COMMUNITY PROGRAM

A large number of patrons and almost the entire student body attended the program on last Friday night. An evening of enjoyment was evidenced by all, and everyone went away feeling that he had been amply repaid for the evening's time.

The program included songs by the entire assembly, special songs, tries and solos, instrumental numbers, a reading, a dance and good string band music. All in favor of another such evening say Aye.

BRINKLEY INFANT

Funeral services were held last Wednesday at the Methodist Church for the 10 day old daughter of Mr. and Mrs. W. C. Brinkley of the Bray community. Rev. A. V. Hendricks conducting the services. The infant passed away Tuesday, Oct. 8. It was a granddaughter of Mr. and Mrs. L. K. Read of Hedley.

Chills 10 & 15c, Otho's Cafe

NEW THEATRE

H. Mulkey announces that his new Cozy Theatre in Clarendon will open Friday, October 18. The new theatre is complete in every detail, with an unusually attractive front, decorated with black and green glass.

The projection booth is unusually large, and is fireproof as well. All in all, it might be concluded that Mr. Mulkey has the picture business in Donley county well under control.

PIE SUPPER

The Ex-Senior Association will give a pie supper, sponsored by Hedley merchants, on Friday night, October 25, at the high school auditorium. A good program will be rendered. Mothers of ex seniors are requested to donate pies.

RECITAL

Mrs. Mary E. Trostle presented her expression pupils in a recital at the school auditorium, Thursday evening, October 10. About twenty numbers were rendered in an excellent manner by the pupils, who showed talent and fine direction.

Dressmaking and alteration at reasonable rates. Will also exchange sewing for quilting. Satisfaction guaranteed.
478c Mrs. L. Z. Land

Lost—Pair of white gold rim glasses. Finder return to Otho Barnett and receive liberal reward.

Buy a good used car that you know is a wreck, then you won't be disappointed.

B. & B. Variety

Hamburgers 5c, Otho's Cafe.

Misses Padgett and Ruth Wells who are teaching at Hopkins in Gray county, spent the week end in the Rev. Wells home. Jo Wells returned with them for a visit.

G. W. Killingsworth is reported ill in a Memphis hospital.

COTTON GINNED

Up to Wednesday noon, the three Hedley gins had ginned a total of 296 bales.

Fruit cakes 5c at Otho's Cafe

HUGH L. RILEY

Hugh Riley, well known Donley county pioneer, passed away at his home in the Sunnyview community last Wednesday after a short illness. He was 54 years of age, and had lived in Donley county since 1905.

Funeral services were conducted at the Methodist Church in Clarendon Thursday afternoon by Rev. E. D. Landreth, pastor, assisted by Rev. J. Perry King Baptist pastor.

He is survived by his widow, three sons, four daughters, two brothers and two sisters. He was the father of Mrs. Raymond Mesley of this city.

LEON JETER DIES

A. R. Marshall and family were called to Dallas Friday on account of the death of Mrs. Marshall's nephew, Leon Jeter, who passed away in a Dallas hospital Thursday night, Oct. 10. Funeral services were held at Piles Prairie Saturday, conducted by Rev. Wallace Hale, Baptist pastor there.

Leon Jeter was the only child of Mr. and Mrs. Joel Jeter of Kemp. He was born Dec. 8, 1926, being 8 years and 10 months old at the time of his death.

Burial was in the Piles Prairie cemetery.

FISH POND

The ladies of the First Baptist Church will have a fish pond Monday, Nov. 25, at the Rev. Wells home. A program will be given in connection. Every lady of the church is invited to help provide fish for the pond.

Doughnuts 2 for 5c at Otho's Cafe.

FREE IMMUNIZATION

All children from 1 to 6 years of age who wish diphtheria immunization will be given same free of charge. Come within next few days. Children or adults desiring typhoid immunization may also receive same free of charge.

Dr. J. W. Webb

R. W. Alewine, S. J. Ayer and News Waldron attended the Texas Oklahoma singing convention at Mangum, Okla., Sunday.

Weaner pigs for sale.

Mrs. Glend Hill

Misses Opal Cooper, Zona Adamsen and Hope Wells of W. T. S. T. G. Canyon, visited home folks over the week end.

Mrs. A. A. Carney and little daughter, Magenta, of Washington, D. C., are visiting in the Dr. F. V. Walker home.

Mrs. R. E. Newman returned Saturday from a visit in Metairie.

Mr. and Mrs. A. B. Long and grandson of near Alanreed visited the Informer family Saturday.

Mrs. Eb Hooker of Claude reports that she is opening up a new Hooker Variety Store at Groom, of which Miss Nell M. Mess will be manager.

Frock That Puts Accent on Youth

PATTERN 9343

9343

Always a good beginning, this youthful tailored collar on the simple yoke makes a demure foil for the dainty softness of the bodice. The prettiness of the chic frock is furthered with a graceful flare sleeve—or it may puff, if you prefer. The results are so satisfying you'll find it real fun to run up this little dress in a dainty printed silk or cotton. A soft handkerchief linen would be stunning, too, and so easy to tub. Buttons and belt can pick up a color in the print and make a striking accent.

Pattern 9343 may be ordered only in sizes 14, 16, 18, 20, 22, 24, 26, 28, 30, 32, 34, 36, 38, 40 and 42. Size 16 requires 3 1/2 yards 30-inch fabric. Complete, diagrammed sew chart included.

SEND FIFTEEN CENTS in coins or stamps (coins preferred) for this pattern. Be sure to write plainly your NAME, ADDRESS, the STYLE NUMBER and SIZE.

Send your order to the Sewing Circle Pattern Department, 232 West Eighteenth Street, New York, N. Y.

FORTUNATE FAMILY

Teacher—And what is your father's name.
New Pupil—It's Daddy.
Teacher—Yes, I know, dear, but what does your mother call him?
New Pupil—She doesn't call him names. She likes him.

Top Short

Mr. Newlywed—What's wrong with that pie-crust, darling? It doesn't half cover the pie.

Mrs. N.—I asked your mother how to make pies to suit you, and she said to make the crust very short.

Popular, Anyway

"Did you see that tall, dark man at the wedding reception? He didn't take his eyes off me the whole time." "So I noticed, dear. He was one of the detectives guarding the presents."

Skeptical

Dealer—Yes, we handle all kinds of milking machines.

City Lady—But do you really think any of them make as good milk as a cow?

cordingly.

RAYMOND PITCAIRN

Portrait of An American

By RAYMOND PITCAIRN
National Chairman
Sentinels of the Republic

Who is the typical American? Just
what is he like?

There seems to be doubt on these
questions in the minds of many men
in public office today. Much of our
recent legislation suggests that they
regard him as willing to swap his
American birthright of independence
and opportunity for the lifeless regu-
mentation now imposed on certain
populations abroad.

But there should be no such con-
fusion. A portrait of the typical Ameri-
can was clearly drawn in the Bill of
Rights of our Federal Constitution.
Read it and you will see that he is a
man who stands firmly for:

Freedom of religion, freedom of law-
ful speech, freedom of the press, free-
dom of peaceable assembly.

The right to be secure against un-
reasonable search and seizure, to be
immune from governmental inquisition,
to trial by jury in all civil as well as
criminal cases.

The guarantee that he shall not be
deprived of life, liberty or property
without due process of law, and that
he shall be protected in all these and
other rights even against government
itself.

In that insistence on definite rights
and powers is reflected, I maintain,
a true picture of the real American citi-
zen—the man who works and earns
and saves and on whose character and
effort depends all the strength of our
government. It has stood unchanged
for almost a century and a half. It
remains as accurate today as when
first drafted.

When our politicians get that picture
clearly in mind we shall see fewer
efforts to inject into our government
the ideas of a regimented Europe—
whose tragic effects we read daily in
dispatches from across the sea.

America, our lawmakers should re-
member, is still full of Americans—
sons and daughters of the hardest,
most self-reliant breed of pioneers and
liberty-lovers the world has ever seen.
No one can take away their individual
freedom—and make them like it. The
Bill of Rights still remains our national
portrait.

