nose to spite his face. We have just returned from a double trip to Central Texas. Within the last two weeks we have been down there and back twice, and we took occasion to do a little checking up on the difference between dirt roads and paved roads, and we found that in a stretch of 163 miles we used as much gasoline on common dirt roads (and these dirt roads were in good shape, just as good as the dirt roads of the Plains are when they are in the very best of condition) as we used on 200 miles of paved roads, and the roads that were paved were even more hilly and longer pulls than the roads that were not paved.—H. B. Adams in Lockney Beacon.

Industries Are Trekking Toward the Smaller Towns

CONGESTED quarters, high rents, exorbitant taxes and unsatisfactory labor conditions are slowly but surely driving industries from the larger cities to the country.

THOUSANDS of manufacturers, mill owners and big business men yearly are realizing the advantages of quiet, uncrowded, inexpensive living and excellent labor conditions offered by the small town and are trekking in that direction.

THE majority of the small towns in West Texas can have their share of industrial development because they have the necessary facilities, of which none is more important than ample, uninterrupted, economical electric power.

THE WEST TEXAS UTILITIES COMPANY, with its more than 2,000 miles of transmission lines and 70,000 available horsepower of electrical energy, guarantees the industries the same efficient service they have enjoyed in the great cities of the country.

COTTONSEED NOTICE COTTONSEED

MR. COTTON GROWER:

Several inquiries have recently been made with reference to disposing of cottonseed not needed for planting purposes.

On Thursday, Friday and Saturday, June 20, 21, and 22 I will be loading a car, paying \$30.00 per ton for sound, dry, prime seed. Weighing and paying at Shields Grain and Feed Store. If you are too busy, I can have them hauled in for you.

On account of the drop in the value of cottonseed it is not likely that there will be any demand for them during the summer. All the oil mills of which I know have closed down until the new season opens, excepting one, and IT CLOSES NEXT WEEK. I expect to be in the market only for the THREE DAYS mentioned.

"Show Boat" Now Playing Here At New Ritz Theatre

Impressive Music From Ziegfeld Production Is Big Feature

The most gorgeous and colorful romance ever filmed.

That's Universal's super talking screen version of Edna Ferber's great novel, "Show Boat" which opened at the Ritz theatre yesterday and which will be shown again Thursday and Friday, June 20 and 21.

It is an enthralling picture from start to finish and brings the novel to the screen with a faithfulness which gives the finished product all the charm and verve of the book, only instead of reading the book you see it acted out before you in a vivid way by a powerful cast amid settings of great beauty.

"Show Boat" as a motion picture we predict will go down in screen history as one of the truly great pictures. It is a picture of such splendor and sweep that no one can afford to miss it.

Most of the action takes place on a Show Boat, one of those floating theatres which play the Mississippi and Ohio rivers. These full sized theatres built on boats still actually play the small river towns.

This is the first time they have ever been brought to the screen. The ever-changing panorama of the Mississippi as the boat floats down it, the beautiful moonlight nights,

When a Good Grip Counts

You have to know how to handle steers before you get chummy with them. Ed Wilcox, Carlsbad, N. M., cowboy is shown "wrangling" a steer during the annual El Paso, Texas, rodeo. It would be just too bad if Ed's hands slipped.

the negro melodies wafted from the shore, the entrancing life on board the Show Boat—all are captured and presented with amazing beauty on the screen.

In the starring role as Magnolia Hawks, Laura La Plante gives a performance of great dramatic depth. As the little star of the Show Boat, protected from life and the influence of the troupers by her mother, Parthy Ann Hawks, played by Emily Fitzroy, Magnolia clothes with her leading man, the river-gambler, Gaylord Ravenal, played by Joseph Schildkraut.

Schildkraut gives a notable performance as the gentleman gambler who turns Show Boat actor because of his love for the star, and yet,

while an actor, he never loses his love for the gaming table. Trouble and unhappiness result from this weakness but the story goes ahead through adversity and triumph to a powerful happy denouement.

Miss Fitzroy is the cause of much of the unhappiness through her strictness in rearing her child, yet she is a sympathetic character for it is plainly seen that a great love binds mother and daughter despite their quarrels.

Little Jane La Verne who plays Magnolia as a child and Kim, Magnolia's child, gives a wholly delightful performance. You'll love her—so refreshing and real. Otis Harlan as Captain Andy

Hawks, owner of the Show Boat gives a strong characterization. Alma Rubens as Julie, the Show Boat actress, gives another outstanding performance.

The musical score is impressive with negro songs and specially written tunes by Jerome Kern—tunes which are sweeping the country with their popularity.

The directorial work is marvelously well done and credit for making a great picture from a great book goes to Harry Pollard.

Forced to Sleep in Chair--Gas so Bad

"Nights I sat up in a chair, I had such stomach gas. I took Adlerika and nothing I eat hurts me now. I sleep fine."—Mrs. Glenn Butler.

Even the FIRST spoonful of Adlerika relieves gas on the stomach and removes astonishing amounts of old waste matter from the system. Makes you enjoy your meals and sleep better. No matter what you have tried for your stomach and bowel, Adlerika will surprise you.—Palace Drug Store.

Altus Interested In Highway No. 51

Believing that the building of a good highway through all towns between Altus and Crowell will stimulate both tourist and commercial traffic, Altus is making an effort to secure pavement connections between Altus and Crowell.

Two or three representatives of the Altus chamber of commerce attended a meeting of the Crowell chamber of commerce last Friday. The meetings was held to create interest in Texas highway number 51 which is the shortest north and south route between Oklahoma and central and south Texas points. Delegates from all towns along the route between Altus and Abilene were requested to attend the meeting. W. R. Ely, Texas highway commissioner, was the principal speaker at the meeting.

Ira L. Sanders and wife of Vernon were in town Monday visiting friends and transacting business.

THINGS YOU'LL NEED FOR YOUR CLEAN-UP AND PAINT-UP

Friday, June 21
is
CLEAN-UP DAY
for Wellington

Friday of this week has been set aside by our mayor as CLEAN-UP DAY for Wellington, and as a loyal citizen you will want to do your part in this city-wide movement.

You may find that you'll need a number of materials and implements. That's where we come in. You will find here a complete stock of hoes, rakes, lawn mowers, sprinklers, hose, and other implements for the upkeep of your premises, as well as paints, varnishes, brushes, etc., which you may need in your clean-up program.

Don't borrow from your neighbor. He will be needing his own implements, and besides you will want to have your own supply so that you can keep your grounds neat and attractive all year, and during other years, too, for our garden and lawn implements are durable and substantial.

PIONEER
HARDWARE
COMPANY

CLEAN-UP, PAINT-UP

Attractive Houses are the Most Livable Homes

The loyal citizens of Wellington will cooperate in the citywide clean-up campaign instituted by the mayor. And as you make your plans for your cleaning program, call on us for any aid we may be able to render. If you have occasion to use Paints, Varnishes, Glass, Screen Wire, Small Amounts of Lumber, etc., you will find them here.

Make your home attractive. It will not only lend to the general beauty of your city, but you will derive a great deal of personal satisfaction from living in more pleasant habitation.

Graveyard Stuff

BY BUDGE

Wellington is staying right in line with other cities all over the country. Everyone here has acquired the yo yo craze, and the ladies are appearing on the streets without their stockings.

Will Rogers says that America is the easiest country in the world in which to amass a fortune. He says that nearly everyone who puts in the slightest energy can become wealthy, and that now a rich man must have brains as well as money if he is to command respect. Rogers is quoted as saying that to be rich and nothing more is a downright disgrace.

Be that as it may, a lot of us would like to bow our heads in disgrace.

Oklahoma gets another lucky break with the passage of Texas' new marriage laws. Not many couples living in Texas counties bordering Oklahoma will wait three days for a marriage licence, when they can drive across the state line and get waited on immediately.

Imbecilia, the office girl, says that the new marriage laws do not bother her especially, as she has been waiting twenty years to get married and if she ever gets a proposal she won't mind an additional three days.

Our linotype operator says he is glad that the Wellington banks are displaying the new currency which will soon be placed in circulation. Otherwise, he states, he might never be able to see any of it.

And as far as the rest of us are concerned, the reduction in size of currency seems to be quite a gesture. Few of us ever found the old greenbacks especially cumbersome.

Many newspapers in the southern states have carried feature stories relative to the Oklahoma University student who, finding

himself short of funds, gathered up coat hangers from all the fraternity and sorority houses and disposed of them at 75 cents per hundred to the Norman cleaning and pressing establishments.

The Oklahoma youth's idea was not original. Last March when the federated clubs of Wellington were campaigning to raise funds for the different candidates for "Queen of Community Week," Mrs. Davis Robinson and Effie Lee Richards gathered up every available coat hanger in Wellington and sold them to local tailoring houses. And they got a dollar a hundred for them, too.

It is hard to tell whether a baseball game is more interesting than the wisecracks which can be overheard in the grandstand. Last Sunday after Wellington had come from behind to win the game, Mish Dukeminier opined that playing baseball was quite a bit like raising cotton—that a club never could tell when they were going to get hailed out.

