

Ike Is Willing To See Stalin To Gain Peace

By RELMAN MORIN

NEW YORK, June 7. (AP)—Gen. Dwight D. Eisenhower said today "I'd go anywhere and do anything" — including talking with Prime Minister Stalin — in the effort to achieve a secure peace.

That problem, he said, underlines and aggravates all other problems.

However, he continued, he has some doubt whether a conference with Stalin would contribute to the solution. He told a news conference, his second full-dress session with correspondents:

"I am not certain that is the way to approach the problem. If I believed it was, and that such a meeting is desirable, there is nothing I would not do to promote peace and security."

"I would go anywhere and do anything."

Eisenhower stood 40 minutes this morning, on the platform of a hotel ballroom, blinking and grimacing into a solid fence of flood lights, catching the questions as they came. The conference was filmed and recorded for later use by television and radio.

It was noisy, confused, and at the end, almost unruly.

As in Abilene, scene of the first news conference, Thursday, most of the people in the room today were not correspondents. Eisenhower's partisans broke into frequent applause, and their running fire of comment made the questions and answers difficult to hear.

The conference ended in an uproar.

A man who said he was Dr. Emmanuel M. Josephson, and had written and published a book called "Rockefeller Internationalism" asked Eisenhower why he had associated himself with Alger Hiss.

(Hiss, former State Department official, was convicted of perjury in denying that he passed official secrets to a pre-war Soviet spy ring.)

Eisenhower's face flushed. He scowled, and stepped away from the microphone toward Josephson. He kept asking, "What's that? Who's that man? What?"

Shouts of "Sit down! Throw him out! How'd he get in?" were coming from the spectators. Josephson continued to shout questions and accusations at Eisenhower.

When some quiet was restored, Eisenhower grunted out:

"I do not believe it's necessary for me to defend myself against

UN Negotiators Walk Out From Truce Parley

By GEORGE MCARTHUR

MUNSAI, Korea, Sunday, June 8 (AP)—Allied armistice delegates took a holiday from Communist propaganda harping today—beginning a three-day recess. The Reds didn't agree to the lay-off.

Major Gen. William K. Harrison, senior Allied delegate, told the Reds that further repetition of the argument on the deadlocked prisoner exchange issue was "quite futile."

He led the United Nations Command negotiators out of the faded tent at Panmunjom while the Communists were still talking. Harrison said tersely the Allied team wouldn't be back until June 11 whether the Communists liked it or not, and that liaison officers could handle any business in the meantime.

North Korean Gen. Nam Il, chief Red delegate, insisted that the top-level plenary session convene today at 11 a.m. as usual. It was not determined, at an early hour, whether the Reds would show up.

"They have been trying to force us to come up here every day and listen to that drivel," Harrison said disgustedly after he walked out of the conference tent Saturday.

The negotiations remained tightly-deadlocked on the Allied proposal to exchange 70,000 Communist prisoners for some 12,000 POWs held by the Reds.

Nearly 10,000 other Communist military and civilian internees said they would rather die than return to Red rule. The Communists for weeks have been assailing that figure, and charging the Allies forced the prisoners to refuse repatriation.

In trying to back up their arguments the Reds have repeatedly cited the Kojie Island prisoner riots as evidence of Allied "mistreatment" and "forced screening."

Reviewing The

Big Spring Week

With Joe Pickle

Water consumption continued to hang around the 2½ million gallon per day mark last week, just as it did for May. It's really remarkable that a city of more than 20,000 can discipline itself to that small a water demand in the summertime. While we don't want to precipitate an untoward increase, we do point out that another half million gallons per day could be supplied without causing any problems.

In an effort to save shrubs, many people have been applying bath water to the plants. A few have complained that it is backbreaking work. It is if you dip it, but why dip when you can siphon. Put one end of a garden hose in the bottom of the unemptied tub; attach the other to the hydrant, and turn it on until air in the hose is expelled and the hose is filled. Turn off the hydrant and unscrew the hose, which will continue to flow until the water is siphoned out.

Building permits for May amounted to a healthy \$379,000, which was \$200,000 under a month ago but the second best for the year. Construction totals now are nearing the \$2 million level and will zoom over it in June.

Speaking of building, work is to start this week on the first block of 300 rental units in the Monticello Addition. There will be 68 in this group and before they are complete, others will be started. This

Young Admirer

President Truman, in Springfield, Mo., to attend the reunion of his old World War I outfit, stops during one of his traditional early-morning walks to shake hands with Jana Kay Hall, of Marshfield, Mo., a three-year-old admirer. Truman later delivered an address to the 35th Division gathering in which he said the U.S. was still in danger from Russia, but denied that Soviet airpower was greater than America's. (AP Wirephoto).

E. Germans Pouring Across To West Side

By DANIEL DE LUCE

BERLIN, June 7 (AP)—Thousands of fearful Germans struggled to flee from Soviet-held East Germany tonight as Communists rushed arming even in schools and factories.

A stream of human misery poured west from the Soviet zone, slipping past Russian sentries and people's police at the risk of death in the Reds' new frontier security belt.

In groups ranging from a single family to 800 persons, the East Germans arrived steadily in the American and British — defended states of the Bonn republic.

Behind them, Communist chiefs in East Berlin threw off all the wraps for a vast armament program including the two million German Youth (FDJ) and workers in all key industries.

The aim is an army of 25 divisions with 375,000 men, backed up

by millions of East Germans organized as Red militia and taught to hate the West.

The Soviet-controlled news agency ADN reported high schools are giving courses in firearms, military communications and aerodynamics and that "armed defense corps" are being set up in major factories.

East German rearmament, whose groundwork was laid with the formation of military cadres in the people's police three years ago, is pictured by the Communists now as a sudden move to counter the threat of West Germany's alliance with the Western Powers.

Troubled Berlin was hit by another Soviet grab today as the Russians grimly went on with sealing off the city from their surrounding zone.

Their auxiliary force, the people's police, shoved 15 Germans out of five homes on the Frohnau estate, whose land is chiefly in the French sector but whose buildings are in Soviet territory.

The action broke still another of the 1945 agreements among the Allies. The ousted farmers lost all their livestock to the Red police.

The British Army's five-day blockade of Russia's Radio Berlin headquarters in the Western heart of the city—a reprisal for Soviet territorial steals on the edge of the British sector—seemed heading in to fulfill.

The Communist radio staff and Soviet Tommy-gun guards were as defiant as ever tonight, boasting they would never leave at British invitation, and glorying in a fanfare of publicity.

WHADDYAKNOW, WATER IS FOUND

Big Spring isn't too far from water, despite the drought.

Pipe line crews found the wet stuff where it wasn't wanted as they laid the city's 27-inch water main between East Highway 80 and the T&P Railway. Several streams gushed from the sides of a ditch and pumps were called into service to keep the channel clear.

The "ground water" of the brackish variety and only a few feet deep, was encountered below the drainage ditch through the lowlands area just east of the city limits.

Russell Name To Be First At Dem Nominating Meet

WASHINGTON, June 7 (AP)—Alabama Sens. Lister Hill and John Sparkman said today that the name of Sen. Richard B. Russell of Georgia will be the first offered at the Democratic presidential nominating convention in Chicago July 21.

They told a reporter that Alabama, which tops the alphabetical list of state delegations, would yield to Georgia to present Russell.

Hill and Sparkman are delegates-at-large from Alabama to the convention and Hill will serve as chairman of the delegation.

KC Freight Terminal Is Lashed By Fire

KANSAS CITY, June 7 (AP)—The quarter-mile long Santa Fe Freight Terminal today was swept by a fire that damaged 400 feet of dock and 20 freight cars.

One Santa Fe official said he thought the damage to the docks alone would amount to at least \$100,000.

They said changes will be slight in the lower price brackets, from \$15,000-\$17,000 down. But down payment requirements will be reduced substantially on medium and higher priced homes.

Truman Warns Of New Bomb At Will In War

French Raids On Reds Go On In Port Cities

Spy Plot Rumored Against Nation's Naval Defenses

PARIS, June 7. (AP)—French Naval authorities, trying to run down a reported Red spy plot to sabotage the nation's sea defenses, today ordered raids on Communist front organizations in four big port cities.

Acting on Navy orders, police swooped down on headquarters of the Red-dominated General Labor Confederation in Brest, Lorient, Bordeaux, and Oran, Algeria.

Police also launched fresh raids on Communist headquarters in Paris in quest of papers to bolster the government's case against Red Boss Jacques Duclos and 163 others charged with plotting against France's internal security.

Police combing the port areas sought documents which might be connected with papers found last week in the home of a Communist party official in Toulon. Informants said the documents contained plans for naval arsenals and a top secret plan for defense of Toulon, France's key Naval base, on the Mediterranean.

The Toulon documents were spotted during raids on Communist offices throughout France following the May 28 riots in Paris in protest against Gen. Matthew B. Ridgway's arrival to take over as Atlantic Pact commander.

Some of the papers found in the past few days were reported to include incriminating contact with powers behind the Iron Curtain and to entail possible charges of treason on the ground of plotting against France's external security.

The raids capped a crackdown in which police and non-Red workers have made more progress against France's Communists than at any time since 1948.

Premier Antoine Pinay said his government's tough new policy is based on experience, and made clear it will continue.

In a speech at Beaulieu, he declared "It is necessary to reject the imitation here of foreign experiments which cannot be adapted to this country or to its national temperament."

With more than 3½ tons of seized Communist documents already in hand, police flying squads struck again in three cities.

They combed Paris headquarters of the International Workers Movement and the French Union Information Agency, both listed by the Interior Ministry as Red front organizations, and Communist offices in Brest and Lorient.

The police were after papers to reinforce the government's case against Communist leader Jacques Duclos and 163 others charged with plotting against France's internal security. They made no further arrests.

Reports circulated in high circles that some seized documents, particularly those of a Communist-led dock workers union at Toulon, implicated some Communist leaders in treasonable activities.

These activities were reported to include incriminating contact with powers behind the Iron Curtain and to entail possible charges of treason on the ground of plotting against France's external security. Official confirmation was lacking.

At the same time it appeared France was in for more out and out fighting with the Communists than the country has been since troops and police were called out four years ago by Jules Moch, the hard-headed interior minister of the time, to crush a widespread coal and steel strike combining political and economic issues.

CONSERVE WATER

Withdrawals during 24-hour period ending at 8 a.m. Saturday: 2,723,000 gallons.

Maximum safe withdrawal rate under present conditions: 3,000,000 gallons daily.

Retorts Sharply To Taft Charges

By ERNEST B. VACCARO

SPRINGFIELD, Mo., June 7. (AP)—President Truman warned grimly today that Russia may be plotting "new Korea in other parts of the globe" but he insisted that United States air supremacy in Korea is such that we "can bomb the enemy at will almost anywhere in his territory."

In a departure from his prepared text, the President declared that "in air combat in Korea our planes have knocked the Russians out at the rate of 8 to 1."

He retorted sharply to Sen. Robert A. Taft's criticism of administration air policy and denounced "short-sighted politicians" he accused of slashing defense appropriations for "playing with fire" in the face of Soviet threats around the world.

Talk that our forces in Korea "are at the mercy" of the Russian-made enemy air force just "isn't true at all," he said.

Truman spoke in the sweltering heat of the Shrine Mosque auditorium to a crowd estimated by Building Manager W. E. Hamilton at 4,000 persons.

The President was warmly applauded, particularly when he said "We can win the peace—and we are going to win the peace." But his biggest applause came earlier when he marched for nearly three

miles in shirt sleeves at the head of the annual 35th Division reunion parade. Police Chief Ralph Langston estimated the cheering yelling, handclapping crowd along the route at from 100,000 to 150,000 Missourians.

The President divided his major address to climax the 35th Division convention between a reply to the "nonsense" that a gigantic Air Force is our cheapest defense, and to a denunciation of the "so-called" economy bloc.

The President declared economy claims of budget slashers "political propaganda" and "political hokey."

The President's reference to knocking out the Russians 8 to 1 apparently referred to Russian planes being used in Korea. He did not refer specifically to either planes or pilots.

And he took a shot at those in Congress who have forced a reduction from around \$11 billion to \$6 billion in his military recommendations and heavy cuts in his foreign military and economic aid program.

"There is no justification for slashing appropriations for defense or for aid to our Allies," he said. "But that is exactly what a group of short-sighted politicians are trying to do."

"This is not the year to play around with meat axes in the field of national security. The Communists are building up forces in Korea and other parts of Asia. In Europe, the Russians are threatening Berlin. Communist parties are staging riots from Paris to Tokyo."

"Slashing appropriations," Truman continued, "is playing with fire, and the dollars saved won't help much if we lack the planes—or tanks—our Allies need in the critical hour of danger."

Truman spoke after a day of feverish convention activity in which he marched afoot in the annual reunion parade with members of his Battery D of the 129th Field Artillery.

He was officially made a "honorary member of the 129th Field Artillery" at a reunion breakfast featuring a floor show topped by a man who imitated all

See TRUMAN, Pg. 6, Col. 1

THIS CAT IS KIND OF BUSY

BONHAM, June 7 (AP)—"Dusty" is a mother again—for about the 420th time.

Dusty is a 17-year-old cat owned by Mrs. Kate Estes of Trenton. She gave birth to one kitten this week. Mrs. Estes said Dusty has had more than 104 litters, with an average of three kittens per litter.

Previously, candidates for commissioner in all four precincts had been listed on all ballots and voters had simply been instructed to mark only those in their respective precincts. This had resulted in confusion, especially in the larger voting boxes.

The election counts include the printing of ballots, tally sheets and other supplies, and pay for election judges and their assistants. Some 95 persons will be required to conduct the elections in the county's 15 voting boxes.

CITY FETE SCHEDULED JUNE 20

Nearly 2,000 Tickets Given Airmen For Welcome Party

Tickets for 1,832 Air Force guests to Big Spring's Welcome Airmen party were turned over to Webb Air Force Base officials for distribution Saturday.

Four hundred to 500 others will be available early this week.

Big Spring businessmen had purchased 1,932 tickets for airmen at noon Saturday, not including those distributed by four service club representative handling additional sales. The quartet had 500 tickets, sale of which they are expected to report Monday or Tuesday.

The Welcome Airmen event is scheduled for 7 p.m. Friday, June 20, when WAFB personnel will be guests of Big-Springers for a hot dog supper and variety show in City Park.

Tentative program for the party

Steel Optimism Cautious; Talks Resuming Today

Both Sides Refuse To Divulge Success Of Capital Meetings

WASHINGTON, June 7. (AP)—Cautious optimism stemmed tonight from continued negotiations between steel industry officials and Philip Murray's CIO steelworkers.

But both sides maintained a complete silence at the end of an all-day session in the White House Cabinet Room.

The fact that they agreed to return for a fourth day of bargaining tomorrow at 10 a.m. (EST) appeared to indicate possible progress toward settling the six-months wage dispute and crucial six-day nation-wide strike.

John R. Steelman, assistant to President Truman and acting defense mobilizer, who is guiding the latest peace endeavor, spent only a few minutes today in the joint negotiations. He, too, refused to give newsmen any clue as to progress or lack of it.

The industry negotiating team, headed by Adam Ben-Morrell, chairman of Jones and Laughlin, went back to its hotel headquarters here to make a complete report on the bargaining thus far to U. S. Steel Chairman Benjamin Fairless and other industry leaders.

The union's negotiating team, headed by CIO President Philip Murray, likewise planned to make a full report on the present status of the peace talks to union district leaders who are gathered in Washington.

The strike which started Monday noon has wiped out almost 90 per cent of the nation's daily steel output. Production and defense officials grew more concerned over imminent shortages of the defense-essential metal.

A directive to funnel defense orders to the few plants still operating was being worked out by the National Production Authority. These plants produce a little more than 10 per cent of the nation's normal steel output. But

See STEEL, Pg. 6, Col. 2

Firemen Get Helping Hand From Passerby

City firemen got an assist Friday night from an unidentified passerby who noticed a fire gnawing at the door of a house on E. 18th Street.

The motorist extinguished the blaze, drove to the 18th and Main substation and told firemen: "I may be cutting in on your business. Just put a fire out down the street. You probably ought to check it."

Firemen found the sill between screen and door slightly damaged by the blaze. No one was at home, but a lighted cigarette apparently had been dropped accidentally between the doors.

Tentative arrangements have been made for the appearance of Henry Rogers, Jim King, Manuel Fuga and their orchestras.

A continuous program will start shortly after 7 p.m. and as guests are served they may enter the amphitheater to witness the presentation.

Attendance goal for the party, planned as a welcome and friendship gesture toward WAFB airmen, is 3,000. In addition to the "blue" tickets sold for airmen, white tickets for civilians are available at the Chamber of Commerce. For every two "blue" tickets purchased, the buyer receives one "white" (civilian) ticket. The "blue" tickets sell for 50 cents each.

IN POSTING PLACARDS

Candidates Better Watch Their Tacks

By WAYLAND YATES
Political candidates may not realize it, but there's a possibility they'll violate the law and endanger some person's life between now and election day.

That applies to others, too, if they're apt to nail a poster or hand bill to a power or telephone pole. Posting of such unsightly documents is contrary to law, unless the permission of the owner of the property used as a support for the vote appeals and "messages" is secured in advance. And permission won't be forthcoming from owners of utility poles.

Power and telephone companies regard tacks, nails, and other devices used to fasten the placards as hazards to the safety of linemen who have to climb the vertical timbers.

The climbers rely on a pair of steel spikes for footing as they mount poles to string or repair lines. If a spike should strike the head of a tack, it might slither off of the post and send a lineman hurtling to the ground.

Maybe lawmakers had safety in mind when the approved legislation banning the posting of placards. Then again, they may have been concerned with appearance of public and private property, as card and hand-bill displays do little to improve the view.

At any rate, the practice is against both state and local law in Big Spring. A city ordinance also prohibits the distribution of circulars, hand bills and written announcements in other ways.

City fathers apparently first took action in support of "post no bills" pleas in 1929 when they adopted a Sanitation and Abatement of Nuisances ordinance. The statute, described occasionally as a "catch all ordinance," covers a number of topics that probably weren't mentioned in earlier laws.

Three sections apply specifically to the display and distribution of printed and written matter.

Here's what the ordinance has to say in defining "nuisances" for which the perpetrator may be charged with misdemeanor, and, if convicted, be fined up to \$100.

"Section 13. The scattering, or distributing of any advertisements, circulars, hand bills, printed or written announcements or papers of like character upon the streets, sidewalks, alleys, gutters or within the public buildings or on the public ground, or in vehicles of any kind within the limits of the city.

"Section 19. The printing, painting, writing for placing of any sign, writing, advertisement, pictures, characters or other symbols on any street or sidewalk within the city limits.

"Section 21. The printing, pasting, sticking or placing of any advertisement, hand bills, or placards of any printed, pictured or written matter upon any house, wall, building, pole or fence, or other property, private or public, without the permission of the owner or person in charge thereof."

Incidentally, each day the "nuisance" continues constitutes a separate offense. Campaign expenses could run pretty high if someone took a notion to file a complaint.

Dem Executive Unit Will Make Up Ballot

By DAVE CHEAVENS

AUSTIN, June 7 (U)—The ballot you folks will mark in the July 26 Democratic primary will be made up at a meeting of the state Executive Committee here Monday.

Who gets on and who may be kept off could produce considerable static.

Compliance with the filing deadlines and with the committee's idea on how much money each candidate owes as a filing fee appeared today to be the chief issue.

Some candidates who disagree with the committee's policy on candidates had complied with deadlines of the new election law on reporting campaign expenses to the secretary of state might not even come up. The committee leadership does not want it to.

Speculation was that the matter of reporting campaign contributions and spending is outside the committee's jurisdiction, that if anybody questions these reports it would have to be a citizen or some other person who considers he has been wronged under the law.

In addition to making up the ballot, the executive committee has two other jobs.

The first is to select a site for the September state convention.

On Roads Board

Carl Rountree, Lamesa attorney, has been named to the board of directors of the Texas Good Roads Association. He is a veteran Mason, Shriner, a Rotarian, and a Methodist. Rountree is a member of the firm of Rountree, Renner & Snell at Lamesa.

Decision Due On Segregation In Public Schools

By PAUL M. YOST

WASHINGTON, June 7 (U)—The Supreme Court is scheduled to wind up its current term on Monday with a decision on two appeals challenging the segregation of white and Negro pupils in elementary public schools.

Negro parents filed the appeals, asserting constitutional rights of their children were violated by segregation in the schools of Topeka, Kan., and Clarendon County, S. C.

The appeals were from decisions by lower Federal Courts refusing to strike down segregation. The lower courts cited earlier Supreme Court decisions that segregation is permissible if equal facilities are provided for both races, and that the segregation problem is within discretion of the states in regulating their public schools.

The Supreme Court could: 1. Dismiss the appeals on a ground such as lack of constitutional substance in the questions raised. (Dismissal would let the lower court decisions stand unchanged.)

2. Affirm the lower court decisions at once, without the usual hearing of arguments.

3. Grant hearings with the intention of making a new decision on the segregation question. (A new decision could uphold or strike down segregation. If the court grants new hearings, they will be scheduled some time in the new term which opens next Oct. 6. The decision and explanatory opinions likely would not come before late November, or might even go over into early 1953.)

The Supreme Court in two decisions announced in June, 1950, banned segregation as then practiced at the Texas and Oklahoma State Universities. Basis of the decisions was that the two universities did not provide equal opportunities to Negroes.

The redwoods of the U.S. West Coast have been native only to California and Southern Oregon since the Glacial Age.

The committee will have before it its own record. That includes the usual application for a place on the ballot by state office seekers, their loyalty affidavits and the filing fee.

The committee policy as announced several weeks ago was that it did not consider an application in order unless it was accompanied by the filing fee at the time of the filing deadline. Several prospective candidates have indicated they might challenge this ruling.

Acheson May Travel To Rome And Vienna

WASHINGTON, June 7 (U)—Secretary of State Acheson may go to Vienna and Rome during a trip to Europe to get a degree at Oxford University in England June 25.

Acheson already has plans to visit Berlin and aides said today a trip to Vienna is definitely under consideration. They added he might also consider going to Rome. The schedule is expected to be worked out finally in a week or 10 days.

Ex-Kaiser Aide Dies

DOORN, The Netherlands, June 7 (U)—Sigurd Wilhelm Adolph Isenmann, 68, former aide to the late German Emperor Wilhelm II, died in Doorn Castle today. He followed the Kaiser into exile when the latter fled Germany after World War I.

Michigan Protests Week Ends Wet; They Blame Rainmakers

By G. MILTON KELLY

WASHINGTON, June 7 (U)—Those rain makers in New Mexico are in for some trouble if Michigan has many more rainy week ends.

Sen. Moody (D-Mich) has taken up the cudgels in a letter to the Defense Department. He demanded to know why, if rain makers can turn on the rain and shut it off like a faucet, his state has to get its share in the form of fun-spilling rainy week ends.

Catering to tourists is a major industry in Michigan. And the Michiganders have been getting pretty touchy about the frequency of rainy week ends since Dr. Irving Langmuir, under Defense Department auspices, started seeding

clouds with chemicals over New Mexico to drench the arid lands below.

Michigan tourist and resort owners have responded with howls that Langmuir usually does his cloud seeding on Mondays, Tuesdays and Wednesdays, and that once seeded the clouds keep leaking as the prevailing winds move them over Michigan and other more easterly states on Fridays, Saturdays and Sundays.

"There are certain times of the year when no one cares very much whether it rains over Michigan on Friday, Saturday and Sunday," Moody wrote Secretary of Defense Lovett in a letter he made public today. "But starting now, and continuing through Labor Day, people do care."

"The tourist and resort industry is the second largest industry in Michigan, exceeded only by the

automobile industry. "It would appear, therefore, that Dr. Langmuir's cloud seeding in New Mexico on Monday, Tuesday and Wednesday is going to have a serious effect on the economy of my state. We would like to have Dr. Langmuir change his schedule."

Moody told a reporter he was serious in the protest, and plans some follow-through action in Congress if he doesn't like the reply.

He based the letter on one from Lawrence J. Davis, head of the L. J. Davis Company, Detroit manufacturing chemists, but said there had been many other complaints.

Incidentally, Davis himself may get into hot water with boosters of Michigan tourist attractions. In his letter to Moody he remarked:

"We have little enough sunshine here anyway."

Local Man Arrested After Release From Nebraska Hospital

PLATTSBURGH, Neb., June 7 (U)—Preston L. Lucas, 30, of Big Spring, who was injured in an auto accident near here Wednesday night, was released from an Omaha hospital today.

Sheriff Tom Solomon said Lucas, who Thursday identified himself as "John Lucas," actually was Preston L. The sheriff waited at the hospital and arrested him on a charge of intoxication.

Solomon said Lucas would be held for Sheriff Ray Drather of Alamogordo, N. M., who has a forgery warrant for him. Solomon said he had no details of the forgery charge.

Lucas was injured and Johnny L. Gambrell, 38, of Messilla Park, N. M., was killed Wednesday night when their car was involved in a collision with two trucks near here. Gambrell was identified as the driver of the car.

The redwoods of the U.S. West Coast have been native only to California and Southern Oregon since the Glacial Age.

Squabble Over Building Pay In Glasscock Co.

GARDEN CITY — A battered and bruised county commissioner, a bit of gun play, and a squabble over fence building pay all added up to \$65 in justice court here last week.

Buck Owens, 23, Odessa, entered a plea of guilty Thursday and paid a \$15 fine and costs to Justice of Peace Pete Underwood for assault charges against E. L. Owens, her husband and father of Buck Owens, were dismissed.

Ross Hodges, county commissioner from Precinct No. 2, was sporting bruises and abrasions about the head. He said that Buck Owens had worked him over after Mrs. Owens pulled a pistol on him.

The episode apparently stemmed from a dispute over pay for building fences on a new oilfield road in the southwest part of Glasscock County. Hodges said that he had half out for \$150 per mile labor cost as per an original contract while some other members of the court wanted to adjust it to \$175 per mile.

At any rate, after a prolonged commissioners court session Wednesday settlement was made at approximately \$100 less than the contractor, E. L. Owens, had billed.

As they walked out the west side of the Glasscock County Courthouse and neared the street, Hodges said he and the elder Owens argued heatedly about the matter. At this point, he said, the pistol was leveled on him and he was ordered to throw out his knife. He reached in his pocket and tossed it aside. Whereupon, the younger Owens laid him low, according to Hodges. Mrs. Owens accused Hodges of pulling a knife on her husband.

Sheriff Walter Teele was sent for, but in the meantime others near the scene separated the two men. Hodges said he asked District Attorney Elton Gilliland, who also doubts as county attorney for Glasscock County in such cases under a special statute, to make a full investigation. Gilliland said

Big Spring (Texas) Herald, Sunday, June 8, 1952

JIMMY JOHNSON

Jimmy Johnson Is Picked As Carrier Of The Month

"Carrier of the Month" among the Big Spring Herald's crew of Little Merchants is a 12-year-old, Jimmy Johnson.

For an outstanding record in servicing his route, prompt payment of his bills and regular attendance at crew meetings, Jimmy gains possession for the month of a gold trophy.

More substantial rewards include

Sheriff Teele had signed the complaints.

Hodges accounted the experience as slightly unnerving and painful but told the Herald that "I'll stay with them as long as my hide holds out because I figured I was trying to save the county some money."

a \$5 merchandise certificate, good at the Big Spring store of his choice, and a dinner out, plus a show, for himself and all members of his family.

Jimmy lives at 400 Dallas, serves that portion of the city between Scurry and Gregg and from 18th Street south to the city limits. His brother, Robert Johnson, was "Carrier of the Month" for April. Jimmy will be in the 7th grade next fall. His hobby is building model airplanes.

He is the son of Mr. and Mrs. A. I. Johnson, and his Dad is a mechanic for the city. He has two sisters who also will be his guests for the dinner and show.

SET FOR THE CITY PARK

'Old Settlers' Map Plans For Annual Reunion On July 18

A handful of "old settlers" in Howard and Glasscock Counties Saturday mapped plans for their annual reunion, an event they expect 600 or more persons to attend.

The gathering will be Friday, July 18, in City Park. It will include the traditional Old Fiddlers' Contest, barbecue and old-time dance scheduled for the evening.

Problems of providing food and entertainment for the hundreds expected to attend were the principal topics discussed at Saturday's planning session. Committees were named to handle details, prepare food, secure additional finances and otherwise complete groundwork for the reunion.

Another meeting was set for Saturday, July 12, when progress reports will be made and final arrangements initiated.

Reunion leaders specified that only "old-time hoedown music" will be played in the old fiddlers' contest. They decided that contest-

ants may bring their own "seconds" or choose one at the reunion. Prizes for winners of first three places were left at \$15, \$10 and \$5—same as in 1951.

A roof has been erected over the

Women Recruits Are Sought For Service

Young women of the Big Spring area who are interested in careers in the Women's Army Corps or the Women's Air Force have been invited to come in for personal interviews at the local recruiting office Monday.

Sgt. Mary Cottingham of the WAC will be at the Big Spring recruiting office from 8 a. m. to 5 p. m. on that date. The recruiting office is located at 301 Scurry street.

The advantages which military service offers young women at this time will be explained in detail to those who report for interviews.

concrete platform at City Park by L. C. Matthies, reunion association president, and others. Mrs. Dick Sides, secretary-treasurer, reported that the organization has some \$300 in the treasury—not enough to provide barbecued beef, mutton, goat and the trimmings for the usual turnout.

Committees were named to secure donations of meat, wood and cash. Sam Childress, a perennial contributor to reunion causes, was the first with an offering for the 1952 get-together. He promptly donated "40 pounds of meat and a load of wood."

Named to the committee to get additional donations of food were Ben Schafer, Jim Cauble and C. C. Stevens. Joe Hayden and Matthies make up the committee to receive cash contributions.

Other committees appointed were coffee and stew preparation, Sam Cauble and Nath Allen; food purchases, Knappe and Childress; barbecue preparation, Allen, Knappe and Kelly Burns; and dance ar-

rangements, Mr. and Mrs. Ben Schafer and Mr. and Mrs. Melvin Choate.

Attending the reunion planning meeting at the courthouse were Matthies, Tom Hicks, Childress, Mr. and Mrs. Schafer, Mrs. Maggie Richardson, W. A. Myrick, Hayden, O. A. Moore, Walter Grice, Mrs. Sides, Mrs. L. R. Mundt and Stevens.

Matthies and Hayden said immediately after the meeting that all cash contributions will be appreciated and go a long way toward making the reunion a success.

MEN IN AMERICA CALLED FAT, LAZY

The New York Custom Tailors Designers Club says American men are the fattest and laziest in U. S. history. The reasons: Too much sleep and food, not enough exercise.

It probably is true that they are the fattest, but we doubt the laziness. Everyone is working and a great deal is being accomplished and it certainly is not being done by lazy men.

If you have decided to reduce, here is a way to do it sensibly, easily and safely. Just go to your drugstore and get a four-ounce bottle of Barconatrate. Pour into a pint bottle or jar; add enough grapefruit juice to fill bottle. Then take two tablespoons twice a day. That's all there is to it. If the very first bottle does not show you the way to take off only fat, return the empty bottle for your money back. Barconatrate not only helps you to take off weight, but it also helps you in other ways. As Mrs. E. Phillips, 27 West Seventeenth Street, San Angelo, Texas, wrote us:

"I am 19 years of age and lost 18 pounds taking Barconatrate and it not only took off weight, but it has improved my health wonderfully."

And Mrs. C. E. Davis, Box 218, Mount Vernon, Texas, says: "When I began taking Barconatrate, I weighed 170 pounds. I now weigh 146, a loss of 24 pounds. Not wanting to lose any more weight, I cut down on dosage and continue to take it, as it helps me in other ways."

Dr. Schwarzenbach Is ABC Club Head

Dr. Howard F. Schwarzenbach was elected Friday to serve as president of the Big Spring American Business Club during the second half of 1952.

He will succeed Dr. Floyd R. Mays, who is finishing out a term as president for the first half of the year.

Other officers for the coming six months named Friday were C. M. Deal, first vice president; Jimmie Jones, second vice president; R. H. Weaver, third vice president; Darrell Webb, secretary; W. B. Hardy, treasurer; and J. B. Apple, treasurer.

The board of governors will be composed of Blondie Crane, Al Dillon, J. D. Jones and Justin Holmes.

T. S. Currie Jr. was named official delegate of the local club to the National Convention of American Business Clubs, which is scheduled June 15-18 in Springfield, Ill.

Big Spring, Texas

Housewife Seeking Governorship Post

SAN ANTONIO, June 7 (AP)—An attractive, brown haired housewife, who helps her blind husband run his electrical contracting business, is a Democratic candidate for governor of Texas.

Mrs. Allene M. Traylor said she decided to run for office for the first time because she believes "a woman must take over the reins of

government and clean out the state capitol." In her campaign, Mrs. Traylor is accusing politicians of responsibility for "inadequate income for the aged, below par salaries for school teachers, poor farm roads, indifference to veterans and utter lack of equal representation for the working man and small businessman."

She said all these conditions exist "because of graft, waste and corruption in government caused by heavy pressure on political office holders who are controlled by special interests, corporations and outside monopolies."

"I believe a woman must... clean out the state capitol, utilizing basic honesty, perspective, business acumen and, above all, honest desire to represent all citizens equally."

Ralph Yarborough of Austin, another Democratic candidate, does not share her opinion that only a woman can sweep out the state capitol.

Her husband now is her campaign manager. The Traylor has four children: three daughters and one son, now in the Air Force.

Mrs. Traylor, who is 43, was born and reared in San Antonio, one of six children. Her parents were Mr. and Mrs. K. G. Wickwire, residents of Bexar County for forty years.

T. B. Atkins To Attend Kiwanis Meet In Seattle

T. B. Atkins will be the official delegate of the Big Spring Kiwanis Club at the 37th annual convention of Kiwanis International scheduled for June 15-19 in Seattle.

A record attendance of at least 10,000 Kiwanians and their families from all sections of the United States, Canada, Alaska and Hawaii has been predicted for the event.

Representatives from the organization's 3,500 clubs will meet to elect new officers, form administrative policies for the coming year and to develop their continuing program of community and national services.

A number of prominent American and Canadian leaders have accepted invitations to address the convention sessions. The keynote address, "Liberty—Let's Keep It," will be delivered by Claude B. Hellman, Baltimore public utilities executive and president of Kiwanis International.

Seattle committees have scheduled extensive entertainment for the delegates and their families.

225 Register For Summer Term At JC

Registration had reached 225 for the initial six weeks of the Howard County Junior College summer term at deadline time Saturday.

B. M. Keese, acting administrator for HCJC, said that approximately 125 of the number were in evening classes, including 70 men stationed at Webb Air Force Base. They are taking regular college work under a co-operative plan made possible by the Air Force.

For the first time, the weight of evening classes is in favor of regular college work rather than the industrial or vocational courses. Virtually all the day students are getting off work toward college degrees. Out of the total enrolled, only 42 are veterans.

Teaching on the summers staff are: Mrs. Charlotte Sullivan, who also is dividing time in the business office; Mrs. Ruby Blankenship, who also is serving as librarian; Marvin Baker, who is teaching math and is serving as assistant to the administrator; J. T. Clements, science and math; James B. Frazier, science, biology and psychology; Harold Davis, typing; Mrs. Janet Davis, speech; George Hank, languages; Mack Rodgers, business law; Wayne Matthews, evening course in woodwork; Bill Thompson, English.

Enrollment in the high school summer session continued at 65 at the end of the week. Roy Worley, principal, said no more pupils would be accepted now. John Freeman is teacher in charge, and others on the staff are Letha Ameron and Colleen Slaughter.

A. L. Robinson Jr., Funeral Set Today

Funeral rites for Albert L. Robinson Jr., who was killed in a traffic mishap east of Coahoma early Friday morning, will be conducted at 4 p.m. Sunday at the Church of Christ, 14th and Main.

Lloyd Connell, minister of the church, will officiate.

Burial will be in the Coahoma cemetery, with the Naalee Funeral Home in charge of arrangements. Pallbearers will be Henry Robinson, Woodrow Robinson, Emmett Grantham, Albert Grantham, Glen Grantham and Sam Cox.

Robinson was killed when the cattle truck he was driving crashed into a concrete culvert railing about seven miles east of Coahoma in the west edge of Mitchell County.

Wife Told Him To Do It, So The Man Did!

DAYTONA BEACH, Fla., June 7 (AP)—A fully clothed man jumped in the Halifax River last night.

"What are you doing in there?" asked Patrolmen D. E. Hillier and J. V. McKnight.

"My wife told me to go jump in the river," was the reply.

The policemen told Baxter Cash that he was going to wade into more trouble if he didn't come out. He did.

Seek Long Range Plan To Save Land From Complete Erosion

Anticipating that there may not be enough rainfall over much of this area to provide either a planting season for cotton and grain sorghums, or to bring these crops to maturity, conservationists are seeking to work out a long range plan to prevent almost complete erosion of a great deal of land next winter and spring.

Discussing the problem are specialists from the Soil Conservation Service, supervisors of Soil Conservation Districts and administrative officers from PMA offices.

The first of these meetings was held in the PMA office at Stanton Friday morning, and attending

Flight Pattern Conference Set Here Monday

A conference "in the interest of safety" Monday is expected to result in separate and distinct flight patterns for civilian and military aircraft operating from Webb Air Force Base and Big Spring's Hamilton Field.

Local civilian, Civilian Aeronautics Administration and Air Force representatives will attempt to work out operational areas for both fields.

"Some definite arrangements are needed so that civilian fliers will know what to expect of WAFB planes and Air Force pilots will know where to look for private craft," an Air Force spokesman said.

Representing the City of Big Spring at the session will be Barney Edens, manager of city interests at Hamilton Field, and Jack Cook, former Municipal Airport manager. Air Force officials to participate are Col. James Wilson, commanding officer of the WAFB pilot training group; Maj. Alec Streeter, director of training and operations at the base; and Capt. Leo G. Bradford, base operations officer.

Emerson Carpenter, district CAA safety agent, has been invited to the meeting. However, he probably will be represented by Roger Fancey of the CAA safety branch. The conference is set for 1:30 p.m. in wing headquarters at WAFB.

Postal Receipts Up Over \$5,000 In May

Big Spring postal receipts for May totaled \$18,946.22, according to Elmer C. Boatler, assistant postmaster.

This represents an increase of \$5,732.36 over May 1951 when the receipts totaled \$11,213.86.

There is much more severely eroded land in this section of the state now than ever before, and declare that immediate steps must be taken to save what is left.

The meeting disclosed that neither Howard nor Midland Counties have PMA funds available for subsidizing such cover crop plantings, but that Martin and Gaines Counties do have funds for this purpose.

It was indicated that the state PMA committee will be asked to make additional funds available to West Texas counties as an emergency matter. It was also indicated that if funds cannot be obtained from this source, supervisors of the various SCD's may call upon Congress for an emergency appropriation.

Green said that apparently conditions are much worse elsewhere than in Gaines County and showed that little inclination to go along with the other PMA representatives in presenting a request to the state PMA committee. He said that he and members of the Gaines County PMA committee had already been before the state group on another matter and had been refused.

Goodlett described Guar as a fast growing plant requiring but

little moisture and one that will come up to a good stand in four days. He said the supervisors of the Martin-Howard SCD have already ordered several thousand pounds of the seed which will be sold to farmers who want it at cost plus freight. He estimates that the seed cost will run from \$1.10 to \$1.25 per acre.

If we don't tie this soil down right now, the SCS specialists agreed, next March will be the most severe month this country has ever known.

Goodlett said yesterday that he anticipates another meeting will be held to discuss the matter further and that representatives from over a much larger area will be invited. He did not know just when or where this other meeting will be held.

The supervisors of the Martin-Howard SCD meeting Friday afternoon at Stanton approved con-

servations practices for 75 farms and ranches.

Floor Fight Is Seen Over GOP Delegates

By DONALD SANDERS
WASHINGTON, June 7 (U)—The issue of seating contested state delegations at the Republican National Convention appeared headed today for a fight on the floor at Chicago, following a general rebuff of Sen. Robert A. Taft's overture toward compromise.

Even some of Taft's own lieutenants indicated they didn't think much of the idea, insisting that justice was on their side and that no compromise was called for.

One who expressed that view was George Atkinson of Dallas, Tex., a delegate on one of the contested states and a Taft leader in the state.

"I don't see much occasion to compromise," Atkinson said, "but of course I trust Sen. Taft's judgment. I think the majority of Texas Republicans are for Taft. Newspapers say the voters are for Eisenhower, but that doesn't mean

they're Republicans."

Backers of Gen. Dwight D. Eisenhower, on the other hand, contend that a majority of the people are for their man but that Taft forces employed steamroller tactics to push through state conventions slates of delegates largely favorable to the Ohioan.

The Taft camp's argument in Texas, scene of perhaps the bitterest contention, has been that Democrats and irregulars attempted to stampede the state convention for Eisenhower.

At least 76 delegate seats in four Southern states are in the disputed category. Such a bloc of votes could easily be one of big deciding factors at the convention opening July 7.

At issue are rival slates from Texas, with 38 delegates; Louisiana, 16; Georgia, 17; and Mississippi, 5.

There were complaints from Eisenhower's campaign manager, Sen. Henry Cabot Lodge of Massachusetts, has said the general can win on the first ballot.

With the 30 sure votes he got in Indiana, Taft's standing in The Associated Press tabulation jumped to 462 delegates. Eisenhower was credited with 387. Other candidates had 130 and 210 were publicly uncommitted.

Sen. Homer E. Capehart, convention chairman, said the Indiana instruction is "legal and morally binding" and all 32 delegates are "honor bound" to vote for Taft. However, he added: "If they don't, we couldn't hang them."

The Eisenhower delegate, publisher Eugene C. Pulliam of the Indianapolis Star and Indianapolis News, denounced the action in bitter terms. He said he and another delegate, William Hutcheson, will not vote for Taft "under any circumstances."

Hutcheson is former president of the AFL Brotherhood of Carpenters. He could not be reached for comment tonight. Yesterday he was listed by both Taft and Eisenhower leaders as neutral.

Pulliam told a reporter he had just talked to Hutcheson and, although not speaking formally for him, said he was sure "we will vote as we damn please." He said the convention "cannot gag us or make us vote to suit them," and "under no circumstances will we vote for Taft."

Edwin Steers Sr., treasurer of the Indiana Republican committee and a member of the state election board, said the convention action "is tantamount to unit rule."

However, the Republican National Convention does not recognize the unit rule of delegates in voting unless it is unanimously adopted by the state delegation.

Former Rep. Robert Grant asserted that Taft forces had put over "another Texas steal" by pushing through the state convention today a 32-vote slate containing 30 pro-Taft delegates and then instructing all 32 to vote for the Ohio senator.

Taft himself wasn't specific when he made the compromise offer at a news conference in Indianapolis on Friday.

"I hope we can compromise the contests where there is any serious difference on legal grounds," he said. "I would like to avoid contests before the Credentials Committee if differences can be settled on a fair basis."

Eisenhower, in a brief stopover at Kansas City yesterday, had been quoted as saying, "Gee, that sounds good," when told of the Taft offer.

Explaining his remark, he told a news conference in New York today:

"Somebody walking behind me said: 'There is some offer in the Southern states.' He didn't even make the attempt to describe it to me. I just said: 'That is good' because it sounded good."

"However, as long as the question has come up, let me make myself particularly clear. I am against the thwarting of the will of the American people no matter what it is and where it comes from."

Eisenhower's campaign manager, Sen. Henry Cabot Lodge of Massachusetts, had rejected the Taft overture shortly after it was made, at least as far as Texas is concerned, saying a statement issued here: "It is never right to compromise with dishonesty."

In Texas, H. J. (Jack) Porter, leader of Eisenhower forces there, said the fight for the Eisenhower slate will be carried to Chicago because, he declared, "the Republican party cannot afford to compromise with corruption."

On the other hand, Henry Zweifel of Fort Worth, GOP national committeeman and a Taft backer, said his group would like to avoid a fight at Chicago, and he added: "The Republicans of Texas have at all times been ready to listen to any offer of settlement of the Texas quarrel...."

Ike Backers To Defy Indiana Instruction

By JACK BELL
INDIANAPOLIS, June 7 (U)—A sweltering Indiana Republican convention today loudly instructed its 32 delegates to vote for Sen. Robert A. Taft. But one pro-Eisenhower delegate defied the action and another delegate may not comply.

If 30 Hoosiers vote for Taft, it would give him a prospective Chicago convention lead of about 86 votes over Gen. Dwight D. Eisenhower.

The well-oiled Indiana Taft organization flattened Eisenhower opposition in choosing most delegates, and on a voice vote told them to vote for Taft for the presidential nomination until the Ohioan releases them.

Indiana's selection of delegates, the last major one before the Chicago convention opens July 7, left the two top contenders for the presidential nomination short of the publicly committed strength

needed for a first ballot nomination.

Taft said at Indianapolis yesterday he believes he has half of the 1,206 delegates—13 of them yet to be chosen. Whether he will try for nomination on the first ballot will depend on what seems to be the best strategy at the time, he said.

Eisenhower's campaign manager, Sen. Henry Cabot Lodge of Massachusetts, has said the general can win on the first ballot.

With the 30 sure votes he got in Indiana, Taft's standing in The Associated Press tabulation jumped to 462 delegates. Eisenhower was credited with 387. Other candidates had 130 and 210 were publicly uncommitted.

Sen. Homer E. Capehart, convention chairman, said the Indiana instruction is "legal and morally binding" and all 32 delegates are "honor bound" to vote for Taft. However, he added: "If they don't, we couldn't hang them."

The Eisenhower delegate, publisher Eugene C. Pulliam of the Indianapolis Star and Indianapolis News, denounced the action in bitter terms. He said he and another delegate, William Hutcheson, will not vote for Taft "under any circumstances."

Hutcheson is former president of the AFL Brotherhood of Carpenters. He could not be reached for comment tonight. Yesterday he was listed by both Taft and Eisenhower leaders as neutral.

Pulliam told a reporter he had just talked to Hutcheson and, although not speaking formally for him, said he was sure "we will vote as we damn please." He said the convention "cannot gag us or make us vote to suit them," and "under no circumstances will we vote for Taft."

Edwin Steers Sr., treasurer of the Indiana Republican committee and a member of the state election board, said the convention action "is tantamount to unit rule."

However, the Republican National Convention does not recognize the unit rule of delegates in voting unless it is unanimously adopted by the state delegation.

Stolen Plane Is Said Found At Brownsville

OAKLAND, Calif., June 7 (U)—A DC-4 Tokyo airlift transport plane was stolen from Oakland Airport this morning but Oakland police said they had been informed it landed at Brownsville, Tex., late today where the crew was taken into custody.

Edward F. Norman, president of United States Overseas Airlines, which owns the four-engine plane, said two men were at the controls when it took off this morning about three hours before its scheduled departure.

He said the plane carried some 2,000 gallons of gasoline, enough for 11 or 12 hours.

A \$1,000 reward was offered for the return of the big \$750,000 plane.

United States Overseas is a non-scheduled airline.

The Civilian Aeronautics Authority said it sent out a general alert to all stations, CAA here said the alert, sent from Washington, presumably went also to Mexico and Canada.

