

Senate Panel Set For Estes Hearing

WASHINGTON (AP)—The Senate Investigations subcommittee has been called to meet behind closed doors Monday afternoon under tentative plans to start taking testimony in its mushrooming inquiry into the affairs of Billie Sol Estes.

Chairman John McClellan, D-Ark., declined Saturday to give out any names, but said, "We may be interrogating some out-of-town witnesses."

All indications were that Estes, a West Texan whose financial empire has been punctured by fraud indictments, would not be among them.

The subcommittee is searching for evidence of whether Estes received favored treatment from government officials in pyramiding operations under federal farm programs into a multi-million dollar fortune.

McClellan said he and staff aides will interview some witnesses Monday morning and then decide whether to start taking testimony at an afternoon session.

"I'm pretty confident that some executive testimony will be taken," he said.

McClellan didn't rule out the possibility that some witnesses may be Agriculture Department officials.

The subcommittee's public hearings are expected to start within a few weeks.

Sen. Karl Mundt, R-S.D., said the subcommittee staff is looking into "a rumor" that Estes got 11 separate loans from the small business administration to help finance his vast grain storage operations.

Mundt, the senior GOP member of the subcommittee, said he has heard that Estes obtained a \$300,000 ceiling on Small Business Administration loans.

"The staff is looking into it," he said. "But it has neither been proved nor disproved."

A spokesman for the small business administration said the records were locked up for the weekend, but that he was almost certain there was no substance to the report that Estes did get multiple loans from the agency.

Mundt also disclosed that Secretary of Agriculture Orville Freeman came by his office late Friday and gave assurance that he will "cooperate fully and freely" in trying to get to the bottom of the Billie Sol Estes case and to determine who or what was at fault.

Freeman is known to have paid a similar call on McClellan earlier in the week.

Mundt said he brought to Freeman's attention "The vast discrepancies between the figures on storage payments paid to Estes which his department had given to our investigators and what they gave the President, before his press conference."

The secretary called the Agriculture Department, Mundt said, and ordered his staff "to review the records and to reconcile the differences immediately."

Kennedy, at his news conference Thursday, said a specimen had paid \$7 million to Estes for storage of grain since 1959

and that about \$5 million of this was paid prior to January 1961—in other words, before the start of the Kennedy administration.

Sen. John Williams, R-Del., subsequently said he had been advised by the department that Estes and his affiliated companies had been paid \$4,779,316 in storage charges last year.

A department spokesman said Kennedy meant that \$5 million had been paid to Estes in grain which was stored during the Eisenhower administration, although some of the actual payments were not made until last year.

Kennedy's claim of vigorous action by his administration to clean up the Estes case came under fire from Sen. Clifford Case, R-N.J.

Kennedy asserted the story of the Texas financier's deals "came to public attention because this administration indicted Mr. Estes before a state agency in Texas or any place else moved."

Case cited challenging comments from Democratic state Atty. Gen. Will Wilson of Texas, and added in an interview:

"The actual evidence doesn't inspire confidence that the great diligence the public has a right

to expect from the administration has been or is being applied. The President went at least a little too far."

The Texas attorney general has accused the Agriculture Department of an uncooperative attitude—a statement the department disputes.

Case said he regards the whole story as so clouded by political implications that neither Congress nor the executive branch should be entrusted with overall responsibility for investigating it.

He suggested that the General Accounting Office, an investigative agency set up by Congress, should take over.

Case said he has confidence in McClellan, but he added:

"This is a campaign year and no matter how diligent the subcommittee's I believe the public would have more confidence in an investigation conducted by a group outside congress and the executive agencies."

A House Government Operations Subcommittee headed by Rep. L. H. Fountain, D-N.C., also is planning hearings. Some sources indicated they may start by the middle of next week, but Fountain declined to confirm this.

Fountain said any government official involved in improper activities in connection with Estes would be exposed publicly "be he Republican or be he Democrat."

Subpoenaes Are Issued

FRANKLIN, Tex. (AP)—The authorities issued subpoenas by the dozen Saturday and prepared to serve them on Monday for a grand jury hearing into the mystery death of Henry Marshall, 32, a farm official mentioned in the Billie Sol Estes scandals.

Among those called to the session were two doctors and hospital authorities. They were instructed to bring X-ray photographs of the body.

State Dist. Judge John M. Barron and Dist. Atty. Bryan Rush called the grand jury.

Judge Barron said today after 34 subpoenas were issued, "We are working very closely with the FBI in Bryan and Houston to get their records, and we want to invoke the aid of the U.S. government to get their records made available to this jury."

Barron reported that investigators are determining who in Pecos, Tex., Estes' headquarters, should be summoned.

Marshall was found dead June 3, 1961, shot five times with a bolt-action rifle, Justice of Peace Lee Farmer issued an official ruling of suicide.

Light voting was reported in all of the boxes except box 2 (Ennis Creek) which voted 10 out of their 11 qualified voters. A total of 1,317 votes were cast.

The election was to determine if voters wanted a home for the aged built in Scurry County. The home would have been leased to a private operator but controlled by the Commissioners' Court.

The vote by boxes follows:

	For	Against
1. NE Snyder	109	195
2. Cottonwood	9	1
3. Ennis Creek	10	1
4. Dermott	8	9

Cholera Epidemic

DACCA, Pakistan (AP)—Twenty-six persons, mostly children, have died in a cholera epidemic in Narayanganj, 12 miles from Dhacca, officials announced Saturday. A town official said the epidemic has been effectively controlled and the population inflated.

Harkins Declares
Command Is 'Fit'

BANGKOK, Thailand (AP)—The general then flew on to Bangkok 130 miles northeast of Khorat to pay respects to local Thai army commanders there.

The Army's 1st Battle Group had just completed a move from Khorat, to a new post 40 miles to the west on Friendship Highway.

Moscow radio charged "the only reason for the American occupation of Thai 'bounty' was to set up nuclear bases and a strategic springboard in one more region of the world."

With pro-Communist Pathet Lao forces in Laos showing no signs of a further breach of the year-old cease-fire—the event that shook the Thai government's confidence in its border security and brought the Marines here—it seemed likely the spotlight this week would shift once again to political negotiations between the three Lao princes.

Prince Savan Phouma, the agreed choice of the chief Western and Eastern powers to head a new neutralist government, cut short his stay in Europe and flew home after a talk outside London with British Foreign Secretary Lord Home.

ROSIE UNDERWOOD
... friendliest woman employee

HOWARD CRENSHAW
... friendliest man employee

Underwood, Crenshaw Voted City's Friendliest Employees

The ballots are in, the counting is complete, and the tabulating is finished. The six-week campaign conducted by the Snyder Daily News to determine the friendliest, most courteous employees in Snyder is over.

More than 9,000 votes were received in the campaign, and the voters have chosen Rosie Underwood as the friendliest woman employee and Howard Crenshaw as the friendliest man employee.

Mrs. Underwood is an employee of Clark Lumber Co., and Crenshaw is employed by Everybody's Super Market. Each will receive a \$50 savings bond and a framed award.

Tabulators worked overtime several days in counting the ballots which came not only from Snyder but from several surrounding towns and cities as well. Before the balloting ended May 15 a total of 193 different individuals had been nominated and received votes.

Those nominated automatically became members of Snyder's "Courtesy Club" and have received membership cards.

Besides the top winners, there were many others for whom votes piled in for days in great numbers. Checkers were kept busy listing the nominees and mailing "Courtesy Club" cards.

The lengthy list of Snyder men and women employees rating recognition as friendly, courteous persons is termed "most impressive."

Mrs. Underwood said she "has no idea" she would win. She said she knew some of her friends were voting for her, but she had no idea she had so many friends.

Mrs. Underwood admitted her main interest was not her work, but rather her nine-year-old son, Randy who is presently completing his third year of school at Central Elementary school. She is the daughter of Mr. and Mrs. Glen Holladay. One brother, Hal, is a teacher at Lamar Junior High.

NEW YORK (AP)—A frankly partisan President Kennedy, accepting a "Birthday Salute" at Madison Square Garden Saturday night, accused the Republican party of trying to stop his program at virtually every turn.

Telling a huge Democratic rally at the Garden that the Kennedy program is "a policy of constructive action" on every front, Kennedy added: "Our opponents prefer to be against everything."

In his prepared speech, he accused the Republicans of being "against every new program, against every attempt to help the individual citizen find a better life for himself and his family."

To the cheers of Democrats who had paid up to \$10.00 to attend the celebration—a birthday which actually will occur May 29—Kennedy said: "We stand for a world community of free and independent nations—and we have broken new ground to achieve it in the Peace Corps, long-term foreign

aid, food for peace, disarmament—and a stronger United Nations."

"We stand for the expansion of international trade for the acceleration of our economic growth."

"We stand for a specific program to speed our recovery from the last recession—public works, youth employment, job retraining, and tax credits—and a specific program to halt the next recession."

"We stand for better schools and colleges for our young—and better health care for the old."

Referring to another rally at the Garden Sunday night, when he will speak on his medical care program for the elderly, known as Medicare, Kennedy quipped: "Most politicians when they come to New York make their headquarters at the Waldorf—mine is Madison Square Garden."

"Tonight," he added, "you have celebrated my birthday so many times that I feel eligible to apply for Medicare right now."

The President will be 45 on his coming birthday.

SNYDER AREA OIL

Texaco Inc. has completed No. 255-1 P. L. Fuller as a "Stram" "B" discovery in Scurry County's Fuller field.

It pumped 21 barrels of 38.4 gravity oil, plus 63 per cent water, daily from perforations at 6,960-6,964 feet, which had been acidized with 500 gallons. Gas-oil ratio was 364:1.

Dually completed with the Fuller "B", it has a total depth of 7,371 feet, with strings of 2½-inch casing set at 7,371 feet and 7,370 feet.

The strike is 16 miles northeast of Snyder and 2,310 feet from north and 990 feet from west lines of section 617, block 97, H&TC survey.

Texaco Inc. will drill a 7,780-foot-Scurry County Ellenburger wildcat No. 262-1 P. L. Fuller, 16 miles northeast of Snyder.

The explorer is 2½ miles southeast of the East Cogdell field and 1,900 feet from north and east lines of section 623, block 97, H&TC survey.

Robinson Drilling Company of Colorado City will drill a 5,300-foot Scurry County wildcat No. 1 Frank A. Wilson, 10 miles northeast of Snyder.

It spots 1,980 feet from north and 660 feet from west lines of section 264, block 2, H&TC survey.

Standard Oil Company of Texas will drill a 7,000-foot Ellenburger wildcat No. 1 D. C. Rogers and others, one mile north of Colorado City in Mitchell County.

Corazon (San Andres) field, 17 miles northwest of Snyder in Scurry County.

No. 37 M. A. Fuller, a 2,475-foot operation, is 630 feet from north and 110 feet from east lines of section 605, block 97, H&TC survey.

No. 38 Fuller, a 2,950-foot venture, is 985 feet from east and 975 feet from north lines of the same section.

No. 39 Fuller, set to drill to 2,475 feet, is 1,560 feet from north and 250 feet from east lines of the same section.

No. 40 Fuller, contracted to drill to 2,950 feet, spots 2,320 feet from north and 925 feet from east lines of section 605, block 97, H&TC survey.

No. 41 Fuller, scheduled to drill to 2,450 feet, is 2,915 feet from north and 250 feet from east lines of section 603, block 97, H&TC survey.

Standard Oil Company of Texas No. 375 G. E. Parks has been completed in the Kelly-Snyder (Cisco) field of Scurry County.

It pumped 120 barrels of 47 gravity oil from perforations at 6,126-6,145 feet, which had been fractured with 10,000 gallons. Gas-oil ratio was 185:1.

Total depth is 6,307 feet, with 5½-inch casing set at 6,305 feet. Location is 467 feet from south and 2,350 feet from west lines of section 447, block 97, H&TC survey.

Texaco Inc. 1-C-4 T. J. Good has been completed in Borden County's Southeast Good-Fussell (man) field.

It pumped 11.07 barrels of 42 gravity oil, plus 53 per cent water, daily from perforations at 6,747-6,754 feet, which had been acidized with 1,000 gallons and fractured with 10,000 gallons. Gas-oil ratio was 100:1.

The 4½-inch casing is set at 9,546 feet, the total depth. Site is 550 feet from north and west lines of section 2, block 32, T&P survey.

Texaco Inc. has announced plans to drill five projects in the

THOSE HORRID AGE SPOTS

Weathered brown spots on the surface of your hands and face tell the world you're getting old—perhaps before you really are. Fade them out with new ESOTERICA, that medicated cream that breaks up masses of pigment on the skin, making hands look white and young again. Equally effective on the face, neck and arms. Not a moisturizer. Acts on the skin—not on it. Fragrant, greasy-free base for softening, lubricating skin as it clears up those blemishes. At leading drug and beauty counters. \$2 plus tax. If you have those age-revealing brown spots, blotches, or if you want clearer, lighter skin, use ESOTERICA. At all Drug Stores.

SCURRY COUNTY TRACTOR COMPANY

West Of City Hall On Ave. T Snyder, Texas

SNYDER'S MAYOR Dr. John Hamblen joined Maintenance Construction Foreman Joe Middleton and Resident Engineer Homer Ray in an inspection of the Highway 84 by-pass Friday afternoon. They are viewing the recently placed steel girders which will carry the new road across the Santa Fe tracks.

AFTER SATISFYING himself that the work was progressing satisfactorily, Mayor Hamblen signed a proclamation designating this week as Highway Week. At left is Homer Ray, and at right, Joe Middleton. Behind them are supports for more steel girders. High winds slowed this phase of construction.

NERVE CENTER of the maintenance warehouse is presided over by Jack R. Berry, permit clerk. The two-way radio is part of the highway department's network and is used to report road conditions such as high water or ice or to send emergency orders for parts or help. An average of 45 oversize or overweight permits are issued weekly by the office. Most cost \$5. A portion of the money goes to the state maintenance fund and some stays in the county.

WORK ON the final phase of the 84 by-pass nears completion on the drawing board of Charlie B. Morrow in the Resident Engineer's Office. Snyder once had a District Office, but it was moved to Big Spring in 1926 and later on to Abilene where it now is. The present set-up was initiated in 1940 with the late Jack Gorman as the first resident engineer. He was followed by B. R. Wilkerson, Homer Ray, present engineer, assumed his duties in Snyder in 1950.

Highway Week Is Proclaimed Here

City of Snyder Mayor John Hamblen has officially designated this week as Highway Week and has issued the following proclamation:

WHEREAS, one of the best-known and well-regarded qualities of the State of Texas is its soundly built and carefully maintained highways;

WHEREAS, a consistent program of highway construction and modernization has in recent years brought about a reduction of more than 25 percent in the fatality rate on all Federal and State highways in Texas;

WHEREAS, heavy increases in traffic and the consequent increase in highway safety since the state's population has increased by one-fourth since 1950, the state now has more than five million registered motor vehicles, and the miles traveled by these vehicles now total 43 billion a year; and

WHEREAS, due to this flood of traffic some 22,000 miles of the state's 25,000-mile system of U.S. and State-numbered highways are already obsolete for the loads of traffic they carry;

THEREFORE, BE IT RESOLVED, as the citizens of Snyder, Texas, do hereby designate the period May 20-26, 1962, that the Texas Highway Department be commended for its achievements in building today's fine highway system in the face of mounting traffic problems; and

BE IT FURTHER RESOLVED, that the citizens of Texas be urged to view with concern the adverse economic effects and the cost in human lives that will result if highway traffic overwhelms the capacity of our roads, and to support a sustained program of highway improvement and modernization to keep Texas growing.