The fact that Friday has been designated as clean-up day does not worry me because I have already borrowed a lawn-mower from Deck and touched up my yard a bit. Now as soon as I can borrow a hose I intend to water the grass, and my attempts at horticulture for the year will be ended, unless I should decide to borrow a hoe and a rake from Jack Deahl and cut the weeds in the back yard.

Speaking of back yards reminds me of the fence which was built around my back yard last week. I was supposed to build a fence to incarcerate Marjorie's chow pup so that he could be kept out of the street. I persuaded Ralph Lewis to do about 90 per cent of the work in building the fence, which turned out to be a neat piece of work. The only trouble with it is that the pup can get either in or out of the back yard at will.

Fight Fruit Fly in Florida

Civilian, state officials and national guard units combined their efforts to check the ravages of the Mediterranean fruit fly in Florida this spring. Guardsmen are shown inspecting and disinfecting an automobile leaving the infected area.

Parisian Star Coming To Ritz In Hit Picture

Much Praise For Chevalier In All Talking And Singing Show

A perfect stage presence is credited to Maurice Chevalier, Parisian revue star, and leading man in the Paramount all-talking and singing picture, "Innocents of Paris," which will open at the Ritz theatre for three days run beginning Monday, June 24.

Chevalier is accepted as Europe's greatest entertainer and for many years has been the reigning king of the Folies Bergere, Femina and the Casino de Paris. For a time he was featured at the Palace Musical hall, celebrated London theatre, where he played with the beloved Elsie Janis of A. E. F. and musical comedy renown.

Chevalier's methods are entirely his own. Seldom does he do the same thing in two successive performances, as his audiences will learn when they see "Innocents of Paris." In this production he sings "Valentine," a French number, several different ways, with impersonations of such mastery that even a

child who knows no French can get a laugh and a thrill out of them.

A voice and a personality that have brought Parisian audiences to their feet in wild applause, that have made Englishmen forget the London tradition of unemotionalism and that have made their possessor an international star, played havoc at the Paramount studios recently.

The voice and the personality are those of Maurice Chevalier.

When this idol of the music halls of Paris and London was making his first picture at the Hollywood studios, "Innocents of Paris," there wasn't much work done by anyone else.

When word got around the lot (as it does, quickly and mysteriously) that Chevalier was about to sing for the camera and the microphone, a general migration from all the other departments—stages, shops, mills and offices took place. Workmen, writers, stenographers and directors slipped over to the set to listen to this man who is rated as the greatest international entertainer of our day.

Richard Wallace directed the production and Sylvia Beecher, Margaret Livingston, Mr. and Mrs. George Fawcett, John Miljan and Russell Simpson are in the supporting cast of "Innocents of Paris"

Rev. S. A. Thomas of Dodsonville was a business visitor in Wellington Monday.

Council At Hollis Adopts New Rules

The city council of Hollis adopted the new set of revised ordinances for Hollis as a city of the first class, after careful consideration which called for council sessions at frequent times during the past two weeks culminating with the final adoption, at the close of the meeting Tuesday night.

Citizens will be living under many new laws designated to be beneficial to the welfare and well being of all.

With the assistance of W. C. Bryant, legal advisor of the Oklahoma Municipal League, laws were drawn up in the most efficient methods applied by modern city governing bodies.

Regular meeting time of the council has been set for the first Monday night of each month at 8 o'clock from April 1 to October 1, after which meetings will begin at 7 o'clock.

Under the new regulations several city officers will be hired on a regular salary which was not in effect under the old laws. These include the city clerk, a street commissioner, a water superintendent, the fire chief, and the public health superintendent.

The water superintendent will keep an office in the city hall during the summer months and will have complete supervision

of the water system. He will have charge of meter reading, collecting of money and deposits, and will be responsible for the water plant working properly. The water rate will remain approximately the same for the normal consumer but the price has been reduced for the large quantity consumer.

T. C. Cass was in Wellington Monday transacting business.

Wellington Club—

(Continued From Page 1)

was relieved in the eighth by Kelley.

Thursday, June 13, Wellington beat out Mangum 11-3 on the local diamond in an exhibition game which did not help the locals' percentage but which elevated their confidence to a certain extent. Jess Handley pitched for Wellington, with Holland covering the home plate.

Friday, June 14, Wellington played a "make-up" game with Cordell, winning 27-7. This leaves Wellington only one more game to make up which is with Elk City. The victory over Cordell was apparently the easiest win the locals have been handed all season. Bunte opened the game for Wellington on the pitcher's mound, but after rolling up a big lead was relieved by McDuffey who continued the perfect twirling. Wellington's 24 hits were distributed as follows: McMahon 5, Bellah 3, McKenna 6, Andree 5, Brown 6, Dean 2, Holland 2, McDuffey 2 and Bunte 1.

Last Sunday's game, played here with Lone Wolf, was the most interesting game yet to be staged on the locals, each hitting twice. Othning 5-4. At one time the Oklahomans were three runs in the lead, but a seventh inning rally for Wellington netted the locals three runs to tie the score and a fifth run in the ninth sewed up the game. The first five innings for Wellington were pitched by Jack Knight, with Jess Handley catching. Gene Bunte relieving Knight on the mound in the sixth, pitching to John Holland. Batteries for Lone Wolf were Venable and Schmidt, McFarland relieving Venable in the ninth. McMahon and Brown led in the stick work for the locals, each hitting twice. Other hits for Wellington were credited to McDuffey, Wilson, Dean, Newman, Holland and Knight, giving the home team 10 hits. Wellington's four errors were made by McMahon, McKenna, Andree and Knight. Lone Wolf hit nine times, with three errors. Herring, Lone Wolf second baseman, was the heavy hitter for the visitors, with three singles to his credit.

Following are the batting averages of Wellington played compiled by J. N. Wallace:

Club Members of Buck Creek Hold Regular Meeting

The Buck Creek women's home demonstration club met Friday, June 14, in the home of Mrs. Minette Lacy and although Miss Swafford is away at this time, the program was carried out in detail despite her absence.

Each member gave her report to the secretary who will turn it over to Miss Swafford upon her return to the county. The standard fair exhibits were arranged so as to be work on this immediately.

Two new members of the Buck Creek club were added to the list of members at this meeting. The next meeting will be held with Mrs. H. Lacy on July 12 and all members are urged to be present.

Roy Bumpass Dies in Ft. Worth

Roy Bumpass died at the Harris sanitarium in Fort Worth Thursday, June 6, after an illness of several days caused by an inward pressure of the brain. He had been taken to the Fort Worth institution about ten days before his death, but according to information received here, the exact cause of his illness was not known.

Roy was 21 years of age. He was born April 26, 1908 in Duncan, Oklahoma, but had lived in Wellington many years. For the past several months he had been employed at the Cook and McClaskey tin shop in Wellington. Burial was made in Farmersville where his parents are buried.

He is survived by two brothers, Roy Bumpass and W. L. Bumpass, of whom reside in Wellington.

President Signs Farm Relief Bill

WASHINGTON, June 19.—President Hoover signed the farm relief bill Saturday, thus making law the major part of his program intended to stabilize agriculture.

Monday he asked Congress for \$150,000,000 of the \$500,000,000 revolving fund authorized for loans to assist the farmer owned and controlled stabilization corporations and co-operatives.

Simultaneously he began the selection of the eight men to compose the Federal Farm Board which is to administer the fund and have authority in agriculture comparable with that of the Federal Reserve Board and the Interstate Commerce Commission in their spheres.

Secretary Hyde will request farm organizations and others interested to suggest men for board appointments. Mr. Hoover hopes that within two weeks he can select a board from this personnel and that which already has been proposed to him.

Thus far Mr. Hoover has made no definite selections, but it is known that two being considered seriously are James C. Stone of Lexington, Ky., president of the Burley Tobacco Growers' Co-operative Association, and Carl Williams, a farm paper publisher of Oklahoma and formerly a members of the Federal Board of Mediation.

Rather definite information is available that neither Julius Barnes of New York, former president of the United States Grain Corporation, nor Frank C. Lowden, former Governor of Illinois and foremost among the advocates of the equalization fee plan of farm relief, will be offered places on the board. Both had been mentioned.

The President is understood to desire men who have had successful experience in the co-operative field and especially in handling basic commodities such as cotton, grain, live stock and tobacco.

The farm bill is the first important legislation signed by President Hoover and its enactment ended one of the longest and most spectacular legislative and political controversies in recent history.

Mr. and Mrs. Jeff Greer visited in Amarillo last week.

NUMBER 51

Living Room For State Contest To Be Judged Soon

Mrs. Claude Whitfield En-
ters Living Room In
State Contest

Is District Winner

Wins First Place In Col-
lingsworth County And
In District

Mrs. Claude Whitfield, club woman of Collingsworth county who won first place in Class Two of the improved living room contest held in this county and who later won first place in this district, has entered her room in the state contest being conducted by the extension service of the Texas A. & M. college, and her room will be judged Friday of this week, judges from College Station having signified they will be here for that purpose at this time. Mrs. Whitfield has written the following paper in regard to the living room improvement contest:

"I joined the living room contest not so much to win a prize as to improve our living conditions.

