ROAD BUILDING FORCES TEXAS INTO DILEMMA

By RICHARD M. MOREHEAD
United Press Staff Correspondent
AUSTIN, Tex.—Highways are a government headache in this biggest state of the union.

Texas has 26,000 miles of designated roads and approximately four times as many miles of auxiliary roads that are outside the state highway system. Only 12,000 miles of the 26,000 are called "adequate" today and even some of the 12,000 miles will be inadequate within a year.

Towns in Texas mushroom with the development of new oil fields and construction of army camps and major national defense works. Great army camps are located at El Paso, Brownwood, Abilene, Mineral Wells, San Antonio and Palacios. Aircraft factories are under construction at Fort Worth and Dallas; shipyards at Houston and Fort Arthur; a large naval air base at Corpus Christi.

Sixty of 70 new oil fields are discovered annually in Texas, and with each some nearby village almost overnight becomes an active town. Heavy trucks crack and wear out roads that were built for lighter traffic.

The U. S. Bureau of Public Roads has decided to concentrate its funds in the near future on highways that have military importance. A border state, Texas has its bid for improving 6,300 miles of military road. That comprises one-twelfth of the total mileage in the United States that is designated for military purposes.

Robert Lee Bobbitt, member of the Texas highway commission, told a meeting of highway officials recently in New York City that army maneuvers already have proved the inadequacy of the state's highways, particularly bridges, for handling heavy military traffic.

Despite this, truck operators in Texas are waging a strong fight to have the legislature raise the present 7,000-pound truck load limit. Gov. W. Lee O'Daniel recommended a 14,000-pound load limit, but truckers' organizations favor a formula that will permit loads up to 32,000 pounds on the largest vehicles.

One of the sorest spots, however, is a surplus that has accumulated in the state highway bond assumption fund. Several years ago, the legislature earmarked 1 cent of the 4-cent state gasoline tax to pay for county bonds on roads incorporated in the state highway system. The cent-a-gallon is more than enough, and nearly \$10,000,000 of unattached funds remains in the treasury.

County officials want the money turned over to them for local use. The highway department wants it for building more state highways. The automobile drivers want the legislature to reduce the gasoline tax because a great part of traffic that uses the gasoline travels municipal streets.

Highway department officials are in a quandary. County officials don't want the state department to get any extra money, they say, but constantly demand new roads in their counties.

Chairman Brady Gentry of the highway commission recently declared that Texas is "falling far behind in its highway program all the time." He estimates that it would cost \$400,000,000 today to make Texas' 26,000 miles of designated road adequate.

The department has about \$42,000,000 a year available, less than two-thirds of it for building and maintaining roads.

"At the present rate," said Gentry, "Texas will be further behind ten years from now than it is right now. And right now we need \$400,000,000."

Even Sugar Pills Are Aid to Co-Eds

By United Press
MINNEAPOLIS, Minn.—The health service at the University of Minnesota has administered standard cold remedies to students in an experiment to determine their effectiveness.

Part of the students, although they were not aware of it, took only ordinary sugar pills instead of the regular cold pills. They were asked to check whether the treatment had helped the cold.

Thirty-five per cent of those treated with sugar pills reported "improvement," doctors said.

They Know Mountain Fighting, Too

Hitler's boys did some historic mountain fighting in Norway, but if they try it against Yugoslavia they'll run into the "komitadjis," famed for centuries for their mountain warfare. Expert sharpshooters, the fearless komitadjis have never been dislodged from their mountains. Here are some of them in festive dress.

People Who Retire On Social Security Should Tell Office

ABILENE, Tex.—Persons 65 years of age or over who may be entitled to Federal old-age insurance should immediately communicate with the nearest Social Security Board office when they are separated from their jobs. W. O. King, manager of the Abilene, Texas, office of the Board, said today, "Otherwise," the state benefits merely because of their delay in filing a claim. This applies to all persons who have been working in employment covered by the Social Security Act for a sufficient period of time to qualify for benefits.

It was explained that old-age insurance payments are not retroactive; payment cannot begin prior to the month in which a claim is filed. For instance, a person aged 65 or older who was separated from work on January 1, 1941, but who filed his claim in March, will receive benefits beginning with the month of March. He loses the benefits he would have received in January and February had he filed his claim in January.

Mr. King explained further that an individual eligible for old-age insurance payments does not have to be retired permanently in order to receive such benefits upon reaching 65, but he may receive them for any month in which he does not earn as much as \$15.00 in covered wages, even though he is receiving unemployment insurance and plans to return to work later.

"It should be noted," King said, "that the survivors of a deceased wage earner have three months in which to file their claims. In the case of a wage earner who dies in March of this year, the survivors who are eligible to receive monthly insurance payments at that time may file their claims as late as June 30, and receive benefits beginning in March."

Spelling Books Are Fund To Differ

By United Press
STATE COLLEGE, Pa.—Inconsistencies in spelling books may often be the cause of poor spelling among school children, according to Dr. Emmett A. Betts, head of the reading clinic at the Pennsylvania State College.

