

DAWSON COUNTY COURIER

Volume 7

Lamesa, Dawson County, Texas, Thursday, April 29, 1937

Number 15

C. H. Day, Plainview, To Address Dawson Farmers Saturday

C. H. Day, of Plainview, member of the executive committee of Texas Agricultural Association, will be in Lamesa, Saturday, May 1, to conduct a county-wide meeting of local farmers. The meeting will be held in the district court room of the county courthouse at 2:00 p. m.

The purpose of the meeting is to discuss organization of the farmers of Dawson county. It is the desire of Mr. Day to get from the farmers an expression as to their desires for a permanent farm program. The results of the meetings which he is holding over Texas will be tabulated and submitted to the Washington representative of the Association who will present them to the administration.

Mr. Day says, "This is the first opportunity Texas farmers have had as an organization to participate in the writing of a farm program. You know how hard it is to change the law after it is written. Let's try one time saying what the law should be."

A farm program has been proposed to the administration which is outlined in the following six points:

FIRST: Any year the world supply of American cotton exceeds a normal supply (about 16 to 17 million bales in 1937) soil building PAYMENTS will be made to encourage the growing of soil conserving crops and practices. This is the soil building payment as we know it.

SECOND: Any year the world supply of American cotton exceeds 19 million bales payments will be made for diverting cotton acreage to retain in the soil the fertility which would otherwise produce surplus cotton. This is the soil conserving payment and will be made in addition to the soil building payment mentioned above.

THIRD: Any year the world supply of American cotton exceeds 25 million bales, the growers be compelled by production control to retain in the soil the fertility which would otherwise produce a burdensome surplus. The two payments mentioned above will be continued.

FOURTH: Any year the price of cotton on the ten leading spot markets is below the parity price, an adjustment payment to all producers co-operating in the adjustment program be made equal in amount to the difference between such price and the existing parity price for cotton. This was known as the subsidy payment we received in 1935 but was not received in 1936.

FIFTH: Government loans on cotton to be considered only as an emergency measure and after other measures have failed to prevent an utter price collapse.

SIXTH: Any year the world supply of American cotton exceeds 20 million bales, a tax of \$15 per bale will be imposed on every bale of cotton available at the gin. Funds so collected may be used, after deducting cost of handling, to pay benefit payments to co-operating producers, but the tax would be paid by cooperator and non-cooperator alike. This proposal was not recommended by the committee of southern farmers.

The Texas Agricultural Association is an organization of Texas farmers whose purpose it is to have a part in making and drafting the laws which affect the farmer and agriculture generally. The Association is affiliated with the national organizations and organizations of other states, and maintains a representative in Washington.

C. A. BARRON LOSES TWO CARS IN FIRE

C. A. Barron, who resides in the Fairview community north of Lamesa had the misfortune of losing two cars and his double garage in a fire last Friday night.

The fire is thought to have been started in a short in one of the cars. The cars burned were a 1935 Chevrolet sedan and a 1936 Ford sedan.

CLYDE BURKHART NAMES SERVICE STATION

Clyde Burkhardt, operator of the old Day and Night Service Station has found a new name for his station. Clyde sponsored a contest giving merchandise prizes for the best name submitted. This week the judges selected two prize winners. Entrants holding number 7 and number 1 are urged to visit the COURTESY SERVICE STATION, the new name selected, and receive their prizes.

LAMESA GOLF TEAM TO PLAY MIDLAND SUNDAY

The Lamesa golf team will play their first home game in the Sand Belt Golf Association for this season here Sunday afternoon. The game is to be played with Midland at the Country Club course just south of town.

Golfers to play in Sunday's match are John Edmison, George Norman, Bill White, A. G. Barnard, T. F. Vaughn, L. B. Vaughn, C. C. Donnell and Vernon Bryant.

Cities in the Sand Belt Association this year are Colorado, Stanton, Midland, Odessa, Big Spring and Lamesa.

J. T. McDonnell is visiting relatives at Byars, Oklahoma.

Oil Test Drilling At 2125 Feet

According to reports reaching the Courier office, the E. L. Wilson No. 1 Texas Land & Mortgage Co. oil test located in the northwest quarter of the southwest quarter of section 45, Block M, E. L. & R. R. Ry. co. survey, was drilling below 2125 feet at about six o'clock Wednesday afternoon.

As to what formations had been drilled through and the formations the bit was now resting in, we were unable to learn.

It was also reported that the Albaugh No. 1 John Robinson, located about a mile northwest of the Wilson test in section 46 Block M, E. L. & R. R. Ry. company survey, was preparing to acidize with the hole cleaned out.

The Lee Wright Pickens well, located in the northeast corner of section 1, block C-37, just across the Terry county line, was reported to be drilling below 5000 feet in water. This well is being deepened by Hugh Corrigan, Midland operator.

Lamesa Auto Co. Celebrate Birthday

The firm known as Lamesa Auto Company, composed of S. L. Forrest, J. D. Dyer, and W. T. Webb, well known local citizens, purchased the Lamesa Motor Company, May 1, 1936. Saturday, May 1, 1937 marks the end of the first year in business.

"Business in every department has far exceeded our expectations," Mr. Dyer said, "and we are going to show our appreciation for the fine patronage accorded our firm by staging an Anniversary Used Car Sale."

Attention is called to the page advertisement appearing in this week's issue of The Dawson County Courier explaining in detail just what Lamesa Auto Company has to offer the people of this territory.

Senior Class Play To Be Presented May 7

There is no such thing as a man-shy girl, then why should a boy be girl-shy? We know all the answers. Lessons will be given to those who are girl-shy and wish to correct this dreadful fault! The instructions will be given in three acts at the high school auditorium at eight p. m. by the Seniors on May 7. Don't miss it.

The cast of "Girl-Shy" will feature several new personalities as well as some of those you saw in "Seventeen" last year's Junior play. Tom Arsdale, played by James Rankin, is a young college graduate who is terribly girl-shy. Kathleen Webb, playing the part of Barbara Sanford, is not in the least man-shy and certainly proves this to Tom.

Victor Crawley delightfully characterizes Oke Stinson, Tom's musically inclined room mate. The part of Caroline Arsdale, Tom's sophisticated aunt is ably played by Gussie Belle Ragsdale. Harold Williams really looks his age in the role of Anthony Arsdale, Tom's very determined father. Sylvia Webster, the girl with the poetic name from "back home" is portrayed by Estelle White.

Richard Crawley shows his poetic ability in the talented role of Alfred Tennyson Muratov. The role of Dean Marlow, the dignified college dean, is well played by Homer Simpson. Elmerine Barron's vivid portrayal of Peaches Carter, Oke's heart beat of the moment, is delightful.

Marjory Hardin's humorous characterization of Asma, the colored wash woman, is something you surely can't miss. Mabel Deane Sasser gives a very clever impersonation of Birdie Laverne, a professional house cleaner, whose highest ambition is to become a famous movie star. The role of Chuck Mayo, Birdie's boy friend, who is a bold and determined young man, is played by Harold Lambeth.

Remember—the lesson in overcoming the fault of being "Girl-Shy" will be given on Friday, May 7, at the high school auditorium at 8 p. m. by the Seniors. We guarantee to cure your blues with plenty of hilarious fun and comedy.

SOFT BALL GAME PLAYED WEDNESDAY AFTERNOON

Officially opening up the softball season in Lamesa the Hub Service Station boys played the Wilson team in a seven inning game here Wednesday afternoon at the school house. The final score of the game was 22 to 8 in favor of the Hub Service Station.

Another game is to be played this afternoon (Thursday) between the Hub Service Station and the CCC team. Considerable interest is being shown in soft ball this year and it is expected that a league will soon be organized and games played on a regular schedule.

KILMER CORBIN WINS AT REGIONAL MEET

Kilmer Corbin, senior high school student, won first place in senior declamation at the Regional meet held at Canyon last week. He will go to Austin on May 7 to enter in the state wide contest beginning at that place on Friday, May 7.

Lamesa Band to Enter Contest At Lubbock Fri.-Sat.

The Lamesa High School Band, directed by Conway King, will go to Lubbock Friday of this week and participate in the ninth annual contest of the Western Texas School Band and Orchestra Association being held there on Friday and Saturday. School musicians from 50 counties are expected to be present.

A parade composed of 25 bands will be staged down town Friday afternoon at four o'clock, and the marching contests will be conducted on Tech's athletic field in the evening, and later the contestants will be guests at a spring football game between Texas School of Mines of El Paso and Tech.

Saturday afternoon the masses bands will rehearse at Senior High School starting at 4:15 o'clock, and at 8 o'clock the several hundred selected musicians will join in perhaps the most colorful event of the entire tournament, a public concert at the auditorium.

Those chosen as judges for the band contests will be: Herbert L. Clarke, "the Crown Prince" of John Phillip Sousa fame and now director of the Long Beach California municipal band; L. M. Calavan, Oklahoma City Central High; Earl D. Irons, director, North Texas Agricultural College band; Milburn E. Carey, director Phillips University band; and Ellis B. Hall, Amarillo Academy of Music.

Luncheon Club In Regular Meeting

Members of the Business Men Luncheon Club met in regular session on Tuesday at noon at the Williams hotel. Kilmer Corbin entertained the group with his declamation that won him first place at the District and Regional Interscholastic League meets.

A. G. Bearden, secretary of the chamber of commerce, gave the history of the Luncheon club from the time of its organization in January 1927. The roll of charter members was read and it was noted that some of those members are still active in the club.

The club president appointed a committee composed of Sam Richardson, C. A. Hollingsworth and W. L. Marr to revise the constitution and by-laws of the club.

J. E. Barron gave a report on the progress of the park project.

Rotary Club In Regular Meeting

Members of the Lamesa Rotary Club met in regular session last Friday at noon at the Williams hotel, with 23 members out of the 25 present.

Vice-president W. D. Arnett had charge of the meeting in the absence of the president, Carl Rountree. The main feature of the day was the observation of National Boys and Girls week, with Earl M. McClure, South Plains Scout Executive making the main address, talking and showing pictures pertaining to the Scout jamboree to be held in Washington, D. C. in July. The pictures were shown through the assistance of Joe Matthews assistant county agent.

Col. E. D. Nix gave a short talk on his early experiences in Oklahoma. The \$25.00 worth of seeds for help of crippled children that the club had voted to purchase were practically disposed of at the Friday meeting.

MUCH INTEREST SHOWN IN WORD CONTEST

Much interest is being shown in the Proof Readers Page contest being run in the Courier for the past few weeks. More answers are being received each week.

Eugene Barrett was the first one in the city to send in the nearest correct list and Mrs. D. D. Kidd the first from the country. Both have been paid \$1 prize money.

Turn to the page of advertisements in this issue and try your luck at finding the misspelled words. Remember the first nearest correct list received at the Courier office wins the prize.

RANCHERS SHOULD SIGN UP ON RANGE PROGRAM AT ONCE

Anyone who is interested in getting his range land under the 1937 Range program should call at the office of the county agent and make his application at once. The program provides payment to the operator of range lands who carries out certain range building practices.

CONSTRUCTION STARTED ON AUDREY COX HOME

Construction was started last week on the brick veneer home of Mr. and Mrs. Audrey Cox on North Bryan st. The home will be two story and when completed will be one of the finest and most modern residences in Lamesa.

PLAY AT SHUMAKE FRIDAY NIGHT

There will be a play entitled "Old Fashioned Mother" given at the Shumake school house on Friday night, April 30. Mothers admitted free.

Lamesa Girl To Be Dutches at Tech Fiesta Friday

Miss Elmerine Barron, daughter of Mr. and Mrs. J. E. Barron, has been chosen to represent Lamesa High school at the second annual Tech Athletic Fiesta Friday night. Miss Barron will be a dutches in the Fiesta Queens court.

Several members of the local school plan to attend this event which will be staged in the Tech stadium. The Lamesa High School Band will be in Lubbock to compete in the West Texas School Band and Orchestra Contest and will also attend.

The program will include the Tech-Texas College of Mines football game, a spectacular demonstration by 1200 physical education students, military demonstration, marching band contest, baseball and tennis matches.

Dr. Knapp of Tech to Talk At Banquet

Dr. Bradford Knapp, president of Texas Technological College and one of Texas' greatest educators, will be the principal speaker at the Junior-Senior banquet which will be held on the night of March 8. This is an annual affair of the Junior-Senior class and is one which is looked forward to long before its date.

The Junior class has been working since the first of school in order that it might present a successful banquet. They are very proud of the fact that they have been able to secure the services of such a famed man as Dr. Knapp. Such a case is of great exception for our school. It is very seldom that a man of such ability and with so many duties can find time for such events of minor importance. He should be appreciated by all the people of Lamesa for showing such interest in the young people of today who will be the citizens of tomorrow. Such men are to be commended.

Attend Home Ec Rally In Fort Worth

A group of high school girls and their instructors left Wednesday of this week for Fort Worth where they will attend the State Homemaking Education Rally. The girls making the trip are from the home economics department of the local school.

The girls and the garments they will display are: Marilyn Parkinson, who will enter the "school girl costume" contest; Carol Cole, the "tailored general wear costume"; Hazel Reynolds, "the selection of a play suit or dress for the pre-school child, also the selection of meal service equipment"; Gilberta Cherry, "the judgment and selection of seasonal centerpiece for various occasions," and "planning of luncheons or supper." Fern Reynolds and Bernice Rhodes will go as visitors. These girls will be accompanied by Misses Eleanor Ragle and Thelma Palmer, high school instructors.

Pioneer O'Donnell Physician Passes Away

Last rites for Dr. A. W. Thompson, 63, O'Donnell physician since 1908, were held on last Friday afternoon at 3:30 at the Southside Baptist Church in O'Donnell by Rev. W. L. Henderson pastor.

Death was at 1:30 o'clock last Thursday afternoon of a cardiac ailment that had disturbed him for several years, and had caused his confinement in bed early last week.

Dr. Thompson had been practicing medicine since 1895.

He leaves a wife and five daughters.

HIGHWAY BAPTIST CHURCH INSTALL LIGHTING FACILITIES

The Highway Baptist Church has just completed the installation of a lighting plant, which had become to be a much needed improvement, according to the pastor, Jno. R. Denning.

The old lighting facilities were totally inadequate to give sufficient light to the ever increasing attendance, and the benefit is already most noticeable in the additional interest the congregation is taking in the song service.