Gossip around the airport was that the plane's probable destination was Mexico.

The plane, license number N90436, had a white fuselage bearing a blue stripe.

The airport control tower said the plane declared for takeoff, was given a go ahead, and left the field at 7:18 a.m. It gave no destination and no normal clearance. That is normal procedure in good weather.

Freedom Party Caravan Gets Ranger Escort In Duval Drive

FREER, June 7 (U)—A Texas Ranger-escorted caravan of 52 cars ranged the South Texas county of Duval today promoting the Freedom Party's fight against the one-man politician control of George Parr.

At the end of the 3½ hour, 80-mile trip a sweltering crowd of 300 to 400 persons stood in front of the American Legion hall here and heard Freedom Party leaders denounce Parr.

Parr — now county sheriff but known politically as "The Duke of Duval" — was not seen among the scattering of Parr sympathizers present. However, an automobile containing six of his deputies dogged the caravan part of the way.

A Purple Heart veteran of infantry combat duty in the Pacific, 42-year-old Donato Serna of San Diego, accused Parr by name of using "block voting tactics."

He said these tactics "have been instrumental in twisting the out-

come of district and state elections to such a dangerous degree that the wishes of the voters of the state have been upset by the wishes of one man."

"Of course all this has been done by unfair election practices and with the help of corrupt politicians," Serna told the cheering crowd of men, women and children, many of Latin-American descent.

While the rally crowd was not great in comparison with the county's voting potential of some 5,000 votes, Serna and others said they were well pleased.

They also said that many people who would vote against Parr were not willing to be seen publicly aligned with the Freedom Party.

Parr supporters scoffed privately at the prediction of success for the 30 candidates endorsed by the Freedom Party.

Apparently trying to calm fears of some voters, the Freedom Party leaders repeatedly assured their listeners that a secret ballot bill be used when they go to the polls. They also promised a true and accurate count of the votes.

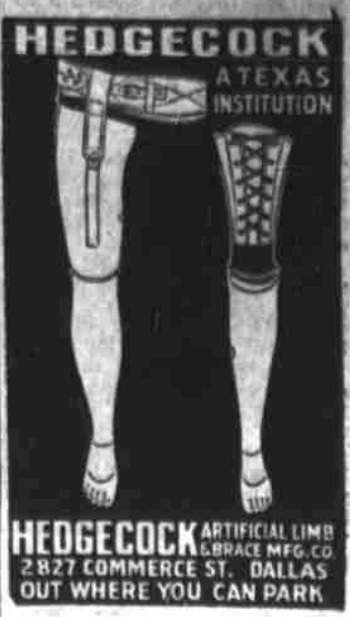

"Believe me, we're going to see that these votes get counted," said Mark Heath of Falfurrias, Reams' former law partner, who now seeks the job of district attorney.

The cavalcade of politically-conscious citizens was escorted by

four Texas Rangers in two cars. The car of Texas Ranger Capt. Free Alce Carrizo Springs and the car with six Parr deputies apparently played a game of cat and mouse on the first lap of the trip. When one car stopped, the other would also.

Parr's deputies, including Chief Deputy Pete Saenz, tailed the caravan closely from the moment it left the San Diego city limits until it reached Benavides. Once the deputies stopped to pick up a copy of the political pamphlet being tossed out in front of each farm house. The pamphlet, in both English and Spanish, invited Duval County citizens "to join us in our honest effort to terminate the shameful, political domination of this county by one man."

44 Fines Paid In Corporation Court This Week

Fifty-seven persons found their names entered on the Corporation Court docket during the past week and 52 found themselves deprived of cash, time, or both as a result of their offenses.

Forty-four fines were assessed during the week for a total of \$847. Five others forfeited cash deposits totalling \$120. Three persons held in city jail were transferred by the court to custody of other authorities.

Charges heard in Corporation Court during the week ranged all the way from making a prohibited right turn to attempted murder.

Fines included 25 for \$433 as a result of drunkenness; one for \$50 for use of profane and abusive language; two for \$19 on vagrancy; one for \$5 for making excessive noise (wrong kind of automobile muffler); two for \$15 for prohibited right turns; five for \$155 for reckless driving; one for \$20 for passing in a no-passing zone; three for \$75 for driving without license; one for \$10 for failure to grant right-of-way; and four for \$65 for speeding.

Transferred to other authorities were persons charged with driving while intoxicated, disturbance, and attempted murder. Two charges of driving without license were excused as was one charge of speeding and a charge of causing excessive noise.

One person was found not guilty of speeding charges. Five charged with drunkenness forfeited the cash deposits.

CRMWD Water Reaches Odessa; Testing Underway

Water reportedly has reached Odessa in CRMWD lines, but it may be a week before that city is using the new supply.

The lines, tested initially for leaks, now have to be tested under pressure.

E. V. Spence, general manager for CRMWD, said Saturday that the big booster pump was now ready to go into action and supply the pressure necessary for the final tests on the 27-inch line. After this is done, the lines will have to be flushed to take out a heavy load of chlorine infused to purify the new pipe.

The general manager had just returned from Austin where he attended a Railroad Commission hearing on the CRMWD request for 80-acre spacing for oil wells in the lake basin area on the upper Colorado River. Magnolia supported the request, and Phillips, which had given approval, was not represented. Shell, which previously said it could not accept the idea, again protested. A ruling will be made later.

Need a Million?

A million acres of forests, mountains, streams for a vacation? Then it's NEW MEXICO for you! Yes, of NEW MEXICO's millions of acres of woodlands, some 8½ million are national forests — including wilderness areas accessible only by horseback or foot trails and forest areas with convenient camping facilities... You'll get a million dollars' worth of satisfaction from a vacation trip to NEW MEXICO — The Land of Enchantment.

Business Changes Noted At Forsan

FORSAN — Several business changes have been announced here during the past week.

Mrs. C. M. Adams sold the old Southwest Tool & Machine Shop building to L. T. Shults.

Fifteen lots, including three with residences and the water well were purchased by O. D. Smith of Big Spring.

The Forsan Welding Shop was sold by C. V. Wash to Alvin Long of Carlsbad, N. M., and J. B. Anderson. Mr. and Mrs. Long and children are moving to Forsan to make their home. Long will manage the shop.

Three non-jury civil cases were heard Saturday by Judge Charlie Sullivan in 118th District Court.

Lucille Payne was awarded a judgment for \$1,680 in a suit against Fred Simpson for support of children born during their marriage.

Margie Burns was granted a divorce from Homer Burns, and the court restored the plaintiff's former name, Brunker.

Aura Saathoff was granted a divorce from Eugene Saathoff.

Civil Cases Heard In County Court

Three non-jury civil cases were heard Saturday by Judge Charlie Sullivan in 118th District Court.

Lucille Payne was awarded a judgment for \$1,680 in a suit against Fred Simpson for support of children born during their marriage.

Margie Burns was granted a divorce from Homer Burns, and the court restored the plaintiff's former name, Brunker.

Aura Saathoff was granted a divorce from Eugene Saathoff.

T-Patchers March In Annual Review At North Fort Hood

NORTH FORT HOOD, June 7 (U)—Rain fell and the grass-covered parade grounds turned muddy as 6,500 T-patchers of the 36th Division marched in annual review today.

Despite the rain, the T-patchers marched in good military order past the reviewing stand where Gov. Allan Shivers and other big brass smartly saluted the colors.

Near Shivers on the reviewing stand stood Lt. Gen. John A. Hulen, 51, of Palacios, the "Daddy of the 36th." It was Hulen who reorganized the division after World War I and commanded it for many years afterward. He had not visited his former command since 1941

when it was stationed at Brownwood. It was a long parade, of both foot soldiers and vehicles, but one the T-patchers had looked forward to. Most of the home folk did not get to see the one the division held last summer when it was at Camp Polk, La., for its annual field training.

The reviewing stand was star-studded. Those on the platform included Maj. Gen. H. Miller Almsworth, Lt. Gen. Ernest O. Thompson, Austin, commander of the Texas National Guard; Lt. Gen. Preston A. Weathered of Dallas, former commander of both the 36th and

the Texas National Guard; Maj. Gen. K. L. Berry, Austin, adjutant general of Texas; Brig. Gen. L. L. Donn, assistant commander of the First Armored Division, and Brig. Gen. Dallas J. Matthews, Austin, head of the Texas Army Board and former adjutant general of Texas.

Before the parade, the division paid tribute to "the citizen soldiers of the 36th Division who have made the supreme sacrifice in the defense of their country." The memorial order referring to T-patchers who died in the two World Wars was read by Lt. Col. Thomas S. Bishop of Austin, division operations officer.

Shivers presented the Eisenhower trophy to the 36th Quartermaster Company of Austin and congratulated unit members in a brief address. The trophy, named in honor of the Allied World War II commander, is given each year to the state's outstanding guard unit. Lt. Col. Thomas D. Blackwell, division quartermaster, and Capt. Stanley R. Stout, company commander, received the trophy for the company.

Shivers arrived at Temple by plane and was met there by Almsworth. A 17-gun salute fired by Battery C of the 131st Field Artillery from Abilene announced his arrival at North Fort Hood. His honor guard was from the same battalion and from the Third Battalion, 143rd Infantry Regiment, of Waco.

The traditional "small-try" muster for sons of National Guardsmen attracted about 40 youngsters, all of whom were given a silver dollar by Almsworth while the band played.

Winners of several National Guard Bureau contests were announced. The Second Battalion, 141st Infantry, Corpus Christi, won the Army area battalion team rifle match conducted by the National Rifle Association. National Guard Bureau gold certificates for efficiency in 1951 field training went to the 36th Division Band, New Braunfels, and the Medical Detachment, 136th Anti-Aircraft Artillery Battalion, El Paso. Silver certificates were awarded to Division Headquarters, Medical Detachment Division Headquarters, 36th Quartermaster Company, and Headquarters Company, 111th Medical Battalion, all of Austin; Headquarters Battery, 36th Division Artillery, and its Medical Detachment, San Antonio; Headquarters Battery, 155th Field Artillery Battalion, New Braunfels; and Headquarters, First Battalion, 142nd Infantry, Brownwood.

Eagles Give Program At Veterans Hospital

The Big Spring Order of the Eagles' monthly program at the Veterans Administration Hospital Friday night included vocal, dancing, and hillbilly selections, and a combination tap dancing act by Jo Jo White of Port Arthur.

E. H. Ellett, master of ceremonies of the program, is seeking talent for future shows. He urges anyone interested in performing on the show to contact him at the hospital.

The Eagles are planning to broadcast a program July 4.

Two Area Highway Project Bids Due

Two projects in this area are in a group for which bids will be opened by the State Highway Department on June 17-18.

Bids have been asked for June 17 on Farm Road 1811 in Scurry County. Specifications call for 4.53 miles of grading, structures, base and surfacing between US 84 and US 180.

One June 18 bids will be opened for Farm Road 151 in Andrews County, a 6.75-mile project. It is due grading, base and surfacing from Farm Road 703 south to the Ector County line.

The members, all officers, were Eva Lee Trotter, excellent junior; David Neese, secretary; and Janice Huffstetter, guard.

At the Lamesa meeting, Katie Lou Ashley, Grand Chief of Texas, attended.

An invitation was extended the guests to attend a tea Sunday from 3 to 5 p.m. in Lamesa honoring the Grand Chief.

Lamesa Injured In Auto Mishap

William C. Smith, Lamesa, was treated at Cowper Hospital Saturday night for injuries received in a traffic mishap about nine miles west of Big Spring on Highway 80.

Smith's injuries, chiefly cuts and bruises, were not believed serious. He was brought to the hospital in an Eberley ambulance. The mishap occurred about 10:30 p.m.

Highway patrolmen who investigated could not be contacted late Saturday night for details of the accident. However, the police radio dispatcher in Big Spring said he had a brief report to the effect that the vehicle in which Smith was traveling was forced off the highway by another machine.

Five Men Arrested

Sheriff's officers Saturday arrested five Latin Americans after receiving a report that a gun had been "smuggled" at occupants of an automobile. The five all were in another vehicle. Police and sheriff's department were seeking a sixth person. No one was injured by the fusillade.

Ike Signs Autographs

General Dwight Eisenhower (left) delayed his train's departure about 10 minutes at Abilene, Kans., as he and Mrs. Eisenhower (right) stood on the train steps and signed autographs for youngsters. The general left for New York after a two-day homecoming celebration. (AP Wirephoto).

Youth Enlisted In AF So Buddy Could Get Married

SAN ANTONIO, June 7 (U)—The month-long masquerade by a 22-year-old Chicago youth who wanted to join the Air Force so badly that he enlisted under a friend's name is heading for a quick finish.

Robert Hybert, sent to Lackland Air Force Base here for indoctrination training, has been recommended for separation from service, Lackland officials revealed today.

The youth was classified 4-F in Chicago four times, he told reporters yesterday at Lackland when the fantastic story was uncovered. He has a chronic ear infection which was not discovered in Chicago. At Lackland, however, the condition was found and Hybert has been confined to the Lackland Hospital most of the time since his arrival.

Hybert's false identity was revealed yesterday when his friend, Richard Phelan, 20, also of Chicago, was arrested there by the FBI on charges of draft dodging. Agents said Phelan was working in Chicago under Hybert's name.

Hybert said his friend Phelan planned to be married and wanted to avoid the draft and conceived the idea of Hybert, who brooded because he could not serve, of enlisting under Phelan's name. Phelan had passed his physical and had been classified 1-A. So when Phelan was called, Hybert answered, the youth said.

Lackland officials said Hybert has been recommended for a "general discharge," a type of separation which is not honorable but carries little stigma.

Because of his ear condition, Hybert was slated for a medical discharge next week anyhow.

The youth will be mustered out as soon as his records can be reviewed with his right name.

Warrant Issued In Charge Of Assault

Warrant was issued by Corporation Judge William A. Greenlee Saturday for the arrest of a Big Spring man who witnesses said struck a trash truck workman with a hammer.

Police Chief E. W. York said the man will be charged with disturbance and simple assault.

Patrolman M. L. Kirby quoted witnesses as saying that the man approached the trash truck about 9 a.m. Saturday claiming that his claw hammer had been stolen. The workman was said to have displayed a ball pen hammer which he said was found in a trash can.

Kirby was told that the man then took the hammer and struck the workman on the head.

The subject disappeared before police arrived. The workman, apparently not injured seriously, returned to his job.

Narcotics Bureau To Sell Jeep At Auction

The Bureau of Narcotics will sell a 1942 Jeep at public auction here next Wednesday at 11 a.m. P. A. Williams, district supervisor, has announced.

The sale will be conducted at the International Harvester Warehouse on East US 80. Presumably the vehicle is one which Federal Narcotics agents confiscated here last March.

The Bureau of Narcotics will sell a 1942 Jeep at public auction here next Wednesday at 11 a.m. P. A. Williams, district supervisor, has announced.

Texas Young GOP Supports Elders' Actions

SAN ANTONIO, June 7 (U)—Texas Young Republican State Executive Committee members meeting here Saturday placed their official stamp of approval on actions of their elders at the Republican state convention in Mineral Wells May 27.

Although overwhelmingly outvoted, youthful Eisenhower backers on the committee loudly protested the convention endorsement. They charged it branded Young Republican Federation members as "stooges and tools" of the senior organization.

The controversial resolution, introduced by newly-elected Y. R. F. Treasurer Robert Lightwine of Denton, echoed senior G. O. P. charges that the ousted Eisenhower majority at Mineral Wells was made up of "overnight Republicans...notorious New Deal and Fair Deal Democrats."

It also charged that "unlimited aid of the CIO-PAC was employed (by the party newcomers) to create mass hysteria...in an effort to steal the organization of the Republican party of Texas by mob rule tactics." The role adopted by the state Executive Committee at Mineral Wells was the "legal and correct one, the resolution continued. It concluded with a glowing commendation of pro-Taft National Committeeman Henry Zweifel.

None of it set well with the pro-Eisenhower young Republicans, led by Y. R. F. National Committeeman Tony Friloux of Houston. Said Friloux: "The Mineral Wells convention hurt the Republican party more than anything in 20 years. This ridiculous farce is uncalled for. If you want to be a stooge or a tool of the senior organization, go ahead and vote for it. I picked up Communist literature in Korea, and it's the same trash I've seen here."

State Chairman Edward D. Patch of Fort Worth over-ruled objections that the committee was without authority to adopt such a resolution.

Labor Meetings Set This Month

AUSTIN, June 7 (U)—Ten State Federation of Labor meetings have been scheduled for Amarillo in June.

They will be climaxed by the annual state convention of the federation for four days starting June 23. The federation is made up of unions affiliated with American Federation of Labor.

Meetings of state organizations scheduled for Amarillo prior to or in conjunction with the federation meetings are:

Texas State Council of Carpenters, June 19-21.

Texas State Council of Carpenters Ladies auxiliaries, June 19-21.

Allied Printing Trades Council, June 21-22.

Texas State Association of Electrical Workers, June 21-22.

State Association of Journeymen Barbers, June 23-24.

State Conference of Painters, June 21-22.

State Council of Boilermakers, June 22.

State Building and Construction Trades Council, June 18-20.

Lone Star State Council of Laborers, June 21-22.

Texas Labor Press Association, June 21.

No Changes Seen For Milk Prices Around This Area

Milk distributors in Big Spring see no change in the price of milk in the near future, a poll of dealers revealed Saturday.

In one part of the state, a 16-county area surrounding Fort Worth and Dallas, the price of milk has dropped one cent per quart.

Most of the local wholesale distributors reported that their prices are dictated from larger offices and they regulate prices paid here.

One dairyman stated that eventually the prices would decrease some, but not in the next week or two.

THE WEEK

(Continued From Page 1)

will be upward of a \$2 million program itself.

Big Spring chalked up its fifth polo case of the year last week. That's not so terribly many, but we are just now getting into the summer season. Naturally, we should redouble efforts to maintain community sanitation at a high level.

Southwestern Bell Telephone Company representatives pegged the time for dial service here at 12 to 15 months hence at a meeting of the city commission last week. That's about like it. Predictions of service this fall had sounded like a wrong number.

Big Rogers gave this column an excited moment Saturday. Upon arrival there were eight cigars on our desk, all proclaiming a new arrival. But before we could confirm a new world's record, Colleague Wayland Yates explained it was unbounded pride over a new son rather than a record.

Big Spring is headquarters for a new district in the Northwest Texas Methodist Conference, replacing Sweetwater, which was on the east edge of the district. First superintendent of the new district is the Rev. Orison W. Carter, who, incidentally, preaches his first sermon in the district at First Methodist this morning.

The City is growing more ways than one. While population is increasing, so is area. City fathers last week passed on final reading an ordinance adding 35 acres in eastern Big Spring. A much larger chunk is coming up on the western side.

E. L. Killingsworth submitted his resignation as city engineer, to be effective July 15. The City will lose a mighty valuable man, but none can begrudge Killy a rest and a chance to let his almost silenced vocal chords come back.

Lie Warns S. Korea To Keep Constitution

By STAN CARTER
PUSAN, Korea, Sunday, June 8 (U)—A South Korean government spokesman said Saturday democracy was not threatened by the current political crisis and accused diplomats of reaching "premature conclusions."

There was no let-up in the feud between President Syngman Rhee and the National Assembly. Rhee has been seeking to dissolve the legislative body which must elect a President before June 23.

Trotsky Lin, United Nations secretary general, sent a message to the U. N. Commission for Unification and Rehabilitation of Korea (UNCURK) backing the Republic of Korea's stand that the Republic of Korea Constitution must be observed.

Lie said the U. N. "cannot remain unconcerned" when democracy in Korea is threatened "by arbitrary methods." Under the U. N.-sponsored republic's Constitution the President is elected by

UN Infantry Wins Hill In Korean Fight

SEOUL, Korea, Sunday, June 8 (U)—Allied infantrymen won a hill on the Western Korean Front Saturday in one of three short but vicious skirmishes. Allied war planes continued smashing at Red supply lines.

The Eighth Army reported United Nations patrols, attacking after an artillery barrage, won a height west of Chorwon in a two-hour clash in the predawn darkness and held it against counter-thrusts.

Two other sharp skirmishes were reported north of Korangpo. The Chinese Reds tried unsuccessfully to dislodge Allied infantrymen from advance positions.

Allied fighter-bombers hammered the Communist rail network between Kangye and Hulehon in North-Central Korea. The Fifth Air Force said the trucks were cut in 32 places and 26 railroad cars destroyed.

U. S. Marine pilots fire-bombed and strafed Chinese troops on the Western Front.

The Fifth Air Force announced U. S. Sabre jets shot down nine Communist MIG-15s over North-west Korea last week without losing a plane. Three Allied planes were downed by Communist ground fire.

Applicants For HCJC President Talk With Board

Howard County Junior College trustees probably will interview several applicants for the college president's post during the course of the next few days, Dr. P. W. Malone, board president, said Saturday.

At least two men who have applied were expected here Saturday night to confer with board members, and some others probably will come this week, Dr. Malone said.

"The board hopes to reach a decision soon, but we feel that we must give full consideration to all of the applicants," the board president said. "Some men with outstanding qualifications have applied, and the board is hopeful that a man can be selected who will lead our college to a peak of community and area service."

The board studied 23 formal applications at its regular meeting last Thursday night.

Impressive Wins In Midland Rodeo

MIDLAND, June 7 (U)—Jim Shoulters, Bud Linderman and Tater Decker racked up impressive wins in the World Championship Midland Rodeo here last night.

Shoulters, of Henrietta, Okla., won top money in bareback bronc riding for the second straight time.

Linderman, of Red Lodge, Mont., came out first in saddle bronc riding for the second straight time.

Decker, of Antlers, Okla., was third in bareback bronc riding and second in saddle bronc busting to add to previous laurels won here.

The five-day rodeo has its fourth go-round tonight.

the Assembly and not by popular vote.

The spokesman commented "It is very regrettable that Mr. Lie has chosen arbitrarily to evaluate local conditions here on the basis of second-hand reports and premature conclusions."

France added her voice to that of the U. N., the United States, Britain and Australia in demanding that Rhee's administration act democratically. The French charge d'affaires in Pusan delivered an official note to Rhee Saturday.

The government spokesman had no comment on the French note. The political feud came to a head recently with the arrest of an opposition assemblyman on charges of slaying a ROK Army captain and the arrests of 11 other lawmakers without formal charges.

Suh Min Ho, the assemblyman charged with the shooting, went on trial Saturday before a court of three Army officers and three civilian judges. The U. N. commission insisted on an open trial. An Assembly committee previously absolved Suh, finding he fired in self defense.

Korean sources said it seemed that Rhee was going slower than originally planned or the assemblyman already would have been executed.

"The whole thing would have been over in two or three days," those sources added.

The government has accused the U. N. of trying to interfere in Korea's "internal affairs." Rhee blamed the crisis on a "Communist plot" to overthrow his administration.

Officer Released On Court's Order

Capt. E. G. Neely Jr., Webb AFB, was released following a hearing in 118th District Court Saturday under the uniform extradition act.

He had been brought in custody on a governor's warrant which charged non-support of three children. The complaint was brought originally at El Dorado, in Butler County, Kansas and papers were forwarded to Lubbock. Only the governor's warrant reached here, however. Supporting papers were lacking.

Capt. Neely demanded the hearing, which is provided under the uniform extradition act. He contended the children were let out for adoption and that there was no legal responsibility involved. After hearing the habeas corpus proceedings, Judge Charles Sullivan ordered the officer to be released.

Cerebral Palsy Clinic Is Slated

A clinic for the examination of cerebral palsied children will be held June 23 at the Cerebral Palsy Treatment Center, 3502 Avenue N, Lubbock.

Orthopedic specialists from Midland, Plainview, and Lubbock, a neuropsychiatrist, pediatrician, eye specialist, and a dentist will be present to examine children.

Parents planning to bring children to the clinic are requested to register the children at the Center prior to the date of the clinic. Information regarding the clinic may be obtained by writing Dr. Esther Smith, director, or calling Lubbock 5-5541.

IKE

(Continued From Page 1)

communism or fascism in any form." There was another roar of applause.

He continued: "The man who was mentioned I have seen only once in my life. There were more cheers and clapping."

He said he had joined the Carnegie Foundation for International Peace, had visited its offices, and there discovered that Hiss was president of the organization.

"That was the only time I ever saw him. I never saw him before or since."

In the 40 minutes preceding this, Eisenhower was confronted with 20 questions, they concerned problems of both foreign and domestic policy, and some related to the progress of the political campaign on behalf of Eisenhower.

Before the first question, Eisenhower delivered a short preamble—asserting he was doing so against the advice of his friends.

The gist of it was that peace and security is the great fundamental problem of this age, and that it underlies the others.

Hearing Authority Here For Clinic

Mr. F. A. Fischer, a recognized authority on hearing, will share the amazing NEW TINY BELTONE at the Crawford Hotel on Mon., June 9 from 1 to 3 p.m.

THE HOME OF GREATER VALUES

METEOROLOGIST THINKS PLANES MAY ACTUALLY AID RAINMAKERS

"I should say it is impossible, and that there is nothing to it," commented C. L. Chipman, when questioned about the possibility of the jet planes in the air over Big Spring dissipating potential rain clouds and thereby contributing to the drought.

Chipman, who is assistant director of Dr. Irving P. Krick's Water Resources Development Corporation of Denver, spoke in Coahoma Friday night.

"In fact," stated the meteorologist, "the nuclei put into the atmosphere from the combustion of the jet fuel should really add to the precipitation and help us with our cloud seeding program."

He then explained that if a cloud is so light that it can be broken up or dissipated by the heat generated by a jet engine passing through it, that such a cloud would be too light to contribute anything to the rainfall anyway.

Chipman said his organization had studied the effects of all types of planes on weather conditions, and "they just don't have any effect at all," he said. They're too minute and too puny in the overall scheme of things, he observed. If they should do anything at all they would release nuclei that can be calculated to aid cloud seeding.

Check Of Mishap Rate May Up Auto Liability Insurance Costs

By DON HENRY

Indications are that auto liability insurance rates in Texas will be increased again as a result of a check-up on 1951 accidents, Big Spring insurance men believe.

The latest revision of the safety-responsibility law, known more commonly as the liability insurance law—went into effect May 1. The revisions were prescribed by the Board of Insurance Commissioners of Texas, following a check of the accident rate from 1946 through 1950.

Previously, the law had called for a straight rate for all motorists. But the revised law divides drivers into three classes:

Class 1, for non-business use, with no operator under 25 years; Class 2, for non-business and bus-

ness use, with no operator under 25; and

Class 3, (a) business and non-business use—individually owned, and no operator under 25, and (b) for business use and non-business use, with no qualifications.

In comparison to the pre-May 1 rates, Class 1 is practically the same—4 per cent increase; Class 2 has been increased approximately 34 per cent; and Class 3 has been upped approximately 27 per cent.

The state is divided into five territories and each area has a different rate depending on the number of accidents in that given area during the 1946-1950 period.

Big Spring and the surrounding area is listed in Territory IV—the lowest rate bracket.

There is a misconception that motorists are required to have liability insurance but the law is aimed to strike hard at reckless and financially irresponsible drivers.

The law has put teeth in the law requiring the motorist to be prepared—if he doesn't have a policy—to cover damage in an accident "up to \$5,000 for property damage; up to \$5,000 for injury to, or death of, one person; and up to \$10,000 for injury to, or death of, more than one person."

If the motorist is unable to meet these provisions, his license and registration can be suspended until he can meet the law.

Any driver applying for a liability policy that has a driving-while-intoxicated or a reckless-driving conviction cannot take out a policy without a charge.

The convicted driver must get a policy through the assigned risk

plan and the rates for the policy are from 10-25 per cent higher than the regulation policy.

To get a policy, the charged motorist must send an application to the Board of Insurance Commissioners which either approves or vetoes the application.

If it is okayed, the application is sent to an insurance company in the motorists' community. The Board, from the application, determines the increase in the rate.

Should a policy holder without a charge against him be convicted of driving while intoxicated or reckless driving most insurance companies will immediately cancel the driver's policy.

Final Rites Today For Murry Rogers

COLORADO CITY—Murry Rogers, 51, sand and gravel dealer of Colorado City, died at his home Friday afternoon of heart attack. Rogers had lived in Colorado City for 46 years and he was a native of HIM County.

Funeral services will be held Sunday at 3 p.m. with the Rev. H. W. Hanks, pastor of the First Methodist Church in Muleshoe, officiating. Burial is to be in the Colorado City cemetery under the direction of Kiker and Son.

Rogers was a member of the First Methodist Church and the Masonic Lodge. He had married Thelma Jones, January 5th, 1925 in Snyder, Texas.

He is survived by Mrs. Rogers, two sons, Charles Rogers of Hebbronville, and James H. Rogers, Aviation Cadet at Lackland Air Base, San Antonio.

Possible Site Talked At Meet Of USO Board

Discussion of a possible site for a USO building took up most of the meeting when the USO executive board met Friday afternoon at the Settles Hotel.

Elton Gilliland, chairman, reported that there are a few available sites, but further study is desired before USO can formally commit itself to taking over a building.

Members of the board who had been appointed chairmen of various committees, also reported on the formation of their groups.

Mrs. W. F. Taylor of the women's committee said the Federated Women's Clubs are on record as willing to assist USO in any way possible.

Also reporting were Roy Bruce, for the committee; Ray Rhodes, survey committee; Bob Whipple, finance committee; Mrs. L. D. Jenkins, entertainment committee; and Fred Greene, public relations committee.

The executive board also decided to assist in any way at the city's official welcome party for Webb Air Force Base personnel at the City Park, June 20.

Prices Drop Slightly For Texas Farmers

AUSTIN, June 7 (AP)—Prices paid Texas farmers for their products dropped four per cent at mid-May compared with mid-April.

The U. S. Department of Agriculture said today there were declines in cotton, cottonseed, wheat, feed grains, hay, truck crops and most meat animals.

Rainmaker Explains Operation At Coahoma Meeting On Friday

A small crowd, but one described by several of those attending as a good cross-section of Howard County agriculture, gathered in the auditorium of the Coahoma High School Friday evening to hear C. L. Chipman, assistant director of the Water Resources Development Corporation of Denver, explain the theory and practice of cloud seeding with silver iodide nuclei to increase precipitation.

Chipman, who flew from Denver, was introduced by Sam Allen, manager of the West Texas Weather Improvement District. The meeting was sponsored by the Coahoma Community Service Club and Dick Bartlett, secretary of that organization, presided. Chipman's explanation was illustrated with the showing a color film. At the conclusion of his talk he answered questions.

Other representatives of the Krick organization present were Ford Hubbard of Houston, manager of the Texas division, and Maurice Forsyth, who represents the Krick group at Lamesa.

Chipman called particular attention to the pattern of the seeded raindrops, describing them as small in size and their fall as gentle and penetrating. He said this pattern probably will not show up as plainly in the summer as in the fall, winter and spring. He pointed out that there is much less run off and far more soil wetting from seeded rain than from natural precipitation.

Allen described the organization of the WTWID and its operation. He called attention to the fact that Howard County is far behind in its fund raising for participation.

After the meeting Chipman was questioned about a statement released last week by Cecil Leatherwood, president of the Howard County Farm Bureau, in which Leatherwood said he learned in New Mexico that the "Rainmaker" is a stock company with ranchers promoting its activity owning stock in it.

Chipman emphatically denied this. Not more than four or five people own stock in the WTWID, he said, and all these are persons who are on the Denver staff. "We meet that rumor frequently," he said, "but there isn't a word of truth in it. We are a corporation and the public records show who owns it. Anybody who is sincerely interested may go look at those records."

Chipman said it would be difficult to answer other charges leveled by Leatherwood because they were so general that it would be impossible to determine just what the Farm Bureau president is driving at.

HOSPITAL NOTES

BIG SPRING HOSPITAL
Admissions — Augustine Ontiveroz, Coahoma; Mrs. Juanita Smith, Vealmoor; Jack Dyer, 111 NW 12th; Mrs. A. E. Walker, 404 Washington; Mrs. Mildred Whitley, 561 Young; Mrs. Donald McKinney, Rt. 1; Mrs. Ode Jones, Stanton; L. G. Chapin, City; Roy Brown, 111 E. 18th; Mrs. Eugene Baugh, Stanton; Mrs. Willard Rodgers, Knott.

Dismissals — Mrs. Ruby Awall, Ackerly; J. L. Parker, 407 Ayford; Patricia Hughes, Coahoma; B. W. Hester, McCamey; Mrs. Jenny Keathley, Garden City; D. A. McDonald, Breckenridge; Ruby Rodriguez, 306 N. Gregg.

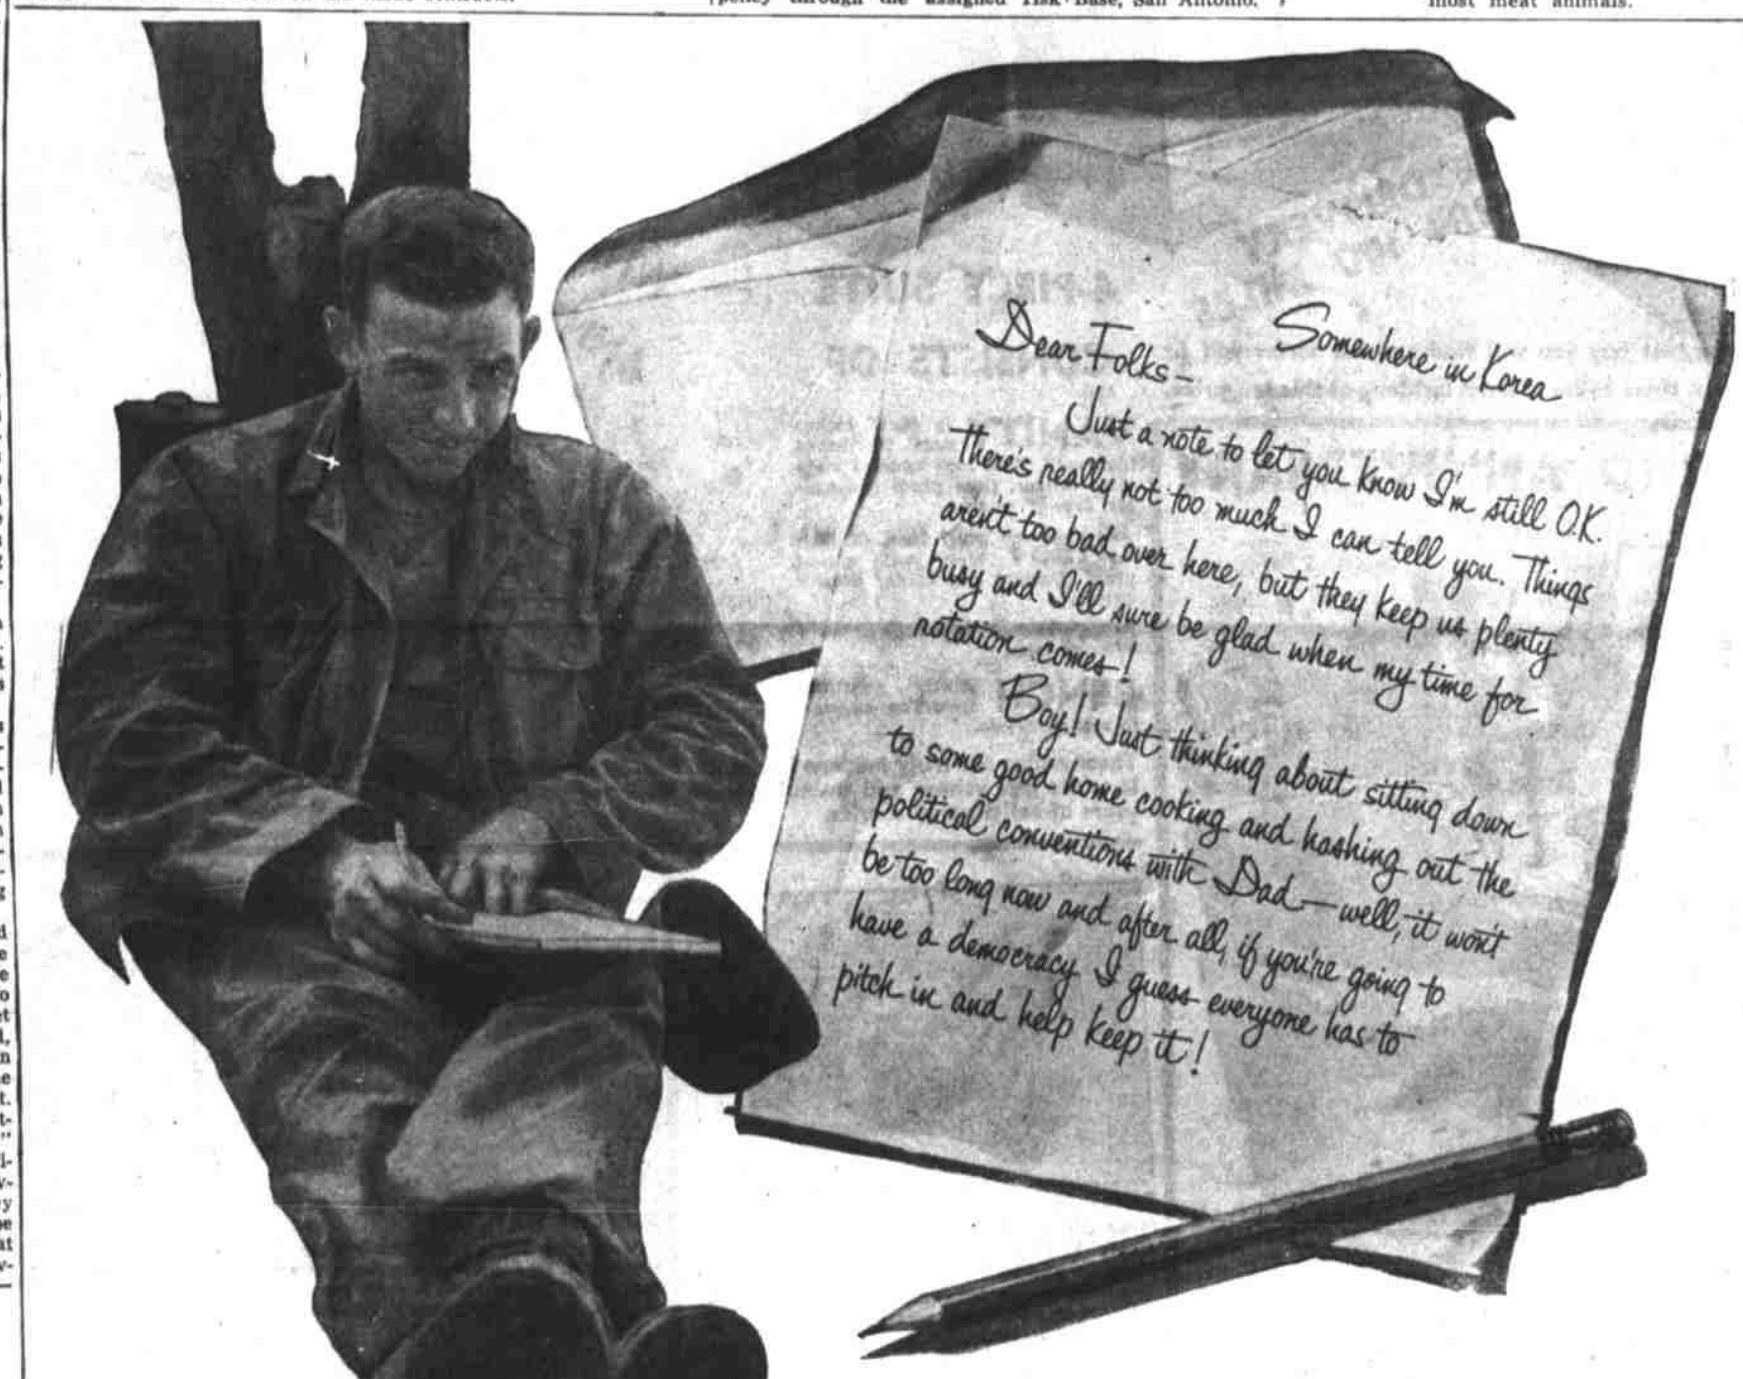

COWPER HOSPITAL CLINIC
Admissions — Mrs. S. L. Rogers, City; Sandra Gambill, City; Geraldine Tripplett, Midland.

Dismissals — Mrs. R. E. Greene, Midland; W. G. Craven, City; Lydia Harrington, City.

Road Due To Receive Topping This Week

Judge Lee Smith said the road going south from the intersection of the Stanton road to State highway 158 would have its caliche base by next week.

Contractor will probably start putting the asphalt topping on that stretch of road before the end of the week. The road extends 14 miles due south of the intersection. When work is completed on this road it will be started on the second stretch which parallels the road six miles to the west. The second road is to be only eight miles long and should be completed much more rapidly than the first.

Just a lonesome G. I. writing home.

He's helping in the armed forces. But there are things you can do to help, too. One of the most important of these is buying United States Defense Bonds.

Tens of millions of Americans own Defense Bonds now—more than 49 billion dollars worth! And every time you add to the total, you are helping to stabilize your country's economic power, making and keeping it as strong as the G. I.'s are keeping her military power. Remember, it's your bonds and other forms of saving that keep your country strong. And in these troubled times, peace is only for the strong!

So how about starting a patriotic program

of regular savings now—by buying U. S. Defense Bonds through the Payroll Savings Plan where you work—the Plan that lets you save a regular sum out of every check—before you have a chance to spend it. No matter how small your income you can't afford not to save something for yourself. Join the Plan today. It's one sure way to save!

HERE'S HOW E BONDS NOW EARN MORE MONEY FOR YOU!

Now safe, sure U. S. Series E Defense Bonds pay an even better return than ever before . . . thanks to 3 brand-new money-earning features just announced by the U. S. Treasury.

1. Now every Series E Bond you buy begins earning interest after only 6 months. It averages 3½, compounded semiannually. It reaches full maturity value earlier (9 years, 8 months) and the interest it pays is now bigger at the start!
2. Every Series E Bond you own can now go on earning interest for 10 more years after it reaches the original maturity date—without your lifting a finger!
3. During the 10-year extension period, every unexpired bond earns at the new, higher interest (average 3½ compounded semiannually). Your original \$18.75 can now pay you \$33.67, \$37.50 pays back \$67.34. And so on.

Start now! Invest more savings in better-paying Series E Bonds—through the Payroll Savings Plan where you work or the Bond-A-Month Plan where you bank!

Peace is for the strong... Buy U.S. Defense Bonds regularly!

The U. S. Government does not pay for this advertising. The Treasury Department thanks, for their patriotic donation, the Advertising Council and

LOOKING 'EM OVER

With Tommy Hart

I look for a Negro athlete to be playing in the Longhorn League before the 1952 season is out . . . The idea of using Negro help is catching on throughout the state and pays off at the box office and the Longhorn operatives weren't a hint the door when the brains were passed out . . . Business is up in most baseball leagues within the state but all the circuits in Florida are having attendance woes . . . The Florida State League may have to fold . . . Observers are wondering what happened between San Angelo management and Indio Beltran . . . Indio was regarded by many as the best pitcher the Colts ever had, yet was rarely given a starting assignment this season . . . A sore arm, maybe? . . . Big Spring wasn't the only club to lose a player to National Guard summer training . . . Wally Arbuckle, the Angelo catcher, also had to check in at Camp Hood . . . Elton Kelly is regarded as one of the best young prospects in the Little League program here . . . Opposing pitchers rarely get him out . . . Davey Williams, the Texan playing second base for the New York Giants, says of his recent hitting streak: "Even a blind pig finds acorns" . . . June Pool, a school marm in Our Town, is a close relation of Enos (Country) Slaughter, The Old Pro of the St. Louis Cardinals . . . Eddie Jacome, Midland's rubber-arm hurler, never committed a balk in either the 1948 season with Vernon or the 1951 campaign with Midland . . . In those two years, Jacome got into a record total of 94 games.

League Nominees Slow To Advance

Rusty Russell Jr., son of the SMU football mentor, all lined up to play pro ball for Green Bay, may be wearing Army khaki by August . . . Who'll be The Longhorn League's "rookie of the year" this season? . . . There's one thing for sure . . . A Big Spring player won't reap 6th honor. Potato Pascual and Mike Fornieles, leading Bronco candidates in the past, haven't gotten to first base in voting . . . No winner of the award, incidentally, has ever gone higher than Class B, and Class B ball, at least in Texas, is little if any better than Class C . . . Al Sokolowski (Odessa), Kenny Jones (Midland) and Bob West (Roswell) have reaped the laurel in the past . . .

The league doesn't seem to have an outstanding rookie this year but Rickie Gonzales and Bert Estrada of the Broncos are as good as any . . . Ossie Alvarez is coming along fast, too . . . Yale Lary, the Texas A & M back, punted 184 times in three football seasons, and never had one blocked . . . Dick Prahm, who became quite an athlete in the local high school his senior year, likes to read after Albert Einstein . . . The Big Spring Broncos are hurting for lack of a starting left-handed pitcher . . . Gumbo Helba and Jimmy Perez are two wrong-handers who went well here in the past . . . Charley Ratliff, only lefty on the local squad, will improve with experience.

Sports Demand Different Types

Larry McCulloch, the local high school basketball mentor, says the reason more footballers don't succeed at basketball, and vice versa, is that the games demand different temperaments . . . Football coaches try to fire up their players . . . Cage coaches seek at all times to calm down their help . . . Blow a gasket in the casaba sport and you're lost . . . So says McCulloch . . . Stan Holm, the bonus boy from Texas A & M who failed to stick with the Phillies, is having his trouble connecting safely against Eastern League pitching . . . He's playing first base for Schenectady . . . Steve Sadowski, umpire-in-chief of the Longhorn League, and Bill Franks, who served in a similar capacity for the WT-NM League, attended the same umpiring school, broke into the game at the same time and traveled together for a long while . . .

Fact is, they almost died together . . . The two were traveling back to Texas from Illinois a few years back when a flash flood stopped them . . . All road signs were gone on one particular stretch of road and they almost drove into an angry river, which would have carried them all the way to the Gulf of Mexico . . . Detroit's Lions, who depend largely upon Texans to see them through, must go like all get-out the first month in next fall's National Pro Football League if they are to go at all . . . During that time they meet San Francisco and Los Angeles on the coast and then host the same clubs at home . . . Glenn Davis, the Los Angeles footballer, can, incidentally, regard football only as a hobby . . . He owns part of a tract in the San Joaquin Valley on which oil was recently discovered.

WITH EASTHAM

Bauman In Tie For Bat Lead

Joe Bauman, hard-hitting Artesia first sacker, has moved into a tie with Leo Eastham of Odessa for the batting lead among Longhorn League players. The two are hitting .432.

The two have the same number of hits—60—tops in that department and, oddly enough, are leading runs batted-in with 51 each.

Eastham has scored the most runs, 53. Bauman has the most total bases, 114, and is tops in home runs with 16 while Emil Carlini of Sweetwater has walked the most times, 52.

In doubles, Stubby Greer of Roswell and Rudy Briner, Artesia, are tied for the lead with 19 each.

In the pitching department, Evelio Ortega of Odessa is way out

in front with eight wins and one defeat for an .889 average.

