BROWNS AGAIN DRUB SENATORS

ST. LOUIS, Aug. 19.—The Browns won from Washington 6 to 1, today for the third straight victory over the Senators. An error by Gerber let in the only run off Wingard, who was credited with his second victory of the season.

ATHLETICS WHIP INDIANS 5 TO 3

CLEVELAND, Aug. 19.—(AP)—Philadelphia made it four out of five today when they defeated the Indians, 5 to 3. Walberg won his second game with a long strike that scored two runs in the eighth. He also struck out seven men.

TIGERS DOUBLE ON RED SOX

DETROIT, Aug. 19.—(AP)—Detroit continued its winning streak to nine games by taking both ends of a double header from the Red Sox here today. The scores were 5 to 2 and 14 to 7. The Red Sox made a triple play in the eighth inning of the second contest.

PIRATES AND GIANTS DIVIDE TWO

NEW YORK, Aug. 19.—Two rousing rallies from opposite sides of the diamond, both in the "stretching seventh", gave Pittsburgh and New York an even break in a double header today. The Pirates taking the first game 9 to 2, and the Giants the second, 5 to 2.

REDS TAKE TWO FROM PHILLIES

PHILADELPHIA, Aug. 19.—(AP)—The Reds took both ends of a double header with Philadelphia here today, winning the first game 5 to 2 in 12 innings and the second by a 1-0 margin.

McAuliff Tells Of Becoming Jockey

(By NEA Service) NEW YORK, Aug. 19.—Denny McAuliff might have been a great fighter instead of a great jockey had it not been for a sudden realization of how fighters were paid.

## Lockney's Building Program Reaches \$600,000 Mark For Past Eight Months

LOCKNEY, Aug. 19.—The report that an additional \$100,000 worth of building and construction work would begin immediately in Lockney, brings the city's total building permits over the \$600,000 mark for the first eight months of 1927, exclusive of railroad construction that is now under way. According to an official report from the West Texas Gas company, the contractors will start the laying of their distributing line within the next week, the plan of distribution shows that their lines will serve practically every consumer in the city, thus giving the homes and industries an economical fuel in a very convenient form. Yata Sewer Bonds Citizens of Lockney have voted a \$55,000 bond issue for the purpose of establishing an adequate sewer service at this place. Councilmen state that Emboff disposal tanks will be installed and sewer lines will parallel practically every water line. This added convenience and sanitary measure will mean much to the city in the locating of new industries and increasing the population. The development of the two above-mentioned projects places Lockney on an equal basis with the larger cities as far as convenience, sanitary measure, and economical fuel are concerned. Construction work has already begun on one of the seed houses of the Lockney Cotton Oil plant. This building is to be built of structural steel on a concrete base with a brick fire wall in the center. Several new residences have recently been announced and construction on three of these is to begin at once. Very few small houses and

shacks have been built in Lockney as most of the buildings have been constructed for permanent homes, and at this time the demand for houses and apartments of the better class is increasing.

## ERWIN FLIGHT

(Continued From Page 1)

ing they were going into the sea, their radio set went dead due to the loss of the antenna, but they were able to reach an island in the Hawaiian group as their gasoline supply exhausted. Serious Condition The manner in which the final message was sent indicated the full seriousness of the situation the Dallas Spirit faced. Navigator Eichwaldt had been speaking slowly, repeating each word when he broke the continuity of the sentence and with a sudden burst of speed he flashed "We are in a tall spin—so." His set was heard no more. Ed Blum, chief mechanic for the Dallas Spirit and experienced flier, said tonight that freak air currents out over the Pacific were undoubtedly the cause for forcing Erwin's plane into a tall spin. "Jensen went into a tall spin and Ernie Smith also experienced one while enroute to Honolulu," Blum said, "so it must be an air expert who knows nothing about it." Hope Expressed "Both Jensen and Smith came out of their spins all right and if it was possible to bring a ship out of it, I am certain Bill did. The possibility of coming out of two spins, the first one starting at 300 feet, is small," he added. Radio experts pointed out that the instrument board on the Dallas Spirit was illuminated by a power supply from a storage battery. This battery also supplied the current for the transmitting tube filament. The last message indicating that the lights on the board darkened showed that the connection to the battery were coming loose and would soon affect the radio power supply also. ERWIN TAKES OFF OAKLAND, Aug. 15. (AP)—Hour-long flight through the Golden Gate into the banks at 140 miles an hour, the monoplane Dallas Spirit, piloted by Captain William Erwin, started today on its flight toward Honolulu in search of the missing

