Resurfacing Of U. S. 80 Through City Is Okayed

4.5-Mile Project To Cost \$75,000

U. S. Highway 80 through downtown Colorado City will be resurfaced, reports the Texas Highway Department.

District Highway Engineer J. C. Roberts of Abilene made the announcement of the planned \$75,000 resurfacing project here Saturday.

To be resurfaced is the 4.5 miles of Highway 80 through Colorado City from the point west of town where it connects onto Interstate 20 to the point where it connects with Interstate 20 east of Colorado City.

Contract for the "bypass-to-bypass" resurfacing project will be let when the paving and surfacing contract is let for the 7.2 miles Interstate 20 loop around Colorado City to the north.

The Interstate 20 paving contract is to be let as soon as construction of grading and structures is completed—and is expected to be let before Jan. 1. Which means the contract for resurfacing 80 through Colorado City should be let before that date also.

The work through downtown Colorado City will be under the direction of Ben Wilkinson, Texas Highway Department supervising resident engineer here.

The announcement of the planned construction here was part of an \$827,400 program announced for this district. It will involve a total of 21 miles in this district—including the project here.

The announcement marked "success" on efforts by a group of local citizens for the resurfacing of 80 through Colorado City.

Roberts was presented a petition requesting the action by Colorado City Chamber of Commerce's Highway Committee here in July. The petition carried the signatures of 90 local citizens.

Roberts was also presented, at the same time, a resolution passed by City Council requesting the same action.

Representing Colorado City in that meeting with Roberts were:

Dr. Seth Cowan, Chamber president; Sam L. (Buzz) Majors, mayor pro tem; Dick Kendall, Chamber manager; and Jeff Taylor, chairman of the Chamber's Retail Merchants Committee.

Roberts assured the group at that time that he favored the action.

Trucker is Injured

Marvin Robertson, Big Spring truck driver, suffered broken bones in one foot and ankle sprains here Friday when he fell from his truck's trailer while it was parked on U. S. Highway 80 in the eastern part of town.

Robertson was attempting to tie-down a strap on the trailer's cover when he accidentally fell.

FORMER PASTOR

FIRST CHRISTIAN HONORS PICKETT

Rev. Frank Pickett, former pastor here and foreign missionary, will be honored by First Christian Church here today (Sunday).

Pickett, who pastored the church here several years ago, will speak at today's morning service at the church.

A tea honoring Pickett, his wife Beulah and daughter Amy will be conducted today at 3 p. m. The 3 to 5 p. m. tea will be conducted in the church's Fellowship Hall.

All of Pickett's local friends are cordially invited to attend both the morning service and the afternoon tea honoring him and his family, said Barrett.

The tea will be sponsored by the Membership Committee of First Christian.

Pickett recently returned from Paraguay after finishing 4 years of missionary work in that country. He worked through the United Christian Missionary Society in Paraguay.

Pickett, while a pastor here, began to study Spanish—which added to his keen interest in missions and led him to dedicate himself and his life to missionary work.

1st Methodist To Conduct Hymn Festival

First Methodist Church, 333 Chestnut St., will conduct a Hymn Festival today (Sunday) at 5:30 p. m.

The church is participating in the festival with thousands of other churches in all parts of the world, reports First Methodist pastor Rev. Darris Egger.

Every Methodist church observing the festival will include 4 hymns in their service. They are "Praise the Lord, the Almighty," "A Mighty Fortress is Our God," "Sing See FESTIVAL Pg. 5

Earl P. Price, Ex Resident, Dies Saturday

Funeral services for Earl P. Price, brother of 2 Colorado City residents, will be Monday in Fort Worth.

Price, about 70, died in Fort Worth about 6 a. m. Saturday. He was a resident of Colorado City in the 1920's.

He was the brother of Oscar B. Price, 705 Vine St., and Mrs. Henry Pond, 712 Pine St. He was also the brother of the late R. P. Price of Colorado City.

Services will be conducted Monday morning in the First Christian Church in Fort Worth. Burial will be in Honeygrove.

Price was a native of Fannin County.

Survivors include his widow of Fort Worth; a son, Dr. E. P. Price, Jr., of Fort Worth; O. Price and Mrs. Pond of Colorado City; and 5 grandchildren.

CHIEFS TRIUMPH BY 31-8 MARGIN

Wolves Lose District Opener to Lake View

Lake View's Chiefs, whooping down the warpath toward the 1961 District 3-AAA championship, cut Colorado City off at the pass here Friday night in Wolf Stadium with a decisive 31-8 triumph over the defending district co-champion Wolves.

The loss all but eliminated the Wolves from a chance at a clear-cut title, but, nevertheless, the Wolves of Coach Sam Christy are still very much in the running for a tie in the district chase.

Each of the 4 starting Chiefs backs crossed the double stripes—but not before the Wolves put on a defensive show. It was guard Darrel Davis, who is all but a cinch already for some all-district honors, and quarterback Danny Latimer, who might make the all-district team via his defensive work alone, who led the Wolf defenders.

Davis and Latimer had able help from sophomore Bill McGuire, center Larry Oliver, back Jimmy Womack, tackle Jerry Whitaker and end Steve Hillhouse.

The Chiefs scored 2 in the

second quarter and 1 each in the 2 final periods to completely dominate the offensive side of the affair. But the Wolves had their own show, if not on the scoreboard, as time after time play was halted to give a "rest" to a "shaken" Lake View offensive man.

Halfbacks Larry Hudson and Lehman Cauley, quarterback Jim Havlik and fullback Mike Sanders shared the Lake View scoring honors. But it was the hard-charging Sanders, a "shoo-in" for all-district honors, who made the Chiefs' run of the night.

He bucked up the middle with 9:37 gone in the third quarter and raced 48 yards to paydirt—and he did it before most of the Wolves even knew who had the ball.

Havlik did some fancy faking on the play and Sanders danced through into the second yard and was off and running, with an amazing total of 3 blockers surrounding him.

Before the Wolves began their chase. Only 2 Wolves had a chance to catch Sanders, but they were forced out by the 3 downfield blockers.

Tailback Ken Northcutt brought the chilled, wind-blown C-City fans to their feet early in the final quarter with his best run of the year—a 32-yard romp around right end for a TD.

Speedy Northcutt ducked around right end and wouldn't be denied as he bulled over 1 grasp and stepped out of the grasp of another. He raced on down the sidelines and did a waltz to stay in bounds after

See WOLVES Pg. 5

B-TEAMERS LOSE

Ninth, Eighth Take Victories

The Freshmen and eighth grade Junior Wolves racked up victories in Thursday night football action. The B-team Wolves and the seventh grade Junior Wolves dropped decisions in other action.

The Freshmen topped Anson 8-6 in a thriller in Anson. The eighth graders' B-squad

blanked the Lamesa eighth grade B-team 12-0 in a game in Lamesa.

The seventh graders lost 26-16 to Lamesa in Lamesa.

The Wolves' B-team fell to Stamford's B-team 26-14—in a game played in Starford.

Coach Bill Everett's Freshmen sneaked by Anson as left end David Bearden hauled in a 19-yard scoring pass from the arm of quarterback Ronnie Preston. The Junior Wolves were trailing 6-0 in the fourth period when the TD came.

Tailback Tommy Lindsey bucked over for the 2 extra points and the winning margin for the locals. Anson's score came in the third stanza.

The B-team eighth graders, coached by Howell Vineyard and paced by the scoring quarterback Elton Davis and wingback Jay Roy Sprott, nipped Lamesa's eighth graders 12-0.

Davis rolled over on a keeper around left end in the first quarter on a 20-yard run to paydirt Sprott, with 15 seconds left in the first half, skirted right end for 10 yards and the final score of the tight game. The game was divided into 15-minute quarters.

Leading the eighth graders' defensive efforts were guard Tommy Apple, guard Lynn Barnett and tackle Bill Martin.

Coach Bobby Cadell's seventh graders, in their last effort for him before he leaves for military service, fell to Lamesa 20-0.

Halfback Bobby Jump cut out up the middle for 60 yards in the first quarter to give the Junior Wolves scoring gear.

Coach Steve White presided over the game. The Wolves' B-team, led by quarterback Tommie Lindsey, won 26-14 over Stamford's B-team in Starford.

On The Job For United Fund

Don Benson, center, chairman of the 1961 Mitchell County United Fund campaign, discusses a United Fund pledge with Mrs. Jeff Walker, right. Miss Dolores Smith, already "convinced" by Benson, signs a pledge card at the left. Mrs. Walker and Miss Smith are employed by G. D. Foster Insurance. The annual UF campaign opened here Monday.

\$3,461.83 IN PAST 2 DAY

United Fund Contributions Mount to \$10,343.33 Total

Pledges and contributions to the 1961 Mitchell County United Fund began to pour in at a near-record rate here Thursday and Friday—in fact, at a \$1,700 per day clip those 2 days.

Pledges and collections leaped to a total of \$3,461.83 from the time Wednesday's counting ended until the second drive report was issued late Friday night.

The added revenue pushed the total collections and pledges up to the \$10,343.33 mark—or approaching 1/2 of the total 1961 goal of \$23,970.

United Fund president Bob Reilly and 1961 campaign chairman Henry Lewis were highly optimistic as the new total was announced.

"We are far ahead of last year at this same time of the drive (5 days)—there's no question about that," they said. "It's very encouraging."

Leading the way in the campaign to this point is the Advance Division which has counted a total of \$8,240 in pledges or collections. That's an increase of \$2,639 over Wednesday's counting of \$5,601.

But the other currently active Divisions were also making gains in the latest 2-day count.

There are a total of 8 divisions of the campaign—with only 5 active at the present. The other 3 plan to kick off their drives within the next 8 to 10 days.

The Special Gifts Division continued its "surprise" collection, pledges record as it

gained \$150 in the 2 days to hit the \$1,139 mark.

General Division, the largest single division of the campaign, reported a Friday night total of \$814.33—it had counted only \$252 through Wednesday night.

Employe Division, not yet in full-swing as cards are still being distributed and collected from UF workers in more than

150 individual businesses here, reported a total of \$134. An increase of \$105.50 from Wednesday.

Farm and Ranch Division, 1 of the 3 yet to begin its campaign, reports \$15 already in its coffers. It and the Westbrook and Loraine Divisions plan their kick off late this week or early next week.

CASH SALE TUESDAY

Bootlegging Truck On Auction Block

A bootlegger's truck goes on the auction block here Tuesday.

Mitchell County Sheriff Lewis Claxton will sell the 1949 Chevrolet 1 1/2-ton truck in a cash sale at Mitchell County Court House.