In addition to the regular Sunday services, a special song service is conducted each Saturday night at eight o'clock. The general public is invited.

DISTRICT MEET FOR SCOUT EXECUTIVES HELD

A district committee meeting of the Boy Scout Executives was held at the First Methodist church on Tuesday evening.

Earl W. McClure and Dr. F. B. Malone of Lubbock were present for the meeting as well as a group of Lamesa citizens. W. K. Crawley presided.

A supper was served the group by mesdames Leslie Pratt, A. G. Barnard, Russell Reising and J. H. Beale.

Mr. and Mrs. Jim Bridgeman visited Mr. Bridgeman's brother Pete in Lubbock this week. Friends of Mr. Bridgeman will be glad to learn that he is slowly recovering from a severe attack of pneumonia.

Rural Electrification Meeting Friday Night

A meeting of farmers from over the county was held at the court house Tuesday night. The meeting was for the purpose of organizing a county Rural Electrification Association. Judge W. M. Yates acted as temporary chairman of the organization. J. M. Peterson was elected as president, and L. A. Duff was elected secretary of the county organization.

Bob Burdett, vocational agricultural teacher of Lubbock county, explained the organization and operation of Rural Electrification to the group. Considerable interest was shown by those present and it was decided that another meeting should be held.

The meeting will be held in the district court room Friday night at 8:00 p. m. A representative of the rural electrification Administration will be present to discuss the operations of the rural electrification plan and advise what steps should be taken to bring electricity to the farms of Dawson county. Any person who is interested will be welcome at the meeting.

All who attended the meeting Tuesday declare that rural electrification offers an excellent opportunity to make cheap electrical power available to the farms.

Lions Club Convention At Big Spring May 2-4

The annual District Lions Club Convention will be held in Big Spring the 2nd, 3rd and 4th of May and the local Lions Club is planning on almost a 100 per cent representation at the convention. Big Spring is making elaborate preparations to entertain one of the biggest conventions ever held. Lion Elmer D. Elliott of Dalhart, Texas, is District Governor, and will preside over the convention.

The German Band of Lamesa will present a program before the convention. The band is composed of Bob and Richard Crawley, Tom and Garvin Wilkes, Homer Simpson and Jack Sanders. This band was on a program at a joint Lions meeting between Lamesa and Big Spring at Big Spring in January, and made such a hit that the District Governor has invited it to take part on the convention program.

Official delegates from the local Lions club were elected Wednesday to represent the club at the convention. These delegates will have the responsibility of voting for next year's District Governor and also the convention town for next year. The delegates are J. R. Flanken, W. L. Marr, A. G. Bearden and J. M. Harrington.

The Lions Club also enjoyed the following program at its regular meeting Wednesday: An accordion quartet composed of Miss Edna Merrick, Mrs. W. J. Beckham, Mrs. Blaine Whiggins and Guy Ruth Travis. Miss Maurine Womack of the high school gave a reading.

\$60,000 in Farm Program Checks Received

Agricultural Conservation Program payments have been received at the County Agent's office for 253 farms. Checks numbering 348 have arrived totaling \$62,459.43. The average amount of each check was \$160.03.

SENIORS TO LEAVE PARTING GIFT TO SCHOOL

The senior class of the local high school have planned to leave the school as their annual parting gift, improvements on the stage at the high school auditorium. They are having installed a Cyclorama with appropriate hangings and hardware. They have also had the front curtain cleaned and renovated.

The seniors expect to use this new equipment for their play, which will be presented on Friday evening May 7.

BORDEN COUNTY RECEIVES \$33,949.43 CONSERVATION CHECKS LAST WEEK

To date, the County Agent's office at Big Spring (Borden County) has received 223 checks amounting to \$33,949.43 which represents a portion of the 1936 Agricultural Conservation payments for Borden county.

Other unpaid checks are scheduled to arrive within the next few weeks, according to County Agent E. B. McLeroy.

Borden county producers are urged to sign 1937 worksheets within the next three weeks. May 15th is the final date for making application for entry into the 1937 program in Borden county.

POLO GAME SCHEDULED SATURDAY AND SUNDAY

The Plainview Polo Club will play a local team at the polo field in Lamesa, Saturday and Sunday, May 1 and 2. A good game is promised and a cordial invitation is extended to polo fans to be present.

MARRIAGE LICENSE

Marriage license were issued at the county clerk's office to Mr. Kelly Bockman and Miss Leellen Weaver on April 23, and to Mr. Robert Koser and Miss Evelyn Burnside on April 24.

Yates Hardware To Stage Birthday Celebration May 1

The Yates Hardware force have been busy this week making preparations and completing plans to entertain the largest crowd in the history of the institution during their Fifteenth Birthday Celebration which will be held Saturday May 1.

Mr. Yates purchased the Lamesa Hardware Company from the late W. S. Moore on May 1, 1922 and Saturday, May 1, 1937, will mark the fifteenth birthday of the Yates Hardware in Lamesa. At the time of the purchase the business was located in a small building on the west side of the square. In 1926 due to the development of Lamesa and Dawson county Mr. Yates found it necessary to expand into larger quarters in order to better serve the people of this territory. As a result a modern brick building was erected on North First Street which is today the home of Yates Hardware. Again this year Mr. Yates in order to take care of an ever expanding business erected an additional building on the north of the present site to house the tractor and implement repair and service department which is a vital link in the policy of the Yates Hardware, not only to sell, but to offer the best in the way of service to the people of this section.

As an expression of appreciation and his esteem for the people who have made this Birthday Celebration possible, Mr. Yates extends a cordial invitation for all to be present Saturday May 1 at his store. Coffee and cake will be served to visitors throughout the day in addition to a free picture show. Don't fail to be present on this the biggest day in the history of Yates Hardware and take part in the Birthday celebration.

Visiting Day Next Monday Evening At Grade School

Next Monday evening, May 3, has been designated as visiting day at the elementary school, the building to be opened at 7:30 p. m.

The members of the faculty will act as a reception committee for parents and others to visit the school. Exhibits will be displayed in the auditorium and rooms adjoining. Informal music will be furnished by the music department during the reception. No formal program has been planned for the occasion.

Every parent and person interested in the welfare of the school is invited to attend this event.

Mrs. G. T. Bryant Dies Last Thursday

Mrs. G. T. Bryant, 62 years of age, passed away at her home on North Fifth street last Thursday afternoon, April 22, at 3:30 p. m.

Mrs. Bryant had been ill for the past several weeks, although her death came unexpectedly.

She was a devout Christian, and had been a member of the First Baptist Church for the past 30 years, being always active in all church affairs. She was a faithful worker with the Mission Sunday school, was always ready and willing to do good for others. She had the esteem and respect of everyone who knew her.

Funeral services were held at the First Baptist church at 4 p. m. April 23, with the pastor Rev. E. F. Cole officiating. Burial was made in the local cemetery.

Survivors are her eight children, O. C. Bryant, Abilene; Everett Bryant, O'Donnell; Cecil Roy and Raymond Bryant, Lamesa; Mrs. Idalia Young, Abilene; Mrs. D. W. Harrell, Breckenridge; and Mrs. Edna Hatch, Lamesa.

Pall bearers were J. E. Barron, W. K. Crawley, C. O. Stone, Nelson Cope, C. A. Hollingsworth, and Matt McCall.

CITY OFFICIALS WARN CHICKEN AND DOG OWNERS

The City officials are taking this method of warning the people in Lamesa who have chickens and dogs running at large, that there is a City Ordinance against such, and unless the owners see that they do not bother their neighbors by scratching up and destroying their gardens and flowers, the penalty of the law will be assessed. Also, people who have cows and stake them out on vacant lots must see that they are staked securely and now allowed to free themselves and destroy gardens. These animals when found loose will be brought to the city pounds.

Many complaints have been coming to the City Officers about the above items and they have expressed themselves as being determined to improve the situation.

SERVICES AT FIRST CHRISTIAN CHURCH SUNDAY

Rev. J. T. McKissick, president of Randolph Christian College at Clio will preach at the First Christian church here Sunday, May 2, both morning and evening services.

Dr. McKissick is an outstanding minister of the Christian faith and every one has a cordial invitation to hear him.

GIANT 32 VOLT WINDCHARGER

Let the air make all the electricity you need. The Giant 32-Volt Windcharger is sweeping the country.

Club News

KEY HOME

DEMONSTRATION CLUB

"It is best to use unbleached sheeting and candlewick thread to make a tufted bedspread," said Mrs. Dock Riley in her demonstration on making candlewick bedspreads to nine members of the Key demonstration club on

April 22, at the home of Mrs. J. A. Lynch. When the spread is finished it should be soaked for several hours in cold water. This will cause the material to shrink and keep the tufts from pulling out.

Mrs. L. E. Page, the wardrobe demonstrator, also gave a helpful demonstration in sewing. The club voted to send Mrs. Page as a delegate to the short course in June. Mrs. T. B. Bennett was present as a visitor.

The club meets next in the home of Mrs. L. E. Page at 2:30 p. m. May 13. Mrs. Bud Riley will be in charge of

the program. Miss Phenix will give a demonstration on the arrangement of storage space in the kitchen.—Reporter.

KEY HOME

DEMONSTRATION CLUB

"The blonde-haired woman may wear black, gold, or blue to a good advantage," said Miss Mattie Phenix to the members of the Key home demonstration club in the home of Mrs. Walter Hawkins at 2:30 April 8.

Miss Phenix added that the matron with grey hair can wear gray, orchid, or blue well. The typical brunet can usually wear more colors than any other type. She can usually wear red, rose, and some shades of yellow, and orange well.

Delicious refreshments were served by the hostess to the members of the club and Miss Phenix. The club adjourned to meet with Mrs. J. A. Lynch on April 22.—Reporter

SHUMAKE HOME

DEMONSTRATION CLUB

"When making tufted bedspreads one need not buy expensive patterns," said Mrs. Bernice Stuart of the Sparenberg club to members of the Shumake club when they met at the home of Mrs. Robert Head, April 23.

Make up your design or with a little time and practice patterns can be copied. When choosing materials and equipment it is best to buy materials, thread and needles made for candlewick work. However, you can use unbleached domestic and a bodkin needle. Always choose colored thread for colored materials rather than colored thread for white or cream colored materials.

In spite of the bad weather there were six members present and three visitors, Mrs. Stuart, Mrs. Opal Riley, and Mrs. Sam Gamage.

The club will meet in the home of Mrs. McAnar at 2:30, Friday, May 7. Miss Phenix will be present and give a demonstration on arrangement of storage space in the kitchen.—Reporter.

SPARENBERG HOME

DEMONSTRATION CLUB

The Sparenberg home demonstration club met with Mrs. A. J. Beckmeyer, April 20. The meeting opened with a song, "Beautiful Texas" followed by club pledge and prayer.

Mrs. Lee Hanson and Mrs. Anne Mabry gave instructions on making a set in pocket and shell button holes.

We elected Mrs. A. J. Beckmeyer as a delegate to the Short Course.

A demonstration on both single and double tufting was given by Mrs. A. J. Beckmeyer.

Twelve members and two visitors enjoyed the refreshments served by the hostess. Next meeting will be May 4 in the home of Mrs. Bernice Stuart.—Reporter.

WELCH HOME

DEMONSTRATION CLUB

The Welch home demonstration club

had the most delightful meeting in the home of Mrs. Fannie Martin Wednesday afternoon, April 17. There were fourteen present, one new member and one visitor.

The club answered the roll call with the name of an heirloom they have. Mrs. Meeks and Mrs. Griffin gave us an interesting and helpful talk on the lecture Mrs. Barnes gave them last Thursday. We feel sure we can select the clothes that become us better. Mrs. Preston gave a demonstration on how beautiful candlewick bedspreads can be made from feed sacks and brown domestic. Some of our club members are planning on going to Canyon, May 6.

The next meeting will be with Mrs. Rome Martin, May 5, and our county agent, Miss Phenix will be with us.—Reporter.

CENTRAL HOME

DEMONSTRATION CLUB

Color for the individual was demonstrated by Miss Phenix at the home of Mrs. L. A. Sasser, last Wednesday afternoon, April 21.

After trying different colors to different members of the club, they decided light shades and mixtures are easily worn, but avoid solid colors as very few people can wear black and white, the pure colors.

No designer can compete with old Mother Nature in harmonizing and blending color schemes. The great Designer, who wrought the patterns and planned the color scheme knew His stuff and has created a masterpiece of harmony. If the club members want to study style and the harmonizing of colors they only have to go out and take a tip from nature, and they will have the latest.

The club nominated Mrs. Tweed for our short course delegate. The club will meet again with Mrs. Sasser.—Reporter.

WILSON HOME

DEMONSTRATION CLUB

"If you have heavy, closely woven materials your tufting will not come out," said Miss Ruby Lewis to the Wilson home demonstration club members meeting at 2 p. m. Thursday, April 22, with Mrs. Lavern Johnston.

Miss Lewis gave a demonstration on making a tufted bedspread after the members had answered roll call by telling of a family heirloom. Mrs. J. C. Johnson has a silk handkerchief that belonged to her husband's uncle who

died in the California gold rush of 1849.

Ruby Lewis was a new member and Mrs. L. C. Spears was a visitor. The club will meet again on Thursday, May 6, 2 p. m. with Miss Ruby Lewis. Mrs. Fred Norris will give a demonstration on "Good Posture and How to Maintain It."—Reporter.

Miss Lorae Hill spent the week end visiting in Slaton.

Mr. and Mrs. Babe Simpson and daughter Katherine of Seagraves spent Sunday here visiting relatives.

Word has been received here that Miss Ethel Barron, who has been ill in a Lubbock hospital, is rapidly recovering and expected to return home in a few days.

M. C. Lindsey made a business trip to Hobbs, New Mexico, Monday.

LEONARD SCOTT NOW OPERATING TAILOR SHOP

According to Leonard Scott, owner of Scott's Tailor Shop, he is now in complete charge. The cleaning and pressing department has been operated for the past year by Mr. Chris Cotten who is no longer connected with the firm.

Miss Grace Katherine Roy of Lubbock spent the week end here with Miss Gertrude Day. Miss Day returned home with her to spend this week.

Mrs. E. G. Carr who has been in a local hospital for medical treatment was carried to her home Wednesday.