Keith Nicolls of Midland has grabbed the lead in strikeouts with 76 and has completed the most games, nine. Eddie Jacome, Midland, has pitched the most innings, 87.

Big Spring is still tops in club fielding with a .957 mark, seven percentage points better than runner-up San Angelo. In club hitting, Big Spring is seventh with a .260 mark. Sweetwater is out front in that department with a .306 average.

Averages include all games through last Monday:

Player	AB	R	H	RBI	Pct.

West Texas Play Begins Thursday

MINERAL WELLS. —The annual West Texas Championship Golf Tournament will be held at the Mineral Wells Country Club June 12-15, and with a Pro-Amateur play Wednesday, June 11. Qualifying will be Thursday, June 12, with banquet and Calcutta pool Thursday night. Match play starts Friday in all flights, with 36-hole finals for championship flight Sunday. Other flights eighteen holes.

Eligible for play, all golfers members of clubs that belong to the West Texas Golf Association. Obie Bristow, president. Big Spring, states that there will be a lot of entertainment for players and also the ladies during the tournament.

Don Cherry, formerly of Wichita Falls, now a television director in the East is the defending champion and will not be present to defend his title.

English, Oliveri Depart Dusters

VERNON—Two players have been released by the Vernon Duster baseball management.

They are Leon English, diminutive third baseman, and outfielder Fred Oliveri.

English was given a pink slip following a salary disagreement.

JUNE 15 IS FATHER'S DAY

Make It A Memorable One With These Gifts

Dress Shirts

by Mark Twain and Marlboro in solid colors and whites. Sizes for every Dad. 2.95 and 3.95

Sport Shirts

Short and long sleeve cottons, rayon seersuckers, broadcloths, meshes in solid colors and fancy patterns by Mark Twain, Marlboro and B V D. 2.50 and 7.95

Ties

by Hollyvogue in silks and rayons. Bold and conservative colors. 1.50 up

Bow Ties by Sherman 1.00

Summer Pajamas

In cotton and seersuckers by Reis. These pajamas will keep Dad Zephyr cool this summer. Short sleeve and knee length. All colors. 3.45 and 3.95

Summer Robes

In cotton seersucker. All of the desirable colors. Sizes Small, Medium and Large. 8.45 up

SUMMER SUITS

Tropical worsted summer weight all wool suits by

Rose, Merit and Timely. All the latest summer

shades. All sizes. Many styles available with extra

trousers.

47.50 up

Rayon Tropicals 35.00 up

Straw Hats

You will want to be sure and get Dad a new straw to "top off" his new ensemble. Western and dress styles by Lee, Stetson and Davis. Light and dark colors. 1.95 to 10.00

Dress and Sport Socks

by Holeproof in nylon, cotton and rayon. A large selection in solid colors, fancy patterns, stripes and plaids. 65c up

SUMMER SLACKS

By Esquire, Haggard and Timely. Light

weight wools, rayons, "Dacrons" and wool

trousers with or without pleated fronts.

Your choice . . . All colors and sizes.

5.95 to 22.95

Summer Shoes

by Freeman and Nunn Bush. In all of the latest summer styles. Nylon meshes, two tone brown and tan. 8.95 to 18.95

Underwear

by B V D, Reis and Coopers. Cottons, rayons and nylon in boxer, gripper and jockey styles. 65c to 2.95

Maxwell Is Paired With Sneed, Ransom

Open Underway On Thursday

NEW YORK, June 7 (AP)—Ben Hogan, who is bound to be the favorite to win his third straight United States Open golf championship when play starts in the 1953 open at Dallas Thursday, will be in good company for the first two rounds.

The pairings, released today by the United States Golf Association, show that Hogan drew as his playing partner Lew (The Chin) Worsham, who beat Sam Snead in a playoff for the 1947 Open title, and Chuck Koosis of Detroit, low amateur in last year's Open.

This threesome is scheduled to tee off for the first round at 9:36 a.m. (est.) Thursday and at 1:12 p.m. Friday. Play starts at 8 a.m. (est.) both days and the last three some in the field of 162 players will not leave the tee until 3:04 p.m.

Three who will lead the way in the opening round are Bill Ezelnicki, the professional hockey player who was the highest scorer who qualified in the sectional rounds last Monday; Amateur John C. Owens of Lexington, Ky., and W.A. Stackhouse of Seguin, Texas.

Sneed will begin play at 1:12 p.m. Thursday and 9:36 a.m. Friday. He is paired with Billy Maxwell of Odessa, Tex., the National Amateur Champion, and veteran Henry Ransom of St. Andrews, Ill.

Maxwell is one of five North Texas State College golfers who qualified for the open. Others are Joe Conrad, Claude B. Reed Jr., Don January and Stinton Mosel.

Pairings and starting times for the first rounds include:

8:32 a.m. Henry Christman, St. Louis; A-Jack S. Williams, Plainville, Tex.; Gardiner E. Dickinson Jr., New City, N. Y.

9:04 a.m. Jack Burke Jr., Houston; A-Sam Urzetta, Rochester, N. Y.; Mike Turnesa, White Plains, N. Y.

9:12 a.m. Smiley Quick, Los Angeles; J. T. Hammett, Snyder, Tex.; John M. Garrison, Tulsa, Okla.

9:28 a.m. Francis (Bo) Winiinger, Northfield, N. J.; Elroy North, Houston; Jimmie Gauntt, Oklahoma City.

9:52 a.m. Lionel Hebert, Verona, Pa.; Walker Inman Jr., Augusta, Ga.; A-Richard E. McCreary Jr., Houston.

10:08 a.m. John Bass, Baltimore; Ward pet the Loraine club down with one hit and struck out 18 batters. The latter is a record in Colorado City League play.

Ward issued no walks. Only three batters hit off him were driven to the outfield.

George Ray, Rube Baker and Ward each had two blows for Coahoma. Leon Kirby, Mike Smoko, W. L. Brown, Larry Davis, J. B. Murphy and Vernon Wolf came in for one each. Raymond Morrison missed the game because of an injury.

The Coahomans struck for two runs in the first inning and scored steadily thereafter.

Coahoma and Col-Tex are now tied, each with a record of nine wins and one loss. The two teams clash at 9 p.m. Tuesday night. Each has beaten the other in previous meetings this season.

Dibrell's Retains Lead in League

Dibrell's Sporting Goods remained atop the Women's Bowling League ladder, winning three games from Team 1 on forfeits Thursday night.

In the second match Cecil's Package Store won three games from the First National Bank.

Jinks Dozier of Dibrell's bowled the high series of the night, 441, and Thelma Lebkowsky had the high singles score, 168.

Nicholson Spells Freeport Mentor

FREEPORT, June 7 (AP)—Herbert Hopper, president of the Texas High School Coaches Association, has resigned as football and track coach at Freeport High School to become full time athletic director.

N. L. Nicholson, assistant coach three years, has been named head football coach, with Virgil Eikenberg as assistant. Both are former Rice Institute athletes.

Hopper was head coach at Freeport for 25 years.

Bronc Schedule For The Week:

SUNDAY—At Midland.
MONDAY—At Midland.
TUESDAY—At Midland.
WEDNESDAY—Olema here.
THURSDAY—At Arles.
FRIDAY—At Arles.
SATURDAY—At Arles.

FRIDAY NIGHT

Broncs Split Two With Pace Setters

Atamis Arenchiba, with a 9 o'clock pitching delivery that numbed the sting of the opposition's heavy bats, hurled the Big Spring Broncs to an impressive 6-1 triumph over the Odessa Oilers here Friday night.

Manager Pat Stacey ran out of pitchers at that point, however, and the Oilers came back to cop the second game of a twin bill, 8-5.

Stacey used three hurlers in the morning-cap, including Mr. Arenchiba in a late relief role. Young Charley Ratliff started on the rubber for Big Spring but was never able to get his high, hard one in there. Tommy Shafer tried his hand at it before Arenchiba reported for duty again.

At that, the Steeds threatened to make a game of it in the dying moments of the seven-inning contest. They scored in the last two panels and had the sacks jammed when the end came.

Leon (Hook) Hayes started on the mound for the Oilers and gained credit for the victory but had to call on Juan Guerrero when the going got rough in the waning moments.

In that one, Odessa jumped out in front with a three-run first, added two in the third and its final three in the fifth.

It was all Arenchiba and Big Spring in the opener. The only run yielded by the knuckle-baller was a gopher pitch delivered to Pepper Martin in the fifth. By that time, the locals had all their runs. The blow was Martin's seventh four-master of the season.

Big Spring struck a pay vein in the fourth. Fields started on the mound for the winners but Jerry White got credit for the win.

Rickie Terry hurled three-hit ball for the losers. His mates got four off the two Oiler hurlers. Aparton, Peacock and Anderson counted the Indian runs in the third.

The Oilers now boast a 7-3 won-lost record.

Red Harrison's Oilers solidified their hold on first place in Little League standings by nailing out the Indians, 4-3, Friday afternoon.

A run scored by Preston Daniels with none out in the sixth turned the trick for the Oilers. Preston had singled and gone to second on a hit by Joe Fields from where he scored on a misplay.

Daniels, Fields and Loren Guess had counted the first three Oiler runs in the fourth.

The Oilers now boast a 7-3 won-lost record.

Reagan Places Five Boys On 1952 All-Star Club

AUSTIN, June 7 (AP)—John Reagan of Houston dominated the all-tournament Texas Interscholastic League baseball meet June 2-4.

The champion Reagan Bulldogs, who defeated Crozier Tech, 8-5, in the finals took a lion's share of places on the 12-man squad, with five players. Runner-up Crozier Tech had three players, Waco three, and Bryan one.

Only three were chosen unanimously, and two of these were pitchers. Reagan's Jack Schulte, who won two tournament games to boost his season's string of victories to 15 straight, was picked by all scribes, as was Doyle Stout of Crozier, a flashy lefthander. Shortstop Wayne Connolly of Waco was

Wightman Cup Tests Open Next Week End In London

LONDON, June 7 (AP)—Four American women, including the present and almost certainly the future Wimbledon champions, meet the British Friday and Saturday in defense of the Wightman Cup, symbol of Anglo-American tennis supremacy.

In seven matches on the No. 1 court at Wimbledon, the Americans will display the strokes and style that have made them unchallenged champions of the post-war world.

The American team is made up of 17-year-old Maureen Connolly, the U. S. champion; Doris Hart, titleholder, and Shirley Fry, last year's French champion and Wimbledon runner-up.

Opposing them will be a British squad of six, including Mrs. Jean Quertier Rinkel. The British have won only two out of 41 individual Wightman Cup matches in the seven series since the war.

Duke University had two pitching candidates for the baseball team with the names Billy Goodman and Ted Williams. Neither were relatives of the big name stars.

Francis assumed Job At Pampa

Buck Francis, official statistician for the Longhorn League for the past three seasons, has resigned that position to accept employment with the Pampa Daily Spokesman.

Francis was a sports writer for the Abilene Reporter News. His job as statistician will be taken by Collier Parris, sports editor of the Abilene paper.

The Cleveland Indians have had at least one 20-game winner every year since Bob Feller became a regular in 1939, excluding his four years in service.

Giants Oppose Abilene Today

Harry Dooley and his Big Spring Giants move in on Steer Park this afternoon, tangling with the Abilene Black Sox in a 3 o'clock engagement.

The Giants swing back into action on Monday night here, at which time they have it out with the Lamesa Black Lobos.

The Giants, victorious in three of four starts to date, were originally committed to tangle with Stamford this afternoon but that game was cancelled.

Ramon Rodriguez will probably twirl for the Big Springers today. Dooley himself will tow the pitching rubber on Monday night.

Midland Assigned A Game Warden

AUSTIN, June 7 (AP)—The Game Commission has assigned 17 new warden school graduates to field areas in Texas.

The men and their assignments: Bert Cade of Chandler; Beaumont, Frank H. Hamer of Austin; Alpine; Nolan W. Johnson of Crystal City; Midland; Charles V. K. Cannon of Bryan; Palestine; Russell N. Lancaster of Grandview; Cotulla; John A. Lockett of Abilene; Ozona; Curtis L. Oswald of Killean; Beville; Harold D. Penney of Austin, Austin.

The Steeds picked up their other three tallies in the fourth on a trio of safeties and two fielding boners pulled by the opposition.

RAMBLINGS—The victory in the first game pulled the Broncs' won-lost record to .500 for the first time this year but the challenge was too great. Leo Eastham, the league's leading hitter, was limited to one hit in six official trips by Big Spring pitching. One of the better crowds of the season, numbering 1,000 plus, looked on. Fans were treated to a rare development in the second game when Gil Guerra, a pitcher, went in to bat for Pat Stacey, Big Spring's cleanup hitter. Stacey reasoned that Guerra would be more effective against the Odessa leftie, Hayes. Hayes, however, then departed in favor of Guerrero and Guerra fanned Juan of a bad tooth and two pitchers had to patrol the outer gardens, Guerra and Baez in the first game and Corrales and Baez in the afterpiece.

Between them, they got five hits in ten times at bat.

Oilers Open Home Season Today

Lefty Shelton and his Forsan Oilers will host Big Lake in a Cancho Basin League game this afternoon, at which time their new park will be dedicated. Left to right, lower row, they are Jay Disney, Dee Anderson, Timon Shoultz, Bobby Ashbury and Harry Barnett. Top row, Manager Shelton, George Gray, Dick Gilmore, Ken Cowley and Winnie Cunningham. In front is Bobby Shelton, mascot.

Forsan Oilers Open Home Season At 3 P.M. Today

Shelton Gang Has New Park

R. L. (Lefty) Shelton and his Forsan Oilers stage a party at home this afternoon, beginning at 3 p.m. Shelton and a sizeable portion of the people in that community have worked hard in recent weeks to build a baseball park, complete with roofed grandstand and a fence.

It's about completed and the Oilers play their first home game of the 1952 season, at which time the Big Lake Cancho Basin League club comes to the South Howard County team's park.

Lefty and his gang are two down in Cancho Basin League play, having lost to Sonora and Bryan Electric of San Angelo in that order.

There's room for about 300 people in the new plant's grandstand and those who can't crowd into the seats can park their cars around the playing field.

The playing field's dimensions rival that of any professional park. Down the left field wall, it's 323 feet to the wall. Dead-away center the tape showed 378 feet and down the right field line it measures 335 feet.

Merchants, oil companies and other business concerns have cooperated by purchasing sign space which enabled Shelton and Blacky Hines to get the park fenced in.

There's a concessions booth being built between the two bleacher sections, squarely behind the fence in back of home plate.

Shelton himself will take the mound, throwing into Winnie Cunningham. At first will be Harry Barnett, at second Bobby Ashbury, at short Jay Disney and at third Ken Cowley.

In the outfield, it will be George Gray in left, Dee Anderson in center and Wesley Miller in right. Timon Shoultz will be available for infield or outfield duty.

Oilers Pacing Little League

The Oilers are hanging onto first place in Little League standings in games through last Friday with a 7-3 won-lost record.

Red Harrison's team leads the Gold Sox by only one game. The Sockers have won six and lost four. The Yankees are third with 5-5, followed by the Indians with 4-6 and the Eagles with 3-7.

Last week's results: Yankees 18, Eagles 8; Oilers 6, Gold Sox 5; Indians 11, Yankees 7; Gold Sox 13, Eagles 12; Oilers 4, Indians 3.

The Indians tangle with the Eagles Monday. On Tuesday, the Oilers meet the Yankees. On Wednesday, it will be the Gold Sox against the Indians. The Eagles play the Oilers Thursday while the Yankees square away with the Gold Sox Friday.

Bengals Invade Midland Today

The Big Spring Tigers return to action this afternoon, at which time they play Midland in Midland. The starting hour is 3 p.m.

The Bengals will carry a 3-1 won-lost record into the game and depend upon Bobby Beall to make it 4-1. Beall is a fast-ball hurler who usually throws the spheroid past the batter.

If he should falter, Manager Ynez Yanes has Howard Jones available for mound duty.

Jones is the ex-HCJC hurler whose arm is just coming around after being injured during basketball season.

BILLY MAXWELL SURVIVES TEST

Defeats Kole, Jack Penrose

PARIS, June 7 (U)—America's bid to add the French golf championship to the British crown continued unabated today as a power-packed foursome of Americans reached the quarterfinal round.

Although Harvie Ward of Tarboro, N. C., who won the British crown last week, had to default from this tourney, the remaining Americans drove steadily ahead and most of the Americans who were eliminated went down before their fellow countrymen.

U. S. Amateur Champion Billy Maxwell of Odessa, Tex., and Dick Chapman, former American and British champion from Pinehurst, N. C., led today's advance through the third and fourth rounds. They were joined in the round of eight by Bobby Knowles of Boston, defending champion in this tournament, and youthful Billy Shields of Albany, New York state champion.

Maxwell, North Texas State College ace, had a close call in the morning's third round against Col. George Kule, a British officer stationed in Paris, but pulled out to defeat Jack Penrose of Miami Beach, Fla., 5 and 4 in the afternoon, building up a five-hole lead on the first nine.

Chapman, steady-swinging veteran, defeated Guy de Pampelven of France, 5 and 3, and came back to trim Joe Bernolof of Salt Lake City by the identical score.

Knowles put out Henri Giraud of France, 5 and 4, and followed up with a 2 and 1 victory over Chris Dunphy of Mamaroneck, N. Y., in the afternoon, while Shields defeated E. Pan de Soraluce of Spain, one up, and Harry Bentley of England, 4 and 3.

Chief American casualty was long-hitting Robert Manley of Savannah, Ga., who was beaten by John Plant, a Briton living in Cairo, 4 and 3.

Manley had beaten Louis Pierard of France, 5 and 4, in the morning round.

Maxwell never had to worry in the afternoon round, as Penrose virtually eliminated himself by three-putting the first and third greens. In addition, Penrose belted his drives on the seventh and eighth holes into the woods. Then he blew a two-foot putt on the ninth, and there he was, five down with nine holes to play.

Penrose steadied, even cutting into Maxwell's lead, but the Texan parred the 14th to win the hole and match as Penrose went one over with a five after driving into the woods again.

Maxwell, North Texas State College ace, had a close call in the morning's third round against Col. George Kule, a British officer stationed in Paris, but pulled out to defeat Jack Penrose of Miami Beach, Fla., 5 and 4 in the afternoon, building up a five-hole lead on the first nine.

IN HILL DUEL Reynolds Shades Duane Pillette

NEW YORK, June 7 (U)—Allie Reynolds came up with another masterful pitching performance today as the New York Yankees shaded the St. Louis Browns, 2-1.

The part-Indian right-hander permitted only three singles, fanned nine and walked one better in hanging up his sixth straight victory and seventh of the season.

It also was Reynolds' tenth complete game of the season. He never has allowed more than three runs in any game.

Duane Pillette, a former Yankee, also pitched a fine game for the Browns. Pillette granted only six hits in the seven innings he toiled but the Yankees collected three of the blows in the fifth inning when they scored both of their runs.

Y. Y. (Allie) Reynolds, 27, 10-1, 1.50 ERA, 100.00 ERA+, 100.00 ERA-. He pitched 100.00 innings, 100.00 hits, 100.00 runs, 100.00 earned runs, 100.00 walks, 100.00 strikeouts.

Duane Pillette, 27, 10-1, 1.50 ERA, 100.00 ERA+, 100.00 ERA-. He pitched 100.00 innings, 100.00 hits, 100.00 runs, 100.00 earned runs, 100.00 walks, 100.00 strikeouts.

ACC Wins NIC Track Carnival

ABILENE, June 7 (U)—Abilene Christian College won the first National Intercollegiate Track and Field Meet tonight with a whopping 74 points while Javier Montes, Texas Western distance runner, and Bransford Watson, tall Negro from Texas College, stood out with glittering double triumphs.

Abilene Christian, one of the host colleges for the meet which drew athletes from 55 schools, easily outstripped the field. Second was San Diego State with 45 points and South Dakota State was third with 34.

Montes, the slim Indian from El Paso, romped to a fine 4:13.4 mile and then won the two-mile run with a time of 9:24.8.

English Girls Upset Yanks On Golf Links

By TOM OCHILTREE

MUIRFIELD, Scotland, June 7 (U)—Britain's victory-starved women golfers squashed a dramatic American rally in the nick of time today for a 5 to 4 victory that gave them their first Curtis Cup in 30 long years of trying.

The best the British ladies have been able to do previously in this international competition, dating back to 1922, was a tie in 1936. This also was the first British golf triumph over the United States by either women or men since Britain's Walker Cup victory in 1938.

But the home supporters had many anxious moments before Elizabeth Price of England sank a six-inch putt on the 34th hole to give her a 3 and 2 victory over Grace DeMoss of Corvallis, Ore., in the day's final singles match.

The British had seen the U. S. forces, youngest ever to represent their country in the series, battle back from the rim of defeat to square the score at 4-4, with one match to go.

The Americans had lost two of yesterday's three foursome tests and had trailed in four of the six 18-hole contests today after the morning 18-hole rounds.

Polly Riley of Fort Worth, Tex., was the only American never in trouble as she led the American charge, followed by Dorothy Kirby of Atlanta, Ga., and Claire Doran of Cleveland, who also scored victories.

Douglas Leads Ardmore Open

ARDMORE, Okla., June 7 (U)—Dave Douglas, the lean Newark, Del., professional, shot his second straight sub-par round to assume the lead today in the \$15,000 Ardmore Open Golf Tournament.

The straight hitting linksman, now ranked 14th among the money leaders on the current professional golfers association tour, posted a one-under par 69 today to go with his earlier rounds of 70 and 68 for a 207 total.

This was two strokes better than E. J. (Dutch) Harrison, the host professional, who also had a 69 today for a 209.

The early leaders, Shelley Mayfield of Cedarhurst, N. Y.; Ralph Blomquist of Glendale, Calif.; Al Bessink of Chicago, and Julius Boros of Mid Pines, N. C., saw their third round scores soar over par to put them behind the new sub-par shooters.

Triangle Match Slated Today

First home match in Triangle Golf League competition for the Big Spring Linksman will begin today at 1 p.m. at the Country Club with Colorado City furnishing the opposition.

Big Spring won its last match, a May 4 win from today's opponent, Snyder and Sweetwater go together in Snyder today in the other league match.

The visitors can bring as many linksman as they choose, therefore the number of matches will depend on the size of the Colorado group. Pro Shirley Robbins commented. But he predicted at least 25 matches would be unreeled.

Floyd Martin Is Sold To Midland

The Abilene Blue Sox of the West Texas-New Mexico League have announced the sale of infielder Floyd Martin to the Midland Indians of the Longhorn League in 1951.

Martin, whose home is in Big Spring, played with the Odessa Oilers of the Longhorn League in 1951. He is the brother of Bob (Pepper) Martin, field manager of the Odessa team.

OVER LEAGUE LEADERS

Broncs Jump To Deadlock For 2nd With 5-2 Win

Bert Estrada replaced Gil Guerrero in the second inning and proceeded to pitch a superlative ball game to give the Big Spring Broncs a 5-2 victory over the league-leading Odessa Oilers Saturday.

The victory turned the three-game set in the Broncs' favor, the two teams having divided a double-header on Friday night.

The Broncs vaulted into a tie for second place along with the San Angelo Colts and the Sweetwater Braves, since the Braves and the Oilers both lost their Saturday games.

The Oilers boasted a 1-0 advantage when Estrada took over.

However, Manager Pat Stacey put the locals ahead for keeps in the fifth with a two-run single. The Broncs went on to score twice more in the same frame.

Evelle Ortega, the league's leading pitcher, was the victim of the Big Spring attack, while Estrada was handcuffing the Oilers. Ortega suffered his second setback of the season. He has nine victories to his credit.

The Saturday night game concluded a home stand for the Broncs. They travel to Midland Sunday to open a series with Zeke Bonura's Indians.

Heads OIIC Work

Carl W. Smith, Big Spring, has been re-appointed Howard County chairman of the Oil Industry Information Committee. Here he discusses plans for the committee, including the tie-in Oct. 12-18 for the American Petroleum Institute sponsored "Oil Progress Week," with Joe T. Dickerson, OIIC area chairman for West Texas. Smith is a member of the Cosden staff and directed an extensive program last year.

Oil Industry Keeps Nervous Eye On Steel Strike Status

By CHARLES HASLET
WASHINGTON, June 7 (AP)—The oil industry is watching the steel strike with concern. Supplies of steel for line pipe and tubular goods have been tight for some time. Government and industry representatives say any protracted shutdown of steel mills will make it tougher than ever for oil producers to get steel for drilling, transportation and storage facilities.

The Petroleum Administration for Defense (PAD) figures that the steel strike will cost the oil industry about 175,000 tons of steel a week.

The industry's summer storage program will not be affected immediately by the steel strike, a government official said, because steel for early summer construction already has left the basic steel mills. But he said a long strike would wipe out steel for building after September and put a crimp in the storage program.

On May 27, before the recent walkout of steel workers, a PAD representative estimated the oil industry's demand, both domestic and foreign, for steel from this country's mills for 1952 would amount to 2,478,916 tons and the supply for

the same period would be 2,160,000 tons—a deficit of 3,189,916 tons. Next year, he estimated, the demand will be about 2,827,000 tons and the supply 2,480,000—a deficit of 347,000 tons.

Price Stabilization Director Ellis G. Arnall assured officials of the Independent Petroleum Association of America (IPAA) that he will study the organization's plea for removing controls from petroleum prices.

The IPAA group conferred with Arnall for about two hours Thursday.

Members of the delegation said Arnall went fully into the methods of crude oil pricing and was told by the IPAA officials that buyers, not the sellers, generally determine the crude price.

Russell Brown, IPAA general counsel, stressed that the group was asking for decontrol with price. His position is that the "natural economic level" which might or might not bring some increase in present prices.

Brown has said no request is being made for an increase in crude prices. His position is that the defense Production Act contains no authority for putting controls on the price of crude oil.

Attending the conference with Arnall were Charlton H. Lyons of Shreveport, IPAA president; W. O. White, president of Kenilworth Oil Corp., Shreveport; George H. Bruce, chairman of the IPAA Price Advisory Committee, Wichita, Kan.; Joe Zeppa, president of Delta Drilling Co., Tyler, Tex.; John M. Kelley, president of Elk Oil Co., Rowlett; James B. Brown, chairman of the IPAA Cost Committee; Minor S. Jameson Jr., assistant to the IPAA president, and Brown.

A gas discovery and wildcat location highlighted Sutton County's activity. Phillips No. 1-A Lebb Wallace, C SE SW 52-14-TW&NG, gauged gas at the rate of 3,114,000 cubic feet daily and recovered 300 feet of gas and distillate-cut mud, no water, on an 80-minute test from 3,880-998 feet. No. 1-A Wallace is 15 miles southeast of Sonora and 3-mile west of Pure No. 1 Davis, dry hole abandoned Jan. 28 at total depth of 5,550 feet.

Continental No. 1 L. M. Watson, Southwestern Ward County wildcat, showed gas and oil on a drillstem test from 9,261-78 feet in the Wolfcamp.

Recovery was 2,450 feet of free oil, 320 feet of oil and gas-cut mud and 930-foot water blanket. Projected to 13,000 feet, No. 1 Watson is 467 feet from the northwest and southwest lines of section 32-33-H&TC.

Stanford No. 1 Frost was completed to extend the Landon field a half-mile south into Yoakum County. It had a daily pumping potential of 139 barrels of oil, gas-oil ratio of 329-1. Located 330 from north, 990 feet from west lines of section 38-D-John Gibson, the well produced from the San Andres, topped at 4,337 feet.

Gaines gained a projected 6,000-foot wildcat, Laan-Tex Oil Co. of Dallas No. 1 Collie Oil Development Co. in the Central-North part of the county. Location will be 660 feet out of the northeast corner of section 2-C35-pal, four miles west of Seagraves.

This test is one location north of the Corcoran Drilling Co. No. 1 Atlas Life Insurance Fee, which has indicated as a discovery in the Wolfcamp and from the Fuselman. Corcoran No. 1 Atlas now is in the process of completing in both of these pays.

The Hamon No. 1 Green is the first project in the area slated since Corcoran loomed as a discovery.

Breedlove Pool Due Producer

The Breedlove-Devonian pool of Northwest Martin County prepared for an attempt at its third completion Saturday while also chalking up its first failure.

Pan-American and Forest No. 3 Breedlove, et al., 1,980 from the east and 3,300 from the south lines of league 258, Briscoe CSL, drilled to 12,295 in the top of the Fuselman. There were no shows in the Fuselman and operator plugged back to 12,180 in the Devonian and 1- to set 5 1/4-in. casing at that point.

The pipe will be perforated from 12,092, the top of the Devonian pay, to 12,180. While no drillstem test was taken in this zone, the cores cut through it showed that it would make a commercial producer. It is 20 feet low to the Pan-American No. 1 Breedlove, the discovery well.

Pan-American No. 4 Breedlove took a drillstem test in the lower Devonian from 12,220-242 with the tool open one hour and 45 minutes. Recovery was 1,800 feet of water blanket, 380 feet of free oil, 450 feet of sulphur water and 90 feet of sulphur water-cut mud. The test drilled on to 12,338 in lime and shale, but it had no further shows. The oil on the drillstem test was the only show in the hole. The Devonian was much lower geologically than that of other producers in the pool and it actually did not find the same formation.

This one location north offset to the Pan-American No. 1 Breedlove is plugging to abandon and is the pool's first failure. Location is 660 from the north and 5,940 from the east lines of league 255, Briscoe CSL.

North Crane Hole Located

Shell No. 1-D John Edwards has been spotted as a test in north-west Crane County.

It will be 660 from the north and east lines of section 27-B-17, PSL, nine miles southeast of Monahans. It will start drilling at once and will go to 5,100 to test through the middle Permian lime.

The hole will be one location south of Shell No. 2 Edwards, now bottomed at 7,774 in lower Permian dolomite and taking a drillstem test. The No. 2 Edwards has had considerable shows above the present total depth and looked likely to make a producer.

Magnolia Locates Iatan-Howard Test

Magnolia Petroleum Company No. 28 Mary Foster will be a location in the shallow Iatan-Eas Howard pool on the Mitchell County side. It is to be 330 from the north and west lines of section 8-29-s, T&P, four miles southwest of Iatan. Contract depth is 3,000 and operations will start at once.

Borden Wildcat Is Spudded, To Deepen

Ashman & Hilliard No. 1 A. J. Long Estate, 660 from the north and east lines of section 7-30-4n, T&P, spudded to 300 feet with cable tools.

Operator set the 13 1/4-in. string with 275 sacks on the bottom and is rigging rotary to drill ahead. This about four miles southeast of Gall.

Making The Tie-In

A Lone Star Gas pipeline crew prepared a big valve which was set into the line Friday to control flow through a new 10-inch main. This was the tie-in for the crew which had brought the new line in from the 12-inch high pressure line near Pyron to increase Colorado City service.

New Line To Increase Gas Volume For Colorado City

COLORADO CITY—The Lone Star Gas Company connected a new 10-inch line to Colorado City's existing gas lines Friday, according to V. G. Sears, construction foreman.

The new line has its northern terminus in a 12-inch high pressure line near Pyron 17 miles from Colorado City. The other end ties into the present system 100 yards north of the Derrick Cafe.

At present, Colorado City is served by a 6-inch line from Snyder and an 8-inch line from Sweetwater, says G. H. McMinn, assistant pipeline superintendent.

"The new line will make additional volume available to Colorado City," added Roy Porter, manager of the local gas company of

FOURTH OF NATION'S

Area Reserves Up Despite Big Take

Despite withdrawal of 503,026,857 barrels, proven reserves of crude oil and natural-gas liquids in West Texas were increased 485,000,000 barrels during 1951, according to a report prepared by the West Texas Chamber of Commerce.

The report, published in the current issue of the organization's magazine, West Texas Today, notes that the 132 counties served by it accounted for all except 123,000,000 barrels of the 608,000,000 barrels added to Texas reserves during the year. The Permian Basin yielded 330,383,599 barrels last year.

This estimate was based on a conservative figure or the Spraberry Trend development because, as The Oil and Gas Journal declared, "development has covered but a fraction of the area considered productive and almost eligible for the 'proven category'."

Texas provided nearly half of 1,416,000,000 (b) barrels added to the reserves of the United States. Of 14,342 wells completed in Texas during the year, 10,859 were in West Texas. The total of comple-

NW Dawson Reef Stepout Strong Well

Ponder, Inc. of Midland and Calgary (Alberta, Canada) No. 1 Classen has completed for a calculated potential of 604 barrels. This flow from the Pennsylvania reef is probably the biggest well ever to be completed in Dawson County. Because the venture had eased off 105 feet of pay in completing from 38 feet of open hole, it focused keen interest on the relatively new Mungerville-Pennsylvanian area in Northwest Dawson.

The 604 barrel rating of 44-gravity oil was based on an actual flow of 302 barrels in 12 hours through quarter-inch choke. There was no water. Gas-oil ratio was 525-1, and the flow was natural. The open hole zone was from 8,550, where the 7-in. string was set, and 8,589, bottom of hole. The reef, from top at 8,445 to 8,550, will not be tested at the present time. This venture picked the reef top 126 feet high to the El Tee No. 1 Briley, discovery well to the southwest. Elevation on the No. 1 Classen is 3,095 feet. Location is 660 from the south and west lines of the southeast quarter of section 95-M, EL&RR, 15 miles northwest of Lamesa.

El Tee No. 1-95 Classen filed corrected location which is 660 from the south and 1,980 from the west lines of section 95-M, EL&RR. This puts it one location west of the Ponder No. 1 Classen. It is now rigging rotary and will start drilling this week. It is projected to 9,650 feet or to pay in the Pennsylvanian at a lesser depth.

However, a series of cores in the zone which was tested looked favorable for production. Operator is taking an electric log, then will set pipe and make a production test. If this makes a well, it will extend production in the Weddell pool which was extended into Southwest Sterling County by Honolulu Oil Company on its Suggs lease to the north of the Atlantic No. 1 Suggs.

Atlantic Oil & Refining Cox, No. 1-2 Suggs, in the Panhandle section of Northwest Tom Green County, took a drillstem test in the Spraberry from 5,006-5,049.

The tool was open one hour and recovery was 60 feet of drilling mud. Operator was unable to tell if the mud had any shows of new oil because an oil emulsion had been put in the hole prior to the drillstem test.

Completions Stay Well Ahead Of '51

AUSTIN, June 7 (AP)—Oil well completions in Texas this year are well ahead of completions in the same period of 1951.

The Railroad Commission today reported a total-to-date of 5,066 compared with 4,716 the first six months last year. There were also more dry holes this year: 2,884 to 2,470 in 1951.

Interest in drilling is lagging behind the first six months last year. The commission had 9,219 applications for drilling permits through June 7 last year and only 8,902 so far this year.

Spraberry Location Set In Glasscock

Ashland Oil & Refining Company No. 9-30 Driver, et al will be a Driver-Spraberry location in Southwest Glasscock County. The location is set for 660 from the south and 1,980 from the east lines of section 30-36-4s, T&P, Projected depth is 8,100.

Crockett Wildcat Is Small Producer

Deep Rock Oil Corporation No. 1 Shannon estate, Northwest Crockett County wildcat flowed 38 barrels of oil in a 24-hour test from perforated section at 5,866-72 feet.

The prospect is still flowing to test and complete. A potential test will be reported in a few days. The well had been shut in for several days prior to the 24-hour flowing test while tanks were being erected.

The section making the oil had been washed with 500 gallons of mud acid and treated with 1,000 gallons of regular acid. No formation water has been reported.

This development is 660 feet from south and 260 feet from west lines of the J. Wiley heirs survey No. 2.

MEET THE 'SENIORS' Of The COSDEN FAMILY

This is the 57th in a series of special Cosden presentations, recognizing the long and valued service of those employees who have been associated with Cosden for 15 years and longer. Cosden is proud of the scores of its workers who have contributed to its success through so many years.

ROLAND A. SCHWARZENBACH

Another employee who has been associated with Cosden fifteen years or longer is Roland A. Schwarzenbach. He began his career with Cosden June 29, 1936 as loader and blender. He has held various jobs during his fifteen years and is now Cat. Cracker Operator No. 1.

Schwarzenbach is a native of Big Spring, and attended public schools here. He is a veteran of World War II where he served in the Navy for two years.

On October 24, 1942, Schwarzenbach was married to Virginia Whitney of Water Valley, Mississippi. They live at 211 West Ninth Street, Big Spring.

Schwarzenbach was business manager of Local No. 826 for two years and is now serving as president. He is a member of the Presbyterian Church. He likes football and softball, but his favorite hobbies are fishing and hunting.

Discovery In West Terry County Gains An Offset

Jake L. Hamon of Dallas, et al No. 1 Leila Mae Green has been stated as a new location, offsetting a potential discovery in western Terry County.

It will be located 660 from the south and east lines of the north-west quarter of section 83-B-11, C&M survey, 2 miles west of Brownfield. Projected depth is 13,000 or production at a lesser depth. Operations will start at once.

This test is one location north of the Corcoran Drilling Co. No. 1 Atlas Life Insurance Fee, which has indicated as a discovery in the Wolfcamp and from the Fuselman. Corcoran No. 1 Atlas now is in the process of completing in both of these pays.

Texas Political Scene Is Active

By The Associated Press

A campaign to break up a South Texas political empire over-shadowed Texas political feuds this weekend.

The Republicans continued their tug-of-war over Taft and Eisenhower.

The Democrats speculated on whether candidates late in filing for office or late in filing expense accounts should get on the ballot of the July 26 primary.

And the candidates themselves stalked across the state with campaign literature in their hands to garner votes.

Down in Duval County of South Texas a group of voters who organized the Freedom Party with the expressed purpose of breaking the political influence of George Parr of San Diego crisscrossed a motor caravan across the county Saturday.

Charles McDermott of San Diego, the party's candidate for sheriff, was in charge. Parr is sheriff of the county now.

All of the Freedom Party's candidates for county offices were to be introduced at an afternoon rally

at Freer. The caravan started at San Diego.

Both Democrats and Republicans will hold their state executive committee meetings Monday.

The Republicans will meet in Fort Worth with selection of a site for their state convention Aug. 22 the only order of business. Carlos Watson, Brownsville, secretary of the executive committee, said he knew of no other matters to come up.

The Democrats will meet in Austin. They have more work to do. They have to select a site for their September state convention. But they have also to make up the ballot of the July 26 Democratic primary. Who gets on and who may be kept off could produce considerable static. There's the question of some candidates late in filing for office and also about how much filing fee they owe.

Another question of whether being late filing campaign expense reports would ban a candidate from the ballot might not come up. Speculation was that this is outside the committee's jurisdiction.

The Republicans aren't expected to get into any controversies at their executive committee meeting.

Their fight over Texas' 38 delegates to the national convention has become a national issue.

Sen. Robert Taft of Ohio said Friday that he was willing to compromise on division of the delegation's votes. Gen. Eisenhower's first reaction to that was reported as it sounds good.

But in Texas Eisenhower leaders reaffirmed their stand that there would be "no compromise, with corruption."

"General Eisenhower naturally could hardly be expected to be familiar with details of the Texas situation," said Alvin Lane of Dallas, an Eisenhower leader.

In statewide campaigns:

1. For governor—Ralph Yarborough began a fast swing through East Texas, Saturday, stopping at Rusk, Jacksonville, Crockett and Palestine. He planned to visit his father at Chandler Sunday. Gov. Allan Shivers was at Fort Hood Saturday reviewing the 36th Division. He was going to East Texas, too, Sunday, to attend a reunion of the Creasy family.

2. For U. S. Senator—Price Daniel planned to be in North Texas Monday, attending a morning session of the police association at Wichita Falls, then going on to Henrietta, Bowie, Nocona, Decatur and Fort Worth Monday night.

Rep. Lindley Beekworth scheduled six speeches in South Texas Saturday, including Kingsville, Alice, George West, Pleasanton, Devine and Hondo.

E. W. Napier of Wichita Falls was in Uvalde Saturday in his campaign for the U. S. Senate. He planned to speak later at Kerrville, Junction, Mason and Brownwood before going back to his home for Sunday.

Chaplain Hitt To Conduct Mission At Webb Air Base

Chaplain (Lt. Col.) Clark O. Hitt (USAF Reserve) of the Veterans Administration Hospital here will conduct the Protestant Preaching Mission to be held at Webb AFB this week.

The mission will be held in the auditorium of the academic building starting with the 11 a. m. service at the academic building. Week-day services will be at 8 p. m. in the same building.

Special music and delegations of civilians are anticipated from interested churches in the area. In addition to vocal and instrumental solos and duets by base personnel the Protestant choir under direction of Chaplain (1st Lt.) John Little, is to aid in the services.

Chaplain Hitt has had much experience in both civilian and military Christian ministry, having served at Lancaster, Texas, prior to his entrance into the service in World War II. In five years of military duty Chaplain Hitt has served at Lowry AFB, Colo., and Randolph AFB, in this country and in England and North Africa with the Third Photo Reconnaissance Group.

Elected

Rev. W. A. Alexander, DD, pastor of the First Presbyterian Church of Shreveport, La., has been elected National Moderator of the Presbyterian Church of the U. S. The church is currently holding its general assembly at Charleston, W. Va. Dr. Alexander has served as moderator of Alabama and Louisiana Synods since 1941. (AP Wirephoto).

U.S. Attorneys To Talk About Prosecutions

By JACK ADAMS

WASHINGTON, June 7 (U.S. Atty. Gen. McGranery said today discussions of criminal prosecutions, particularly of tax frauds and rackets, will have top priority when all of the U. S. district attorneys meet here next week.

The new attorney general has called the prosecutors in for a three-day conference, starting on Tuesday. It will be a closed session, except for brief opening exercises at which McGranery will deliver his welcome.

The attorneys will represent every state, as well as Alaska, Hawaii, Guam, Puerto Rico, the Virgin Islands and the Canal Zone.

McGranery announced the session recently, saying he wanted to get acquainted with his chief trial assistants in the field. The Justice Department said today that it will also help "to establish uniformly his policies concerning prosecution of violators of federal statutes."

The conference is also one of a series of steps McGranery is taking toward following up the projected Truman administration clean-up of any misdoings in the federal government. The clean-up campaign was dramatically interrupted two months ago when both Atty. Gen. McGranery and administration investigator Newbold Morris lost their jobs in a dispute over a proposed financial questionnaire for top government officials. The questionnaire was never circulated except to some high Justice Department officials. Following McGranery's lead, they didn't return it.

As another step in the clean-up campaign, McGranery has asked the heads of all of the divisions in his department to submit detailed reports on the dozen cases which have been pending longest in their divisions without action.

Guards Check For Tunnels Around Koje Isle Compound

By ROBERT TUCKMAN

KOJE ISLAND, Korea, Sunday, June 3 (U.S. Army engineers today resumed digging for suspected escape tunnels at a Communist war-prisoner compound where British guards used tear gas Saturday to put down shows of defiance.

The engineers were using a mechanical ditch-digger for the work—the third day of burrowing around unruly Compound 66.

British guards hurled six tear gas grenades into the compound to drive a group of prisoners away from the inner barbed wire fence. The Reds persistently had refused orders to move away from the scene of the digging.

It was the only noteworthy disturbance Saturday among the 17 compounds enclosing some 80,000 Communist-agitated war prisoners. No casualties were reported.

Fifteen minutes earlier, the North Korean officers staged a propaganda show for the benefit of a score of Allied newsmen and

photographers who had gathered outside the compound to watch the digging. The Red prisoners brought out five elaborately painted signs depicting the Communist versions of "massacre" of prisoners on Koje. They placed them on the roof and sides of a building facing the barbed wire.

The commander of the guard—a company of the King's Shropshire Light Infantry—ordered them to take the signs down within 15 minutes. The prisoners complied, but they ignored an order to move away from the barbed wire fence. The British guards gave them 10 minutes to comply. When they didn't, the guards tossed tear gas over the wire into the compound.

Fined \$150, Costs

Tommy Mason pleaded guilty in County Court Friday to a charge of transporting beer in a dry area. Judge Walter Grice assessed a fine of \$150 and costs of court.

THE GRUB LINE

With Franklin Reynolds

The writer has had an opportunity to renew his acquaintance with Charles Daniel, Martin County FMA administrative officer.

Daniel was in the Lamb County FMA office at Amherst when the Grub Line was rounding up cattle and crop news on the South Plains.

Morris Patterson has been telling friends what a good buy he made from an Indian up in the Cote country of Oklahoma.

He needed a wagon and team for use on the Bluestem ranch that he and R. T. Pliner acquired in the Caney River section not so long ago. Patterson went up in Kansas and all around looking for a team but couldn't find one that measured up to the price being asked.

Then back down in Oklahoma he heard of an outfit that was for sale. He says he bought as nice a team as a man ever saw, a good wagon and a splendid set of harness that had been carefully oiled and well cared for—all for \$160.

It will be hard for West Texans to believe, but ranchers in that country must still use wagons if there is any hauling to be done across those Oklahoma pastures. It's still in the habit of raining in that country, and a car or truck on that range frequently means a car or truck bogged down.

R. W. Pittman, a Gaines County resident for 43 years, who raises registered Herefords and crops just east of Seminole, says he has 100 acres of Johnson grass on his three sections and that he doesn't know what he would have done without it, and the grazing it has provided for his cattle.

Mr. Pittman is now drilling two wells, but up until now his irrigated farming has been from a lake on his place which catches most of the runoff from his area in addition to the water from the Seminole sewage disposal plant. He has been operating a pump that gives him a 10-foot lift on the lake water.

W. S. Goodlett of the Soil Conservation Service says there are some farmers in the Martin-Howard Soil Conservation District who have land that has been so badly eroded by the winds, they admit they will have to spend two or three years in soil building before they can again put the land into production.

Louis Conrad of San Angelo, Bill Currie of Garden City, Boots Montgomery of Vega, and the Mans-

field Cattle Company, also of Vega, are closing a deal for 40,000 acres of the old Matador Ranch near Adrian (Oldham County) at \$30 an acre for a total of \$1,200,000.

The partners are now engaged in fencing their respective parts of the land and crews are setting 300 posts a day.

Conrad is owner of a Scurry County ranch part of which will be inundated by the lake from which Big Spring will eventually draw its Colorado River supply. The Mansfield Cattle Company is owned by Mr. and Mrs. Jack Mansfield and their son and daughter. The Mansfields also own a half interest in the old Alamosa Ranch at Vega which adjoins the Matador property on the south.

A committee of Dallas and Fort Worth businessmen have completed plans for the 24th annual Texas Future Farmer Convention which is to be held at the Baker Hotel in Dallas, July 16, 17 and 18.

The convention will be opened Wednesday afternoon at 2 o'clock with a two-mile long parade up Commerce Street in which well over 20,000 Texas Future Farmers will show off to the people of Dallas and visitors, the latest in farm machinery which will be furnished by the farm machinery dealers in that area.

Another highlight of the convention will be a Gold Key Banquet, attended by well over 3,000 Texas Future Farmers, honoring the 600 Future Farmers who have been awarded the Lone Star Farmer Key for outstanding achievements in the state association. Governor Allan Shivers and other notables have been invited to attend the convention.

Hank Gowdy of Arch, New Mexico, is a good story teller as well as a good Aberdeen-Angus breeder.

