W.G. Finney Attends School

W. G. Finney, Peace Justice of Precinct 1, Lamb County has just completed 20 classroom hours of the mandatory 40 hours as passed by the 62nd Legislature in the last session.

Only licensed attorneys or Justice's of Peace who have served eight years or longer in office are exempt from the classes.

Such schools are being conducted throughout the state. Judge Finney attended the first session which was held at Lubbock.

Emphasized were general provisions of the new legislation dealing with arrests, with or without warrants, civil disturbance, the penal code, court procedure, offenses against persons, offenses against property and other aspects of the office of the Justice of Peace.

The school was made possible by a grant secured by

B-Team Schedule Announced At Booster Club Meeting

Olton Booster Club met in the school cafeteria Monday night for a regular business meeting after which Coach Ray Kinnison introduced the players of the week and the Mustang of the week.

Defensive player of the week went to Gale Long. Gale played an outstanding game Friday night and made some very crucial tackles in the game. On the first offensive play of the game, he dropped the Tahoka runner for a four yard loss back to the Tahoka 16. He made several more tackles and put the rush on the passer also. Last week, however, wasn't the first good game for Gale. He gives all he has to give every game.

Offensive player of the week goes to none other than Marlos May. Marlos has been very outstanding this season. He is the leading ground gainer for the Mustangs with nearly 8 yards per carry. Marlos is very quiet and most of the time has a smile on his face. But he has played all year with sore throats, very bad colds, pulled muscles, and sore spots that would have side lined others but not Marlos. He is one who never complains. He just tries to do his job to perfection whether it is on the foot-

ball field, in the class room, or wherever.

"Mustang of the Week" goes to a very deserving fellow, Steve Stockdale. Steve was selected this week because of his leadership, his spirit and enthusiasm for the team. He puts all he has into the game. He is a fine leader whether he is on or off of the field. Steve is another one who had had his lumps and went ahead and played with them.

Coach Kinnison gave his report on the Tahoka game and showed the game film to the members present at the meeting.

Kinnison announced that Olton is fielding a B-team as of this week. He said that he was doing it in order to give more boys more experience. He says that it will cut the size of the varsity traveling squad, but the boys would be getting playing experience instead of standing on the side line experience.

The B-team schedule is as follows:

Sept. 30 Plains there 7:00
Oct. 7 Crosbyton there 7:00
Oct. 21 Dimmitt there 7:30
Oct. 28 Floydada there 7:00
Nov. 11 Abernathy there 7:30

Speaking of last week's game with Tahoka, Coach Kinnison said that he was disappointed in the game.

He said, "We played the first quarter and the fourth quarters and that's it."

"We just didn't do it in the second and third quarters and first of the fourth quarter. Then we picked back up and got right after them."

He went on "In just plain language, we just haven't put one all together yet. I'm not making any excuses because we have a much better team than we have shown. We haven't been able to make the big play when we need to all of the time."

"I am still trying to get the best people on the field at the same time and the boys are becoming more confident of themselves all of the time."

"Starting district play this week, the Mustangs are going to have to put it all together and play all 48 minutes this Friday night."

Next week the Booster Club will meet at 7:30 in the High School building.

Grid District Play Gets Under Way

Olton's Mustangs hit the road again this weekend as they travel to Friona Friday night for the first game of district play for either of the two teams.

Game time this week is at 7:30.

Friona is coming off of a win over the Muleshoe Mules. They defeated the Mules 13 to 6 last Friday night. Local scouts for the Mustangs said that Friona beat Muleshoe at their own game. That is just powering it up the middle and keeping the ball for most of the night.

Friona ran 49 offensive plays in beating the Mules. The third quarter was the only bad quarter that the Chiefs had and it wasn't too bad as they fumbled three times and held the Mules on the Friona 3 yard line for four downs straight to regain the ball.

Friona passed 17 times and completed 8 and scored one touchdown by passing. The Chiefs will probably run same defense and offense that Muleshoe ran against Olton. They have been running this same type of systems so far this year, but you never know until you get on the field what they may throw at you.

The Chiefs have a smaller size team than Muleshoe had but they are quicker coming off of the ball and quicker in moving on defense also. Coach Ben Cates gave the scouting report and he said that Friona won the game by just not giving up. He said that Muleshoe got every advantage that could be gotten but that the scrappy Fri-

ona bunch just didn't know what let up or quit meant and that they just kept dishing it out to Muleshoe and won the game by doing so. Cates finished by saying that they are just a well balanced team that plays to win.

