## Wellington is on Proposed Route To Rio Grande

C. C. Small and R. H. Templeton Will Assist in Securing Route

### Templeton Chosen

Meeting Held at Colorado Texas to Perfect Organization

Leader-Democrat News Alliance Another State Highway for Collingsworth county, connecting the Panhandle with the Rio Grande, via West Texas, came a step nearer realization Wednesday with the organization of the Panhandle-Rio Grande Highway Association at Colorado, Texas.

The plans formulated are for the designation of a state highway from Canadian, via Wellington, Memphis and Turkey, then south to the Rio Grande at Del Rio or some point south of San Angelo.

Delegates from Sterling, Mitchell, Scurry, Dickens, Motley, Hall, Collingsworth and Wheeler counties met in Colorado Wednesday to organize the association and formulate plans for designation and improvement of the proposed highway.

Judge Horace Holley of Snyder was elected president of the association; Judge B. F. Brown of Sterling first vice-president; Judge A. C. Hoffman of Memphis second vice-president; M. G. Evans of Snyder secretary-treasurer. Directors, W. N. Reed, Sterling City; A. A. Dorn, Colorado; W. A. Johnson, Snyder; Judge Hugh Davis, Clairmont; Clifford B. Jones, Spur; J. F. Montgomery, Matador; F. G. Abbey, Turkey; and Judge R. H. Templeton, Wellington.

George H. Mahon, Colorado; Clifford B. Jones, Spur; Judge C. C. Small, Wellington; and W. G. Whittier, Girard, were named members of the steering committee.

The association will meet again soon at some point on the proposed highway at the call of the president.

The counties represented at the Colorado meeting expected to make a concerted effort to improve the gaps in the highway from Canadian south and get designation as a state highway the road from Wellington to Turkey via Memphis, and extension of Highway 101 from Girard to Snyder via Clairmont and from Colorado to Sterling City. These designations would connect with highway already designated and close the gap from Canadian to the Rio Grande.

The delegates were enthusiastic over the prospects for improvements of the highway and promised aid and cooperation of the counties touched.

## Revival Meeting Very Successful

The revival meeting is attracting large crowds at the Nazarene church and the song services are conducted by Mr. and Mrs. Douglas in a large way the cause of the wonderful success of the meeting.

The pastor has been filling the pulpit up until now but will turn the meeting over to Dr. R. T. Williams, engaged evangelist from Oklahoma City, who will continue the revival until August 19.

E. A. Wells made a business trip to Harold, Texas last week.

## Lawn Beautiful Contest Will Be Brought to a Close on August 15

The lawn beautification contest will be brought to a close on August 15. At this time the various lawns will be judged and the prizes awarded. The prizes will be grouped in two divisions. One set will go to the best lawns in the city and the other will go to the three lawns showing the most improvement.

The lawn contest which was started two years ago has done

## Looking Him in The Mouth

## Fort Worth Club May be Here For the County Fair

Fair Officials Negotiating to Secure Wichita Spudders for Series

It is possible that the Fort Worth Cats may meet the Wichita Spudders in Wellington during the Collingsworth county fair. The fair association has already taken up the matter with the Cats and they have expressed their willingness to return to Wellington again this year, according to W. H. Gofort, who received a letter from Eddie Moore last week.

In case the Fort Worth team is secured and the Spudders are not a series of games between an all star team and the Panthers will be arranged for the fair. Some of the fair officials believe that a team composed of star players taken from Wellington and neighboring towns would attract a bigger crowd when played against the Panthers than would the Spudders as many people from neighboring towns would attend the fair to see their favorites play.

## Houselog School Opens on Monday

Houselog school of which Jim Cook is principal and Miss Tipps is teacher opened last Monday for an eight month term. Trustees of the school believe that the school will have a good year and are highly pleased with the teaching staff for the coming year and with the attendance at the opening. The trustees are: E. W. Carter, Willie Smith and J. O. Seyton.

## Child Drowns in Tank Near Wellington

Falling into a ground tank, the 22 months old, son of Mr. and Mrs. George Deger was drowned on the Daffern farm in the Nicholson community at ten-thirty o'clock Saturday morning. The parents worked with the child until eleven o'clock, and then brought him to the hospital. The fire boys were called, and neither the constant use of prome pressure or the lung motor returned the lad to consciousness. At one o'clock the doctors gave the boy up.

The funeral was held at five o'clock Saturday afternoon at the cemetery with Brother Graydon, Methodist circuit preacher in charge.

Thomas and McInnis were in charge of the burial arrangements.

## Anders adding New Story to His Hotel

Work on the two-story addition of the Welcome cafe and hotel owned by G. F. Anders is progressing rapidly. The new addition is twenty-five feet long with four rooms in each of the stories. The rooms on the ground floor will be occupied by the family of Mr. Anders while those of the upper story will be part of the hotel. The work will be completed by the middle of this month according to Goforth Brothers, contractors.

Lester Bengé will spend a few days in Memphis this week visiting his sister, Mrs. Pete Clower.

Mr. and Mrs. T. W. Hide and Mrs. George McCullough spent last week in Medicine Park, Okla.

Dr. Beach of Shamrock was a Wellington visitor last Tuesday.

## Funeral of Dr. J. W. Peeples is Held on Sunday

Physician Dies at Home in Dodsonville After Long Illness

Funeral services for Dr. John Wesley Peeples, who died last Thursday night, were held at the First Baptist church in Wellington Sunday afternoon at 3 o'clock. The ceremony was conducted by C. R. Joyner and Rev. Henry West with the Masonic lodge in charge at the cemetery.

Dr. Peeples had been ill for nine weeks, but it was thought he was improving slightly until pneumonia set in a week before his death. Dr. Peeples was seventy-one years old at the time of his death. He was converted at the age of fourteen and joined the Baptist church a year later, and had been a faithful member for fifty-seven years in his death Collingsworth county lost a man who has given freely of his time and services to make this a happier and better community, and hundreds of friends mourn his passing. He is survived by his wife and five children. The children are: John William Peeples, Homer Peeples, Mrs. L. A. Manzer, Mrs. E. L. Tarpley and Mrs. O. L. Woodrum.

Miss Ruth Little of Clarendon is visiting her father, T. M. Little and brother, Milus Little this week.

E. W. Alley left last Tuesday for Oklahoma City to bring back several new Ford cars.

## Plenty of August Sunshine Needed To Insure Bumper Fall Cotton Crop

### Leader Gives Hat Bands To Delegates

All Club boys and girls who went to the Short Course wore arm or hat bands advertising Collingsworth County. These bands were furnished free by The Leader.

The following card was received from Miss Swafford at College Station. The one thing which has made our trip most enjoyable and which has advertised Collingsworth County most is the fact that The Leader provided us with Collingsworth County hat bands. We all thank you.

### Mother and Baby Die on Sunday

That unexpected sorrow which constantly closes the door of happiness on the thousands of families, called at the home of C. E. Jackson's on the morning of August 5, taking from him his most beloved companion and new born baby.

Funeral services for Mrs. Beulah Cleo Jackson and baby were held on Tuesday, August 7, at 4 p. m. from the First Baptist church of Wellington with Rev. C. R. Joyner and Rev. J. C. Clement officiating.

Mrs. Jackson was born July 27, 1900 in the state of Oklahoma. She was married to C. E. Jackson during the year of 1919 and has lived in Wellington since that time. She is the daughter of Mr. and Mrs. N. C. Tennyson of this city.

Mrs. Jackson is survived by a husband and two children. Thomas and McInnis were in charge of all funeral arrangements.

### Buck Creek School To Run 8 Months

The Buck Creek school opened Monday for an eight month session. Teachers and trustees of the school are expecting an excellent year. The teachers of the Buck Creek school are: E. E. Amburn, Miss Phebe Lee Sullivan and Miss Ella May Sullivan. The trustees are: J. F. Skaggs, T. M. Jones and H. Lack. The school will have an eight month term.

### M. J. Zackry is New Auto Dealer

Announcement has been made that M. J. Zackry will be manager of the local Studebaker agency to be located in the building between the Buick building and that of the Oakland-Pontiac. Mr. Zackry is one of the most efficient salesmen that are in this section according to Raymond Ballew, and quite able to take charge of the agency here. Selling one of the best motor cars on the market, one that has broken all official records for speed and endurance, and climbed Union Town's famous hill at the rate of sixty-five miles per hour, Mr. Zackry will place many a Studebaker in this territory.

The agency here is a branch of the Raymond Ballew company located at Childress, Memphis and Wellington.

### Rains Bring Fear of Worms to Farmers of County

Rains and cloudy weather Friday aroused anxiety over the supposed danger from worms among the cotton growers of this county. More rain has already fallen this summer than came during the entire season in some of the good crop years. The question of moisture does not worry the cotton growers. It is now a matter of sufficient dry weather to carry them thru August, which is the critical month for cotton in this county.

The Agricultural and Mechanical college reports some infestation near Spur as well as in other parts of the state, but no serious infestation has developed yet. However, the heavy rains may develop considerable infestation during the next two weeks. The report from College Station follows: Careful observation during a trip just completed extending from Dallas to San Antonio, Corpus Christi, and to the Lower Rio Grande valley as far as Brownsville did not reveal to us any damage being done by the leaf worm, nor did we observe any individuals of the insect, either as the worm or as the adult moth, advises R. R. Reppert, Entomologist, Extension Service, A. and M. College of Texas. Those observations revealed that our cotton crop is practically free of damage by this insect to this time.

Since our return, however, two live individuals of the worms have been sent us from Uueches county. Serious damage was not reported and the presence of these worms is of interest only as showing that initial infestation actually exists. As stated in our previous press letter, weather conditions will determine largely whether this infestation will develop to serious proportions. Frequent showers over the state will be favorable to the rapid multiplication of the insect. We do not believe, however, unless serious infestation now exists in some sections not yet reported to us, that the cotton growing area as a whole need fear any serious damage for the next two weeks, or before about the 10th of August. Weather conditions will largely determine what the situation will be subsequent to that date.