Dry pastures were mentioned at San Angelo a few days ago and Hank told about an 11,000-acre ranch near Roswell that he and his partner, Bun Lewis of Clovis, have had under lease for the last 18 months.

They were never able to put anything on the 11,000 acres, Gowdy said, except two brown mules and they finally had to take these off to keep them from starving to death. He says they're mighty lucky they were able to sell the balance of this 10-year lease.

Gowdy is graduate of the University of Texas Law School and formerly practiced at Muleshoe. He was too much of a cowboy at

J. G. TURNER

E. L. LOONEY

Turner And Looney Named To Head Texas State Bar

J. Glenn Turner, Dallas, has been elected president of the State Bar of Texas.

Everett L. Looney, Austin, was chosen vice president in balloting among 11,000 lawyers in the state.

Both Turner and Looney are currently serving as members of the state bar's board of directors. Their one-year terms will begin

with the close of the 1952 state bar meeting in Houston July 5. Cecil E. Burner, Corpus Christi, current president, announced results of the election.

Also elected, but for three-year terms, were seven members of the State Bar board of directors, each representing the lawyers of one of the state's congressional districts. These include C. M. Kennedy, Texas (1st Congressional District); John P. Blair, Beaumont (2nd District); Earl Roberts, Longview (3rd District); Floyd Enlow, Angleton (9th District); Albert M. Walker, San Marcos (10th District); Virgil T. Seaberry, Eastland (17th District); and W. F. Nowlin, San Antonio (20th District).

Reporting induction in Abilene were Lino Coleman Soso, J. Volney Fuglaar, Roscoe Leon Basham Jr., Victor Yanez Garcia, William Charles Christian, Donald J. Wood, Andres T. Valdez, William James Lasseter, Jimmy Glaspie, Thomas W. Barnes, John Bidy Edwards Jr., Eugene Clarence Delaney, Bill J. Bennett and H. F. Henderson.

The group made up the June induction quota for the local draft board. Fifteen will be sent to the Army and Marine Corps in July.

heart to stand the stagnation of a law office and so he took off for New Mexico. There he managed to get a foundation herd from the old XIT cattle and has stayed with the Blacks ever since.

He says he has turned down 35 and 36 cent offers for 1,500 calves to be delivered in October. He and Lewis also have a ranch near Guthrie where good rains have fallen. Grass developed so rapidly they have not had to feed there since about April 1.

45 Bids Expected On County Courthouse

Thirty-three firms have advised that they plan to submit bids on one or more phases of the Howard County Courthouse project.

Six separate contracts are due to be awarded, including general construction, electrical, plumbing, air conditioning, elevators and jail equipment. A total of 45 bids may be submitted, based on records of plans and specifications which have been ordered from Puckett and French, architect and engineer. Some of the firms plan to bid on more than one contract.

Effect of the steel strike on the project is still somewhat problematical, but reports from dealers and contractors indicate that enough materials will be available. Bids will be opened June 17.

Firms which have checked out plans and specifications are as follows: General construction—Howard Mankins, 501 East Second St., Odessa; Warner Construction Co.,

Keeping It In The Family

A lot of good men give credit for their success to a good woman.

The help of the wife is unusually influential when she participates actively in the operation of the husband's business. It comes right down to a partnership affair, although maybe the wife's name doesn't appear on the company signs and stationery.

In some cases, maybe it's solely a team affair, in others there are other employees while the feminine half of the partnership handles bookkeeping and office work, or perhaps sales. In any event, there is usually a good understanding around the house about the problems of the business.

Quite a few business establishments in Big Spring function under husband-and-wife management and operation, and illustrations of these teams are pictured on this page.

OFFICE SUPPLIES—Top left, Mr. and Mrs. Eugene Thomas wrap a package and make a ticket. They work together in operation of the Thomas Typewriter and Office Supply.

APPLIANCES—Top center, Mrs. E. B. Hilburn does the book work with some assistance from her husband. They're together in handling the business details of the Hilburn Appliance Co.

TAXICABS—Second left, Mr. and Mrs. W. C. Carr are together at the dispatcher's mike for City Cab Co. Together they operate this firm, and Mrs. Carr also runs the Doris Letter Shop.

BEHIND THE FOUNTAIN—Right, Mr. and Mrs. J. O. Hagood make a sundae. She puts in full time operating their Ritz Drug, while he doubles with a school district tax job.

DRY CLEANERS—Lower left, Mr. and Mrs. Frank Rutherford discuss the technical problem of cleaning a garment. They're "partners" in the Gregg Street Cleaners.

DRESS SALES—Below, Jim Zack has a fine saleswoman in Mrs. Zack, and they show a garment here to Mrs. Loyd Brannon. It's a two-way combine in operating Zack's of Margo's.

New Eastern Star Officers Are Installed

Pictured above are the new officers of Chapter 67, Order of Eastern Star, at installation ceremonies held this past week, when Mrs. Thelma Helton assumed the office of Worthy Matron and Rad Ware became Worthy Patron. Left to right are Pyrie Blushaw, Lie. Harkins, Sarah Griffith, Dorothy Winder, Inez Magee, Ina

Richardson, Ray Howard, Edward Crabtree, Mrs. Helton, Ware, Amanda Hull, Dorothy Parish, Gertrude Cantrell, Maurine Hanks, Willie B. Carpenter, Bernice Davis, Hazel Townsend and Nelene Wright.

Installation Service Held At O E S Meeting

One of the highlights of the Eastern Star year came this past week for Chapter No. 67, as new officers were installed in a formal candle-light ceremony. Approximately 125 members attended.

Mrs. Thelma Helton was installed as Worthy Matron and Rad Ware as Worthy Patron. Other officers included Mrs. Ina Richardson, associate matron; Edd Crabtree, associate patron; Mrs. Bernice Davis, secretary; Mrs. Sarah Griffith, treasurer; Mrs. Dorothy Parish, conductress; Pyrie Blushaw, associate conductress; Mrs. Bea Carpenter, chaplain; Mrs. Dorothy Winder, marshal; Mrs. Maurine Hanks, organist; Mrs. Gertrude Cantrell, Ad.; Mrs. Inez Magee, Ruth; Mrs. Annie Ray Howard, Esther; Mrs. Amanda Hull, Martha; Mrs. Nelene Wright, Elects; Mrs. Leta Harkins, warden; and Mrs. Hazel Townsend, sentinel.

Grand installing officers were Mrs. Agnes V. Young, Past Grand Matron of the Grand Chapter of Texas and Mrs. Gladys Dalmont, Past Worthy Matron and chairman of the welfare committee of the Grand Chapter; Mrs. Louise Leeper, Grand Chaplain; Mrs. Brownie Dunning, Grand Marshal; Mrs. Maude Bennett, Grand Organist; Mrs. Frances Fisher, served as master of ceremonies; Mrs. Lena Koberg, Grand Escort; Mrs. Emily Andrews, Bible bearer; Mrs. Anne Eberley and Mrs. Orrin Boatler, registrars. Mrs. Euta Hall presented the flag.

Candle lighters were Mrs. Nora Williamson and Mrs. Ethel Lees. Mrs. Helton was presented with a white Bible from the Order of

Rainbow for Girls. Dorothy Driver, retiring matron and a former Rainbow Girl, made the presentation.

Serving as officers during the installation were Mrs. Bonnie Allen, acting worthy matron; Mrs. Minnie Michael, associate matron; Mrs. Beulah Carnrike, secretary; Mrs. Ruth Pittman, conductress; Mrs. Beatrice Carroll, associate conductress; Mrs. Nettie Mitchell, warden; Mrs. Naomi Arender, organist; Mrs. Rose Stringfellow, sentinel.

Members of the choir — Ben Winder, director; Leona Benson, Fred Baker, Gladys Fivash, Frances Fisher, Lera McClenny, Edith Murdock and Ruby Read.

After the installation Mrs. Helton was escorted to her station in the East by her husband, T. E. Helton and Mrs. Jeannette Ware escorted her husband to his station.

After addresses by the Worthy Matron and Worthy Patron, Mrs. Sarah Driver presented the past matron's pin from the chapter to Dorothy Driver. Charles Stovall presented a past patron's pin to Ervin Daniels, retiring from that office. The Worthy Matron's jewel was presented to Mrs. Helton by Miss Driver.

The decorative scheme of coral gladioli with white tapers was employed in the room, both around the speaker's stand for the ceremonies, and along tables for the refreshment period that followed. Ilene Barnett poured punch and Mrs. Cara Fleeman served cake. Hostesses included Euta Hall, Ilene Barnett, Vera Crabtree, Marie Daniel, Cara Fleeman, Sophia Merts and Carma Stovall.

Bryon Hills Make Home Here Following Wedding

Mr. and Mrs. Byron D. Hill are making their home here following their recent marriage.

The bride is the former Mrs. Lois Cox, daughter of Mrs. Beulah Buckley of Duncan, Okla. Mrs. Effie Hill of McCamey is mother of the bridegroom.

Lloyd Connell, minister of the Church of Christ, 14th and Main, performed the ceremony May 29 in the home of the bride.

The couple was attended by the bride's children, Juanita and Jack Cox.

Following a short wedding trip to New Mexico, the Hills are making their home at 509 Bell.

The bride is employed by Hemphill-Wells Co. and her husband is employed at Webb Air Force Base. Mrs. E. J. Stockton of Otis Chalk was hostess at the reception immediately after the ceremony.

The refreshment table was laid with a lace cloth and centered with the wedding cake topped by a miniature bride and groom.

Out-of-town guests included Mr. and Mrs. E. J. Stockton and Mary Belle of Otis Chalk and Billy Autry of Silverton.

Always cook giblets in water until tender before adding to a stuffing for roast chicken or turkey.

Supper Party Entertains Blankenship

FORSAN, (Spl) — Raymond Blankenship was honored with an outdoor supper party on the Amador Lease Wednesday evening.

Hostesses were Mrs. Dan Furse, Mrs. J. W. Griffith and Mrs. Kenneth Cowley.

Blankenship is spending a two-week leave from the Navy with his parents before sailing for Guam. He is attached to a submarine tender.

Attending were Mr. and Mrs. Doyle Whetzel, John and Jackie of Tex-Harvey, Mr. and Mrs. P. R. Stroud and Larry of Lees, Mr. and Mrs. H. A. Craven, Helen Lawson and Johnita Griffith of Big Spring, Mr. and Mrs. E. E. Blankenship, Vernie, Billie Ruth and Larry, Dan Furse, Lee and Larry, J. W. Griffith, Gaye and Sondra, Kenneth Cowley and Bobby, Barbara Green, Patsy Shouls of Forsan and J. W. Seal.

Mr. and Mrs. Jack McCall and Dorothy are spending their vacation visiting Cpl. and Mrs. Billy Shaw in Lawton, Okla., and Mr. and Mrs. Herman Mahan, Mr. and Mrs. W. W. Grant and other relatives in Neosho, Mo.

Mr. and Mrs. G. F. Painter have returned from a vacation trip in Arkansas. They also visited relatives in Nocona.

Mrs. J. T. Gray Is Named Honoree At Farewell Coffee

FORSAN, (Spl) — Mrs. J. T. Gray was honored with a coffee Monday morning by Mrs. C. C. Brunton in her home on the Sun Ray Lease.

Mr. and Mrs. Gray and Bill have moved to Haddac.

The honoree was presented a farewell gift.

Guests, who are wives of employees of Sun Ray, were Mrs. C. C. Suttles, Mrs. Bob Vick, Mrs. W. O. Averett, Mrs. B. R. Wilson, Mrs. E. B. Prescott and Mrs. Hoyt Andrews.

Mr. and Mrs. C. C. Long of Blackwell were Forsan visitors during the week.

Mr. and Mrs. G. L. Monroey, Mrs. Howard Bennett and children were San Angelo visitors during the week.

Buster Peek of San Angelo is visiting his grandparents, Mr. and Mrs. B. D. Caldwell.

Beverly Sue Wilson of Hobbs, N. M., is visiting her grandparents, Mr. and Mrs. Steve Huestis and Mr. and Mrs. Ray Wilson.

Mr. and Mrs. Dan Furse left Sunday for a short visit in Dallas with their daughter and son-in-law, Mr. and Mrs. R. A. McIntosh, They

Three 4-H Club Members Will Attend State Meeting

Three members of the county girls' 4-H clubs will attend the annual state meeting in College Station Monday and Tuesday.

Cennie Crow, daughter of Mr. and Mrs. O. R. Crow of the Luther Community and winner of the District Dress Revue held in Lubbock recently, will attend and participate in the state dress contest.

Delegates to the meeting are El-louise Carroll of Center Point and Betty Davis of Coahoma.

Mrs. Doris Blizzard of Lomax will attend as an adult leader and Mrs. Eugenia Toland, county agent, will also attend.

The group will leave Monday morning on a bus chartered for the district.

While in College Station, members will stay in the dormitories at Texas A&M and eat in the college dining hall.

Delegates, contestants and adult

leaders will be feted at special programs and a tour of the campus is also on the agenda.

Highlight of the affair will be an awards banquet Tuesday evening.

The group will leave immediately after breakfast Wednesday morning to return to their homes.

MRS. JOE BRUCE CUNNINGHAM

Smyth-Cunningham Vows Said Saturday

In a semi-formal ceremony Saturday afternoon in Houston, Beverly Smyth became the bride of A-3c Joe Bruce Cunningham.

The bride is the daughter of Mr. and Mrs. Murray G. Smyth of Houston. Mr. and Mrs. Grover B. Cunningham Sr., 1912 Scurry, are parents of the bridegroom.

The Rev. Myers B. Curtis performed the double ring ceremony at St. Paul's Methodist Church.

The bride, who was given in marriage by her father, wore a blue ankle-length dress of pure silk organza over taffeta. It was fashioned with a portrait, off-the-shoulder neckline and a circular skirt. Her blue satin shoes matched her dress. Her veil of imported French flusion was caught to a white rose petal calotte.

She carried a white Bible topped with orchids and her mother's heirloom handkerchief.

Following the reception at the home of the bride, the couple left for a wedding trip to New Mexico. Mrs. Cunningham chose for travel a navy blue imported linen suit with navy and white accessories.

The bride is a June graduate of the University of Texas and is a

past president of Delta Delta Delta sorority.

Her husband is a graduate of Big Spring High School and the University where he received both his Bachelor of Business Administration and Law degrees. He is a member of Delta Tau Delta fraternity, Phi Delta Phi law fraternity and Cowboys and Friars, honorary organizations. He is also a member of the Lion's and Toastmaster's Clubs here.

He is now serving in the U.S. Air Force and is stationed at Webb Air Force Base, where he is assigned to the legal office.

The couple will make their home here. Attending the wedding from Big Spring were the bridegroom's parents and Mr. and Mrs. Grover Cunningham Jr. and children.

Thersa Majors Is Honored At Birthday Party

Thersa Ann Majors, daughter of Mr. and Mrs. Jess Majors, was honored with a party on her second birthday recently.

Games were played and refreshments were served to Mrs. Rex Voyles, Gary and Don Wayne, Mrs. Zack Gray and Linda, Mrs. R. T. Winn, Robert Ferrell and Timothy, Bonnie Parrish, Jimmie O'Shields, Mrs. Nora Mathis, Mrs. G. B. Adams, Eddie and Robert, Mr. and Mrs. L. E. Patterson, Carol, Linda, Marcia and Tommie, Mrs. J. D. Cates and Sandra and Mrs. Myrtle Patterson.

Mr. and Mrs. L. S. Bonner and Charles have returned home after a two-week vacation spent visiting their daughter and son-in-law, Lieut. and Mrs. Bernard Savage in Biloxi, Miss. Margaret Dunham accompanied the Bonners.

ZALE'S STERLING SILVER CLUB

YOU PAY ONLY
33c
A WEEK
PER PLACE SETTING

- TOWLE
- INTERNATIONAL
- WHITING
- GORHAM
- HEIRLOOM
- WATSON

Zale's New Sterling Silver Club Plan now makes it possible for everybody to own beautiful and imperishable sterling silver—your choice of forty patterns by famous makers—Towle, Gorham, International, Heirloom, Whiting, Watson—at the regular nationally advertised prices, on terms as low as 33c a week.

How The Club Plan Operates

- Choose your pattern—anyone of 40.
- Take home a four-piece place setting, average cost about \$22.50 and pay as little as 33c a week.
- Buy just one or as many place settings as you wish, paying as little as 33c a week for each place setting. The prices listed here are for 4-piece place settings and include federal tax. Do not be confused by lower prices quoted in a competitor's ad where the tax is not included.
- When you have finished your payments on one place setting, you may add another on the same low terms.
- You may continue the club plan for any number of place settings desired—from one to a dozen, or you may stop at any time when current contract is completed.
- You may pay off balance at any time, thereby discontinuing the weekly payments.
- The cost of your sterling silver is the regular price with absolutely nothing added, no interest, no carrying charge.

Horace Mitchells Live Here After Marriage Ceremony

Mr. and Mrs. Horace Mitchell are making their home in Big Spring following their recent marriage.

The bride is the former Billie Jean Walker, daughter of Mr. and Mrs. Alvin Walker, Rt. 1. Mr. and Mrs. James E. Mitchell of Winters are parents of the bridegroom.

Lloyd Connell, minister of the Church of Christ, 14th and Main, performed the double ring, informal ceremony at the home of the bride's parents, May 30.

The bride, given in marriage by her father, wore a white nylon organza over pink taffeta ballerina length dress. It was designed with a Peter Pan collar, small buttons down to the waist and a full gathered skirt bordered in embroidery. She carried a white Bible topped

with white carnations. Peggy Painter was maid of honor. She wore an aqua nylon dress with white accessories and a corsage of pink carnations.

Richard Kirkpatrick of Odessa served as best man.

When the couple left on a short wedding trip to New Mexico, the bride wore a maize tailored suit with lavender accessories.

The bride is a graduate of Coahoma High School and is employed by the First National Bank.

Her husband graduated from Bradshaw High School, attended Tarleton State College and is a graduate of Texas Tech.

At the reception held immediately following the ceremony, the refreshment table was centered with an arrangement of pink and white carnations.

The three-tiered bride's cake was topped by a miniature bride and groom.

Mrs. L. J. Davidson served. Out-of-town guests for the wedding included Mr. and Mrs. James Mitchell and Mrs. Jess Davis and Beth of Winters, Mr. and Mrs. Richard Kirkpatrick of Odessa and Rex Merideth of Stamford.

Bride Feted At Shower

Mrs. S. L. Newsom honored Mrs. Albert V. (Curley) Brown, the former Dorothy Mase, with a bridal shower in her home Thursday night.

Mrs. Brown is the daughter of Mr. and Mrs. W. F. Sides, 509 Gregg.

The couple was married June 1 at 11 a.m. at the Primitive Baptist Church with the pastor, Elder B. R. Howze, officiating.

The bridegroom is a radio dispatcher with the city police force. Mrs. Brown is employed at Mead's Cakes Shop.

They are making their home at 407 Benton.

Rogers Announce Birth Of Son

Mr. and Mrs. Sig Rogers have announced the birth of a son, Steven Gordon, Friday at 3:50 p.m. at Cowper Clinic & Hospital.

The baby weighed eight pounds, two ounces and is the grandson of Mr. and Mrs. B. Rogers of Whittier, Calif. Mrs. Gertie Manning of Cushing, Okla. is the maternal grandmother.

Joe Carsons Are On Wedding Trip Following Ceremony

COLORADO CITY, (Sp1)—Mr. and Mrs. Joe Carson are on a wedding trip following their recent marriage.

The bride is the former Texi Lea Windham, daughter of Mr. and Mrs. J. C. Windham. The bridegroom is the son of Mrs. A. B. Carson and the late Col. Carson of Fort Worth.

The Rev. R. Y. Bradford, pastor performed the double ring ceremony May 31 at the First Baptist

Church here, as the couple stood before an arch covered with plumosa fern and majestic daisies. Baskets of gladioli flanked the scene.

Nuptial music included "The Lord's Prayer" by Malotte, "Chairs de Lune" by Debussy, "Calm as the Night" by Bohme and the traditional wedding marches.

The bride was given in marriage by her father.

Bulah Pond was maid of honor. Norma Jane Allen and Mrs. Eric Morrison of Fort Worth were bridesmaids.

Groomsmen were Bud and Jim Windham, brothers of the bride. Ushers included Mike Hart and Bobby Lee Smith.

Following the ceremony a reception was held at the home of the bride's parents.

The house party included Mrs. C. L. Henson of San Angelo, Mrs. Gene Huey, Mrs. J. P. Windham and Mrs. Laura Pittman of Sweetwater, Nan Gossett of Mineral Wells and Mrs. John Adams, Mrs. M. L. Johnson and Mrs. J. P. Pond.

Mrs. Windham is a May graduate of Colorado City High School. Her husband is a graduate of Texas Christian University, Fort Worth and is a civil service instructor at Sheppard Field in Wichita Falls.

The couple will live in Wichita Falls.

Bible School Pupils Give Program

FORSAN, (Sp1)—A commencement program was presented by the students at the Vacation Bible School of the Methodist Church at the church Friday night.

Mrs. O. D. Smith of Big Spring led in prayer.

A religious film, "The Story of Moses," in color, was shown by Mrs. Elizabeth Johansen of Big Spring. The characters in the picture were members of the 1948 Bible Class of Big Spring High School and the picture was filmed near the site of the "spring."

An exhibit of the work done in the school was on display in various departments.

Mrs. Price Stroud is in Ardmore, Okla., with her grandmother, who is ill.

Larry Furse is spending the summer in Ruidoso, N. M., with his aunt, Mrs. Eva Ball.

Mr. and Mrs. Leroy Prescott, Glenda, Nona Lee and Donald are spending a two-weeks vacation with her parents in Oak Grove, La.

Mr. and Mrs. Grover Camp, Charles and Ida Lou spent last week end in Tahoka as guests of Mr. and Mrs. Robert Weatherby and family.

Bill Ward and Mrs. Floyd Smart won high score when the Double Six "42" Club met Thursday in the home of Mr. and Mrs. Charles Neefe, 1404 Sycamore.

Low score winners were Raymond Frazier and Mrs. Milton Brown.

Attending were 12 members and four guests, Mr. and Mrs. Frazier and Mr. and Mrs. Ward.

The next meeting will be June 16 in the home of Mr. and Mrs. John E. Brown, 702 Tulsa Rd.

Lions' Plan Picnic For Thursday Night

It has been announced that the Lion's Club and the Lion's Auxiliary will have a family picnic supper Thursday at 7 p.m. at the City Park.

Each family will bring their own supper but soft drinks and dessert will be furnished by the clubs.

Marian, Charlotte and Ronald Winn have returned to their home in Sayre, Okla., after visiting with their grandparents, Mr. and Mrs. H. T. Moore and their uncles and aunts, Mr. and Mrs. C. B. Sullivan and Mr. and Mrs. Herman Taylor.

MAJOR AND MRS. H. K. McCOMBS AND CHILDREN

Major McCombs Finds Life Is Wonderful 'Back Home'

A husky, blond, blue-eyed youngster with an infectious smile is apt to be the apple of any father's eye.

But Major H. K. McCombs and his 17-month-old son, Harold Jr., have a special reason for being close. Until a month ago, they had never seen each other.

But the Major is equally affectionate with his daughter, 6-year-old Amy.

In fact, he thinks it's wonderful to be back home with his wife and children again after a tour of duty in Japan. That's when young Harold was born.

The McCombs have bought a home at 1606 Tucson after moving here from Pittsburg, Pa. He reported for duty at Webb Air Force Base as the comptroller, Friday.

The children take up most of the couple's time. But both like to play golf. In fact, Major McCombs has won several tournaments and one of the most prized possessions of his wife is a set of sterling silver goblets, he won as a golf prize.

He, too, likes to paint. A self-

portrait and a still-life attest to his progress along that line. "I like to work," laughed his wife. "Work with my family," she added.

However, while the McCombs were living in Pittsburg, Mrs. McCombs was active in the Eastern Star, the Officers Wives Club and Women's Club.

David Taylor Is Honored At Party

David Lawrence Taylor was honored on his fourth birthday with a party given by his mother, Mrs. Herman Taylor, in their home.

Home movies were shown and games were taken of the group. Games were played.

Refreshments were served to Butch, Penny and Mack Frazier, Butchie, Barbara and Russell Neefe, Diane and Randy Banks, Tommy and C. A. Hinds, Martha Couch, Gene and Willie Stormes, Mark Coldiron, Quannah and Glenn Hyden.

Terry Forest, Judy Sluteville, Barbara Forest, Mrs. Wilbur Forest, Charlotte, Marian and Ronald Winn of Sayre, Okla., Coral B. Sullivan, Mrs. Charles Neefe, Mrs. Bill Banks, Mrs. Clarence Coldiron, Mrs. H. T. Moore and Mrs. C. B. Sullivan.

District Meeting Set For Thursday

It has been announced that a meeting of the new Big Spring District WSCS will be held Thursday at 10 a.m. at the First Methodist Church in Snyder.

At that time, officers will be elected and four year goals will be explained.

Crib Toys

Soft, cuddly, washable crib toys are crocheted of bright wool yarn, features are embroidered. The sleepy giraffe (he has his eyes closed) measures 13 inches in height and is made of yellow yarn; spots, tail and feet are of black yarn. The "lazy pup"—he is always in a sitting-down position—is crocheted of green yarn and is trimmed with red. This pup wears glasses made of two one-inch white plastic rings. Very dignified and scholarly looking, this pup!

Shirley Wheat Will Attend Meeting Of Girls' State

Shirley Wheat, daughter of Mrs. Stella Wheat, will leave June 15 to attend Girls' State in Austin.

The affair is sponsored by the state department of the American Legion Auxiliary.

Delegates are selected on the basis of scholastic ability, leadership and character traits. During the session, the girls will be taught the functions of government through actual experience by taking over the duties of various government officials.

The meeting will last through June 22 and about 300 will attend.

Three Initiated At Theta Rho Meet

Three members were initiated when the Cuyamaca Star Theta Rho Girls' Club met Thursday night. New members are Doreen Clark, Marilyn Constant and Sue Ann Zolinger.

During the meeting Claudine Butler was named vice president to fill an unexpired term.

Where to shop for what--- HELEN'S HINTS

BE A SPORT . . . and give that sportsman of yours a real Father's Day gift he can be proud of. If he's been fishing for a new rod and reel, tackle box or creel, or any other fishing equipment, you'll find the very finest at the BIG SPRING HARDWARE. They have all types of improved casting rods . . . casting reels that are rust and corrosion resistant with level-wind and anti-backlash features . . . extra large and roomy tackle boxes . . . and a host of fine lines that will keep those fish constantly on the line. When next Sunday rolls around, why not present Dad with a genuine heman gift and then watch out for those tall fish tales he'll be coming home with.

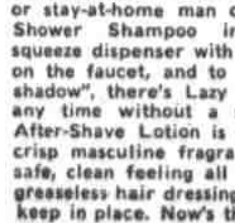

PIPE DREAMS . . . For your man on Father's Day, FAYE'S FLOWERS has received some unique pottery planters that will soon be the talk of the town. Particularly intriguing is a gay little pipe that is the perfect setting for ivy, to go in a man's den or study . . . if he's a fisherman, you'll find a clever pottery creel . . . and if he's a dog lover, surprise him with a saucy spaniel pup sporting a gay plant to brighten Dad's favorite corner. Come next Sunday morning, why not present Dad with one of these smart planters as well as a bright boutonniere for his button hole to let him know, you know he's the grandest guy in the world.

WHAT'S NEW UNDER THE SUN? . . . For sea and shore operations, the order of the day is Catalina swim suits that are as eye-arresting as an exclamation point! You'll find scores of them at ZACK'S Of Margo's in all colors and materials . . . nylons, smooth or nubby latex, denims . . . new designs, gay sun-filled colors, beautiful patterns. It's the suit that combines wonderful ease and comfort with complete freedom of movement. Wherever the sun sets the fashion, whether you're vacationing North, South, East or West, smart swim wear is essential for fun in the sun . . . so "Look For The Flying Fish" for top fashions in swimming apparel.

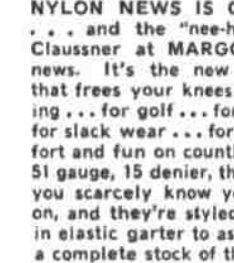

FOR A GRAND GUY . . . Max Factor's "Signature" is the perfect Father's Day gift. At HARDESTY DRUG there's a complete line . . . everything the traveling or stay-at-home man could want. There's Shower Shampoo in an unbreakable squeeze dispenser with handy cord to hang on the faucet, and to hide that "5 o'clock shadow", there's Lazy Shave that freshens any time without a second shave. The After-Shave Lotion is cooling, exhilarating and refreshing with a crisp masculine fragrance, and the Deodorant Cologne assures a safe, clean feeling all day. Also you'll find a new and different greaseless hair dressing that will make his hair easy to manage and keep in place. Now's the time for him to sample "Signature".

IT'S A GOOD MORNING . . . when you start the day off with a hearty, taste-tantalizing breakfast. If you dash off to work with just a taste of toast and a swallow of coffee to stay you until noon, you should try the delicious breakfasts at the DOUGLASS COFFEE SHOP. You'll find everything from the traditional ham and eggs to cereal and cinnamon toast. Those of you with a sweet tooth will relish the mouth-watering waffles and hot cakes with good old-fashioned maple syrup; and there's always tangy fresh fruits and fruit juices as well as plenty of flavorful, steaming hot coffee. It's a bright morning when you begin the day with a bountiful breakfast.

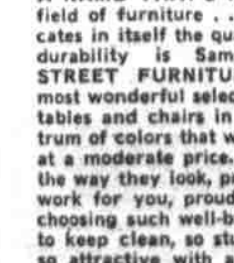

KING FOR A DAY . . . and every day for years to come if you present him with a Father's Day gift that excels in usefulness and smartness. At HESTER'S you'll find a variety of suitable gifts . . . if he likes a smooth-shaven look, he'll welcome the simplicity of operation that will give him a faster, closer, smoother shave every time with a Sunbeam electric Shavermaster. If it's a lighter he needs . . . a Ronson indeed, you'll find a complete line of every type to choose from. And that man behind the desk will write you a love letter if you give him any one of the wide selection of beautiful bronze pieces for office or study. Next Sunday make him the proudest pop in town with one of these fine gifts.

NYLON NEWS IS GOOD NEWS . . . and the "nee-hi" nylons by Claussner at MARGO'S are NEW news. It's the new fun stocking that frees your knees . . . for dancing . . . for golf . . . for shopping . . . for slack wear . . . for summer comfort and fun on countless occasions. 51 gauge, 15 denier, they're so sheer you scarcely know you have them on, and they're styled with a built-in elastic garter to assure perfect fit. Cool and comfortable, there's a complete stock of these nifty nylons in all sizes and smart summer shades, and they're economical too . . . priced at only \$1.35. Once you've seen them, you'll agree that they're the smartest hose afoot for the summer season.

FASHIONS FOR FATHER . . . to make his day complete and win the heartiest approval of that favorite man in your life. Clothes don't always make the man, but they'll go a long way toward making him a mighty happy guy come Father's Day if you choose from the wonderful selection at ELMO WASSON'S. There you'll find flexibly planned clothing with a country casualness as well as a talent for town. Whether your man is of animated ancestry or descends from a long line of loungers, Elmo will tie up a treat for him that will really do him proud. Don't forget about the gift certificates too, if he's finicky about choosing his own fashions.

A NAME THAT'S KNOWN . . . In the field of furniture . . . a name that indicates in itself the quality of strength and durability is Samson. At GREGG STREET FURNITURE you'll find the most wonderful selection of Samson card tables and chairs in a scintillating spectrum of colors that will please your pride at a moderate price. You'll be proud of the way they look, proud of the way they work for you, proud of your wisdom in choosing such well-built pieces. So easy to keep clean, so sturdy in construction, so attractive with all furnishings, these are the tables and chairs to choose for a more comfortable and attractive home.

DAD DESERVES THE BEST . . . after working hard all day, give him a chance to relax to good music from THE RECORD SHOP. You'll give lasting pleasure, give hours of delight all through the year, if you give him record albums . . . the open door to worlds of enjoyment. There's music for every taste . . . classics that have stood the test of time—the bright new musical shows of today. No matter what your selection, you'll find a wide and wondrous choice of albums in every size, in every speed. Also you can add music to his summer fun with a portable radio or record player because indoors or out, summer living takes on added zest when you make music the portable way.

MR. AND MRS. HAROLD JAMES CAIN

Harold Cains Take Trip To San Antonio

Mr. and Mrs. Harold James Cain are on a wedding trip to San Antonio following their marriage here.

The bride is the former Mary Elizabeth Sewell, daughter of Mrs. Juanita Sewell, 1400 Nolan. Mr. and Mrs. Leon Cain, 309 W. 3rd, are parents of the bridegroom.

The Rev. Maple Avery, pastor of

the E. 4th Baptist Church, performed the double ring, informal ceremony at his home, June 1. The couple stood before a fireplace decorated with arrangements of pink and white gladioli.

The bride chose for her wedding a gray organza dress trimmed in white embroidered flowers. It was fashioned with a Peter Pan collar and a full skirt. She wore a white lace hat, white linen pumps and carried an arrangement of red roses on a white ribbon.

Nelda Kay Williams, cousin of the bride, was maid of honor. She wore a gold and brown plaid cotton taffeta dress and a yellow gladioli corsage.

Charles Edward Cain of Fort Worth served his cousin as best man.

When the couple left on their wedding trip, the bride wore a navy broadcloth dress with white accessories. Her corsage was of red roses.

Mrs. Cain is a graduate of Big Spring High School and attended Howard County Junior College two years. Before her marriage she was employed as a bookkeeper at McCrory's.

Her husband is a Big Spring High School graduate, attended HJJC and New Mexico A&M. He is employed by Norwood Drilling Co.

The couple will make their home here at 711 E. 12th.

Cosden Chatter

S. Smith Gets Degree From H-SU

Mr. and Mrs. Sidney Smith were in Abilene Monday to attend graduation exercises of Hardin-Simmons University. He received his B.B.A. degree from that school.

C. W. Smith and R. M. Johnson spent this week in San Antonio on company business.

Frank H. Bridal, Wall Street Journal, Dallas, was a visitor in the offices on Wednesday morning.

Mr. Gillen, Sinclair Refining Company, Fort Worth, and Mr. Eckman, Sinclair Refining Company, Kansas City, visited in the sales department Wednesday.

Allen Cunningham, F. M. Reeves & Sons, Pecos, visited in the asphalt division Monday morning.

George Grimes and family left early Friday morning for Ponca City. Mrs. Grimes' brother is in very serious condition following a heart attack.

New employees at Cosden are the following: Targe M. Lindsay, John R. Gilbert, Jimmie Wilkerson, James F. Holley, Mervill Lee Click, Hugh L. Tuck, Robert L. Owens, Bert D. Matthews, E. S. Clinton, James Robert Smith, Melvin E. Howell, James D. White, Thomas G. Henry, Joe Earnest, Fred Harrington, Barbara Smith, Billie Anita Simpson, Marilyn Miller, Dorothy Thomas and Jane Echols.

Leo Ekstrom of the Tex-Harvey Gasoline Company, visited the refinery Monday.

Jack Cameron and J. G. McElhiney with the DuPont Company visited the refinery Wednesday and Thursday to discuss gasoline blending.

Alma Gollnick spent Thursday in Snyder and Clairmont on company business.

R. B. Pratt of San Antonio was a visitor in the office.

Dorothy Thomas is spending the week end in Ackerly visiting her parents, Mr. and Mrs. Fred Thomas.

J. W. Wood left Thursday after receiving word that his brother-in-law, A. H. Donnell, has passed away. Mr. Donnell was a resident of Iowa Park, where funeral services were held Friday.

Mrs. R. I. Archer and Carol of Seminole visited their daughter, Mary, Monday.

Pvt. Jess H. Slaughter writes from Camp Chaffee, Ark., that he has passed the test for Officer Candidate School.

Those on vacations this week are A. L. Carlie, Wayne Johnston, Dan Bostick, A. M. Wiggins, A. A. Porter, E. F. Russell, C. A. Tonn, W. O. McClendon, R. D. Kiser, Ira Raley, Y. A. Harris, E. J. Thomas, A. T. Schafer, J. O. Bailey, E. F. Hollis and J. D. Cauble.

Big Spring (Texas) Herald, Sunday, June 8, 1952 5

MR. AND MRS. ARNOLD TONN

Arnold Tonns Are Making Home Here

Mr. and Mrs. Arnold Tonn are making their home at 1900 Mittel Ave. following their marriage May 29.

The bride is the former Mona Lue Walker, daughter of Mrs. Lee Blalack of Rt. 1. Mr. and Mrs. Allen Tonn, 410 NW 10th are parents of the bridegroom.

The Rev. Roy O'Brien, pastor of the Salem Baptist Church, performed the double ring, informal ceremony at the East Fourth Baptist Church. The couple repeated their vows as they stood before an altar centered with palms with candelabra at either side and flanked by baskets of flowers.

Moren Tinkham, pianist, played the traditional wedding marches and accompanied Shirlene and Gorman Rainey who sang "I Love You Truly," "Oh Promise Me" and "Saviour Like a Shepherd Lead Us."

The bride, given in marriage by her uncle, Johnnie Walker, wore a white linen street length dress with orchid accessories. She wore a white hat covered in daisies with rhinestone trim.

She carried a bouquet of orchid and white carnations. Charlene Wilson was maid of honor. She was attired in a white lace dress with an orchid corsage.

Rosemary Rice and Sue Dennis lighted the candles.

C. A. Tonn Jr. served as best man.

Ushers were Harold Cain, Jerry

Sanders and Jack Lee.

The couple went to Ruidoso, N. M., on their wedding trip.

Mrs. Tonn is a May graduate of Big Spring High School where she was a member of the volley ball team and a representative to the student council.

Her husband is also a Big Spring High School graduate. He is a painter and decorator.

Red Trey Club Fetes Husbands At Barbecue

Members of the Red Trey Canasta Club entertained their husbands at a barbecue Saturday evening at the City Park.

Plans for the affair were made when the club met Thursday afternoon in the home of Mrs. Janie Holcombe.

Mrs. Jinks Dozier won high score during the meeting and Mrs. Katherine deGraffenreid, second high.

Attending the meeting were six members and two guests, Mrs. Christine Hamby and Mrs. Sam Baker.

Revival Services Are In Progress

Revival services will continue through next week at the Apostolic

Faith Church, NW 10th and Lan-

caster.

The Rev. Roy Wooster of Rockdale, pastor of the Apostolic Faith Church there and a faculty member of the Apostolic Faith Bible

School in Baxter Springs, Kan., is

conducting the services.

Billy Don McIlvain of Kings Mill is directing the choir. The Rev. A. W. Ferguson is pastor of the local church.

A Bible Thought For Today—

Some once thought creation was an accident. Learned men do not so think today. The microscope and the telescope both proclaim infinite wisdom in the universe. "In the beginning was the word (Wisdom) and the word was with God and the word was God." — John 1:1.

Problem Of A Sick Soil Challenge To Initiative Of Our Land Owners

At a meeting of Soil Conservation Service and Production Marketing Administration representatives at the end of last week, the scope and severity of the current drought in this area was re-appraised. Consensus was that the situation is certainly as bad as and probably worse than that of 1917-18 when many a cattleman was driven to the wall. Most agreed that the present situation qualified as the most acute drought in the agricultural history of this area.

Those assembled were indulging in a piece of far-sighted work, namely the exploration of means for getting some sort of cover on the land in the event any kind of a planting moisture does come in late summer or early autumn. They foresaw a duplication of the dust bowl condition of the Texas and Oklahoma Panhandle in the early 30's unless some protection is provided for the soil.

One of the expedients suggested was the planting of a quick growth legume with a prolific and marketable seed yield should summer rains come. Another was the extensive planting of Abuzzi rye up to December to take advantage of late rains.

To this could be added the wholesale planting of grain sorghums for rains even well into July. Faced with a similar problem several years ago, Dawson County planted heavily to black-eyed peas

and got a good money crop as well as one for green manure and litter.

One of the chief hopes expressed at the meeting was that some sort of emergency legislation could be passed by Congress to provide seed aid to land owners to encourage such plantings.

Soil is a basic resource and one that affects not only the welfare of an immediate area but the country as a whole. In this light, there is some justification for seeking help or encouragement from the outside.

However, the real and best hope is that land owners will recognize their prime responsibility as trustees of the soil. The most effective way to get something done promptly and right is to do it yourself. No one stands to lose more through the erosion of soil than the person who depends upon it for a livelihood. Conversely, no one stands to gain as much through operations designed to hold and to heal as the landowner.

This is a most important problem and one which we hope will command the best thought and action of all the ranchers and farmers in this area. Our soil is sick, sorely sick. Therefore, we face the urgent need not only of wise treatment but also of understanding and patient convalescence. The individualism, ingenuity and initiative of our farmers and ranchers has seldom if ever faced so great a challenge.

Gallup Poll

Kefauver Gains Steadily In Popularity Among Dem Voters

By GEORGE GALLUP
Director, American Institute of Public Opinion

PRINCETON, N. J., —Sen. Estes Kefauver of Tennessee has gained steadily in popularity among Democratic voters as well as Independents.

He is the presidential choice of 45 per cent of Democrats questioned in the latest Institute survey. This represents a gain of four percentage points since a previous poll reported May 9.

The next most popular candidates are Alben W. Barkley with 17 per cent and Gov. Adlai Stevenson and Sen. Richard Russell of Georgia, who are tied for third with 10 per cent. Barkley and Russell have both gained ground in the last month, while Stevenson has registered a slight drop.

With the Democratic convention scheduled to start in six weeks, interviewers for the Institute personally questioned a cross-section of Democrats across the nation on the following:

"Here is a list of men who have been mentioned as possible presidential candidates this year for the Democratic party. Which ONE would you like to see nominated as the Democratic candidate for President?"

Here is the vote:

DEMOCRATIC VOTERS ONLY	Percentage
Estes Kefauver	45%
Alben W. Barkley	17
Adlai Stevenson	10
Richard Russell	10
W. Averell Harriman	5
Robert Kerr	3
Brien McMahon	1
No Opinion	9

100%

Because of the emergence of new candidates in recent weeks such as Harriman and McMahon, a slightly different list was used in today's survey than in the survey reported May 9.

Kefauver led the May polling with 41 per cent, Stevenson and Barkley came next with 11 and 9 per cent apiece, followed by Russell with 8 per cent.

The Tennessee Senator with the coonskin cap stepped out in front in the polling right after he defeated President Truman in the New Hampshire Democratic primary in March. He jumped from 21 per cent in February to 33 per cent in April, and has continued to climb ever since.

Whether Kefauver's rising popularity with the rank and file of the party will win him the nomination is another matter. The decision, as everyone knows, is made by delegates, not by any vote of the rank and file.

In the past four Democratic conventions the choice went to the most popular man at the time of the convention, but that does not necessarily mean that it will happen again. Many Democratic party leaders who control city political ma-

chines in the north are said to be opposed to Kefauver's candidacy.

Independents Like Kefauver

Of all Democratic candidates, Kefauver has the greatest appeal to the one voter in every four who classifies himself as Independent politically. The Tennessee Senator has long been the favorite Democrat of the Independent group.

In February he led with 36 per cent among Independents, in April with 40 per cent, in May with 40 per cent.

The latest survey shows:

INDEPENDENT VOTERS ONLY	Percentage
Kefauver	42%
Stevenson	15
Barkley	12
Russell	8
Harriman	4
Kerr	3
McMahon	1
No opinion	15

100%

G.O.P. Standings

In the race for Republican nomination, General Eisenhower was running ahead of Senator Taft in popularity in the most recent Institute survey, although Senator Taft was gaining.

The standings among Republican voters were Eisenhower 43 per cent, Taft 36 per cent, MacArthur 9 per cent, Warren 6 per cent, Stassen 4 per cent, Dewey 2 per cent, and no opinion 6 per cent.

Black Hills Has Critical Mineral

RAPID CITY, S. C. — Nearly 12,000 tons of low grade beryl—a rare and critical mineral—are tucked away in the Black Hills of South Dakota, officials of the Bureau of Mines have estimated.

Beryl is found in pegmatite, popularly known as giant granite. The mineral has many military and industrial uses. It has been mined in the Black Hills as far back as 1914, but production was small. Total production through 1949 was 2,358 tons.

Wolves Are Shot From An Airplane

FAIRBANKS, Alaska (AP)—Two U.S. Fish and Wildlife Service agents returned here with a report of having killed 110 wolves in three weeks of hunting in a light, two-man plane. Four other agents reported a kill of 61.

Three airplanes have been used in the biggest scale campaign ever waged in the Far North against wolves which cause damage among the caribou herds.

India Imports Iron And Steel

NEW DELHI, India (AP)—The United Kingdom and Belgium supplied the major quantity of iron and steel that India bought abroad during April to August 1951.

Official figures published here showed India imported 86,000 tons, of which 30,000 tons came from the United Kingdom and 25,000 tons from Belgium.

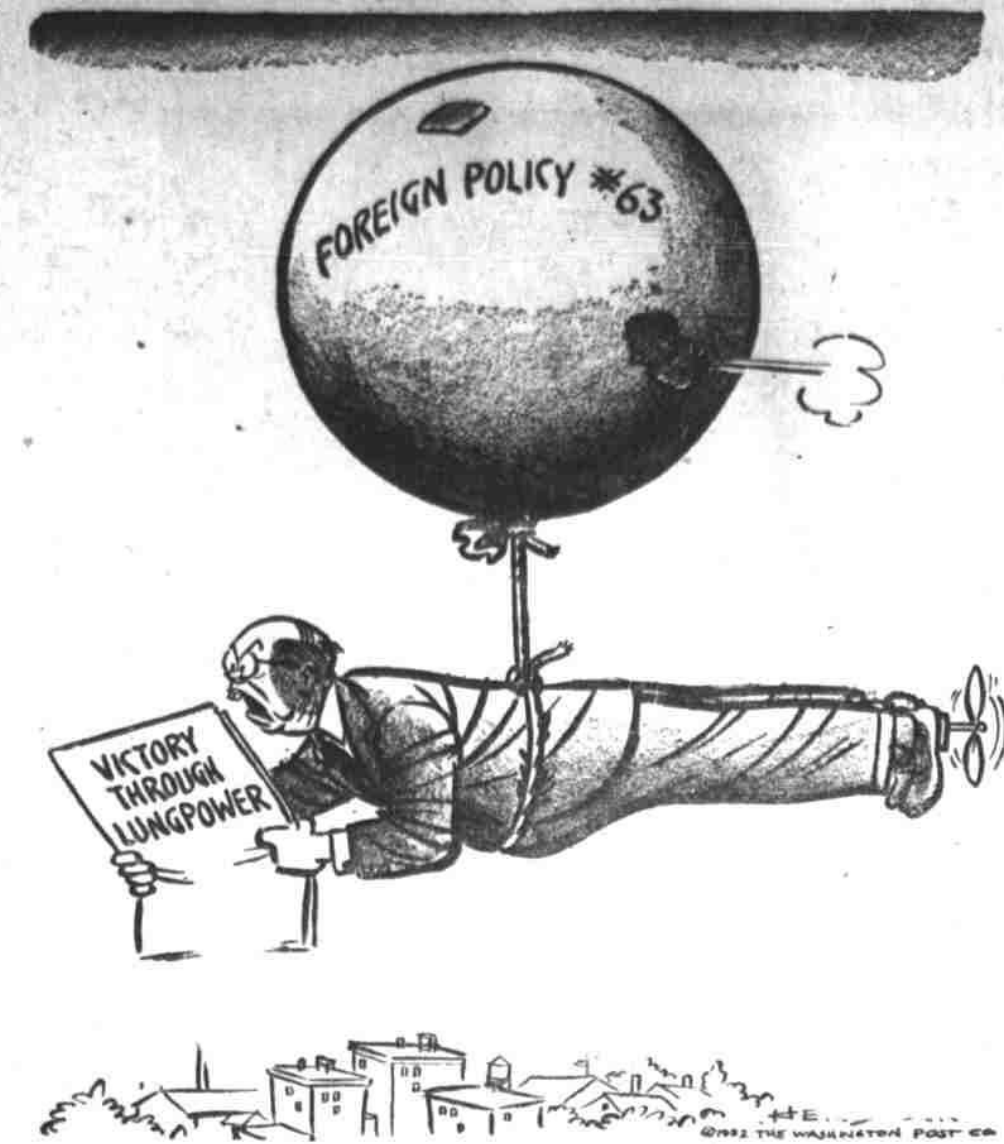

India also obtained 9,000 tons from the United States, 7,000 tons from France and 6,000 tons from West Germany.

