Henry Norris Is Chairman For Aviation Group

Officials report that a lot of enthusiasm was evidenced at the aviation meeting held in this city Friday night, August 24, at 8:30 p. m. Approximately 50 persons gathered at the meeting to hear and participate in the discussions concerned with a postwar airport for this city.

Henry Norris was elected to serve as permanent chairman for the group and the project was turned over to the city and county and to the citizens aviation committee for further advancement.

The citizens aviation committee is comprised of Eddie Darrell as chairman, W. K. Crawley, Sam Richardson, Charnell Jobe, and Kilmer Corbin and W. B. Collins.

Duties of the group will be to secure a suitable site for an airport and to decide on the best procedures to adapt for establishing a port in Lamesa.

Rev. E. L. Jones Holding Meet At O'Donnell Church

The Rev. E. L. Jones, pastor of the Bryan Street Missionary Baptist Church in this city, is conducting a revival at the Calvary Missionary Baptist Church in O'Donnell. The meeting opened August 26th and will extend through September 2nd.

During the period Rev. Jones will meet with the Junior Choir at 8:30 p. m., each evening, after which he will deliver his evening sermon at 9 p. m.

Rev. Jones will assist the Rev. T. M. Hopkins, regular pastor of the O'Donnell Church.

A cordial invitation is extended to everyone to attend the services during the meeting to hear the worthwhile messages which will be brought by Rev. Jones.

FIRST CHRISTIAN CHURCH TO HAVE BUSINESS MEETING TONIGHT AT 8:30

The congregation of the First Christian Church will meet in an important business session tonight at 8:30 p. m.

Every member is urged to be present.

MANY TAKING ADVANTAGE OF BARGAIN RATES FOR COURIER SUBSCRIPTIONS NOW IN EFFECT

Already in effect are the new bargain rates for the Dawson County Courier, whereby you can obtain a subscription for the paper at a reduced rate. The regular price of \$3.00 per year in Dawson County and the surrounding counties of Gaines, Borden, Terry, Martin and Lynn has been slashed to the price of \$2.00 per year.

An even greater savings being offered to Dawson County residents and to persons living in this trade territory, is the reduction of the \$2.00 rate to the garden rate of \$1.50 per year. Persons throughout Dawson, Gaines, Borden, Terry, Martin and Lynn Counties can currently obtain their subscriptions for the amazingly low price of \$1.50 per year. The bargain rate is being offered for a limited time only.

Two year subscriptions to the paper are being offered at \$3.00 instead of the regular \$5.00 rate, and you will want to take advantage of this savings at your earliest opportunity.

Persons living outside of the trade territory can still subscribe for the paper at the price of \$4.00 per year, and the prevailing price of \$3.00 per year for personnel of the armed forces will be in effect henceforth.

Many Dawson County and trade territory residents are taking advantage of the amazingly low \$1.50 and \$3.00 bargain rates for 1 and 2 year subscriptions to the Dawson County Courier, and many have joined the already large circle of Courier readers, placing their orders at the office daily for the paper.

Old subscribers are coming to the office to renew their papers thus extending their subscription dates for 1 and 2 years. Forsighted Courier subscribers are quickly availing themselves of this opportunity and even though they only recently subscribed for the paper, they are taking advantage of the new low bargain rates, and are having their papers renewed and their dates extended for 1 and 2 year periods.

Under the prevailing trade territory bargain prices, no subscriptions for less than a year will be accepted.

The Courier publishes with pride the following list of subscribers who have already taken advantage of the bargain rates. The names are listed according to the routes and communities in which the subscribers reside:

Subscribers from Rt. A—
J. H. Hale, H. E. Spinks, Mrs. Alma Ray, R. T. Bedwell.

Motor Rt. B—

Serving oversea for more than a year, Houston Bennett, Second Class Cook, is now stationed on Guam. He is the son of Mr. and Mrs. T. B. Bennett who reside in the Key Community. Entering the Navy on December 29, 1943, Bennett first landed on the Marshall Islands after receiving foreign assignment, but was then transferred to Guam. Until recently the 19 year old Navy man serviced planes, but because of a foot injury he suffered while doing this type of work, he was assigned the duties of cook. Bennett is a former student of the Key Schools. Prior to entering the service he worked with his father on the farm. At one time he was employed at the Western Auto House in this city.