1937 Farm Program Questions and Answers

QUESTION: Are the acreages given to the producer when he signs his 1937 Work Sheet subject to change?

ANSWER: The acreages which are given to the producer to plant in various crops at the time he signs the 1937 Work Sheet are all based on the 1936 base acreages of feed and cotton. If any change is made in the measured acres on the farm, or if the community committee makes any adjustment in the base acreages of the farm after the Work Sheet is signed, then the acreages to be planted will be changed from those given the producer at the time of signing.

QUESTION: Is the final date for signing 1937 Work Sheets the same as first announced.

ANSWER: Yes, the final date is May 15th, 1937. The State Committee has refused to make any extension of time.

QUESTION: What information should a farm operator have in order that he may sign his work sheet?

ANSWER: He must be able to give an accurate figure on his cotton production on the farm in 1936. If he did not operate the farm in 1936 then the information must be had from the 1936 operator. He will also need to know how much feed was produced per acre on the farm in 1936.

QUESTION: Will it be possible to earn a payment in 1937 if a Work Sheet is not signed before the time limit?

ANSWER: Payment will not be made under any circumstance if a work sheet is not made out before May 15.

QUESTION: Is a producer obligated to carry out the cropping plans he gives when the Work Sheet is signed?

ANSWER: No, signing the work sheet does not obligate the producer in any way. It just makes him eligible for payment if he carries out his farming practices in such a way that he earns payment.

According to Mr. G. A. Cole, owner and operator of the Cole Theatre, Lamesa, the latest type of washed air system has been installed and is now in operation. Mr. Cole has just returned from Dallas where he made arrangements for some of the outstanding picture hits of the year. The best programs available will be presented at the Cole Theatre.

FISHING SEASON OPENS AT SWEETWATER LAKES MAY 1

Sweetwater, April 28.—With an unprecedented demand for fishing privileges at lakes Sweetwater and Trammel for the season opening Saturday city officials predict a new first day bass and crappie record at these two popular West Texas lakes. Licenses include boating and fishing privileges at both.

Sensing a new high in the number of visitors this year using the many and varied recreational facilities at Sweetwater, the Board of City Development set aside the week of April 26-May 2 as "Recreation Week" and Mayor L. M. Watson issued a proclamation making it official. Not only the fishing, boating, camping and picnicking assets of the lakes are being stressed but the many other facilities of the city are being featured.

LOCAL PEOPLE TO BROADCAST OVER RADIO STATION KBST

We have been asked to announce that Mr. and Mrs. W. W. Beaman and Mrs. Morris will probably broadcast over radio station KBST at Big Spring, Sunday afternoon, May 2, from 6 to 6:30 o'clock.

A varied program of instrumental music with vocal selections of sacred, popular and classical songs will be rendered.

WHAT TERPEZONE DOES

Ordinary colds are broken up in a few treatments. In Laryngitis, Bronchitis, Hay Fever, Asthma, Tonsillitis, Pharyngitis and Pneumonia the response is almost immediate. Terpezone by actual laboratory test kills tubercle bacilli, the tuberculosis germ. When breathed, it is brought into direct contact with the entire respiratory system. Terpezone is 50 percent more efficient than oxygen. It is a most effective treatment for respiratory diseases.

IN THE UNITED STATES DISTRICT
COURT IN AND FOR THE WESTERN
DISTRICT OF TEXAS WACO
DIVISION

J. M. Hubbard
vs.
Temple Trust
Company
No. 236
In Equity

NOTICE IS HEREBY GIVEN that
the undersigned has filed his applica-
tion with the Clerk of the United
States District Court in and for the
Western District of Texas, Waco Di-
vision, for an order authorizing him
to sell and convey to W. W. Griffith all
of Lots Nine (9), Ten (10), Eleven (11)
and Twelve (12) in Block Twenty, 20
of the original town of Lamesa, Daw-
son County, Texas, for a consideration
of \$10,000.00 all to be evidenced by one
note in said sum, to be executed by
said purchaser, payable to the order of
the undersigned at his office in the
city of Temple, Bell County, Texas,
and to become due and payable in 120
monthly installments of \$116.10 each
the first installment to become due and
payable on or before June 1, 1937, and
one each on or before the first day of
each succeeding 119 months, to bear
interest from date at the rate of seven
per cent per annum, the interest to
become due and payable monthly, and
each payment when made to be ap-
plied first to the accrued interest on
said note, and the balance to the prin-
cipal; to provide that failure to pay
any monthly installment of principal
and interest thereon when due shall at
the option of the holder mature said
note; to stipulate for ten per cent ad-
ditional as attorney's fees, and said
note to be secured by a vendor's lien
and deed of trust lien on the property
herein described.
Said application will be heard by the
Honorable Charles A. Boynton, Judge
of said Court, after this notice shall
have been published for a period of
ten days, and any person interested in
said Receivership Estate may contest
this application.
Witness my hand at Temple, Texas,
this 21 day of April A. D. 1937.

**American Legion To
Meet Monday Night**

Monday, May 3, is next regular meet-
ing night. The 7th grades of the Fair-
view and Weaver schools have agreed
to put us on some entertainment. A
play or something like that, with trim-
mings. Professor Franklyn Y. Martin
is getting this up and you can rest
assured it will be something to see.
Adjutant Martin, has a knock for that
sort of thing, he even writes his play
and then puts it on. His play "In A
Cotton Country" proved as popular as
any we ever saw. He was begged to
show that in various parts of the
country, but just did not have the
time. Come out and see this new one.
It's free. The place, Legion Hall.

It was voted last meeting not to
have any dances this year except July
4, which being Sunday will be held
July 3, November 11, and Christmas.
The officials are against making the
Legion Hall a dance hall.

The American Legion is making a
pilgrimage to France and Italy this
fall. Starting September 22 out of New
York and continuing until October 9,
the boys will be on their way. Any pas-
senger ship plying from New York to
Europe has reduced round trip fares
for this occasion. All world war vet-
erans and members of Auxiliary, and
their children can take this trip. You
can return next year and still get the
reduced rates. We quote the highest
rates: Queen Mary, 80,773 tons, departs
New York, Sept. 22, round trip cabin
class \$427.40, Tourist \$217.60, third class
\$153.20, port Cherbourg Sept. 27. The
lowest is the Laconia, 20,000 tons, de-
parts September 24, Cabin \$236, tour-
ist \$172.80, third class \$127.20. These
are 20 per cent less than the standard
rates. The first ten thousand arriving
in France get 6 days trip all free, in-
cluding hotel bills.
N. P. Cochran, Commander.

**ATTENDS MEETING OF LOAN
ASSOCIATIONS IN DALLAS**

O. H. Morris, secretary of the La-
mesa Federal Savings & Loan Associa-
tion returned recently from a joint
meeting of the State Building and Loan
League and Southwest Conference
group held at the Adolphus hotel in
Dallas.

There were many things of interest
brought to the attention of those in
attendance, among which was a state-
ment made by B. H. Wooten, president
of the Federal Home Loan Bank of
Little Rock. He pointed out that the
monthly reducing balance loan made
by the Federal Associations were proving
to be the most popular loans being
made today for the reason that there
is less red tape and expense to
secure this loan. Many loans have been
authorized by local Federal Savings &
Loan Associations within a few hours
and the purchaser or borrower knows
within a days time if his loan is going
to be approved.

Mr. Adams, president of the First
National Bank of Dallas, was called
into the first conference when the
system was set up to help outline a
home building loan, best suited to the
needs of the people of moderate means
and in his estimation any one desiring
to build or buy a home, could easily do
so with this plan of financing.

Many spoke on the subject of sav-
ings and investments in Federal Sav-
ings and Loan Associations and in their
opinion, was one of the very best in-
vestments afforded the public today.
There are many thousand school chil-
dren throughout the United States to-
day saving a part of their allowance
each week, investing in shares of fed-
eral savings and loan associations.
Thus teaching them thrift as they ac-
quire their education, which is a part
of their early training.

HIGHWAY BAPTIST CHURCH

(11 miles south on Highway 9)
Sunday school at ten a. m. We use
the Bible only, so bring your Bibles.
Classes for all ages. A real Bible study,
with mass drill and memory work.
Howard Moore, Superintendent.

Evangelist Jno. R. Denning preaches
every Sunday at eleven a. m. and 8:30
p. m. Young People's Choir and con-
gregational singing begins twenty min-
utes before each preaching service.
Mrs. Beachey Barron, pianist.

Special song service each Saturday
night at eight o'clock. Come and sing
with us.

A church where Christian Fellowship
prevails, the old-time Gospel is
preached, and a personal hand-shake
awaits every soul. Visitors from a dis-
tance will be invited to our homes for
dinner. Come, be with us next Sunday.

**JIMMIE BERT ADAMS
PASSES AWAY THURSDAY**

Jimmie Bert Adams, 18-month old
son of Mr. and Mrs. Bert Adams of
near O'Donnell passed away in a Lub-
bock hospital on last Thursday, April
22.

Funeral services were held on Fri-
day at 2 p. m. in O'Donnell, with Rev.
J. W. Braswell officiating. Burial was
made at that place.
Survivors are his parents and three
sisters, Virginia, Doris and Bobby June.

Mr. and Mrs. W. D. Arnett spent
Tuesday in Lubbock.
Mrs. Dave Campbell, who has been
visiting her son, Truman Campbell and
sister, Campbell, returned to her home at
Sulphur Springs Wednesday.

Curlee Clothes
An ideal suit for
Summer...

Building style, good looks and wearing quality into a lightweight,
comfortable Summer suit is one of the toughest jobs we know, but
it can be done. It's a matter of rare judgment in the selection of
materials, plus expert designing, plus fine tailoring.

Our new Curlee Summer Suits combine all those qualities to give our
customers the outstanding value of the summer season. We offer
these suits, knowing they will meet every demand that's made of
them in solid comfort and lasting style.

These Curlee Suits are tailored from a choice selection of lightweight,
pure wool fabrics—most desirable of all summer suit materials.
They're made in a range of models and sizes that gives you a wide
selection from which to choose. And they're so moderately priced
that you'll probably want more than one. Come in and select yours
today.

Baldwin's
"LAMESA'S LEADING STORE"

There's nothing like
GAS

Gas gives you the intense heat needed to brown
meats so fast that loss of juices is prevented. Full
flavor is saved.

Roasting
Gas gives you the oven ventilation which produces
crisp, juicy roasts. Excess moisture is allowed to
escape preventing that flat "steamed flavor."

Baking
Baking requires even heat throughout the oven and
unlimited range of baking temperatures. For light,
evenly browned cakes, pies, breads. Gas gives both.

Frying
Perfect, speedy frying requires instant high heat—
even spread of heat under the skillet—numberless
heat variations. Gas gives all three!

Boiling
Faster! Gas brings foods to a boil in two-thirds
the time or less of other fuels. More flexible, it gives
you the exact shades of heat you need.

GOOD GAS WITH DEPENDABLE SERVICE

ELEMENTARY SCHOOL NEWS

By the Pupils of the Seventh Grade

The grammar school boys have begun spring football training. The students in Mr. Kayser's room gave an interesting assembly program last Thursday morning. Mrs. Stuart and her seventh grade civics classes attended district court Monday. The arithmetic club in Miss Allen's room had a picnic Saturday night. Wright Grant Boyd entertained the Hobby Club with a party at his home Tuesday night. The English club in Room 33 gave an interesting program last Friday afternoon. The children in Mrs. McCall's room have been studying desert life. They have a clever exhibit of the work in the sand table in this room. The annual elementary school exhibit will be held Monday evening, May 3, at eight o'clock in the grammar school auditorium.

GRANDVIEW SCHOOL NEWS

Our school attended the athletic tournament at OK last Saturday and won first place. We were the only school represented that won two trophies. Sophie Jeffries won first place in

senior girls singles in tennis. Charletta Clark and May Jane Levacy took first place in girls senior doubles. Wesley Holt won second place in senior boys singles, losing to a player from Randle in the finals. James Phillips and Amos Newsome lost to the OK team in senior boys doubles. We are very much enthused over our success at the tournament. Mr. and Mrs. A. B. Clark were visitors in the OK community Sunday. Mr. and Mrs. L. A. Sharp and family of Lamesa spent Sunday with Mr. and Mrs. Jeff Loe. Mr. and Mrs. R. L. Nelson attended our Monday morning school program. We were glad to have them. We urge all the patrons to visit our school. Mr. Nelson is secretary of the school board. Floyd and Laton Oliver are ill with pneumonia. We are hoping their recovery will be speedy. The honor roll for last week in the primary room was Mary Dean Walls, Flora Nelson, Melvin Smith, Jack Rhyme, Billie Fortenberry, and Bubbles Loe. We hope to have more next time. We had several who missed only a few words during the week. We have started making our plans for a closing of school program. Every one in the room will take part.

R. N. Kayal is spending this week in Snyder transacting business.

PERSONALS

Mr. and Mrs. J. W. Minor and children visited relatives here Sunday. Douglas Hill of Muleshoe spent the week end here with Mrs. Hill. Mr. and Mrs. Durwin Echols and Mr. and Mrs. Boyd Echols accompanied Mrs. Drue Lockhart to Crane Sunday. Mrs. Lockhart had been visiting relatives and friends here for several days. Mr. and Mrs. R. E. Speck and children and Maxine Speck spent Sunday in Lubbock. Clyde and Lloyd Buckalew spent Sunday in Slaton. Guy Simpson and A. M. Bennett made a business trip to Hobbs and Eunice, N. M. Monday. Mr. and Mrs. Jim Waldrup and Mrs. J. T. Nichols spent Sunday in Ralls, visiting Mrs. E. G. Coker. Miss Thelma Wright has returned here from Lubbock to make her home and will be employed at the Albaugh lease office in the Dal Paso Hotel. Mr. and Mrs. M. R. Hall, Mr. and Mrs. Tracy Campbell and Mr. and Mrs. Herbert Dunn spent Sunday visiting in Merkel.