Dr. Betts found in a check of 17 spellers published in the past few years that only one word—"long"—was placed uniformly in a particular grade.

"Teachers take the books too seriously and follow them too slavishly," Dr. Betts said. "They teach fifth grade pupils only those words in the fifth grade book. As a result, our study has shown that there is no such thing as a fifth grade or a sixth grade word."

Spelling and capitalization also varied in the books checked.

Slag Becoming Highly Useful As A War Material

PITTSBURGH.—Slag—once the unwanted by-product of the steel industry—is fast becoming of vital importance in the nation's armament drive.

The lava-like material, which is the waste matter left in the production of iron, formerly was a burden to the industry—something to be disposed of as quickly as possible.

New defense projects, however, have opened up many new uses for slag, according to local steel-makers and slag processors. Slag is playing an important part in the construction of emergency airports. It is going into the runways, hangar aprons, drains and building foundations.

Cantonment streets in army camps are being paved with slag, and coastal fortifications are being reinforced with it. Slag concrete blocks are being used in the construction of defense factories. Even roofs are being laid with slag.

The material also is employed as ballast for railroad tracks and is the filtering substance for sewage disposal systems in army camps.

But its use is not limited to the American armaments program. Officials of the National Slag Association report that the famous German naval base at Helgoland is largely built of slag concrete in addition to its use in the West Wall.

According to slag officials, this waste material is coming into increasing importance because of its availability, economy and durability.

The available supply of slag corresponds to the rate of production of steel. With the present steel rate operating near theoretical capacity, the supply of slag is more than adequate.

It is inexpensive, with grinding and screening the only main processing operations necessary. In addition, slag is an unusually hard material, which, according to experts, can only be broken up by a pneumatic hammer when it has solidified. Tests have shown it has superior resisting qualities to machine gun bullets.

The use of slag in the present emergency also allows conservation of more valuable and less plentiful construction materials, according to the slag association.

Slag is one of two solids that come out of a blast furnace—the other being iron. For every two tons of iron are one ton of slag is tapped in a molten state from the furnace.

It is poured into large ladles and is hauled to cooling pits or dumps. After it has solidified, the slag is transported to crushing plants where it is screened into various sizes, in accordance with the use for which it is intended.

"COTTON-COATED" SHEEP
LARAMIE, Wyo.—People asked so many questions that finally University of Wyoming authorities had movies made of their "cotton-coated woolly" sheep.

ALLOWABLE IN COUNTY SHOWS AN INCREASE

Breakdown of the State Railroad Commission allowable schedule for oil production in the West Central Texas area, effective April 1, shows an increased permissible production for the 15 counties of the district, instead of the reduced allowance as had been reported last week when the commission held its statewide hearing. Included in the increase allowed was Eastland County.

An increase of 513 barrels daily, instead of a cut, was shown for the district, with Eastland County having an increase of 54 barrels daily. The Carbon field of Eastland County has an increased allowable of 20 barrels a day.

Allowable production for Eastland County under the orders effective April 1, show the county has been assigned 2,759 barrels daily, as compared with 2,705 barrels under the Mar. 10 order.

Allowable for the Carbon field was set at 140 barrels daily, compared with 120 barrels for the field under the Mar. 10 orders.

Figures for other nearby counties include Palo Pinto, 392 barrels; Stephens, 3,431 barrels; Brown, 1,528 barrels; Callahan, 1,161 barrels; Comanche, 102 barrels and Erath, 102 barrels.

SEVEN MORE AXIS VESSELS ARE SCUTTLED

A total of seven German and Italian tankers and freighters were scuttled by their crews today in South American ports, as Western Hemisphere nations indicated they might follow the lead of the United States in seizing Axis and Axis-dominated shipping, or placing them under watch.

The United States today placed 18 French merchant ships, including the luxury liner Normandie, second largest vessel afloat, under close watch.

There was still no indication as to what disposition might be made of the seized vessels, though Danish crew members expressed the hope their vessels might go to Great Britain. Italian seamen were being held virtual prisoners in New York, while Danish seamen were allowed more freedom and newspapermen were allowed to interview them.

Officers Capture Still South of Cisco

Sheriff Loss Woods and his deputies Monday took possession of an 80-gallon capacity still, which they located in operation in the mountains four miles south of Cisco. With the still the officers obtained five gallons of whiskey and 300 gallons of mash.

Later in the day Sheriff Woods arrested a man in Cisco whom he is holding for Federal officers in connection with the captured still.

James Roosevelt To Marry After Easter

BOSTON, April 1.—The Boston Post said today that James Roosevelt, eldest son of President Roosevelt, and Miss Ronelle Schneider will be married "shortly after Easter."

Watermelon Week Will Be Proclaimed

NACOGDOCHES, Tex.—Governor W. Lee O'Daniel has promised W. L. Jones, chairman of the Nacogdoches County Melonfest, that he will proclaim June 29 to July 5 as "Watermelon Week," Jones announced today. The governor said he may accept an invitation to attend.