If sufficient sunshine can be secured, Collingsworth county is due to produce one of the biggest crops in the history of the county.

### S. E. Larson to Be Manager Here

Announcement has been made that S. E. Larson has replaced Judson Corn as manager of the Wellington Ice Plant. Mr. Corn resigned from the position as manager to go into business with his father in the Ne-hi Bottling works at Amarillo. The former manager not only had the good will of the owners of the company when he resigned but that of the people of this community.

S. E. Larson took over the management July 24, and, according to C. S. Hunt, owner, is capable of the position. Mr. Larson has been with the company ten years having worked at Enid until July, 1927 when he came to a position with the Wellington company.

The owners of the company here control fourteen plants in Texas and Oklahoma. The Wellington branch has three wagons for service in the city besides trucks that run between the several towns where the plants are located, making it necessary for the employment of seven men.

## County Wins A & M Honors

Club girls and boys of Collingsworth county were again successful this year in carrying off honors at the Short Course held at the Agricultural and Mechanical college last week. Buster Worley was elected secretary of the United Boys of Texas and Miss Maude Hix won third place in second year sewing and Miss Dollie Mae Brown won second place in first year sewing.

Club women who attended the meeting were: Mrs. Worley, Mrs. Coe, Mrs. Newton, Mrs. Haralson,

Mrs. Morgan, Mrs. Brisbin, Mrs. Cummings, Mrs. Williams and Mrs. Elda Smith.

Girls who attended were: Lorraine Kesler, Hazel McClure, Inez Clement, Trula Morrow, Ethel Pearl Clement, Ruth Formentin, Florence Pepper, Oletha Karnes, Thelma, Hix, Clara Brown, and Lucile Bennett.

The livestock judging that represented Collingsworth county was composed of Buster Worley, Cecil Lemons, Leldon Hudson. The dairy judging team was composed of

Theodore McCutcheon, Monty Mitchell and J. T. Clement. The grain judging team was composed of Ross Gladney, J. T. Horton and J. T. Clement. Other club boys who attended the short course were: Roy Pepper, Leroy Thompson and Raphael Easter.

The results of the boys judging contest has not been announced from A. & M. but C. C. Stinson, county agent, has received word that one boy from Collingsworth county will win a trip to the Stock Show at Kansas City this fall.

## Aberdeen School Will Hold Opening Exercises on Friday, August 10

Aberdeen will open its new \$50,000 school building Friday, August 10, with a band concert and exercises. The building has classrooms, a library, a gymnasium, and dressing rooms. It will serve the community for several years. The new building is the finest in the county. The new building is the finest in the county. The new building is the finest in the county.

## School to Open in Wellington on September 10

Commercial Arts Course Will be Taught During the Coming Year

### Institute Sept. 3

All Teachers Will be Required to Attend the Institute at Canyon

The Wellington Public Schools will open on September 10, for what is believed will be the most successful term in the history of the schools of this city. At the beginning of the term the East Ward building will be used by the High School and Junior High, and this arrangement will be continued until the new building is completed on the south side of town.

The teachers of the school will go to Canyon on September 3 to attend the institute there. The trustees have made it compulsory for every teacher to attend the institute this year.

New teachers are expected to arrive about September 1. All persons who will keep either boarders or roomers are asked to get in touch with G. L. Farrar as soon as possible. His phone number is 296.

One of the new features of the school this year will be the Commercial Arts Department. This proposed course will include book-keeping, typewriting and shorthand. The trustees have definitely decided to include this course in the curriculum provided state subsidy can be secured.

A meeting of all Juniors and Seniors who will be interested in the Commercial course is called for Monday, August 13, in the East ward building at nine o'clock. At this time Superintendent Farrar will discuss the various features of the work with the students. A light fee for this course will be charged. The amount of the fee will be determined by the number of pupils who take this course.

During the opening week of the school meetings for the parents of the pupils in the various schools will be held on separate nights. The parents of the high school students will hold their meeting on one night and the parents of the junior high on another, etc.

The personell of the faculty this year presents a highly trained corps of teachers. The teachers in the Wellington Public School for the coming term are:

- High School
- G. L. Farrar, superintendent.
- C. B. Harrison, principal, athletic coach and mathematics.
- Miss Mildred Hulsey, English, Junior and Senior girls coach.
- Miss Louise Harle, Latin and Spanish.
- Miss Lota Price, English.
- Miss Kathleen Ingram, History.
- Miss Hattie D. Wells, History.
- Miss Estelle Shepherd, Home Economics.
- Miss Vada Crawley, Home Economics, History and English.
- Miss Ruby McDonald, Science.
- O. M. Stewart, Spanish and English.
- R. L. Davidson, Mathematics.
- Junior High School:
- Zeffie Childress, high seventh, history.
- Raymond McClure, low seventh, arithmetic.
- Lula Masten, sixth and seventh, reading.
- Effie Rankin, high sixth, geography.

(Continued on Page Eight)

### Improper Seed Costs Farmers Many Millions

#### Is Distinct Mark of Backwardness in Cotton Industry

COLLEGE STATION, Aug. 8.—The continual planting of gin-rup or mongrelized cotton seed by so many farmers and the planting of too many varieties in a community is costing the farmers of Texas millions of dollars every year, and is a mark of backwardness in the cotton industry that should be corrected as rapidly as possible, E. A. Miller, agronomist, Extension Service, A. & M. College of Texas, told the corps of farm engineering group at the nineteenth annual Farmers Short Course in session here. His subject was "Cotton Standardization by Communities."

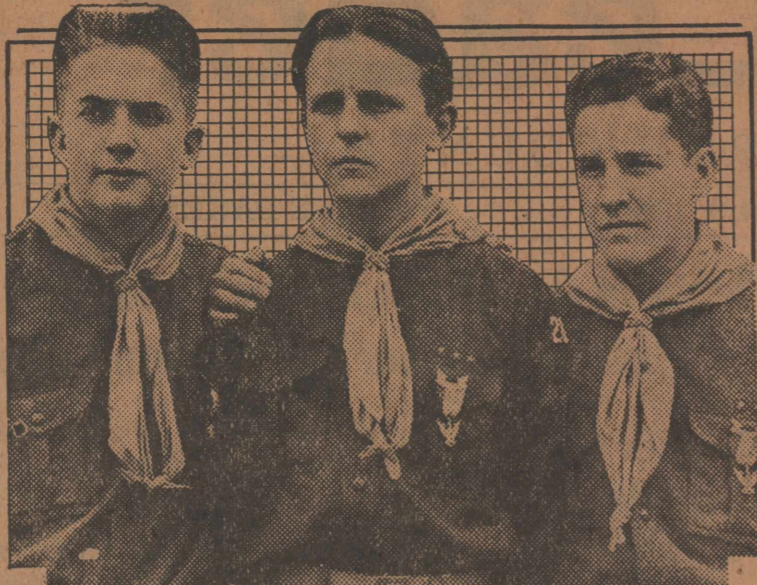

"By growing the different varieties in the same community the seed become badly mixed at the public gins, crossing takes place in the fields and the seed run out," Mr. Miller said. "Even if good seed are introduced, they become badly mixed within a few seasons."

"Mixed seed produce an uneven fibre which the mills do not want because there is too much waste in spinning uneven cotton. It is getting more difficult for the spinners and the automobile tire manufacturers to obtain large even running lots of fibre which they require."

"It is only in communities where the farmers get together and plant one variety of cotton that the seed can be kept pure and the production of superior cotton made possible. The one variety communities by producing commercial quantities of the same kind of uniform cotton can establish special market relations that unorganized communities could not possibly attain. The main things holding the movement back are that too many farmers in every community have some pet variety which they do not want to give up and because they have not been getting the proper premium when sold on the usual 'hog around' market."

A recent survey shows that cotton variety standardization has been worked up by county agents in fifty-nine communities in twenty-three counties of the state and that many more communities have made a start, Mr. Miller added. "The survey also shows," he added, "that wherever the cotton was pooled or sold through a marketing association, it brought an average premium of \$7.85 a bale."

### Boy Scouts on African Safari

Here are the three lucky Boy Scouts who were chosen to accompany Mr. and Mrs. Martin Johnson on a camera safari in Africa this summer. They are (left to right) David R. Martin, Jr., of Austin, Minn.; Robert Dick Douglas, Jr., of Greensboro, N. C., and Douglas L. Oliver of Atlanta, Ga.

ty-three counties of the state and that many more communities have made a start, Mr. Miller added. "The survey also shows," he added, "that wherever the cotton was pooled or sold through a marketing association, it brought an average premium of \$7.85 a bale."

#### Notice By Publication in Probate

THE STATE OF TEXAS

To the sheriff or any constable of Collingsworth County Greeting: You are hereby commanded to cause to be published (in a newspaper of general circulation, which has been published continuously and regularly for a period of not less than one year in your county) at least once a week for 10 days previous to the return day hereof, copies of the following notice:

To all persons interested in the estate of Frank LaCasse, deceased, Mrs. Ellen LaCasse has filed an application in the County Court of Collingsworth County on the 23rd day of July, 1928, for the probate of the last Will and Testament of the said Frank LaCasse, deceased, which said application will be heard by said court on the 3rd day of September, 1928, at the Court House of said county, in Wellington, Texas, at which

time all persons interested in said estate are required to appear and answer said application, should they desire to do so.

Herein fail not, but have you before said court, on the first day of the next term thereof, this writ, with your return thereon, showing how you have executed the same.

Witness my hand and official seal, at Wellington, Texas, this 24th day of July, 1928.

Mrs. Frances E. Winn, Clerk. County Court, Collingsworth County, Texas.