THEREFORE, I, John H. Hamblen, do hereby designate the period May 20-26, 1962, as HIGHWAY WEEK and urge that special attention be directed to the needs of our highway system.

Boys Find Money Bag

HOUSTON (AP) — Three boys on their way to school found 20 pounds of money which had fallen out of an armored car Friday. Their car wheel struck a large white bag laying in the street. The boys backed up and sure enough the bag contained over \$900. All but \$162 of it was in change.

The three, John Pizzitola, 18; Jimmy Riley, 14; and Frank Hartney, 13, finished their school exams and then Pizzitola called his father. The bag contained a deposit slip for Ace Merchandise Vendors, so the elder Pizzitola called the company. A man laughed at him when he told him what they had found. Pizzitola finally convinced the man and the money was returned.

Jimmy Riley commented: "All I could see during the exams were \$10 bills."

Since 1900, the New York-San Francisco Giants hold a 698-646 edge over the Brooklyn-Los Angeles Dodgers.

The Chicago Cubs have never played a night baseball game in their home Wrigley Field.

Highway Dept. 'Open House' Scheduled Here For May 25

BY DICK ROBERTS

How does the Texas Highway Department use tiny glass beads to make your driving safer? Why do highway engineers cut circular holes in brand-new highways? These are only two of the many fascinating aspects of highway engineering and maintenance that local citizens may explore on Friday, May 25.

On that day the Highway Department will hold "Open House" at the maintenance warehouse and engineering office as part of National Highway Week, May 20-26, announced Maintenance Construction Foreman Joe M. Middleton and Resident Engineer Homer Ray.

Any interested resident of the Snyder area may visit the warehouse at 319 East Highway and the engineering office at 1900 Thirtieth during the hours 8 a. m. to 5 p. m. and observe the daily functions of the public agency which is responsible for the care of a complex highway network of 250 miles in Scurry County.

District Engineer J. C. Roberts said the Open House will show the public how the Highway Department operates on a normal working day.

"I would like to extend a most cordial invitation to the citizens of this area to visit our Open House," he said. "Your neighbors who work for the Highway Department would like to show you through our facilities and demonstrate a few of the many tests and operations we conduct daily to care for the highways."

Visitors to the Open House will see examples of two-way radio communications; they will see laboratory testing apparatus used to determine the quality of new highways being constructed and to maintain existing roads in smooth riding condition; they will see work being done on roads which are still far in the future for Scurry County.

What visitors will not see are some of the "miracles" which make the Texas Highway Department the high-ranking organization.

Frank Lary's 23 victories during the 1961 season was the highest by a Detroit Tiger pitcher since Hal Newhouse won 26 in 1946.

The Detroit Lions hold the National Football League record for rushing yards in a single season. They ran up 2,265 yards in 1958.

tion that it is. Such things as the dedication to safety that every employee has are not visible to the naked eye.

Over a thousand days have passed since a time-lost accident by Highway Department employees in Scurry County. But the safety concept goes further than their own safety. When work is done on the highways the safety of the motorists using the highways is always a major consideration. This is true from the original planning stage through the erection of temporary warning signs.

The Scurry County maintenance division operates nine trucks and one of the familiar Highway Department's hybrid carpenter trucks, three maintenance trucks and two front-end loaders. While it is strictly a bookkeeping method the system of repair and replacement of the vehicles is of interest.

Each Highway Department vehicle is "rented" from the department. Mileage, or "rent," is paid back to the state at a rate determined by the cost of maintenance of each vehicle and its replacement cost. In this way the major overhauls (which are done in the shops at Abilene) and the new replacements are being paid for as the vehicles are being used.

Each district is allotted and operating budget for the year. Scurry County's total budget is \$108,000. Out of this is paid all salaries, "rent," gas and oil, patching material, and all expenses that are not contract construction.

One of the major efforts of the local maintenance division is the right-of-way cleaning. One large expense paid-out of the operating budget would be unnecessary if people would just behave themselves.

Last year vandalism to signs alone cost \$2,689.70. Here is the way that breaks down: 885 square feet of signs destroyed at \$1.04 per foot; 50 bolts at 3 cents; 100 reflector buttons at 10 cents; 20 posts at \$2.37; labor, \$1,029; equipment rental, \$681.60.

Far more was spent on just picking up litter along the right-

of-way in Scurry County. At \$15.35 per mile, 540 man hours spent on litter pick-up cost this county \$8,350.90. Add to this equipment rental at \$336 and you have a total litter pick-up costs of \$8,615.00.

OUR VIEW

Precinct Convention Hours Confusing In Big Cities

There is a clamor in some of the larger cities for a later starting hour for precinct conventions on primary election days. In fact, some of the metropolitan areas schedule their party conventions after the polls close.

There is a good reason for this. A voter cannot vote in a precinct convention until he has cast his vote in the primary election. Thus, when precinct conventions are scheduled at 2 p.m. or 3 p.m., only those people who have actually voted up to that hour are eligible to participate.

Afternoon precinct conventions caused confusion in some of the larger cities a couple of weeks ago. There were reports that many voters who had hoped to participate in their conventions were unable to get their votes cast before the conventions started, which meant that they were not eligible to attend.

Actually, in smaller cities and towns, afternoon conventions may be an incentive for early voting. The voting precincts in Snyder, for example, usually are able to take care of all demands for ballots during the morning and early afternoon hours of the primary election days. Therefore, persons who are interested in attending precinct conventions will seldom find themselves delayed because of congestion at the polls.

Backstage...

Bennie F. Pinnell, president of the Snyder Real Estate Board, has informed us that this week is the annual Realtor Week. As members of the National Association of Real Estate Board, local realtors in Snyder will join with thousands of colleagues across the nation for the celebration which is being held in conjunction with the 100th anniversary of the Homestead Act.

"This act is one of the greatest single steps ever taken by a nation to make possible widespread real property ownership," Pinnell said, "and it is fitting that realtors, who have been so instrumental in advancing this principal, should join in the celebration."

Since national well-being is often in direct proportion to private property ownership, we too join in their celebration and wish them well.

Steps were taken this week to correct an admittedly bad situation in Snyder. A handful of interested people have for some time been critical of the operation of the dog pound. Shelter from the weather was almost nonexistent; conditions were crowded; water was often not available.

George Patterson, our new city manager is more interested in the problem than our last, and we are happy to report that improvements will soon be made which will protect the pups somewhat from the rain and snow, and give them some shade. We realize that unwanted dogs must be destroyed. But we have felt that their last three days of life need not be days of misery. So, again, we're glad the work will be done, and we hope it will start soon.

Incidentally, anyone who wants a dog can get one at the pound. The love and affection that only a dog can give can be had for just the price of a license.

Estes Case Pinpoints Weakness In Program

WASHINGTON (AP)—The Bill Estes case spotlights federal farm programs that carry production allotments which in some cases are "guaranteed" with land and on which the farmer is paid a subsidy.

Others that got Estes, West Texas farmer under threat indictment, also trouble with the Agriculture Department. And it was his activity in this field that has brought charges that Estes got favored treatment from the department.

For tobacco, production rights are not sold to the farmer. They are leased to him, and he is paid a subsidy. The rights are sold to the farmer, and he is paid a subsidy.

The rights are sold to the farmer, and he is paid a subsidy. The rights are sold to the farmer, and he is paid a subsidy.

There are conflicting viewpoints among farm leaders as to whether the law should be amended to permit outright sale of acreage allotments. Secretary of Agriculture Orville Freeman has said he believes they should be saleable.

Had they been saleable, there would have been no trouble with Estes over the matter. As things stand, Estes has been assessed a penalty of \$544,000 on 1961 crop cotton grown on land for which the department says, he did not have legal allotments.

Those who argue for such a change in the law say sale of allotments would be beneficial to those farmers having allotments but who, for various reasons, might want to get out of farming.

P. O. Dept Overcharged

WASHINGTON (AP)—A New York private transportation contractor overcharged the Post Office department by half on a \$142,000 bill for hauling mail during last year's harbor strike.

The official said \$68,000 has been or will be recovered, and three career postal employees have left the department since investigation of the billing began last December.

James Kelleher, special assistant to Postmaster General Edward Dow said the overcharges were paid to firms owned by Thomas Doran of Buffalo, N.Y. He said these firms received \$3.7 million—48 per cent of all such business in New York state—for star route service performed for the Post Office Department in 1961.

Kelleher said the employees involved were George Dargatzis, 44, of Huntington, N.Y.; H. W. McNeil, 55, East Orange, N.J.; and A. T. DeSanctis, 46, of Bronx, N.Y. All worked in the New York City regional office.

might want to get out of farming of the controlled crop. This is argued the transferability of allotments would help promote greater agricultural efficiency. This argument is based on the belief that buyers of allotments would tend to be the more efficient farmers.

Opponents contend sale of allotments would promote development of big farming units with the eventual result that production would be concentrated in the hands of a few large producers.

SHS NATIONAL HONOR SOCIETY MEMBERS—Senior students at Snyder High who were selected for membership in the National Honor Society were presented to the student body in assembly last week. They are front row, left to right, Mary Ann McKitt, Jan Vestal, Joyce Langridge, Annette Blum, Linda Farmer, Brenda King, Candy Weyel; Second row, Bill Weaver, Jean Young, Bob Smith, Johnny Mitchell, Jerry Franks, Kay Powell, Diane White, third row, Dale Cushman, Steve Free, John Pickering, Jr., Freddy Miller, John Best, Weldon Merritt, Keith Moreland.

Recovery Under Expectations After Market Selling Climax

NEW YORK (AP)—The stock market's long-awaited selling climax last week but the subsequent recovery failed to live up to expectations. The lid blew off Monday morning in an eruption of selling after the market in the previous week had experienced its most severe weekly loss in at least 20 years. By noon the ticker tape was running 34 minutes late, a lag un-equaled since May 27, 1933. Then buyers charged in, the tide turned and the averages ended up with good gains. The rally picked up Tuesday where it had left off and gained momentum. The Associated Press average of 60 stocks scored its biggest gain in 4½ years and the Dow Jones industrial average made its greatest advance since April 23, 1961. The recovery at its peak had retraced about one-third of its decline from mid-March, but the usual expectation after a sell-off is for a recovery. The recovery was a recovery of trading volume, not of prices. Nevertheless, they found the week's action reassuring on the whole and the technical aspects not too bad. Wall Streeters said investors' sentiments had been helped by encouraging business indicators and optimistic predictions about the economic outlook. These included record levels in April for industrial production and personal income, a sharp increase in housing starts in April and gains in production of autos, mills and utilities. President Kennedy told his news conference that all indications pointed to a record year for profits, wages and production. For the week, The Associated Press average of 60 stocks advanced 4.80 to 240.90, for its best weekly gain since early February.

The Dow Jones industrial average climbed 10.07 to 680.70. Of 4,679 issues traded, 883 advanced and 466 declined. The remainder were unchanged. Volume was 19,586 shares, a daily average of 3,913,354, compared with 18,419,640 the previous week. It was the heaviest since 19,566,770 were traded in the week of Dec. 18. U.S. government bond prices slumped during the week. Corporate bonds traded on the New York Exchange, as measured by The Associated Press average, held steady at 1962 highs in exceptionally heavy trading. Treasury prices fell four of the five sessions. Volume of corporate trading on the Exchange expanded to the highest in a year—at \$36,968,000 par value, compared with \$27,000,000 the previous week. The week of May 15, 1961, total was \$37,990,000. The Philadelphia Phillies have finished last in the National League for the past four seasons.

Installation Ceremonies Set For National Honor Society

Installation ceremonies will be held at 7 p.m. tomorrow for Snyder High School students who have been selected for membership in the National Honor Society.

The selections were made by a committee of eight teachers headed by J. M. Kayser, assistant principal of Snyder High. The students were chosen on the basis of scholarship, citizenship, trustworthiness, dependability, and leadership.

Seniors selected for the honor are John W. Pickering, Jr., Jean Margaret Young, John Taylor Best, Mary Ann McKitt, Jan Vestal, Linda Dianne Farmer, Candace Weyel, Robert L. Smith, Jr., Steven Gordon Free, William Franklin Weaver, Jr., Weldon L. Merritt, Joyce Langridge, Annette Blum, Brenda King, Johnny Mitchell, Jerry Franks, Kay Powell, Dianne White, Dale Cushman, Freddy Miller, and Keith Moreland.

Juniors selected for membership in the National Honor Society are Carl Bailey, Stuart Long, Paul McBeth, Thomas Shelburne, Gene Shelburne, Terry Alexander, Sandra Autry, Mary Bowlin, Dana Falls, Deanna Hill, Pat Mebane, Julia Richardson, Deborah Short, Lynn Walker, Dana Westfall, and Elizabeth Ann Williams. Only 15 per cent of the senior

class and 10 per cent of the junior class are eligible for membership. No honor conferred by the school exceeds that represented by selection for membership to the society. Robert Clinton, high school principal said, "It represents the fundamental objectives for which schools are instituted and gives recognition to those who have attained most nearly the desired ends."

The National Honor Society was reactivated this year at Snyder High School after a lapse of several years. The first charter was issued to the school in May, 1932.

The organization was originally founded by the National Association of Secondary School Principals for the avowed purpose of improving scholarship and placing the regular and faithful performance of academic work in its proper place in the estimation of the student body.

Spain Still Has Trouble With Strikes

By HAROLD K. MILKS
MADRID, Spain (AP)—The government appeared to be winning the strike battle in the Asturias coal fields Saturday, but walkouts hit other parts of Spain.

Labor officials said less than 3,000 of the more than 20,000 Asturias miners remained off the job after the government promised them wage increases.

Some quarters here predicted the wage settlement for the coal miners would encourage walkouts throughout Spain, and this pattern already was shaping up in Barcelona.

Generalissimo Francisco Franco had planned a trip to Barcelona later this month, but this has been postponed because of the strikes there, official sources reported.

Various officials in the Spanish capital expressed concern at the continued wave of strikes, and said the walkouts are causing serious economic losses.

A note circulated to newspapers in Bilbao by authority of the civil governor estimated strike losses in that area at \$2 million the past 10 days.

Despite encouraging reports of strike settlements in that area, the Bilbao region still had around 25,000 workers on strike. At the peak of the labor trouble, about 35,000 workers were out.

To Attend Institute

Dan Johnson, principal of Lincoln High School, announced Saturday that Mrs. Lois D. Powell has been selected for participation in the Summer Institute for Secondary School Teachers of Science and Mathematics.

This six-week course will be given at Houston-Tillotson College and will begin in June. Mrs. Powell will be given travel and living expenses by the Foundation.

The specialty under which Mrs. Powell qualified, and in which she will be working, is in the field of chemistry.

BIRTHS

Mr. and Mrs. Tommy Caldwell, Alamo, N. M., are the parents of a 5 lb. 7 oz. boy, born May 17. The boy, Darrell Wayne, is the grandson of Mr. and Mrs. Tom Caldwell and Mr. and Mrs. Ed Caldwell, both of Snyder. The mother is the former Carol Caldwell.

