Notaries Must File By June 10

Secretary of State Crawford C. Martin announced that all qualified Notaries Public desiring re-appointment for new term ending June 1, 1965 must re-qualify by the payment of the required fee and the filing of a new oath and bond with the County Clerk of his residence between June 1, 1963 and June 10, 1963.

Martin emphasized that Notaries Public should not send requests for re-appointment or for commissions directly to the Secretary of State. The law specifically requires that the County Clerks approve notary bonds.

Any person not now a Notary Public who desires appointment should apply to his County Clerk between April 1, 1963 and May 20, 1963. Application during this period will assure prompt attention before the rush procedure of re-appointing present Notaries.

The Secretary of State further pointed out that each person applying for a commission as a Notary Public must be at least 21 years of age and a resident of the county for which he is appointed. The exact name and permanent address of the applicant must be furnished the County Clerk.

Spring Officially Begins Today

Spring, the vernal equinox, officially begins today, March 21. That means winter is over as far as the calendar is concerned. But sometimes the weather does not observe the official spring date, and winter makes a return engagement and temperatures dip below the freezing mark.

With warmer temperatures, seed planted and plants put out in gardens are beginning to grow. Redbud trees, japonica and jonquil are in full bloom. Fruit trees are budding and some are in bloom.

Grass is putting out and is affording grazing for cattle, cutting down on feed bills.

JONES & BONHAM

Austin.— A \$3,000,000,000 budget bill has been passed by the House of Representatives.

Before it cleared the House and went on to the Senate, the bill elicited several cries of anguish from some who protested agency bequests as too small and some who claimed certain allotments were too big.

Rep. Forrest Harding of San Angelo claimed appropriations for the State Armory Board and the State Board of Control were too big, since they involved \$1,000 salary raises for executive directors of those agencies.

Rep. Terry Townsend of Brady claimed deputy commissioners in the Texas Education Agency draw a total of \$14,800 more than the Legislature authorized.

Townsend also tried to cut out a \$250,000 appropriation to improve the newly-donated Mheatly Ranch in Blanco County as a state park. He claimed the money was needed for established parks. But this move failed.

LOW COST OF EDUCATION—Complains about too low appropriations came from members who said allotments for higher education in 1964-65 are too small.

The last Legislature appropriated \$159,800,000 from the State General Revenue Fund for higher education in 1962-63.

State college administrators requested \$243,000,000 for the coming two years. Former Gov. Price Daniel and the Legislative Budget Board recommended \$226,000,000. Gov. John B. Connally recommended \$225,000,000. Paducah Rep. Bill Healy's appropriations bill allows for \$187,600,000 to educate the bumper crop of war babies that is expected to begin to flow into state colleges

next year.

Rep. Hugh Palmer of Fort Worth claimed the Healy committee had slashed Arlington State College's library budget so drastically, the school might not be accredited next year.

So, Palmer and Rep. Don Gladden of Fort Worth begged for an amendment to raise Arlington's appropriation. It failed by a vote of 94-41.

The \$172,000 needed to make the Texas Maritime Academy in Galveston a reality was absent from the appropriations bill. But Governor Connally said, "I have real hope of getting the Legislature to restore the maritime money." He didn't say whether he had any hope of getting the allotment for higher education boosted.

COUNTY BUYING MAY BE EASIER—Rep. Vernon Beckham of Denison got a green light from the House Committee on Counties on his bill to raise the amount a county purchasing agent may spend on emergency purchases without advertising for competitive bidding.

Since 1925, the amount that may be spent without competitive bidding has been \$150. Beckham said this is unrealistic in the view of rising costs. He proposed it be raised to \$500. However, the subcommittee set it at \$300.

Reps. Henry Grover and J. C. Whitfield of Houston won approval from the House State Affairs Committee on their bill to require competitive bidding on public school purchases above \$1,000.

SALES TAX FREEZE FALLS—An attempt by Rep. John Allen of Longview to pass a consti-

tutional amendment to freeze the state sales tax at two per cent and keep food and drugs exempt failed by a 72-64 vote.

However, food may remain safe from the sales tax if a measure by Rep. Ben Atwell of Dallas and Rep. Charles Wilson of Trinity passes. They have proposed legislation to simplify sales tax bookkeeping for grocers. Since grocers have been the ones fighting for a blanket tax this bill may satisfy them.

TUITION RAISES PROPOSED—Rep. Atwell picked up a recommendation by the Commission on Higher Education to double state college tuition, and filed a bill to raise it from \$50 to \$100 a semester.

Governor Connally has ignored the commission's suggestion.

Rep. Dick Morgan, Republican from Dallas, chose "a good compromise." He introduced a bill to raise tuition to \$75 a semester.

Children of members of the Texas National Guard who have been killed in the "cold war crisis" since 1950 will be provided free tuition in state colleges, if a bill by Representative Parmer is passed.

—STATES RIGHTS STAND—The House passed a resolution to ask Congress to call a constitutional convention to leave legislative reapportionment to state legislatures. Rep. Bill J. Parsley of Lubbock said, "This may be the last time the state can take a stand on what may be the last of state's rights."

If the proposed amendment is adopted by a sufficient number of states, Texas could insure a ruraly-dominated legislature, despite urban growth.