"My living room when I entered the contest was small and gloomy and seemed never to be in order. It was 15 by 16 feet and for the family the size of mine (nine children, six of whom are boys) the room was too small.

"We had a bedroom the same size as the living room, both rooms having a door opening on the front porch. By moving the partition between these rooms four feet, gave me a living room twenty by fourteen feet. One of the front doors was taken out and the other placed in the center of the house. Side lights were placed on either side of this door. These with the two windows and two doors with glass give plenty of light. The door between the living room and dining room has a glass. This work was done by the men of the family and was of no expense except the side lights.

"After the room was enlarged my first thought was of a color scheme. I wanted something cheerful, yet not so light as to be easily soiled. My floor covering was first purchased as I wished to build up from a darker floor to a lighter ceiling. This covering is a good grade of linoleum. It is a check of taupe gray and pearl gray with black between the checks. This gives me a floor dark enough to be easily kept clean. The floor was very rough, so pasteboard was tacked to the floor before it was covered with linoleum.

"The wall paper is a tiffany rough plaster effect in Old English design. The colors are tan, green and soft gray. This harmonizes well with the floor. I was puzzled as to the color to use on my woodwork. I bought three cans of flat paint for indoor painting. One can of shell pink, one of pearl gray and one of sepia brown. These were mixed, using equal parts of the pink and gray, with half as much of the sepia. This gives a lovely color just lighter than the floor and darker than the wall paper. Doors, door and window casings, and mop boards were painted with this paint.

"When I began my improvement I had in my living room an old organ, always out of order, a duofold and two rockers, library table, book case and graphophone. These pieces were dark, all finished in worn mahogany. I wanted a lighter finish so these were first given two coats of buff, next two coats of dark oak and last two coats of dull rubbed finished varnish. The duofold and rockers were upholstered in a good grade of velour. Three out came bottomed kitchen chairs were finished in oak. One has a covering the same as the duofold and rockers. The seat was padded with cotton and the velour tacked over this.

A strip four inches wide is tacked all around the chair and over the back. One of the chairs is covered with the old covering from the duofold and is dull brown. The other is covered with the old covering from the rockers. The color was removed from this material and dyed a dull blue. This is my sewing chair. New pieces added

(Continued on Page 4)

Mayor Designates Friday, June 21 As Clean-Up Day for Entire City

Friday, June 21, has been designated as the day for a city-wide clean-up campaign for Wellington, a proclamation to that effect having been signed by Mayor W. P. Moore. The proclamation follows: "To the residents and property owners of the City of Wellington: "Whereas, it has been brought to the attention of the city council of the City of Wellington that in certain parts of said city, and especially upon vacant properties therein, weeds are being permitted to grow up, and trash and refuse are being allowed to accumulate on

said properties, thereby creating not only an unsightly but a very unhealthful and unsanitary condition, and

"Whereas, in order to maintain a sanitary condition within our city and to keep down the rank growth of grass and weeds the city council deems it fitting to call upon the entire citizenship of the City of Wellington on the day herein designated to join together and clean up the entire city.

"Now therefore, on behalf of the city council of the City of Wellington, Texas, I, W. P. Moore, Mayor of said city, hereby set aside and designate Friday, June 21, 1929, as "Clean-up Day" and ask the entire citizenship of our city to use said day to clean up on and about their properties, and to try to make Wellington the cleanest and most healthful little city in which to live.

"In witness whereof I have placed my official signature and caused the seal of the said city to be impressed hereon, this 15th day of June A. D. 1929. W. P. MOORE, Mayor. Attest, Jack Knight, City Secretary.

State Department License Inspector Visits Wellington

Points Out Traffic Violations Which Need Correction

L. B. Barkley, license and weight inspector of the state highway department of Texas, was in Wellington last week in the interest of the department and while in the city he pointed out a number of traffic violations which urgently need correction.

Mr. Barkley pointed out the need of paying license, adding that he had noticed several cars bearing licenses from states other than Texas which were owned and being operated by resident citizens of Wellington. This, he declares, is a violation of state highway laws and must be corrected immediately. "With the exception of bonafide tourists, all others having licenses from other states are violating the state highway law and will be forced to pay a heavy penalty if the situation is not corrected," Mr. Barkley states.

Another matter which must be corrected is the fact that several automobile owners have only one license on their cars. This comes as the result of one of the license tags being lost, but according to the laws this is inexcusable as each motor vehicle is required to have two licenses attached in plain view. "It is unlawful to buy or sell a car unless it has Texas license paid for the current year. The penalty attached to this violation is from \$10 to \$2000 or a year in jail or both," Mr. Barkley stated.

Mr. Barkley says he will be back in this city in the near future and that he hopes to find all these traffic violations corrected by that time. "I do not wish to be hard-boiled or domineering in this situation, and my first visit to Wellington was largely to inform the people of the highway matters which need correcting. I felt that the people should be given fair warning about these violations before any penalties should be assessed. When I return, however, it will be necessary for me to take action on these matters if they are not corrected."

Mr. Barkley pointed out that the payment of licenses was nothing more than a part of good citizenship. He stated that about half of the total amounts paid for licenses remained in the county to be used on lateral roads, while the remainder is used on state highways.

The inspector will be in Wellington again in the near future to check up on local highway conditions as to whether or not the situation has been remedied.

Program Announced For Coming Meet To Be Held At Lillie Church

Announcement has been made concerning the workers' meeting which will be held at the Lillie church July 9, at which time devotional will be led by Bob Mathes. Other features of the program will be "Giving to Associational Mission" by Rev. Greenwood and Rev. Brewer; sermon by Rev. Brynoff; board meeting and women's meeting; song service; special music by Tomazine and Maudell Dukeminier; business meeting; "Giving to Foreign Missionary Cause" by Rev.

Knowledge Contest To Appear Soon

How well are you acquainted with the different business firms and professional people of Wellington? In the next issue of The Leader will appear short descriptions of various firms but no names will be attached. Valuable prizes will be given to the first three readers of this paper sending in the nearest correct list of answers. The purpose of the contest is to stimulate greater interest in the business of Wellington and to prove to those taking part that their names are well known in every household. Full details will be found in next Thursday's Leader.

Will Build Pool At Camp Warner

A. M. Duvall Is Drawing
Specifications For Dam
To Be Built

The camp committee of the Southeast Panhandle Area council of Boy Scouts of America met at Camp Warner Sunday afternoon and will recommend that the dam at Camp Warner be reconstructed. A. M. Duvall of Wellington, a member of the area council committee and also engineer, is drawing plans and specifications for the dam. He has estimated that the cement core of the dam can be built, with the use of scouts and donations of cement, for about \$100.00.

A swimming pool is the only thing missing at Camp Warner to make it an ideal camping place. Camp Warner was donated to the Boy Scouts several years ago by Mrs. Phebe K. Warner of Claude. There are some buildings already constructed, including a dining room, kitchen, headquarters building, camp hospital, work shop and one cabin. There is an excellent supply of good, soft water from Dripping Springs. The surrounding hills are filled with cedar and wood which could be used for woodwork, paper knives, etc. Indian lore such as flint, arrow heads, etc., are found in abundance and the acquisition of a swimming pool at Camp Warner would make it an ideal place.

The committee feels sure that the very many parents and friends of the Boy Scouts, who have something of the following lists, would be glad to donate them for the boys camp. These are the things

Sidney Johnson and Rev. R. C. Joyner; "Blessing of Home Board" by J. J. Baird; "The Word" by J. A. Baird; sermon "The For-ward" by W. B. P. Johnson. Dinner will be served at noon and a large attendance is expected at the meeting. According to those in charge of the meeting, each individual applying on the program will bring an interesting message to the gathering and no detail is being overlooked to insure a successful meet-

New Marriage License Laws Now Effective

Applications Must Be
Filed Three Days Prior
To Securing License

Texas' new marriage laws governing the issuance of marriage licenses in the state of Texas became effective Thursday, June 13. The new law as provided in the acts of regular session of the forty-first legislature requires that an application be filed with the county clerk three full days prior to the issuance of the license. When the application for license is filed with the county clerk, a blank is issued to the man which must be filled out by a licensed physician who must state that he has examined the man for venereal diseases. This blank, properly signed, must then be returned to the county clerk at the end of the three days and the marriage license will then be issued.

Application for marriage license may be made in any one of three manners. Notice of intention to marry may be filed and signed by either or both of the contracting parties. Application can be made by a third party who must sign an affidavit to the effect that he knows both parties and knows their correct ages. This may be signed by a witness. And the other form of application may be made by a parent or guardian. There is also a form of application which may be filed by the county judge when applicants are without parents or guardians.

W. T. U. Company Extending Lines

ABILENE, Texas, June 19.—Construction gangs of the West Texas Utilities Company are working overtime in virtually all of the 10 districts on the properties of the company extending distribution systems, building additional high-lines and improving electric service, it was announced from the Engineering Department of the company here.