Miss Leva Cason is in Lubbock this week undergoing medical treatment. Mrs. J. H. Pierce is in Dallas this week buying merchandise for her store. Miss Opal McNew spent the week end with her parents at Patricia. Miss Mary Nance spent Sunday in Big Spring. Mrs. James Sumpter and children and Mrs. Dolly McKenzie spent the week end in Midland visiting Mr. and Mrs. Leonard Daugherty. Mrs. Ross McDonald is ill this week at her home. Mr. and Mrs. B. P. Maddox of Tahoka visited their daughter Mrs. Fayne Wilkes here Sunday. Mrs. Bob Lavender and daughter of Lubbock spent Sunday here visiting friends. Robert Maddox of Tahoka spent the week end here with his sister, Mrs. Fayne Wilkes. Mr. and Mrs. Sol Cleveland, Mrs. S. E. Cleveland, and Miss Willie Belle Cleveland visited relatives in Tulsa Sunday. Miss Olive Meadors visited her sister who is ill in Lubbock Sunday. Mrs. Waller Ayers and Mrs. C. P. Umphreys and Miss Imogene Umphreys visited in Lubbock Sunday.

Mr. Hubert Planiken of Morton visited Mrs. J. M. Barrett during the week end. Mr. and Mrs. Lee Hanson of Big Spring attended the wedding here Sunday of Miss Evelyn Burnside and Mr. Robert Koger, spending the remainder of the day with friends.

Miss Minnie Cope and Mrs. Billie Bogard spent Sunday in Lubbock.

BALANCE

One requisite of good health is balance, balance of the functions of internal organs. When all these synchronize a healthy body and a poised mind are developed. Sinus infection, acutely painful, disturbs this balance. A dubious "cure" could increase it and drive it deeper. But medical or surgical measures, undertaken by your physician, can clear it and restore your health to harmony and equilibrium.

REAL TESTIMONIAL

This is to certify that I was suffering with a very severe case of prostate gland and bladder trouble. I was passing at least one pint of blood daily. Went to a doctor and he couldn't offer me any thing but an operation. I went to Dr. S. E. Shultz, the Magnetic Masseuse, and after the third treatment I haven't passed any more blood and the pain is all gone and am feeling fine and working every day. If you are a sufferer don't fail to go to Dr. S. E. Shultz, 411 N. Main, Lamesa, Texas. I will answer any questions.

Yours very truly,

I. B. WALKER

201 N. 4th St.

SOCIETY

MISS EVELYN BURNSIDE BECOMES BRIDE OF MR. ROBERT C. KOGER

Miss Evelyn Secrest Burnside, daughter of Mr. and Mrs. Tom Burnside, became the bride of Mr. Robert Curtis Koger in an impressive ring ceremony performed on Sunday morning, April 26, at the First Presbyterian church. Rev. David Murray pastor of the church, officiated.

Preceding the ceremony Mrs. Kate Weaver sang "Because," and Mrs. S. M. Alexander of Abilene sang, "Oh Promise Me." Mrs. A. G. Barnard played the accompaniments and also the wedding march.

The bride entered on the arm of her father, and was attractively attired in a costume suit of beige crepe with cape trimmed in dyed fox and accessories of cornation blue. She carried sweet-heart roses and lilies of the valley.

Miss Vanabel Clark, maid of honor, wearing navy blue chiffon with yellow accessories, carried an arm bouquet of yellow snapdragons. The bridesmaids, Jack Hart, Edith Mae Collins, Ruth Lee Stuart and Roberta Lee Hanson of Big Spring, wore frocks of pastel hues and each carried a bouquet corresponding in color to her gown.

Arphice Spikes of Lubbock, roommate of the bridegroom when he was a student at Tech, served as best man. Charlie Still of Lubbock, Stanley Wilkes, Loyd Morgan, Herbert Rule of Lubbock served as his other attendants. Ushers were George Gable, Dick Collins, C. L. Schmidt, L. J. Duggar, Paul Morgan and Vernon Smith.

Mrs. Koger, a very popular member of Lamesa society, is a graduate from the local high school and has attended Texas Tech for the past two years, where she held membership in Sans Souci social club.

Mr. Koger, son of Mr. C. C. Koger, Dawson county ranchman, is also a graduate of the local schools, and did three years work at Tech. He held membership there in the Wranglers fraternity.

Immediately after the ceremony the couple left for a short wedding trip to El Paso and other points. They will make their home on the Koger ranch twelve miles south of Lamesa.

Out of town guests here for the wedding were:

Pat Secrest of Hamilton; Mrs. D. Burns, Francis Burns, Mrs. Edna Alexander, Mrs. Rupert Harkrider, Mrs. Henry Sayles, Mrs. J. L. McDavid, Bill Yeager, Mrs. Jim Alexander and son Sidney, all of Abilene; Mrs. A. O. Harvey of Temple; Mrs. Letcher King of Austin; Clark Secrest of Big Spring; Ruth Thompson, Plainview; Jane Wilson, Kay Donahue, Mary and Henri Sue Boone, Mary Ross Edwards, Ellen K. Clapp, Mary Katherine Agerton, Porter Parris, George Dale, George Zarafonitis, Chape Chappin, Lynn Bain, all of Lubbock; Mr. and Mrs. Lee Hanson, Big Spring; Mr. and Mrs. Walter Cox, Seminole; Mr. and Mrs. Mack Noble, O'Donnell.

Rehearsal Supper Given At Price Home

Members of the Burnside-Koger wedding party were given a rehearsal dinner at the N. H. Price home on Saturday evening. Hostesses being Mesdames Price, W. D. Arnett, Frank Rose and J. E. Garland.

The delicious supper was served buffet style.

Those attending were Misses Edith Mae Collins, Vanabel Clark, Jack Hart, Ruth Lee Stuart, Roberta Lee Hanson, Big Spring, Francis Burns of Abilene, Evelyn Burnside, Messrs Dick Collins, Vernon Smith, Lloyd Morgan, Stanley Wilkes, Robert Koger, George Gable, L. J. Duggar, Paul Morgan, C. L. Schmidt, Herbert Rule, Arphice Spikes and Charlie Still of Lubbock, Bill Yeager of Abilene, Mrs. Kate Weaver Rose, Mrs. S. M. Alexander of Abilene, Mr. and Mrs. A. G. Barnard, W. D. Arnett, Frank Rose, and Dr. N. H. Price.

Mrs. Martin and Barnard Honor Miss Burnside and Mr. Koger

Mesdames M. Q. Martin and A. G. Barnard entertained with an informal dance Saturday evening at the Martin home, honoring Miss Evelyn Burnside and Mr. Robert Koger and members of the wedding party.

Music was furnished by Mrs. Barnard at the piano.

Refreshments of sandwiches, cookies and punch were served throughout the evening.

Those attending were the honorees and Misses Edith Mae Collins, Vanabel Clark, Roberta Lee Hanson of Big Spring, Jack Hart, Francis Burns of Abilene, Ruth Lee Stuart, Martha Lou Martin, Messrs Dick Collins, George Gable, L. J. Duggar, Paul Morgan, Herbert Rule, Stanley Wilkes, Vernon Smith, Loyd Morgan, Charlie Still and Arvie Spikes of Lubbock, Bill Yeager of Abilene, Mr. and Mrs. Tom Burnside, Mrs. Letcher King, Austin, Mrs. Harkrider and Mrs. Alexander, Abilene, and Mrs. Barnard.

Mrs. Boyd Echols Honored with Shower

Honoring Mrs. Boyd Echols, whose home burned a few weeks ago, the ladies of the McCarty Missionary Society entertained with a miscellaneous shower on last Thursday afternoon at the P. E. Echols home in the McCarty community.

The honoree received many beautiful gifts. A refreshment plate of ice cream and cake was served at the conclusion of the afternoon to about 40 guests.

Judge Louis B. Reed, who underwent an operation for appendicitis last Wednesday night, is reported to be doing nicely.

Cris Cotten left Monday for a few days stay in Sherman.

Mr. and Mrs. Elmer Cope, Mrs. Earl Green and daughter spent Monday in Lubbock.

Entertains with Dance Last Wednesday

On last Wednesday evening, Mr. and Mrs. Tib Fox, assisted by Misses Gilberta and Virginia Cherry, entertained with a dance, honoring Miss Katherine Warren on her birthday.

Lightful music was enjoyed throughout the evening and at the conclusion iced punch and cookies were served to a number of friends, the honoree, host and hostesses.

Mrs. Sol Cleveland Honored With Shower

Complimenting Mrs. Sol Cleveland, recent bride, Mesdames Carl Cox, Audrey Cox, T. F. Vaughn, Viola Caldwell, Jap Baldwin, and Elwin Kutch entertained with a shower at the club house on Wednesday evening.

The club room was beautifully decorated with vases of varied colored spring flowers.

The program for the evening was Mrs. Weldon Lindsey singing, "Ah, Sweet Mystery of Life"; Miss Gladys Alsobrook gave a violin number, accompanied at the piano by Mrs. Carl Roundtree; a reading by Addie Ruth Fulkerson.

The honoree received many beautiful and useful gifts.

A delicious refreshment plate of ice cream and angel food squares were served to about 75 guests.

Mrs. E. A. Conley Hostess to Club

Members of the Wednesday afternoon Bridge club were entertained this week by Mrs. E. A. Conley at her home.

At the conclusion of the play, Mrs. E. A. Conley held high score and Mrs. Frank Rose was given the slam award.

A delicious salad course was served to Mesdames W. B. Collins, E. T. McCollum, J. L. Syper, Audrey Cox, N. H. Price, Loo Randals, A. N. Randle, A. L. Reagan, M. Q. Martin, J. H. Harp, T. F. Vaughn, and Frank Rose.

Pioneer Club Met With Mrs. Barfoot

Mrs. Walter Barfoot was hostess to members of the Pioneer Club Tuesday afternoon at her home on South Main street.

At the conclusion of the 84 games lovely refreshments of pear salad, snacks, pie and iced tea, were served to Mesdames D. S. Day, R. E. Simpson, W. V. P. Baker, Joe Barron, A. H. Gilham, Dixie Kilgore, and A. M. Bennett.

Mrs. Lex Brock has returned to her home from a local sanitarium where she recently underwent an operation for appendicitis.

Dr. and Mrs. Sableman of Hobbs visited Dr. and Mrs. Cutler here during the week end.

Out of Town Couple Marry at Local Church

The marriage of Miss LaVade Baze of Colorado, Texas, to Mr. Hayes Holman of Post was performed here last Saturday morning at the First Methodist church, Rev. M. M. Beavers officiated.

Music was furnished by Mrs. Murray McWhorter, organist of the church. Mrs. Holman is the daughter of Mr. and Mrs. John R. Baze of Colorado and is now a teacher in the Ralls public schools. Mr. Holman is superintendent of the Post public schools and was formerly principal of the junior high school in Colorado.

Out of town relatives and friends attending were Mr. and Mrs. Baze, parents of the bride, Miss Princess Martin of Lorraine, Mrs. Burnice Baze and Mrs. Inez Brown of Snyder, Miss Ruth Pirtle and Miss Katherine Royalty of Lubbock, Miss Double Cooper of Ralls, Mr. and Mrs. Jay Slaughter, Mr. and Mrs. C. G. Lewis, Mr. and Mrs. Jess Cearley of Post, and Mr. and Mrs. Riggs Sheppard of Courtney.

Ruby Allie Johnson Marries in California

Announcement has been made of the marriage of Miss Ruby Allie Johnson, daughter of Mr. and Mrs. Whit Johnson of this city, in Colton, California to Mr. Edie Towles Goodman.

Mr. Goodman's former home is in Madison County, Florida, but he is now employed by the Union Pacific at Colton, California.

RESETTLEMENT ADMINISTRATION LOANS DAWSON FARMERS \$28,672

The Resettlement Administration has loaned farmers in Dawson county a total of \$28,672.00 since January 1, 1937, according to S. P. Collins, County Supervisor, with offices in the court house. This figure does not include loans made after April 15.

Mr. Collins said loans in Dawson county were made to deserving farmers for various purposes, including the different farming operations, such as for the purchase of feed, seed, gas and oil, living expenses, purchase of livestock and necessary equipment, etc.

A few of the loans, he said, were made to include necessary repairs of a minor nature to buildings.

Another important phase of the Resettlement Administration's broad-gauged credit program, designed to rehabilitate drought-stricken farmers, is the loan policy which makes it possible for the farm women to improve their conditions in the home and provide an adequate diet for their families.

Mr. Collins said he is always glad to explain different phases of the Resettlement program to anyone who desires to visit the local office.

NEW CARS REGISTERED

New cars registered the past week at the Tax Collectors office were: S. W. Cleveland, Chevrolet coupe; Keisling-McBride, Chevrolet deluxe coupe; W. O. Ratliff, Chevrolet master town sedan; Everett Turner Ford V-8 Tudor, \$5 h.p.; A. A. Applin, GMC truck; J. E. Moore, Ford V-8 Tudor; Irvin Wright, Dodge pickup.

SERIES OF PARTIES GIVEN FOR MISS EVELYN BURNSIDE BEFORE WEDDING

Miss Burnside Given Bridge Breakfast Thursday

Complimenting Miss Evelyn Burnside, Mesdames Roscoe Holton, Elzie Burleson and Truman Campbell entertained on last Thursday morning with a bridge breakfast at the Holton home.

After the breakfast bridge was enjoyed with Miss Aileen Graham holding high score at the conclusion. As award she was given a Spode salad plate, which she presented to the honoree. Miss Burnside also received a Spode plate.

The guest list included Misses Vanabel Clark, Jack Hart, Mary Helen Abbott, Aileen Graham, Mesdames Elwin Kutch, Douglas Hill, Connelley Baldwin, C. E. Parks, Hugh Lott, R. E. Simpson Jr., Jim Little, J. E. Garland, Frank Rose, N. H. Price and the honoree.

Slumber Party and Breakfast Given

Misses Edith Mae Collins and Jack Hart entertained for Miss Burnside on last Friday evening with a slumber party and a breakfast on Saturday morning, entertaining in the Collins home.

Girls who attended the Friday night party were Misses Ruth Lee Stuart, Vanabel Clark, Roberta Lee Hanson, and the hostess.

Guests for the waffle breakfast Saturday morning included the slumber party guests and Messrs. Robert Koger, Lloyd Morgan, Stanley Wilkes, L. J. Duggar, C. L. Schmidt and Dick Collins.

Miss Diana Lynn Daughtery of Midland is here visiting her grandparents, Rev. and Mrs. J. W. Braswell.