The truck was confiscated Wednesday, Mar. 1, along with a total of 180 cases of beer it contained. Sheriff's Deputy Roy Richards and City Patrolman Selma Dickson discovered the load in a check of vehicles northwest of Westbrook.

Judge Eldon Mahon, 32nd District Court, returned a judgement in favor of the Liquor Control Board here recently after the LBC filed for possession of the truck—normal legal action.

Mahon ruled that the truck be forfeited to the LBC and Claxton, again according to

the law, was instructed to sell it in a public auction for the LBC.

All proceeds from the truck, minus any sale costs, will go to the Liquor Control Board.

The truck was the property of a Sweetwater resident. A Sweetwater resident was driving the vehicle at the time it was stopped by Richards and Dickson.

The auction will be conducted by Claxton at the front (east) entrance to the County Court House. It will be sold on a cash basis only.

The auction begins at 2 p. m. Tuesday.

The truck will be on display west of the Court House both Monday and Tuesday.

Claxton reported that one sealed bid had already been received by his office on the truck.

SAYS CONGRESSMAN MAHON

We Must Measure Up To Demands of Times

"We must measure up to the demands of our times," Congressman George Mahon said.

Mahon, 19th Congressional District Representative, made the unheeded comments at a Colorado City Lions Club meeting.

He reminded the group that this nation was still engaged in a contest with the Soviet Union and that "we are still in a state of emergency."

The United States is also engaged in a contest with the Communist Party and will continue to be so, he said.

He warned that workmen should be prepared to work long hours and that they should be prepared to work long hours.

"We're in a long contest," he said.

Mahon expressed his confidence that this country would hold its own in the contest with the Soviet Union and the Communist Party.

"I say it's a time for us to measure up to the demands of our times," he said.

"We must measure up to the demands of our times," he said.

"We must measure up to the demands of our times," he said.

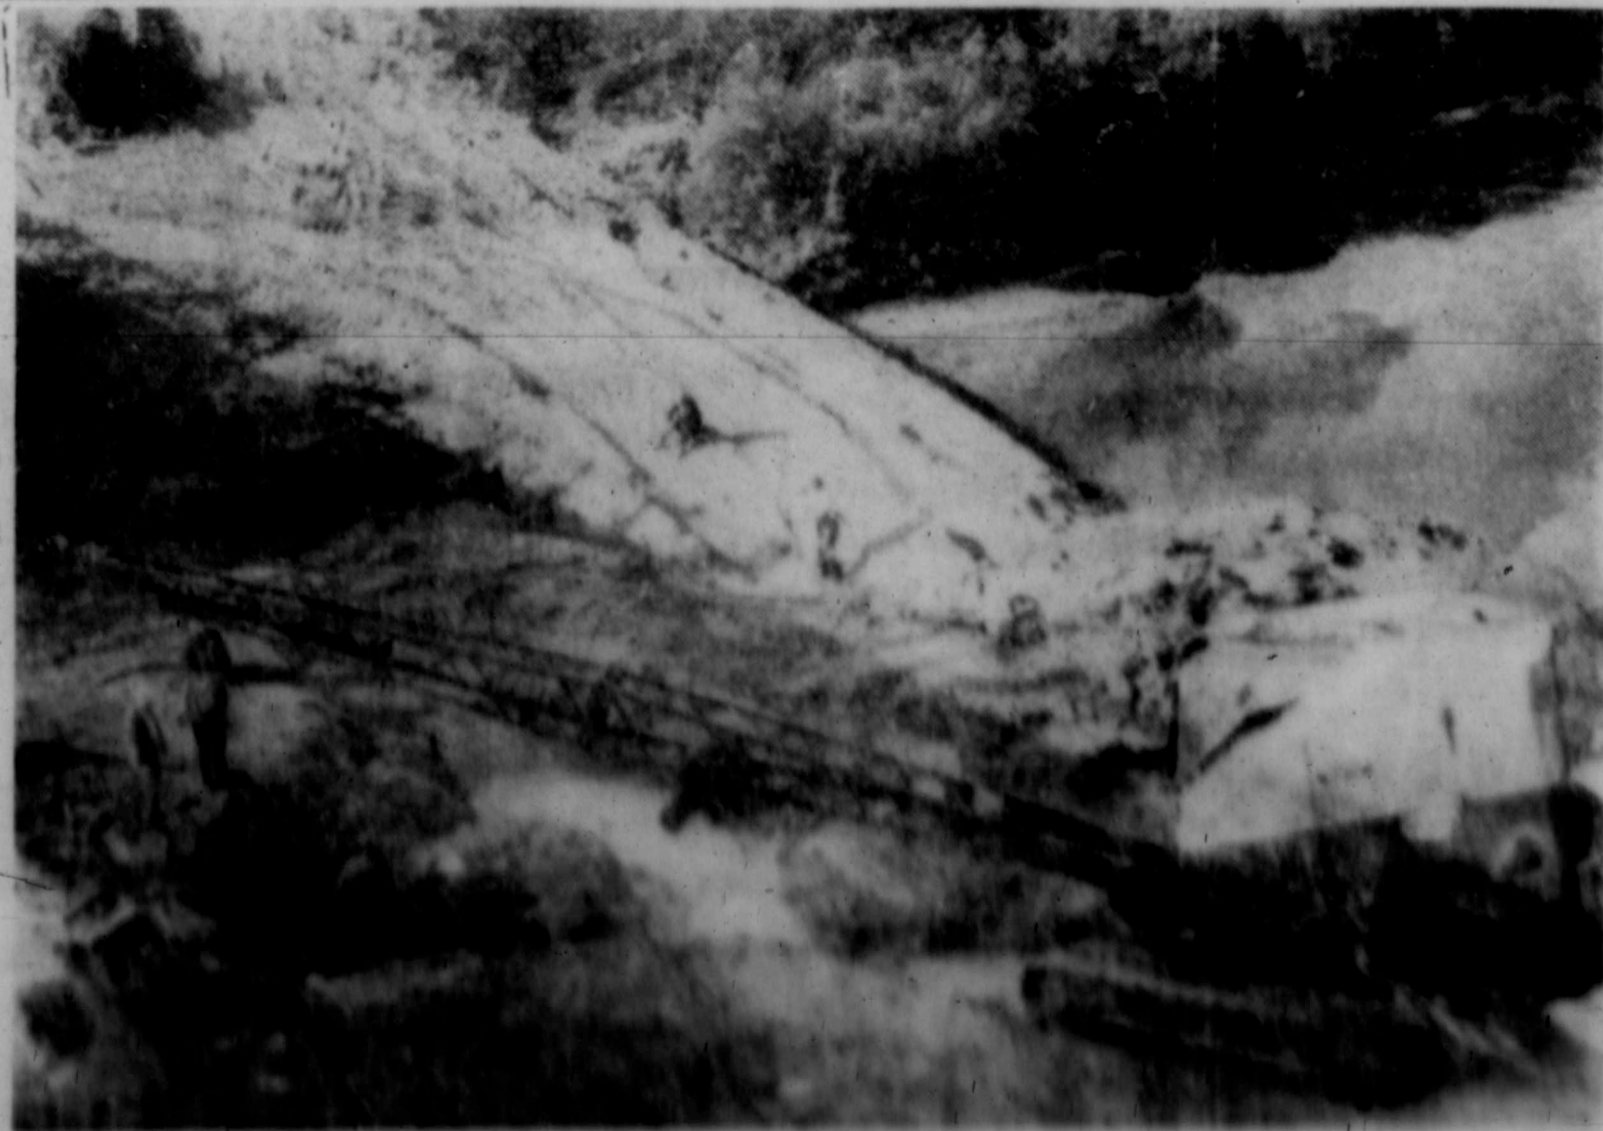

Mahon re-echoed the President's announcement late this week that there is "too much spending by the national government."

"I say it's a time for us to measure up to the demands of our times," he said.

"We must measure up to the demands of our times," he said.

"We must measure up to the demands of our times," he said.

"We must measure up to the demands of our times," he said.

Connecting Water Link

Richardson Construction Co. workers are making the final touches of a water link connecting the City of Colorado City to the City of Amarillo. The link will be 4 1/2 miles long and will carry 42 inches of water.

Work on the link is well advanced. The link will be 4 1/2 miles long and will carry 42 inches of water. The link will be 4 1/2 miles long and will carry 42 inches of water.

Anniversary Party

Mr. and Mrs. Roy Wells and daughter, Katrina, of Lorraine were in Colorado City recently attending the 49th wedding anniversary party honoring Mr. and Mrs. Earl Hunsley. Mr. and Mrs. R. J. Knoche of Big Spring and Mr. and Mrs. Paul Hunter of Colorado City hosted the affair.

Visit Hamiltons

Mr. and Mrs. Frank Rich and Mrs. Annie M. and Mrs. O. F. McComb of Abilene and Mr. and Mrs. U. H. Clark of Wichita visited the U. S. Hamiltons of Lorraine recently. The latter and Hamiltons visited together in World War I.

OFFICIAL NOTICE

Gatherings of more than 5 persons for the purpose of religious worship are henceforth prohibited

If you woke up one morning to find a notice such as the above plastered around town, even those Americans who are among the "Great Indifferent" might soon react with alarm. And they would be wise to do so. Freedom of worship should be a jealously guarded privilege. But like any privilege which we don't respect by its use, it can be lost.

Restrictions of this privilege are unthinkable to every American. But failure to take advantage of this privilege is widespread. When was the last time you and your family enjoyed the right to worship?

"Ada" Showing to Open Here Today

"Ada," the story of a woman of obscure background whose marriage enabled her to rise to a position of extraordinary power, opens at Palace Theater here today (Sunday).

The showing of "Ada" will continue through Tuesday at the local theater.

Dean Martin and Susan Hayward, an Academy Award winner, star in the movie.

Miss Hayward, an Academy Award winner and 5 times nominated for the award, has the film's title role as Ada, who started at the bottom and was determined to let nothing stop her from rising to the top until she found love an unexpected barrier to her ambition.

Dean Martin, equally at home in musicals, comedy or drama — enacts Bo Gillis, amiable, guitar-playing friend of the people, who gave him the job of running the state but who, for awhile, found his wife sitting in the driver's seat.

The conflict in this clash of personalities and the fascinating procedure by which the former "nobody" Ada, capitalizes on her beauty and brains in outsmarting the behind-the-scenes manipulator Sylvester Marin, who attempts to use both husband and wife as puppets, makes this a drama of intense and mounting interest.

Filed in CinemaScope and color, the Avon Production is based on Wirt Williams' best-seller, "Ada Dallas." It marks Susan Hayward's first role at MGM since her memorable performance in "I'll Cry Tomorrow," one of the pictures which won her an "Oscar" nomination, and reunites her with the respective producer and director of that picture, Lawrence Weingarten and Daniel Mann. Weingarten subsequently produced the highly

successful "Cat on a Hot Tin Roof"; Mann's most recent film was "Butterfield 8" which gave Elizabeth Taylor an Academy Award.