Special Holiday Recalled By Solon

EDITOR'S NOTE: The following article written several weeks ago by Rep. Omar Burleson was brought to our attention by Mrs. J. E. Sorrells, who recalls that Miss Lucille Miller, referred to in this article, formerly lived in Snyder County and is well-known to many areas, residents.

BY OMAR BURLESON, M. C.

WASHINGTON, D. C. — THE TEXAS PHARMACEUTICAL ASSOCIATION invited me to address their State-wide convention in Austin. The subject suggested was "Politics—You Can't Afford To Sit On The Sidelines."

THIS SUBJECT SUGGESTED that I should speak on the necessity and advisability of businessmen accepting an active responsibility in political affairs. To put it another way, it is impossible for one to sit on the "sidelines" and meet his political responsibility.

IT REMINDS ME OF A SPECIAL HOLIDAY observed at Newlight, the one-room, one-teacher school I attended, located between Anson and Stamford. This special holiday was the day we caught the skunk. The only other holidays we knew were Christmas, Thanksgiving, Easter and the 4th of July. WE ALWAYS KNEW THE DATES of the other holidays, but this other special day was never definitely known until it happened.

ORDINARILY ONE WOULD THINK THAT there might be more than one of these holidays, but there never was. The reason there was just one skunk season under the schoolhouse.

ON THE FIRST DAY WHEN THINGS WERE real quiet, our teacher, Miss Lucille Miller, who is now my sister-in-law, since I arranged the marriage between her and my older brother, seemed to expect it to happen. Usually there was a light scratching under the floor, and everything would get real quiet. At that first scratching we all knew it was time to set the trap.

FOR SOME UNACCOUNTABLE REASON there was a hole in the foundation on the east side of the building. Why, no one knew. Anyway, the skunks enjoyed it, and it was left clear in a spirit of fair play, and because it was the natural place to set the trap.

THE SETTING AND THE HANDLING OF THE TRAP always fell to the biggest boy in school. He furnished the trap and placed it in a small pit just inside the hole and covered it lightly with leaves and grass. The job done, we would settle back and wait for the holiday.

THERE WAS NO WAY TO TELL when it was to happen. It could be on the very first morning, or it could take a week or ten days. If the period was extended over the weekend, the trap was

Broiler Markets In State Steady

AUSTIN (AP) — Texas broiler markets opened steady in South Texas and slightly weaker in East Texas Monday, the state Department of Agriculture said. The market remained steady in the south but showed some strength in the East Tuesday. At the close Friday, both areas were steady with undertones firm. Offerings were adequate for the slow to fair demand. Movement ranged from about normal to brisk.

Closing prices Friday: South 14-14.5. East 13.4-13.8. Week earlier: South 14. East 13.4-14.10. Year earlier: South 15. East 13.98.

Newspapers Lauded For Coverage

DALLAS (AP)—A Texas newspaper executive said Saturday that Texas newspapers have "done themselves proud" on the Billie Sol Estes case.

David W. Hoster, editor and general manager of the Taylor Press and president of the Texas Associated-Press Managing Editors Association, commented as the APME opened a two-day session in Dallas.

"This is one of the biggest stories of the century," Hoster said. "Texas newspapers have been on it from the beginning. Long before the Estes case gained general interest in the East and especially in Congress, readers of Texas newspapers had been fully informed of the Estes scandal."

The APME organization opened a two-day meeting with a tour to Six Flags over Texas this afternoon. Sunday morning business sessions will take up various aspects of The Associated Press news report and in particular coverage of the current political and election year in Texas.

Dr. Willis Tate, president of Southern Methodist University, will be the luncheon speaker tomorrow. Associate Managing Editor Tom Simmons of the Dallas Morning News is chairman of the Texas APME Continuing Study Committee and will direct the Sunday morning talks.

Hoster said the coverage by Texas newspapers "from the weekly up to the big metropolitan daily" has proven that Texas newspapers "are in the front rank in ability to sink their teeth into a highly complex story and stay with it to the end."

"The end is not in sight but all of us in Texas can be proud of the journalistic leadership shown by Texas newspapers in this particular case."

Hoster said coverage by the individual newspapers and their providing it to The Associated Press is "the finest kind of example of the member cooperation that makes The Associated Press the great wire service that it is."

Hoster noted that until congressional action started in the Estes case that few eastern newspapers gave it much attention. He noted that "they are now deeply interested in a story which Texas newspapers had been carrying for weeks."

IT IS ALSO WHY EVERY SCHOOL NEEDS A SKUNK.

To The Employees Of Snyder —

To you we owe the success and growth of our city.

Our Thanks To You —

Another Quake Hits Mexico

MEXICO CITY (AP)—The second severe earthquake in eight days struck Central and Western Mexico Saturday, injured more than 15 persons in the resort city of Acapulco, and sent thousands in this capital rushing into the streets in panic.

A Canadian businessman collapsed after apparently suffering a heart attack while the rolling quake still shook Mexico City and died later. This was the first report of a fatality.

The heaviest damage appeared to be in the West Coast area of Acapulco, hardest hit by the quake May 11 that killed 3 persons and injured 100 others.

The Red Cross there said 15 persons were in hospitals and many more were injured in that city of 28,000.

Getting through to Mexico City by radio after all telephone lines went out, the Acapulco Red Cross

said the Las Hameacas and Los Los hotels in that resort were damaged heavily, as was a school. The tower at the airport buckled.

One report from the area said several homes collapsed in the town of Iguala, about 150 miles southwest of Mexico City.

The Canadian who died in the panic that spread through Mexico City was Roy A. Blay, president of Aluminio Industrial Mexicano, whose home town was unavailable.

With others, he rushed from his office building near the U.S. embassy as the earthquake still was rolling. He collapsed on the sidewalk, apparently from a heart attack. He was taken to the American Hospital, where he died.

The earth shock was recorded in Mexico City at 8:58 a.m. and lasted more than a minute. The

earthquake that hit May 11 lasted nine seconds.

The government seismograph bureau said the intensity of the quake was about the same as last week's. It said the center of the disturbance could not be pinpointed immediately because the tremor damaged some equipment.

In Mexico City, thousands of alarmed citizens and tourists fled to the streets for fear that buildings might collapse. None did.

Communications were disrupted between the capital and Acapulco, a Pacific Coast resort city near Iguala. Much of the damage from last week's quake was centered in this area.

No serious damage was reported in Mexico City.

Three Russian crews will row in the Independence Day Regatta on the Schuykill River at Philadelphia on the Fourth of July.

3 Americans Are Injured In Explosion

By EDWIN Q. WHITE
SAIGON, South Viet Nam (AP) — Three American servicemen and eight Vietnamese were injured Saturday night by a grenade explosion on a street before a U.S. military billet in downtown Saigon.

The bombing followed a similar incident Thursday when a grenade exploded at a sidewalk cafe frequented by U.S. servicemen, injuring two Germans.

The latest attack coincided with the birthday of Ho Chi Minh, leader of Communist North Viet Nam, which is supporting the Communist push against this Southeast Asian country. Ho may be 71 or 72, records as to the year of his birth are obscure.

None of Saturday's victims was believed seriously injured. One American serviceman was wounded in the back, legs and side and the second was hit in the shoulder. The third was struck by fragments in the stomach, but apparently the flying metal did not break the skin.

Names of the Americans were withheld.

Military sources said the grenades used in both attacks were homemade.

Witnesses to the Saturday night attack said the bomb was thrown from a moving car as it passed the Hung Dao Hotel. The blast dug a small hole in the concrete sidewalk and dented a motorbike parked nearby.

Saigon, the capital of South Viet Nam, has been relatively free of Communist Viet Cong terrorism during the past year. But the recent attacks apparently heralded a new campaign.

Earlier Saturday South Viet Nam military forces, supported by U.S. helicopters, launched an operation against rebel forces in Phong Dinh Province, 100 miles southwest of here. Three rebels were reported killed although the government troops made no major contact with Viet Cong units.

A public leader, said in a separate interview it is fair to say that the Republicans are going along with the President now but reserving the right to criticize him later.

Kuchel was critical at a White House briefing of members of both parties last week on the failure of U.S. allies to send at least a platoon of troops into Thailand as a token of their support of our move.

Subsequently, the British made Royal Air Force units available on Thailand's request.

"We are agreed," Hickenlooper said, "that a display of military strength was necessary. But we do not agree with the policies that brought about this crisis."

"In our view the policy of forcing Western elements in Laos into a coalition with the Communists and the neutralists is wrong. If there is a coalition government, eventually the Communists will own Laos."

Sen. Thomas H. Kuchel of California, the assistant Senate Re-

Spence To Reiterate Need For Marking Water Rights

E. V. Spence, general manager of the Colorado River Municipal Water District, is expected Tuesday to re-emphasize the importance of marking area surface waters for future use in this area.

The hearing is the culmination of a study the engineers have long had on the Colorado River and its tributaries. Spence previously expressed the view that the study will paralyze other hearings, particularly those of the U. S. Study Commission report.

The CRMWD manager plans no written report to submit inasmuch as there have been 141 meetings with the U. S. Study Commission.

Water Engineers and its successor, the Texas Water Commission, as well as the U. S. Study Commission.

He will, however, summarize the background of the CRMWD, a body politic created by the State of Texas and organized in 1911.

The district has financed a total of \$16,350,000 in revenue bonds and has constructed a system of approximately 125 miles of pipeline, all without assistance from anyone. It has Lake J. B. Thomas, which at capacity contains 20,000 acre feet of water, with a right to divert 30,000 acre feet annually.

"Continued accelerated growth of the cities of West Texas," Spence explained, "have made it necessary to look forward to an additional water supply not only to serve member cities, but to consider the needs of other cities such as Midland, Lamesa, Colorado City, Stanton, Lorraine, all of whom filed resolutions supporting the District's application for a second lake."

Under an order entered June 20, 1960, the District holds a permit to construct a reservoir on the Colorado River in southern Mitchell County to hold 402,700 acre feet. The permit, however, becomes effective only when the District receives and advises the Texas Water Commission as to its intended procedure with respect to clearing up pollution conditions or solving the pollution problems on the upper Colorado River.

The District has asked for a railroad commission order seeking relief from pollution it contends is due to seepage of saltwater disposal in earthen pits and from improperly plugged abandoned oil wells. A report is anticipated soon in this matter, but even if successful the district faces the task of coping with the ordinary flow of salt water now in the Colorado

River at the rate of 300 gallons per minute. At Colorado City this is estimated to approach 110 tons of salt per day.

Assuming that this will be solved, either by reinjection or dilution with oil-repressuring units, the district still will need to look for water, Spence observed.

Thus, he plans to reiterate at the hearing that the study done by the Colorado River Municipal Water District should be included

in the study of the Colorado River at the rate of 300 gallons per minute. At Colorado City this is estimated to approach 110 tons of salt per day.

Assuming that this will be solved, either by reinjection or dilution with oil-repressuring units, the district still will need to look for water, Spence observed.

Thus, he plans to reiterate at the hearing that the study done by the Colorado River Municipal Water District should be included

Baccalaureate At Fluvanna Tonight

FLUVANNA—Baccalaureate for Fluvanna High School seniors and eighth graders will be held at 8 o'clock tonight in the High School auditorium.

Commencement exercises are set for 8:15 p.m. Tuesday in the auditorium, and classes will be dismissed for the summer vacation on Wednesday.

Anna McDaniel, daughter of Mr. and Mrs. J. W. McDaniel, is valedictorian of the senior class, and Bill Kingston, son of Mr. and Mrs. Harry Kingston is salutatorian.

Valedictorian of the eighth grade class, which will be promoted into high school, is Michael Landrum, son of Mr. and Mrs. Joe Landrum. The eighth grade salutatorian is Debbie Mathis, daughter of Mrs. and Mrs. Orval Mathis.

Roy Phemister, minister at the Fluvanna Church of Christ, will preach the baccalaureate sermon. The Rev. H. A. Watkins, pastor of Fluvanna Methodist Church, will give the invocation, and the Rev. B. C. Finch, pastor of Fluvanna Baptist Church, the benediction.

Mrs. Bill Stansell will play the processional and the recessional. Mr. Phemister will be introduced by L. M. Dawson, superintendent of Fluvanna Schools.

Speaker at the commencement Tuesday night will be Dr. Bertie J. Fallon, associate professor in the Department of Education at Texas Tech.

Ushers at the baccalaureate will be Robyn Beaver, Charles Berryhill, Rinda Bruner, Henry Contreras, Robert Miller, Lavetta Boulware, La Rue Reeder, Virginia Finch, Bob Daugherty and Bill Noel.

Members of the senior class are Malinda Cunningham, Wayne Green, Billy Don Kingston, Anna

Republicans Reserving Judgment

By JACK BELL

WASHINGTON (AP) — Congressional Republicans are supporting President Kennedy in the immediate Southeast Asia crisis but are reserving the right to criticize his diplomatic course in Laos.

And if a coalition government eventually is formed to rule that unhappy country, Kennedy can expect to hear in the fall campaign that his "mistakes" have made it certain that the Communists will control Laos.

Sen. Bourke B. Hickenlooper of Iowa, chairman of the Senate Republican Policy Committee, made it clear in an interview Saturday that GOP members have no criticism of the President's sending U.S. troops to Thailand.

"We are agreed," Hickenlooper said, "that a display of military strength was necessary. But we do not agree with the policies that brought about this crisis."

"In our view the policy of forcing Western elements in Laos into a coalition with the Communists and the neutralists is wrong. If there is a coalition government, eventually the Communists will own Laos."

Ira Baccalaureate Tonight; Graduation Slated Thursday

Baccalaureate services for Ira High School seniors and eighth graders will be conducted at 7 o'clock tonight, with the commencement exercises set for 7:30 a.m. Thursday.

Kay Byars, daughter of Mr. and Mrs. J. L. Byars, is the valedictorian of the senior class. Her grade average is 95.07.

Solatorian is Cheryl Kay Dove, daughter of Mr. and Mrs. Jimmy Dove, with a grade average of 93.6.

Highest ranking boy in the graduating class is Donnie Dunn, son of Mr. and Mrs. L. F. Dunn. He has a grade average of 91.3.

Ricky Sterling, son of Mr. and Mrs. W. R. Sterling, is the valedictorian of the eighth grade class which will be promoted into high school. His grade average is 95.1.

Weldon Wiggins, son of Mr. and Mrs. Weldon Wiggins, and with a grade average of 91.5, is the eighth grade salutatorian.

The Rev. Roy Haynes, pastor of the Ira Baptist Church, will preach the baccalaureate sermon tonight. Darnell Boyd, minister of the Ira Church of Christ, will give the invocation, and the Rev. Wesley T. Hutchins, pastor of the Ira Church of God, the benediction.

The high school choir will sing hymns and Bob Ballard will play the processional and recessional.

The commencement speaker Thursday night will be the Rev. Harry Vanderpool, pastor of First Methodist Church in Snyder, High School diplomas will be presented by Roy H. Sallee, superintendent of Ira Schools. Sallee also will present awards during the commencement. Bill McMeans will recommend the candidates for graduation.