When interviewed about the upcoming Friday night game, Favian Minjarez said, "I'm ready to go to Friona and kick them around and win the game!!! We have all of the material and personnel to have a

very good team and I think that starting with district play and Friona Friday night you are going to see a bunch of rough and ready Mustangs.

"I'm tired and I think that the rest of the bunch are tired also of being beaten and we are going to do something about it. Also we have the best Coach and coaching staff that we have ever had. They have done a great job for us and now it is our turn to do something."

Steve Lewis says "We have confidence in each other now and we are ready to put one all together instead of just playing now and then. We're going to win this one Friday night."

Steve Stockdale said, "Starting district play is just like starting a new season and we are going to start with a win over Friona. I know that they will be up high after beating Muleshoe. But we can let them right back down!"

Passing Of School Buses Prohibited By New Law

Area motorists are reminded of the new State law which no longer permits Texas motorists to stop and then pass a school bus which is loading or unloading children.

According to Superintendent Joe Turner, a number of violations have been noted concerning the law.

In the past, motorists were permitted to proceed with caution after coming to a stop when a bus was loading or unloading. Now the law states that drivers must stop and remain stopped as long as the flashing lights on the bus are in operation.

Vehicles on another roadway of a divided highway are

not required to stop and no stops are necessary if the bus has stopped in a loading zone of a controlled access highway where pedestrians are not permitted to cross.

Turner asked that motorists keep this new law in mind which was passed for the safety of all the children.

Congressman Bob Price To Serve As Group Leader

Congressman Bob Price has been asked by the sponsoring Federal and State agencies to act as group leader at a Sept. 28-30 conference designed to see what can be done to improve animal waste disposal.

The National Symposium on Animal Waste Management will be co-sponsored by the U. S. Department of Agriculture, Environmental Protection Agency, Council of State Governments, and the Association of State Universities and Land Grant Colleges.

"Livestock and poultry producers are faced with serious problems as they struggle to comply with new laws and regulations on animal waste management. I am convinced that most producers are willing to adjust their operations where necessary to assist in environmental improvement," Price said.

"I believe this symposium will provide us with a timely forum from which will come ideas and proposals for better assistance to producers across the nation as well as general benefits to the public," he added.

The House Agricultural Committee member said he accepted the chairmanship because of his concern about the environment and his concern about the possible bad economic effect of pollution control on feed lots in the Panhandle.

Price will chair the work group discussing "action pro-

grams" with specific reference to present waste management problems of farmers, ranchers, and feedlot operators and the Federal programs which can assist in solving these problems.

At the request of Congressman Price two Panhandle feedlot operators have been invited to attend the symposium. They are Tom Herrick of Amarillo and Joe Easley of Hereford.

Findings and recommendations of the Price work group will be included in the final symposium proceedings which will be made available to Congress, State and Federal agencies, farm organizations and the public.

Turkey Dinner Set Oct. 8

Ticket sales are underway for the Community Turkey Dinner to be served Friday, Oct. 8, in the School Cafeteria.

Serving of food will begin at 5 p. m. and continue until game time. Mrs. Jack Allcorn, chairman urges local fans and Littlefield visitors to share "turkey and all the trimmings" at this pre-game meal to be served by Woman's Club Council.

Tickets may be purchased from any member of Olton Garden Club, Olton Study Club or TOPS Club at \$1.75 for adults and \$1 for children 12 years and under.

Mrs. Sherman Holds Lead, Howard, Roberson Close

The three top grid guessers maintained their positions this week in season's standings as Ruby Lee Sherman went ahead with 42 points followed by Rick Howard and T. J. Roberson, each with 39 points.

Close behind is Dale Riggs and Jim Hyatt with 38 total points. Nosing up behind them with 37 points are Gary Davis, Harold Lloyd, Raul Munoz and Daniel Ray.

This week's winner is a tie between Roy Salas and T. J. Roberson, who missed two games each and were five points off on the tie-breaker score. They will split first and second prizes of \$5 and \$3, each receiving \$4.

Third place goes to Alan Duncan of Roswell, N. M. who also missed two games. However, he was 18 points off on the tie-breaker so he will get

the \$2 third prize money.