Pancho Villa, storied Mexican desperado, had a daughter—and here she is, singing in a Baltimore night club. Senorita Celia Villa soon goes to Hollywood to appear in a movie based on her father's life.

Farmers Cast For Pheasants Using A Fishing Line

By United Press

SALT LAKE CITY, Utah.—Utah farmers developed a new summertime sport—dry-land fishing with rod, reel and fly, but with sagebrush land replacing the trout streams and pheasants substituting for trout.

The new sport was disclosed by the Utah legislature during debate on revision of fish and game laws.

State Sen. Francis Lundell said dry-land fishing was developed by farmers who could not spare time away from their crops to travel to mountain trout streams.

Farmers take their rod and reel into fields where pheasants abound, the senator disclosed. The fishhook is baited with a kernel of corn, the line is stretched out in the field and the farmer hides behind a bush.

The pheasant gobbles the corn, is caught by the hook and the farmer plays the bird like a trout until it collapses exhausted.

"They say fighting a pheasant in the air is more thrilling than battling the largest trout," the legislator said.

Mississippi Will Have Sam Dole Day

By United Press

EUPORA, Miss.—The 100th anniversary of the death of Gen. Sam Dole will be observed May 23 at Daleville, Miss.

Dale was famous as a militia leader in Georgia, Alabama, Florida, Louisiana and Mississippi during the late 18th and early 19th centuries, when relations with the Indians was the chief problem of residents of those states.

Sen. Theo G. Bilbo, D., Miss., has been invited to deliver the address at the ceremonies. Gov. Paul B. Johnson will be a guest.

HITLER'S SPRING PLAN IS DISRUPTED BY THE EVENTS OF PAST WEEK

Oil Field Men Ruled As Under Wage-Hour Law

DALLAS, April 1.—Through-out the oil industry in the Southwest, employers and employees are studying a Federal Court opinion which is of extraordinary importance to that industry.

Judge James C. Wilson, United States District Court for the Fort Worth Division of the Northern District of Texas, has held that ordinary oil field workers, including those engaged in the operation of "stripper" wells, are covered by the Federal Wage-Hour law, because most crude oil, certainly that which finds its way into major pipe lines, goes out of the state, although it may be in the form of by-products, and therefore is in interstate commerce. Accordingly, the opinion holds that such workers must be paid overtime at time and one-half their regular rate of pay for hours worked in excess of 40 per week.

This decision was made in a suit brought by H. H. Brown and other employees against R. F. St. John, an oil producer in the Amity Field, Comanche County, Texas, to recover overtime pay claimed by them under the Wage-Hour Law. The court sustained the claim but did not set out the specific amount of money to be paid them.

Judge Wilson also ruled that the employees' regular rate of pay upon which to compute overtime compensation is determined by dividing the actual number of hours worked each week into the weekly wage. This sustains the formula set forth by the Wage and Hour Division in paragraph 12 of Interpretative Bulletin No. 4.

The employer, St. John, used a different method of figuring weekly wages and contended that weekly wage was all right as long as it exceeded the statutory minimum, 30 cents per hour and 45 cents per hour for overtime. Judge Wilson said this method "is purely a fictional rate of pay." (The method used by St. John.)

A question of the employer's method of computing wages was involved in the recent Dallas News case, which was decided in favor of The News by Federal Judge William H. Atwell, Dallas. That case is now being appealed by the Wage and Hour Division.

In deciding the St. John case, Judge Wilson referred to the Dallas News case and observed that the opinion in The News case was apparently contrary to what he holds in the St. John case.

In the latter case the defendants contended they did not intend or know that their oil or by-products would pass into interstate commerce. Judge Wilson said:

"They must be held to know that which is of such common knowledge that the courts may take judicial knowledge of it, viz., that the greater percentage of all crude oil produced in Texas, certainly such as finds its way into major pipe lines, goes out of our State, though it may be in the form of by-products, for ultimate consumption. . . . I hold the law is applicable. I see no need of discussing the authorities, there are many, which support this view."

Soft Coal Miners In 12 States Strike

Soft coal mines in 12 states were shut down today, cutting off fuel supplies to steel mills and industrial plants operating at capacity speed on national defense orders.

It was expected in some quarters that President Roosevelt might personally intervene in the strike if an agreement was not reached by tonight between mine operators and CIO union members.

Father of Ranger Man Dies Tuesday

E. C. Swoveland of Ranger received a long-distance telephone call today informing him of the death of his father at his home in Indiana. He had been seriously ill for some time.

Mr. and Mrs. Swoveland left for Indiana immediately, and will attend the funeral services.

Axis anger mounted today against Jugoslavia's new government and over the Western Hemisphere seizure of shipping belonging to the Axis and Axis-dominated countries.

There was no direct indication any counter action by the Axis might be made in the shipping situation, but signs that Germany was prepared to make war on Jugoslavia multiplied.

In Rome several hundred troops, soldiers and plainclothesmen guarded the United States embassy and Yugoslav locations as students demonstrated in the streets in behalf of the Axis and against the democracies.