CITATION BY PUBLICATION

The State of Texas.
To the Sheriff or any constable
of Donley County—
Greetings:

You are hereby commanded to
summon W. F. Jones, who is a
non resident of this State, to ap-
pear at the next regular term of
Justice Court, Precinct No. 2,
Donley County, Texas, to be held
at the courthouse thereof in the
town of Clarendon on the fourth
Monday in October, being the
28th day of October, 1935 then
and there to answer a petition
filed in the said court on the 28th
day of September, 1935, the file
number of which is 1672, in
which suit Warren Lott is plain-
tiff and W. F. Jones is defendant,
the cause of action being alleged
as follows: W. F. Jones did, on
the 19th day of June, 1933, file a
claim with the State Highway
Department, claiming that War-
ren Lott owed to W. F. Jones the
sum of \$126.05, which action by
W. F. Jones was wrongful; and
that Warren Lott did not owe to
W. F. Jones said sum of money
and that the Highway Depart-
ment will not pay Warren Lott
said sum until he has established
his right thereto by judgment.
You are commanded to summon
such defendant, and to serve this
citation, by making publication
of this citation, once each week
for four consecutive weeks pre-
vious to the return day hereof,
in some newspaper published in
your county.

Herein fail not, but have you
before said court on the first day
of the next term thereof, this
writ, with your return thereon,
showing how you have executed
the same.

Witness W. A. Davis, Justice
of the Peace, Precinct No. 2,
Donley County, Texas.

Given under my hand in the
town of Clarendon, this the 28th
day of September, 1935.

W. A. Davis
Justice of the Peace, Precinct
No. 2, Donley County, Texas.

MOREMAN HARDWARE

Leaf tobacco being
sold to highest bidder

From 1900 up to 1934 the leaf
tobacco used for cigarettes in-
creased from
13,084,037 lbs. to
326,093,357 lbs.;
an increase of 2392%

It takes mild ripe tobacco
to make a good cigarette.

© 1935, LIGGETT & MYERS TOBACCO CO.

United States
Treasury Building

During the year ending June
30, 1900, the Government
collected from cigarette taxes
\$3,969,191

For the year ending June 30,
1934, the same taxes were
\$350,299,442
an increase of 8725%
—a lot of money.

Cigarettes give a lot of
pleasure to a lot of people.

More cigarettes are smoked today because
more people know about them—they are better advertised.
But the main reason for the increase is that they are made
better—made of better tobaccos; then again the tobaccos
are blended—a blend of Domestic and Turkish tobaccos.

Chesterfield is made of mild, ripe tobaccos.
Everything that science knows about is used in
making it a milder and better-tasting cigarette.

We believe you will enjoy them.

Let Our Motto Be GOOD HEALTH

BY DR. LLOYD ARNOLD
Professor of Bacteriology and Preventive
Medicine, University of Illinois,
College of Medicine.

ASTHMA, HAY FEVER, HIVES AND SICK HEADACHE

Spontaneous hypersensitiveness in man are big words that, without proper explanation, mean very little, but, as a matter of fact, spontaneous hypersensitiveness includes asthma, hay fever, eczema, and such common diseases which, while they rarely carry us to the grave, certainly make us exceedingly uncomfortable. Asthma attacks the muscular tubes of the air passages and causes these muscles to contract, thereby diminishing the volume of air that is breathed in. Hay fever attacks the membrane of the nose. Eczema may break out in the skin almost anywhere.

It has been found that, when both parents have suffered from hay fever or asthma, 58 per cent of the children have these ailments. When only one parent suffers from hay fever and asthma, usually just half of the children have the same ailment. But hay fever and asthma also develop in some children where there is no family history of this disease. When both parents are asthmatics or hay fever sufferers, children develop the same disease earlier in life than when only one parent is involved or when there is no history of these particular ailments in the mother or father.

Hay fever parents usually beget hay fever children, and asthmatic parents beget asthmatic children.

Hay fever is usually associated with August, the month in which ragweed pollens are most numerous in the air. But the hypersensitive condition of the nose can be brought about by other substances than plant pollens, animal hair, dandruff, or such substances can cause it, as can face powders, perfumes and certain foods, such as strawberries, almonds, fish, etc. Or it can be brought about by bacterial infections. In this instance it is not the bacteria that cause the disease, as in the case of a boil, but it is the component parts of the bacteria that are absorbed by the blood stream and come in contact with the nose in this way.

The cause of asthma may be the same as that of hay fever. Inhaling certain substances, ingesting certain substances as food or remote foci of bacterial growths, can cause an increased sensitiveness of the musculature of the tubes leading air to the lungs. This increased sensitiveness causes spasms of these muscles. It is during the period of spasm or cramps that the asthmatic is most uncomfortable. Another manifestation of hypersensitiveness to foods is the urticaria or hives that break out on the skin after the eating of certain foods.

In studies which have been carried out at the Illinois Research hospital in connection with the University of Illinois, it seems that an individual belonging to the asthma, hay fever, eczema or hives group is put together in a different way from the rest of us. These hypersensitive people are so constituted and constructed that they react in an abnormal manner to what would be normal to most of us.

The individuals who suffer from migraine headache, the sick headache that comes on with regular periodicity, really belong to the same general group as the hypersensitive persons do. This does not mean that the migraine is brought on like an attack of asthma or hay fever. But studies of the headache groups that we have made in our research laboratory leave us impressed with the fact that preceding an attack of sick headache, certain definite internal changes take place. These include changes in constituents of the blood, and there seems to be a difference in the internal metabolism of these migraine sufferers. The changes seem to be periodic, occurring some times at weekly intervals, and again at fortnightly, monthly or even longer intervals. Consequently these sick headaches, although not brought on by inhaling plant or animal substances or by eating certain foods, seem to depend on a changing or unstable internal regulating system that makes the migraine patient closely akin to asthmatic and hay fever sufferers.

Our conclusion then is that persons suffering from asthma, hay fever, eczema, hives and migraine, have a very unstable involuntary nervous system.

The involuntary controlling machinery of their body functions is so regulated that it can be upset or thrown out of tune as a result of contact with irritating substances that to the rest of us produce no deviation from the normal. We know even less about the migraine group of sufferers than the hay fever group. The cause of the attacks of sick headache seems to be developed within the individual, because we can demonstrate certain internal body changes preceding the onset of migraine. It will be necessary to do a great deal more laboratory work before these spontaneous hypersensitive people and the migraine sufferers can be clearly understood. We must know more about the cause and how the body changes during the attacks of these diseases before we can attempt to prevent them.

© Western Newspaper Union.

Red Cross—Universal Sign of Mercy

Red cross workers are often as busy in peace time as during a war, as are the nurses shown above transcribing Braille for the blind, and those at the registration desk taking applications for relief in a California earthquake. Inset, left: Henry P. Davison, war time head of American Red Cross. Inset, right: Admiral Cary T. Grayson, chairman of the League of Red Cross Societies.

By WILLIAM C. UTLEY

AS DEPLORABLE as, and perhaps even less excusable than, deaths on the field of war are the some 30,000 deaths which result from automobile accidents in the United States every year. If quick aid could be given to the injured along our highways, this staggering annual total could be lessened materially.

In wartime it is the job of the Red Cross societies to see that men hurt so severely that they may die are given quick medical and surgical aid. Now the American Red Cross is going to bring its noble and efficient service along the highway fronts in the war against automobile deaths.

Within a few months, according to the officials of the society, trained members of the Red Cross will be stationed at every possible point along the busy highways, ready to lend a hand to save a life. Just how the campaign will be conducted was not available at the time of this writing, for plans were not yet complete, but it is more than likely that agreements will be reached between the Red Cross and the oil companies which operate gasoline filling stations, to effect some sort of co-operation.