Co-stared in "Ada" are Wilfrid Hyde White as Marin, the political czar who finds Ada a formidable opponent; Ralph Meeker as Colonel Yancey, head of the State Police; and Martin Balsam as Bo's sagacious press-agent.

An interesting facet of the picture is that, for the first time, a motion picture company was permitted to film scenes in California's impressive State Capitol Building in Sacramento.

Although "Ada" is a strictly dramatic effort for Dean Martin, the star sings one musical number, a traditional gospel song entitled "May the Lord Bless You Real Good."

New Loraine FHA Officers Are Installed

LORAINÉ—New officers of the Loraine High School chapter of Future Homemakers of America were installed here Tuesday night.

Janie Lee, president of the Colorado City High School FHA chapter was the installing officer. The 1961-62 officer installation was conducted in a meeting in the local school's cafeteria.

New officers installed were: Katrina Wells, president; Ruth Browning, first vice president; Annette Browning, second vice president; Peggy Phillips, third vice president; and Beth Shepherd, fourth vice president.

Also Ann Dickenson, fifth vice president; Carla Britton, secretary; Sandra Cushing, treasurer; Loretta Tartt, historian; Judy McDaniel, parliamentarian; Joyce Furlow, song leader; and Joretta Hall, pianist.

Local FHA members attending included the new officers and:

Rachel Beights, Linda Chapman, Ann Compton, Sherry Graham, Carol Little, Charla Martin, Carolyn Schroeder, Kitty Taylor, Barbara Doyle and Cindy Mahon.

Mothers of local members attending included:

SCIENCE FOR YOU

By BOB BROWN

PROBLEM: What holds up the clouds?
NEEDED: A milk bottle, some hot water and an ice cube.

DO THIS: Put hot water into the bottle and place the ice cube over the mouth. Small clouds will be seen to form inside the bottle. What holds them up?

ANSWER: Actually, if left still and not disturbed by air currents, all clouds would eventually fall in air at a constant temperature. But the droplets of water in clouds are so small and light, they do not fall rapidly because of the air resistance. The slightest air current can blow them along. If they join together and become heavier they fall faster, usually as rain.

Rising currents of warm air give an upward push to the tiny droplets and the clouds move up or down according to the amount of the upward-moving air. Watch fog carefully and you can see it fall.

(copyright 1961, general features corp.)

MRS. JORDAN HOSTS

1949 Study Club Hears F. Kelley

Frank Kelly, chairman of the Texas Good Neighbor Commission, was the guest speaker for the 1949 Study Club meeting here Thursday.

Mrs. Jack Jordan, Jr. hosted the meeting in her home at 976 Marshall St.

Kelly gave a brief history of Mexico and the Good Neighbor Commission — as well as the commission's purpose during his talk.

"Understanding and cooperation between the people and governments of Texas and the 4 bordering Mexican states is what we are striving for," he said.

"Since Texas and Mexico have organized into the International Good Neighbor Commission and the Pan American Student Forum, we (the commission) are now able to settle many more problems that arise between the 2 countries," Kelly continued.

Kelly emphasized that Texans should study Mexico. They will find that even though some Mexican citizens prefer Communism, the greater majority of their people, especially the ones in power, are friends of the United States, Kelly concluded.

Mrs. Jene Steakley was the directed the day's program and gave the opening prayer.

Mrs. Ben Sparks, president, conducted the business meeting.

Mrs. Charler Baker, finance chairman, gave each member a copy of the budget for the coming year.

Refreshments were served from a tea table arranged with white and yellow chrysanthemums with a jack-o-lantern as the focal point.

Members present included: Mmes. Baker, Bill Carter, Dwayne Feaster, Dick Gregory, Wayne Griffin, Bill Holbert, Kelly, Tom Neff, Sparks, Steakley, Joe Smoot, A. J. Dean, Austin McCloud, and the hostess.

The club next meets Thursday, Nov. 9, in the home of Mrs. R. J. Hoback, 843 E. 14th St.

Mrs. Dockery, McClendon 42 Winners

Games of progressive 42 were played at the Hostess Club meeting Thursday afternoon in the Recreation Center here.

Winners for the afternoon were Mrs. James McClendon, high, and Mrs. Charles Dockery, low.

Hostesses were Mmes. Bob Chalker, Doyle Clark and Carroll Gray.

Members attending included Mmes. Joe Igo, Dockery, Travis Turner, Charles Snider, B. D. Mason, Leland Moore, Buddy Hertenberger, Don Webb, Charles Goodlett, James Hern, Don Womack, J. R. Erwin, Trevlyn Kelly, Gray and Clark.

Special guests at the meeting included Mrs. James Williams and Mrs. Charles Ezell. Refreshments of coffee, cookies and candies were served.

The next Hostess Club meeting will be Thursday, Nov. 9, with Mrs. Goodlett as hostess.

ON RANGELANDS IN COUNTY

Attorney-Rancher D. Barber Practices Soil Conservation

EDITOR'S NOTE—Another in a series describing operations of Mitchell County farmers and ranchers—in cooperation with the county Soil Conservation district office here in Colorado City. Conservationist A. V. Sheppard, county SCS office manager, here discusses the program of a local attorney-rancher.

By A. V. SHEPPARD
Soil Conservationist

J. Dell Barber, local attorney, doubles his full-time law practice by conducting farming and ranching interests both in Mitchell County and on a 60-section ranch in Arizona.

Barber, a cooperator with the county Soil Conservation Service office, is applying a soil water and plant conservation program on his ranch here.

He applied for assistance under the Great Plains Conservation Program in the fall

of 1959 and, with the assistance of local SCS technicians, has developed a plan to treat his rangeland in this county according to its need as far as conservation is concerned.

The plan includes such practices as deferred grazing and proper range use on all rangeland—as well as the drilling of water wells, construction of water storage facilities at the wells for livestock water, construction of ponds for livestock water, seeding of 1,700 acres of rangeland with a mixture of native and introduced grasses, control of mesquite, cactus, cedar and shinnery and construction of permanent fences for better distribution of livestock grazing.

Under the program, Barber has deferred 1,700 acres this year—he deferred 2,500 total in 1960. Barber's "rule-of-thumb" for proper use of his rangeland had been the "taking of 1/2 and the leaving of

1/2" on his 5,373 total acres of rangeland in the county. The local attorney has recently completed a water storage facility and a ranch pond for livestock water as part of the program.

Barber is also presently engaged in a program attempting chemical control of shinnery on a 1,700-acre plot of rangeland.

"The effectiveness for the chemical control of shinnery looks real good," he reports. The chemicals, their first test here in this county, have suppressed the shinnery and deferred grazing has allowed the range grasses to make a good growth—especially under the favorable moisture conditions of the present.

Junior High Council Aids In Disaster

Colorado City Junior High School Student Council voted to contribute \$5 to a disaster-damaged school in its meeting Thursday.

The group approved giving the money to Blocker Junior High School in Texas City—a school damaged by Hurricane Carla recently.

A letter requesting a donation was read by Jan Williams, Council president, who presided over the session.

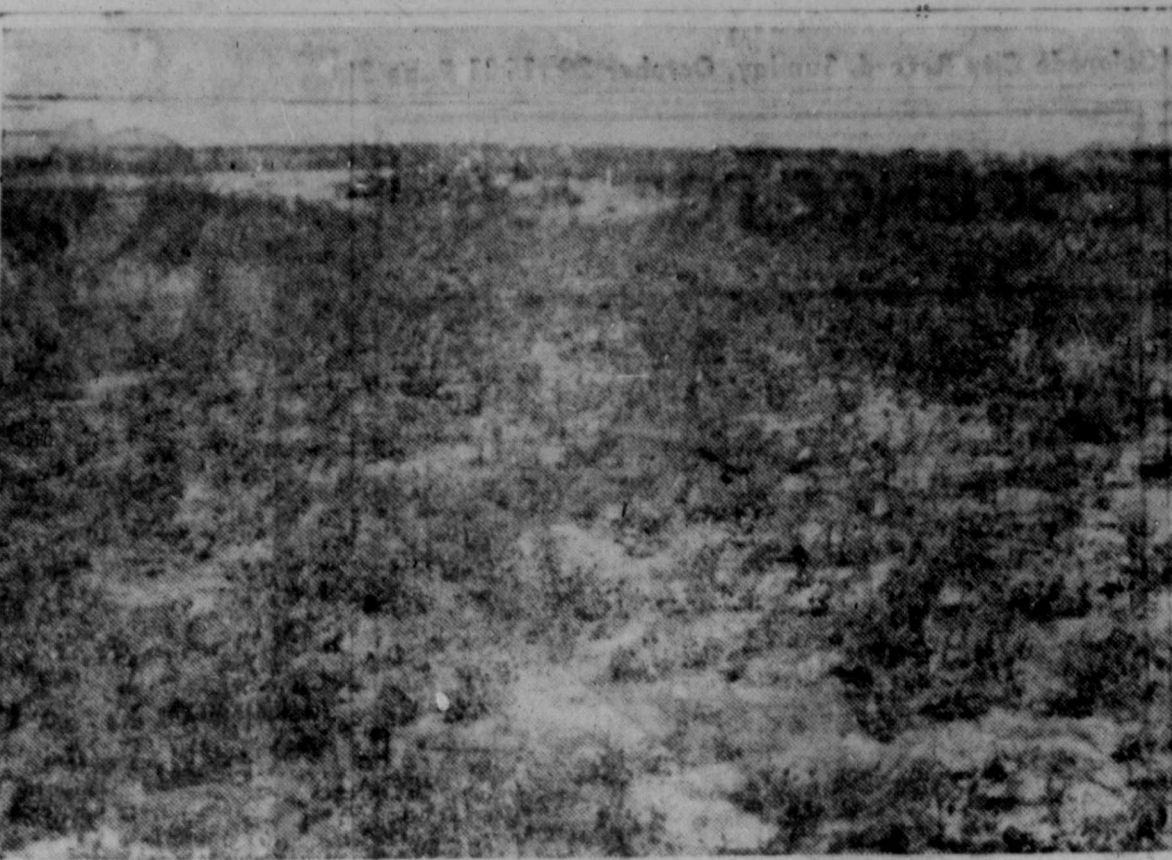

Martha Sheppard was admitted at the meeting as the Council's newest member—she represents the National Junior Honor Society.

Jar Williams and Skipper Warren were named the school's "Students of the Month" for October in other council action.

Mary Jane Nobles and Judy Andrews were appointed to direct Monday devotionals for the school during the month of November.