VD Rate Reduced

HEIDELBERG, Germany (AP)—Venereal disease, once the U.S. Army's biggest headache in Germany, has been reduced to an almost "inconsequential" problem, Army authorities say.

The rate of infection has dropped steadily until today it is only 20 per cent of the 1946 rate.

The steady improvement has been maintained despite the influx of young inexperienced soldiers since the re-introduction of the draft.

Spotlighting A Week Of News

'Call Me Mister' Eisenhower Is Home, Takes Over A New Role As Politician

By FRED GREENE

General Dwight ('Call Me Mister') Eisenhower is home again and has already stuck his head into the noose of politics.

He said a few things this week that make sense to a lot of people, but by and large it appears the GOP candidate for President is not going to get embroiled in any mud-slinging campaign. He did, however, attempt to set the record straight, particularly as regards to remarks by a certain Ohio Republican senator, also seeking the nomination.

In response to Sen. Robert Taft's assertion that there has been a

interview, did not touch upon all critical issues, he did make known his position on quite a few vital points:

1. He would consult Gen. MacArthur on Asiatic policies if elected President.
2. There is no political connection between him and the Truman Administration which would prevent his lashing out at its policies.
3. He believes the creation of Fair Employment Practices Commissions (FEPC) is primarily a state problem.
4. States can best handle edu-

cational problems, not the government.

5. He is against centralization in government, claiming it would lead to socialism.

6. Dislikes idea of "socialization of medicine," though every American is entitled to decent medical care.

7. Deplores the tragic loss of China to the Communists.

By and large, however, Ike made it clear he thinks 20 years is too long for one party to be in power and that the longevity is partially to blame for corruption and poor government.

We cannot properly expect Eisenhower's views right away on all issues. He has been, up until now, a soldier and because of his conviction that he must do one job at a time and have his mind fully on that job, he has largely been concerned with military matters.

Now that he is a politician, he will gradually find his stand on major issues. However, he does not, like Sen. Taft, seem to pos-

sess all the answers in vague generalities. He wants facts and if he wins out, will secure these facts then make decisions. Taft, on the other hand, says he's for this or against that, but fails in many cases to say why and what he would do to make things right. Ike is precise and that may be why he is neglecting to criticize just for the sake of an argument in political fashion. It looks, for a change, that such a clear view of matters is what this country needs and appears to want.

Russian-instigated troubles in West Berlin kept a nervous western world on edge this week, but by week's end it all appeared to work against the Reds themselves.

According to a Berlin dispatch, this scare campaign backfired and frightened thousands of Soviet zone Germans into fleeing for the western area.

Refugee stations on the Allied side had increased business by week's end, some from areas where the Communists are creating so-called "safety-belts" to isolate their zone from the west.

A considerable number of refugees, however, were youths fearful of being drafted into an East Reich army.

A now-it's-on-and-now-it's-off game was being played by Russians at barriers along the Berlin-West Germany superhighway. The halting of Allied patrols apparently made somebody mad and British Tommy-guns retaliated by barricading Radio Berlin, Soviet station in the Western zone of that city. The British will allow anyone to come out, but not go in. Some Reds are still holding out in the building.

Harry Truman got a jolt this week when the Supreme Court voided his seizure of the steel mills claiming, in a 6-3 decision, that he acted unconstitutionally.

However, Congress immediately drew its share of criticism and also sat down on the hot seat in this issue. It has been apparent to many for some time that Congress has not acted to assure vital defense materials in the event strikes cannot be settled. While many have argued that the President should have invoked the Taft-Hartley Act, ordering thus an 80-day cooling off period in steel, the fact of the matter is that with all the delays occasioned by Presidential appeals, far more than 80 days has passed and yet the strike is still on. There would have been, as a result, no assurance that, after 80 days, we would have seen the strike's end.

Consequently, since the President has no power to act, it is up to Congress to give the President necessary powers to prevent strikes in vital industries. Ostensibly, this means compulsory arbitration, something neither union nor management want, and certainly something Congress hesitates to order in an election year.

NEWS IN THE SPOTLIGHT:

Korean truce talks are getting more and more into a rut as Red delegates persist in their determination to get back all prisoners. The U.N. Command will not return prisoners to the Communists who seek to remain in Allied hands. So, the boys at Panmunjom are getting nowhere, though considerable exercise of vocal chords is apparent.

Koje Island is still the scene of trouble, although things have quieted down a bit. Prisoners there remain unruly and stories of "kangaroo courts" are filtering out of the compounds. Meanwhile, U. N. troops are breaking up the large compounds into smaller ones.

Around The Rim—The Herald Staff

About Dogs, Alliteration, Rhyme, And How To Count Your Fowl

The opinions contained in this and other articles in this column are solely those of the writers who sign them. They are not to be interpreted as necessarily reflecting the opinions of The Herald.—Editor's Note.

A bunch of stuff about nothin'!

I am very belated in tendering the appreciation of this good journal to one of its dearest friends and severest critics, Bill Tate of Dallas and Big Spring.

Bill wrote us a couple of months ago that his household, faced with a decision in choosing between The Herald and their pet cocker spaniel, chose The Herald. I call this either (a) rare loyalty to the paper, or (b) darn poor judgment. It all happened this way:

The Tate's cocker nips the postman. Postman gets sore, says he'll deliver no more mail to the house. Tate has Herald's address changed to come to his downtown office. Tate reads paper at office, fails to take it home. Mrs. T. raises a ruckus about this. Family finally has to get rid of dog, persuade postman to return and ring again, get Herald address changed back again to the residence.

The cocker? Placed in a home where they don't care if the Herald is never delivered. Which means that dog is in an underprivileged home.

fond of alliterations, I searched under the "Z" in the dictionary for some word I could attach to Henry Zweifel, a man who, I think, tore his britches but good with that business of his at the Mineral Wells Republican convention. I found "zorillo-lic", but I definitely am not using this word in connection with Mr. Zweifel, and I certainly do not want to leave any impression that I so intend. For zorillo, I found, is a type of skunk. I found also "zymotic", which means something about causing fermentation, and believe you me, the ferment has been touched off with that GOP shenanigans. I also found "zigzag-ratic", which I figured would mean something about setting up a lofty pedestal type of place with a shrine on top. Mr. Z. may be on the pyramid for the nonce, but somebody is going to pull a brick out from under his zigzag.

I also have a fondness for corny rhymes, which leads to the observation that: Down in Texas, Mr. Zweifel Left the Ike-men feeling cry-fry.

Speaking of dogs:

Our circulation department took a poll among the Little Merchants who handle the local routes. This asked them why they took delivery contract, what they liked about it, etc., and what they didn't like about it.

Mostly what they liked was a chance to earn some money, and a lot of them said they liked the nice people on their routes.

What most of them DIDN'T like was dogs on the route—dogs and people "who don't pay their bills on time." Now, you wouldn't want to be a dog in the eyes of our newshoys, would you?

This is now a change of subject. Being

Some guy went to the trouble of digging up the words used properly to describe groups of various creatures. He pointed out that:

It's a rafter of turkeys, a mustering of storks, a chattering of starlings, a team of ducks if on the wing or a paddling of ducks if on the water, a convocation of eagles, an exaltation of larks, a pack of grouse, a bevy of quail, a congregation of plovers, a colony of gulls a gang of elk, an army of frogs, a troop of kangaroos, a dray of squirrels, a hover of trout, a pack of perch, a bale of turtles, and a cloud of grasshoppers.

From this, the only way I can figure about people is that they are a mess.

—BOB WHIPKEY.

Merry-Go-Round—Drew Pearson

General Clark Was In No Mood To Whitewash Kojé Isle Affair

WASHINGTON.—The Army has hushed it up, but the two key generals in the Kojé Island fiasco almost got off the hook with a light reprimand. It was only by direct order from Gen. Mark Clark, the new Far Eastern commander, that the reprimand was torn up and Generals Francis Dodd and Charles Colson were busted to colonels.

Dodd got himself kidnapped by Communist prisoners of war, and to obtain his release, Colson agreed to concessions that played right into the Communist propaganda theme. Until General Clark intervened, the Army was going ahead with the usual whitewash.

The Army is always quick to discipline enlisted men, slower to discipline junior officers, but practically never takes drastic action against the high brass. So, in keeping with this tradition, a board of inquiry recommended a reprimand for Dodd and Colson and their superior, Maj. Gen. Paul F. Yount.

Gen. James Van Fleet, who, as the top commander in Korea was technically responsible for the Kojé Island POW camp, approved of the reprimands and sent them up for Clark's signature. But Clark had stepped into a hornet's nest when he took over the Far Eastern command, and he was in no mood for a whitewash. He approved of the reprimand for Yount, but ordered Dodd and Colson busted.

that she cannot last the summer.

While it may not be pleasant, even for hard-boiled diplomats, to sit by and watch a woman die, nevertheless the capitals of Latin America are coolly calculating what will be the effects of Evita's death on revolution and war.

Last fall she was operated on for a cancerous condition of the upper intestine and duodenum. In December her doctors came to the decision that she could not be permanently cured, put her on a careful schedule, advised that with rest and care she might live two years.

Evita obeyed the doctors' orders until the end of February. By then she was feeling so much better that she decided the doctors were wrong. Besides she got to worrying about her social aid foundation, her charities, and her work in the labor department.

So, since March, she has been back on a full work schedule. Though she looked pale and drawn she seemed as full of energy as ever.

On the night of May 24, however, following a small dinner at the presidential palace, Evita collapsed. The news was kept secret for 72 hours while extensive blood tests were taken. Then four physicians broke the news to President Peron that his wife had only weeks to live.

A meagre official announcement which referred only to the "recurrence of the first lady's previous complaint" was enough to set off a wave of demonstrations all over Argentina. Special masses were celebrated and pilgrimages to Buenos Aires were organized by Peronista workers.

But none of the loyal followers knew that their beautiful, sometimes ruthless patroness was on her deathbed at only 34. When they do, there will be upheaval in Argentina. And with her passing, part of the power of her husband will vanish.

Uncle Ray's Corner

A week ago I spoke briefly about the venomous snakes of North America. Today I wish to take one kind, the diamond-back rattler, in some detail.

Diamondbacks were given their name because of the diamond-shaped markings on their backs. Some of them have fangs which measure one full inch in length!

Some persons are fearful of the forked tongues of snakes, but it is the fangs which do real damage. The fangs are grooved teeth, and venomous snakes send poison through the grooves.

There are several kinds of diamond-backs. Eastern diamondbacks range from North Carolina down to Florida, and westward to the Mississippi River. Western diamondbacks are of a highly deadly type. They reach a length of six or seven feet, and are found in parts of the Rocky Mountains, also in Texas and a section of California.

Diamondbacks of Florida are the largest in the entire rattlesnake family. Some of them are eight feet long and weigh 15 pounds.

Mr. Ross Allen, an expert on snakes, has made careful records of snake bites in the state of Florida. He traced the history of 509 persons bitten by poisonous snakes during a period of 14 years. Of these, 76 died. The great majority of those who died were victims of diamondback rattlers.

The rattles on a rattlesnake may help to show its age, but they are far from a perfect guide. These snakes usually add four rattles a year. In a rough way we may say that each rattle shows three months of life. Trouble comes, however, from the fact that several rattles may be broken off during a rattler's career.

A rattler is added each time the snake sheds its skin. A baby rattler sheds its skin very soon after birth, and the sheddings keep on after that at the rate of about four per year.

PATTERN by American Designer CLARE POTTER

LIKE NIGHT IN HEAVEN

Dress Steals Heart With Glamour From Word 'Go

Sure 'tis like a night in heaven this dress now, don't you think? Well, we do. In the pattern business you see them come and go, like ships in the night, but never, no never, have we seen a dress that more completely steals the heart away than this Clare Potter costume. It's glamour, from the word go—and we think that all America will be going after a dress that has so much umph, so much chic, so much irresistibility that it beggars description. Clare Potter, as you probably know, is known for the well-bred look she gives to a woman's appearance, although this outfit would hardly get a reward in heaven for being well-bred. Rather, it achieves the ultimate in the way EVERY woman would like to look, regardless of race, creed, color—or forbears. The strapless dress is tight-fitting, giving emphasis to the bosom, and the skirt is femininely full, with

side pockets. The stole is the dress, as far as we are concerned, for it is new, smart, entirely different from those you've seen making the rounds. Miss Potter originally designed Pattern 1100 in linen and chiffon—chiffon being the gossamer stuff that made the stole. However, you might prefer any number of fabrics, such as cotton, silk shantung, French gingham—or linen. Fabric for the stole could be of your own choosing, too. Size 12 requires 4 yds. of 35-inch material for the dress, and 1 1/4 yds. of 48-inch material for the stole. (The original trim around the stole is a ball fringe.) Pattern is available in sizes 12, 14, 16, 18, 20. To order Pattern 1100, send \$1 to Spadea Syndicate, Inc., Dept. 164, Box 258, Madison Square Station, New York 10, N. Y. For air mail handling, enclose 25 cents. To order our pattern booklet VI, send 15 cents.

COMING EVENTS

MONDAY
CHURCH OF THE NAZARENE WPM will meet at 8 p.m. at the church.
ST. THOMAS ALTAR SOCIETY will meet at 8 p.m. at the church.
LIFE BAPTIST WMS will meet at the church at 7:30 p.m.
VFW AUXILIARY will meet at the VFW Hall at 7:30 p.m.

SATURDAY
CITY HOME DEMONSTRATION CLUB will meet at 2:30 p.m. with Mrs. J. W. Garrison, 807 E. 13th.

SUNDAY
MOTHER FETES SON WITH HOBO PARTY

Mrs. Vernon B. McCoslin honored her son, Lonnie, with a clown and hobo party recently in celebration of his fifth birthday.

The table decorations included a large white balloon with a painted clown's face and stuffed white garden gloves with "Happy Birthday" balloons tied to the fingers.

Place cards were clown hats and favors were hobo-clown bundles, horns and balloons.

Games were played and pictures of the group were taken.

Attending were Jody and Chris Mittel, Nancy Hardesty, Lucy, Kay and Mary Thornton, Vickie Colter, Mary and Johnnie Little, Freddie Coleman, Bobbie Brown, Theresia Hayhurst, Olivia Anne Cochran, Mary Jo Cochran.

Marsha McCoslin, Mrs. Cliff Little, Mrs. J. C. Mittel Jr., Mrs. Hugh Cochran and Mrs. Fred Coleman.

Mrs. Watkins Speaks At WSCS Meet

GARDEN CITY, (Spl) — Mrs. I. L. Watkins brought the devotion-al when the WSCS met at the church Tuesday afternoon.

She chose for her subject "Friends," bringing out the thought that to have a friend you must be a friend.

Mrs. Tom Asbill led the group in two songs followed by a prayer by Mrs. W. K. Scudday.

Mrs. Asbill presided over the business meeting.

Mrs. Max Fitzhugh gave the treasurer's report and discussed a way in which more money would be left in the treasury at home for mission work.

The society will devote their next meeting to cleaning the church kitchen.

Mrs. Buster Cox, a guest, won high when the afternoon Bridge Club met with Mrs. Glenn Rife Wednesday. Second high went to Mrs. W. K. Scudday, Mrs. W. E. Sull, a guest from Midland, and Mrs. Joy Wilkerson won the bingos.

Refreshments were served. The club will have their next meeting with Mrs. Scudday.

Forsan Calendar

MONDAY
Methodist WSCS at the church at 2 p.m.
Boy Scouts at the hut at 7:30 p.m.

WEDNESDAY
Baptist WMS at the church at 2 p.m. for royal service program.
Prayer meeting at the Baptist Church.
Prayer meeting at the Methodist Church.

THURSDAY
Service Club at the school at 7:30 p.m.

Doing The Town

Melvyn Douglas and Joan Evans are two of the principals in "On The Loose," playing at the State Theatre today and Monday. The story deals with the problems confronting a young girl who seeks her fun her own way when she is ignored by her parents.

Big Spring (Texas) Herald, Sunday, June 8, 1952

Two Boys, One Girl

Janet Leigh is favored by both Richard Anderson and Peter Lawford in this scene from "Just This Once." It's a gay comedy romance about a millionaire spendthrift and a young lady lawyer who tries to discipline him, and is at the Ritz Theatre Tuesday and Wednesday.

Something Weird Here

It's Charles Laughton chiding Boris Karloff — if anybody can get by with that sort of thing. They're the principals of a chiller film, "The Strange Door," which comes into the Jet Drive-In Friday midnight as a Friday, 13th feature.

In the cast are Janet Leigh and Peter Lawford, Lewis Stone, Marilyn Erskine and Richard Anderson.

"Just This Once" tells the story of a millionaire spendthrift and an attractive but penny-pinching young lady lawyer. Appointed his financial guardian, she puts him on a \$50 weekly allowance, attempts to lure him to the beauties of lunch at the Automat and the

pleasure of a boat trip on the Staten Island Ferry, strips him of his expensive home and then finds out that, through a loophole in the law, he is able to move into her apartment. From then on, it's a battle of wits, and also of love, between playboy Lawford and legally-minded Miss Leigh. It's a reunion for the two young principals, who have been together in two other pictures.

HIGHLIGHTS ON KBST

June Valli Singer On Breakfast Club

June Valli, "The Cinderella Girl of Popular Music," will be the sixth songstress to guest on Don McNeill's Breakfast Club. She will appear on the program during the week of June 9. The program is heard on KBST at 8 a.m., Monday through Friday.

The 21-year-old vocalist was born in the Bronx, New York, and until two years ago was a bookkeeper. However, she was prompted to sing a song at a gay Italian wedding on Christmas Day, 1950, and so impressed one of the guests that he arranged to have her appear on a network talent scout program. ABC's Harry Salter heard her sing the last few bars of "Stormy Weather" on the program and invited her to audition for "Stop The Music." She made her professional debut on the program on March 18, 1952 and scored an immediate hit.

In July, 1951, she was signed to an exclusive recording contract with RCA Victor and less than a year later returned to "Stop The Music" as regular vocalist.

THIS IS YOUR FBI
A fast-paced thriller about the operations of a gang of car thieves will be presented over the This Is Your FBI on Friday, June 13, from 7:30 to 8:00 on KBST.

Auto stealing has become such a big business, it will be revealed on the program, that the value of cars stolen last year reached more than \$95,000,000. To reduce the prevalence of car-stealing, some cities in the United States have passed laws making it a crime for drivers to leave keys in unattended cars.

THE NELSONS

True to the pattern of the Nelson household, Ozile and Harriet and their sons David and Ricky find themselves in a complete misunderstanding during "The Adventures of Ozile and Harriet on Friday, June 13, at 8 p.m., CDT, over ABC and KBST.

Ozile and neighbor Thronberry almost declare war on each other because of a tree bordering their property, but during the course of events the social dissonance is finally resolved.

The Gilbreths Again

These are four of the dozen Gilbreths, who came "Cheaper By The Dozen," and who now return in another story of the same family, "Belles on Their Toes." The comedy, in Technicolor, is at the Ritz today and Monday. Jeanne Crain, Myrna Loy and Edward Arnold are the top players.

'DOZEN BECOME 'BELLES'

Gilbreth Family In More Adventures

Remember the Gilbreths? They're the ones who came "Cheaper by the Dozen."

The unusual family is back—minus father, who has passed on—to be seen in "Belles on Their Toes."

Brod Crawford As Tough Guy In 'The Mob'

Broderick Crawford returns to his tough-guy roles for "The Mob," playing at the Jet Drive-In tonight and Monday night. He's a hard-hitting detective who, in the pursuit of his duties, poses as an earthy, pugnacious dock worker. Based on the Collier's magazine story, "Waterfront," the story traces the stranglehold clamped on the docks by the coldest crew of toughs seen in many a film. Extortion, mayhem and murder are their daily diet.

When Crawford witnesses a killing which the police connect with the mob, he is given the assignment of trapping the higher-ups in the dock setup. He goes to work as a dock wallflower to get his evidence.

Seen in support of Crawford are Betty Buehler, television actress who makes her film debut; Richard Kiley as an amiable detective; Otto Hulett as another detective and Matt Crowley as the villainous mob leader.

Vet Patients To See Movies And Variety Shows

Movies and variety shows highlight the entertainment calendar for patients at the Big Spring Veterans Administration Hospital this week.

Three out-of-town groups—from Snyder, Odessa and San Angelo—are due to provide part of the week's entertainment fare.

The San Angelo VFW Post sends a delegation to the local hospital to stage a variety show at 2 p.m. American Legion Auxiliaries of Big Spring and Snyder are to conduct a bingo party Tuesday at 7 p.m. Odessa's Sheriff's Posse will present the week's second variety program at 7 p.m. Thursday.

Movies are scheduled for 2 and 7 p.m. Monday and Wednesday, 2 p.m. Thursday and 7 p.m. Friday.

Joan Smith Attends RC Aquatic School

Joan Smith is representing the Howard-Glasscock Red Cross Chapter at the national Red Cross Aquatic School at Camp Murray, Oklahoma.

The school began Wednesday and will run through June 14.

Following the school, Miss Smith will return to Big Spring to teach swimming, lifesaving, and water safety if and when the Big Spring pool is opened.

Miss Smith is a physical education major at Texas Tech.

The comedy, in Technicolor, heads up the Ritz Theatre's program for today and Monday.

Jeanne Crain, Myrna Loy, Debra Paget, Jeffrey Hunter and Edward Arnold have stellar roles and the supporting cast includes Hoagy Carmichael, Barbara Bates, Robert Arthur and Verna Felton.

"Belles on Their Toes" is based on the novel by the same authors, Frank and Ernestine Gilbreth, and reveals the further adventures of the uproarious clan and tells what happens when the Gilbreth boys get growing pains and the girls discover romance.

A number of musical selections, many of them old favorites are used to add human interest qualities to the story.

"Belles on Their Toes" captures the spirit of the flapper age with such dances as the Shag, the 1923 vintage Pierce-Arrow which the family used as a carry-all. The comedy is highlighted by a silent newsreel sequence showing the meal-time efficiency of the Gilbreths, the atomic explosions of a batch of homebrew and a bathroom scene in which the Gilbreth boys give their sister's boy friend, Al, a very bad time.

In the romance department, Jeanne Crain, as Anne, the eldest daughter, falls in love with Jeffrey Hunter, the young doctor, and Barbara Bates has an adolescent crush on Al, played by Martin Miller, while Myrna Loy as Mother and Edward Arnold narrowly escape matrimony.

L. A. Background For State Film 'Shadow In Sky'

Los Angeles, its homes, highways, beaches and landmarks, forms the background for "Shadow in the Sky," coming to the State theatre Tuesday and Wednesday. It tells the story of a family and a girl who aid in the regeneration of an ex-GI who thinks the world has forgotten him.

The picture's four stellar roles are played by Ralph Meeker, Nancy Davis, James Whitmore and Jean Hagen. Miss Davis and Whitmore, enacting wife and husband in the new film, scored in similar capacity in "The Next Voice You Hear."

"Shadow in the Sky" was directed by Fred M. Wilcox from a story by Edward Newhouse.

'Mark Of Renegade' Offered Today At Terrace Theatre

"Mark of the Renegade," starring Ricardo Montalban and Cyd Charisse, is a lavish Technicolor spectacle dealing with a bold attempt to overthrow the government of early California.

The new action film is featured today and Monday at the Terrace drive in theatre. J. Carrol Naish, Gilbert Roland, Andrea King and George Tobias are in supporting roles.

Montalban made his Hollywood debut in "Fiesta," following a successful career as a leading man in Mexican films. His co-star in "Mark of the Renegade," Cyd Charisse has gained screen prominence as a dancer.

SAT. — "Shakedown," with Howard Duff and Brian Donlevy.

Girl's Social Problems Told In State Film

A film dealing with a social problem of today—that of youth's difficulties when parents do not meet their responsibilities—is "On The Loose." The picture is at the State theatre today and Monday.

Joan Evans, Melvyn Douglas and Lynn Bari are co-starred in the story which revolves around a high-school girl's search for happiness and the ensuing troubles with her thoughtless, selfish parents and her scandalized school companions.

Because her mother and father are too interested in their own social activities to pay attention to her, Joan awkwardly seeks to live her own life in her own way. As a result she gets into difficulties at school and with the boy she thinks she loves, and her girlfriends desert her. Although innocent of serious misconduct, she is misunderstood by her parents and decides to end it all. The dramatic results of that decision finally lead to a better understanding of the girl by her parents, and to a recognition of her worth by her companions.

Robert Arthur, Hugh O'Brian, Constance Hilton, Susan Morrow and Tristram Coffin are in the supporting cast.

Visits, Guests Make Main Westbrook News This Week

WESTBROOK, (Spl)—Visits and guests are making the early summer news in Westbrook.
Guests of the George Dawsons last week were his brother and family, Mr. and Mrs. J. C. Keaton, Steven and Mike of Helena, Ark., a nephew, Gene Makowsky of San Angelo and A-2c Weldon L. Dawson of Lackland Air Force Base.
The Dawsons visited in San Angelo Sunday afternoon.
L. M. Dawson is in Odessa attending a vocational agriculture meeting.
Mrs. L. E. Gressett and Mrs. T. B. Coker left Tuesday for Abilene to enter McMurry College for one summer term.
Mr. and Mrs. H. P. Iglehart and children, Mr. and Mrs. James Cherry, spent the week end in Dallas with Mr. and Mrs. C. J. Cherry.
Mr. and Mrs. C. A. Anderson have left on a vacation. They plan to visit in Notrees, El Paso, Roswell, N.M. and Denver, Colo.
Mr. and Mrs. Altis Clemmer spent the week end in Royalty as guests of the Cecil Townsends.
Howard Hardcastle is home from

HI-TALK

By Margie McDougle

State champions in sixteen areas of 4-H work will be crowned Tuesday. Big Springers planning on entering the competition are Connie Crow, Ellouise Carroll, Betty Davis, Travis Fryar, Ronnie Davidson, Sonny Choate, Donald Denton, and Delbert Davidson.
A summer activity program, sponsored by the YMCA, has begun and will last through July. Approximately three hundred children are participating. Ages range from seven through 17.
Nancy Lovelace will direct girls' activities, and T. L. Baker is in charge of the boys. Coaches Bonner and Baird will aid Baker in directing the boys.
Girls' activities will be held in the YMCA gymnasium, while the boys' program will be held in the junior high school gym.
Listed on the sport agenda for the girls are tennis, tumbling, softball, various dances, volleyball, relays, plays, crafts, first aid, and ping pong.
Boys' activities include baseball, wrestling, dodgeball, boxing, tumbling, and soccer.
Aim of the summer program is to give the youth of Big Spring education as well as recreation during summer vacations.
New officers of the Big Spring Order of the Rainbow for Girls paid tribute to the new Worthy Advisor, Fern Crabtree, at the installation of officers Thursday night. In addition to Miss Crabtree, officers installed were Joyce Gound, Worthy Associate Advisor; Anna White, chairman; Joyce Anderson, Hope; Mary Ella Bigony, Faith; Doris Ann Daniel, chaplain; and Sue Love, Love.
Taking part in the installation of the officers were Pat Dillon, Lydia Mae Axtens, Barbara Smith, and Sally Cowper.
Patsy Clements' trip to North Dakota is the longest journey being made this summer with Steve Kornfeld's visit in Kansas the second longest. Others planning out-of-town trips this summer are Gerald Scott, San Angelo; Barbara Hill, Austin; and Diane Laughman and Frances McClain, Fort Worth.
Jerry Choate, a former Big Spring High School student, is visiting here from Albuquerque, New Mexico.

the hospital after undergoing surgery last week.
Recent guests of Mr. and Mrs. Arthur Moody were Mr. and Mrs. J. A. Moody and daughter of Novice, M-Sgt. A. R. Moody and Mike of Denver, Colo., Mrs. E. C. Whitehead, Wanda and Danny of Odessa, Mrs. Bobby Henderson and Mr. and Mrs. C. I. Jeffries of Colorado City and Mr. and Mrs. H. C. Moody and Jimmie of Westbrook.
Jimmie and Winnie Bobo are visiting their sister in Dallas this week.
Mr. and Mrs. Willie Bell and children and Mrs. Annie Bell visited the Vance Armstrongs Saturday in Jal, N.M. and attended the McCarty reunion in Andrews Sunday.
Mrs. S. M. McElhatten and Curlee spent the holidays visiting in Louisiana. They were accompanied by an aunt of Waco.
Mr. and Mrs. Altis Clemmer and children, Mr. and Mrs. Willie Bell and children, Ray Moore, Mr. and Mrs. Troy Lankford and children and Mr. and Mrs. Buck Phillips and Johnnie attended a barbecue at the home of Mr. and Mrs. Leslie Bassinger Tuesday night.
Mr. and Mrs. B. F. Ellett and children of Cuthbert have recently moved back to Westbrook.
Mrs. Thomas Lewis and children are visiting in Dallas.
Guests of the Dalton Conoways last week were her mother, Mrs. B. F. Palmer of Gladewater, Mr. and Mrs. B. L. Palmer, Jack and Larry of Jal, N.M., Mr. and Mrs. Harvey Webb, Dale and Melba of Jal, N.M.
Leslie Coit Walker of Odessa is visiting his grandparents, Mr. and Mrs. Coit Butler.
Don McNew of Snyder spent Tuesday night with his aunt, Mrs. B. F. Ellett.
Mrs. J. M. Byrd had as her guest Sunday her daughter, Mrs. Clyde Smith, of Lubbock.

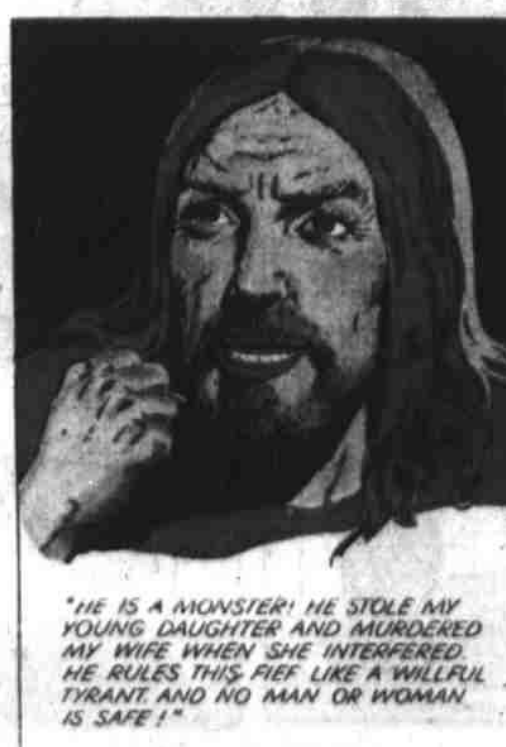

Graduate Nurses Meet

It has been announced that the Graduate Nurses' Study Club will meet Monday at 8 p.m. at the VA Hospital Nurses Home.
Dr. L. C. Culwell will discuss the "RH Factor." All members are urged to attend.

WIN ROYALTIES* FROM 44 TEXAS OIL WELLS!

First Prize in Easy Dr Pepper Jingle Contest

Complete 2-Line Jingle "GET A LIFT FOR LIFE, IT'S REALLY TRUE"

A Lift for Life!

Read How Dr. Pepper Pays 1952 Income Taxes on First Prize. Yes, YOU can win the most fabulous first prize in contest history—an income from not one, but 44 producing Texas oil wells! Or you can win one of 899 other really valuable prizes—just for completing an easy 2-line jingle to rhyme with "true." The winning rhyme may be as simple as, "Get a Lift for Life, it's really true, you'll go for Dr. Pepper, too."

You'll get plenty of good ideas for rhymes once you've tried Dr. Pepper's special sparkle. Then send in the complete 2-line jingle, enclosing a Dr. Pepper bottle cap or facsimile for each word in the

entire jingle. Enter as often as you want; get your friends and family to enter, too!

DR. PEPPER COMPANY WILL PAY FEDERAL INCOME TAX ON YOUR 1952 ROYALTY EARNINGS IF YOU WIN FIRST PRIZE, PROVIDED YOU DOUBLE THE NUMBER OF BOTTLE CAPS OR FACSIMILES ENCLOSED WITH YOUR ENTRY, AND SEND YOUR ENTRY ON AN OFFICIAL ENTRY BLANK, GET ONE AT YOUR DR. PEPPER DEALER, OR WRITE DR. PEPPER, BOX 5086, DALLAS, TEXAS, FOR OFFICIAL ENTRY BLANK.

Enter today! It's fun—and a few minutes' thought may win for you a royalty from 44 Texas oil wells!

PRIZE NO.	NO. OF AWARDS	PRIZE
1	1	Royalties* from 44 Texas Oil Wells
2	1	6 E. Dishwasher, Disposal and Clothes Washer
3-6	4	Motors TV sets 20" screen
7-10	4	Hoover Cylinder Vacuum Cleaners
11-20	10	6 E. Electric Blankets, Double Bed Size, Dual Controls
21-25	25	Cushman Deluxe Bicycles
26-31	6	Bermeyer Meal Maker Mixers
32-37	6	Fryrite Deep Fat Fryers
38-43	6	Birmingham 60 Electric Shavers
44-48	25	Tonmaster Toaster
49-100	12	Reynold Backroom Model Western Hats
101-250	150	Chicago Roller Skates
251-400	150	Autopoint Mechanical Pencils
401-900	500	Personalized Stainless Steel Identification Bracelets

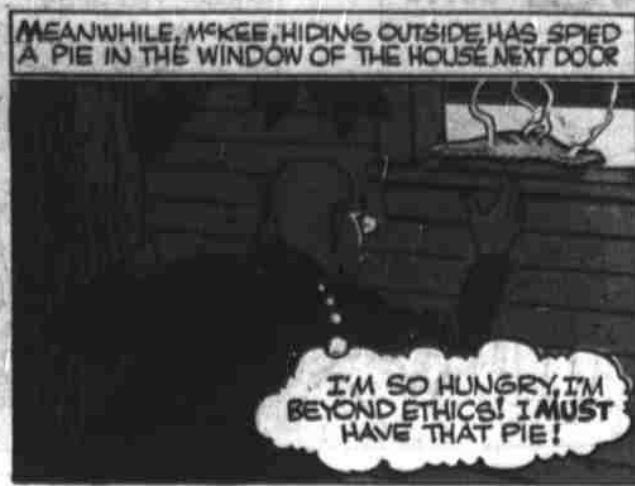

*Based on average of approximately \$100 per month from traditional royalty interest under ten tracts in the famous East Texas Oil Field. Independent geologists estimate that the future returns of these royalties based on crude prices and operating production as of March 28, 1951 is over \$20,000.

Read Easy Rules and ENTER TODAY!

Read How Dr. Pepper Pays 1952 Federal Income Taxes on First Prize

- Print or write plainly your two-line rhyme beginning with "Get a Lift for Life, it's really true." Use entry blank, or one side of a sheet of paper. Print or write plainly your name and address. All entries must be original work of the contestant and submitted in his or her own name.
- Mail to Dr. Pepper Jingle Contest, P. O. Box 753, Chicago 77, Illinois. Enter as many times as you like, but with each entry, enclose a Dr. Pepper bottle cap or facsimile for each word in the complete jingle. Use a sturdy mailing envelope and affix sufficient postage. CAUTION: Do not send entries to Dr. Pepper Co.
- You will be eligible to have Dr. Pepper pay your Federal Income Tax on the 1952 Royalty earnings on the first prize, if you write your entry or entries on an official entry blank and double the number of Dr. Pepper bottle caps or facsimiles you enclose with each entry.
- Contest will close July 31, 1952. Entries must be postmarked before midnight July 31 and received by August 15. Only entries with sufficient postage will be judged.
- Entries judged on the basis of originality, uniqueness and aptness of thought by the Lloyd Harold Company, independent contest judges. Decision of judges final. Entries, contents and ideas become the property of the Dr. Pepper Company. Duplicate prizes in case of ties.
- Any resident of continental United States may enter, except employees of Dr. Pepper Company, Dr. Pepper bottlers or advertising agents, and their families. Contest subject to all U. S. and local regulations.
- Winners will be announced approximately one month after the contest closes. All winners notified by mail. Complete winner list sent on request if you enclose self-addressed stamped envelope with your entry. Entry blanks at your Dr. Pepper dealer, or write Dr. Pepper, Box 5086, Dallas, Texas, for official entry blank.

NEW VEL* MAKES DISHES SHINE WITHOUT WASHING OR WIPING!

"VEL SOAKS DISHES CLEAN--SAVES ME ALL THE HARD WORK!"

says Mrs. Arlene Eddy, mother of 2

DON'T WASH--
JUST SOAK!

"I spruce up my kitchen while Vel soaks my dishes and glasses shiny clean! You see, I don't wash--just soak! If any food sticks--it comes off with a touch of the dishcloth!"

DON'T WIPE--
JUST RINSE!

"When I take the dishes from Vel suds, all I do is rinse! They dry shiny clean without wiping! Greasy pots and pans soaked with Vel suds come clean without hard scouring!"

Help avoid rough, red hands with MILD, PURE VEL

America's first mild detergent! Brings you the grease-cutting efficiency of heavy laundry detergents plus supreme mildness! Vel contains no harsh alkali--no harsh laundry chemicals--no irritating bleaches! And your hands are in dish-water so little this new Vel way.

TARZAN

By Edgar Rice Burroughs

... INSTEAD OF BEING DASHED AGAINST JAGGED ROCK AFTER SPIRALING DOWN FROM HIGH ABOVE, TARZAN LUCKILY LANDED IN A BILLOWY SNOW BANK!

UNDAUNTED, THE APE-MAN CLEARED HIS SENSES AND RENEWED PURSUIT OF THIS CRAFTY ENEMY, UNTIL, FINALLY, THEY REACHED LUNYA'S SUMMIT.

THEN TARZAN PAUSED, CURIOUS. JORGE DISAPPEARED INTO A CRUDE STONE BUILDING, THE SHRINE OF WORSHIP FOR THE INDIAN MOUNTAIN DWELLERS.

MOMENTS LATER HE EMERGED, DRESSED IN THE UNIFORM OF A SIXTEENTH CENTURY SPANISH SOLDIER! PROBABLY AN ANCIENT SOUVENIR OF THE INCAS, IT NOW SHATTERED THE LAST VESTIGE OF HIS SANITY.

"AND SO!" HE BELLOWED, EYES FLASHING. "HERE IS WHERE I KILL YOU-- J. FRANCISCO PIZZARO!"

JORGE, UNCANNILY ALERT, STRENGTHENED IN MADNESS, INCHED SLOWLY TOWARD THE APE-MAN-- HERE WAS THE FINAL SHOWDOWN!

I'M COME SEE C'MANDIN' OSSIFER! SENTRY NO LET ME BY--TELL ME GO 'WAY, WANNA TAKE MY HORSE!
IS THAT TRUE, SERGEANT?
IS THAT TRUE, CORP'L?
PRIVATE DOWDY??
WHY, SIR, AS SURE AS I'M STANDIN' HERE--

NO, NO! I'M GOTTA TURN IN TO C'MANDIN' OSSIFER! I'M KILL CAP'N BEAUREGARDE!!
NEVER MIND! GET HIM OUT OF HERE!

YOU...KILLED... CAPTAIN BEAUREGARDE...??
OF COURSE! YOU'RE THE REPSKIN, KIT FOX!!

"SERGEANT, THROW HIM IN THE GUARDHOUSE! BREAD AND WATER RATIONS!!"

DOWDY, TELL US HOW YOU CAPTURED A WHOLE TRIBE O' REDSKINS SINGLEHANDER!

YEH, HIM AN' A SARJINT AN' A CORP'L AN' SIX OTHERS! ONE HALF-PINT INJUN KID!! HAW!

HOW D'YA FIGGER THAT KID?--TURNIN' HISSELF INTO TH' ARMY FOR KILLIN' A CAPTAIN! YIFE!

HE'S AS GOOD AS FACIN' TH' FIRING SQUAD NOW!

RIGHT, MR. COLBY... THE BOYS'LL LOOK AFTER 'EM IN THE PADDOCK 'TIL YOU'RE READY... MEANWHILE I'LL PUT OUR PERSONAL GEAR ON THE DOCK.

BLACKIE, THIS IS A HECK OF A LOT OF INSURANCE! I'M SURPRISED THE COMPANY WOULD ISSUE SUCH A BIG POLICY ON TWELVE SADDLE HORSES!

SADDLE HORSES, MY EYE! THEY ARE BLOODIED STOCK FROM MILESTONE FARM! EVERYONE'S A POTENTIAL DERBY WINNER... AT LEAST AS FAR AS THE INSURANCE COMPANY KNOWS.

OKAY, BOYS... THE SHIP'S AT THE DOCK... THE THREE OF US WILL PUT THE HORSES ABOARD... EACH LEAD ONE HORSE AT A TIME... LET'S GO!

I JUST HOPE NONE OF 'EM GETS SPOOKY ON THAT NARROW PIER!

THIS ISN'T BAD... THEY MUST'VE USED THIS SHIP FOR HORSES BEFORE.

CAPTAIN CRUMP SAYS WE CAN PICK OUR OWN CABINS, BUT I THINK WE OUGHTA SET UP A COT HERE, SO WE CAN TAKE TURNS STAYIN' WITH THE HORSES.

WE'RE CASTING OFF, BLACKIE... A LOCAL PILOT IS TAKING US PAST THE CAPE... YOU CAN GO BACK WITH HIM IF YOU LIKE!

NOT ON YOUR LIFE! I'M STAYING ABOARD TO MAKE SURE YOU DON'T GET TOO SOFT-HEARTED!

I'M SORRY I'M IN IT... I DON'T PRETEND TO BE TOO GOOD FOR A LITTLE LARCENY, BUT TAKING A CHANCE WITH THE LIVES OF THE CREW AND PASSENGERS...

WHAT CHANCE ARE YOU TAKING? YOU GOT MORE THAN ENOUGH BOATS... YOU JUST FOLLOW INSTRUCTIONS AND NOBODY WILL EVEN GET WET!

THERE GOES THE PILOT, PETE!

YEP... NOTHING TO DO NOW 'TIL WE GET TO FLORIDA.

DONALD DUCK

WHAT'S WITH THIS LAW OF GRAVITY, UNCA DONALD?

WHO DREAMED IT UP?

WHY, ISAAC APPLE... ER... I MEAN FIG NEWTON... NO... ER...

LOOK, BOYS I'M BUSY NOW... RUN OUT AND PLAY... I'LL EXPLAIN GRAVITY LATER!

OKAY, BUT DON'T FORGET!

"LAW OF GRAVITY... ISAAC NEWTON... APPLE FELL ON HEAD... HMM... WELL... HMM..."

TRY T' STUMP ME, HUH?

OKAY, LOUIE, SIT DOWN UNDER THAT TREE!

OH, BOY, NOW WE LEARN ABOUT GRAVITY!

NOW WATCH AND YOU'LL LEARN ALL ABOUT THE LAW OF GRAVITY!

OKAY, BOYS, THIS IS... OOPS?

CRACK!

THUD!

GEE, WE GET IT! IT'S WHAT MAKES YOU FALL... IF YOU'RE SWIPING APPLES!

PROCTER & GAMBLE'S EXCITING, NEW

SPECIALLY MADE FOR "TOUGH-JOB WASHING"

New, exclusive formula!

CHEER's unique formula gives you the extra washing power you need for your toughest washing jobs... actually guarantees you the cleanest washes possible! Cleaner than any soap you can buy!

Miracle whitening agent!

You'll rinse out not only the cleanest, but the whitest possible washes! Whiter than any leading soap, in hardest water. And the brightest possible colored

washes, too. CHEER guarantees it, because CHEER brings you a miracle whitening agent!

Safe for colors! Kind to hands!

It's true! With all its extra washing power, new pleasant-scented CHEER is safe for washable colors, truly gentle on your hands. So change to CHEER for everything you wash. Just CHEER alone--without bleaches, water softeners, or any other laundry aids. Grand for dishes, too!

GUARANTEES YOU THE CLEANEST, WHITEST WASHES POSSIBLE!

Double-your-money back

If you don't agree that new CHEER gives you the cleanest, whitest washes possible. CHEER gets clothes cleaner than any soap you can buy. And new CHEER gets clothes whiter than any leading soap, in hardest water. CHEER not only removes grease and graying dirt, but dulling soap film as well. Try it next washday!

Wonderful for NO-RINSE washing, too!

CHEER is THRIFTY! And the big buy is the Giant Economy Size!

Supplement.

FOR MODERN MOTHER HUBBARDS

Cupboards Set Tone In Kitchen

Cabinets are the most important part of the modern kitchen. They fill the greatest wall space. Their finish sets the color scheme and general tone of the room. They take the place of the old-fashioned pantry, saving the housewife unnecessary steps and providing efficient storage space within arm's reach.

You can buy cabinets factory-built in units of various widths to fit into whatever space you have available. You can have them built on the job, or if you are a careful woodworker you can build them yourself—a big job, though.

In any event, installation is quite a trick and generally it's wiser to have a contractor do it. Measurements must be extremely exact. Supporting strength is required—a wall cabinet filled with dishes can weigh up to 300 pounds. And every part must be delivered before installation is started. One small, missing detail can delay a job for weeks.

The importance of an advance plan of kitchen layout is cited by the General Electric Home Bureau in Bridgeport, Conn., which has done extensive research in the advantages and disadvantages of various types of cabinets. The bureau's experts strongly advise that you call in the man who is selling you the cabinets and have him measure the space himself.

Small left over space at the end of a row of cabinets can be killed off with a filler strip, but this is somewhat of a precision job both in fitting and finishing. Filler strips are used with either enameled steel cabinets or wood. However, if the cabinets are too long for the space, you are stymied.