This construction activity has been made necessary by the numerous additions of new customers, heavy sales of electrical merchandise and equipment and extensive building programs now under way in many West Texas cities and towns, it was pointed out.

The following projects now are either under construction or soon will be:

Mile 2300 volt line from Abilene to Abilene Christian College addition, northeast of town; 1,000 feet primary and secondary distribution system in ACC addition. Joint construction with Southwestern Bell Telephone company.

Three phase 440 volt line to serve motor in Humble Pipe Line station, Cook Oil Field, Shackelford county.

One and three tenths miles single phase 2300 volt line to serve country Club property north of Crowell. Rebuilding four blocks of three phase line at Cochelle to serve 10 new lighting and two range customers.

Improve distribution system at Menard. Construction 110 and 220 volt line at Miles to serve new addition. Increase and extend distribution system at McCamey to serve 55 new customers.

Medical Society Meets Friday In Local Courtroom

Interesting Gathering Of
Four-County Medical
Society Held Here

Papers Discussed

Scientific Discussion Ac-
corded Papers Of Gooch
And Townsend

An interesting meeting of the Four-County Medical Society, embracing the counties of Childress, Collingsworth, Hall and Donley, was held in Wellington Friday, June 14 with Dr. D. C. Hyder of Memphis, president of the society, presiding.

Doctors in attendance were D. C. Hyder of Memphis, R. E. Clark of Memphis, W. N. Wardlaw of Childress, F. A. White of Childress, H. S. Townsend of Childress, Wolford of Childress, J. W. Gooch of Shamrock, H. L. Wilder of Clarendon, E. W. Jones of Wellington, E. W. Moss of Wellington and C. E. High of Wellington.

The society now has forty-one members. Dr. Perry R. Jeter of Childress was recently elected to membership and at the Wellington meeting Friday Dr. J. G. Hamer of Shamrock was also elected a member of the society.

The scientific meeting was held at the district courtroom in Wellington where two papers were read to the gathering. Dr. J. W. Gooch of Shamrock read a paper on "Emphysema" which was later discussed by Doctors Wardlaw, Wolford, Clark, Townsend, Jones, White and Hyder, the discussion being closed by Dr. Gooch.

Dr. H. S. Townsend read a paper on "Fracture of the Femur." This was discussed by Doctors Jones, Wardlaw, Clark, Wilder and Hyder, with the discussion closed by Dr. Townsend.

A motion was carried to accept the report of Dr. Wardlaw who was delegate of the Four-County Society to the state medical meeting held in Brownsville last May.

Minutes of the last meeting which was held in Childress May 10 were read by Doctor C. E. High, secretary of the society. At this meeting Dr. B. L. Jenkins of Clarendon read an interesting paper on the subject of "The Unborn Child." He quoted numerous Scriptural references to the subject of procreation, hygiene, and heredity transmission of diseases. He gave an invincible argument for universal birth control to the effect that no mother should be forced to bear a child against her wish, nor a child be born unless it was wanted and could receive proper care and the assurance of a normal development during childhood.

Minutes were also read from the speech of Dr. E. W. Jones of Wellington who read a paper entitled "The Pre-School Age," in which he ably emphasized the importance of environment. He stated that from 50 to 65 percent of the child's future depended upon environment and since at birth the factors of heredity could no longer be altered, it was of utmost importance that every physical defect be corrected, if possible.

The minutes from the speech of Dr. Perry R. Jeter of Childress revealed that "The Adolescent Period" was the period between youth and maturity—a critical age when men and women are made. He divided the life of an individual into four periods: childhood, adolescence, maturity and old age; he discussed each at length.

Mrs. J. H. Campbell returned home from Hedley Thursday after three weeks visit there with her cousin, Mrs. Mag Hall.

Leader Dry Goods Store Recently Completes Attractive New Front

The Leader Dry Goods store in Wellington has recently completed a new front which affords this business two of the most attractive display windows in Wellington and adds materially to the general appearance of the east side of the square. The old front of the store was torn away last week and the new windows were completed last Saturday. The base of the new front is constructed of brick, and the floors of the display windows

Vivian Porter Guesses Weight Famous Rock

Vivian Porter, young daughter of Mr. and Mrs. V. A. Porter guessed the correct weight of the rock which was displayed in the window of The Famous during the fifteen days of their recent sale. The idea of displaying the rock, suspended by a single pair of silk hose, attracted wide attention. The rock weighed 74 pounds which was the number guessed by Miss Porter, and according to the agreement made by The Famous, she was paid ten cents per pound, or \$7.40.

Brady Editor Is New President Of Texas Press

Corpus Christi Is Selected
As Next Meeting Place
Of Editors

The election of officers and the selection of Corpus Christi as the next convention city, ended the Golden Jubilee gathering of the Texas Press Association held at Wichita Falls last Thursday, Friday and Saturday.

Harry F. Schwenker of Brady was elevated to presidency. He had served during the past year as vice president, Ray H. Nichols of Vernon was elected to fill Schwenker's old place of vice president. Sam P. Harben of Richardson, secretary, and Ben F. Harigel of La Grange, treasurer, were re-elected. William Russell Clark of Memphis was elected essayist. Deskins Wells of Wellington had served as essayist for the past two years.

The convention went on record as favoring two state constitutional amendments, increasing the number of supreme court judges and raising the governor's salary, to be voted upon soon, and urged the press to give the measures the fullest publicity to the end that their fates might not be determined by indifference upon the part of the people.

The Harper Herald was awarded first place in every event of the annual newspaper contest sponsored by the Belo Award for the best all-around weekly publication.

Mangum Janitor Sues For Injury

E. J. Montgomery filed suit in district court at Mangum Monday, asking a judgment for \$15,000 against the board of education of the city of Mangum for damages for injuries alleged to have been sustained by him in September, 1927.

Montgomery's petition alleges that he was employed as janitor at one of the city school buildings and fell, while performing his duties, injuring his head when it struck the concrete floor. He alleges that his injuries have resulted in permanent epileptic fits. The suit was filed by Robinson and Oden, Altus attorneys.

Mrs. J. H. Campbell returned home from Hedley Thursday after three weeks visit there with her cousin, Mrs. Mag Hall.

are of hardwood.

Mack Said, proprietor of the Leader Store, states that he has been intending to secure the new front ever since he opened his store in Wellington but that it had been impossible to arrange the matter until this time.

Several merchants of Wellington have re-arranged the fronts of their establishments during the past few months, and this work gives the city a much more modern and attractive appearance.

Kiwanis Club Is Awarded Charter On Friday Night

District Governor McDon-
ald Presents Charter
To Wellington Club

Many Visitors Here

Representatives From
Clubs Of Surrounding
Cities Are Present

Wellington's Kiwanis club was awarded its charter Friday night at a well planned banquet which was held at the basement of the First Methodist church and which was attended by eighty-seven guests. The Kiwanis club of Hollis, sponsors of the Wellington organization, sent a large delegation and several other nearby cities had a good representation.

J. W. Watson of Hollis presided in the capacity of toastmaster. The opening song, "America," was led by Ed Smith of Hollis, followed by the invocation by Rev. O. K. Webb of Hollis.

After these preliminaries, a delicious banquet was served by the ladies of the Methodist church. The menu consisted of fruit cocktail, chicken a la king, new potatoes, fresh beans, sliced tomatoes, parker house rolls, assorted jellies, perfection salad, olives, pickles, ice cream, angel cake, coffee and iced tea.

Following the banquet, the assembly sang "My Wild Irish Rose" and "My Wild Kiwanis Ann."

The address of welcome was delivered by Dr. E. W. Jones, with the response made by E. L. Gardner of Hollis.

Miss Tomazine Dukeminier next sang "A Song of Love" by Roberts. She was well applauded and favored the guests with an encore. Both numbers were brilliantly rendered.

The visitors were next introduced, with members of the Childress, Altus, Hollis and Wichita Falls clubs standing for the introductions. At this time, L. A. McDonald of Denton, governor of the Texas-Oklahoma district, was presented.

Raymond Barry of Hollis then delivered one of the most humorous and humanly interesting speeches of the evening. His talk was well received by each guest present at the banquet.

Governor McDonald spoke the presentation speech and delivered the charter to A. M. Duvall, president of the Wellington club. Mr. Duvall answered the presentation address with a few well chosen and well delivered words.

Miss Greta Mae Cayton favored the guests with an appropriate reading, after which the flag was presented by O. K. Webb of Hollis to E. C. Cayton, vice president of the Wellington club, who delivered the acceptance speech.

Inter-club relations, discussed by R. B. White of Altus, was the concluding speech after which the banqueters sang "Till We Meet Again."

Those seated at the banquet table were L. A. McDonald, E. T. Smith, Mrs. E. T. Smith, Gene Robertson, E. L. Gardner, E. M. Slaughter, Raymond Barry, J. W. Watson, O. K. Webb, Sid Reid, Mrs. Sid Reid, E. B. Cocke, J. N. Coursey, H. B. Newberry, Shaw D. Ray, Carl Ward, Russell K. Dodge, Paul Richardson, Mrs. W. H. Moseley, Bill Moseley, Dora Massey.

