If your "innards" actually looked and worked like they're pictured in television commercials, you wouldn't need the doctor—the fellow to see in an emergency would be the plumber.

Perhaps they do not realize that such practice works a hardship on the composing department of the newspaper. It causes errors and the composition is not as good as it could be if the compositors have plenty of time on it.

We have to set a deadline because we must get the papers that go to Roscoe and Hemphill routes in the mail by a certain time on Thursday for our subscribers to get their paper on Friday.

Our subscribers want to get their paper on Friday and we want to get it to them on time. We need the cooperation of our merchants to do it.

Wednesday at noon is the deadline. If every merchant waits—and most of them do—for the deadline to get his copy for his ad in our office we must rush like mad to get everything ready to go into the forms that make the paper. If every merchant—except grocers—would get their copy for their ad to our office on Friday or Monday we would appreciate the cooperation.

It would help also for those who have news items to report would phone it in or send it in just as soon after the news happens as you can. May we drop a hint, too, that when you call the office to report news you can save a lot of time for yourself and us too if you will give the item to the one that answers the telephone rather than wait to give it to a certain person.

Conservation Reserve Contracts Will Not Be Extended Any More

Chairman Orrion J. Linnam of the Mitchell County Agricultural Stabilization and Conservation Committee has announced that Conservation Reserve Contracts which expire in 1960 or later years are no longer eligible to be extended for an additional period of years.