Carlene Lloyd was running neck and neck with the winners but was off 19 points on the tie-breaker to be shut out of the money.

In checking the contest this week, everyone was guaranteed at least one correct. The reason for this being the game between Bovina and Lazbuddie was entered in the contest twice. Therefore, everyone was credited with a point for the game numbered 29-30.

Remember, it isn't too late to get your entries in this week. Just pick up a copy of last week's Enterprise, fill in the entry blank and drop it in one of the envelopes supplied at the businesses that are sponsoring the contest. You could be a winner of two tickets to the New Year's Cotton Bowl Game or the Sun Bowl Game.

Beef Consumption Increase Brightens Cattle Business

People in the cattle business can look to the future with optimism as beef consumption continues its upward spiral across the country, according to Dr. Ed Uvacek, livestock marketing specialist with the Texas Agricultural Extension Service.

The specialist refers to a recent U. S. Department of Agriculture research publication which states that beef now accounts for about two-thirds of all red meat consumed in the United States.

Says Uvacek, "Continuation of the present per capita trends is expected and this coupled with an increasing population will call for a third more beef by 1980. The average American today consumes about 114 pounds of beef annually."

The expansion of beef cow numbers may hold the real key to meeting this increased demand for beef, explains the specialist. Today practically all available calves are being used for feeders, and calf numbers will have to be increased to maintain the growth of the beef industry.

"Cattle feedlots over the U. S. handle more beef today than the entire cattle industry produced a scant 20 years ago," notes Uvacek. "Yet the industry still needs to increase its output by a third to keep pace with trends in population and

per capita consumption over the next 10 years."

The specialist suggests that cattle feeders take a look at the live futures market as a means of reducing some of the risk in the cattle feeding business that results from price changes. Contract agreements also help the producer lessen risk, he points out.

Dear Editor

This enclosed clipping, was taken from W. A. McGalliard's column of The Daily Ardmoreite.

You will probably wonder why one takes a daily paper from that far away. It so happens I have a sister Mrs. Lela Birdwell who lives there, also our family has been going to Ardmore, since Aug. 1895, and this way it's kinda like getting a letter from home.

Also, "Mac McGalliard" is writing a book on the Chickasaw Indian Nation, and history is right down my alley, especially early day history.

My family went there when I was two years old, and we left there October 1926, and came to Olton with my family in covered wagons, arriving October 25, 1926, at Tom Mason's place.

CONSIDERATION FOR THE AGED

A reader passed along the following "Beatitudes for Friends of the Aged", written on the pattern of the "Blessed Are's" in the Bible.

ten on the pattern of the "Blessed Are's" in the Bible.

"Blessed are they who understand My faltering step and palsied hand, Blessed are they who know that my ears today

Must strain to catch the things they say. Blessed are they who seem to know That my eyes are dim and my wits are slow.

Blessed are they who looked away When coffee spilled at table today. Blessed are they with a cheery smile Who stop to chat for a little while.

Blessed are they who never say, 'You've told that story twice today', Blessed are they who know the ways To bring back memories of yesterdays.

Blessed are they who make it known That I'm loved, respected and not alone. Blessed are they who know I'm at a loss To find the strength to carry the Cross.

Blessed are they who ease the days On my journey Home in loving ways."

You know what a limiting factor time is when planting starts in the spring. Weather puts you in a bind for enough time to get all the operations done properly. We know how often limited time cuts into fertilizer application.

We also know that you have more time for fertilizer application in the fall just after harvest. So we're suggesting that you contact us today for Ammo-Phos or Olin Nitrogen Fertilizers for immediate application.

When you get your fertilizer out in the fall, you know it will be there in the spring. What you may not know is that

fertilizer applied in the fall and plowed under with crop residue actually lets you plant faster. That's because crop residue is more thoroughly decomposed, eliminating trash problems.

Call us today and let's work out your needs. We have plenty of Ammo-Phos Fertilizer, made only by Olin, and Olin Nitrogen Fertilizers in stock for immediate delivery. Do it now.

MRS. ELDON TOWRY

Cook Of The Week

Our Cook of the Week, Mrs. Eldon Towry, does not need tranquilizers - she finds relaxation and satisfaction and a glow of pride in "doing things".

"I love what I do," she exclaims - and she does many things.

"Professional" just begins to describe the work Marjorie Towry does when she refinishes or re-upholsters an old piece of furniture. Everything she undertakes, she does as though it were her own and the completed project many times turns out prettier than when it was new.