#### LOUISIANA SHIPS FIRST 1928 BALES OF COTTON

LAKE CHARLES, La., Aug. 9.—Grandchenir in Cameron Parish scored with what is believed to be the first bale of cotton for Louisiana in 1928 when W. H. Carter shipped his first produce by special boat to Jones Bros. of Lake Arthur.

From Jennings the cotton was shipped to Anderson, Clayton Company of New Orleans.

Bill Leggett, Roscoe Sasser and Raymond Jones returned Thursday from Texas Teck at Lubbock, where they made arrangements to enter school in the fall.

### Livestock Need Adequate Pasture

College Station, Texas, Aug. 8.—Providing adequate pasturage is one of the first essentials in the profitable production of livestock in Texas, D. T. Killough, agronomist, Experiment Station, A & M College of Texas, pointed out in a discussion of "Temporary Pastures" before the livestock sections at the nineteenth annual Farmers Short Course here. Pastures are classified as permanent and temporary, he continued. Temporary pastures, as the name implies, have to be resown every year.

"Since temporary pastures are intended to carry stock for only short periods and the cops used for this purpose have to be resown one or more times a year, they fit well into a rotation or cropping system on the farm. Some of the principal crops used in planting temporary pastures consist of sudan grass, cowpeas, Soy beans and velvet beans for summer pasture; and small grains, such as wheat, oats and rye, alone or in combination with winter field peas or vetches, for winter pastures.

"Sudan grass is probably the most widely known annual summer pasture crop in Texas. It is very drought resistant which makes it suitable for planting in the western sections of the state where rainfall is often the limiting factor in crop production. It is equally well-suited, however, for pasture in the more humid sections of Central and East Texas although it is difficult to produce a crop of seed there on account of the sorghum midge. Sudan grass is an annual and is killed completely by frost. It therefore never becomes a pest as Johnson grass often does on cultivated land. Sudan grass should

### Clarendon Will Be Host to All Checker Players

Jim Morris, president of the Clarendon checker club, announces that the club will be host to Panhandle players in Clarendon on the second Tuesday in August. Mr. Morris says the invitation includes all players anywhere in the Panhandle section of counties bounded by Childress and Farmer on the south and extending to the north state line.

Prizes will be offered for the winners in three classes of play to be divided upon the ability of the player. This meet will take the place of the usual Amarillo meet which will not be held this year and which has been known as the Panhandle Checker tournament. E. M. Lindsey, former director at Clarendon who formerly directed the Wellington band, is the present champion of the Panhandle, having won that honor at the last meet held in Amarillo two years ago, Morris, who has just returned from the state meet at Dallas where he was in the finals, says he expects a large attendance at the Clarendon meet.

be planted on land which is well drained and fairly productive since it does not make as good a growth on poorly drained or thin soil." Leguminous crops such as cowpeas, Soy beans and velvet beans provide good temporary pasture in the summer for all classes of livestock and the small grains such as wheat, oats and rye are used in most sections where these crops are adapted to furnish temporary pasture in the winter and spring, the speaker said.

There are 20 States west of the Mississippi river.

### Unusual Artist is Here This Week

One of America's best known painters, Dr. Benjamin F. Tanner, will arrive in Wellington next week and will remain here throughout the week, demonstrating his art at the Hardy Drug store.

Dr. Tanner uses ordinary house paint, strained through cheese cloth, to create the most beautiful and striking landscape scenes imaginable. He is a rapid worker and while he makes no claims to being another Rembrandt or Titian, his pictures are much more attractive and really more artistic than the compositions of many of the modernists.

When surprise is expressed that such pictures can be achieved with ordinary house paint, Dr. Tanner declares that there is no difference between it and the high priced artists colors except that the latter is strained and put into tubes. He merely uses the kind he finds to be the most reliable, and does his own straining.

Dr. Tanner has traveled all over

the United States and studied several years in Europe. He painted an Indian village scene that hangs in the union depot at Minneapolis. That painting is 72 feet long and 20 feet high and is said to be the largest in this country. All the decorative work on the famous Heinz "pickle pier" at Atlantic City was done by him.

The public is invited to watch his demonstrations in Wellington.

Buddha's personal name was Gautama Siddhartha,

The Irish Free State has ordered a number of daylight bombing planes.

## Announcing the New Utility Truck

-another Sensational Chevrolet Value

### 4 Speeds Forward • 4 Wheel Brakes

Typical of the progressive design embodied in the new Chevrolet Utility Truck is a four-speed transmission with an extra-low gear, providing tremendous pulling power for heavy roads, deep sand and steep hills—and reducing to the very minimum the starting strain on motor, clutch and rear axle—

—powerful, non-locking 4-wheel brakes, with a rugged emergency brake that operates entirely independent of the foot brake system—

—and a new ball bearing worm-and-

gear steering mechanism, which even includes ball bearings at the front axle knuckles!

And in addition, there are all those basic features which have been so largely instrumental in Chevrolet's success as the world's largest builder of trucks!

Come in and get a demonstration of this remarkable new truck. You'll find that it offers every feature needed for dependable low-cost transportation—and we can provide a body type to meet your individual requirements.

PUBLISHED EVERY THURSDAY BY THE LEADER PRINTING CO., INC. WELLINGTON, TEXAS

HENRY DESKINS WELLS, Editor  
Budge J. Harle, Assistant Editor

Entered as second class mail Aug. 25, 1909 at post-office at Wellington, Texas, under act Mar. 3, 1879.

NOTICE—Any erroneous reflections upon the character, standing or reputation of any person, firm or corporation which may appear in the columns of THE LEADER will be corrected gladly upon its being brought to the attention of the publisher.

\$2.00 A YEAR INSIDE OF TRADE TERRITORY  
\$3.50 A YEAR OUTSIDE OF TRADE TERRITORY

## The Value of Restraint

Restraint and accuracy are coming to play a bigger part in all advertising as time goes on. The following article from Linotype News gives an insight into the reason for the necessity of such practice.

Before us lies a pathetic little card that probably was meant to be advertising, but that really states nothing and does the stating poorly.

The card was sent out by a little new lunching place in New York in an effort to attract patronage. One line reads: "Our sandwiches are the talk of the town."

When a person states that it "rained cats and dogs," he utters a colorful phrase, and is not necessarily misunderstood. We get the feeling that it rained in earnest. The statement that a great beauty, or the first trans-Atlantic flyer, is "the talk of the town" does not jar us too much. We can forgive hyperbole in such instances—even enjoy it. But for the sandwiches of an insignificant little lunching place, and one that has just started at that, to be labeled as "the talk of the town" is too much.

Can we see millions and millions of otherwise busy New Yorkers gathered on street corners, on subways and elevators, and in their homes, animatedly discussing the sandwiches of this little lunching place? No, alert reader, we simply cannot. The line is ridiculous and cannot be taken seriously. Yet it's not ridiculous enough to be funny. It's merely inane—flat.

It's about as meaningless as that ragged old statement many publishers still permit to appear in advertisements accepted for their papers: "Quality and Service our Motto." Some publishers even use this phrase in advertising of their own. Yet the very fact that one is so out of touch with things as to consider such a statement good advertising implies that he is out of touch with other things, too, and certainly not qualified to deliver quality and service.

But let's take a look at another statement on the card before us: "The best in sodas and foods will be served."

Of course it isn't possible to believe this. For all we know, the best in sodas and foods haven't been determined anywhere, and perhaps never will be. That term "the best" is a good one to stay away from.

"Best sodas and foods." Best for what? Best for the health? "One man's food is another man's poison." Best for the taste? Tastes differ widely! Best for what? We give it up. The phrase is just another of those that simply cannot be taken seriously. Superlatives have a way of tripping over their own feet—of leaving us unimpressed and just where we started. We wonder how many printers and publishers employ in advertising of their own: "We do the best printing," "Ours is the best paper."

Another meaningless phrase on the little card runs: "All leading cigars at cut rate prices." Again it isn't possible for us to be impressed. That word "all" is another word to dismiss from our vocabularies.

"All leading cigars." Leading where? Has the proprietor of this little place investigated the demand for cigars in every corner of the world? Isn't it possible that he may have missed one particular brand made in some out of the way place and yet a leader in its section?

Is this hair-splitting? We believe not. To us "yellow" doesn't mean "pink," nor does "iron" mean "wood." Why, then, should "best" mean less than best, or "all" mean fewer than all?

Had the card stated that already several patrons have complimented that lunching place on its sandwiches; that it serves sodas and foods that meet a fair test of goodness; that it sells several leading brand of cigars at cut prices—we'd have read the statements with respect, and perhaps have been induced to give the place a trial.

We'd have been attracted by the restraint of the advertisement—have been impressed with its sincerity.

But it simply isn't possible to take seriously an array of exaggerated statements that foolishly have been applied for years to many commodities from shoes to ships and sealing wax.

The hallyhoo of sideshow barkers and the bark of moving picture producers have hurled so many superlatives about us that real advertisers feel they must employ hyperbole to attract the desired attention. Of course the movie vendor screams at us with superlatives. Comparatively simple truth is almost impossible to get across.

## TEXAS & TEXANS

By Will H. Mayes

### Election Panics

Business is easily frightened. At least that is true of those who lend money, borrow money, or invest money in industries. It is admitted that while there may be slight differences in the fundamental principles of the two leading political parties, the differences in their practical control of government are so slight as to be almost negligible, yet every four years business shudders at the prospect of a change of government political control. It becomes frightened to a standstill and awaits the result of the approaching election. When it is over and it is free of smoothness, business picks up its ears, and found that the country moves along with a fair de-starts on its way again. But much valuable time is lost and nothing is gained by the pause in progress. The point I am trying to make is that there is no need to wait until after the November election to start upon that business enterprise you have in mind. The country is going to be safe with either party in charge, and business will move along. Whatever fluctuations there may be in prices and demands will be only temporary and will be about as likely to occur under one administration as another.