AT THE ANNUAL meeting of the North and East Texas Press Association each year, a plaque is presented for Meritorious Service in the Field of Journalism. This plaque was first presented to the late Sam C. Holloway, former publisher of this newspaper. After his death it has been called the "Sam Holloway Memorial Award" in memory of the man who worked hard with others to organize the NETPA and was its second president in 1927. The plaque has become a coveted award by members of the Association. Mrs. Holloway, who with Miss Eddie Lou Short, represented this newspaper at the convention last week end in Kilgore, was honored by having her picture made with the recipients of the award this year, Mr. and Mrs. R. N. Robison of Royce City, American and presented by last year's award winner Jack Callan of Kaufman. The group picture appeared on the front page of the Longview Morning Journal, Saturday.

ATTEND — IMPORTANT

March 28th, 9 a. m. to 5 p. m., at the Alps Cafe in Mt. Pleasant. Ray Morrison, representing the Area Redevelopment Administration, and Rip Loftis of the Extension Service will commence a workshop meeting to explore with community representatives and business leaders how best to industrialize Northeast Texas counties. Possibilities of each community will be explored. Projects judged feasible by this group will receive every bit of help it is within my power to give.

Economic Conditions. The Joint Economic Committee, of which I am a member, has just published its annual economic report. It concludes that our economy will continue to be sluggish and might even worsen if tax cuts are not enacted. Even with tax cuts, our 6% unemployment rate isn't likely to decline. This is one of the biggest problems our economy faces.

Accelerated Auto Output. With the optimism of Spring, some auto makers are predicting that 7 million 1963 models may be produced—a 4.5% gain from the 6.7 million turned out last year. Autos are an important bellweather for the economy, providing directly and indirectly many thousands of jobs.

Improvements in Wages. In 1913, steelworkers received \$12 a week and had to work 70 hours for it. Today, they receive \$122 for a 40 hour week, and, in addition, receive paid vacations, sick pay, retirement annuities, and other fringe benefits.

Fifty years ago working people had to spend over 40% of their income on food. Today, the average industrial worker spends only 25% on food and enjoys much greater variety.

Spending. People are spending a bigger percentage of their incomes on autos, housing, education, medical care, interest on loans, insurance and gifts to charity. On the other hand, because of higher incomes, a smaller percentage goes to pay for drinks, food and tobacco.

The power to become God's perfect child is within all of us. We need only to brush aside all the disappointments and doubts and disbeliefs of the past and join in silent communion with Him through prayer.

ury Dillon and Federal Reserve Board Chairman Martin both testified before the House Banking and Currency Committee, strongly endorsing the President's proposal to switch the one dollar bill from a silver certificate to a Federal Reserve note. This proposal would free 1.3 billion ounces of Treasury silver much needed to mint half-dollars, quarters, and dimes in the future.

Aging Citizens. A leading British publication says our country's 17 million senior citizens—nearly a tenth of the population—may hail President Kennedy's recent message to Congress as their "Magna Carta." The President recommended not only federal hospital insurance, but also better housing, retraining for employment, recreation, and adult education for the elderly.

If loss in life is not high enough, Captain Warner cited that an estimated \$145,621 has been lost in property damage.

Memo for the Boss:

Big Thinking Pays Off

IN ANY SMALL BUSINESS

Managers of small businesses sometimes feel that statistics, efficiency and long-range planning are peculiarities of the jobs of big business executives, and have little or nothing to do with their small stores or shops. Yet very few ideas can be as wrong as this one!

About eight out of every ten businesses in America employ less than ten people. These companies operate on a narrow margin of capital—and every year thousands of them go out of business because their managers make mistakes their budgets can't afford. For a mistake is much more expensive when when you can't afford it than when you're part of an industrial giant with rich financial reserves.

ADVERTISING AS AN EXAMPLE

To illustrate the point, marketing executives in large organizations keep records and dig up formulas to determine how much they must spend in advertising to maintain a certain volume of business. Yet many small organizations which may literally be forced out of business if a certain volume isn't maintained never bother with establishing the ratios necessary to tell them how much advertising they need to survive.

THINK BIG — AND GROW BIG

Every big business was once a small business. In almost every case, it grew big because its management thought big.

"My wife always lets me have the last word," exulted the husband of two months.

"Huh!" snorted a seasoned old-timer; "just wait until you run out of compliments, young feller!"

Alcorn Reports There Are Plenty Of Answers On Cuba But None Work

Editor's note: Achin Alcorn Philosopher on his Johnson grass farm on Sulphur looks at a problem this week, but then throws up his hands.

Dear Editor: Somebody has to do it, and there's always plenty of men hunting the job, but being President of the United States is one job I wouldn't be interested in. Too many problems with no answers.

I don't mean to say that running this Johnson grass farm doesn't involve a lot of problems, and some of them may not have any answers, but I don't have to contend with a lot of people furnishing answers that won't work. And even in the worst year, there are always times when I can wake up some mornings without anything really bothering me. This doesn't happen in the White House.

For example, right now everybody wants the United States, and therefore the President, to do something about Cuba.

One man out of many I was listening to on television said the way to handle Cuba is simple, just cut off the flow of oil to the island, that'll bring Castro to his knees. Now I'll admit you can't run machinery or a country very long without oil, I've tried it with my tractor and it's the quickest way I know to bring it to its knees, and also to the repair shop.

So when somebody asked, "Wouldn't stopping a Russian ship bearing oil to Cuba be an act of war?" this man said, "Well, naturally, I'm not in favor of war, what I mean is I'm in favor of stopping the flow of oil to Cuba provided it wouldn't be considered an act of war."