Will the Red Cross be successful in cutting down this wholesale annual massacre of Americans? Here is a piece from the records which may throw some light on the answer:

Twenty-one years ago, before the Red Cross began its drive to teach swimming and life-saving methods to all Americans who like to swim or bathe, the national drowning rate was ten in every 100,000. During the last 21 years there has been a 450 per cent increase in the swimming public. Red Cross instructors have trained 600,000 persons as life savers. The drowning rate today is only five in every 100,000.

Busy in Peace Times

The Red Cross, you know, is far from idle when there is no war going on. Rather, there is always a war going on for the Red Cross—a war against the ravages of floods, dust storms, hurricanes, earthquakes and other national disasters; a war against the terrors of eternal darkness for the blind, against demons of discouragement for the disabled veteran, a war against countless things that bar the road to happiness and health for whole communities unless organized battle is conducted against them.

This year more than ever before the battle has been a terrible one. In the average year there are 82 national disasters, one every four days. During the last 12 months there have been 159! That is an all-time record. And the battle of the American Red Cross has been nobly fought.

With all this impressive record the American is one of the younger Red Cross societies. There are 61 of them in as many different countries. Their methods of operation differ surprisingly little for the many kinds of populations which they serve.

In one thing they are completely uniform. Almost no matter where you go on this old globe you will find that the insignia which identifies the angel who relieves the soldier's suffering, is the Red Cross on the field of white.

Rapidly since the World war, the activities of all of these 61 societies have grown to be more uniform. They have proved themselves to be as important in the relief of human suffering during peace time as they ever were at the peak of wartime activity.

Americans Spread the Light

What has been responsible for such developments? It is good to be able to say that, in large measure, Americans have. For it is Americans who, in less than twenty years, have been the leaders in the work of international co-operation which has been conducted by the League of Red Cross Societies whose modest headquarters stand about 100 yards from the Place de l'Etoile in Paris.

It was dynamic personality of the

late Henry P. Davison, war-time head of the American Red Cross, that effected the agreement between heads of the Red Cross in France, Great Britain, Italy, Japan and the United States, launching the league a few months after the signing of the armistice. Davison was the first chairman of the league.

John Barton Payne, another chairman of the American Red Cross, became chairman of the league to succeed Davison in 1921; when Judge Payne died early this year another American, Admiral Cary T. Grayson was unanimously chosen to succeed him. And since 1931 another American, Ernest J. Swift, has been the league's secretary-general.

The league has brought about the creation of 20 new Red Cross societies since it was formed, but its influence has gone much farther than that. Almost every one of the 61 member societies is today engaged not only in keeping ready for the emergency of war, but in a regular day-to-day program of health and welfare work, disaster relief and other important peace-time activities.

Plan Air Ambulances

The highway service planned, and already started in a small way in America, is being worked out along international lines. As aviation develops, the possibility of air ambulance services are interesting the league. Through the league secretariat, health propaganda material is made regularly available to all of the societies.

The league has widely publicized the disaster relief organization perfected by the American Red Cross and has helped other societies emulate it. When a disaster occurs on a scale so large that the society in the nation affected is not able to cope with it alone, co-operation of other member societies is a recognized duty. As a recent illustration, may be cited the earthquake which wiped out the city of Baluchistan, India, in May of this year. Fifteen national societies, in response to an international Red Cross appeal, immediately forwarded contributions to increase the resources of the Indian Red Cross.

The league believes in interesting youth and with the help of the American Red Cross commission in Europe during the post-war years, it extended to European countries the Junior Red Cross, which originated in Canada and Australia and has been a popular feature of the work in the United States since 1917. Today there is organized Junior membership in 50 different national societies—15,000,000 Juniors, all pledged to a program embracing the practice of elementary health rules, the development of a spirit of public service and the cultivation of international friendliness.

The Red Cross is one of the few humanitarian organizations which have been born in a war. Its origin is traced to the battle of Solferino, in the Italian war of 1859. Henri Dunant, of Geneva, saw that bloody battle, and in *Un Souvenir de Solferino* described the tragic suffering of the wounded soldiers so vividly and powerfully that his words were read throughout the world. These sufferings, he pointed out, were largely the result of improper care. He suggested the possibility of organizing in all civilized countries "permanent societies of volunteers which in time of war would render succor to the wounded without distinction of nationality."

Dunant's idea caught on with Gustave Moynier, Geneva lawyer and social worker. He appointed a committee of five Genevese to meet and construct a plan of carrying out the Dunant suggestion. At the invitation of the committee delegates from 14 nations met at Geneva on October 26, 1862. They adopted resolutions laying the seed for the formation of the Red Cross as we know it today, although most of the duties with which they charged members were associated with

war emergencies. One of the most important acts of the convention was to declare, concerning the volunteer societies:

Uniformity of Emblems

"They shall wear, in all the countries, a white band around the arm, with a red cross upon it, as a distinctive and uniform badge."

The first of the new Red Cross societies was organized in December of the same year at Wurtemberg. In a convention at Geneva in 1864 delegates from 12 nations signed a treaty providing for the neutrality of ambulances and military hospitals and adopting the red cross as the emblem and distinctive sign of the sanitary service. Virtually every civilized nation has since acceded to it. The Hague peace conference of 1864 extended its terms to naval warfare.

Although the convention, of course, had to be international in nature, the Red Cross society in each country is entirely national and independent. It makes its own laws and is directly responsible for the work in its own country. The international committee, comprising 18 Swiss residents of Geneva is the official medium of communication between the national organizations, an important function in time of war, when it becomes the neutral channel for relief of prisoners.

When the first convention was called at Geneva, the United States was in the throes of Civil war, and the people of the North, the recognized government, were caring for the wounded. It was not until 1869 that the real foundations of the American Red Cross were laid.

Miss Barton Is Founder

An American, Miss Clara Barton, in that year met the founders of Red Cross in Geneva and they prevailed upon her to foster the work in the United States. She interested President Garfield and James G. Blaine, then secretary of state. In 1881 and steps were taken for the United States to ratify the treaty. In the same year the "American Association of the Red Cross" was organized with Miss Barton as its president. President Garfield was assassinated, but in 1882 President Arthur signed it and the senate confirmed it.

The American organization has been clarified several times. Its charter now calls for a yearly audit of Red Cross accounts by the War department and for federal supervision through official representation on the Red Cross governing body.

During the World war, the American Red Cross distinguished itself in a manner never to be forgotten. It organized and completely equipped 54 base hospitals of 1,000 beds each and each with a personnel of 265, for the army medical corps, and for the navy seven more. The society spent \$3,000,000 on this work. It assigned 19,877 nurses to active military duty and equipped 10,000 of these for overseas duty at a cost of \$2,000,000. It co-operated in health and hospital work both in this country and abroad. Canadian workers served refreshments 40,000,000 times to troops in transit and 15,376,000 times to soldiers in France. Financial aid was given to the families of 500,000 American soldiers. All in all, in the years from 1917 to 1923, the Red Cross spent \$103,000,000 on American soldiers and their families.

In addition, a total of nearly \$100,000,000 was spent by the American Red Cross in bringing relief to sufferers in foreign countries during those years.

With Americans leading the work of the League of Red Cross Societies, the number of members of the Red Cross has steadily increased, even through the depression years, until today there are in the world 15,000,000 adult members and an equal number of Juniors.

And perhaps no sign is so universally recognized as the sign of the Red Cross.

Uncommon Sense

By John Blake

© Bell Syndicate.—WNU Service.

The motor car gasped, spluttered—and came to a dead stop.

We were on a lonely road. As far as we knew, we were twenty miles from the nearest town.

Night was coming on. It had begun to rain.

I tried all the devices to make a car start that I knew.

None of them were of any use.

Two cars passed. I hailed both of them.

The driver of the first grinned, and sped on.

...

The driver of the second got out of his car, and walking over to us asked what was the matter.

I couldn't tell him.

He lifted the hood and looked under it.

"The engine isn't going," he said.

I could have told him that—and a number of other things. But I didn't.