Wall cabinets usually are hung first to avoid climbing around base cabinets. But this is determined by the need for overhead clearance in maneuvering large continuous counter tops into place. Since counter tops are made in as few pieces as possible, you have to figure on how to get them into your kitchen and into place on top of the base cabinets without smashing holes in the wall.

This is another reason for careful planning. Manufacturers of kitchen equipment maintain planning services and it's a good idea to make use of such services. They make it possible for you to plan a complete kitchen remodeling job in easy stages.

With a plan, you can buy a few items of equipment at a time as your budget allows and add more as you go along, winding up with a kitchen as smart and efficient as if it were all assembled at once.

Screens Can Cut Ventilation

Ventilating louvers in attics often are screened to keep out squirrels and insects. This screening can greatly reduce the ventilating efficiency of the opening.

Insect screen with 16 meshes to the inch can cut the ventilating capacity of any opening by one-half.

If you are planning attic louvers or other ventilation openings and intend to cover them with screens, figure on making the openings twice as big as needed, if you intend to use insect screen. For coarse mesh, eight to the inch, make the opening one and one-fourth the size of an unscreened vent. Quarter-inch hardware mesh, adequate against squirrels and birds, makes virtually no difference in the size of the opening.

KNOTTY PINE cabinets with wrought iron hardware give this kitchen a colonial touch. Decorative niches for pottery break the soffit above the cabinets.

How to Install Cabinets To Carry Load of Dishes

You can't trust to makeshifts when it comes to installing kitchen cabinets. The job calls for competent carpentry throughout. Fill a wall cabinet with dishes, canned goods and everything a woman packs into it, and you have a weight that is going to strain all but the strongest supports.

Since cabinets don't extend all the way to the ceiling, you have to build a soffit, or false wall above them. This space is so high that a woman can't reach it without a ladder, so it is usually killed off and decorated along with the other walls.

If you are building a new house this soffit can be built before the cabinets are installed. Frequently it offers a convenient passage for a flue from a hooded ventilating fan over your kitchen range. But that is about all it is good for.

The soffit is built of the same material as the wall—plaster or wallboard. In a remodeling job, plywood or gypsum board are among convenient materials.

Building a Soffit

The simplest soffit is made by screwing a 1 by 3 inch board to the top front edge of the cabinet and screwing another board directly above this along the ceiling. Wallboard is then tacked to the front edges of these strips; molding or trim is applied and the soffit is ready for decoration.

However, it's easy to plan a soffit to accommodate concealed lighting with fluorescent tubes. You can plan the soffit back a few inches to allow the cabinet top to protrude, affording space for indirect cove lighting that will reflect up to the ceiling. Or the soffit can be built out farther than the top edge of the cabinet, providing space for a strip of frosted glass panels that will give direct downward lighting from the concealed fluorescent tubes.

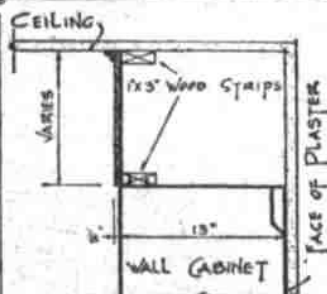

DIAGRAM of a simple soffit formed by wallboard nailed to wood strips on ceiling and cabinet tops.

ther than the top edge of the cabinet, providing space for a strip of frosted glass panels that will give direct downward lighting from the concealed fluorescent tubes.

Purpose of Hanging Strips

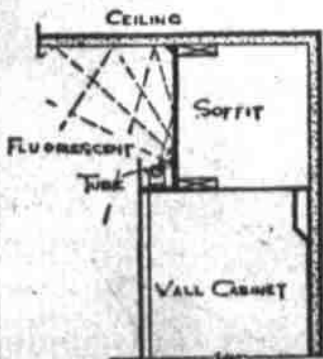

Wall cabinets are usually hung from horizontal wooden strips securely nailed into the studs. It isn't usually practical to attempt to fasten cabinets into studs. The studs are customarily placed at 16-inch intervals in a house wall and your cabinets may not conform to those measurements.

These mounting strips are usually plastered over in a new house, but in remodeling they are merely put outside the plaster. This will make the cabinet stick out from the wall the thickness of the strip—roughly about 1/4 of an inch—but the empty space behind the cabinet is easily concealed with a filler strip.

Cabinets are then hung with screws and cup washers.

It's important to have the cabinets straight and level. If the wall isn't straight and one end of the cabinet protrudes farther away from the wall than the other end, shims or wedges are inserted to true it up. Wooden roof shingles make good shims.

Base cabinets are easier to install. Screws can be used at almost any place. If a stud is

FOR INDIRECT lighting, the soffit is set back from the front of the cabinets, allowing space for concealed fluorescent tubes.

Larger Cupboard Most Economical

Three factors enter into the purchase of kitchen cabinets—economy, appearance and utility.

Supposing you want to fill a wall space that measures 72 inches. Since factory-made cabinets usually come in sizes from 15 to 36 inches wide, you could choose from three combinations.

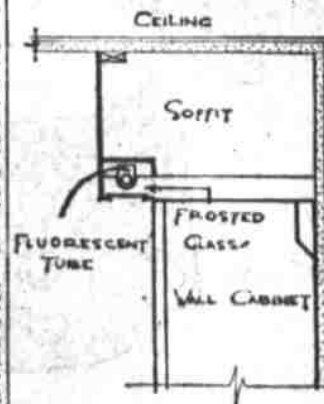

If you chose two 36-inch cabinets to fill that space, one manufacturer's price would be \$94. Three 24-inch cabinets also would fill the space. They would come to \$107. Or you could use two 21-inch and one 30-inch. This would cost \$112 from the same manufacturer.

The large cabinets are the most economical, but the use which the housewife wants to make of the storage space may call for several smaller cabinets.

not convenient, the cabinet can be nailed to the floor, or the various units can be bolted together to prevent shifting.

The only difficulty likely here is a sloping floor. If this is slight, it may be ignored, or the cabinets may be shimmed up. If there's a decided slope and you want a perfect job, it would be worthwhile to rebuild such a floor.

Floor covering usually is laid first, but if you want an extra special job the cabinet is installed first and the linoleum is bent to fit the space left.

FOR DIRECT lighting the soffit extends over the front of the cabinets with fluorescent tubes above frosted glass panels.

Kitchen's Cabinet Hue Is Up to You

The type of kitchen cabinets you select depends entirely on your own preferences and your budget. Some like 'em white. Some like 'em blue. Or maybe you like plain wood in its natural hue.

Because of the popularity of white enameled stoves, refrigerators, dishwashers and so on, many women choose white enameled steel cabinets. They're easy to clean, all right. But with ventilating fans freeing kitchens from all smoke and grease, penchants for colors are opening the way for various attractive wood cabinets.

Knotty pine, shellacked to bring out its natural grain, or oiled, waxed and otherwise finished, carries colonial motifs into the kitchen with accents of black iron H and L hinges and handles.

Redwood, cedar and other woods are widely used for their natural beauty.

Then there are factory-made wood-metal cabinets, some with hollow doors and shelves built up of thin sheets of pressed hardboards, such as Masonite. These cabinets come sprayed in any enamel color desired and fitted with chromium hardware. They can be waxed like an automobile, offering a glossy surface that is readily wiped off.

Some people take white steel cabinets to an auto body works and have them color sprayed to suit.

Women can be as independent about their kitchens as they are about their hats.

Shellac Calls For Dilution With Alcohol

Pure shellac, because of its strength and durability, is one of the most popular finishes for floors and furniture. Called the world's toughest film, it is used on bowling alleys, gymnasium and dance floors. The American Bleached Shellac Manufacturers Association claims that 70 per cent of the floors in American cities are now finished with shellac.

One of its advantages is that it dries so quickly the dust particles that often detract from slower-drying finishes do not have time to settle and stick to its surface.

Because of its sealing qualities, a complete coat of shellac will prevent doors and drawers from sticking and jamming because of seasonal swelling. When used as an undercoat for paint, shellac will prevent stains from wood sap, water, oil or coal tar.

The cut of pure shellac is shown on the label. A 4-pound cut means four pounds of shellac to one gallon of denatured alcohol (not anti-freeze alcohol). Four-pound cut shellac is too thick for most purposes. For floors it is wise to dilute this mixture with an equal amount of denatured alcohol. This can be applied in two thin coats and a slightly heavier cut can be used for the third coat. It used to be that fine homes called for five or six thin coats.

CHILDREN'S COLORS

Children of school age prefer blue over red, according to the National Paint, Varnish and Lacquer Association. Yellow runs third in their favor and green is preferred over white.

CONTRACT THE JOB

THE MOST ECONOMICAL WAY TO BUILD

J. D. JONES

GENERAL CONTRACTOR — BIG SPRING
PHONE 2387

Record Building Year Seen

This year may be a record breaker in Big Spring, on the residential building front, if construction maintains the pace established during the first five months of 1952.

Already issued are permits for 290 one- and two-family houses, with construction costs totalling \$1,377,633. In addition, permits have been granted for 174 alterations, additions and repairs to residences—work aggregating \$135,830 in value and boosting the year's residential construction total to \$1,513,463.

Majority—in fact, 278—of the new homes built or started this year are one-family dwellings valued by bidders at \$1,258,333. Twelve of the

two-family structures are listed on building permit records at a value of \$119,300.

Most of the one-family houses range in cost from \$6,000 to \$10,000. Average for the 278 is below \$5,000, however, indicating that a number have been constructed at a cost of less than that amount. Several have exceeded the \$10,000 figure.

Average cost of the two-family houses is about \$9,900, according to permits.

Valuations in all cases is somewhat deflated, as builders customarily submit cost estimates well below selling prices in applying for construction permits.

Majority of the new homes are of the two-bedroom size, according

to F. W. Bettle, city building inspector. Construction is almost exclusively of frame type with asbestos siding. A few stuccoed and veneered exteriors have been incorporated in building plans. Composition roofs also are finding wide favor with builders.

Several hundred other homes are in prospect for the remainder of 1952 with the first of 300 rental units to be started this week in Monticello Addition and a 40-unit rental housing development planned for the Banks Addition in northwest Big Spring.

Sites for more than 200 homes will be available in Avion Village and Indianola Addition near Webb Air Force Base in the western part

of the city. Both developments may be started in the next few months.

Standing just above the \$1,500,000 mark, residential building this year already is near the total for 1951 when 346 houses were erected at a cost of \$1,729,240.

Oak Floors Last Long

Economy is one of the principal advantages of oak flooring, builders say. They point out that the material lasts a lifetime and seldom if ever requires major repair. At little cost for routine maintenance it can be kept clean and sparkling.

Fire-Safe Barrier Around Heat Unit Is Recommended

Fire-safety authorities recommend that home heating units be separated from living quarters by barriers of incombustible materials. A dry-wall product widely used for this purpose is asbestos-cement flat sheets, which are incapable of burning. Made in units 4 feet long, asbestos building board will quickly cover a partition or line a basement ceiling.

GLAMOR IN TODAY'S FURNITURE

BY VIVIAN BROWN

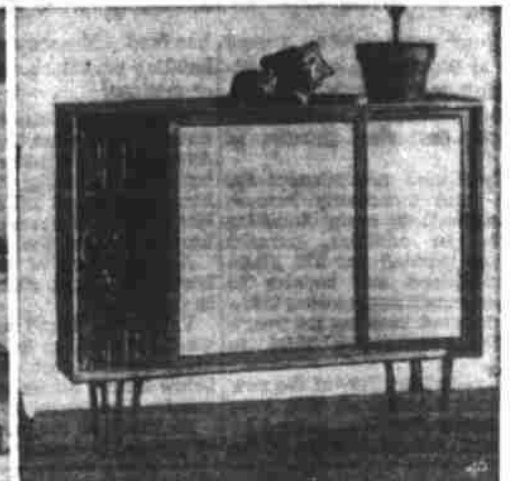

(John Stuart)

UP POPS THE CORK—Used for a table surface, this material resists scuffing. Designed by Paul Frankl.

(Salterini)

OLD INTO NEW—Iron, marble and wicker in modern furniture by Tempestini.

(Dunbar)

NATIVE CLOTH—Edward Wormley uses this Philippine material for cabinet panels.

Modern furniture employs ancient materials. Not since the Victorian period has marble been so popular as it is today. It makes its appearance not only in the period reproductions such as Louis XV and XVI and Victorian, but in modern furniture.

Tempestini combines iron, marble and wicker to create magazine tables, bed headboards and other occasional pieces. Paul Frankl designs a beautiful low cocktail table which has a surface of good old-fashioned cork. Edward Wormley explores the native handicrafts of tropical islanders (such as the Philippines Pandanus cloth and uses it as paneling material) to enhance the beauty of a cabinet.

Says Wormley:

"Modern designers are using materials which serve a definite purpose. Metal is used where it can do a better job than wood. The idea of modern furniture is to look everything squarely in the eye. Will a material do the job and at the same time be pleasing to the eye?"

Wormley points out that even in the use of woods, in the interest of preserving timber and eliminating waste in furniture making, modern designers have utilized laminated wood made of wood shavings and wood chips. The wood is pressed, mixed with plasticized agents and a lovely finish obtained which looks like flattened out wood shavings. It is resistant to alcohol and water.

He has designed a useful tea cart with rubber surfacing, and a side board which wears leather anklets

around its legs to protect its finish from carpet sweeper abuse.

There's a new look in the finish of furniture, also, and naturalism, of course, takes the eye. Furniture is not stained to look like an unrecognizable wood, but its own natural beauty is emphasized.

Says Wormley:

"The middle tones in woods are being stressed. The rich tones of the wood itself, whether it is cherry, mahogany, or any of the countless others used in fine furniture gives color to a room in its unadorned state."

This new interest in naturalism does not mean that all pieces of furniture in a room should be of one color. He suggests an accent piece, in either a lighter or darker shade, but still definitely the natural color of the wood. It can lend interest to any room.

Beware of Cluttering In Furnishing a Home

It's easy to furnish a home if you learn to pick and choose the pieces you need, and skip pieces which are unnecessary or pure decoration.

Above all—don't clutter, advises designer Paul McCobb. He points out that particularly in small homes today, rooms should be organized to achieve a spacious and uncluttered look.

"In a living room there should be a conversation group of upholstered pieces—either a love seat or sofa and at least one good-size arm chair. At least two other lighter scaled chairs—armless chairs or just exposed wood chairs—easy to move about should be in the grouping. Especially it is important with television that chairs which you do not want permanently grouped around the set be used in the conversation group. These should be light and easy to move around.

"Add to this one wall unit—either a long cabinet or a high storage unit—to carry all paraphernalia in the living room that can clutter a room and make it seem smaller than it really is."

The bedroom, according to McCobb, should have nothing more in it than a comfortable bed and a single chest, large enough for the apparel of two people. He sees no use for night tables if a lighting arrangement is used above the bed. He points out:

"If you are going to spend \$400 to furnish a bedroom, it is better to buy two pieces—bed and chest—at \$200 each, than to buy four pieces, two of them not necessary, at \$100 each."

LOOK, NO CLUTTER—This conversational group has a streamlined look. Furniture designed by Paul McCobb.

THE SCULPTURED LOOK

You'll hear a lot about the sculptured look. It is the newest look in American, Swedish and Italian furniture. It gives a softer more flowing line to modern furniture rather than the unyielding straightness of past designs.

Denmark's Kindt Larsen, for example, designs a smartly curved upswing at the back of the arm of the chair to cradle the elbow comfortably. Even in metal furniture gracefulness and delicate sculptured effects are achieved that belie the rigid materials employed.

Cycle in Design

Harold Schwartz, who first used the sculptured look in America about seven years ago, explains it this way:

"Designs follow a natural course. We have a straight period, then a curved, then a blending of the two—as for example the curves of Louis XV, then the straight lines of Louis XVI, then a blending of the two such as Regency."

After our curved Victorian period, we had a revival of straight lines and the Paris exposition of 1925 brought out skyscraper modern, points out Schwartz. Now, he says, we are getting into our relaxed period, the reason for the popularity of the sculptured look.

"The sculptured look," he says, "plays up form, structure and engineering. Wherever strength is required structure is emphasized but you get a feeling of lightness and beauty in the piece because of the tapered line."

Details in Technique

Schwartz says in determining how to put strength into a chair he avoids mitering corners. He fastens a chair together where it can take the strain. He took the curve of a tree where the branch shoots off as his design for the back of the chair so that at the seat back, a graceful line runs down the back and for several

(Romweber)

SCULPTURED LOOK—Harold Schwartz, designer, got his idea for this table from a tree trunk. Below is a posture chair.

inches out from the seat before it is joined to the front section.

Schwartz accounts for the fact that even in lower priced modern furniture sturdiness as well as

eye-appeal is emphasized because the "United States never has been so home conscious," and designers of budget furniture must compete with better designers if they are to sell the average woman today.

A Man in the Picture

Homes are no longer just for women, either, he points out. The man has a big say in what goes into his home—and he is willing to pay the price for comfort and durability. Says Schwartz:

"American women basically have good taste. If they would spend as much time selecting their furniture as their clothes they could have beautiful homes."

Mr. Schwartz also has just introduced the "suspended look." This is an interesting arrangement of desk and shelves which has all the advantages normally incorporated into a permanent storage cabinet, except that they can be used as room dividers between living room and dining room.

Homes Going Up Fast Here

Builders have added more than 1,500 homes to Big Spring residential districts in the past five and a half years—more than 1,000 of them in the last 29 months.

Constructed since Jan. 1, 1947, have been 1,527 new residences. Since Jan. 1, 1950, a total of 1,040 homes have been built, including 278 so far this year.

Peak of the post-war home construction boom was reached in Big Spring in 1950 when 460 new houses were built. The number dropped to 346 in 1951, but this year already offers assurance of a new record with the 278 residential structures built or under construction and 300 defense rental units virtually certain. Permits are to be issued this week for 68 of the 300 homes.

Value of 1950 residential construction, not including repairs, alterations and additions, was \$2,216,500. For 1951 the value was \$2,025,240, and thus far in 1952 new residential building is valued at \$1,377,633.

Alterations, additions and repairs added \$248,679.50 to residential building totals in 1950; \$287,390 to the 1951 aggregate; and has amounted to \$135,830 this year. Though the type of construction involved in the alterations and additions is not shown in city building permit statistics, a number of the projects represent additional living units for the city.

Record for the last five years and five months shows 215 homes built in 1947; 154 in 1948; 218 in 1949; 416 in 1950; 346 in 1951 and 278 through May 31, 1952.

Monthly record for 1950:

Month	Res.	Units	Valuation

Totals	278		\$1,377,633

Room Can Now Be Floored With Oak, Used The Same Day

Oak flooring that requires no finishing treatment after installation now can be obtained from lumber dealers in most communities. The material is completely prefinished at the mill. A room can be refloored with prefinished oak and put back into service the same day.

New Hardboard Top Saves Picnic Table

Unightly picnic tables can be streamlined by the addition of an overlaid top. Recommended for this purpose is Masonite Tempered Presdwood, because it will last indefinitely and it has a smooth, easily-cleaned surface.

Cover the bench tops with this material too.

Panels four feet wide are available at lumber dealers. Simply nail them over the boards. In doing so you will bridge the open joints and provide a sanitary, silver-free surface which may be decorated any attractive color with exterior quality paint.

If the legs of the table are shaky, nail to them a piece of the Tempered Presdwood, which will brace them.

Families wanting a backyard picnic table may build one from free working drawing No. AE171. Send a postal card to Home Service Bureau, Suite 2039, 111 West Washington St., Chicago 2, Ill.

South Heavy Producer Of Oak For Flooring

The Southern Forest, embracing 211 million acres, makes the southern states as a group leading forest area in the nation, according to the U. S. Forest Service. One of the principal products of the area is hardwood flooring. Together the Southern and Appalachian regions account for approximately 90 per cent of the country's entire hardwood flooring supply. All but about five per cent of that volume consists of oak, the most popular flooring for homes.

Safe Rat Bait Holder

A rat bait holder that is safe for pets can be made inexpensively by the farmer. Poisoned bait is accessible only to the rodents, who enter and leave the self-feeder through 2" holes at floor level. Used in the construction are ends and bottom of 1"x6" lumber; front, back and slanting partition, Masonite 1/4" Tempered Presdwood. The hinged top is a framework of 1"x2" lumber covered with Presdwood. Dimensions of the device are 18" wide, 16" high and 6" deep.

Screen On Chimney Keeps Out Insects

Ordinary window screen placed over the top of the chimney will keep mosquitoes, flies and other insects out of the house during the summer.

The screen can be held in place by cementing a brick over it at each corner of the chimney. If left in place the year around, the screen will prevent sparks from flying out with danger of setting fire to the roof.

IMPROVE YOUR HOME AND

BEAT BUDGET BLUES

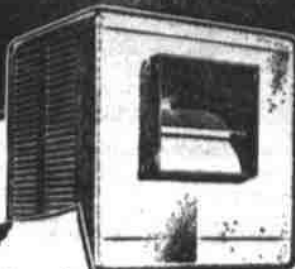

WITH THIS
NEW CARPET
BY LEES

A carpet miracle becomes a boon to your budget! Presenting beautiful Successor by Lees—a carpet that proves fine carpets can still be reasonably priced. It's woven with sturdy carpet rayon yarn—proven for durability—tested for quality. Rockbridge is made in a wide selection of patterns and colors—all at the same low price. Choose a floral or a modernized plume motif that will do wonders for the appearance of your room. Easy to clean. Safe from moths. Get Rockbridge by Lees and buy carpet for that extra room with the savings!

Use Modern Materials For Odd Job Short Cuts

Modern materials, such as hardboards and plywoods, new paints and other finishes make it easy for householders with no more than average skill to add many decorative and useful details to a house.

Very often older homes have old-fashioned fireplaces that are unused in various rooms. Sometimes the mantels are especially attractive and add definite charm that you may be reluctant to sacrifice. The removal of an old fireplace and plastering and redecorating the wall can amount to an expensive operation. Still the draft, dirt and heat loss involved must be reckoned with.

In such cases there are several ways to close the opening and retain the old marble, Dutch tile or carved mantelpiece.

In some old bedrooms the fireplace flue has been sealed and the firebricks covered with highly glazed colored tile, which is easy to keep dusted.

A Panel Can Close Opening

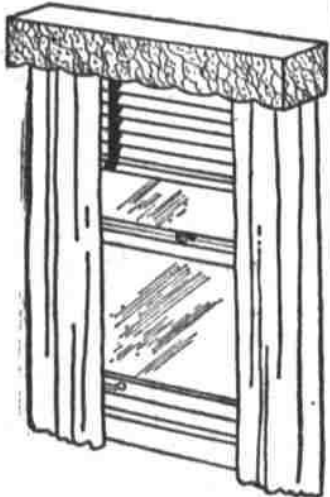

More economical, however, is the use of a panel fitted into the fireplace opening. These panels are easily cut out of tempered hardboard sheets, available at any well stocked lumber supply house. A frame of 1x2 lumber is built in the fireplace opening and the panel is attached with screws. Chromium plated round-head or Phillips screws in cup washers, or flathead screws slightly countersunk and covered with wood filler make a neat job.

Some people decorate such panels with a hand painting. In these cases, two coats or more of flat white paint are used as a sealer to give the artist a suitable surface. Amateur photographers often use a mural blowup of a favorite snapshot, mounted on the panel with rubber cement. Photographic murals displayed in offices and public places are nearly always mounted in this way on hardboard panels.

Lacking any such special talents, you can get a good effect with decalcomanias or stencils.

Cornices for Windows

Other easily built features for the home are window cornices. These permanent valences, boxing the tops of drapes and curtains and hiding curtain rods and draw cords, are easily made with a shelf of one-inch lumber

around which $\frac{1}{2}$ -inch-thick pressed wood is nailed or screwed.

The shelf is made with ends dropping down in the form of an inverted U. These ends provide secure fastening for the hardboard facing. They also provide anchorage for combinations of curtain rod fixtures, accommodating both drapes and glass curtains.

The lower edge of the hardboard facing can be cut in a simple scallop design with a scroll saw or coping saw. Leatherwood, an embossed pressed wood, simulating the grain of Spanish leather can be given a two tone finish that is very effective. Or the cornice can be decorated in harmony with the drapes, woodwork or other interior motif.

Sanitary Dog Bed

And while you're building things, you might turn out a bed for the dog. When Junior comes home with a pup, you have to train the newcomer to get used to sleeping in his regularly appointed corner. A box or a basket may do in a pinch, but a permanent bed that can be easily kept clean and free from

odors will keep more peace in the family.

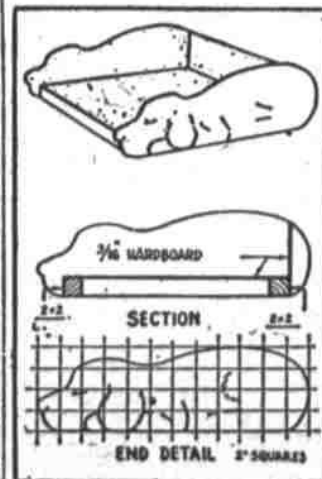

You can make a square frame out of 2x2 lumber, figuring about 18 inches wide and 20 inches long to take care of a small dog. Over the frame, one sheet of $\frac{3}{16}$ -inch hardboard, nailed or glued in place, will provide a seamless and splinter-free floor.

Sides for the bed can be cut out of the same material in the pattern of a sleeping pup. Two pieces of 1x2 lumber reinforce the back corners and provide fastening framework for the sides and back. The front is left open.

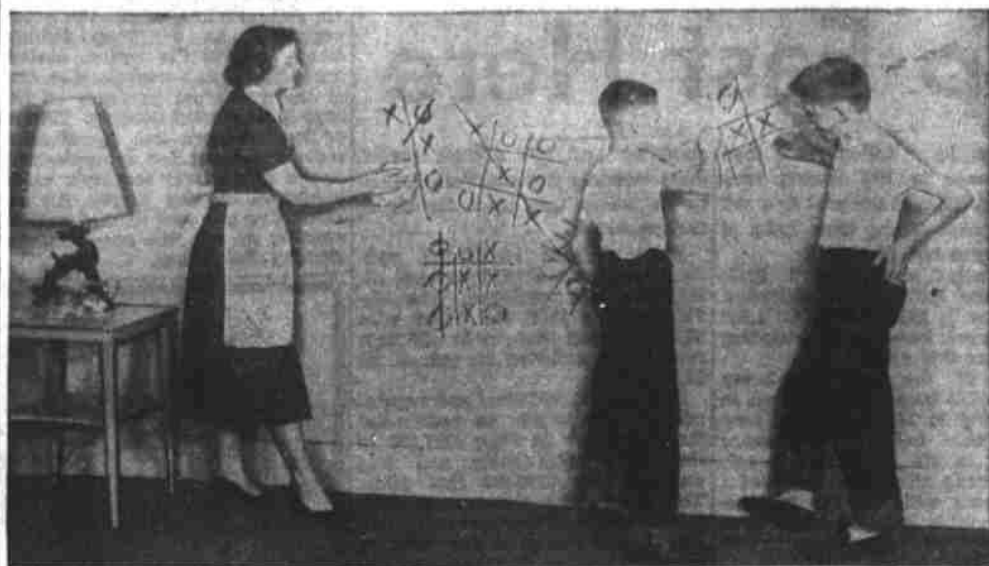

What's New in Paints

New paints make it easy to finish home woodworking projects as well as to do your own interior decorating. One of these, odorless paint, is now available in about every color you can think of, in both enamels and flat finishes. It's manufactured the same as any quality paint and then deodorized before being placed on the market. It's widely used now in hospitals, beauty shops and places where fresh paint odors would be objectionable.

Another unusual development is a synthetic rubber emulsion base paint that leaves no brush marks or lap marks and produces a satin-like finish. You can stop painting when you are only part way across a wall, pick up the job at any time—the next day if you have to wait

NEW PAINT SETS BAD EXAMPLE

BOYS ARE ADVISED not to try this, but if they mark walls covered with the new synthetic rubber base paint, crayons or even lipstick wipe right off.

—and still you can't tell where you left off and started in again when the job is done. You can touch up missed spots with no sign of patching.

This paint is entirely waterproof and can be washed continuously with soap and water. You can use it over wallpaper as easily as over woodwork, old plaster or wallboards. It dries in 20 minutes, forming a skin that withstands marking with soft lead pencils, crayons or lipstick—all of which readily wipe off.

The rubber-like seal, which it provides, makes an effective vapor-barrier on the interior of outside walls. About the only places you can't use it are surfaces exposed to extreme heat, or over casein cold water paints.

AUTOMOBILE IN THE HOME IS A PROBLEM

The automobile has brought about big changes in the American home.

It took away the use of front verandahs. It made the barn—now the garage—part of the house. It closed up many back doors by making it handier to carry packages in, and garbage out through a door from kitchen to garage.

Now the automobile is making another change in houses, and houses in turn, are demanding a change in the automobile.

The automobile brings so many guests to the house that there is less and less use for the front door. With living rooms moving toward the back yard, many houses are being planned with no front door—the main entrance is from the garage.

It costs so much to build a garage, and the space is empty so long, while the car is gone, that garages are being turned into car porches, and even into glass enclosed recreation rooms and conservatories.

But automobiles still drip oil and grease on these floors. So if the car is going to be brought into the house, it has to reform. Manufacturers will have to do something about house-breaking their automobiles.

Some architects have tried low curbed rectangles in the middle of the floor of their car porches. When the car is gone, a folding table is placed over this opening. But people who have tried it, find it a makeshift. Oil and grease, dripping on the asphalt tile with which they have paved these playrooms, disintegrates the tile.

Apparently the only solution will be metal diapers for cars.

Does the Price Include Mortgage?

If you sign a contract to buy a house for \$25,000 "subject" to an encumbrance of \$10,000, do you have to pay only \$15,000 on closing the deal, or \$25,000?

George F. Anderson, legal expert for the National Association of Real Estate Boards, recently pointed out that it is important to find out what the seller, or broker, means by the word "subject."

"There are many cases," he observed, "holding that when the word 'subject' is used, the encumbrance is not deducted from the purchase price. It's a tricky little word. Use it with care."

MORTGAGE-FREE

Everybody doesn't have a mortgage. According to the Housing and Home Finance Agency in Washington, more than half of all nonfarm homes in the United States are mortgage-free.

Heat-Proof Paint For Radiators

To paint radiators or steam pipes you'll get best results by using special heat-proof paints that will not crack or discolor up to 500 degrees. Such radiator and range enamels are available in a wide range of colors and provide a porcelain-like finish. Don't use aluminum or gilt paints, because they tend to insulate and cut down the amount of radiation. Clean the surface well and sandpaper it before painting.

Rope in Concrete Gives Flag Pattern

An easy way to get a flagstone effect in concrete walks and terraces is to lay pieces of heavy rope in the concrete surface in the pattern desired until the concrete sets. Various subdued or bright colors can be worked into the surfaces separated by the ropes as the concrete is troweled. When the rope is removed the impressions left are filled with contrasting colored pointing cement.

Accordion-Style Doors Conceal Spare Bedroom

MODERN FOLDING doors are smartly plastic covered with sound-deadening air space between the two surfaces. They can close off an end of a living room to create an emergency spare bedroom.

Modern Methods Produce Improved Hardwood Flooring

Most strip hardwood flooring nowadays is tongued and grooved at the mill. This is done by running the flooring pieces through machines which cut a tongue on one side and end, and a groove on the other side and send. This process also is known as side and end matching. The tongue and groove allow the flooring pieces to join one another more snugly than would otherwise be possible. This close joining also results in a floor of greater solidity and strength. Another feature of modern strip flooring is the undercut. This consists of a groove on the bottom of each piece which enables it to lie flat even though the subfloor surface may contain slight irregularities. While tongued and grooved flooring is preferred by most persons, you can obtain square-edge pieces if you wish.

Consider All Angles Before Buying Home To Assure Your Satisfaction

Everything from an odd-shaped kitchen to the pocketbook of the size of the family should be taken into consideration when a person goes to buy a house. That's the opinion of a group of local real estate agents.

Money is the biggest factor in selecting a house, they all agree.

Before a prospective buyer goes to purchase a home, some rough estimate should be made as to the amount of money which can be spent on the house. Of course, the payment plan lessens the problem, but still the real estate agents advise the buyer to survey the monetary factor before making a purchase.

Location of the lot is another factor requiring a great deal of consideration, the agents report. In considering the location, the buyer should think of the future, as well as the present.

For ideal locations and ideal neighborhoods can and frequently do move, leaving the purchaser and his family in an undesirable sector in a few years.

Location in regard to churches, schools, and shopping districts also make a house more desirable and saleable.

Buying a house without taking into consideration the size of fam-

ily usually results in loss of money, in addition to loss or waste of space, the real estate agents agree.

One agent commented that sometimes an odd-shaped kitchen is more useful than a square or rectangular one. The shape of the kitchen determines the number of steps needed in preparing a meal, he added.

In addition, he commented that much space in a house is wasted in walls and halls that the average buyer doesn't notice.

Insulation, both for fire and temperature, increases or decreases a house's worth, one agent stated.

How the house faces on the lot and the direction the lot faces is

a big factor in house-buying problem.

The position of the rooms—especially the bedrooms—should be studied in selecting a house, another real estate agent commented.

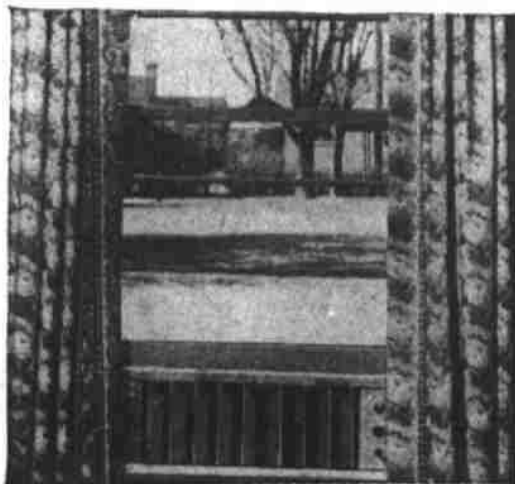

But, he added, the rise in the use of air conditioners has partially lowered the importance of this factor.

Should a person desire to buy a lot and build a house, many of the above factors should be studied. In addition, the prospective purchaser should select a lot and build a house within the same price range as the neighboring houses. It will increase the value of the buyer's house and yet will not lower the value of the neighboring homes.

WESTERN INSULATING CO.

COLOR MAKES A PRETTY HOME

BY VIVIAN BROWN

Three Basic Hues Allow For Accents

What is the recipe for a pretty home?

Should it be conservative . . . giddily decorated . . . cramped and overstuffed? Many homes, violating all the rules of good taste are nothing more than eye sores.

What can you do to make your home more attractive?

Harmony in Color

Your home should have sugar and spice—but the spice should be used in easy doses. Colors are more compatible, usually, when added to your home just as spice is used in concocting a culinary delight—little by little.

Color consultant Beatrice West, who has decorated the exteriors and interiors of a great many housing projects, including Levittown and a New Mexico development for atom bomb workers, says:

"In planning your home, first start with color—before you purchase a piece of furniture. A good idea is to select something you've fallen in love with—a drapery or a rug—and plan it as your basic color. Then build from there."

Selecting Accent Colors

Miss West suggests that you start with a theme, using a maximum of three basic colors. The basic ground should be neutral and soft, highlighted by small pieces in brighter colors. These color accents if used in pillows or odd chairs can be in addition to the basic three.

A good rule of thumb, says Miss West, is that only one pattern should predominate, whether it is drapery, slip-cover or whatever. In addition to this a tone-on-tone pattern in which all shades are of the same color can be used, or a coordinated stripe, coordinating colors to be

Smart Design in Modern Carpet

BLACK AND WHITE TREND—Here it is in a rug designed by Edward Fields. The room is accented in gay hues of orange-copper.

found in the pattern which predominates in the room.

Miss West suggests the following color schemes might be helpful to the amateur decorator:

Black and white background accented with red, green or the orange-coppers.

Lime or chartreuse combined with blue-green or any of the greens using red, coral and/or white for accent.

French blue combined with white and accents of fuchsia, coral, or purple to lend warm tones.

Miss West cautions that the colors of the exterior of your house should be taken into consideration when planning the interior.

White is being used more and more as an accent in the home now that we have washable fabrics such as nylon and orlon. Lovely provincial motifs in black on white backgrounds

bring glamor to drapery fabrics; there are lovely lamps with attractive white bases; black tole trays with wrought iron stands serve as end tables. Solid black rugs or carpets of small or large black and white squares add glamor to the black-and-white scheme.

Pillows for Accents

Accents in bright colors such as throw pillows will set off a gray, gold, light blue or black sofa to great advantage.

A recent survey showed that men have a preference for cool colors—blue was the choice of about 45 per cent of the men polled. They like red and purple accents, and also approve of green, yellow, orange in that order.

In decorating your home when it comes to color and comfort, particularly, remember home is for your husband, also.

Easy to Clean Fabrics Win Place on the Wall

Time was when a fabric meant heavy or light in texture, floral or striped design. Most fabrics had to be dry cleaned.

Today you can have your choice of washable rayon, nylon, cotton, orlon—magnificent antique satins, velvets and easy-to-care-for plastics which can duplicate almost any fabric in appearance. A wide range of decorator colors in solid hues, lovely muted florals and interesting striped fabrics bring beauty to the American home.

The improvement of fabric and design has been due to the education of the consumer, says Margaret Reilly, stylist for Waverly Fabrics.

Cites National Response

She points out that heretofore New York, Chicago and a couple of other large cities would be at least six months ahead of the rest of the country in the selection of fabric designs. But today, the job of the fabric people is easier because good design gets a national response. Says she:

"It used to be that most fabric companies would have to keep 'pot boilers'—clumsy bouquet designs—in their lines for the mass market. Today you can't give them away."

Miss Reilly says she has several theories about the great interest evidenced in the home today. She believes that GPs saw prettier homes than they'd been used to while on their travels, that parents want to dress up their homes prettily for their teen-agers to keep them at home more, that television makes the family entertain more and that husbands are taking a greater interest in the home.

Why Provincial Is Popular

She is amazed at the desire for high style colors—French lilacs, greens and earth colors. Provincial design in every form is much in demand, she says, principally because Provincial having roots, the designs are better than average. Simple little Provincial designs go with either traditional or contemporary furnishings—another reason for their popularity, she says. These smaller designs are better scaled with softer colors so that patterns do not look too busy.

A great many people are putting fabric on their walls, she says. This is helpful where walls are uneven and messy. She advises the following method for applying fabric to walls:

If you want to put the fabric on permanently so that it doesn't scar, put wall paper paste directly on the wall (not on the fabric). Roll the fabric on, tacking it and then smoothing it down, removing the tacks as you go along. Use the vacuum cleaner attachment when you wish to clean wall fabric. If the fabric is to be a temporary arrangement, staple it or tack it to the wall. Then it can be taken down and washed.

Wall fabric does not soil as readily as paper because it is not so absorbent, says Miss Reilly.

MAKE EVERY ROOM COUNT

Why not treat your entrance hall or foyer as a room and not merely as a place to pass through, asks decorator Frances Lee.

Miss Lee suggests that a long narrow foyer can be made interesting by the use of wallpaper treatment and paint, and that a

spacious one can be utilized for extra seating space. Says she:

"Architectural wallpaper (a brickwall motif, columns, etc.) or flowered urns in panels which are pasted to a painted wall, add particular interest to an otherwise dreary small foyer or entrance hall. If the foyer is large enough to make a grouping of loveseat and chairs, the arrangement will prove very handy when entertaining."

Miss Lee also pleads the cause of that extra room used as a den or guest room. Why not combine both, she asks? She illustrates by the example of one she did herself. The room is used as a guest room, play room, luncheon room and brings the outdoors indoors insofar as the motif goes. She calls it her Virgin Islands room.

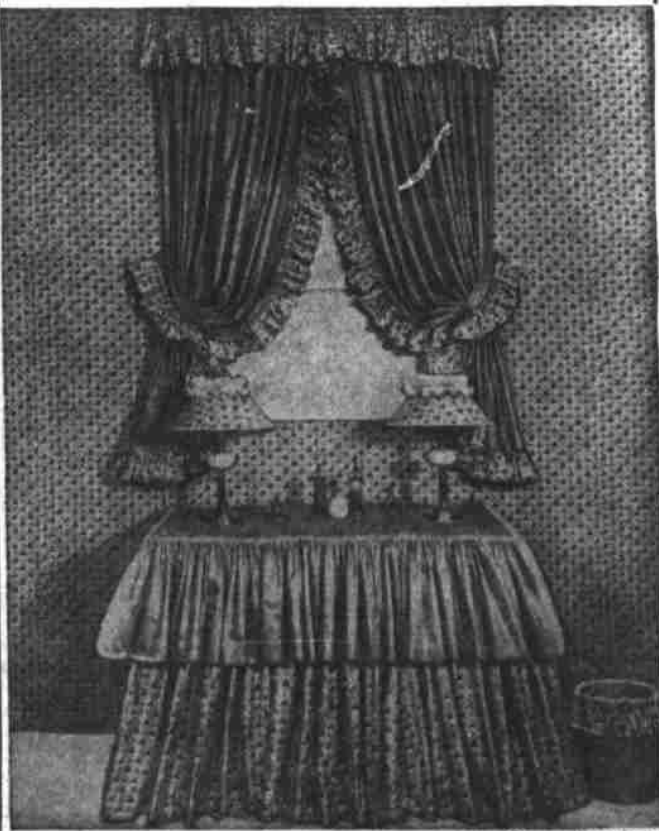

On one wall, which also has two windows, she used a white brick wallpaper and put turquoise shutters at the window. In between the two windows is an over-sized bird cage with 12 Venezuelan sugar birds in all their gay plumage. Alongside that wall and between the two windows is a pale blue and gold wrought iron dining table and chairs.

The wall opposite is wallpapered in a shutter pattern and sea design with a dado of brick wallpaper.

OUTDOORS INDOORS—Shutters, brick design wallpaper and iron furniture by Frances Lee. Lamps have sea shell bases.

Warm and Cozy Decorative Effect

FABRIC GOES TO THE WALLS—Provincial design also is carried over to the dressing table, curtain trim and lampshades.

Limits Are Extended 4 Times In 17 Months As City Grows

Big Spring's city limits have been extended four times in the past 17 months, increasing the corporate area by approximately 325 acres and providing sites for scores of new homes.

Latest annexation was completed Tuesday and adds the Hillcrest Terrace Addition, north portion of the Amended Piner Heights Addition and 35 acres of unplatted land to the city. Homes already are under construction in the platted section and the 35 acres apparently will be made available for development.

The land, property of Howard, Martin, Midland and Ector Counties, is expected to be sold a public auction June 27.

Other subdivisions annexed since Jan. 1, 1951, are the Monticello

Addition and Howard County Junior College, August, 1951; Hayden, Thixton, Sunset Place and Sunset Additions, August, 1951; and Wiley and Buckner Place Additions, plus some unplatted acreage, May, 1951.

Housing developments currently are under way in the Monticello and Wiley Additions. An eastward extension of Monticello is planned by developers, a move that will add sites for several score additional homes.

Work is expected to start Monday on the first of 300 homes in Monticello and the proposed extension eastward.

Also planned is annexation of an undetermined amount of acreage spreading from the present west city limits to Webb Air Force Base, an area including two proposed

residential developments—Indianola Addition, planned by Lumberman Louis Thompson, and Avion Village, projected by M. S. Goldman. The two developments will include sites for more than 200 homes and a score or more of suburban business buildings.

Developers reportedly are planning construction of some 300 houses in the area east of HCJC property. City Engineer E. L. Killingsworth said a request for annexation of some 50 acres in that section may be forthcoming within the next week or two.

Total area added to the city in 1951 and thus far in 1952 is 325.126 acres. Annexations in prospect for the immediate future may exceed that amount.

Uses Most Asbestos

The United States is by far the largest consumer of asbestos in the world. Asbestos fibers are fabricated into hundreds of items, including textiles, brake linings and

electrical insulations. The biggest user of asbestos fibers is the building materials industry, which combines them with Portland cement to make siding and roofing shingles, flat building boards and corrugated sheets.

GOOD SIGNS IN A HOUSE PLAN

There never was a perfect house plan. Architects will tell you the perfect plan will never be drawn. A house that seems to fill all the needs and likes of one family will not necessarily appeal as strongly to another family. But certain features can mark any plan "good," or "not so good."

It's easy to recognize many of these signs when you look at a house plan.

One good sign is the ease of circulation—the way you can move around in the house. Looking at a plan you can visualize how you would come in the front door, or back door. You can see the routes you would take from one room to another. These are traffic routes. In time they wear the carpets thin, but every house has traffic routes.

Some of these are sensible, some annoying and some expensive to provide for. It used to be that most houses were planned with long halls to take care of traffic. When building costs began to go up, architects figured that such halls were more or less waste space and they tried to keep this space down to about 10 per cent of the total floor area. When they succeeded, they called it a good plan.

Advantages of Center Halls

About that time they rediscovered the advantages of the center hall plan, which distinguished many fine old colonial homes. The goal then became the planning of rooms around a center of circulation so that each room could be a dead-end room, whenever possible. This made it unnecessary to walk through a living room and on through a dining room just to get a drink of water in the kitchen. So a plan with dead-end rooms became a good plan.

This made it easy to plan a two-story house in the shape of a box when building costs shot upward again. Home buyers had to get as much house for their money as possible. A two-story square or rectangular house was the most economical. It packed a maximum of rooms in a minimum of outside walls and foundations. And it was economical to heat a house with some rooms above others.

A fairly big house could measure, say, 30x30 ft. That produced an area of 900 sq. ft. for each floor, or a total of 1,800 sq. ft. And the house measured 120 ft. around, calling for only 120 linear feet of foundation. If the second story rooms were placed down alongside the first story, you'd still have 1,800 sq. ft. of area, but the foundation would measure 180 ft.—50 per cent more excavation and concrete or masonry foundations—and the roof would be twice as big.

Other Economies Involved.

So the two-story house became a good plan. Other economies involved plumbing, wiring, heating pipes and ducts. If a bathroom were placed over a kitchen, plumbing stacks ran straight up. In a one-story house the bathroom might be far from the kitchen, calling for long plumbing lines.

Then another jump in building costs made room sizes change. You'd look at a plan and instead of finding a room with an even 12 or 14 ft., it might be 11 ft., 4 in., or 13 ft., 4 in. This showed the architect was figuring on standard lengths of lumber to cut waste and labor costs in sawing lumber on the job.

Using a 12-ft. joist allowed 4 inches at each end for its share of walls or partitions, so the room came out 11 ft., 4 in. wide. Since lumber comes in multiples of 2 ft., making a room exactly 12 ft. wide could call for a 14-ft. joist cut down to 12 ft., 8 in., with the sawed-off piece burned as waste.

So these odd measurements became a sign of a good plan.

Grass Roots Ideas

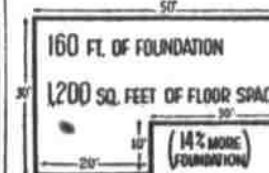

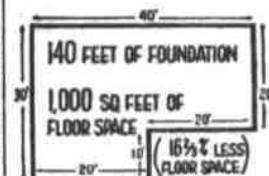

And people living in houses found all kinds of things they considered wrong about their houses. For instance, a little Cape Cod cottage, lacking a front porch, vestibule or entrance foyer, meant that in rainy or stormy weather people had to step directly into the living room with their dripping clothing. If a house had no outside cellar entrance, ashes and laundry from the basement had to be carried across the kitchen from wherever the cellar stairs were located.