Pvt. Albert B. Crawford, the son of Mr. and Mrs. O. C. Crawford of Patricia, entered the military service on March 20 of this year. He is now stationed in Lathrop, California, where he serves with an engineering corps. He is a former student of the Klondike School and before going into the service was employed in a defense plant in Portland, Oregon. His child, Lavina Jean, makes her home here with his parents.

FT. STOCKTON COUPLE VISIT MR. AND MRS. G. W. VERMILYA

Mr. and Mrs. Audrey Ewing of Ft. Stockton spent Wednesday night and Thursday with Mr. and Mrs. George W. Vermilya in this

Rev. C. D. Kellar Spoke At Friday Rotary Meeting

The Rev. C. D. Kellar, president of Jacksonville Baptist College in Jacksonville, who has been conducting a meeting in this city at the Bryan Street Missionary Baptist Church, was guest speaker at the regular meeting of the Rotary Club Friday, August 24. He was introduced by the regular Missionary Baptist pastor, Rev. E. L. Jones.

Rev. Kellar took for his topic of discussion, "The Challenge of the Postwar World," emphasizing three traits needed to meet the problems of the postwar world.

One visitor was present at the session. He was W. A. Dorman from Tyler.

Officials of the club report that the improved attendance record of the Friday session was noted with pleasure, stating that nearly the entire club was present.

The two couples spent part of Thursday in Midland.

The Ewing's and Vermilya's are former residents of Nebraska City, Nebraska. The Vermilya's are currently employed here by Audrey Cox at the Majestic Theatre.

Softball Tourney Will Be Held; Twelve South Plains Teams Are To Participate

Arrangements are being made for a softball tournament to be held in this city with games scheduled for Friday night, Saturday, Monday, Tuesday, and Thursday nights.

The tournament which was arranged by popular request, is to be comprised of twelve of the best softball teams on the South Plains, seven of which have just finished playing in the all-star tourney held in Lubbock.

Participating in the tourney will be teams from LAAF Field in Lubbock, Seagraves, Big Spring, O. K. Garage from Lubbock, O'Donnell, Seminole, Post, SPAAF of Lubbock, and several local teams including Ackerly, Osborn's Drive Inn, Sparenberg, and Modern Cleaners.

P. K. Humes has announced a tentative schedule of play for the local tournament. Each of the games will be played at the local ball park, and games will begin promptly each night at 7 p. m.

The tourney will open with 3 games Friday night, followed by 3 games Saturday night, three Monday night, 2 Tuesday night, and 3 games Thursday night.

The event will be a straight elimination tourney with a consolation bracket. Humes reports that awards will be made to first and second place winners as well as to the consolation winner.

He further states that an accurate schedule of play will be ready for publication in Thursday's edition of the paper.

The tourney is being sponsored by the Dawson County Softball League and games will begin promptly on schedule hours. Competent officials will be secured.

Twenty-five cents will be charged as admission price for each night.

Registration Of Local High School Pupils Has Begun

Lamesa High School pupils began registering today (Monday, August 27) for the 1945-46 school term, with seniors reporting at the school to receive their schedule cards.

The registration period will continue through August 30. According to arrangements made by local school officials, juniors will report for their registration cards on Tuesday, August 28. Sophomores are to secure their cards on Wednesday, and freshmen will obtain their cards on Thursday, August 30.

All pupils are to report to Principal H. S. Fitzgerald in room 204 of the local high school.

Students have been asked to bring writing materials with them at the time they register and to be able to submit this information to the registrar: parents name, correct mailing address, telephone number, and the name of the school district in which they reside.

Pupils coming from other school districts or other schools to the Lamesa institution are requested to bring the grades they made in the school last attended.

During the registration period students may purchase their student activity tickets which will admit them to the various school activities of the year.

The official opening of the Lamesa High School will be Monday morning, September 3 at 9 a. m.

Before the revolution George Washington's home, Mt. Vernon, contained only eight rooms. Physical condition of the cow is one of the major factors in producing high quality milk.