I thought he might possibly help us. I didn't want to put him in an unfriendly state of mind.

By and by he said he would have to be going, but that he would tell the men in the nearest garage he found to come out and help us.

...

We waited for half an hour. No car came.

Presently out of the woods came a small boy, with a shotgun over his shoulder.

"What's matter?" he inquired.

"Stalled,"

"We are," I said. "Will you please stop at the nearest garage, if you know where there is one, and ask them to send a man out here?"

"Lemme look under the hood," he said.

He looked under the hood. Presently he lifted his head. "S'all right now," he said. "Give her the gas."

I gave her the gas. The car started slowly, then began to purr pleasantly.

"O. K.," said the kid. "She won't give you no more trouble."

"What was the matter?" I inquired, handing him a dollar bill.

"Piece of grit in the gas line," he said. "She'll be all right."

"How did you find out?" I asked him.

"Just looked at her. You could of did it, but you didn't know how."

From that time forth I have had a high regard for technical knowledge.

Here was a child of a child, who, by virtue of special knowledge, could solve a problem that four strong men had pondered in vain.

...

It has often occurred to me, as I have driven out into the country, that most motorists see very little except the roads.

Why the roads are useful. But they only take one there and back.

In garages where I have left my car after a pleasant journey over the countryside, I find great numbers of cars, all stored away for the night while their owners sit and fume on hotel porches, with nothing to do but skim through the local papers, and complain about the detours they found along their way.

Now if these people were really in a hurry, there would be some excuse for them.

But the fact that they get into their destinations long before dinner time indicates that they were not really in a hurry, except when they are driving.

...

And in burning up the road as they go along they lose all the beauty of driving, which is to explore little winding lanes, sit down for a half hour beside a little brook, or look out from a hill top on a wide stretch of winding river.

I get more fun out of exploring the country that I pass through than I could possibly get out of speeding.

There always are snug little farms, with silos or hay stacks beside them.

Here and there cattle are grazing, or horses look over the fence at you to see what manner of people you are.

You can stop at almost any little farm house and get a glass of milk or a pitcher of cider, and drink them while you are asking about the weather and the crops and the likelihood of rain or sunshine the next day.

...

Farming people are almost invariably friendly.

They like to meet strangers, and talk to them.

They can tell you about pretty places that are off the road a little way, and usually give you interesting information about the country round about.

To travel through New England, over old Revolutionary country, is always a delight.

...

To me, it seems too bad that the highways are always chosen by the city motorist.

There is so much that he could see, and so many things he could learn that the money he spent for his car and the gas to keep it going would be more than repaid if he took his time.

But rarely does he do anything but worry about how he is going to get past the cars ahead, or what is making that menacing noise under the hood.

Motoring would be one of the finest of all pursuits, of those who are addicted to it, if only they kept their ears and eyes open.

Golden Phantoms

FASCINATING TALES
OF LOST MINES

© W.N.U. By Editha L. Watson

THE MISSING MUSKETEER

WHEN a London syndicate employed Herbert Hoover, then an engineer, to hunt for a lost mine, it was a rather good sign that there really must have been such a mine.

Its name was the Musketeer. It lay—and surely it still lies—in the Fraser river region on the border between the United States and Canada. It was found by Jacob Henshaw, an old prospector, and his partner.

The two men had lived with the Indians for several years. Perhaps their first heard of the mine from these humble friends—or perhaps they stumbled onto it as they followed after the golden phantom. But they found it rich enough to stay their steps. They built a little cabin, and went to work.

In September, 1873, Henshaw came into Vancouver—then a small place just beginning to grow—with a donkey which carried two sacks of ore. He took this to an assayer, and presently word spread about that here was something which assayed the richest north of the Comstock lode.

There would have been a gold rush in no time, had anyone known where to rush. But Henshaw, who could neither read nor write, had a deep-rooted suspicion of his fellow-men. He felt that no good would come of it if he gave out even the faintest of clues. He knew that he should file his claim—but that would place on record the exact location of his find. In the meantime, mao bothered him continually, asking all sorts of questions, watching every move he made.

To get rid of them he invented various stories, hoping that they would believe his tales and go away. But somehow there lacked the ring of truth, and no one bothered to take his stories seriously.

Henshaw was being driven to desperation. At last he figured that if he could go back and consult with his partner, they could work out some way of filing the claim in secret. But here was another problem, to get away without detection.

How he managed it, no one knew, but somehow Henshaw "turned up missing" one day. Everyone thought that he had eluded his annoyances, and that after a while he would return to Vancouver with more ore, or else that his partner would show up, to try what he could do in Henshaw's stead.

Weeks went by; months; years. Neither of the miners came. No one heard of them. No one knew what had happened. Everyone guessed: perhaps Henshaw had been caught in a blizzard; perhaps his partner had been killed by Indians; perhaps—

And perhaps some day the Musketeer will be discovered again. So far it has managed to stay a mystery. Men have hunted for it, certainly, time and time again. Those who have faith in spirits have often been told by these unseen influences just where to search—but something must be wrong, for they seek but never find.

RED MEN'S GOLD

THREE brothers named Rolleston went into the Uintah basin in the '90s, in search of gold. They found more than they were looking for in a rich silver and gold deposit—silver sulphide, sprinkled liberally with coarse gold.

Although the Indians were a constant menace, the brothers got out of the place with three mule loads of ore, which they took to Salt Lake City and sold for \$20,000.

The Indians had warned them, in no uncertain terms, never to return to the mine, but three years later they took five mules and went back for more of the ore. They mined enough to load their animals, and were about ready to go back to civilization again, when the Indians appeared once more. Exactly what happened no one has been able to say, but the Indian version of the affair was that the brothers fell into the Duchesne river and the weight of the gold in their pockets held them under and caused them to drown. The mules simply disappeared.

After this the place remained unmolested for years. At last a relative of the Rollestons went out to hunt for it. But cloudbursts had obliterated all signs of the diggings.

...

This may have been the same mine that Caleb Rhoads found. He said, at least, that it was in the Uintah reservation and that he had an understanding with the Utes so that he would be unmolested if he kept the place a secret. It is certain that men who tried to follow him were fired on by unseen persons.

Rhoads made a trip into the unknown region every year for 18 years; then he died. A man named Hartzell married the widow in hopes, it may be, of inheriting the mine, but she did not know the location—and although Hartzell hunted for a long time for the mysterious mine he never succeeded in locating it.

Sparrow Hawk's Diet

The sparrow hawk's diet consists of less than one-fifth of 1 per cent of game birds and no poultry. More than 50 per cent of its diet is composed of insects and 25.4 per cent of mice and other small mammals.

Housewife's Idea Box

To Slice Bacon

Try slicing bacon this way: Place the rind down. Do not cut through the rind. Slice the number of pieces you want. Then cut them free from the rind. Cut as close to the rind as possible to avoid waste. You will find that you get the best results in this way.

Work of Today

It is rejuvenating to keep in touch with the work of today and the plans for tomorrow.

Quick, Pleasant Successful Elimination

Let's be frank—there's only one way for your body to rid itself of the waste material that causes acidity, gas, headaches, bloated feelings and a dozen other discomforts. Your intestines must function and the way to make them move quickly, pleasantly, successfully, without griping or harsh irritants is to chew a Milnesia Wafer thoroughly, in accordance with directions on the bottle or tin, then swallow.

Milnesia Wafers, pure milk of magnesia in tablet form, each equivalent to a tablespoon of liquid milk of magnesia, correct acidity, bad breath, flatulence, at their source, and enable you to have the quick, pleasant, successful elimination so necessary to abundant health.

Milnesia Wafers come in bottles at 35c and 60c or in convenient tins at 20c. Recommended by thousands of physicians. All good druggists carry them. Start using these pleasant tasting effective wafers today.

Wintersmith's Tonic

Not only the old reliable remedy for

MALARIA

in all of its forms, but

A Good General Tonic

which stimulates the appetite

and helps restore the strength.