The council approved a November candy sale to raise funds after a report from the finance committee.

Parents Visit
Mr. and Mrs. Buck Hughes of Loraine had their parents, Mr. and Mrs. Buck T. Hughes of Roby as recent guests.

Control of Shinnery

This is part of a 1,700-acre plot of shinnery-infested rangeland where rancher Dell Barber is attempting chemical control of shinnery. He reports the chemical tests to be satisfactory. The dark spots of the range denote where the chemicals have killed the shinnery. The tests are part of Barber's participation in the Great Plains Conservation Program.

IN METHODIST CHURCH

Loraine Observes Week of Prayer

LORLAINE—First Methodist Church here observed "Week of Prayer" with an all-day program at the church Wednesday.

Mrs. J. G. Bruce directed the morning portion of the program—its theme was "The Meaning of Christ According to St. Peter."

The program opened with the singing of "Open My Eyes That I May See"—led by Mrs. Frank Crownover, accompanied by Mrs. K. L. Taylor at the organ.

Mrs. J. D. McDonald presented the devotional. It was taken from the 48th chapter of the book of Isaiah.

Other morning program parts were presented by Mmes. Bruce, T. C. Wilson, Doris Martin, Floyd Richey, Wiley Walker, Cora Hall, Percy Bond, John Mahon and Miss Annie Jarratt.

Rev. Frank Story, pastor, presented a special talk. The noon luncheon followed.

The afternoon opened with a presentation, "He Opened the Book," by Mrs. McDonald—she also presented the call to worship.

Mrs. Crownover led the session's opening song. It was followed by a prayer led by Mrs. Ottis Muns.

Mrs. Buck Hughes presented the special music for the program. Her solo was "Take Time to Be Holy."

Others participating in the afternoon program were:

Mmes. B. B. Blair, Alva Bennett, Walker, W. C. Jacobs, Story, Bond and McDonald.

Those attending and not on the program included Mmes. Bruce Johnson, Martin Dobbs, Harold Martin, S. E. Meadows and G. W. Hendricks.

Wheat Farmers are Urged to Check '62 Program Details

Wheat growers of Mitchell County are being reminded by the County Agricultural Stabilization and Conservation Service Office that the period for signing up under the program continues through Dec. 1, 1961.

Orion J. (Jack) Lynam, Mitchell County ASCS Committee chairman, says it is important for farmers of the county to come into the county office to get information about the 1962 wheat stabilization program.

The wheat stabilization program, recently enacted by the Congress, is designed to reduce national wheat acreage by at least 10 per cent. Wheat farmers are encouraged to make additional voluntary reductions for which a higher rate of payment is available.

Lynam urged county farmers who are interested in the wheat stabilization program to get in touch with the County ASCS Office immediately.

Returns from 2-Week Visit

Mrs. Bud Shepherd returned home to Loraine last week following a 2-week visit in Loral Bay, S. C., with her son and family, Sgt. and Mrs. Max Shepherd.

Two of Mrs. B. Shepherd's grandchildren, Mike and Ken returned home with her. Two others, Susanna and Jeanette, will arrive in Loraine this week.

Mrs. M. Shepherd and her children will make their home in Loraine with Mrs. B. Shepherd while her husband is on U. S. Army duty overseas.

Visiting Daughter

Mrs. J. D. Gibson of Payne was in Abilene last week visiting her daughter, Mrs. Ken Deathridge.

Guests from Dallas

Mr. and Mrs. Ello Elam of Dallas visited his sister and family, Mr. and Mrs. Bill Stribling, in Loraine recently.

DELTA KAPPA GAMMA

Chapter Members To Attend Meeting

The International Honor Teacher's Society Beta Epsilon Chapter of Delta Kappa Gamma met Monday evening in the homemaking department of the Colorado City High School.

Presiding over the business session was Mrs. Floyd Coffee, president.

For the business program, plans were outlined for the regional Delta Kappa Gamma meeting to be conducted in the Highland Methodist Church in Sweetwater Saturday.

Registration for the members will begin at 9 a. m. at the regional session with initiation services for new pledges beginning at 9:30.

The theme for the meeting will be "Come Let us Reason Together."

Completing the business session, Mrs. Witt Hines gave a discussion on "Migrant Children Pose a Problem for our Schools." Mrs. U. G. Hardison spoke on the "Roots of Understanding."

Suggestions for the betterment of pupil and teacher relationship in the classroom were presented by both speakers.

Hostesses for the evening were: Mmes. Marion New, A. L. Geer, Lawrence Ruddick and R. M. Reed.

Members from Colorado City attending were: Mmes. Mabel Smith, J. F. Quinney, Lynn Halbert, L. H. Rudd, Ace McShan, V. V. Shropshire, M. J. Dawson and W. W. Rhode.

And Mmes. Gerald Gordon, C. B. Hines, Weldon Moore, E. M. Findley, Frank Wilson, Hines, Hardison and Miss Jane Merrill.

Attending from Loraine were Mrs. Coffee, Mrs. Drew Givens and Miss Edith Wilkerson.

Students at Home

Billy J. Long, son of Mr. and Mrs. Troy Jones, and David Redwine, son of Mr. and Mrs. Heston Redwine, were recent visitors in Loraine. Both attend Tarleton State College in Stephenville.

Guest of Parents

Treva Hays, a student at Hardin-Simmons University in Abilene, was in Loraine recently visiting her parents, Mr. and Mrs. H. H. Hays.

They go 17 times around the world every year...

Yes, that's how far U. S. oil explorers travel every year in search of new sources of oil. As a result U. S. oil men keep finding more new oil than the nation uses.

That's just one reason why all of us who work in America's competitive and progressive oil business take pride in the progress of our industry and in the part we play to make this progress possible.

LEGALS

CONTRACTORS' NOTICE OF TEXAS HIGHWAY CONSTRUCTION

Sealed proposals for constructing 9.455 miles of grading, structures, flexible base and asphaltic concrete pavement From Scurry Co. Ll. to Roscoe on Highway No. US 84, covered by F 671(8) & C 53-12-13 in Mitchell and Nolan County, will be received at the Highway Department, Austin, until 9:00 A. M., November 8, 1961, and then publicly opened and read.

Plans and specifications including minimum wage rates as provided by Law are available at the office of F. B. Buford, Resident Engineer.

The mishap occurred at 6:25 p. m.

Damages to the Ford were estimated at \$350 and at \$650 to the Chevrolet by Mitchell County Highway Patrolman Wendell Rehm who investigated the accident.

The auction will be by bidding and cash sale. The truck will be on display at the Courthouse Monday and Tuesday before the sale.

Lewis Claxton Sheriff of Mitchell County

PUBLIC AUCTION

A public auction will be conducted Tuesday, October 31, 1961, at 2 p. m. at Mitchell County Courthouse in Colorado City for purpose of selling a 1949 Chevrolet 1 1/2 ton short wheelbase, stakebed truck.

The auction will be by bidding and cash sale. The truck will be on display at the Courthouse Monday and Tuesday before the sale.

Lewis Claxton Sheriff of Mitchell County

Westbrook

Girl Hurt In Accident

Glynith Matlock, 18, suffered bruises and abrasions Thursday when a car in which she was riding was involved in a collision in Westbrook. She was treated at Root Memorial Hospital here in Colorado City.

She was injured when the 1959 Ford, driven by E. K. Matlock of Westbrook, in which she was riding collided with a 1957 Chevrolet driven by Willie D. Bacon, Jr., of Westbrook.

The mishap occurred at 6:25 p. m.

Damages to the Ford were estimated at \$350 and at \$650 to the Chevrolet by Mitchell County Highway Patrolman Wendell Rehm who investigated the accident.

The auction will be by bidding and cash sale. The truck will be on display at the Courthouse Monday and Tuesday before the sale.

Lewis Claxton Sheriff of Mitchell County

GAMES—

Continued From Page 1

The clock, White kept on a faked pass and danced 20 yards for the other Junior Wolf score. Cupp bucked up the middle for the 2 conversion points.

The Wolves B-team dropped their second game in a row—after winning 4 straight to open the season — as Stamford's B-squad took a 26-14 victory.

All the Wolf scoring came in the second half. The half-time score favored the host Bulldogs 19-0.

Wingback Benzil Pendergrass took a 15-yard pass from quarterback Richard Smith to open the Wolves' scoring in the third quarter.

The other Wolf TD came in the final stanza as fullback Greg Lucky burst through the middle for 20 yards and a tally. Smith rolled around right end for the 2-point conversion.

Leading the B-team's defensive efforts were Lucky, middleguard Raymond Kincaid and tackle Jimmy McGill.

A faked field goal attempt got the Chiefs out of the hole on fourth down with 4 to go on the Wolf 16. Hudson took again went for a first down what appeared to be a bad snap (on purpose) and rolled to his right to pass.

He was hit as he cocked his arm to pass — but Cauley raced back and lifted the nose-diving ball off his shoe tops and rolled to the Wolf 3-yard marker for a Chief first down.

With just about 1 minute left in the half, the Wolves again whet for a first down on fourth and 6 from the 50. That cost them 2 yards and the ball too.

Havlik, tossing against a 20 to 30 miller-hour wind, hit Cauley with a 48-yard scoring pass on the first play of the drive. It came with 32 seconds left in the half.

Hudson got the next Chief TD. It came with 2:58 left to play on a 39-yard gallop first around left end and then up the middle. The drive took only 5 plays to cover 67 yards.

Havlik scored from the 4 as time ran out in the game. Lake View led in first downs 17-7, rushing yardage 257-140 and passing yardage 72-42.

The Wolves, using Latimer, Dale Walker and David Lewis at the man-under slot, attempted a surprise total of 15 passes. They completed 4.

For Sale or rent: 2-bedroom house at 313 E. 11th St. Colorado City. \$3950. R. B. Baker, Box 441, Colorado City.

TO GARDEN CLUB

"Mr. Weeds" to Give Talk Here

Russell Sheppard, better known as "Mr. Weeds, U.S.A.," will be the guest speaker here for the Colorado City Garden Club's regular monthly meeting in November.

He will speak at the club's meeting Wednesday, Nov. 8, in Community Center.

Sheppard's topic will be "Weeds are Wonderful" he will give demonstrations on dried flower arrangements as part of his program.

"Mr. Weeds" travels the entire United States collecting data and material for his programs. He makes his home in Dallas.

These dried weeds he collects are used for decorative effects in homes, in business houses and conventions. From this vast accumulation of dried material and accessories, "Mr.

Weeds" selects his lecture illustrative pieces.

During his extemporaneous lectures, Sheppard shapes arrangements that attract his audience.

He claims to have no special training in his work, but just uses the knowledge he has acquired from people in his travels all over the country.