The Rome demonstrations were touched off by the presence of Japan's foreign minister, Yosuke Matsuoka. Matsuoka's trip to Rome and Berlin was originally heralded as a mighty Axis threat, particularly toward America.

The Yugoslav coup, occurring the day after he arrived in Berlin, the British victory over the Italian fleet, revealed the day before he arrived in Rome, and widespread Western Hemisphere measures against the Axis shipping, tended to push the Japanese statesman's activities into the background.

However the possibility continued that the Axis might persuade Japan to raise a threat in the Far East as a diversion measure, timed to coincide with the expected German blitzkrieg.

There was little tangible evidence, but the suspicion existed that Hitler's spring blitzkrieg schedule might have been upset by events of the past week. In the Balkans Hitler is faced with Jugoslavia, which he apparently must deal with before he can wage any campaign against the Greeks or against the Turkish-owned Dardanelles.

Italian naval strength has been further reduced in the Mediterranean by the English victory, making more difficult the task of supplying and reinforcing the Libyan army which Germany is building up.

Italian Revolt Is Reported Nipped By Mussolini

NEW YORK, April 1.—Americans returning from Italy said today that Mussolini had barely averted a revolution recently by sending members of his cabinet to the front and having Gen. Badoglio, supposed leader of the revolution plot, chased to the king's palace, where he was safeguarded.

Reports from Italy had mentioned the fact that members of the cabinet had gone to the front to lead Italian forces, though no mention of the revolution had come out of Italy.

Some of the reports said that resentment over German troops in Italy, shipment of summer clothing to the snow-covered Albanian front and winter clothes to the African desert forces were among the causes for resentment against the Mussolini regime.

Food Shipments To France Again May Be Under Blockade

WASHINGTON, April 1.—Arrangements for shipment of American food into unoccupied France, through the British blockade, were believed today on the verge of collapse.

Britain had previously refused permission to transport food to France, on the grounds that a great percentage of it went to Germany, but relaxed the blockade temporarily upon the insistence of the United States.

Roosevelt Starts Allocation of Arms

WASHINGTON, April 1.—President Roosevelt returned to the White House today after a 10-day fishing trip off the Florida coast, and started allocating armaments among the nation's armed forces and the embattled democracies abroad.

'Science Says—'

Ali Baba had a magic word. When he pronounced "Open, Sesame!" the door of the thieves' cave swung open, and all the riches within lay before him.

We of the twentieth century have inclined to believe that we, too, had a magic word. "Science says..." we mouth, and expect all the riches of health, wealth and happiness to lie before us.

There are people today who trust in science blindly, almost as our forefathers trusted in God. Faith like that, by the way, even in science, is not scientific.

But even science requires a sort of faith at bottom—faith that the truth is discoverable, and that it is worth discovering. That faith has been shaken in these days, as the Rockefeller Foundation admits in its review of its 1940 activities.

Science has placed powerful tools in the hands of men. But of what use are they if they are used merely for man's enslavement? If the German dye industry produced sulfanilamide, most amazing of modern medical discoveries, it also produced mustard gas. If deep principles of physics are used to point a 500-ton telescope at a hitherto unknown star, they are used also to point a 16-inch gun. It means of communication are multiplied, so that men may speak more freely to men and thus multiply truth, the same means can be used to multiply false and destructive propaganda.

But it scarcely follows that we should therefore abandon science, or the scientific methods it teaches. What we need is to realize that mere science is not enough. We need morals, too, so that we may properly use for good the tools science has given us. We need faith, the ultimate faith that lies beneath science, that the truth is discoverable and good. We need to renew faith also that there is an aspect of man apart from the material things in which science deals.

None of these things are contradictory. We need to put science in its place by faith that man's spiritual side is also important. We need moral development, so that the techniques of science may be used for good and not for evil. And we need science itself, and the scientific method, so that man, given brains, may use them to think, and to achieve.

Science is swell, and we're all for it. But science is not everything. Is man so great that he can afford to discard anything he can achieve in faith, in morals, or in science. Surely, the fault is not with any of these, but with the fact that man has not yet perfectly developed them.

Detroit couple were indicted for robbing a jewelry salesman of \$15,000 in diamonds. Stepping stones to the pen.

SLIPPING SOCIALLY

By Shirley Mae Berry
Are you slipping socially? Are you sure you are using the right technique in picking the pockets of life? This is one method to be used by the girls who have always wanted to get a box of chocolates for Easter, but whose boy-friends are always so forgetful! Here's how to persuade him to get you a box in an almost innocent way. He won't ever be the wiser (we hope). Follow these three easy rules carefully:

1. Saturday when you start to the picture show, suggest to him that you want to walk down Main first. (This is also recommended as a splendid way to show him off.)
2. Walk until you come to a drug store which has boxes of

sandy in its show windows, then abruptly stop as if you hadn't dreamed they would be there and exclaim, "Oh, Elmer, aren't they perfectly beautiful—I've never gotten a box of chocolates on Easter, but I certainly would love to, and Elmer, that's my favorite kind of candy and so cheap too, only \$5—Elmer, wouldn't a girl be perfectly thrilled over something like that?" Now you have done the most important thing, but you had better walk on a little further so he won't suspect anything.

