HEADQUARTERS
3560TH PILOT TRAINING WING (ATC)
UNITED STATES AIR FORCE
Webb Air Force Base, Texas

OFFICE OF THE COMMANDER

TO OUR FELLOW CITIZENS OF BIG SPRING AND THE SURROUNDING AREA:

All Webb Air Force Base personnel join me in extending a warm welcome to each of you for a Base Open House on Saturday, 8 May 1965, in observance of Armed Forces Day.

We invite you to be our guests on a day that is set aside to afford us an opportunity to express our appreciation for your fine support, and to demonstrate that your Armed Forces are prepared to maintain freedom and security through Power for Peace.

Our Open House will be from 9:30 a.m. to 4:00 p.m. The first event of the day will be a Wing Review in honor of Pilot Training Class 65-G on the flight line at 10:00 a.m. Static displays of aircraft and equipment, fly-bys of training and tactical aircraft, Bozo the Clown Helicopter, and the Ft Bliss Army Jump Team, are among the interesting activities planned for your enjoyment.

We are proud to be members of the United States Air Force and we look forward to celebrating the sixteenth observance of Armed Forces Day with you.

Jurors Again Ponder Fate Of Klansman

HAYNEVILLE, Ala. (AP) — A deadlocked jury was called back into court today to try again for a verdict in the civil rights murder trial of a Ku Klux Klansman.

The 12 jurors deliberated four hours and 20 minutes Thursday evening before Circuit Judge T. Werth Thagard ordered them locked up for the night.

He told the jurors, all white men, to resume their deliberations at 9 a.m. (Central Standard Time) in hope of reaching the unanimous agreement necessary to convict or acquit Collie Leroy Wilkins Jr., 21, of Fairfield, Ala., of the slaying of Viola Gregg Liuzzo, a white civil rights worker from Detroit, Mich.

Thagard handed the first-degree murder case to the jury at 3:40 p.m. Thursday and 75 minutes later a rap on the door of the high-ceilinged jury room appeared to herald a verdict.

REPEAT CHARGE

But the jurors only wanted further instructions from the court. They asked whether they could convict the paunchy, crewcut defendant of a lesser offense than first-degree murder.

The judge, repeating his earlier charge, explained they had a choice of first-degree murder, second-degree murder, manslaughter, or acquittal.

Two hours later, Thagard called the jurors back to the courtroom and gave them the choice of taking time out for dinner then or — if they still hadn't agreed on the fate of the accused — to wait and "get a steak when you get to Montgomery."

Each night since the trial began, the jury has been taken 25 miles to Montgomery where quarters were made available in the modern air conditioned courthouse.

KEPT TOGETHER

The jury in a murder trial must be kept together day and night and neither the 133-year-old Lowndes County Courthouse nor the small town of the Hayneville has the facilities to house the 12 men.

At 8 p.m., the judge summoned the jurors again and inquired, "What do you say now?"

"We don't appear to be near a verdict," replied Clifford McMurphee, a Burkville, Ala., farmer who apparently was chosen jury foreman.

Thagard then called off deliberations for the night.

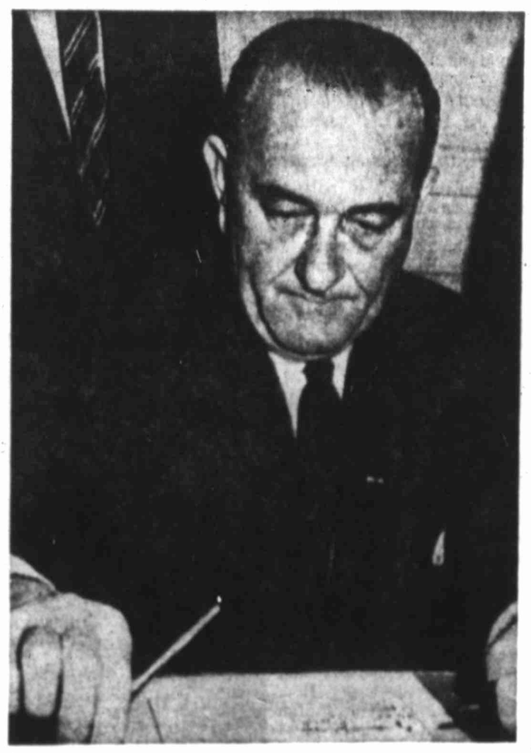

The jurors retired with the case after listening to the militant plea for white supremacy from klan attorney Matt H. Murphy Jr., the defense lawyer, and a warning against prejudice from three states' attorneys.

KLAN COUNSEL

Murphy, himself a klan member as well as legal counsel for the United Klans of America, punctuated his 70-minute speech to the jury with frequent reminders of the civil rights struggle going on in Alabama. At one point, he shouted, "I'm proud of my heritage. I'm proud to be a white man. I'm for white supremacy."

"The Communists and the nigger (sic) have taken us over," he charged. "Some of them have even infiltrated this courtroom to watch this trial."

He mentioned no names.

Signs Bill

President Johnson reaches for a pen as he adds his signature today in a special bill signing ceremony at the White House. The bill is the special $700 million appropriation measure to finance the war in Viet Nam. (AP WIREPHOTO)

Arms Fund Bill Signed Amid Storm

WASHINGTON (AP) — President Johnson signed today a special $700 million appropriation to finance the war in Viet Nam and said it was a message of American determination to resist aggression in Southeast Asia.

Johnson signed the bill in the East Room of the White House just three days after he asked Congress for the funds.

"It is not the money but the message that matters. And that message is simple — that message is clear," he said.

FIGHT AGGRESSORS

"We will do whatever must be done to ensure the safety of South Viet Nam from aggression. We will use our power with restraint and with all the wisdom we can command. But we will use it."

Johnson said that "once this message is clearly understood by all there will be greater hope for peace."

The money bill sped through the Senate Thursday, completing congressional action in almost unprecedented time, but some thunderbolts were hurled at the White House.

Congress should "resent being led around like a dog on a leash and given 48 hours to pass bills which the administration seeks to gird up its shaky policies," stormed Sen. Ernest Gruening, D-Alaska, one of three senators who voted against the appropriation.

MIRRORS CONCERN

And Sen. Jacob K. Javits, R-N.Y., mirrored the concern of several who voted for the bill when he said:

"I hope the President will not let this vote go to his head. We are voting to uphold the President in this particular action, but we are not voting for the President to do everything in violation of our consciences and full consent."

331st Leaves, Undisclosed Destination

Elements of the 331st Fighter-Interceptor Squadron, an Air Defense Command unit based at Webb AFB, departed the Base today under what apparently was a special-order assignment.

Neither Base authorities or command echelons with the ADC would make any official comment.

A number of the 331st's "hot" 104's took off for an undisclosed destination, accompanied by support aircraft. The 104's are equipped with automatic 20 mm cannons, and can carry some types of missiles.

The Dominican situation could have prompted the move, but there was no official confirmation of this.

During the Cuban crisis of October, 1962, the 331st was moved into Homestead AFB, Fla., as a part of the vast collection of U.S. strength. It won a special unit citation for its performance during that crisis.

The squadron presently is commanded by Lt. Col. M. W. Sharek Jr.

New Airstrip Work Starts Upon Arrival

SAIGON, South Viet Nam (AP) — A flotilla of landing craft brought 3,000 U.S. Marines and 3,000 Seabees ashore today at Chu Lai, 52 miles south of the big Da Nang air base. The Leathernecks will guard a combat airfield which the Seabees will construct.

There was no contact with the Viet Cong during the landing, but far to the South the Communist guerrillas staged a savage attack on a Roman Catholic town, inflicting 105 casualties.

ATTACK BRIDGES

Eighty-one U.S. jets attacked bridges and barracks in North Viet Nam today. Main attention was given to the Than Hoa highway and railroad bridge, 80 miles south of Hanoi. A spokesman said the bridge remained standing, but its approaches were badly damaged. One F105 fighter-bomber was shot down at sea. The pilot was rescued.

U.S. officials in Saigon reported three raids by 10 U.S. Navy planes Thursday over North Viet Nam. The sorties were aimed at railroad traffic, ferry boats, bridges and trucks.

Pilots reported good results, but specific details were not given. All planes returned to their carriers, officials said.

START AIRSTRIP

The Marines and Seabees landed at Chu Lai in perfect weather, and the Seabees went to work at once building a 4,000-foot airstrip to be used for operations in central Viet Nam. Intelligence sources have said a North Vietnamese regiment is operating in the foothills and mountains to the west of Chu Lai.

After construction is completed, the Marines will move out into the area, seeking out the Viet Cong.

The big new landing, plus the increased American involvement elsewhere in Viet Nam, is behind the request which President Johnson made of Congress for an extra $700 million. Congress approved the request Thursday.

45,000 YANKS

The landing brings the total number of U.S. servicemen in South Viet Nam to about 45,000.

Alert Issued On Weather

By The Associated Press

The Weather Bureau issued a severe weather forecast for the eastern half of the Texas Panhandle today.

It predicted a few severe thunderstorms with hail, locally damaging windstorms and a tornado or two.

In the area are Borger and Pampa. Amarillo is just to the west.

The forecast was to extend from 3 p.m. to 9 p.m. in an area 60 miles on each side of a line from 30 miles west of Childress to 30 miles east of Dodge City, Kan.

Much of the same area was alerted Thursday night to turbulent weather which failed to occur.

Many Activities On Tap For Webb's Open House

For the second consecutive year, Webb Air Force Base will hold a combined Armed Forces Day and an Undergraduate Pilot Training class graduation today and Saturday.

Armed Forces Day Saturday will include flyovers, static displays and an open house.

Graduation activities begin this evening with a dining-in, beginning at 7 p.m. in the Webb AFB Officers' Open Mess. The 32 Air Force officers, who will receive silver wings at the wing review and graduation, will hear Brig. Gen. John W. Vogt Jr., director of policy planning staff at the Pentagon, as featured speaker at the dining-in.

OPEN AT 9:30

Tomorrow, the gates of Webb will open to the public at 9:30 a.m. for those who wish to see the review and graduation at 10 a.m. on the base flight line. Immediately following the review, the 32 officers will receive the silver wings of an Air Force pilot.

Sandwiched in between the graduation exercises in the morning and the open house, will be the annual Armed Forces Day luncheon. This year, however, it has been changed to a stand-up brunch with more than 300 civilian officials and military members invited. The brunch begins at 11:30 a.m. and continues until 1 p.m. in the Officers' Open Mess.

Aircraft flyovers are scheduled throughout Saturday afternoon. Included in the aircraft static display on the flight line are the F-84, F-89, F-100, F-101, F-102, F-104, F-105, F-106, F-4, F-5, A-1E, B-57, C-130, T-33, T-29, T-37, T-38, T-39 and HH-43B.

Of special interest will be the Royal Air Force Vulcan bomber, which is being flown to Webb from Great Britain. The bomber is a delta-wing, medium range type. Only three of these aircraft will be displayed in the United States on Armed Forces Day.

BOZO, CLOWN

Also featured on the open house program will be "Bozo the Clown," an H-23 helicopter which is painted as a clown and will perform aerial acrobatics.

Types of aircraft on display run the gamut from the F-84 Thunderstreak to the F4C Phantom II. Manufactured by McConnell Aircraft, the Phantom II is rapidly coming into the Air Force aircraft inventory, particularly in the Tactical Air Command. The Phantom II can carry twice the weapon payload of the World War II B-17 Flying Fortress.

Also on hand will be the Army National Guard's M-44 155-mm self-propelled cannon and the Hawk missile. The Navy will provide a Polaris missile, and the Air Force will have a Sidewinder missile on display.

Most of the static displays will be located in hangars T-1 and T-25.

Tonight's dining-in speaker, Gen. Vogt, has been in his present position as director of policy planning staff, office of the assistant secretary of defense, since February, 1963. In this assignment he heads a staff of Defense Department planners at the highest level. Gen. Vogt has been selected for his second star.

Graduates are Capts. Peter Pitman and Larry L. Snow, 1st Lt. Thomas H. Niquette, 2nd Lts. Randall H. Boyett, Thomas E. Brady, John D. Broman, Leonard J. Doton, Estel G. Gifford, James L. Green, Richard H. Gronning, Terry J. Hadley, James L. Hayes, Jimmie D. Martin, Arthur A. McNatt, George B. Rice, all from 65G-Fl.

OTHERS

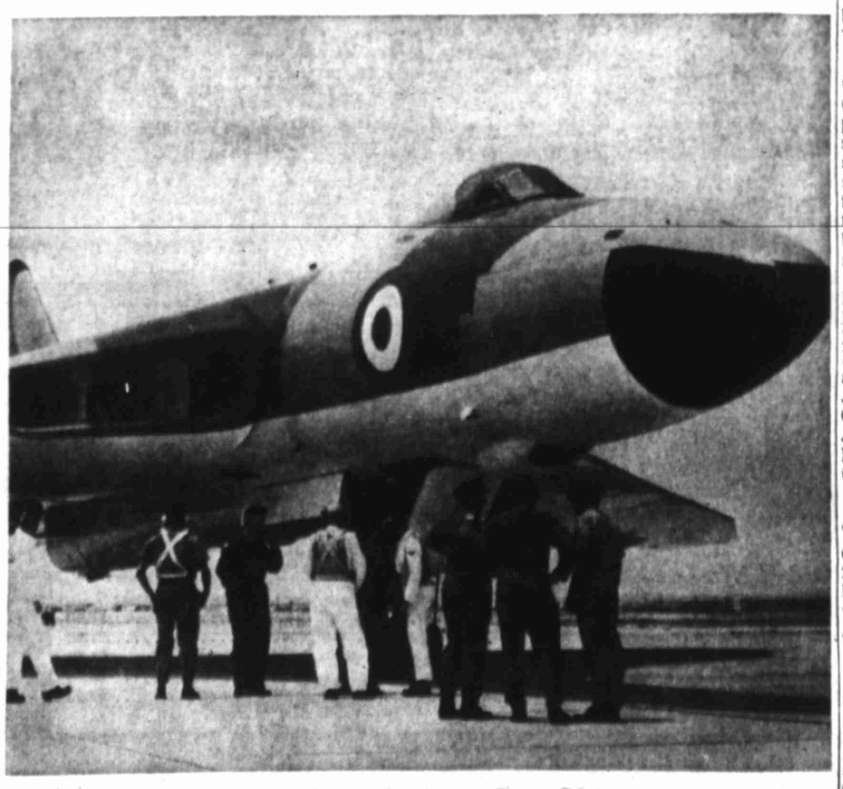

Also, 1st Lts. Roger A. Ayres, Thomas H. Edge, David L. Hardesty and Thomas W. Young; 2nd Lts. Carl M. Bendick, Herbert R. Dean III, Richard Delvecchio, George D. Golden, Juey J. Hebert, Jack S. Kelly, Weman R. Kierbow, Frank M. Malagarie, James B. McCormick, Angelo Perfetti and John M. S. Thomas Jr., all from 65G-FO.

Open House ends at 4 p.m., however, the graduating class activities continue. Saturday evening a formal reception will be held at the Officers' Open Mess at 7 p.m. It will be followed by a buffet dinner and a graduation ball.

The Lowry Air Force Base, Colo., band will perform at the various activities both days.

SCHEDULE OF EVENTS

9:30 a.m.	Gates Open
10 a.m.	Wing Review
	T-38 High Speed Pass
	T-38, T-37 Formation Flybys
	F4C Flyby
10:40 a.m.	Bozo the Clown (H-23 helicopter)
11 a.m.	Fort Bliss Parachute Team
	Refreshments in Hangars T-1 and T-25
	Judo Demonstration in Hangar T-1
	Static Displays on ramp and in Hangars T-1 and T-25
1 p.m.	T-41A Formation Flyby
1:10 p.m.	3560th Pilot Training Wing Air Show
	T-38, T-37, F-100, F4C Flybys
1:40 p.m.	Bozo the Clown (H-23)
2 p.m.	331st Fighter Interceptor Squadron Air Show
	F-104 and T-33 Flybys
2:35 p.m.	Fort Bliss Parachute Team
3:15 p.m.	HH-43 Huskie Fire Suppression Demonstration
3:30 p.m.	Static Displays
4 p.m.	End of Open House

Big Bomber Arrives For Show

This big, exciting Royal Air Force Vulcan bomber made a spectacular arrival at Webb AFB at noon Friday. It will be on display at the base Saturday as one of the highlights of the Armed Forces Day. As the big delta-wing craft touched the runway Friday, instantly it took off again and shot almost straight up before sweeping back to the field where it pulled up for crews to make it ready for display (Photo by Kenneth Good)

EXTRA COPIES

Many people away from Big Spring — relatives, friends, former residents and former Webb personnel—will find today's Armed Forces Edition of The Herald of high interest.

Extra copies are available at The Herald, and mailing will be handled by us if you just bring in the addresses. Wrapped and mailed for just 20¢ a copy.

We suggest that you arrange for your "mail-away" copies immediately.

U. S. Hopes To Begin Dominican Withdrawal

WASHINGTON (AP) — Officials said today the United States hopes to begin withdrawing some of its 20,000 troops from the Dominican Republic within a few days as contingents from other American nations move in.

Final decisions on the timing and number of withdrawals are yet to be made by President Johnson. Officials indicated they would be shaped in considerable degree by the speed and size of forces contributed by other countries to the peacekeeping operations of the Organization of American States.

NATIONS RESPOND

The OAS voted early Thursday to set up an inter-American military force in the Dominican Republic. Two countries, Paraguay and Venezuela, announced they were ready to contribute military units. The Costa Rican Security Ministry said later Thursday that country would send 10 to 20 men from its police organization, since it has no regular army. Brazil and Argentina were reported considering contributing military units.

There was a report in diplomatic quarters here that three prominent political figures of the Caribbean area might be asked by the OAS to play an important role in helping solve the political problems involved in creating a democratic regime in the Dominican Republic.

DEMOCRATIC LEFT

They are former Gov. Luis Munoz Marin of Puerto Rico, former President Romulo Betancourt of Venezuela and former President Jose Figueres of Costa Rica. The three have long been identified with what is known in Latin-American political circles as the democratic left. All are strongly anti-Communist and antidictatorship.

The three have been in Washington for several days and have been in touch with Johnson as well as the Organization of American States.

Many Entries In Horse Show

More than four hours of competition among horses and riders from Texas and as far away as Alamogordo, N. M. are expected Saturday in the fourth annual Texas Paint Stock Horse Club show at Big Spring's rodeo bowl.

A series of 27 events will range from calf roping to color and costume classes for children.

A champion all - around entrant will be chosen and trophies presented to grand champion stallions, mares and geldings, as well as winners in each class.

Spectators will be welcome at the show, with no admission charge.

Four children's classes are included, open to any size paint horse and children 16 years and under. Western pleasure, pole bending, barrel racing and a flag race are included.

Entries will be accepted in the show Saturday. Entry fees are $3 for the children's classes, $6 for other events and $16 for the calf roping and cutting classes.

Starting time for the show is 1 p.m. Kenneth Williams, Sterling City Route, is secretary.

Elaine Clark of Big Spring will judge the color and costume classes, and J. L. Hedrick, Post, will judge the remaining events.

The show is open to entries from outside Texas as well as within the state. The Texas club is an affiliate of the American Paint Stock Horse Association.

Gray To Handle Royal Tires

The U. S. Royal line of tires are now being handled by Zack Gray's Big Spring "66" Truck Terminal on US 80 West.

The firm will hold its grand opening May 13-15, Gray said, and the public is invited to visit and look over the complete line for passenger vehicles, commercial trucks, and farm tractors.

"We are in a position to handle tire repair and changes in the station, go on the road or to the farm," Gray said.

Included in the line of U. S. Royal tires is the "Laredo Rain" tire developed on the firm's proving ground at Laredo.

"We are going to give someone a set of four U. S. Royal tires for a first prize; 200 gallons of Phillips "66" gasoline as second, and 100 gallons of the same gas for third prize," Gray continued. "All one has to do is to register at the station on any of the three days. He does not have to buy anything or be present to win a prize. He'll be notified."

Gray said the Truck Stop would continue operation on a 24-hour basis, with the cafe adjoining.

Probably Came From A Plant

The five skinned cowheads, found in a pasture west of town on the Guitar ranch, have all the earmarks of having been from animals slaughtered by a meat processing plant.

Aubrey Standard, sheriff, said that an inspector for the livestock association, called into the case, examined the five heads and made the announcement they were probably from a professional slaughter house.

The way the heads had been skinned and evidence of the expert use of a boning knife were clues which led to the inspector's decision.

The heads were found and reported to the sheriff's office Bill Whitton, deputy, went to the scene.

The inspector said there are no reports of any missing livestock in this area.

Lions Set Bulb Record, Make $1,000

Downtown Lions set a record for completing their light bulb sale, Wesley Deats, president, said at the Wednesday meeting.

Through Tuesday, all but three cases were sold, and a cleanup crew sold these quickly Wednesday. He praised Frosty Robison, chairman of the sale, for one of the best organized sales efforts yet. Returns are incomplete, but it appeared the club would realize upwards of a thousand dollars for its blind and sight conservation, youth and welfare fund.

Donald Robbins, high school athletic director and football coach, briefed Lions on progress of spring training and prospects for next autumn. He repeated the omnipresent problem—that of finding a dynamic leader and thrower at the quarterback post. While graduation will cause some real losses, some promising young material is coming up. Robbins was encouraged by the good turnout of sophomores.

Rev. Beazley Marks 25th Anniversary Wednesday

REV. FRANCIS B. BEAZLEY

A lot of the world has been covered by him during the 25 years since the Rev. Francis Beazley, pastor of Immaculate Heart of Mary Catholic Church, was ordained to the priesthood. He will celebrate a Jubilee Solemn High Mass at 6:30 May 12 in commemoration of his ordination in 1940.

The mass will be said at the church, on US 87 South, and then a dinner, honoring Rev. Beazley, will be given in the school cafeteria. Some 25 to 30 priests, including Monsignor Marthaler of Rowena, are expected to be present for the dinner.

Rev. Beazley expects to leave, around the first of June, for a trip to Ireland and a pilgrimage to the Holy Land, and expects to be away for about three months.

"I expect to see a lot of Ireland while I'm there," he said. "Dublin is my home and I still have a sister and other relatives there. I will join other priests in a group in London for the pilgrimage to the Holy Land."

Immaculate Heart of Mary's pastor has been with his charge since August, 1958. He attended St. Kevin's College, Glencree, Ireland, and was ordained following his graduation from St. Conleth's Seminary in Daingean, Ireland in 1940. Post-graduate work was done at Our Lady's Scholasticate, in Piltown Ireland.

He was assistant pastor of the Church of English Martyrs, Tower Hill, London, England in 1941-42. He served as chaplain the British Army from 1942 to 1946, with tours in England, India, Burma, France, and Indonesia.

Rev. Beazley came to Texas in 1947 and served as assistant pastor at St. Mary's Church in San Antonio; Sacred Heart Church at Falfurrias, and at St. Ann's in Midland. He was then pastor of St. Joseph's Church in Edinburg, before coming to Big Spring in 1958.

In Big Spring, he has served as Deanery moderator of Christian Family Movement; Big Spring Deanery, and District Superior of Oblate Fathers. His church membership runs well over 500.

Air Attacks Said Hitting Red Lines

SAIGON, South Viet Nam (AP) — Secretary of Defense Robert S. McNamara says the air attacks on North Viet Nam, which began three months ago today, are helping restrict the flow of men and goods to the Viet Cong.

Authoritiative U.S. sources in Saigon say, however, the air strikes by U.S. and Vietnamese forces have failed so far to halt large-scale movements of men and supplies.

These sources say the air war has been slowly and carefully escalated, keeping world reaction and Red China in mind.

The regular day and night attack schedules now make the first scattered raids on the North look like pinpricks. Information available here indicates the future will bring bomb and rocket attacks dwarfing anything to date.

OTHER PHASE

In the other phase of the air war — inside South Viet Nam — serious difficulties have to be worked out to get the most effective use of U.S. jets and propeller-driven Skyraiders which join Vietnamese Skyraiders in giving Vietnamese government ground troops close air support. As part of the effort to streamline things a U.S.-Vietnamese joint command has been created in the four military corps areas. In each case a Vietnamese officer is in charge.

One mystery was the sudden appearance and then disappearance in early April of attacking Communist MIGs over North Viet Nam and the Gulf of Tonkin. The MIGs, at least some of which were Chinese, darted down onto U.S. Air Force F105 Thunderchiefs and may have accounted for a Navy jet that didn't get back.

WINDS SHIFT

The weather has improved vastly over North Viet Nam with the shifting of the monsoon winds, although rain squalls occasionally hamper air activity.

Discussing the U.S. air war in the North, one high Air Force source said: "We are not going all-out by a longshot."

No official spokesman would say whether further escalation of the air war is in the ofning. But other sources clearly indicate this will happen soon.

Authoritiative sources say the present level of air strikes is not sufficient to keep roads and railways under the virtually sustained attack necessary to bar Communist military convoys.

One U.S. Air Force source added: "Anyone who thinks we are going to win this war by knocking out bridges or railroad trains is dead wrong, but we can harass them and slow the movement down."

One indicator of an increased air war is the plan to build a new jet air strip at Chu Lai, on the coast 52 miles south of the big Da Nang Air Base. Three thousand Marines landed there today and some 3,000 Seabees are due there in the next two days to start work on the field.

BEEFED UP

U.S. Air Force units in the Far East have been beefed up sharply in the past three months and the buildup probably is not over. Navy jets could be increased at any time by adding more carriers to the two the 7th Fleet normally has stationed near Da Nang.

U.S. and Vietnamese air force planes together with Navy attack aircraft have poured more than three million pounds of bombs into North Viet Nam plus huge quantities of rockets and cannon fire. The Navy has lost 17 planes and 12 pilots, the U.S. Air Force 14 jets and 8 pilots and the Vietnamese air force 7 Skyraiders and 4 pilots.

Announced results have been 21 bridges blasted, 1 air base, 7 supply depots and power stations destroyed plus about two dozen railroad cars and an unknown number of trucks knocked out. In addition, a large quantity of ammunition and war material has been destroyed plus an unknown number of North Vietnamese troops killed.

HIT BRIDGES

Attack planes have been going for bridges and other "choke points." The aim was to create bottlenecks for Communist traffic.

U.S. airmen are fairly proud of their strikes in the South against the Viet Cong, pointing out that in one day 430 sorties were flown against a suspected Viet Cong base northwest of Saigon.

Some senior U.S. Army sources are a good deal more cautious about the effect of air attack on the Viet Cong. They say it is virtually impossible to pinpoint Viet Cong base camps or supply dumps. During ground operations aircraft often are late when crisis calls come, or bomb an area ground forces are not yet ready to assault. Some of the fault for the latter falls on slowness of the ground forces, U.S. advisers have said.

Zale's Diamond Watches Are For Everyone

MOTHER

Guess what Daddy got you at Zale's...

The new look in diamond solitaires . . . ingeniously crafted in 14K gold. $250

Eighteen diamonds follow a brilliant course in this masterfully designed 14K dinner ring. $395

A magnificent emerald cut diamond is accented by four baguettes in this pair, 14K. $350

Twenty diamonds outline an exquisite heart in this sparkling 14K pendant. $110

This lovely 14K gold pendant with diamond clapper is a real "bell ringer." $29.95

Diamonds resemble fresh dew drops in these beautiful 14K gold buttercup earrings. $125

The Florentine square case of this 17-jewel Elgin is beautified by six sparkling diamonds. $59.95

This slender 14K bridal pair is designed with fine center diamond offset by ten diamonds. $150

A magnificent deep blue Linde star is gloriously accented by twelve diamonds, 14K. $125

Twelve strands of 14K gold with genuine smoky topaz quartz make a fine necklace. $19.95

Two bright diamonds combine with a cultured pearl in brush finished 14K gold. $49.95

17-JEWEL PENDANT WATCHES

a. A fine, 17-jewel Baroness is housed within this simulated pearl and golden rope design.
b. This attractive 17-jewel Baroness pendant watch features an elegant enamel case.
c. The lovely golden Florentine and filigree look of this pendant accents a 17-jewel Baroness.
Your choice $17.88

SILVER CHARMS & BRACELET

a. Gleaming sterling silver charm bracelet with flattened edges interspersed for accent. $7.50
b. Girl's profile charm in sterling silver. $1.50
c. Sterling silver boy's profile charm. $1.50
d. Sterling girl's head charm, genuine diamond eye. $2.95
e. Boy's head charm with genuine diamond eye, sterling. . . $2.95

Ready For Junk Heap

Cars that took force of a tornado that ripped Fridley, in suburban Minneapolis, Thursday night, are ready for the junk heap. One auto was tossed atop another and into side of home. (AP WIREPHOTO)

Twisters Kill 10, Injure Over 300

MINNEAPOLIS, Minn. (AP) — A string of tornadoes spewed death and destruction over this heavily populated area of Minnesota Thursday night, killing at least 10 persons, injuring more than 300 and causing millions of dollars in property damage.

More than two dozen suburbs lay in the path of the winds that skipped to the ground and lifted, only to come down again over sections to the southwest, west and north of Minneapolis during the supper hour.

DELUGES LEAD

Heavy rain and two-inch hailstones preceded the twisters.

Utility lines were flattened, in many sections dangerously crossing highways lined with homeward-bound workers. Dozens of accidents were reported on the highways.

Hundreds of homes were damaged and many were destroyed.

Gov. Karl Rolvaag called out National Guard units to help local police and Civil Defense volunteers to maintain order.

Tornado sightings were reported over at least 25 small towns.

HEAVIEST DAMAGE

The heaviest damage was reported to communities around Lake Minnetonka, some 15 miles west of Minneapolis and Spring Lake Park and Mounds View, 15 miles north of the city.

Four persons died at Mound, a residential community on Lake Minnetonka's west shore, where dozens of homes were hard hit, and many destroyed. Island Park and Navarre also on the lake's west side, received heavy property damage and reported many injured.

FOUR DIE

Four persons died at Spring Lake Park, one at Mounds View and one at Norwood.

The injured in twisters that hit Fridley, Spring Lake Park and Mounds View were brought to Mercy Hospital at Coon Rapids in a continuous stream. After two hours, the hospital's administrator, Robert Van Hauser, pleaded with ambulance drivers and motorists to take their injured to other nearby hospitals.

Van Hauser estimated that upward of 100 persons had been treated at Mercy Hospital. Nearly 30 of those treated were in serious condition.

Public Affairs Now Businessman Field

NEW YORK (AP) — Gone are the days when a corporation president was judged solely on the amount and effectiveness of the hours he devoted to the company's financial statement.

Now he's being told to get out of the office and attend to other affairs: politics, education, civil rights, urban renewal, conservation. "Get involved," he's told, "and get the company involved too."

Said H. Bruce Palmer, president of the National Industrial Conference Board:

"There is a new awareness throughout the business community that pressing public problems make it essential that business come outside the store."

FROM ALL SIDES

The advice is coming from every quarter — from civil rights leaders, politicians, professors, public relations men, other executives. Self-interest is the primary reason for involvement. But there are altruistic motives also.

The problem of involvement has disturbed corporations and their executives throughout American industrial history.

With the development of the branch plant, for example, came criticism from town officials that the executives of the plant owed their allegiance to another city, to the headquarters city, and that they failed to help solve local issues.

Aware of the need for good community relations, executives were told to join in local activities, but this frequently meant the country club rather than a popular civic movement.

Community relations are still a problem to many companies.

Education long has been an "involvement" of business, but as the president of the New York Stock Exchange, Keith Funston, observed, one-fourth of this support — $250 million annually to schools and colleges — is coming from about 80 companies out of the thousands in our nation.

NO LONGER

For years the political arena was considered out of bounds by some corporations, but the Du Pont company found in a study recently that 930 of its employes now hold elective or appointive government offices.

More recently, corporations and their executives have been urged by civil rights leaders, other businessmen — and by governmental action — to enlist in civil rights programs.

Charles G. Mortimer, former chairman of General Foods Corp., said recently at a meeting of the Industrial Conference Board in Los Angeles, studies show chief executives of larger corporations now give 40 to 60 per cent of their time to public affairs.

As recently as eight years ago, he said, only a handful of companies were involved in any way in public affairs. Today, more than 500 corporations have formal units to deal with such problems.

Does an eyesight specialist other than one at TSO examine your eyes?

If so, you can still have your prescription for glasses or contact lenses filled at Texas State Optical, using only the finest quality lenses and frames — at reasonable cost, too.

TSO guarantees absolute accuracy in filling your ophthalmic prescription.

Select your frames from hundreds of fashionable styles and colors.

Consult your telephone directory for the TSO office nearest you.

Court Asked To Reconsider Dr. Sam Order

CLEVELAND, Ohio (AP) — Dr. Sam Sheppard's attorney says he is asking the 6th U.S. Circuit Court of Appeals to reconsider its order sending Sheppard back to prison to serve out his sentence for the 1954 slaying of his wife, Marilyn.

Sheppard was sentenced to life imprisonment.

Attorney F. Lee Bailey of Boston said at a news conference here Thursday that he mailed the appeals court a request for a rehearing.

Bailey also said he had asked for a 20-day extension — to June 14 — in addition to the 20 days already allowed to answer the appellate court order.

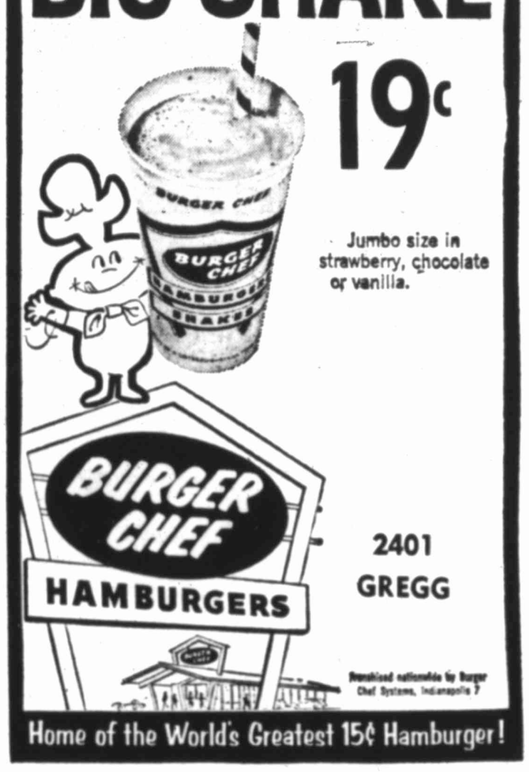

The "ultimate aim is to get a new trial" for Sheppard, Bailey said. Sheppard was freed last July by a federal judge who ruled his constitutional rights were violated during his trial.

A Devotional For The Day

Look carefully then how you walk, not as unwise men but as wise, making the most of the time, because the days are evil. (Ephesians 5:15-16, RSV)

PRAYER: Dear Lord, forgive us for our waywardness. Keep us from wandering from Thee, that we may live in perfect obedience to Thy holy will. Help us, we pray, to walk in Thy light this day and forevermore. In Christ's name. Amen.

(From the 'Upper Room')

Another Russian Discovery

The managers of the modern Russian state have searched in vain for guidance in the gospel according to Karl Marx and Friedrich Engels on some questions of modern economics. How to keep demand and supply in some sort of balance, for instance.

Under the system of state planning, factories are told what to produce, where to buy most supplies, when and where to sell output, and what prices to pay and charge. In actual practice the factory manager may discover that the quotas assigned are too large in relation to material allocated. Suppliers do not deliver on time or else ship goods with the wrong specification, interrupting output and endangering the fulfillment of annual quotas.

In its search for a solution the Russian leadership has hit upon a revolutionary approach, the Morgan Guaranty Survey reports. Instead of basing bonuses just on the fulfillment of quotas, a new "profitability rate" has been introduced. The profitability rate is defined as the total profit of the firm in relation to its stock of fixed and working capital. The size of a firm's bonus will now be determined by its profit. In 1965 some 400 shoe and clothing enterprises will switch to the profit criterion and the new market-oriented arrangements which seek to supply store managers with merchandise their customers want.

Premier Alexei Kosygin laid down the law when he said: "It is necessary to wage a resolute struggle against those who represent didactic management of the national economy, who substitute arrogant instructions for real, businesslike management. . . We shall take the path of planning on the basis of orders from customers not only in the consumer-goods industries but in other branches of the economy as well."

This sure does sound like decadent capitalism — just as does another pronouncement to the effect that advertising more than pays for itself. But the Russians, no doubt, will argue that it represents nothing less than state socialism in action. It's at least refreshing to hear that the Russians no longer consider the subject of profits as vulgar.

Be Careful To Report

Do you employ domestic help by the hour or day earning more than $50 a quarter? If so, you had better check whether you are making proper payments to the Internal Revenue Service for Social Security — or some years from now you will find yourself having to cough up hundreds of dollars in back taxes, penalties and interest.

Employers are supposed to be making quarterly payments of 7½ per cent of such wages, representing employers' and employes' contribution to Social Security taxation. The IRS guesses — it has no way of knowing for sure yet — that some 300,000 employers of domestic workers are failing to make those payments.

Nothing may happen for a long time. The catch comes when the workers reach 65 — perhaps sometime after leaving your employment — and apply for Social Security benefits. Their earnings claims are then checked against employers' payments. And if such payments have not been made, the IRS goes after the former employers to get all the contribution money due from both employers and employes.

It's a cumbersome law, though IRS has some nice forms you can use to facilitate regular payments. And ignorance of the law is no excuse. If you are among the estimated one-fourth of domestic-help employers delinquent in such payments, better ponder the consequences.

David Lawrence

Our Position With The OAS

WASHINGTON — Whether or not some of the countries in Latin America disapprove of the sending of United States military forces into the Dominican Republic, the realistic fact is that basic international law approves such rescue measures when the lives of foreigners are endangered and no other police force to protect them is available.

THE CHARTER of the Organization of American States provides, in effect, that where there is an established government capable of discharging its international obligations, "No state or group of states has the right to intervene directly or indirectly, for any reason whatever, in the internal or external affairs of any other state." But this does not exclude intervention when the local government has broken down. The United States has openly declared that it has no desire to participate in the political affairs of the Dominican Republic.

There are indeed, even more pertinent articles in the charter of the Organization of American States on this point. Articles 7 and 8 say:

"EVERY AMERICAN state has the duty to respect the rights enjoyed by every other state in accordance with international law.

"The fundamental rights of states may not be impaired by any manned whatsoever."

These provisions are in complete accord with precedents of international law, which have always held that the lives of foreigners resident in a country must be protected against any violence and that, if the existing government is incapable of giving such protection, the state or states whose nationals are threatened may take appropriate action in defense.

ANOTHER ARTICLE in the charter provides that "the territory of a state is inviolable" and that "military occupation" or other measures of force must not be taken against it even temporarily. The plain objective of such a provision, however, is to prevent territorial acquisition. The United States has no hostility toward the Dominican people and, of course, has no intention of annexing a single foot of territory or of interfering with a government once established.

In the present instance, the United States had detected an effort on the part of the Communist imperialist regimes to take over the Dominican Republic. This has precipitated a situation which not only endangers the lives of all foreigners, but also could extinguish self-government altogether in the Dominican Republic.

THIS MEANS that the United States was obligated by the charter of the Organization of American States to exert military as well as moral force against the aggressors.

By announcing at once that the United States would withdraw its forces as soon as the OAS could put into effect its own peace plan, President Johnson followed the procedures provided for in the charter of the Organization of American States. The duty of a strong nation like the United States is clear. It must protect the weaker nations. If an emergency arises, it can act alone.

THE PROOF of the sincerity of the Washington government is to be found in its open declaration that it will join with other countries in the OAS to help preserve the independence of the Dominican Republic.

The United States action, therefore, is based upon two points — the protection of the lives of foreign nationals, and the preservation of the territorial integrity and political independence of the Dominican Republic against acts of agression by imperialistics governments. This was the fundamental principle originally proclaimed in the Monroe Doctrine, and it has been preserved in essence in the charter of the organization of American States.

Billy Graham

How can you decide whether somebody is really a Christian? . . . L. K.

A Christian is one who is trying to pattern his life after that of Jesus of Nazareth. He has met the Savoir, and made a decision to follow Him. He is trying to love every man, woman and child as God loves them. He is trying to speak as Jesus would speak. He is making an effort in each situation that arises to do what Jesus would do.

Still he may make many mistakes. We all do. He may say and do things which are unworthy of a follower of the Master. We are all human, and make slips every day. So we must never judge another by some thoughtless word or deed. The Bible says: "Judge not that ye be not judged." (Matthew 7:1). A person can rightly be called a Christian if he has dedicated his life to the Master, and is honestly trying to live by the principles Jesus taught. This is the test.

Viet Nam Presents Gruesome Picture

WASHINGTON (AP) — "It's a mess," President Johnson told reporters the other day, talking about the war in Viet Nam. And nothing illustrates his point better than two books, just out.

They give a gruesome picture of a savage country — distrust, corruption, contempt and brutality — upon which the United States has spent about $4 billion and hundreds of American lives to try to save from communism.

The books are by two newsmen, Malcolm W. Browne of The Associated Press and David Halberstam of The New York Times, who last year shared a Pulitzer Prize for their coverage of Viet Nam.

Both books, Browne's "The New Face of War" and Halberstam's "The Making of a Quagmire," were finished before Johnson put bombers and Marines into the war.

HERE'S PART of the picture of the Vietnamese people by Browne who has been in their country since 1961:

Most of them not only dislike Americans but hold them in contempt; he cannot think of one among the thousands of Vietnamese officials he has known who does not only distrust one another but treat their own racial minorities atrociously.

He gives an almost incredible example of distrust among the Vietnamese whose next-door neighbor is Cambodia:

The bodyguards of the president or whoever happens to be in power are never Vietnamese but Cambodians. And well-to-do Vietnamese have such distrust of their own people they won't hire them as servants if they can hire Chinese.

ONE THING was always clear about President Ngo Dinh Diem who was assassinated in 1963 after being backed eight years solidly by the United States with men, money and weapons: He wanted all the American help he could get and no advice.

Halberstam, who reported from Viet Nam for about 15 months, says of Diem:

Under him and his family Viet Nam became a "Communist-type country without communism. It had all the controls, all the oppressions, and all the frustrating, grim aspects of the modern totalitarian state."

These summations pretty well point the direction the two books take. Browne's is focused on the Vietnamese people, in Saigon and the countryside, the kind of war that has been fought, and why the Viet Cong guerrillas won most of the country, grabbing it steadily, year after year.

HALBERSTAM'S BOOK, more personalized, looks at American ineptness and stupidity, the American failure to force Diem into reforms that might have won him support among the peasants.

Hal Boyle

Viet Press Center Is Wild, Woolly

DA NANG, South Viet Nam (AP) — In a strange war one of the strangest places out this way is the wild and woolly press center.

It is something like a 1925 auto court, the Long Branch Saloon in Dodge City, Kan., and a Mexican gambling den.

Officially it is named the Da Nang Press Center. But it is also known as Riviera on the Da Nang, the Flea Bag, and Pest Paradise.

It consists of a series of yellow-painted tin roof rooms bordering a dusty court in the center of which stands a water tower.

THE ENTRANCE is through a big iron gate. At the other end is a comfortable bamboo - topped patio which stretches to a barbed wire - protected ledge overlooking the Da Nang River. From here the weary gentlemen of the press can sally forth, yawning before dawn, to cover a morning patrol in the hills with the U.S. Marines, or fly a helicopter mission.

At evening, dusty, bone-weary and, perhaps, shaken by their experiences, they return to shower and write their dispatches.

The French owner of the motel, a former marine engineer who left ship here around 1949 for reasons of his own, has six slot machines and an antiquated pinball machine.

THE SLOT machines are fixed to yield the house a profit percentage that would shame a Chicago gangster.

The bar has five hostesses of the same vintage as the pinball machine. They are called Marie, Low Tacky, High Tacky, Whacky and Old Faithful.

The press center is presided over by Lt. Col. W. C. Mahr of Santa Ana, Calif., a pipe-smoking former company commander in the Korean campaign.

But the real major domo is Staff Sgt. Harold F. Colby, 30, of Easthampton, Mass., a man with a new mission in life. He and his wife hope to run a hotel of their own some day when he retires.

Colby plans to get his experience now by converting the press inn here into a kind of horizontal Miami Beach resort hotel. He wants to get rid of the faded bar belles and to ban the four cats, two mangy old dogs, and grave hop toads that play games in the courtyard.

He has installed a badminton court and acquired a motorboat for river cruising and water skiing. He also is having snappy new uniforms sewn for the waitresses so that Colby's Ritz will have an air of spit and polish.

THE CORRESPONDENTS are fond of the hard-working sergeant but they point out one grave defect in the press center here. It is perhaps the only one in the world that doesn't have a telephone and a newsman without a telephone is like a plumber without a wrench.

"Telephones," say Colby sadly, "are very hard to get in this country."

To Your Good Health

Porphyria Is An Hereditary Disease

By JOSEPH G. MOLNER, M.D.

Dear Dr. Molner: My 13-year-old daughter has porphyria, which I am told is incurable.

Please tell me what it is, and if it can be fatal, in language I can understand. —Mrs. R. W.

Certain necessary chemicals in the body are colored, hence are called pigments. Blood is red; other pigments control the color of the skin, hair, eyes. They are present for purposes other than merely giving color, of course. The red, iron-containing cells of the blood, are the cells which carry oxygen, for one example.

Now when the body is unable to handle certain of these pigments properly, we have a disease called porphyria. (Other diseases can involve other pigments. Jaundice is one example.)

With porphyria, attacks can be triggered by too much sunshine; the use of barbiturate medications; some infections; or attacks may occur during menstrual periods.

Various systems of the body may be affected, but violent abdominal pain is one of the common consequences. Mental symptoms and muscle weakness may occur. One of the diagnostic signs is that urine is discolored and becomes a dark burgundy on standing. Then chemical analysis reveals the presence of porphyria.

The underlying cause is an inherited trait—in short, it is hereditary, but it is not overly common.

It is incurable, but you must not think of it in terms of a fatal disease. Indeed, some patients recover from it automatically over a period of years, although they haven't been "cured."

There is no specific treatment. Rather, the goal of the doctor (and the patient) is to prevent attacks. In the main this means avoiding excessive sun, especially if the skin seems to be affected in attacks; avoiding barbiturates in any form; and treating infections promptly. (It is wise to avoid sulfa, however.)

If sedation is needed, tranquilizers may be used, but not barbiturates. Steroids (cortisone-type) hormones sometimes are tried.

• • •

Dear Dr. Molner: Is the fluoride which is put in drinking water the same as that which is found naturally in some localities? What is fluoride made of? Is it available in drug stores?—J. C. S.

Generally speaking, sodium fluoride is used in drinking water; when found naturally in water it is more usually calcium fluoride. Either contains fluoride which is the important element. Fluorine isn't made of anything. It's a chemical element. Tablets can be obtained from druggists.

• • •

How to get rid of leg cramps and foot pains? The answer may be simple. Write to Dr. Molner in care of The Herald for a copy of the booklet, "How To Stop Leg Cramps and Foot Pains," enclosing a long, self-addressed, stamped envelope and 20 cents in coin to cover cost of printing and handling.

• • •

Dr. Molner welcomes all mail from his readers, but because of the great volume received daily he is unable to answer individual letters. Dr. Molner uses readers' letters in his column whenever possible.

Around The Rim

He Wins Who Has The Night

Behind the reports of the war effort in Viet Nam undoubtedly are some interesting, at times amusing and oft-thought-provoking anecdotes in the lives of military personnel. Some interesting glimpses of their lives there were given last year in a series of letters written by an Army officer, later reprinted in a brochure distributed among Army personnel.

IN ONE LETTER, the captain, a graduate of West Point, told how experiments were being carried out in the use of night saturation patrolling. One night alone 1,000 separate ambushes were placed by the South Vietnamese and their American advisors.

"One can get most uncomfortable after 11 hours of not moving," he wrote. That night his ambush position turned out to be in the middle of a pig pen, occupied by the pig.

IN BETWEEN teaching South Vietnamese soldiers how to conduct guerrilla warfare, he wrote that he was spending what spare moments he found by taking a correspondence in, of all things, "counter-insurgency and psychological warfare."

"It's interesting to study the stuff while you're smack in the middle of it," the officer, Capt. James Spruill, wrote.

