Water Everywhere

City Water department crews were busy all day Tuesday trying to plug three water main breaks, including the one in the downtown area near the City National Bank on Elm.

Water Lines Fixed

"Earth Tremor" Caused Breaks?

Colorado City's water supply was getting back to normal late Wednesday after three water lines split about midnight Monday.

The exact reason for the breaks is not known but City Manager J. A. Sadler Jr., believes there must have been a slight earth tremor.

This would seem to be the only explanation for all the breaks occurring at once, the city manager said, noting that he has heard a large water main was ruptured about that same time in Sweetwater.

The breaks in water lines in Colorado City occurred in the downtown area of Elm; west of the refinery area and in the 800 block of Pine Street.

The line near the refinery was a 16-inch line, the larger of two lines that leads to the city water storage area from the water treatment plant.

The break on Pine Street was in a 10-inch line and the line

that was ruptured downtown was four-inches. All the pipes were cast iron.

City water department employees worked on the lines from midnight Monday until the two smaller lines were back in service about 23 hours later at 11 p.m. Tuesday.

The larger line required a piece of pipe that had to be brought here from Abilene. It was expected to be back in service by late Wednesday.

All pumps on the water system had to be shut down for a time after the breaks occurred until valves could be cut off in order to stop the loss of water, Sadler pointed out.

He estimated that about 200,000 gallons of water were lost by the breaks.

The loss of water pressure Tuesday morning was due to the pumps being shut-off, Sadler said.

"We apologize for any incon-

venience caused residents of the city by the rusty and muddy water in the water system, but it was beyond our control," Sadler said.

All of the rust and mud was expected to be out of the water lines by late Wednesday, the city manager reported.

Sadler hastened to add that at no time was there any danger of city residents having to go without water for any length of time as there were 2,000,000 gallons of water in reserve, half of which was at the water treatment plant and the other half at the north water works.

There was also a drop in pressure as the result of stopping the pumps from pumping water from the storage area to the water tower.

The water tower is now full again and everything is back to normal, Sadler noted, praising water department employees for their long hours of work to repair the breaks.

Fingerprints Key In Case

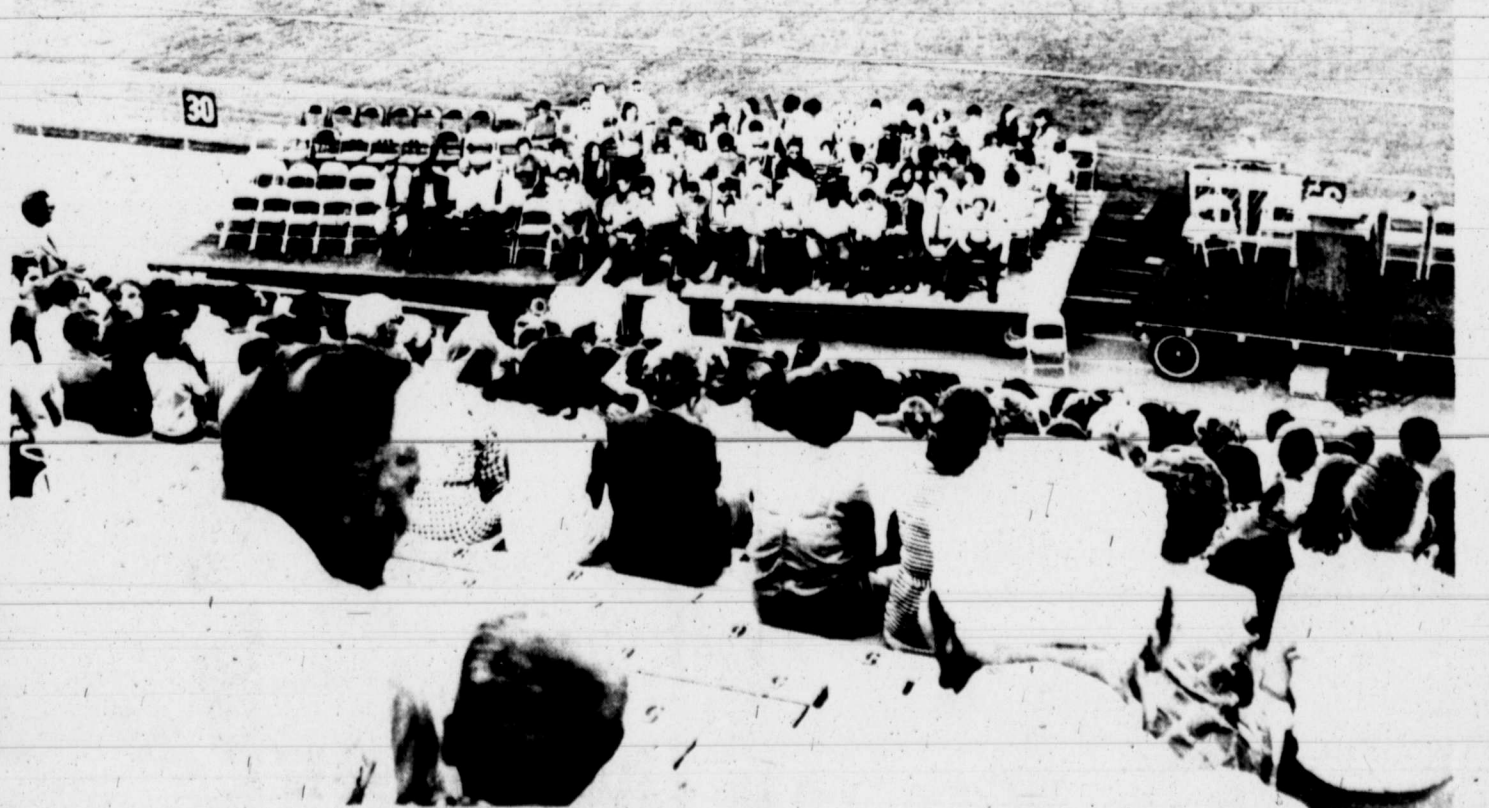

Officers have hoped that finger prints would be a key aid toward solving the criminal assault and robbery of a 78-year-old widow in her home here.