Marjorie first became interested in working with furniture when she was just 13. The owner of a woodwork shop helped her build a small half-circle shaped table with drawers. She still has the table although she has re-done it in avocado antique.

She refinished two chests - one a small one that had belonged to her grandfather and had been exposed to outdoor weather - and put them together for a much-used chest in her sewing room which friends call "the hole". Atop the chest is yet another bit of her refinishing work - a clock which belonged to her great-grandfather.

Marjorie likes to see something old and seemingly worthless turn into something useful and beautiful. She is particularly proud of a loveseat and matching chair which she created from about \$40 worth of broken down, used furniture and Belgium linen which she found on sale.

An expert seamstress, Marjorie sews for herself, her daughters and her grandchildren. She has sewed for the public but now helps her cousin, Billie Edwards, make draperies and accessories.

Not content to sew by a pattern, Marjorie designs and then seams up the clothes she makes. A little nine-year-old granddaughter, complimented on a pretty pants suit, proudly proclaimed, "And my grandmother made it without a pattern!"

"Then he kissed me."

Margaret Thomas In Cast Of WTSU Drama Production

Margaret Thomas, a sophomore student at West Texas State University in Canyon, will play a minor role in Henry David Thoreau's spiritual evolution after his sojourn at Walden Pond, titled, "The Night Thoreau Spent in Jail", to open Sept. 29 at the university.

The play by Jerome Lawrence and Robert E. Lee, authors of "Inherit the Wind," will be presented at 8 p. m. Wednesday, Sept. 29, through Friday, Oct. 1, and 2:30 p. m. Sunday, Oct. 3, in the Branding Iron Theatre.

The drama, which the authors describe as "a mystical

experience which proves Thoreau's inner self," relates the Concord transcendentalist's brief imprisonment in 1846 for refusing to pay a poll tax he felt would support the Mexican-American War, which the philosopher believed to be immoral. Leading the cast is Travis Dean, junior from Amarillo, as Thoreau-not, the authors say, "the bearded, weary-eyed Thoreau of the recent postage-stamp," but a "blazing, contemporary outraged with the insanity and insanity of civilization around him."

Cast in the role of Thoreau's fellow Concord titan, Ralph Waldo Emerson, is Forrest Baldwin, Amarillo senior; Lydian Emerson, his wife, will be portrayed by Cindy Newman, Canyon senior. Thoreau's illiterate cellmate, Bailey, is played by Harrell (Pinkie) Floyd, Canyon junior.

Tickets are priced at \$2 for adults and \$1.50 for non-WTSU students. Admission is free for faculty and WTSU students with activity cards. Tickets are on sale at the Branding Iron Theatre box office, open from 11 a. m. to 5 p. m. weekdays.

Margaret Thomas, a 1970 graduate of Olton High School is the daughter of Mrs. Juanita Thomas.

Bulldogs Chew Mustangs, PAT's Make The Difference

Tahoka slipped by the Mustangs 14 to 12 Friday night in another one that the Mustangs just didn't put "all together."

Tahoka played the odds by punting three times while in Olton territory.

Finally the odds paid off as Olton fumbled with Tahoka recovering on the Olton 15 and taking it in for the winning TD.

Tahoka received the opening kickoff on their own 20 after Stockdale's kick-off sailed into the end zone. First down found Gale Long dropping Tahoka's big gun Ladd Roberts for a four yard loss back to the 16. But on second down they made up for the loss as they faked up the middle and gave it to the second man through the hole and Dean Rogers was finally brought down on the Bulldog 30 by Robert Ahrens.

With a first down and breathing room, Bulldog Roberts got four more to the 34. But the Mustangs had settled down now and went to work. Two running plays by Rogers still left fourth down and one needed.

Atwell punted for the Dogs to the Olton 25. Olton cranked up the offensive machine and got a first down at the 35 with Workman totting the pigskin. Workman got another first down to the Mustang 47. Stockdale passed to Marlos May with a screen pass to the Tahoka 40. This play could have gone all the way as there was only one defender left but as luck would have it one of the Olton blockers knocked a Tahoka guy down but he still got up and grabbed Marlos by the leg as he came by.

With the first at the Tahoka 40, Workman broke loose for 10 more yards to the Dog 30. On first down Stockdale passed to Ahrens but Tahoka's Gary McCord got his hand up and batted the ball away.