A MOVIE was shown one night in the market of a South Vietnamese village and he said not only did the villagers watch it but members of the Communist Viet Cong came in to see the cartoons.

"Strange thing to sit there in the night, a pistol in your hand, and laugh at the animated cartoons with members of the Viet Cong," he said.

IN ANOTHER letter, the captain wrote that he was becoming so accustomed to speaking in Vietnamese that his English sounded strange to him.

In April of last year, he was killed when his vehicle hit a land mine.

In serious words about the war effort, he had written that "when the night becomes more ours than theirs, events will take a dramatic turn." The emphasis on the importance of night fighting recalled similar words during the Korean conflict.

"It is a war which can be won no matter what present circumstances are," he wrote shortly before his death. —PRESTON MAYNARD

Holmes Alexander

Two-Front War And A Trojan Horse

WASHINGTON — Castro's Cuba, as previously reported here, stands in the calculations of the Johnson administration with Viet Nam — a Communist base for launching war.

Writing in this place last March 9th, I reported that the State Department had no recent proof of warlike activity by Castro, adding: "But when we are able or willing to show proof, the President's passive policy toward Cuba will be subject to change."

THE PRESIDENT'S televised address last Sunday night left no doubt that he has now learned of Red Cuba's involvement in the attempt to communize the Dominican Republic. Speaking a few hours earlier on "Meet the Press," Senator Tom Dodd gave his well-informed opinion that the same Communist headquarters were directing the attack both in Viet Nam and in the Caribbean.

IT WOULD BE fatuous for realistic-minded Americans to delude themselves about the fix their country is in. World Communism has engaged us in the Far East, has opened another front off the Florida coast, and is deeper than our officials will admit in organizing Reds and weak-minded liberals into anti-American demonstrations on our campuses and in our streets. To put it bluntly — and to scorn equivocation — this country is in a state of siege. Its ramparts are being stormed by relentless foes, and the Trojan Horse containing infiltrators stands inside the walls.

THE SITUATION would be hopeless indeed if the man in the White House were not the resolute and skillful American that so many of us, not by any means all his political backers, know him to be. It is awkward to do personal reporting without violating confidential talks, but I will state as a known fact that Mr. Johnson suffered in agonized frustration while he watched the present crisis in its building days when he was vice president. I have the best possible reason to believe that in 1961 he viewed the double defeat at the Bay of Pigs and the Berlin Wall in helpless dismay.

HAD HE THEN been in the position he now holds, the Caribbean would not be a Communist-invaded area, and I doubt if he would have permitted the Berlin Wall to be the concession that the State Department made to Khrushchev in order to buy "peace" on our European frontier. I am certain beyond peradventure that the President's action of sending Marines to the Red-threatened Dominican Republic was a policy he adopted shortly after taking office in 1963, and that it applies to all parts of Latin America. "Act now, talk later" is the shorthand of this policy. It is well understood at the State Department, and those who disapprove of it may not be there much longer.

THE WORD "geo-military," used with deliberation in this column last week, describes the President's thinking, and the thinking he demands of his subordinates. As it became necessary to bomb North Viet Nam in order to maintain our military fist-in-the-face of Asian communism, it may become necessary to strike at Castro's Cuba in order to prevent World Communism from outflanking us in the Western Hemisphere.

No man in the presidency has ever acted more strongly to a real and present danger than Mr. Johnson has acted on opposite sides of the world. There remains for him to show the same resolve toward the Trojan Horsemen who are trying to open the gates from the inside. The state of war that now exists upon our outposts will not permit the Long Hot Summers of rioting that have marked the Stressful Sixties thus far.

(Distributed by McNaught Syndicate, Inc.)

Richard Starnes

The Insight Bug

WASHINGTON — Call him the Insight Bug, see, and build a whole system of philosophy around him. Big thing, see, family sitting around after dinner, late spring rain, open fire, neighbors in for a round of bridge, kids making almost-solid milk shakes in the new whatzzit that can liquefy a banana.

Fade in with somebody bringing in a log and outgrabing about the crummy weather for this time of year. The log goes on the fire and hisses because it's wet and then somebody says, "My God, what's that?" and you zoom in for a close-up of the thing on the rug.

FOR A MINUTE you just look at it, and the whatzzit in the kitchen and the hissing of the fire sound sinister instead of homey and comfortable.

"What is it, in heaven's name?" one of the women asks, and there is no kidding about the terror in her voice.

You look close now at the thing (you'll start calling it the Insight Bug much later, after you've tried to sort the episode out in your mind.) It is round, faintly reminiscent of some scratchy kitchen implement that's been used to clean a sooty saucepan, and it is covered with poisonous-looking black spines. It can't be much bigger around than a silver dollar, but it looks bigger, and you hope it turns out to be something inanimate. But it moves, pulsates more, and you understand that whatever it is, it is alive.

AS SOON AS that notion seeps in, the solution is obvious. "Kill it," somebody says.

See, here is where Insight begins. The adults react by wanting to kill whatever it is.

YOU GO TO the kitchen and get a paper picnic plate and come back and slide it under the thing on the rug. What the hell is everybody afraid of? Helicopters kill people, bugs don't. But the thing pulsates sullenly again and you almost drop the plate. You put the plate on the card table and take up the pencil you've been using to keep score. "Don't touch it," one of the women implores. You stick the pencil underneath it and flip it over. Its underside is covered with crescent-shaped marks that are orange in color. "I'll bet it's got a stinger someplace," your neighbor says. "Whyncha kill it?" But an idea is taking hold. You get another paper plate and cover the first one; leave him be and see what he does, you say.

IN FIVE MINUTES you lift the top plate. The creature from outer space has changed shape. He is no longer a spiney, sinister pincushion. He is a furry black caterpillar, somewhat larger than usual but otherwise unremarkable. Soberly you take him back to the woodpile, and later that night you spend a fretful, wakeful half hour wondering what kind of people we are all becoming.

The Insight Bug has come out of your woodpile to try to tell you something, but you fall asleep with the message, garbled and unclear, still undeciphered.

(Distributed by United Feature Syndicate, Inc.)

Gets Caught

DECATUR, Ill. (AP) — The city's assistant animal control warden—dog catcher—was arrested as a parole violator after an officer recognized him.

Clinton D. Smith, 26, was sought by authorities. He had been on parole since August 1963, after serving five years of a 10-year sentence for check forgery. Parole Agent John Koch said Smith violated the terms of his parole when he left the state without permission.

Smith was employed as a temporary dog catcher through an agency that provides temporary help.

Has Gavels

LAS CRUCES, N. M. (AP)—Mayor Thomas J. Graham, who has presided over City Commission sessions for a long time with no gavel, now suddenly is the possessor of two.

Troops of Girl Scouts and Brownies gathered around Mayor Graham one night to present a polished and engraved-banded gavel to the city chief.

At the close of the meeting, city employes, who had the same idea at about the same time, presented the mayor with his second mace of authority.

Forum Installs Officer Group

The Junior Woman's Forum installed new officers during a Thursday evening dinner at Holiday Inn. Mrs. Paschal Odom was in charge of the ceremonies. Her theme was a candle wheel.

Other decor of the dinner was based on next year's program, "Mother Was a Freshman." The main table featured a graduation hat on a large globe. Individual placecards were figurines dressed as graduates. The color scheme of red, white and blue was chosen by Mrs. Earl Zetsche, new president.

Other officers will be Mrs. Truett Newell, vice president; Mrs. Wayne Henry, recording secretary; Mrs. Don Weeks, treasurer; and Mrs. Dee Jon Davis, corresponding secretary.

Mrs. Zetsche, Mrs. Newell and Mrs. Odom were presented gifts for being outstanding club women of the year.

League Has Birthday

A birthday supper was planned at the Thursday evening meeting of the St. Paul Lutheran Parish Workers. The group met in the home of Mrs. Clair Wiederhoft, and the devotion was given by Mrs. Garland Helton.

Mrs. Frank Long presented the discussion topic, "Christian Family and Morals." Joining the 18 members were three guests, Mrs. L. Sebelius, Mrs. Gus Oppegard and Mrs. Howard Enoch.

Mrs. Roger Wright, president, conducted the plans for the May 22 birthday supper for the Walter League leaders and their parents. She assigned Mrs. Long as entertainment chairman, and Mrs. Wiederhoft is in charge of the food. Mrs. Wright, Mrs. Moran Oppegard, Mrs. Walter Pachall, Mrs. Gilbert Pachall and Mrs. Paul Berset are in charge of the decorating.

Refreshments were served by Mrs. Wiederhoft and Mrs. Wright.

Re-Elected President

New officers were elected at the Thursday evening dinner meeting of the Insurance Women of Big Spring. Mrs. Henry Bell presided and welcomed Mrs. Joe Bob Baker, new member; and Mrs. Gloria Toombs and Mrs. Herbert Love, guests.

The new slate will be Mrs. Bell, re-elected president; Mrs. Ed Settles, vice president; Mrs. Bill Read, secretary - treasurer; and Mrs. Robin Howell, reporter.

Plans were made for a bosses' dinner to be held in conjunction with the official installation ceremonies. Mrs. Howell and Mrs. Frank Morphis are in charge of the committees.

The club also conducted a study session on the new insurance rates and revisions to become effective June 1.

Winners Named For Webb Games

Eight tables were in play for duplicate games held Thursday evening in the Officers' Open Mess at Webb Air Force Base.

North-south winners were Mrs. B. B. Badger and Mrs. Rogers Hefley, first; Mr. and Mrs. Joe Steryer, second; and Mrs. J. H. Parks and Mrs. Myrtle Lee, third.

Winners in the east-west position were Mrs. E. G. Patton and Mrs. Dan Greenwood, first; Mrs. Charles Dodson and Mrs. Leland Pierce, second; and Mrs. J. H. Holloway and Mrs. Ayra McGann, third.

Knott Residents Welcome Guests

KNOTT (SC)—Mrs. Cecil Winterbamer and children, Houston, were weekend guests of Mr. and Mrs. W. M. Nichols.

Mrs. Dorris Carmichael is visiting relatives in Andrews.

Mr. and Mrs. W. F. Morris and Nekda, and Mrs. Alice Herren and Ila visited Rev. and Mrs. Claude Hold in Big Spring Sunday afternoon.

MRS. DONALD GARY SANDS

Couple Recites Vows In Odessa Church

Mr. and Mrs. Donald Gary Sands are residing in Cleveland, Tenn., following their marriage April 18 in the chapel of the Church of God in Odessa. The double ring ceremony was performed by the Rev. J. W. McNeese, Lamesa, before an arch decorated with greenery.

The bride is the daughter of Mr. and Mrs. C. L. Gilstrap, 1610 Young, and parents of the bridegroom are Mr. and Mrs. D. D. Sands, Route 2, Odessa.

Miss Linda Darity, organist, accompanied Miss Brenda Fox, Big Spring, as she sang "Whither Thou Goest."

Accompanied to the altar and given in marriage by her father, the bride wore a white floor-length wedding gown. The molded bodice, fashioned of lace, featured a square scalloped neckline and fitted lace sleeves that extended to the hand. The skirt of lace and silk organza gave a cutaway effect at the center front and opened to reveal a center panel of lace. A lace scalloped banding edged each side of the skirt and extended to edge the skirt front at the hemline.

ATTENDANTS

Attending the bride as maid of honor was Miss Alice Gann, of Cleveland. She wore a blue street-lgenth dress of dacron and carried a bouquet of white carnations in a cascade arrangement.

The bridesmaids, Miss Janice Osburn and Miss Donna McDonald, both of Big Spring, wore blue street-length dresses of dacron and carried bouquets of white carnations in cascade arrangement.

The bride's brother, Dean Gilstrap, Big Spring, was best man, and Doyle McNeese, Lamesa, and Gary Osburn, Big Spring, were ushers.

The flower girl, Debbie McNeese, Lamesa, wore a blue dacron dress and carried a white basket of red rose buds. Tommy Sands, Odessa, was the candlelighter.

For a wedding trip to Oklahoma, the bride wore a pink polkadotted two-piece suit of whipped cream with a white pillbox hat and pink accessories.

The bride is a graduate of Big Spring High School, and the bridegroom graduated from Odessa High School. Both are now attending college in Cleveland.

RECEPTION

Parents of the bride and bridegroom and attendants joined the honored couple in greeting guests at a reception in the fellowship hall of the church.

The refreshment table was covered with white lace over blue taffeta. Silver and crystal appointments were used in serving the three-tiered white cake topped with a miniature bride and groom. Small white and blue roses edged the cake.

Guests were registered by Miss Jolynn Sands, Odessa.

Out-of-town guests were E. O. McNeese, Big Spring; Mrs. George Barns, Dallas; and Mrs. J. W. McNeese, Midland; great-grandmother of the bride.

Designer Opinion

A famous rug designer now turns to comment on women's clothes. Edward Fields, custom rug maker, suggests that women could do well to select clothes by the same rules applied to home decoration. "The well-dressed lady is reminiscent of a tastefully - furnished room, in that neither looks contrived," said Fields.

New Slate Named By Spaders

New officers were installed at the Thursday meeting of the Spaders Garden Club. The ceremony followed a salad luncheon in the home of Mrs. Don Williams. Mrs. D. S. Riley was guest speaker and presented the new officers.

The new officers will be Mrs. Jimmy Morehead, president; Mrs. R. D. Dolan, vice president; Mrs. Donald Gratham, secretary; Mrs. W. D. Caldwell, treasurer; Mrs. Dale Smith, program chairman; Mrs. V. A. Whittington, parliamentarian; and Miss Bo Bowen, reporter.

The club presented awards to outstanding members for the past year. The awards were given to Mrs. Caldwell, Mrs. Dave Dorchester, Mrs. Morehead and Mrs. Dolan. A gift was also given to Mrs. Bowen as retiring president.

Glossary Gives Aid

Fine fabrics seen in couture collections this spring include some that are new, others that aren't.

Starting with A, B, C in the fabric glossary, there is Arielle —a new porous synthetic linen. Bark crepe is a fabric made of twisted yarns to resemble the bark of a tree.

Cascadine is a wrinkle proof silk-linen look-alike from Ducharne. The fiber content is 50 per cent viscose, 47 per cent rayon, and three per cent silk.

Notable, particularly at this time of year, is Cire Plastique. It is an imported shiny oil cloth used in rainwear.

Olive Oil Facial Good Treatment

In Spain, a beauty treatment that has been used effectively for hundreds of years consists simply of rubbing the face with a generous amount of olive oil, then patting on a "mask" of salt.

Lie back for approximately 10 minutes, then wipe off the oil and salt. The olive oil makes the skin smooth and supple. When used before going out into the sun, it also helps to prevent sunburn or windburn.

TROOP 407

Mother-Daughter Tea Given By Brownies

COAHOMA (SC) — Brownie Troop 407 had a Mother-Daughter Tea Tuesday in the home of Mrs. Ted Fowler, leader. Other hostesses were the assistant leaders, Mrs. Alvin Luce and Mrs. Harry Lee. The table was covered with a pink linen cloth centered with a miniature Brownie and flags. Crystal appointments were used. Each Brownie met her mother at the door, pinned her name tag, and served her. There were 18 Brownies, 17 mothers and two grandmothers present.

Mrs. Ethel Kinder is a patient in a Loraine hospital. Also, her daughter, Mrs. Steven Berry, is in the Webb AFB Hospital.

Mr. and Mrs. J. L. Herron spent Sunday in Merkel with his mother, Mrs. J. G. Herron.

Mrs. Luke West is a patient at the Howard County Hospital Foundation in Room 221 following surgery.

Jim Turner is in the Veterans Administration Hospital.

The Forsan and Coahoma Food Association met Tuesday evening at the Wagon Wheel Restaurant for a supper meeting. Mrs. Vera Dell Anderson presided. The association voted to discontinue the regular monthly meetings and to meet yearly. Thirteen attended, and the prize was won by Mrs. Helen Wright.

The Truth About WIGS by Bette B.

Top executives in the wig business, predict that the sales of fashion wigs will increase in leaps and bounds in the immediate future. Wigs are cretainly not a fad and definitely here to stay.

At this early date there is a shortage of the finest quality European hair, especially in the lighter shades. It is not getting scarcer as some believe. The reason for the shortage is the influx of wig buying nation wide.

Many are inclined to think that wigs will come down greatly in price. This absolutely will not happen with good quality fashion wigs. If anything, the price will go up.

There is a good possibility that the market will be flooded with wigs made of ungraded and lesser quality hair. These, most likely, will be cheaper, depending on the market.

Now is the time to get that wig and the place is Bette B. Wig Clinic, 1704 Gregg, Big Spring, Phone AM 3-6411. Wig purchased for gifts, may be exchanged if necessary. They will be sized and styled to the patrons complete satisfaction.

adv.

Circle Shown Humorous Skit

Mrs. Bob Cozart was in charge of a skit given this week for members of the Esther Circle of Kentwood Methodist Church. The women met with Mrs. Henry Parmenter, Rt. 2, with 10 in attendance.

The skit, "A Look at Ourselves as Christian Women," used a doctor's office as the setting, and described the imaginary ailments that kept people from attending church services or reading the Bible.

Those on the program were Mrs. Don Campbell, Mrs. Eddie McClain, Mrs. Parmenter, Mrs. Floyd Pringle, Mrs. Noel Stuller, Mrs. Henry Salley, Mrs. Raymond Hamby and Mrs. Arlen Stidham.

During the brief business session, plans were made to entertain district officers during the training May 20 at the church.

The Night Circle will assist the Esther Circle in prociding copies of "The Texas Methodist" for use at the Spanish-American church here.

Mrs. C. W. Parmenter, 712 Birdwell, will be hostess for the May 11 meeting.

INVITED TO OES AFFAIR

All local Eastern Stars are invited to be guests at 8 p.m. Saturday evening in the Masonic Temple, 1600 W. Wall, Midland. At that time, Mrs. Amy Goebel, worthy grand matron, and Dr. James H. Goettee, worthy grand patron of the Grand Chapter of Texas Order of the Eastern Star, will make a joint fraternal visit of Midland Chapter 253 and Norman Reed Chapter 1010.

Workshop Plans Told During Dinner Meeting

A dinner meeting was held at the Village Restaurant in Coahoma Tuesday for 11 members of the Licensed Vocational Nurses Association and a guest, Mrs. R. C. Click.

Mrs. Huey Rogers, president, and Mrs. Willie Butler announced plans to attend the spring workshop May 18-19 in Baytown. Mrs. Rogers was joined by Mrs. Fred Winn and Mrs. Andy Jones in reporting the 10th anniversary program they attended last week for the Midland LVN chapter.

Communications were read from the Odessa LVN chapter saying it would request the 1966 convention. If accepted, the chapter wants the Midland and Big Spring groups to assist them.

Mrs. Paul Camp, Coahoma, was hostess.

The next meeting will be June 1 with Mrs. Rufus Tuckness, 1313 Stadium, and Mrs. Maurene Rice will be cohostess.

Lamesa Nurses Hear Speakers

LAMESA (SC) — The Professional Nurses of Lamesa met recently for installation of new officers. They are Marge Hardin, president; Bonnie Heath, vice president; Julia Stump, secretary; and Mildred Trotter, reporter. The traditional red rose was presented to each officer upon installation by the outgoing president Ruth Owens.

Guest speakers for the evening were Dr. David Smiley and Dr. Evelyn Smiley. Mrs. Owens gave the welcome address and the president's report, and music was furnished by Mrs. Dorothy Kluge.

Fifteen attended.

Connally Answers On His Teacher Salary Raise Plan

AUSTIN (AP) — Teachers, heartened by advance support pledged by legislators for their $405 annual raise proposal, quickly dismissed Gov. Connally's offer for half that amount next year.

"Inadequate" was the utterance of L. P. Sturgeon, publicity man for the Texas State Teachers Association (TSTA).

Connally fought the TSTA with their own words: He quoted TSTA statements that salary schedules should reward experience and additional education, and said that's what the Connally 10-year plan does.

Sen. Jack Strong of Longview, author of the Connally plan, contends his plan will give many teachers more money during the next 10 years than they could get if three $45 per month raises were given by the legislature.

BILL FEATURES

Compared to the TSTA plan to add $405 a year to all minimum teaching salaries, Strong's bill would:

—Give first year teachers with a bachelors degree a $90 raise next year and provide a stair-step plan which would extend the number of steps and graduate the increases next year up to $243 more for the most experienced teachers with masters degrees. The average raise next year would be $184.

—Boost base salaries by $99 per two-year period to offset the anticipated increase in the cost of living.

—Increase the spread between maximum and minimum salaries by increasing annual raises from $108 to $126 and increasing the steps for bachelors degree holders from 10 to 15 and for masters degree holders from 17 to 20.

—Increase over a 10-year period base salaries for teachers with bachelors degrees from $4,104 to $4,500 and for teachers with masters degrees from $4,239 to $4,860; and maximum salaries for teachers with bachelors degrees from $5,094 to $6,390 and for teachers with masters degrees from $6,075 to $7,326.

BE MATCHED

—Provide $9.5 million in state funds to be matched by local funds for discretionary raises as the districts choose.

"Our program is designed to correct on a realistic basis the inequities in our present system," Strong says.

The inequities, Strong says, result in beginning teachers with bachelors degrees earning $194 less in Texas than the national average while teachers with maximum experience in the same category earn $967 less than the national average.

"The TSTA program would result in teachers with bachelors degrees at the maximum level would receive about $500-$600 below the national average, Strong says."

Sturgeon compares this average raise of $155 a year his association has won for teachers with the increase of from $4,000 to $4,500 in 1975 proposed in Strong's bill—an average of $50 a year.

Sturgeon also asserts that TSTA raises have benefitted experienced teachers and those with advanced degrees, noting that the masters level raise from 1943-51 averaged $300 a year, and the 1951-61 raise averaged $200 a year. He compares this to the $125 per year raise proposed in Strong's bill.

Strong declared such comparisons would be as unfair as comparing the operation of the stock market from 1935 to 1965, that "it's hard to believe that each era must stand on its own."

Teachers also have termed the 10-year provision a straitjacket, but Strong says this is untrue because no legislature can bind a future legislature.

LOOK AHEAD

Strong sees the long-range scale as an attraction to young teachers, who will be able to know their future, and to school districts, which will be able to plan better for future spending needs.

"The 10-year plan is more difficult to amend," Sturgeon asserted. "If that's not so, they wouldn't be offering it. I don't know anyone making a 10-year contract in these times."

Strong contends teachers will fare just as well or better in the long haul with his plan as they will if the TSTA bill passes this session and subsequent $405 annual raises are provided.

Strong notes that next fall's beginning teacher with a bachelors degree will earn a 10-year total of $48,690—up to $215 more than available under the TSTA bill and up to $1,810 less than that available with three $45 per month increases.

MINIMUM PAY

Sturgeon said the minimum salaries were increased in 1951 from $900 to $2,400, for a raise of $150 a year over 10 years; and in 1961 from $2,400 to $4,000, for a raise of $160 a year over 10 years.

Gov. Brown May Find Actor-Politico His Foe

SACRAMENTO, Calif. (AP) — Democratic Gov. Edmund G. Brown, victor over two California Republican giants in past campaigns, is edging toward a possible 1966 battle against a new breed of office-seeker — the actor turned politician.

Ronald Reagan, whose affable face was etched in the voters' memories by scores of movies and television shows, says he'd like to move into the executive mansion in Sacramento.

So do others, raising the prospect of a tumultous election year in a state where both Democrats and Republicans are trying to patch up feuds.

SECOND TERM

Brown, now serving his second term as governor of the nation's most populous state, declines to comment on predictions by his friends that he'll try for a third.

They are hoping the same campaign magic that worked against former U.S. Sen. William F. Knowland in 1958 and against former Vice President Richard M. Nixon four years later will once again mean victory for the Democrats.

Brown says, "I can only tell you that there's one good fight in the old man yet."

Reagan's backers — who proudly wear the conservative label — are spurred on by the example of his fellow Republican, George Murphy, the state's new junior U.S. senator.

Former actor Murphy readily admits his film exposure gave an early push to his 1964 campaign. It ended with a win over Pierre Salinger, press secretary to Presidents Kennedy and Johnson.

GOV. EDMUND BROWN

REAGAN READY

At a recent meeting of the Volunteer California Republican Assembly, Reagan told reporters he is ready to run — but only if there would be "no bloody primary fight."

He sounded like a candidate as he told cheering delegates Brown is "a little Sir Echo who is determined to give California its biggest budget in history."

But there are indications that Reagan's wish to avoid bloodletting in the June primary may be a forlorn hope.

Two-Car Collision Kills Game Warden

WICHITA FALLS (AP)—State Game Warden Joe Evans of Jacksboro died in a hospital here Thursday of injuries received in a two-car crash near Graham the day before.

Final Action Approaching On Major Bills

AUSTIN (AP) — Texas lawmakers started a three-day weekend today, and they'll probably need the rest.

Coming up next week are what could be some of their most grueling days, both in legislative committees and on the floor of the two houses.

Senators scheduled for Thursday their debate on rearranging the 31 state senatorial districts in line with a court mandated in the legislature strictly according to population.

LOSE JOBS

As many as six senators could lose their jobs as districts swing toward the state's four major cities.

Their vehicle for debate will be a skeleton bill by Sen. Louis Crump of San Saba, chairman of the Senate Redistricting Committee. It draws no district lines, leaving that task to floor amendments.

Another big decision expected next week is on the $3.6 billion general appropriations bill, which came out of a joint conference committee this week. The lawmakers have only two options: Accept the bill as written or send it back to conference.

DEATH PENALTY

Rep. Charles Whitfield of Houston intends to press for debate Monday on his controversial bill to abolish the death penalty for all crimes except murder of a policeman or murder by an escapee from prison or jail. It was approved Thursday by the House Criminal Jurisprudence Committee.

A House tax-writing subcommittee expects to go to work Monday figuring what kind of bills may be needed by the end of the session, particularly if a teacher pay raise passes.

TEACHER PAY

Rep. W. S. Heatly's House Appropriations Committee and the Senate Finance Committee will hear both Gov. John Connally's and the Texas State Teachers Association's teacher pay bills Wednesday.

Connally went on statewide television Thursday night in an effort to swing popular support behind his 10-year graduated teacher pay plan.

GIFT FOR A CHAMP
Don Hickson, (left) and Jim Thompson.

Kiwanians Honor Spelling Champion

Young Don Hickson, who captured the coveted Regional Spelling Bee Championship in Lubbock last Saturday, was guest of honor at the Thursday luncheon of the Big Spring Kiwanis Club.

The Runnels Junior High eighth grader won the right to compete at the Lubbock regional bee by winning the Third Annual Herald Howard County Spelling Bee held in April. Don also won the county championship in 1964, but did not score at the regional bee that year.

Don was presented with a dictionary, inscribed with his name, as a token of the Kiwanians' appreciation for the honor he has brought to the community and for the fine example he offers as a modern teenager.

Jim Thompson, chairman of the boys and girls work committee, made the presentation. Looking on at the presentation ceremony were Mr. and Mrs. R. L. Hickson, his parents. Rev. V. Ward Jackson, who is his pastor, introduced the young champion to the club.

The recognition accorded Hickson was to emphasize the interest Kiwanians have in outstanding achievements by young people.

Don, by his victory over 23 other county spelling champions, wins an all-expense paid trip to Washington in June, and a chance to compete for the National Spelling Bee Championship.

The program for the day was devoted to National Music Week. A group of young singers, all members of the prize winning Big Spring High School a cappella choir, were presented in two madrigal selections.

Pat Hamilton a member of the group, discussed the origin of madrigal singing and spoke briefly of some of the recent activities of the choir and the high school music department.

Mrs. H. M. Jarratt, speaking for the Big Spring Music Clubs, thanked the Kiwanians for devoting a program to National Music Week and stressed the importance that music plays in the lives of men, women and children. She introduced the group from the high school.

Disabled Veterans May Get Many New Benefits

Compensation payments to veterans disabled in service would be increased about $130,000,000 annually under administration-endorsed legislative proposals enunicated by William J. Driver, administrator of Veterans Affairs.

This was reported today by Ray Boren, contact representative at the Veterans Administration Hospital here, who said the proposals are now under consideration by Congress.

A measure introduced by Rep. Olin E. Teague, chairman of the House veterans affairs committee, would increase compensation for totally disabled veterans by $600-a-year.

In a recent appearance before the Compensation and Pension Subcommittee of the House veterans affairs committee, Driver also unveiled two new compensatory proposals recommended by the Veterans Administration.

One proposal would equalize the rates of disability compensation paid to veterans disabled in wartime and peacetime service. Under present law, payments to peacetime veterans are only 80 per cent of those authorized for wartime veterans.

This proposal would provide a first year increase of about $28,000,000 to peacetime veterans, and certain dependents, the VA chief said.

The other VA proposal recommends the extension to certain veterans severely disabled by military service since the end of the Korean Conflict of the $1,600 assistance paid by the VA for the purchase of a specially equipped automobile or other conveyance.

H. R. 171, would provide modest increases to most veterans with disabilities rated less than total, said Driver.

Lieutenant To Get Top CAP Honor

The Falcon Medal, the highest honor bestowed in the Civil Air Patrol Cadet Program, and the first ever won, will be presented to 2nd Lt. Douglas C. Roach, a student pilot of Class 66-E, at the dining-in at Webb Air Force Base tonight.

Brig. Gen. J. W. Vogt Jr., director of Policy - Planning, Headquarters, U. S. Air Force, Pentagon, will make the presentation. He will be assisted by Col. Dale D. Brannon, chief of staff, Civil Air Patrol.

Lt. Roach is a holder of the Gen. Carl A. Spaatz Award, the second highest CAP award, and one of the requirements of the Falcon award. His certificate states: . . . 2nd Lt. Douglas C. Roach had completed with distinction all requirements of the Falcon Medal, the highest Civil Air Patrol Cadet Award . . . has demonstrated dedication to the principles of freedom and the maintenance of this nation's aerospace leadership." Specifically it represents his participation in a strenuous CAP program of aerospace education, moral, physical and leadership activities.

The lieutenant was a member of the Wayne-Romulus Cadet Squadron of the Michigan Wing of Civil Air Patrol. He attended the University of Michigan, where he participated in the Reserve Officer Training Corp. Commissioned a second lieutenant in 1964, he entered the Air Force Jan. 13, 1965.

Eight More Are Warned

The city is notifying eight property owners this week of structures being classed hazardour and unsafe.

Letters mailed by the building inspection office, following checks by fire department officials, inform the property owners that the buildings have deteriorated to an extent to create a fire and safety hazard.

Notification is given that the buildings must be repaired or demolished within a 60-day period from May 5, the date of the notice, or, if the property owner fails to comply, the city may institute proceedings and take action to see that the hazardous condition does not remain.

Expenses to the city in taking such action may be assessed against the property, constituting a tax lien to guarantee payment.

The city has previous notified 56 property owners of buildings being declared fire or safety hazards.

'Offer' Made By Cambodia

PHNOM PENH, Cambodia (AP)—The government of Cambodia said today it would resume normal diplomatic relations with the United States if the United States ends the war in Viet Nam and "showed a little respect and consideration for Cambodia."

The Cambodian position was outlined in a letter from Foreign Minister Koun Wick to U.S. Secretary of State Dean Rusk. Rusk had written Wick taking note with regret of Cambodia's decision to break diplomatic relations.

Consul Gets To Visit Prisoner

MOSCOW (AP) — Soviet authorities have given the British consul permission to see Gerald Brooke, a London instructor in Russian held incommunicado in Moscow since April 26.

The British Embassy said the consul would visit Brooke Friday. The 26-year-old lecturer at London's Holborn College is believed being held in Moscow's Lubianka Prison.

The embassy said earlier that Brooke is being held on charges involving "alleged subversive activities."

Cheery Start For Meeting

HOT SPRINGS, Va. (AP) — Prospects of rising prosperity and a diminishing payments deficit provided a cheery start today for the spring meeting of the Business Council.

About 100 top industrialists, conferring here with three Cabinet officers and other high officials of the Johnson administration, were due to hear that:

Business activity should advance strongly throughout 1965, bringing national output to the neighborhood of $660 billion for the year — about $7 billion higher than the council's experts predicted six months ago.

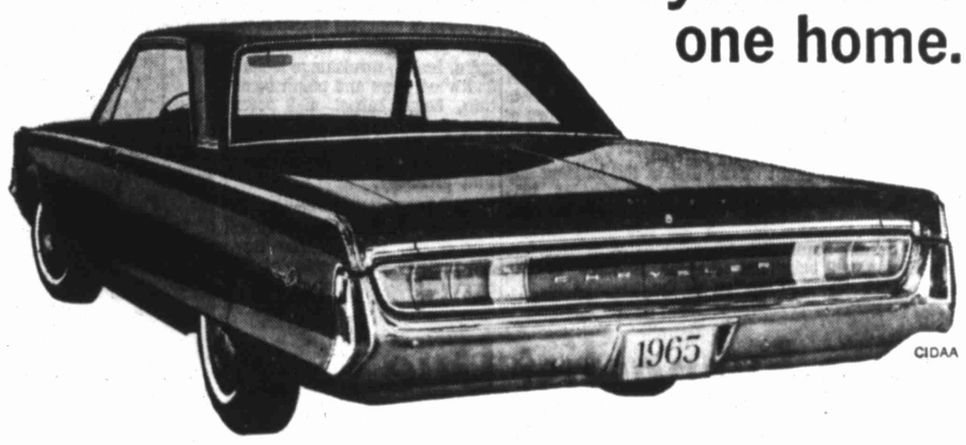

Fears of a slowdown, once considered likely in the fall, have receded into 1966. But some council members now warn of a different hazard — heightened inflationary pressures as the boom advances.

Good progress toward eliminating the balance of payments deficit has been made under President Johnson's voluntary program.

The thing that makes our sales success so sweet this year

is watching a man who thought he couldn't afford a Chrysler drive one home.

CIDAA

Got the idea you can't afford a Chrysler? Listen: nearly half this year's models are actually priced just a few dollars a month more than the most popular smaller cars, comparably equipped. Now, another shock: V-8 engine, automatic transmission, power steering, power brakes, radio and heater are included. So, look friend—come in and see how easy it is to drive home a new Chrysler.

SAND SPRINGS BAPTIST CHURCH TO BE DEDICATED
Church has added a new sanctuary, four classrooms, and study

Sand Springs Church Dedication Sunday

Dedication of the First Baptist Church in Sand Springs will be held Sunday at 2:30 p.m. Everyone is invited.

Improvements have brought a new auditorium with a seating capacity of 200. In addition, there are four more clussrooms and a pastor's study. The educational building has been completely remodeled and furnished.

The Rev. Darrell Robinson, pastor of the Berea Baptist Church in Big Spring, will bring the dedication address. The Rev. Bill Irwin, former pastor, will bring the morning and evening messages at 10:55 and 8 o'clock as another highlight of the day's observance said the pastor, the Rev. Dan Burrow. Rev. Irwin also will bring a brief history of the church as part of the dedicatory service.

Total cost of the building and furnishings approximates $25,000. Financing was handled through the Broadway Church Bonding Company of Houston, and Pioneer Builders of Big Spring did the construction.

The new auditorium is constructed of concrete blocks faced with brick and is topped by a spire. Inside, furnishings include fruitwood pews and pulpit furniture, beige carpet and ocean blue padded pews and draperies to match. The front is accented with brick planter boxes with greenery.

On the building committee were Harvey Paul, W. W. Jones and G. W. Hudson. The Rev. Burrow has been pastor of the church since November, 1963.

Ordination Set For Rev. Bowyer

REV. CHARLES L. BOWYER

The Rev. Charles L. Bowyer, curate of St. Mary's Episcopal Church, will be ordained to the Sacred Order of Priests by the Rt. Rev. George H. Quarterman, bishop of the Episcopal Diocese of Northwest Texas, Saturday, at 7:30 p.m. in the Church of the Heavenly Rest in Abilene. Also to be elevated to the priesthood at this same service will be the Rev. Charles Allen, curate of St. John's Episcopal Church, Odessa. Rev. Donald N. Hungerford, rector of St. Mary's Church, will make the presentation of both candidates to the priesthood to the bishop.

Others participating in this service of ordination will be: The Rev. Lawrence Brown, professor at the Episcopal Theological Seminary in Austin; the Rev. Evans Moreland, rector of St. Andrew's Church, Amarillo; the Rev. William Eastburn, St. Mark's Church, Abilene; the Rev. Thomas Miller, St. Christopher's Church, Lubbock; the Rev. Charles McIntyre, St. John's Church, Odessa; the Rev. J. M. Washington, St. Paul's Church, Lubbock; and the Rev. Terence Kelsey, St. James' Church, Monahans.

Rev. Bowyer came to Big Spring to serve on the staff of St. Mary's church in June, 1964. He is a graduate of Berea College and of the Episcopal Seminary in Lexington, Ky. He is an accomplished organist. Following ordination, Rev. Bowyer will continue to serve St. Mary's parish as curate.

This ordination is one of the highlights of the 7th Annual Council of the Episcopal Diocese being held in Abilene, May 7-9. Delegates from St. Mary's parish to the council will be Harold K. Bull, junior warden; William H. Eyssen, Dr. Milton Talbot Jr., J. Rich Anderson, C. Wesley Deats, Fred Doelp, and Dr. J. H. Burnett Jr. Delegates to the House of Church Women include Mrs. Harold K. Bull, Mrs. Donald Lester, Mrs. Fred Doelp, Mrs. Marjorie Jordan, and several others from St. Mary's parish.

The seating of women on the official boards of the church including vestries, diocesan councils and the general convention of the entire National Episcopal Church, will probably be the liveliest item of business at this diocesan council. Other considerations include ownership of the Episcopal Seminary at Austin, a change in the name of the church, the permission for the translation of bishops, the approval of a $203,000 annual budget in the development of plans for diocesan-wide evangelistic efforts in the year ahead.

Abilene Evangelist Due For Westside Baptist Revival

The Westside Baptist Church, 1200 W. 4th, has announced a revival meeting, beginning Sunday and running through May 16. The Rev. Ira Harrison, Abilene, will be the evangelist. James Kinman, music and educational director for the church, will lead the singing.

REV. HARRISON

"Committees have been named for making preparations for the revival meeting," the Rev. Kenneth Andress, pastor, said.

Rev. Harrison, a graduate of Hardin-Simmons University and Southwestern Theological Seminary, Fort Worth, has pastored the First Baptist Church of Paducah, First Baptist of Snyder, and the First Baptist of Georgetown. He was an employe of the Baptist Sunday Board for 12 years, and is now kept busy in revival and interim work. He and Mrs. Harrison live in Abilene.

"We feel fortunate in getting Rev. Harrison for a revival, and that he will be a blessing to our church and the city," Rev. Andress said. "We welcome the people of Big Spring to the meeting."

The revival steering committee is made up of: Donnie Anderson, chairman; advertising committee—Fred Painter, chairman, Tommy Vernon, Tommy Hamner, Mrs. Ralph Walker, Mrs. Jack Johnson, Mrs. Charles Carter; prayer committee—Bill Ballard, chairman, Mrs. Tommy Vernon, Mrs. Monroe Sundy, Bill Robinson, Jack Johnson; visitation committee—Rayford Harrison, chairman, James Kinman, Mrs. Waymon Lepard, Donald Ray, Mrs. Shirley Bayes; hospitality committee — Mrs. C. L. Kirkland, chairman, Mrs. E. O. Sanderson, Mrs. W. E. Holeman.

JEHOVAH'S WITNESSES

Six p.m., Watchtower by J. W. O'Shields, "The Love That Leads to Life."

JEWISH

TEMPLE ISRAEL — Services at 7:30 p.m., Friday in the Prager Building.

COST OF SELF-WILL

"The Cost of Self-Will" is the title of the International Sunday School Lesson for May 9. The text is taken from I Samuel 18:5-16.

David, sent out by Saul, took part in the subjection of the Philistines and came back before the Israelites for loud praise. When David, just a boy, slew one of the giants, the people no longer feared the enemy.

Saul, who sought to kill David because of his popularity with the people, and who was favored of the Lord, found that the Lord's hand was against him, and he made David a captain among his armed forces. The attempt to send David into battles, hoping that he would be killed, failed, and Saul remained afraid of the young man. He was afflicted with a tendency toward jealousy or envy, but was unable to take himself in hand, and he found no happiness.

RECEIVES 100TH NEW NAZARENE
Rev. W. M. Dorough, right, and John A. Billings Family

Rev. Dorough Leaves Nazarene Charge Here

Rev. W. M. Dorough, pastor of the Church of the Nazarene, will give his seventh and final report to the District Assembly for the Big Spring church, showing a 70 per cent net increase in church membership during his ministry here, and the reception of his 100th new Nazarene on profession of faith.

With the reception of the John A. Billings family, Mr. Billings became the 100th new Nazarene to be received into church membership during Rev. Dorough's ministry here. Mr. and Mrs. Billings, their daughter, Shelly, and their two sons, Mark and Terry, reside at 2206 Lynn.

There were 85 members when Rev. Dorough came to the church in 1958. During this period, he has received 130 members of which 101 were new Nazarenes received on profession of faith; 29 were received by letter of transfer, and 60 were transferred out by letters, leaving a net membership of 145.

Giving by the church, through tithes and offerings, has increased from $14,944 in 1958 to $20,070 in the year which closed in April, 1965. The church spent $10,000 on a re-modeling project and installed new educational furniture, and $30,000 indebtedness has been reduced to $7,677. Each year during this period, the church has given 10 per cent or more of its total annual income to World Evangelism, which helps support 600 missionaries serving in foreign fields.

Rev. Dorough will be moving to Wichita Falls May 31, where he will be pastor of the First Church of the Nazarene. Rev. D. M. Duke, who is currently pastor of the church in Wichita Falls, has accepted the call of the Big Spring congregation and will be moving here June 1, to assume the duties of pastor.

Nazarenes To Attend Assembly At Lubbock

Delegates from all departments of the Church of the Nazarene, 1400 Lancaster, are preparing to attend the annual district assembly and convention in Lubbock, May 10-13, where General Superintendent George Coulter, Kansas City, Mo., will preside over business and worship sessions.

Before his election as general superintendent in Portland in June, 1964, Coulter was executive secretary of the Department of World Missions for the denomination.

Rev. R. W. Hurn of Lubbock, superintendent of the Abilene district portion of Texas, will give his annual report to the assembly Wednesday. The district includes 100 churches, with a membership of 6,200.

Local delegates to the Youth Convention, Monday, include Benny Pitzer, president; Brenda Mize, Kay Peacock and Charlotte Ford. Special speaker will be Rev. Ray Hance, general Youth Council representative. The convention will be climaxed at 7 p.m. with a district wide youth banquet, with Merle Green, head coach of Abilene High, as master of ceremonies.

Tuesday's Nazarene World Missionary Society Convention will be attended by Big Spring delegates: Mrs. D. J. McGuire, local president; Mrs. Gerry Spears, Mrs. Katherine Waller, Mrs. J. H. Turner, and Mrs. W. M. Dorough. Special speaker will be general president, Mrs. Gordon Olsen, of Eugene, Ore., who was elected at the quadrennial convention of the Nazarene World Missionary Society in Portland, Ore., in June, 1964.

Rev. W. M. Dorough, pastor, will head the Big Spring delegation at the District Assembly which opens Wednesday and continues through Thursday. Other local delegates include Travis Waller, Sunday school superintendent; and three elected delegates; D. J. McGuire, and Mrs. Mary Kay Pitzer.

The delegates will hear reports of the 100 pastors and the district officers, and participate in the election of district officers for the coming year.

This will be Rev. Dorough's sixteenth report to the Abilene District Assembly, and his seventh report from the Big Spring church.

A mother's thoughts

Atomic bombs darken our skies . . . radioactive fallout threatens unborn generations . . . there is strife, unrest, even war in many parts of the world! How can we face the future with confidence when humanity stands at the very brink of destruction?

There is only one way: to be courageous and steadfast, and trust in the wisdom and mercy of God!

This little girl, my own daughter, does not know what troubles my heart. She is not afraid of tomorrow . . . not yet! Through the Church she will learn the ways of the Lord and how to live a truly Christian life. Through prayer may God help me set an example for my daughter . . . teaching me to put my trust, yes, my very life into His hands, no matter what the future might have in store for us!

U.S. Dominican Toll At Least 13

SANTO DOMINGO, Dominican Republic (AP) — Another wrong turn into rebel territory was blamed today for the deaths of four Marines, bringing the U.S. death toll in the Dominican fighting to at least 13.

U.S. sources said three Marines were killed Thursday after a patrol wandered accidentally into the insurgent-held sector of downtown Santo Domingo. Two others were wounded and one died after he was taken to the aircraft carrier Boxer.

INSURGENT KILLED

A rebel spokesman said one insurgent was killed and two wounded in the encounter. The rebels at first accused the United States of violating the cease-fire arranged Wednesday by a peace commission of the Organization of American States. Later they said they believed the Marine patrol had taken a wrong turn.

Two U.S. newsmen who had been observing the clash from a taxi were caught in the crossfire and wounded slightly. They were Al Brut and photographer Doug Kennedy, both of the Miami (Fla.) Herald.

NEAR U.S. LINES

A U.S. military source said the newsmen had passed through a rebel checkpoint and were approaching the U.S. lines when the insurgents opened fire on the Marines and the Marines fired back. The source said it was probable that U.S. gunfire wounded the newsmen.

Another Marine patrol took a wrong turn Wednesday into rebel territory. After sharp firing the rebels captured two of the Marines but released them Thursday to the OAS Peace Commission. The commission returned them to American authorities.

In other incidents Thursday, snipers wounded two U.S. paratroopers and hit a helicopter, wounding the pilot in the legs. A flurry of sniping activity broke out near the U.S. Embassy during the afternoon, but it died down quickly.

Otherwise Santo Domingo was quiet Thursday, and more stores reopened for the first time since the revolution broke out April 24.

Airport Pact Being Drawn

Dee Jon Davis, county attorney, is preparing the final draft of a contract between the Howard County Commissioners Court and Central American Airways, relative to use of the Howard County Airport for the USAF's new pre-jet training program for pilots.

Davis will hand the contract to the commissioners on Monday.

It is being drafted in accordance with the stipulations made in letters sent to all bidders for the Air Force training contract. The county commissioners have already awarded contract and work is under way on a hangar-office building to house the operation.

The contract will call for Central Airways to pay the county one-fifteenth of $25,000 per year, with 3.5 per cent interest, plus two cents rebate on all gasoline used and 10 cents per gallon on all oil used. In addition, the company will pay all utility and insurance bills on the hangar-office building.

Flag Lowering Brings Quizzing

BALTIMORE, Md. (AP) — Eight fraternity pledges from Johns Hopkins University partly lowered the flag early today at Ft. McHenry, where Francis Scott Key wrote "The Star-Spangled Banner" during the War of 1812.

After FBI agents questioned them, Asst. U.S. Atty. Joseph Kaplan declined to prosecute and they were released without charge.

"We wouldn't want to give you people a record for something like that," said U.S. Atty. Thomas J. Kenney.

"We don't think it's a case for prosecution and we are simply going to report the matter to the dean at the school for whatever disciplinary action he wants to take."

At Johns Hopkins, Dean Wilson Shaffer was reported consulting with students and unavailable for immediate comment.

City Police Lt. Harry J. France said the eight are all freshmen and pledges of Phi Kappa Psi fraternity.

Ft. McHenry, which sits on a narrow peninsula jutting into Baltimore harbor, is one of a few places in the nation where the American flag flies 24 hours a day.

Jail Population Down To Nine

Howard County Jail is almost a lonely place today.

Removal of three inmates to state institutions Friday reduced the population in the country prison to nine.

This is said to be a new low for the jail. None of the old-timers at the courthouse recall a time when there were so few prisoners in the jail.

Aubrey Standard, sheriff, said that his jail has a capacity of 60. The number of prisoners has been low for some weeks.

The nine prisoners still in jail Friday morning are mostly veterans—inmates who have been in the jail for a long time. Several date back to October, 1964.

Fined $50, Costs

Joe Flores, charged with contributing to the delinquency of a minor, pleaded guilty Thursday afternoon before Judge Lee Porter in Howard County court. Judge Porter fined the defendant $50 and costs.

Paul W. Camp, arrested for DWI, has posted $500 bond and been released from custody.