### Cause of Cotton Slumps

M. H. Wolfe, a veteran Dallas cotton buyer, says that he has been watching the cotton market for 43 years, and that year after year the farmers of the South commit financial suicide by rushing their cotton to market at the time of gathering. He thinks the fault is not so much the farmers' as the bankers' and that is brought about by the system of short credits in practice over the country. Much cotton farming is done on credit, with notes maturing at the time the crop is ready to market. The banks become anxious for their money, and the farmers sell at whatever price he can get in order to settle with his bank. Mr. Wolfe says that when Southern bankers and cotton farmers lose their heads they also lose the profits that should come from cotton growing.

### Valley Citrus Crop

Rio Grande Valley this season reaching 2,500 cars as compared with 1,300 last year, it is expected that the crop next year will approximate 4,000 or 5,000 cars and be worth \$10,000,000. Texas can produce all the citrus fruit for which it can find a profitable market, and the greatest danger now confronting Texas growers is over-production. A late census shows that there are now 3,419,157 citrus trees in the Valley. In every branch of farming, fruit and vegetable production, and allied industries, the Texas farmer has only to fear an unprofitable market. Collin county onion growers are plowing under onion crops because they will not pay for the gathering and crating. California grape growers are leaving half their grapes on the vines in order to maintain prices. Texas figs have been allowed to fall from the trees. Many other crops annually go to waste. The tillers of the soil everywhere are in need of practical help in solving their many marketing problems.

### Texas Tomato Crop

Smith county alone has shipped more than 1,000 cars of tomatoes this season. Last year the shipments totaled 739 counties. Smith is only one of many counties growing tomatoes for carlot shipments. There are at least a hundred others in Texas where vegetables of almost all kinds can be grown about as successfully as in Smith county. The price paid for tomatoes this year has ranged from 11-2 to 2 cents which the growers regard as unsatisfactory. Consumers in Texas cities have been paying from 8 to 12½ cents, which they consider too high. There is need for some agency to take a hand in adjusting the prices of farm products to do away with the disproportion in prices from producer to consumer.

### Getting Natural Gas

Camerof is happy that it has natural gas and well it may be if its consumption proves as economical as it is convenient. Uvalde is now laying natural gas mains, San Marcos has before it a proposal for natural gas, but as that city is installing water mains, and the gas mains will have to be placed above these, the gas franchise must await the completion of the water plant. San Marcos officials show wisdom in this orderly proceeding. Many other places have not been so careful. Progress is desirable, but progress should be orderly and economical. Mistakes may even be made in granting public utility franchises to the first concerns applying for them.

### Goliad's Oil Seepage

There is no guessing where oil is going to be found in Texas. Oil seepage is injuring a Goliad swimming pool, as the swimmers don't like to remove the oil from their bodies after taking a plunge. But it has led to plans for tracing the oil to its source, and may result in uncovering a new oil field in Texas.

### School Buildings

Donna, in the Lower Rio Grande Valley, will invest \$300,000 in new school buildings, consisting of a high school building and several smaller buildings. Texas, and especially South Texas, is showing its interest in better education by the erection of better buildings, that are better equipped for the care and training of students.

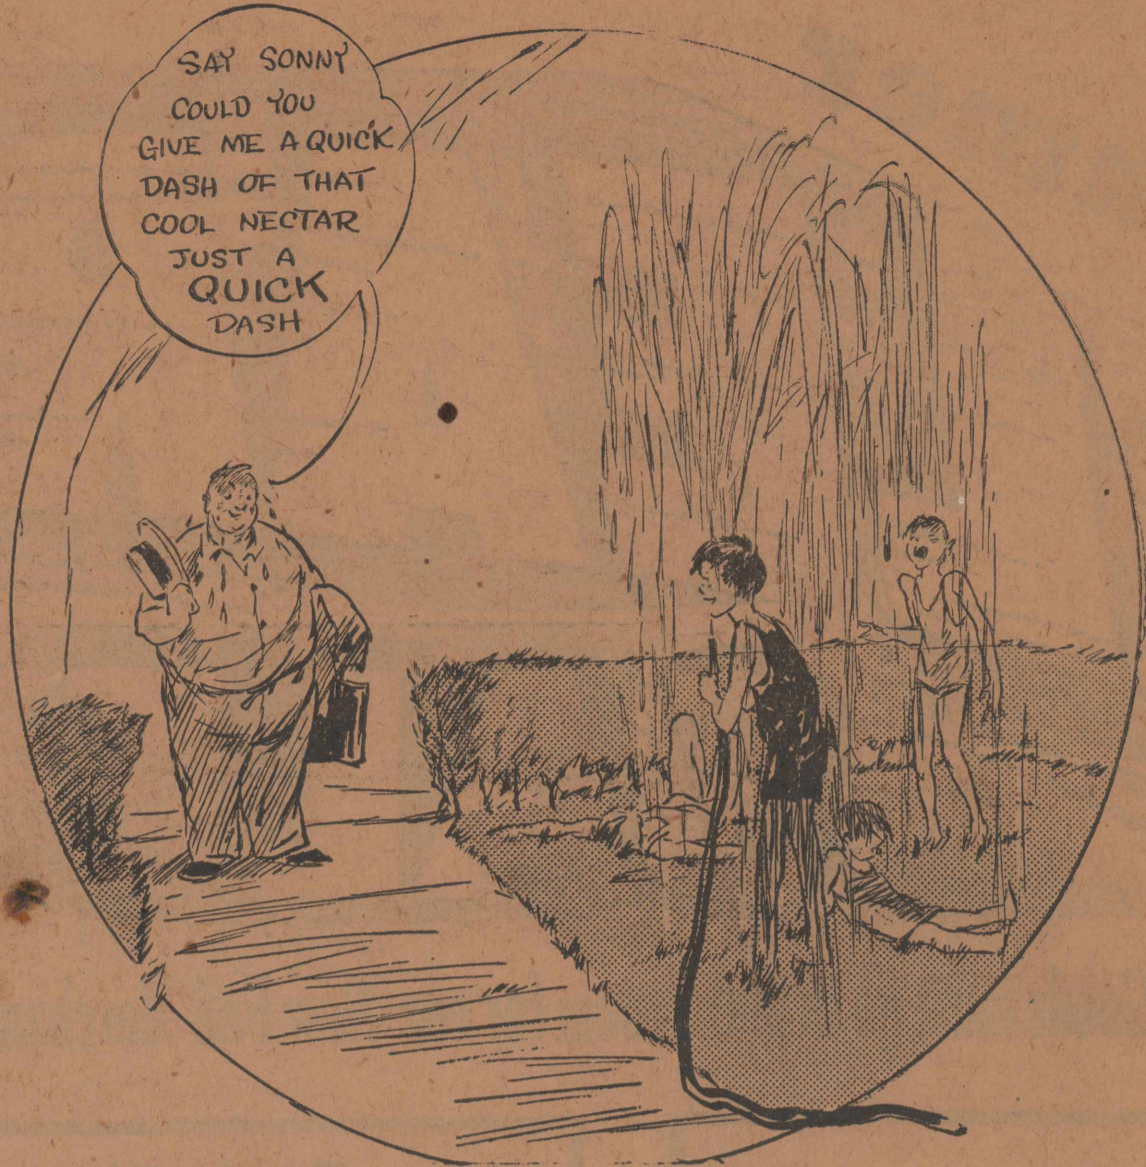

Corpus Christi is among the larger South Texas cities that is noted for its good school buildings, and it has recently let a contract for a new high school to cost \$219,000.

### Gonzales Tomatoes

Gonzales business men have been so pleased with the results of the Gonzales tomato industry this year that they are already at work on plans for a tomato shipping plant there. Business should always show interest in its local farming and stand ready to co-operate in plans that are to their mutual advantage.

In a city-wide beautification contest in San Antonio bronze tablets are to be placed at both ends of what has been declared the best kept block in the city. Beautification contests always improve the looks of an entire city by increasing civic and home pride. San Antonio's method of awarding is inexpensive. Bronze tablets should remain only so long as the blocks kept ahead of others in improved appearance.