**Passenger Car
Tires To Continue
To Be Rationed**

New passenger car tires will continue to be rationed largely on the basis of occupational driving needs, although rationing of all farm-implement and industrial type tires ended August 20, the District Office of Price Administration has announced.

"The critical tire shortage has only been emphasized by the cancellation of gasoline rationing—applications for tires have increased 20 per cent in many counties," according to Rationing Executive Wm. G. Williams.

Predictions of an early end of tire rationing have made many applicants feel that local Boards were discriminating against them if their application was turned down. Local Boards must hold tire certificate issuance within their quotas and the end of the war brought no increase in quotas, Williams said. "If you need any proof of the scarcity of passenger tires, just try to find one of the popular sized ones," he pointed out.

Under the new eligibility system, certificates for new tires may be issued for use on the following:

1. Passenger cars used for occupational purposes. Board quotas will continue to be distributed in accordance with importance of the uses of the passenger cars.

2. Passenger cars used for non-occupational purposes provided that the local board decides that denial of the application would cause undue hardship and that the issuance in this category does not exceed 5 per cent of the board's total quota.

**PFC. FRED N. WITT TO
RECEIVE DISCHARGE**

Pfc. Fred N. Witt, son of Mrs. Lulu Butler and nephew of Bob Taylor of this city, recently arrived at Camp Virginia en route to San Antonio, where he will receive his discharge from the military service.

Pfc. Witt has been stationed in the vicinity of Naples, Italy, where he served with the Medical Corps as an ambulance driver.

Screwworms Can Do Much Damage To Stock

Unusual increases in the screw-worm fly populations from the Edwards Plateau area north into Kansas should be warning to farmers to take every precaution to cut down the possibility of stock becoming infested, according to Paul Gregg, Entomologist for the A. and M. College Extension Service.

Gregg said that sheep and goat raisers should treat all shear cuts promptly and to avoid wounding the stock in any way. Usually, the screwworm fly population decreases after June 1, and after the normal spring increases. But this summer, fly numbers have become greater, and estimates made by the Bureau

of Entomology indicate that the population during the first half of July was the highest of the past six years—approximately the same as 1941—and 140 per cent of normal.

The Bureau of Entomology reports that their organization hasn't been able to determine the cause of the unexpected increase of the flies and the rather persistent heavy attacks on livestock. Some ranchmen have suggested that the condition has been provoked by deterioration of equipment and fences to the extent that more animals are wounded, and that wounded stock have been neglected on account of a shortage of help.

All wounded animals should be treated with smear 62, Gregg said. Even though screwworms are not present, the wound should be treated, since smear 62 acts as a healing agent and will kill any worms that hatch within the two days after the smear is applied.

Smear 62 applied to animals in-

Ways To Control Tick Infections Are Given Here

Controlling tick-borne infections should receive the serious consideration of rural folk who are pestered by ticks, according to Paul Gregg, entomologist for the Texas A. and M. College Extension Service.

Rocky Mountain spotted fever is carried by the American dog tick which is found in scattered areas of Texas. This tick is also known as the common wood tick. It is found chiefly in tall grass and wooded areas, and is most active in the spring and summer, Gregg said.

The favorite meal of the adult American dog tick is supplied by the dog, but the blood of humans and warm-blooded animals also is acceptable. Most people in Texas know a dog tick when they see one, but just in case some are not sure, it is flat and has eight legs; it is about one-fourth of an inch long, brownish, and is marked with white on its back.

Gregg offers the following advice to help reduce the number of ticks around homes and to avoid their attack and possible resulting infection: "keep grass and underbrush closely cut; destroy rodents; keep dogs away from tick-infested areas; examine yourself and your clothing thoroughly at least twice a day when in a tick-infested area; remove and destroy as promptly as possible all ticks from dogs and humans; use care to prevent the blood of crushed ticks from getting into the eye or a skin abrasion.

"If ticks are numerous in a yard, a spray consisting of four teaspoonfuls of nicotine sulfate (40 per cent nicotine) and 1 1-2 ounce of soap to one gallon of water may be applied without injury to plants and will help reduce the number of ticks for a few days. A more effective solution may be obtained by adding two ounces of sodium flouride to each one gallon of spray. This will give control for a longer period but will cause some burning of foliage," Gregg said.