W. R. Fields will present the

Budget Is Big Secret

BATON ROUGE (AP)—About the biggest secret in Louisiana is the budget message Gov. Jimmie Davis will present to the legislature Sunday night.

Davis has completed the message, but he gave no hints what it contained. The governor's Legislative Budget Study Committee recommended a reduction of \$22.4 under present expenditures.

Administration House leaders were undecided whether to call up the administration's \$60 million bond issue, aimed at this year's \$63 million deficit, when the House meets at 7 p.m. tomorrow.

The bill seems assured of passage, with 58 of the 103 House members having signed the legislation.

Some lawmakers and newspapers have suggested the bond issue vote should be delayed until lawmakers have a chance to look at the governor's budget proposals.

Harry (Mike) Link will captain Notre Dame's 1962 football team. He's fullback from Chicago.

Two Youths Are Nabbed

SHREVEPORT, La. (AP)—Two youths were arrested here early Saturday after a bullet fired by a Texas Highway Patrolman at a speeding auto struck the officer in the leg.

First reports were that the officer, Ralph Allen of Queen City, Tex., was wounded by a gun fired from a speeding car. He was taken to a hospital and is in good condition in Texas.

Flournoy said the teen-agers were Johnny Heflin, 18, of Shreveport and Jerry Addie, 18, of Ida. They were arrested about 30 miles north of Shreveport, shortly after they were forced to abandon Addie's car because one of the tires was shot out.

Both waived extradition and were taken to the Cass County Jail at Linden, Tex., where Flournoy said Addie was charged with driving while intoxicated, and Heflin with drunkenness.

From me to you A DAILY VIEW

Rev. R. Charles Spivey

Jesus said "I am the resurrection and the life; he who believes in me though he die, yet shall he live, and whoever lives and believes in me shall never die."

John 11:25, 26, (read verses 1-27)

Perhaps the clue to being a Christian is whether or not you want to live forever. In talking with some people, you get the idea that they don't especially want to live forever. Maybe they feel that they have had enough trouble on earth and they would just as soon be done with it. Or maybe their conception of heaven and eternal life is "streets paved with gold and pearly gates", and these things don't interest them in the least.

But when you talk with a person who is especially looking forward to eternal life, there is a gleam in their eye and a real sense of joy. They realize that there will be no more troubles, and they look forward to that. "Golden streets" is only a simile of the richness of God that will be theirs. But the main reason for looking toward eternal life is simply that God will be there. To the person of faith this is reason enough to desire heaven.

Laos Crisis Causes U. S. To Reappraise Its Asian Policy

By JOHN M. HIGHTOWER

WASHINGTON (AP)—The sudden crisis which swept U.S. troops into Southeast Asia last week appears to have resulted in part from a failure of U.S. policy in Laos.

This has caused searching but so far informal discussion among officials of the Kennedy administration about what went wrong and whether similar error can be avoided in future.

So far President Kennedy's anxiety has been expressed in a series of statements and a meeting with the State Department, that some elements of the U.S. government might have been pulling against other elements and encouraging Phoumi to disregard the U.S. advice he was receiving officially.

The administration arose because there are divisions within official Washington over whether a neutral Laos with a government of Western elements has any chance of withstanding an eventual Communist takeover.

The groups principally involved in the Laos struggle, apart from the White House, have been the State and Defense departments and the Central Intelligence Agency.

The State Department has been trying to work

Complaint Dismissed

WASHINGTON (AP)—The National Labor Relations Board said Saturday it has dismissed a complaint by the Oil, Chemical and Atomic Workers' International Union against Phillips Chemical Co. in the firing of a worker.

The ruling affirmed an earlier ruling by the trial examiner.

The firing was an outgrowth of a strike beginning Jan. 7, 1961, at the company's Cactus Plant in the Texas Panhandle, which ended April 19, 1961. The strike was accompanied by considerable violence.

Weldon Tatom, a striker, was reinstated at the end of the strike. The company claimed he had shot through the automobile windshield of a car belonging to David John Anderson, a non-striker, and thus the firm would not reinstate him.

The trial examiner limited the hearing to a question of whether or not Tatom did shoot through the windshield.

The examiner, Morton D. Friedman, did not rule whether Tatom committed the act or not. He said the failure of the National Labor Relations Board to prove that Tatom did not fire the shot was sufficient for a ruling against the union.

Drilling Figures Ahead Of Last Year

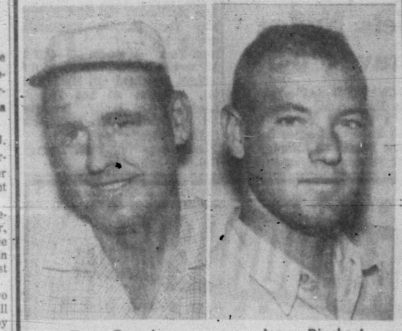

AUSTIN (AP)—The Railroad Commission said Saturday that drillers produced 196 oil and 84 gas wells during the week.

For the year, 3,338 oil wells have been drilled and 1,318 gas wells. This compares to 3,355 oil and 1,133 gas wells in 1961.

Wildcaters brought in nine oil and no gas wells. A total of 140 wells were plugged, including 76 dry holes. The average calendar day allowable was 2,743,228, up 6,690.

since 1954 arises from the fact that when Laos was created out of the wreckage of French Indochina certain pro-Communist Phoumi Lao rebel forces were left unreconciled within the country.

With the long-distance support of Russia, the more immediate encouragement of Red China and the direct help of the neighboring Communist state of North Vietnam, the Pathet Lao developed into a spearhead of a Red campaign to take over the country.

Several years ago, during the Eisenhower administration, the United States rejected a Phoumi government took over as a strongly pro-Western regime. Gen. Phoumi became the central figure in the administration, reportedly with powerful backing from the CIA. As deputy premier, minister of defense and minister of the interior he has wide powers.

Athletics, Giants in 2nd Victories

The Athletics and Giants marked up their second successive victories in Little League play Friday night.

The Indians fell victim to a shutout, 6-0, by Athletics hurler Eloy Vazquez, while the Giants edged out the Cardinals, 2-1, in a hard-fought National League game.

Benitez gave up only three hits but contributed a single and a double to his own cause. He also scored a pair of runs. Terry Holt pulled a home run for the Athletics in a big second inning which saw the winners pound five runs across the dish. Holt also had a single.

Bill Grief's dramatic home run in the second of the campaign broke the 1-1 deadlock and provided the Athletics with their margin of victory over the Cardinals. Grief doubled and scored the tying run in the fourth.

The Cardinals had taken the lead, 1-0, in the second inning when Jackie Aldridge doubled and scored on an error, Mickey

Allmand, Cardinals pitcher, limited the Giants to three hits, while the Cardinals collected four off the offerings of Steve Moffett.

High Winds Discourage Fishermen

High winds have discouraged Texas fishermen and restricted pleasure craft during past weeks.

The Port Mansfield Pass plug was removed last week. Water now is circulating between the Gulf and Laguna Madre at Port Mansfield. State biologists are studying the effect on fishing.

Outboard racers will vie for \$500 in prizes Sunday at the Lake Brownwood Regatta.

Texas water supply reservoirs are also a boon to recreation. A Game Commission report shows 163 reservoirs with a total of 20,000 surface acres, fishing is permitted on 89 per cent of them. Boating was allowed at 80 per cent, and picnicking at 67 per cent. Percentages of reservoirs offering other facilities: camping, 54; hunting, 42; water skiing, 37; and swimming, 23.

Fishing reports: More shrimp for coast fishermen is expected this week, with supply fair to plentiful at Seabrook, San Leon, Galveston, Freeport, Matagorda and at camps on the central and lower coast.

Fishing at Lake Houston has slowed for all except cat fish. Yellow cat catches weighing up to 22 pounds were reported at Lake Nasworthy at San Angelo. Five-pound black bass also were taken there.

Plentiful channel cat catches were made at Gratiot Shoals, and 120 white bass were pulled in by one group of fishermen.

Lake Day Crockett anglers report good catches of channel cat in deep and shallow water with shiners or minnows. Some good catches of bass are being caught in shallow water on sand bars or around brush.

Plastic worms are being used successfully for bass at Lake O' the Pines, and bream and cat-fishing are excellent.

Nighttime crappie fishing at Lone Star Lake has been excellent and one fisherman got his limit of bass three straight days.

Trout fishing in back coastal bays has been fairly good. Good schools of drum were reported in the flats on Lower Laguna Madre. Tremendous catches of snapper, warsaw and ling have been made offshore from Galveston, Freeport, Port Aransas and Port Isabel.

Caddo Lake State Park reports good channel cat, black bass and crappie fishing.

White bass fishing, especially at night with lights, is reported excellent at Lake Inks.

NFL Slates Spring Meet

NEW YORK (AP) — National Football League owners and officials open a 3-day spring meeting on Tuesday with the players' retirement plan and a future rule change the chief orders of business.

The sessions are a carry-over from last year's annual league meeting, held this year in Florida, and will clean up unfinished business from that convulse plus other matters which have since arisen.

There is also the very present possibility of player trades that inevitable emerge when the teams' general managers get together.

Pete Retzlaff, Philadelphia's talented end who heads the NFL Players Association, will address the owners on the player trade that the owners are expected to finalize the retirement phase of the league plan.

Medical, accident and group life insurance phases.

R. E. Smith Wins, 12-0

R. E. Smith downed Green Hill Baptist, 12-0, in C-1 City Softball League play Friday night as Bill Davidson limited the losers to one hit.

Wayne Crow had three doubles for the winners, while Doyle Hayes contributed a pair of doubles and Jimmy Allen one two-bagger. Hayes collected a single for Green Hill's only hit of the evening. James Cantwell was the losing pitcher for Green Hill.

REFEREES AWAIT INVESTIGATORS — Odell Preston, right, of Waco hands a soft drink to Bill Johnson of Lorena as the two Southwest Conference basketball referees await their turn to face members of a Texas House of Representatives investigating Committee looking into alleged fixing of conference basketball games. The hearings are being held in Waco. (AP Wirephoto)

Birds Rout Chisox, 11-6

CHICAGO (AP) — Home runs by Jim Gentile, John Powell and Charley Lau powered the Baltimore Orioles to an 11-6 victory over the Chicago White Sox Saturday.

Gentile and Powell connected for three-run blasts, both featuring five-run rallies. Gentile's homer came in the first and helped chase rookie right-hander Joel Horlen who made the start for the Sox but couldn't get anybody out.

The Sox rallied for three runs off Steve Barber in the second and went ahead with another three-run rally in the third.

Eddie Fisher and Russ Kemmerer held the Orioles in check until the seventh when Brooks Robinson and Gentile opened with singles. Powell then put the Orioles ahead 8-6 with a homer his sixth of the year.

After Kemmerer walked Jackie Brandt, Turk Lown came on for the White Sox and was joined for a two-run homer by Lau, his second. The Orioles picked up their final run in the eighth without a hit.

Dick Hall, who relieved Barber in the fourth, received credit for the victory.

Baltimore 500,000 516-11 13 3
Chicago 033,000 036-9 2

Barber, Hall (4) and Lau; Horlen, Fisher (1), Kemmerer (3), Lown (7), DeBusschere (8) and Rosell, W-Hall (2-1), L-Kemmerer (1-1).

Home runs—Baltimore, Gentile (3), Powell (6).

Greek Money Wins Preakness

By JOHN CHANDLER
Associated Press Sports Writer
BALTIMORE (AP) — Greek Money, from the Brandywine Stable of Donald P. Ross of Delaware, outgamed Ridan in a furious stretch drive Saturday at sun-scorched Pimlico and won the \$100,000 Preakness Stakes by a nose in a photo finish.

Kentucky Derby winner, Greek Money, finished off the money as did the favored Jaipur from New York.

The first full claim against a winner in the history of the Preakness, inaugurated in 1973, held up the result for almost 10 minutes before it was disallowed.

John L. Rotz, who finished second in the 1961 Preakness with Globemaster as Carry Back nailed him to the wire was also and Greek Money.

The four claim was lodged by Majuel Ycaza, the Panamanian booter, who piloted Ridan, the speedy colt who was Derby favorite two weeks ago but finished third. Ridan rode in the silks of Mrs. Moody Jolley of Hialeah, Fla. Ycaza said Greek Money bothered him all the way down the stretch.

All eyes were on the battling leaders as they came down the long stretch to the wire before 33,854 screaming fans. The temperature was in the upper 90's.

Bill Miller Picked On East Grid Squad

BUFFALO, N.Y. (AP) — All-America end Bill Miller from the University of Miami, Fla., was picked Saturday for the East squad in the second annual All-American Bowl football game June 29.

Linebacker Ed Ryan of Michigan State also was added to the East squad. The West team picked up tackle Ed Blaine from Missouri.

Bears Sign Bivins

CHICAGO (AP) — The Chicago Bears announced Saturday the signing of halfback Charlie Bivins for the 1962 National Football League campaign.

Bivins, 24, joined the Bears in 1960 after playing college football at Morris Brown, Atlanta.

The leaders finished 3/4 lengths in front of Roman Line, the second horse in the Derby owned by T. A. Grissom, of Detroit. It was another 1 1/4 lengths back to

Mantle Probably Out Three Weeks

By JACK HAND
NEW YORK (AP) — Mickey Mantle was in the hospital Saturday, lost to the New York Yankees for three or four weeks because of a torn muscle in his upper right thigh.

With a world championship and a season's worth of the rigors of the season, Mantle's injury was a crippling blow to the team. However, Manager Ralph Houk was relieved to learn that Mickey's left knee, originally feared seriously damaged, was only bruised.

Houk was cheered by the return to the line-up of Roger Maris, who had been confined to pinch hitting duty in the last two games after straining a back muscle in Boston Wednesday.

Mantle's injury in full view of the television cameras on the final play of Friday night's game flooded the Yankee Stadium switchboard with calls from anxious viewers. It occurred under most dramatic circumstances.

Tom Tresh was on second base with the potential tying run and there were two out in the last of the ninth when Mantle smashed a hard grounder at shortstop Zelfo Versalles. The ball was hit so hard that Versalles reeled back momentarily but quickly recovered.

"I saw him fumble the ball as I started to run so I tried to put on a little more speed, hoping I might beat it out," Mantle told his teammates. "When I stepped off, I felt something pop in my right leg. I guess that was the tear. It knotted right up and I couldn't straighten out the leg. When I grabbed at it, I felt."

Mantle fell in a heap about 19 feet from the bag and rolled over. Players from both teams gathered around and a stretcher was brought out. However, he left the

Frank E. Power's Viny Ridge, in the field off 11 3/4-year-olds.

Those who watched Decidedly, the gray Derby winner, waited the late move which brought him

Phils Down Cubs By 7-5

PHILADELPHIA (AP) — The Philadelphia Phillies scored six runs in the fourth inning Saturday and then went on for a 7-5 victory over the Chicago Cubs at Connie Mack Stadium before a knothole crowd of 23,883.

Right-hander Art Mahaffey went the route in the 56-degree temperature—hottest May 19 in Philadelphia Weather Bureau history—to gain his third victory and put an end to his own five-game losing streak.

Mahaffey made it a memorable occasion by hitting the first home run of his career with Bob Wine on base in the six-run ruckus that saddled Glenn Hobbie with his fifth consecutive loss.