FRECKLES AND HIS FRIENDS

which was held in Stephenville last Friday.

The Ranger Girls Debate Team received first place while the boys' team, after defeating Weatherford representatives, lost the next round to Tarleton debaters to receive second place.

First place in oration was taken by Edith Taylor and Herschel Eyley took first in radio speech. Neil Justice won first place in poetry interpretation.

Glen Rex received second place in the boys' division of extemporaneous speaking.

Those winning first places will leave Thursday at noon for the state finals in Temple. They will spend Thursday night, Friday, and Friday night in Temple and return home Saturday. Mrs. Hunter and Mrs. Taylor will take their cars on the trip.

SEWING CLUB NOTES

By Shirley Mae Berry
Have you ever listened in on a sewing club? Did I say sewing club? Well we do take a stitch once in a while, and we have to have a name for it, so why not? As I was saying, if you listened in on the club at Edie Taylor's Saturday the 22, you wouldn't have known whether it was a jamboree, whether Mardi Gras time was here again, or whether somebody was just quietly having an epileptic fit. Nothing of the sort was happening, of course. Everyone was just enjoying one of Margaret Jo's frequent periods of pure bubbling joy—you know what I mean.

But I am getting away from my story. What I wanted to tell you about was the way everyone and everything went. Fern Allen was stretched out on the floor engrossed in her crocheting (she always sits on the floor at sewing club meetings.) And can you believe it, Juneanne was sitting in the middle of the floor studying; well, yes, if you know Juneanne you can believe it.

Rita Gallagher was sitting demurely and sewing (isn't that just like her?) Hazel Fendren sat by the radio serenely listening to our popping up ever so often with "Get something more jazzy." Shirley was another one of those

girls that attempted to sew, or was it crochet? Yes, she finally learned, thanks to Juneanne. Dorothy Byas also tried to sew, but she could not do much of her quiet mood—just sitting around enjoying the rest of us. We all missed Dorothy Campbell's cheerful chatter, for she happened to be absent.

We all wonder if Margaret Jo ever got enough to eat, but I'll let you in on a secret; Fern Allen was sneaking things off her plate when her back was turned. Of course that inevitable question was asked: "Who has a date?" but I won't answer that, since I'm not your gossip reporter. I guess that is about all until our bunch of G. E. S. get together again.

MUSIC DEPARTMENT

Continuing a series of planned spring programs the college chorus presented a group of selections at the Methodist church Sunday night.

Three of these numbers were sung by the sextet, which is a sub-division of the chorus, and one piano solo was given by Mr. E. R. Priesing, head of the college music department. The program ran as follows:
Hymn No. 105, verses 1, 2, 6.
Beautiful Savior, Old Crusades.
The Sextet.
Scripture reading, Ecc. XXI, 7-9; XII, 1-7, Carrol Boon.
Prayer.

Go Down Moses; Nobody Knows the Trouble I See, Spirituals; the College Chorus.
God Is a Spirit, Scholin; The Sextet.
Offertory; Nocturne in E Flat, Chopin; Mr. Priesing.
Heavenly Manna, Cesar Franck; Frances Ussery, soprano.
As Torrents in Summer, Elgar; The College Chorus.

The Year's at the Spring, Noel Cain; The Sextet.
Hymn and Descant No. 205, Abide With Me. (Verses 1, 2 and 1).

Mr. Elwood R. Priesing, head of the Music Department, will be in Dallas over Saturday to attend the meeting of the Texas Association of Music there.

READING ROOMER

The girls would like to know why one Sid Fowler insists on so much attention. Silly, isn't it? R. J. C.'s loss will be Rainald Field's gain when MacRucker and MacLitten, as they are popularly known, take to the air in the future. Congratulations and wishes from McWinchle and Staff.

The sign on the Alley Oop says bachelors only. McWinchle overheard two girls trying to make a date. Too bad, girls, such luck.

Fern, what in the world did you do with all of the food that you stole (rather, took) from the plate of Margaret Jo at the called Sewing Club Saturday afternoon. Do China dogs eat potato chips, Fern?

Uniforms do make a nice cat, don't they, girls? Especially the girls who went to Stephenville Grigolet's car.

Maulie Faye turns down dates now without having to say she has to study; wonder why? Don't we all wish that we had that certain "thing" that Darlene seems to have?

Sue and Rita Mooncy are either in their second childhood or haven't left their first one. If any of you finds out which please inform us. Very sweet children, don't you think, and pretty too!—McWinchle.

DOLLARS TO DOUGHNUTS

BY EDITH ELLINGTON

COPYRIGHT, 1941, NEA SERVICE, INC.