Farmers Urged To Fight Inflation

Farmers will be heading toward financial disaster after the war if price controls are relaxed now. This warning is embodied in a statement prepared by the postwar agricultural policy committee of the Association of Land Grant Colleges and Universities.

According to Director Ide P. Trotter of the A. and M. College Extension Service, this anti-inflation statement has been approved by the executive committee of the Association, of which Clarence A. Dykstra, provost of the University of California, Los Angeles, is chairman, and represents the concensus of

leading college authorities through the United States. The policy committee consists of 18 members representing different major phases of Land Grant Colleges' activities in all parts of the nation.

Farm people have an enormous stake in success control of inflation, the policy committee declared. "A runaway price situation during the war, or while the pressure for civilian goods and services continues during the early postwar period, would spell disaster for many farmers and their families."

The statement ascribes the agricultural depression of the 1920's and 1930's largely to the inflated prices of world war one. Singling out farm land prices for special emphasis, the committee's statement declares that a lifting of price controls before the danger is past would open the door to a speculative boom in land. "This would lead to piling up of mortgages debts which in many cases would be out of line with long-run farm earnings," the statement continues. "Such a result would spell foreclosure and disaster for many farmers when the inevitable reaction sets in." Many returning war veterans, it adds, would be among

those victimized by exorbitant land prices.

Observing that no one contends that the control of prices and wages has been perfect, the postwar policy committee expressed belief that "fair-minded citizens will agree that the job has been reasonably well done considering the difficulties involved."

"As rapidly as the war effort permits," the committee's statement concludes, "the threat of inflation should be tempered by speedy expansion and resumption to meet civilian needs. But continuing controls are needed until supplies again are adequate to meet requirements at reasonable prices. Additional controls, especially to limit and discourage land speculation, are in order."

He Didn't Think Of Dialing Information

LEXINGTON, Ky. (AP) — Life is too short to spend in a telephone booth, said a visitor here who told city police he smashed the glass from a booth because he didn't know how to get out, not being used to "these new-fangled contraptions."

Harvesting To Get Underway In Some Sections

C. E. Tarter, administrative officer at the local AAA office, reports that Dawson County crops are looking good considering prevailing conditions.

He states that after making a survey of the county, he believes that the feed crops this season will average approximately 500 pounds of feed per acre, even if the county does not receive additional moisture.

"Some of the feed crops are looking very good," he states, "although some of the younger crops are not doing so well."

He reports that a little feed will be harvested next week, but that a larger majority of the crops will probably not be ready for harvest until frost.

To inquiries about the cotton situation, he answered that the cotton which is up looks very good, and that only a few farmers report that they are being bothered with worms.

He stated Saturday that two men, W. L. Gilliam and Archie Moore, had reported that they might have a bale of cotton each, ready for ginning this week.

The administrative officer at the AAA office stated that some local residents had already begun harvesting blackeye peas, and stated that W. T. Ellis of Munger expects to harvest 60 pounds this week, with R. A. Pounds planning to harvest around 40 pounds. Other residents from Munger are looking forward to harvesting some of their peas this week also.

Tarter states that there are 3 buyers in the Lamesa territory who are buying green peas at this time, and reports that they are paying 3 cents per pound for the vegetable.

Sgt. T. Wilkes Returned From Duty In Europe

After serving overseas for a period of 27 months, S-Sgt. Tom Wilkes, son of Mr. and Mrs. E. V. Wilkes of this city, has returned to the States. He arrived in Boston last week, calling his parents Saturday, August 25, and reporting that he would probably arrive home during the latter part of this week.

A member of the Eighth Air Force, Sgt. Wilkes was stationed in England while overseas. He served as a clerical technician with his group, and has the Presidential Unit Citation among other awards.

Sgt. Wilkes entered service February 4, 1942 and received his training in Lubbock, at Pendleton Field, Oregon and in Pueblo, Colorado. He then received an overseas assignment and left the States in May of 1943.

Sgt. Wilkes is a Lamesa High School graduate and a former student of Baylor University and Texas University.

C. A. Mitchell's Father Died Recently

Funeral services were held Sunday for M. A. Mitchell, father of C. A. Mitchell of this county. Mr. Mitchell was making his home in Munday and at the time of his death was seventy years of age.