The Hatchery Season Will Soon Be Over

ONLY 5 MORE WEEKS TO GET BARRON'S HIGH-LIVABILITY CHICKS

There will be at least 15% less chicks raised this season than last year in the United States. This will mean good egg prices this fall and all next year, also poultry meats will bring much better prices this fall. Mr. R. H. Switsler, vice-president and manager of the St. Louis Refrigerating & Cold Storage Co., says, "that it is almost a dear certainty that market prices on poultry meats next fall will be 5c to 8c higher than last fall."

So do not make the mistake of letting your flock run down, buy enough chicks to keep it up to normal. You say "feed is too high, I can't afford to raise them." It will only cost you 3c to 4c more to grow them up to fryer age than it did last year, and feed prices are likely to drop within the next 30 or 60 days.

**— Book your orders now! —
DON'T DELAY**

It will be necessary for you to book your orders one to three weeks in advance, that you may get the kinds of chicks you want when you want them. You take no chances on quality or livability when you buy from Barron.

DAWSON COUNTY COURIER

"WHERE TEXANS ARE TEXANS"

Volume 7

Lamesa, Dawson County, Texas, Thursday, April 29, 1937

Number 15

AROUND THE CAPITOL

by J. Doyle Settle

With only two weeks more left out of the 120 days of the regular session of the legislature, we find much of the major legislation proposed early in the session is being junked and a concentrated effort to get through the 'must' legislation such as the appropriations bills and the raising of some five millions of dollars in new taxes.

Major legislation junked the past week includes:

- Reliberating wide-open pensions.
- Sales tax to raise \$40,000,000 a year to pay universal pension to all over 65.
- Public utility regulation by the state.
- Numerous tax remission bills, including the State-wide Maturity bill to give the counties the final \$9,000,000 a year the state gets from property.
- Legislative redistricting.
- Liquor sale by drink.
- Numerous judicial reform measures.
- Classification of property for tax purposes.

Uncameral legislative plan.
Lieutenant Governor Walter Wood-
dell's \$5,000,000 Texas advertising amend-
ment that was rescued in the House
on an appeal by Governor Allred. This
bill will get a final vote, but does not
have much chance to get the necessary
100 vote necessary to send it to the
voters of the State.

Oil and Gas Leases and Assignments

Margaret W. Yates et al to Sun Oil Company, oil, gas and mineral lease, 320 acres, covering north-one-half of section 4, block C-41, P. S. L. survey in Dawson and Lynn counties, April 10.

J. G. Northrup to Humble Oil and Refining Company, assignment of oil and gas lease, the east 213 1/2 acres of land out of section 15, Block C-39, public school land in Dawson county, April 12.

CLEANING the SLATE

That's just what we mean to do during our first Anniversary Week. On May 1, 1936, we became your Ford Dealer. At that time we started without a single used car. Business has been far better than we expected it to be. We have sold more than twice the number of new Ford cars than we thought we would sell the first year. Our parts and accessory business has also far exceeded our expectations. Our shop is busy all the time. But with it all, we have accumulated a large stock of better used cars. These must go. Regardless of cost, we are determined to start our second year with another clean slate.

SO OUT THEY GO! ALL MODELS - ALL MAKES!

PRICES CUT TO THE BONE!

AND A SPECIAL GIFT BESIDES...

FREE GASOLINE!

In appreciation of the fine year we have enjoyed, we will give absolutely free with each used car net sale during our anniversary week, May 1 to 8, inclusive, the following amounts of gasoline:

With each used car selling from \$75 to \$100.00	25 gallons gas
With each used car selling from \$100.00 to \$200.00	50 gallons gas
With each used car selling from \$200 to \$300	75 gallons gas
With each used car selling above \$300 we will give absolutely free 100 gallons of gasoline.	

And Here Are A Few Specimen Bargains We Offer-----

1933 Chevrolet Master Four-door, complete motor overhaul just finished, new paint job, a clean, good looking job, during our Anniversary week only **\$225.00**

1934 Ford Pickup, good rubber, good motor, an excellent job for a milk route our Anniversary Week price **\$275.00**

1930 Chevrolet Coupe, good rubber, good motor, new paint job, an unusual buy, during our Anniversary Week Sale **\$120.00**

1929 Model A Ford Pickup, complete overhaul, a good running job, worth twice our Anniversary Sale price **\$115.00**

1930 Ford Tudor, clean, a bargain in line with our anniversary sale prices **\$127.50**

1928 Chevrolet

Coupe
Pickup

Good rubber, a dandy little car. Our Anniversary Sale price

\$35.00

1935 Ford Fordor Deluxe, including good radio, a car that has been well cared for, a first class job in every respect. Our Special Anniversary Week sale price **\$420.00**

1935 Ford Coupe, a good looking job, good rubber, a car you will be proud to own. Sales Week only, no trade in **\$290.00**

1928 Model A Ford Coach, new paint job, good motor, clean and O. K., Our Anniversary Week sale price only **\$90.00**

1930 Chevrolet Coach A dandy **\$80.00**

We have pickups, coupes, trucks, touring cars, and what have you, in practically all makes.

REGARDLESS OF YOUR USED CAR NEEDS, IT WILL PAY YOU WELL TO SEE US DURING OUR ANNIVERSARY WEEK SALE, MAY 1-8, Inclusive.

Not only will you get a good running car, but enough good gasoline to run it many miles.

WHAT WE SAY A CAR IS — IT IS!

PRESIDENT ROOSEVELT INVITED TO ATTEND WTCC CONVENTION MAY 10-11-12

Brownwood, April 13.—President Franklin D. Roosevelt has been invited to attend the West Texas Chamber of Commerce convention in Brownwood May 10, 11 and 12. The invitation was extended by D. A. Bandeen, WTCC manager.

The President will leave Washington about April 28 for a two weeks fishing trip on the Texas Gulf Coast between Corpus Christi and Brownsville. His vacation trip plans also include a visit to the home of his son, Franklin, in Fort Worth. WTCC officials hope his itinerary can be arranged to include a stop at the convention here.

Governor James V. Allred and Col. Ernest O. Thompson, member of the Texas Railroad Commission, already have accepted invitations to speak at the convention.

General plans for the convention are being pushed to completion under the direction of Gus Rosenberg, Brownwood business man, who is chairman

of the convention executive committee. Chester Harrison, secretary Brownwood Chamber of Commerce, and J. R. Rix, convention manager, and various local committee chairmen.

Convention visitors will be entertained Monday and Tuesday nights. May 10 and 11, with two outstanding shows, "West Texas Follies of 1937". Each town and city affiliated with the West Texas Chamber of Commerce has been asked to name a sponsor to take part in the show. The sponsor chosen as the most beautiful at the Monday night show will be crowned "Queen of West Texas" at the Tuesday night performance. Some of the most talented artists of the state will appear on the program, which will be directed by Dr. Melville Armstrong Brownwood.

Two general assemblies will be held during the convention, on Tuesday and Wednesday mornings. Four group conferences will be held. Subjects of two of these will be "Soil Conservation and Flood Prevention" which is the general theme of the convention, and "Oil and Gas Development in West Texas." Two luncheons will be held for WTCC directors and another luncheon will be held for newspapermen and Chamber of Commerce secretaries.

More interest is being shown in the Home Town Speaking Contest, this year than ever before, according to Rix. Twenty-five entries already have been received and at least 75 are expected.

The winner will receive the Thomas "Loving" cup. Other prizes include scholarships to several Texas colleges and several cash awards. Scholarships have been offered to Howard McMinery College, Abilene; J. D. Payne College, Brownwood; Texas Christian University, Fort Worth; and Abilene Christian College, Abilene.

Prizes of \$50 for first, \$25 for second and \$10 for third are offered in a band contest to be directed by D. D. McInroe, Brownwood, former member of Brownwood's famous Old Gray Mare Band. Fifty or more bands will take part in the contest.

Chambers of commerce will also take part in an achievement contest. An award will be given the chamber showing the best completed program for the past year. Another award will be given the organization submitting the best proposed program for the coming year. Sweetwater, Shamrock, and Kerrville already have filed entries and others are being received daily.

ALL CARS ON THE ROAD NEED MOTOR OIL CHANGE

Every motor vehicle that has been in operation during the winter months should have its engine oil drained, the crankcase should be flushed, and refilled with new oil of the proper grade for the spring season. Mr. O. H. Carlisle, Division Manager of the Gulf Oil Corporation has advised motorists.

"Engine oil in cars that have been running during the cold months is certain to be diluted and contaminated to the extent that its lubricating value is badly impaired, and in a good many engines this contamination has reached the point where damage to bearings, cylinders and pistons is likely to result if the oil is not changed," the Gulf official continued.

During winter months considerable water gets into engine oil and contaminates it. Over a gallon of water is produced in an auto engine with the burning of a gallon of gasoline, and during warm weather most of this water is evaporated through the exhaust in the form of vapor or steam. Moisture in the crankcase is condensed to water much more rapidly in cold weather.

"Motor oil is further diluted by the action of automatic chokes. With cold engines, automatic chokes may remain in operation throughout the period of a short run and permit too rich a mixture, or even raw gasoline, to get into the cylinders and thereby cause dilution of the motor oil."

Checkups of anti-freeze solutions, collection of dust and abrasives, and

SIGN UP NOW

It seems that sign-up in the soil conservation program is proceeding slowly. Many farmers say they will stay out and raise all cotton.

It seems to me that any farmer ought to know the same condition and low prices we had in 1930, 1932, will return if we don't keep the acreage down. If we pull out of this program we cannot run to our dear Uncle Sam crying, "Wolf, wolf," as we did in 1930, 1932 and expect this kind of old gent to start another plow up.

The AAA was the best thing we ever had for it took care of the fellow who wanted to raise more cotton at his neighbors expense. But the court said it was wrong, so we must do it voluntarily. Will we do it? We must cooperate or, as surely as the sun shines we will be selling 5c cotton in a short time.

And bear in mind, Mr. Farmer, if we drop out of this program Uncle Sam is going to let us be just as free as we want to be and manage our own affairs as far as he is concerned. And if you can figure out how we would have managed in 1930, 1932 without Uncle Sam's aid, it is more than I can do.

Think a little, Brother Farmer, and then go right to your committee and sign a work sheet and clear your conscience.—W. H. Lewis, Kaufman county, Texas in the Farmer-Stockman.

LAMESA PEOPLE ATTEND REUNION AT RULE

A family reunion of Mrs. J. W. Arnett and her children was held last Sunday, April 18, at Rule, in the home of her son, Mr. A. B. Arnett, whose birthday was honored at that time.

Mrs. Arnett had the pleasure of having all of her children present except one. It was quite a surprise to Mr. Arnett when all the guests arrived, as he had not thought of it being in his honor. The honoree was presented with an assortment of useful gifts for which he expressed his sincere thanks.

At the noon hour a delicious birthday dinner was served to about twenty-five people. Those present from Lamesa were Mrs. J. W. Arnett, Mr. and Mrs. Clyde Gibson and daughter, Clyde, Mr. and Mrs. D. E. Barrett, Mrs. B. J. Camp, Mesdames Gibson, Barrett and Camp being daughters of Mrs. J. W. Arnett. Mr. and Mrs. Eugene Barrett, Mr. and Mrs. Ernest Barrett and daughters Ernestine and Geraldine.

Those attending the District Conference of the Methodist Church held in Slaton Monday and Tuesday of this week were J. H. Pierce, Rev. M. M. Beavers, W. E. Roberts, W. T. Webb, Dr. J. C. Lovelass and Miss Willie Belle Cleveland.

the chemical change that constantly is taking place in motor oil in an engine in addition to water contamination, makes it very necessary that every car owner have his winter oil drained without delay." Mr. Carlisle concluded.

LEGAL NOTICES

IN THE UNITED STATES DISTRICT COURT IN AND FOR THE WESTERN DISTRICT OF TEXAS WACO DIVISION

J. M. HUBBERT vs. TEMPLE TRUST COMPANY

NOTICE IS HEREBY GIVEN that the undersigned has filed his application with the Clerk of the United States District Court in and for the Western District of Texas, Waco Division, for an order authorizing him to sell and convey to W. P. Averitt all the North 100 feet of Lot Six (6) in Block Forty-five (45) of the original town of Lamesa, Dawson County, Texas, together with all improvements thereon situated, and for a consideration of \$2250.00, and of which amount \$250.00 will be paid in cash, and the balance \$2000.00, to be evidenced by one note in said sum, to be executed by said purchaser, payable to the order of the undersigned at his office in the city of Temple, Bell County, Texas, and said note to become due and payable in 108 monthly installments of \$25.00 each, the first installment to become due and payable on or before May 1, 1937, and one each on or before the first day of each succeeding 107 months to bear interest from April 1, 1937, at the rate of seven per cent per annum, the interest to become due and payable monthly, and each payment when made to be applied first to the accrued interest on said note, and the balance to the principal, and to provide that failure to pay any monthly installment of principal and interest thereon when due shall at the option of the holder mature said note; to stipulate for ten per cent additional as attorney's fees and said note to be secured by a vendor's lien and deed of trust lien on the property and premises above described.

Said application will be heard by the Honorable Charles A. Boynton, Judge

The Farmall Tractor A Saga of Success

TRACTOR PIONEERED THE WAY FOR PROSPEROUS AND BUSINESS-LIKE FARMING

The romance of agricultural prosperity in the Southwest is closely allied with the startling development of the Farmall Tractor, distributed in Lamesa by E. R. Yates, whose firm is celebrating its fifteenth anniversary of endeavor in the Hardware and Farm Equipment business. This was the statement here today of F. J. Johnson, of International Harvester Company, in charge of sales for the southern Panhandle section.

The tractor pioneered the way for prosperous and businesslike farming, Johnson said, growing in efficiency with the advance of the nation and the prosperity of its farmers, until today the Farmall has become the representative tool of the thoughtful and analytic agriculturist.

The McCormick Binder Company sold its first tractor around 1900. Like all important ventures, this one began on a modest but firm foundation and it was a one cylinder gas combustion engine, barely able to move from one job of beltwork to the next, under its own power. No need to go into further details of the crudities of this tractor, for it would be a joke in our modern day. It's import is merely historical. From it sprang the present line of McCormick-Deering tractors.

The Mogul was then developed. It was a monster one cylinder affair, cumbersome and slow, uneconomical as compared to the present day tractors—inasmuch as a great quantity of fuel was required to move its own weight. Then too, America was at this time just becoming motor minded. Mechanics—good or bad—were few. Service facilities as we know them today did not exist. Mechanical implements were so new that when children saw an automobile they yelled at the driver: "Get a horse."