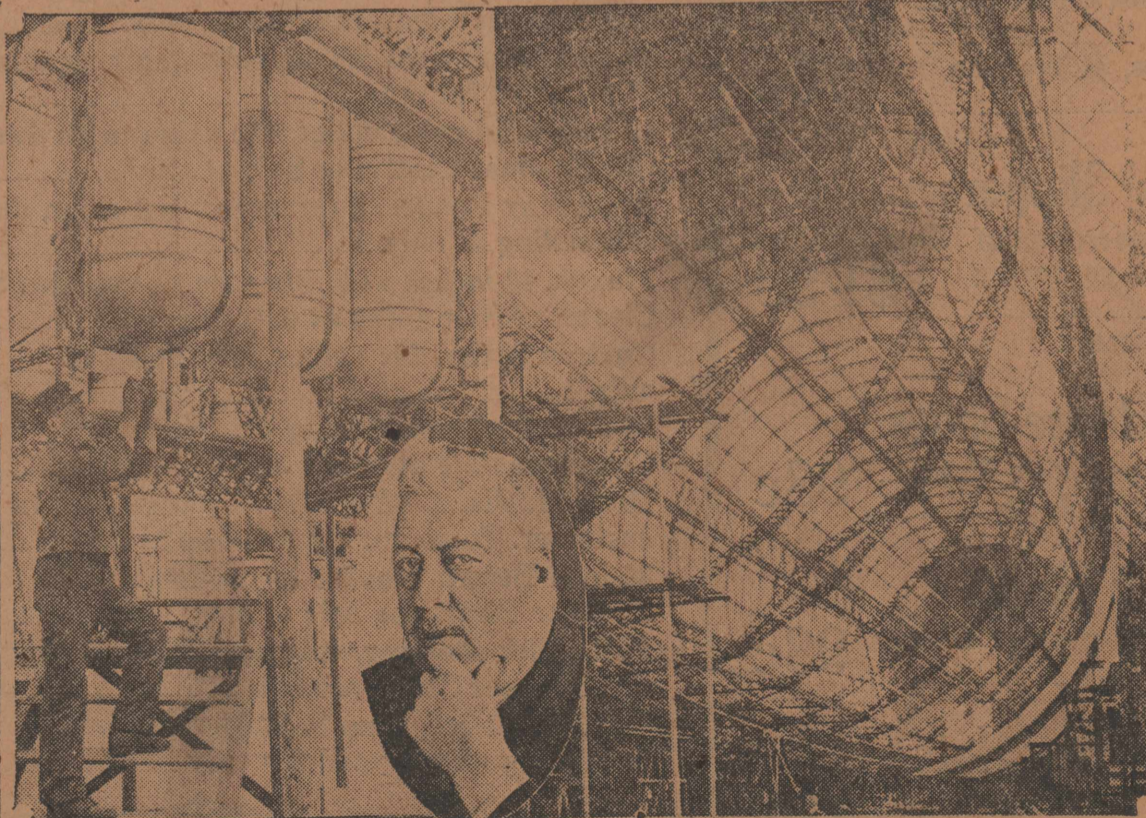

## The Great American Home

# Poultry Flocks Should be Culled 4 Times Each Year

College Station, Texas, Aug. 8.—The year 'round system of culling the poultry flock, that is, culling four times a year, is a practical method of getting a check on production since it will indicate what hens are laying during each season of the year even if it is not known the exact number of eggs produced, E. N. Holmgreen, poultry husbandman, Extension Service A & M College of Texas, said in a talk before the poultry group of the nineteenth annual Farmers Short Course in session here. This culling should be carried on in the fall, winter, spring and summer, the speaker added. At each culling the layers should be banded with a leg band of different color while the non-layers and other culls are not banded. In this manner each time the flock is culled the layers are given a good mark in the form of a leg band. "With a year 'round system of culling the farm flock, will come the Texas 'Four Band Hen,' the only kind of hen that can be profitable with low priced eggs, because she will be an all season layer." One thousand Texas farmers reporting on egg production placed their average for the year from 120 to 137 eggs to the hen, Mr. Holmgreen said. "While this flock average is not particularly high," he said, "it is much higher than the state average of around 70, and it represents the additional eggs that mean the difference between profit and loss. Anyone who wants to reach this, or a still higher average, will have to follow, as these poultrymen did, some method of removing the poor layers from the flock." Records of county agents show that in 1926 were 12,512 farmers in 137 counties of the state who culled 346,261 chickens and removed 102,655 non-profitable hens Holmgreen said. These figures, he added, represent only those who reported culling their flocks and only in 137 of the 254 counties of the state.

# GERMAN'S AIR LINERS MAY SOON CONQUER OCEAN WAVES

At the left are shown some of the fuel containers of the giant LZ-127 which hold a form of gas only slightly heavier in specific gravity than the air, thereby getting greater cruising radius. The giant framework of the German dirigible, a vessel of 3,750,000 cubic feet, is shown at the right. Dr. Hugo Eckener, inset, is supervising the construction at Friedrichshafen. (International Newsweek)

BY WILSON WALTERS  
International Illustrated News Staff  
Correspondent

GERMANY under her treaty arrangements was required to build some giant dirigibles of the Zeppelin type for this country and England.

With characteristic thoroughness she went about her job, producing among others the ill-fated Shenandoah and the sturdy Los Angeles. Now Germany is turning the expert knowledge gained from these experiences to her own commercial uses.

Dr. Hugo Eckener, dirigible expert of the Zeppelin company, is the master mind which directs the construction of these monster trans-Atlantic flyers. It is by the hand of this great builder that Germany is entering into the transportation of passengers and freight across the ocean. The proof that these giants of the air can cross the sea has been given in the flights by Dr. Eckener when the Shenandoah and Los Angeles were delivered to this country.

The newest methods of manufacture have enabled Eckener to give the LZ-127, his latest effort, more cruising radius than heretofore was thought possible. New gas fuel which is almost as light as air has

been developed for these ocean liners.

When the LZ-127 is finished, she will mark an epoch of air flight history. Ocean flying has been a series of spasmodic dangerous assaults on the uncharted air currents. Some have been successful but the majority have added little to the advancement of knowledge which would bring success to trans-Atlantic commerce by air.

To Germany, tied down, as she is, will probably go the honor of being the first to start regular trans-Atlantic service. Dr. Hugo Eckener will be the man whose unswerving belief in the Zeppelin type makes it possible.

## DECK Didactic

By H. D. W.

The recent plunge into salt river proved to be only a stimulating bath in brine for some of the candidates.

Ed Julian seemed to be the most optimistic and he went to work Monday as though nothing had happened. Last Wednesday he handed me a notice which he said he wanted to pay for but I told him I would run it free. It follows: LOST, Strayed or Stolen —

One vote somewhere between here and Salt Creek. Finder notify Ed Julian.

Now that is my idea of good sportsmanship after a political defeat.

Ernest Winn wanted to know when Budge would be back. I asked him why and he said he just wanted to know when The Leader would be back up to its standard as one of the leading weekly papers in the state.

Ordinarily an advertisement in this paper cannot draw too big a crowd to suit me, but the Fain & Co. ad published in The Leader last week did. I wanted to get over there and buy some of those towels they sold at a nickel a throw. I went over and the gentle ladies nearly stomped me to death in the rush to get in; so I decided I didn't need any towels after all.

If you see a big writeup where in The Leader favoring E. Mayfield don't think I am porting him. I am not, but the foreman of the shop is for certain despicable reasons, and he is bent on slipping in some copy about Mayfield. He waits until it is too late to set more type and then comes up with a story on Earl B. that will fit, and I have to let it go to keep from making the paper late in the post office.

However, the foreman's actions are not so bad, for we publish both sides of the news, and only give opinions in the editorial columns. If you want my opinion on the Senatorial race it is that Tom Connally will be the next Senator, for he is running faster than Mayfield. One of the minor reasons that will help Connally, incidentally is that he is better qualified to fill the office than is Mayfield.

Hot dry weather is not the dream of Utopia in the mind of the average West Texan, but it is the thing the people of this county need now. Dry weather until the last week in August will produce a crop that will require threshing machines or something of that nature to harvest. It looks too good to be true, but my pocketbook can stand it if unprecedented prosperity does hit this country.

Since Budge is away I will keep his Saturday in Wellington alive. SATURDAY IN WELLINGTON

Saturday came with welcomed sunshine after the clouds of Friday, with a large crowd of women trying to fight their way into Fain & Co.; Ewing Talley creating an air of rushing business by soliciting work with a pair of trousers thrown over his shoulder, with Bill Andrews worrying Jimmie Richards about a picture of Jimmie supposed to be in this issue, with Harry Garbee and Johnnie Wallace waiting on customers while dreaming of August vacations with Joe Hardy making foolish bets on cotton and good bets on politics, with Fatty Watkins and Paul Star asking the farmers how their cotton would be and farmers grouped on ever corner talking of the need of dry weather and the danger of worms, with a visiting girl noting the handsome features of Ralph Lewis and deciding she wanted a date with him, who got.

Jim Ferguson has come favor of Earl B. Mayfield means 250,000 votes in Mayfield and 400,000 votes for Connally. However, want to but any money figures.

One other thing that is ed in Wellington is a swimming pool near town. That at the country club is to out and is not accessible enough people. A good pool, kept sanitary, should make good money for the individual who put it in. Such an undertaking should be run as a private business for profit. It will be kept better and the people who use it will pay for it.

The earth being a spheroid length of a minute of latitude ceases from 6,046 feet at equator to 6,108 feet at the

### Hoover and Smith Will Start Soon In Hot Contest

#### Smith Will Deliver Acceptance Speech Ten Days After Hoover's

Saturday Herbert Hoover will formally notified in California nomination to lead the Republican ticket, and ten days later, for Smith at Albany will be advised by the Democrats. These routine ceremonies will be tardy trumpet calls of hostilities already begun.

The fighting has been of greatest fervor in the outline well in advance the ground for this perhaps spectacular of later-days. Its boundaries appear those of the entire county party drives in all directions. The proverbial "rat" South is now fixated on a public objective and its are looking to usurp an farmer strongholds.

es have been shaping of acceptance. Hoover to the printers his 00 words, and is off week-end vacation.

Smith is returning to his desk at Albany from a Long Island sea-side vacation not so far advanced with his speech as is Hoover. As the case with the Republican, Smith has given no indication of the nature of his address to intimate it will deal exclusively with farm relief and which have been thrust to foreground.

his acceptance speech still making. Gov. Smith has let down that the equalization relief idea is not acceptable, although he reads the platform as recognizing control of the sale of agricultural surpluses as essential, the borne by the unit bene-

### Men Changes Made in Pontiac

PONTIAC, Mich., Aug. 7.—Oakland Motor Car company announces seven improvements, designed to make the new series Pontiac Six more powerful, faster and more flexible of operation.

Major changes include a new carburetor, new intake manifold, new air deflector, higher gear ratio, larger tires, smaller wheels, and smart new Duco colors on the sport landau sedan.

Outstanding among the new improvements in a one-inch carburetor of the approved type used on the Oakland All-American Six. Not only is it simpler of adjustment and more accurate than the old type, but increased speed, power, acceleration and fuel economy are achieved by its use in conjunction with the new manifold and gear ratio. Connected with the carburetor is a new mushroom type air deflector.