On third down good old Marlos ripped the Dogs' line for 11 yards and another first down to the Tahoka 19. Stockdale kept to the 11 but a red flag nullified the run and Olton was penalized 15 yards back to the 34.

Workman tried the line and got 1 and a pass fell incomplete and May bulled his way to the 26. Stockdale tried to find a receiver for his pass on fourth down but before he could unload it a Tahoka defender dropped him from behind at the Tahoka 41 to kill the Mustang drive. The Mustang defensive held

on first down allowing Tahoka no gain only to have the second play pass complete to the Olton 45 and another first down.

But this time Tahoka fumbled with Marlos May recovering for the Mustangs at the Olton 45.

First down found May churning to the Tahoka 47. Workman busted to inside the 45 for another Mustang first down. Faced with third down and 15 needed for the first, Marlos May took a Stockdale handoff and ripped straight ahead through the Bulldog line and outran the secondary for 50 yards and the first Mustang score of the night. Extra point try failed.

Olton's defense came right back and forced the Dogs back from their 20 to the 10 before Tahoka punted to their 37.

But Tahoka's defense had stiffened up too and they held the Mustangs short of the first down at the Dog 32 to take over on downs.

Tahoka used four first downs and a timely penalty to move to the Mustang five yard stripe. Three running plays by Thomas and Roberts put the ball on the one foot marker. Thomas plunged in for the TD to tie the game with 2:31 left in the first half of play. Extra point try was good to put Tahoka in the lead 7 to 6.

Workman returned the kick-off 28 yards to the Olton 38. Stockdale and May moved the ball to the Tahoka 40 before time ended the first half of play.

Both teams swapped punts in the third quarter and early in the fourth quarter Tahoka pounced on an Olton fumble at the Olton 15. Tahoka had punted to the Olton 7 and Olton moved to the 15 before losing the ball by fumbling.

Tahoka used three plays to cover the 15 yards with the last one being a pass of 10 yards to end Louis Zedlitz for the TD. Extra point try was good to give the Bulldogs a 14 to 6 advantage.

Olton took the kickoff and marched straight up the field behind May, Workman and Fa-

vian Minjarez's running and Stockdale's passing. With 2:27 remaining in the game Olton was camped on the Tahoka 11.

On first down May plowed his way for five hard yards to the 6. Workman got three to the 3 and then the final 3 for the TD. A running attempt for the two extra points to tie the game was no good and Tahoka had the victory 14 to 12.

Odds Are Your '72 Harvest Won't Be As Good As This Year's

But you can cut those odds.

By taking some of the gamble out of next spring's planting and plowing down with Oxy's high-phosphate Zipp ® fertilizer. It cuts the odds by plenty.

Spring planting is no time to run out of time.

Or equipment or labor or dealer service. Or fertilizer. A few days at planting can make a lot of difference. One sure way to buy a few extra days next spring is plowing down this fall.

Fall plowdown's like insurance at no extra cost.

It gets your fertilizer down when the weather is right. When the soil is firm. And fertilizer is available on a no-wait basis.

Suppose next spring is not as dry as this one was. Wet, sloppy conditions could put a two or three week damper on your planting schedule. Fall plowdown won't improve next spring's weather delays. But it will insure that a good and proper fertilizer bed will be ready and waiting when you do start up.

Oxy can help.

See your Oxy dealer now about your fall fertilizer - high-phosphate Zipp. And get the jump on spring.

Dangers Of Pesticides Cited By Entomologist

Is an empty pesticide container really empty? Don't believe it, says Bill Clymer, Extension area entomologist at Amarillo.

There are always a few grains of powder or a little liquid on the sides of a container that can be just as dangerous as a full one. Proper disposal is the answer to prevention of damage to crops and perhaps injury or death to livestock and humans. Clymer offers some suggestions on disposing of used containers safely.

Glass should be wrapped in newspapers and then broken. Plastic and metal containers should be punctured and crushed and then buried at least 18 inches deep in an area isolated from crops, livestock or people. The site should not be in an area where the chemical might leach down into underground water supplies.

Paper and other combustible materials can be burned, but make sure the fumes and smoke cannot damage plants or animals, Clymer reminds. Sanitary landfills used by many cities and towns can be a good disposal spot, but a producer should check with the proper authorities before dumping the containers.