Ted Frazier, Mrs. Ted Frazier, Mrs. R. E. Willingham, C. I. Massey, R. E. Willingham all of Hollis, Jno. C. King, Mrs. John C. King, Jas. A. Allen, H. A. Walker, Mrs. H. A. Walker, G. W. Ellison, R. A. Franklin, O. M. Stewart, Don Blair, H. G. Richards, Phem Sutton, all of Childress.

R. B. White, Mrs. R. B. White, H. L. Hamilton, R. B. Collins, Roy T. Wileman, all of Altus; Don Haynes, Mrs. Howard Renfro, Howard Renfro, all of Wichita Falls; Jno. W. Harper, Mrs. S. E. Larson, S. E. Larson, Mrs. A. M. Duvall, E. M. Hunter, H. A. Phillips, Mrs. E. N. Lewis, R. Lewis, Maudell Dukeminier, Tomazine Dukeminier, Cecil J. Calhoun, E. W. Jones, A. M. Duvall, E. C. Cayton, Greta Mae Cayton, F. L. Emanuel Claude McKim, Mrs. Hal Hearn, S. P. Buster, S. P. Buser, Mrs. F. Jeff Greer, Jim Co.

State Highways Investment Of Many Millions

Highway Conditions in Texas Given Authentic Discussion

By R. S. STERLING
Chairman Texas Highway Commission

For the consideration of those interested in the continued construction and improvement of the highways of Texas the following information and suggestions are submitted:

The people of Texas at this time have an investment of not less than one thousand million dollars in vehicles; these are of value to their owners in proportion to the condition of the highways or roads over which they are operated. It is difficult to perceive that there is any general clamor for a reduction in registration fees which average in Texas approximately \$14.00 per vehicle, particularly if such reduction will result in reducing the available income of the Department for the upkeep, improvement and construction of adequate highways, demanded by the people. The loss to the owner of an average motor vehicle in a trip of 100 miles or so over a rough road such as may be found in not a few places on some of the most important highways of our state, will amount to more than the saving to him from any personal reduction in license fees. We are forced to believe that the people of Texas are aware that the practical source of saving to them lies in improved roads—savings in time, comfort, consumption of gasoline and oil and in the wear and tear of vehicles. The registration fee on the ordinary car is less than the cost of a year's insurance against fire and theft, which insurance, we are advised is required on cars sold on the installment plan. The average life of motor vehicles does not exceed four years; at the end of which time the sale or trade-in value of a car costing \$1,000.00 will not exceed \$250.00; while the annual cost of the operation of the average car in repairs, parts, oil and gasoline exceeds \$100.00. In the light of these facts the cost of registration, part of which goes to the improvement of the country roads and part to the improvement of State highways, cannot be a matter of paramount importance to the owners of motor vehicles interested in better roads in Texas.

The problem of financing highway improvement in Texas is not difficult of understanding; highway funds are derived from two sources, (a) a tax on gasoline and (b) fees from the registration of motor vehicles.

When the present Highway commission took over the Department the balance on deposit to the credit of the Department in the State Treasury was approximately \$600,000.00, whereas the outstanding liabilities of the Department were then approximately \$6,500,000. At that time Federal aid had been withdrawn from Texas and upon the grounds that Federal-aided highways were not being properly maintained and that contractors on Federal-aided jobs were not being paid. This situation, together with other needs of the Department, was brought to the attention of the Fortieth Legislature, then in regular session, and that body, in March, 1927, increased the gasoline tax to 3 cents per gallon; but, unfortunately for the Department, by the terms of the act the gasoline tax was automatically reduced to 2 cents per gallon beginning September 1, 1928; since which last date the gasoline tax has been 2

Hoover Crime Commission Gets Busy

Members of the national law enforcement commission, appointed by President Hoover to study law and enforcement throughout the country, are pictured above as they met in Washington. Left to right are: Roscoe Pound, Frank J. Loesch, William I. Grubb, Ada M. Comstock, Chairman George W. Wickersham, Henry W. Anderson, Monte M. Lemann, Kenneth R. Mackintosh, Paul McCormick and William S. Kenyon.

cents per gallon. Due to the fact that, by terms of legislation, the income from the gasoline tax is measured by the fiscal year while the income from license fees is measured by the calendar year, there has been no period of twelve months, under the present administration, throughout which both the gasoline tax and registration fees have been uniform. But the receipts of the Department for the fiscal year from August 31, 1927 to September 1, 1928 will answer all practical purposes.

Due to the fact that automobile registration is required to be made by January 1 of each year the bulk of receipts from that source for the present year has already been received.

A total income for the present fiscal year 1928-29, in round numbers, on \$22,500,000 was produced from a 2 cent gasoline tax and present rate of license fees.

If there had been no decrease in the gasoline tax from 3 cents to 2 cents as occurred on September 1, 1928, the income of the Department for the present fiscal year ending September 1, 1929 would have been approximately the sum of \$27,975,000.00.

No one familiar with the necessities of the Highway Department can say that its annual income from State sources ought to be less than \$28,000,000; and if the program of highway development is to be speeded up to meet the general demand of the great body of people of Texas, the annual income of the Highway department from State

sources ought, under no circumstances, to be less than \$30,000,000.

At the regular session of the Forty-First Legislature of 1929 House Bill 495 passed the House of Representatives but failed to become a law. That bill proposed to reduce license fees approximately 50 per cent; the entire loss of revenue from such reductions falling upon the Highway Department. Under that proposed act the annual income of the Highway Department from registration fees, (including trucks, busses motorcycles, tractors, transfers, dealers' licenses, etc.) would have been approximately \$2,369,000; a net loss in the income of the Department of approximately \$9,000,000 per annum. With the enactment of House Bill 495, without an increase in the gasoline tax, the income of the Department for the fiscal year 1929-30 would not have exceeded \$14,186,000.

However, the proponents of the fifty percent reduction in registration fees announced their purpose to increase the gasoline tax. Let us assume that the license fees had been cut fifty per cent as proposed and that the present 2 cent gasoline tax had been increased to 3 cents. What then would have been the income of the department for the fiscal year of 1929-30?

W. H. Stuart and sister, Miss Florrie spent last week-end in Commerce visiting their mother. Mr. Stuart returned Sunday and Miss Stuart remained to spend the summer.

Big Patronage Is Given Cafeteria Texas University

AUSTIN, Texas, June 12.—More than 1,200 meals were served daily at the University of Texas cafeteria during the month of May, an increase of approximately 12 per cent over the highest record in its history, according to Miss Anna Jansen, manager.

"Patronage at the cafeteria is a pretty good barometer of the amount of studying that is being done by the students," Miss Jansen said. "When the students are having to spend a good part of their afternoons and evenings in library work on the campus, they don't care to return home for lunch and dinner. Then, too, when spring comes and the weather begins to get warmer, the students tire of their boarding houses and they eat at the cafeteria and at restaurants and tea rooms more frequently."

The University cafeteria is operated as a non-profit making institution for the benefit of students and faculty members. It is maintained in a thoroughly sanitary manner and every possible effort is exerted to prepare the food in an attractive way.

Mrs. R. V. McDavid left last week for Austin where she will visit relatives and friends. From there she plans to visit in Galveston and other South Texas points of interest.

Women Drivers Agree Whippet Is Ideal Auto

Finger-Tip Control And New Steering Gear Easy Handling

With the number of women drivers increasing by thousands and thousands each year, automobile manufacturers more than ever before consider this factor in the design and construction of their products. This is aimed at by as many conveniences and safety features as possible, that will appeal, not only to women, but to all drivers, according to J. W. Ricketts, of the Ricketts Whippet-Knight company, Whippet dealers in Wellington.

A clear example of this is seen in the Willys-Overland company's new line of Whippet four and sixes. Notable among the outstanding

convenience on these cars is the "Finger-Tip control." This consists of a button conveniently placed in the center of the steering wheel to control all the functions of starting the motor, manipulations of the lights and sounding the horn.

In addition to this being a decided safety factor it also materially increases the driving comfort of the driver. With this new improvement the driver no longer searches with his or her foot for the starter button usually found in the toe board. Instead, a slight pull up of the button starts the engine, a turn of the button to the right controls the lights of the new type headlamps, and the horn is sounded by pressing downward with finger.

The new improved steering gear also provides easier handling of the car with minimum of effort. This permits women to more easily park their car. The increased second gear is a distinct aid in heavy city traffic and allows quicker pickup and get away.

The larger and more comfortable interiors, as well as the large, easily operated 4-wheel brakes, also

are distinctive features which will appeal to both men and women drivers, while the notable fuel and oil economy and low maintenance cost make the Whippets outstanding in the low price classification.

The Chevrolet Six offers all the Distinct Advantages of BODY by FISHER

STYLE

The new Fisher bodies on the Chevrolet Six are unusually smart and attractive. Concave front pillars lengthen the profile—the effect of the side paneling extends well up over the roof line—and all rear quarters are artistically molded.