Lou Brock clouted his fourth home run of the season for the Cubs, who rallied for three runs in the sixth inning and another in the eighth to make it close at the finish.

Chicago 001,003 010-5 8 3
Philadelphia 006,000 018-7 11 0

Hobbie, Balamo (4), Anderson (7), Schultz (6) and Thacker, Bertell (7); Mahaffey and Dalrymple, W-Mahaffey (3-5), L-Hobbie (9-5).

Home runs — Chicago, Brock (4), Philadelphia, Mahaffey (1).

In the National League game, the Cardinals scored three in the fourth to break a 1-1 deadlock. The Giants came back for two in the bottom of the fourth and then capped off the activity with the five-run spurge in the fifth on the strength of three walks and three singles.

Most Asians Accept Troops In Thailand

By DON HUTH
BANGKOK, Thailand (AP) —
The United States has taken some
lumps from Southeast Asian editors
for sending combat forces to
Thailand, but in the main President
Kennedy's policy seems to
be ahead of the critics.

There has been almost no official comment in Southeast Asia
on a critical article in maintaining
world peace, but many newspaper
editors reflect the thinking of
government circles.

In general, there is acceptance of Kennedy's action aimed at deterring Communist aggression against Thailand, but a widely expressed view is that the United States must press forward to seek peace in Laos and Cambodia.

As for the average man in the street, few in Southeast Asia seem to know what is going on—or care.

Some of the bitterest editorial criticism has come from neutralist Burma, which shares a common border with Thailand and Laos.

But the leading English-language Nation said "a swift show of force and willingness to use that force goes a long way toward deterring aggression" in the present cold war.

In Hong Kong, two English-language papers, the China Mail and the Morning Post, approved the Marine landing.

But Hong Kong's strongly anti-Communist Tiger Standard said

Abe Rogers

Ken Aldridge

Billie James

the move exposes the United States to accusations of imperialist warmongering. It said there also is a risk that the Communists will "proceed unchecked with their offensive in Laos and make the false but plausible claim that they have successfully defied the American paper tiger."¹⁰

For the next two days, Communist newspapers followed Peking's lead in accusing the United States of attempting to invade Laos war the east of Indochina and repeated Peking's warning that "The Chinese people cannot ignore such acts."

The Philippines, Southeast Asia Treaty Organization ally of the

United States and Thailand, on the other hand, was reluctant to sign the United States act. There has been stiff criticism from the Philippines for failure of SEATO to act in past crises.

Manila editorial comment heavily favored the United States.

But the Manila Chronicle, often a critic of U.S. policies in Asia, objected to "any Laotian move that would threaten of Asian peace."

Left-leaning and ultranationalist newspapers in Indonesia were also critical. Warta Berita said "The United States does not hesitate any longer to interfere in the internal affairs of other countries."

in embattled South Viet Nam, where an American assistance command supports the fight against the Communist Viet Cong, government officials privately expressed satisfaction over developments in Thailand. Their attitude was "It's about time."

Me

In Malaya, where militant communism was defeated in a 12-year internal war, the English-language Daily Mail accused Kennedy of resorting to outdated gunboat diplomacy.

Several anti-Communist papers there, however, praised Kennedy's action and called for prompt moves to avert a further breach of the cease-fire in Laos and establish political stability.

The Chinese press in Singapore, where British RAF fighters are ready to hop to Thailand if requested, has taken a hard line. Marines heavy play but has had little to say editorially.

The Chinese Nationalist press on Formosa commended the dispatch of troops to Thailand and suggested in the words of the United Daily News "further posi-

live action." The China Post said U.S. determination to protect Thailand was good but American troops should also be sent to Laos.

Hearings Set On Bank Applications

AUSTIN (AP)—The State Bank

Scheduled for 10 a.m. hearing will be the application to open the Coronado State Bank at El Paso.

MILAM FOWLER and the soil scientist for the Soil Conservation Service examine a profile of soil taken with a hydraulic soil sampler.

Farmer Needs To 'Know His Soil'

It has been said that a farmer needs to "know his soil" as well as he knows his family if he is to get the maximum response from farm management practices that he uses.

It is very difficult for a farmer or rancher to stay in business if he abuses the basis for his existence—the soil.

combined with the soil series name and makes up the soil type name.

Ahliegne clay loam is a soil type. Ahliegne clay loam, gently sloping is a soil phase. The Ahliegne series is in the Chestnut Great Soil Group that takes in broad areas of the Rolling Plains of Texas.

All the facts considered important to farming and ranching are

For the past 18 months a slow and steady survey has been recorded. Each soil is then placed into a capability unit according to its erosion hazard and its treatment needs.

When the soil survey is completed, a soil survey report will be written and all the information known about the soils will be included in the report.

Management practices for each soil, the capability unit that it

[illegible]

When the soil survey report is completed and published a farmer can find his farm on the map, identify the soils from the symbols on the map and study his soils in the soil survey report. He can also compare his yields with those in the report which are an average of all the farms in the county.

the characteristics of the soils, such as texture, color, depth, amount of free lime and other characteristics. On this basis the soils are classified into Great Soil Group, series, type, and phase. There are 7 Great Soil Groups, 48 soil series, 9 phases, and 35 different soil types. The soil series is the name for towns or communities close to the town or communities.

recognized and shipped, such as Stamford or Abilene. The surface texture such as clay loam is com-

trict Board of Supervisors to drop in at the Soil Conservation office at Snyder.

CRMWD Revenues

Still Run Ahead

Revenues of the Colorado River Municipal Water District continue to run slightly ahead of a year ago, principally due to heavier early-year water demands by oil refineries. In the April revenue statement, reflects, supplies, \$1,028 for maintenance, \$1,099 for well field electric power, \$2,417 for water purchases, \$524 for automotive expense, \$32,624 for pumping expense, \$9,892 for administrative and general expense, and \$2,156 for recreation.

For the month, revenues aggregated \$149,746, of which \$112,806 came from the member cities of Odessa. (\$75,163), Big Spring (\$29,995) and Snyder (\$6,666), plus \$1,070 from rural users. April a year ago generated \$152,421 in revenue, and the difference was split about evenly between the April excess of revenue over expenses was \$98,664, making \$451,239 in this category for the year. This has been transferred to debt service and to indented funds.

Big Factor

...the expense of making repairs for the past year amounted to \$183,952. The increase is due mainly to purchases of automotive equipment, payment of insurance, major pump maintenance, replacement of a bearing and other repairs injected a 47,000 expense

April expenditures showed \$227,791.45 for general labor, \$114.14 for maintenance, \$114.14 for supervision labor, \$342 for equipment, \$125.26 for soybeans, \$4.14 for repairs and higher, May \$2,494.14.

CRMWD Revenues Still Run Ahead

Revenues of the Colorado River Municipal Water District continue to run slightly ahead of a year ago, principally due to heavier early-year water demands by oil refineries. In 1964, the April revenue statement reflects:

During the first four months of this year, revenues have reached \$537,454, ahead of the \$614,228 for the same period in 1962. The amount from cities is \$441,192, or \$2,009 less than the first four months of 1961, while the representing revenues are up by \$45,000. The state's Recreation Department revenue of \$30,993 are up about \$800 for the period.

1982, making \$206,206 for the four months. A year-ago expenses for four months amounted to \$182,592. The increase is due mostly to purchases of automotive equipment, prepayment of insurance, a phase pump, maintenance and replacement of a bearing and other repairs injected a \$7,000 expense

April amount \$114; oats, 14-15 higher; May
April expenditures showed \$237 75-1/2; rice, 1-1 cent higher;
for supervision labor, \$243 1/2; cp-May, \$125-26, soybeans, 1-1
grading labor \$129 for repairs and higher, May \$249-1/2.

Weather Is Big Factor

CHICAGO (AP) — Weather became the dominant factor in grain futures trade last week and prices advanced or retreated generally on reports of rain or the absence of it.

The hot, dry weather exerted its most bullish influence in wheat and grain, all most contracts well advanced early in the week as re-

ports are to the trade almost daily of deterioration of crop prospects in western areas of the Great Plains and parts of the Southwest.

Wheat closed unchanged to $\frac{1}{8}$ cent a bushel higher than the previous week, May \$2.14 $\frac{1}{8}$ - $\frac{1}{4}$; corn $\frac{3}{8}$ higher to $\frac{1}{4}$ lower, May \$1.14; oats, $\frac{3}{8}$ - $\frac{1}{4}$ higher, May 72 $\frac{3}{4}$ - $\frac{3}{4}$; rye, $\frac{1}{4}$ - $\frac{1}{2}$ cent higher.

May \$1.25 1/2-26, soybeans, 1/4-1/2
higher, May \$2.49 1/4.

Don't Forget Father's Day is Just 4 Weeks Away

GETTING FACTS—Robert R. Patterson, chairman for Americans abroad, and Mrs. Dan Martin, working with committee on homes and student family adjustments,

get the real facts from Mrs. Raymond Williams, American mother for the past year to our foreign exchange student.

FINE JOB—Mr. Robert Clinton, principal of the Snyder High School congratulates Mrs. M. H. Roe, president of the local AFS chapter for the fine job they

are doing. Mr. J. M. Kayser is chairman of the school liaison of AFS.

THE SNYDER DAILY NEWS

VOL. 13, NO. 17 SNYDER, TEXAS, SUNDAY, MAY 20, 1962 SECTION B

CHECKING CLUBS—Mr. Badger Robertson and Mrs. Carl Dillaha are busy contacting the various men's and women's clubs, asking for their support in this community endeavor.

AMERICAN FIELD SERVICE

— IN FULL SWING —

The month of May has been designated "American Field Service" month in Scurry County. This program enables our public schools to receive a foreign exchange student for one year, and also sends one of our students to a foreign country during the summer months.

This worthwhile program, gives our students going abroad an experience long remembered. From this experience comes the knowledge of how people in other parts of our world live. For the exchange student who comes to us, it gives them an insight to the American way of life.

In order for the local program to participate it takes approximately \$1500 per year for the two students. Our group of AES leaders in Snyder are working tirelessly to raise these funds for the 1962-63 year.

Donations are being made from various clubs and civic organizations, but, anyone wishing to make a donation personally, it will be greatly appreciated. Checks should be made payable to Snyder Chapter, AES, and mailed to Box 019, Snyder.

MRS. HUGH TAYLOR, chairman of the telephone committee has already made much progress in contacting various individuals.

CHECKS POSTER—Rev. Jack Dean, chairman of excursion committee, looks at the poster for AFS with

Mr. Wayland G. Holt, secretary of the local chapter.

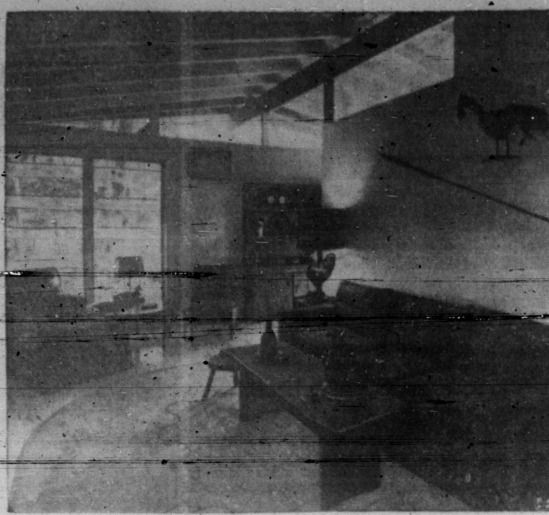

MAKING PLANS—Miss Virginia Groves, second from left, student council chairman, and Mrs. Lyle Alexander, chairman, public relations in community homes, explain their plans to Rev. Walter Lenta, left

and Rev. Lyle Alexander, standing. Lenta and Vanderpool are on the committee on homes and student family adjustments.

CHECK PRESENTED—Miss Mary Ann Moffett, president of the Future Teachers Club of Snyder High School is pictured as she recently presented a \$50 check from the club to Mr. Jim Traugott, president of the classroom teachers. The money will be added to the scholarship fund.

RESORT RETREAT—Westport, Conn., furniture takes to Summerplace, Fla., atmosphere without a hitch. Mrs. Elaine Francis, whose home this is, advises persons planning to furnish a vacation or retirement home to take along the furniture they already have.

Old Furniture Often Fits New Home

By VIVIAN BROWN
AP Newsfeatures Writer

Furnishing a vacation retreat or moving to a retirement home? Consider taking your furniture with you.

"Many people sell all their furnishings on the theory that they should start from scratch in the new climate, but that move may prove to be regrettable," says Elaine Francis, a Florida transplant from Connecticut.

"It's especially disconcerting when you find yourself trying to find the same type of furniture you've given up," she says, "once you discover that your own furniture could have been integrated handily in the new area. And another good thing about having your own furniture is that your new abode will feel like home sooner than you'd expect."

Mrs. Francis' two bedroom one-bath cottage at Summerplace, Fla., had to look weathered inside, she says. It's that kind of place, tucked in between ancient live oaks and palm trees. Stark modern furnishings wouldn't be the order of the day, even though the ocean and beach are a stone's throw from the house. The other factor is that Mrs. Francis' cottage is used as a model home and for entertaining.

Mrs. Francis' advice is to stick to wooden pieces that children can't hurt. She likes large crash-proof ash trays for the same reason.

"And forget clutter, draperies. You want the view, privacy and little upkeep."

"Use small rugs. A broom should be the extent of your household equipment," she advises.

Most vacation homes will attract guests, she says. The same rules apply to your home that apply to a guest cottage or a guest room in vacationland: avoid perfection.

"If guests take over your cottage for awhile, post a typewritten guide to the house on a kitchen wall as I do. That way they can bumble around in cupboards and closets, feeling their own way. They shouldn't feel they are in the midst of clutter or that everything is precious and breakable."

And you shouldn't feel that way either, if you'd enjoy your home...

MISS DONNA SUE ALEXANDER—Miss Donna Sue Alexander will become the bride of William Sidney Hembree Jr. June 30 in the Park Cities Baptist Church, of Dallas. Parents of the couple are Mr. and Mrs. J. Weldon Alexander of Dallas, and Mr. and Mrs. William S. Hembree of San Angelo. Miss Alexander attends Baylor University, where she is a member of Phi Beta Mu and Alpha Lambda Delta. Her fiancé is a pre-law student at Baylor and a member of Rho Gamma Sigma. Mr. and Mrs. A. C. Alexander and Mr. and Mrs. J. O. Morrison of Snyder are grandparents of the bride-to-be.

Scurry County Students To Receive Degrees At Tech

LUBBOCK—Texas Tech has 1,052 candidates for degrees at spring commencement May 28. Fred H. Moore, Mobil Oil Company president and Tech graduate, will give the principal address during the exercises at 8 p.m. in Lubbock Municipal Coliseum.

The Rev. John William Lincostre, pastor of First Presbyterian Church in Houston, will deliver the baccalaureate sermon at 8 p.m. May 27 in the Coliseum.

Candidates for undergraduate degrees, by school, include:

SCHOOL OF ARTS AND SCIENCES

Bachelor of Arts

Ira—Dorothy Ann Bowles, Journalism.

Snyder—Lydia Ann Hutchins, Mathematics.

Bachelor of Science in Education

Snyder—Sandra Lynn Feather, Elementary Education. Lanelle

Smith Rabin, elementary education. Timmy Anon Riley, physical education.