But these hopes are dimming.

GREAT GENEROSITY

For many years, the American Legion here played an extremely important part in the lives of Colorado City.

This was true of the American Legion in cities and towns throughout the United States.

However, in recent years, the Legion membership dwindled, leaving precious few to carry out the aims and achieve the Legion's goals.

The Legion here recently announced that it was turning over ownership of its building at East Third and Chesnut to the Mitchell County Boys Club.

It was a generous act on the part of the Legionaires, one for which they should be praised and one for which they will long be remembered.

The gift will help give Mitchell County boys a place to have fun -- an objective for which members of the Legion risked their lives in war.

The surprising Maverick.

It's a comfortable, 6-cylinder American compact
that's actually priced *below* the Volkswagen 113.

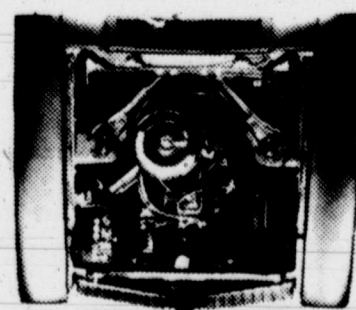

If you can afford a Volkswagen 113 - or almost any
little import - you can afford a Maverick. Look:

FORD MAVERICK	2-door	6-cylinder	\$2,140.*
VW 113 (Super Beetle)	2-door	4-cylinder	\$2,159.*
TOYOTA COROLLA 1600	2-door	4-cylinder	\$2,109.*
DATSUN PL 510	2-door	4-cylinder	\$2,306.*

*Manufacturer's suggested retail price for 2-door models. Excludes dealer preparation charges if any, destination charges, title and taxes.

NOTE: People ask us how we can afford to offer a roomy, 6-cylinder compact at about the same price as the little imports. First, we've been making small cars since 1908. Experience helps. Second, we haven't changed Maverick - except for mechanical improvements - since we first introduced it. That kind of continuity helps to control costs.

Third, recent currency revaluations and devaluations have helped restore the competitive stance of American manufacturers.

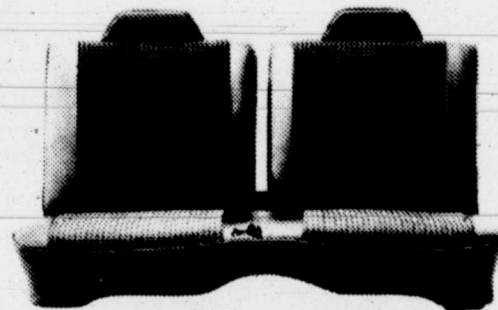

Most little imports give you 4-cylinder engines. Maverick gives you a 6-cylinder engine.

It's smooth. It's reliable. It lets you accelerate into turnpike traffic with confidence and hold your own on steep hills. And it delivers surprisingly good gas mileage.

A good car for long trips.

Maverick's rear track is 2.9" wider than Volkswagen's. Its wheelbase is 7.7" longer. There's a bit more weight, too. By themselves, these differences aren't very big - but they can add up to a big difference in the way Maverick drives and handles the open road.

Better idea for safety... buckle up!

Ample room inside.

Maverick's front seat, for example: over 8" more shoulder room than Volkswagen 113. There's no wasted space inside Maverick. At the same time, none of that small-car crowded feeling.

Maintenance: Even simpler, more convenient than the little imports.

VW, for example, recommends normal service every 3000 miles or three months, whichever comes first. On Maverick, it's 6000 miles or six months. So Maverick's recommended service interval is twice as long as Volkswagen's.

We also designed Maverick to be a simple machine to care for. In fact, we've even prepared a manual which tells you how to do many maintenance jobs yourself.

One more convenience: there are over 5,600 Ford dealers in the country. VW has about 1,100.

INDUSTRY From Page 1 decided.

Anyone wanting to give a tip should phone or write the Colorado City Chamber of Commerce. Tips will be worked on by members of the Industrial Team as well as by members of the Chamber of Commerce Industrial Committee and its Contact Team.

The reward for tips on industry program is in effect in a number of cities and has been successful in helping to secure industries.

Industrial Team members have found in the past that one of the greatest problems in securing new industry is locating industry that is unhappy in its present location and situation.

In the past, people have said that on visits with relatives and friends in other towns and states, they have heard comments about an industry wanting to change its location but they didn't think to see if they'd be interested in Colorado City.

Drew Ballard, Chamber of Commerce director, who was one of the originators of the reward program idea, pointed out that one large industry was attracted to Georgetown from an east coast state.

The move came about after a Georgetown resident was told the industry was looking for a new home and the man took that information to Georgetown officials.

Members of the Colorado City Industrial Team who will work on tips are Charles Thompson, G. D. Foster, J. W. Randle, Ralph Lee, Bob Reilly, J. S. Craddock Jr., J. P. Hendrix, Charles Root and Mac McKinnon.

Members of the Colorado City Chamber of Commerce Industrial Committee are Charles Root, Lloyd McKee, Kent Gentry, J. A. Sadler Jr., Charles Godwin, J. W. Randle, G. D. Foster, Leonard Morris, Don Benson, Joe Bell and Mac McKinnon, chairman.

Members of the Industrial Contact Team, who will do preliminary work with industrial prospects, are Chairman Darrell Rains, Trelyn Kelley, Bobby Lemons, J.A. Sadler Jr., Don Benson and Willie Landau.