USED FOR 65 YEARS

Watch Your Kidneys!

Be Sure They Properly Cleanse the Blood

YOUR kidneys are constantly filtering waste matter from the blood stream. But kidneys sometimes lag in their work—do not act as nature intended—fail to remove impurities that poison the system when retained. Then you may suffer nagging backache, dizziness, scanty or too frequent urination, getting up at night, swollen limbs, feel nervous, miserable—all upset.

Don't delay! Use Doan's Pills. Doan's are especially for poorly functioning kidneys. They are recommended by grateful users the country over. Get them from any druggist.

DOAN'S PILLS

As to College Wardrobe, Here's What

By CHERIE NICHOLAS

A LOGICAL way to assemble the all important "back-to-school" wardrobe is to divide it into two types—the "musts" which are absolutely necessary, and the "would like to have," which make clothes a thrill and a venture.

In the "musts" smart shirtwaist frocks in the new silk weaves should alternate with sweater and skirt outfits. We speak particularly of "new silk weaves" because that's what they really are—"new." Hand-

some, practical, dependable-wearing silks which have

the "look" of wool, are the last word in smart fabrics. Don't overlook, especially, the new spun silks which have a rustic-looking rough-surfaced texture. These noli silks, as they are sometimes called, are practically crushless, and though they look like wool they are much cooler for early fall days and steam-heated class rooms. They launder nicely, too.

The girl seated in the little inset picture is off to class in a strictly tailored frock of plaid noli silk which, to look at, you would think was wool. The dress buttons down the back and has cuffs and Peter Pan collar of pique.

The shirtwaist dress is full of bright ideas this fall. Round yokes, jeweled or fancy metal buttons, fur Peter Pan collars glorify the new silk models. Skirts have silk pleats; box pleats placed just above the knee all around are new and girlish looking.

The two-piece type of dress vies with one-piece styles. Perfect for campus wear is a two-piece frock as pictured to the left in the illustration. It is made of one of the chic tie-silks which are having such a pronounced vogue. This one is wine color with green dots. The blouse has flap pockets and the skirt buttons all the way down the front.

From-trotting daughters can really let themselves "go" on the subject of clothes. They can be glamorous and exciting and sophisticated and gloriously young, too, in satin, silk velvet or one of the new metal silks. This year's evening frocks go in for molded bodices and waistlines, wide belts or sashes and fullness spreading

gently from the waist. Bodices are

tricky. Sometimes they are merely a straight band of the fabric held up by camisole or "shoestring" straps. Again they are built up to cover the front of the throat in elaborately twisted, draped and winged treatments, with low-back décolletage.

Girls adore black. Let your daughter wear black in gleaming slipper satin or black velvet and then tell her to have her beau send her flowers for her hair. Instead of her corsage if she wants to be swish. Daughter will be very grand in a black slipper prom frock as pictured. It has the high-in-front winglike effect above mentioned, contrasting the low-cut décolletage at the back. The shiny belt is all-over-stitched, which is the latest wrinkle for belts.

If your young hopeful is going to a co-ed college, she will want a few soft dressmaker-type afternoon dresses. For tea dancing nothing could be more ideal than a black silk-satin ensemble. Don't merely ask the salesman for "satin." For satisfaction in wear and appearance specify silk satin and insist upon it. The dress should have a cowl neck—that means glittering clips to daughter. The jacket should be cut on the classic lines of her sports jacket, with patch pockets and notched lapels. The skirt should come just below the break of the calf. Worn with one of the new baby bonnets of black silk velvet with ostrich plume tips, daughter will be devastating to her "date."

© Western Newspaper Union.

EVENING ENSEMBLE

By CHERIE NICHOLAS

Velvet for evening, velvet for daytime, velvet, velvet! All signs point to a velvet season. The evening ensemble pictured is of deep red stiff velvet—a Chanel model. Luxurious marten collar and cuffs add to the glory of this superb creation. Note the button fastening of the gown. Many of the Paris dresses show a down-the-front button closing. Often on sheer or lightweight materials dozens upon dozens of tiny buttons are placed as close as possible and the effect is utterly feminine and charming.

FASHION SIGNALS GREEN FOR AUTUMN

Yellow, the sun's own color, is usually a summer favorite. This year has been no exception: yellow with brown, yellow with black and yellow with green is yellow still. This brings to mind that green is being waged on as the follow-up color.

When utterly satiated with the idea of current fashions it's a relief to be able to peer into the future. On a recent peek behind the scenes the discovery was made that green looked good to many manufacturers whose fall lines are in preparation. And why not? It's one of the Renaissance colors and a change from the inevitable browns, reds and rust. Each autumn brings a change also from the blues in which we have been steeped all summer.

There are a number of likely looking green woolen dresses ready to make their shop window debuts. Some of them are sure to win applause. It won't be long now before shopping throngs will flatten their noses against the plate glass front which shields the cloth-clad mannequin from the street.

Green, White Jade Having Tremendous Vogue in Paris

Green and white jade is having a tremendous vogue of popularity in Paris now. One-third of every jewelry shop window is devoted to fascinating carved necklaces, pins, clips and earrings, while fat round bracelets of uncarved jade are matched by round jade rings. Knick-knacks of carved jade such as small, fat Buddhas on jet stands, ugly little monkeys and awkward elephants are made in green and white jade and vary in size from tiny miniatures to statuettes of 8 or 10 inches in height.

Fall Fabrics

Materials used by smart designers for evening clothes include velvet, lame, metal fabrics, "cellophane" mixtures, brocades and lace.

PEASANT COTTAGE POT HOLDER SET

By GRANDMOTHER CLARK

With a very little handwork you can have this charming little peasant cottage with a fence around it, right in your kitchen. When you are not using it the house fits inside the pocket formed by the fence. Colors in the house and field beyond are stamped and stenciled and require merely outlining. Size finished about 9 by 12 inches.

Package A-11 contains the stamped and tinted material, of linen for the potholder and the container, also the binding for fence and instructions how to make it up. Sent postpaid for 15 cents.

Address HOME CRAFT CO., DEPT. A, NINETEENTH AND ST. LOUIS AVE., ST. LOUIS, MO.

Inclose stamped addressed envelope for reply when writing for any information.

HITCH-HIKING FLY SPREADS DISEASE

The common house fly is a hitch-hiker. However, the fly doesn't bother to jerk a thumb and ask a ride; it flies into moving autos or even trains or airplanes without permission and often travels hundreds of miles before leaving its chosen vehicle.

This habit of flies traveling great distances on other power than their own has made local fly eradication campaigns less effective than the campaigners hoped. Cases have been found where a fly carried disease germs on its legs and body for miles and infected people in the community where it settled. No previous cases of the disease were in existence in the new community and health authorities could find no other source of infection than flies.

Repeated warnings of physicians and health officials have apparently failed to instill a proper fear of the house fly in the average mind. However, a more thorough knowledge of the habits of a fly would increase the respect for this tiny insect, according to authorities on the subject.

Decent cleanliness in any home requires protection against the menace of flies. Whether a fly is home-born or a hitch-hiking visitor, he is a danger. Fortunately, an effective fly-killing program can be conducted in any home by the use of a reliable fly spray containing an ample quantity of Pyrethrins, a product derived from Pyrethrum flowers, which is death to flies, when sprayed in a fine mist.

Memories

"To store our memories with a sense of injuries is to fill that chest with rusty iron which was meant for refined gold."—W. Secker.

LION WOULD LEARN

"Time after time," said the big-game hunter, "the lion sprang at me, and time after time as he leaped I threw myself forward and he went harmlessly over my head. Eventually the animal gave up the attempt to tell me and trotted off into the jungle. The following day I came to a cliff overlooking the sea, and there on the beach I saw the same lion. I stood transfixed at its antics."

"What was he doing?" "Perhaps you won't believe me, but that lion was practicing short jumps."—Tit-Bits.

Fact

Facts do not so much account for defeat or victory as the spirit shown in the face of them.