COMFORT

In comfort, too, these new Fisher bodies represent a marked advance. The seats are deeply cushioned. Upholstery is "built-up" for added luxuriousness. And the driver's seat is easily adjustable, forward and back.

STRENGTH

Another outstanding feature of these new Fisher bodies is their sturdy construction. Built of selected hardwood and steel, they provide a measure of strength, endurance and safety that is unapproached in any other low-priced car.

QUIETNESS

As a result of their composite wood and steel construction, Chevrolet's new Fisher bodies are exceptionally quiet. The roof is padded to prevent rumble. And wherever wood and metal contact, a layer of insulation prevents noise.

APPOINTMENTS

All hardware fittings on Chevrolet enclosed bodies are designed and built by Ternstedt. Door handles are of the remote control type—window lifts are smart and convenient—and all exterior bright metal parts are chromium-plated.

FINISH

No single feature of Chevrolet bodies has created more widespread comment than their beautiful finish—made possible by the superlatively smooth surface of the steel body panels. Applied against this silken surface, Chevrolet finishes are uniform, lustrous and permanent.

Boy Scouts Will Meet In England During Summer

Nearly 1,500 American Scouts Expected To Make Trip

Nearly 1,500 American Boy Scouts will pilgrimage to England this summer to take part in the greatest peace-time encampment of boys that the world has ever known. The group will be the official representatives of the Boy Scouts of America at the World Jamboree to be held at Birkenhead, across the Mersey River from Liverpool, England, from July 31 to August 13 this year. 50,000 Boy Scouts representing 42 different nations will pitch their tents and for two weeks will work and play together. The Jamboree is being held to celebrate the 21st birthday of the founding of the Boy Scout movement and to also pay tribute to Sir Robert Baden-Powell, Chief Scout of the World. More than 400 acres of ground will be under canvas when the World Jamboree opens on July 31.

Patrol units of eight, under leaders, the American Scouts will mark from several different points of departure, and landing at Liverpool, Grimsby, Hull, Goole, and other ports, will pilgrimage to the Jamboree camp. Many of the American Scouts will embark on special trains from the various ports and be carried to the Jamboree camp. From there they will be transported by motor to Arrow Park where the world's largest gathering of boys will take place at Birkenhead, England, with 1,500 American Boy Scouts participating at the Third World Scout Jamboree, July 31 to August 13, when 50,000 boys from all corners of the world will camp together. The Jamboree celebrates the coming of age of the Boy Scout movement. American committee in charge, (upper row) Frank Presbrey, Chairman, Mortimer L. Schiff, George D. Pratt, New York, G. Barrett Rich, Buffalo and (lower left) James E. West, the Chief Scout Executive. American championship Jamboree troop (center) and many other notables will camp with the scouts.

Hides and skins must be cured promptly in warm weather if they are to make good leather. They should be salted as soon as they have cooled and have been cleaned. About one pound of salt is needed for every pound of cattle or horse hide. See that all parts of the flesh side get a sprinkling of salt, being especially careful to rub it in well along the cut edges, head, neck, legs, wrinkles, and heavy portions. Properly cured hides will take from 12 to 14 days to become "salt firm." Sheepskins take longer than hides to cool and in warm weather should not be salted until 8 or 10 hours after being removed from the carcass. One-half pound of salt is enough per pound of sheepskin. Sheep and lamb skins heat quickly, especially if piled, and should be marketed promptly; not more than five or six days after salting, unless special facilities and storage space for keeping them are available.

Bert Starkey is back in his place at the City barber shop after several weeks of illness.

May Big Month For Chevrolet

May was the biggest month in the history of the Chevrolet Motor records, according to M. M. Kern, and J. B. Castleberry of the Wellington Motor company, local Chevrolet dealers.

Under pressure of the greatest demand in Chevrolet history, its 16 giant factories in May experienced the busiest period the company has ever enjoyed. Factory wheels turned with all the speed consistent with Chevrolet's precision manufacturing methods to accommodate the demand for cars that poured in from Maine to California and from Washington to Florida.

May was the third consecutive month to set a new all-time monthly production mark. It far surpassed the March record of 147,273 units and topped the April achievement of 157,522 units.

To accomplish this record performance Chevrolet plants averaged 7,000 cars and trucks daily; an average of 777 cars and trucks were built every hour; an average of 13 were built every minute—and one was built every 4.6 seconds.

From present indications the same relatively high level of production will be maintained in June to keep pace with the demand, which officials report, continues unabated. Dealer stocks are still below normal due to the necessity of filling orders as fast as cars are received. Unfilled orders are over 300 per cent ahead of this same period last year. It was announced definitely that June production would break all records for the month.

J. F. Lawrence of Arlie was a business visitor in town Saturday.

No one likes butter with a sour overripe flavor, and this defect, which is very common in farm butter, can be avoided by properly ripening the cream, says the U. S. Department of Agriculture. Keep the cream cold and sweet until about 12 hours before it is to be churned. Then stir it thoroughly, warm to a temperature of 65 to 75 degrees F., and hold at that temperature until it thickens, has a glossy appearance, and churn. The churning temperature should be low enough to produce, firm butter. In the summer this will be between 52 and 60 degrees F. Cream that is allowed to ripen too long or at too high a temperature produces butter with a sour flavor. Such butter does not keep well.

THE BANG OF BURNED OUT BEARINGS YOUR MOTOR CAN ESCAPE IT

If you've ever listened to the anvil chorus under the hood when a bearing burns out, you realize the damage that poor oil can do to a motor. Replaced bearings cost real money—a great deal more, in fact, than the cost of a year's supply of good oil.

Isn't that reason enough why you should always insist upon a brand of oil which has stood the test—a brand backed up by an organization which has spent years specializing in the lubrication needs of every type of motor?

Such are the brands offered you by the Continental Oil Company. You may be sure that an oil sponsored and sold by this organization is the right oil for your car.

You protect the bearings—and your pocket-book, too—when you ask for these brands at service stations and garages.

CONTINENTAL OIL COMPANY

of high-grade petroleum products in Arizona, Arkansas, California, Idaho, Kansas, Missouri, Nebraska, North Dakota, Oklahoma, Oregon, South Dakota, Texas, Utah, Washington, Wyoming

Conoco Amalie is 100% Pennsylvania Oil—refined from premium crudes by a special process. Universally recommended by automotive engineers and lubrication experts.

Through exhaustive laboratory and road tests it has demonstrated its ability to lubricate properly under the most trying conditions of motor operation.

Conoco Motor Oil is source protection. It seals compression—cures gasping—keeps friction down—under most trying conditions. In short, does a complete lubricating job in all kinds of weather.

Pure Bred Folks

By Phebe K. Warner

During the last few years it seems like almost everybody has been going "hog-wild" over pure bred stuff. Pure bred poultry, pure bred hogs, cattle sheep; pure bred corn, cotton and wheat. The most enthusiastic stockmen, and the most enthusiastic farmers are those who raise only pure bred products.

And why not? You never see a man running around all over the country attending all the stock shows to exhibit his runts, cut-backs and off colors. Never! You never hear him telling his neighbors how much he received for his cut-backs. He seldom ever invites his neighbors over to see his runts.

And did you ever know a pure bred stockman to quit the business and go back to raising runts, cut-backs and off colors again? No Sir! There is something spiritual about raising fine animals. And once a man is soundly converted to the business of raising pure bred live stock, he seldom backslides. Because he is not only proud of his hogs, horses and cattle, but he is proud of himself. It gives a man a new social and commercial classification and he just naturally takes higher rank among his fellow men than he held while he was engaged in the business of producing poor grade products for the markets. Now, why is this?

In the first place, it does a man good to associate with high-grade animals. They are good company. There is just that much relation between the different species of the animal kingdom. Any sensible man enjoys a good looking, fine acting, high spirited horse more than a poor old worn out nag that can't do a thing. Then there is more money in the well-bred animal. Besides it is more economical to raise good stuff. A \$10.00 hog or a \$20.00 cow eats just as much as a \$500 hog or a \$1000 cow. And it takes just as many months and years to produce a poor animal as a good one. About the only difference between the production of a good animal or a poor one is its origin and the care it receives, and the brains used in its development.

When we see how enthusiastic men are over their fine livestock, we sometimes wonder why men, and women too, are not more enthusiastic over their boys and girls. There seems to be but one logical conclusion. It must be too many of us are rearing runts. Mental and physical and social runts that will never bring a high figure on the human markets of the world. Many of us do not seem to have as high an aim in our home as we have in the cow pen, or the horse lot, or the poultry yard. Yet many of the principles of child rearing and stock raising are the same.

It takes just as much time to rear a mental and moral runt as it does to produce a fine character. It costs just as much and usually more to rear a bad boy or girl as a good one. And no matter how well born they may be unless they receive the right kind of care and food and are kept in the right kind of environment they will not thrive any better than a well-bred but neglected animal. The only difference between a growing boy and a growing animal is the boy has a spirit, a soul, a mind and a heart that needs food every day the same as his body; while a pig just has a body to be developed. And some times we parents become so absorbed in developing ham and lard and backbones that we forget our children are more complex in their nature and need a balanced ration to develop their entire nature the same as a pig.