## ERWIN'S RECORD

service cross for this deed, although on his return he was shot down behind the enemy's lines. He and his observer made their escape in the battle. Before he was massacred out of the army in June, 1919, Captain Erwin toured the country with the Victory loan flying circus for the United States treasury department. Since he has been out of the army he has conducted a flying school at Love Field, near Here, and has done commercial flying. He was given the name of "The Star Bill Erwin" by his friends, because he always called Texas his home. When William E. Easterwood, Jr., offered a prize of \$25,000 for a flight of four jumps to Hong Kong, China, via Manila, Philippine Islands, Captain Erwin was anxious to enter the contest and a group of Dallas men sponsored the venture. Captain Erwin supervised the construction of the Dallas Spirit at Wichita, Kansas, and flew it to Dallas. With but a few more hours in the air and an insufficient time to make tests, he flew the plane to California. He planned to continue his flight around the world.

### Gets Dark

"5 p. m. It is now getting dark and we apparently will not be able to see much until morning."

### Plane Passes Ship

SAN FRANCISCO, Aug. 19. (AP)—The Federal Telegraph company received the following message from the steamship Mana tonight: "Airplane Dallas Spirit latitude 26:13 north, longitude 126 degrees 23 west, 5:10 p. m. Dallas Spirit passed near ship, flew around then changed his course for Honolulu. Came close. Seems to be going fine. We got some pictures of him. Signed—Steamer Mana."

### Signal to S. S. Mana

"5:11 p. m.—Plane just passed the S. S. Mana at five ten coast time and dipped in salute. They answered on the whistle. Of course we could not hear it, but we saw the steam. We might pick up the squadron of destroyers before dark, that depends on their speed. All OK." (Position of Mana 240 land miles from San Francisco.)

### Air Clear

"4:20 p. m.—We just passed close to a rain squall. The air is a little bumpy in its vicinity. We soon left it behind, however. Very clear ahead."

### Ocean is Clear

"5:25 p. m.—Bill and I both send our best wishes to Mr. and Mrs. DeJoy and to all of the large crowd of well wishers that saw us off."

"5:33 p. m.—Bill had a drink of water."

"5:40 p. m.—The ceiling is now 700 feet. We are flying at 300 feet. We haven't seen anything since the Farallones and all is OK except Bill just sneezed. We are keeping a sharp lookout for the Doran plane. Also the Golden Eagle. Will call you again later."

### Some Clouds Encountered

"5:55 p. m.—Overcast strata over us, cloudy but it looks like clearing farther ahead. That last means the Baron is sending. Say, tell Ed Blum that his job on the window is fine. We are turning up 1,850 RPM and making 55 air speed. All instruments working fine. Will say more later. Regards to Lieutenant Wyatt."

"6:10 p. m.—Our ceiling is increasing and the sun is breaking through."

### Take Off Easy

Radio flashes from Erwin's plane leaving San Francisco for Honolulu, Aug. 19. (AP)—"Going strong. We are passing the docks. Will see the light ship soon."

"We are carrying the tail high at 1,700 and are making close to 100 miles per hour air speed. Will call again when passing lightship." From news on, it will double up. (Increase power) so you can copy better as I know my sending is none too good. Tell McAllister that the set is working fine. Love to Ma." (The radio sending was done by navigator A. H. Eichwaldt, accompanying Erwin.) "We are being Point Lobos (Golden Gate) now."

"We are now passing the lightship and see the two flag signals which means that you boys are getting us, and we can see the Farallones ahead."

## MISSING FLIERS

(Continued From Page 1)

floating object said to resemble a plane which was reported yesterday to have been seen in that vicinity. Two naval seaplanes departed from Pearl Harbor early in the day under orders to search the coast of Maui for the missing aviators.

The submarine F-29 continued its progress toward San Francisco along the great circle course of shipping followed by the Dole fliers; the mine sweeper Polacca and the naval tug Sunnada were 150 miles east of Honolulu on a similar course in the search.