The intake manifold has been changed to accommodate changes in the carburetor, and the rear axle ratio stepped up to 2.3 to 1. Marked improvement in every phase of performance is instantly noticeable, behind the wheel, with a higher top speed and an ample reserve power at all driving ranges.

With the increase in gear ratio, the rate of piston travel is still considerably less than that of any other car in the low priced six cylinder field. Thus Pontiac retains and advantage it has held since its introduction, minimum of wear of moving parts, which means longer life for the car.

Greater beauty and a big car appearance, in line with the current vogue is achieved by the use of larger 29 by 5 inch balloon tires and smaller wheels with ten sturdy spokes, and a larger seven and a quarter inch hub flange. The larger tires result in greater riding comfort and lessening of tire wear.

Simultaneous with these mechanical changes is the announcement that the smart sport landau sedan will take on new dress. The body with be of a dark Standish green Duco, with fenders of lighter Virginian green, a combination similar to that now used on the Oakland All-American cabriolet. Wheels are in natural wood finish.

Special sport equipment, consisting of a trunk rack and six wire wheels with tires, also is available for the first time on a low priced six. Spares are mounted in front fender wells on either side of the car, while non-corrosive chrome plated rims add a brilliant touch of color to the swanky model. New and distinctive bumpers also are available.

While many small homes are being built in Honolulu, T. H., speculative subdivisions are going begging.

### Heroes of "The Lost Cause"

Johnny Reb donned again the old gray uniform which he wore when he was making history by his gallant stand against the forces of the Union and participates in Memorial Day exercises at the graves of his fallen comrades. The old butternut uniforms are fast disappearing now, and the holiday ceremonies take on an added note of pathos because of this.

Johnny Reb donned again the old gray uniform which he wore when he was making history by his gallant stand against the forces of the Union and participates in Confederate Memorial Day exercises at the graves of his fallen comrades. The old butternut uniforms are fast disappearing now, and the holiday ceremonies take on an added note of pathos because of this.

#### THE MEXICAN BEAN BEETLE

The Mexican bean beetle, formerly known principally in the Southwestern States, has spread very rapidly during the past ten years through the Eastern States; in many localities it has been abundant for a season and then has subsided, only to reappear in injurious numbers two or three years later. It is the most serious insect enemy of edible beans wherever it appears in the United States and attacks all kinds of common garden beans, tepary beans, Lima beans, and kidney beans. The Mexican bean beetle when fully mature is copper-colored and bears 16 black dots on its wings. It appears in the fields about the time the earliest planted beans show above the ground, and all stages of the pest may be found throughout the entire summer if not controlled. The injury caused by the beetle is easily distinguished from that of other insect pests. The beetles and larvae

feed on the under surface of the leaves, the adult often cutting through to the leaf and giving the foliage a lacelike appearance. While the larva feeds on the under side of the leaf, it leaves the upper surface intact; the plant tissue is cut away in narrow parallel sections about the length of the insect's body, but narrow strips between these sections are left untouched, resulting in a peculiar network. After the foliage is destroyed, the insects may attack the pods and even the stems, and when abundant they have been known to completely destroy a bean crop in about four weeks. Considerable work on control measures has shown that the materials which will give best control without injuring the plants are magnesium arsenate or a good grade of calcium arsenate with lime, applied either a dust or spray to the under sides of the leaves.

Brazil has a new sugar co-operative association.

### Mayfield Gaining In Popularity in Race for Senate

DALLAS, Aug. 8.—R. B. Humphrey, world war veteran, former member of the state legislature and practicing attorney of this city has accepted the position of director of the Mayfield Volunteer Speakers' Bureau, for Senator Earl B. Mayfield, candidate for re-election to a second term in the United State Senate. Mr. Humphrey will maintain headquarters in the Adolphus Hotel.

In commenting upon his selection to head the Mayfield Volunteer Speakers' Bureau, Mr. Humphrey said: "The pleasure naturally incident to being selected to head the Mayfield Volunteer Speakers' Bureau has been immeasurably enhanced by the extremely cordial spirit of co-operation encountered on every hand and from all over the state. In support of Senator Mayfield's candidacy it is our purpose to assist in carrying to the people the honest message of his splendid record during his first term in office. We will endeavor to furnish an able and reputable speaker to fill every engagement requested."

While fishing at Blonday Bay, Mull, Scotland, recently, a number of fishermen were suddenly surrounded by a large school of basking sharks of great size, and were forced to flee to shore.

## Dodsonville

J. F. King returned Sunday from Peacock, Texas, after several weeks with her by Mashore.

Mrs. Peyton Smith and Mrs. Altus Sunday.

Mrs. D. A. Scott of Dallas was visiting Sunday in some of Mr. Scott's parents, and Mrs. M. P. Scott.

Miss Imogene Wynn of Wellington was visiting here several days week.

Mr. and Mrs. J. O. Davis left Friday for about two month's visit with relatives in Murray county, Tennessee.

Mrs. W. R. Slagel of Mobeetie is visiting relatives here Sunday. Mrs. Johnson spent last week at aunt, Rose McGee of Holbrook, Texas.

Mr. Dyke Burnett, Wellington, is visiting Monday with her mother, Mrs. Miller.

Miss Oucille Reeves of Mangum, Okla., was visiting several days last week with Miss Daisy McDonald.

Mr. and Mrs. W. F. Hays returned Monday night from a visit with relatives at Louisville and Dallas, Texas.

Mr. and Mrs. Dewey Malone were visiting Tuesday night with Mr. and Mrs. J. D. Wilson of Wellington.

Mr. I. A. Rollings and Mr. J. G. Nisbett returned Tuesday from a two weeks vacation in Colorado, at Snow Stone Park and other places. They report a very interesting trip.

Mr. and Mrs. Ansel McDonald spent several days this week with Ansel's parents, Mr. and Mrs. T. W. McDonald.

Mr. and Mrs. W. N. Davis returned Wednesday from the wheat harvest at Spearman.

Mr. and Mrs. H. P. Scott, Mr. and Mrs. C. O. Black, Mr. and Mrs. Fed Hill, Raymond and Maxine Hill of Eldorado, left Thursday for Colorado Springs, Pike Peak and Denver. They expect to be gone about two weeks.

J. A. Smith of Marlow came Friday to visit with his sons Idus and Pepton Smith.

The W. M. W. ladies met at the home of Mrs. R. E. Walker Monday evening.

Mrs. L. J. Jackson entertained Wednesday Aug. 1 with a birthday party for her seven year old son, Derwood. Games were played throughout the afternoon and all departed to their homes very happy after refreshments were served.

M. and Mrs. N. L. Wesson visited Sunday with Mr. Wesson's parents, Mr. and Mrs. W. H. Wesson of Dryden.

Mr. and Mrs. Z. O. McKinney and children and Miss Gertrude Wesson motored Sunday to Plymouth.

Born to Mr. and Mrs. G. C. Riddale Saturday, July 28, a girl. Both mother and babe are getting along nicely.

Mr. S. J. G. Nesbitt, Mrs. Tobe Deahl and Miss Rachael Deahl left Friday for a two weeks vacation in Arkansas. They were accompanied by Mrs. Nesbitt as far as Oklahoma City.

Mr. Nesbitt and Cleatus Rollins were in Hollis Thursday evening business.

## Quail

Quails are looking good since the recent rains.

N. Pierce and daughter, Jimmie, have returned from a visit to Portales, New Mexico and left in to visit relatives at Vernon, Texas. They were accompanied by Geneva Morgan on this trip.

Mr. and Mrs. Marcellus Weaver and son, on Aug. 2, a girl. Both mother and babe doing nicely.

Mr. Crutree and wife also returned Starr and wife left Friday morning for a two weeks vacation in the mountains of New Mexico Colorado.

H. Clevenger and family from Norman, Okla., visited Mrs. Clevenger's parents last week. Mr. and Mrs. T. P. Willingham and family relatives here.

Mrs. E. C. Renderson visited her mother, Mrs. Stavenbagen at Lelia, Okla. last week.

Mr. and Mrs. Haynie of Lubbock, Texas are visiting their son, Frank Haynie of this place.

Mr. and Mrs. J. O. Wood are on a trip to Whiteboro, Okla., and their son Ethridge Wood of this place.

Mr. and Mrs. Blevins and family of this place visited the Oklahoma, Okla., Wednesday.

Mr. and Mrs. Duke and family of this place visited the Oklahoma, Okla., Wednesday.

Mr. and Mrs. T. P. Willingham is making extensive improvements on his filling station, making things look quite nice.

Mrs. R. B. Mann has as her guest this week her sister and niece, Mrs. C. and daughter of Ada, Okla.

# Graham Trucks Production Soars to 6900 Units

With July production of trucks and motor coaches averaging 298 units daily, Graham Brothers, the truck division of Dodge Brothers, reports the best July business in history and the heaviest sales of any month since June 1926. Unfilled orders are working all plants to capacity, and officials expect the new line of sixes, featuring four speed transmission and four wheel brakes, to continue production records for the second half year. Production for August will be maintained at the pace set in July, which approximated 6,900 units.

That sales are keeping pace with manufacturing is indicated by the fact that new commercial car registrations for the first five months of this year show Graham Brothers ranking second place or better in twenty-seven states, third in seventeen states and fourth in four states against all manufacturers, regardless of type or price of truck.

Second place was held by Graham Brothers in key industrial states where new registrations are unusually heavy, such as California, Illinois, Massachusetts, New York, New Jersey, Pennsylvania and Wisconsin.

"Buyers of the new line of trucks, whether individual or fleet owners, are enthusiastic about the new line of sixes, according to reports from our dealer organization," said Howard E. Sneathen, director of commercial car and truck sales. "For flexibility, economy and dependability, the trucks are meeting the requirements of all types of business. The four wheel brakes on all capacities, and four speed transmissions on the heavier types enable owners to match passenger car performance, and insure most efficient transportation."