Then came the great World War of 1914 in Europe, with its enormous demand for supplies, particular food supplies. The vast wheatlands of the Russian Ukraine were cut off from warring Europe by the Turks at the Dardanelles. Europe turned to America. "Wheat" was the cry. "More Wheat." America had the additional acreage, but the additional horses to work this increased acreage were lacking. This was the beginning of the great wheat development on the North Plains of Texas.

From three to four years are required to develop a draft animal, so the answer to this shortage of power in the agricultural belt was mechanical power, and the International Harvester Company responded with the Titan.

When introduced the Titan was a greatly improved tractor. It was a horizontal two cylinder design. It still

(Continued on Back Page)

CELEBRATES 15th ANNIVERSARY OF OPENING OF E. R. YATES HARDWARE

E. R. YATES, owner of Yates Hardware, who are celebrating their fifteenth birthday, Saturday, May 1st. Mr. Yates purchased the Lamesa Hardware Company from the late W. S. Moore, May 1, 1922.

TWO E. R. YATES HARDWARE EMPLOYEES HAVE 15-YEAR RECORDS

Ralph Stuart and W. W. White were originally employed by the E. R. Yates Hardware when Mr. Yates first bought the store on May 1, 1922. Mr. Stuart was then an employee of the old Lamesa Hardware Company, whom Mr. Yates bought out.

However, Mr. Stuart has the greatest number of years service with Mr. Yates for he has been on the job continuously since 1922 while Mr. White left the employ of Mr. Yates in 1927 to return in 1935.

During his absence from Lamesa Mr. White operated farms and property he

owns in and near Roscoe, Texas. The long years of service these two men have given the Yates firm speaks high of their efficiency and character and at the same time speaks well of the fairness and consideration extended by Mr. Yates to his employees.

Fifteen years of continuous service is a record to boast of and Mr. Stuart is to be congratulated for his many years of loyalty. It is to be hoped that the next fifteen years will find them both rendering the same efficient, public pleasing service that they have given during the past fifteen years.

Saturday, May 1st. Fifteenth Anniversary

"Repairs in Stock" Valuable to Farmers

One of the features of the Farm Equipment Department at Yates' is the large stock of repair parts carried at all times for the McCormick-Deering Farmall Tractors and Implements used in this territory.

Only last winter was this department enlarged and remodeled to care for over double its previous stock. Machines which are seasonal, such as binders, planters and cultivators, have the largest stock of parts during their particular season, but almost any piece for any machine is on hand at all times regardless of season. Mr. Yates states this is the expensive way, but the only sure way of having the parts when they are needed. A recent stock check of the repair department showed over 17,000 parts for McCormick-Deering Farm Equipment on hand in Lamesa. This local stock is quickly supplied from the enormous stock carried by the International Branch House at Amarillo, from which telephone and telegraph orders can be filled over night. The factories and other branch house stocks supplement that at Amarillo.

It has been said that the Doctor and Pharmacist have no rest—their work calling them at all hours of the day and night. This holds true for the implement man during rush seasons for it is nothing unusual for night calls to be made to a Yates employee for parts to a machine that has rush work on hand, such as crop planting after a "duster." The Yates employees are glad this is an exception and not the rule. A goodly part of the Yates Repair Stock consists of remodeling unit packages or parts, which permit the user to improve his old model machine to a degree of efficiency and perfection of a later model. This type of service available on the McCormick-Deering line is highly valuable to the farmer by giving him a new model operating machine with only a part change and at a minimum cost.

The first and only exclusive Tractor Service Station on the South Plains is at Yates'. It is equipped with the latest in special tools and machines to efficiently and economically repair and recondition tractors and implements. This shop is manned by factory trained mechanics of long experience, trained to do the job they are required to do. These men are specialists in their work. The shop equipment is especially for tractors, thereby you can find the parts, the men who know how to use them with the tools to do the job right, all at Yates'.

Buys Lamesa Hardware Co. On May 1st, 1922

The history of the E. R. Yates Hardware is a story of the growth and success of this store along with the growth and development of Lamesa and its trade territory.

On May 1, 1922 Mr. Yates bought the Lamesa Hardware Company from the late W. S. Moore. The store was then located in a 25x80 building on the west side of the square, and had a ware house space of only about 1000 square feet, making a total floor space of nearly 3000 square feet.

An increasing business demanded more floor space and in 1926 Mr. Yates erected the building at his present location and moved into it. This is a

CAKE AND COFFEE SERVED FREE TO VISITORS

Cake and coffee will be served free to all visitors at Yates Hardware, Saturday, May 1, during their Fifteenth Birthday Celebration.

FREE PICTURE SHOW

"My Model Farm", a comedy featuring "Speed" Neasefoot and a thousand laughs. Other features will include "Romance of the Reaper" and other free sound movies and other entertainment. You can't afford to miss this big birthday celebration at Yates Hardware. Be on hand early and spend the day.

modern brick building on North First Street and contains a total of 8250 square feet of floor space. A warehouse containing 5000 square feet of floor space is located near the Santa Fe depot. This makes a total of 13,250 square feet of floor space and does not include the livestock pens in east Lamesa or the ground used for the storage of second hand plows and other farm equipment. Neither does it include the 1200 square feet of space rented in the Courier building as an Electroflux stock room.

With the above facts in mind it can be readily seen that while the growth of the Yates Hardware has been spectacular in its rapidity, it has been built on a solid foundation and with the ideals of quality, service and economy always uppermost.

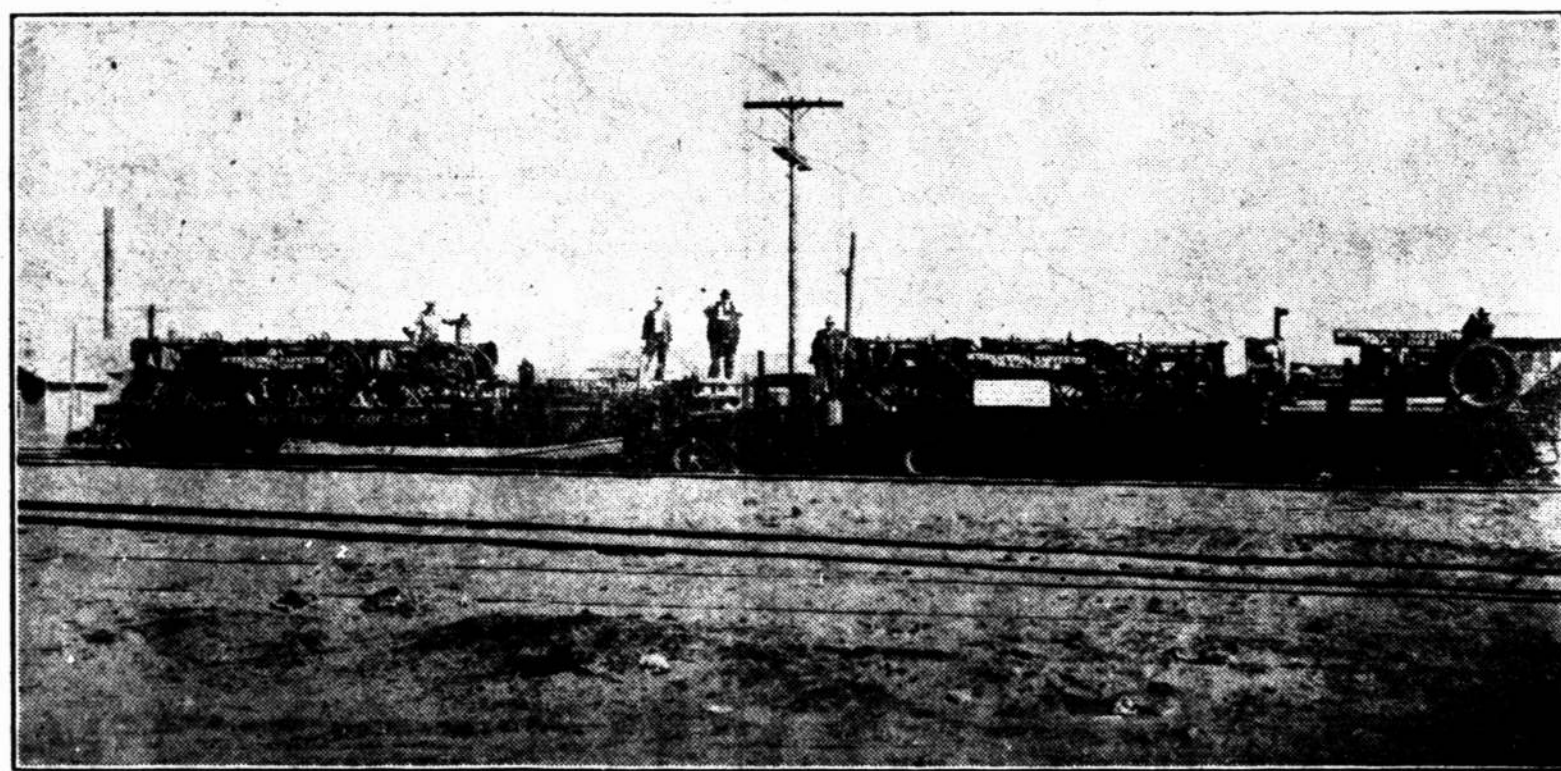

Many well-known, nationally prominent lines of merchandise are handled in Lamesa by the Yates firm. In addition to the McCormick-Deering farm equipment you will find in their Hardware department Perfection and Ivanhoe Oil Stoves and Ranges; Servel Electroflux Refrigerators, both gas and Kerosene; Aladdin Kerosene Mantle Lamps; Jumbo Harness and Leather Goods; Remington Guns and Ammunition; Coleman Gasoline Irons; Blue Grass, Crusader, Dasco, Diston tools, saws, wrenches and general hardware; Kelvinator Gas Ranges; Eleknap Bicycles; Salem Chinaware; Bauer Colored Ovenware; Pyrex, Enamelware and tinware. In addition to these a large stock of shelf and heavy general hardware consisting of bolts, supplies, rope, chain, and thousands of other items found in the general hardware stores, are carried in stock at all times by the Yates firm.

This store is also headquarters for American Cans, Automatic and Burpee Sealers, Automatic and National Canners and Canners.

One line handled at Yates Hardware which is a pet of all connected with the store is the large line of Case Cutlery—known far and wide as cutlery that will cut. In this line you will find about 50 patterns of pocket knives, butcher and kitchen knives of almost every shape and description, scissors, razors, hunting knives, and every item found in a good cutlery department. Mr. Yates has sold this line of cutlery for many years and is justly proud of the reputation the Case Cutlery has earned for itself.

Mr. Yates keeps in close contact with actual farm requirements by operating two farms of his own in south Dawson county, thus knowing by actual experience and knowledge the needs and demands of Dawson county farmers.

YATES HARDWARE RECEIVE TWO CAR LOADS OF FARMALL TRACTORS

The above picture appeared in the Dawson County Courier, Thursday, February 7, 1935. The following news item appeared in connection with the photo: "The above photograph shows the two car loads of F-12 Farmall Tractors received Friday by E. R. Yates, local Hardware and Farm Equipment dealer. This photo was taken just before the Yates force began unloading and getting the tractors ready for delivery to users in the Lamesa territory. According to Mr. Yates, many car loads of tractors have been received in Lamesa but this is the first time that two car loads have arrived the same day."

"We have unloaded as many as five car loads of Farmall Tractors and Equipment in one week since the record breaking day in 1935," Mr. Yates said.

Aladdin White Light A Thing of Beauty

To those of you who live in localities where it is necessary to use the old-fashioned open-flame kerosene lamp for artificial light, the fact that you can now light your home just as beautifully, just as decoratively, just as modernly as if it were lighted by electricity and still use kerosene should be welcome news indeed.

Strange as it may appear, kerosene burned in an Aladdin Mantle Lamp, is

transformed into the highest quality of modern white light, and it is accomplished so economically, so efficiently that your cost for fuel is but one-quarter the cost of what the old style lamp would consume, if it could be made to produce the same quantity of light. However, the quantity of light from the ordinary flat-wick kerosene lamp is about six candle power, and the Aladdin produces sixty candle power so it actually takes ten of these ordinary lamps to equal one Aladdin.

Aside from Aladdin's fuel economy it gives a light which is soft, white

and mellow, of just the right quality and strength to save and preserve eyesight, while the light from the old style lamp is weak, reddish-yellow in color and its use is disastrous to the delicate muscles and nerves of the eyes. Defective vision, impaired eyesight, headaches from eyestrain, are things unheard of in an Aladdin lighted home.

If you use the old-style kerosene light—make up your mind now to replace it with one of the several beautiful Aladdin lamps. It will fill your home with a light every single member of your family will enjoy for years. It will make sewing, reading, writing, or any evening pursuit a joy and pleasure. It will protect the eyes of all and make it easier, safer for children to study by.

E. R. Yates Hardware have a complete stock of Aladdin Mantle Lamps and supplies and will be more than pleased to show them to you.

What If We Have Five Cent Cotton?

Too many farmers who depend upon cotton to make their living are not taking the cotton situation seriously enough. They think that the other fellows will cooperate with the reduction program while they will stay out and plant all cotton. This they think will enable them to make a big profit at the other fellows expense. It has not occurred to them that there might be thousands of other farmers who are also "smart" and they may all have to sell their cotton at a price for which they cannot produce it profitably.

The farmer is often heard to make the statement that he has lost money through cooperation in the Government's farm programs, but he cannot tell anyone how much he lost, he can not tell what his operation costs are, he cannot tell what his profits were for any year, he does not know what it costs to produce cotton, so how does he know he lost money? He forgets that what he did not plant to cotton while in the program contributed to the increased price he received for cotton, he sold. He also forgets that he received a payment for the reduced acreage without having the expense of farming it. He has forgotten the prices he received for cotton in 1930-31 and 1932, he then had an example of what trying to produce more cotton could do for him.

Every farm operator should by all means sign up with the farm program then cooperate. After the closing it will be too late. What will he do if a hail storm gets his crops? What will he do if a drouth comes along, or boll worms? And above all things what will he do if we have five cent cotton?

