Rickey Westerman Said Still In Critical Condition

Rickey Westerman, 15, remained in critical condition in the intensive care unit of Brownwood Community Hospital Tuesday morning suffering injuries sustained in a motorcycle-auto accident last Wednesday.

Westerman, who was making his home with his grandmothers and his father here, was rushed to the Brownwood hospital by Higginbotham ambulance last Wednesday night.

It was learned by the Review that the impact of the crash of the motorcycle he was riding and a station wagon, driven by Leeland Watson 16, of Sabanno, severed Westerman's left foot. He was also reported to have a broken right leg and multiple other injuries.

The accident occurred on a dirt road about three miles south of the Pioneer Cemetery July 12, at about 8:15 p.m., according to Don Gosnell, local Department of Safety patrolman of Cross Plains who investigated.

Watson was not injured and was alone in the automobile.

Watson reportedly drove to the home of Leroy Nixon for help and then to the home of one of Westerman's grandmothers to notify her and his father, L. W. Westerman, of this city of the accident.

Gosnell said the mishap occurred on a curve in the road and view of oncoming traffic was said to be obscured by high vegetation.

No charges had been filed Tuesday.

Westerman is well known in the Cross Plains area, having attended school here several years where he was an outstanding athlete in junior high school.

Social Security Increased Benefit To Be Automatic

Social security beneficiaries need not apply for the 20% benefit increase signed into law by President Nixon on July 1.

Glyn Hammons, Assistant District Manager of the Abilene office, said today that all social security beneficiaries who are on the benefit rolls in September will receive the increase automatically. "The increase is effective with payments due for the month of September," he said; "those checks are due on October 3."

The average monthly benefit for a retired worker goes up from \$134 to \$162; for a retired couple from \$224 to about \$271. A widowed mother with two children will receive an average social security benefit of about \$386, up from \$332. For a disabled worker with a wife and one or more children the new average monthly payment will be about \$354, increased from \$295.

The special monthly payments that are made to certain individuals age 72 and over who are not insured for regular social security case benefits will also be increased by 20%, from \$48.30 to \$58.00 for an individual and from \$72.50 to \$87.00 for a couple.

Hammons said that not everyone's benefit will be in the amounts stated above. He pointed out that these are merely examples of AVERAGE monthly payments and each beneficiary's present payment will be increased by the 20% voted into law.

The new law, Hammons said, also includes a provision for automatic annual increases in social security benefits as the cost of living rises in the future, a recommendation made by President Nixon in his 1969 message on social security.

Under the new law, he stated, the contribution and benefit base (the maximum amount of annual earnings that is counted for benefit and contribution purposes) will rise from the present \$9,000 a year to \$10,800 in 1973 and to \$12,000 in 1974. Thereafter, this amount would be adjusted automatically to keep pace with rising wages.

"This means," Hammons said, "that as earnings rise, workers whose earnings are at or above the level of the maximum earnings base will pay contributions on higher earnings — but they also will have those additional earnings counted toward the benefits that will be payable to them and their families in the future."

14 Subcontractors Told On New School Here

Fourteen sub-contractors on the new elementary school building in Cross Plains have been announced by Armstrong Construction, Co., Inc. of Breckenridge who was low bidder on the structure.

N. B. (Sonny) Armstrong notified the architect on the job, Don Hampton of Sweetwater, and local school board members and officials of the sub-contractors and suppliers by letter recently.

The Armstrong firm accepted the job on a bid of \$213,325.55 after the local board of trustees rejected all bids and agreed to optional specifications and facilities from the original bid of \$219,450. That initial offer was also made by Armstrong and was the lowest of those made.

Six sub-contractors were named in the letter by Armstrong. They are: roofing and sheet metal, Barr Roofing Co. of Abilene; vinyl asbestos tile and base, ceramic tile, carpet, acoustical ceiling, insulation and grid, Harris Acoustics of Abilene; painting, vinyl wall coverings and caulking, Hector Lomas of Abilene; electrical a portion set forth in original documents, Wimberley Electric Co. of Breckenridge.

Eight suppliers were also listed. They are: steel, Central Texas Iron Works of Abilene; pier drilling, Precision Drilling Co. of Lubbock; toilet partitions and accessories, Avalon Supply Co. of Dallas; chalk and tackboards, Texas Seating Co. of Dallas; hollow metal, doors and frames, R. E. Henderson Co. of Fort Worth; finish hardware, weather stripping and thresholds, West Texas Builders Supply of Abilene; millwork, Terrill Manufacturing Co. of San Angelo.

Remainder of the work will

be done by the Armstrong firm.

When the contract was signed the Breckenridge company was given 240 calendar days in which to finish the project. Board members wanted an earlier finish date, and Armstrong said that he would do everything in his power to see that the building is finished by Dec. 1. School officials hope to move into the building between semesters next school year.

New Highway Signs Are Explained

Although the "new look" in highway signs is not as revolutionary as the miniskirt — Texas Highway Department engineers hope it will be as eye-catching.

In many cases, symbols, shapes and colors are substituted for words. It is hoped that this will give the message to motorists at a glance and remove the language barriers. The new symbol signs and pavement markings adopted by the Texas Highway Commission are from the revised "Manual on Uniform Traffic Control Devices" released by the Federal Highway Administration.

The new prohibitive signs are probably the most important. These signs all have a red circle with a slash cutting diagonally through the center which means "DO NOT" or "NO". The symbol inside the circle shows what is prohibited.