## Antelope Stocked At Kerrville Hills

KERRVILLE, Aug. 7.—Canadian antelope are now part of the game stocked on the Schreiner game preserve in the Kerrville Hills.

A herd of 20 antelope have been placed on the preserve by Charlie Blazier, western Canada rancher, who accompanied the herd of Texas. At latest reports the antelope had stood the transfer well and all were in apparent good health.

The Western Canada antelope, according to authorities, is not really an antelope but should properly be called a prong-buck or pronghorn. It is said to be the latest remnant in America of hollow horned ruminants in which the horn sheaths are forked and annually shed. In the earlier days, they were plentiful in the hill country of Texas but have long since disappeared.

Beside the antelope, the Schreiner preserves has upon it a herd of American bison and a small herd of real longhorn cattle.

All are being preserved by L. A. Schriener, multi-millionaire banker and wool merchant. For the purpose a preserve with a 100 foot heavy wire fence has been marked out. All shooting is prohibited. Native deer and wild turkey are also given a haven on the preserve.

## Houston Will Hold Swimming Meet

HOUSTON, Aug. 4.—Houston will become the center of aquatic interest, August 10, when the Southern A. A. U. swimming championships will take place at Heights natatorium.

Star swimmers from practically every state in the south will be entered, including a number of local swimmers from Houston and near vicinity.

Mr. Gilbreath and family from Abernathy visited his son and daughter here, J. P. Gilbreath and Sam Russel and family.

W. O. Martin and family of Graff, Colo., and Mrs. W. A. Martin and son of Pritchell, Colo., visited the Mrs. Martins' parents, Mr. and Mrs. G. W. Killingsworth and other relatives of this place. On Sunday a family reunion was held at the home of Willie Milton. A good dinner was served under the trees in the yard to eleven children and 26 grand children of Mr. and Mrs. Killingsworth. There were in all 52 present. Mr. and Mrs. H. Milton also Ernest Pierce and family as invited guests. In the afternoon ice cream was served, kodak pictures made and a very enjoyable time was had.

Jack Beck and family and Mrs. M. E. Beck made a trip to Knox county this week.

Mr. T. P. Willingham is making extensive improvements on his filling station, making things look quite nice.

Mrs. R. B. Mann has as her guest this week her sister and niece, Mrs. C. and daughter of Ada, Okla.

# Blanton and Owsley Pledge Support to Tom Connally

DALLAS, Texas, July 31.—The lines of battle are tightening for the August 25th run-off primary in the campaign for the United States Senate and the forces of Congressman Tom Connally are prepared to carry the fight into every precinct in Texas. Reports and messengers have come to Tom Connally headquarters throughout the week saying that supporters of the eliminated candidates are flocking to the Connally banner. In less than twenty-four hours after the polls had been closed Congressman Thomas L. Blanton sent this telegram from his home at Abilene to Connally:

"Dear Tom you have made a gallant fight. Victory is yours. I congratulate you. Our unbroken friendship of thirty-three years is still intact. I am for you. Command me if you need my services. I hope that all my friends will support you."

Later a letter received by Connally from Ballard W. George, Corsicana lawyer who managed the campaign of Alvin Awsley made this declaration:

"I did my best to place Alvin Owsley in the run-off. As we failed to secure a sufficient number of votes I am now supporting you. I believe you will make a splendid representative of the Democracy of Texas in the United States Senate. I hope and believe that my friends throughout Texas will join me in supporting you."

Connally spent the week in conference with friends and preparing the speech he made in his opening the run-off campaign at Fort Worth Tuesday night, August 7. Connally will have sixteen speaking dates before the primary and he plans to make a hard campaign.

Early in the week the victorious congressman gave out this formal statement of thanks and forecast of the campaign now beginning:

"To my friends throughout Texas, I want to express my deep gratitude for their unselfish and untiring efforts in my behalf. The results of Saturday's primary prove their loyalty and activity. They have achieved a great triumph. However, the real fight lies before us.

"The lines of battle have not changed. From the beginning of this contest it has been a battle of the whole people who want a United States Senator who knows no master but the people and the public good against those interests that seek preference and privilege and stand for the rule of secret and selfish interests.

Before the primary their were five of us enlisted in the fight. The total vote of the five candidates at this moment aggregate 377,538 to 159,018 for the opposition and my vote alone stands at 146,864, just 12,154 short of the total vote of the remaining candidate. This overwhelming vote of protest makes it clear that the people of Texas want a new Senator.

"I know that my friends will carry on and hold and advance the lines until August 25. The fight

## Tom Connally

Tom Connally is conceded the victory by political students of Texas. He has run a clean race on his own merits and is splendidly equipped to fill the office he seeks.

is on. The issues between Mr. Mayfield and myself are clear cut and sharp. Our political viewpoints differ widely. I stand for government in the open by and for all the people. I am opposed to government by a few and for a few.

Since the primary a host of those who voted for other candidates have pledged me their enthusiastic support. To the Democrats of Texas I am thankful. I solicit their support in the coming primary. I shall devote my best energies and such ability as I may possess to their service."

Owners of livestock will find in Miscellaneous Publication 25-M, which can be secured from the U. S. Department of Agriculture, methods of identifying and combatting various kinds of livestock parasites. The material in this publication, which is entitled, "A Calendar of livestock parasites," is conveniently arranged under each month of the year.

As a convincing argument in favor of forest-fire protection, the following figures are of interest. In one section of a county in North Carolina, where no forest-fire protection has been given, the tax rate is \$1.38 and the forest land is worth \$15 an acre; while in another section, where forest-fire protection has obtained for the past 25 years, the tax rate is only \$1.02 and the forest land is worth \$50 an acre.

## Texas University Will Make Study of the Root-rot

AUSTIN, Aug. 8.—Cooperating with Texas Agricultural and Mechanical College and the United States Department of Agriculture the University of Texas will undertake to make a detailed study of the root-rot which is one of the chief menaces of Texas cotton and will conduct exhaustive experiments in an effort to stamp it out, according to Dr. H. Y. Benedict, president of the university. The university will maintain space on the Little campus for laboratories in which many of the experiments are to be made. Apparatus and equipment for the laboratories will be loaned by the university to the experts who are to conduct the research, and the university library will be at the disposal of the workers.

A. & M. College will continue the work it has started in furnishing land for many of the field experiments, field and laboratory equipment and labor and implements for the substitution farm. The Federal government will conduct the studies of root-rot at field stations in Greenville, San Antonio, Temple and Austin, as well as on farms of cooperating farmers in various parts of the State. It will also bear the expenses of the workers as they travel from section to section of the state.

## California Artist Displays Work in Local Drug Store

Dr. B. Tanner of Los Angeles, California, is giving a demonstration of painting in oils this week at the Joe Hardy Drug company. He has established a temporary studio in one of the large show windows and is painting pictures before crowds throughout the day who gather before the window and in the store building.

Dr. Tanner is truly an artist. His rapid transpositions of canvass and various colored paints into beautiful scenes is nothing short of marvelous. It is very interesting to watch him in his work.

Aside from being an artist, Dr. Tanner is a great sportsman, especially catering to fishing. He is the inventor of the famous Basorino bait, which is practically the only guaranteed bait on the market today. He has any number of other baits, which he has invented and placed on the market for catching various specimens of fish.

Thick lamb chops may be seared on each side and on the edge in the broiling oven or a very hot skillet, and the broiling finished in the oven. They should always be served piping hot, so it is necessary to have all the other dishes of the same meal ready when the chops are done.

## Creager Wins To California

DALLAS, Aug. 7.—R. B. Creager of Brownsville, Republican National Committeeman for Texas, will attend the ceremonies at Palo Alto, California, Aug. 11, when Herbert Hoover will be officially notified of his selection as the Republican Standard Bearer.

Mr. Creager is a member of the arrangements committee for the notification ceremony, which is a special honor for him and for Texas, as the committee is small. Because the State Executive Committee meets at Fort Worth two days later, Mr. Creager, who is already known as the "flying National Committeeman," may take an airplane back to Texas.

Capt. J. F. Lacey, of Dallas, who is the member for Texas on the notification committee of the National Convention, will probably also attend the Palo Alto celebration. Theoretically, this committee of the National Convention was appointed to inform Hoover of his selection as the Presidential candidate.

### Powerful Drama Will Show Here August 14-15

Judgment of the Hills Will Be Shown at Rialto Soon

Tucked away among the Blue Ridge Mountains of Kentucky is a land that holds more romance and mystery than any of the older lands of other continents. Amongst those hills that are the same today as when Daniel Boone and his fellows found to own them, live people who are as eternally the same. The word "change" does not exist to them. Their world is bounded by the misty purple tips of the surrounding hills. Hills over which they never go. Never want to go. And in these little valleys they live just as their ancestors have lived since the days the Indians drifted away.

A picture with these people is not just a picture from any usual standards. People know enough to realize the difference, but Larry Evans, one of America's greatest writers, also used to live among the Blue Ridge Mountains, and his fertile pen has done more than anything else to teach the rest of us to understand this strange folk who live in our very midst. "Judgment of the Hills" is taken from Larry Evans' "Down Our Way," a storm from the Cosmopolitan Magazine, which told in a sympathetic way how little the world's affairs meant to these "hill-billies."

Torn by feuds, harrassed by winds and storms that in one night wreck the scanty fields on which they depend for bread, they still think only of their little world and when the great war breaks and the whole world is enveloped in misery they think "it ain't our feud" and wander on their little immovable ways.

Few directors could have handled a theme like this, and still make a picture which told its story to the whole world, but J. Leo Meehan is more than a mere director, he is an artist, who plays on the highly tuned chords of human feelings, and in this picture he has made these "hill-billies" vital characters, whose troubles seem normal. "Judgment of the Hills" will long be remembered as one of the greatest pictures of all time, and as long as the camera can aid in such a manner, the motion picture is going to be the greatest known medium whereby man can see just how others live.