F. L. Grissom, Chairman
County Committee

Completely Equipped to Service McCORMICK-DEERING TRACTORS

IT IS important that you get the right kind of service on your McCormick-Deering Tractor during its entire life. As an authorized McCormick-Deering dealer, we can give it the service it should have. We have the equipment to do every job the quickest, best, most economical way. We use only genuine IHC parts. Our charges are reasonable. Call on us whenever you need service of any kind.

THE NEW INTERNATIONAL TRUCK

International Harvester presents to users of trucks the latest and finest products of its automotive plants—trucks at the peak of today's efficiency with style and beauty that will please every owner and driver. Trucks that offer new standards of performance per dollar in upkeep and operation. The new International values—underneath the modern styling—are of great importance to the buyer of 1½ to 3-ton trucks for livestock hauling and other heavy trucking.

International's New Full Truck Line

Of special interest to truck users is the recent announcement that International Harvester has an entirely new line of motor trucks ranging in capacity from light delivery units to the largest sixwheeler. These new models include conventional four-wheel units, six-wheelers with both dual-drive and trailing axles, and cab-over-engine types. The complete International line consists of 26 models in 77 wheelbases with gross vehicle weights ranging from 4,400 to 62,000 pounds.

Powerful truck engines, numerous wheelbases, a variety of rear axle ratios, two-speed rear axles, and multiple speed transmissions, especially in the heavy-duty models, permit accurate selection from every standpoint of the right truck for each specific hauling task.

These new Internationals provide universally standardized (S. A. E.) cab-to-rear-axle dimensions so vitally necessary to body interchangeability, and they also permit mounting of standard length bodies of stock sizes. Front axles are set back, and this, together with the relocation of rear axles and cabs, contributes to greatly improved load distribution, not only of body and payload but of gross weight as well. Thus loads on front and rear tires are more uniform, relieving the usually overloaded rear tires by transferring a greater portion of the load to the front tires.

Wheelbases, in conjunction with cor-

rect cab-to-rear-axle dimensions, are available to accommodate all lengths of bodies, with the ideal conditions resulting from the use of bodies in even foot lengths. At the same time, bodies factory mounting and load distribution in odd foot lengths will permit satisfaction on either the next shorter or longer wheelbase.

International Truck A Style Leader

Simplicity and good taste are the keynotes of the sweeping streamlined styling of the new International motor trucks. In each line and curve dignity and beauty have been carefully preserved, which means that the new models will be attractive to owners and observers as long as they remain in service.

Elements of the new and distinctive styling include long, parallel louvers sweeping in almost continuous lines around hood sides and grille, accentuated by a beautiful well-spaced trim. There is the attractively rounded grille which contributes to the sturdy, all-truck appearance, which has always been a distinctive International asset; fenders with gracefully curving skirts and creased crowns; also a sloping V-type, one-piece windshield which gives good visibility and adds to attractive appearance. Hardware, inside and out, and the well-designed instrument panel are pleasing to the eye.

Standard bodies have been designed to harmonize with the lines of the hood, fenders and grille. Sides of the

bodies are skirted to the level of the short running boards. Rear fenders, too, are of attractive, rounded and skirted type.

In the light-duty and panel bodies, pressed-in moldings take the place of what might have been visible seams. The result is a smooth, decorative surface. Large, one-piece stampings take the place of what might have been many pieces welded together. The exercise of care in designing has in that way provided definite attractiveness together with more rigid construction, which is so conducive to long life and quiet operation.

The curvature of windows and window reveals is in strict keeping with the style motif.

Interiors of cabs and panel bodies, as well as the exteriors, have been designed for appearance in addition to comfort and utility. Beauty, as well as passenger-car comfort and maximum utility, has now found its rightful place in modern truck transportation.

In each model of the complete line International Harvester style engineers have succeeded in their efforts to integrate distinctive appearance with advanced performance and economy features. Therein lies the trend which International stylists have expressed effectively through adherence to simplicity, dignity, and good taste.

The Tractor That Has Proven Itself

That there are in the neighborhood of 300,000 farmalls in the three sizes on farms means something to every man who is considering the purchase of a farm tractor. These tractors are anywhere from less than one to ten years old, and there are ten-year-old Farmalls still going strong.

In purchasing a tractor, the question of size naturally arises. If the tractor is larger than the operations warrant operating costs will be higher than they need be. If the tractor is too small, the owner is likely to habitually overload it, and that means undue wear. The Farmall that fits the job will peg right along for many useful years of satisfactory and economical service. That's why there are three Farmalls—so that one can select the one that exactly fits his power and crop requirements. Remember that when you choose a Farmall you choose a tractor for which there is available a full line of direct-connected machines, worked out by Farmall engineers with more than a ten-year start in the designing of machines of this type.

West Texas Gas Co.

EXTENDS CONGRATULATIONS TO

AMARILLO, TEXAS

International Harvester's Easy Payment Plan

The founders of the International Harvester Company, realizing that it was impossible for many thousands of good farmers to pay cash for their farm implements, pioneered the policy of extending credit where necessary. The result being that thousands upon

thousands have enjoyed the benefits of improved machinery, that would otherwise have been impossible. The machines have literally paid for themselves in time and money saved.

About three years ago the Harvester Company decided their sales were not being made in accordance with the farmer's income and on dates such income was available. They at once informed their entire organization that henceforth, all sales made on a time

basis must be made in keeping with the customer's income. In other words instead of telling the customer he must pay on October 1st, or on a date when he did not have the income, that it would be proper for the customer to tell the dealer on what dates he could pay and have the income.

In the case of a cotton farmer, approximately one third of his income would likely be available in the month of October, two-thirds during November—that ordinarily being the best month, and the one most favorable for gathering the crop—then the remainder during December, or possibly some in January and February, if the customer has some sorghums or other feed stuff to market. Frequently small payments are without question more easily paid than one large amount. Automobiles, radios, refrigerators, stoves and many thousands of other items in use today on farms are practically all sold on the monthly basis, and are paid for from various monthly incomes, such as butter, milk, eggs, livestock, etc. Farm implements can be purchased the same way now.

Twenty-five to \$30 per month will pay the deferred balance on a tractor. They took their invention to the Swedish Electrolux Company, which initiated a world-wide industrial development of their discovery. American rights were acquired by Servel Inc. of Evansville, Indiana—a firm which at that time had been long connected with refrigeration of all types. The original system has been developed and incorporates many additional inventions resulting from unceasing research in various laboratories throughout the world, including the laboratory of Servel Inc. at Evansville, which is manned by some of the world's most able scholars and technicians.

This remarkable refrigerator has been awarded prizes at numerous exhibitions both in America and abroad. It has the endorsements of such well known authorities on appliances as Good Housekeeping Institute and the Underwriter's Laboratories.

It is today that we find Electrolux Refrigerators in the home of Millions of satisfied users and in the field of Apartment House management it exceeds by far any other type of refrigerator. This is significant because Apartment managers require appliances to have user appeal and satisfaction together with long life and lowest operating and maintenance costs.

The youth of our modern world has given us the world's most popular means of food preservation at the lowest operating cost ever known, for to-

day Servel Electrolux Refrigerators are not only the finest the world knows of but also the most popular.

The result of these two experimenting youths has been the chief factor in the construction of a 33-acre factory in the city of Evansville, Indiana, where approximately 7000 men and women work the year round to build for the consuming public—Electrolux Refrigerators. It is from this factory that the many orders transmitted by telephone, telegraph, and mail are filled. The dealer organization is ever increasing in numbers but old dealers with less territory are having far more sales than at any other time.

It all ends with this—those youthful students discovered that heat applied at one point would make ice at another point of their apparatus, but they or no one else ever expected this discovery to change one of the most demanding requirements of mankind—but as any observer of the refrigeration industry will attest, the change is here and is spreading more rapidly each day—increasing each day the Triumph of these two young students, not only in the scientific world, but economic and domestic as well.

International stresses the point of paying cash when you can—the saving is much greater—if not all cash the largest amount you can; the more you pay down, the more you save. When not in a position to pay cash.

take advantage of the finance plan: it is lower and more favorable now than ever before. You can if you wish, make payment of the deferred balance at any time before it is due, and receive a refund of the unearned interest.

Servel Electrolux - A Triumph of Youth

Today's finest and most popular household refrigerator is truly a Tri-

umph of Youth, for the Servel Electrolux Refrigerator originated as a result of an invention by two young under-graduate students of the Royal Institute of Technology, by name Carl G. Munters and Baltzar von Platen.

Coffee, cake, free moving pictures at E. R. Yates Hardware, Saturday, May 1.

CONGRATULATIONS

SILENT..

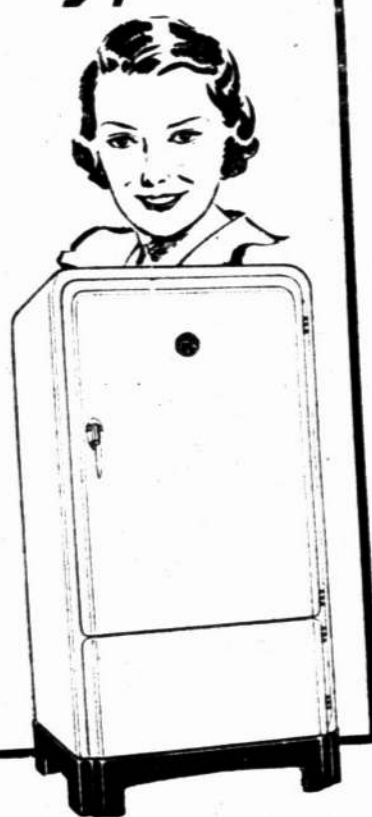

as nature's own freezing method

SERVEL ELECTROLUX has no moving parts

This means . . .

- PERMANENT SILENCE
- NO MOVING PARTS TO WEAR
- CONTINUED LOW OPERATING COST
- SAVINGS THAT PAY FOR IT

... as well as
Fullest Food Protection
Modern Convenience
Extra Roominess
Streamlined Beauty
Greater Ice Cube Capacity

You enjoy continued savings with the GAS refrigerator!

Nature has nothing on a Servel Electrolux in the silence of its freezing method—nor in its simplicity, either! A tiny gas flame takes the place of all moving, wearing parts in this different, noise-free refrigerator. As a result, you enjoy longer, more satisfying service—worth-while savings on running cost, food bills and upkeep year after year. Be sure to see the beautiful thrifty new models for yourself. Come in!

"Speck" a Ten-Year Employee at Yates'

To think of anything connected with Yates Hardware without thinking of "Speck" the name commonly given Mr. O. C. Speck, long time salesman and service man of the Yates Hardware, would seem almost impossible.

Starting to work for Mr. Yates ten years ago with the new power farming era of agriculture, Mr. Speck has been closely connected with the use of tractors for farm power on the South Plains. He has long been recognized by farmers and factory men as being a man of sound judgement and knowledge as concerns farm machinery and equipment. Many farmers have relied on his knowledge of farm machines and farm power in settling their many problems. It is hoped that Mr. Speck will remain in the Yates organization for many more years.

Three Qualities Feature 'Perfections'

To the three outstanding qualities—dependability—economy and convenience—which have always distinguished Perfection "High-Power" Ranges, has been added this year an entirely new beauty of line and color. The entire line has been restyled along sound modern lines, straight, sturdy and dignified—the sort of style that will be up-to-date for a long, long time, and will always please the eye.

Every part of a Perfection "High-Power" Range is designed to afford the utmost convenience. The "Live-Heat" oven is at a workable elbow height, no bending or stooping; all parts are readily accessible for cleaning or adjustment; and the handy fuel reservoir can be easily refilled without interrupting the stove's operation.

In keeping with the modern idea of kitchen attractiveness, these stoves are clean in operation and are easily kept spotless. Year after year Perfection will continue to bring a feeling of genuine personal satisfaction in appearance at performance.

The E. R. Yates Hardware has a complete line of Perfection ranges on display at their store and cordially invite you to come in and inspect them.

The Harvester Idea of Service

The idea underlying all that the Harvester Company does and attempts is that of Service.

That is necessarily the basic theory of all manufacturing and selling of machines of utility. When you see a man a coat, a bolt of cloth, or a bill of groceries, delivery and payment close

the transaction; when you sell him a machine which enables him to earn his living, delivery is only the beginning of the relation between buyer and seller. The purchaser looks, and has the right to look, to the maker and seller of the machine for a continuous service while the machine is in use—for the prompt furnishing of repair parts in case of breakage and wear that will keep the machine running when he needs it; for expert instruc-

tion and assistance, ready at all times and in all places to show him how it may be most efficiently employed.

"But the Harvester idea of service is broader and deeper than that. It holds that the maker and seller of the agricultural machines which are essential to human existence and progress, must constantly keep ahead of the farmer in the development of the science of agriculture as well as of its mechanical agencies; he must assume and meet

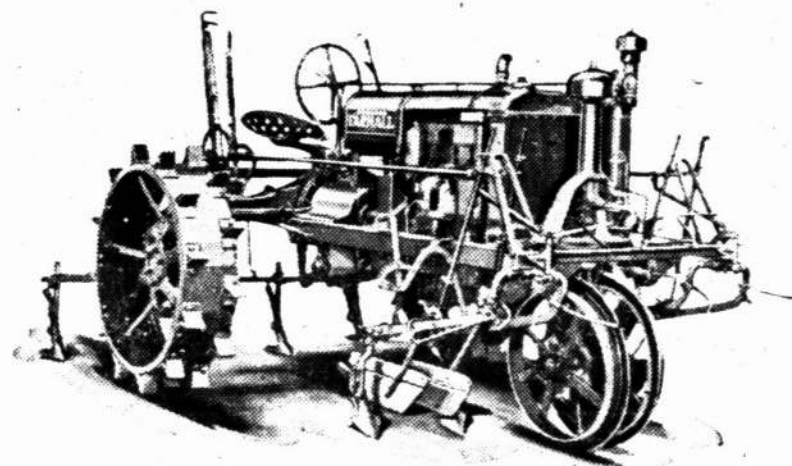

a responsibility even beyond the fulfillment of his unwritten contract to have machines, parts, and expert service ready whenever and wherever they are needed; he must be an unfailing source of accurate information and wise counsel in all that pertains to the industry; he must stand to the farmer in a relation much more helpful and intimate than that of mere bargain and sale."

1936 MODEL McCORMICK-DEERING COTTON PICKER

Front view of a 1936 model McCormick-Deering Farmall cotton picker with cleaner, on Hopson Plantation, Clarksdale, Mississippi. The machine is of the spindle type.