Mr. and Mrs. C. A. Mitchell and family attended the funeral services.

To remove iron rust, ink and scorch on washable material, moisten the spot with lemon juice, sprinkle with salt and place in sunlight. Repeat until stains disappear.

— BUY MORE WAR BONDS —

Cotton requires for its development from six to seven months of favorable weather, plenty of sunshine without prolonged periods of dull, cloudy weather.

Brighten up your closets with fabric-covered hat and blanket boxes and matching garment bags that you can make yourself.

Peanut butter need not be stored in the refrigerator but should be kept well covered and stirred occasionally to help distribute oil and prevent drying.

The Harvard School of Medicine was started as a branch of the University at Cambridge in 1782.

If you've been annoyed with salt shaker top corrosion, try this. Remove tops from the salt shakers and invert them. Pour melted paraffin through them. Enough paraffin will adhere to coat the surface and holes may be opened with a toothpick or needle. This will last for a long time.

Important Meet For Pep Squad Members Slated

Band director Richard Young reports that preparatory steps are being taken by the band and pep squad units for the first football game to be played here September 14, with Tahoka.

The pep squad will have their first meeting today (Monday) at 4:30 p. m., and this unit will start marching and drilling this week. Young states that cards have been mailed to prospective pep squad members, but reports that there is a possibility that some interested parties did not receive cards as their addresses were not known. He states that persons who failed to receive cards who are interested in joining the pep squad are invited to attend the meeting today. The first session of the organization will be important, because plans will be made for uniforms.

Girls must meet certain qualifications prior to being accepted into the pep squad. According to Young they must be a member of the high school, make passing grades, and attend all pep squad practices regularly.

Yell leaders for the organization this year are Ann McGuire, Nancy Walker, and Jimmie Lee Cotten.

Director Young states that 70 musicians will participate in the senior band this year. They will play at the football games and will be dressed in the new band uniforms.

According to Young, the units are hoping to be able to attend several of the out-of-town games, now that gasoline has been released from rationing.

County Agricultural Agent
FEED SCARCITY MAY AFFECT 1946 FOOD PRODUCTION

Scarcity of feed as forecast by a smaller estimated corn yield in Texas and the nation last year and a decline in available animal proteins may result in less production of meat, milk, and eggs in 1946, according to T. A. Barfield, County Agricultural Agent.

Barfield said that the national advisory council of an organization of feed manufacturers, of which E. D. Parnell, Poultry Husbandman for the A. and M. College Extension Service is a member, warned Secretary of Agriculture Clinton P. Anderson during a hearing at Washington recently that livestock numbers and feed supplies must be kept in balance. The tendency to get livestock numbers ahead of feed supplies is foreshadowed by an increased number of chickens on farms, together with an expected excess production by commercial hatcheries over the record year 1943.

Other indications are an expected increase in fall pig farrowing; continued heavy grain feeding of dairy cattle; marketing of hogs at heavier weights; unfavorable weather for corn production, and the severest drought in the Panhandle and South Plains areas in several years.

Offsetting this in some measure are a record wheat crop for the nation; and oats crop 22 per cent greater than last year's good yield, and excellent pasture and hay conditions in most sections of the country. But to be prepared for the eventuality of short crops of corn and grain sorghums, Barfield urges Dawson County farmers to adopt these feeding practices:

(1) Avoid over-feeding any type of livestock; (2) Substitute wheat for corn in all rations whenever possible; (3) Make best use of pasture and roughage, both of which are in good supply; (4) Use waterproof feeders and avoid filling feeders too full at any time; (5) Market livestock and poultry at the most economical weights; (6) Check regularly with Barfield for the latest information on improved feeding practices.

Blueberries and huckleberries which are often confused are similar in appearance and use. The usual distinction is that the blueberry is tame and the huckleberry wild.

T-5 Smith and Pfc. Williams Write Of German City

Editor's Note: Printed below is a letter from T-5 Fred C. Smith and Pfc. Leslie H. Williams, both Dawson County boys, which was received at this office this week:
Nurnberg, Germany,
August 12, 1945

Dear Editor:

A couple of home town boys in Germany would like to tell you a few things about Nurnberg, Germany as it is today. We have been here for one month now.