For example, a sign showing a black left turn arrow with a superimposed red circle and slash designates "NO LEFT TURN".

The yellow diamond-shaped signs still stand for a warning, but some of the symbols showing hazards are new. In addition, most warning signs continue to have a word message, but the message is located under the sign on a plaque.

For example: The word message "MERGING TRAFFIC", is replaced by a black arrow being joined by a smaller black line. A plaque under the sign will have the word "MERGE". It is hoped this will minimize confusion as to which stream carries the merging traffic.

School signs are shaped like a schoolhouse, containing the silhouettes of two children on a yellow background.

Color is a key in the new system. Red indicates stop or prohibition; green shows movement permitted or gives directional guidance; blue signifies motorist services; yellow indicates general warning, and black on white is used for regulatory signs such as those for speed limits and for most guide and destination signs.

In addition, orange (a new color in the manual) will convey construction and maintenance warnings.

The shapes of the new signs are important. Diamond shaped signs signify warning; rectangular signs with longer vertical dimensions provide traffic regulation; rectangular signs with longer horizontal dimensions contain guidance information. An octagon always means stop and an inverted triangle means yield.

In addition to the new signs, there are major adjustments in the use of color lines for pavement markings. Yellow lines will be the only color used for centerline markings on two-way roads and white will remain on multiple-lane highways — for separating traffic flows in the same direction.

A broken yellow centerline will mark the division of the road where passing is permitted. A solid yellow line to the right of a broken yellow centerline will mean no passing is allowed for traffic in that lane. Double solid lines will denote areas where no passing is permitted by traffic traveling in either direction. Similarly, double yellow lines will mark the center line of multilane divided highways.

HINTS

FROM HIGGINBOTHAMS

By Barbara Williams

Higginbotham's is pleased to have Miss Annalynn Skipper working with us for two weeks. Annalynn is a student at Tarleton State College. Her assignment with Higginbotham's is a field study in professional awareness. The following is her contribution:

Yesterday morning Roy Rains, the clothing buyer, took me on a tour of the warehouse. I was surprised to see so much merchandise on hand to be sent to the branch stores. I didn't realize it, but Roy buys some things by the truckload and stores them in the warehouse as needed.

With the help of Doris Williams, Roy keeps detailed records of the items shipped to each store. It was fascinating to see the methods used to keep up with each store's inventory. If your local store doesn't have your size in a particular item, tell one of the clerks what you need. Chances are the clerk

can notify the main office, and Doris can locate the item for you in your size.

It was exciting to see the hundreds of boxes of fall merchandise waiting to be checked, tagged, and sent to the seven ready-to-wear outlets. Roy opened some of the boxes and gave me a preview of the fall fashions. We saw pantsuits and slacks of polyester knit. There were some knit dresses striped in bright fall colors. We also unearthed some denim smocks which should be big on the fall fashion scene.

For back-to-school, there were some plaid cotton dresses for the girls, and bright striped sweaters for the boys. The new fall fashions should begin arriving locally about the last of July. See you at Higginbothams for back-to-school shopping.

Mrs. Williams, Higginbothams Staff Home Economist, may be contacted through your local Higginbothams store or by calling (915) 356-2545. She will be happy to assist individuals or groups with problems in home economics. (Pd. Adv.)

Mr. and Mrs. J. R. Gage, Mrs. Dorothy Jean Anderson and Lori, all of Fort Worth and former local residents, visited R. E. King, Sr. and other relatives and friends here last week.

Tuesday noon is deadline news and advertising.

Burnt Branch School
Reunions Recently

Another year, another reunion for the class of 1914. Our reunion was held at the beautiful country home of Mrs. Stella Davidson of Cottonwood. This gracious lady and her sister, Mrs. Lee Bennett, were co-hostesses. We gathered in the back yard under huge oak trees, where tables and chairs were set up. Food was bountiful and delicious. Lester Sterne, one of our favorite classmates, gave the invocation. Our guest of honor was John Hightower. John had been ill for some time and we were happy he could make the trip from Lubbock.

Mr. and Mrs. Hightower had their daughter and granddaughter from Ohio with them.

We were honored to have 36 young guests with us for lunch.

Those of the Burnt Branch Class of 1914 numbered 14. They were: John and Bill Hightower, Mabry and Jewel Brown, Ruby Pannell of Lubbock, Lester and Beulah Stern of Odessa; Novie Switzer, Santa Anna; Grover and Lucy Berry, Baird; Alice Wills, Ocala; Mr. and Mrs. Homer Warren, Abilene; Mrs. Blanch Fortune, Gady's Riggs, Colvin Fortune, Robert Burks and Emma Johnson, all of Cross Plains and Willie Whittington of Midland.

"So, 'Vaya-Con-Dios' (go with God) dear friends and thanks again to Mrs. Davidson and Mrs. Bennett.

WORLD'S RECORD PEANUT PRODUCER* USES LILLISTONS EXCLUSIVELY

Rudolph Sumner, Omega, Georgia, Tells Why:

"I have been using Lilliston Peanut Combines exclusively since 1966 and they've always done a good job. The one I have is three years old and it's in excellent condition. I like the wide header and the easy way it handles in the field. It works well in a wide range of harvesting conditions. We've had no maintenance problems."

Rudolph Sumner established the world's record peanut yield of 14 pounds per acre in 1971.