Dallas Episcopal Diocese Budget Set

DALLAS (AP)—A cooperative budget of $491,061 was adopted Thursday by the Dallas Episcopal Diocese. The budget last year was $514,721.

WEATHER

NORTH CENTRAL TEXAS — Mostly cloudy and warm tonight and Saturday. Thunderstorms in 30 per cent of extreme west late today and early tonight. Thunderstorms in half of west late Saturday. Low tonight 65 to 72. High Saturday 82 to 92.

NORTHWEST TEXAS — Partly cloudy tonight and Saturday. Thunderstorms in 30 per cent of area today and in extreme east early tonight. Thunderstorms in 40 per cent of southeast late Saturday. A little cooler in northwest third of area tonight. Cooler Saturday. Low tonight 48 to 68. High Saturday in 80s.

SOUTH CENTRAL TEXAS — Cloudiness and warm tonight and Saturday. Low tonight 66 to 75. Highest Saturday 82 to 96, except 78 to 88 in Southeast Texas.

SOUTHWEST TEXAS — Cloudy today and Saturday with late showers over 20 per cent of area. Low tonight 65 to 75. High Saturday 85 to 95.

Soil temperature 75 degrees.

T. J. Perkins Dies Thursday Of Heart Attack

Services will be at 4 p.m. today for Terrell J. Perkins Jr., 30, of 405 Donley, who died about 2:30 p.m. Thursday. Mr. Perkins became ill about 1:30 p.m. Thursday and died at a local hospital of a heart attack.

Mr. Perkins had moved to Big Spring in 1959 from Girard, Texas. He was presently employed by Bronson's Construction Co. as a carpenter, and was previously employed by the E. C. Smith Construction Co. and the McElyea and Douglass Construction Co.

Services today were to be at the Nalley - Pickle Rosewood Chapel, with the Rev. Roy E. Honea officiating. Additional services will be at 2 p.m. Saturday at the Girard Baptist Church, with the pastor, the Rev. Richard Babb, officiating. Burial will be at 4 p.m. Saturday at the Roby, Texas, Cemetery.

Mr. Perkins was born May 10, 1943 at Sylvester, Texas, and attended and graduated from public schools at Girard. He served in the Air Force from 1955 to 1958, returning to Girard after military duty. He was a member of the Methodist Church.

Survivors include the parents, Mr. and Mrs. Terrell Perkins Sr., Girard; one brother, Earnest M. Perkins, Big Spring; six sisters, Mrs. J. R. Stanley, Spur, Mrs. H. C. McElyea Jr., Big Spring, Mrs. Jackie Young, Odessa, Arlene Perkins, Judy Perkins and Jackie Perkins, all of Girard; the maternal grandmother, Mrs. M. D. Douglass, Sylvester.

Pallbearers will be B. L. Harkrider, Rance Gregory, George Taylor, Delmer Browning, Hester Arnold and Jimmy Bural.

Peters Sent To Rusk

John Marvin Peters, 26, who took French leave for five days from his ward at the Big Spring State Hospital, may find walking away a little more difficult hereafter.

He was transferred from the Big Spring State Hospital to the Rusk Hospital for the Criminally Insane Friday. Rusk is a maximum security hospital.

Peters, under indictment for burglary, was ruled insane by a 118th District Court jury and ordered committed to a mental hospital. He was placed in the Big Spring institution. Saturday night he disappeared. He returned Wednesday night.

Peters was one of three prisoners removed from the county jail today. Two others, Robert Hilburn and Joe Leonard McNeil, were taken to the Huntsville State Penitentiary. Both are facing three year prison sentences—Hilburn for worthless check and McNeil for burglary.

A. G. Mitchell and Bill Whitton, deputies, left early Friday with the prisoners.

Encouraging Reports From Scout Sign-Ups

Encouraging reports came from the monthly meeting of the Lone Star Boy Scout district, but W. S. Crooker, organization and extension chairman, warned that some critical registration dates would wipe out gains.

Through April, he said, the district showed a net gain of 104 boys. Of this, 64 more were in Cubs, but one unit now in trouble with registering, could account for three-fourths of that gain. Boy Scouts were up by 60, but Explorers (seniors) were down 20.

Commissioner enrollment now is nearing full strength and should be about first place in the council, said Fred Beckham, commissioner. He has seven assistant district commissioners and 23 neighborhood commissioners recruited, and all commissioners will meet Tuesday evening at the Petroleum Building for a briefing on assignments.

Noel Reed was introduced as new chairman of leadership training, and he and his panel announced that leadership of units would be trained now upon request, and that five sessions each for Scout and Cub leaders had been scheduled for next October and November.

The recent district camporee at Moss Creek Lake was one of the most successful held, said Frosty Robison, district campaign and activities chairman. One of the next major events will be the Cub olympics. However, main emphasis is on long term summer camping, and 18 units have signed. He urged attendance at a "Show and Do" event for Scout leaders in Odessa May 15.

A report from Erven Fisher, advancement chairman, showed the district in fourth place on Cub advancement and tied in Scout advancement. Dick Ream, finance chairman, said the sustaining member enlistment is coming along satisfactorily.

Applications are still needed for Boy Scouts or Explorers who would like to be in a Scout service unit assigned to the Worlds Fair for a week. The total trip will exceed two weeks and will cost probably less than $200. Information can be had from William T. McRee, Scout executive.

Spacecraft Lands On Side

Technicians measure crater left by blast from rockets on a Gemini dummy spacecraft during landing test at Ft. Hood recently. The test was the first of a soft land landing for the vehicle. The spacecraft dropped from an airplane beneath a Parasail, was termed a partial success. A malfunction of a turn motor caused the spacecraft to miss its target by 500 yards and land on its side. (AP WIREPHOTO)

It Takes Satellite To Catch Suspect

MIAMI, Fla. (AP) — The space-age police technique of satellite television led to the arrest of an urbane Canadian who has been hunted all over the world since the spectacular burglary of a Montreal bank four years ago.

The Canadian, Georges Lemay, 39, was surprised when 11 federal and local police stopped him just as he boarded his fancy, 43-foot yawl in the huge Bahia Mar Marina in Fort Lauderdale Thursday.

"I very seldom make mistakes," he told Police Capt. Bob Smith. "How did you people catch me?"

Told that a boat repairman recognized a mug shot broadcast displayed by a Royal Canadian Mounted Police inspector on the inaugural Early Bird satellite television program, Lemay was incredulous.

"Is that your word of honor," he asked Smith.

Assured it happened that way, Lemay said: "Well, isn't that something. It took a satellite to catch me."

Police have had an interest in Lemay for 14 years since his beautiful blonde wife, the former Huguette Daoust, mysteriously disappeared while fishing from a bridge on the overseas highway in the Florida Keys.

In 1961, a gang of thieves smashed through the concrete reinforced floor of a branch of the Bank of Nova Scotia and rifled 377 safe-deposit boxes.

They escaped with $500,000 to $4 million although the exact amount was never determined because of depositors' reluctance to talk. The chief witness at the trial where four others were convicted of the theft said that Lemay was the mastermind.

The Early Bird TV broadcast showed the Mountie describing wanted men while FBI agents in Washington and Scotland Yard officials in London watched.

The Fort Lauderdale man, who asked that his name not be used, went to police the next day.

"I'm sure that's the guy I saw on TV last night," he said. He said Lemay had wanted him to do some work on his yacht.

Fluvanna Plans June Homecoming

Residents at Fluvanna are completing plans for the 1965 homecoming to be held June 11 and 12 at Fluvanna School, according to L. M. Dawson, superintendent.

About 1,500 persons are expected to participate in festivities this year, which will mark the third homecoming. These reunions are held every five years.

Individual class parties will be given Friday night, June 11. Saturday will be official Homecoming Day. Highlights of Saturday will be a noon barbecue and program which follows.

R. A. Swafford Funeral Set

LAMESA (SC) — Services for Rupert Alvin Swafford, 45, will be at 2:30 p.m. Saturday in the Branon-Philips Funeral Chapel. The Rev. J. R. Mosley will officiate, assisted by the Rev. Roy McCoy. Burial will be in Lamesa Memorial Park.

Mr. Swafford, who had lived in Dawson County since 1945 until two months ago when he removed to Zapata, died Tuesday in that city. He was a farmer.

Witnesses To Attend Meeting

Local Jehovah's Witnesses will attend a three-day circuit assembly in Kermit, May 28-30, according to J. W. O'Shields, presiding minister. Upwards of 600 delegates are expected to attend the gathering, which is sponsored by the Watchtower Bible and Tract Society.

O'Shields said the assembly is not a revival, but held primarily to advance Bible education. The three-day program includes a variety of talks on Bible subjects. Groups of ministers will discuss ministerial problems, and demonstrations will teach how Christians should conduct Bible studies. Sessions will be conducted mornings, afternoons, and evenings, with a baptism of new ministers on Saturday afternoon. The convention theme is "Willingly Fulfill Your Ministry."

The featured speaker appearing on the program daily is H. A. Fetzik, from world headquarters of Jehovah's Witnesses in New York.

Pleads Guilty

L. Z. Bell, charged with carrying arms, entered a plea of guilty in Howard County Court Thursday afternoon. Judge Lee Porter sentenced him to serve 30 days in the county jail and pay costs in the case.

DAILY DRILLING

BORDEN

Lario Oil & Gas Co. No. 1 Davis, spotted as a southeast stepout to the Von Roeder (Wolfcamp) production nine miles north of Vincent, 467 feet from the north and west lines of section 80-25, H&TC survey, was making hole at 3,953 feet in lime and sand.

HOWARD

Shell Oil Co. No. 1 Clay Reid, a potential Strawn-Pennsylvanian gas and condensate producer, was preparing to run a series of calculating gauges. On a 6-64-inch choke the well flowed 280,000 cubic feet of gas, with a flowing tubing pressure of 1,927 pounds per square inch. Gauging is continuing. Location was staked 660 feet from the north and 1,980 feet from the west lines of section 13-32-1n, T&P survey.

STERLING

Locke Purnell & Fortune Drilling Corp., an Ellenburger prospector 15 miles northwest of Sterling City, was drilling ahead in dolomite, sand and shale at 2,480 feet. Spot is 467 feet from the south and east lines of section 74-17, SPRR survey.

Shell Oil Co. No. 1 F. M. Hildebrand, 660 feet from the north and east lines of section 4-7, H&TC survey, 13 miles south of Sterling City, was moving off rotary to move in a completion unit.

Officials Booed Explaining Viet

MADISON, WIS. (AP) — Three U.S. State Department officials outlining the war in Viet Nam were heckled and booed in an appearance on the University of Wisconsin campus Thursday night.

The protesters carried signs, including one reading, "The war in Viet Nam is an immoral war, a futile war, and a dirty war."

EVENLY DIVIDED

There were boos for the hecklers, too. The audience of about 500 seemed evenly divided.

"What is the effect of napalm on people?" asked one member of a campus "Student-faculty committee to end the war in Viet Nam."

Army Col. Rolfe Hillmen, a military adviser in Viet Nam, explained, "Napalm works well on those targets which would cost a lot of manpower to get."

The student asked if innocent people were killed. Hillmen replied, "I'm not trying to stand here and tell you mistakes aren't made. South Vietnamese look an awful lot like Viet Cong."

TORTURE ISSUE

Another student in a sport shirt hurled a reference to torture. Thomas F. Conlon, State Department official in the Office of Southwest Pacific Affairs, answered, "I could show some pictures of Communists torturing."

Earl K. Young, an Agency for International Development official, also participated in the two-hour question and answer session. The forum was sponsored by a student group and a civic organization.

Weather Forecast

Weathermen predict rain Friday night from the upper and central Mississippi Valley to the southern Plains, along the mid Atlantic coast, western parts of the northern Plains and in the central Rockies. It will be very warm in the Lakes region and upper and central Mississippi Valley and colder in the Great Basin and central Rockies. (AP WIREPHOTO MAP)

4-H Clubbers To Compete Saturday

A sizeable army of 4-H Club members from this county will invade Lubbock Saturday to take part in the District 4-H Club elimination contests. Hundreds of boys and girls from many counties in West Texas are to be on hand for the elimination events.

Herb Helbig, county farm agent, said that a poultry marketing team has been added to the list of contenders announced earlier this week. The members are Dero Shaw and Johnny McGregor.

Youngsters and the events they will enter at Lubbock are:

Senior livestock judging—Mack Frazier, Gary McNew, Phil Richey, and Mike Brady.

Junior livestock judging—Debra Buchanan, Daryle Coates, Terrye Soechting, Jerry Webb.

Junior foods and nutrition education, Linda Crawford; senior money management education, Martha Couch, senior 4-H food show, Kathy Shaw; junior clothing education, Joan Crawford; senior electric team demonstration, Lawrence Long and James Haston; senior clothing education, Carolyn Crawford; junior safety demonstration, Kelly Gaskins and Bruce Nichols; junior public speaking, Larry Shaw; senior share the fun, Gary Riddle, senior tractor driving contest, Mike Bridge; junior sh the fun—Debra Williams, Wanda Williams, Kayla Gaskins, Sherie Shaw, Angela Shaw, Johnny Peugh, Charles Williams, Keith Nichols, La Deana Riddle and Sherry Riddle.

Church Builds New Addition

LAMESA (SC)—A new auditorium is being built by the North Fourteenth Church of Christ, increasing its seating capacity from 380 to 800. Approximate cost of the new addition is $104,000, bringing the total value of the plant to approximately $275,000. The floor space measures over 20,000 square feet.

The church, organized in February, 1963 with a membership of almost 200 members now has 375 members. John Gibson is minister of the congregation. He has been with the church since its beginning, coming to Lamesa from the Parkview Church of Christ in Odessa. Gibson and his wife have three children, one son and two daughters.

Lloyd Price, Lubbock contractor, is building the new addition. Bill Woodrum, elder of the church, announced the auditorium should be ready for use by July 1, in time for the homecoming in Lamesa July 2-4.

A week revival has just been concluded at the church with Larry Marshall, a former Lamesa High School graduate, speaking. Marshall is now minister of the Central and Briar Church of Christ, Dodge City, Kan.

Minor Accidents

Four minor traffic mishaps were reported in Big Spring Thursday. Locations and drivers were East Fourth and State, Bill Stark, Hurst, Texas, and Clyde Payne, 2002 Eleventh Place; Fifth and Settles, Evelyn Miller, 3303 Drexel, and Brenda Smith, 2604 S. Monticello; Fourth and State, Ronnie Lee, 1001 E. 3rd, and Larkin Martin, 1004 E. 15th; and 807 Lamesa Highway, Jimmie Woodfin, San Angelo, and Paul Camp, 209 W. 2nd.

Fire Losses Show Drop

Big Spring's fire losses have evidenced a sharp drop in the past month, after heavy losses were recorded in the first months of 1965, Fire Marshal A. D. Meador has reported.

The insured fire loss record for April reached $1,257.24, Meador said, compared to $31,154 for the previous month.

Total for the year is now at $113,847. The city had experienced heavy losses in the first quarter of this year. At the end of April last year the total was $33,109.

Meador emphasized that residents should be fire-conscious throughout the remainder of this year if the city is to prevent considerably high losses for the year. Last year's fire loss total was $112,718.

The April loss totals included $1,207 for buildings and $50 for contents. Totals for this year are now $87,100 for buildings and $26,746 for contents.

Mission Set In Midland

MIDLAND — Robert B. Doing, world traveler, author, and National Missioner of the Brotherhood of St. Andrew, will conduct a Preaching Mission at St. Nicholas Episcopal Church here May 9-14. The mission will begin with a service at 7:30 p.m. Sunday and continue with services each evening thereafter.

Missioner Doing, a native of Long Island, began conducting missions in 1952 and has spoken in the United States, Canada. He has also been sponsored and commended by churches of the major denominations in South India, Bangkok, Athens, Geneva and Amsterdam.

Pastors of churches in Lamesa Andrews, Odessa, Big Spring, Colorado City and Sweetwater will encourage members of their churches to attend one or more sessions of the mission, and some have already indicated that they will attend. The public is invited to all services.

Equalization Board Meetings

Boards of equalization will sit May 14 for the oil valuations in two districts at Coahoma.

Pritchard and Abbot, valuation engineers, will be on hand with the Coahoma Independent School District equalization comprised of Jim Hodnett, Earl Hull and Pete Thomas. This meeting will be at the school at 9 a.m.

At 2 p.m. in the city hall, the engineers will be with L. F. Kinder, J. F. Gibson and Waymond Lepard, the board of equalization for the Howard County Water Control and Improvement District No. 1.

Police Break Up Street Fight

Seven youths were taken to Big Spring police headquarters Thursday night after officers stopped a fight reported at Fourth and Gregg Streets about 10:40 p.m.

One youth was taken by Big Spring Ambulance Service to Cowper Clinic - Hospital for treatment and was released this morning.

The seven youths brought to the police station were released to their parents, officers reported, and the incident referred to Juvenile Officer Bob Darland.

Opening lead: Queen of ♡

South overlooked his most promising prospect in playing the six diamond contract, and the result was a totally unnecessary loss on the deal.

South's opening two diamond bid and North's positive response of two spades are in accord with textbook requirements. When North raised the diamonds on the next round, South checked back for controls. If his partner had shown one ace and two kings, he would have been able to count 13 tricks. North announced only one king, however, and South was content to settle for a small slam.

West opened the queen of hearts which was taken in the closed hand by the king. Trumps were drawn in two pulls and a spade was led to the king. The ace of spades was cashed followed by a spade ruff—in the hope that the suit would divide evenly, in which case declarer's clubs could be discarded on the established spades.

West showed out on the third round of the suit, however, and everything now hinged on the club finesse. The seven of diamonds was overtaken by North's eight and a club was led to declarer's queen. West turned up with the king, and the defense subsequently won another club trick to hand South a setback.

Declarer had neglected to avail himself of an additional opportunity to succeed. When the trumps divide evenly, establishing North's eight of diamonds as a late entry, South is, in fact, in position to assure his contract provided that spades are divided no worse than four-two.

When South leads a spade, instead of going up with his king, it is suggested that he put in the six from dummy—conceding a cheap trick to East. If a club comes back, declarer puts up the ace and leads another spade to the king. When all hands follow, a small spade is ruffed establishing the rest of the suit. One club is discarded on the ace of spades and the other on North's long card. Declarer loses only one trick—a spade.

Jobless Youth Problem Held Major Threat

WASHINGTON (AP) — The AFL-CIO warned today that the soaring youth unemployment problem is a major threat, not only to the economy but to the democratic structure of the nation.

In the wake of discouraging new government figures on jobless youths, the labor federation said: "It was the jobless, disillusioned youths who grasped at the 'solutions' offered by Hitler. . . . America can ill afford to have this sort of discontent among large segments of its population."

NOT ENOUGH

Federal antipoverty and school-aid programs are not enough to solve the problem, said an article in the labor organization's magazine, The American Federationist.

The article coincided with the Labor Department's monthly employment report, showing that an early surge of school-age youths seeking jobs had boosted the nation's jobless rate from 4.7 to 4.9 per cent of the labor force in April.

Youth unemployment is expected to hit a peak of 2 million in June as high schools and colleges pour out a flood of young job seekers.

The AFL-CIO said only federal economic policies geared to create new jobs rapidly will ultimately solve the problem.

Higher wages and Social Security benefits, shorter hours to spread employment, and more federal spending for roads, hospitals, education and housing are urgently needed, it said.

"The challenge confronting the country is tremendous," it added.

Without new jobs, government training and education programs will fail, it said, adding: "They can lead only to a better-trained, better-educated body of unemployed."

The federation said 1.5 million of the 4 million unemployed last year were under age 25.

"Although these young workers made up less than 20 per cent of the civilian work force, they accounted for more than 40 per cent of the nation's unemployed."

House Panel Supports Johnson's VA Closures

WASHINGTON (AP) — The House Appropriations Committee today supported President Johnson's proposed closing of veterans facilities and approved his request for $105,577,000 for public building construction in 31 cities.

Its action was in connection with a $14,086,408,000 appropriation bill financing 24 federal agencies and programs for the fiscal year starting July 1. The bill is scheduled for House debate next week. Its total is $444,615,000 less than the President requested.

The committee left the way open to change its mind about the planned shutdown of 11 veterans hospitals and some other veterans facilities, a proposal that has stirred up considerable congressional opposition.

The committee disapproved funds to keep the facilities operating after June 30. It said there will be ample opportunity for the House to restore the funds before June 30.

Chinese Industrial Center Leaps Forward In Housing

By CHARLES LYNCH

SHENYANG (Mukden), China (AP) — The easiest way to locate this place is to say that had MacArthur bombed across the Yalu River during the Korean War, this is where his planes would have headed.

Shenyang is the capital of Liaoling Province, the traditional industrial area of China, still going strong but now rivaled by the new industrial centers springing up all over this burgeoning land.

The Japanese used Shenyang as their headquarters during their 14-year occupation of Manchuria, when they set up the puppet Manchukuo empire here. The city once was known as Mukden, but that name has Christian overtones that the Chinese do not care to remember.

THE BRINK

This was the jumping-off point for Japanese incursions into the rest of China, and much later, it was the jumping-off point in the other direction for the Chinese troops on their way to the Korean War.

The "cathedral" of Shenyang is the industrial exhibition hall, built in 1959, filled with machines of a complexity that gratify the Chinese mind, and all made by Chinese hands.

Among the good things of the old China, it is generally agreed, good housing for workers and peasants was definitely not included. And it is in this area that the new Shenyang is most impressive, since it includes four vast workers' villages.

Here, tens of thousands of industrial workers are housed in conditions that rival anything similar in Asia. North American standards do not apply, and the Chinese make no such claim — but the leap from the old housing to the new is a great leap forward, indeed.

The apartment buildings, three stories high, stretch for blocks in every direction. I picked a doorway at random and found myself the guest of Ten Shi-chin, who earns $40 a month as a leading worker at the Shenyang metallurgical machinery factory.

WARM WELCOME

The welcome was warm. The living quarters were Spartan but neat. One room serves as living room, dining room and bedroom for Ten, his wife, and their four children — the parents in one broad bed, the children, aged up to 12 years, in the other. The beds, covered with straw matting, become part of the living space by day, in the Chinese fashion.

And in the Chinese fashion, this was living — gas burners in the kitchen, an electric light bulb, a radio, a clock, and a bicycle. The rent is $1.20 a month.

Across the street is the department store where eggs are three cents apiece, cabbage five cents each, and pork is 35 cents a pound. Strong drink is $1.10 a bottle, but canned fruit costs 50 cents a can and rates as a special treat for the kids. Refrigeration is no problem — the Chinese housewife shops on a meal-by-meal basis, and likes it that way.

The only unhappy faces I've seen here are those of the rickshaw men but they, I am told, are not unhappy—they are just concentrating on their work, secure in the knowledge that "there's a motor in their future," somewhere up ahead.

Lodge Pledge Cited By Sato

TOKYO (AP) — Prime Minister Eisaku Sato said today that Henry Cabot Lodge, President Johnson's personal envoy on Viet Nam policy, promised him that the United States will not bomb Hanoi, the capital of North Viet Nam.

"The United States will not bomb Hanoi or occupy any part of North Viet Nam," Sato said Lodge promised him. He added that Lodge promised him the United States would not involve Japan in the Viet Nam war.

Lodge has just completed a swing around the Far East explaining American policy in Viet Nam to friendly governments in the area.

Grand Jury Bills California Youth

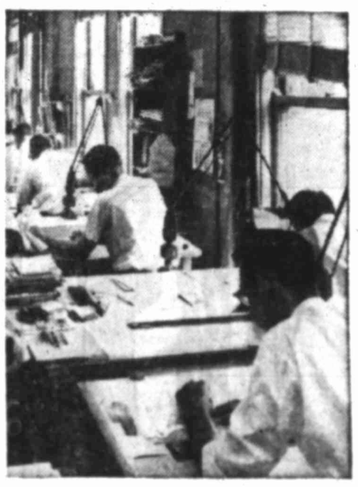

KINGSVILLE (AP) — Paul Krueger, 17, of San Clemente, Calif., was indicted for murder by the Kleberg County grand jury Thursday in the slayings last month of three Corpus Christi men.

Stock Market Slightly Lower

NEW YORK (AP)—The stock market opened slightly lower today. Trading was active. Most changes were small.

The Associated Press average of 60 stocks rose 1.0 Thursday to 344.7, a new high.

"YES— The Bible is our SOLE GUIDE"

"AT THE COUNCIL OF TRENT, Bishop Nachianti, . . . maintained that Scripture was the only final authority, because in the Gospel everything was written which was necessary to salvation: but he was enormously outvoted, and it was decided that 'unwritten traditions were to be accepted with the same veneration as the Holy Scriptures.' " (F. W. Farrar Quoting Ranke, I. P. 203). . . .

ONE VIEW IS THAT THE SCRIPTURES ALONE furnish people completely in that which is necessary to salvation and that we can resort to it as the final authority in religion. The other view is that the Scriptures of God are NOT sufficient as a guide and therefore must be supplemented by tradition. Now the question before us is, WHICH VIEW IS THE TRUTH?

IN SEARCHING FOR THE ANSWER to our question we find that God's people under the law recognized the inspired books of the Old Testament as authority. Isaiah said, **"To the Law and to the testimony; if they speak not according to this Word, it is because there is no light in them," (Isaiah 8:20).** Through the prophet God made it clear that His written word was to be recognized as authority in religious matters. Christ Himself recognized the authority of the Old Testament, and when He was tempted of Satan He appealed to the Scripture. With each temptation Jesus said, **"It is written," (Matthew 4)** and then He quoted from the Old Testament.

AFTER THE LAW OF MOSES WAS GIVEN TO THE CHILDREN of Israel, the elders built up a collection of human tradition. They contended that this tradition was as binding upon the people as the written word of God itself. But Christ and His disciples ignored tradition for "He answered and said unto them, Well hath Esaias prophesied of you hypocrites, as it is written, This people honoureth me with their lips, but their heart is far from me. Howbeit in vain do they worship me, teaching for doctrines the commandments of men. For laying aside the commandments of God, ye hold the tradition of men, as the washing of pots and cups: and many other such like things ye do. And he said unto them, Full well ye reject the commandment of God, that ye may keep your own tradition." (Mark 7:6-9). Thus we see that Christ forever repudiated and rejected man-made tradition as AUTHORITY in religion.

THE WORD "TRADITION" IS DERIVED from a word which means "that which is carried over." Tradition is that which is repeated or carried over from one generation to another. Peter said Christ died to redeem men from the "vain manner of life handed down from your fathers," (I Peter 1:18). Knowing that Christ died to redeem men from the effect of human tradition Paul said, "If ye died with Christ from the rudiments of the world, why, as though living in the world, do ye subject yourselves to ordinances? Handle not, nor taste, nor touch (all which things are to perish with the using)." (Colossians 2:20-22, R.V.) From the New Testament scriptures we learn that Christ credited the Old Testament books as the ONLY authority for God's people under the law. He warned the Pharisees that they were worshiping God in vain when they followed tradition. (Matthew 15:9).

WHEN JESUS SPOKE "THE PEOPLE WERE ASTONISHED AT HIS DOCTRINE; FOR HE TAUGHT AS ONE HAVING AUTHORITY AND NOT AS THE SCRIBES," (Matthew 7:29). After Christ rose from the dead he said to his apostles, "All AUTHORITY hath been given unto me in heaven and on earth." (Matthew 28:18, R. V.) There is no question but that Christ now has all authority in spiritual matters, and we must submit to His will. **(Jesus and his teaching are inseparable; to receive His doctrine is to receive Him and to reject His doctrine is to reject Him.)**

THE BIBLE IS OUR SOLE AUTHORITY IN RELIGION for the Scriptures claim that authority for themselves. In I Peter 4:11 we read, "If any man speak, let him speak as the oracles of God." Peter said the Scriptures are the oracles of God, and when man is speaking in behalf of Christianity he must speak as the oracles. In 2 John 9 (R. V.) we read, "Whosoever goeth onward and abideth not in the teaching of Christ, hath not God: he that abideth in the teaching, the same hath both the Father and the Son." In this passage the Bible testifies that if we go beyond the teaching of Christ as given by the apostles, we have not God.

GOD GAVE THE BIBLE, AND HE CLOTHED IT with divine authority. He told the children of Israel to go to the law and the testimony (Isaiah 8:20). Christ said "Search the scriptures" (John 5:39). Jesus said further **"the word that I have spoken, the same shall judge him in the last day"** (John 12:48). The word of Christ is now the rule of living and it shall be the rule of judging. The fact that Christ will use the Bible as the standard by which He judges us is proof that it is now **authoritative**. In closing the Bible the Lord taught that we must not add to His word or take anything from it. (Revelation 22:18-19). **YES, THE BIBLE IS OUR SOLE GUIDE.**

It takes a lot of "outside" help to get this year's big telephone job done...

This year Southwestern Bell is investing nearly $1 million a day in an intensified construction effort to make your telephone service (already the most modern and reliable in the world) even better.

These construction dollars, pouring into communities large and small, account for some 17,500 jobs among the hundreds of firms which sell supplies, services and materials to the telephone company.

These jobs mean more paydays for secretaries, accountants, architects, brickmasons, carpenters, engineers, truck drivers, bulldozer operators, ditch diggers—thousands of people who aren't telephone company employees.

There's another tangible benefit, too. Because hundreds of individual projects affect virtually every telephone exchange we serve, the economic impact in these communities will be significant and widespread.

That's how Southwestern Bell's construction program works to help build a more prosperous America. You, personally, will benefit through even better telephone service. "Your Town, USA" benefits from a surge of new dollars into the local economy.

Southwestern Bell
1965: Your Bonus Year for Telephone Service

DEAR ABBY

Right To Complain

DEAR ABBY: What happened to all that wonderful entertainment we used to see on TV? All we get lately is stuff about crime, murder, divorce and young girls going wrong. But worse yet are all those horror things that make your blood run cold. Is this the way to entertain children? Where are all those funny comedians and all that lovely singing and dancing I used to see? We try to raise our children to think clean and lofty, but with all this junk and violence on TV we don't have a chance. Isn't there something we can do about it?

DISGUSTED MOTHER

DEAR DISGUSTED: Yes. You can write to the sponsors of such programs and complain. You can also complain to your local television station and ask them to pass your complaint along to the networks. If enough people express disgust, something will be done. But all one mother can do in the meantime is turn off her set.

* * *

DEAR ABBY: My husband is the manager of a gas company. We have been married four years and all that time my husband has been trying to persuade my mother to buy a gas stove for cooking. My mother has cooked on an electric stove all her life, and as much as she would like to please my husband, she doesn't think she would be happy with a gas stove. Mother is having her kitchen completely remodeled, and she is putting in a new built-in electric stove. Needless to say, my husband is mad. Do you think he is justified in feeling this way? After all, my mother is the one who has to cook on it. HER DAUGHTER

DEAR DAUGHTER: No man (not even a son-in-law) can change a woman's cooking habits. But if your husband wants to be "mad," he can cook his goose with gas as well as with electricity. Your mother's preference for electricity isn't nearly as shocking as your husband's attitude.

* * *

DEAR ABBY: I am 26, have a good job and I am still a good girl. Three years ago I fell in love with a married man. I didn't know he was married at the time. He said he didn't tell me because he was afraid he would lose me. When I found out about his wife I quit seeing him, but I never really completely got over loving him. He saw a friend of mine one day last week and told her to tell me that he was now divorced and he wanted to see me again. How can I find out if he is really divorced this time? Can you help me? ONCE BURNT

DEAR ONCE: Do not walk—RUN in the other direction. Don't bother to find out if he's really divorced or not. It won't make any difference in his behavior. He could be "free" now, but if you married him he could "forget" to tell the next girl who looked good to him that he is married to you. Lose him.

* * *

Problems? Write to Abby, Box 69700, Los Angeles, Calif. For a personal reply, enclose a stamped, self-addressed envelope.

Hate to write letters? Send one dollar to ABBY, Box 69700, Los Angeles, Calif., for Abby's booklet, "How to Write Letters for All Occasions."

Uniform Oil Price Restoration Sought

WICHITA, Kan. (AP)—Directors of the Kansas Independent Oil and Gas Association say they will try to restore uniform crude oil prices in Kansas and join in a three-state move to combat further price cuts.

Dodd Scores Press On Viet Reports

CLEVELAND, Ohio (AP) — Sen. Thomas J. Dodd, D-Conn., said Thursday American newsmen have sent home an inaccurate, imbalanced and inadequate picture of the war in Viet Nam.

"To the extent that it has failed to convey to the American people an accurate appreciation of what is going on in Viet Nam," he declared, "the American press has gravely complicated the task of the administration."

"BROADER VIEW"

"My plea," said Dodd, "is for a broader view, for treatment in depth, for more balanced presentations, for less insistence on the sensational on the part of cable editors, for more thoughtfulness in the formulation of lead paragraphs and headlines."

SEN. THOMAS DODD

In a speech to the Cleveland Press Club, Dodd, just back from a tour of the Far East, declared:

"I came away from Viet Nam with the impression that the war is going much better for our side than can be gleaned from a reading of the press, that government morale is higher and Viet Cong morale lower, that the outlook for the future is more promising."

Dodd said most American correspondents in Viet Nam are competent and conscientious, but he added:

"The hard fact remains that, taken in its totality, American press coverage of Viet Nam has created a public image of the situation in that country that is in certain respects inaccurate, in other respects imbalanced, in still other respects grossly inadequate or even blank."

VIOLATED SECURITY

Dodd said some stories should never have been told because they violated security. Two weeks ago, he said, a story from Da Nang airbase mentioned operation of the Blue Streak reconnaissance drone.

"This was a top-secret matter," Dodd said.

Dodd also criticized the way American newsmen reported the use of nonlethal gas in the Viet Nam fighting.

Consul General Resigns Position

MONTERREY, Mexico (AP) —The U.S. consul general here, Richard Johnson, is resigning to direct a program of inter-America area studies at Trinity University. He has held the Monterrey post two years.

Brass' Golf Junket Bared

WASHINGTON (AP) — Sen. Stephen M. Young, D-Ohio, says scores of generals and admirals were flown to Augusta, Ga., for the Masters Golf Tournament on a Pentagon-sponsored junket.

He told constituents in a newsletter that the military brass were among "hundreds of officers and civilian officials" who took time off from their Pentagon duties to be billeted at Ft. Gordon, Ga., for the four days of the championship tourney.

"It cost taxpayers $20,000 to prepare barracks to house the generals and other top brass," he said. "Their civilian guests were compelled to pay 40 cents each night for rooms plus a dollar or two daily service charge for 'services', including liquid refreshment."

Young, a member of the Senate Armed Services Committee, said Air Force travel from the Pentagon to the tournament and back was at government expense.

Money Gift Due Truman On Birthday

KANSAS CITY, Mo. (AP) — Harry S. Truman will be 81 years old Saturday and one of his gifts will be money — up to one million dollars. Twenty years ago he got a better present when in "a solemn and glorious hour" he announced the end of the war with Germany.

That was on the 26th day of his presidency, the day after he moved his family to the White House. He wrote his mother, "I slept in the President's room" last night.

"This will be a historical day," he said. "At 9:00 o'clock this morning, I must make a broadcast to the country: Announcing the German surrender. The papers were signed yesterday morning and hostilities will cease on all fronts at midnight tonight. Isn't that some birthday present?"

Truman will be pleased with this year's present too. The money is for the project he cherishes most — the study by scholars of the office of the presidency, of the Truman administration and of Truman himself.

Tom L. Evans, one of the former president's closest friends and treasurer of the Truman Library Institute Board, solicited the money in 70,000 letters. Evans says the response has been overwhelming, "contributions from $7,500 to 25 cents."

Thomas Posts Two Bonds Thursday

George Thomas posted two $1,000 bonds Thursday afternoon in a new chapter in the assault charges pending against him in Howard County Court.

Dee Jon Davis, county attorney, said the Big Spring lawyer put up a bond in connection with the first of two aggravated assault complaints lodged against him by his wife.

This was on a complaint which Davis said he prepared and filed soon after the alleged assault on April 5. Thursday in court, when the state sought to go to trial with the first of assault cases, Thomas attacked the complaint, as prepared in the justice court, as faulty. Told the complaint listed on the docket was not the justice of peace complaint, but one prepared and filed by the county attorney, Thomas objected he had not been made legally aware of this new charge. The court granted his motion for a continuance in the case. Thomas also said he had not been served with a warrant in this particular case.

Davis said that he had Thomas put under arrest on this case shortly after noon and that the first $1,000 bond was to cover this charge.

The second $1,000 bond for carrying arms was along the same pattern. Davis said the complaint read that the defendant had a weapon which he carried "on or about" his person. To be a proper complaint under state law, the allegation should have read "on and about." This amendment led to the second bond.

A third case pending against Thomas was continued Thursday when he said that a principal witness for the defense could not attend court, due to the grave illness of an immediate relative.

Interact Club Makes Donation

LAMESA (SC) — The Lamesa Interact Club, organized under the auspices of the Rotary Club, recently contributed $180 to the Dawson County Museum Association to be used toward the restoration of the museum building. The contribution is the club's project for the year and money for the contribution was raised through club sponsored activities.

Jim Anderson, a senior at Lamesa High School, is president of the club and Eugene Barkowsky is faculty representative. Stansell Clement is chairman of the club and Eugene Barkowsky is faculty representative. Stansell Clement is chairman of the Rotary Club's Advisory Committee.

Other Interact officers include: Billy Wilton, vice president; Dennis Olson, secretary; Eddie Collins, treasurer and directors are Joel Foster, Lee Lindsey and Reinhard McKinney.

Tornadoes Hit Rural Sectors In Oklahoma

OKLAHOMA CITY (AP) — Tornadoes skipped across rural areas in Southwestern and Western Oklahoma but missed thickly populated areas Thursday night.

Mrs. Evelyn Minton, 41, suffered neck and head injuries when her mobile home was overturned by a twister which swept through the Oakwood community.

No other injuries were reported.

HARMON COUNTY

Much of the property damage in the southwest was at Ron, a small Harmon County community. A gin and barracks were destroyed and an abandoned school was unroofed.

A truck loaded with 63 cattle was overturned 7½ miles south of Mangum. Five cattle were killed but the driver was not hurt.

At Reed in Greer County, a seed warehouse was blown away and the rural home of Collin Thompson was leveled. Crops in the area suffered severe damage from hail and hard rains.

HOUSES DESTROYED

Two houses were destroyed in the Granite area and several were damaged in the Lake Creek area 6 miles to the northwest.

The storm knocked out power in several communities. At Hollis the power failure stopped the city's water pumps.

Reduced Nationalization Of Steel Clears Hurdle

LONDON (AP) — Prime Minister Harold Wilson's steel nationalization plan cleared its first legislative hurdle Thursday night, but only after the Labor government indicated it would settle for control of the industry instead of total nationalization.

Only seconds remained before the mandatory end of debate in the House of Commons when the government dramatically offered to listen to any other plan that would give it control of the steel industry.

The move won back to Labor's side two right-wing Laborites who had threatened to risk the government's future by abstaining or even opposing the nationalization plans.

VOTE 310-306

The vote was 310-306.

The vote was not on legislation nationalizing the steel industry, but on a government white paper — a statement of intent — setting forth the Labor party's intention to nationalize by transferring steel company stocks to a government-owned National Steel IQORP.

Wilson's government now has to decide whether to introduce its steel bill next month as planned.

ON SCHEDULE

Some ministers, certain that the steel industry could offer no alternative proposals, said the bill will be brought in on schedule.

Other influential Laborites argued that no major industry could be expected to bring forward plans of such scope within a few days or even weeks. They predicted the whole issue will be shelved at least until October, when Commons returns from summer vacation.

Wilson's plan calls for nationalizing 14 giant steel corporations which control 90 per cent of Britain's production and employ 70 per cent of the industry's manpower.

EQUAL AMOUNTS

Stockholders would be compensated with equal amounts of stock in NSC. The white paper said the price would be the average value of the steel shares between October 1959, and October 1964, or during the six-month period May-October 1964, whichever enjoyed the higher rating.

During debate Thursday night, Woodrow Wyatt, one of the Laborite rebels, argued for a takeover of 51 per cent of the stock of the major steel firms instead of 100 per cent.

This, he said, would be just as effective and less expensive.

The other rebel, Desmond Donnelly, denounced total nationalization as old fashioned and electorally unpopular. He asked for a takeover of a fraction of the industry.

A defeat in the enacting legislation yet to come would bring down the Labor government.

Mrs. Henry Requires More Extensive Care

Mrs. Patsy Ann Henry, 26, gunshot victim, needs to be taken to the Gonzales Warm Springs Foundation, her physician has announced.

Mrs. Ruby Phillips, county welfare officer, told the Howard County Commissioners Court Thursday afternoon that it would probably be up to the county to take the woman to the institution.

Mrs. Phillips said that it was possible Mrs. Henry might have to be taken to Galveston for a series of treatments in a hospital there prior to being removed to Gonzales. She said the doctor would let her know shortly if this would be necessary.

The commissioners instructed Mrs. Phillips to get figures on the expenses involved and to contact the physician for added details.

Mrs. Henry has been in Cowper Clinc and Hospital since March 29. On that date police found her shot in the temple and in the throat on the front porch of her residence on Ryon Street.

She is paralyzed as a result of her injuries, Mrs. Phillips said the doctor told her.

Elmo Henry, Mrs. Henry's husband, is at liberty on $10,000 bond under indictment for assault with intent to commit murder. He is alleged to have shot Mrs. Henry.

Auto Mechanics Graduation Set

Fifteen men will graduate from the auto mechanics course near the end of June, James Banks, instructor, indicated today.

The training, which covers a year of intensive instruction in all phases of automobile mechanics, is offered at Howard County Junior College under the Manpower Development Training program. The first such course resulted in 13 men completing the class. All of them were placed in or secured jobs in their new chosen field.

If there is sufficient demand, a third session may be started soon after the second class graduates.

Divorcee, Man Jailed In Death

HOUSTON (AP)— A 24-year-old divorcee and a 51-year-old man, both from Texarkana, were in county jail today charged with the slaying of the woman's elderly father last week.

Margaret Smith was arrested at a Houston apartment Thursday.

William Massey, a painter, was already in jail when the sheriff's office received the murder warrant from Texarkana. He had been charged with attempted burglary at a pawn shop here last Sunday.

The slain man, Robert Smith, 74, apparently was beaten to death at his home in Texarkana.

Police said both denied the slaying and claimed Smith was alive when they left Texarkana for Houston last Thursday.

Maintenance For Webb Aircraft Is First-Rate

One of the burners of the T-38 (Talon), the advanced trainer in use in the undergraduate pilot training program at Webb, is shown being rolled into place, after being cared for by T-38 maintenance crews. The matching engine is on the dolly to the right.

Webb Is One Of Eight Pilot Training Bases

Webb Air Force Base, with the main mission of producing, safely and economically, the world's finest pilots, is one of eight undergraduate pilot training schools, operated by the Air Training Command of Randolph Air Force Base, San Antonio.

Webb, as do the others, accepts students from the U. S. Air Force Academy, college and university Air Force Reserve Officer Training Corps units, Air National Guard, Officer Training Schools, and from allied nations. Rated navigators who wish to qualify as pilots are accepted also. Presently, qualification requires 55 weeks of training.

Attesting to effective utilization of equipment, personnel and techniques, is the current increase in pilot production, along with a decrease in the attrition rate. Thus, Webb is able to send more graduates into the Air Force flying commands.

TRAINING

Many Webb-graduated pilot officers have received, and are receiving, advanced training at Tactical Air Command (TAC), Strategic Air Command (SAC), Air Defense Command (ADC), Military Air Transport Service (MATS), U. S. Air Force Europe (USAFE), and Pacific Air Force (PACAF), bases in preparation for assignments throughout the U. S. Air Force. Others are preparing to become instructors in the Air Training Command undergraduate pilot training program. Many Webb graduates are instructor pilots at Webb.

All flying training at this time, pre-flight, primary and basic, is being conducted on the base. On July 29, 1965, a first-phase, light-plane, propeller, flying instruction for a new class will be conducted by a civilian contractor at Howard County Airport. This will be an economical weeding out preliminary to the jet instruction at Webb. Students will be housed and fed at Webb.

Jet pilot training is divided into three phases — pre-flight, primary flight and basic flight training. Students are assigned to the 3561st Student Squadron upon arrival. They receive their training from instructor pilots assigned to the 3560th and 3561st Pilot Training Squadrons. Officer training and academic subjects are under the direction of the staff in the 3561st Student Squadron.

PRE-FLIGHT

Pre-flight lasts three weeks, with a new class arriving every six weeks. The integration of the students from pre-flight to primary is timed to conform with the graduation dates of the senior class.

The student squadron processes one class every six weeks. The primary phase of student training is divided equally between both pilot training squadrons, the 3560th and the 3561st.

Each of these squadrons will have eight distinct class groups in training at any given time, four in primary and four in basic. The primary training phase, lasting five and one-half months, is given in the T-37, a twin-engine Cessna jet-training craft, affectionately known as "The Tweety Bird." The basic flight training phase is given in the T-38, called by the manufacturer "The Talon." Students call it the "White Dove." The T-38 is a Northrop supersonic training aircraft.

The adoption of the Undergraduate Pilot Training Program has resulted in savings in money and time over an earlier system. Formerly, student pilots were assigned to preflight at Lackland AFB for six weeks. This meant transportation expense from his home to that ATC base. Upon completion of pre-flight, he was sent to one of the primary contract pilot training schools, which meant another move. In five and one-half months, the student completed his primary and moved to another time to basic. Upon consolidation, there were few changes necessary in the course syllabus.

FLYING

Flying training is conducted by the flight and academic instructors of the two pilot training squadrons. However, nonrated officers, airmen and civilian employes are assigned to handle administrative and other support activities.

The school's peak load is approximately 400 student officers. The nine classes, that is, eight classes in training, plus one preflight class, average 45 members each.

The training of these student pilots requires 158 aircraft — 82 T-38s and 76 T-37s. Other aircraft at Webb includes three HH-43B Husky helicopters, used for rescue and firefighting.

The approximately 1,470 hours required to complete the 55-week Undergraduate Pilot Training Course are divided into 253 hours of flying, and the remainder into academics, officer training and flying preparation.

A total of 372 hours is devoted to academic study, aviation physiology, principles of flight, codes, navigation, safety, engineering, planning and weapons. There are also classes in T-37 flight planning, weather, aural and visual code, survival, programmed learning for flight instrument, T-37 and T-38 aircraft engineering, applied aerodynamics, flight line T-38 and reciprocating engines.

OTHER

Drill, ceremonies and inspections, physical development and conditioning, marksmanship, counter - insurgency, heritage, duty, officer performance ratings, are among the officer development courses which round out the training.

The flying hours necessary to complete flying training are broken into six areas: Flight indoctrination, contact flying; instrument flying; navigation; formation flying; and synthetic instrument training.

When students complete the requirements for attaining their wings, they are assigned to the various flying commands according to class standings, student choir, instructor recommendation, USAF requirements and assignment council.

DECEMBER, 1950

Reactivation Was Well-Kept Secret

Reactivation of the air base at Big Spring was one of the best kept secrets of this area until its surprise announcement in December, 1950.

In July of that year, Rep. George Mahon, then chairman of the House subcommittee on military appropriations, alerted the Chamber of Commerce manager and the mayor that the Air Force was considering reopening the former Big Spring Bombardier School due to the Korean Conflict and the general world situation.

REQUESTS

City authorities, meantime, made proper requests and during the week of Dec. 4, the Air Force requested the subcommittee to include $13,822,000 for reactivation of the base.

Still there was no public mention of the matter until the military appropriations was presented in the House by Rep. Mahon.

At that time he and then Sen. Lyndon B. Johnson made a joint announcement on Dec. 19, 1950. The House passed the measure and the Senate quickly followed.

There remained only the matter of promptly negotiating a $1 a year lease to the government on 1,279 acres.

Meanwhile, it became necessary to do some changing at the base. Most of the buildings of the bombardier school had been sold and moved, but a dozen or so structures still remained.

Howard County Junior College was in the process of building its new home in southeast Big Spring and they moved from the hospital area. The district offices of the Civil Aeronautics Administration was transferred.

The IOOF Lodge moved to its new location off base. Also moved were the National Guard, the Naval Reserve units, the 4-H, Hereford Breeders and the Howard County Fair groups.