Sheppard says that Texas and the semi-arid states of the southwest are the best hunting grounds for rare and unusual weeds.

The one grass or plant that "Mr. Weeds" is really fascinated with is Johnson grass. He uses Johnson grass as height and filler for his dried arrangements.

Sheppard came to Texas from New York in 1951, and was so fascinated with the state that he choose to stay and make his home in Dallas.

Completion of the wildcat, near the Nena Lucia Field 23 miles southwest of Sweetwater, will be attempted through Strawn Reef perforations at 6,921-6,926 feet. Preparations are now being made to install pump.

The wildcat spots in Section 34, Block 12, H&TC Survey.

Gulf Oil Corp. No. 4 M. L. Compton, Jr., has been completed in the Nena Lucia (Strawn Reef) field southwest of Sweetwater.

The well pumped 125.43 barrels of 61.1 gravity oil in 4 hours on initial potential. It has a calculated daily potential of 752.58 barrels.

Flow was through a 7 1/2 inch choke with packer set on the casing and 440 to 420 pounds of tubing pressure.

Casing is set to 7,154 feet and total depth is 7,155 feet. The well had a gas-oil ratio of 1.515-1.

The well is producing from 40 perforations at 7,080-7,090 feet. It was treated with 500 gallons of mud-acid.

The new producer spots in Section 91, Block 1-A, H&TC Survey.

COMPLETION TO BE ATTEMPTED ON WILDCAT

Jake L. Hamon No. 1 D. W. Wallace Estate, located just across the Nolan - Mitchell Counties line in Nolan, will attempt completion.

Completion of the wildcat, near the Nena Lucia Field 23 miles southwest of Sweetwater, will be attempted through Strawn Reef perforations at 6,921-6,926 feet. Preparations are now being made to install pump.

The wildcat spots in Section 34, Block 12, H&TC Survey.

Gulf Oil Corp. No. 4 M. L. Compton, Jr., has been completed in the Nena Lucia (Strawn Reef) field southwest of Sweetwater.

The well pumped 125.43 barrels of 61.1 gravity oil in 4 hours on initial potential. It has a calculated daily potential of 752.58 barrels.

Flow was through a 7 1/2 inch choke with packer set on the casing and 440 to 420 pounds of tubing pressure.

Casing is set to 7,154 feet and total depth is 7,155 feet. The well had a gas-oil ratio of 1.515-1.

The well is producing from 40 perforations at 7,080-7,090 feet. It was treated with 500 gallons of mud-acid.

The new producer spots in Section 91, Block 1-A, H&TC Survey.

CORRECTION

There were no injuries in an auto accident here Saturday, Oct. 21, at the intersection of Locust and E. 6th Sts.

Drivers of the cars involved were Alex Campbell, son of Mr. and Mrs. J. T. Campbell, 1020 E. 16th St., and L. P. Lunsford of Sweetwater.

The Record erroneously reported that one of the cars was driven by J. T. Campbell and his wife, Mrs. Campbell, was injured. The Record's error was due to misinformation reported on City Police Department accident records.

Praise to God Who Reigns Above; and "For All the Saints Who From Their Labors Rest."

School Lunch Menus

Following are the school lunchroom menus for the Colorado City, Loraine and Westbrook Schools for the week of Oct. 30 through Nov. 3.

COLORADO CITY

MONDAY — Tamale pie, crackers, cabbage-carrot salad, buttered corn, pineapple upside-down cake and milk.
TUESDAY — Baked ham, cranberry sauce, whipped potatoes, English peas in white sauce, hot rolls, butter, syrup or jelly and milk.
WEDNESDAY — Chicken spaghetti, apple-celery salad, buttered green beans, sliced bread, butter, gingerbread and milk.
THURSDAY — Pinto beans with salt pork, mixed greens, homestyle cucumber pickles, cornbread muffins, butter, peach cobbler and milk.
FRIDAY — Luncheon meat, pimento cheese sandwiches, potato salad, pork and beans, lettuce wedge with French dressing, oatmeal cookies and milk.

LORAINÉ

MONDAY — Macaroni and cheese, English peas, lettuce-tomato salad, carrot sticks, bread butter and peanut butter cookies.
TUESDAY — Barbeque meat balls, new potatoes, vegetable salad, hot rolls, milk and syrup.
WEDNESDAY — Pinto beans, weiners and sauerkraut, mashed potatoes, carrot sticks, cornbread, milk and gingerbread.

Visits with Parents

Mrs. Roger Cripplaver and son of Dallas are in Loraine for a 2-week visit with her parents, Mr. and Mrs. S. E. Meadows.

cks, cornbread, milk and gingerbread.
THURSDAY — Turkey and dressing, giblet gravy, green beans, fruit salad, celery sticks, bread and milk.
FRIDAY — Fish sticks, tarter sauce, blackeyed peas, hominy, fruit cobbler, bread and milk.

WESTBROOK

MONDAY — Hot dogs, Spanish rice, green salad, butter, apricots and milk.
TUESDAY — Hamburger, corn-pone pie, buttered spinach, cabbage salad, cornbread muffins, butter chocolate pie and milk.
WEDNESDAY — Beef stew with vegetables, cheese sandwiches, bread, butter, cake squares and milk.
THURSDAY — Chicken pie and topping, hominy, celery sticks, biscuits, butter, peanut butter and syrup.

Soil Conservationist Transferred to Spur

James Walsh, soil conservationist here in the Mitchell County Soil Conservation Service district office, has been assigned to the SCS office in Spur.

Walsh, a graduate of Texas Tech College in Lubbock, was in training here under A. V. Sheppard, local SCS office manager.
 Walsh and his wife left for Spur Friday. He is now rated as a "professional soil conservationist." He came to Colorado City early last summer.

Visiting Children

Mrs. Willie Byrd of Westbrook is presently in Lubbock visiting her children and families, Mr. and Mrs. Clyde Smith and Mr. and Mrs. M. Byrd.

FRIDAY — Fried fish, tarter sauce, macaroni and cheese, cornbread, butter, tossed salad, cherry crisps and milk.

Space-Phone Talk Monday At School

Plans to expand worldwide communications by bouncing telephone calls off satellites orbiting in outer space will be described here Monday to Students of Colorado City High School.

Glenn Scott, public information supervisor for Southwestern Bell Telephone Co., will use miniature equipment to demonstrate Project Echo, an experiment conducted by Bell Telephone Laboratories scientists who made coast-to-coast long distance calls by bouncing voice signals off a balloon satellite in orbit 1,000 miles above the earth.

Other techniques the Bell System has developed to improve and increase telephone transmission also will be demonstrated. Among these is a device that can transmit samples of many different telephone conversations over the same pair of wires at the time and then decode them back to normal voice conversations at their destinations.

Scott also will demonstrate how microwave systems work to beam long distance calls and television programs across the country via the airways. His talk, "Voices Across Time and Space," is being brought here by J. O. Wood, Bell wire chief in Colorado City.

Stars of "Ada"

Dean Martin, left, and Academy Award winner Susan Hayward star in "Ada" which opens Sunday at the Palace Theater here. The picture will continue through Tuesday night. "Ada" is the story of a woman's drive for success and power.

Wise Finishes Basic Training

Marine Pfc. Daniel B. Wise, his proficiency in the latest of Mr. and Mrs. Manuel O. Wise, 904 E. Sixth St., Colorado City, completed 4 weeks individual combat training Friday at the Second Infantry Training Regiment, Camp Pendleton, Calif.

Each marine receives combat training upon completion of recruit training to ensure

94 Attend Meeting of Teachers

Ninety four Mitchell County teachers and their guests attended the first 1961-62 meeting of the Mitchell County Teachers' Association in Loraine Monday night.

All county schools — including Loraine, Westbrook, Colorado City High, Junior High Hutchinson and Primary — were represented at the session. Each school's principal introduced the teachers of his staff.

Vance Dickenson of Loraine, association president, presided over the meeting. He conducted the program — a tape recording entitled "20,000 Russians Told Him."

Reports were given by Colorado Independent School District superintendent Frank Wilson and Colorado City High School teacher Mrs. Gerald Gordan.

Visits Parents

Mr. and Mrs. Roy Price of Stanton visited his parents, Mr. and Mrs. J. E. Price, in Loraine last week.

J. B. Cushing, superintendent of Loraine schools, gave the invocation. A banquet meal of tomato juice, vegetable salad, turkey and dressing, green beans, candied yams, cranberry sauce, apple pie, coffee and tea was served.

Members of the Loraine High School home economics class served the meal. They were Carol Littler, Sherry Graham, Kitty Taylor, Carolyn Shroeder, Sandra Cushing, Gloria Claxton and Charla Martin.

PETROLEUM INDUSTRY MAKING GAINS

U.S.A. World's Leading Producer Of "Energy"

The domestic petroleum industry during 1960 gave the "energy supremacy" of the United States another impressive advance over other major nations of the world, the Independent Petroleum Association of America has announced in the 1961 edition of "The Oil Producing Industry in Your State."

The 96-page reference book published annually by IPAA, offers a convenient source of information about production of crude oil and natural gas, "America's power twins that supply about 73 per cent of all energy consumed in the U. S."

"Plentiful supplies of low-cost oil and gas have been largely responsible for maintaining the U. S. position of energy supremacy and along with it the highest standard of living in the world," IPAA said. "Since the standard of living in any area depends on the public's ability to consume energy, IPAA said:

In 1960 1 hour's average wage by an American bought 7.4 gallons of gasoline, compared with 6.5 gallons in 1955, 5.5 gallons in 1950, 5.0 gallons in 1945, 3.6 gallons in 1940, and 2.8 gallons in 1935.

Through discovery of an abundance of oil and natural gas, domestic producers have given the U. S. the means of achieving "energy supremacy" and assuming its present role in world leadership, IPAA said.

As of Jan. 1, 1961, crude oil producing capacity in the U. S. reached a record of 9,892,000 barrels daily. Capacity to produce both crude oil and natural gas liquids stood at 10,933,000 barrels daily.

But actual daily crude oil and natural gas liquids production averaged only 8,209,000 barrels in January. The difference between this actual production and the nation's capacity to produce was 2,724,000 barrels daily.

"In other words," IPAA said, "under sound producing practices the petroleum industry in the U. S. could produce daily almost 30 per cent more petroleum liquids without harm to existing fields."

"This excess shut-in capacity, developed and maintained at industry expense, constitutes a safety factor which could be of life or death importance in any future national emergency," the association said.

The U. S. entered World War II with an excess producing capacity of about 1 million barrels per day, and this provided a cushion with which to meet a sudden great increase in petroleum requirements.