Coleman Self Heating Iron

INSTANT LIGHTING

Iron the easy way in one-third less time with the Coleman. Iron in comfort any place. It's entirely self-heating. No cords or wires. No weary, endless trips between a hot stove and ironing board. Makes its own gas. Burns 95% air. Lights instantly—no pre-heating. Operating cost only 1¢ an hour. See your local dealer or write for FREE Folder. THE COLEMAN LAMP & STOVE CO., Dept. W-1111, Wichita, Kans. Los Angeles, Calif. Chicago, Ill. Philadelphia, Pa.

ONCE you taste Grape-Nuts Flakes, you'll cheer too! Enjoy its famous flavor today, and don't forget—it's nourishing. One dishful, with milk or cream, contains more varied nourishment than many a hearty meal. Try it—your grocer has it! Product of General Foods.

"I've discovered Calumet's big, new 10¢ can!"

"No more 'by-guess-and-by-golly' baking in this house now!"

says Mrs. Owen H. Fleming, 1235 Jackson Ave., Evanston, Ill.

Mrs. Fleming was one of the first women to get the big, new 10c can of Calumet, the Double-Acting Baking Powder.

"Nonced for any woman to take chances with her baking now," she says. "That new 10c can of Calumet certainly means that the very best can be bought at a bargain." Ask your grocer to show you the new, bigger 10c Calumet can!

A SIMPLE TWIST... and the Easy-Off Top lifts off. No spilling, no broken finger-nails!

WHY DOES CALUMET give such astonishing "baking luck"? Why is Calumet different from other baking powders? Because Calumet combines two distinct leavening actions. A quick one for the mixing bowl. A slower one for the oven... And Calumet's famous double-action is so perfectly balanced and controlled that it produces perfect leavening—every time.

All Calumet prices are lower! Calumet is now selling at the lowest prices in its history. The Full-Pound Can now sells regularly for only 25¢. And if you want a smaller size—get the new, big 10¢ can—a lot of good baking for a dime—with Calumet, the Double-Acting Baking Powder.

JELLY IS BETTER WHEN PREPARED IN SMALL LOTS

"Make jelly in small lots. Use a large, flat-bottomed saucepan. Carry the entire process through promptly." These are tips on jelly-making from women in the bureau of home economics who for years have studied the behavior of fruit juices and sugar when combined to make jellies.

An ideal jelly, they say, has a bright color, delicate flavor, and a translucent texture. It holds its shape when turned out on a plate, but quivers when the plate is moved. Perfect jelly should be so tender that it cuts easily with a spoon, yet shows a sharp face.

Such jellies cannot be produced in wholesale amounts. When extracting the juice, it is easiest to prepare and handle about 6 quarts of currants or berries or 8 pounds of apples or grapes at a time. Large masses of fruit pulp drip too long and the bags are not handled easily.

In cooking the juice and sugar together it is important to reach as rapidly as possible the point where the sirup will jelly. This is the reason a large, flat bottomed saucepan is best—evaporation takes place more rapidly from a broad surface. When the jelly stage is reached, cooking must be stopped immediately, the sirup skimmed and put promptly into hot, sterilized glasses to set. Prolonged cooking affects the flavor and color and sometimes the jelling power of the juice.

It sometimes is better to use more than one drip bag. If there is a large amount of fruit on hand, a fresh lot can be prepared and cooking started as soon as the first lot has finished dripping. Some fruits are so rich in jelly-making power that two extractions of juice can be made from the same fruit. These may be mixed.

Drop of Blood Will Tell

Whether an autoist is drunk or not may be told by a drop of blood, according to a writer in the Lancet, the official organ of the British Medical society. A single drop taken in a special capillary tube has been shown to give accurate results through the Widmark test for alcohol in the blood, it is claimed.

FRECKLES DISAPPEAR IN 5 TO 10 DAYS

WONDER CREAM WIPES AWAY BLACKHEADS—DULL, DINGY SKIN

All you do is this: (1) At bedtime spread a thin film of NADINOLA Cream over your face—no massaging, no rubbing. (2) Leave on while you sleep. (3) Watch daily improvement—usually in 5 to 10 days you will see a marvelous transformation. Freckles, blackheads disappear; dull, congested skin becomes creamy-white, satin-smooth, lovely! Fine results positively guaranteed with NADINOLA—tested and trusted for nearly two generations. At all toilet counters, only 50c. Or write NADINOLA, Box 41, Paris, Tenn.

Refreshing Relief When You Need a Laxative

Because of the refreshing relief it has brought them, thousands of men and women, who could afford much more expensive laxatives, use Black-Draught when needed. It is very economical, purely vegetable, highly effective. Mr. J. Lester Roberson, well known hardware dealer at Martinsville, Va., writes: "I certainly can recommend Black-Draught as a splendid medicine. I have taken it for constipation and the dull feelings that follow, and have found it very satisfactory."

SYNOPSIS

To the little town of Heron River comes Anna ("Silver") Grenoble, daughter of "Gentleman Jim," formerly of the community, known as a gambler, news of whose murder in Chicago has reached the town. Sophronia Willard, Jim Grenoble's sister, is at the depot to meet Silver. Her household consists of her husband, and stepsons, Roderick and Jason. The Willards own only half of the farm, the other half being Anna Grenoble's. On Silver's arrival Duke Melbank, shiftless youth, makes himself obnoxious. Roderick is on the eve of marriage to Corinne Meader. Silver declares her eagerness to live on the farm, and will not sell her portion. She meets Roddy Silver tells Sophronia "Phronie" by request something—but by no means all—of her relations with Gerald Lucas, gambler, friend of her father. Roddy marries Corinne. She has a maid, Paula, who seems to attract Jason. Silver again meets Gerald Lucas, who has established a gambling resort. She is compelled to introduce him to Corinne Willard much against her will. Silver confides to Roddy the fact of her illicit relations with Lucas. Friendship between Lucas and Corinne develops. At a dance Duke Melbank insults Silver. Roddy's solicitude brings Silver to the realization that she loves him. Roddy is offered a position at the University farm, but, to Corinne's dismay, he declines it. Determined to break up the over-friendliness of Lucas and Corinne, Silver tells Roddy she has decided to sell her portion of the farm. Not understanding, he reproaches her for her "treachery."

CHAPTER VIII—Continued

She sprang up suddenly. "Have you gone crazy?" she cried huskily. "Do you want me to bring a child into a place like this—where we may be starving next year? Or wasn't it enough for you to throw Anthony's offer into my face? You had to think up something more brutal!"

"Corinne—for God's sake!" Roddy stammered in despair. "We are not going to starve," he went on lamely, obstinately. "Lots of people are bringing up children on less than we have."

It dawned on him painfully that Corinne was not listening. He felt completely lost, floundering about in a gray and chilling chaos. "All right, Corinne," he concluded dully. "I did not know that I was insulting you. I'll not do it again."

He got to his feet and turned to find her eyes upon him, widening for a moment with reflective indolence, then closing as though she were shutting him out of her consciousness, shutting herself in with her own resignation and defeat.

On an evening in February, Paula had come down from the big house and sat beside the table munching an apple.

Sophronia pushed her glasses back into place on the bridge of her nose and shook her head.

"There's no use in you gettin' yourself worked up into a state over Corinne," she said to Paula. "If you ask me—all that woman makes is exercise. If she'd do a bit of her own housework, it'd be better for her."

"I don't know," Paula ventured. "She doesn't seem right. She took one of them headaches again today. Sometimes she scares me. She stares at the walls and says the wind is drivin' her crazy."

"I think I'll go up and stay with Corinne for a while," Silver said.

"That's better," old Roderick said. "It's the first time anybody here has been in Roddy's house in almost a week."

Silver felt the rebuke in the old man's words. Almost a fortnight had passed since she herself had been in Roddy's house. The intense cold had been reason enough for staying indoors most of the time.

"I think I'll go along with you," Paula said hesitatingly.