The picture will be shown at the Rialto theatre on August 15 and 16 and no one should miss seeing it.

#### A CARD OF APPRECIATION

I entered the race for re-election for the office of County Treasurer because I need the work, I enjoy the work and I had the desire to serve my county for another term.

I tried to conduct my campaign on a high plane and pursued this course throughout. I feel no sting in my defeat, my conscience is clear, and I have the friendship and support of so many good men and women of Collingsworth county. My earnest effort shall always be to so conduct myself in all things as to merit the confidence that the people have reposed in my integrity and ability to serve you in my official capacity for the past six years and please be assured that all efforts that you put forth to re-elect me are deeply appreciated. Although the results of the primary election on July 28 show the decision against me, I accept the results without argument. To my loyal friends who so valiantly and courageously supported me in this campaign, I extend my heart and hand. You made a brave fight, and I sincerely think you for your influence and vote and every effort you put forth in my behalf, let me assure you of my affectionate regard.

It is now and has ever been my desire to join with you in striving to build up a greater and better Wellington and Collingsworth county.

Sincerely,  
(Signed) Mrs. Laura Campbell

#### A WORD OF THANKS

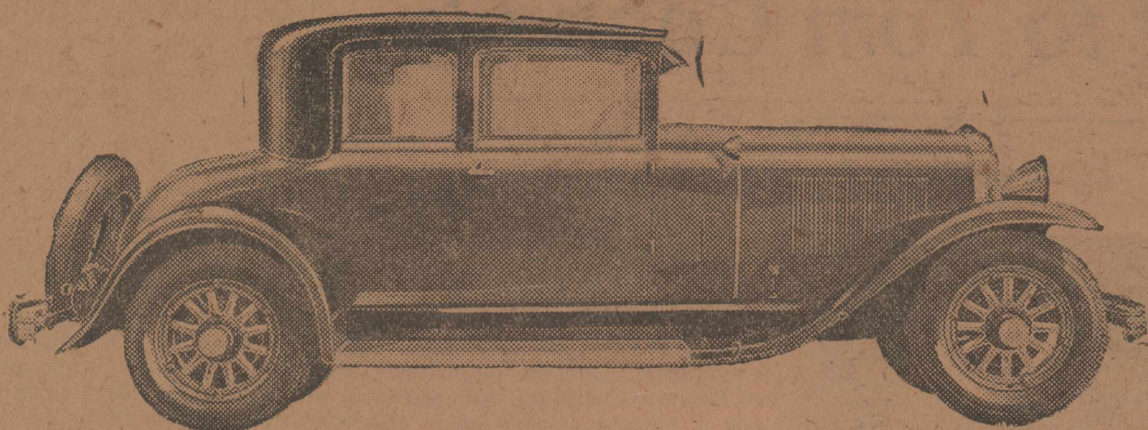

I want to thank the voters of precinct one for the splendid support given me in the first primary. I will appreciate your vote in the second primary, and if elected, will do all in my power to make you an efficient and conscientious commissioner.

JOHN JONES

The highest percentage ever made by a pennant-winning club in the National League was made by the Boston club in 1892. They had an .830 percentage.

Some of the finest diamonds ever found have been dug up in the new fields at the mouth of the Orange River in South Africa.

### Silver Anniversary Buick

SILVER ANNIVERSARY BUICK, MODEL 58

Five-passenger Coupe

Buick has done away with sharp roof corners, except at the front in the Silver Anniversary Buick. The steel of the body sides and rear sweeps upward from the body sill in a curve of varying pitch, draws in just below the windows to produce a pleasing fullness in the body, and then rises vertically, merging into a full, round curve which replaces the sharp roof-corner. Metal of sides and rear is carried clear over onto the top in one graceful sweep.

### Farm Leader is Against Hoover

NEW YORK, Aug. 9.—In his fight for the presidency, Governor Smith gained an ally today from the corn belt—George N. Peek, of Illinois, one of the champions of the McNary-Haugen farm bill frowned on by the Coolidge administration.

Peek announced that he had bolted the Republican party to enlist under the Smith banner after he and the Democratic nominee had discussed the farm question for two hours.

Immediately after their conference, which took place over a breakfast table in the governor's suite Mr. Smith reaffirmed his intention, if elected, of calling on the best minds for advice in the shaping up of a farm relief program. He mentioned Frank O. Lowden, of Illinois, as one of the Republicans he would like to consult.

The governor reiterated that he would discuss the farmer's problem at length in his acceptance speech and observed that "control of the sale of agricultural surplus is recognized by our platform as an essential need, its cost to be imposed on the unit to be benefitted."

#### Stands on Platform

"That principle is fixed by our platform, on which I stand—only the details of its accomplishment remains," he added.

Peek, who supported Lowden for the Republican presidential nomination, came out for Smith formally after he had visited Chairman Raskob of the Democratic national committee at campaign headquarters late in the day.

"I feel certain that he (Smith) has a clear and correct understanding of the farm problem and that he will solve it with intellectual honesty if he is elected president," Peek said.

"Upon the strength of his statement to me as epitomized in his public statement this morning I shall support his candidacy for president."

#### Stockmen Lose Homes

"I think that no campaign promises which Mr. Hoover now makes for the purpose of insinuating himself into the good graces of the farmer will obliterate his past record from the memory of grain and livestock producers, many of whom have lost, or are in the process of losing their homes."

Peek is chairman of the committee of twenty-two of the North Central States Agricultural conference which since its organization at Des Moines several years ago has made an effort to get

Put meats that have to be carved on platters large enough to give the one who carves free play. Never place potatoes or other vegetables around a roast if they are likely to be cut by the carver or pushed off the platter. Garnish the meat attractively with parsley or water cress or lettuce leaves, and serve the vegetables by themselves.

A tasty way to cook string beans is to shred them finely, and give them a short, quick cooking, in a comparatively small amount of lightly salted water. Remove the tips, ends, and strings, and cut the beans lengthwise, into long thin shreds, with a pair of scissors. If the beans are young they will cook tender from 15 to 20 minutes. They will keep their bright green color and have a delicate fresh flavor. Season them with melted butter, and add more salt if necessary.

When little girls' dresses are not to have matching bloomers, make them two inches longer than you would otherwise, and they will look better.

farm relief legislation to its liking on the federal statute books.

Peek made it clear that he was acting as an individual and not for his committee.

### New Buicks are Being Shown

Buick swings into its 25th year of operation, this week, with the introduction of the Silver Anniversary Buick, its new car for 1929. Tremendous advances in beauty, style and comfort, as well as in every item affecting performance, combine to make the Silver Anniversary Buick an automobile new and totally different from anything the public has known.

Taking as a nucleus Buick's famous six-cylinder valve-in-head engine, torque tube drive, sealed chassis, cantilever springs, double drop frame and mechanical four-wheel brakes, Buick engineers have refined and improved these units, and created around them a motor car of radiant beauty and dashing style, a car which is easy to operate and comfortable to ride in, and finally, one which is said to out-perform, under all conditions, not only its own predecessors but any other car within hundreds of dollars of its price.

Outstanding departures from convention will be found in the new and daring treatment of body lines, the dazzling new colors in lustrous Duco, and the lavish use of enduring chromium, which serves to differentiate the car sharply, even at first glance, from other automobiles of today. Less apparent to the casual eye, but no less vital, is the enlarged and improved power plant which provides an "unsounded reservoir of energy for any and all needs."

There is no car on the road to which the new Buick may be compared, a fact which makes description difficult. However, among the innovations affecting its appearance may be listed the gentle "swelling" of the body, just below the windows, which are gracefully arched across their tops where they were formerly straight; a complete blending of the side and roof lines in an altogether pleasing curve which is carried around the sides and rear of the car; graceful new radiator emphasizing the curve motif further; new one-piece front fenders and extra long and deep rear fenders, new running board bound on all four sides in aluminum and shaped along its outer edge to harmonize with the body lines; and new full-finished rear end with large gasoline filler

inlet on one side and new combination tail stop and backing light, mounted on a heavy steel tube which encloses all wiring, on the other.

The car's appearance factor is still further enhanced by smaller wheels and larger section tires, which make the new Buick seem lower, though its road clearance is actually unchanged. Large new hubs, new easy-on radiator cap, and re-location of the new Buick trademark, in a new and distinctive monogram on the radiator honeycombing instead of the shell lend additional touches of beauty. The new head and parking lamps, on their chromium-plated brackets, also are noteworthy features.

Interior refinements making for beauty, as well as for riding and driving ease, are numerous. Not only the steering column, but the entire front seat of closed models, is now adjustable to the requirements of any driver. A small hand knob just under the edge of the seat cushion, accomplishes adjustment, without inconveniencing driver or passenger. The seat locks automatically in any of the seven positions within its 3 1/2 inch range. The gearshift lever is longer, and is inclined toward the driver at its upper end, making for easier control of the gears.

### Miss Thomas is Bride of E. M. Hartman

A wedding of much interest solemnized on Sunday morning August fifth at nine thirty at the home of Rev. and L. Porter, when Miss Thomas became the bride of Elmer Hartman. Rev. R. L. said the words that made man and wife.

The bride is one of the most beautiful and popular young ladies of the Wilmulcer community. She is the daughter of Mr. and Mrs. P. H. Thomas.

The groom is one of the most progressive young farmers of the Buck Creek community. He is the son of Mr. and Mrs. J. C. Hartman.

Those present at the wedding were: Mr. and Mrs. Stanley S. Mr. and Mrs. Jack Lancaster and Mrs. Gourney Thomas; Other Hartman; Mr. John Thomas and little Etella Thomas.

The couple will spend their honeymoon in Colorado, afterwards will make their home on the farm of the groom's father.