The question of using empty 55-gallon barrels always arises. Most people do not want to throw away containers that can be used for feed storage or as feed bunks. But the practice can be extremely dangerous, especially if the chemical had an arsenic base.

"You can burn them or wash them or anything else, but enough arsenic may still remain in the barrels to kill almost any animal," Clymer warns.

Any chemical kept over the winter should be sealed in an air-tight and water-tight container, and stored away from feed supplies in a barn.

When a producer is disposing of left-over pesticides, he should be careful where he

dumps the material, Clymer adds. A common practice is both aerial and ground spraying is to dump excess chemicals in draws or small grass areas. This can be extremely hazardous because cattle are often kept in these areas for short periods of time before working or shipment. They graze this grass that can have high amounts of dangerous pesticides, which may cause sickness or death to the animal.

HUNTING FOR DRYLAND --- This friendly little stranger was seen walking down Main Street Monday about noon, just waddling along and "quacking" a tune as he took his stroll. He was spotted by Ezra Whittington, who came to the newspaper office and said to grab a camera, there was a duck walking down main street. We grabbed the camera and in the meantime, Barry Thompson and Susan Nicholas also had spotted the duck ...walking across the street toward the South. To make a long story short, the critter was caught, pictured with his friends, then taken to the editor's home where a pen was erected. He stayed overnight and the next day and then left for parts unknown.

How is everybody doing in their six weeks exams?

Just think, Seniors, five more six weeks and we are out! The school year is passing fast and it will be no time till we are out for Thanksgiving Holidays. We got an hour and a half break this week when school was let out for the fair. How did everyone like it? Did all our boys win your girl a bear? Or were there some exceptions?

The Mustangs played a hard and difficult game Friday night. We were defeated 14 to 12 when Tahoka scored in the last few minutes of the game. Each player did a fine job but each one needs to have spirit within himself. Get out there and stomp Friona in the ground this Friday!

The freshman game was called off last Thursday because of rain. They will play their regular game this Thursday. Freshman football players are just as important as the varsity players even though very little recognition goes to them from the school body or coaches. They will be in the coming years be our varsity players. They are equal in any matter. Support ALL football players!

We are lacking something as a group in school this year. We haven't got it together. We've gotta be like one big family—willing to back each other up all the way. Everyone has gotta be accepted into this family for it to be a family. We are equal!

As a member of your family might have a birthday, a group of members of our family are in a sense having a season of special occasion. When you have a birthday, don't you expect to celebrate and be congratulated? Well, we think the members in our family who are having special occasions should be recognized in a very special way by the rest of our family. We all represent O.H.S. and these members we are talking about are representing our home in a special way. In case you haven't guessed these members, they are our football boys.

People have begged and pleaded and for some reason we can't all get together if one of our family members were sick wouldn't you visit them, try to cheer them up, and give them courage? Just think about it! Let's back them up, they are part of our family too!

Everything But The Kitchen Sink

BY MOZELLE TROTTER

One of the privileges of reading exchange papers is finding something clever that you might not otherwise get to read. Such is the case this week.

The following item was clipped from the Post Dispatch from Charles Didway's column (he's the Charles Didway who enters the Enterprise football contest and the lucky winner a few seasons back.). Mr. Didway says this was handed to him by a reader and is entitled "I Read This The Other Day."

"We Americans are a funny lot of strange people. Each year we eat 16 million pounds of aspirin, devote one day out of the year to our mothers - Mother's Day - and an entire week to pickles - National Pickle Week.

"We want the front of the bus, the back of the church and the middle of the road. After six months of using new bourbon-flavored toothpaste, the U. S. Test Group reported they had 40 percent more cavities, and they couldn't care less.

"This is an unusual time we live in. The prayer of the modern American seems to be, 'Dear God, I pray for patience and I want it right now.'

"We tie up the dog and let our 16-year-old sons run wild. An American will work hard on the farm so he can move into town so he can make more money so he can move back to the farm.

"He yells for speed laws and safe cars, but won't buy one unless he can go at least 100 mph. We are a country that has more food to eat than any other in the world and more diets to keep us from eating it.

"A woman called the welfare office the other day and asked for more money for a cradle for her baby. The welfare officer asked her what the baby was sleeping in now, and she said, 'The box our colored TV set came in.'