"Let's go, then," Silver said.

Corinne was huddled up in bed weeping stormily.

"Corinne!" Silver said sharply. "You ought to be ashamed of yourself!"

Corinne stared at her with wild eyes. "Who sent you here?" she demanded petulantly. "I suppose the whole Willard family has been having a convulsion!"

"Stop it!" Silver broke in. "No one sent me—and you're acting like a child."

Corinne began to weep in earnest. "I—I might have known—you'd say that. This place is driving me mad! The wind—and the cold—and being alone—"

"You don't have to be alone," Silver protested. "Why didn't you come down with Paula tonight and—"

"Because they all hate me! I know it. They hate me because I'm not a farm lout—like the rest of them. Roddy hates me—and loves to see me suffer! He's tickled to death because Jason has humiliated me. Paula for a sister-in-law—oh!"

Silver took her by the shoulder. "I'm not going to sit here and listen to that nonsense," she said severely. "You've got to get yourself out of this mood."

Turn over here! Is your head aching?"

"It has been bursting—all day!"

Silver ran her fingers gently over Corinne's shoulders. "I used to do this for my father when he had a headache," she said quietly, and began pressing her finger tips into the tendons and muscles that were knotted at the back of Corinne's neck.

Corinne turned over on her face and moaned. But Silver continued to ply her fingers until Corinne began to relax at last, and her muffled calling ceased.

"That's better!" Silver said.

"O-oh—that hurts!"

Silver worked more gently. "You ought to get out and see what the world is like around you. I'll tell you—take a walk with me early tomorrow morning, over to the Lathie place and back. You have no idea how good it makes you feel."

A sort of docility had crept over Corinne. "I'll do anything," she murmured. "Just to get away from the grayness of this hill."

For some time there was silence between them, until Silver began to wonder if Corinne had fallen asleep. Presently, however, Corinne spoke up unexpectedly.

"Why didn't you marry Gerald Lucas, Silver, when you had the chance?"

"I should have been the most unhappy creature in the world," Silver replied.

"Why?"

"Because—I've seen enough of that life to know," Silver said.

Corinne lay still and did not speak. Fear filled Silver's heart as she fixed her eyes upon Corinne and wondered, with something like despair, what was passing in the mind of this girl who was Roddy Willard's wife. Once or twice she felt that she must say something to warn her against Gerald Lucas and the bright disaster that awaited any woman who gave him her love. But the words would not come. At last, with an inner trembling, she got up and spoke.

"I hope you feel better."

Corinne turned and yawned.

"Lots better. Thank so much, Silver."

She put the coverlet on Corinne's shoulder. "Try to sleep now. And I'll come up in the morning, right after breakfast, to take you on our hike."

"Perhaps it would be better to postpone it till the afternoon—or maybe another day," Corinne suggested. "I'm expecting a telephone call tomorrow."

Silver regarded her for a moment in silence. "Well, go to sleep now, anyhow," she said, and stole quietly out of the room.

Alone again under the cold starlight, Silver found that her ministering to Roddy's wife had had a profound

"But, Lord! How Am I Going to Explain It to the Folks?"

effect upon herself. All that lawless feeling for Roddy that had battled within her for weeks retreated now before a burning pity for Corinne and a feverish resolve to do everything in her power to save Roddy's wife from herself and her false sense of values.

CHAPTER IX

In March, after a prolonged spell of bitter cold and very little snow, a sudden thaw set in. The back of the winter, as Sophronia said, was broken.

But everywhere the talk was of the gloomy outlook for the farmer. "A man doesn't know whether to pray for rain or drouth. If there's a bumper crop, prices will go still lower—and if you don't plant at all, you get nothing."

Roddy reflected. What if he had to sell his last year's grain at practically no profit to himself! He was no worse off than countless farmers whose obligations were staggering compared with his own. He could still give Corinne enough money to buy herself some spring clothes, though she probably would never know how much it meant to him. Well, perhaps things would be better now that spring was here.

For that matter, things were better. Corinne had been more like her old self during the past weeks. He was well aware that Silver Grenoble had had much to do with the change in Corinne's state of mind. He had seen very little of Silver, but she and Corinne had become very friendly.

He slowed down as he saw a horse and rider. It was Silver Grenoble.

"Where do you think you're going all by yourself?" he laughed.

"If you really must know," she re-

plied, "I'm going down to get some dogwood near the lake."

"Where's Corinne? You two—"

"She wasn't home when I called. We hadn't planned anything for today."

"Why don't you come up to the house some evening when I'm around. Gosh, I haven't seen anything of you since Christmas!"

"I've been busy," Silver retorted simply.

Roddy smiled. "Busy giving lessons in good cheer to my adorable wife, eh? Well, you've made a good job of it."

The sudden flash of color flew in Silver's cheeks, and Roddy suffered an acute pang of dismay.

"Run along and get your dogwood, then," he said hurriedly, and started his car.

As he continued on his way, Roddy found that he could not dismiss from his mind that swift, baffling blush his sister had won from her. Her face had had the delicate, flushed courage of a spring flower. She was not of the land in the same sense that Paula Gobel was. Paula was like a field of ripe wheat. But Silver Grenoble had an earthy quality all her own; she was like young grass in a pale spring sun, or sheet lightning in a summer dusk, or the shadow of a bird's wing over water. Roddy was glad that he could regard her so disinterestedly now, for her own fine values.

In a dappled enclosure of birches where new leaves were like a sunny green rain, Corinne Willard leaned against a tree. Gerald Lucas was looking down at her with a contemplative, a masterful smile, that thrilled and frightened her, and made her feel at the same time triumphant.

"Haven't we been playing tag long enough, darling?" he asked softly. "Why don't you admit that I love you?"

Corinne laughed throatily. "What a sweet new way you have of putting it, Jerry," she said, and lifting her hand she ran her fingers through his hair.

Beyond her shoulders, at the top of a craggy crest where the trees opened, Gerald saw Silver Grenoble seated on her horse and staring at them with wide eyes.

CHAPTER X

Silver Grenoble's waking hours, since the day she had seen Corinne and Gerald together, had been filled with an apprehensiveness and sense of impending disaster, and her dreams were confused and tortured with visions of Roddy.

Preparations for the wedding of Paula and Jason stressed rather than relieved her sense of loneliness. Here were two, at least, who were going forward with their lives unaware of the defeat and hopelessness that were stalking about them.

After supper on the evening before the wedding day, Roddy and Jason were at work in the sitting room of the stone house on a wooden lattice which when decked with chokcherry and plum blossoms would form a bow over the bride and groom for the ceremony.

Paula was watching the progress of Roddy's and Jason's work when Corinne entered in her green tweed riding habit.

"Hello!" she called gaily. "What on earth are you making there, Roddy?"

Roddy looked down at her, then continued to pound a nail into place. "I think it's a canopy—or something like that," he said. "Or it will be when the flowers are up."

"Oh—I think that will be very nice!" Corinne exclaimed.

"You're back early," Roddy said. "Didn't the fitters give you a nice dinner party?"

Corinne seated herself. "It was all right. They had a lot of dull people up from town—rather tiresome."

Corinne pulled off her gauntlets. "I'm going to miss Paula terribly," she said, and made a sweet, dejected little moan at the big German girl, who was still standing with her red hands pressed nervously against the back of a chair.

A few moments later Roddy and Corinne left for the big house. As soon as they were outside, Corinne took his arm and drew herself close to him.

"I want you to do something for me, darling," she said in her sweetest manner. "I simply can't be at the wedding tomorrow. And I want you to explain it to the family. I know it sounds terrible to you, darling. She went on. "But Evelyn Richter told me to-night that Harrison's are having a big sale tomorrow in the city—just for one day. It's an awfully exclusive shop, you know, and I'll be saving money if I take advantage of the sale. I can stay over night at the Lombards' and it won't mean any extra expense."