We even go so far in most of our states as to build great colleges and send our boys to those places at from \$500 to \$1000 a year expense to be taught how to raise the finest hogs in the least time and at the least expense that will bring the highest price on the market. But if there is a school anywhere in this nation where men are taught how to produce the finest looking, healthiest, strongest, most useful, and best natured boys in the world, we have never seen it advertised.

The greatest industry in this world is that of rearing children. Yet how many of us, either fathers or mothers have ever had any sane, intelligent, scientific training for this greatest of all callings and the one business on which the salvation of the human race depends.

Will the time ever come when men and women will take as much pride in and use as much sense to improve the breed of the human family as they do to improve the standards of their crops and the lower animals or the style of their clothes and automobiles or anything else they may happen to be interested in.

Living Room—

(Continued From Page 1)

are two magazine baskets, two wall racks, two flower stands two end tables, a sewing cabinet, telephone stand and chair. These pieces were knocked down and unfinished. The men put them together and I finished them. The end piece, sewing cabinets and telephone stand are finished in dark oak. The two floor stands are finished in sepia, the wall racks in shell pink and the magazine baskets in a combination of shell pink and pearl gray.

"A long mirror was purchased and hung over the library table. One large picture was bought and hung over the duofold. Frames were made for two small pictures. Two foot stools were made, padded with cotton and covered with velvet the same as the rockers.

"One end table is placed at the end of the duofold and on this is a good reading lamp. The lamp was nickel finished but was given a coat of jade green paint to harmonize with the shade which is of pleated parchment in colors of green and rose. On the library table is another lamp and near the table a rocker and magazine basket. The wall racks are placed on each side of the south window and under one is the telephone. I am proud of my telephone set for I can sit down and talk with my friends. It used to be high on the wall.

"The thing I like best in my room is the storage place and book case combined which is made from the old organ. This is three feet eight inches high and fourteen inches deep. A partition was placed in this and one side has a door in which the children hang their school coats and caps. The other side has shelves and hold magazines and books. A picture of lovely colors hangs above this and on top of the bookcase a mandarin red bowl holds flowers.

"The curtains for doors, windows and side lights are of light ecru marquisette. The window shades are of plaza green. The side drapes of gray-tan terrycloth with flowers of rose, blue and green. The drapes are hung on poles with rings and extend over each side of the windows, giving them breadth. My scarfs are of ecru linen.

"One end table contains writing material. One flower stand holds two ferns, the other a lovely hydrangia (a gift of the club) and I have a folding card table and games for the children.

"We love our living room now. It is cheerful and restful. My advice to any woman wishing to improve her living room is to join the living room contest for unless you do you will leave so many things undone. The cost is not great, considering the pleasure received. My cost was \$133.25. We did all the work ourselves.

"Work was started February 15. First the partition was removed and doorway changed. This work took two men two days. Next the papering was done. This took two days for two men and myself. Lacking the pasteboard to the floor and laying the linoleum was a half day's work for one man. Painting doors, windows and door casings and mop boards took two men one day. Refinishing the furniture was done at odd times as each piece had six coats and twenty-four hours was required between each coat. Making curtains was half day's work for myself. Two days' work was required to make the book case from the old organ. Old material used was the old organ, cotton for padding duofold and chairs. Old velvet from duofold and chairs and old screen to make a frame for window screen.

"An itemized cost of the room follows: linoleum \$35.00; side lights 11.00; mirror 5.35; picture 6.00; Marquisette 4.44; terry cloth 4.25; springs and rods 1.00; linen 1.25; hemstitching .95; magazine baskets, wall racks, flower stands, etc., 4.75; sewing cabinet 2.00; telephone set 3.35; end tables 3.20; wall paper 9.40; canvas and tacks 2.10; paint and varnish 3.60; lamp shade .69; ferns 2.00; upholstery material 14.75; frames and pictures .50; bowl, dye and rit, .70; screen wire and hinges .75; card table, ash tray and dominoes 2.08 and screen door 2.50.—Total \$133.35."

True, we cannot go back into the past and change the origin of our children but their environments is in our hands. And that will become the inheritance of all the future generations.

Are we doing our best in this generation to improve the standard of our American boys and girls?

On Honeymoon, Yet Doug Works

It's a wonder Mrs. Douglas Fairbanks, Jr., who only a few days ago changed her name from Joan Crawford, doesn't take young Doug to task. You see, they were married in New York recently and are now honeymooning in the east—but young Doug insists on doing a little work. That is, he is learning from Glenn Hunter, right, stage star, how prima donnas act in "Spring is Here," which will be his next movie production. Fairbanks is pictured at the left, with his lovely wife in the center.

Kiwanis Club—

ton, Mrs. Judge Holton, Mrs. Ray Goodson, Ray Goodson, Mrs. E. W. Moss, E. W. Moss, Mrs. E. W. Jones, E. I. Fox, Miss Claudine Fox, Mrs. E. C. Cayton, J. W. Ricketts, Mrs. Jess Hancock, Jess Hancock, Lola Ricketts, Mrs. E. L. Winn, E. L. Winn, Mrs. W. H. Tice and W. H. Tice.

Charter members of the Wellington Kiwanis club are: A. M. Duval, president; E. C. Cayton, vice president; F. L. Emanuel, secretary; E. M. Hunter, treasurer; C. C. Small, district trustee; H. A. Phillips, Deskins Wells, C. R. Joyner, Joe Baumgardner, Chas. D. Slay, E. W. Jones, and Cecil J. Callahan, directors; Judge Holton, Ray Goodson, Milus Little, Jeff Greer, I. A. Smith, W. Y. Burden, S. E. Larson, Claude McKinney, C. C. Bell, Henry Holcomb, Lee Fortenberry, E. I. Fox, J. H. Plemons, Henry Cocke, W. H. Tice, Jess Hancock, Hal Hearn, J. B. Castleberry, Luther Gribble, Ralph Lewis, Jno. W. Harper, W. O. Pettit, Walter Ricketts, Jack Gibson and E. A. Wells.

Mrs. C. C. Bishop and daughter, Dorothy Lee Love, and son, Burton Love, returned from Fort Worth Wednesday after several weeks visit with relatives there.

Alfred Emanuel and Miss Cora Cocke visited friends and relatives in Memphis Sunday.

V. A. Porter and family, L. C. Jones and family, L. J. Campbell and family, Leta May Chastain and Mrs. Mag Hall of Hedley enjoyed a fishing trip at Lelia Lake Wednesday evening.

Will Build Pool—

(Continued From Page 1)

which can be used and all donations to the Boy Scouts will be appreciated by them:

Large cooking utensils such as baking pans, iron skillets, pancake griddles, fifty-pound lard cans, cooking forks, bread knives, butcher knives, large stews, pie pans, wash boilers, tubs, milk cans, dish-pans, garbage cans, meat saw, salt and pepper shakers, dippers, lemon squeezers, meat platters, vegetable dishes, ladles and syrup containers.

Other things needed are tents and flies, fourteen by sixteen or larger; books and magazines, block planes, smoothing planes, hack saws, files, wood scrapers, vises, paint brushes, varnish, shellac, sand paper and work benches.

Athletic equipment needed include indoor bats, playground balls, volley balls, tennis nets, .22 single shot rifles and turkey feathers.

People who have any of these articles and wish to donate them to the Boy Scouts, are requested to write to I. E. Jolly, scout executive, at Memphis, Texas.

POWER SECRETARY

WASHINGTON, June 15.—Frank E. Bonner of Piedmont, California has been selected to succeed O. C. Merrill as executive secretary of the Federal Power Commission.

Secretary Good announced the selection Saturday in formally making public the commissioner's decision that it had jurisdiction in the Cumberland Falls, Ky., power development case.

Local Scout Is Entitled To 50 Merit Badges

Clark Chapman Will Become Eagle Scout Next Fall

Clark Chapman of Wellington, who has been working in the Leader office during the last few days to pass the test on printing, already has over fifty merit badges to his credit. Although he has the required number of merit badges to become an Eagle Scout, he must pass three other required tests such as lifesaving, etc.

Clark is 16 years old and joined his local troupe July 15, 1928. Today he has earned 50 merit badges, and by the time the next court of honor is held he will have 10 more.

He is a Star Scout now and he automatically becomes an Eagle Scout in October, if he continues his good record. This is the highest honor he may receive in scouting, and one envied by every "tenderfoot."

In the Panhandle Area scoutmasters are at a premium. In fact, L. E. Jolly, local executive, finds it extremely difficult to keep the work progressing among boys who are interested in the organization. But this is no problem for Clark Chapman. When his scoutmaster is absent, he does the officiating for his superior, and scouting in his community goes right ahead unhampered.

Winning merit badges is no small task. It requires considerable hard work and study to successfully complete the requirements.

"I find the easiest way to secure a merit badge," Clark said, "is to begin work immediately after a court of honor has adjourned. Then by the time another court is called, you are prepared."