NEW BUILDING

Big Spring turned over its new $60,000 terminal building (which became the operations building) and abandoned operation of the municipal airport, although commercial airlines were accorded landing privileges until Howard County Airport was built. Private business, including a wholesale produce company, planing mill and trucking company moved off.

Just as rapidly, contractors moved in on a crash building program. On June 8, 1951, Maj. Gen. Warren R. Carter, Flying Training Air Force commander from Waco, announced that the base would be advanced single engine (jet training), and Col. Ernest F. Wackwitz of Goodfellow AFB, San Angelo, would be the project officer.

An ultimate strength of 3,100 officers, airmen and students was indicated.

On May 18, 1952, the base was dedicated formally and was named for 1st Lt. James L. Webb Jr., a Big Spring pilot who was killed in a P-51 crash off the coast of Japan in 1949.

In June, 1958, Col. John Fitzwater of the Air Defense Command, came here to announce the 331st Fighter Interceptor Squadron was being transferred from Newburgh, N. Y., to Webb.

1ST FLIGHT

On Aug. 4, 1958, Lt. Col. Richard C. Watson officially brought in the first flight of the unit in its F-100 Sabrejets. In 1960, these gave way to F-102 Delta Daggers and in 1963, the 331st received F-104 Starfighters.

At present, the 3560th Pilot Training Wing has two types of training aircraft: T-37s and T-38s. In August of this year student pilots will begin training in the T-41A in the primary phase, then move up to the T-37s and complete the UPT in the T-38 Talon.

Radar Guides In FIS Craft

The 331st Fighter Interceptor Squadron—the Webb-based unit of a long range air defense system—must fly 24 hours a day, in all kinds of weather. To reduce hazard, the GCA (ground control approach) units are made available to these fighters on around the clock schedule, when the weather is bad or visibility is poor.

The conversation between the final controller and the pilot are familiar words to the 331st Webb-based pilots recovering from missions. By following these instructions, a pilot can make a safe landing in any weather.

UNITS

The GCA is made possible by radar units. The first operation is the location of the aircraft by the search controller. This is done by sending out wave pulses. The beam is sent straight out from a rotating antenna with the beams forming a circle much like the light of a beacon. As the pulses strike the aircraft, they bounce back and are picked up on the receiverscope. Then as small dots or blips move across the screen, the aircraft is identified and contacted by radio.

After the plane has been put in touch with the approach position, the final controller takes over. There are two pictures on the final controller's scope—one, a line that represents the glide path and the other, a line that represents an imaginary beam running straight out from the center of the runway.

The final approach begins about 10 miles out. When the airplane begins its descent, the blips on the screen show its movements. If the blips are above the line (glidepath) the pilot is instructed to increase his rate of descent so he will not overshoot the runway.

If the blips are to the right or left of the center line, the pilot is told to change his heading until the blips follow the line on the controller's scope.

TOWER

As the airplane touches down, the control tower takes charge and GCA is free to put another aircraft on final. GCA can handle three planes at one time. As one plane lands, another is picked up, while two others may be controlled by the search controller. In this way the aircraft can be kept approximately seven miles apart.

The GCA unit at Webb is one of the busiest in the Air Force. In addition to handling the aircraft for the 331st, it also controls hundreds of approaches by students in the pilot training program. For example — during the month of June last year a record of 2,200 guided approaches was established. The runway at Webb is 150 feet wide and one and one-half miles long. The touch-down by the high speed aircraft must be made within the first 1,000 feet due to the long landing roll of the aircraft.

Eight Chair Dental Clinic Is Provided

Lt. Col. Rowland D. Wolfe Jr. operates an eight chair dental clinic. Dental service is limited to military personnel. There are presently four dental officers assigned in addition to the dental surgeon: Captains Chester H. Barker Jr., Gerald B. Rifkin, James H. Simonton, and Joseph S. Towbin. T. Sgt. Renfro heads the airman staff.

The Veterinary Service, another function of the 3560th USAF Hospital, is operated by Capt. Ronald E. Loose and his airman staff.

Mrs. W. A. Bryans, secretary to the hospital commander heads the civilian staff of 26. These civilians perform various duties such as budget analyst, receptionists, typists, nurse and nursing assistants, stenographer, X-ray and laboratory technicians, food service specialists, and building custodians.

Some workload data for the hospital shows that in 1964, 368 babies were born; 1,940 patients were admitted; 171 outpatients were seen daily; 10,871 X-rays were taken; 29,627 laboratory procedures completed; 60,992 prescriptions were filled; 2,718 physical examinations were performed; and 8,951 dental patients served, for a total of 33,737 total procedures and 11,507 dental lab units.

Recruits Employes

The employe utilization section, directed by Omer A. Williams, recruits and hires new employes, coordinates and provides training, and conducts a broad program of employe-management relations.

Also a part of this section is the incentive awards unit, managed by Mrs. Ruth E. Heath. It processes suggestions from employes on methods of improving day-to-day operations. From such suggestions, the base has realized savings running to many thousands of dollars. Cash awards are made to employes whose suggestions are adopted for use, based on the estimated amount of money expected to be saved during the first year. The highest single award in the 10-year history of this program was $1,500, based on the estimated first year benefit of $290,000.

Employes are also eligible, under this program, for cash awards based on superior performance of their duties over a prescribed period of time.

Management, Procedures Section Has Complex Job

The management and procedures section at Webb AFB under the supervision of 2nd Lt Howard K. Sonoda and S.M. Sgt James R. DeVore, is responsible for formulating and effecting management and procedural policies of the Base Equipment Management Office. Included in this section is the authorization-allowance unit, directed by T. Sgt. Robert G. Burkhalter, which receives requests for issue, turn-in and exchange of equipment from base units and reviews them against appropriate items and quantities of equipment needed by various functions of an Air Force installation.

CONTROL UNIT

Approved requests are forwarded to the document control unit, directed by S. Sgt. Manuel H. Falcon, which will then order from or turn in the items to base supply. This unit maintains documented records of each of these transactions.

The complexity of the many equipment items required by the Air Force involves large sums of money, approximately 10 million dollars at this base. As BEMO is the accountable agency for all equipment at Webb, detailed records must be maintained pertaining to these items. T. Sgt. Timothy F. Lilley is in charge of the equipment control section which maintains these records.

Approximately 25,000 cards are in use and relate for each equipment item showing condition, location, custodian, cost, authorization allowance and whether or not it is required and properly used. With this information, the inventory unit, supervised by S. Sgt. Malcolm H. Williams, performs a perpetual cycle inventory and maintains constant surveillance to assure that only the proper items, in the exact amounts required, are in use at this base.

DELIVERY

When an item is received from base supply, BEMO must then deliver it to the user. The warehousing unit, operational support section, under supervision of M. Sgt. Frederick C. Coleman, has this responsibility. If an item is turned in to BEMO by the user, it is also picked up by this unit.

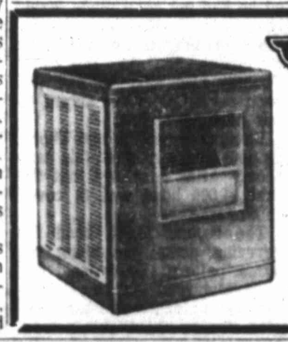

Also within the operational support section is the tool issue center, individual equipment unit, personal equipment unit and the linen exchange unit.

The tool issue center, directed by S. Sgt. Everette J. Kindred, maintains a stock and issues the hand tools needed by the technicians, such as jet engine mechanics, carpenters and plumbers. Approximately 1,336 tool kits are in use.

INDIVIDUAL EQUIPMENT

T. Sgt. Farmer Hollen supervises the individual equipment unit, which issues and maintains records of all organizational items, examples of which are safety clothing, special winter clothing, pilot's flying gear (which includes numerous specialized articles), linen for all personnel living in barracks and various other personal items for military personnel.

The linen exchange unit, under direction of S. Sgt. Jasper Comeaux, exchanges and has laundered the items issued by the individual equipment unit as well as all linen in use on the base. This amounts to approximately 2,000 items per week, which are turned in to a civilian contractor for laundry, and returned for delivery to base personnel.

T-37 Pre-Flight

Getting ready to go, student and instructor make an engine inspection, landing gear inspection and mask student for instrument flight.

Pilots Dodge Menacing Bush

A tumbling, voluminous bush holds a particular significance to jet pilot training bases in this area. At Webb AFB, pilots call it the "Terrible Texas Tumbling Tumbleweed" and have developed a healthy respect for its whims.

An average day sees about 320 sorties flown by student pilots at Webb, another 20 to 30 by Air Defense Command aircraft, and five to 10 by support or transient aircraft.

These 360 sorties make up about 900 take-offs and landings and of this number, some 890 are made by jet aircraft with the majority being made by the base's jet trainers.

Every air base has its "foreign object damage" problem. But at Webb it's the tumbleweed that is the biggest problem because of its unpredictability and flight on any wind.

Annually, pilots here fly close to 100,000 air hours. With the finicky tumbleweed always threateningly close at hand, engine and equipment damage is a constant danger.

Training aircraft at Webb are especially vulnerable to the evercharging tumbleweed because of their twin jet construction. A jet engine is particularly sensitive.

It will suck in a tumbleweed which then damages the compressor, rotor and stator blades.

Even a small tumbleweed blown near the intake duct of a jet engine may be ingested in part or in whole by an engine. The stalk of a mature tumbleweed may grow to more than an inch in diameter and when dry is as effective against an axial flow turbojet engine as a crescent wrench.

Although the operations of a jet engine depend upon the mass being forced through it, tumbleweed mass is harmful to an engine under all circumstances.

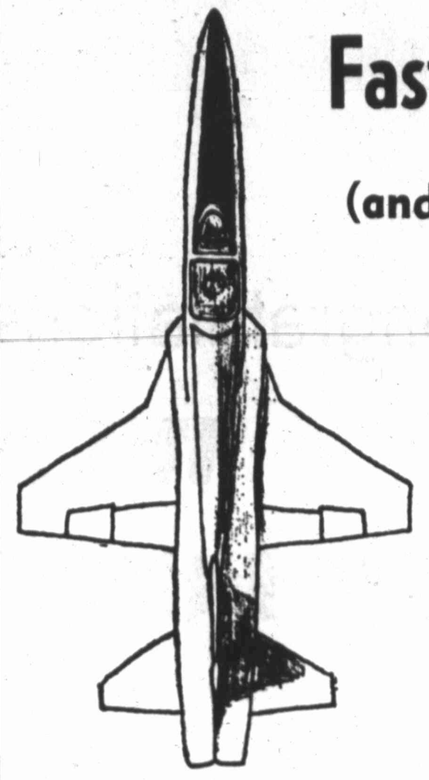

Since the engines apparently cannot be adapted to the tumbleweed, base officials were forced to look elsewhere for answers to the problem.

While the tumbleweed is not blamed for all damage, officials have been able to identify many thousands of dollars worth of tumbleweed damage and suspect many more tumbleweed incidents.

Get ID Cards

All dependents of military personnel over the age of 10 years are eligible for ID cards on application to the pass and registration section.

S.M. Sgt. Herbert L. Smith, Air Police superintendent, and T. Sgt. L. J. Fontenot, NCOIC of the law enforcement section, will be in charge of all traffic control on Armed Forces Day.

Fast Movers

(and so are we!)

We are happy to extend our congratulations to Webb Air Force Base on this 13th anniversary . . .

Much of the responsibility for the defense of our nation rests with men trained here and at other installations throughout the country.

Hospital Provides Medical Support

The 3560th USAF Hospital at Webb AFB furnishes direct aeromedical support to the 3560th Pilot Training Wing and the 331st Fighter Interceptor Squadron. This includes flying physical examinations on all flying personnel, administration of the Aircrew Effectiveness Program and the Physiological Training Program. Although this is the primary mission, the hospital operation covers a myriad of services from hospitalization and treatment of the pilot to a polio shot for his baby.

The medical support includes medical, surgical, and dental outpatient and inpatient services for all military personnel, and all services except dental for their dependents and for retired personnel and dependents residing in the area.

The Hospital Group is headed by the Director of Base Medical Services, Lt. Col. M. E. Frantz. The administrative functions are grouped within the jurisdiction of the hospital administrator and the plans and operations support section. Maj Maurice J. Took, MSC, is the hospital administrator. Administrative sections include the hospital registrar; the medical squadron section, commanded by Lt. Willard W. Darnell, and the medical materiel section, headed by CWO Robert F. Marks. T. Sgt. Cecil Sparks Jr., is the hospital sergeant major, and S. M. Sgt. William H. Harp is the squadron first sergeant.

Functions dealing with the professional care of patients are assigned to hospital services and are under the supervision of the director of base medical services. Capt. Robert A. Cook is the chief of obstetrical - gyncology service. Capt. Francis N. Medici heads the pediatric service. General surgery is under the direction of Capt. Raymond J. Kasher. All surgical specialties are handled by general surgery except eye, ear, nose and throat. These are usually referred to other medical facilities.

INTERNAL MEDICINE

Capt. Robert C. Koberstein heads the internal medicine section, and Capt. Alan R. Swearingen is in charge of the general practice and the Air Force Clinic. Capt. Daniel W. Whitmer assists on the obstetrical-gyncology service. The military medical staff is assisted by local civilian and regional military consultants as necessary.

The nursing service is headedy by Lt. Col. Evelyn N. Lawrence, with Capt. Sarah N. Graham assisting and nurse in charge of the Medical-Surgical Wards. Capt. Marjorie L. Devine is in charge of the Obstetrical Ward, and Capt. Della J. Daniels is charge nurse of the Air Force Clinic. Others are Capt. Maria T. Varela, anesthetist, and 1st Lt. Jean L. Gillon, nurse in charge of the surgical operating room. A total of 19 nurses are authorized.

Ancillary support includes the clinical laboratory headed by S. M. Sgt. William H. Harp; the X-ray department with T. Sgt. James W. Denny as NCOIC, and the pharmacy with Lt. Willard W. Darnell as OIC and Airman 1.C. John A. Farnel, as NCOIC. Capt. John L. Culberson heads the Aeromedical Services, assisted by Capt. Lawrence A. Dils and Capt. Guillermo E. Rios.

The Physiological Training Section is under the direction of Capt. Dick E. Wilson, assisted by Capt. Lawrence R. Klinestiver. Both are jet pilots in addition to specializing in physiological training. This training includes physiological training indoctrination, chamber flights, parachute training and ejection seat training.

Takes 182 For Supply Support

Supply support of the flying training mission at Webb AFB is a task which requires the services of 182 employes consisting of five officers, 123 airmen and 54 civilians.

Lt. Col. John E. Bold manages the operation with assistance from 1st. Lt. Stephen E. Berry, management and procedures officer, 1st. Lt. Gerald A. Glad, property accounting officer; CWO Herbert R. Heath, materiel facilities officer; and 2nd Lt. James R. Hensley, maintenance support officer.

CONVERTED

Webb converted from a mechanized supply accounting system to an electronic system over a year ago. Records for the 26,000 items handled by base supply are stored in a computer on magnetic discs. Transactions are now processed as they occur during the day, rather than being held for processing at the end of the business day.

The programs in the computer make many of the decisions formerly made by supply personnel. These decisions are primarily mathematical; i. e., computations of amounts to be ordered, computation of excesses, improved response to organization's demands, and more accurate posting of transactions. Receiving and issuing parts is not the only job of base supply.

Many of the 26,000 line items must be stringently controlled throughout their life in the Air Force logistic system. Transactions involving these items must be documented and reported to higher echelons of command. Frequent inventories and inspections are required to insure complete control.

Base supply has four major sources when ordering material. Most of the aircraft parts and standard Air Force items are ordered from nine Air Force supply depots. Many of the items that are common to two or more military services are obtained from six Department of Defense supply agencies. Office, cleaning, general, and some construction supplies are ordered from the General Services Administration (GSA). In addition, a large number of items are purchased from local and area merchants.

Requisitions submitted to supply depots are transmitted via "Autodin" (Automatic Digital Network) which was recently placed in operation by the Air Force. Base supply prepares a punch card requisition and transmission cards showing the address abbreviation of the correct depot. Cards are delivered to base communications several times each day. They are placed in a machine which converts the punches into electrical signals and transmits them to the appropriate depot through several relay stations. The message will be received at the depot within a period of 30 minutes to four hours, depending on the priority of the message and the amount of priority traffic being handled.

COMPUTERS

The network is almost exclusively controlled and operated by computers. It is capable of automatic interruption of low priority messages when a high priority message is being received. The low priority message is held in computer "memory" until the high priority is completed and then the low priority is retransmitted.

To the Members of Our Defense Team

Since the dawn of civilization man has had to protect himself . . . when he won his well-being, he reasonably turned to the bettering of his living conditions.

Because America is sure of her protection—because our defense is strong—we can enjoy the highest standard of living in the world.

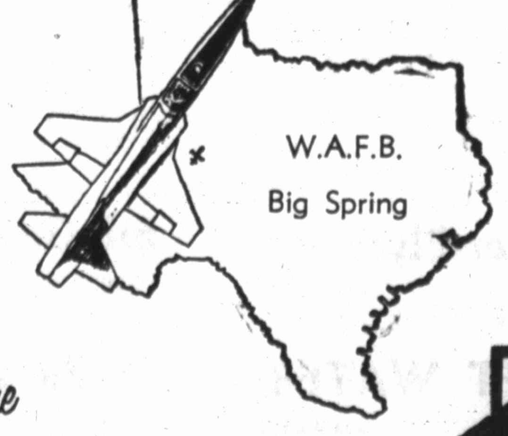

Our Armed Forces insure us day after day in the endless task of vigilance . . . and Pioneer Natural Gas is proud to be a member of the industry that helps repay this dedication and devotion to duty.

The natural gas industry contributes to the manufacture of thousands of products vital to the armed services . . . plastics, synthetic rubber, explosives, anesthetics, and anti-freeze, to name a few.

Especially during the Armed Forces appreciation observance, we extend to Webb Air Force Base neighborly best wishes.

TEAMED for defense!

ARMED FORCES DAY

Pioneer Natural Gas Company

BLUE STAR HOME
GO MODERN—GO GAS

Operations Office Is Hub Of Flying And Control

One of the bustling and diversified activities at Webb AFB is base operations. Often called the "Gateway to the Air Base," it is the hub of most of the flying activity and the control point through which most flight operations are governed.

Like its civilian counterpart—the terminal building at a large commercial airport—base operations processes passengers, aircrews, flight plans and clearances. It is the focal point for the arrival of visitors; it has complete flight planning facilities for pilots preparing to depart to any other base in the U. S., and it houses a communications center that links control towers, flight service stations, and air traffic control centers.

BASE OPERATIONS TOWER

WEATHER

Also available in base operations is a modern weather station operated by Detachment 16 of the 24th Weather Squadron, a division of the Military Air Transport Service. Weather radar and remote controlled meteorological calibration equipment, located on the airfield between the runways, help update and increase the speed of collection of weather data. Electrowriters transmit weather information instantaneously to the 331st Fighter Interceptor Squadron and to each of the training squadrons briefing rooms.

The dispatch section, which operates 24 hours a day, seven days a week, is the center of communications activity. NCO in charge of clearance and dispatch, S. Sgt. Robert G. Montague, and his team of specialists, Airman 1.C. Clement C. Maurry Jr., Airman 1.C. Tom Bost, Airman 1.C. Ralph Kidd, Airman 2.C. Gary Hauss, Airman 3.C. Hector Medellin, and Airman 3.C. Phil Parks transmit and receive flight plans, process passenger manifests, handle emergency and crash calls, and generally monitor the military flight operations system.

FLIGHT PLANS

Flight plans are transmitted through various communications lines to control towers and key air traffic control points. Instrument flight plans are coded on teletype and transmitted to the Fort Worth Air Traffic Control Center where flight data specialists feed the information into electronic computers. Flight information is then transcribed on to flight strips that air route controllers use to monitor the progress of instrument flights along pre-selected airways that blanket the United States with a vast, complex system.

S. Sgt. George Bauer is in charge of the aeronautical charts and publications section. This section distributes charts and flight information publications, with changes and revisions, to pilots, students and aircraft. These publications are subject to constant change and new, updated issues are distributed as they are required. Sgt. Bauer is also in charge of the central flight planning room and keeps it stocked with the latest charts and flight manuals for the air crews that use it.

The Air Force must work closely with the Federal Aviation Agency. Dick Bortner is the resident air traffic specialist representing the FAA at Webb. His experience and advice are vital in planning instrument landing procedures and publishing special charts jet pilots must use when landing or taking off in bad weather. This is an exacting business, requiring special knowledge of communications capabilities, radio navigation aids, federal and military air regulations, and first hand experience of the capabilities of high performance jet aircraft.

IN CHARGE

In charge of over-all operations is Capt. Wayne A. Kunkel, base operations officer. The captain is a senior pilot with over 4,000 hours as a pilot and flies the T-37 trainer as an instructor, and has been a flight commander at Webb, as well as coordinator for the maintenance and procedures of the runway supervisory units. NCO in charge is T. Sgt. Joseph D. Kluding, an air operations supervisor with over 17 years military experience. Together with an administrative clerk, they handle the general administration of the base operations function and the inevitable flow of paper work that an activity of this type generates.

Maneuvers become progressively more difficult, and no student is permitted to progress until he has completed his instrument courses to the satisfaction of his instrument instructor. These instrument instructors are highly qualified airmen and are professionals in this particular skill. (The synthetic trainer phase of pilot training is the only phase which utilizes enlisted airmen as instructors.)

ELECTRONICS

They are also electronics technicians and specialists, and are required to maintain these synthetic trainers in operational condition. The trainers are composed of intricate analog and digital computers, which develop the simulation required to present the instrument movements, within the cockpit and instructors consoles. The synthetic trainer branch at Webb is under the direction of chief of operations, deputy commander for training.

Maintains Gear

The personal equipment unit, under direction of T. Sgt. John Hooks, is responsible for maintaining flying gear for over 400 pilots on base. Examples of these items are parachutes, oxygen masks, helmets and pressure suits.

Base Named For Lt. Webb

Webb AFB in Big Spring is named for a Big Spring man—1st Lt. James L. Webb Jr. His mother, Mrs. Rilla Webb, has worked at the base since its activation.

Emerging from World War II with 49 combat missions to his credit in the European theatre, he gave his life in a crash off the coast of Japan on June 16, 1949.

Born in Sweetwater, he moved here with his parents as a lad, attended schools here and at New Mexico Military Institute in Roswell before going to the University of Texas. He left off his studies there to enter the (Army) Air Force, crowding in 49 missions before rotation to the United States and re-deployment to the Pacific. However the war ended and he returned to civilian life. Never, however did he get flying out of his system and soon he was back in the Air Force.

Air Policemen To Help Base Visitors Saturday

The first man visitors see at the gate at Webb AFB for the Armed Forces Day Open House, will be an Air Policeman.

He will be easy to recognize, because of his special uniform and equipment. He will be dressed with a white hat cover, white scarf about his neck, white gloves, bloused trousers in black boots with white shoe laces; his equipment will be black leather and the regulation air policeman's badge will adorn his left breast pocket.

MANY

Residents will see many of these air policemen at Webb on Armed Forces Day. Approximately 45 air policemen and 35 other police will be on duty. They will be posted at intersections and will direct visitors along the route to designated parking areas; and will assist in parking cars. A number of air policemen will be on duty in and around the areas which residents will visit—the aircraft parking ramp, the static displays, and the various refreshment stands.

Their presence is assurance of safety, and they will assist in many ways. One air policeman will be on duty at the Lost and Found Desk, where he will help in locating lost articles, or even a child who has been momentarily disoriented. In general, all the air police will be doing their best to provide every service, assistance and courtesy.

CAPT. KIBLER

The Security and Law Enforcement Division at Webb is commanded by Capt. Ronald F. Kibler. There are 81 airmen and one civilian authorized to man the division. The mission of the division is to provide the security and law enforcement for the base, including the 331st FIS area. The division consists of six operating sections.

The operations section is under the control of S.M. Sgt. Herbert L. Smith. It is his responsibility as air police superintendent to handle the administration of the division and exercise over-all supervision.

The law enforcement section is under the control of T. Sgt. L. J. Fontenot. His operation is divided into four air police flights which function on a rotating basis so that one flight is on duty at all hours of the day or night. His flight commanders are; S. Sgt. J. H. Frair, S. Sgt. R. S. Torres, S. Sgt. C. L. Lacy and S. Sgt. S. H. Phares.

The confinement section, supervised by T. Sgt. G. L. Griffin is responsible for the rehabilitation of personnel confined as a result of courts martial and for the detention, confinement and processing of all prisoners. He is ably assisted in this section by S. Sgt. R. Gregoire.

RANGE TRAINING

The range training section under the direction of S. Sgt. D. E. Robb, has the responsibility for marksmanship and range training of student pilots, 331st FIS personnel, and for all Air Police personnel.

The investigations section, headed by T. Sgt. Fontenot, and manned by S. Sgt. G. Spadafore and S. Sgt. N. R. Miller, maintains liaison between the base and local law enforcement agencies and conducts minor investigations and makes preliminary investigations for offenses.

The administrative security section, under the supervision of S. Sgt. E. Lorenz, processes requests for security clearances, monitors the physical security reports, conducts on the spot checks of security procedures, and supervises the security indoctrination program.

The pass and registration section, under the supervision of S. Sgt. C. H. Bate, has the responsibility of registering privately owned vehicles, processing identification cards, also restricted area badges.

SPECIAL ITEMS

During the Armed Forces Day Open House, the air police will be utilizing many of their special items of equipment. They will be driving radio controlled vehicles which can be operated for point to point communication and three portable megaphones. The communications net is centered around the air police desk sergeant who will control and monitor all telephone calls and radio transmissions.

The augmentee air police will be wearing white helmets and white armbands. They are personnel from other organizations on the base who are selected by their unit commander to supplement the regular air police function during periods of emergencies and on days of special events. They are given training by the air police training section under the supervision of S. Sgt. H. F. Kight. While they perform these duties they are assigned with regular qualified personnel.

Miliary personnel at Webb are briefed on all traffic laws, rules and regulations immediately on arrival at the base. All personnel assigned to Webb, both military and civilian, are required to register their vehicles with the pass and registration section, at which time they must show a valid driver's license, also policy protection on liability for accidents both on and off base. If they cannot, for any reason, comply with these regulations they are not permitted to operate a motor vehicle on the base.

City Has Had 17 Years Experience With Air Base

Although today marks the 13th anniversary of the activation of Webb AFB, Big Spring has had approximately 17 years experience as a home town for air bases.

Within months of the Pearl Harbor attack, Big Spring was singled out as a training base and contract was let April 28, 1942, for work to begin May 15.

The late Col. Sam L. Ellis was assigned as project officer and remained to become the first commanding officer when the base headquarters was activated on June 28.

All stops were pulled to get the base going, and while mountains of sand and gravel were turned into a concrete apron for the "line," frame buildings were hammered out. The first class of cadets arrived Sept. 26, 1942, to begin bombardier training in B-18 and AT-11 training planes. They were given cram ground school courses and sent on practice missions over targets in this area. By Dec. 17, 1942, the first class had completed its three-months course and graduated.

Col. Ellis, who was preparing for an overseas assignment, died March 8, 1943, of a heart attack and was succeeded by Lt. Col. David Wade, who was acting commandant until appointment of Col. Robert W. Warren on March 19. He was succeeded (Feb. 26, 1944) by Col. H. M. Whittkop who gave way (May 16, 1944) to Col. John P. Kenny. Col. Ralph C. Rockwood assumed command (Aug. 4, 1944) to be replaced (July 15, 1945) by Col. John K. Nissley, who was relieved by Lt. Col. Joseph F. Hunker (Oct. 26, 1945) who terminated the base. Lt. Col. James F. Reed and Lt. Col. Albert W. Satterwhite, directors of training, served as acting commanders briefly.

The school turned out its 42nd class of cadets Sept. 26, 1945, with a record of more than 6,000 students graduated. Planes had put in more than 400,000 hours and over 60,000,000 miles in dropping more than 1,200,000 practice bombs.

A remarkable safety record was achieved. Only four fatal accidents occurred, and two of these involved cadets.

During 1945, facilities were expanded and students of France, Brazil and China were added to the roster along with U. S. cadets. The last class to graduate was composed entirely of Chinese—35 of them.

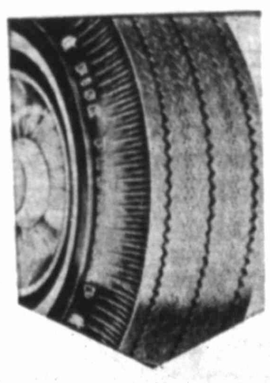

In the All-American Bombing Olympics, Big Spring Bombardier students fared well, and in combat, graduates earned thousands of medals. During the latter stages of the war, many former students returned to the base as administrative officers and to direct the redeployment program. This 24-week course to maintain and improve proficiency of bombardiers in the use of the Norden bombsight, was interrupted by the end of the war. The base became a station that received some 3,000 officers and enlisted personnel who were processed for the separation centers. The base was busy almost to the day it closed.

FISK & MICHELIN "X" TIRES and RANCH MASTER TUBES

PHILLIPS TIRE IS NOW INTRODUCING PREMIUM TIRES AND TUBES TO BIG SPRING. COME IN AND GET ACQUAINTED WITH QUALITY MERCHANDISE AT REASONABLE PRICES! COMPLETE TIRE SERVICE AWAITS YOU!

FISK PREMIER

Millions of torturous test miles on the road and in the laboratory has proven Premier LP's long performance. Thicker tread and unit locked bead construction gives outstanding tire strength. Rugged nylon carcass.

OUR RECAPS

- Looks and Runs Like new tires.
- Guaranteed like new tires.
- Only best quality materials used.
- Experienced craftsmen fabricate every tire.

TRUCK TIRES BY MICHELIN "X"

The original Radial Steel Cord Tire gives twice the mileage, better traction in the rain, snow, any climate. 3 layers of steel cords and archwise casing provide greater flexability for a safer ride.

FISK RANCHER HI-TRACTION FOR TRUCK & PICK-UP

Attention, Fleet operators! We offer you America's finest truck tires for longer original tread mileage . . . more re-caps, less down time . . . Fewer repairs. Operate your truck at the lowest tire cost per mile.

WHEN YOU USE Ranch Master TUBES

YOU GET:
- BETTER BALANCE
- LONGER WEAR
- GUARANTEED SATISFACTION

FISK SUPER TUF LUG

Certified for full value — full pull, size, lug count, width, cleaning action. There are full outside-in weather protection and full inside-out moisture protection.

City Links Tourney To Begin Saturday

Defending champion Bernard Rains goes against Novis Womack and former titlist Charles Bailey tries John Burgess in first round matches of the City golf tournament.

The tournament action gets under way Saturday and will be completed in a week's time.

No prize was given for the low medal score but that honor was won by Jimmy Newsom, who toured the course in 73 strokes, even par.

It took a 78 or better to rate the title flight.

Only 62 players entered the meet, smallest number to qualify in several years. Tournament director Shorty Gideon has enough for four flights, however.

Winner of the Bobby Rutherford-Paul Mosley match or Robb Smith is favored to reach the finals against Rains or Bailey. Other top flight players in contention include R. H. Weaver, Newsom and Donald Lovelady.

Pairings:

CHAMPIONSHIP FLIGHT
(Listed with qualifying scores)

Bernard Rains (75) vs. Novis Womack (76); R. H. Weaver (75) vs. Donald Lovelady (75); Loy Carroll (78) vs. Jimmy Newsom (73); John Burgess (77) vs. Charles Bailey (76); Bobby Rutherford (74) vs. Paul Mosley (74); Robb Smith (75) vs. Don Bustamente (75); Al Kloven (74) vs. Marvin Williams (75); Jan Smith (74) vs. Armando Torres (75).

FIRST FLIGHT

Joey Peay vs. Bill Patton, Joe Connally vs. Danny Maberry, Farris Hammond vs. Tommy Young, Phillip Parks vs. Danny Coates, Leonard Morgan vs. Delnor Pass, Spot Cockrell vs. Wally Slate, Ron Nusz vs. Max Pitts, Jerry Dudley vs. Jim Spikes.

SECOND FLIGHT

Ted Gross vs. W. A. Wilson, Wayne Hulme vs. Randy Nicholson, Robert Mahoney vs. B. F. McCreary, A. E. Sunday vs. L. A. Webb, Ralph Walker vs. S. Gorman, Col. J. B. Baird vs. H. C. Spivey, Bill McRee vs. James Petty, Bob Rogers vs. Joe P. Gordon.

THIRD FLIGHT

Gordon Wheeler vs. Frank Maberry, Harry Hubbard vs. Doyle Paris, Ray McMahen vs. Ray Bluhm, Jim Lewis vs. Don Hale, Sherrill Farmer vs. John Hobbs, Pat Allen vs Adam Ramos, Ray Grandberry vs. John Billings.

MOSLEY GETS HOLE-IN-ONE

Paul Mosley, who has been at it 19 years, sank the second hole-in-one in two days on a local course Thursday when he fired an ace on the 275-yard first hole at the Muny. He used a No. 4 wood.

Playing with Mosley at the time were Bobby Rutherford, Leonard Morgan and Charley Bailey. It was Mosley's first ace.

He wound up with a sparkling 33 on the par 36 front nine.

Braves Shade Devils, 13-4

Skippy Eggleston, with three doubles and a two-run home run, sparked the Braves past the Devils, 13-4, in National Little League action Thursday night.

Larry Vasquez was the winning pitcher but got relief from Dave Duncan. Mark Powell was credited with the loss.

Feather Champ Meets Rojas

LOS ANGELES (AP) — World featherweight champion Vicente Saldivar of Mexico puts his newly won title on the line for the first time tonight and is favored to retain it in a 15-round fight with Raul Rojas of San Pedro, Calif.

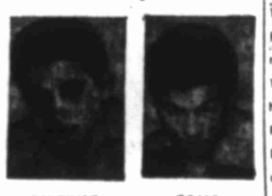

Just turned 22, the switch-hitting Saldivar still is a 9-5 favorite over the 23-year-old ex-dock worker in a match many believe will go the full distance.

The site is immense Memorial Coliseum and a crowd of 18,000 is expected at fight time, scheduled for midnight, EDT.

Saldivar won the title last Sept. 26 when he stopped Sugar Ramos in 11 rounds in Mexico City, a result that proved to be a stunning surprise to boxing fans.

Saldivar has lost but one match in 26 professional fights. This was on an accidental butt against Baby Luis. Vicente later knocked Luis out in seven rounds.

Rojas, unbeaten in 25 matches but held to a draw in one, did not box as an amateur and has been a pro only about three years. However, he is ranked No. 3 by the World Boxing Association in the 126-pound division.

ROJAS

Scottie Ace Forced Out Of 4A Meet

AUSTIN (AP)—Highland Park sprinter George Aldredge's withdrawal from the state schoolboy track meet because of an injury switched the spotlight today to the rest of the talent-laden field.

Previous performances indicate a flock of records are in jaopardy at the two-day meet, which will decide champions in Classes B, A, AA, AAA, and AAAA.

Preliminaries began at 9 a.m. in Class B.

There are some fine individual entries including a couple of reminders of one-man track teams.

Steve Lane of George West boasts the best Class A time in the 120-yard high hurdles and is highly ranked in the 180-yard low hurdles, discus and shot put. Another Class A athlete, Harry Broussard of East Chambers, also will run both hurdle events and the 220-yard dash, where he has done 22.5.

Several other performers—including Jimmy Jasper of Dallas Samuell; Shayne Slovacek of Booker, Lonnie Schiller of Spring Branch Memorial, Charles Callihan of San Marcos and Carl and Rusty Height of Liberty—are entered in one individual event as well as running legs on the 440 and mile relays.

Among the team favorites only Booker, defending Class B champion, promises to be an easy winner. Given slim nods in the other divisions are Samuel in AA and George West in A.

Samuell and Corpus Christi Miller will be racing for a national record in the 440-yard relay. Both have clocked 41.6. The record of 41.5 is shared by two Texas teams, Andrews in 1960 and Houston Lee last year.

A fast AAAA 120-yard hurdles group could also provide a national mark. Dallas Kimballs' Sammy Maddox and Mike Robbins of Waco University are close to the record of 13.7.

CLASS AAAA

440-YARD RELAY—41.5, Houston Lee (Stuart Godwin, Mike McKee, Bruce Cameron, Doug Cameron), 1964.
880-YARD RUN—1:53.7, Larry Rhodes, Abilene, 1960.
HIGH HURDLES—13.7, Fred Brocker, Austin, 1962.
100-YARD DASH—9.4, Don Parkhurst, Baytown Lee, 1962; George Aldredge, Highland Park, 1964.
440-YARD DASH—47.2, Eddie Southern, Dallas Sunset, 1955.
LOW HURDLES—18.0, John Roderick, Highland Park, 1962.
220-YARD DASH—21.4, George Aldredge, Highland Park, 1964.
MILE RUN—4:17.9, John Cooper, Fort Worth Tech, 1958; Richard Romo, San Antonio Fox Tech, 1962.
MILE RELAY—3:14.9, Dallas Samuell (Johnny Neumann, Ken Holmes, Jimmy Jasper, Mike Casey), 1964.
BROAD JUMP—25-1¼, Dudley Hass, Corpus Christi Ray, 1959.
DISCUS—193-3, Randy Matson, Pampa, 163.
SHOT PUT—66-10½, Randy Matson, Pampa, 1963.
HIGH JUMP—6-5¾, Jeri Franklin, Abilene, 1961.
POLE VAULT—14-6, Larry Smith, Abilene, and Pinto Beene, Cooper, 1964.

CLASS A

440-YARD RELAY—43.4, Iowa Park, 1960; Bloomington, 1963.
880-YARD RUN—1:56.6, Jan Pearcy, Sundown, 1956; Earl Meyers, Industrial Vanderbilt, 1961.
HIGH HURDLES—14.1, Donald Beard, Thorndale, 1956.
100-YARD DASH—9.7, Mike Holmes, Big Lake, 1962.
440-YARD DASH—49.2, Bob Thompson, Boswell-Saginaw, 1964.
LOW HURDLES—19.3, Donald Beard, Thorndale, 1956; Gary Collins, Hardin-Jefferson, 1961; Robert Hunt, Hallsville, 1962.
220-YARD DASH — 22.4, John Brim, Hawkins, 1964.
MILE RUN—4:26.4, Tommy Sims, Henrietta, 1964.
MILE RELAY — 3:25.2, Petersburg, 1963.
BROAD JUMP—23-7, Raymond Lanehart, Iraan, 1963.
DISCUS—175-3½, Howard Van Loan, Retan, 1964.
SHOT PUT—63-6, Howard Van Loan, Retan, 1964.
HIGH JUMP—6-5, Barry Noble, Jourdanton, 1963.
POLE VAULT—12-6, George Nelson, Marble Falls, 1964.

Longhorn First Sacker

Pictured above is Eddie Thomas, who'll be at first base when the Big Spring Steers visit Abilene Saturday for a 2 p.m. District 2-AAAA game with Cooper. The two teams are tied in the standings. Thomas throws right handed and bats as a leftie.

Steers Seek Fifth 2-4A Win Saturday

The Big Spring Steers, still smarting from that 4-3 defeat inflicted at the hands of Odessa High earlier this week, visit Abilene Saturday for a 2 p.m. engagement with Cooper.

The Longhorns need a win over the Cougars to climb back to the .500 mark, having dropped five of nine starts to date against league opposition.

The Longhorns nudged Cooper earlier in the season, 1-0. In that one, Hank Pope stopped Cooper with two hits.

Over-all, the Longhorns are 11-11 and are in a position to finish with their best record in many years.

Charles (Swifty) Burdette, a senior righthander, likely will go to the mound against Cooper. Burdette has won five games this season and has been tough as the proverbial boot his last few times out.

Other starters for Big Spring are apt to be Yogi Anderson behind the plate, Eddie Thomas at first base, Gregg Pate at second, Howard Bain at third, Sammy Mims at shortstop, Jesse Zapata in left field, Van Tom Whatley in center and Johnny Stone in right.

Probable starters for Cooper include Mike Simmons, second base; Charles Soladay, right field; John Scott, first base; Truett Roberts, left field; Roger Bailey, short stop; Jimmy Little, third base; Ronnie Harris, center field; Duane Yeatman, catcher; and Mike Choate, pitcher.

The Steers also play on the road Tuesday, meeting Permian in Odessa. The locals play their next home game a week from tomorrow, at which time they host Midland High.

In other league action tomorrow, Abilene goes to San Angelo, Midland Lee will be at home to Odessa High and Midland High visits Permian.

George Knudson Leader In Colonial With 68

FORT WORTH, Tex. (AP) — Soft greens and sparse fairways promised more sub-par rounds today as Canadian champion George Knudson led a field of 72 top golfers into the second round of the $100,000 Colonial National Invitational Tournament.

The Toronto pro shot a two-under-par 68 Thursday.

One stroke behind in the race for the $20,000 top prize were five others, including Fort Worth's Ben Hogan, a five-time winner over the 7,132-yard layout sometimes known as Hogan's Alley.

The others were Johnny Pott, Gene Littler, Mike Souchak and Tommy Bolt.

The extra-soft greens, which often stopped a low hooking approach shot dead in its tracks, gave the golfers a real break Thursday.

"If they cut the greens and stopped watering them, you'd find the scores would be higher," Hogan said after his round. "This way they save the bad shots."

Arnold Palmer, winner of the Tournament of Champions at Las Vegas last week, had this to say about his opening round 73:

"I wasn't real pleased, but also I didn't play real bad either. Take away those doublebogeys out of the sand traps at No. 7 and 17, and it would have been pretty good."

Knudson said he profited by "a lot of good fortune" on the fifth hole, one of the most difficult in the United States. His tee shot faded quickly to the right and appeared to be headed directly into the Trinity River when it hit a tree and bounced back onto the fairway.

"I mean I hit that one way out," he said with a grin. "I would have made a six for sure if it didn't come back."

The Leaders:

Pirates Win 6-5 Decision

The Pirates downed the Jets, 6-5, Thursday night in American Little League action.

Rickey Steen fashioned the win for the Pirates and Steve Baker was the loser in relief. In Wednesday night American League play the Cabots edged out the Jets, 2-1, in seven innings. Mike Murphy drove the winning run in for the Cabots with a seventh-inning double.

Raider Football Drills To End

LUBBOCK—A pair of evenly matched Red and White teams bring Texas Tech's spring training to a close in the annual game in Jones Stadium at 4 p.m. Saturday.

Each has triumphed once. Two games have been ties.

Tech's Whites won the opening game 9-0. The Reds took the third contest 14-7. Ties were the second Saturday scrimmage, 20-20, and last week's workout, 14-14.

Tom Wilson, regular quarterback last year, from Corsicana, will guide the Reds; freshman John Scovell of Dallas Hillcrest, the Whites.

Whites, a defense - minded combination, have the most experience, 13 lettermen to 10 for the Reds. Their starting offensive line averages 216 pounds, against 207. The offensive backfield, averaging 188, has a five-pound edge.

Defensively, the Reds, with a 210-pound line, average three pounds heavier than the Whites. But the White defensive backfield outweighs the Red secondary, 194-188.

Teaming with Wilson in the Reds' starting offense will be end Terry McWhorter of Perryton and Jeff White of Burbank, Calif., tackles John Porter of Lamesa and Stanley Edwards of Dallas, guards James Cecil of Sugarland and Chester Howard of Longview, center Jerry Turner of Garland, halves Mike Leinert and Kenny Baker of Houston, fullback Charlie Graham of Longview.

Besides Scovell, the Whites will start on the attack ends Terry Scarborough of Petersburg and Larry Gilbert of Kilgore, tackles Wayne Barginear of Petersburg and Larry Gilbert of Kilgore, tackles Wayne Barginear of Richmond and Mickey Finn of Houston, guards Doug Smith of Pasadena and John Avent of San Antonio, center Jackie Booe of Munday, halves Johnny Agan of Albany and Jerry Lovelace of Farwell, and fullback Gary Seat of Menard.

TOM WILSON

Knicks Draft Bill Bradley

NEW YORK (AP) — "If we hadn't picked him and he decided to play and wound up with another club, I don't see how we could have kept our franchise."

This was how Ned Irish, president of the New York Knickerbockers, explained his territorial pick of Princeton's Bill Bradley even though the brilliant basketball player had assured him he was by-passing a professional cage career for a Rhodes scholarship and an eventual law practice.

"I felt we had to take the gamble," Irish said at the conclusion of the National Basketball Association's annual draft of college seniors Thursday.

"If we didn't, I know for a fact that several other clubs were eager to draft him. I realize the chances are almost nil that he'll ever turn pro but we could not afford to pass him up."

The Knicks acquired the rights to several outstanding college stars, notably Dave Stallworth of Wichita and Dick Van Arsdale of Indiana, but they gladly would have given up all 13 of their selections for one affirmative nod from the Princeton pride.

It has been reported that Irish had offered Bradley $100,000 to sign a Knickerbocker contract.

"I made him no definite offer," Irish said. "However, I made it plain to him there was no ceiling on what we were prepared to pay him."

Bradley was one of the three territorial picks. The other clubs who exercised their territorial rights were Detroit, which picked Bill Buntin of Michigan, and Los Angeles, which selected Gail Goodrich of UCLA.

Stallworth was New York's first-round choice. San Francisco, which finished last in the Western Division, had two first-round picks and chose Fred Hetzel of Davidson and Rick Barry of Miami, Fla.

LOOKING 'EM OVER

With Tommy Hart

L. L. (Red) Lewis, the HCJC track and field mentor, reasons the scrap for the May 21-22 National Junior College track and field meet will be largely between four teams and concedes his own troops have as good a chance as any.

Phoenix, Arizona, will be out to repeat as the national king, having beaten the Big Springers by two points in last year's meet. The Hawks, no doubt, would have been home free had not one entry on another Texas team deliberately eased up to give Phoenix a victory in one event—but that's another story.

Lewis reasons Phoenix can't be quite as tough as it was last year, mainly because it has lost much of its muscle in the weights. The Arizonians, however, boast good quarter milers and will be respectable in the 220 and the hurdles.

Phoenix breezed to the team victory last year by piling up 72 points in the field events. It doesn't figure to do nearly as well this time, out.

* * * *

Other top contenders, if the meet goes according to Lewis' "book," will be two Texas schools, Victoria and Blinn.

Blinn beat HCJC at the Border Olympics in Laredo earlier this year but the Jayhawk mentor figures the Brenham school may suffer damaging blows in the sprints, where its talent is not outstanding but was good enough to beat HCJC in an off year.

Blinn has three good high jumpers and as many able hurdlers and high jumpers.

* * * *

Victoria will field virtually the same sprinters it had last year, when it was as good as the best and could be brutal in both the sprint relay and mile relay.

Lewis foresees a finish so close one could throw a blanket over the top four contingents. The point spread within that group may be no more than 15 points, he thinks.

* * * *

Boyce Hale, the former Big Spring basketball official who now calls Borger home, visited his old haunts here last week.

He recently was named District IV ASA (softball) commissioner. His domain covers eight counties in the Texas Panhandle. He'll try to have a tournament up that way this summer.

* * * *

Luke Thompson, the two-times champion of the Big Spring Invitational Golf tournament, will team with Bobby Wright in the upcoming third annual Big Spring Open. The meet is scheduled June 11-12.

Thompson is now an El Paso pro. Wright is the local veteran who won Big Spring Invitational titles ten years apart, the last one in 1964.

* * * *

Still on golf, ex-Big Springer Billy Maxwell will probably compete in this year's Texas PGA tournament, scheduled Sept. 30-Oct. 3 at Baytown, along with such names as Gay Brewer, Don January, Jackie Burke, Jimmy Demaret and Miller Barber.

This year's field in the PGA should be the best ever, since the dates conflict with no other tournament of consequence. There's even a chance Tony Lema will be in the field. He'd be eligible, since he is in the process of moving to Dallas.

* * * *

No night rider is Jack Nicklaus, the Masters golf champion. He says he needs up to 11 hours of sleep a night. They call him the Big Bear for a number of reasons.

HCJC Half-Milers

Bobby Sorenson (left) and Mike Riden will carry the red and grey colors of the Jayhawks into the Western Junior College Conference meet this weekend in Roswell, N.M. Both boys are half-milers and are expected to place well in the event.