"It'll cost you six dollars in gas to go there and back in the car—and more if you take the bus," Roddy said. "Evelyn is going down first thing in the morning and she has promised to call for me and bring me back."

"But, Lord! How am I going to explain it to the folks? Paula will feel hurt no matter what I say to—"

"I'll speak to Paula tonight. I might fib a little, if necessary, and tell her I have to go to mother."

"Why not tell her the truth—if you have to tell her anything?"

"After all, Roddy, there's no need of hurting the girl's feelings any more than necessary."

"It seems to me you aren't giving much consideration to her feelings as it is."

Corinne drew away from him. "I have done far more for her than lots of women would for their maids. You seem to forget that I've suffered no end of embarrassment ever since I knew that Jason was going to marry

her. Having a maid working for you every day—and knowing that she is going to marry one of the family—I've never said anything about it, but—"

"What's wrong with it?" Roddy demanded.

Corinne shrugged her shoulders. "Well—I don't expect you to see it from my point of view, of course. After all, it's none of my business. What I think—or feel—doesn't seem to matter much anyhow."

Anger flamed suddenly within Roddy. He checked the retort that sprang to his lips. They had arrived before the door of the big house. He turned away abruptly and started for the barnyard.

"Aren't you coming in?" Corinne asked in surprise.

"I have some work to do first," he told her.

She paused with her hand on the door. "But—what shall I do about tomorrow? Evelyn is coming immediately after breakfast."

"Do whatever you like about it," he said. "I don't give a d—n!"

In the afternoon of the next day, Jason and Paula departed. It had been a fine wedding. Sophronia thought with a swelling heart, as fine as any farmer could afford these days.

Under the big oak a number of the farm boys had seated themselves and were tuning up on guitar, accordion, harmonica and violin. Presently a lively melody was lilting upward through the rugged branches of the trees.

"Come on, Phronie!" old Roderick called, his eyes wistfully following Silver and the older Michener boy as they exhibited an intricate and amusing fox-trot step.

"Oh, go on with you!" Phronie expostulated, blushing, and was forthwith swept into Roddy's old-fashioned and courtly embrace.

Twice, three times around the circle of the great oak's shade they waltzed. Old Roderick adapting his knowledge of dance figures resolutely and gallantly to the outlandish new tempo amidst cheers and clapping of hands.

At last, breathless and bristling rosy as a girl, Sophronia stopped in front of the door. Old Roderick bowed low over her hand, and the applause and laughter whirled about them.

"Go on with you, silly!" Sophronia said, and gave Roderick a little push. "I'm thinkin' the older pitchers need dillin'."

In the kitchen she found Roddy alone.

"Why don't you go out and join in the fun?" she asked.

"I guess I'm not in the mood," he replied.

Phronie gave him a sharp glance. "Small wonder," she remarked. "When do you expect Corinne back?"

"Tomorrow night," Roddy said, without looking around.

"Well—I don't understand what got into her to go off—"

"I'd rather not talk about it," Roddy interrupted.

"No—I suppose the least said about it the better," Phronie agreed. "I don't know what to think about it, but I wouldn't go moonin' about the house for anyone. I never did—and I never would. Why don't you get out and dance with the rest of them? No one will ever thank you for bein' a soft-hearted fool over any woman, even if she is your wife."

Roddy began impatiently rolling a cigarette. "A devil of a lot you know about it!" he exploded.

Phronie looked at him in surprise. "I know you've never talked like that to me in your life before," she said.

Roddy got to his feet and put an arm about her. "I don't mean it like that, ma," he said affectionately. "You know I don't. But there's more to this than I want to talk about. Now that Paula's gone I don't know how we're going to get along up at the house. I can't afford another girl, and Corinne doesn't know a darn thing about housework. Even if she did—she isn't strong enough to do it."

"Have you told Corinne about that?" Sophronia asked.

"Yes," he said darkly. "I told her."

"Well, there's no use borrowin' trouble. Corinne will swing into it when she knows she has to, like anyone else. I'll come up now and then to help her get started—and Silver will be glad to give a hand when it's needed. I don't know how I'd do without that girl."

Corinne did not return on the following afternoon. She telephoned Roddy to explain that she had not completed her shopping and that rather than drive home after dark, Evelyn Richter preferred to stay in town for the night. She herself would stay with the Lombards. And was the wedding a lot of fun, and how was he feeling? Roddy, listening to her tumbling, sweetly inflected questions, and giving his monosyllabic replies, stared at the wall beside the telephone.

Even after he had hung up the receiver, he continued to stare at the same spot on the wall. There had been something in Corinne's voice—an over-emphasis of apology, of solicitude.

He went heavily upstairs to wash before going down to his father's house, with old Steve, for their early supper. He thought of the yellow corn he grew, rich and full-eared and sound as the sun. In times like these, when a farmer got little more than a romantic satisfaction out of what he grew, he was justified in contemplating with affection such corn as that. He hoped no obstacles of nature would come between the planting and the maturing of his crop.

Composition of Tin Cans
Tin cans are made of a thin sheet of steel coated with pure tin.

PRAIRIE SERPENT

Pollack, S. D., refuses to be outdone by Loch Ness, Scotland, and Vancouver, B. C., with their sea serpents. It has a "prairie serpent." Joe Heckelsmiller, doing his spring plowing, first saw it leisurely crawling through the grass with its head about two feet above the ground. Its track, said to be as large as that of a balloon tire, led to a lake. Ed Kramlich, G. L. Koch and Ben Miller of Mound City reported seeing the serpent swimming in Lake Campbell. They said it had a large flat head a foot in diameter and the body 16 to 22 feet in length.

WHEN THEY SHOW THESE SIGNS

—Nervousness, Constipation,
and Poor Appetite,
check their diets for this all-
important, 3-purpose vitamin

Many are nervous, poor in appetite, system out of order, because their daily diets lack enough of the precious Vitamin B for keeping fit.

Few things keep them back like a lack of this protective food element.

So give everyone Quaker Oats every morning. Because in addition to its generous supply of Vitamin B for keeping fit, it furnishes food-energy, muscle and body-building ingredients. For about 1/2c per dish.

Start serving it tomorrow for a 2-weeks test. Quaker Oats has a wholesome, nut-like, luscious appeal to the appetite. Flavors, surpassingly good. All grocers supply it.

IN VITAMIN B FOR KEEPING FIT...

1c worth of Quaker Oats equals

3 cakes of Fresh Yeast

Quaker and Mother's Oats are the same

T. E. L. CLASS

Met with Mrs. L. Spaulding Friday, October 11. Only a few of the class were present, but we had an interesting meeting. A program on the life of Solomon by Mesdames McQueen, Luttrell and Spaulding. Delicious refreshments of sandwiches and coffee were served.

The absent members of the class will never know what you are missing. You are all invited to meet with us in our next meeting.

We are planning a real Bible study and a social for our next meeting, so all of the class try to come and make it a real meeting. Let's make it the best meeting of the year.

GOOD WILL CLUB

September 24, the Good Will club met at the school house in the Home Ec room for the eats, after which we went to the laboratory room where the club had installed a radio for this occasion.

After listening to the Baer-Louis fight, we had games and contests, and Mrs. Owen and Mrs. Trostle each gave us a nice reading.

After this we went to the auditorium where Miss Sewell played several piano numbers and Mr. Trostle led our closing song, "Good Night Ladies".

Those enjoying the occasion were Messrs and Mesdames Payne, Trostle, Thomas, Master-son, Jewell, Finch, Hall, Jiggs, Mosley, Mann, Mesdames Owen, Sherman and Howard, Misses Sewell and Hixon and Mr. Lovell.

On October 8, the Good Will club met in the Fred Finch home where we held our election of officers for the new year.

After this very busy meeting we enjoyed a good social hour with delicious refreshments.

Those present were Mesdames D. Leach, Burten Howard, G. Z. Sherman, R. E. Mann, J. B. Masterson, Roy Jewell, Chas. Grimsley, Royce Hall, Roy Blanks and Fred Fince.