In the Suez crisis of 1956-57, when Europe was denied access to Middle East oil, excess U. S. capacity delivered an average of a half million barrels a day on an emergency basis over a 3-month period.

So, in addition to being of crucial importance to the defense of America, production made available by the domestic industry also provides an energy umbrella over western Europe, IPAA pointed out.

The widespread and far-reaching role of the domestic petroleum industry in 1960 was highlighted by these findings in "The Oil Producing Industry in Your State:"

1. Thirty-three of the nation's 50 states have either oil and-or gas production.
2. Nineteen per cent—or 422 million acres—of the total U. S. land area is either productive or leased by the petroleum industry.
3. In 14 states, more than 25 per cent of the land area is under lease, for oil and gas, and in eight states more than 40 per cent is under lease.

3. Total value of crude oil, natural gas liquids and natural gas in 1960 was \$9.9 billion, compared with \$9.6 billion the previous year. (Value at wells of crude oil produced since oil was first discovered in the U. S. in 1859 now totals more than \$127 billion.)

4. Oil and gas accounted for well over half the total value of all mineral production in the U. S. in 1960, and in 15 states crude petroleum was the principal mineral product in order of value.

5. The number of persons employed in crude oil and natural gas production alone in the U. S. totals 307,247.

Road Taxes At New High

State governments collected a record \$5.3 billion in highway-user taxes in 1960, a 5 per cent increase over 1959, according to Oil Facts.

Gasoline taxes accounted for \$3.4 billion, or 64 per cent, of the total.

In addition the federal government collected \$4.3 billion in its own highway-user taxes. Of this, \$2.6 billion was spent on highways while \$1.7 billion was diverted to non-road uses.

Oil Transportation

Petroleum accounts for nearly 3/4 tonnage handled in Texas ports; about one out of every 14 tons of Texas rail traffic.

Gas Tax to Roads

One-fourth of gasoline tax is used for public education and the balance for roads.

Well Nears Depth Record

In southeastern Louisiana, according to Oil Facts, drilling crews are boring their way toward what may be the world's deepest oil well.

The American Petroleum Institute publication says the plan is to go down to a minimum of 26,000 feet. The venture will cost at least \$2 million.

The present depth record belongs to a hole in Texas (25,340 feet at a cost of \$3 million) which failed to produce.

USAF Top Fuel User

According to Oil Facts, the Air Force used a record 5.9 billion gallons of aviation fuel during fiscal 1960.

In addition to fuel, the American Petroleum Institute publication reports, the Air Force used 600 separate classes and specifications of other oil products.

59,600 Miles of Pipe

Texas has 59,600 miles of oil pipelines — 26,500 miles of trunk lines, 26,600 miles of gathering lines and 6,500 miles of product lines.

From Oil to Soap

Seventy-five per cent of all the soap and detergent purchased in the U. S. is made with raw material obtained from oil.

OF WEST TEXAS ASSOCIATION

Leo D. Ellis on Oil & Gas Board

Colorado City is represented on the 81-man board of the West Central Texas Oil and Gas Association.

Leo D. Ellis, 1536 Austin St., represents Colorado City on the board. His term of office will expire in 1962.

Twenty cities are represented by the 81 men on the 1961 board.

The board is composed of 6 officers and the advisory board of 15 past-presidents, plus 20 members whose terms expire at the annual meeting this month, 20 whose terms end in 1962 and 20 who will serve through 1963.

Officers in 1961 were Sam L. Robertson, president; Ralph Bridwell, James E. Russell, Jack Patton and W. N. Tindell, vice presidents, and Bailey Lewis, treasurer. Patton is from Rotan, the others from Abilene.

Living past presidents are Lester Clark, Paul Pitzer, W. Pitzer Jr., W. J. Rhodes

defer Jr., all of Breckenridge; L. J. Frazier, J. C. Hunter Jr., J. S. Lauderdale, V. C. Perini Jr., and French M. Robertson, all of Abilene; Joe Clarke and Marshall R. Young of Fort Worth; C. W. Hoffmann, Eastland, and E. Bruce Street of Graham.

Directors whose terms expire this year are: Hicks Allen, Snyder; R. S. Anderson and W. H. Gilmore, Midland; John DeFord, Pat Dunigan, B. F. Gilchrist, J. F. Hooker, F. A. Hunter, Riley Maxwell, George Straughan and Kent Waddell, Abilene; Roy Guffey and W. R. Ransome, Dallas; C. E. Jacobs and Vaughan Moore, Albany; Ed Karper, Graham; Kenneth Williams Pardue Jr., Breckenridge; Kenneth Smith, Fort Worth, and J. F. West, Stamford.

Terms expiring in 1962: Eugene T. Adair and Ray

Dilger, Fort Worth; R. R. Bloomer, Edgar Davis, Norman D. Fitzgerald, Tom Gordon, Robert D. Crisham, Morgan Hubbard, Roland Hudson, George Hughes, Lem Neely, Jim Wallace and L. A. Warren, Abilene; L. W. Brooks, Breckenridge; E. B. Ellis, Sweetwater; Leo D. Ellis, Colorado City; James Fleming, Comanche; Cyrus B. Frost, Eastland; L. R. Pearson, Ranger, and Wallace Thompson, Houston.

Terms expiring in 1963: E. L. Anders Jr., W. D. Brookover Jr., R. C. Grisham, P. S. Kendrick, Frank King, Carl Miles, Bruce Puckett and Coy Warren, Abilene; William M. Boase and O. H. Reaugh, Breckenridge; Russell F. Dorsey, Big Spring; Uriel Griggs Jr., Wichita Falls; Jake L. Hamon and Robert H. Hay, Dallas; W. H. Hoffman, Eastland; Chester H. Kenley, San Angelo; George Ritchie, Mineral Wells; Hamilton Rogers, Fort Worth; John Schattel, Sweetwater, and H. R. Staney, Albany.

Oil Reserves

Texas has 18.3 billion barrels of oil reserves — 14.9 billion in crude oil; 3.4 billion from natural gas liquids.

One Station For Each 327 U. S. Vehicles

Department of Commerce statistics indicate that there is 1 service station for every 327 motor vehicles registered in the United States.

In 1958, the year of the last official count, there were 206,302 service stations and more than 67 million motor vehicles. Ten years earlier there were 179,647 stations to care for some 41 million vehicles, a ratio of 1 to 225.

The decade saw a net increase of 14.8 per cent in the number of service stations compared to a gain of 66 per cent in registrations.

The difference in ratio of stations to cars reflects the pronounced trend to larger and more efficient stations in helping to meet the demands of a rapidly expanding automotive population.

Larger stations often appear where highway construction opens new or improved routes. Even where no new high-

Where would YOU search for Oil?

... Where Would You Drill?

The search for oil is one of the world's riskiest businesses. Even with the most modern scientific equipment and know-how, the odds against finding oil are enormous.

We like our job, because everytime we do drill and find new oil, it means more gasoline for your car, more power for farm and ranch, more safety in our military defense, more comfort in living.

But like thousands of other oilmen, we of Robinson Drilling Company accept these risks. Uncovering new sources of oil is our responsibility in America's free enterprise oil industry — an industry that brings you continuous oil progress through constant competition.

Here's our pledge that, no matter what the odds, we will continue to drill for oil for you and our nation... asking no special favors from government or industry... paying our way by keeping costs at lowest possible level through free competition.

AN INDEPENDENT HOME-OWNED
COLORADO CITY INDUSTRY

Robinson Drilling Co.

GLENN R. (BOB) ROBINSON

WE SAY
'THANKS'

... WITH THE KIND OF
SERVICE YOU LIKE!

Sure, we're proud to be a part of the oil industry. Proud, too, that oilmen are among our regular customers. And we express our appreciation for this oil industry business in the best manner we know... with better service for your cars and trucks.

Oilmen are on the go, busy and fast moving. And we assist 'em with the kind of fast, dependable service that speeds them along.

FOR DO-IT-YOURSELF WILDCATTERS

How to Look for Oil — By the 10-Step Method

EDITOR'S NOTE — You too, can become a wildcatter — by following the correct steps. The correct procedure is described in the following do-it-yourself feature that recently appeared in "Petroleum Today," official publication of the American Petroleum Institute.

You are about to enter upon one of the most exciting projects you have ever undertaken.

It will not be easy, but then, few things worth doing are easy.

A wildcatter looks for oil where none has ever been found. He is among the most admired and indispensable men in the petroleum industry. As a wildcatter, you will be a part of a long and colorful tradition.

NO SPECIAL CLOTHES — Before we present the step-by-step directions that can lead

to your oil strike, there are 2 points that should be made clear.

It is not necessary that you wear special clothes to be a wildcatter.

And you do not need to purchase boots or a 10-gallon hat; many wildcatters wear business suits.

Nor must you assume any special speech patterns or special habits. Though some wildcatters draw, it is not mandatory; and very few swaggar and light cigars with \$100 bills.

There has been some exaggeration in this regard.

Now you are ready to start. Here are the directions. Good luck!

1. Since oil is formed underground, you cannot expect just to come upon it. You must look for it.

This is a process that is very complicated, and we do not suggest that you undertake it by yourself. There have been stories of people who have found oil directly with divining rods and special machines, but to the best of our knowledge such discoveries have been freaks and unrelated to the use of these devices.

GET A GEOLOGIST

We recommend that you engage the services of a petroleum geologist. If there are none listed in the yellow pages of your particular telephone book, we suggest that you ask your local librarian for a list of recognized geological organizations; one of them may be willing to aid you.

2. Once you have chosen a petroleum geologist and have spoken with him, you may be somewhat discouraged.

He will undoubtedly refuse to promise that he can find oil for you. He may even quote statistics to the effect that 8 out of 9 new field wildcat wells do not find any oil or gas, and that only one in 45 wildcats discovers a commercially successful oil field.

But remember, if you give up now, you will never be a wildcatter.

3. Your geologist will want to study what may seem to be an unreasonable number of maps and charts. He will also wish to conduct various tests, underground rock structures, in various locations.

It would be wise to give him free rein at this stage. For it is true, as he will tell you

that there is no certain way of finding oil; the best he or anyone can do is find a spot where the geological formations might contain oil.

BE FRANK, FRIENDLY

4. Now you decide where to drill. It is important at this stage that you not be too explicit in telling people the exact location of your spot, nor should you be too enthusiastic about your chances in other people's hearing.

This may cause trouble when you make your next step; obtaining the mineral rights for the spot where you wish to drill.

We suggest that you approach the owner of the property in a frank and friendly fashion; if he feels that you are seeking to take advantage of him, he may be distraught. Also, we strongly urge that you have the aid of a landman, a specialist who understands the intricacies of leasing operations.