"Strange times we live in, ladies and gentlemen. Nowadays it even takes eight cents to say your two cents worth on a penny postcard. This is an age when

News Of Our Service Men

Navy Petty Officer Third Class Charles L. Hudgens, son of Mr. and Mrs. Albert E. Hudgens, and husband of the former Miss Francine Offield all of Olton, is aboard the aircraft carrier USS Independence, which is in the Eastern Atlantic participating in the NATO Strike Fleet Exercise Royal Knight.

The seven-day exercise which started Monday, (Sept. 27) includes 35 warships and 200 aircraft under the flags of Canada, the United Kingdom, Norway, the Netherlands and the United States.

Royal Knight is one in a series of regularly scheduled NATO training exercises designed to test the NATO Strike Fleet's combat effectiveness.

if you miss a day of work the government loses almost as much as you do.

"We used to have a group of men in our nation called the Minutemen. They came to our rescue in time of need. Today, the Minutemen is the guy who can make it to the refrigerator, fix a sandwich, open a can of beer, and be back in front of the TV before the minute commercial is over.

"Today it is expensive to raise kids. Not only do they expect an allowance but a guaranteed minimum wage. You can go broke just buying batteries for transistor radios.

"Today it seems to be the goal of many to live high off the hog or put a tiger in your tank, a dinosaur in your engine and expect our cars to purr like kittens.

"Our forefathers went out and built empires. Today you have to get a permit to add a room to your house.

"It is strange the things that are happening today. Did you know that man can live without air for seven minutes, without water for seven days, without food for seven weeks, and without brains for 70 years.

"Recently, we had a visitor in Chicago, a well known evangelist, and in our communications work we had to set up a whole program for him for a nationwide network hookup.

"The evangelist was talking and he announced that there are 726 different sins.

"No sooner had the network show finished than we started to receive thousands of requests for the list from people who thought they were missing something.

"In my Wall Street Journal today I saw this news story: 'Southern Pacific Railroad detectives followed a long extension cord into an idle box car recently where they found a hobo sleeping under an electric blanket.'

"The late and great Illinois Senator Dirksen had this to say about statistics: 'Washington carloadings are down 18 percent, booze consumption is up 30 percent, which proves that in the nation's capitol twice as many people get loaded as cars.'

TO DUMAS

Mr. and Mrs. Ray Copeland were in Dumas last weekend with their son and family, Mr. and Mrs. Bob Copeland, Shaunalee and Mike.

SUNDAY VISITORS

Mr. and Mrs. D. H. Ball had as guests Sunday afternoon his brother and sister-in-law, Mr. and Mrs. Lewis Ball of Hart Camp and their granddaughter, Robin Borden of Lubbock.

Accent on Health

Back in 1915, the Texas Health Department became the instrument for enforcement of the McNealus Anti-Pollution Act. That act was designed to "preserve the purity of our water supplies". Today Texas has more sewage treatment plants than any other state and ranks at the top in total number of public drinking water supplies.

Drinking water supplies serving communities, common carriers, food processing plants and parks are subject to thorough inspection of health officials. Plans for new systems as well as improvements and expansion of existing systems are reviewed for health hazards and compliance with Health Department rules and regulations. Water utility operators are examined by the Health Department and, where qualified, are issued a certificate of competency.

"The quantity and quality of drinking water in Texas is in excellent condition, at least for the moment," says C. K. Foster, Director of Sanitary Engineering Division of the Texas Health Department. "It's in much better condition now than 10 to 15 years ago, due to expansion and extension of facilities, and public awareness."

In Texas every community with a population of 10,000 or more now has an approved public water supply system, as do many smaller communities.

Travelers may have noticed that some communities have a sign posted at their city limits announcing that their municipal water supply has been approved by the State Health Department. This sign indicates

that the water supply does more than meet the minimum requirements of a public water supply and State Health Department regulations.

Today there are some 450 public water supplies across the state that have been approved by the State Health Department and certified as meeting high environmental health protection standards. Health officials say these systems serve approximately 90 percent of the population of Texas. They have achieved what amounts to a blue ribbon award for health protection and excellence. These 450 systems, while serving most of the population, represent only a small portion of the approximately 3,000 public water systems in Texas. The remainder are generally in accordance with the minimum standards set by the State Health Department.

FROM SPEARMAN

Charles Ray Ball of Spearman was here during the weekend with his parents, Mr. and Mrs. D. H. Ball.