Lsic Loans from a to Z

You name it . . . the C-A-S-H you want for any of your heart's desires from A to Z. S.I.C. has the loan plan that's letter-perfect for you. Two In Tie For 2-AAAA Mace Lead

San Angelo's Julio Guerrero and Wayne Merritt of Midland High are the leading hitters among regular baseball players in District 2-AAAA with identical .500 averages.

Each has collected 14 hits in 28 times at bat in conference play. Merritt also tops the league in runs scored with ten and in runs batted in with nine.

Only Big Spring player hitting more than .300 is catcher Yogi Anderson, in at .308.

Cooper's Harris is the leading pitcher in games won with three to his credit. Al White has a 2-0 mark while Freddy Miears, Big Spring, is 1-0.

Conference averages:

Clay-Liston Bout Sure

BOSTON (AP) — "We'll hold this heavyweight title fight May 25 if we have to hold it on a barge in a Florida swamp."

Fred Brooks voices a general sentiment of backers of the beleaguered Cassius Clay-Sonny Liston rematch: The bout will either be banned or blessed in a Boston courtroom today — or be whisked to another site without further delay.

The fight, postponed by Clay's emergency hernia operation last November, is scheduled for Boston Garden May 25.

Roberts Gets 4th Victory

By MIKE RATHET
Associated Press Sports Writer

How long can Robin Roberts go on?

That just might depend on his supply of snake oil.

ROBERTS

"I hear Satchel Paige found some snake oil in Venezuela he rubs on his arm to keep it young," Roberts said recently. "If I can find some, I just might pitch 'till I'm 56."

With 18 years to go, Roberts should have little difficulty reaching the 300-victory circle.

The 38-year-old Baltimore right-hander stepped up to still another plateau Thursday when he posted the 275th victory of his 18-year career by subduing the Minnesota Twins 5-1 on four hits.

It was Roberts' fourth victory without a loss this season, lowered his earned-run average to a sparkling 2.37 and revived the questioning about his chances of joining the select group of 14 pitchers who have won 300 or more major league games.

"Getting 25 more doesn't seem so big right now," Roberts said after he had handcuffed the Twins. "The way I'm going, it should come. Right now I'm not thinking too much about it. I imagine it will mean most after I'm through playing."

Then the modest pitcher who started out as a Whiz Kid with Philadelphia and eventually came to the Orioles in 1962 after getting his release from the New York Yankees had an after thought about his climb up the victory ladder past some of the game's greats.

"I noticed it most when I went past Bob Feller and Red Ruffing on the all-time victory list.

"Some of those names mean something."

Only one other game was played in the AL, the Los Angeles Angels running their winning streak to four as Bobby Knoop drove in four runs with a triple and a homer in a 5-4 victory over Kansas City. The New York-Cleveland game was rained out.

In the National League, the Los Angeles Dodgers defeated Cincinnati 4-2 and the Chicago Cubs downed Pittsburgh 5-3.

Roberts allowed the Twins' only run on Harmon Killebrew's fourth - inning homer that matched one by the Orioles' Brooks Robinson in the second inning off Jim Kaat.

So, with the score tied, Roberts took things in his own hands in the fifth inning, driving in the lead run with a single following a walk to Johnny Orsino and Jerry Adair's single.

Knoop tripled home two runs for the Angels in the second inning and then built the lead to 4-1 with a two-run homer in the fourth inning. The decisive run, however, came across in the sixth inning on Jim Fregosi's triple and a single by Bob Rodgers.

Rookie Rudy May got the victory for a 2-1 record but needed relief help from Aubrey Gatewood and Bob Lee. Lee surrendered a homer to Ed Charles in the eighth but then shut the door. Orlando Pena, now 0-4, took the loss.

Ex-Pony Killed

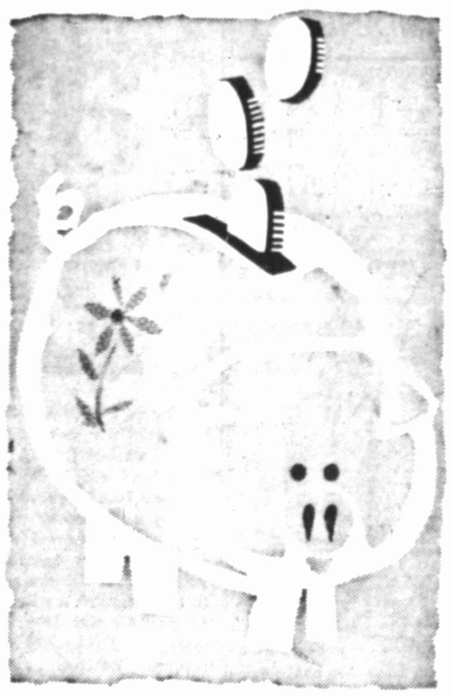

Jim Krebs (above), 30, former basketball star at SMU and for the professional Los Angeles Lakers, was killed near Los Angeles Thursday night when a tree fell on him. Krebs retired after the 1964 season to accept a banking position. (AP WIREPHOTO).

Two Boast .333 Batting Marks

Joe Sharpnack and Billy Paul Thomas share batting honors on the Morton's Foods softball team, both hitting a sound .333. Other .300 or better hitters include Oakey Hagood .308, D. A. Miller .308 and Allen Simpson .300.

The averages: Joe Sharpnack, .333; Billy Paul Thomas, .333; Oakey Hagood, .308; D. A. Miller, .308; Allen Simpson, .300; Jack Blizzard, .297; Bobby Suggs, .292; Gordon Fitz, .235; Spec Franklin, .222; Buck Drake, .214; Gerald Cox, .205; Tito Arencibia, .154; Cotton Mize, .143; Roy New, .136; Herb Sorley, .000; James Hallmark, .000.

Judge Replaced For Ruby Hearing

DALLAS (AP)— Dist. Judge Joe Brown, who presided at the Jack Ruby murder trial, has been replaced for a May 24 hearing in which an effort will be made to untangle the Ruby lawyer fuss.

Joe Tonahill of Jasper, one of the lawyers, quickly predicted that removal of Brown meant "it's going to blast wide open."

Brown agreed Thursday to relinquish temporarily jurisdiction in the hearing to determine who shall represent Ruby in his bid for a sanity hearing.

Presiding Dist. Judge Dallas Blankenship then appointed Dist. Judge Louis Holland of Montague to hear the sanity trial. Holland already was due to preside in Brown's court that week.

Officials indicated Holland might also be asked to rule on motions to disqualify Brown and to change venue.

The Dallas judge said he requested the visiting jurist because "I believe I have been attacked by Joe Tonahill. In all fairness I think another judge should preside."

Tonahill has frequently criticized Brown for writing a book about the Ruby trial.

De Gaulle Hits Intervention In Dominican

PARIS (AP) — President Charles de Gaulle today voiced his disapproval of American military intervention in the Dominican Republic and called for withdrawal of the U.S. forces.

A spokesman for the French Cabinet said De Gaulle took this position during a Cabinet meeting.

ASKED PULLOUT

France Tuesday made known its disapproval of American action in the Dominican Republic through a statement at the United Nations Security Council. U.N. Ambassador Roger Seydoux called for rapid withdrawal of American forces there.

During today's Cabinet meeting, Foreign Minister Maurice Couve de Murville reported the French ambassador in Santo Domingo had made contact with Dominican authorities under Col. Francisco Caamano Deno, who has been named provisional president.

UNDER STUDY

The Cabinet spokesman, Pierre Dumas, said the question of recognition of the Caamano regime is under study by France, but that no decision has been reached.

The Cabinet spokesman did not go into the reasons why De Gaulle disapproved of the U.S. intervention in the Dominican Republic.

Actor Back To Horses

By CYNTHIA LOWRY
AP TV - Radio Writer

NEW YORK (AP) — Peter Breck, who rode tall in the old "Black Saddle" series of television's yesteryear, is eager to get back on the range after several seasons of horseless movie and TV roles.

In New York recently to talk up ABC's forthcoming "Big Valley" series which will star Barbara Stanwyck, Peter attracted considerable attention with his boots, tailor-made wrangler's pants, civilian Ike jacket and five-gallon hat.

"Big Valley," Breck could hardly wait to explain, is set in California's San Joaquin Valley in the 1870s and is built around the matriarch — Barbara Stanwyck—and her children.

"Ah," exclaimed your reporter, "like 'Emprie' three years ago."

"No," he said, with disapproval. "Not at all. That was set in modern times. Anyway, there are three boys and a daughter. I'm Nick who runs the ranch which is a 440-mile spread. And I've a brother Jarrod, who is a lawyer in San Francisco. And then there's Heath, the younger one."

CBS, obviously very happy about the comment and general excitement stirred up by last week's Barbra Streisand special, will have another Streisand romp next season — plus a similar outing for another important Broadway star, Carol Channing. Hitherto, most of Miss Channing's television exposure has been on game-show panels.

Bank Robbery Suspect Held

HOUSTON (AP) — James Rogers, 43, a man with a back ache, was in the county jail today charged with robbing the South Main State bank of $7,000.

Rogers, a brick mason, surrendered to FBI agents through a lawyer Thursday about four hours after a man handed a teller a threatening note scrawled on the back of a blank check.

"I've had two back operations," he told newsmen. "Every time I do something wrong, my back starts bothering me."

Police quoted Rogers as saying he needed money to pay off some bad checks. They said the $7,000 was recovered.

Rogers waived a hearing and was jailed in lieu of $25,000 bond.

Farm Worker Discussion Held

WASHINGTON (AP)— Growers from Texas, California, Arizona and Michigan met today in the Mexican embassy to discuss terms under which Mexican farm laborers can work in this country.

A law permitting Mexicans to enter the United States to do farm labor expired Dec. 31.

Today's meeting was to work out terms replacing that arrangement, said a spokesman for the national council of agricultural employers.

The Labor Department has approved only the importation of 1,500 Mexicans to work temporarily in California.

Photos Held Inadmissible

SAN FRANCISCO (AP) — Pictures of bare-breasted girls performing in San Francisco's North Beach bars have been ruled inadmissible as evidence against the show girls in two municipal court trials.

The girls face charges of lewd conduct.

One judge ruled that the photos couldn't be used because they were taken after the police had decided to arrest the girls.

The other judge said they couldn't be used because they were taken before the girls were arrested and failed to depict the alleged offense.

Melvin Belli, one of the defense attorneys, said of the rulings: "I love a good snafu. This looks like one of them."

Anti-Death Penalty Bill Clears Panel

AUSTIN (AP)— Legislation to repeal the state's death penalty cleared the House Criminal Jurisprudence Committee Thursday, 10-3. House action may come Monday.

It's Commoner For Princess?

THE HAGUE, Netherlands (AP) — A spokesman for the Dutch Government Information Service indicated today that Crown Princess Beatrix is expected to become engaged to a West German commoner, Klaus von Amsberg.

The spokesman said Von Amsberg, an official of the West German foreign ministry in Bonn, was a "very good friend" of the heir to the Dutch throne and would be referred to as such "until an eventual engagement announcement."

He added, however, that he could not say whether a definite engagement decision had been taken.

"IS AMAZED"

Von Amsberg, 38, told the London Daily Mirror he was "amazed" that he had been named as Beatrix's future fiance.

"We have never discussed marriage," he said, "but I hope to see the princess again soon. She is a charming person."

British and Dutch newspapers today identified Von Amsberg as the man with whom the princess was photographed walking

PRINCESS BEATRIX

hand in hand in the woods around her palace 30 mile from Amsterdam. Von Amsberg said he had visited there last weekend.

TO RETURN

Beatrix, 27, was scheduled to return today from London, where she acted as godmother Thursday at the christening of Sibylla Louise Ambler, three-week-old daughter of Princess Margaretha of Sweden and her British husband, John Ambler.

A wedding of the heir to the Dutch throne must be approved by the government and Parliament.

Beatrix and Von Amsberg have known each other for about six months, friends said.

Dutch newspapers reported they have met six times and last February spent a skiing vacation in Switzerland.

Secretaries Pick 'Boss'

WASHINGTON (AP) — The National Secretaries Association (International) has selected Eugene O. Foley, administrator of the Small Business Administration, as international boss of the year.

Mrs. Hazel A. Keller, the international president who is a secretary in Portland, Ore., announced the selection of Foley.

Foley, 36, is from Wabasha, Minn. He has held the SBA post since 1963.

He was nominated by his secretary, Miss Frances L. Gray.

Five Men Injured In Boiler Explosion

HOUSTON (AP)— Five men were injured, none seriously, Thursday in a boiler explosion and flash fire at the Tenn-Tex Alloy & Chemical Co.

Baby Drowns In Bath Tub

SLATON, Tex. (AP)—A 19-month-old child drowned in a bath tub Thursday while a baby sitter was dressing his brother, 5.

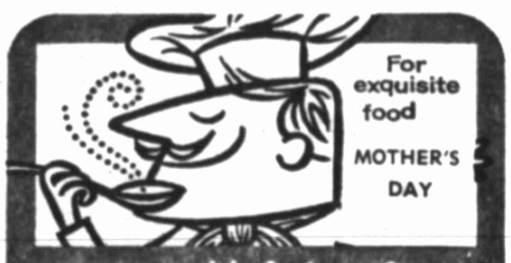

The victim was the son of Mr. and Mrs. Jerry Johnston of Slaton.

The baby sitter, 22, said she had bathed both children and had dressed the older boy when she went back to the bath room and found the infant drowned.

BIG SPRING DAILY HERALD

SEC. C BIG SPRING, TEXAS, FRIDAY, MAY 7, 1965 SEC. C

Working Together

The story of the mission of Webb AFB in moulding pilots and securing aerial defense has been detailed in previous Armed Forces editions of the Herald, George Zachariah, mayor of Big Spring, and Col. A. F. Taute Jr., wing commander at Webb, reach from community to base in a handclasp that symbolizes the closeness of Webb and Big Spring. While there are hundreds of examples, only a few selected at random bring into sharper focus today the people at Webb who join hands as participating citizens in all phases of Big Spring life. (Photo by Kenneth Good)

ARMED FORCES DAY

GROOMING SATAN FOR SHOW
Capt. Joe Seegers and prize Doberman

Satan Takes Family To Area Shows

Baron Satan Von Streicher is a point of common interest for the Joseph E. Seegers Jr. family, and one point of contact for the family and Big Spring.

Satan, as he is called, happens to be a Doberman, and this has led to a real interest of Capt. and Mrs. Seegers in the Big Spring Kennel Club. Besides being active members of the club, they have entered Satan in two area shows, and he has won a second and a third place in the Doberman division. They acquired him after moving here, as they have another member of the canine family—Fluffy, who has a rather broad and democratic lineage.

OTHER ACTIVITIES

The Seegers, who live at 110 Gunter in Webb Village, maintain several other activities in the community.

One of them is Little League, and there is a good chance that in time Capt. Seegers will become involved in more than a spectator's role. Already he suffers with every pitch as Stevie, 12, goes to the mound. There's more coming, for Michael, 8, has signed up with a minor league team in the International League. Mike is entering the Cub Scouts, too. Cynthia, the other member of the clan, is too young yet for Girl Scouts.

Mrs. Seegers, who is the former Rosanne Cherry of Miami, Fla., keeps busy in a number of things, including a bowling league which she serves as treasurer. Recently, she accompanied the team to the state meet in Dallas. Since Capt. Seegers was assigned to Webb AFB, she has become interested in Gray Ladies work for the Red Cross, and while much of this has been at the base hospital, she has done volunteer service at the Veterans Administration Hospital.

WATER SPORTS

The family goes in for water sports — boating, swimming and water skiing at Lake Thomas and other area lakes. Capt. Seegers enjoys some golf, too, playing regularly on the Big Spring Muny and Big Spring Country Club courses as well as the base links.

The Seegers are Baptists and attend the base chapel Sunday school and worship services.

Capt. Seegers is a native of Miami, Fla., and attended the University of Florida before entering pilot training as a cadet. He was at Lackland Field, Bainbridge, Ga., and Williams AFB, Ariz., in 1955 before getting his first assignment as a pilot. He was at Moody AFB, then with the Air Defense Command at Griffiss AFB, N. Y., where he flew F-101s.

THEN HERE

Then he went to Schutharle, England, with the Tactical Air Command before being assigned here as an instructor pilot. This entailed three months of instruction at Randolph Field, and later when he was made flying safety officer, he was sent to special school at the University of Southern California for three months.

Eight Have Served Webb As Commander

Eight men have served Webb AFB as commander since the base was reactiviated in 1951.

Currently, the commander of the 3560th Pilot Training Wing is Col. A. F. Taute. He began his tenure as commander on Feb. 18, 1964, but he was far from being a stranger to the base or to Big Spring.

Col. Taute served here previously as deputy commander. He is a native of Tolley, S. D. He began his service career with flight training at Randolph and Kelly Fields. He is a graduate of the Air War College and Air Command and Staff School. Previous assignments that Col. Taute has been on include instructor at the Army's Guided Missile School and Chief of the Military Assistance Advisory Group and chief of the USAF Mission in Lima, Peru.

First commander of Webb since reactivation was Col. Ernest F. Wackwitz, who had been assigned here as project officer Oct. 1, 1951.

Col. Fred M. Dean reported to Webb in July, 1953. He began his command on July 19. Prior to leaving Webb he was promoted to brigadier general.

Col. Charles M. Young became the next commander on Feb. 10, 1955. Two years later he was reassigned to Randolph AFB. Subsequently he was promoted to brigadier general. He is now retired.

Next in the position was Col. Kyle L. Riddle who assumed command June 24, 1957. Little more than two years later he was named commander to a tactical wing at Laon Air Base, France.

Col. Donald W. Eisenhart took command of the base on Aug. 26, 1959. In 1961, he was assigned to Lackland AFB where he still is stationed.

Col. Wilson H. Banks replaced Colonel Eisenhart Aug. 14, 1961. Colonel Banks came to Webb from a deputy commander post at Williams AFB, Ariz.

On July 29, 1963, the late Brig. Gen. Howard J. Withycombe (then a colonel) arrived at Webb from the Air Force Academy to take command. Gen. Withycombe won his star in November, 1963, then the following Jan. 5, 1964 he was killed in an automobile accident east of Big Spring. In April, 1964 the base academics building was named Withycombe Hall in his honor.

The present commander, Col. Taute, arrived here in February, 1964 after commanding the 3646th Pilot Training Wing at Laughlin AFB, Texas.

WORKS FOR MEMBERSHIPS
T. Sgt. Foster Kemp, American Legion Vice Commander

Sgt. Kemp Helps Boost VFW, American Legion

Not only is T. Sgt. Foster Kemp second vice commander of the Big Spring American Legion, he is also the junior vice commander of the Big Spring chapter of the Veterans of Foreign Wars.

This keeps Sgt. Kemp quite busy, but he still finds time to do other things. Sgt. Kemp is in the air frame repair section at Webb and has been stationed here since July, 1958.

A 21-year veteran of the Air Force, Sgt. Kemp plans to return to his home in Joell, Kan., once he retires.

As vice commander of both organizations, Sgt. Kemp explains his duties as "anything the commander wants me to do," he said.

"Most of our work in the American Legion is directed toward youth," he continued. "The American Legion sponsors the Boys State in Austin each year, and in Big Spring we sponsor a teenage baseball team and a Boy Scout troop for handicapped boys," he said.

The vice commander of the American Legion must coordinate the work of the youth program, plus work on the membership committee. Sgt. Kemp also works on the VFW membership committee.

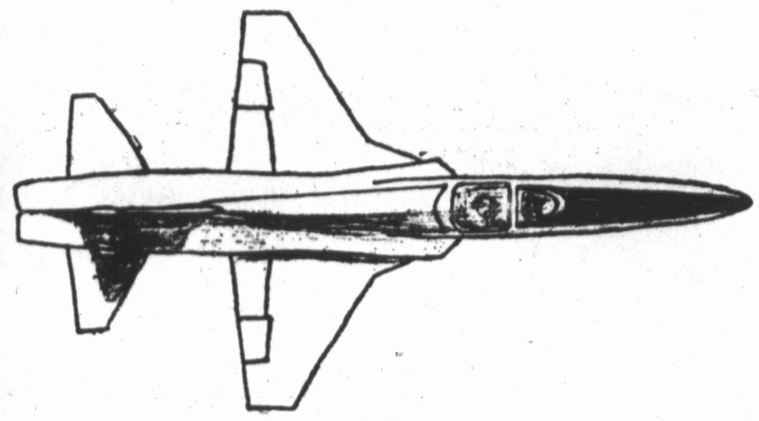

He was elected second vice commander last July and has been active in American Legion for several years. He has been the junior vice commander of the VFW for several years.

Mrs. Kemp is also a busy individual, being a licensed vocational nurse at Bennett House. Mrs. Kemp received her nursing education at Howard County Junior College and went to work at Bennett House in December, 1964.

Prior to taking her nursing course, Mrs. Kemp was the head of the ceramics hobby shop at Webb. In fact, Mrs. Kemp started the ceramics shop in 1958.

Sgt. and Mrs. Kemp's two children, Kathleen, 15, and John, 13, both attend Goliad Junior High. No stranger to Texas, Sgt. Kemp has been stationed in Bryan and Fort Worth prior to his Webb assignment. Other duty stations include Europe, Japan and Korea.

Moving Ahead...

America's security teams can't afford to stand still . . . it could be a matter of life or death.

Because of their being always awake — always alert — our Armed Forces guarantee the freedom of our future. Of all the members of this dedicated team, the men and women of Webb Air Force Base are the most capable. Stanley Hardware salutes them and their families during this Armed Forces Appreciation observance.

Base Procurement Spends $4 Million

The base procurement office spends approximately $4 million each year for services and supplies to support Webb AFB organizations and attached units.

PROFITABLE

Local procurement of requirements has proven to be profitable to the Air Force. The total dollars spent through local purchases has increased yearly as central procurement has been de-emphasized as too costly to the government. Through local purchase, the government saves warehousing, transportation and inventory costs associated with centralized procurement. The base procurement office is charged with the responsibility of purchasing at a fair and reasonable price with cost, delivery terms and other advantages to the government given consideration.

1st Lt. George H. Podrasky, base procurement officer, heads a staff of 17 personnel.

Two procedures are used by the office to buy supplies and services. They are formal advertising and negotiation. The formal advertising or sealed bid method is the normal means of purchase established by public law and is used as often as practical. This method entails the preparation of invitations for bids, publicizing the invitations, publicly opening bids, and awarding the contract to the low responsive and responsible contractor.

The negotiation method is used when authorized by law. Normally, this method is used for small purchases which do not exceed $2,500 in total dollar amount. Three methods of negotiation are used by the office. The blanket purchase agreement method is preferred — it amounts to a charge account which is established by the office with several local firms. The petty cash method is used if a firm does not have a blanket purchase agreement and the items purchased do not exceed $100. When these two methods cannot be used, a purchase order is issued to the vendor for the supplies or services required.

The obligation of appropriated funds can be made only by individuals designated as Air Force contracting officers within the limits of their authority. Vendors selling to the government have the responsibility of knowing the authority of the government official with whom they are dealing. Vendors must be careful that a person placing an order is either a contracting officer or a buyer employed in his office.

NON-APPROPRIATED

Normally, procurements made by non-appropriated fund activities, i.e., Officers Club, base exchange, etc., do not come under the authority of the base procurement office. However, the base procurement office does handle A&E and construction contracts for non - appropriated fund activities.

The procurement office has initiated a program aimed at doing more business in Big Spring, West Texas, and the State of Texas, in that order. Business firms are encouraged to visit the procurement office to be placed on the bidder's list or to demonstrate new products.

Synthetic Trainers Are Used

One of the most important phases of pilot training at Webb AFB is conducted in the synthetic trainer branch. There are 14 of these trainers—seven T-4's which simulate the T-37 aircraft; and seven T-7's which simulate the T-38 aircraft.

These synthetic trainers are specifically designed for use in basic instrument flight for the aircraft they simulate. They were developed to perform two primary functions: First, they enable the student to become familiar with the location of respective cockpit instruments and controls, and learn the normal and emergency procedures by which the aircraft must be operated. All of the cockpit equipment of the aircraft is reproduced in the trainer, and each instrument and control functions as it does in the aircraft. The second function is to maintain pilot proficiency. Students can use the trainer to practice normal and emergency procedures, some of which would be much too dangerous to practice in the aircraft itself.

The panels in the synthetic trainers and controls are exact duplicates of the instrument panel and controls in the aircraft. An instructor's station is outside the cockpit, where the reactions of the student are recorded, and errors corrected by a competent instructor. When the student has become familiar with the instruments, he attempts more intricate problems, such as power control, leveling off, climbs, changes. Eighteen of the 35 lessons he receives are in the T-37 trainer, and 17 in the T-38.

Busy As Bees In Many Things

Under his assignment as wing comptroller at Webb AFB, Lt. Col. Julian B. Baird's listings of additional duties includes nearly a dozen other things. It's not surprising that this carries over into his community life.

He and his family are busy as bees in many fields, and particularly so in church. He is superintendent of the adult (25-32 years) department at First Baptist Church, is a member of the choir, and the Brotherhood and is advisor to the Baptist Military Union.

ADVISOR

Mrs. Baird is advisor to the intermediate Girls Auxiliary, teaches a Sunday School class of juniors, is a Women's Missionary Union member. With their daughters, they are members of the training union, and the two girls sing in the choir. In stewardship and enlistment efforts, Col. and Mrs. Baird are tireless workers.

Another field in which he is extremely active is the YMCA, which he serves as a director and as a member of its physical education and adult recreation committees. He also is an avid handball player (a champ in local circles.) Col. Baird also is an honorary member of the Rotary Club (he had been a member once before in Auburn, Ala.), is a member of the Tuberculosis Association and is a past vice president. He also is past chairman of the committee for Scout Explorer Post No. 142. Col. Baird is a member of the Howard County United Fund board of trustees.

Continuing in the tradition, Linda, who is a junior, and Nancy, who is in junior high, take part in school activities. Linda is in the National Honor Society, Spanish Club, Science Club and both are in Future Homemakers of America. Both study piano. Wayne, who is now at A&M, is one of the top ranking freshmen there.

BOTH GOLF

Both Col. and Mrs. Baird enjoy golf and play together when possible. She is a member of the Webb AFB Ladies Golf Association. They also belong to the Couples Bowling League. Mrs. Baird loves to play bridge as she has time.

He was reared in Fort Worth, graduated from Pascal High School and took his bachelors in music and education in 1940 from Texas Wesleyan College, where he was also student director of the band for two years. After three months as band director at Goldthwaite, he volunteered as an aviation cadet and was trained at Ryan's school in Lindbergh Field, San Diego, Calif., then at Lamout Calif., and Mather where he got his wings in 1942. Then came an assignment in the B-25 program, and he trained crews at Columbia, S.C.

During 1943-44 he was commander of the 499th Bats Out of Hell squadron on New Guinea, barely missing Lester Morton, First National Bank president, who reported to the unit just as Col. Baird was leaving after having put in 51 combat missions starfing. Back in the States, he was in safety work at Greenville, S.C., then assistant professor of air science and tactics at Auburn for three years and Duke for one.

DEPUTY IN JAPAN

Then he became deputy commander of the 437th troop carrier wing in Japan, and wing inspector for the 315th troop carrier wing. He also got in 10 combat missions over Korea in C-46s. His next assignment was commander of the air reserve flying center at Scott AFB, Ill. training air reserve instructors. He spent 1956-57 studying management at the University of Oklahoma, then put in three years with the 63rd troop carrier wing at Donthan, S. C., qualifying as a C-124 pilot. Then he went to Eieleson AFB, Fairbanks, Alaska, in 1960 as comtroller, before coming here in September, 1962 in the same capacity. He has served as acting base commander.

Mrs. Baird is the former Perle Smith, Wichita Falls, whom he met when she was secretary for the Travis Ave. Baptist Church in Fort Worth. They were married in 1945. The Bairds make their home here at 120 Kelly Circle.

COLONEL A KILLER AT HANDBALL
Lt. Col. J. B. Baird serves to Frank Hardesty

Light Plane Training Set

Beginning in August, Class 67-A will be the first group of Webb AFB students to begin flight training in the T-41A — better known as the Cessna 172.

Students will receive 30 hours of flying in the T-41A at Howard County Airport under the contract provisions made between the Air Force and Central American Airways of Louisville, Ky.

From T-41A training the students will go to primary training in the T-37. In this aircraft the students will receive 90 hours of flying training before going to the supersonic T-38 Talon for basic flight training. They will receive 120 hours of training in the T-38 before winning their silver wings.

T-41A training will be given at all Air Training Command Undergraduate Pilot Training bases. The eight bases in addition to Webb AFB are Craig AFB, Ala.; Laredo AFB, Texas; Laughlin AFB, Texas; Reese AFB, Texas; Moody AFB, Ga.; Vance AFB, Okla.; and Williams AFB, Ariz.

Civilian contractors will train the pilots in this initial phase.

The T-41A has a top speed of 121 knots at sea level with cruising speed with 75 per cent power at 2,500 feet at 110 knots.

Service ceiling is 16,150 feet. Some 630 feet of runway is required to get the plane airborne. Total gross weight is 2,000 pounds.

Wing span is 36 feet, two inches; length is 26 feet, six inches. The T-41A carries a six-cylinder engine rated at 145 horsepower at 2,700 rpm.

The local contract was let to Central American Airways April 14 at a cost of $14.74 per hour per student.

Contract goes into effect June 1 and will terminate June 30, 1966. At that time new bids will be taken for renewal of the present contract or the award of a new one.

An estimated 10,497 hours at a cost of $154,725.78 is called for in the tract.

STATES FAMILY GOING TO CHURCH
From left, Howard Jr., Sgt. Howard C. States, Mrs. States, Vicki and David, entering Berea Baptist Church for services.

States Family Plays Leading Roles At Berea Baptist

A church-going and working family is that of T. Sgt. Howard C. States, in materiel control with the 3560th Field Maintenance Squadron, Webb AFB. The whole family is at Berea Baptist Church for all services, and have leading roles.

Sgt. States teaches an intermediate Sunday School class, and instructs a junior section of Training Union. He is vice chairman of the Kindergarten School board, is an ordained deacon, and an adult leader of the Royal Ambassadors.

His son, Howard, Jr., is a member of the Royal Ambassadors, and daughter Vicki, is a member of the Girls Auxiliary.

Sgt. States, is superintendent of the Sunbeam Department and also teaches the group each Wednesday night. He took 14 boys from Berea Baptist to the state Royal Ambassadors' Congress in Austin recently. The boys came back with six Pioneer Council awards.

Vicki, 11, is a sixth grade student at Marcy Elementary School; Howard Jr., 9, is a fourth grader there, and son David, 5, is still at home.

The sergeant is a native of Huntingdon, Pa., and was graduated from high school there. Mrs. States (Aline) was a schoolmate, and they were married in 1952. Both are members of the Order of Eastern Star, Magnolia Chapter No. 27 of Shreveport, La. He is also a member of the Hap Arnold Lodge No. 457, F.&A.M., in Shreveport. He was stationed in Shreveport at Barksdale AFB for seven years.

Sgt. States enlisted in the Air Force in July, 1948. He served overseas at Shemya AFB, Aleutian Islands for 16 months; then to Schulthorte RAF Station in England for three years, and to Thule in Greenland in 1962-63. He came to Webb Air Force Base in October, 1963.

"If I have any hobbies it is tape recording of good music," he said. "I have also worked with the church league and my son in the softball season and enjoy that. I don't have a whole lot of time for other things outside my assignments at the base, my home and family, and church. Recently I have taken on a committee assignment for starting a library at Berea Baptist Church, and that is taking some time."

The family has found a place in Big Spring to take part in community and church affairs, and the sergeant is being looked upon as a leader in his church.

"There may be a time when I'll have to slow down with some of it, but as long as I can keep my family together and we are happy, I'm sure we will keep working," he continued. "Next year we will have a daughter in junior high school, and soon the youngest son will be in elementary school."

Sgt. States said he had also visited the local Masonic Lodge a few times and had enjoyed the association, and that he would likely continue his association during his tour at Webb.

ACTIVE IN LEGION, VFW
Harold W. Danford, civilian

Activities Blanket Wide Range Of Civic Life

The Harold W. Danford family's community activities reach across a wide range of endeavors, varying from church work to service groups, and the youngsters are getting active in many school programs.

The family moved to the area in 1950, and he accepted a civil service position at Webb AFB in March, 1952. Today, he is a supervisor in the planning section of the maintenance control branch.

But aside form his base work, Danford has had a part in many service organizations. He is a member of the American Legion post and has served on many of its committees since joining up in 1952. He has worked in the Veterans of Foreign Wars organization since 1947, has served as quartermaster of the local post, as well as District 25, which serves 20 counties.

He formerly was a member of the Toastmaster Club at Webb, and has been a councilman in Boy Scout work. He also served with the Little League program at Webb.

He has been in the Odd Fellows Lodge since 1954, and has held several offices. Also, he has been a member of the Woodmen of the World practically all of his life, and has served in several offices. He is a member of the Forsan P-TA.

Mrs. Danford is a teacher of the third grade at Forsan, and is active in P-TA work. She has also found time to participate in the VFW Auxiliary, and has been a Cub Scout den mother.

The family attends the First Methodist Church in Big Spring.

There are five little Danfords, including Christopher Eugene, 12; Michael Edward, 11; Janice Irene, 9; Helen Irene, 8, and Harold James, 2. The four oldest children are members of the YMCA.

Michael and Christopher are students in the Forsan Independent School District junior high school at Elbow, and both are in the band. They also play Little League ball on the Comets team, and are members of the Scout troop at the First Methodist Church.

Pilot Reports News At Base

Most Air Force bases have a weekly newspaper for their personnel. At Webb Air Force Base, the newspaper is "The Prairie Pilot."

There are two types of Air Force newspapers: official and commercial enterprise. Official papers are funded from official or non-appropriated moneys and carry on advertising. Most official papers are paid from non-appropriated funds. Non-appropriated funds are maintained on base and revenue comes from profits from the base exchange and other concessions authorized by the commander.

Commercial enterprise newspapers are supported through the sale of paid advertising. The Prairie Pilot is a commercial enterprise paper and is published by the Big Spring Printing Co.

Each paper is in a class (population of military and civilian employes determine the class). Class One is for fewer than 1,000 combined military and civilian population. Class Two are those bases that have between 1,000 and 5,000 population. Class Three are those bases between 5,000 and 10,000 and Class Four is for bases that have over 10,000.

The Prairie Pilot is a Class Two publication, along with approximately 75 per cent of the Air Force papers.

For the past two years The Prairie Pilot was named the Air Training Command Class Two winner in commercial enterprise division. The Prairie Pilot in 1964 won top Air Force honors as the best Class Two publication. The year before it was a second place finisher in the same contest.

Editors who handled the reins in 1964 were 1st Lt. David M. Hodson, T. Sgt. Mike De Stephanis and Airman 1.C. James T. Caumley.

News for the Prairie Pilot comes from base sources and is supplemented with news from Air Training Command, Air Force News Service and Armed Forces Press Service.

The base newspaper at Webb had its birth around activation of the base in the early 1950s. At that time it was an official publication and it was called The Springboard.

In 1958, the paper went from official (funded by non-appropriated money) to commercial enterprise. It was renamed The Prairie Pilot.

A Family Get-Together

Airman 1.C. and Mrs. Willis Walker bring their family together at the piano. Seated, from left, are Rhonda, 6, and Loreli, 8. Airman Walker holds James, 1½, as Phyllis, 3, looks on. The Walkers have been Big Spring residents since 1962.

Church Meetings Keynote Life Of Walker Family

Church activities are a keynote of the family life of the Willis . Walkers, who have been Big Spring residents since November, 1962.

Airman 1.C. Walker is assigned to the 3560th Field Maintenance Squadron as an engine mechanic. He will complete his 10th year in the Air Force in June.

The family attends College Baptist Church, where he teaches a junior Sunday school class and Mrs. Walker a beginner class.

In addition, Mrs. Walker teaches a Training Union class and works with the Woman's Missionary Union. He will also soon be working with a new Royal Ambassador program at the church and participates in the church softball league.

Getting to Sunday school and church each Sunday would prove a problem for most families that include four children with ages ranging from one and a half years to eight. But the Walkers have found they are able to keep their busy church schedule without major difficulty.

"If a family wants to attend church, they will do so regardless of any problems involved," he pointed out.

The family includes James, 1½ years; Phyllis, 3; Rhonda, 6; and Loreli A., 8.

Loreli is active in Girl Scouts and attends Washington Place School.

Both Mr. and Mrs. Walker are members of the Parent-Teachers Association.

He joined the Air Force in 1955, was assigned first to Lackland AFB, San Antonio, then served for 18 months at Lake Charles, La.

The next assignment was at Ramey AFB in Puerto Rico, where the Walkers stayed for three years.

Puerto Rico proved an interesting and enjoyable assignment except for one big drawback, Walker recalled, that of off-base housing.

"But we could go anywhere and still be at a beach within 15 minutes," he pointed out.

Following the Caribbean duty, the Walkers traveled to Westover AFB in Massachusetts for another three years duty. His assignment through his 10 years of service has been as an engine mechanic.

Both Mr. and Mrs. Walker are natives of Arkansas.

Likes Good Cars, Purr Of Engines

1st Lt. Jack A. Smith Jr., a native of Oklahoma, said he has had grease under his fingernails since he was 11 years old. He likes sports cars, and was active in the local club when it was activated. Lt. Smith said his step-father was a mechanic and the love of engines and good cars has stayed with him from that time. He is with the 3560th Field Maintenance Squadron at Webb Air Force Base.

He and Mrs. Smith, who is an English teacher at Coahoma High School, live at 74-A N. Ent in Webb Village. She is also a native of Oklahoma, and the two were married in Muldrow, Okla.

The lieutenant goes with Mrs. Smith to various activities in connection with schools in Coahoma. Both have been members—and she still is — of the Texas State Teachers Association and other professional groups. She has been active also in helping youngsters in certain Interscholastic League contest training.

In giving a list of his hobbies Lt. Smith says he likes mechanics of automobiles most of all and does all his own work.

"It feels great to get my hands on an engine and then feel that the car comes up with more power and a smoother-running engine when I'm through with it," he said. "I like other sports some, including golf, but there are more of my golf balls in the lake just off the Webb course than I have taken home. I also like fishing some, but don't get around to it as fast as I might like to."

He was born in Okmulgee, Okla., and was graduated from Wynona (Okla.) high school. He was also graduated from Northeastern State College at Talequah, Okla., and then taught in Wynona two years in the English, history and accounting departments, but he said he just didn't belong in the school room.

He entered the Air Force in December, 1962, and was sent to Officer Candidate School.

"When my OCS work was completed, they asked me where I would like to be assigned," he said. "I quickly told them Webb Air Force Base at Big Spring. They didn't understand, necessarily, but I spent one summer in Odessa and liked this area of West Texas. I have been here now two years and 10 days, and we love it."

Lt. and Mrs. Smith attend various churches in Big Spring, although they are not members here.

He wanted to enter the flying service, but was denied that privilege.

"I am two inches taller than the maximum allowed for jet aircraft pilots," he said. "My head will not fit where it should in case of emergency ejection and they fear that tall men will suffer injuries. So I'm just not a pilot."

In his high school years Lt. Smith played basketball, baseball, volleyball and football, and still likes watching sports.

She's Purring Like A Kitten

Lt. Jack A. Smith Jr., listens to the engine of his late model Corvette after giving it a tune-up job. Mrs. Smith smiles as she listens.

The Spotlight Is On

THE BUSY HILLS
Capt. and Mrs. Henry C. Hill, with Cathryn 3, Stephen 5 (standing), and Henry Jr.

Hills Involved In Many Projects

"We use every minute to make time for the things we feel worthwhile," Capt. Henry C. Hill said in summing up his family's busy community life. For the Hills pack a lot of community work in the already activity-filled life of an Air Force career officer.

Capt. Hill has been most active in the Toastmaster organizations, the Junior Chamber of Commerce, and the Aggie Club.

Although he had been active in Toastmasters before coming to Webb in December, 1963, he joined the Flying Tumbleweed Club in January, 1964 and served as the educational vice president from April-October of that year. Capt. A. J. Grill won the district contest during this time. Capt. Hill also served as District 44 Club Achievement chairman.

In March of this year, Capt. Hill joined with others in rescuing the Talon Toastmaster Club, which had become inactive. He was elected president, and the club has grown from three to 15 members.

In April, he was speech representative to the Area 4 meeting in Abilene and placed third. More important, he was elected Area 4 governor, which includes Abilene, San Angelo and Big Spring.

The captain joined the Junior Chamber of Commerce last December, and has become one of its most active members. He was chairman of the registration for the Rattlesnake Roundup; leadership training chairman; emcee for the Miss Diamondback banquet; and was elected a director in March.

Capt. Hill was the first military winner of the Jaycee of the Month award for February. At the Jaycee Area II meeting in Fort Stockton, he won the First Timer Award, for meeting the most Jaycees at the meeting.

Capt. Hill joined the local Aggie Club in December, 1963 and was co-chairman and emcee for the 1965 Muster Day program. He is also a member of the Air Force Association, the Big Spring Concert Association, and the Big Spring Bowling Association.

At the First Methodist Church, where the Hills are members, the captain is president of his Kum-Dubl Sunday School class, and a member of the church finance commission.

Mrs. Hill is a member of the Gray Ladies, serving at the base hospital, and also the Officers Wives Club. Both had parts in the Red Stocking Revue last year, as well as the Christmas variety show staged at the Big Spring State Hospital last December.

The Hill family includes Stephen 5, who attends the First Methodist Church Kindergarten; Cathryn 3, and Henry II, 1.

Mr. and Mrs. Hill are both natives of Cameron, Texas. He is a 1956 graduate of A&M University, and won his wings at Webb AFB in November, 1957. He is an instructor pilot at Webb in the 3561st Student Squadron.

In his 8½ years of military service, he has served in Maine, Japan, Florida, Georgia, as well as at Lackland and Webb in Texas. While at Tyndall AFB in Florida in Weapons Training School, his outfit won the outstanding unit award.

Training Program Depends On Overall Support Here

Despite the fact that the primary mission of Webb AFB is to train jet pilots, the job depends on the over-all support it receives. Among the major agencies providing this support is deputy commander for materiel and its staff of maintenance workers.

To provide adequate maintenance support for 155 aircraft requires immediate access to more than 10,000 separate parts, plus the services of some 25 different specialists. To keep the aircraft moving through the various stages of both operational and repair is a stupendous task.

TAB KEEPING

The "tab-keeping" assignment falls on the workload control center; and the "brain" which exercises this control is a huge panel manned by five controllers. On this panel is the number of every aircraft assigned to the base. The panel is divided into three sections — T-38's, T-37's and specialists. The specialists panel is in the center flanked by the T-38 and the T-37. By consulting this panel the controller can tell at a glance exactly where any given aircraft is and what state of commission and-or repair it is in at any given time.

By reference to the specialist control panel the controller can, also, tell the manpower available for specialist work, how many men are working on an aircraft, approximately the com- of work being performed on aircraft undergoing scheduled periodic maintenance. Specialists are dispatched to the aircraft based on the time elapsed on the clock. If for any reason a work stoppage occurs, the workload center is notified and the working clock for that aircraft is stopped and not started again until work proceeds.

WORKLOAD

Workload control takes over when pilot training group submits their operational requirements for aircraft both weekly and monthly. For example, pilot training reports that the requirements for the month will be 4,000 hours; this figure is broken down into weekly and daily requirements.

Then begins the preplanning; flying time, engine changes, inspections, checks and even routine delays are considered. From the preplanning comes a firm figure on the number of sorties that can be scheduled for each aircraft. When this schedule has been prepared and approved, it is rigidly observed.

The over-all supervision of this agency is the responsibility of Col. George E. Franks; however, the actual operation falls within the province of Lt. Col. L. J. McNeil, chief of maintenance.

Maintenance problems are studied and resolved daily by department heads at maintepletion time of maintenance and when the aircraft will become operationally flyable. Clocks are used to check the progress nance staff meetings. This committee is composed of Maj. Bowden Hampton, maintenance control officer; Maj. H. P. N. Gammel, organizational maintenance officer; Maj. James Hamilton, field maintenance officer; Maj. Garland McClure, quality control officer; and Capt. William Daoust, maintenance standardization officer.

The chief of maintenance function is broken down into six different branches, each of which is responsible for various aspects of the over-all maintenance program.

SCHEDULING

Maintenance control branch is responsible for scheduling the aircraft to fly, all maintenance to be performed, and coordinating with base supply on supply matters.

Maintenance administration branch is the chief of maintenance's administrative section and maintains the historical records on all aircraft assigned to the base.

Maintenance standardization branch runs studies on man hours required for particular jobs as required, and studies on items which show up as causing major problems.

Quality control branch is responsible for checking the quality of maintenance performed and for test flying aircraft after maintenance has been performed.

Field maintenance branch is composed of all the aircraft industrial maintenance shops.

Organizational maintenance branch performs periodic inspections, services the aircraft, and launches and recovers the aircraft on their return.

We congratulate you . . .

Motor Pool Has Good Record

Drivers of Webb Air Force Base motor pool have traveled 900,000 miles since January, 1963, without a reportable accident, according to Base Transportation Officer 1st Lt. William S. Druyun.

This kind of performance aided the traffic management branch in moving from 19th to first place in Air Training Command. 1st Lt. Kathleen R. Morrissey, Webb's chief of transportation, was cited as an outstanding transportation officer in ATC because of "tremendously efficient and economical utilization of transportation resources, and improvement in over-all management.

Two motor pool drivers, William T. Brewer and Henry Stewart, were cited recently for having driven eight and seven years, respectively, without a vehicle accident.

Others cited for safe driving for periods ranging from two to six years include: Ed Lawson, Charles Bussey, Carl C. Clary, Gumecinda Denada, Daniel Flores, Ivory Harper, Ignacio Mendoza, Francisco Moncada, Jimmy R. Montgomery, J. W. Meece and Ernest L. Parish.

Nine See Service

Nine National Guard Divisions saw service in the Pacific and nine went to the ETO. The only U. S. WW II division with a name instead of a number was the "Americal" (for Americans in New Caledonia).

Discuss Masonic Activities

Chief Warrant Officer and Mrs. Henry Brewer talk with Patty, 12, a member of the Order of the Rainbow for Girls, and Robert, 13, who plans to enter the DeMolay program, concerning the family's interest in Masonic work.

Brewers To Make Their Home Here

From the time he helped aim artillery pieces with the old "horse cavalry" at Fort Bliss, Texas, in July, 1940, Henry Brewer has seen a lot of military service from California to Texas to Spangdahlem, Germany.

Today in their brick residence at 2513 Carol in Big Spring, the Brewers recalled their travels and said that they have found their home.

"We're not just passing through, we're here to stay," Chief Warrant Officer Brewer pointed out. "People here have made us feel an intregal part of the community, so much so that we are going to make this our home."

A big part in the Brewers' decision to become permanent Big Springers is their participation in Masonic work here.

Brewer first became interested in the Masonic Lodge while stationed at Goodfellow AFB, San Angelo, and recalled encouragement given him by Judge O. L. Sims, a widely-known San Angelo pioneer.

After entering Masonry at Concho Lodge No. 1260 there, he transferred his membership to Lodge No. 1340 here in 1958, when he was assigned to Webb AFB.

He was a charter member and is a past president of the Webb National Sojourners Chapter No. 469.

Three years ago he received a life membership in the Scottish Rite Consistory, for work with the Consistory in Dallas. He is presently master and has held every office in lodge 1340 here. He is a certified Mason with the Grand Lodge of Texas.

Mrs. Brewer has joined her husband in interest in fraternal work. She was elected associate conductress of the Laura B. Hart Chapter 1019, Order of Eastern Star, here.

A daughter, Patty, 12, a student at Park Hill school, has been active in the Big Spring Assembly No. 60, Order of the Rainbow for Girls.

Both older sons of the family, Richard and Henry Jr., were active in the DeMolay chapter here and Brewer is second past chapter dad. Now in Army service, Richard is assigned to the 250th General Hospital, San Antonio, and Henry Jr., to the 35th Armored Division in Germany.