YESTERDAY! Anthony takes his big idea up to the merchandise manager. He waits anxiously, knowing that if he is successful he will ask her to marry him and her husband will be ended. A customer tells her that she wants her husband to see a dress. Bee doesn't expect the woman to return, but she does. And her husband in Jenkins, Beatrice Huntington Davenport's chauffeur!

BEE BEGS FOR HER JOB

CHAPTER XX

JENKINS' hands were deep in the pockets of a striped purple suit, and a slouch hat was pushed back on his head. He had the air of a man enduring inhuman punishment.

"He was protesting to his wife. 'But listen, suppose she stays in South America the rest of the year? You think the old man's going to keep me on a salary for doing nothing? I tell you, I might be out a job and you want to buy more dresses!'

"I might not buy it. I just want to try it on."

"I've got to get out of here," Beatrice thought swiftly. "I simply can't face Jenkins. I can't have it all exposed now! It was an hour until lunchtime, and she had a customer in the fitting room. A customer who was trying to soothe a whining little boy. 'I'll be through in a minute, Junior. In just a minute.'"

Miss Getz appeared, providentially, and Beatrice cried, "Oh, Getz, please take my customer; in there. I—I don't feel well."

Miss Getz stared, but Beatrice had turned and ran. She slipped through the curtains at the other end of the fitting room aisle. Miss Dane was on the phone, her back to Beatrice. Beatrice fled through Housewares, and into a waiting elevator.

She'd go up to the soda fountain, linger over a forbidden coke, and then she'd loiter on the main floor. How long would Mr. and Mrs. Jenkins wait down there? "If he'd only talk her out of the whole idea, and drag her away!"

OVER the coke, she wondered again about what was happening upstairs. "I'll sign the slip for it," she told the soda clerk. "If you ask me, they ought to give us the cokes," the girl said while Beatrice scribbled her name, number and department across the back of the ticket. "What's a coke to the Duchess, anyway?"

"Two thousand cokes might be something," Beatrice suggested mildly.

Having finished her drink, she wandered into the stocking de-

partment. "I certainly need some, too. But \$1.35 . . . that's too much." She fingered 79-cent hose until the speculative eye of a main floor section manager sent her scurrying again. As she passed one of the side street entrances, a sudden thought struck her. "Jenkins lives in Queens. I bet he's riding around in my car!"

She walked boldly out the door. Sure enough, there a little way down the street, her shining black town car was parked. She regarded it with strangely mingled emotions. "I ride the subway, and Jenkins and his wife skylark around in that."

She took the escalator to the basement. From Children's Clothes, she peered into Budget. The Jenkinses had definitely left. Beatrice sighed with relief, and marched back.

MISS DANE was drumming dangerously on the wrapping desk, her blood-red fingernails managing to call forth an unpleasantly loud sound from the measured wood. "Where have you been?"

"Stairs for a coke," Beatrice murmured meekly. "You leave the floor? You're taking advantage of the section manager's absence, that's what you're doing! I have a good idea of where you're right now!"

Beatrice's lip. All at once, she was ready to scream, "Go on, fire me, and watch me mop up your department—in 10 minutes!"

But she was under Miss Dane, the thought simply couldn't ruin ever. He was on his own, and with the merchandise manager. He was working on a scheme he had thought to himself—he would soon be getting a promotion he had earned. The farther he gets away from this low-paying section manager job, the less it will hurt him to know I've been lying."

If Anthony could convince himself that he was standing on his own two feet in this store, if he knew beyond any shadow of a doubt that he was valuable and appreciated—perhaps later, when inevitably he discovered that Beatrice owned the store, he wouldn't feel that he held his job only because she loved him. Because Beatrice had long ago decided that Bruce Sheldrake, who was too high and mighty to explore trivial details, was going out on his ear, some fine day. And An-

thony Bradley, after serving the training she was certain Grandfather would have wanted, was going to occupy that perfectly appointed office upstairs with "General Superintendent" on the door. So Bee Davis, salesclerk in Budget Fashions, let Miss Dane, the Budget buyer, fume at her. Bee dropped her eyes and tried hard to look contrite.

"Yes, Miss Dane," she murmured meekly. "Oh, Miss Dane, I'm so sorry. I'm so very sorry."

And finally, when she saw that Miss Dane was working herself up into a veritable tantrum, and when she realized that the eyes of every girl in the department were focused on them, Beatrice took a deep breath and burst out, tearfully. "Please, Miss Dane, don't fire me! Oh, Miss Dane, I need my job. I promise, I'll never do it again. Really, I won't, Miss Dane." Her wide eyes lifted tragically to the contorted face of the buyer. "Miss Dane, you won't fire me, will you?"

SHE had learned, the day she applied for this job in the personnel office, that if you stood up to people they respected you more. But she had learned, too, that power was sweet to women like Miss Dane. Women who had so little else to glory in. The power of life and death, of hiring and firing, made autocratic tin gods of them. If you begged, they liked to see you grovel . . . and they grudgingly dispensed a little mercy, after you'd humbled yourself enough.