Around the various islands of the group cruised other naval vessels, but no word of the two missing planes and their four men and one girl came to cheer the searchers, or the anxious ones ashore. The Miss Doran could not remain in the water longer than 24 hours in the opinion of aviation experts here, this would have put the occupants of the plane out into the rubber life-boat, about Thursday noon, assuming that the plane cruised until the gasoline supply exhausted. If it was crashed in a forced landing at sea, or soon after it left Oakland, the occupants would just have time to escape with their rubber life boat, provided they were uninjured in the landing.

While the rubber lifeboat carried by the Miss Doran would carry three persons in fair weather, it would be a difficult task to keep the boat afloat in a squall at sea, experts pointed out. Carrying two men and a woman, the boat might hold indefinitely in fair weather, however. The late John Rodgers, who was forced down at sea, while flying to Honolulu in 1925, was not found until after he had floated about with his crew of four for nine days. Their craft, however, was a seaplane capable of remaining afloat indefinitely.

The speed of gliders varies from an inch a day to as much as 100 feet.

## ROBBERS SURROUNDED IN WOODS BY BANK POSSE

ROWLEY, Iowa, Aug. 19. (AP)—The five robbers who held up the Farmers National bank at Vinton, Iowa, this afternoon are believed to be surrounded in a wood near Rowley. The dense growth is under heavy guard tonight but no attempt will be made to penetrate until tomorrow leaders of the posse say.

## GOOD WHEAT PROSPECTS

With more land worked up and awaiting the planting of wheat than has ever been planted in the county before, prospects for another year's wheat crop could not be brighter. As a general rule the land is in much better condition for planting than in last year's and after being free from vegetable growth since June and early July it is in excellent condition. From the expression of wheat farmers there will be all probability be a third more acreage planted this fall. Recent rains have put a fine planting season in for France. Unlike the one which failed two years ago, it will carry no guns, no ammunition, no first-aid kit, and it is not a bit improbable that a new record for the year's wheat crop will be set next year.—Plainview News.

## GROUND BREAKING FOR COURTHOUSE SET TODAY

Commemorating the passing of that temporary stage of affairs to one of permanent improvement and plans for solid progress, hundreds of Hockley county citizens together with prominent speakers from South Plains points will meet in Levelland this afternoon to dedicate the new \$150,000 courthouse which is to be constructed. Judge Clark M. Mulliken, Judge Homer L. Pharr and Durwood H. Bradley of this city are to speak. A program relating the marvelous progress of the past few years will feature the ceremony. Music will be furnished by the Levelland band. Ninety-six per cent of the \$4,318 rural mail routes now are covered by motor car.

## GOLDSTEIN PLEADS GUILTY

LOS ANGELES, Aug. 19. (AP)—Jacob Goldstein, wealthy president of the Rothschild Mortgage and Finance company was allowed to plead guilty to manslaughter in superior court today for the killing of his business partner, Frederick A. Stern, July 15.

## TO FLANDERS FIELDS

Another army is about to aid kits, and will leave before parting, no again, no gallant determination of the home fires burning, many of those who kept peace-time army on its feet to war-time army on its feet. Of the 15,000 men will be sent to Paris for the Legion, 45 per cent, also are said to be women. These women will be going returning to scenes they left when they became the brides of our soldiers and forsook their friends to make their husbands and lovers to the country. They go to view eager interest the places their men made history.—Chickadee.

## GOOD WHEAT PROSPECTS

With more land worked up and awaiting the planting of wheat than has ever been planted in the county before, prospects for another year's wheat crop could not be brighter. As a general rule the land is in much better condition for planting than in last year's and after being free from vegetable growth since June and early July it is in excellent condition. From the expression of wheat farmers there will be all probability be a third more acreage planted this fall. Recent rains have put a fine planting season in for France. **SANTA FE BUILDS MORE RAIL STALLS**

**THREE HUNDRED THOUSAND WORTH OF CONSTRUCTION TO BE CARRIED OUT**

LATON, Aug. 19.—Construction of new stalls for the Santa Fe is in full swing. There are now twelve stalls, hence capacity is to be increased fifty per cent. The new ones will be more than the old, and will accommodate the large locomotives used on the Slaton division, such as the "2800," "2900," and "Mallory."