It would be unfortunate if you were to find, after striking oil, that the fine print of your lease gave the property owner most of the profits; then you would be distraught.

5. The time has come to gather your equipment. It is very important at this stage that you know what you are doing.

Unless you plan to devote a considerable amount of time to learning the complicated oil field equipment business, we would recommend that you hire a man known as a drilling contractor. He has all the equipment that is required (and knows how to use it), whereas you probably don't know the difference between a crown block and monkey-board.

ACTUAL DRILLING

6. Once your equipment is gathered and set up, you are ready to "spud in" your well. This is a very exciting moment, the start of the actual drilling. You will want to have your family by your side at the spudding in.

By this time, you should have decided on a name for your well. Many wildcatters name their wells after their children, for luck; and you may find this a wise course to follow.

7. After the drilling has begun, assuming that you have hired a drilling contractor, there is little more that you have to do except wait. Occasionally, after he has gone a certain distance without finding oil, a contractor may ask if you wish to keep drilling.

We recommend that you turn this decision over to your petroleum geologist. You would not want to make the wrong decision after all the trouble you have gone to.

8. It may happen that piece of the drill pipe will come apart during drilling. This will involve one of the most interesting, though costly, activities of a wildcatter. It is known as "fishing."

Special tools, and sometimes fishing specialists, are necessary to get the parts of pipe out of the driller's way. Occasionally it may be necessary to abandon the well if the fishing operation proves unsuccessful. Your drilling contractor will be invaluable in helping you to judge whether abandonment is required.

\$50,000 PER WELL

9. You will perhaps begin to wonder at this stage why your drilling contractor does not wildcat on his own. It may be that he has done so and can no longer afford it. As you will have found out by this time, drilling a wildcat can be quite expensive. The average cost of a well is about \$50,000.

10. Essentially, that's all there is to it. Of course, there are many ways in which you can vary your approach. For example if you don't feel that you can make such a large investment out of pocket, you can parcel out the cost among friends or business acquaintances or in-laws.

But if oil is found, then you will have to split your profit with them. Almost every wildcatter does this, though; with all the risks involved only those who light cigars with \$100 bills can afford to spend all that money — and as we pointed out earlier, there are very few of them. At this stage, you will understand why.

Fish Attracted to Offshore Drilling Sites

The search for oil occasionally produces interesting side effects, according to Petroleum Today.

The magazine reports a marine doesn't off the coast of California became the habitat of more than 30,000 fish of a kind — a large different species after all — which were quite tame toward the ship.

Spook Spook
Wide-eyed, frozen with fear, this kitten watches a witch streak across a Halloween sky on a brookstick near Ottawa, Canada.

Dyed Asphalt Street-Tested

Colored asphalt is undergoing road tests to determine its potential as a traffic safety aid and directional indicator.

Various hues of asphalt may some day set off speed zones, stop streets, crosswalks, safety islands, and turn-offs at cloverleafs. White may be used on some stretches to diminish glare and extend headlight range.

In Illinois, state officials are testing yellow pavement as a directional approach to red intersections.

The color is built into the asphalt, and will not wear off. It can be laid with existing construction equipment.

Top Oil Producer

In 1959 America produced more than 1/3 of the world's crude oil, accounted for 46 per cent of world's oil consumption, and American oil companies spent more than \$300 million on research.

Moon Drilling Rig Planned

A drilling rig capable of boring a hole on the surface of the moon has been developed by an American oil field equipment company.

According to Oil Facts, core samples obtained by the rig will be automatically analyzed and the results radioed back to scientists of the National Aeronautics and Space Administration, sponsor of the project.

Colorado City Record, Sunday, October 29, 1961 Page 3

The target date for the initial lunar probe is 1963.

Oil-Derived Insulations

A type of foam rubber so rigid it can be sawed is helping to maintain the quality of frozen foods while they are on their way to the dinner table.

According to Oil Facts, urethane foam — the scientific name of this petroleum-deriv-

ed product — is now being used to insulate refrigerated trucks.

It is said urethane foam as insulation is twice as efficient as ordinary insulation yet needs only half the space.

Farmers use more petroleum horsepower than any manufacturing industry, according to Oil Facts. They spend about \$3.5 billion annually to fuel, lubricate and maintain nearly 5 million tractors alone.

OIL PROGRESS

... and Colorado City
Go Hand in Hand!

Since the discovery of Permian Basin oil near Westbrook more than 30 years ago, the progress of Colorado City and Mitchell County has been tied closely with the oil industry.

And just as oil progress is important to Colorado City, the best insurance service is important to G. D. Foster. For the best is none too good for G. D. Foster customers.

APPLAUSE
FOR OUR
OIL
INDUSTRY

The Baker management and staff applauds the men and women of our oil industry for their job well done ... providing all of us better living at minimum cost.

And we at the Baker are proud to be able to serve the oil industry ... with the hotel where oil men meet for business and pleasure ... and our Colorado Room with its lunches, dinners and fine steaks. We invite our oil industry to make the Baker its headquarters every day.

PARTNERS IN AREA PROGRESS

The oil and the electricity supply industries long have played important roles in the growth and development of West Texas. Oil and gas are important factors in the production of electricity. Electric power, in turn, performs a multitude of tasks for the oil industry. And just as the oil industry has expanded its facilities to provide more and better service for its customers, Texas Electric Service Company has expanded its power system to keep pace with the progress of the areas served. The company continues to plan and build ahead to assure plenty of dependable electric service for the oil industry and for the continued growth of the areas it serves.

TEXAS ELECTRIC SERVICE COMPANY

ASPHALT IS PRODUCED LOCALLY

Use of Bottled Gas Sets High in 1960

Last year Americans consumed nearly 10 billion barrels of versatile substance known variously as bottled gas, liquefied petroleum gas, LP-Gas, LPG, butane and propane.

According to the magazine Petroleum Today, LPG found its first major market in rural areas where no gas mains exist but today is widely used in industry and as a motor fuel.

Asphalt Pavements More Economical than Concrete

Asphalt, a product produced right here in Colorado City from West Texas petroleum, is rated as the best and

most economical highway pavement.

An on-the-spot study of 2,500 highway projects in 21 states and at 13 turnpikes by Stanford Research Institute made these findings — "that asphalt holds a substantial advantage over portland cement as a highway pavement."

Asphalt is manufactured here in Colorado City by Col-Tex Refinery—a division of Occidental Petroleum Corp. of Big Spring.

An analysis of the data gathered by the Institute during its independent study produced these average costs:

\$47,300 to pave a mile-long stretch of 2-lane highway with asphalt and \$79,700 with cement;

\$19,800 to resurface the same stretch with asphalt and \$24,200 with cement;

\$250 per year to maintain either pavement.

The Stanford research team found the average time between the initial surfacing and the first resurfacing to be 26 years for cement and 18 years for asphalt, but added the lower initial and resurfacing cost of asphalt made it less expensive in the long run.

The researchers computed an annual average cost for both pavements over a 40-year span by combining the major cost elements with various interest rates to take into account the time value of money.

They found the total average annual cost for a mile of 2-lane asphalt-paved highway was \$1,611 less than a mile paved with cement. In this case, an interest rate of 5 per cent was used.

The research team made a separate set of computations based on data pertaining solely to the Interstate Highway System.

Using the same 5 per cent interest rate on these heavy duty roads, the average annual cost of a 2-lane mile paved with cement would be \$5,353, compared to \$4,232 for asphalt. Or a savings in favor of asphalt of \$1,121 or nearly \$45,000 a mile over the 40-year period.

The study said that if the entire interstate system were built of asphalt, initial construction costs would be about \$1.5 billion less than if it were built entirely of concrete—assuming the conservative very heavy design was used for both pavements.

It also said that if all the remaining interstate projects not yet let to contract were constructed of asphalt instead of concrete, the total first-cost savings would be approximately \$1.1 billion.

U. S. Leads In Mileage Of Pipelines

Seventy six per cent of the world's crude oil and petroleum products pipeline mileage is located in the United States.

These pipelines span a distance of 190,000 miles, enough to circle the earth at the equator almost 8 times.

Natural gas pipelines and utility mains total 574,000 miles, nearly half again as much as the nation's 390,000 miles of railroad tracks.

Safe and efficient operation of this spreading system of pipelines is highly dependent on automation. As of last year, 1/4 of all crude oil trunk pumping stations and 1/3 of all products pumping stations were remote-controlled.

Microwave radio plays an important role in pipeline automation. It is estimated that 1/2 of the nation's private microwave radio relay system mileage is in pipeline service.

Boats Hike Gas Usage

An indication of the rising popularity of pleasure boating is to be found in the substantial increase in the amount of gasoline consumed by in-board and outboard motors last year.

Gasoline used in pleasure boat engines in 1960 totaled 547 million gallons, an increase of 57 million over the previous year. Diesel fuel use rose 1 million to 25,500,000 gallons.

There were 6,050,000 outboard engines in use in 1960, as compared with 5,845,000 in 1959. Inboard engines were used in 842,000 craft in 1960, and in 745,000 the previous year.

The study concludes: "However, it is roughly estimated that about 10 per cent of the remaining system represents special cases, such as elevated and depressed structures, and bridges where concrete must be used. Therefore, the range of potential future construction savings that would result from using asphalt on the remainder of the system could be considered to lie between \$440 million and \$1.1 billion, or from \$50 million to \$100 million per year, assuming a 10-year construction period."

Born in Freedom... Working for Progress...

That's the story of

Our Oil Industry!

Progress in the oil industry has been our progress... here within our home community, within the state and nation. And the staff of Root Memorial Hospital is proud and thankful for this great tradition of progress that typifies the oil industry. Our personal salute to all the men and women of this industry!

Years Of Progress In Every Gallon We Pump

That's What You Get Every Time You Fill-Up At Our Col-Tex Gasoline Pumps

More than 30 years of know-how by skilled refinery experts... and the finest techniques... go into every gallon of your HOMETOWN COL-TEX GASOLINE. And that means more power, more fuel value for the least cost to you.

COL-TEX STATION

and WHOLESALE
42ND ST. AT HICKORY

Fuel Blends Complicated And Costly

Producing gasoline blends can be a very costly and complicated procedure.

An oil company on the west coast recently installed a \$1.5 million electronically controlled blending unit that automatically mixes as many as 10 different gasoline stocks and 6 different additives from storage tanks a mile away to produce the complex fuel that powers today's automobiles.

Some 5,000 transistors in the electronic control instruments guide the blending of gasoline at the rate of 5,000 headlight range.

A companion unit blends turbine and diesel fuel at rates up to 3,500 barrels per hour. Fuel blending permits better engine design, which in turn results in fuel economy.

Wildcat Set 70 Miles Out

Drilling crews in the Gulf of Mexico are at work on a new offshore oilrig that is located a record 70 miles from shore.