But Miss Dane surprised her. For, instead of the mounting fury, instead of more threats and final humiliation, Miss Dane suddenly crumpled.

"Stop that!" she grated. "Don't cry, you fool! Do you think I like tramping all over you? But I haven't got it so easy myself. . . . They took my stock girl, they keep raising my sales figures higher and higher. I'm nearly crazy, that's what I am! I was a salesgirl myself once. In those days, the store had some heart. Mr. Huntington wasn't hard-boiled, he didn't drive people . . ."

To the never-to-be-forgotten stupefaction of the entire Budget Department, Miss Dane herself burst into tears. She wailed, "Go away, you young idiot. Let me alone! Oh, I wish I never had to see this place again!"

She covered her face with her hands, and turned to Miss Getz, who had somehow crept closer. "Getz, Getz, this in the old days, was it?"

Making America Strong

MAKING AMERICA STRONG

AMERICAN ENGINEERS ARE CONTRIBUTING MANY NEW TOOLS, MACHINES, AND APPLIANCES FOR NATIONAL DEFENSE.

Standing squarely behind the builders of the nation's huge defense structure is an army of industrial inventors, designers, and engineers who are constantly creating new devices, machines, and processes so vitally important to the job of "making America strong."

This army of industry is as important as the army in the field, for without the mechanical genius of America's industrial laboratories, our soldiers would be equipped with outmoded equipment. The creative skills of the laboratory are to the fore in any inventory of America's defense strength.

There is, in fact, more mechanical and technological skill in the United States today than in any other country in the world. It follows that in the program now being executed on so vast a scale to insure predominance of our de-

fense weapons, this country enjoys increasingly apparent advantages. New machines and methods are being perfected every day. Most of them are rigidly guarded militarily or naval secrets, but occasionally announcement is made of some startling new device or process that improves our defense arsenal and, in some cases, even revolutionizes traditional methods of production.

Experts predict that air fighting in the future will take place at dizzy heights of some 30,000 feet—nearly six miles. Such aerial feats are made possible by cabin superchargers and self-sealing ships, recently developed in industrial laboratories.

Large modern mortars and howitzers were being made by a boring process that required an unusually long period of time. Now American engineers have developed a method of manufactur-

ing such barrels much faster and better by spinning the hot metals in centrifugal molds. This process is, of course, a guarded defense secret.

Expansion of the war, the need for rapid industrial production of defense materials, the constant race for mechanical superiority—together these provide a stimulating force from which flows a flood of creations, improvements, and refinements of products that in peacetime mean great human benefits.

That was the lesson of the World War. Industrial leaders believe that when the present conflict is over, American industry will be prepared to apply the new knowledge and skills it perfected under the stress of war to the improvement of peacetime products to a degree that can hardly be perceived today.

FOURTH WEEK WINNERS IN CONTEST

FIRST PRIZE WINNER

Mrs. Allen B. Hill, 1409 Mesquite Street, Corpus Christi, Texas, winner of first prize of \$100.00 in the third week's Admiration Happiness contest and a chance at the \$1,000.00 Grand Prize.

SECOND PRIZE WINNER

Mrs. Alla Barrier, 1210 Sayles Boulevard, Abilene, Texas, winner of second prize of \$50.00 in the third week's Admiration Happiness contest.

THIRD PRIZE WON

Mrs. Buddy Fisher, Box 417, Brenham, Texas, winner of third prize of \$25.00 in the third week's Admiration Happiness contest.

Also listed as winner of one of the winners of one pound cans of Admiration Coffee was Mrs. J. H. McKinney of Ranger.

Society Notes

W.M.U. Meets Monday

The Woman's Missionary Union of the First Baptist church met at the church Monday afternoon at 3 o'clock for a short devotion led by Mrs. Bob Hodges. Following the brief service members paid visits to the sick and shut-ins.

Legion to Entertain

The American Legion will entertain with a program and social, Thursday evening in the Legion Clubrooms for members and their families. All are urged to attend.

Ladies Bible Class Meets

The Ladies Bible Class of the Church of Christ met at the

church Monday afternoon at 3 o'clock for the opening lesson on the new course of study which is based on Thessalonians.

The meeting was opened with a song service led by Wesley Mickey, minister of the church who also taught the lesson. Interesting outlines of the course were given by the members. The attendance for Monday's meeting reached 43 with a membership of 60. The enrollment goal is 100.

Following the meeting a committee from the membership presented a cash donation to a patient in the City-County hospital. A generous shipment of groceries was contributed for the Bowles' Orphan Home.

Dorcas Luncheon

The luncheon of the Dorcas Class of the First Baptist Church will be held Wednesday at 12:00 o'clock at the church. All members, associate members and prospective members are invited to attend.

Boy Scouts Enjoy National Wilderness Camp

From all parts of the nation experienced Scout campers and leaders head for their Pluturn Rockymountain Scout-camp of 35,527 acres of mountain country near Cimarron, New Mexico for an unsurpassed wilderness camping experience. The camp, located in the land of Kit Carson's exploits, is developed and maintained by the National Council of the Boy Scouts of America who received the land in 1938 as a gift from Walter Phillips of Tulsa, Okla.