We never knew each other before we came into the Army, but have been in the same company for two years. So now if you wish we will give you a lift and show you Nurnberg, as it looks to us.

The best way to see Nurnberg is to take a ride with us down the street through the heart of the city, so that you can see everything for yourself. Over on your left you can see a wall, perhaps thirty feet high, with a gap here and there where a bomb has hit. You will almost lose your sea as we pull out sharply to miss a bomb crater that has not been filled yet.

Here and there a building has been missed by the bombs, but you will see very few of those. Nurnberg reminds you of a ghost city—or shall we say windowless. On your right you will see groups of perhaps one hundred SS troopers. They don't look like the super men that Hitler tried to make them think they were. They look like tired, beaten men, and they have picks or shovels, and are cleaning the rubble from the streets that is the result of bombs and shells.

Here and there you see a very old woman carrying a pack. She stops to rest, and each time you will wonder if she will be able to get up without anyone offering to help. Through it all there is a continuous

stream of traffic. You see trucks, jeeps and tanks and wonder where they can all be going. For a minute you forget that a war has just passed this way—but then you see the damaged street cars that line the bombed out tracks—and the war that was just here is back again, and is never far from your mind.

Then for a moment the traffic is congested and you stop. A little boy or girl will be pulling at your arm and asking for chocolate for mama, or cigarettes for papa.

Now, as we don't have much time, we will take you for a short ride down along the Rhine River. At the first look, you will be disappointed. You expected a very large river, and the widest point measures only a few hundred yards. Then as you look, you see the color of the water. It is a very deep blue, and flows very swiftly. As we drive along the river you see the castles that were built so long ago. Along the mountain side, you see what looks like great steps, but as you get closer, you see that they are man made and have grapes growing there.

You can see the ends of bridges that have been broken in the middle, and close by you will see pontoon bridges that were built by our Army. Over them the Life Line of our Army has come, and is still coming.

At noon time when the sun is shining and reflecting upon the water, you can not tell what color the water is. It appears red, or dark blue, with a touch of gold. Then it hits you with force that it is a very large river after all and very beautiful.

T-5 Fred C. Smith,
Pfc. Leslie H. Williams.

4-H Club Calves Are Showing Marked Growth

T. A. Barfield has completed visits to all 4-H boys in the county who are feeding out beef calves this year. He reports that to date there are 29 calves on feed, and some other 4-H'ers have indicated that they will buy 6 additional calves.

County Agent Barfield states that the local boys are getting off to a nice start with their feeding programs. He reports that Ben Mac Dopson, Leon Archer and Tommie Allen have some milk fed calves which are showing remarkable growth. Some of the calves are said to be gaining at the rate of 3

pounds per day.

Barfield reports that a number of the 4-H'ers plan to enter their calves in some of the large stock shows during the Spring months.

According to the local agent, approximately the same number of calves are being fed out this year as during 1944, but more boys are participating in the program. Boys

who have calves include Bruce Earnest, Corky Grissom, J. C. Freeman, Clarence Wright, Jeff Raney, Gilbert Sherman, Wilbur Ray, Willie Gene Davis, Donovan Phipps, Kenneth Preston, Tommie Allen, Miller Shipp, Clay Ingram, and Douglas Yates. Boys planning to feed calves are Vernon and Douglas Hogg and Charles Fields.

During 1944, there were 2,000 deaths in grade crossing accidents—a seven per cent increase over 1943.

Suds left from the laundry, and a stiff broom, will make quick work of cleaning the porch. Rinse with garden hose.

Save Paper And Tie Securely For Friday Collection

Mrs. C. F. Gowen, chairman of the paper drive committee, requests that all citizens here save all their newspapers, books, and magazines and tie them very securely in 12 inch bundles for the city-wide drive which will be conducted here Friday, August 31.

She states that announcements for the intensive Friday drive will be made and publicized for persons having collections, and expresses the hope that a large amount of paper will be turned in for the project.

The campaign chairman requests that you do not put loose waste paper on the sidewalks on the day of the city-wide collection.

Watch for further announcements about the collection day for waste paper and be sure to save all your newspaper, books and magazines and have them ready Friday.