The family includes another son, Robert, 13, a student at Goliad Junior High, who also plans to enter DeMolay work.

Brewer entered military service as a private, rose through the enlisted grades to reach master sergeant in 1951 and was commissioned a warrant officer in 1952 while at George AFB, Victorville, Calif. He has worked with the T-38 program since its beginning.

When he first entered the Army Air Corps in 1941, he served as a radio operator on a B-10, the first modern low-wing bomber. He can recall training in the last of the old bi-planes, B-12's and B-6's, in 1941. In 1952 he completed instruction on jet engines at the Allison factory.

He is now in charge of periodic and flight line maintenance units for the 3560th Organizational Maintenance Squadron at Webb. Mrs. Brewer is manager of the Webb post exchange.

Plans To Make His Permanent Home In City

T. Sgt. Charles M. Barsamian, who has eight years duty at Webb to his credit, has made an important decision.

Big Spring will be his permanent address from now on.

He recently moved into a new home he has bought on the Gail Route. He proposes, even after he leaves the Air Force, to make this his residence.

His plans, when he leaves his duties as redistributor at the base, are to raise race horses. This is one of his reasons for acquiring acreage in connection with his new home.

Barsamian has the distinction of being the sole Armenian on the Webb lists. His parents were born in Armenia. He is a native of Tewksbury, Mass.

"When I came here eight years ago," he said, "I had to get used to the big change from the country I had known.

"I like what I found. I still like it. I like the people. I want to make this my home."

He has one daughter, Karen, 17, who is in high school here. Two other daughters, Nancy, 18, a student and Mrs. Jean Sletlpack, 19, make their homes in Tewksbury. One of his sons, Gary, 20, is in the U. S. Army at Fort Hood. Dennis, 19, is attending school in Massachusetts.

Barsamian is a member of the Church of the Nazarene.

He is active in the affairs of the American Legion and has served two terms as vice commander of Post No. 355.

He devotes a lot of his spare time to Troop 81 of the Boy Scouts of America, serving as chairman of the troop committee. This is a troop of scouts made up of handicapped boys.

Barsamian is a member of the Big Spring YMCA. He takes part in the Y youth activities, and he is also on the entertainment committee for the VA hospital.

Mrs. Barsamian is in Tewksbury, but her husband feels that when she is established in the new house on the Gail Route, she will be just as fond of West Texas as he is.

He is rapidly approaching retirement in the Air Force and is shaping up his future life with Big Spring as its locale.

"When I get my race horses going," he said, "Naturally I will be away for a lot of time, but I intend to make Big Spring my headquarters."

NEW HOME FOR VETERAN AIRMAN
T. Sgt. Charles Barsamian selects permanent residence

Management Techniques Implemented By Air Force

Since the end of World War II, significant progress has been made in improving methods and techniques of manpower management, in an effort to keep pace with rapid changes in technology affecting other Air Force functions.

The management engineering program, formerly the manpower validation program, was officially implemented in July, 1960, but didn't get started until July, 1961. Management engineering personnel constitute less than one per cent of the total assigned Air Force strength. Since implemntation of the program, over 4,600 manpower spaces have been redistributed to other priority missions in the Air Force.

The program is designed to provide major air commands with a tool for improving the distribution of available manpower resources. The program provides for the development of work center manpower standards by major air commands through use of tested and proven industrial engineering techniques — time study, pre-determined time standards, work sampling, operational audit, and correlation and regression analysis.

The principal effort of the program is now being carried out by management engineering teams, located at Air Force bases, but assigned to a major air command headquarters. A team usually consists of three or four senior airmen and one or two officers, all trained in work methods and standards. At present, the teams concentrate on determining manpower required to perform a given task under existing organizational-functional arrangements. After the initial schedule of standards coverage is attained, these teams will spend more time on the aspects of methods improvement, work simplification, and improved equipment utilization at the operating level.

The Webb AFB management engineering team is a tenant organization, attached to the base for logistical support, under the direct control of Headquarters Air Training Command. The team members are Capt. Gerald L. Warner, team chief; 2nd Lt. Hal B. Rigby, assistant team chief; technicians are M. Sgt. Clifford D. Howell, T. Sgt. Martin J. Falter, S. Sgt. Hugh L. Wilson, S. Sgt. George H. Mixon, S. Sgt. David A. Thwing, S. Sgt. Drew B. Hunter, S. Sgt. Hayden T. Kelly, Airman 1.C. James J. Pingel, and Mrs. W. Geraldine Gates, secretary.

FLIES WITH WEBB AERO CLUB
Airman 2.C. Paul W. Sykas active in flying club

Airman Flies In Webb's Aero Club

Airman 2.C. Paul W. Sykas, 26, and a native of Montpelier, Vt., is in the 3560th Field Maintenance Squadron as an airborne electronics technician.

He finds time to take part in private flying through membership in the Webb Aero Club; for membership in the Elks Lodge; and attending meetings of Big Spring Masonic Lodge No. 1348. He is a member of Aurora Lodge No. 22 in Montpelier.

Airman Sykas says he lacks just a couple of hours in private aircraft, before he takes a check ride for his license. He wants to go ahead with his training to complete his instructor's license training and instrument rating for night flying.

"That Cessna 150, in which I have been training, is a top-notch airplane and I like it. As soon as I have my private license I'm going to train in the Cessna 172, a heavier craft," he said. "I have been held up a little in training, but will get back into it as soon as possible."

Sykas recently became a member-initiate of the local Elks Lodge, and will be initiated soon. He has also attended regular meetings of the Big Spring Masonic lodge, and enjoys the fellowship there.

"All of this gives me a feeling of being a part of Big Spring," he said, "and I enjoy all of it."

The airman is not married and lives on the base.

He attends the Greek Orthodox Church in San Angelo, when he can get down there. There is no Greek Orthodox Church closer.

In addition to his other activities and his job, Sykas has found time to enroll in Howard County Junior College night classes where he has completed courses in freshman composition, U. S. history, personnel management and algebra.

He is a graduate of Montpelier, Vt., high school, and enlisted in the Air Force in October, 1962. He has been at Webb AFB for 19 months. His hobbies are skiing, hunting and fishing. He has been to the ski run in Ruidoso, N. M., a couple of times since coming to Big Spring. His home in Vermont is just 30 miles from the ski run on Mount Mansfield, at Stowe, Vt.

Airman Sykas has the job of maintaining the little "black boxes" used in aircraft at the base. The ComNav (communications navigation) section of the field maintenance squadron requires maintenance of all airborne radio equipment in T-37 and T-38 aircraft.

"It is a challenge to us to keep everything in top condition and operating," he said, "but we have the finest equipment made for servicing electronics gear in all aircraft. Each piece of equipment undergoes inspection and testing after so many hours in service. Then, if the pilot finds some problem in the function of equipment, he writes up the problem. We then take the equipment from the plane to the shop and repair or replace it."

Most At Home Skiing Down Snowy Slope

Although he now makes his home in Big Spring, Lt. Erik H. Vettergren Jr. is most at home coming down a snowy mountain on a pair of skis.

Born and reared in Michigan, Lt. Vettergren has been on skis nearly all his life. When he came to Big Spring a little over two years ago, he found a number of other people interested in skiing.

They organized the Big Spring Ski Club, of which he is the current president. They meet once a month during the winter months ard plan ski trips and discuss facets of skiing.

"We have about 85 members in the club now and only about a third are from the base. It is really a community club," the lieutenant said. He said the purpose of the club was to further the interest in skiing as a sport in the community.

Lt. Vettergren says there are three excellent ski spas in the Big Spring area — Cloudcroft, Ruidoso and Taos, all in New Mexico.

"Cloudcroft is for the beginner, Ruidoso for the beginner and intermediate, and Taos for the advanced skier," he said.

Lt. Vettergren can be classed as an advanced skier easily. A graduate of the Air Force Academy, he participated actively in the skiing program there and was a member of the ski team.

He specialized in the jumping and cross-country events. He has also taken part in downhill and slalom competition.

Presently a pilot - instructor at Webb, Lt. Vettergren will be soon transfered to the 3561st wing - standard - evaluation section.

He and his wife, Nevaline, like all outdoor sports, not only skiing. They both enjoy tennis and Lt. Vettergren enjoys getting out on the golf course when possible.

Mrs. Vettergren is a member of Beta Sigma Phi and secretary of the NABAC. Lt. Vettergren is a member of the Jaycees and Talons Toastmasters Club. They are both members of the First Methodist Church.

Ski Enthusiasts

Lt. Erik Vettergren and his wife, Nevaline, are two of the biggest ski enthusiasts in Big Spring. Two years ago the lieutenant helped organize the Big Spring Ski Club and currently serves as its president.

Study Of Oil Checks Engines

Spectrometric analysis of aircraft oil is beaming a new light on performance of jet and helicopter engines at Webb Air Force Base.

Using a technique developed by Air Force Logistics Command engineers, experts can analyze failure in aircraft engines with high accuracy.

The system began at Webb last Oct. 1, in testing the J-79 engines of the F-104 Starfighters. The Pilot Training Wing began taking samples in mid-February of the T-38 Talons and also provided assistance to the base rescue unit on its samplings.

C.M. Sgt. Biard McQuay of the Propulsion Branch is the base monitor, assisted by S. Sgt. Donald L. Mather, Airman 1.C. Billy Weatherford, and Airman 1.C. Edwin Newman. The 331st FIS monitor is CWO Sidney Wilson.

Reduced to its simplest terms, spectrometric analysis is a technique to identify, both qualitatively and quantitatively, the elements in a given sample of material by analysis of different light frequencies produced by a spectrograph or a spectrometer.

About 17 per cent of the parts of a jet engine are oil lubricated. As engines wear, minute particles of metal wear from the oil lubricated parts and become suspended in the lubricating oil.

When a spectrometric analysis of the engine oil samples shows the presence of excessive wear materials or a rapidly increasing trend in the amount of wear materials, the engine is grounded and removed for repair.

Since mid - February there have been 1,186 samplings on T-38 Talon engines. The 331st has had about 250 since Oct. 1.

Oil samples are taken at set flying-hour intervals and sent to AFLC laboratories. The 331st sends their samplings to Wright-Patterson Air Force Base, Ohio, and the others go to the lab at MacDill AFB, Fla. There are two other testing labs: Searsport, Maine, and Mukilteo, Wash.

Sgt. Mather reported that there were three marginals and one definite engine showing wear since the samplings began. He also stated flight personnel have been shown a film about these samplings and almost 300 concerned individuals have seen the film.

AFLC's nine air materiel areas are equipped with spectrographs, an instrument which gives a manual reading. The Sacramento (Calif.) Air Materiel Area soon will be equipped with an automatic spectrometer and one is programmed for Oklahoma City Air Materiel Area. The command has also established a spectrometric lab at Tachikawa AB, Japan, to serve the Air Forces in the Pacific; and is establishing this function under contract in Europe to serve the Air Forces there.

AFLC officials say the kits to take oil samples are simple to use. Cost of throw-away kit components is nominal, with overall cost coming to about $2 per sample.

AFLC technicians are working with Air Force Systems Command toward developing an "on base" spectrometer, which would give each Air Force base a simplified, inexpensive spectrometer capability.

The device would eliminate time lag between sampling and analysis, a move which might ultimately save lives.

OUR HATS ARE OFF FOR A WEST TEXAS SALUTE

Once each year we pause to pay a special tribute to the men in uniform. We are particularly proud of the men and their families who are stationed with WAFB.

We Invite You To Visit Our Store

WHITE'S

202-204 SCURRY

Your FUTURE

... made more secure by the Men of Webb Air Force Base

America's military units stand perpetually ready, watching . . . knowing what to do in future emergencies. And so we salute them, and especially the servicemen of Webb Air Force Base who play a key role in making our future even more secure.

Time and again, the capable men of Webb have proven their reliability, their unfaltering dependability.

WAFB ranks high in the United States defense team role . . . a place they well deserve. We believe that the men of Webb Air Force Base are the best of all.

THE STATE NATIONAL BANK Of Growing Big Spring

Music Makers

Mrs. Benjamin F. Meacham and her daughter, Marilyn, share a satisfying interest in music as regulars in the chapel choir at Webb AFB. Mrs. Meacham, wife of Chaplain B. F. Meacham, teaches music in three local schools and has assisted with programs at the hospitals and service clubs.

Music Plays Double Part

Music has done much to mold the life of Mrs. Benjamin F. Meacham, wife of Lt. Col. Meacham, chaplain at Webb AFB. It has served as both profession and personal pleasure for many years.

Mrs. Meacham comes in contact with approximately 800 local children while performing her duties as music teacher for three elementary schools. Three days a week, Mrs. Meacham instructs students at Marcy Elementary School, and on the other two days she teaches at Kate Morrison and Lakeview schools.

At various times, she has taken her students to service club meetings where they have presented musical programs. Creative and imaginative, she writes all the skits and operettas she produces.

A member of the choir for the base chapel, Mrs. Meacham sings there regularly, and has previously played the piano and organ for religious services at bases where her husband has served. Last summer she assisted with music once a week in the wards at the Big Spring State Hospital and plans to do so again this year. Last year she was active in the Toastmixers at the hospital.

Mrs. Meacham has been a member of the Tall Talkers Toastmistress Club and served on several committees, however, she is not active with the club at this time. A talented speaker, she has appeared before local church organizations to give book reviews, illustrated talks and lead study programs, and is program chairman for the Big Spring Music Study Club.

Chaplain and Mrs. Meacham live at 12 Albrook with their daughter, Marilyn, 17, a junior at Big Spring High School. Chaplain Meacham is a member of the Big Spring Pastor's Association and the Base-Community Council.

The Meacham's son, Richard, 22, will graduate from North Texas State this year where he is majoring in political science. He plans to enter the Air Force following graduation.

Marilyn is a member of the National Honor Society, French Club, YMCA and the school annual staff. Richard is an Eagle Scout and received his God and County award. Chaplain Meacham and Richard are both avid golfers, hunters and fishermen. Marilyn enjoys tennis and swimming.

At Webb, Mrs. Meacham at one time served as chairman of the emergency committee for family services. She and her husband "adopted" another child 13 years ago through the Christian Children's Fund. The child lives in Hong Kong and writes to the Meachams regularly. Chaplain Meacham was able to visit the child while in that area, and he worked extensively with a home for children while he was stationed on Okinawa.

Mrs. Meacham is helping further music interest locally by serving on the board of the Big Spring Concert Association.

Diversity Of Participation Marks Sergeant's Life Here

If the test of being a good citizen in a community is diversity of interests and active participation in organizations and affairs, then T. Sgt. Gordon L. Griffin Sr. qualifies with flying colors.

Griffin, now 36, is an airman with 17 years service in the Air Force. He and his family live at 248B Langley, and have been residents of Big Spring since 1959.

Attached to the air police, Sgt. Griffin's specific duties are trying to help young airmen who get into difficulty with the law or with the military.

Perhaps Griffin's intense interest in youth has much to do with the widespread activities in which he is engaged. The fact that he is a native Texan—born in Marlin—probably made it a simpler matter for him to fit into Big Spring community life so patly.

A list of organizations and activities in which Griffin has a part is good evidence of his role in the community he now calls home.

The Griffins are members of the First Christian Church. He is a member of the Christopher Sunday School class, and a past president of the class. He is a member and past president of the Christian Men's Fellowship. He also serves as a member of the church education committee.

He is a member of the Marcy P-TA. He is affiliated with the Masonic lodge in Waco—his former station. He is a member of the council and the chapter of the Big Spring Royal Arch Masonic bodies.

He is a committeeman for Pack 46, Cub Scouts, and awards chairman for the same pack. He is a member of the Talon Toasmasters Club and a past president.

Mrs. Griffin (Sammye E.) is a member of the First Christian Church, and of the Christopher Sunday School class, the Marcy P-TA, assistant den mother for Pack 46, Cub Scouts, and member of the Women's International Bowling Congress.

Nor do Griffin family activities program end with the sergeant and Mrs. Griffin.

Gordon L. Griffin Jr., 9, a student at Marcy School, is a member of Cub Scouts Pack 46, Den 5; a regular member of the First Christian Church; a member of the Colts and a Little League ballplayer.

His brother, Robert G. Griffin, 7, is a Marcy student and a member of the First Christian Church.

Officially, Griffin is correction supervisor in the air police division, Headquarter Squadron 3560th Air Base Group. Thirty-three months of his service was in Japan. Prior to being transferred to Big Spring in 1959, he and his family had lived for seven years at Waco.

The Griffins are enthusiastic Big Spring boosters. They like the community and its people. They have found taking an active part in the school, church and community life of the town has been most helpful to them and made their residence here more enjoyable.

'HERE HOW YOU HANDLE A MITT'
T. Sgt. Gordon Griffin enjoys work with kids

Proclamation Set The Date

A presidential proclamation of March 5, 1957, proclaimed the third Saturday in May of each year as Armed Forces Day.

A Department of Defense directive issued in November, 1957, to implement the proclamation, provides the basic authority for Armed Forces Day and reaffirms the policy of the Department of Defense with respect to observances which have significance for the services individually.

Base Has Been Activated Twice

Webb Air Force Base was known as Big Spring Army Air Field in World War II. Its mission was to train bombardiers.

After the war's end the airfield was closed as a military base and the property reverted to the City of Big Spring under a lease agreement. Most of the structures were either sold by the city or removed.

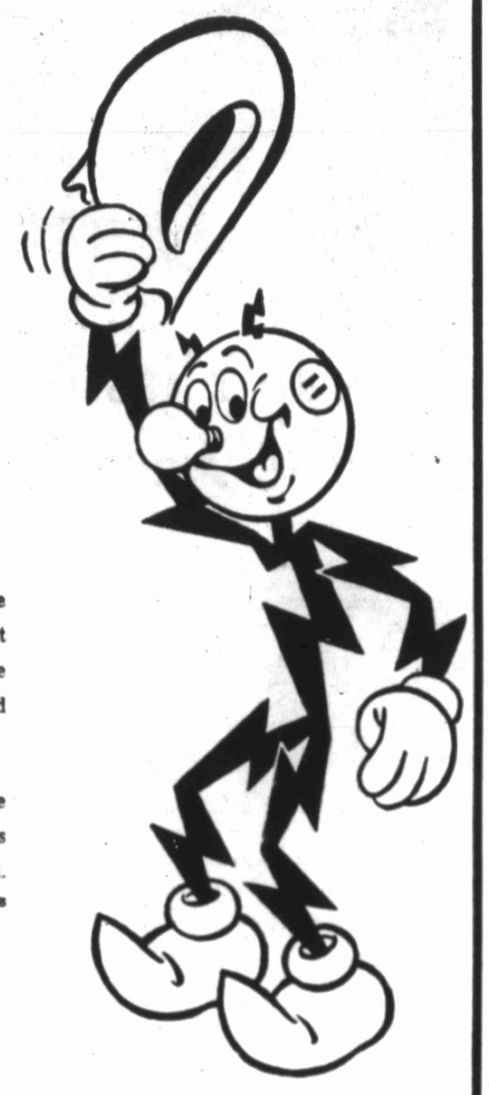

In mid-1951, negotiations were again opened between the city and the Air Force for the leasing of the property in connection with the activation of a training wing for pilots. The lease agreement was signed on Oct. 1, 1951, and the base was officially designated as Big Spring Air Force Base.

The first cadet arrived at Webb on March 28, 1952, from Perrin AFB near Sherman, Tex. The first class—52-D—was graduated on June 20, 1952.

Early in 1952 nominations were invited for a new name for the base. The base was named for 1st Lt. James L. Webb of Big Spring, a former Air Force pilot who was killed over Japan.

Early in 1961 the first class to train in the T-37 was started. In February 1962, Class 63-A was the first class to begin training in the supersonic T-38 Talon.

A West Texas Salute To Webb Air Force Base

Your friends and neighbors at Texas Electric Service Company join in a West Texas salute to the men at Webb Air Force Base. Much of the responsibility for the defense of our nation rests with men trained here and at other installations throughout the country.

Electric power from the lines of Texas Electric Service Company is important to Webb Air Force Base, just as it is to homes, stores, offices and industries in this area.

TEXAS ELECTRIC SERVICE COMPANY

Explains Merit Badges

Joe Maenner, scoutmaster of Troop No. 81, explains some of the merit badges earned by one of his Scouts, Jerry Tibbetts. Interested in them and in working on some of their own are John Tabor, Gary Bevill and Bill Marks. Terry, who is near Star Scout rank, was chosen Handicapped Scout of the Year in 1964.

Emergency Post Became Permanent

To fill in during an emergency, S. Sgt. Joe Maenner took over as scoutmaster of a Boy Scout troop made up of handicapped lads. That was half a dozen years ago, and he's still at the job and crusading for Boy Scouts of America to broaden its program in this field.

Scouting, despite Sgt. Maenner's great activity, is only one of the many things in which he and his family have become involved in as citizens of Big Spring.

LEGION

He is a member of the house committee of the American Legion Post 355 and of its Scout committee, and Mrs. Maenner is in the auxiliary and their two daughters in the Legion Junior Auxiliary.

Both Sgt. and Mrs. Maenner are members of the Boydstun Parent-Teachers Association and she is chairman of its committee for handicapped children in addition to serving as a room mother.

He was a charter member of the Big Spring Coin Club and won first place in the U.S. coin division with his set of buffalo nickles. Naturally, he is a Boy Scout merit badge counselor for coin collecting as he is for stamp collecting and first aid.

Sgt. Maenner also finds time to take part in the Big Spring Little Theatre and recently had a role in the presentation of Stalag 17, an experiment in the semi-round theatre.

He is a member of the Texas Society for Crippled Children and Adults, a member of the parent group for handicapped children, and served on the Governor's Committee for Mental Retardation. During the Easter Seal campaign, he was a co-chairman on the benefit ball.

BIRDWELL LANE

The family attends Birdwell Lane Baptist Church, where the parents once taught a young people's group.

Mrs. Maenner, who is the former Jenny Gilmore of Fort Worth, is an assistant leader in the Brownies. Like her husband, she also likes to get in a little bowling.

At Webb AFB, Sgt. Maenner is on the John H. Lees Service Club council and is captain of its ping pong team. It's no surprise that he lists ping pong as one of his hobbies.

A native of Baltimore, Md., he entered service in February of 1952, drew a hitch in Korea and came to Webb first in 1953. He assisted Jim Smith with troop No. 1 here then, but when he was rotated back from Sossesterberg, Holland, he had committed himself to helping Richard Clark with a newly organized troop at the Elbow community. However, William T. McRee, scout executive, appealed to him to take over the troop (No. 81) of handicapped boys until a regular scoutmaster could be found. A year went by, and then Sgt. Maenner was so wrapped up in these boys that he couldn't see giving up the troop at all.

These boys have various handicaps — some are palsy victims, some crippled, but many of them are mentally retarded. But with patience and love, these boys have the ability to rise within their limitations, and Sgt. Maenner wants the Scouting program to be broadened to permit these boys to achieve within these limitations. However, they ask no particular quarter, for in a "man hunt" at the Davis Mountain Scout Ranch, his boys won first place with no holds barred.

WON PLAQUE

Recently, one of his lads won a district plaque for Handicapped Scout of the year, and Sgt. Maenner is dedicated to seeing the award continued, even broadened.

The Maenners live at 612 Caylor and have three children, Virginia, 8, Shirley, 6, and Joseph 5. When he completes his career in the Air Force, they plan to come right to Big Spring and retire among their friends and where they have so much invested in service.

Many Facilities For Recreation

Come on out—for a picnic, to the golf course, to a movie, to a set of tennis, or just to be lazy under the sun and blue sky. Webb AFB is proud of the many facilities for recreation which are available to its personnel. All facilities come under the supervision of 1st Lt. Mike Walling, personnel services officer, and Phil Hines, recreation director.

There's a nine-hole golf course and driving range, and the picturesque lake-side picnic area and pavilion for squadron and private parties. Also available are four tennis courts and two swimming pools, two ball fields and a little league diamond, a six-lane bowling alley, and a new base gymnasium scheduled for completion July 15.

Personnel services supply offers sports equipment on a loan or rental basis to military personnel and their dependents. There are 13 fishing boats, a ski boat, trailers, anchors, motors, water skis, and fishing tackle, for both fresh water and salt water fishing. For the camper, there are electric lanterns, sleeping bags, water coolers, axes, and hatchets. Individuals may check out tennis and archery equipment, bowling, softball, and baseball gear, horseshoes and badminton sets, and small games from dominoes to dart boards. Personnel services supply also supplies equipment for base and squadron teams, such as softball, track, football, basketball, and volleyball, and, an active athletic program is maintained both on an intramural and inter-base level.

Recreational and social activities are programmed for the members of the officers' and non-commissioned officers open messes, and the John H. Lees Service Club offers a diversified program in an attractive, homelike atmostphere for Webb airmen, their families and friends. The service club program includes dances, talent shows, tournaments, seasonal parties and provides equipment for self-directed activities, such as pool, table tennis, musical instruments, magazines and writing materials, cards and small games. There is color television, a stereo room, game room, kitchen, ballroom, and lounge; and, classes are scheduled in such diversified fields as art, photography, and model plane building. The imaginative and varied program is planned and carried out by the service club staff on a seven day week schedule.

For the hobbyist who is more specialized there is a wood hobby shop and an auto hobby shop. A well equipped ceramic shop is also provided.

The base library, geared toward serving the needs of the pilot training program, contains 12,000 volumes, and has a professional reading room, childrens' corner, magazines section, and language record library.

Every kind of sport and hobby has its experts and its beginners, and lots of just average folks in between. To all of them—the novice, the "Sunday painter," the duffer, and the ace—personnel services offers the chance to make better use of their leisure time.

Many Came To City To Stay

Many Big Spring residents today were introduced to Big Spring through service either at the old bombardier school or Webb AFB.

Some moved back and established homes because this was the hometown of their brides. Many had found the people friendly and the community and area progressive. Not a few found good business opportunities.

Not all of those stationed here in the bombardier school days forgot Big Spring (some wrote they would never forget it, in fact would go a 1,000 miles to avoid it!) and for several years the B-Z (Big Spring) WAC detachment held reunions to celebrate their war service days at Big Spring.

Congratulations

One Of Busiest Offices Is Primary 'Gateway'

One of the busiest offices at Webb Air Force Base is the Administrative Services Division. It is the "doorway" into both the wing commander and base commander's office.

The division staff is part of Air Base Group. Maj. Cletus T. Pajot is the chief of administrative services division, and C. M. Sgt. Leonard R. Ermel is base sergeant major. The division is comprised of two branches: The mail and records branch, supervised by M. Sgt. Carl A. Carlsson and is comprised of 11 persons; and the publications branch, supervised by T. Sgt. Roy C. Culbertson and is comprised of 10 persons.

The administrative services division is responsible for accomplishing a multitude of jobs which consist of establishing communications processing procedures, records management, mobile distribution service, message processing center and mail processing center, provides postal service for all base organizations to include directory service, consolidated mail rooms, periodic postal inspections, administrative control of classified documents; administrative orders, forms management, publications management, printing and duplicating, distribution of publications and forms, master publications reference library. Air Force Effective Writing Program; Special Subject Letters for inspection pertaining to administrative services functions.

The administrative services division is further responsible for providing base organizations with base locator service. Organizations may obtain duty phone, home phone and address by calling extension 725 during duty hours or extension 802 after normal duty hours.

Members Swell

From four federally - recognized individuals enrolled in the National Guard in June, 1946, the membership swelled to 369,489, (including 44,728 in the Air National Guard) at the time of the outbreak of hostilities in Korea, four years later.

READY!
WAFB . . .
PREPARING MEN

Armed Forces Day Is Unique . . .

Yes, Armed Forces Day is one of the most unique observances in the world. On this day we acknowledge the closeness of cooperation between the citizen and the serviceman, the civilian and military.

Webb Air Force Base's outstanding achievements in the training arm of our Air Force is an asset to them and to our community. The good citizenship of the members of the Webb team affirm the confidence that we have in them.

We of CABOT CORP. extend our congratulations to the men and women of Webb Air Force on this 13th Anniversary.

We appreciate your contribution to our national defense and to the community life of Big Spring.

THE MEN OF CABOT CORP.
SALUTE THE MEN OF WAFB

Getting Field Ready For Play

Elmer C. Bolte, left, assisted by Airman Kenneth Boyd, arrange for lights at teenage baseball park. Bolte, painter at auto pool at Webb AFB, is also chairman of rules committee for teenage baseball.

Trained Here In Bombardier School

Elmer C. Bolte, a painter in the Webb AFB motor pool, was one of the first trainees in Big Spring during the days of Big Spring Bombardier School. He was here from 1942-44 and was married to the former Bobbie Mae Halbrook in Big Spring.

Bolte is a native of Joliet, Ill., and was a graduate of high school there. After completing his training at the bombardier school here, he went overseas and served with a P-51 Mustang special services section in Italy for 18 months. In 1945, when he got out of service, he went to work with his brother for a couple of years. He then went into the automotive business for two more years, and after that went with General Motors for two years in the diesel division.

He returned to Big Spring later, and in 1955 took his present job under civil service. He has lived here since that time.

Bolte has been active with teenage baseball and is manager now of the Orioles, and is rules chairman for the league. His son, Mike, 14, is a member of the team. He spends a lot of his spare time working with the youngsters in the baseball field.

He is also a member, with his family, of Immaculate Heart of Mary Catholic Church; is chairman of the entertainment committee at the church, is on the ways and means committee, and chairman of publicity.

Mrs. Bolte is a member of the Altar Society. He is also a member of the Knights of Columbus and is publicity chairman for their activities.

In other community activity he is president of the American Federation of Government Employes.

Roxanne Bolte, 18, a member of the National Honor Society, will be graduated from Big Spring High School in May. She is also secretary-treasurer of the local chapter of the National Honor Society.

Michael Bolte, 14, is an eighth grader in Runnels Junior High School. The son is also interested in athletics, especially baseball.

Bolte says his main interest, outside his family, is in the teenage baseball activities. He said he and others worked together, during the winter and off months, to get the park in shape for playing season, and that all was volunteer work.

"I feel like I am a native of Big Spring, and I enjoy working with all the groups with whom I am associated," Bolte said. "I also know a lot of boys who were trained at this base, who left and have returned to Big Spring after release from service. It all speaks well for the community when that happens."

At the base he has served on the incentive awards committee, to recommend outstanding awards for performance and ideas put to practical use on the base.

Furnishes Base Services

The Air Base Group at Webb Air Force Base and its personnel are responsible for furnishing services and supporting the operation of the base.

Col. Elmer L. Masters is commander, and Lt. Col. Robert H. Tyldesley is executive officer. The group consists of one squadron and 10 support divisions. There are 43 officers, 454 airmen and 330 civilians assigned to these divisions.

The services provided by the group and the officers or NCOs in charge of them are: comptroller (includes budget, accounting and finance, data processing) Lt. Col. Julian B. Baird; Administrative Services, Maj. Cletus J. Pajot; procurement and contracting, 1st Lt. George Podrasky; security and law enforcement, Capt. Ronald F. Kibler; civil engineering, Maj. Charles H. Penn; transportation (includes freight shipment and motor vehicle maintenance and operations), 1st Lt. William S. Druyon; personnel, Maj. Joseph P. Sokolewicz; manpower and organization, T. Sgt. John Benefield; base chaplain, Lt. Col. Benjamin F. Meacham; Supply Services, Maj. Robert L. Rader; and Staff Judge Advocate, Maj. Joel K. Carter.

The Headquarters Squadron is commanded by 1st Lt. Hollis I. Marshall, with M. Sgt. Cecil T. Mallory as first sergeant.

Archery Is A Family Pastime

Homer Conner, (at rear) shows son, Michael, 10, how to draw the long bow. Teresa, 15, looks admiringly on.

Absorbed In Many Interests

Homer Conner, an estimator at Webb AFB, is a former resident of Oregon who came to Big Spring nearly a decade ago, found he liked it, and is still here. Until 3½ years ago, he was a builder and contractor. Then he signed up with Civil Service and his full time is devoted to keeping the buildings and facilities in shape at the base.

Schools are vitally important in the lives of the Conner family these days. Their home at 1605 Oriole hears much school talk each day. Sandra, 18, the oldest of the Connor children still at home, is a Big Spring High School senior. Teresa, 15, is in Goliad Junior High, and Michael 10, is in Airport Elementary. The oldest son, Robert, 26, is in the Navy, stationed at San Francisco.

Sandra graduates this spring and is already making plans to enroll in Howard County Junior College next year.

"We are absorbed with the activities of two bands, the Boy Scouts and the Little League," said Conner. "Our interest is also focussing on the Big Spring Little Theater. Sandra had a part in a recen play and we became interested in the work."

The Conners are all active members of the Methodist Church. Two of the family have memberships in the MYF of the church.

Conner, in addition to his part in the numerous enterprises in which his family takes part, is active in the Masonic bodies. He is a member of the Shrine and of the Eastern Star.

His relaxation, when he has the time, is bowling. He bowls in the Industrial Bowling League.

Nine years ago, when the Conners first came to Big Spring, all of their youngsters, with the exception of Michael who was a baby, were ready for school. So the history of the family has been closely intertwined with the schools.

"We found Big Spring the kind of town we liked," Conner said. "We liked the schools, and we liked the people. Our youngsters made friends and found life here good. It was a change, of course, from Oregon, but we have never regretted our move."

The myriad activities the Conners pursue outside of his work at the base tend to make life in the community even more interesting than might otherwise be the case.

Like many other men and women attached to Webb AFB, the Conners are Big Springers. What happens in the town and to the town is of vital concern to them.

They like the spirit of cooperative effort they find here and enjoy their roles as active citizens of their home town.

Congratulations to Men of Webb on your 13th Anniversary in Big Spring

Our Armed Forces insure us day after day the endless task of vigilance and the feeling of peace and security.

Big Spring Daily Herald

SECTION D

BIG SPRING, TEXAS, FRIDAY, MAY 7, 1965

YOUTH: Sharing skills with youngsters

SCOUTS: Working with boys who respond

HOBBY: Tuning racing engine an art

Webb People In Local Role

At least one of every three military persons at Webb AFB takes an active part in some phase of off-base community life, according to a Herald survey answered by two-thirds of those assigned here.

Practically every community activity has military representatives, ranging from scouting to church work, civic clubs to sporting events.

The city's churches draw one of four to worship services, and many of these take leadership roles. For instance, the base supplies 45 Sunday School teachers, 11 in choirs, six Sunday School superintendents, 10 deacons, and 10 in other supervisory posts.

Youth work lures another large segment of the military population, including 17 scoutmasters, five den mothers, eight cubmasters, 29 in YMCA roles, 34 in other scouting posts, 16 in girl scouting, five work with brownies, 16 in little league and one in 4-H Club work.

Their youngsters are involved in many of these organizations, to the tune of 11 in school bands, 47 in girls scouts, 74 in boy scouts, 43 in cub scouting, 16 in brownies, 25 at the YMCA, 46 in Little League, and one each in 4-H Club and Future Homemakers of America.

The youngsters also swell the local school enrollment, by 553, which is about one for every 13 in public school. Another 117 are in private schools, and 48 attend Howard County Junior College. Parents do their part in the school systems by turning out 128 strong for P-TA meetings.

In civic work, the military contingent supports many organizations with membership, including 40 in civic clubs, 38 in service groups such as the American Legion, VFW, 100 are members of various lodges, and 34 hold memberships in business groups, such as the chamber of commerce.

The cultural side of life gets support from Webb as well, with 30 members in the concert association, and another 46 in art clubs, music clubs and little theatre work. Sports has a loyal following, including 38 in golfing organizations, 32 in bowling, and others in flying, archery, softball, and others.

The women make contributions through such organizations as the Gray Ladies and hospital volunteers, where 44 can be counted. Study clubs and garden clubs have 13 from Webb, and bridge clubs and other similar groups count 25.

Many choose to live in the community, rather than on base, and at least 224 own their own homes — representing about one out of 10. Another 31 rent their homes.

FAMILY: Involved in Cubs, Girl Scouts, Brownies

About The Figures--

The figures in stories about participation of the military and civil service personnel at Webb AFB in Big Spring community affairs are by no means to be construed as complete. For one thing, response to the questionnaire on which material is based was less than two-thirds of those surveyed. Thus, all figures could be raised at least one third. Actually, this would be conservative for a natural antipathy to questionnaires cuts down on complete answers. For instance, there are three to four times as many Webb men in Howard County Junior College as the survey would indicate. And so it would go with many other areas of activity.

Closeness Is Not Matter Of Chance

The interrelationships of Webb AFB and Big Spring, held by some to be exemplary, are not the result of chance. Leaders in the community and base have worked hard to obliterate even any imaginary lines between the two so there will be a co-mingling of people in civic enterprises.

There may be several reasons for what seems to be a reasonably good measure of success in drawing Webb families in the stream of community activities.

Foremost is a Big Spring philosophy that a good portion of the people in the military are there because it is an honorable career. Thus, the airman, the sergeant, the colonel all are engaged in an occupation just as the oilman, the railroad man, the farmer, the refinery worker, the salesman, or the professional worker. Whether for a brief period or several years, so long as they are here, this is their home town.

Another reason is that Big Spring had experience with a military base during World War II when the Big Spring Bombardier School was operated here. Certainly business people appreciated the economic importance of a defense facility, but there was compelling reason in that lasting friendships and even marriages had issued from that experience. Stimulated by the exposure to personalities and intellects from all over the country—indeed the world—Big Spring really wanted the base.

This has been a source of enrichment for the cultural, civic, religious and recreational life of the community. Again deep friendships have been formed, and multiplied scores of the city's daughters have been married to men in service, or to put it the other way around, scores and scores of families have added a new member from the military.

Finally, one of the continuing reasons for close relationship between Webb and Big Spring is the Base-Community Council, a division of the Chamber of Commerce. This group is just what the name implies, an action organization comprised of representatives from the base and the civilian community who makes its business the task of promoting still closer ties, to keep open the channels of information, and to spot and give attention to any potential points of friction.

There is always room for improvement, as one reply to a questionnaire about community participation indicates: "Being in service, I have no need or time to have a social life in Big Spring, Texas. In 514 days I'll return to New York with my wife and begin to live like we were human."

But at the other extreme is a large number of former Webb people who now reside in Big Spring after leaving the military or civil service at the base. Add to this a number of others who have expressed intentions to settle here when they retire. But best of all, add up the great numbers who pitch in to community activities just like it was their home town—which it is.

Base Civilians Busy Citizens

The civilian segment of the Webb AFB family also takes an active part in the community, according to a survey answered by about three-fourths of the 755 assigned.

Over half of the civilians are active in their churches, and hold a host of leadership positions. There are 37 Sunday School teachers, nine Sunday School superintendents, 15 deacons, nine in choirs, and 19 hold other supervisory posts.

These families have 410 youngsters in public schools, and another 34 in private schools, in addition to 28 in Howard County Junior College. Helping in school programs are 127 participating in P-TA work.

About half of these civilians own their own homes here — 310.

Civic clubs count 15 members from this group, and one is on his club's board and a vice president. Service organizations, such as the Legion and VFW, have 54 members and lodges are supported by 112.

Business organizations, such as the chamber of commerce, have 29 supporters, and sports activities draw 25 in the golfing areas, and 22 in bowling.

The distaff side of these families turn out 26 strong for study clubs and garden clubs; 16 volunteers for Gray Lady and other hospital work; and 17 are participants in bridge clubs, and allied activities.

The civilians take many leadership roles in youth work. There are six Little League coaches, three den mothers, two scoutmasters, three cubmasters and 10 scout committeemen. In addition, there are nine adults working in girl scouting, 17 in boy scouting, 14 in YMCA, one in brownies, three in baseball posts, one in Rainbow, and two in other similar positions.

The youngsters, of course, turn out strong for organizations planned for them. There are 60 in boy scouting, 24 in school bands, 33 in the YMCA programs, seven in brownies, 24 in girl scouting, seven in Rainbow Girls, 21 in cub scouting, 40 in Little Leagues, six in Future Homemakers of America, two in Future Farmers of America, three in teenage baseball, and three in other youth programs.

On the lighter side of life, the civilians are 17 strong in the concert association, and 17 are involved in art clubs, music clubs, or little theatre work.

While some of the civilian employes at Webb naturally are local people who simply went to work at the base, and therefore have a built-in participation factor, the fact remains that the majority of employes have civil service specialties and have come here from other places. Yet, they have shared equally in community affairs.

LITTLE LEAGUE: Making big leaguers in miniature

YMCA: One phase of a triangular emphasis

Engineering Division Has Big Impact On Economy

Operation of the civil engineering division at Webb Air Force Base has more than a $3 million-a-year impact on the economy of Big Spring, according to Maj. Charles H. Penn, base civil engineer. The figure represents a tripling of cost and accomplishment since Maj. Penn's assignment to Webb in early 1963.

"In 1964," he said, "Approximately $1.1 million was spent for real estate improvements. $1.6 million went for civilian and military labor, and about $500,000 was expended for supplies and utilities." Breaking it up differently, it looks this way: civilian labor cost $1.2 million; military labor $.4 million; materials $.3 million; contract projects $1 million; and other $.3 million. This totals, for the calendar year of 1964, $3.2 million.

BUYING

"What we are buying," said Maj. Penn, "is the best and most in flying safety, morale and welfare for Webb that each and every dollar can buy."

To civil engineering flying safety means runways, runways and runways, smooth, free from foreign object damage or any other kind, aircraft maintenance facilities and aircraft pavements. Morale means dormitories, officer quarters, family housing, curbs, walks and base appearance. Welfare means warmth in winter, coolness in summer, renovations and fixtures, latrines and showers (that work). All of which adds up to well being (safety), and a feeling of well being (comfort).

Civil engineering division today touches every phase of activity at Webb. The scope is so wide that the division corrects difficulties from fixing leaky faucets to major runway repairs—from manicuring lawns to maintaining 26 miles of paved roads.

Maintenance is the tall broad word in the division. Civil engineering maintains 719 buildings and facilities, 15 miles of gas mains, 50 miles of water distribution lines, 18 miles of sewage lines, 36 miles of overhead electric lines and 2½ miles of underground cables.

RUNWAYS

Runway lighting systems and allied navigational aids are maintained, as well as 80 miles of underground storm sewer and drainage systems, 17,000 feet of railroad track, three central plants and a fuel storage facility with a 1,851,738-gallon capacity.

Maintained are 164 acres of improved grounds, 1,600 acres of semi-improved grounds and 548 acres of unimproved grounds, in yards of taxiways and runways at Webb AFB and its auxiliary field at Colorado City, which is utilized for student pilot training.

Additionally, the division is charged with the maintenance of a 1,200,000 gallon water reservoir, ball diamonds, base exchanges, swimming pools, the golf course and the bowling alley.

For fire protection, the division is responsible for installing and maintaining all fire protection sprinkler systems in warehouses, shops and hangars. It is ready to fight fires at Webb AFB, at auxiliary fields or in Big Spring and environs. Under a mutual aid agreement, the fire department of the division or the city fire department will assist each other when needed.

POLICY

Division policy, from Maj. Penn down, is the tried and true "stitch in time . . ." Preventative maintenance is carried on by rigid and regular inspections of every base facility. Defects are noted and appropriate repairs are accomplished. New work is done by a work order, either through base forces or outside contractors.

Yearly spending in Big Spring and vicinity is something like $278,000 for maintenance materials. Local utility firms receive an average of $164,000 annually for electricity, $66,600 for gas, and $71,000 for water and sewage disposal. C. E. Division is responsible for budgeting the money to be spent for these utilities.

During the fiscal year of 1965 some 52 projects have been contracted to local construction firms — the total amount involved exceeded $1,408,000.

MAJOR JOBS

Major jobs include: the construction of 600 feet of runway extension at Colorado City auxiliary field; the construction of a new gymnasium and the new base exchange cafeteria, the rebuilding of an instrument runway, the repair of the interior and exterior of 14 airmen dormitories and eight officer quarters, and the improvement of hospital facilities.

About two-thirds of the 300 people employed in civil engineering are civilians. Four branches operate under Maj. Penn. They are: engineering and construction; industrial engineering and analysis; control center; and fire protection.

Engineering and construction branch develops maintenance and construction programs for real property facilities. It accomplishes design, specifications and plans for projects to be done by contract. It provides technical guidance to in-house (on-base) labor forces.

Industrial engineering and analysis branch has administrative duties and compiles cost data used to develop operation and maintenance programs. It maintains real property accountable records and studies methods and analyzes systems and procedures so as to recommend management improvement.

CONTROL CENTERS

Control center plans, estimates, schedules and accomplishes work with in-house forces, including preventive maintenance, utilities, pavements and grounds, refrigerators, electrical, paint, carpenter, sheet metal and plumbing shops.

Fire protection branch performs fire inspections and develops fire prevention programs and practices. It provides fire protection and suppression capabilities for Webb, the auxiliary field, and for Big Spring. The branch has also aircraft crash rescue.

Maj. Penn, in the civil engineering military career field since 1951, has 18 years of service. A B-17 pilot during World War II, he was shot down over Germany and spent 21 months as a prisoner of war. A civilian after World War II, he was recalled and served in Korea. His decorations include: Air Force Commendation Medal; World War II Victory Medal; Europe-African-Middle-East Campaign Medal; Korean Service Medal; National Defense Service Medal; United Nations Service Medal; Air Force Reserve Medal, with hourglass; Air Force Longevity Medal, with three bronze clusters, and the Good Conduct Medal. He is a graduate of the University of Maryland and the Air Force School of Advanced Engineering at Wright - Patterson AFB.

J-85 Gets Attention

Two maintenance airmen are shown working on the J-85, which is the powerhouse for the T-38 supersonic trainer in use at Webb Air Force Base. It takes two J-85's to do the job.

Safe Driving

Citations are presented to two motor pool drivers of Webb, William T. Brewer and Henry Stewart, for driving eight and seven years respectively, without a vehicle accident, by 1st Lt. William S. Druyun, base transportation officer.

New Lab Provides Base With Accurate Instruments

To provide a single, intricated calibration system for the Air Force is simply stated, but it is the mission of the Precisions Measurement Equipment Laboratory at Webb.

The new Webb Precision Measurement Equipment Laboratory (PMEL) officially opened in April with ribbon cutting ceremonies by Col. A. F. Taute, wing commander, along with an open house. On hand at the opening was Col. G. E. Franks, deputy commander for materiel; Lt. Col. L. J. McNeil, chief of maintenance; and Maj. B. Hamilton, and others.

PMEL first came to Webb approximately five years ago, and at that time was a small facility. The new unit cost $22,000 to build and has almost $100,000 in equipment on hand.

PMEL is one of the most unusual sections on base, because of its appearance and also the type of work done. The working areas are classified as being "clean"; all personnel entering must wear white robes, the area is as dust free as possible; and the temperature is maintained at plus or minus six degrees from 73.

At the present time, six personnel are assigned, including M. Sgt. Earl J. Jones, supervisor; T. Sgt. Ted B. Shirley, S. Sgt. Harold G. Graham, S. Sgt. Glenn F. Sanborn, Airman 1.C. Herman A. Peaslee, and Willis E. Taylor.

PMEL is charged with all calibration of equipment and measuring that requires preciseness, doing their part for the "100 per cent Predicted Probability Concept."

This unit is a certified laboratory meeting all the requirements of the Quality Control Standards Calibration Lab at San Antonio.

Tube testers, volt meters, ammeters, signal generators, weapons systems, and the list of equipment goes on and on. As a matter of fact, some 255 different types of equipment are maintained.

Modern jet aircraft require close tolerances on equipment utilized on board and also equipment used in repair. For that reason, the majority of PMEL's trainers and also from the 331st Fighter Interceptor Squadron assigned here.

Before this lab was certified, which hasn't been too long, approximately 40 pieces of gear had to be shipped to Kelly for calibration each month. Also, a man had to travel along with the equipment. Construction of the new lab and also certification has eliminated these trips completely at an undetermined savings to the Air Force.

To insure that other sections' equipment is calibrated exactly, PMEL's gear must be also. For this reason, and for the exactness required in this area. PMEL's is shipped periodically to another laboratory nearby for calibration.

The Precision Measurement Equipment Laboratory has a very large job dealing with minute measurements.