Bachelor of Science in Agriculture

Fluvanna—Wendell Rex Pyle, agronomy.

Bachelor of Business Administration

Snyder—Jerry Allen Davis, accounting.

Bachelor of Science in Engineering Physics

Hermleigh—David Arlon Groves.

Bachelor of Science in Petroleum Engineering

Fluvanna—Johnny S. McDonald.

Bachelor of Science in Home Economics

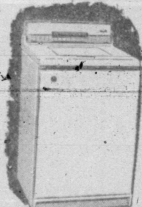

Hermleigh—Carolyn, Murphy, home economics education.

Detroit's Frank Lary pitched 21 complete games during the 1961 season. His closest rival was Steve Barber of Baltimore with 14.

Omelets For Any Meal

What's the most versatile single dish?

"The omelet," says Mary Jane Forest. "One of my favorite New York restaurants lists 536 on the menu, and the owner says there could be thousands more."

"A glance at that menu would inspire any cook, and stop her from thinking of the omelet as basically a breakfast dish. It's in style all day long. Chicken, lobster, fish, mushrooms, cheese—your favorite meat or meat substitute—may be combined with an endless variety of herbs and vegetables to make a dish fit for a king."

"The secret of an exciting omelet is color. Use your garden as inspiration for your kitchen palette. Parsley, asparagus, or any green vegetable for summer green. Shrimp, lobster, red caviar for flowery pinks and reds. Diced carrots for a bright marigold orange."

"Add an elegant touch to your omelet by serving them in individual copper skillets, the way many restaurants do," advises Miss Forest. "Skillets 7 or 8 inches across are best. Easy to keep clean, too. A good copper cleaner brings a festive glow to copper that makes any meal look like a special occasion."

WOMEN'S CALENDAR

SUNDAY

Scurry County Sheriff's posse to attend play day at Sweetwater, 2:30 p.m.

MONDAY

Travis Junior High School P-TA 7:30 p.m. in cafeteria.

TUESDAY

The Yankees will hold their 1962 Old Timers' Day on Saturday, July 28. The Chicago White Sox will be their "for real" opponents.

MRS. ANDREW OLSEN

Eudera House Becomes Bride Of A. Olsen In Chapel Rites

The Goodfellow Air Base Chapel was the setting for the double ring ceremony of Eudera House and Andrew Olsen, at 7:30 p.m. May 19th. Ten votive cup candles lighted the altar.

Chaplain Charles S. Edwards performed the ceremony.

Parents of the couple are Mr. and Mrs. Travis House, Route 3, Snyder, and Mr. and Mrs. Ralph Olsen, 12 Bertwell Road, Lexington, Mass.

The bride wore an eyelid embroidered sheath dress, topped with a waist length jacket. A crown of embroidered flowers and nylon with a short net veil, set atop her head. White accessories completed her ensemble. Her something old and borrowed were cultured pearls, something new, her dress, and something blue, a lacy blue garter.

Two white orchids surrounded by stephanotis made up her bouquet.

Maid of honor, Miss Sandra Nicks of Sonora, was dressed in a beige sheath with beige accessories.

J. B. Underwood of Oklahoma City, Okla. served as best man.

The bride is a 1961 graduate of Ira High School and has attended San Angelo College. The groom attended the University of Massachusetts for three and one-half years.

Elect Cone J. Merritt Justice Of The Peace Precinct 1

To all of the Voters of the Justice of the Peace, Precinct 1:

I thank you for your consideration that you gave me in the first primary election.

Time and means are limited with me. I shall try to see each one between now and the second Primary, but if I fail, would you accept these general mediums as a personal request for your support. I certainly would appreciate your vote and influence. If elected to the place, I again promise to perform the duties with courtesy, fairness and reason.

I have worked with people, men, women, boys and girls for 30 years. I believe I know in a small way what it means to have the privilege and responsibility of a place of service.

Thanks again for your vote and kind consideration.

Cone J. Merritt

Knitted hair hides a multitude of curlers in the summer.

Kutty Knits Make Kneedles Klick

By JESAN SPRAIN WILSON

AP Newsfeature Writer
Today's knitted clicker keeps one eye on what's going on in the world and the other on her knitting instructions.

The results of this ocular exercise in this dizzy world are "knitted knits," original, imaginative and knobby as anything out of an Italian boutique collection. The maddest (and wisest) are the knit knitters this year. They take their cues from the American Indian (by way of Paris at La St. Laurent) and an American address (by way of a misplaced Egyptian in Italy).

Somehow knitting up a bandana never seemed as glamorous (even

as shawl-like proportions) as it has been since French designer Yves St. Laurent spied it and tried it successfully in his last collection.

Now the Yankee knit fan has stolen it, worked out a novel stitch pattern for this triangle, added rows of fringe and buttoned it under her chin. What she has, as a result, does not look as much like a cowboy scarf as it does an Indian war bonnet.

Although Cleopatra never had time to knit, she nevertheless did recognize a timeless fashion when she saw one. Today Elizabeth Taylor, the latest cinema version of the Egyptian queen, sails down the Nile (in Rome) in the splint

of an immortalized version of the Cleopatra headgear, and American knitters are frankly gitching up their own.

Some of the knit Cleopatra hats have black fringe bangs, and most have the edges fringed to shoulder length until you can't really tell whether the hat is a hat or a wig.

But why a knit hat for the summer?

Ask a girl who has a sports car, goes swimming daily, or just wants to hide the curlers in her hair without being unsightly. If you can hear over the clack of her needles, you'll get your answer.

TASTY SUPPER

These mushrooms give a fillip to any menu. Serve them warm as soon as you make them, or chill them overnight or longer before offering.

Fish Fillets
Potatoes Green Peas
Rowena's Mushrooms
Salad Bowl Bread Tray
Fruit Beverage

ROWENA'S MUSHROOMS

1 pound mushrooms
1/2 cup salad oil
1 1/4 teaspoons salt
1 clove garlic (crushed)
1 teaspoon prepared mustard
1 tablespoon sugar
2 tablespoons water
1/4 cup cider vinegar
1/3 cup olive oil
Wipe mushrooms with a damp cloth. Quarter small mushrooms; halve medium or large ones and slice medium-thin so caps and stems are attached. In a large (at least 10 inches) skillet, heat mushrooms and 1/2 cup salad oil over low heat; toss mushrooms to coat with oil. Cover and cook, stirring a few times, just until mushrooms lose their raw look. Meanwhile, in a small bowl, combine with a fork or whisk the garlic, salt, mustard, sugar, water, vinegar and 1/3 cup olive oil; pour over cooked mushrooms in skillet; remove from heat and mix well. Serve at once or chill in a covered container. Makes 8 servings.

The first man to fall in the Battle of Hastings was a Norman minstrel knight. He led the first charge chanting "the Song of Roland."

The United States Lawn Tennis Association sanctioned 728 adult and 731 junior tournaments in 1961.

The Gardeners Corner

By EARL ARONSON

AP Newsfeature

WHEN YOU SEE the graceful tulips, daffodils, hyacinths and other spring bulb plants providing early color to the landscape, do you ever wonder about their origin?

The spring there are an estimated one million such flowers in bloom at the 12-acre Sterling Forest Gardens at Tuxedo, N.Y., only an hour away from Manhattan's skyscrapers. And among the splendor are 11 rare tulips supplied by hybridist Hildebrand Van Eeden. Reportedly, there are none like them anywhere else in the country.

Who could tell us about developing tulip bulbs better than Van Eeden?

It takes an average of seven years from the cross (pollination) to develop a new bulb. A cross made in early May will produce seed by the end of the month. And the seed is kept until fall for planting.

The next year the bulb is tiny. Left in the ground for six-seven years, it will develop and produce its first flower. The plant is allowed to bloom for three years before final judging may be completed.

The 11 new bulbs in the Sterling collection are 15 to 17 years old (since the original cross).

Such bulbs have Oriental blood. In their breeding, the Dutch first increased the size of the flowers and then brought the Oriental blood back into the varieties.

The Greigil type (red) came from Bokhara, the Russian part of the Dardanelles near the border of Persia. The original Greigil had more graceful forms than the Darwin or Cottage types, which were used for increasing the stem length.

The range of color in the Greigil is limited, mainly to red and yellow, with no pink or white. But the foliage is striped and blotched.

So rare are the 11 new tulips at Sterling that Dutch hybridist D. W. LeFeber, could spare only one bulb of each type.

So a peek at these plants actually is a preview of 1963 tulips, as 30 years are needed to develop enough bulbs for home gardeners.

In the miniature greenhouse at Sterling also is a species tulip, Aitichsonii, one of the original wild plants from which many of today's varieties stemmed. This is one of the smallest tulips known. The flower is only one inch in size. In comparison, the Holland National, one of the 11 new ones and probably the largest tulip known, has a flower seven inches tall and 18 inches wide.

More practical home gardeners may use a collection of 25 new and standard varieties of tulips and 100 varieties of daffodils.

In Sterling's Living Library of Tulips are 16,000 bulbs planted among a network of tanbark paths. Along Daffodil Trail are more than 6,000 of these blooms. And among the most unusual jonquils are three said to be prehistoric.

with trumpets that are split and woven into the internal envelope of the flower.

Late spring is a good time to trim evergreens, especially if you want to confine them to a limited area.

Restrain yourself in clipping.

Broad-Beam Latest In Fashions

NEW YORK (AP)—The capabili-

ties of elevators, automobiles and night club dance floors were challenged today as the Christian Dior house here introduced the widest hipped costume since the battle-

A crush of fashion buyers who would never have squeezed into the showroom if they had been wearing designer clothes.

The new suits, nevertheless, applauded the broad-beamed silhouette as the best he has done yet. Menikows were heavily shadowed eyelids, false eyelashes, orange, blonde, or white streaked black hair, tams or bullet-shaped hats and remote expressions on their faces as they began the style parade in bulky wool suits and dresses Wednesday.

The jacks were sloped-shouldered with three-quarter length sleeves. Bodices were snug at the bosom but blousy at the waist. Girding the ballooning skirts were contour belts that rested just above the hipbone.

Worn with these fabrics as deep textured as rugs were blouses blinding with crystal jewels or with silky satin, or diaphanous lace. Satin, a favorite, was often used as trim on the wool suits. So were fur and velvet.

Every now and then, however, the models changed the pace with costumes as spare as exclamation points. But they returned again in skirts that parachuted out from multi-pleated or gathered yokes.

At the daytime costumes gave way to the night life wardrobe, skirts grew in volume, knocking programs out of the hands of the front row audience as they swished along.

One slim white bodice of a cocktail dress perched on a huge ball of black fringe, a skirt shaggier than untrimmed poodle. Even the dinner gowns that did not gather at the waist tapered wide enough at the hems to require double doors for coming and going.

However, the buyers found a different story down the street at Jane Derby's.

There, as was gathering skirts—wide, ruffled, and bows to clothes when no one else would think of it, Miss Derby has reversed herself. Her silhouettes today are spare. The details are minimum. And a V-neck is always there, sometimes framed with leopard trim, or made modest with insets when it plunges too low. Her sleeves are longer this year, too.

BRIDE-ELECT HONORED—Miss Belva Nell Davis, bride-elect of Darby Scott was honored with a miscellaneous shower Thursday evening in the home of Mrs. Bruce Evans. Hostesses were Mmes. Evans, W. W. Parker, Bill

Evans, Bertha Cotton, Melvin Calhoun, Merle Wilbourn and Doss Ray Smyrl. Pictured above from left, Mrs. Howell Scott, mother of the prospective groom, Miss Davis and Mrs. Jimmy Davis, mother of the honoree.

STORAGE FOR SMALL ITEMS—Half the closet behind the sliding mirror doors is equipped for the hanging of clothes. The half which is shown has been converted to storage space for small items by the addition of pull-out plastic drawers and a shelf.

You Can Install Storage Drawers

By VIVIAN BROWN
AP Newsfeatures Writer

Ask a woman whether she needs more storage and shelf space and you can be almost certain she'll say yes.

Shallow compartments for wearing apparel and accessories are needed in bedrooms usually, in addition to other needs, and more drawer space is required than available in kitchens. Kitchen storage space often is wasted because original planning did not utilize properly the space that is available.

New instant storage drawers may be installed by the handyman in a jiffy and are the answer to many situations.

Modular drawers and slide units are available at building supply yards. The home handyman may install them by spreading cement on a panel of plywood or hardwood and then pressing a plastic panel to the backing. Molded drawers, wood and glass shelves may slide in on the panel slides. They are adaptable to many types of installation including pole systems and storage walls.

The drawers of beige plastic are available in a standard depth of 17 1/2 inches and in heights of three and six inches, and in five widths ranging from about 16 to 46 inches. Birch or walnut fronts are optional, and one might paint the drawer fronts to match room decor.

Kitchen requirements for pots could be the six-inch height. These may be useful also for some small appliances. Drawers may be spaced with shelves in a deep-closet for more efficiency, and since drawers move easily on the preformed slides even in the presence of moisture, they may be used in bathrooms and in basement workshops.

Drawers may be planned to the height requirements of tall men who dislike bending down to remove clothing from dresser drawers. The easy-to-wash compartments may be used in the nursery and a teen-ager's room, ideal for collections for the moment

that make for considerable clutter.

The drawers may be used without attached fronts in cupboards or cabinets since they are available with molded pulls.

If drawers are to be part of a new closet in a bedroom, a wood closet frame may be installed to slide panels and drawers added exactly to fit requirements.

Reporter Has Fiction Skill

"The Northern Palmyra Affair" By Harrison E. Salisbury.

This moving novel takes the reader into the Leningrad of the fear-filled Stalin era. Its action comes to a focus in 1949, but its main characters are portrayed in perspectives that reach back into the 1917 revolution.

Its central figure is Irena Galina, a sculptor descended from a liberal family. And she is quite a figure. Her love affairs have taken place in the upper echelons of the Leningrad hierarchy. They began with the engineer Morozov. Later in Paris here was General Orlov. After her return to Russia she married her writer Maxim Voronov.

She has crossed the paths of Chekovsky the security agent, Ivanov the party secretary and Smirnov the newspaper poet. She has spurned Smirnov, and it was he who brought her downfall and banishment after she had created an anti-war statue.

The climax comes when Irena's son, Michael dares to bring her body back to Leningrad for burial, and dares to entice the major characters in the book to attend her funeral.

Salisbury knows the Russia of which he writes. He won a Pulitzer Prize with his news dispatches in the New York Times. He

has written five books of non-fiction, but this is his first novel.

As a fiction writer, his first attempt surpasses the skill of most beginning novelists. His narrative rings with the echoes of the revolution and the Leningrad siege. It is steeped in the deadly atmosphere of Soviet intrigue and it builds suspensefully to its climax.

Mrs. R. Robinson Hostess To Murphy H-D Club.

The Murphy Home Demonstration Club met Thursday May 17th, in the home of Mrs. Raymond Robinson, for an all day meeting with a covered dish luncheon.

The roll call was answered by nine members and three guests. Mrs. Glenn Hoffman and Mrs. Fred Beatty of Snyder, and Miss Ruby Butts, County Home Demonstration Agent. Mrs. Beatty gave a demonstration on how to make a rose tree, after completing it she presented it to the hostess, Mrs. Robinson.