Valley Forge Will Hold A Blossom Fete This Spring

By T. A. Fenn

VALLEY FORGE, Pa.—A new annual celebration in honor of George Washington and his Continental soldiers who spent one of the severest winters of the Revolutionary War here will be inaugurated May 10 with a dogwood festival, the Valley Forge Park Commission has announced.

The blossom display, a rival of the apple and Japanese cherry blossom celebrations in the eastern United States, will be dedicated to the memory of Washington. An equestrian statue of the first President also will be unveiled. Governors of the original 12 states will be invited to the ceremonies.

"The beautiful displays of dogwood at Valley Forge long have been known to eastern Pennsylvanians," Major-Gen. Edward C. Shannon, president of the Valley Forge Commission, said in announcing the program, "but this year—because the war abroad had called attention anew to the early struggles of this nation for freedom—we intend to arrange a dignified celebration and dedication of these trees to the men whose struggles made possible this free nation of ours."

The flowering period for the trees lasts approximately six weeks, but horticulturists expect the trees to be most beautiful in the second week in May.

Society

Mrs. Chester Rogers and daughter, Mona Gail, have returned from a visit with relatives in Hollis, Okla.

Mrs. W. S. Barnett and her sister, Mrs. Otis Vaden of Temple, left Saturday for a visit with their parents, Mr. and Mrs. Jim Head, of El Paso.

Mrs. Helen Shaw has returned from a week-end visit in Fort Worth.

Mr. and Mrs. B. H. Peacock and children, Dorothy Jean and Bobbie of Austin, spent the week-end in Ranger.

Mrs. Pete Jensen, Mrs. Grossman, Mrs. John Thurman and Mrs. Saunders Gregg were in Dallas Monday to attend the flower show.

The flowering period for the trees lasts approximately six weeks, but horticulturists expect the trees to be most beautiful in the second week in May.

Lumber Shipments Grow As Orders Are Still Coming In

AUSTIN, Tex.—Orders continue to pile up in Southern lumber plants through production and shipments are much higher than a year ago, the University of Texas Bureau of Business Research revealed today.

Average unfilled orders per unit at the end of February totaled 1,931,150 board feet, up 53.1 per cent over February, 1940.

Production—319,633 board feet weekly per unit—was 17.9 per cent higher, and average weekly shipments per unit—336,450 board feet—39.8 per cent higher. Unfilled orders were 1 per cent lower than at the end of January, while production and shipments eased off 1.9 and 1.2 per cent, respectively.

The U. S. malt industry annually consumes more than 61 million bushels of barley in malt manufacture, according to Census reports.

Cast Autographed, Cash Goes To Britain

HAMPTON, N. H.—Mrs. Philip House does not favor a "break a leg for Britain" campaign, but she is turning her misfortune into cash.

When friends visit her she invites them to autograph the cast on her leg and pay 50 cents for the privilege. The money is given to a British Aid fund. Mrs. House fractured her leg while skiing.

Nearly 100 million belts for men, women, and children are manufactured each year in the U. S., says the Census.

Pains In My Arms Made Them Stiff; Hoyt's Helped Me

Muscular Aches and Pains, Constipation and Nervousness Were Relieved By Hoyt's Compound, Says Mr. W. R. Perry.

"Hoyt's Compound brought me such quick and effective relief that I want all my friends to know about it," declares Mr. W. R. Perry, 800 East Harrison St., San Angelo, Texas. He continues: "For

MR. W. R. PERRY
A year I had muscular aches and pains in my arms and shoulders, I had to be helped into my coat, and I couldn't raise my arms over my head. At times I had similar pains in my legs. I was badly constipated, and I couldn't sleep because of nervousness.
"I want others to benefit from Hoyt's Compound as I did. Aches and pains are gone now, and I raise my arms easily. Constipation is relieved, I feel better in every way. And I do praise Hoyt's!"
Hoyt's Compound is recommended and sold by the Texas Drug Store and by leading druggists everywhere.

Ranger Teacher Wins In National Contest

Mrs. Ethel M. Moore, 604 Young Street, teacher in Young School for the past three years, was announced a winner of \$25 in a nationwide contest, sponsored by Colgate Palmolive-Peet Co. on Super-Suds.

Mrs. Moore's prize was awarded for telling why she liked Super-Suds.

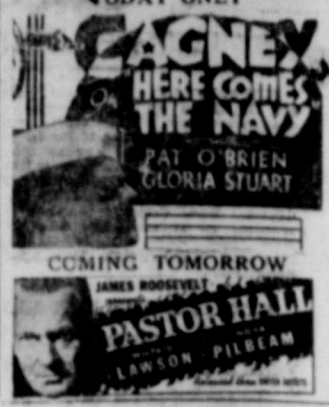

Mrs. Moore came to Ranger from Chico, where she taught five years in Chico High School. She is a graduate of Abilene Christian College, Abilene.