Fuel Supply Section Has A Staggering Job

The base fuel supply branch at Webb has the staggering job of providing fuel and oil for all aircraft landing at the base. This branch of 92 employes under the direction of Capt. James L. Hudson Jr., assisted by S.M Sgt. Joseph Miller, has supplied fuel to aircraft of every major air command in the Air Force as well as Army, Navy, and Marine aircraft.

In meeting the needs of thirsty jet aircraft during 1964, the fuel supply branch at Webb dispensed over 28 million gallons of fuel. If placed in a line nose to tail, this volume of fuel would fill enough T-37 aircraft, the primary trainer at Webb, to extend from Big Spring to Texarkana.

FROM COSDEN

All of the bulk aviation fuels received and issued at Webb come from West Texas contractors with the Cosden refinery in Big Spring as a major supplier. The accounting for all fuels from the time of receipt until issued is accomplished under the direction of Mrs. Lois A. Hill.

The fuel storage section, under the supervision of Rawleigh J. McCullough, is responsible for storing all aviation fuels which are received by pipeline, tank trucks, and tank cars at an average rate of 500,000 gallons per week. From the storage facility, the fuel is transferred to refueling trucks which in turn deliver the fuel to aircraft. This part of the fuel handling operation is the responsibility of the distribution section under the guidance of T. Sgt. Felix N. Thomas.

450 PER DAY

During 1964, this section made over 85,000 individual deliveries of fuel with as many as 450 servicings in one day. While the gallons issued and the number of deliveries give some indication of quantity of fuel handled at Webb, maintaining and assuring the quality of this fuel is of paramount importance, but not as easily measured. In burning 500 to 800 gallons of fuel per hour, it is extremely important that jet aircraft receive the cleanest fuel possible, for solid particles as small as one-twentieth the diameter of a human hair can be harmful to the sensitive fuel controls in jet engines. This task of quality assurance is the responsibility of the quality control section headed by S. Sgt. Robert L. Brown.

Copters Give Rescue Service

Detachment 18, Western Air Rescue Center, provides rescue coverage for the Webb AFB area. Detachment 18's primary mission is to suppress fire and to rescue personnel involved in aircraft accidents. It provides search and rescue coverage as needed to support the National Search and Rescue Plan, including response to local disasters and civilian emergencies. Detachment 18 helicopters stand by during all precautionary landings of Webb Aircraft as an added safety measure.

3 COPTERS

The detachment is equipped with three HH-43B helicopters. Specifically designed for the local base rescue mission, the HH-43B has a unique intermeshing rotor system which is highly effective in blowing smoke, heat, and flames away from the cockpit area of downed aircraft, thus assisting fire-fighters and speeding rescue operations. The HH-43B is also equipped with a hoist for picking up personnel in rough terrain where landing is impossible.

Special rescue baskets can be attached to the hoist cable for water pickups and for picking up badly injured victims who must be immobilized. A full compliment of crash entry tools, flares, first aid equipment, survival gear, litters and blankets are carried in the rear of each helicopter for use by the fire-fighter - rescue specialists assigned to the detachment. Additionally a 100-pound fire suppression kit is carried beneath the helicopter. The firekit can lay out approximately 700 gallons of foam, more than enough for any likely aircraft rescue operation.

READY TO HELP

An HH-43B with a full crew stands by at all times when student pilot training is in progress. In case of emergency, the helicopter is airborne and the fire suppression kit is attached within 90 seconds of notification by the Webb AFB tower.

Detachment 18 has four helicopter pilots assigned: Capt. John H. Larson, detachment commander; Capt. William F. Glover Jr., Capt. Norbert T. Williams Jr., and 1st Lt. John F. Guilmartin Jr. Detachment 18 maintenance superintendent is M. Sgt. Elmer H. Pittman, with S. Sgt. Floyd E. McCraw Jr. serving as crew chief flight examiner. S. Sgt. Curtis F. Yancy, Airman 3.C. James H. Hood, and Airman 3.C. Alvino Espinoza are qualified crew chiefs on flying status. Airman 1.C. James F. Terry Jr. is the engine specialist and the maintenance section is rounded out by Airman 3.C. Ronald F. Malone and Airman 3.C. Harold W. Brown. Airman 1.C. Tommie R. Sneed serves as administrative clerk and Airman 1.C. Jerold W. Blanscet, Airman 1.C. Gene W. Wintamute, Airman 1.C. Russell H. Robinson, Airman 1.C. Wayne M. Haskins, Airman 2.C. Herbert A. Hays, Airman 2.C. Ross D. Baker, and S. Sgt. Curtis Mills serve as firefighters. Airman Baker, Blanscet, and Hays have received the Air Rescue Service certificate of appreciation for their work.

Webb's Chopper At Rest

The HH 43B Air Rescue Helicopter (Huskie), is shown in photo. This is the workhorse of Detachment 18, which has been located at Webb since October of 1961. Twelve permanent personnel, seven fire-fighters and one pilot make up the detachment. The commander is Captain John H. Larson.

Management Of Equipment

The abbreviation, "BEMO," stands for base equipment management office and this title states in the simplest terms the primary mission of the section, which is the management of all equipment used at Webb. This means keeping track of an equipment inventory in excess of $10,000,000 and consisting of more than 36,000 items.

Establishment of a single base equipment management office on each Air Force base to control all its equipment is a relatively recent development. It is the last step in a series of evolution that began about five years ago and which has caused the beloved "supply sergeant," whom most veterans knew, to breathe his last.

Provides Support For All Conditions

The 2050 Communications Squadron, a tenant organization representing the Air Force Communications Service (AFCS) at Webb AFB, is responsible for providing voice and data communications, airdrome and radar approach control and navigational aids including weather communications in support of the over-all base mission.

Maj. Burt T. Johnson is squadron commander and maintains the over-all responsibility for the following sections:

BASE COMMUNICATIONS

The base communications center, under the direction of T. Sgt. Richard N. Wright, provides tactical administrative, and logistical voice and data communications for the base and associated tenant units. The Center is further broken down into the following operational sections: telephone operations, teletype operations, and MARS operations.

The telephone operations section, supervised by Mrs. Lillie F. Smith, is responsible for 24 hour operation of the base telephone switchboard which consists of 26 local trunk lines, seven automatic voice network (AUTOVON) lines, one Air Training Command Alert Network (ATCAN) line, and the capability for 800 local extensions. The telephone operators handle approximately 4,000 calls per day and notify key and-or appropriate personnel in the event of an emergency.

The teletype operations section, supervised by S. Sgt. John B. Simunovic, provides high speed electrical processing of written communications originated at Webb and received from similar communications centers throughout the world. The existing teletype equipmrny has largely been replaced by the Automatic Digital Network (AUTODIN) system which is capable of transmitting 1,200 characters (pre-printed on IBM cards) per second to any other AUTODIN terminal in the world. This section normally handles approximately 90,000 cards and 3,500 teletype messages per month.

The Military Affiliate Radio System (MARS) operations section, headed by S. Sgt. Wayne F. Beyer, provides back-up or emergency communications for primary voice and data systems. The section is equipped with a mobil communications van, radio-teletype, and single-sideband radios ready to respond to both military and civilian emergencies on a 24 hour basis.

FLIGHT FACILITIES

The flight facilities section, under the direction of Capt. James G. Devlin and CWO W-3 Rupert D. Gamble, provides air traffic control services through two facilities, RAPCON (Radar Approach Control) and the Webb control tower. Personnel in the control tower are responsible for directing all aircraft flying in visual contact with the ground and aircraft and motor vehicles operating on the surface within base airport boundaries.

RAPCON, on the other hand is responsible for maintaining air traffic separation and control of civilian and military aircraft operating under instrument flight rules (IFR) below an altitude of 8,000 feet and within a 30 mile radius of Webb AFB. Two separate radar systems are available to RAPCON controllers. Surveillance radar will provide the controller with a scope presentation of all aircraft flying below 30,000 feet within a 60-mile radius of Webb.

Precision radar, which is extremely accurate, provides both azimuth and elevation and enables the controller to direct an aircraft to within 30 feet above the runway at a predetermined point of touchdown.

The maintenance section, supervised by 1st. Lt. Oliver C. Reighn Jr., is responsible for the installation, modification, and repair of ground communications electronic equipment and associated systems in support of both squadron and base operational requirements.

PLANS, PROGRAMS

Personnel of this section provide technical assistance and planning guidance to squadron and base agencies having authorized functional requirements for new ground communications systems.

on Armed Forces Day

Thanks—to the vigilant, trained and dedicated men of America's defense team. The world is becoming, because of them, a safer place . . . safer for those who love peace and want to see an end to our human history of violence. From First Federal to the Webb Air Force Base members of our mighty defense team, a sincere "thank you" for a job well done.

Keeping A Busy Schedule

The Wilson family maintains a busy round of activities at Webb AFB and in Big Spring and here Capt. and Mrs. Dick Wilson join in serving the five younger Wilsons supper, as Cub Scout meetings and other programs fill the family schedule. The youngsters are, from left, Kimberley, Martin, Michale, Kristina and Stephen.

Host Of Activities Taken In Stride

Catching rattlesnakes and teaching children's dance classes are not usual family routines in most households, but for the Dick Wilsons these and a host of other activities are now taken in stride as part of the family's busy schedule.

"We have gone a week at a time without a chance to talk to each other except on the telephone," Capt. Wilson said of the schedule he and Mrs. Wilson keep.

Mrs. Wilson teaches the dance classes twice a week for about 40 children, and Capt. Wilson's activities included directing this year's Rattlesnake Roundup.

"We've found we can't spread ourselves too thin," Capt. Wilson said, as time has presented the biggest problem in keeping the family schedule going. The Wilson family includes five children, three of whom were born in Big Spring. Twin boys, Michale and Martin, now 2½ years of age, were the latest addition. The others are Kristina, 6, and Kimberley, 7, both girls, and Stephen, 9. Kimberley was also born in Big Spring.

The family attends the First Christian Church and both parents are Sunday School teachers there. Capt. Wilson was in the choir for three years, until last year.

Capt. Wilson has found time for a host of civic activities, including the Jaycees, in which he was named Jaycee of the Month during March, and the Flying Tumbleweed Toastmasters, in which he was named Toastmaster of the Quarter in December.

He helped with the Junior Livestock Show and served as a judge for the annual Howard County Junior College area debate tournament this year. Another Jaycee project was as chairman of the judges committee for the Miss Big Spring Pageant.

In December, 1963, Capt. Wilson came into the Big Spring Masonic Lodge 1340 and is in the Sojourners Chapter 459.

He has worked with the proposed zoo effort and helped in the "Red Stocking Revue," presented as a charity show.

Mrs. Wilson has helped with charity variety shows here and has served as choreographer for high school productions this past year. The high school chapter of the National Thespian Society voted her an honorary membership this year. She is also president of the Tall Talkers Toastmistress club this year.

"A community is only as strong as the people's interest," Capt. Wilson emphasized.

"The contact with the people of a community is extremely rewarding, simply for the opportunity to meet the different personalities of people," he pointed out.

"One of the primary reasons we feel at home here," he said, "is because of the acceptance of the people of Big Spring to military people."

A native of Huntington, Ind., he is a graduate of Indiana University. Both he and Mrs. Wilson, who graduated from Ball State Teachers College, taught school prior to his entry into the Air Force. He had completed the college ROTC program to receive a commission, then received a Regular Air Force commission while at Webb in 1958.

The Wilsons first came to Webb AFB in 1956 and he received his wings as a pilot after training here. He had entered the Air Force in June, 1955, and received primary pilot training at Barlow Air Base in Florida.

After an assignment to the instructors pilot school at Craig AFB, Ala., he returned to Webb and served as an instructor until 1958. After an assignment at Brooks AFB, He was transferred back to Webb with duties as a physiological training officer. He is also an instructor pilot.

Administers 664 Employes

The civilian personnel office, with a staff of nine headed by Warren A. Farrow, administers a total personnel program for 664 employes at Webb AFB.

It is divided into three sections. The classification and wage administration section, of which W. A. Bryans is chief, insures that all positions are properly classified and graded. This section also conducts periodic wage surveys in the Big Spring Midland - Odessa industrial community. The data collected during such surveys is used by the Army-Air Force Wage Board in Washington, D. C., as a basis for establishing wage rates at the base for hourly paid employes.

THREE SECTION Provides Base Transportation

The transportation division at Webb AFB is responsible for providing necessary transportation requirements to the 3560th Pilot Training Wing and its tenant units, so that they may accomplish this task, the division is divided into three main branches or sections.

The vehicle operations branch provides passenger and cargo transportation support to all organizations assigned at Webb. It maintains records on vehicle utilization, fuel consumption, cargo hauled, and other data. There are 300 pieces of vehicular equipment on the base. This equipment is divided into three main categories: (1) general purpose, (2) special purpose and (3) materials handling equipment.

This equipment is either permanently assigned to using organizations or is a part of the base taxi fleet, which is operated to take care of the needs of those units who do not need a vehicle on a daily basis. In addition, a base driver's school is operated. This school provides necessary instruction in order that military and civilian personnel may acquire a government driver's license and authorize them to operate government vehicles.

The vehicle maintenance branch has the mission to "keep 'em rolling." It performs all maintenance and repairs on all vehicles assigned to the base. The maintenance work covers all facets of keeping vehicles and related equipment in service, from pumping gasoline to major overhauls. All types and sizes of equipment are maintained, from lawnmowers to runway sweepers to tractors. The vehicles are both gasoline and diesel powered.

Vehicles with engines as large as 820 cubic inch displacement are serviced. Some vehicles even have aircraft engines. Mechanized method is employed in computing maintenance and operational cost for all equipment assigned to the base. Cost per mile, as established by Department of Defense, is the goal all division personnel work for and are interested in maintaining.

The traffic management branch is the "nerve center" for all off-base transportation shipments. This transportation is provided by various carriers in the local area. These shipments are routed by all means of transportation, rail, air or road.

The traffic management office does business with seven contractors, 26 household goods carriers, three mobile home transporters, three motor freight carriers, one rail carrier, four bus carriers and two airline carriers. All the above have local facilities and-or agents. The traffic management office handles all passenger travel request, household goods and hold baggage shipment for all incoming and outgoing personnel.

During the past year this section processed 600 passengers departing the base, or surrounding area. It processed 4½ million pounds of household goods and hold baggage, as well as 6,598 cargo shipments, with a total weight of 72,000 tons. The section spent $300,000 during 1964 for commercial transportation service.

Youth Beauty Shop

AM 4-4431 1705 Scurry

All Good Scouts

SM. Sgt. and Mrs. Eugene F. Sieja help their children, enjoy themselves and serve the community by the work they do in the Scouting program. Mrs. Sieja is Girl Scout Neighborhood Chairman for the Marcy-Webb area, and her husband is troop and den father for Girl Scouts as well as Cubs. The three youngsters who are Scouts are, from left, Sandra, 8, Susan, 13, and Stephen, 9. Young Scotty, 4, has a couple of more years to wait but he likes to sit in on plans for the program.

Enthusiastic Supporters Of Scouting Program Here

Five of the most enthusiastic supporters of the Scouting program can be found at Webb AFB.

They are S.M. Sgt. and Mrs. Eugene F. Sieja and their children, Susan, 13, Stephen, 9, and Sandra, 8. The youngest child, Scotty, is only four years old and not yet ready to take on a Scouts responsibility.

Mrs. Sieja is chairman for Girl Scout Neighborhood 4 which includes the Webb and Marcy School areas. Susan belongs to Cadette Troop 424, which Sgt. Sieja serves as troop father, and Sandra proudly wears her Brownie uniform.

Sgt. Sieja works with his oldest son, Stephen, by being den father for Cub Scout Troop 146. The Siejas keep tab, too, on the children's school activities by their participation in the Marcy Parent-Teachers Association and Mrs. Sieja's membership in the Immaculate Heart of Mary Mother's Club.

Mrs. Sieja is a past president of the Tall Talkers Toastmistress Club which meets twice monthly, and she and her husband sing in the base chapel choir. He was inducted into the Knights of Columbus here in 1961 and has served as chancellor besides working on the annual February festival and fund-raising ventures sponsored by the organization.

By attending classes at Howard County Junior College, Sgt. Sieja has acquired 27 college credits and will continue his math courses there in June. He has just returned from six week's training at the NCO Academy at Kirtland AFB.

Educational courses have not been confined to the head of the house. Mrs. Sieja learns new skills at every opportunity, taking courses in millinery design, cake decorating and sewing. She makes many of the girls' dresses.

Weekends provide the Siegas with an opportunity to take excursions with either Boy or Girl Scout groups or get together for a few hours of bridge with friends.

The family home is at 136-A Dow.

Cerrones Find City Busy Place

From Carthage, N. Y., to Mountain Home, Idaho, North Africa, Misawa AFB, Japan and Webb AFB represents a lot of mileage traveled by S. Sgt. Lewis Cerrone and his family.

Sgt. Cerrone can recall some 18 years of duty with the Air Force, with assignments ranging from learning how to drop leaflets over enemy territory during training with an air reconnaisance and communications squadron in Idaho, to interpreting Italian while at Tripoli, North Africa.

Since June of last year, the Cerrones have been assigned to Webb AFB and the family has found Big Spring a busy home.

Mrs. Cerrone is a first grade teacher at Marcy Elementary School, and Sgt. Cerrone is now handling duties as acting First Sergeant of the 3560th Field Maintenance Squadron and chief clerk in the squadron's orderly room.

Mrs. Cerrone brings a considerable background of teaching experience to Big Spring, as she has taught each year the couple has been in the Air Force, including three years in Japan. The family is especially proud of the collection of items which they brought from Japan.

For Mrs. Cerrone, their transfer to Webb brought her again to her native state. She is from Winters, Tex., and is a graduate of Southwest Texas State College.

Sgt. Cerrone is a native of Carthage, N. M., and attended St. Lawrence University in Canton, N. Y., for one year. He served in the U. S. Army Air Corps from 1941 until 1945 as a clerk in a wing headquarters at Panama and Trinidad.

After five years in civilian life, he was recalled to active duty in 1950 at the outbreak of the Korean Conflict. After six months at Kelly Field, San Antonio, he was assigned to Idaho with the communications squadron. Two such squadrons were given training in the dropping of leaflets over enemy territory, Sgt. Cerrone recalled, but one squadron was sent to Korea and the other, with which he was assigned, sent to North Africa. With no need for such work there, the squadron was then disbanded and Sgt. Cerrone was assigned to handling off-base housing and interpreting Italian for the base at Tripoli.

The Cerrones were in Japan from 1961 until their transfer to Webb last year, with his assignment at Misawa AFB in maintenance administration.

Sgt. Cerrone is a member of the American Legion and the family attends the First Methodist Church. Bowling is a favorite spare time pursuit, as they participate in two leagues here. Mrs. Cerrone is active in the Parent-Teachers Association.

Examiner Board

The third unit within the employe utilization section is the board of U.S. Civil Service Examiner, which recruits, tests, rates potential employes and maintains registers of eligibles from which appointments are made. Eugene L. Smith is in charge of this unit.

Recalls Duty

A collection of items purchased in Japan have been brought to Big Spring by S. Sgt. and Mrs. Lewis Cerrone. The Cerrones have been Big Spring residents since September of last year and previously served at Misawa AFB in Japan for three years.

331st Uses Starfighter

The F-104 Starfighter is the aircraft used by the 331st Fighter Interceptor Squadron at Webb AFB. The Starfighter replaced the F-102 Delta Dagger in the summer of 1963.

Air National Guard units in Tennessee and South Carolina received the 331st Delta Daggers and in-turn the 331st got the Starfighters.

The F-104 is manufactured by Lockheed Corporation and serves Air Defense Command as a day fighter interceptor. Starfighters are armed with Sidewinder missiles and Gatling guns.

First flight for the stubby, razor-sharp Starfighter was in 1954. Length of each wing to fuselage is 7½ feet. It is little over 54 feet long and is almost 14 feet high. Speed is more than 1,400 miles an hour. The Starfighter ceiling is above 90,000 feet.

Power plant is one GE J-79 engine with horsepower thrust of 15,000 pounds.

In December, 1959, Capt. J. B. Johnson, Edwards AFB, Calif., test pilot, flew the Starfighter to two records: 103,395 foot ceiling and a time-to-climb from takeoff to 98,424 feet in 15 minutes, 4.92 seconds.

THESE ARE THE MEN WHO GUIDE ACTIVITIES

Webb Leadership Makes It Work

Imagine a community of over 3,000 persons assembled to operate a business with assets over $165 million.

Obviously, this could not be left to chance—to haphazard operation. On the contrary, the situation would demand a sound plan of organization backed with individuals possessing leadship acumen. As with any business, the ultimate key to success would be management.

So it is with Webb AFB, typical of the bases of the United States Air Force. Direction of Webb's manifold operations aimed at production of the best jet pilots in the world rests on the shoulders of Col. A. F. Taute.

He is supported in this responsibility by members of his staff, including Lt. Col. M. W. Shareck Jr., commander of the 331st Fighter Interceptor Squadron, which has its own facility at Webb, and is charged with protecting this quadrant of the nation against aerial attack.

Military paperwork may be a favorite subject of jibes, but it is necessary to carry out the accounting of everything assigned to the base from the tiniest screw to the human beings who must be housed, fed and clothed.

Training pilots—and basing a defense unit—means that Webb AFB functions fan out like the spokes from a wheel. Naturally, a prime concern is the classes of officers who come here to be fashioned into pilots. They must be tempered, and honed to a fine edge physically, schooled in academics, military discipline, in survival techniques, in leadership qualities as well as learn to fly planes.

Backing up this mission are mazes of warehouses, fuel dumps, instrument shops, electric shops, metal shops, mechanical shops and engineering shops, control offices, administrative offices, billets, dining halls, medical facilities, recreational facilities, chapels and a host of other auxiliary operations needed to sustain and maintain the complex industry that makes up a base dedicated to protecting the nation.

BASE-COMMUNITY COUNCIL IN RECENT SESSION
Civilian, military people work together for mutual benefits

Organization Expresses Base-City Cooperation

An organization that is the formal expression of Webb AFB-Big Spring cooperation is the Base Community Council. It is made up of some 65 civilians and military people, meets each quarter, and has committees that stay in close liaison to pick up any project needed in the area of base and community relations.

While the community and the military installation have had an informal working organization almost from Webb's inception, the formal organization of the Council is only about two years old. It has been highly successful in a number of activities.

Col. A. F. Taute, wing commander at Webb serves as co-chairman of the council with Champ Rainwater, the civilian representative.

The council is composed of four permanent working committees, each having as co-chairman a civilian and an Air Force officer. The committees are:

Police-Health-Safety—Dr. Lee O. Rogers, and Lt. Col. M. E. Frantz.

Housing and Commercial — Jeff Brown and Col. George E. Franks.

Business—Bob Bradbury and Col. E. J. White.

Prestige-Public Relations-Hospitality-Good Citizenship — Dr. Carl B. Marcum and Col. E. L. Masters.

Each of the committees—their membership ranging from seven to 15—have regular meetings, and explore projects that come within their province. They report their findings and recommendations to the full council.

They have worked to erase situations that might have caused civilian-military misunderstandings; they have developed and promoted positive programs to further mutual interests.

Over 15,000 Packed Base For Dedication In 1952

Thirteen years ago between 15,000 and 20,000 people, creating a colossal traffic jam as they came, packed into Webb AFB for open house activities marking the dedication of the new air base.

The weather had turned unexpectedly cloudy and cold and many visitors, fooled by the calendar date of May 18, 1952, shivered in shirt sleeves while neighbors felt comfortable in coats in the 50 degree weather.

Two hours earlier, the gates had been opened and from that time until almost 4 p.m. there was a steady stream of visitors. By 2 p.m. some 500 cars had come through the base gates.

Littles Find Plenty Of Opportunities

Although Big Spring is far different both in size and character than Baltimore, the opportunities for community service here are just as abundant as in Maryland.

At least this is the experience of the Captain Norman A. Little family. The Littles, who have been at Webb AFB for the past year, live at 17-A Albrook, have seven children — naturally their interests are much centered in schools, churches and school organizations.

Capt. Little was formerly a SAC pilot. He dropped out of the service for five years and then re-enlisted. He was assigned here as an instructor. The five years he was out of service, he worked with the Martin Aircraft Co.

Attached now to the 3561st Training Command, the captain and his family are enthusiastic workers in the Immaculate Heart of Mary Catholic Church.

They are also deeply involved in the Cub Scout movement. Mrs. Little is a den mother for Den 9, Pack 46. She also is a member of the Mother's Club of the Immaculate Heart of Mary parochial school and with the P-TA which is attached to the special education work in the Big Spring schools.

Little is a worker in the Holy Name Society of the church.

The Littles have five sons, including two 9-months-old twins, James and John, born since they came to Big Spring. Norman, 8, their eldest son, attends Immaculate Heart of Mary school. Michael, 7, is a student in Marcy. Charles, 5, will be ready for school next year. Mary Claire, 10, their oldest daughter, attends the special education school. Jennifer is 6 and is enrolled at the Immaculate Heart of Mary school.

The Littles are impressed alike with the general friendliness of Big Springers and are well pleased with effective work the special education department does.

"I was born and reared in Baltimore," said Capt. Little, "and so was my wife. We are naturally 'big town' people but we find life here in a smaller city most enjoyable and our contacts for the year we have been here have been happy and beneficial."

Home, School And Church Major Interests Of Family

Capt. Norman A. Little, and his family are active citizens of Big Spring. Shown front row seated, are, Charles Little and Norman Little Jr.; standing, Michael Little; seated at rear, Mrs. Rosemary Little, with John Little, Jennifer Little, Mary Claire Little and Capt. Little with James Little.

Libya's Air Arm Gets Webb Help

The United Kingdom of Libya is situated between the devil (the Sahara Desert) and the deep blue sea (the Mediterranean). Libya, which attained its independence in 1951, has since pulled itself from economic poverty to comparative wealth through the discovery of oil.

NAME ONLY

In 1964, the Royal Libyan Air Force (RLAF) was in existence by virtue of a few men and a name only — until that country's parliament requested aid from the United States in organizing an air force that would be capable of standing on its own. The gift of a C-47 and two T-33s reconverted to F-80s, followed. Now, the Royal Libyan Air Force is growing. It has more men. And these men must be trained to operate and maintain the equipment used by any modern air force.

Through the Military Assistance Program (MAP), the Royal Libyan Air Force is using the training facilities of the U. S. Air Force.

One of the men assigned to the USAF Air Training Command is Private Mobruk S. Gariana. He will leave Webb AFB June 26 to return to his country as a qualified airborne navigational aids repairman.

Pvt. Gariani enlisted for a five-year tour in the Royal Libyan Air Force in October, 1963. His first step was basic training. This was an eight week course, and for Pvt. Gariani it was coupled with courses in English and basic electricity. Competitive examinations followed, and Gariani was notified of selection for further training in the United States.

NEXT STOP

His next stop on the road to Webb was at the Lackland Military Training Center for 15 weeks of language school. Becoming proficient in English, Gariani was sent to Keesler Technical Training Center to begin his electronic training. Thirty - five weeks was the length of this course and it earned the young Libyan airman a 'semi-skilled' capability in Nav-Aids equipment. The Com-Nav shop at Webb, haded by C.M. Sgt. S. I. Fleischer, was selected to give the private his on-the-job training. Airman 2.C. John C. Minton was chosen by W. R. Campbell, chief foreman of airborne electronics, to sponsor, guide, counsel, and train Pvt. Gariani.

The number and complexity of sets to be mastered is staggering, especially in view of the limited time allowed for training. Ranging from the intricate TACAN (Tactical Aerial Navigation) with its time-lapse generators and distance measuring devices to the combat important IFF (Identification: Friend or Foe) and to the ILS (Instrument Landing System), the training period seems short. Sgt. Fleischner and Campbell decided the more help the foreign trainee received, the better the quality of training. Airman 1.C. Bob Morgan and Airman 2.C. Gil Arredondo were selected to aid.

Libyan Student At Webb

Learning by doing is the basis of the U.S. Air Force On-the-Job Training program and this principle is applied to the training of the Libyan Private Mabruk S. Gariani. Webb's Comm-Nav shop is responsible for this training through the Military Assistance Program.

LIKE TEXAS

Pvt. Gariani's homeland is similar in terrain to the West Texas area. But, as the 21-year-old Libyan says: "The weather is always different in Texas." Libyan weather forecasts sound like stuck records most of the year . . . fair and warm. Home to Pvt. Gariani is a suburb of the city of Tripoli, known as Suk el Juma or the market of Friday. Life in the Middle East, and in Libya, is much different from the everyday life in the United States. Gariani finds he enjoys the customs and dress of the Western World as opposed to the eastern. One item of dress he misses not at all is the barracan worn by Libyan women, that covers all but one eye. "I like to see a pretty woman's face."

Food was a prime subject in the conversation with Gariani "I miss most about Libya, the food . . . especially rice and kuss-kuss." Kuss-kuss is a dish made with camel or sheep meat and the vegetables of the locale, and is highly seasoned. While on the subject of food, Gariani observed a Moslem holiday that has just past: Rhamadan. Rhamadan is a month-long observance of the period when Allah gave Mohammed the Koran. The main feature of the observance is fasting from sunrise to sunset.

OBSERVED FAST

"From the time of the new moon and for 30 days, I observed the fast," stated the Libyan trainee. Gariani was exposed to Texas hospitality in the form of barbecue at the home of Sgt. Mainord, one of his co-workers in the Com-Nav shop.

For the most part, Pvt. Garinai is happy to be in the United States, and he is justifiably proud of the training he is receiving and of the place he hopes to fill in the growing Royal Libyan Air Force. His co-workers and supervisors speak praise for the determination exhibited by the young man.

Open House

Although Armed Forces Day is a public event and has been the occasion for a wide variety of community activities, the observance is primarily an "open house" program.

Alert At Webb

These photographs show men in the 331st Fighter Interceptor Squadron, a unit of 29th Air Division of Air Defense Command, in action. The top photo shows the scramble, and the bottom shows the strap-in in the F-104, two minutes later. The pilots are in the air in five minutes.

NCO Wives Participate In Many Areas

There are many clubs and organizations at Webb AFB, among them the Non-Commissioned Officers' Wives Club. The purpose of the club is to develop welfare and social activities and to form a closer relationship among the wives of servicemen. The membership is composed of wives of active and associate members of the Non-Commissioned Officers' Open Mess.

During the past year the club has participated in many activities and welfare functions. Members of the club meet twice monthly: one is a social gathering for members to get acquainted and for planned entertainment. The first meeting of the month is a business meeting where new projects are discussed. The NCO Wives participate in as many welfare projects as possible.

During Thanksgiving, a check and several baskets of food were given to the chapel for distribution to the needy. During the year donations were given to the Chaplain's Welfare Fund, Memorial Window Fund, state hospital, Easter Seal campaign, March of Dimes, Little League, and others. Curtains were made and presented to the base hospital for the lounge in ward two. A donation is given to the Brownie troop of Webb, as well as a Christmas party each year. Recently the club served coffee and refreshments to patients at the VA Hospital. The latest project of the club is to collect clothing for an orphanage in Korea.

331st Helps Guard Against Air Strike

Guarding the North American continent against air attack is the job of the North American Air Defense Command. From its headquarters in Colorado Springs, Colo., NORAD in time of war will control the air defense of both the United States and Canada. NORAD is an international command formed in 1957 by the joint chiefs of staff of both countries.

331ST

The 331st Fighter Interceptor Squadron is the Webb based unit of this long range air defense system. The 331st, equipped with the needle-nosed F-104 Lockheed Starfighter, is under the operational control of Oklahoma City Air Defense Sector. OCADS is an air defense sector under the control of the 29th Air Divison with headquarters at Richards-Gebaur Air Force Base, Kansas City, Mo. The 29th Air Division is responsible for the Air Defense of the midwest United States from Canada to Mexico and is one of the five major divisions of the United States Air Force, Air Defense Command.

The 331st FIS arrived at Webb AFB from Stewart AFB, New York in August, 1958. The squadron flew the F-86D until February, 1960, when it recevied its first supersonic F-102A "Delta Dagger." In May, 1963, the F-102A was replaced by the Mach 2 F-104 "Starfighter." The 331st FIS is one of the only two squadrons in the Air Defense Command equipped with the Lockheed "Starfighter."

MACH 2

The F - 104 is a supersonic fighter aircraft capable of flying two times the speed of sound or Mach 2. A term more frequently heard concerning the speed of the "Starfighter" is that it is capable of "speeds in excess of 1,400 miles per hour." The F-104 still holds three time-to-climb to altitude records and has reached an altitude of 103,395 feet, or a little over 20 miles in the air.

The F - 104 "Starfighter" is built by Lockheed Aircraft Corporation and first became operational with Air Force flying units in January, 1958. It is powered by a General Electric J79 engine capable of producing 15,000 pounds thrust maximum power. At low fuel weights, the amount of thrust put out by the engine exceeds the weight of the aircraft. This high thrust to weight ratio gives the "Starfighter" its tremendous speed and altitude capability.

UNIQUE

One of the more unique features of this sleek fighter aircraft is its wings. Each wing is only 7½ feet long from the body of the aircraft to the wing tip. The leading edge of each wing is kept razor sharp to increase its ability to cut through the air at high airspeeds. These wing edges are covered at all times while the aircraft is on the ground so that the men working around the airplane will not accidentally cut themselves. The unusual downward slope of the wings give added lift capability at high supersonic speeds.

The 331st pilots fly their aircraft daily and practice the tactics necessary for them to fire GAR8 "Sidewinder" missiles from the wingtips of the "Starfighter." The 331st aircraft are also equipped with the M-61 "Vulcan" cannon, which is capable of firing 4,500 pounds of 20MM cannon shells per minute. This cannon greatly increases the combat effectiveness of the 331st aircraft and the ability of the squadron to perform its Air Defense mission.

MISSION

The mission of the 331st Fighter Interceptor Squadron is to maintain a 24-hour alert against any hostile attack by enemy bomber aircraft that might fly from the north or over the southern borders of the U. S. to attack vital targets in West Texas and New Mexico.

The 331st is a tenant unit at Webb Air Force Base and is commanded by Lt. Col. M. W. Shareck Jr.

Makes Plans For Airmen

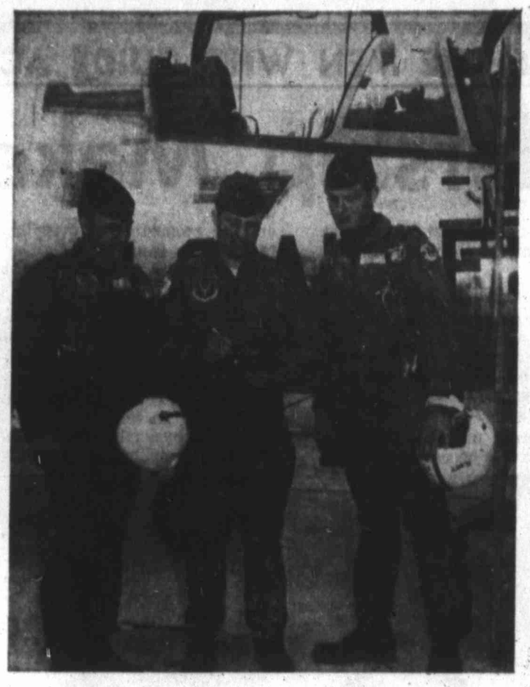

For Webb AFB airmen, the John H. Lees Service Club offers participation in cards, dominoes, checkers, chess, Monopoly, Scrabble, ping pong tables, pool tables, snooker table, shuffleboard, games of puff billiards, table cricket, dutch shuffleboard, skittles; a variety of 31 magazines for news, sports, stories, techniques; five Sunday newspapers with the morning coffee hour; free stationery, stereo record players, a photo hobby room, musical instruments, color and black and white TV; lounge area, kitchen for snacks.

For special functions there are tournaments, quiz programs, game night, orchestras, dancing, scavenger parties, jam sessions, inter-squadron ping pong and pool tournaments, interbase ping pong meets, talent shows, electronic jazz concerts and snacks, short timers get-togethers, pizza party night, tacos party night and a sergeants' coffee time.

The servicemen's wife and family has activities such as square dancing, photo hobby classes, art lessons, leathercraft instruction, sky diving group, model airplane group, chess instruction, bridge classes, a food class with the Howard County Home Demonstration agent instructing in basic foods, their preparation, buying and nutritional content for budget-wise families, and a cake decorating class.

The service club becomes a meeting place for base-wide functions as airmen orientation schedules, retirement briefings, little league meetings, armed forces day meetings, family service orientation, Cub Scouts, Girl Scouts, league bowling kick-off meetings, bond drive meetings, art shows, baby show, dance recital, Japanese wives club sponsored English grammar lessons, chaplain's movie and snack night.

Tours of various sites of interest are scheduled for military personnel and their dependents, including Carlsbad Caverns, Villa Acuna bull fights, Piedras Negras tour, Sonora Caverns, Palo Dura Canyon and Buffalo Lake.

TAC Briefing

Two second lieutenants from Class 65-H were chosen to represent their class in flights in the F-104D, a two-seat version of the F-104A, from the Tactical Air Command's George AFB, Calif. From left are 2nd Lt. Milan Zimer, 65-H; Capt. David B. Clardy, the pilot from George AFB; and 2nd Lt. Roger Berens, 65-H. The various Air Force commands send pilots and aircraft to Webb for periodical briefings to aid the students in choosing the command they wish to fly with.

Airmen Must Annually Qualify With Weapons

There is a regulation in the Air Force that pertains to everyone except non-combatants. This regulation pertains to qualification with their assigned weapon on an annual basis.

Webb AFB is able to fulfill this requirement with a 24 position range. Pistols and carbines are fired on this range under the supervision of range personnel.

The small arms training section consists of three men: S. Sgt. Don E. Robb, NCOIC, S. Sgt. Larry D. Kingsbury, and Airman 1.C. Ronald D. Brooks.

S. Sgt. Don E. Robb has been a small arms instructor eight years and is a master pistol shooter, and the holder of two "Excellence in Competition" badges won only in .45 caliber pistol matches. He has been a member of teams in Strategic Air Command, Air Training Command and Pacific Air Force Command. Sgt. Robb has been assigned at Webb AFB since November, 1962.

Sgt. Kingsbury has been an instructor since August, 1961, when he graduated from the USAF Marksmanship School. He came here in May, 1964. Sgt. Kingsbury is an expert with the pistol and is on the pistol team at Webb AFB.

Airman Brooks has been an instructor since September, 1962 when he graduated from the USAF Marksmanship School.

Congratulations to W.A.F.B. on Your 13th Anniversary

We are proud to have you in our growing community.

Students Given Officer Training

The 3561st Student Squadron at Webb AFB, commanded by Maj. Barry R. Butler, is charged with the responsibility of providing administrative control along with academic and officer training instruction for all students in the pilot training program at Webb. The squadron is also responsible for the administrative control of airmen performing duty with units assigned to the deputy commander-training.

ORDERLY

The 3561st Student Squadron orderly room, located in the heart of the student complex, houses the squadron commander, administrative personnel, the officer training section, the physical training section, and graphics. The squadron academic section is housed separately in the academic building, 350, which has recently been renamed "Withycombe Hall" in honor of the late Gen. Howard J. Withycombe, former Webb commander.

During the first three weeks of training — the preflight period— student squadron administrative personnel coordinate the many details necessary in entering students in training, and, as is often the case, entering them in their first tour of military duty. During the preflight period, the student has an opportunity to get settled while he studies and learns the procedures that he will soon have to perform in flight. The preflight period is noted for its drill and ceremonies; in ranks inspections; and a vigorous conditioning phase of physical training.

NINE CAPTAINS

The student squadron has nine rated captains assigned as training officers under the direction of Capt. Robert C. Hammerle, chief of officer training. One training officer is assigned to each class of students as the immediate supervisor and overall monitor of training.

The training officer's function is broad and diversified. He flies instructional flights with students on a frequent and regular basis, provides classroom instruction in officer training subjects, monitors and often participates in physical training periods for his assigned class, conducts inspections, prepares all reports and ratings on assigned students, and is responsible for the over-all coordination of training activities for his assigned class. Training officers and present class assignments are as follows.

Class 66A — Capt. Victor R. Figalan; 66B — Capt. Lewis G. Vale; 66C — Capt. Robert C. Hammerle; 66D — Capt. Henry C. Hill; 66E — Capt. Raymond L. Gardner; 66F — Capt. Neal T. Reavely; 65G — Capt. James W. Marlin Jr.; 65H — Capt. Robert H. Laurine (senior training officer); Capt. Harold B. Ferguson (senior training officer).

PHYSICAL TRAINING

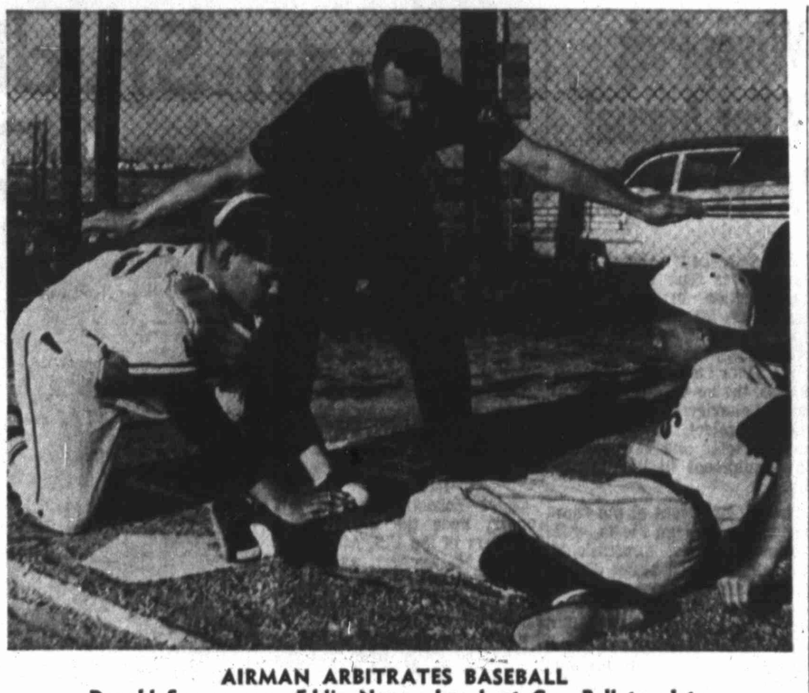

As a part of the officer training program, students receive approximately 143 hours of physical training. The physical training department is under the supervision of Cal Lowry, who is assisted by S. Sgt. Diego Garcia and Airman 1.C. Julian Bell.

The academic section of the student squadron has 18 instructors authorized and is under the supervision of Maj. Glen Lingenfelter, chief of academics. With one exception, all academic instructors are rated jet instructor pilots and are required to fly frequent and regular instructional flights with students in conjunction with their classroom responsibilities. The nonrated instructor in the section is CWO Raymond A. Seger, a meteorologist who is responsible for over-all academic scheduling as well as instructing in his field.

ACADEMICS

During the course of the program, each student receives approximately 349 hours of academic training and 249 hours of officer training. All of this instruction is rendered by the professional instructors assigned to the student squadron. The squadron motto is "leadership by example."

The 3561st has been repeatedly cited for excellent mission performance.

AIRMAN ARBITRATES BASEBALL
Donald Spence says Eddie Nanny has beat Guy Bell to plate

Airman Serves As An Umpire

Next time you take a trip to a local baseball game, take a good look at the umpire.

It might be Airman 1.C. Donald E. Spence, of Webb AFB doing the calling. A member of the Big Spring Umpire's Association, Airman Spence has long been active in baseball, and other sports.

"I'm an avid fan of baseball and particularly of the St. Louis Cardinals," he said. A native of Washab, Ind., "which was the first electric lighted city in the world," Airman Spence has been in the service for the past 11 years and a resident of Big Spring three years.

"I really like being an umpire, but would rather umpire the plates than behind the plate," he said. Airman Spence has played on sandlot teams and squadron teams and has umpired in Indiana and Nebraska. This is his first year to umpire in Big Spring.

Besides his duties as an umpire and jet mechanic at Webb, Airman Spence is also superintendent of the junior Sunday school department at Phillips Memorial Baptist Church, chairman of the church's nominating committe, and director of the Training Union.

His wife, Nellie and their two children, David 7, and Paul 5, attend church regularly and the Spences are members of the Boydstun P-TA. Mrs. Spence is also a member of the Big Spring PBX Club.

Airman Spence is no stranger to Texas, having served in Wichita Falls and Amarillo prior to being transferred to Webb.

Besides baseball, Airman Spence is interested in basketball and Howard County Junior College. He sees all the HCJC games he can, and attends HCJC night classes.

"At the end of the present semester I hope to have 27 hours," he said. "My ambition is to be an elementary teacher when I retire from the service and teach the age boys and girls who participate in Little League," he continued.

Active In Church And School Affairs

Having lived here only 16 months, S. Sgt. William P. Hall and family are active in church, school and Scouting. (left to right) Charles William, Sgt. Hall, Theresa Louise, Mrs. Hall, Stephen William and seated (left to right) William Gregory and William Douglas.

Sergeant Finds Time For Many Community Roles

S. Sgt. William P. Hall is a busy man.

As NCOIC of the personal affairs branch at Webb, one would think that it would keep a man busy and leave little time for nothing else. But Sgt. Hall finds time to be a Sunday school teacher at the base chapel, take an active part in Boy Scout and school activities.

A native of Kentucky, Sgt. Hall has been in the service 23 years. He and his wife, Louise, and five children, Charles, Stephen, William Douglas, William Gregory and Theresa, have been in Big Spring for the past 16 months.

A crew chief during World War II, Sgt. Hall has been stationed all over the world, most recently at Laon AFB, France. He was in France when he received his law degree. This came after many hours of study and years of work. He started on his long trail to his law degree at the University of Kentucky and ended at the University of Chicago. It comes in handy as a personal affairs NCO.

When he retires he plans to return to his native state and open a law practice. He is a member of the American Legion and Veterans of Foreign Wars in Wheelwright, Ky., and a member of the Masons in Columbus, Ohio.

Sgt. Hall has been in Scouting 32 years. He is an Eagle Scout, scoutmaster, cubmaster and commissioner. He is a member of the Laon AFB Toastmasters Club.

His chilren are active in school and chapel affairs. Charles is president of the Protestant Youth of the Chapel and a member of the Big Spring High School band. Stephen is a member of the football and track teams at the high school and the French Club.

William Douglas and William Gregory are active members of the Boy Scouts. Douglas is a second class Scout and Gregory is a Webelo.

Sgt. and Mrs. Hall are members of the Goliad P-TA and four of the children are enrolled in the Big Spring schools.

Judo Demonstration

To be conducted during Armed Forces Day at Webb Air Force Base by 1st Lt. Edwyn M. Saiki and his Judo students.

Judo Has Long History In Japan

In feudal Japan, the only weapons were hands (jiujutsu), knives, clubs, staves, swords, spears and bows and arrows. Practical use of these was taught and practiced with scientific, and often deadly, skill. Teachers held official positions and were highly regarded.

Toward the end of the Tokugawa era (1576-1878) a change occurred in the types of weapons and methods of fighting. The old martial arts fell into rapid disuse and interest diminished. The jiujitsu masters lost their official positions and were forced to seek other employment. Many turned to wrestling and to exhibitions.

REVIVED

One man named Jigoro Kano, a student of many of the old masters, realized that the arts were disappearing. He set out to revive, organize and systematize a course of instruction in them. In June, 1882, he established the Kodokan in Tokyo. Today's sport of judo is that system as developed by Kano in the intervening years.

What is judo? Judo is an art of hand-to-hand fighting in which the weights and efforts of the opponent are used to bring about his defeat. Judo is based on definite principles of movement, balance, and leverage; to "give way" to the efforts of the opponent and still succeed in applying these principles in the highest attainable form in the art.

Judo students at Webb Air Force Base like at any judo gym learn the various methods of keeping their balance and disturbing the balance of their opponent. Then they learn how to break the opponents' position entirely, and then how to throw him to the mat. They also learn how to use locks, holds, chokes, and how to counter-attack in mat fighting. They pool this knowledge and practice, and then they enter into conducted sporting contests where they are allowed to use their knowledge and try to defeat their partners. Through this method they learn and master judo. This method is called randori, meaning free-playing, but it is only reached through kata or form-practice. It requires several years of intelligent practice before the student becomes really proficient.