Mrs. A. J. Ray showed a film on making and serving quick meals.

The hostess gifts were presented to Mrs. Freda Murphy and Mrs. Glenn Hoffman.

Mrs. Milton Davis will have the Club in her home June 7th.

Patricia Gilmore, Owner

LIBRARY NOTES

Begin preparing for college early! That's the advice of college and university admissions officers to high school students who are interested in going to college this fall. Numerous books and other materials which will be helpful in planning a college career are available at the Snyder County Library.

For those who have not yet selected a college, the library has a collection of catalogs from approximately thirty colleges and universities in Texas and throughout the country. These can be helpful not only to high school seniors who are thinking about going to college but also to freshmen who wish to plan their course of study to meet college requirements.

The catalogs give entrance requirements, descriptions of courses, and much other important information about individual colleges and universities. Schools of all types are represented in the collection, including junior colleges, four-year colleges and universities, military academies, and others.

Books that students will find helpful include such titles as "College Ahead" by Eugene Wilson; "You Can Win a Scholarship" by Brown and Warner; "College Entrance Tests" by the College Entrance Examination Board; and "How to Pass College Entrance Tests."

The patron who wishes to combine self-education and pleasure, Snyder County Library suggests reading up on a hobby. The average person spends more than sixteen years of his life in leisure-time pursuits, according to authorities.

Marjorie Mulac's "Hobbies" discusses a number of leisure time activities under such headings as "Things to Make," "Things to Learn," "Things to Collect."

Speaking of collecting, the library staff suggests that you visit your library and enjoy the interesting mineral collection displayed by Mrs. Annie Bailey. You will find such interesting items as Banded Amethyst from Mexico, Tiger eye from Africa, Kona dolomite from Michigan, Uranium from Utah, and many, many others.

If you have a collection you would like to exhibit for library patrons, the library staff would be most happy to talk with you about it. We are always interested in knowing about prospective displays.

New additions to the record library include Betty's 8 pieces for Orchestra, Op. 6 with six pieces

for Orchestra by Webern and Schoenberg's "Begleitungsstück" conducted by Robert Craft. James B. Coover, Music Librarian, Snyder County Library, says Craft's readings defy competition for their clarity and orchestral precision. Schoenberg's work appears for the first time on record. He says that all in all, this recording is practically essential to any library.

Mr. Coover also reviewed Brahms' Symphonies; Tragic Overture; Academic Festival Overture. Philharmonia Orchestra, Otto Klemperer, conductor. "It will be a long time before these performances are surpassed. Fine stereo sound." Of Bruckner's "Symphony No. 9, D minor," conducted by Claudio Abbado, Bruno Walter, conducting, he says the stereo recording adds the final evidence to a highly recommended record.

When buds are ready to break, it's count-down time for pesky spring cankerworms.

Living time capsules, they hatch from eggs only when their chow is ready for gulping—precisely when leaves unfold. Among the hungriest critters in insectdom, they frequently champ their way through tender greenery until the tree victim is completely defoliated. In festsations of two or three years weaken trees to the point where many may die.

Fortunately, the cankerworm, often known as the measuring worm or inchworm, is easily controlled. One spraying of DDT, arsenate of lead or malathion is usually enough to exterminate the bulk of the population.

Cankerworms are something of mystery guests. They have the habit of appearing in certain areas about every seven to nine years, but nobody is able to foretell where or why they'll appear. The Epicurean taste of the cankerworm leans to elm, oak, apple and linden. Maple, dogwood and other valuable specimen trees are also included on the menu. Cankerworms are such gluttons they'll consume new leaves as fast as they'll grow. Severely infested trees will remain bare until the feeding is completed in late spring.

Caterpillars are green to black and about one and one-half inches long when first grown. They have legs on the front and rear and crawl by inching along. They couldn't exist without their wonderful built-in timing mechanism. Caterpillars hatched before leaves unfold would starve. Similarly, caterpillars hatched later in the growing season would find adult leaves too tough to chew and digest.

Cankerworms have an annoyance factor for humans, too. They spin down on silk threads and are picked up on clothing of people walking under infested trees.

Lehigh University has won 15 Eastern Intercollegiate wrestling championships, more than any other school.

Cankerworm Is Glutton That Strips Trees Bare

Meany Urges Short Week

ATLANTIC CITY, N.J. (AP)—George Meany, president of the AFL-CIO, says a 35-hour week without any reduction in pay would solve the problem of unemployment in the United States.

He predicted Thursday the AFL-CIO would start a nationwide drive for the shorter week "unless we very quickly see the end of this unemployment problem, unless we see the economic growth step up beyond the 2 1/2 per cent which is slowly but surely going to relegate us to the status of a second class nation, unless this happens right soon."

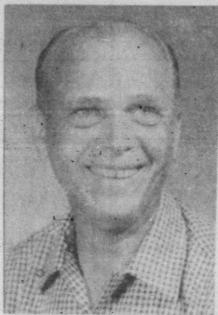

Meany addressed the biennial convention of the Amalgamated Clothing Workers Union, which gave him thunderous applause.

The clothing workers, a 400,000-member AFL-CIO union, voted Wednesday to seek the shorter work week with no pay cut.

The stand was taken only one day after Secretary of Labor Arthur J. Goldberg said the administration opposes the shorter work week. Goldberg said the administration considers it no solution to the problem of unemployment.

Most Farmers In Texas Needing Rain

COLLEGE STATION (AP) — Farmers and ranchmen are sky watching for rain signs. The need for rain, said John Hutchison, director of the Texas Agricultural Extension Service, is practically statewide.

Crop growth in many years and the final figures for small grain production may depend upon what happens soon, he said. Winds and high temperatures have robbed the moisture. Only spots over the state have adequate moisture.

Moisture was short to very short over the Panhandle before the rains. Wheat, which needed cotton planting is continuing but the dry, hot winds have been damaging to young cotton, as well as wheat. Range conditions were generally good.

Hot, dry weather delayed dryland cotton and corn planting on the South Plains. Planting was delayed in the irrigated cotton north of Lubbock was planted but in the south it ranged from 65 to 85 per cent. Corn planting is complete. Ranges and pastures need rain.

Moisture was needed in 17 of the 22 counties in the Rolling Plains (Verdon). Wheat harvest will begin in 10 to 14 days. Rust was bad in a few counties. Many fields in one county are bare of leaves. Cotton planting is 40 per cent complete on the average and sorghum 50 per cent.

Moisture is needed in North Central Texas. Cotton is still growing but corn and sorghum growth is slowed.

Moisture is adequate to short in Northeast Texas where the high winds have sapped the soil. Pastures and row crops still are making good growth. Wheat and oats are heading. Some cotton is up.

It is dry in far West Texas. Irrigated cotton is growing well and yields of 1½ tons an acre on alfalfa were reported from Ward County. Blowing sand in the Midland area caused some damage to young crops.

High, dry winds coupled with fast growing vegetation, have depleted soil moisture in Central West Texas. The oat crop will be very light and wheat has suffered. Sorghum is planted.

Moisture in Central Texas is adequate in the eastern counties and short in the west. Cotton in the eastern counties is being cultivated, but a good rain would help. Corn and grain are in. Oats are maturing with yields fair to good.

All crops are making progress in East Texas where moisture ranges from adequate to short. Oats are being cut for hay. Cotton, corn and watermelons are growing fast.

All counties, except those along east- and north boundaries of South Central Texas, need rain. Corn and sorghum in more favored areas are making good growth and cotton planting is complete. A light flax harvest

has started; some rice is being replanted in Calhoun County; peanut planting is on; and broom-corn is making good growth.

Farmers are busy in the upper Gulf Coast area clearing crops of grass and weeds and winding up rice planting. All crops are making good growth.

Moisture has improved in South Texas but is still short in most areas. Irrigated cotton is making good progress but dryland crops need rain. The vegetable and melon harvests are on. Livestock are in fair to good condition.

Californians Are Puzzled By Market's Ups And Downs

By SAM DAWSON

sharp down and ups of stock prices in recent days worries many Californians — but worries them even more. Many fear speculation first pushed prices too high and then reacted too much to the squabble over steel prices and to government stock market investigations.

Secret Kept By Playgoers

LONDON (AP)—One of the world's best kept secrets is the identity of the murderer in Agatha Christie's play "The Mousetrap."

In November it will complete 10 years of uninterrupted performances. More than 1½ million people have seen the play and it seems—have kept silent about the killer's identity.

"It's refreshing," says producer Peter Saunders. "The people learn the name of the murderer, but there's some sort of code that seems to prevent their spilling the beans."

"The Mousetrap" has a cast of eight. Over the years, 65 actors and actresses have played its roles. Author Christie has seen the production 45 times. It has helped make her a millionaire.

How much longer will a run-house, said the producer, "and I long ago gave up trying to forecast the length of the run. I've been proved wrong too many times."

Soviet's Announce Golovko's Death
MOSCOW (AP)—Moscow newspapers announced today the death of Adm. Arseni Grigorevich Golovko, first deputy commander in chief of the Soviet Navy. He was 55.

The obituaries said he died Thursday after an illness. The nature of the illness was not disclosed. During World War II Golovko was chief of staff of the Baltic fleet and then chief of staff of the northern fleet.

Chief Should Have Knocked On Wood
ROCHESTER, Mich. (AP)—Police Chief Sam Howlett said he had knocked on wood Thursday when he told his men that vigilance and thorough police work had prevented an armed robbery from occurring here since 1906. Howlett was still on the subject when the alarm came in. A man with a pistol robbed the Western Union office of \$25.

May we join other employers in this tribute to the people who make Snyder

Top Demo Clans In Kennedy's Home State Locked In Battle

EDITOR'S NOTE—By ordinary expectations, the Democratic Party in President Kennedy's home state should be in line for the two most powerful clans in battle, the Kennedys and the McGoverns. But the McGovern clan is locked in battle, the McGoverns have shaken the state, and the McGoverns are far from cloudless. Here is a guided tour through an astonishing battle.

BY TOM HENSHAW
AP Newsfeatures Writer

BOSTON (AP)—Two very powerful men in Washington are Democrats who call Massachusetts home.

President John F. Kennedy sits in the White House. Rep. John W. McGovern sits in the speaker's chair in the House of Representatives.

You'd think that this august wall for the Democratic Party in Massachusetts would look as proud, satisfied, well-oiled machine, purring along smoothly on all cylinders.

But a brief survey of the Democratic Party in Massachusetts is a visit to a wonderland of confusion, rivalry and apprehension through which blows the chilling wind of scandal in an election year.

Edward M. (Ted) Kennedy, the President's brother, and Edward J. McGovern Jr., Speaker McGovern's nephew, are running

against each other for the U.S. Senate.

But there are people who will tell you, in effect, that their primary concern is simply to get away from Massachusetts politics, like their illustrious relatives before them.

"Jack Kennedy never had much to do with the state once he was elected to Congress in 1946," says Dr. Charles Cherington, professor of government at Harvard. "I think he was quite right. He saw state politics were a virtual maelstrom."

"Bright young men seem to regard Massachusetts state politics as hopeless," says Prof. Paul Hefstrom, chairman of the Government Department at Boston College. "They don't want to get involved in it."

What is so peculiar about politics—particularly the Democratic kind—in Massachusetts, the platform from which President Kennedy and Speaker McGovern vaulted onto the national scene? Massachusetts Democrats rate high as individuals.

Early next month, they will gather for three hectic days in Springfield in a pre-primary convention to give the party endorsement to candidates for statewide office. Anyone with a slight knowledge of Massachusetts politics can

Spas Form Big Industry In Germany

BY RICHARD O'REGAN
FRANKFURT, Germany (AP)—With warm weather hundreds of thousands of Germans are off to the baths—sulphur baths, salt baths, radioactive baths, mud baths, saffron baths, cold water baths and sea water baths.

Germany's spas have become one of the great little industries of this highly industrialized society. There are more than 200.

Some take the baths at their own expense, but many at the expense of employers.

"Baths are always good psychologically," says an American doctor practicing in Germany.

"But I find it a great paradox that in a modern, scientific society, so many Germans are convinced they can be cured of practically anything by taking a spa."

German doctors disagree.

"I feel that the majority of baths do really have useful benefits and assist in cures," a prominent German internist said.

In any case, Germany's socialized medicine has put new life in old resorts which began going downhill after World War I.

The great elegant hotels and sanatoria—mostly built in the times when the Kaisers partook of the waters, with their courts—have been modernized.

Now most are filled with middle-class office employees, officials or workers whose doctors have recommended a cure.

"I am convinced that many of my patients, who have adhered strictly to the regimens laid down, have benefited," a German heart specialist said.

"But many people go who don't need rest and special treatment. They regard a cure as great fun. They slip away from their diets to eat big meals in restaurants, go dancing or to the casinos until 3 in the morning and then get up at 7 for their treatments."

"And I don't mention those businessmen who take the cure merely to get away from their wives and have a good time with ladies also supposedly taking treatment."

One type of bathing attracts Germans from the sooty Ruhr and the dirty industrial cities. It is organized by 70,000 Free Body Culture followers.

"Free Body Culture," explained a doctor, "is a synonym for nudism."

There are many restricted nudist beaches on the north coast of Germany where people claim they can be cured of the ailments of our civilization—but you can't get your insurance company to send you to one for a cure. You have to pay your own way.

"I wouldn't know if nudism cures anything."

Richard O'Regan has been stationed in Austria and Germany since World War II. He is now chief of AP operations in Germany.

Uganda To Become A Commonwealth

KAMPALA, Uganda (AP)—The British colony of Uganda has decided not to become a republic when it attains independence in October. Instead, it will remain in the Commonwealth as a full member, acknowledging Queen Elizabeth as its head and as queen of Uganda, Gov. Sir Walter Coutts announced Thursday.

Coutts made the announcement in a speech from the throne, on behalf of Prime Minister Milton Obote, at the opening of a new session of the National Assembly.

Junior Editors Quiz on MOTION

QUESTION: What keeps a pendulum swinging in a grandfather's clock?

ANSWER: Long ago, the astronomer Galileo observed that the movement of a lamp, swinging back and forth from a very long chain in the cathedral of Pisa, was always steady. But it was not until 1657 that the Dutch astronomer Huygens developed a practical pendulum clock. In this kind of clock, the power to make the wheels turn is provided by a heavy weight—which moves slowly down by the force of gravity. But the wheels are held back by an "escapement" (see diagram) which is itself connected with the swinging pendulum. By its movement the pendulum opens the escapement so that the wheel connected with the weight is suddenly released and this gives a "tick" to the pendulum. The pendulum is pulled back from its swing by the force of its own gravity, and is then given another kick which helps to swing it the other way. These steady swings of the pendulum, back and forth, hold the mechanism of the clock to an even pace and regulate the movement of the hands so that it never varies as they show you the time.

FOR YOU TO DO: Tie a weight to a cord and swing it back and forth like a clock's pendulum. Notice that (unless you swing it all the way around) the weight moves at a steady even clip. It is difficult to hurry it or slow it down! That is why a pendulum is so useful in a grandfather's clock.

(Thomas Davis of Fitchburg, Mass. wins \$10 for this question. Mail yours on a postcard to Junior Editors in care of this newspaper.)