Indications Are That Gilt Show Here Will Be Good

Recently the United Duroc Record Association held its Regional Progressive Show and Sale in Lubbock. The sale covered the southwestern states and hogs from Texas, New Mexico, Oklahoma, Arkansas, Tennessee, and Missouri were exhibited and sold.

At the event a gilt sold at a new record price. The price was \$375.00 which was \$65.00 higher than any other gilts in the nation had sold far at such an event.

T. A. Barfield, county agent, reports that the boar being used by 4-H Club boys in this county for

their gilt program is Golden Ladd, a full half brother to the highest priced gilt sold in the nation at the Lubbock event which is mentioned above.

He explains that Golden Ladd was bought by J. P. Gibson of the Key Community from Glen Whitmore of the Five Mile 4-H Club, who received Golden Ladd in the Sears Program this year, which probably has some bearing on the fact that Dawson County placed second over the state in the number of pigs raised from 1945 litters, and possibly explains the exceptional high quality of the gilts owned by 4-H'ers here.

The local county agent further reports that a Sears Gilt Show will be held in this county on October 3, according to tentative plans. He says that he believes that the show will include a fine group of gilts and states, "I don't believe a better group of gilts will be exhibited anywhere in the state than in the local show. All gilts designated for the event are uniform in size and are exceptionally pretty."

Local boys who have gilts which will be in the October show are Bobby Hale, Leland Lane, Jeff Raney, Arthur Gooch, Gail Batson, Billy Gray, Arlie Ray Williams and Don Fennell. Vaughn Francis has the boar.

Lt. E. D. McMillan Buried In France

Word has been received here that Lt. E. D. McMillan, financee of Miss Lois McBride of this city, who was reported missing over France during the D-Day invasion, has been buried in that country.

Lt. McMillan, son of Mrs. D. H. McCoskey of Kansas City, received part of his military training in this city having been stationed at the Lamesa Field during 1942, and had a number of friends here. He was a C-47 pilot, and was flying a glider during the invasion when he was reported to have been shot down.

Sugar Stamp 38 To Become Valid

Sugar stamp No. 37 in Book IV will be good for the purchase of five pounds of sugar beginning September 1, according to OPA Rationing Executive Wm. G. Williams.

The current sugar stamp, No. 36, will expire August 31.

Continuing the ration rate of five pounds of sugar every four months, the new sugar stamp, No. 38, will be good through December.

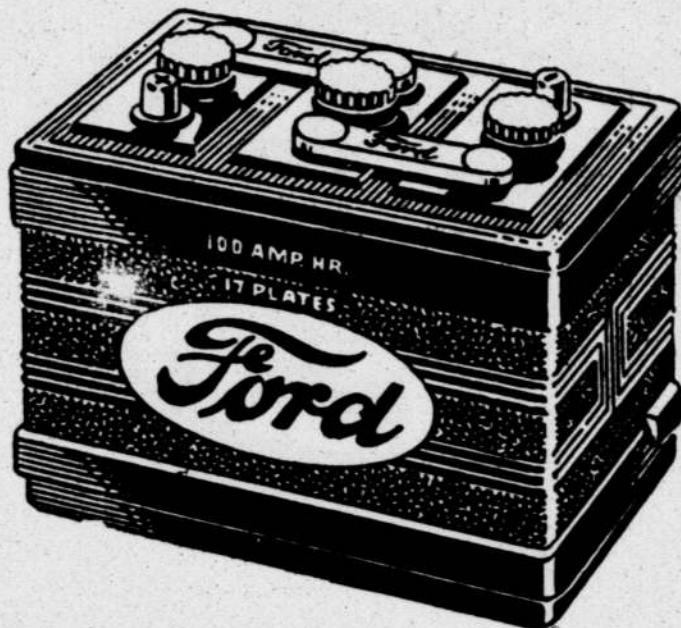

Sugar stamp No. 38 is being validated instead of No. 37 because so many home canners by mistake last year mailed sugar stamp No. 37 to their local War Price and Rationing Board to obtain special can-

ning allowances, instead of spare stamp 37 requested by OPA.

Injuries from home accidents total more than 13,000 every day in the year.

Under normal conditions in warm climates cultivated cotton is a perennial. But in the United States, climatic conditions necessitate annual plantings.