Front door protection and rear service vestibules linking the back door with both kitchen and cellar stairs became signs of a good plan.

Women never seemed to find enough storage space. They demanded more closets. But with building costs climbing to \$10 to \$15 or more per square foot, it was expensive to build closets.

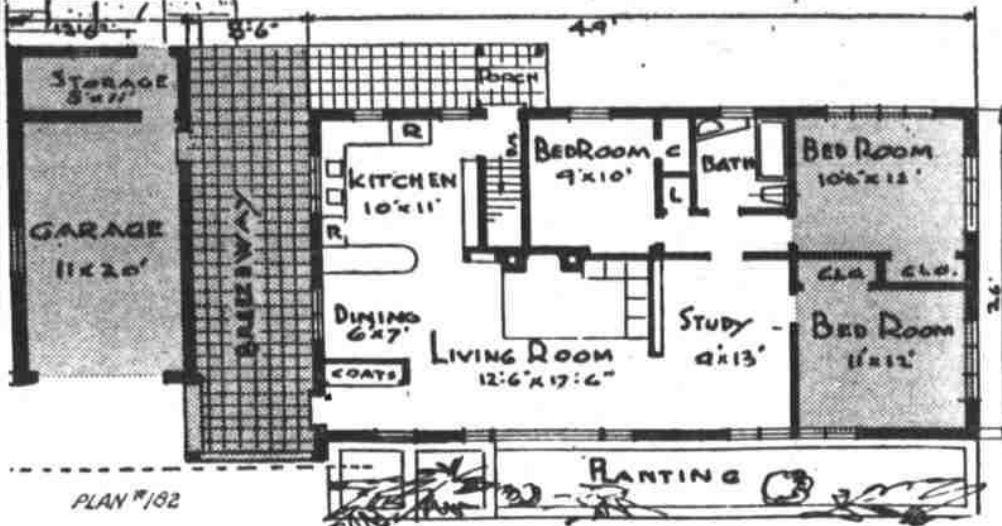

Star Drill Cuts Holes in Concrete

A star drill will cut a hole in concrete twice as fast as a cold chisel. Actually not a drill, but a four-edged chisel, it is driven with a hammer. Lifted and twisted after each rap, it will not become stuck in the hole.

WHY a simple rectangle nets the most floor space with the least foundation and roof framing.

A Home That Grows With Family

THREE STAGES of construction are possible with this plan for an expandable house, which starts with the complete four-room cottage in the center and grows with addition of garage and breezeway on one side, then two extra bedrooms on the other side. Paul T. Haagen, architect, 360 No. Michigan Ave., Chicago 1, Ill., has kept this plan No. 182 in simple rectangular shape for economy of construction. Aside from bathroom passageway, there is no hall space. The house covers 1,274 square feet without the garage wing.

Architects revised their thinking again. Floor plans showed halls almost vanishing. Open planning—the elimination of many partitions—marked the plan. Space needed for passage could also be used for dining at a time when people would not be passing through. Dual purpose and multi-use rooms came in to keep costs down. Living room and dining room were merged. Porch and garage were merged in a carport. Laundry and kitchen could be merged because of modern equipment. This combined with new heating systems eliminated much of the need for basements. House plans changed radically.

Walls of windows became practicable with the use of double panes of glass sealing an insulating air space between them. This feature turned some houses around, putting the living room on the rear, where a view could be created by landscaping the backyard.

Shortages of copper and other metals made it more important than ever to keep bathroom and kitchen adjacent. By placing them both in or near the front of the house, water supply lines were shortened; turning the house around was further encouraged, and these became signs of a good plan.

Exceptions Prove Rules

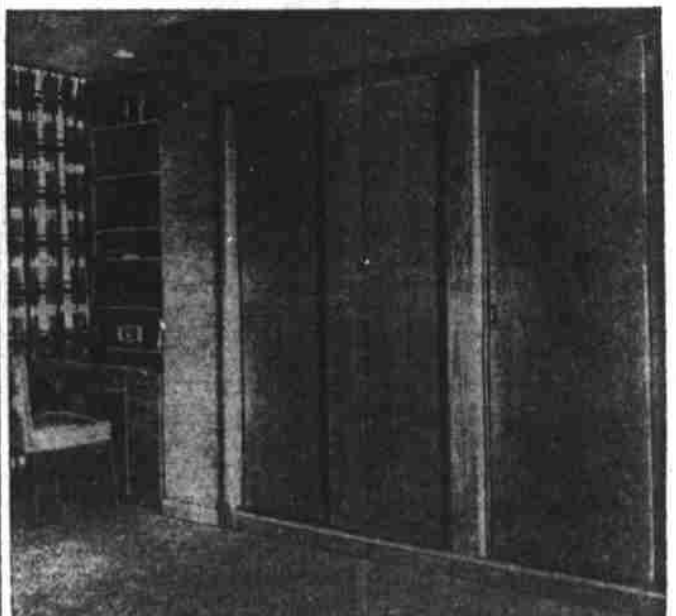

Here was proof that all so-called rules could be broken. You can compromise. Family needs, likes and budget become the final tests. But some things remain constant through all changes in plans. Privacy is fundamental. Wall space is essential for large pieces of furniture. Cross ventilation is always important. A fireplace must be located for natural furniture grouping.

And a plan should be popular. The more people your house

appeals to, the more resale value it will have and the better investment it will be for you.

A good plan indicates that this is a house almost any family would like to live in.

Sliding Closet Doors Save Space in a House

SLIDING CLOSET DOORS save the space in a room that is needed for swinging doors and eliminate hidden corners in a closet. Concealed rollers operate on unobtrusive rails. The doors can be built up from ordinary plywood and painted, or surfaced with hardwood veneers for natural finishes. Sliding doors in storage walls characterize the modern house plan.

Investors Steering Clear Of GI Loans

Ex-service men thinking of obtaining a GI loan toward building or purchasing a house should think twice.

The investors, for the most part, are steering clear of such loans. Like the famed dodo bird, the GI loan is practically extinct.

The law governing the GI loan is still in effect but until its interest rates are liberalized, it appears it will benefit the ex-service man little.

Such was not the case immediately after it went into effect. Investors had a quantity of loose cash and sunk a considerable amount of it in housing for ex-GI's. But the boom died a'born.

Regulations pegged the interest rates on such loans at 4 per cent and investors found they could get more return for their money in other investments.

The ex-GI seeking the loan finds a complicated procedure in obtaining same, for the simple reason he must find someone willing

to invest the necessary capital in his housing venture and get the Veterans Administration to agree with him on appraisal of the property.

If he has a rich uncle or a close friend to tap for a loan, it probably would be much simpler to obtain a GI loan but then, perhaps, he would not be forced to approach the VA for such help, anyway.

The FHA plan for building is much more popular and, of course, a going concern. Some real estate operatives will tell you it was the finest contribution Franklin Delano Roosevelt made to our way of life.

You generally pay 4 1/4 per cent for an FHA loan, 4 1/4 of which goes to the investor. The remaining 1/4 per cent goes into the fund for operating expenses of the organization.

One authority is quoted as saying that, had the FHA plan been in operation for the past century, the fund now controlled by the FHA would have been large enough to retire the national debt.

Individuals seeking FHA loans need only to seek out individuals or concerns handling same, establish their credit ratings. Miscellaneous expenses in connection with such an investment run in excess of \$300, under ordinary circumstances.

Relaxation Of Payment To Aid Local Purchases

The government's relaxation of the regulation concerning down payments on home furnishings and the length of time needed to purchase the commodities has had little effect on sales in Big Spring, a survey of local merchants revealed.

But the merchants admitted the new developments definitely will aid the people. Young people, stated one merchant, would find it hard to furnish their homes if the ruling had not been altered. As one store manager put it, "It'll raise the standard of living in many cases."

A majority of the stores contacted reported that they required a down payment, regardless of the change in the ruling.

Despite the change in the law, some stores cannot sell merchandise without a down payment because the payment is required by the credit companies. Of the merchants still requiring a down payment, 10-20 per cent is the rate charged.

One store manager commented he felt the change of the law would help the stores in a round-about way and that long-range developments could be realized from it. "But, he added, the people aren't flocking to my store as I had expected."

The merchants' range of payment length is from six to 36 months.

Plan Rooms From Floors Up Is Idea

The logical starting point in developing a new decorative plan for a room is the floor, according to leading interior decorators.

They say that planning a room from the floor up makes sense because from a decorative standpoint the floor serves as a frame for the furnishings.

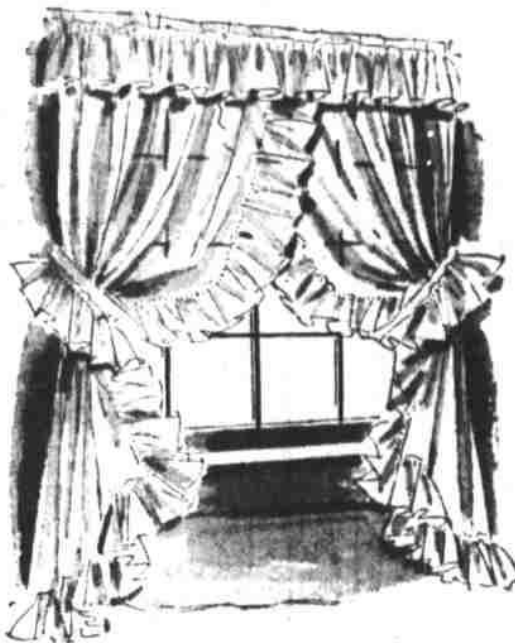

As such, it is a basic feature and commands major attention. Tasteful planning therefore demands not only that a floor be attractive, but also that it harmonize with other elements. Practicality should be considered, too. The floor should be one that is easy to keep clean and well groomed.

These fundamentals of successful room planning are executed especially well in the currently popular practice which utilizes the natural beauty of oak floors to fullest advantage. In this styling a relatively large area of oak flooring is left exposed. Set off with attractive accent rugs, the gleaming oak blends well with traditional or modern furnishings of any color and additionally fulfills the requirement of easy care.

CLOTHES
STYLED IN SYRAC

Lightning's a Hazard In Exposed Locations

Houses in exposed locations can be natural targets for lightning. On farms, for instance, lightning causes more fires than any other hazard. According to the National Board of Fire Underwriters, thousands of buildings are destroyed in rural locations every year, between 400 and 500 persons are killed and more than 1,000 others are injured by lightning alone.

Contrary to popular belief, trees seldom afford protection and cannot be depended upon for safety. Fire prevention engineers regard trees as symbols of danger, especially when they overhang a house. These experts point out that lightning does not always follow the tree trunk to the ground. The bolt may jump from a branch to the broad wet roof of the house to find an easier path to the ground through the building.

Lightning Rods Work

Lightning rods of the right size and materials, properly installed have proved to be almost 100 per cent effective. The Underwriters' Laboratories in Chicago, which has been testing and approving building materials and equipment for more than 50 years, reports that out of 150,000 approved lightning rod systems installed in all

parts of North America, less than one per cent of the buildings were damaged by lightning in 30 years.

Adequate lightning rods work by providing electrical charges a direct and continuous route to the ground. In this way much of the electrical charge is dissipated before it builds up into a violent bolt. Without such a short cut, a bolt striking wood, concrete, brick or other materials that are poor conductors, sets up friction within them, producing heat that causes them to burn, or expanding them violently if they will not burn—splitting chimneys and walls.

The White House System

Part of the rebuilding of the White House in Washington involved the installation of a new lightning protection system. Bonded to that system were all metal objects, such as ventilators, television antenna and the flagpole. All roof conductors and flashing were grounded to water pipes and grounding rods. In 20 states, credits of 2 to 10 per cent are given in fire insurance policies covering buildings equipped with lightning rods that bear the master label of the Underwriters' Laboratories. Field inspectors check the installation of such systems.

LAYING ATTIC FLOOR

When laying an attic floor, saw the boards so the ends overlap only half the thickness of a joist, allowing support for nailing the end of the next board. Stagger the ends of floor boards so that too many of them will not end on the same joist.

Bulk Methods Of Selling Go Out The Window

By OVID A. MARTIN
Associated Press Farm Writer

WASHINGTON (AP)—The old cracker barrel has given way to brightly colored cartons of crackers and cookies. So have bulk methods of selling many other foods been displaced by tempting packaging.

The average housewife likes the change—but many officials who check up on distributors of food to see that they give correct weights wonder whether it is all clear gain.

At a recent meeting of weight officials here, I. M. Levy, Chicago's sealer of weights and measures, said the change has been accompanied by a lack of standardization that makes it difficult—if possible at all—for the customer to determine the best buy.

The consumer, typed by the woman shopper, had become accustomed to buying in pounds or such common sub-units as half-pound and quarter-pound. The Chicago official pointed out that, when a package approximates a pound container in size but is labeled 15 ounces, only the most discerning shopper will note the difference.

Levy said the greatest evil of lack of standardization is a confusion in the customer's mind as to the best buy when there are two variables—weight and price.

He gave this illustration: In one store he visited there were three brands of apple sauce. One was labeled one pound and four ounces, priced at 19 cents. Another was one pound and one ounce at 16 cents the third was one pound at 14 cents.

He said the average shopper would not spend the time to figure out which was the best buy from the standpoint of quantity.

Heads Chiropractic Association In Texas

DALLAS, June 6 (AP)—Dr. J. C. Shipman of Abilene again heads the Texas State Chiropractic Association.

He was nominated for a second term at the opening of the group's three-day convention yesterday.

Dr. R. E. Horton, San Antonio, and Dr. Clyde M. Keller, Dallas, were nominated for vice president. Dr. C. T. Harkey, Victoria, was the only nominee for secretary-treasurer.

Enter Portland Rodeo

PORTLAND, Ore., June 7 (AP)—Two Texas schools will compete in the National Intercollegiate Rodeo at the Portland Rose Festival here next week.

Officials said yesterday that entries are expected from Texas A & M and Hardin-Simmons.

Yugos Seeking To Cut Down On Wine, Rakija

By ALEX H. SINGLETON

BELGRADE (AP)—In this land of the plum and the grape, a cry for temperance—and ultimately prohibition—has been raised to cut down Yugoslavia's vast consumption of beer, wine and rakija.

Leader of the crusade is B. P. Tasic, a Belgrade University professor and a staunch foe of alcoholic drinking on the grounds that it "decreases working power, increases diseases, destroys families and leads to prostitution and crime."

Tasic claims a substantial following, particularly among students. Far more significant, however, was the fact that his appeal was printed in "Dorba," voice of Marshal Josip Broz Tito's government. As such, its contents are selected and edited carefully.

The professor cited these figures to support his contention there is too much guzzling going on in Yugoslavia:

1. There are approximately 300,000 alcoholics in Yugoslavia's population of 16½ million.

2. A school survey in Belgrade showed that of 1,000 teen-age boys examined all of them drank wine and two-thirds of them rakija, Yugoslavia's potent plum brandy.

3. In Ljubljana, capital of the Yugoslav republic of Slovenia, more than three million litres of wine and an equal amount of beer and rakija were drunk last year alone.

4. In the period 1948-51, more than two-thirds of the country's annual average plum production of 500,000 tons went to make hard liquor and approximately 80 per cent of the average grape crop of 770,000 tons went into wine.

Tasic thinks more of the fruit should be used for jam, for export and for soft drinks. He thinks a start could be made along the path of prohibition by barring sale of liquor to minors and to chronic drinkers and by creating a mass organization of teetotalers.

Mexico Peso Is Firm

MEXICO CITY, June 7 (AP)—After a poll of private and government banking circles, the newspaper Excelsior announced today that Mexico's peso is firm.

CAST-IRON BATH UNIT 171.45

Porcelain-enameled cast iron lavatory and 5-ft. tub, china closet. All resist stains, clean easily. Closet is fast, quietest type made—uses least water. All faucets, plugs, fittings and seat included.

TUB 86.95
CLOSET 45.50
LAVATORY. 33.90

AUTOMATIC GAS HEATER

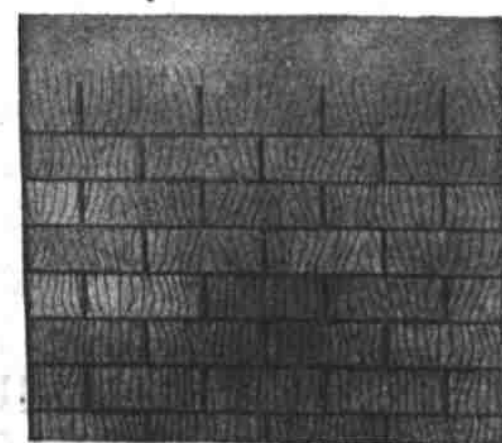

\$5 Monthly

FHA terms, installed. Deluxe 30-gallon model. Covered by Wards 10-year Protection Plan. Fast recovery capacity. Safety thermostat stops gas flow to both pilot and burner if pilot goes out. AGA approved. Baked-on enamel finish. Also available in 30, 40 and 50 gallon sizes.

REGULAR 4.29 EXCELRON 3.84 gal. Reg. 1.25 qt. 1.12

Rubber-based Flat Wall Paint that's really durable. You can scrub it year after year. Easy to apply—one coat covers. Primes, seals itself. Pastel colors. Deep tones available for slightly more per gallon.

WARDS THICK TAB SHINGLES

Low as \$5 Mo., installed*

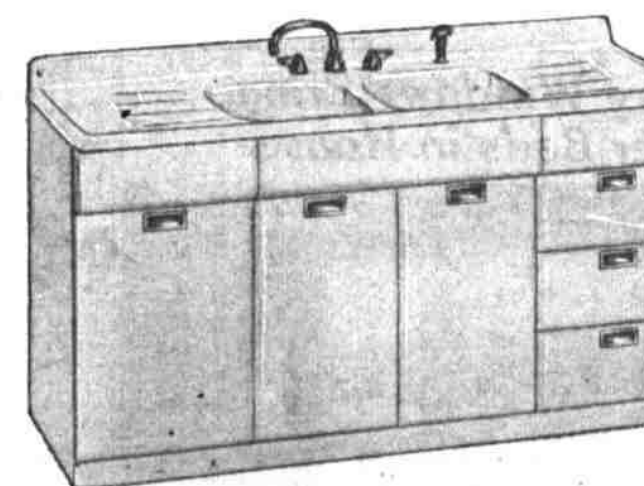

Asphalt roofing shingles with extra layer of asphalt on exposed surface. Ceramic granules retain color. Available in 8 colors. *Wards will arrange expert work at low cost. FHA terms, 10% dn, 3 yrs. to pay.

WAVY EDGE ASPHALT SIDING

Low as \$5 Monthly*

Hard ceramic granules imbedded in weather-defying asphalt. Self-aligning, self-spacing. Gray-white. *Wards will arrange expert installation at low cost. FHA terms, 10% down, up to 3 years to pay.

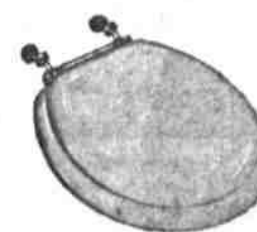

66" STEEL CABINET SINK

No money down on FHA 10 monthly, installed

Double basin, double drainboard. Porcelain-enameled top resists stains and household acids—cleans easily. 5 drawers, 2 compartments give you plenty of handy storage space—save steps. With fittings.

FITS ANY CLOSET 5.25

Durable hardwood seat resists splitting, cracking. 4-coat finish—white. Chromium-plated fittings included.

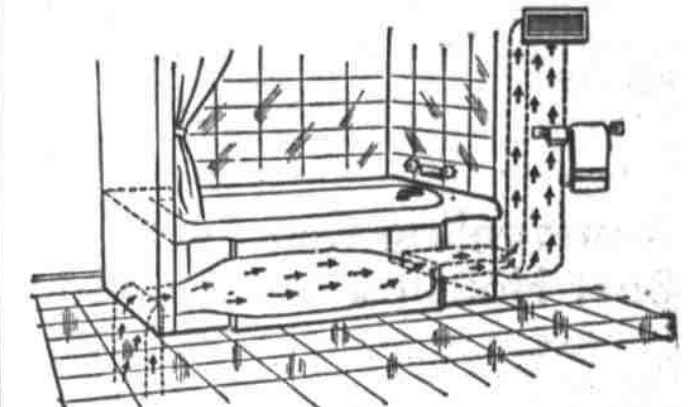

Heating Engineers Take Chill From the Bathtub

The heating engineer, who came back from France and had a small radiator installed in the bathroom wall behind the towel rack to keep his bath towel warm and dry the way he found it in a Paris hotel, thought he had something until he learned back to relax in his bathtub one cold winter night.

Try that bathtub trick without draping a towel over your shoulders and you won't be likely to do it again.

Still, bathtubs are made with sloping backs, so the heating engineers have come up with a way to make them comfortable. In fact, the National Warm Air Heating and Air Conditioning Association has developed several ways to make bathrooms more comfortable.

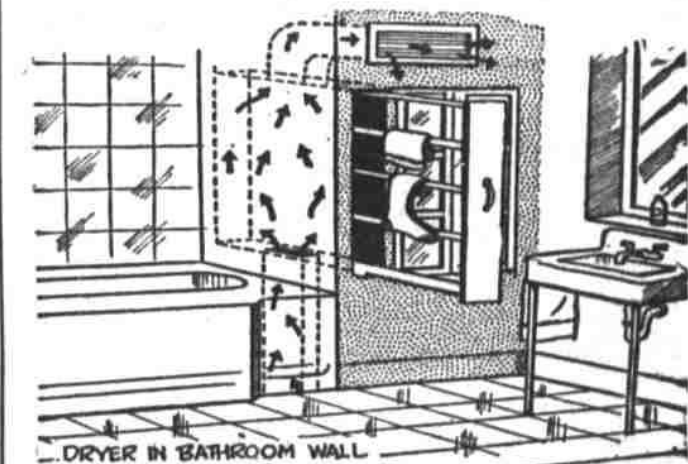

The hollow space between the lining and outer shell of a bathtub can be used as part of the warm air duct that heats the

HOW WARM AIR takes chill from a bathtub.

bathroom. One heating duct is brought up under the tub. Another duct leads out from the opposite end of the tub to the room's heating outlet. The warm air circulating in the shell of the tub keeps it warm at all times. The colder the weather, the warmer the tub.

Another trick apparently was devised by a heating engineer who, in groping for a towel, grabbed some of his wife's underwear that had been hung in the bathroom to dry. He devised

DRYING RACK slides into enlarged warm air duct.

a lingerie dryer, fitted into the bathroom wall and heated by a warm air duct on its way into the room. It keeps drying stockings out of sight and dries them quickly for free.

A built-in hair dryer is one of the easiest installed bathroom accessories. A small warm air register is placed in the bathroom wall about 40 inches above the floor. The exact location is best determined by measuring the height of the woman intending to use it, while she is seated on a bathroom chair or stool.

The duct to a hair dryer register often is an extension of the duct opening in the baseboard. The woman drying her hair closes the damper in the baseboard register, forcing all of the heat up through the higher outlet.

PAINT ROLLER CARE

A lamb's wool paint roller can be restored to fluffiness when it becomes matted by working it over with a coarse pocket comb. Keep a roller not in use wrapped in paper or foil to keep it clean. The metal parts of a roller, especially the bearings, should always be carefully cleaned.

BUILT-IN hair dryer can be provided by extending warm air duct head height for woman seated

Has Portable Floor For Outdoor Dances

A Scranton, Pa., tent company has added an interesting sideline in connection with its rental of tents for weddings and dances. For any outdoor use, it built a portable dance floor which it rents out. As a base, the company used 2x6 and 4x6 joists. To these were fastened a lamination of 5/8" marine plywood and Masonite 1/4" Tempered Presdwood, held together with glue and screws. Because of its smoothness and durability, the Tempered Presdwood surface is exposed for the dancing.

Cement Booklet

An informative 24-page manual, "The Asbestos-Cement Reference Book," has been published by the Asbestos-Cement Products Association, 509 Madison Ave., New York 2, N. Y. It describes the various types of asbestos building materials and how to apply them. Copies may be obtained free by writing to the association.

WHEN IT'S WISE TO MODERNIZE

BEFORE REMODELING this old farmhouse had little in eye-appeal.

AFTER REMODELING the house revealed this home-like charm.

Remodeling Can Be Your Best Housing Investment

Remodeling can very well be the best housing investment you can make today. It can give your family better living facilities for a fraction of what a new house costs.

You may feel that you have lived in your house long enough to know its shortcomings—maybe long enough to think the one small bathroom and old-fashioned kitchen are hopeless. But to duplicate the size of that house under present building costs might amount to two or three times what you paid for the place.

For a fraction of that outlay you can accomplish a lot of remodeling, increasing livability and resale value.

What to remodel depends on the individual house, on your needs and your budget.

Check With Architect

If you plan exterior changes, or want to remove a wall, it's a good idea to see an architect. If you are handy with tools and want to do some, or all of the work yourself, check with your local building inspector.

List the changes you want to make and get an estimate from a contractor. He usually can help you arrange for a loan at the bank to finance the work in easy payments.

Building material and equipment manufacturers are aware of the demand for remodeling. They are making it as easy as possible for home owners to do the job. They publish complete instructions to show how to install kitchen cabinets, pre-fitted windows and doors, flooring, folding attic stairs, overhead garage doors, and so on.

Bathroom Space Needed

Older houses often need additional bathroom facilities. Sometimes a powder room-lavatory can be installed in space under stairs, or by enlarging a seldom

HIGH WINDOWS CAN BE COLD OVER A BED

High windows in bedrooms can have drawbacks as well as advantages.

They are designed to increase wall space—to make it possible to place the heads of beds against any wall except those broken by doors and closets.

Being shoulder high, they insure privacy, requiring no blinds at all.

On the other hand, they may let in too much moonlight for your taste, and provide an excess of ventilation over your head.

MEASURING SHINGLES

Shingles are commonly ordered by the square. A square of roofing is enough to cover 100 square feet, allowing for overlap.

used closet. Frequently the space occupied by an old fashioned pantry becomes available through the installation of new cabinets in the kitchen. With plumbing supply lines already in a house, the addition of new bathroom and kitchen plumbing fixtures is relatively simple.

The possibility of enlarging a bathroom and compartmenting the fixtures so that more than one person can use the room at a time should not be overlooked. Divided bathrooms are one of the economy tricks in the newest houses.

Modern folding doors of the accordion type make it easy to divide overly large living rooms to create a den for television at one end.

Attics Offer Economy

Attics and basements contain much wasted space that can be utilized with minimum expenditures. Expanding a house into the attic is much more economical than destroying existing walls to provide a new wing. Wallboard is easy to install and can be decorated attractively.

Shed dormers—the type without gables—can accommodate several windows and thus are cheaper to build and provide more headroom than separate single dormers.

Beware of Rats; Cover Garbage

Don't be squeamish about the subject of rats. They are one of the householder's biggest enemies and you can do much to fight them.

The common rat, called the domestic rat in spite of its being a wild animal and often attacking man, is far more numerous throughout all of North America than people. The food eaten by rats totals close to a half billion dollars worth per year. Furthermore rats are dangerous disease carriers.

Garbage is one of the richest food sources for rats. You can do a lot in curbing the rat menace by keeping all garbage in a metal container with a tight fitting lid.

Red squill is a safe and efficient poison for both rats and mice. Most other animals can vomit and thus rid themselves of this poison. Rats cannot vomit.

BATHS NEEDED

More than eight million non-farm homes in the United States have no bathtub or shower—approximately 23 per cent of all dwelling units.

An old house in an outlying location, or on a farm where you can get an attractive piece of land with it, often makes a good investment. Here is such a house that looked pretty hopeless. But by intelligent modernization, a good-as-new house was obtained at much less than the cost of building from the ground up.

The first step was to jack up the sagging floors and strengthen the foundation. Then came new floors and new windows and doors. Interior structural changes were minor. The old clapboard on exterior walls was covered with light gray asbestos siding. Light blue asphalt shingles covered an old roof of dried and split shingles and badly worn roll roofing. The new roof was laid over the old.

The front porch was enlarged, unused chimneys were removed, new eaves and downspouts installed.

Interior changes included modernization of kitchen and bathroom.

New Roof Is Less Costly Before a Leak Develops

Before buying or remodeling a house, it's always prudent to examine the roof—inside and out.

Occasionally, continued neglect of a leaky roof will result in rotting of the roof boards or framing that supports the deck. When this happens, reroofing is costly, since a new deck is necessary before the new roofing can be applied.

For this reason it pays to put on a new roof before the first leak has a chance to develop in an old and weatherbeaten roof.

If the deck is sound, has good nail-holding power, and will safely support the weight of the men applying the new roof, it's comparatively easy to prepare the old roof to serve as a deck for the new. The main thing is to get the old roof as smooth as practicable.

All curled, warped or loose shingles should be straightened and renailed. Loose and protruding nails should be removed.

Missing and rotted shingles should be replaced and tapered wood strips, called feathering strips, should be nailed against the butts of each course of old wood shingles.

Some Roofing Rules

Since asphalt shingles are now used for some 80 per cent of all house roofs, rules for reroofing compiled by the Asphalt Roofing Industry Bureau are widely applicable for reroofing jobs. These are:

1. Cut back old wood shingles at eaves and rakes about 4 inches to 6 inches, and nail a new 1 by 6 inch wood strip along the eaves and rakes in place of the old shingles.

2. Nail a metal drip edge 2 to 4 inches wide over the edge of the new wood strips, allowing it to extend so that it can be bent down far enough to be even with the eave and rake lines.

3. Apply an eaves flashing strip of 65 to 90 pound roll roofing. This strip should be no less than 36 inches wide, and should extend up the roof to a point at least 12 inches beyond the inside line of the outer wall of the house.

Pitch Determines Roofing

The pitch of a roof is the first consideration in selecting asphalt roofing. If the slope of your roof is less than 4 inches per foot, don't use asphalt shingles. Roll roofing, with a 19-inch salvage edge, is best for pitches of less than 4 inches and more than 1 inch. Below 1 inch of pitch, use built-up roofing.

Most homes, particularly older houses have roofs with a relatively steep pitch. This makes the roof particularly visible and therefore it lends itself to the decorative colors and textures of asphalt shingles.

PROTECT ROOF GUTTERS

Copper roof gutters corrode under chemical action of smoke, soot and cinders. If your house is subjected to railroad or factory smoke it is wise to paint the inside of gutters with asphaltum preparations, using spar varnish on the outside for appearances. Painting prevents copper from staining white woodwork.

46 MILLION HOMES

There are now 46 million dwelling units—homes and apartments—in the United States. More than 8,550,000 or 23 per cent, were built since 1940.

Picture Windows Bring Flower Beds in House

THE CALIFORNIA-STYLE window, formed by a 2 by 4 framing, which is strong enough to support double sealed insulating glass, is now popular even in the smallest homes. This is a design by Rudolph A. Matern, architect.

Bathroom Fixtures Add Heavy Load on Joists

If you are planning a new bathroom in connection with a remodeling job, don't overlook the need for heavier floor joists. Bathroom joists ordinarily carry a dead load that is greater than the combined dead and live loads figured for other floor joists.

A tile floor alone can impose a dead load averaging up to 30 pounds per square foot. Bathroom fixtures add from 10 to 20 pounds per square foot on floor structure. This makes the total dead weight of most bathrooms average 40 to 50 pounds per

WHEN NECESSARY to cut a joist for a pipe the cut should be made at the neutral axis and the joist reinforced. Note tension and compression arrows in diagram.

square foot. The combined dead and live load to be carried by bathroom joists is figured between 60 and 70 pounds per square foot.

If a bathroom is installed over a hall where joists may be short, added strength may not be required. But if the bathroom is over a living room or large space, heavier joists spaced closer may be called for. This is important in finishing off expansion attics.

Very often joists have to be cut to accommodate pipes. Waste pipes may measure 5 inches in overall diameter. Such cuts weaken joists especially near the center of a span. Headers and trimmers can be used to compensate for such weakening.

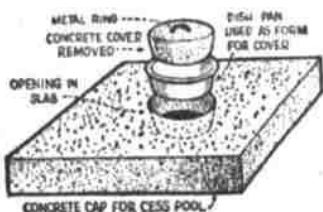

The best policy is to run all pipes between joists and parallel to them wherever possible.

MAKING A CONCRETE LID

An old dishpan with slanting sides makes a good form for a concrete cap over a cesspool or catch basin.

Grease or wax the pan thoroughly inside and out. Set it in the center of the form for the cover slab. Fill it with concrete when pouring the slab and set a heavy steel ring in the center.

When the concrete has cured lift out the lid and the pan. The lid will fit snugly

back into place because of the taper formed by the slanting sides of the pan.

Home Building At New High In City

More residential construction is in progress now than at any previous time in Big Spring's history, and the city can boast several big-scale developers of its own.

In addition, a few concerns from outside the city have sizeable projects underway, while working for the most part with local groups and individuals.

Many Big Spring builders have contributed to the city's residential growth since the war, and most of them are still at it, with demands continually increasing.

One of the largest local home builders, based on production, is Louis V. Thompson, who has developed extensive projects in the southeast part of the city and is still building homes.

More recently, Cecil D. McDonald has launched development of substantial projects.

Among other local builders who have produced new residential facilities since the war are Ray Parker, William A. Bonner, Omar Jones, F. H. Talbot and son, J. D. Jones, and Charles H. Rudd.

In addition some local corporations have functioned from time to time to help promote new residential development, such as the Big Spring Building Corp. and the Big Spring Rental Housing Corp. A new corporation recently organized, which has housing as a major interest is the Pocahontas Investment Co.

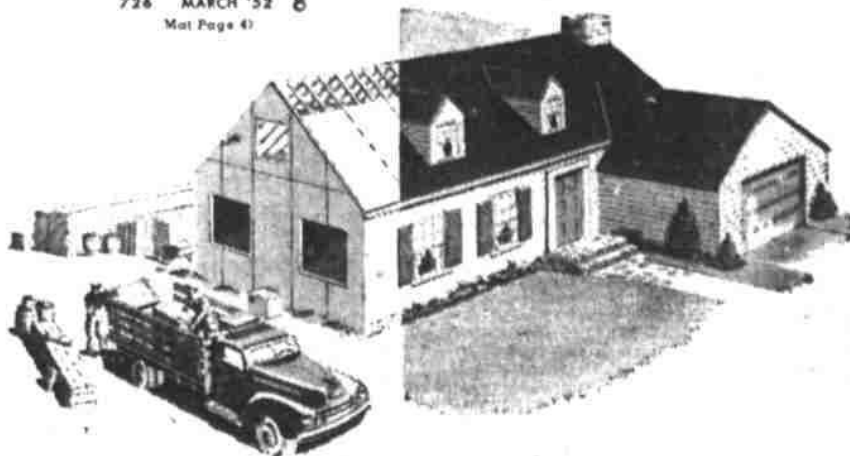

Some other major home building concerns which have operated in Big Spring recently, some of which still have projects underway, include the H&H Development Co. (Heath and Haney), Carl Hensley and George Steakley.

All combined have accounted for new dwellings numbering well in

to the thousands, including a modest amount of rental units.

People in Glass Houses Hang Paintings in Yard

By W. G. ROGERS
Associated Press Arts Editor

People who live in glass houses can now hang their paintings out in the yard.

Glass houses, and other modern, partly glass houses don't provide much wall space for art. Miss Katharine Ordway, art patron with an estate in Connecticut, has commissioned a picture made out of material that withstands heat and cold, rain and snow, and shines right back at her by night.

It is made of the reflecting material used in small tabs on bicycles and along highways to mark directions and curves by night.

The work is in black, white, green and varying intensities of yellow and orange, and ten more colors are available. The artist is abstractionist Robert Motherwell, and his panel was shown at New York's Whitney Museum of American Art. It is a reproduction of part of an unfinished mural which he painted for a school in Massachusetts.

Miss Ordway bought the mural, gave it to the University of Minnesota, and commissioned a craftsman to copy a central eight-by-ten-foot section of it under Motherwell's supervision for display in her garden.

Overcoat for a House Makes It Snug and Rigid

Ever think of giving your house an overcoat? It's a smart way to make lightly-built walls wind and weather tight and to add rigidity to an old house that shakes and vibrates in heavy storms. It gives the house a new look and considerably prolongs its life.

Overcoating is the best construction practice in renovating old houses. It can be done with shingles, either wood or composition, imitation brick siding, stucco, or a single thickness of brick veneer.

When it comes to a roof, it's always good practice to lay a new roof over the old. It increases insulating value and saves the cost of removing the old roofing.

The additional weight of an overcoat of shingles, composition siding, or stucco is carried by the framework of the house, which is plenty strong, except in the flimsiest construction.

Brick veneer, however, calls for a broadening of the foundation to carry the weight and for a liberal use of metal ties driven into the old framework and imbedded in the mortar joints.

For the best job in overcoating sidewalls, apply stiff sheets of insulation to the old walls, then a layer of building felt or good quality building paper. Nails long enough to get a solid

hold in the old wood are used for shingles or stucco lath applied over this.

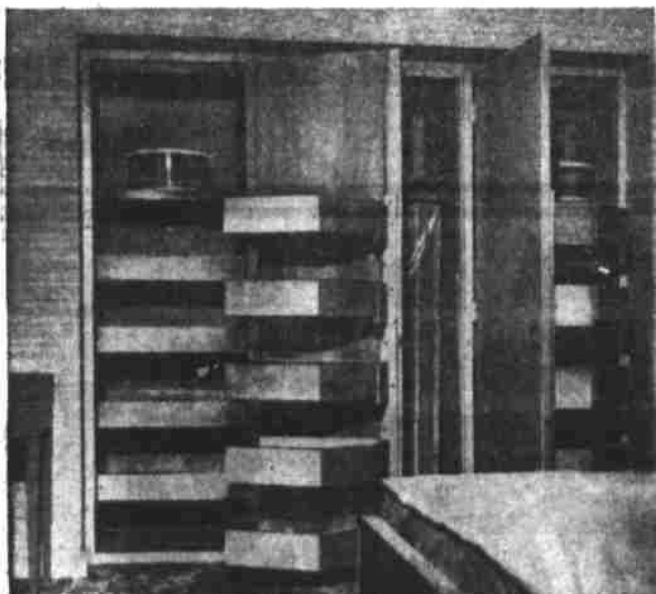

Properly applied stucco will greatly increase the stiffness of house walls. Shingles will not add so much. But a brick veneer will overcome almost any lack of rigidity.

If you use shingle siding over old clapboards, you have to level up the wall with wedge-shaped strips. However, shingles offer a big advantage in that they do not have to be painted unless you change your mind about color. You can get them pre-painted in a variety of soft hues that will weather well.

VALUE OF CREOSOTE

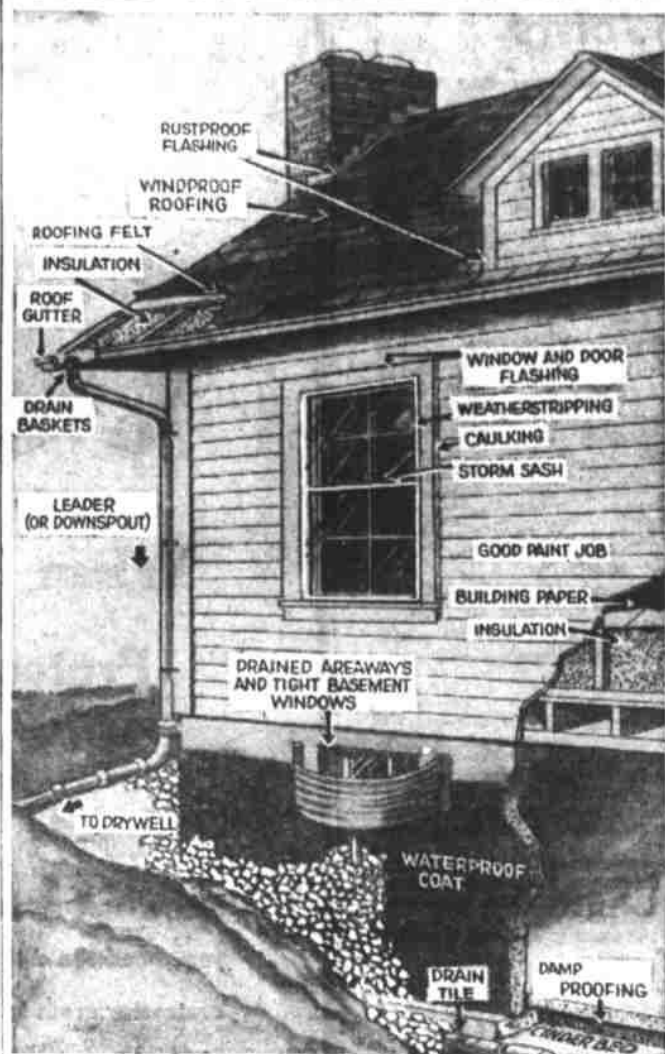

Creosote is an old standby as a preservative delaying rot in wood that is in contact with the ground, such as fence posts. A railway tie treated with creosote lasts about 25 years.

All the Drawers Open When This Door Opens

INTERLOCKING STORAGE drawers provide an abundance of space in a small closet when arranged in this fashion. It is a feature idea used in homes by Herman York, architect.

WEATHER-TIGHT

SOME OF THE MOST IMPORTANT points in weatherproofing a house are shown in this cutaway diagram. While shingles and siding shed rain water, roofing felt and building paper, flashing and caulking keep it from soaking through. Gutters, downspouts, grading and waterproofing of basement complete the job. Insulation, weatherstripping and storm sash prevent heat loss.

Study Shows Fuel Saved By Using Storm Windows

According to a new study, if you live in a two-story house you can save more fuel by having storm windows and storm doors on all openings than you can by using a 4-inch blanket of insulation over the ceiling.

Also in a two-story house, insulation of the side walls is even more important than insulation of the ceiling, in spite of heat rising.

This is because of the relatively large amount of exterior wall space in comparison to roof area in two-story houses.

In a one-story house the comparison is almost always reversed. The roof area is larger, so ceiling insulation is almost twice as important as storm sash and can be almost twice as important as wall insulation.

It's because of exposure.

Two Types of Houses Tested

The Small Homes Council of the University of Illinois made a study in reducing fuel bills for two houses, a one-story structure measuring 36 by 28 feet, and a two-story structure, 28 by 24 feet, each with a full basement. Ceiling height was 8 ft., and windows and doors comprised 15 per cent of the total wall area.

In the one-story house, storm sash and storm doors saved 12 per cent on the fuel bill; 4-inch ceiling insulation between joists with ventilated attic saved 22 per cent; 3½" blanket insulation between studs in walls saved 13 per cent.

In the two-story house, storm sash saved 18 per cent; 4-inch ceiling insulation saved 13 per cent and wall insulation saved 19 per cent.

Wood Construction Involved

These figures were derived from standard frame construction with wood or shingle siding, which rated lower in fuel bills than veneer or masonry construction.

However, the figures can be better understood by taking into consideration some of the variables involved. For instance, the one-story house had a ceiling area of 1,008 square feet against 672 for the two-story house. The one-story house had an exterior wall area of 1,024 square feet in comparison with 1,664 square feet for the two-story house, where 15 per cent for openings loomed larger.

Water Pipe Noises Can Cause Leaks

Water hammer—the banging noise you hear when water is turned off suddenly, as with a spring-activated faucet—can be dangerous as well as annoying.

It is caused by the sudden stoppage of the flow, creating a terrific impact in the pipes, sending energy waves rebounding through the water at high velocity. This makes the pipes vibrate, loosens pipe supports, strains the pipes and causes leaks at joints or other weak points.

Water hammer in small pipes increases the pressure by as much as 55 pounds per square inch. This means that water flowing at only five feet per second can build up a pressure of 275 pounds per square inch when stopped suddenly.

A projecting pipe, tightly capped and filled with air above a household plumbing system, or commercial shock absorbers fitted with springs and cushions, will take up water hammer and its destructive force.

How to Obtain A Satin Finish

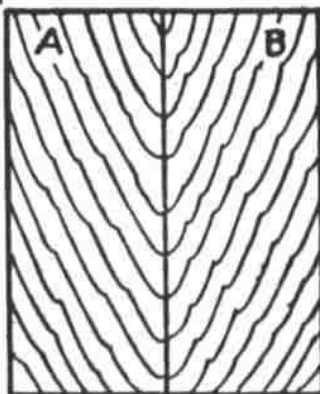

Dull or satin finishes for varnish or enamel are obtained by removing the natural gloss with pumice stone and water or oil after the last coat has dried. Three to eight days are allowed for hardening.

Thick felt, dipped in water or oil and then in finely ground pumice, is used for the rubbing. Light grade motor oil, raw linseed oil and benzine, or paraffin oil may be used.

The surface is rubbed lightly with special care being used on edges and corners to avoid rubbing through the finish. Moldings and carvings are rubbed with a short stiff brush instead of felt.

Pumice is washed off with clear water and wiped dry with a clean cloth. Corners and angles are cleaned out with an orange stick or other sharp instrument.

Matching Grain Is an Open Book

Matching wood grain patterns on desk tops, other furniture and hardwood veneer paneling for walls is achieved by slicing quarter-sawn logs in very thin sheets in making the veneer. The grain of one sheet is virtually identical with the grain of the sheets next to it.

A "book-match," as shown in the sketch, is made by matching the grain lines of sheet A perfectly with the lines of sheet B at a precision tight joint between the sheets. In the log the face of sheet A adjoined the face of sheet B like the pages of a book.

Costs Of Homes Have Jumped Since Start Of Korean War

If you're planning to pick up the tab for a new house, be prepared to take along more than the weekly paycheck.

Like everything else, the cost of homes—whether you're investing in a simple one-bedroom place without elaborate fixtures or a multi-room brick structure complete with

old-fashioned fireplace—has skyrocketed since the start of the Korean police action.

You generally pay by the square foot and a frame house with ordinary fixtures will cost you something like \$10 a square foot.

That figure, of course, generally includes items like floor furnaces,

insulation, window weather-stripping, etc.

If you buy a brick home, the expense amounts to something like \$12 a square foot.

Some of the better houses being built here at the present time are the cavity-wall type of structure. That type of building is considered excellent for this section because the heat transition is low, making for cooler interior in the summer time and warmer interior in the winter time.

Such a building, builders will tell you, runs something like \$11 a square foot.

Most expensive type of home now being built in this section has an exterior of Austin or Random Ashler stone. The cost is generally estimated at \$14 a square foot.

Of course, the lavishness of the interior of a house largely determines the final cost to the builder. Doors, floors, wall papers, closet space, bathroom fixtures, air-conditioning systems, etc.—all vary in price range.

Cost of a home rises and wavers, of course, with the price of raw materials to the builder.

Right now, if you're thinking in terms of buying or building a two-bedroom place, expect to pay \$9,000 or more. If you do your own contracting and help with other details, the price will come down but the average buyer is investing that much for such property.

Beautification Plans Can Be Made, Even In Drouth

Dry weather seems like a poor time to talk about planting, but actually it's a good time to begin planning for home beautification.