A knowledge of judo teaches the student to distinguish between the right and wrong use of whatever strength he has. In boxing or wrestling practice, contestants are always evenly matched in their respective weight classes. In judo practice you usually see a light, small fellow playing against someone twice his weight and size. Thus, it is not necessary to be strong physically in order to practice judo.

SELF DEFENSE

After a student becomes somewhat proficient in sport judo, he realizes how self-defense judo works. He discovers the scientific way of freeing himself from locks, holds, chokes and other attacks. He learns how to use his strength wisely. When the need arises the student would probably induce his antagonist to lunge forward. A man so lunging is the easiest of all to throw. Judo as a sport is the most beautiful of all hand-to-hand forms, but as a means of attack and defense, it is most ferocious and dangerous to the opponent.

Judo strengthens and builds the student's mind, body and spirit. It builds character, disciplines emotion, teaches patience with tolerance and to have grace under pressure.

Wives Pick Y For Annual Work Project

The year began for the Officers Wives Club with the annual election in May, when Mrs. A. F. Taute became honorary president, and Mrs. Robert Hartzog, the office of president. During the summer months, the newly elected board chose Lakeview YMCA as its welfare project, donating a 16 mm projector and 64 pieces of play equipment to this institution.

The biggest event of the summer was a Mexican Fiesta, with costumes, prizes, professional entertainment and buffet dinner at the Officers Open Mess in July. Later in the year, the second party was held, the traditional OWC Christmas Gala with dinner and dancing for members and their husbands and all who belong to the Officers Open Mess.

A volunteer services group was organized in the fall to donate hours to the Big Spring State Hospital. Mrs. Richard Gronning, wife of one of the student pilots, donated 100 hours in three months. The group also staged two musical variety shows for the patients and decorated a ward for Christmas celebration.

Mrs. Herbert Dahnke was honored as guest of the year for being a charter member of the OWC since her previous days at Webb in 1952. Many classes of instruction were offered during the year, including flower arranging, millinery, bridge, duplicate bridge, sewing and knitting. The knitting students staged a fashion show and luncheon in midwinter.

A welfare fund-raising project for the year was centered in the sale of Air Force cook books entitled "Recipes on Parade," which was a successful sale both at Webb and in Big Spring.

Guests and speakers at monthly luncheons during the year included wives of the International Club, Bruce Frazier who spoke on traveling in Mexico, and exchange student Nick Androvich, who gave a piano concert for members and guests. Other social entertainments included an antique show, HCJC Choir musicale, fall fashion show, and an Easter hat show.

Ava Nell Jenks was sponsored in the Junior Miss Big Spring contest, while earlier in the year the OWC entered a float in the homecoming parade. A clothing drive for patients at the Big Spring State Hospital and active support for the Air Force Village Foundation were two welfare projects that brought the year to a close.

Din Of Battle

In the Mexican War a cry rang out above the din of battle on a fateful day at Bunea Vista, "Stand Fast Mississippians!" This was the beginning of the legend of the famed Mississippi Rifles whose commander was — Colonel Jeff Davis.

Iranian Student In Current Class

A young man from Shahzandarak Vousfie, Tehran, Iran, Cadet Manoochehr Yousefi, 25, of the Imperial Iranian Air Force, is a student in the new pilot-training Class 66-F, which began undergraduate pilot training at Webb AFB last month. Other nations, represented in the 3560th Pilot Training Wing, in the last six months, include Pakistan, Venezuela, Turkey, China, Saudi Arabia, Morocco and Thailand.

INVITED

Cadet Yousefi came to this country upon the invitation of Secretary of the U.S. Air Force, Eugene M. Zuckert, as a participant in the Military Assistance Program (MAP), which provides training for select students of friendly nations. He received the letter from Zuckert as his country's choice, after scoring highest in competitive examinations in English language and in flying.

In Tehran, he attended Shazand, a primary school, Arak, a secondary school, and the Iranian Air Force Pilot College. Before coming to Webb, he attended language school at Lackland Air Force Base. An instructor at Lackland wrote in his record, "Cadet Yousefi is a serious young officer, whose study habits and attitude toward learning are positive and obvious . . ."

MANOOCHEHR YOUSEFI

At Webb this appraisal holds. Capt. Neil T. Reavely, a training officer of the 3561st Student Squadron, tells of meeting the Iranian upon his arrival at Big Spring.

"It was a weekend before Class 66-F officially began training. I got Yousefi settled and asked if I could be of further service. I expected anything from a request to be left alone to rest, or, for a sight-seeing tour. Instead he asked for study materials. That, I wasn't prepared for. But I dug him up a physiological training text and wished him luck."

ABOVE AVERAGE

Another student of 66-F, Capt. John Brooks, who is Cadet Yousefi's flight commander, said, "Yousefi is getting off to an above average start in academics."

A wide smile from Yousefi, and he said, "My first weekend at Webb, I read that physiology book from front to back."

Capt. Edwin R. Maxson, an instructor pilot of the 3561st Student Squadron, said, "It's a little early to comment on Yousefi's flying abilities. But I'll tell you this: I'm glad he is my student and not somebody else's."

The awake time of a student-pilot is taken—flying, academics, officer training, physical education, and so on. But, when he lies down to rest and closes his eyes to sleep, Cadet Yousefi sees pictures of home. He sees Chadija, his wife, who is 18, and Mansoor, his son, who is 2.

"My dream," he says, "is that I do well here—until there is no question but that I will graduate—and then, perhaps my wife and son will join me in Big Spring."

During the last six months, Webb AFB has been actively participating in the Military Assistance Program (MAP) which sponsors Cadet Yousefi

OTHERS

From Iran, also, was Maj. Ghgdratollak Sharifipone, who studied the duties of aircraft maintenance officers. From Pakistan, Maj. Syed M. M. Azher and Maj. Mahmood Uz Han studied air traffic control. From Venezuela, M. Sgt. Pedro A. S. Raymond was in on-the-job training for warehouse specialist. From Turkey, Capt. Neidit Erol and Capt. Nejat Tandogan studied engine installation. From China, Capt. Chung-fu Yen was in air traffic control. Saudi Arabia sent Capt. Mohammed O. S. Khuzami to Webb to learn about ground safety. Aviation cadets Mohammed Dahhou and Hamid Boukhalif, both from Morrocco, were in undergraduate pilot training part time. From Thailand, Capt. Pramouth Viritamase came to Webb to learn the tasks of assistant flying safety officers. Also, from Thailand, Aviation Cadet Shoosug Sukamalin received warehouse specialist on-the-job training at Webb Air Force Base.

SPECIAL PROJECTS

Ample Facilities Are Provided For Youngsters

Youth Activities at Webb AFB are under the supervision of Mrs. Miriam M. Russell, youth director, assisted by parents and volunteer military personnel who play an important role by chaperoning, acting as instructors, and as consultants for special projects. Teen "record hops" are held on alternate Saturday nights in the service club ballroom.

At the recent "Penny-a-Pound" dance, the young men and girls weighed in at the door, and a penny was charged for each pound over 100. For the petite teen, this was no problem, but the moans and groans were loud when the husky boys shelled out their admission, which helps to defray costs of refreshments and entertainment.

TEEN SCHEDULE

On the teen social schedule for the summer are a Backward Date Dance—the gals will escort the boys to the party, serve the refreshments, and dances will all be ladies' choice—a Bermuda hop, a beachcomber dance, and a luau. There will be moonlight swims at the pool, and barbecues at the pavilion. Pre-teen parties for 11 and 12-year-olds will begin May 21 at the service club. Activities for this age group will include game nights, record dancing, bicycle hikes, a tacky party, and cook-outs.

Organized classes for the summer program will include golf, tennis, archery, and judo; a charm course for teenage girls, ceramics class, and a junior first aid course for 12-15-year-olds taught by qualified volunteers. Registration for these will be conducted at the base commissary June 1-3.

Red Cross standard swim courses will be given at both pools by certified instructors, and a synchronized swimming course will be offered for teens.

Webb's International Little League, one of four participating leagues in Big Spring, has a registration of 227 ball players, under Maj. Ed Davis' guiding hand.

Twenty-five junior judo students work out each week with their instructor, 1st Lt. Ed Saiki, who awards the boys belts of appropriate color as their skills progress in this age-old sport.

Jackie Wilson has conducted a dance clinic for boys and girls which will conclude with a dance recital on May 16 at the service club.

COACHED

T. Sgt. Gary Pagan has coached and counseled the 36 members of the teen bowling league, who will compete during June in the American Junior Bowling Congress Tournament at Abilene. Bus transportation will be provided for the young people and parents will chaperone the weekend trip.

Webb parents are asked and urged to share their skills and their leisure time with the dependent youths, in order to make possible the recreational activities needed by lively, inquiring young people.

Locater Can Find Anyone

If you want to contact someone stationed at Webb AFB, there is a place that can help you locate him. They can tell you his rank, organization, duty or organization phone number, or last-known off-base address listed by the individual.

Call "base locator"—Extension 725.

A card system locator is maintained and operated under direction of the chief administrative services at Wing Headquarters. During normal duty hours this service is performed by the consolidated mail room personnel. After duty hours and on holidays, the files are operated by the officer of the day and staff duty NCO to insure continuous service.

Aviation Physiology Is Becoming More Important

"Higher and faster flying is causing aviation physiology to become more and more vital in the safety of the Air Force pilot," according to Capt. Dick E. Wilson, officer in charge of the Webb Air Force Base physiological training unit. The unit is an organizational member of the 3560th USAF Hospital, and is manned by 13 military personnel.

FASTER JETS

Capt. Wilson said, "With the advent of the century series jet fighters, supersonic jet trainers, high performance jet bombers and other sophisticated vehicles in space, today's aircrewman must be both mentally and physically prepared to confront the various physiological hazards which might be encountered during any routine mission. It is the responsibility of physiological training to prepare the man so that he can survive at high altitude should his standard equipment fail to function properly."

The captain breaks down the mission this way: 'a thorough indoctrination in physics of the atmosphere, respiration and circulation, hyperventilation, hypoxia, decompression sickness, pressure breathing, cockpit pressurization, problems of vision, sensory illusions and spatial disorientation, oxygen equipment, ejection seat and canopy removal, bail-out and related survival equipment, parachute training and various types of altitude chamber flights.

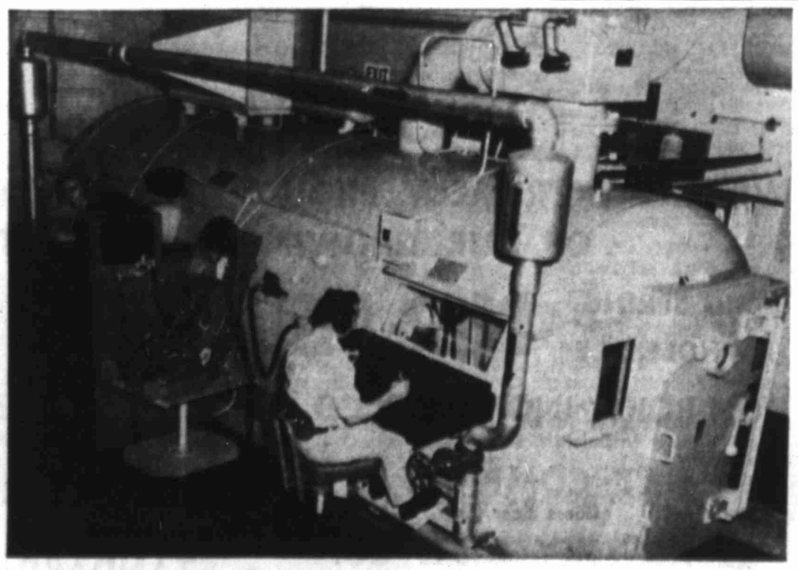

TRAINS ALL

The physiological training unit trains all student pilots going through training, the permanent party aircrew members, the 331st Fighter Interceptor Squadron, and personnel of all other bases located within proximity of Webb, such as Goodfellow, Dyess, and Biggs Air Force bases. The unit also provides special training for Federal Aviation Agency personnel. P. W. Malone, M.D., a Big Spring surgeon, completed this training, because he is the FAA flight medical examiner for the Big Spring area.

Capt. Wilson has been with the unit since December, 1961. He is assisted by Capt. Larry Klinestiver. Non-commissioned officer in charge of the unit is T. Sgt. Bobby D. Eiland. His assistant is T. Sgt. Chester A. Drennan, who is in charge of the chamber and ejection seat maintenance and supply.

Other personnel include: S. Sgt. Earl T. Colwill, in charge of the administration section; S. Sgt. Benjamin Hatfield, in charge of training and on-the-job training; Airman 1.C. Earl H. Barrington, in charge of parachute training; Airman 1.C. William N. Owens, airman in charge of administration; Airman 1.C. James R. Dallas, in charge of ejection seat training. Physiological training specialists include: Airmen Dale Fage, Vincent Cyr, Jim Aziz, and Joe Schalk.

"Dreams of outer space travel are reality today," said Capt. Wilson. "Aviation physiology is, and will be, the return trip ticket."

Compression Chamber

The compression chamber at the physiology training unit at Webb looks like this from the outside. Chamber operators observe through plate glass windows reaction of trainees during gradual compression and rapid decompression.

On Your 13th Anniversary

MAY 8th

We at McGIBBON OIL COMPANY want to say "thanks" to the men and women at Webb Air Force Base – first on the front line of our defense system.

Because of the alertness, instant response to any situation, and constant dedication of men and women such as those at Webb, America can feel proud and secure.

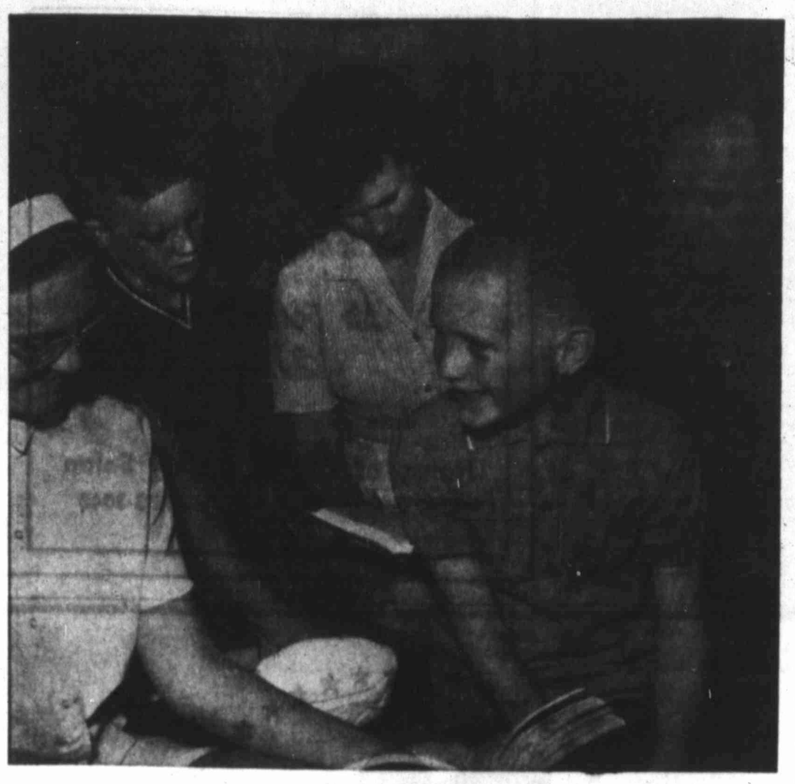

With their continuing devotion to duty, the Webb personnel make the first line of defense a triumphal deterrent to aggression.

Family Studies Sunday School Lesson Together

Mr. and Mrs. Cal D. Lowry, at back, and three children, LuAnne, left, Cal Jr. and Phillip David, attend St. Paul Presbyterian Church together, and all are active.

Sporting Activities Claim Large Part Of Lowrys' Time

"One of my best hobbies is watching the Big Spring Steers play football," Cal D. Lowry, physical training director for the 3561st Student Squadron said. He played football with a U. S. Marine team in Pearl Harbor while he was with that outfit from July, 1945 through December, 1947. He was non - commissioned officer in charge of special services — athletics.

Lowry was reared in Fort Worth and was graduated from Polytechnic High School, and from Texas Wesleyan College. He was married there in 1949 after he left the service.

He and his family moved to Big Spring last August, and have three children in school. LuAnne, 13, is a seventh grader at Runnels Junior High School. Cal Jr., 11, is a fifth grader at Washington School, and Philip Daniel, 7, a first grader at Washington.

The Lowrys are active in the Washington Place Parent-Teacher Association, and she has been for several years. She is past president of Forest Hill Chapter of the P-TA in Fort Worth, and a life member of the Texas Congress of Parents and Teachers.

All members of the family belong to St. Paul Presbyterian Church, where Lowry is sponsor of the College and Senior High School Fellowship, and has substituted as a teacher of an adult Sunday School class. Cal Jr. takes part in the youth camp activities, and in the youth choir.

Lowry has coached the Gra-Y basketball team at the YMCA and was co-coach of the Washington Place team. Cal Jr. was a member of the Gra-Y team, and of the Little League Star Fighters, made up of Runnels Junior High seventh graders.

The training director is an active member of the Flying Tumbleweed Toastmasters at Webb Air Force Base, where he has been a consistent participant in programs.

He has also been a member of the Deer Creek Lodge, No. 510 AF&AM; Texas Chapter, No. 362, R.A.M.; Texas Council 321 R.&S.M., and Worth Commandery No. 19, Knights Templar, all of Fort Worth. Lowry said he intends to transfer membership to Big Spring in the near future in order to complete his community affiliation.

"We like our work in the church here in Big spring, and in all other organizations," he said. "We find that people here are easy to get acquainted with, and make us feel at home immediately. While I have not been too active in the Parent-Teacher Association here because it meets in the afternoon instead of night, I enjoy taking part in whatever community activities I can find time for."

The Lowry family owns its home at 2401 Carlton Drive.

Prepare The Man Slogan Continues

Prepare the man! That's the slogan of the Air Training Command.

No organization would think of launching a campaign for the marketing of a product, unless it had the facilities for satisfying the demand created by a campaign. Nor would the Department of Defense think of adding new weapons to the Air Force inventory without preparing the men to man the weapon.

Successful defense of this nation then not only depends on the missiles, aircraft and spacecraft but on the men who will use them.

The Air Force believes that if every man is prepared for the job which he is assigned the element of failure will be reduced to the absolute minimum. Progress in the field of technology is moving along at a terrifying rate; it is moving in so many directions that it is impossible for any one man to keep abreast of all developments.

The Air Force cannot hope to prepare a man to qualify in more than one or two of these fields . . . and if in two fields, they must be allied.

So specialized have these fields become that the Air Force now must have one group of specialists who do nothing more than study and evaluate trends.

Other groups of specialists are busy designing vehicles capable of outperforming anything a potential aggressor might come up with. Once the design has been accepted it is turned over to other specialists in manufacture, who build the vehicle.

The next step is to turn the vehicle over to the test pilots—another specialized g o o u p. These test pilots put the vehicle through its paces. The new vehicle will undergo rigid testing. If any malfunctions are found, the modifications are ordered and corrections are made. The testing then begins anew.

Only when the vehicle stands the test is accepted and added to the Air Force inventory. Here, a new group of specialists take charge of the vehicle.

If it's an aircraft designed for pilot training, such as the T-37 or T-38, the plane is assigned to one of the eight Undergraduate Pilot Training Bases in the Air Force. One of the UPT bases is Webb Air Force Base.

At Webb a staff of competent pilot instructors teach student pilots to fly.

Every six weeks a new class of students arrive for pilot training. After preflight the students go to the T-37 for their primary flight training and then take their flight training in the supersonic T-38 Talon. The training program is for 55 weeks.

Formerly, the student had to spend his first weeks at Lackland AFB where he received preflight. Then he was sent off to a primary-contract air base where he attended a five and a half month flying course.

Upon completion of the primary course he was sent to one of the basic schools for another five and a half months. There he completed his flying training and was awarded his certificate and his silver wings.

The old system involved three separate moves of the entire class. Under the UPT concept there is only one move and the student learns from preflight to graduation at one base.

Ground, Air Safety Welded Into One Unit

In years past the areas of flying and ground safety at Webb AFB have been widely separated, but today they are welded together for one purpose, mission accomplishment without accident or incident. Both are now under the direction of one staff agency, the chief of safety.

Unity of these agencies is necessary in the present day Air Force because of the ultimate goal to train pilots to fly supersonic aircraft. The safety of pilots and aircraft is foremost because of the necessity for him to leave his quarters, accomplish a flying mission, and return safely.

To promote safety is of equal concern to flying and ground safety. Today, the new pilot is taught the philosophy of accident prevention for his protection, regardless of whether he is driving to the flight line or flying at supersonic speeds. Modern day modes of transportation, both on the ground and in the air, dictates a need for up-to-date information about accident-cause factors. This is where flying and ground safety combine resources to keep both flying and non-flying personnel informed. Also, flying and ground safety have a mutual interest in the maintenance that keeps the aircraft in 100 per cent flyable status.

Accident prevention is an endless operation, which is as important in social lives as on duty. Consequently the pilot, mechanic or administrative technician are all informed of the importance of conducting themselves in a way that will prevent them from being the cause of an accident any place.

Col. Preston Guides 3560th Sq.

The 3560th Pilot Training Squadron at Webb AFB is commanded by Lt. Col. Thomas Preston, assisted by Maj. Paul M. Jenks, squadron operations officer, and Maj. Donald F. C. Patton, assistant squadron operations officers.

The primary mission of the squadron is to train and educate student pilots in all phases of pilot training—transition, instruments, navigation, and formation—that will qualify him as a rated officer.

Since August, 1964, the squadron has consisted of eight flights designated: Hammer, Hatchet, Axe, and Sledge, T-37 flights; Falcon, Jaguar, Tiger, and Eagle, T-38 flights. Commanders of the eight flights are: Axe, Capt. Charles Jansen; Hammer, Capt. Robert Hurst; Hatchet, Capt. Vincent Bakies; Sledge, Capt. James Redden; Falcon, Capt. Carl Densch; Jaguar, Capt. Charles Luther; Tiger, Capt. Marvin Zepf; Eagle, Capt. James Day.

Student classes arriving at Webb are split so that half receives its training in the 3560th Squadron and the rest receives its training in the 3561st Squadron. The eight flights are responsible for the training of 50 per cent of the students assigned to Webb. A student class graduates approximately every six weeks and, as a result, the squadron is flying in every phase of the flying curriculum.

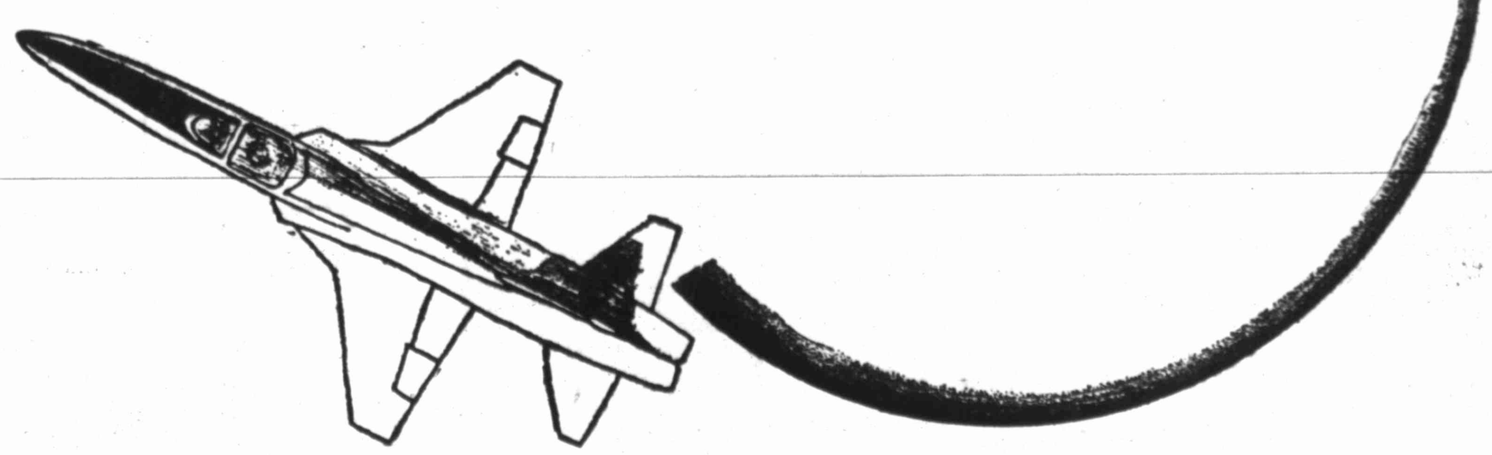

Each instructor pilot in the squadron is responsible for the training and supervision of two to four student pilots per class. Since each flight trains two classes per year, the individual instructor trains approximately four to eight students per year.

The squadron actively participates in all types of base activities including inter - mural sports. The softball season is now under way and the squadron boasts an undefeated team in the softball league of the Big Spring Association.

A SPECIAL NOTE OF PRAISE...

from HCJC to WAFB

Webb Air Force Base students are among the best we have the pleasure of meeting and knowing. Their hard work and diligence attest to the outstanding character of the members of the WAFB Defense Team . . . and for the high standards they have set for themselves, Howard County Junior College extends a special note of thanks.

HCJC
Howard County Junior College

Chapel Serves All Faiths

The chapel at Webb AFB seats over 300 and serves as the spiritual center of the base. Protestants, Catholics and Jews have a regular schedule of worship services and Sunday school.

Although there is no Jewish chaplain assigned to Webb, the members of this faith have consolidated their spiritual activities under a lay reader in Big Spring. High Holy Day services are conducted by visiting Rabbis at the base chapel.

The chapel program at Webb is designed to provide religious services, religious education, and personal counseling for assigned personnel and their families. The chaplains have organized and carried out a planned program of pastoral visitations. Choral programs, sponsored by choirs from Texas Tech, San Angelo College, Southern Methodist University, and North Texas State University, have been a part of the cultural program of the chapel. Spiritual life conferences for Protestant personnel, and retreats for Catholic personnel are also sponsored annually.

The chapel program is under the supervision of Lt. Col. B. F. Meacham, the base chaplain. He is an ordained Methodist minister with many years' experience in the Air Force. The present Protestant chaplain is 1st Lt. William Warren.

The Catholic program is presently under the direction of Capt. Thomas Holland who came from Turkey.

Both the Protestant and Catholic groups have choirs. There are also organizations for men, women, and young people of both major faith groups: Protestant Men of the Chapel, Protestant Women of the Chapel, Protestant Youth of the Chapel, Catholic Holy Name Society, Catholic Ladies Sodality of Webb, and the Catholic Youth Organization.

Religious missions were conducted this year by Rev. Hughes, Catholic, and Dr. J. B. Holt, Protestant, professor of Missions in Perkins School of Theology, Southern Methodist University.

Y PRESIDENT CHATS WITH GENERAL SECRETARY
James Tidwell confers with Curt Mullins

James Tidwells Do Double Duty

The James Tidwells are one of those double duty families—they both work at Webb AFB and both are active in community affairs.

He has been in the engineering section at Webb for the past eight years, and she has been perhaps the best known female voice on the base as the wing commander's secretary.

NATURALLY

As for their participation in the community, this might come naturally, for both of them were reared in Big Spring and were schoolday sweethearts.

Tidwell is president of the Big Spring Young Men's Christian Association, serving his second term in this capacity. He also has had a five-year hitch on the Y board, serving in about every committee capacity it is possible. Soon after his return to Big Spring, he was caught up as one of the workers in the capital funds campaign. For several years he was a key figure in the Y membership campaign. He also serves as a trustee on the United Fund.

He filled numerous offices in the Downtown Lions Club, serving as president during 1962-63, establishing one of the best records in the club's history.

Somehow, out of this busy schedule he finds time to serve as manager of a Little League team (the Yankees of the National League) on which their son, Steve, 12, plays. Tidwell also is a football official and in the autumn, calls games throughout this area. When he has any time left, he tries to squeeze in a little fishing and hunting.

T&P

Tidwell is a native of Iredell, moving here in 1936 when his father took a job with the Texas & Pacific Railway Co. That was in December, and they came from New London where, in the following spring, the school building blew up killing scores of his former schoolmates.

He participated in high school athletics and was graduated in 1942 from Big Spring High. After one semester at Texas A&M, he enlisted in service as a Navy cadet for pilot training. On June 6, 1943, he and Joyce Martin were married in Hutchinson, Kans., but their plans to be together when he was sent to Corpus Christi went awry when he was dispatched instead to Pensacola, Fla. The program ran into a log jam and he hurried to Texas after hearing that the Army was snapping up pilots.

It wasn't so, so he got on as an instructor for a contractor training military pilots. Later, when he did get his call as an Army aviation cadet, he had had over 1,600 hours flying time to his credit before he ever began. The Army assigned him to Enid, Okla., as a B-26 instructor.

SPORTS

Out of service, he went to Sul Ross College and played football, baseball and basketball, then spent a year playing pro baseball under Pat Stasey, who had the Big Spring club. His baseball love came naturally, for his late father-in-law, Floyd (Pepper) Martin was a baseball man from the word go. Subsequently he tried a tour with the T&P as a railroad fireman.

However, he was determined to become an engineer and reentered A&M and got his degree in 1951. For a time he worked with Forrest and Cotton, Dallas consultants, and then formed a partnership with Louis Jean Thompson, going later with the highway department, then with United Concrete Pipe Company here and Odessa before joining the engineer's section at Webb where he is in charge of plans and construction. He is a member of the Texas Society of Professional Engineers and American Society of Civil Engineers.

The Tidwells are members of the First Methodist Church. Joyce was working in the training section when she was tapped out to succeed another Joyce—Joyce Croft Williams — to become the secretary to the commander under Col. Charles Young. She has held this post successively under Col. Donald Eisenhart, Brig. Gen. Howard Withycombe and Col. A. F. (Gus) Taute Jr. She is about as conversant as anyone except the commander on what goes on at the base.

ALSO ACTIVE

She is a member of the Pot Pourri Club and she and her husband belong to a couple of bridge clubs and the Cotillion Club. Until the press of duties prevented, she was a member of the National Secretaries Association and a number of other clubs, as well as helping in Cub Scouts and with the Y swimming team.

The Tidwells live at 1209 Pennsylvania where they own their home.

First Trained Bombardiers

Webb AFB was known during WW II as the Big Spring Army Air Field and its mission was to train bombardiers. At war's end the airfield was closed as a military base and the property reverted to the City of Big Spring under a lease agreement. Most of the structures on the field were either sold or removed.

In mid-1951 negotiations were again opened between the city and the Air Force for leasing the property in connection with the activation of a new training wing for pilots. Lease agreement for the property was signed Oct. 1, 1951 and the base was offically designated as Big Spring Air Force Base.

The first cadet arrived at Webb March 28, 1952 from Perrin AFB.

ARMED FORCES DAY

Best wishes to the entire personnel of Webb Air Force Base.

Vital Weather Reports Made

The mission of Detachment 17, 24th Weather Squadron at Webb AFB, is to provide meteorological support for the 3560th Pilot Training Wing and the 331st Fighter Interceptor Squadron. To fulfill this mission, around the clock weather observing and forecasting service is provided.

The weather detachment includes two officers and 21 enlisted men. Capt. Alexander J. Chamberlain is the commander.

The unit is divided into three working sections. The surface observing section is responsible for taking representative weather observations of all meteorological data.

The forecast section is responsible for preparing 24 hour forecasts for Webb, issuing severe weather warnings when necessary, providing weather information for transient aircraft and monitoring the weather radar.

The maintenance section is responsible for the maintenance and repair of weather equipment. Included in this equipment are the weather radar, wind speed and direction measuring device, electronic temperature and humidity measuring device and the rotating beam ceilometer (a device which measures the height of cloud bases).

a salute to w.a.f.b.

Retiring Soon, To Stay Here

The last day of May this year will mark an important date for T. Sgt. Noel Stuller and his family, for that day will begin his retirement from military service after 24 years of duty.

The Stuller family plans to remain permanent residents here after their retirement, at 2308 Marshall Drive.

Activities at their church, Kentwood Methodist, have come to play an important role in the family's life here.

Sgt. Stuller is chairman of the church's membership and evangelism commission, serves as an usher and is an assistant Sunday School teacher for junior adults.

As chairman of the commission, his work involves contacting newcomers to Big Spring and welcoming them to the city, assisting them when possible in finding a church home.

Mrs. Stuller helped organize the junior Methodist Youth Fellowship at the church, which started with only three members and has grown to include 18 young persons. She also is a Sunday School teacher, for a class of three, four and five-year-old children.

She was named vice president of the Women's Society of Christian Service at the church.

The family includes a 10-year-old daughter, Sandra Lynn, a student at Washington Place school. Sandra is active in Girl Scouts.

A native of Oklahoma City, Sgt. Stuller is administrative supervisor for the chief of maintenance at Webb.

His Air Force duty has included four periods of service at Tinker Field, Oklahoma City. Other assignments have included three years in communications work with Air Force Headquarters, Washington, D. C., three years at Kisarazu, Japan, two years at Little Rock AFB and then a three and a half year period at Evreux, France, as administrative supervisor for the base comptroller. In November, 1963, he was transferred to Webb.

In France he helped with organization of Pony League and Little League baseball groups during off-duty time and then served as an umpire for the leagues.

Two Webb Jets Break Barrier

Webb Air Force Base has two types of jet aircraft capable of breaking the sound barrier and creating a sonic boom. One is the 331st Fighter Interceptor Squadron's F-104 Starfighter and the other is the 3560th Pilot Training Wing's T-38 Talon.

Despite the fact that these aircraft can break the sonic barrier, neither the T-38 or F-104 pilots are permitted to do so while flying in the local area.

All supersonic aircraft pilots are under strict orders to fly at speeds in excess of sound only with certain limited areas which are distant from cities and towns.

Even when flying in these areas, generally in the vicinity of Fort Stockton, pilots must maintain an altitude of 30,000 feet.

The boom is a natural sound phenomenon, and is the direct result of flying above Mach 1—the speed of sound.

This sound is not a burst as heard in an explosion. It is a continuing sound. What actually happens is shock waves are dragged along the flight path as long as the aircraft remains above the speed of sound.

There are several factors which contribute to the pressure of the waves at ground level—speed, altitude, atmospheric conditions, size and shape of the aircraft. The bigger and bulkier the aircraft, the bigger the boom.

Tests have shown even poorly constructed buildings do not suffer from pressures of less than 70 pounds per square foot. This is well under the normal ground pressure resulting from a boom.

FAMILY NIGHT AT THE BROWNS
Kathy 4, Mrs. Brown, Susie 2, and Capt. Wilbur Brown

Unique Family Meeting Held Weekly By Browns

Capt. Wilbur R. Brown and his family have a unique family gathering each week.

It is called family home evening and once a week Capt. Brown, his wife Betty, and two children, Kathy 4, and Susie 2, have a discussion of the Bible, or church work, sing and have refreshments.

Capt. Brown is a deacon in the local Church of Jesus Christ of Latter Day Saints, and Mrs. Brown is active in the relief society. Capt. Brown attends priesthood meetings and is active in the home teaching program.

"The home teaching program is a program of the church in which we visit various homes of church members and study teachings of the church," said Capt. Brown.

He explained that the relief society aids in the church's building fund with pie and cake sales to raise money. This money is then contributed to the building fund.

A native of North Carolina, Capt. Brown and his family have been here five years. He is a pilot-instructor with the 3561st Squadron at Webb and will be leaving for Viet Nam in September.

A member of the Talon Toastmaster's Club, Capt. Brown is enthusiastic about the work of the club.

"The program is to improve your ability to communicate to an audience and it has really helped me," said Capt. Brown.

Not content to be active in church affairs, Capt. Brown is an accomplished pistol marksman and was a member of the Western Sportsman Club and on the Webb pistol team for several years.

He is in the process of restoring a 1959 Austin-Healy sports car to its original beauty. This is quite a task as some of the parts are not easy to get.

"It was in bad shape when I first got it, but it is coming along now," he said.

Capt. Brown is also a golfer but admits he is just a duffer. He also is active in the Big Spring YMCA taking full advantage of the handball courts to stay in shape.

In 1963, Capt. Brown was the squadron representative for the Kennedy Memorial Library Fund. It was his responsibility to see that all members of the squadron had a chance to donate to the library fund.

Well-Rounded Scout Units

The Scout program at Webb AFB is complete and well-rounded.

There are Cubs for younger boys; Scouts for intermediates; Brownies for younger girls; Girl Scouts for intermediate girls, and Explorers for older boys.

The institutional representative is Lt. Hollis I. Marshal; S. Sgt. D. F. Thomas is scoutmaster; and S. Sgt. R. L. Keller is packmaster. There are about 150 active members of the Webb scouting movement. The troops are active in all phases of scout work, but the high point is the annual summer encampment in the Davis Mountains. The boys finance their trips by selling refreshments at the annual Armed Forces Day open house.

The Girl Scout activities include camping trips, merit badge work, and other scouting activities. The girls also engage in one special project in the Base Round - Up during Girl Scout Week. They also volunteer for work in the base hospital. There are about 160 girls in the various Girl Scout units at Webb.

Keeps Training Up To Par

In the complex training program such as that conducted at Webb AFB, the deputy commander-training (DCT), who is Col. Edwin J. White Jr., has the responsibility for the overall conduct and quality of training that all students receive. In order to accomplish his assigned responsibility, the DCT utilizes the services of one of his primary staff agencies—the stan-eval division.

The division is composed of two branches, the T-37 Branch and the T-38 Branch. Each branch is manned by four flight examiners, who are also instructor pilots. The chief of the division, Maj. George Aubry Jr., maintains currency in both the T-37 and T-38 aircraft and is responsible for the overall conduct of the standardization program at Webb AFB.

Other members of the division are: T-37 Branch, Capt. David D. Chamberlin, chief; Capt. Edmund H. Crandall, Capt. Timothy L. Thomas, and 1st Lt. Larry L. Shane. T-38 flight examiners are: Capt. Eric E. Miller, chief; Capt. Frederick D. Parent Jr., Capt. Eugene O. Westback, and Capt. Harvey L. Kimsey.

The standardization program is the primary means by which the commander maintains quality control of our training and by which he is continually advised of the current status of flying training at Webb. In order to keep the commander advised, stan-eval division conducts check flights and evaluates all instructor pilots in the contact, navigation phases.

Congratulations on Your 13th Anniversary

Thank you for being here in our community.

BAPTIST TEMPLE

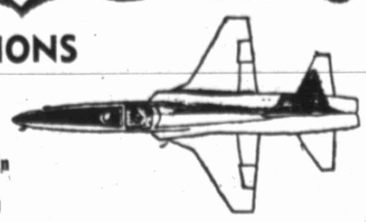

Plan Church Activities

The Noel Stuller family has found an active place in the program of the Kentwood Methodist Church since their assignment to Webb AFB. T. Sgt. and Mrs. Stuller here join with their daughter, Sandra Lynn, in planning a Bible School program for the church.

CONGRATULATIONS WEBB

On Your 13th Year In BIG SPRING

May we join in and say congratulations and give a special salute to you, the men and women of WAFB. We are extremely happy to have you in our town and community. For the past 13 years we have enjoyed being good neighbors and friends with such fine people as those who are serving at WAFB. Drop by and visit with us at any time you wish.

CONGRATULATIONS WAFB

On Your 13th Anniversary

In a world where the most remote points are only missile minutes apart, we are thankful for an Armed Forces that has the dedication, ingenuity and persistence to do the best job possible under any condition and staying on top of every situation.

Olsens Support Youth Activities

Mrs. Kenneth Olsen's association with Webb AFB has lasted longer than that of military personnel stationed there. She joined the Webb operation as a civilian employe April 4, 1952, and worked in various departments before being assigned to her present position in the commercial services branch of the accounting and finance office.

Mr. and Mrs. Olsen make their home at 1805 Settles with their three children, Richard Kenneth, 16, Linda Gail, 14, and Patricia Kay, 13. Olsen is manager of a finance company and a member of the Retail Credit Association.

Mrs. Olsen is not a "joiner," except that she and her husband are members of the Choir Boosters Association and the family is affiliated with the First Christian Church. Their children are more active than many, and most of her spare time is spent in support of their activities.

Richard, a sophomore at the high school, is an Explorer Scout and a member of the TABY bowling team and the high school golf team. He is learning the fundamentals of business by having a paper route. Linda, a ninth grader at Goliad Junior High School, is a serious art student, and her sister, Patricia, is studying piano and is a member of the Goliad Choir and the National Honor Society. Both are Rainbow Girls. When the youngsters were in grade school, Mrs. Olsen took active part in the Parent-Teachers Association and served her turn as Cub den mother and worker in the concession stands during Little League baseball games.

When there is leisure time for Mrs. Olsen, she sews clothing for herself and the girls and plays the piano which she studied for many years. Her husband relaxes by participating in two bowling leagues.

Large AFA Squadron Is Organized

Big Spring has a 300-member plus Air Force Association under the command of Lester Morton.

The local association received its charter in March, 1964 and although it was organized only a month before, it became the fourth largest squadron in the state.

Purpose of the AFA is to keep informed on the progress of the Air Force and to know its problems. It also is to act as a liaison between the Air Force and the public.

Membership is open to any one interested in the Air Force. For $6 a year, an individual receives his membership and also gets a subscription to "Air Force and Space Digest," a magazine put out by the association each month.

The wing headquarters of the AFA is located in San Antonio.

Of the $6 membership fee, $4.50 stays with the local unit and $1.50 goes to national headquarters in Washington, D. C. Local funds enable the association to secure informative programs and to conduct informative projects.

Like Rural Living

Standing with Sgt. and Mrs. James R. Bayer are their oldest children, Katharine 13, and James Jr., 12. Sitting, from left, are Mary 8, John 10, Sharon 4, Jerome 9, and Theresa 6.

Bayers Like Square Dancing, Doing Things As A Family

When the conversation gets around to "squares" at the James R. Bayer residence, they are talking about dancing.

M. Sgt. and Mrs. Bayer are members of the Howard County Hoedowners and have been to area dances at Snyder, Abilene and other cities. They are also members of the Westerners Square Dance Association, an organization embracing all clubs.

The Bayers learned to square dance while he was stationed at Wichita Falls, and they have pursued the hobby since moving here in March, 1963.

Sgt. Bayer is assigned to the airborne communications unit in the 3560th Field Maintenance Squadron at Webb AFB. His work consists of repair to the electronic equipment used in the training organization.

The sergeant is a native of Waco and plans to make his home there when he retires.

Meanwhile, however, the family has bought a small place on the Gail Road, where they have a cow, chickens and some guineas, as well as household pets.

Rural living suits the youngsters in the family just fine—all seven of them. The children include Katharine, 13; James Jr., 12; John P., 10; Jerome, 9; Mary, 8; Theresa, 6; and Sharon, 4.

Katharine attends Runnels Junior High, and the other school-age children attend Boydstun Elementary.

Mrs. Bayer is a member of the Boydstun P-TA, but it meets in the afternoon and Sgt. Bayer cannot make the meetings. He, however, attends classes at Howard County Junior College in manpower management, to improve his career standing with the Air Force.

The family spends a lot of time together, Sgt. Bayer said, fishing and other outdoor activities, including rock hunting. Jerome particularly is an avid rockhound.

The Bayers attend St. Thomas Catholic Church.

The sergeant has served stints in Japan, Korea, Iceland and Alaska.

Speed Advanced During The 50s

The 1950s were a decade of advance in aircraft speeds.

In 1950, a bomber flew at 400 miles per hour. Bombers in use in 1960 had speeds of 1,300 miles per hour. Fighter planes in 1950 could claim records of 600 miles per hour. In 1960, they boast 1,500 miles per hour. Even transport planes have made strides. From 350 miles per hour in 1950, they now fly 650 miles per hour.

Holds Classes In Maintenance

The 420A Field Training Detachment's mission at Webb AFB is giving maintenance instruction to pilots and maintenance personnel of the 331st Fighter Interceptor Squadron and the 3560th Pilot Training Wing. Instruction is presented involving the T-37, T-38, and F-104. Other classes are also offered, including navigation, communication, pneudraulic, electrical, as well as assistance in the base's on job training program.

The unit has been based at Webb since January, 1960 and is presently commanded by 1st Lt. Billy J. Hawthorne. The detachment's strength is 17 airmen and one officer.

All detachment personnel have been previously trained at Amarillo Technical Training Center and are considered experts in their field.

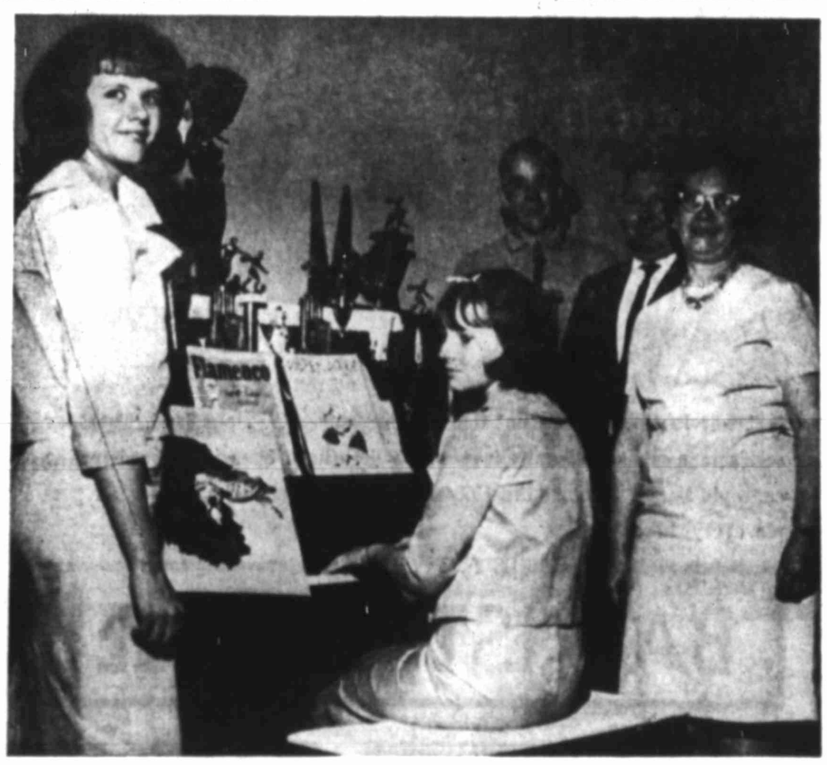

Doubled Size

The 1940-41 mobilization of the Guard immediately doubled the size of the Army. Nearly 80,000 Guardsmen were commissioned officers by the time they left active service.

Colors Returned After The War

At Arlington, Va., the Colors were symbolically returned to the states by President Harry S. Truman on Nov. 11, 1946. As he launched the post-war National Guard into the era of the Cold War, he said, "I return these colors to the National Guard. I hope they will use them to train young men in the interests of peace and in the welfare of the country.

"And," added the one-time captain of artillery of the Missouri National Guard, "I am sure they will do just that."

Teenagers On The Go

The three teenagers of the Kenneth Olsen household personify the new generation that's always on the move. Mrs. Olsen, a long-time employe in the Commercial Services Branch at Webb AFB, and her husband, manager of the Jet Finance Company, plan their leisure hours to be available if assistance is needed with the young people's activities. Shown with their parents are Linda, 14, Patricia, 13, and Kenneth, 16.

Observance Has Had 4 Slogans

The Armed Forces Day observance has emphasized the basic concept that national security and a free way of life depend upon the power which comes from teamwork and national unity.

The 1950 slogan was "Teamed for Defense," in 1951, "Defenders of Freedom," and in 1952 "Unity — Strength — Freedom." The 1953 observance was keyed to the fact that the Armed Forces of the United States represented "Power for Peace" — a slogan so appropriate to the national policy that it has been retained each year since.

Date Set By Proclamation

A presidential proclamation of March 5, 1957, proclaimed the third Saturday in May of each year as Armed Forces Day.

A Department of Defense directive issued in November, 1957, to implement the proclamation, provides the basic authority for Armed Forces Day and reaffirms the policy of the Department of Defense with respect to observances which have significance for the services individually.

ARMED FORCES DAY

Congratulations
WAFB
On Your 13th Anniversary

Let us pause
on this
day and pay
tribute to all
the men
and women
of our