Work is also in progress on a longer turntable. It will be set, and will allow the larger engines to turn without going to the scale track installed recently. The 75-car-capacity track was installed. It is to weigh trains of loaded light cars originating on the division. The scale is so delicately constructed that it weighs with unvarying accuracy. Even when cars of tons are being weighed, weights are within one or two pounds of perfection. The scale is electrically operated, colored lights being on or off to indicate correct and incorrect weights.

**Slaton Crops Are Now Looking Fine**

LATON, Aug. 19.—Illustrating conditions through this part of the South Plains, W. H. Lovell, living ten miles south of here, exhibited at a local bank this week a stalk of cotton literally loaded with "bolls" more than fifty in number. There were numerous squares and blooms, and twigs of varying size were numerous. The plant showed not to have been suffering for lack of water, neither was there any material insect damage. It ripened just a few days before unusual rains which came in June.

**Rockney Farmers Have Enough Rain**

ROCKNEY, Aug. 19.—Cotton of this section state that there has been sufficient rain for this time and should more rain, it would be very detrimental to the crop. Since the first of the month, cotton has taken a very unprecedented in the history of the county, and it is expected that the farmers that will take too much growth and to mature by freezing.

**Winfield Host To Trustee Meet**

WINFIELD, Aug. 19.—More than a hundred school trustees here today under a call from county superintendent for the purpose of familiarizing themselves with recent rulings of the State superintendent and hearing addresses from prominent speakers in this and other portions of the state. The meeting was in session the entire day and the delegates entertained at noon luncheon the citizens of the town.

**Winview Cotton Meets U. S. Grading**

WINVIEW, Aug. 19.—The cotton industry in Hale County is heralded this week in the interest of better cotton raising, by a visit from Dr. J. H. Gilliam, professor of farm and management of the Texas Experiment Station, and Robert F. Jones of the U. S. Department of Agriculture.

**USE OF MILK INCREASING**

Evidence that the war on bovine tuberculosis has not turned the tide against milk, dairy experts here, is seen in the fact that annual consumption of milk in the United States has increased more than 49 per cent since 1914. During 1925 the public consumed 46 billion pounds of milk and cream, an increase of two billion pounds over the quantity consumed in 1924.

**Brewster Pecan Budding Is Shown**

ALPINE, Tex., Aug. 19.—Demonstrations in budding pecans were held on the ranches of H. L. Koker, A. J. Tippitt and Mead Wilson the past week by County Agent Miller.

The buds were placed on large trees which were topped back last winter. Some of these trees were more than two feet in diameter, but were bearing small inferior nuts. Paper shell pecans of the Burkett and Texas Prolific variety were budded to the young sprouts and should bear in two years, according to Miller.

Others who have had trees budded are: Bennett and Willis McCutcheon, Joe Kingston, C. H. Bird, H. C. Williams, J. W. Weatherby, Clarence Ford, G. C. Bourland, W. M. Daugherty, T. J. Cartwright, Mrs. Dan Knight, T. R. Wood, Buck Pool, and W. T. Jones.

**NAVAL CONFEREES SCRAP SILK HATS**

GENEVA, (AP)—While talking about the scrapping of auxiliary ships, the tripartite conference on naval limitation has virtually discarded an auxiliary to the well-dressed man, namely the silk hat for evening wear.

At the formal dinners which punctuate the delegates' evenings, it is the exception for a guest to arrive in one of the turret-like top hats.

Looses caused by robbery may be deducted from one's income tax. While this may be comforting to some, most victims will prefer not to be robbed.—Auburn Citizen.

Baron Saito, being every inch an admiral and statesman, is virtually the only one of the conference leaders to cling in the high headgear. The rest retain their soft felt hats of the day, pearl gray being the prevailing color, or turn up with straw hats. One British delegate actually reported at an official function in a golf cap.

Even such a rigid gentleman of the old nobility as M. le Comte de Cluzel, France's unofficial "informant" at the conference, has discarded the traditional headgear. With evening dress he wears a soft black felt which would make him fit in with the local color of the Paris Latin Quarter, were it not for the monocle below it.