Eating Well Or Just Eating A Lot

Had enough to eat today? Yes, unless we felt pangs of hunger at the moment. But specialists in the science of nutrition believe that many of us have not had enough to eat today—not enough protein, calcium, iron and vitamins. While we've had more than enough fat and carbohydrate (starches).

It's confusing to many that we should be called a wonderfully well fed nation by the American Medical Association, that our government assure all essential nutrients are in ample supply, and at the same time have nutritional deficiencies, heart specialists, bariatric and obstetricians express concern about our eating habits.

Some of the results of our poor food choices show up in the unsatisfactory record for physical fitness shown by our teen-agers, the scandalous condition of the teeth of our armed forces recruits, the high death rate from heart disease of middle-aged men, and recent reports of low vitamin levels in the blood of our babies.

Have these conditions occurred because Americans are uninformed about the essentials of an adequate diet? Booklets about popular diets are easily obtained free by everyone. These pamphlets simply list the recommended daily intake of the important nutrients for babies, teen-agers, older adults with strenuous or undemanding jobs.

But, despite all the information available about our food energy needs (calorie intake) and our requirements for protein, carbohydrates, fats, vitamins and minerals, many Americans ignore the rules and choose their food on a hit or miss basis.

Proof of the existence of poor eating habits is presented in the reports of many scientific surveys. A few years ago, Dr. Pearl Swanwick checked the diets of over 1,000 women in Iowa and found almost 90 per cent were not taking in enough of the right foods daily. She estimated that such undernutrition was leading to short-

ages in vitamin protein (the basic building material for the cells that make up our bodies) as well as the all-important B vitamins and iron (vital to our internal communications system and blood formation).

Only a few months ago, doctors in California checked the exact composition of the daily diet of a group of 100 men who should be especially aware of the importance of diet. They found these hard-working men were deriving half or more of their food energy from fat, and as a result were both overweight and under-nourished to a marked degree.

Blood tests on this group of men revealed that many of them were deficient in iron, calcium, and vitamins A, B, and C. These vitamins perform many functions in the body. A having much to do with skin health and strength, B with resistance to disease, and C with the ability to fight off infections.

Tests on tenth graders in New York State showed less than the desired protein intake, too little munching of foods rich in vitamin A and vitamin C. An analysis of diets of 247 teen-agers in the state of Washington completed just last year revealed the following conditions:

Actual blood tests to determine the vitamin C available to a group of New Jersey industrial workers—vitamin C can't be stored by the body—showed less than adequate levels in the bodies of 41 per cent of these grown men. Similar tests showed poor vitamin levels for more than half of a group of high school girls in Rhode Island, more than a third of pregnant women in Massachusetts and over half of Maine's high school students.

Since both government officials and the doctors' organizations state that there's plenty of good food to be had, how come such figures as these? The housewife's description of her lunch all too often goes like this: "I grabbed a couple of slices of bread and jam while I was feeding the baby." The office worker, who already skipped

breakfast to get a few minutes more sleep, says: "I grabbed a sandwich and a bottle of pop before I went to work. I had a banana at coffee break. School dietitians don't have to ask what their charges do at lunch. They simply observe the vegetables and salads leftover on plates, the complete disappearance of puddings, cakes and other desserts.

Why are nutritionists worried about such eating habits? Although few people in the U. S. suffer serious shortage of vital protein, many do lack calcium, iron and vitamins A and C. These vitamins perform many functions in the body. A having much to do with skin health and strength, B with resistance to disease, and C with the ability to fight off infections.

Generally, however, all the vitamins and minerals are present in the body's tremendously complex factories. The B vitamins are involved in literally hundreds of processes in which they prevent chaos on the production line.

Minerals, too, play important roles. Calcium is vital to teeth and bones, and potassium governs the processes by which the blood brings food and oxygen to the far flung tissues and carries away wastes.

Some vitamins can be stored by the body—A is an example—but others must be replenished daily. Which is why nutritionists aren't satisfied that you ate a soup, balanced meal three or four days ago and plan to double up on your intake tomorrow to make up for your missed meals today.

What actually happens when nutrition is poor? What are the bonuses of proper eating? The next article takes up these topics.

Hairy stems of flowers, such as geraniums and zinnias, should have their stem ends split, or be dipped into boiling water or seared over a flame for a few seconds. This treatment will seal in the juice in the stem. Whenever hairy or juicy stems are recut, they must be treated again.

Iceland's Voters To Get Attention

By LYNN HEINZERLING
REYKJAVIK, Iceland (AP)—The 96,000 voters in this volcanic island will get a lot of attention when they choose new municipal councils May 27.

From the Kremlin to the Pentagon, soldiers and statesmen are waiting to learn how the proud and independent Icelanders will divide up ideologically in the election. A prime question: Are Iceland's Communists getting strong?

Iceland stands like a giant sentinel high up in the North Atlantic, its northern tip jutting into the Arctic Circle. The paramount political issue is the North Atlantic Treaty Organization's base at Keflavik, 31 miles through the lava fields from Reykjavik. It is manned by 4,000 United States sailors and Marines.

The Communists and their left wing adherents oppose the base bitterly and unendingly as a danger to the country, a blow to national pride and a threat to the nation's culture. They make their views heard because they captured almost a fifth of the vote at the last general election in October, 1959.

The Communists are pounding hard on a popular theme. Not many Icelanders like the idea of having foreign troops stationed in the country.

The Icelanders, descendants of Norwegians and Celts, have created a pleasant society out of a once forbidding land studded with scores of volcanoes and glaciers.

There is little natural wealth except the cod and the herring that surround the island and swarm obligingly into nets. With a total population of only 178,000, the nation never has had its own army, navy or air force. The NATO force and the extension of the early warning radar system

to three stations in Iceland are hard for many Icelanders to swallow.

National elections are scheduled for next year.

When Iceland's voters choose their town councils next weekend, they may indicate whether the national government is in danger. It is a coalition of the Conservative Independence party, with 24 of the 30 seats in Parliament and the Social-Democratic party, with 16 seats.

The United People's Socialist party, which includes the Communists and other left wing groups, won 19 seats at the last national election. It is united in opposition with the Progressive party, an agrarian and cooperative grouping which won 17 seats.

CHICKEN LIVERS EN BROCHETTE
A few friends joining you for lunch and a table of bridge? Consider this menu!

Chicken Livers en Brochette
Broiled Tomatoes Soap Beans
Orange Souffle Beverage
CHICKEN LIVERS EN BROCHETTE

1 pound (12) chicken livers
1/2 teaspoon salt
1/2 teaspoon white pepper
1 tablespoon olive oil
3/4 to 1 cup fine fresh bread crumbs
4 slices bacon

4 thin slices hot toast (buttered and cut into 2 triangles)
Wash and dry livers; cut each in half. Mix salt, pepper and olive oil. Roll livers in seasoned oil, then in bread crumbs. Cut each slice of bacon into 4 cross-wise pieces. Alternate livers and bacon leaving a tiny space for bacon to crisp on 4 long skewers.

Broil rapidly, turning to brown both sides. Remove liver and bacon to rest. Serve at once. Makes 4 servings.

HERE'S HOW — Bill, two-year-old son of Mrs. Minnie Lee Elliott of Waco, Texas, concentrates on his task of feeding one of the month-old squirrels he adopted. The pets are fed a diet of milk and honey out of doll-size baby bottles.

Construction Of Tankers In Recovery

By MAX B. SKELTON

HOUSTON (AP) — World construction of oil tankers has made a minor recovery since its sharp 1960 decline.

The British Petroleum Co. estimates tankers totaling 14.7 million tons were building or on order Jan. 1.

The total at the end of 1959 was 19.5 million tons but the world surplus of oil dropped 1960's year-end new construction total to 14.6 million tons.

British Petroleum's review of the world-oil industry rates the

world tanker fleet Jan. 1 at 67.1 million tons, compared to 64 million a year earlier.

Major changes in the 1961 fleet involved tankers flying flags of Liberia, Panama and Honduras.

Tankers operating under the convenience nations flags dropped to 14,051,000 tons in 1961, compared to 14,861,000 at the end of 1959, and a record 15,468,000 tons at the end of 1958.

Western Europe claimed 21 per cent of the world fleet at the end of 1959 but 25 per cent at the start of 1962. Russia and her satellites increased their share during the same period from 2 to 4 1/2 per cent, increasing their fleet from 1,100,000 tons to 2,000,000.

Tankers flying the United States flag accounted for 57 per cent of

the world fleet in 1946. Despite increasing her tonnage from 8 million to 3.1 million, the United States' share amounted to only 13 1/2 per cent of the world total.

Britain's share dropped from 19 per cent to 13 1/2 per cent.

Lindbergh Contributes To Space Age

EDITOR'S NOTE — Thirty-five years ago Charles A. Lindbergh made history by flying alone from New York to Paris. The feat brought him fame, followed by searing personal tragedy. At the dawn of the space age, America now has a new hero. But yesterday's hero is making a far bigger contribution to modern aviation than most people suspect.

By JULES LOH
AP Newsfeatures Writer

Lindbergh's schedule wouldn't permit that; it's already full. He still is a consultant for the Defense Department, helped select the site of the Air Academy, and according to a Pentagon spokesman "has made many contributions to the ballistic missile program." He also is aviation consultant for the Library of Congress and has been the go-between in acquiring a number of historical documents.

Lindbergh's work for Pan American World Airways has, in a sense, gone full circle. He explored the first air route for the company in 1933, some of them still in use today. Later he helped Pan-Am develop its first transoceanic Clippers, and not long ago earned part of the credit for the company's pioneering switch to jet airliners.

As a Pan-Am consultant Lindbergh is nearly always on the go. He has offices in New York, in various manufacturing plants across the country as well as to London, Rome, Beirut, Saigon, Tokyo.

He also likes to visit his boys on the West Coast. Jon, 29, now in California; Land, 24, in Washington, the father of a brand new baby girl. The other three children live at home: Anne, 21; Scott, 19; Reeve, 16.

Presiding over the household is his wife Anne-Morrow Lindbergh, notable in her own right. Best-selling author of "Gift from the Sea," and a poet, she recently completed a novel, "Dearly Beloved," which has been scheduled for publication June 6.

Home, for the past 16 years, has been a gracious Tudor-style house with high-pitched gable roof, gray half-timber exposed in white stucco gables, wrought iron appointments—on a rugged hill overlooking Scott's Cove, a breeze-carried inlet off Connecticut's Long Island Sound.

The home is in a private residential section of Darien, a typically quiet New England town whose 18,437 residents are quite proper, quite polite, not given to idle talk.

Surely, somewhere, within the painted walls of that house are memories of Lindbergh's bold victory 35 years ago—the Medal of Honor, the Royal Air Cross, the Legion of Honor, the Order of Leopold, awards and decorations from 31 countries in all; the Wright Memorial Trophy, the Dariusson Medal.

And likely he will reflect on the flight this anniversary day. The dream was born one moon-bright night when he was flying the "Spirit of St. Louis" to Chicago. Why not New York to Paris?

Others were trying it, mostly two-man teams with costly twin-engine jobs. Lindbergh was convinced the only way it could be done was by one man—a lone eagle, so to say—in a single-engine plane. Few would listen. Finally, nine St. Louis men agreed to loan him the money for a plane that Lindbergh himself helped design, "The Spirit of St. Louis," he called it.

It was drizzling over Long Island at 7:32 a.m. May 20, 1927, but the weather ahead looked favorable enough. Lindbergh slid casually into the narrow cockpit and listened to the throb of the 220-horsepower engine.

The monoplane, heavy with fuel, lumbered down Roosevelt Field's soggy runway, lifted slightly into the air, down again with a muddy splash, then up laboriously into the haze and out of sight.

To Lindbergh the flight was no stunt.

Each step along the 3,640-mile route was carefully measured at 100-mile intervals against clock and compass; each drop of the 482-gallon fuel supply carefully calculated against each of the 7,000 pounds of gross weight. He took no parachute 20 minutes extra fuel was a better safety pre-

caution, wore lightweight boots of his own design, carried no needed areas from his charts. "No detail is too small to be considered," he said.

In his pocket he carried probably the most useless excess baggage in aviation history—letters of introduction.

At the Place de l'Opera in Paris, flickering lights that had traced the flight's progress for anxious thousands suddenly spelled out those in French then in English.

Lindbergh arrived Le Bourget 19:19. Landed 19:22. Officially, he was home.

The flight enabled Lindbergh to fulfill what he later called the first cause of his life: To preach the wonders of flight to all who would listen. "I love the sky and flying more than anything else on earth."

His second cause was less popular but he devoted himself to it, just as vigorously. He had flown the Messerschmitt and knew Germany's air strength and reported his information to the War Department. He also had carried the U.S. air arm, for Gen. Hap Arnold, and was convinced we were not ready for war. He aimed to do what he could to keep his country "out of Europe's suicidal internal wars."

His speeches during the nine months preceding Pearl Harbor produced a harvest of invective and nothing more.

Once at war, however, Lindbergh urged his countrymen to "meet as united Americans—regardless of our attitudes in the past."

He participated in Henry Ford's first tour of the B34 at Willow Run then joined United Aircraft Corp. as an engineering consultant. He was one of the first to see no symptoms of a high-altitude blackout.

One of the members of the committee was Charles A. Lindbergh.

The coincidence is intriguing, in view of the inordinate parallels that have been drawn between the two aviation pioneers on every level from courage displayed to confetti thrown.

But far more interesting to many is that Charles Lindbergh was in 1934, and is—on the 35th anniversary of his storied flight from New York to Paris—actively involved in aviation. His counsel is sought at the highest levels, his schedule crowded with appointments, conferences, trips, his interest in current affairs never livelier, his circle of friends never broader.

This may surprise some who were asking, amid the tumult raised for Glenn: Whatever became of Lindbergh?

The vague, general impression is that Lindbergh long ago withdrew to some secluded island, cutting himself off from a society that once had honored him but also had refused him a moment's peace ever after the 1932 kidnapping of his son.

Shortly before the kidnaper Bruno Hauptmann was executed in 1936 Lindbergh moved to England. He returned four years later but didn't reappear as a public figure until his impassioned 1941 campaign to keep the United States out of World War II.

After the war Lindbergh did buy an island, two of them in fact, but he doesn't live on either. He lives solidly on the mainland in Darien, Conn., and he lives as normally as anyone else—except in one respect. He simply avoids the public eye.

He attends very few public functions. He was once invited to the White House dinner in honor of Andre Malraux, French minister of culture. His telephone is unlisted. His mailbox is nameless. His business associates refuse to divulge his whereabouts to the merely curious, and his friends likewise are voluntarily protective of him.

He goes about freely. He stands on the platform with the commuters from Darien, Conn., and takes the train with them to New York. He walks through Grand Central Station and window shops on Fifth Ave. and rides in taxis and airplanes and elevators.

He doesn't wear dark glasses or false whiskers or make any contrived effort to hide his identity. He doesn't have to.

Only a handful of photographs of Lindbergh have appeared in the last 20 years.

The man once known on sight by thousands today, at 60, can stroll the streets a stranger.

Lindbergh's cultivated anonymity gives him deliverance, at last, from that unrelenting army of transom peepers he once had to flee the country to escape. More than that, it enables him to keep his professional life free from the clutter of banquets, speeches, award presentations and such that are the inevitable inheritance of prominence.