Bees are wild animals and should be handled only in accordance with their natural activities. The man who understands the behavior of bees can do almost anything with them if he makes them do only the things it is natural for them to do. Bees are very much irritated by surflings, quick movement, for example, and they should be disturbed during handling as little as possible. With their peculiar eye structure they seem to notice motion more rapidly than they do objects. Stings

Helps Feed The Shrines

Among the scores of pretty California girls who helped to wait on the Shriners when they held their convention in Los Angeles recently was Senora Romero, pictured above with a stack of plates. The Shriners were given a real barbecue on the Meyer Ranch, near Los Angeles, and it took more than 5000 pounds of meat to feed them.

are to be avoided not only because the operator doesn't enjoy them, but because the odor of poison that gets into the air irritates the other bees and makes them more difficult to handle. The color of black excites bees, and black clothing, especially a black hat, should not be worn. The best time to handle bees is during the middle of warm days, preferably during a honey flow. Never handle them at night or on cold, wet days unless absolutely necessary.

Mrs. J. W. Dollar Dies Last Sunday J. L. Patterson Dies Recently

Mrs. Lucinda Lowe Dollar died at 4:10 in the afternoon of June 9 at her home on Route 2. She was born February 27, 1852 in Pickens county, Alabama, being 77 years, 3 months and 13 days of age at the time of her death. She was converted in her girlhood and served in the Methodist church until her death.

March 7, 1922, she was married to J. W. Dollar, who preceded her in death by four years, having died March 14, 1925.

Seven children survive, who are W. C. Dollar of Wellington, J. L. Dollar of Wellington, Mrs. J. W. Adcock of Wellington, Mrs. W. E. Oliver of Bookston, Mrs. C. N. Dingman of Paris, Mrs. J. S. Woodby of Paris and Mrs. R. F. Crumley of High. Twenty-four grand children and eight great grand children also survive.

Funeral services were held Mon-

day from the Methodist church at Adcock, conducted by Rev. J. A. Loney. Interment was made in the Dingman of Paris, Mrs. J. S. Woodby of Paris and Mrs. R. F. Crumley of High. Twenty-four grand children and eight great grand children also survive.

James Louis Patterson died May 30 at the home of his son, G. K. Patterson, at the age of 80 years and 26 days. He had lived in Wellington for almost seven years and had spent his life farming.

He was born May 4, 1849, and moved to Texas from Tennessee. He is survived by his wife, Mrs. L. E. Patterson of Wellington, four sons and one daughter who are James H. Patterson of Bomus, W. H. Patterson of Estelline, G. K. Patterson of Wellington, F. E. Patterson of Lamesa, and Mrs. L. Patterson of Lamesa, and Mrs. L. Patterson of Lamesa, and Mrs. L. Patterson of Lamesa.

H. Little of Kiowa, Okla. Thirty-four grandchildren and four great grandchildren also survive. Interment was made in the Wellington cemetery with Ray Goodson in charge of funeral arrangements.

When you want to relax and rest— Refresh yourself

Most of the time when you've worked or played until you're weary, only a refreshing drink will give you the needed refreshment.

OPERATING ECONOMY

AND REMARKABLY LOW PRICE MAKE WHIPPET EASY ON POCKETBOOK!

THE new Superior Whippet Four carries on the original Whippet's unsurpassed reputation for low operating and service costs. Though its higher compression engine develops more than 20% added horsepower, with faster speed and pick-up, there is no increase in Whippet's consumption of gas and oil.

And the new Superior Whippet Six is even more economical than its predecessor. Its increase in compression ratio assures more value from gas used, and more miles per gallon.

Date Trees Are Being Planted In Texas Valley

Experimental Program Being Conducted In Date Industry

College Station, Texas, June 19.—Nearly 1,000 offshoots from Persian date trees, gathered during an eight months tour of Iraq (Mesopotamia), have just been planted in the Lower Rio Grande Valley in the experimental program being conducted by the Experiment Station of the A. and M. College of Texas in cooperation with the United States Department of Agriculture to develop the industry in Texas. Announcement to this effect was made here following conference between T. Ralph Robinson, plant breeder of the Bureau of Plant Industry, U. S. D. A., and Director A. B. Conner of the Texas Agricultural Experiment Station. Mr. Robinson here following a week at the College substation of the Texas Agricultural Experiment Station where he assisted Superintendent W. H. Friend in planting the shipment.

The date offshoots were obtained from native groves of Iraq by Ralph W. Nixon, of the United States Department of Agriculture, who made a special study of date production along the Persian Gulf and selected many rain resistant varieties which it is believed will thrive under the climatic conditions prevalent in the Rio Grande Valley section of Texas. The expedition for gathering offshoots was made possible by special appropriation by Congress through the efforts of Congressman John Garner of Texas. The shipment, comprising 886 offshoots and representing twenty-seven distinct varieties, was assigned to the Texas Station by the United States Department of Agriculture for trial in the Valley country where climatic conditions are somewhat similar to that where the shoots were gathered.

"This shipment of dates," said Mr. Robinson, "is the most important ever received in this country." In order to guard against the introduction of harmful insect pests Robinson said.

Cat Nurses Fox Puppies

The canine and feline may be hereditary enemies, but out at Elko, Nevada, when litters of silver and blue foxes proved too large for the mothers to take care of, cats were called in to pinch hit.

Rodeo And Horse Show State Fair

DALLAS, June 17.—A world champion rodeo, and combined horse show and style revue will be featured in the new 6,000 seat capacity Livestock Coliseum at the State Fair of Texas, according to T. E. Jackson, president, and Roy Rupard, secretary of the state exposition.

The horse show and style revue will be one of the most elaborate entertainments of its kind ever staged in this country. Committees are now working on plans for the horse show under the supervision of Otto Herold, director in charge.

W. T. Johnson, millionaire West Texas cattleman will produce the rodeo. As this "corral meet" comes so late in the year, points awarded will have much to do in deciding championships for 1929.

with the offshoots, the latter were subjected to drastic "cooking" treatment at Washington, D. C., before shipment to Texas for planting. "Only a limited area of the United States is adapted to date production and a good per centage of this area lies in Texas," Mr. Robinson said.

Instructions Are Given Club Girls In Dress Contest

By VEDA SWAFFORD
The girls 4-H dress contest will be held Saturday, June 29, at 2 p. m., and each girl must have her dress made and pressed and labeled by that time. All dresses and stories must be to the home agent by 12 o'clock that day so the garments may be judged by 2 p. m. The review will begin promptly at 2:30 p. m.

Former Teachers Of Collingsworth Marry Recently

Announcement has been received of the marriage of Eric Ming of

All girls in Class 1 must write a story on "How I Planned My School Costume." All girls in Class 2 must write on "How and Why I Planned My Spring and Summer Wardrobe."

This article must include an inventory of all clothing on hand January 1 that can be worn through 1929, all garments needed to be added to the list, and price lists of clothing bought and on hand. This is easy. Just pile out all your clothing on the bed and look it over and make your lists from that.

In the contest most stress will be placed on the story and beauty of the dress and its accessories on the girl. Workmanship, etc., will be secondary.

All stories must be on letter sized paper (8 1/2 inches by 11 inches) in ink or typewriter.

Bellview, N. M., to Miss Novie D. Hamilton of Abilene, which was solemnized at Clovis, New Mexico, June 3. Mr. and Mrs. Ming are spending their honeymoon at Las Vegas, N. M.

Both Mr. and Mrs. Ming are well known in Collingsworth county, having taught in the Quail school for several years. Mr. Ming also taught for a time at Salt Fork as well as Quail.

Our EZEFIT Trusses will hold the most difficult of ruptures. The KANTSLEIP pad does just what its name implies. Fitted by us, your rupture troubles are over.

We can fit any of the fourteen different kinds of ruptures. Sizes run from six years to the largest truss made. Cochran Drug Co.

FINE-CAR FEATURES

COMBINED ONLY IN MARQUETTE IN THE \$1000 CLASS

It's pretty hard to catalogue a car like the Marquette—and give anything like a true idea of what you get in this car in the \$1000 class. This new six is such a revolutionary value that you've actually got to see and drive it to realize what a great car it is!

Just as an indication of the value, rare value—in this splendid new six—here are a few of more than 66 fine-car features that it embodies—features combined for the first time on a car in the \$1000 field.

Wheelbase 114 inches.
Closed Bodies by Fisher.
Non-glare Fisher VV type ventilating windshield.
New type mohair upholstery.
Spacious rear seat.
Adjustable front seat.
Remarkable power plant—67.5 brake horsepower.
Rubber engine mountings.
Thermostatically-controlled water cooling.
Full-crown one-piece fenders
Chrome-plated cowl lights and cowl moulding.
Built-in bumper brackets integral with frame.

Running board fully bound, with no exposed screws.
Completely sealed engine.
Forced lubrication.
Lovejoy hydraulic shock absorbers, both front and rear.
Four-wheel internal-expanding brakes.
Adjustable steering wheel.
Hydrostatic gasoline gauge on dash.
Guide tilt-ray lamps.
A host of other extraordinary features that combine to make the Marquette America's most complete car in the \$1000 field.