**Harvester Engineer
Works 30 Years on
Cotton Picker**

There has been considerable talk in recent years about a new agricultural revolution that may soon ensue in the South because of the development of a successful mechanical cotton picker. Every now and then since way before the World War, the possibilities of such a revolution have been discussed.

But in this latest wave of discussion about such a revolution, there is a tinge of fear. What is to become of the millions of negroes and poor whites whose meager livelihood is based on the production of cotton and especially the big job of picking this important money crop? What are to be the social consequences? Will its wide adoption bring about a new migration with all the upsets and sorrows and tribulations that go with uprooting a large group of people from one section and forcing them to seek homes and a means of living in a new and unfamiliar region where they may be unwelcome?

In the International Harvester, or-

ganization at Chicago there is a well-known agricultural engineer, who deprecates this fear talk. And his reassuring voice should bear much weight because he has worked on the design of one cotton picker after another for more than thirty years and has also made a very careful study of the work done by others in developing mechanical cotton pickers. He is without a doubt the best informed man in the country on all the phases of cotton picker design and especially on all the vicissitudes that have been encountered and are still to be encountered in developing a practical cotton-harvesting machine.

The man is E. A. Johnston, vice-president in charge of engineering. As Mr. Johnston puts it: "There are many extremely complex problems in the development of a successful mechanical cotton picker which should gather a high percentage of cotton from the stalks, reduce ground losses to a minimum, gather a minimum amount of leaves and trash with the cotton, avoid damage to immature bolls during early pickings, and produce a sample that will grade favorably with hand-picked cotton."

"Picking cotton by hand is hard, back-breaking work and it is reasonable to assume that the demand for mechanical pickers will be stimulated by scarcity of hand pickers and the necessity for reducing the cost of production; but I cannot emphasize too strongly my belief that this demand will continue long before mechanical pickers are available in sufficient numbers to seriously affect the labor situation in cotton-growing areas."

**Electrolux Retail
Sales Increasing**

Proof that the sale of Servel Electrolux Refrigerators is gaining momentum every day is revealed in the fact that new retail stores are being opened during the present time in several cities where Electrolux sales companies were already established.

For example the Generator Service Co. of Fort Worth recently opened their third Fort Worth store for the retailing of Electrolux in order to better care for the demands of the refrigerator buying public.

The Graessinger-Kendall Co. of Dal-

las opened their third store in Dallas the past week, as was a third retail outlet established in Abilene in the Wooten Hotel Building.

The E. R. Yates Hardware, Electro-lux distributors in this territory recently received a full carload of Servel Electrolux, and claim that if sales continue as good as they have been during the past few weeks, will have to make

another carload order within the very near future.

MULLINS 4-H CLUB

The Mullins 4-H Club met April 14 at the Mullins school. Mrs. Riddle, the sponsor met with the girls and discussed the making of bath towels and mats. Each club girl is getting along fine with their gardens.

There will be a pie supper at the Mullins school house Friday night, April 23. Everyone is invited to come. The money will go to the girls 4-H club.—Reporter.

Congratulations

TO OUR GOOD FRIEND AND CUSTOMER —

MR. E. R. YATES

Upon his 15TH ANNIVERSARY in the hardware and implement business in Lamesa.

It is with a deep feeling of pride that we have been privileged to serve you all these years.

May the future hold for you the full measure of success to which you are so justly entitled, is our sincere wish.

**Amarillo Hardware
COMPANY**

History of Texas And Harvester Co. Parallel Closely

The history of Texas and of the Harvester organization parallel each other quite closely. The McCormick reaper was invented four years and nine months before General Sam Houston's strategic victory at San Jacinto. From the San Jacinto battlefield sprang Texas independence—which made possible Texas' annexation to the United States nine years later—and eventually after the war of 1848, resulted in the addition of a large part of the Rocky Mountain and Pacific coast area to the United States. From the wheat field in Virginia where the reaper was first tested, or, more properly, from the Virginia forge shop where the reaper was built, sprang the basic principles of how a grain-cutting machine should be designed—knowledge which made possible the successful and rapid development of Texas and the West.

Large scale manufacture of the McCormick reaper started in Chicago the year before the war of 1848. At this time the population of Texas was less than one person to the square mile. If steers of those days started Texas on its way, it may be said that the Longhorn path of progress, it is likewise true that the McCormick reaper quickened the pace—eventually turning the path of progress into a broad highway. A review of America's social and economic development of the past century quickly reveals this fact.

Suppose this were the year 1837 and you were living on a farm or ranch, as four out of five people in the United States were at that time. Tomorrow morning, after a night spent on a straw bed, you would get up at dawn, or before, pull on moccasins and homespun clothes, start a crude fire with whatever Nature offers in the way of fuel, and begin a day of dreary routine, the like of which few of us know anything about today. Besides the ordinary housework of 1837 the routine of the women of the household would include weaving cloth and tailoring it into clothes, churning butter, dipping candles, acting as doctor, nurse and teacher, and helping with the farm or ranch work in cases of emergency—which were too frequent.

On that day there were no telephones, telegraph, radios or cables. No lights, sewing machines, ice machines, motorization, safety razors, or mod-

ern plumbing. No steel plows or barbed wire fences. No gasoline, automobiles, or vulcanized rubber. No steam hammers, pile drivers, riveting machines, I-beams, steel castings made to pattern, case-hardening, electric welding, revolvers, cartridges, or dynamite. No steel pens, typewriters, carbon paper, shorthand, adding machines, photographs, or movies. No X-ray, anaesthetics, or dental bridge work.

The list could be prolonged. The point of importance is that even if these commonplaces of today had been available a century ago, there would have been very little market for them.

America, like Texas, in 1837 was at the crossroads. It was favored with millions of undeveloped fertile acres, unlimited natural resources, a variety of climates, and a hardy stock of pioneers whose free government suited their bold ambitions. Yet their pent-up hopes were chained to the soil. They needed a quicker, easier method of harvesting wheat, their main food requirement. Before the invention of the reaper the most wheat a man could cut in a day with a cradle, the most was about two acres. And wheat then, efficient harvesting equipment known as now, had to be cut when it was ready to be cut—in a few weeks time at the most. The size of farms accordingly were severely limited.

The McCormick reaper of 1831 could cut only 8 or 10 acres a day, but it quintupled the acreage a man could harvest—and enabled horsepower to relieve human muscles. Today, the harvester-thresher, or "combine," direct descendant of the McCormick reaper, cuts, threshes and cleans the grain from 40 to 50 acres a day—two men doing what would have required 160 to 200 men before 1831.

With quicker harvesting came larger farms. Larger acreage brought improvements in plowing, harrowing, and planting. The combination of these machines released men from farm labor to work in other industries. With more mouths to be fed in the cities came a need for greater production per farm—of both grain and meat. As the country-to-city trend increased, there came a procession of implements for all farm work.

The city people had to be fed and the farmers fed them—and received money for their labor that enabled them to buy the products of industry. This created a commerce that brought the railroads, banks, exchanges, and retail and wholesale trading that today supports two-thirds of the nation and keeps all the nation housed, heated, clothed and fed.

The United States could not have developed without the steamboat, the

railroad, and the telegraph. It still would be largely a land of promise rather than fulfillment if it had not been for the genius of Whitney, Henry, Howe, Morse, Goodyear, Edison, and a host of other inventors who have emolozoned the path of modern civilization. Most of their efforts, however, would have borne little fruit had it not been for the release of men's thoughts, time and labor through the medium of the reaper. In many instances the hopes and ambitions of the inventors themselves would not have been realized had it been necessary for them to spend most of their waking hours in back-breaking hand labor. And even if they had been able to perfect their inventions, little could have been accomplished in the way of manufacture and distribution if it had remained necessary for four out of five people to live on farms.

Viewed in retrospect, the past century demonstrates that progress depends, in large degree, upon a release from drudgery and routine tasks that require little mental activity. The people of 1831 needed an easier method of harvesting their main food requirement. When this was provided, greater progress resulted in a few years than previously had been possible in many centuries. Railroads were necessary to market wheat cheaply, iron was necessary for building reapers and railroads, cheaper paper and printing for the spread of information and education, the telegraph to expedite exchange, and the other labor savers to give people necessary leisure. All were dependent upon one another. The startling thing is that the vast majority of them followed the others so closely after McCormick perfected the reaper. The world waited centuries for the progress of events that started with that memorial invention in 1831.

Mixmaster, the Best Food Mixer Made

One of the many household items that the E. R. Yates Hardware carries in stock is the Sunbeam Automatic Mixmaster, the best food mixer made.

The new Mixmaster is a powerful portable mixer that operates on a range of ten speeds. It has more power, new, lovely, streamlined beauty, easier handling, has wider usefulness, and lasting service.

The Mixmaster automatically maintains the speed you set it no matter how much the batter thickens or is made heavier with additional ingredients. There is only one Mixmaster—the sturdy, powerful Sunbeam Automatic Mixmaster.

horses, to aid in plowing and for belt work. This limited performance rendered them uneconomical in the majority of instances, as no reduction was possible in the number of horses required for planting and cultivating.

During these ten years a number of companies made attempts to produce a cultivating tractor. Some were put in use, but none were entirely successful and they soon faded from the scene. The Harvester company began designing and developing an all purpose tractor in 1916. Implements that could be used successfully with an all purpose tractor were also in process of development. In 1922 seventeen of those tractors were approved by the management of the International Harvester Company. This was the turning point in agriculture and tractor history.

It was this new Farmall Tractor that has revolutionized the agricultural industry, removed much of the drudgery and has brought American farming to a higher level. Here at last was the correct design, the sturdy International engines could now be mounted on a chassis that could till, plant, or cultivate every type of crop from the start to the finish and from coast to coast, and from the Arctic to the Antarctic. Let us look at the record:

17 Farmalls were built in 1922.
43 Farmalls were built in 1923.
248 Farmalls were built in 1924.
1,188 Farmalls were built in 1925.
5,600 Farmalls were built in 1926.
15,000 Farmalls were built in 1927.
40,017 Farmalls were built in 1928.
75,000 Farmalls were built in 1929.
117,000 Farmalls were built in 1930.

Other facts of the record are that some of the 1923 model Farmalls are still in use today. It was a general prediction and opinion of other tractor builders that the Harvester Company was foolish to build a row-crop machine and this idea prevailed during the years 1922 to around 1927 and 1928. After which time these competitors began to design and produce an all-purpose tractor.

Now today there are over 300,000 Farmalls in use. So successful was the first Farmall that the basic design has never been changed. Not only has it never been changed, it has been copied universally. Let us pause for a moment and review the phenomenal success of the Farmall. The economical, sturdy motor—the outstanding chassis design—the ingenious and highest quality implements to be attached to the tractor are all contributing factors. But no doubt one of the most important factors was the International Harvester Company's Dealers.

For without dealers like E. R. Yates, who early in the 'twenties stocked and demonstrated the Farmall, who stocked and carried on hand huge stocks of supplies and repair year in and year out—available at all times when a tractor needed them, and who spent thousands of dollars for shop and shop equipment—and in the training of men in the proper manner and methods to service and recondition tractors; we say that without such men tractor farming could never have been completely successful.

Mr. Yates is this week celebrating his 15th Anniversary as McCormick-Deering dealer in Lamesa. We, of International Harvester extend our con-

gratulations to the trade territory of Lamesa on its possession of a pioneer firm so capable and so well equipped to benefit it. We sincerely wish that our pleasant and successful business relations may continue with Mr. Yates and his employees for many more years. The highest compliment we can think to offer is that E. R. Yates is as soundly reliable and honest as the Farmall Tractor he pioneered and has sold these many years.

(Continued from Front Page)

PERSONNEL

Farmall and farm equipment department. Mr. Stuart is employed in general sales and Electrolux installation, while Mr. White is employed in the repair department and sales. Other employees of the firm are Mr.

Geo. McNew, head of the Tractor Service Station; Mr. Buster Davis of the Service Station; Mr. Leroy Griffin, delivery and shop assistant; R. A. Stuart Jr., service station apprentice in connection with the diversified occupations department of the local high school; Mr. Mike Garvin, salesman; and Mrs. Lorena Thigpen, head bookkeeper and head of the chinaware and kitchenware sales department.

Last but not least among the employees of the store is Mr. E. J. Yates, son of the owner. Eugene has a multitude of duties, among them being advertising, sales, much of the buying and according to him is the chief bureau of information in regards to the different phases of the store.

Attend the Yates birthday party May 1.

Our Service Department Is Headquarters for EXPERT

MAGNETO SERVICE

WE have a good stock of Genuine IHC Magneto Points and Parts and special tools that enable us to do expert work quickly and at low cost. No one else in town is as well equipped as we are to take good care of the Magneto on McCormick-Deering and International Tractors and McCormick-Deering Engines.

The magneto used on an engine is the "heart" of the power plant. On its perfect functioning depends much of the efficiency of your engine. Don't risk damage to this important equipment by entrusting its service to someone who is poorly equipped or who may use "will-fit" parts.

When the magneto on your McCormick-Deering or International Tractor or McCormick-Deering Engine needs attention bring it to us to be put in its original first-class condition with Genuine IHC Parts.

THE TRACTOR

packed excess weight for the power developed but was fairly reliable. It would start, and it proved durable—many continued to perform from ten to fifteen years or longer. With the advent of the Titan and tractors of simi-

lar design, it seemed for nearly ten years that power-farming had reached the limit of its possibilities. During these ten years better engines were developed. The great oil companies were evolving better lubricants and better fuels. But tractor farming seemed definitely confined to limited fields. Tractors could plow, pull seeders, and combines, drive threshers and grinders. This proved satisfactory and sufficient

for the straight wheat farmer. Due to its weight and design, this tractor could not be used to pull a peg-tooth or disc harrow. It could not be used for the all-important work of planting and cultivating. The vast row-crop and cotton sections of the south had to depend on horse flesh, likewise the great rolling cornlands of the middle west. A tractor in these enormous sections could only be used as a supplement to

CONGRATULATIONS..... E. R. YATES HARDWARE

We are happy to join with the friends of E. R. Yates Hardware in sending our heartiest congratulations on your 15th Anniversary.

We hope for you a continuation of fine business the people of this territory have given you in the past. May the years add to your growth and each anniversary find you larger and stronger is our sincere wish.