JUDGE IN CONTEMPT CASE—Joe D. Browning, county judge, on bench during the contempt court hearing in Corpus Christi.

Insects Proving Destructive To Cotton This Year

Infestation of Texas cotton fields by destructive insects was high at the end of the third week of July, according to Paul Gregg, entomologist for the A. and M. College Extension Service. More than 400 reports received from cotton growing areas in all parts of the state showed an average of 37 per cent of squares punctured by boll weevils. This, Gregg said indicated that weevil infestation was general and high.

In the same period, leafworms had been found as far north as Victoria and Jackson counties. Bollworm infestation was spotted, but was causing a measure of damage in some fields.

Gregg suggests that growers pick and examine 100 normal squares from their fields at least once weekly, and oftener when weevils are abundant, to determine how many are being punctured. Dusting

with calcium arsenate is recommended when 10 to 15 of each 100 squares on cotton growing on light land are punctured, and when 20 to 25 squares per 100 on cotton on heavy high-yielding soils become infested.

Five or six pounds of calcium arsenate, of which there appears to be an ample supply this year, is sufficient for medium sized plants, Gregg says. For rank cotton, seven to nine pounds should do the job if applied with a dusting machine.

Weevils are more numerous than is usual at this time of year. The principal causes are that more weevils survived the winter and cotton is later this year than in 1944. Last year the hot, dry weather during June so effectively checked the early-season populations that weevils were unable to build up again until after a good crop of bolls had been made. This year, except in limited areas, weather has not been favorable to preventing a normal increase in weevils.

In view of the critical situation, Gregg urges growers to watch their fields carefully and be prepared to act promptly in controlling boll weevil infestation.

In 1881 a traveler coming down his boat was tied up three days the river. the Missouri river reported that while thousand of buffalo crossed —. **BUY MORE WAR BONDS :-**

G. M. Roberts Announces Two Faculty Meets

G. M. Roberts, local elementary school principal, has announced two faculty meetings for this week.

He states that on Friday afternoon, August 31, all teachers who instruct classes from grade 1 through 4, in the local school are to meet in the elementary school building at 3 p. m. This will be followed by a meeting of the elementary school faculty on Saturday morning, September 1, at 10 a. m. All teachers who are in town prior to the opening of school are urged to attend these sessions.

In addition Principal Roberts reports that he will hold some individual conferences for any teachers who are here now, and invites any who would like to contact him to call at the principal's office at any time during the week.

He reports that he enrolled a number of new pupils for the oncoming term last week, including a group of students from Key and Mullins and some from the local community. Principal Roberts states that he will continue with the enrollment of any children who have not attended this school previously, with the exception of first grade students, throughout this week.

Large Class Was Enrolled In Band School In City

Richard Young, band director of the Lamesa School, reports that the summer band school closed Friday, August 24. He states that an enrollment of more than 85 pupils was recorded for the band school which had been in progress for the last 5 weeks under the direction of the band master.

Forty-three beginners enrolled in the musical organization, and during the five weeks period two bands were rehearsed, including the advanced organization and the beginning unit.

Classes in instrumental playing and music theory were held during the school.

The band school members participated in their closing activity for the summer session when a Saturday night concert was given August 25, at the band stand in town. This was the culminating concert for the summer season. The series of musical concerts given by the local band have attracted good crowds throughout the period.

Price And Pratt Gave Interesting Program Aug. 23

Lion Wright Boyd made arrangements for the program given at the last meeting of members of the local Lions Club on Thursday, August 23.

Participants on the program included R. L. Price, county service officer, who explained the veterans service organization and the benefits that organization offers, as well as how to apply for veterans insurance.

Following his discussion Lion Leslie Pratt took charge of the program conducting a quiz program. He asked questions concerned with facts about Lamesa, inquiring about when the courthouse was built, the number of businesses here, the amount of cotton ginned last year, when the present post-office began its operations, and a variety of other questions.

Visitors present at the meeting included Lt. Wright G. Boyd, Pvt. Karl Cayton, E. Barrett, and the new city manager, Gordon Hill. Stansell Jones was introduced at the club as a new member.

Hematite, magnetite and limonite are the names of the three leading types of iron ore used in the United States.