A group of oil companies have joined in erecting the rig in 180 feet of water. It is a wildcat—a well drilled in an unexplored territory. Four additional wells will be drilled from the same platform in hopes of finding oil. It is expected that the initial well will be drilled to 14,000 feet.

The 800-ton structure is located south of Morgan City, La.

University Aid

University of Texas Petroleum Program receives \$12,000 in aid from Service Pipe Line Company.

PIPELINES AND POCKETBOOKS

Pipelines - smile-pipelines! What do oil pipelines give that's so outstanding?

Two things, my friend: economical oil transportation and good service to producers and refiners.

Means nothing, chum. I'm no producer or refiner. What I want to know is what they do for me.

That's the point. THEY SAVE YOU MONEY... at your gas station.

For without low cost pipeline transportation, the cost of petroleum products would be a lot higher.

Returns on Investments Are 'Average'

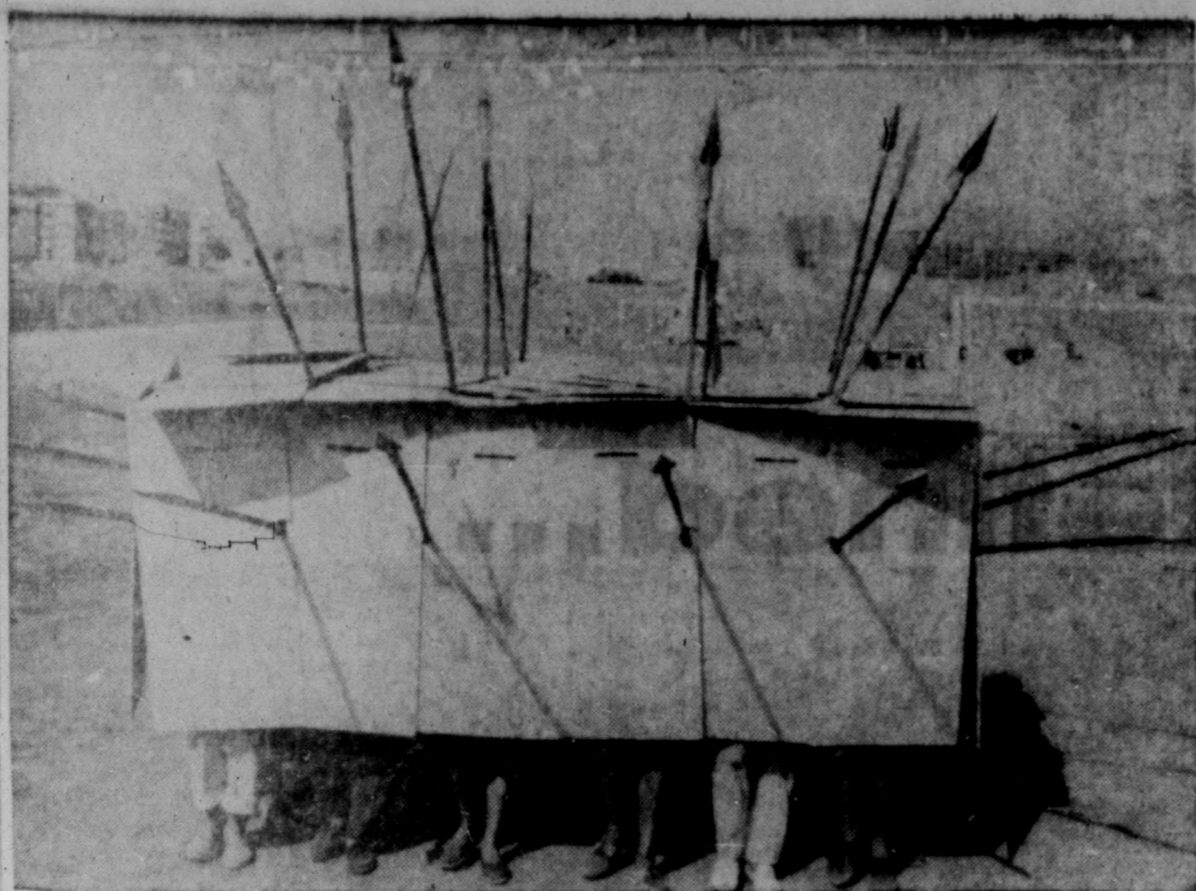

Petroleum's return on investment falls in the middle range when compared with the return of representative industries, according to recently compiled figures.

Throughout the 1950-1960 period, the oil industry's return on investment stayed about halfway between the high and the low of all the industries surveyed.

Not only did petroleum profits fall in the middle range, in relation to the industries at either end of the profits spectrum, but also when compared to a selected group of leading industries.

For instance, the combined average return on invested capital for petroleum production and refining companies during the 11-year period was 13.4 per cent. The top industry in this selected group had a 20.7 per cent return; the lowest had a 10.2 per cent return.

During 1960 alone, the average return on invested capital realized by all manufacturing industries was 10.5 per cent. Oil's return was right in line with the average at 10.2 per cent.

Spearhead

Spears bristle menacingly from this ancient Roman military device called the "Testudo." This ancestor of the modern tank allowed Roman warriors to march into battle protected by close arrangement of special shields. The war machine—which means tortoise—was revived for the movie "Cleopatra," being filmed in Rome.

Adds to School Fund	498 from petroleum industry for lease rentals, bonuses, royalty payments; total since Fund in 1960 received \$25,933,1932, \$360,722,131.	983,840,000 Barrels	Texas produced 983,840,000 barrels of crude oil in 1959, 38.2 per cent of U. S.

Sealer from Oil can Cut Water Loss

A new method of reducing loss of vital irrigation water on parched western farmlands has been tested.

A petroleum-based emulsion, which seals the bottoms and sides of irrigation canals and ditches, has resulted in cutting water losses by as much as two-thirds.

Previous tests show the sealing compound is capable of cutting seepage in highly

porous canals up to 90 per cent or more.

Such results are highly significant to irrigation farmers throughout the West who are experiencing the third year in a row of sub-normal water supplies.

In some areas, seepage has claimed up to 1/2 of the water delivered at the mouth of

major irrigation projects.

Previous techniques required that a canal be drained before application of the sealant, but the new product uses water as a carrier. Where leakage occurs, the new sealant enters the soil with the escaping water and in a few hours forms an impervious membrane at a selected depth.

The U. S. Bureau of Reclamation has expressed keen interest in the new product. It may help answer the Bureau's 15-year search for sealants which meet the Bureau's high standards of performance, while being economical enough for use in the widest range of irrigation projects. Farmers are hopeful that the new oil product may provide a means of restoring vitality to water-starved land.

Expenditures For Drilling On Increase

The petroleum industry is stepping up its spending for drilling, new equipment and plants in 1961.

A comparison of Department of Commerce business figures and projected petroleum company budgets shows a 6.2 per cent increase in petroleum capital expenditures, as opposed to a 1 per cent cutback in general business spending.

It is estimated the industry will spend a record \$6.4 billion for drilling and new facilities this year, up \$373 million from 1960.

Drilling and production continues to top capital expenditures, with an expected total this year of \$3.5 billion.

Transportation outlays are expected to be up 16 per cent this year, for a total of \$1 billion 384 million. The largest part of the increase is for natural gas pipelines.

Processing will account for \$803 million of this year's spending, a jump of almost 30 per cent over 1960.

Outlays in the marketing category will account for \$598 million. This is about 20 per cent more than 1960 spending.

Spending in the "all other" category rounds out the picture at \$139 million.

Petroleum Today's Top Energy Source

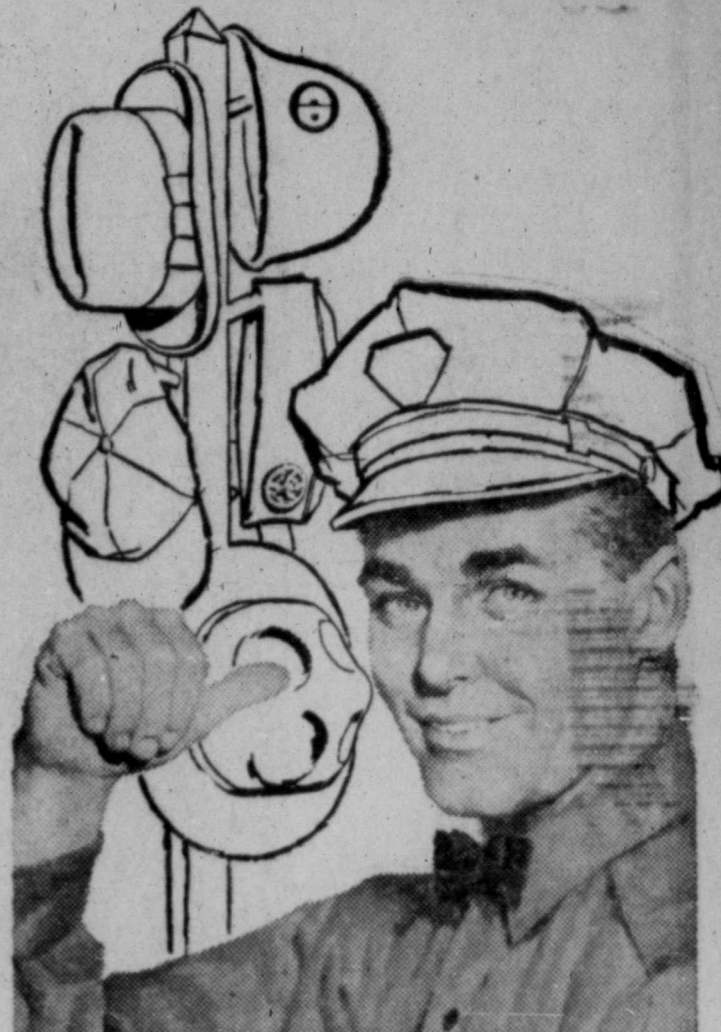

Petroleum is our principal source of energy today.

In 1960 oil and natural gas together provided 73 per cent of the total U. S. energy supply.

Oil accounted for 41.5 per cent and natural gas for 31.5 per cent making a total of 73 per cent. Coal contributed 23.1 per cent, and water power, 3.9 per cent.

In 1920, the comparable percentages were: coal, 78.4; crude oil, 13.3; natural gas, 4.4; and water power, 3.9.

OUR SALUTE TO OUR OIL FRIENDS

We tip our Texaco caps to all of you who are a part of the great oil industry . . . for your contribution to our good living . . . our own community and our nation.

FOR BEST SERVICE . . .

We at Henderson Texaco, proud members of the oil industry, invite you to our driveways for the very best in auto and truck service.