Landscaping is just as important to the attractiveness of a home as

the design of the home itself. And a sense of orderliness and beauty of the home setting is no more apt to happen by accident than a decent house without pre-conceived drawings.

In general, residents will be well advised to consult nurserymen here concerning landscaping plans. In the first place, planning is their business. In the second, they have a record of experience that equips them with a knowledge of what plants are best adapted to certain areas of the particular soil as well as to this region in general.

Moreover, nurserymen will be expected to do a job that gets results. Because they live with the work they do, they are anxious to give it good service. Too, they are available for consultation.

Dealing with a local nurseryman actually is a money-saver in most instances. They will advise against over-planting, a temptation to which the average home owner will succumb in an effort to make a showing the first year. Nurserymen look at a problem with an eye cocked several years hence after plants have had their growth. Their tips on planting and care will help save on the water bill.

Looking toward next year when there probably will be ample water supplies, it would be wise to contact a nurseryman soon for counsel on your landscaping problem.

Bathrooms Are Being Made Bigger

The bathroom is one of the most expensive rooms in a house. Its fixtures, fittings and finishing—usually tile or other easily cleaned surfaces—are all relatively costly. Heavier framing is called for, because of the weight of a tile floor and heavy bathroom fixtures. And then when the room is completed it is one of the most wasteful rooms.

So big changes are being made in bathrooms. They are becoming larger, accommodating built-in vanity counters around washstands, storage places for towels, soap and accessories, and they are being subdivided in compartments so that two or three persons can use the room in comparative privacy.

Sliding doors, mechanical ventilation and modern lighting make the compartmented bathroom entirely practicable. Families most in need of an extra bathroom often can least afford one. So the divided bath solves a big problem.

More Space Is Needed

Few existing bathrooms are large enough to be subdivided. They were planned as small and compact as possible because of their high cost. But very often there is an adjoining closet or part of a room that can be merged with the bathroom by remodeling.

This additional space is essential. Crowded bathrooms have been hazards for both mother and child in the bathing and dressing of children. Space for two persons to move around avoids accidents. This is one of the reasons for the popularity of built-in vanities, providing adequate counter space for bathing a baby as well as secure tabling space for toilet articles and bottles.

One large compartmented bathroom calls for much less plumbing than two bathrooms, especially if they are widely separated or at some distance from the kitchen.

Various Money Savers

Efforts toward economy in bathroom finishing and fitting began many years ago and have achieved considerable progress. The introduction of rubber tile and asphalt tile in place of mosaic tile floors was one step. Waterproof wall papers and laminated plastic wall panels appeared. Stamped enameled steel fixtures, produced like automobile fenders, made colored bathtubs about the same price as heavier cast-iron white tubs.

A big advantage of stamped steel fixtures, especially in connection with remodeling, is their lightness. One man can handle a bathtub.

SMART PLUMBING FITTINGS

If you are in the market for new bathroom fixtures, you will want to consider the new designs that accommodate smartly tooled fittings, including large cut glass style knobs in place of the usual hot and cold water controls.

For Cutting The Cake

It's handy to have a cake board available for either a round, square, rectangular, large or small cake. Cut as many as you need from Tempered Presdwood, an extremely hard, splinter-free material available at the lumber yard. Cake boards like these can double as all-purpose cutting boards.

Hardwood Flooring Used As Early As King Solomon Mine

Although used as early as King Solomon's time, hardwood flooring gained its present widespread popularity only in the last half-century. Mass production methods now permit it to be manufactured at a cost well within the budget of any home buyer. Today it is being produced at a rate approximately 25 times greater than 40 years ago.

Make Garden Scoop

For handling dry fertilizer, insecticide or potting soil, cut a scoop shape in a tin can with tin snips. For a bottom, insert snugly a piece of Masonite Tempered Presdwood. Attach a piece of dowel or discarded small-tool handle with a screw fastened through the hardboard and the metal. For a handle on a small-sized scoop, use a drawer knob instead.

Dry Walls Cut Costs, But Take Careful Work

Dry wall construction has become one of the most popular modern building methods. As its name implies, it embraces all applications of wall panels directly on the framing studs, eliminating lathing and the use of wet plaster.

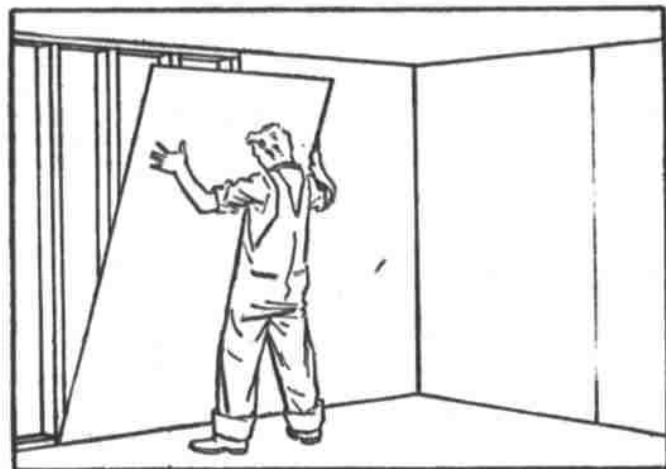

Dry walls were introduced primarily for economy, but now are recognized to have some other advantages.

A survey of 626 home builders conducted by the Architectural Forum, Magazine of Building, showed the three leading techniques used to reduce over-all house-building costs were (1) close supervision, (2) dry wall construction, and (3) the use of power tools and pre-cut lumber.

The most common materials used for dry wall panels are gypsum wallboard, which is really pre-cast plaster with a paper facing, delivered in large sheets, pressed hardboards, which are laminated wood fibers, various plywoods, which include finished hardwood veneers, and prefinished wallpanels, which are made from hardwood materials with baked enamel coatings.

Careful Work Is Required

Although walls finished with the conventional three coats of plaster still give a house a premium feature in resale value, properly installed dry walls virtually defy detection of seams.

DRY WALL panels in 4 by 8-foot sheets are easily placed.

However, it may be difficult to achieve perfect installation. But expansive ceilings have been covered with gypsum panels and—when the job has been done carefully—merely a normal finish of ceiling paint conceals traces of where panels are joined.

There are various ways of obliterating panel joints and the type of board used usually determines the method. With gypsum wallboard, a special cement is mixed to putty-like consistency and buttered into the channel left by the recessed edges of the panels. Over this a perforated reinforcing tape is stretched and feathered over with cement, which after a second coat has dried, is sanded lightly for a smooth surface ready for decoration.

Nailheads are carefully dimpled below the surface of the panels and cemented and sanded similarly to the joints.

This taping treatment is called a concealed joint. Exposed joints and covered joints also are commonly used especially with hardboards and veneers.

Panel Effects Possible

An exposed, or V-joint, often is exploited for decorative effect. A covered joint involves the use of batten strips, metal moldings or other decorative details. J. B. Palmer, expert on dry wall construction for the Masonite Corp., points out that in the use of either exposed or covered joints it is important to plan the panels properly to bring the joints symmetrically in relation to the wall areas.

"By proper selection and handling of the joints," he explains, "much can be added to the overall design of a wall. A carpenter can vary effects by either beveling or rounding the edges, cutting bevels deep or shallow, bringing panels into moderate contact, or leaving a slight gap."

Sometimes panels are spaced an inch or more apart, top, bottom and sides, to produce a raised panel effect. Decorative wood moldings also are placed between panels to add direct interest to the joints.

Embossed hardboard panels, such as Leatherwood, often are finished with a hide welt or gimp.

The Easiest Methods

Palmer prefers exposed or covered joints as more foolproof methods when using rigid panels that may expand or contract slightly, or be affected by building settlement.

"In ordinary frame construction," he says, "there are many possibilities for movement."

While dry wall panels are nailed securely to framing members, small sections such as acoustical ceiling tiles and boards are now installed with special concealed clips. Since paint tends to destroy some of the acoustical properties of such ceiling tiles, nailheads cannot be touched up. The clips (called quick-clips) hook over furring strips and imbed their horizontal lower terminals into the edges of the soft tiles.

Electric Fan Speeds Defrosting

A desk fan, blowing warm room air into the freezing compartment of a refrigerator, will speed up defrosting by as much as 40 minutes.

ATTIC JOB: Pour Mica Bubbles In for Insulation

One of the most interesting of modern building materials is vermiculite—a mineral which is a form of mica. Extremely light in weight, it is used as an aggregate in concrete for roof slabs and other places where lightness is an advantage. Expanded under heat, in a sort of puffed-wheat process, it becomes a highly efficient insulator with millions of air bubbles imprisoned.

Householders are more familiar with vermiculite in its loose insulating form. It is easily poured between joists where attic floors are not installed. All openings along the tops of walls are closed first and the layer of vermiculite provides an effective fire barrier as well as checking heat loss through the ceiling.

Amateurs Show How

An interesting demonstration of how amateurs can install this insulation was staged recently in Arlington Heights, a suburb of Chicago. An average couple with no special training was selected. The house involved had an unfloored attic measuring 34 by 27 ft.

It was estimated that 50 sacks of loose fill vermiculite would provide a layer three inches thick. The couple filled a rented trailer with the 50 sacks, drove out to the house and had no trouble unloading the materials, since sacks 48 inches high weigh only 18 pounds.

They carried the sacks up to the attic and poured the insulation between the joists, raking it with a board cut to slide along

MODERN INSULATION is lightweight. Here a Chicago couple pour vermiculite between attic joists to demonstrate how easy it is to do the job yourself.

the tops of the joists and spread the pellets to an even depth. The job took three hours, with three breaks for cigarettes and soda pop. The cost of the material totaled \$67.

Dr. George E. Ziegler, direc-

tor of research for the manufacturers who arranged the demonstration, asserted that the project might reduce fuel bills for that four-and-a-half-room brick bungalow by as much as 22 per cent.

THE KEY TO AUTOMATIC HEAT

Automatic heat, whether it is implemented by oil burner, automatic coal stoker, gas or electric radiant wall panels, is not entirely automatic without a clock thermostat. This device lowers the temperature at bedtime and raises it again early in the morning without any attention on your part.

It's easy to replace any old-style manually operated thermostat with an electric clock type. New instruments are available that plug into any nearby electric outlet and call for no electrician's services to install. The electric cord can be fastened to the wall straight down to the baseboard and then over to the nearest outlet, or it can be stretched from the thermostat to any nearby woodwork and then carried down to the baseboard.

This system is as fireproof, or more so than any Underwriters' approved lamp cord, since it is subjected to no wear and never gets stepped on.

Installing Plug-In Type

To install a plug-in type of thermostat, remove the cover of a manual type and loosen the mounting screws until the instrument comes loose from the wall. If there is a terminal plate fastened to the wall, an adapter plate that comes with the clock-type can be mounted directly on the terminal plate, using three mounting screws which attach to the terminals.

If there is no terminal plate on the wall, one which comes with the plug-in type, is installed. The proper colored wire is connected to each terminal screw according to manufacturers' directions.

The new thermostat is then fastened to the plate with cover off. The time desired for day and night temperatures is then set on the dial. The average family sets a thermostat for night temperature at 10:30 or 11 p.m., and for day temperature at 6:30 or 7 a.m. The clock is then set and the cover replaced. The extension cord is connected and you have automatic heat—at least until a storm disrupts electric power.

Because of fire laws and local electrical ordinances it is best to have an electrician install a clock thermostat with wiring concealed in the walls, although

it is possible for a handyman with basic electrical knowledge to do the job.

Location Is Important

The location of a thermostat is vital to its efficiency. Heating engineers of the Minneapolis-Honeywell Regulator Co. warn that improper location of a thermostat can be responsible for the erratic operation of any good heating system.

These experts advise you to mount a thermostat about five feet from the floor and in a place where it will be affected only by the temperature of the room. It should not be fastened to a cold outside wall, nor where it will be exposed to air from frequently opened doors. It should be placed where it will have free circulation of air and not obstructed by furniture or draperies. It should not face a fireplace, where radiant heat can affect it.

Nearby hot and cold water pipes, heating ducts in the wall, radiant heat from the sun, table lamps and even a television set can throw a thermostat out of kilter.

Don't Get Stuck On the Wrong Glue

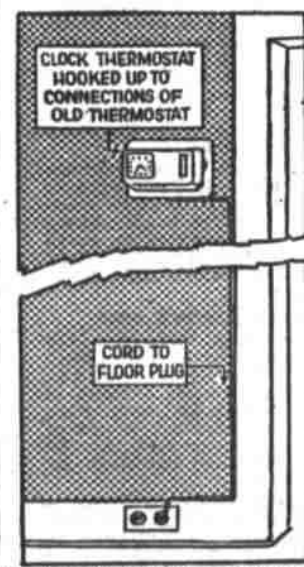

There's a special glue for almost every purpose.

Plastic resin glues are completely waterproof, can be used in boat building and will withstand all weather.

Casein glue, while not waterproof, is a favorite in woodworking because it is used cold and does not set too rapidly.

Hot animal glue is the old-time adhesive of cabinet makers. It is strong, stainless and sets quickly.

Fish and vegetable glues are among the prepared liquid glues, handy for quick household repairs, but not moisture-proof.

A PLUG-IN clock type thermostat is easily connected to a convenient outlet.

A Trick to Thaw Frozen Water Pipes

When water pipes freeze, don't wait for them to thaw as the weather gets warmer. The Plumbing and Heating Industries Bureau points out that damage from bursting pipes can far exceed the cost of having them thawed by a plumber.

Here are some "don'ts": Don't use a blow torch or other flame. It can start a fire or burst the pipe with steam pressure. Use hot water or electric heat and start from the faucet end.

Don't use lye, potash or drain solvents.

Don't pour boiling water into frozen toilet bowls—it can crack them.

Don't start a water heater when the pipes are frozen.

Utilities Firms Have Big Outlay In Service Facilities For Homes

If you buy a lot and build a home, you have around \$800 waiting for you.

That's the estimated cost, exclusive of plant and main supply lines, of supplying utility service to the average residence in Big Spring.

And you get it all for one tap fee charged by the City for water installation. Utilities, however, figure that you will be a good customer and that over the years you will amortize this outlay so that the companies will realize a reasonable return on their investment.

For instance, if you averaged an aggregate of \$20 per month for

your gas, lights, water and telephone, in about three years you would only have paid back the immediate cost of getting the main across your property, the line tapped and put to a meter. Actually, the capital outlay involved in supplying the service is much greater.

The City charges \$17.50 tap fee for water service. Most municipalities in the area require \$27.50 tap fee, which is about the bare cost of making the tap and installation of meter with connecting copper tubing. It takes about \$200 in pipe and labor to get across a 60-foot lot to the next customer, so the City has an investment of some-

thing like \$250 in adding its new customer. (The City's pipeline costs are frequently much larger than needed for mere service because of fire protection demands. It also has street light costs.)

As a very rough approximate, the gas company pegs \$150 to \$175 as the cost of connecting you with service. This is a figure which the electric company about duplicates. In neither case does this involve any of the costs of main supply lines, the pressure regulators, control valves, transformers, etc. Private companies, which operate for a profit, have no connect fees.

Telephone service, counting cost of instrument, will be around \$200, figuring in a share of the cable cost back to the station. However, it does not include any of the cost at central office such as switch boards, and a myriad of other equipment.

So when you buy a piece of ground for that new home of yours, you actually get more than dirt. You have an \$800 value created and waiting for you.

Abestos Roofs Save Buildings As Fire Strikes

Incombustible roofing is credited with saving two of the three buildings which comprised the \$400,000 municipally owned Lyons Memorial recreation center in New Orleans. The two buildings were directly on either side of a huge gymnasium, used as the home court games. Fire from an unknown cause broke out one night last winter in the gymnasium, completely destroying it. Despite the intense heat and a bombardment of burning debris, one of the adjoining buildings was unharmed while damage to the other was limited to some internal burning.

Had it not been for their asbestos-cement shingled roofs, witnesses said, both of the buildings probably would have been destroyed. As it was, the embers burned out harmlessly on the incombustible roofing.

EXTRA ASSURANCE

Check On Zoning Before Building

Zoning may figure in your life, especially if you are planning on buying or building a home.

Since July 8, 1947, Big Spring has developed under terms of a zoning ordinance. It was adopted at that time after several months of hearings and study by the City Zoning Commission (made up of the City Planning Board, plus four other members). This group of nine men made recommendations to the City Commission, which finally approved the plan.

Because this act governs the usage to which land within the corporate boundaries may be put, within certain limits, it may be wise for you to consult a city zon-

ing map before you close a trade.

For instance, if you wanted to put up an apartment house in a residential neighborhood, you couldn't do it. Similarly, if you wanted to put in a business house in the midst of a residential area, you couldn't do it unless your property was in a community center business designation.

Basically, the A zones are for one family dwellings; the B zones for two-family dwellings; the C and D zones for apartment houses of various types; the E zone for community business centers; F zone for general business; G, H, I and J zones for industrial purposes of various types. A higher category can be built in a lower category, but not vice versa. For instance, a residence could be built next to an iron works, but an iron works could not be plunked down in the middle of a residential district.

There are certain other requirements you might want to know about, such as a maximum height of 35 feet for a single family dwelling; a minimum side clearance of five feet; a minimum of 20 per cent of lot area for backyard purposes, etc.

One of the chief aims of zoning is to protect and if possible perpetuate or promote property values, and to safeguard health and safety.

Plyron Panels Are Used To Improve Home

A new building panel known as Plyron has various applications in the home. It combines the backbone of plywood and the smooth, tough surface of tempered hardboard.

The hardboard, made by compressing wood fibers into a thin, hard sheet of uniform density and smoothness, gives Plyron its tough, wear-resistant, easily-paintable surface. The new panel has a core of plywood, which makes it puncture-proof, strong, rigid and dimensionally stable.

The combination panel is split-proof and relatively light weight. It is permanently bonded with moisture-resistant glues.

Already in use commercially as cabinet doors in kitchen cabinets, fixture shelving and surfaces, store partitions, industrial table and bench tops and other ways, Plyron has some interesting and versatile applications in the home.

For example, it is excellent for bookshelves, coffee tables, occasional tables and various working surfaces. For built-ins, partitions, pass-throughs and dividers, Plyron is an ideal material.

The new building panel may be obtained at most lumber yards.

Large Closets Need Electric Lighting

All closets with more than 9 sq. ft. of floor space, or deeper than 24" should be equipped with electric lights.

A switch in the door jamb, similar to that on a refrigerator, will turn on the light automatically when the door is opened.

Handy Clipboard Desk

A portable desk can be made out of a shallow wooden box grooved to receive a common Masonite Presdwood clipboard that will serve both as a sliding lid and a handy writing surface. When the outfit is not in use, simply fasten the top in the closed position and hang it up by the clip.

Abestos Siding Presents Choices In Styles, Colors

A selection of styles, as well as colors, is available in asbestos-cement siding shingles. Some models are textured with wood grain or tapered line design, while others as smooth surfaced, with colored granules applied so as to give a textured appearance. Asbestos siding shingles are produced with wavy, straight or staggered butt lines. The range of colors includes grays, greens, buffs, browns and white.

Building A Playhouse Makes Good Summer Project For Hobbyist

Here's a project for the handcraft enthusiast who wants to transfer his activities to the outdoors with the coming of good weather: build a playhouse for the children in the backyard.

A sturdy and attractive structure of that type recently was designed by a teen-age boy for his younger sister. It turned out so successfully that it was featured in a national magazine. Now duplicates are being built in all parts of the country.

The playhouse, measuring 8x6 feet overall, has a wood frame work and gable roof. Sidewalls and roof are covered with asbestos-cement board, a weatherproof, fire-safe material. Built on skids, it can be moved to any part of the yard.

The Asbestos-Cement Products Association, 509 Madison Avenue, New York 22, N. Y., will send plans for the playhouse free upon request.

YOUNGSTOWN KITCHENS JET-TOWER DISHWASHER Completely Modernizes Dishwashing!

World's Largest Makers of Steel Kitchens develops new principle that will change all your ideas about dishwashing... bring more practical help into your daily life than came when the vacuum cleaner modernized house cleaning!

The Youngstown Kitchens Automatic Dishwasher brings you really practical, efficient, automatic dishwashing... Ready to take FIRST PLACE among your other modern appliances... to bring you the greatest help a housewife ever had.

Before you've tidied up after a meal (just 9 1/2 minutes after you close the lid) this new marvel will have done the hard, boring work!

Your Youngstown Kitchens dealer is ready to show you proof. Hurry—for every day you wait, you're doing lots of work that you no longer need do!

Two Grand Models!
Electric Sink-Automatic Dishwasher combined with beautiful 48" Cabinet Sink.

Automatic Dishwasher—In beautifully styled 27" cabinet.

AMAZING JET-TOWER WITH EXCLUSIVE HYDRO-BRUSH ACTION

Revolutionary idea completely modernizes dishwashing! 64 swirling jets of booster-heated water brush-flush every hollow of every dish. Then a piping-hot double rinse; all in 9 1/2 minutes (normal water pressure)—automatically, electrically!

4 Easy steps end your hand-dishwashing drudgery

1. **SCRAPE** loose food waste into opening of Youngstown Kitchens Food Waste Disposer or receptacle.
2. **PLACE** dishes in Dishwasher.
3. **START** by flicking the switch. In 9 1/2 minutes, the lid pops open.
4. **THAT'S ALL**—your dishes are done automatically!

Treating Two House Diseases: Depreciation and Obsolescence

All houses are subject to two major diseases—depreciation and obsolescence. A complete cure has not been developed for either of them. But there are such good remedies available that you can keep a house well ahead of their worst complications.

There's nothing to get panicky about. The seriousness of either of those afflictions is sometimes a matter of opinion. Fine old houses have survived both troubles for many generations. Yet occasionally you'll find fairly recently-built homes in advanced stages of decrepitude.

Depreciation is the easiest of the two to treat. The best medicine for it is a mixture of paint, nails, elbow grease and generous doses of general upkeep know-how.

Obsolescence, on the other hand, calls for real thought.

Importance of Remodeling

Sometimes careful remodeling goes far toward combatting obsolescence. If you feel that your house is becoming out of date because of its general design, competent architectural guidance may be able to remedy that.

There are architects who specialize to a great extent in remodeling work. They have the professional ability to plan a face-lifting operation that will involve correct proportions and pleasing appearances without courting a relapse through freakish misfits.

Your building contractor can give you an estimate on the most important phase of remodeling—the cost. And he can give you practical suggestions on materials and methods, even if he may lack talent in architectural design.

Buy Quality Equipment

Much obsolescence, however, centers on equipment—a phase that is much easier to treat. Quality equipment is the best

Watch a Word's Legal Meaning

The legal meaning of a word can cause a lot of trouble in a real estate transaction. An interesting example was cited recently by George F. Anderson, legal expert of the National Association of Real Estate Boards.

A buyer had signed an installment contract, which was duly recorded. He made several payments before he decided to drop the deal. The seller wanted the contract removed from record so he could sell the property to someone else. To do this, he got the buyer to sign a memorandum on the back of the contract, stating: "By mutual consent the within contract is hereby rescinded."

The buyer then wanted his payments back, minus a fair rental. He brought suit. The seller said, "Why this is ridiculous." But it wasn't. The word "rescinded" meant that the situation reverted to the same as if no contract has ever been signed.

"The word 'discharged' should have been used," Attorney Anderson explains. "That means that everything done under the contract up to the date of discharge is valid."

Best Way to Use Paint Remover

Paint and varnish remover will take off an old coating of paint that is in bad condition. Apply the remover to a small area at a time. Allow it to stand a few minutes until it softens the old paint. Scrape off the old finish with a scraper or steel wool. Before putting on new paint, clean the old surface thoroughly with turpentine or mineral spirits to remove any traces of wax left by the remover.

insurance against loss of value on this score. To buy cheap equipment of any kind is worse than false economy. It can aggravate obsolescence by speeding up depreciation.

In selecting new equipment for a house—a new heating plant, new garage doors, new kitchen and laundry appliances and built-ins—you have to be aware of gadgets and novelties on every hand. Passing fancies are exactly what that term says.

Since major equipment is expected to give efficient service

for many years, select it on a basis of past performance and buy it from a reputable dealer.

This conservatism does not freeze out new inventions and new developments, which may be combinations or adaptations of known and tested components. Great advances have been made in recent years in heating systems, for example. But even radiant coil heat in homes is more than 20 years old—a competent test.

And manufacturers with a reputation at stake spend years experimenting and testing new products before placing them on the market.

You can almost always bank on reputations.

Civil War House Shakes Off Age in Remodeling

A TRANSFORMATION—This attractive colonial style facade was produced by a comparatively simple remodeling of the old house of Civil War vintage shown at the top.

You can't tell from the looks of a house how far it can jump into a new era. This 100-year-old, pre-Civil War house certainly presented a woe-begone appearance. But it was given a face-lifting that offers an example of the possibilities that remodeling offers.

Under the Title I property improvement program of the Federal Housing Authority (FHA), which your bank can tell you about, the government encourages modernization by insuring loans made for this purpose.

The owners of this pre-Civil War house wanted more light, for one thing. They took out the single window on each side of the main entrance and put in a pair of windows, spaced in classical design. Five new windows added to the second floor included two dormers in front for architectural balance.

Clapboard siding was painted white, window shutters a traditional green and a subdued shade of asphalt shingles harmonized the roof with the rest of the exterior.

Built-in Bunks Prove Popular in Boys' Room

HARDWOOD VENEERS make it easy for the handyman to build attractive bunks in boys' rooms.

Fighting Obsolescence By Forecasting Trends

The man who builds a new house is in a strong position to combat obsolescence and keep it away from his home for possibly a long time. Much depends on his judgment.

Of course, no one can beat obsolescence. New ideas and new preferences are going to affect houses in the future just as much, if not more than in the past. But

more popular attention is being paid to architectural details and this knowledge can be power.

The new home builder today is much less likely to accept a plan that is out of date before the house is started. The woman, for one, is not going to tolerate the attitude that this type of house was good enough for Grandpa, so it's good enough for us.

Some of the radical departures from customary houses indicate rather a danger of overstepping in anticipating future trends. No house becomes obsolescent faster than a house that has no appeal to others.

Emotion Rules Design

So the trick in choosing a house design that will endure is to study trends, analyze needs and double check human emotions. Emotions seem to have a greater bearing on architecture and decoration than intellect ever does.

People know that window shutters are archaic, that they add to the useless and costly gingerbread on a house, but many people want them and will pay for them to get that roses-over-the-door tug on their heartstrings.

Others contend that the window-wall is a must—regardless of view or lack of view—that it marks the house of the future. They are willing to pay more for heat, more for storm sash if needed, and much more for curtains, because the idea to them is exciting.

So you take your pick and wend your way between the traditional and so-called functional styles, hoping you'll hit the jackpot of enduring popularity.

Some Apparent Trends

However, some trends begin to appear obvious.

Larger living rooms and smaller bedrooms make sense.

Larger bathrooms to accommodate dressing counters, soap and towel storage and compartmented fixtures win votes.

Larger windows are here to stay even on small lots, where a private view can be created in the rear.

The ease of living in a one-story house gets the edge over the cheaper-to-build two-story house.

Roof pitch is getting lower—nearer to flat—where attics are not needed.

More closets make sliding doors a necessity to save swinging space.

Laundries in kitchens take one of the last reasons away from basements—but cellars are not vanishing yet.

The demand for outdoor living means terraces and outdoor fireplaces—with bugs ignored.

Remote control electrical wiring can make any house a push-button house.

And year-round air conditioning is here and spreading fast. Manufacturers of gas-fired air conditioners (Servel) have developed a year-round plant for oil-burning installations. R. G. Hughes, builder of Pampa, Texas, has developed a year-round air conditioning plant for houses selling at \$10,500.

The house that can't be cooled in summer may soon be dated.

Oil Tank Whistle Prevents Overflow

Vent whistles are very useful on fuel oil tanks. Whether you have a tank buried in the yard or standing in the basement, the whistle is capped on the vent that extends out of doors. While the tank is being filled, air forced out of the vent sounds the whistle continuously until the fuel level is reached. When the whistle stops, the oil man knows the tank is full and no oil overflows to kill the grass.

PAINTING DRAWER FRONTS

When finishing unpainted furniture, remove the drawers and stand them with drawer-fronts up. This prevents the possibility of enamel runs or sags.

NEW ORDER OF THE BATH

By CHARLES HONCE

This piece is about the bathroom—one of the most important rooms in a house. It will have nothing to do with size, arrangement, or architectural detail. Dave Bareuther, the editor of this supplement, has dealt with those points elsewhere.

My theme is: Why is the average bathroom the junk shop of the home? Why does it have to be the catch-all for everything the housewife can't find a place for elsewhere? Why does it have to look like Macy's bargain basement on a sales day?

I don't think I have overstressed the point. The bathrooms of some of my friends are so filled with objects that it is hard to breathe in them. A well-stocked drugstore could be put together from the toiletries stashed away or in full display therein.

Not to mention use of the bathroom as a place to wash and dry clothing.

I have successfully resisted most of this bathroom hodgepodge, but it is a hard job. I have even discouraged use of the room as a clothing dryer, except possibly for a few pairs of stockings.

Two Baths No Solution

Hal Boyle told me the other day that he had achieved some high point in his life when he moved into an apartment with two bathrooms. One was his very own. There was a feeling of luxury in having this little corner of the world all to himself.

So what happens? So his wife uses her bathroom for herself and dries her clothes in Hal's. Thus he has lost a little bit of the glory and wonder of life.

Now, what are my specifications for a proper bathroom? Outside of the standard built-in equipment that goes with every normal bathroom I see no reason for permitting the addition of much more than one modest clothes hamper. I won't quarrel with a small waste basket and a weighing scale if you feel that it is necessary. Soap, a bath brush, a glass and towels complete my outside equipment.

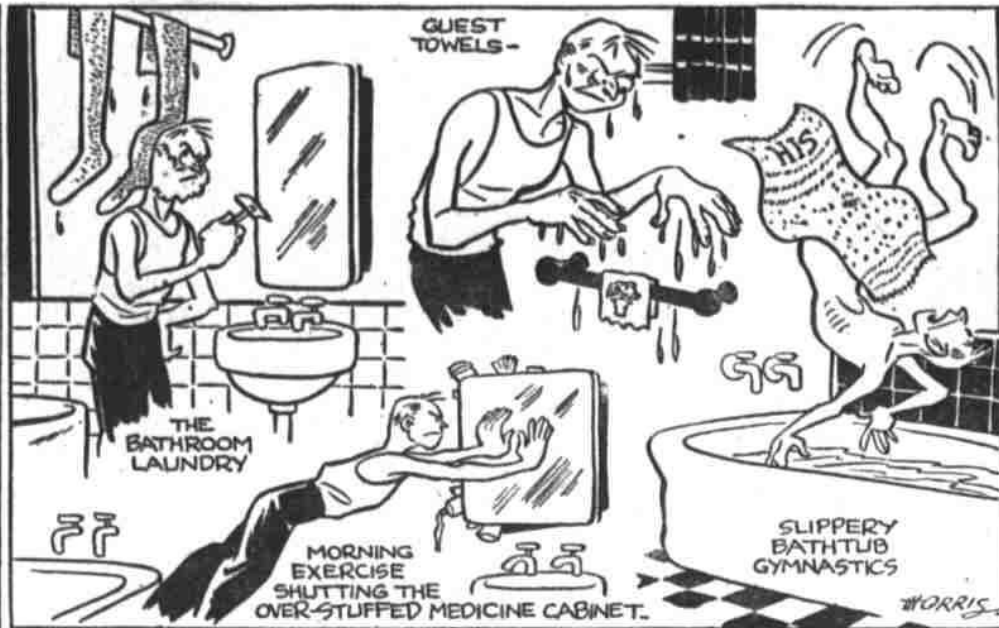

Use No Hooks!

When I moved into my present apartment I took down all hooks, brackets, nails, and similar objects. I considered they were merely invitations to hang unnecessary objects. My wife objected, but I won on this one.

That takes care of the outside. Now open the medicine cabinet and treat yourself to a bit of amazement. The average cabinet is overflowing with pills and unguents and ointments and oils and washes and medicines and heaven knows what else. Every householder should go through this mess at least twice a year and throw away everything he can't identify or that he feels he really can do without. If you do this in a thorough manner you will find that you haven't much left except the few items really necessary for daily toilet use.

I also have a few pet peeves. One is guest towels. I never have met a man in my life who didn't sneer at these singular objects. Let it be breathed that a guest is on the way to your home and presto the comfortable Turkish towels and wash rags promptly disappear in favor of those dinky, virtually unusable "guest" towels which evidently were designed for Singer's midgets. I always have maintained that they are never used, either because the guest finds them unsuitable for the purpose for which they supposedly were designed or he is afraid he will make his hostess mad by soiling one of her "pretties."

My wife says I am all wet; that the towels serve a useful

purpose and that people would think we were living on the wrong side of the tracks if we provided them with good comfortable Turkish towels.

Colorful Idea Wasted

Another peeve is against the ugliness of the average standard bathroom equipment and the difficulty of getting in and out of the normal tub without wrecking yourself. Thirty years ago, when all bathroom equipment was white, I began asking why manufacturers didn't introduce colors; but, alas! I failed to

patent the idea. Today, colors are widely used, but the standard design of tubs, basins and the like hasn't changed much and seldom has esthetic appeal.

I think some institution should furnish the money to promote research into the designing of a safe and comfortable bathtub—one that is easy to get into and out of. I have invented a complicated system that takes care of my bathing at home. But when I am elsewhere I have to make mathematical calculations, including the use of advanced trigonometry, to figure how to

beat the game. I suppose you will say why not use the shower? Answer: I have two, but I prefer a bathtub.

This has gone rather far afield. I started out by pleading against turning a bathroom into an attic repository or a basement junk heap.

What I probably am trying to say is: Let's have a bathroom that doesn't look like a bathroom. A place that is just as attractive in its own way as is your living room or dining room, or whatever is your most prized living space.

Let Budget Guide Your Home Choice

The difference between salary and take-home pay has changed the old rule about what you can afford to pay for a house.

Budget advisers in banks used to agree that a man could afford a house costing from one-and-one-half to two-and-a-half times his annual income.

Now because of withholding taxes, hospitalization, pension assessments, union dues and the various deductions that are made from pay checks, you are generally advised by conservative counselors to keep your fixed monthly payments down to equal one week's take-home pay.

The most prudent way to figure fixed monthly payments is to include not only interest and installments toward paying off the mortgage, but to add monthly average costs of all real estate taxes, fuel, gas, electricity, telephone, water, fire insurance, and a reasonable amount for upkeep. (If it costs \$800 to paint your house, set aside \$10 a month toward a paint job in five years.)

Home owners who must commute to work in large metropolitan areas are wise to figure their monthly travel expenses, which must come out of the family budget somewhere. A house close in may cost more, but a house farther out adds to commutation.

To find yourself house-poor, especially in these days of high living costs, does not make for a happy home life when every movie or holiday observance pinches the family budget.

Paying off a mortgage can be considered saving, but you need available savings in addition.

HOW OWNERSHIP IS PROTECTED

More home owners take chances without title insurance than any other form of indemnity.

Fire, life and even liability insurance are more widely understood than title insurance. Yet a title policy sometimes can prove more valuable than a fire policy.

Even total loss by fire leaves you with a foundation and your land. But if your title is invalid, you can lose all.

Of course, this doesn't happen very often. More frequently an unjustified claim arises. Some neglected heir of a previous owner of the land feels that he has a right or part interest in it. Such a claim must be fought in court.

Legal Costs Run High

The biggest feature of title insurance is that the title company must defend any claim that is made against your ownership. The cost of such a defense may exceed the cost of your home.

Don't be misled by the fact that you have a mortgage on your house and that the mortgage lender charged you for title insurance along with fire insurance when you took title to the property. Insurance held by the mortgage lender does not protect your equity. The mortgage lender is only interested in seeing that his loan is safeguarded. Financially it makes no difference to the mortgage lender who holds the equity, so long as the loan is protected and paid.

The amount of cash you have invested in your home, which increases with each payment toward reducing the mortgage, is unprotected without an owner's title policy. When your mortgage is paid off, the bank's title insurance ceases, and there is no protection on any part of the property. But an owner's policy continues indefinitely without further premium payments. One single payment in the beginning is permanent.

Even though your mortgage may amount to more than your

share in the deal, you are the owner and it is your responsibility to defend your title to protect both yourself and the mortgage lender.

Sometimes a flaw in title develops without a claim being filed. You may be planning to sell your property and the prospective purchaser's lawyer may discover some long lost survey or other records that show your title to be imperfect. You are then saddled with an unmarketable title.

Protection From Mistakes

Title insurance compels a title company to make your title good, even if the company itself made a mistake in the beginning. It insures you against errors made by clerks in public offices, surveyors and court officers.

It's usually cheaper to get a title policy when taking title to a property than it is at a later

Ask Lawyer Before You Sign to Buy

Every home buyer, or home builder, needs a lawyer when he signs a contract.

Many people make the mistake of thinking that the important time to call in a lawyer is when they take title. The smart man has his lawyer on hand on both occasions—contract and closing.

When you sign a contract to buy real estate, the seller has his lawyer with him, or presents you with a contract drawn by his lawyer. If you do not have your lawyer present, you may find that you have signed a very one-sided contract.

A lawyer can protect you from buying property which a seller may not own. He can competently inspect tax receipts, determine encumbrances and see that you have some guarantee that the seller will fulfill his obligations.

The seller may be your friend, and you may trust him, but if he should die before the contract is fulfilled, you need legal protection.

Many people have signed contracts specifying, for example, that their house would be completed by a certain date. A lawyer will tell you that such a statement means absolutely nothing without the insertion of a legal phrase: "time is of the essence."

If you sign a contract without legal guidance and call in a lawyer when you are about to take title, don't be surprised if he tells you that you signed away whatever rights you were entitled to, and that all he can do is to pick up the pieces.

The Right Ways To Apply Paints

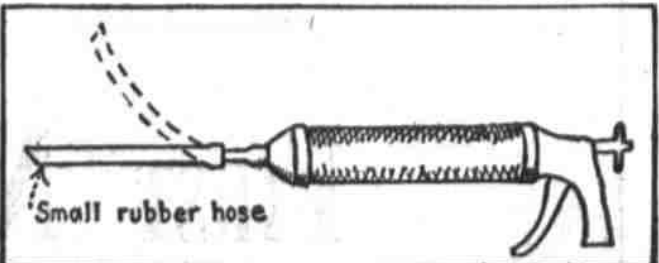

The best way to apply paint depends on the paint.

The National Paint, Varnish and Lacquer Association recommends that flat paint be brushed in a semi-circular stroke, allowing the brush to leave the surface on the completed portion of the work.

Varnishes and enamels are flowed on with plenty of material carried on the brush in even strokes to maintain a uniform thickness.

Shellac is applied rapidly in straight back-and-forth strokes.

TIP ON CAULKING CORNERS

A FLEXIBLE rubber hose fitted over the end of a caulking gun can be a big help in reaching difficult places. The end of the hose can be cut at the same angle as the original gun point.

Molded Plastic Makes Countertop Drip-Proof

KITCHEN COUNTER TOPS are now made of molded plastic in one large seamless piece with a raised and rounded front edge that prevents overflows on the floor. Here spilled chocolate frosting is wiped up with a sponge showing how the rounded splashback, which is part of the counter top, offers no unsanitary crack or crevice for food deposits. Developed by the chemical division of General Electric, the surface is plastic resin impregnated and welded under heat in hydraulic presses. The complete lamination is 3/16-inch thick, can be mitre-cut for corners in a U-shaped kitchen and butt joined with glue. The material is self-supporting, requires no plywood base for rigidity and can be installed over an old top or rested on base cabinets.

Spray Painting Can Be Messy Job in the House

You bought a vacuum cleaner with a paint spraying attachment?

Well, look out when trying to use it. Paint spraying can turn out a professional finish on your automobile, kitchen cabinets, and so on, but you have to know how to handle it.

You have to wear old clothes, which you are ready to throw away—an old hat that covers a lot of territory—gloves, and a thick coating of cosmetic cream or petroleum jelly over your face and all exposed skin.

The spray from the paint is going to cover everything it settles on.

Because of the rapid diffusion of vapor and fumes, odorless paint lends itself readily to this type of work. Douglas C. Arnold, president of the Keystone Paint and Varnish Corp., of Brooklyn, pioneers in odorless paint, was asked for his advice on the use of popular vacuum cleaner sprayers.

"If properly used," Mr. Arnold said, "a sprayer can produce a smooth, even finish, with no runs or brush marks, and do the job two or three times faster than brushing.

"But it's important that you cover everything, which you do not want to be colored with the paint you are using. This presents quite a problem.

"If you are spraying the walls and ceiling of a room, the woodwork, or windows—floors and every other detail that is not to be painted—must be covered with old newspapers and tightly sealed with masking tape."

Paint experts usually advise against spraying the walls of a small room—although it has been done successfully by professionals. A Long Island, New York, developer used paint spraying throughout the interior of houses to cut costs.

Floor Tile Keys Each Room's Use

The popularity of the basementless house with radiant heated concrete floor and the spreading use of structural plywood for smooth and rigid sub-flooring have made resilient tile one of the most widely used floor coverings.

The ease of laying asphalt tile, rubber tile or cork tile has opened new avenues for originality for the home decorator as well as extending opportunities for design to the large areas which are devoted to floor.

Recreation rooms and game rooms were the first to demonstrate the possibilities of floor design through patterns formed by resilient tile.

Shuffleboards and other game patterns permanently set with contrasting colors in the floors of recreation rooms pointed the way for dressing up floors throughout the house.

Entrance foyers, children's rooms, kitchens and dining areas now are frequently paved in appropriate designs that keynote the use of each room as definitely as wallpaper or other decorations.

A striking entrance foyer, for example, was paved in black floor tile accented with a white ribbon border one tile-width, or 9 inches from the edges and centered with a large black and white many-pointed compass star.

Children's rooms have been floored in keeping with a child's love of color and variety. Picture tiles of a cowboy on a bronco, a swimming frog, sailfish and other designs are found in boy's rooms. Rabbits, duck, birds, daisies and sunflowers appeal to the girls. Laughing clown designs, ABC's and numerals are popular for all children.

In kitchens where solid masses of white predominate in equipment, elaborate floor patterns in sharp color contrasts with theme accents show to advantage. Picture tiles for kitchens include kettles, pitchers, spoon and fork, fruit and vegetable still life. These are sometimes worked into borders or multi-tile squares in a marbled floor or used singly in the center of a small kitchen.

Flower petal and ivy leaf designs are among those used in dining area floors.

The proportions of a room very often can be improved through floor patterns. Some basic principles have been worked out by designers of Kentile, Inc. They point out that while a checkerboard pattern in 9 inch squares often is suited for a small kitchen, a larger pattern formed by grouping four tiles at a time would not have sufficient space to repeat itself.

A long narrow room can be made to look wider and larger by running stripes in alternate colors crosswise on the floor. A large room can be pulled in by a wide border with a narrow contrasting stripe separating the border from the main floor area.

Shuffleboards and other game patterns permanently set with contrasting colors in the floors of recreation rooms pointed the way for dressing up floors throughout the house.

Oven Built in a Wall Revises Kitchen Plan

THE KITCHEN RANGE is coming apart in modern planning with the oven separated from top burners and each unit placed where it will be most convenient. Manufacturers of gas ranges (Chambers) have developed in-a-wall ovens and in-a-counter burners which can be built into the kitchen the same as sinks and dishwashers are encased. This makes it possible to place an oven at convenient height and adjacent to a built-in baking board, while top burners can be located nearer to the sink. A second oven for broiling likewise can be built into the wall at another location determined by convenience. Insulation and adequate venting eliminate fire hazards.

How FHA Made Buying And Remodeling Easier

The Federal Housing Administration (FHA) is one of the most misunderstood agencies of the government.

You'll hear people talk about getting a loan from the FHA.

This can't be done and never was done.

The FHA lends no money. Its business is to insure mortgage loans made by banks and other lending institutions.

This doesn't mean that the government will step in and make your payments for you if you can't meet them. It means that if you are having a house built, or buying one from a builder, the FHA says in effect:

"If that house is built to our standards, we will insure the bank against loss on its loan in case the house must be taken in foreclosure and resold at a loss."

If you are planning to remodel your house, a similar arrangement is made. In both cases you sign the usual bond or note for which you are personally liable. And in both cases you pay the insurance premium on the loan. This amounts to one-fourth of one per cent.

You'll hear people ask: "Why should I pay for insurance to protect the bank?"

There are several reasons. Before the FHA was established, you couldn't get such liberal loans, nor monthly payments extending over 20 years or

more. For modernizing a house, it would be difficult today to get as much as \$2,500 spread out in monthly payments over 30 months, without FHA insurance.

But most important is the assurance established by FHA standards, which in many cases have been stricter than building codes. One out of every three new homes in the United States is financed with an FHA-insured mortgage, which indicates the popularity of the system.

By seeing to it that the entire transaction is economically sound, the FHA has kept foreclosures at a minimum. Although more than two million homes were financed under Section 203 of the National Housing Act with insured mortgages, only three out of a thousand had to be foreclosed.

This stability resulted in an accumulation of premiums so far exceeding needed reserves that many millions in rebates have been made in certain classes of paid-up mortgages.

Paint Gave Name To the White House

The White House in Washington, D.C., gets its name from the coat of white paint that concealed the smoke smudges on its limestone walls after the British set fire to the President's Palace in 1814.

When George Washington outlined his plans for the original structure to the architect, he stipulated that the building was to "have the sumptuousness of a palace, the convenience of a house and the agreeableness of a country seat." But he didn't specify the color.

White paint got the job in 1814 and even the recent remodeling did not dare to change this specification.

129 Pc. COMBINATION

Complete Service for 8!

HERE'S WHAT YOU GET:

- ★ **8-Pc. DORMEYER ELECTRIC MIXER**
 Saves time and work in the kitchen! New Electricmold 8-pc. Dormeyer kitchen mixer with portable mixing head. Set includes: mixer, stand, large and small spot glass mixing bowls, juice bowl, spatula, reamer and juice strainer.
- ★ **25-Pc. GLASSWARE SET**
 Lovely gold-colored rims and daintily etched leaf design on this sparkling clear glassware set. Included are: 8 Fruit Juice Glasses, 8 Water Tumblers, 8 Ice Teas and Pitcher.
- ★ **53-Pc. DINNERWARE SET**
 Gay center floral pattern of rich colors and intricately designed gold border on creamy background. Service for 8 includes: 8 Dinner Plates, 8 Cups, 8 Saucers, 8 Dessert Plates, 8 Soup Bowls, 8 Cereal Bowls, Platter, Serving Bowl, Creamer, Sugar Bowl and lid.
- ★ **34-Pc. SILVERWARE SET With Chest**
 By International Silver Company
 Gleaming silverware, heavily silverplated in the finely detailed "Diplomat" pattern by International Silver Company. Included with chest: 8 Knives, 8 Forks, 8 Teaspoons, 8 Soup Spoons, Butter Knife, Sugar Shell.
- ★ **8 GLASS STIRRERS**
 Eight sparkling stirring rods, each with tiny glass ball on one end... to complete this fine set for ease of entertaining.
