TEXANS LETS TALK TEXAS

The Scurry County Times AND SNYDER SIGNAL

OFFICIAL NEWSPAPER FOR THE CITY OF SNYDER AND SCURRY COUNTY

WEST TEXAS' LARGEST WEEKLY NEWSPAPER

SNYDER, TEXAS.
—The busiest small city in West Texas, inhabited by the busiest people living and the best in the world!

VOLUME XLIII — SNYDER, TEXAS, THURSDAY, JULY 25, 1929 — NUMBER 6

4-H BOYS OF SCURRY COUNTY HOLD FINE CAMP IN SNYDER

Entire Gang Visits Times-Signal Office; Enjoys Other Fine Things

Seventeen communities in Scurry County were represented at the first annual 4-H Club Boys Encampment that held a two-day session here starting last Thursday morning. More than one hundred boys joined in the camp that was held at Wolf Park and enjoyed the sessions in great shape, all of whom took conservative efforts to enjoy the work and play that had been arranged.

Communities that were officially represented, according to County Agent Logan's records, were:

Pyron, Hermleigh, Dunn, Turner, Crowder, Ennis Creek, Fluvanna, Camp Springs, Pleasant Hill, Plainview, Ira, Bethel, China Grove, Canyon, Bison, Snyder and Loyd Mountain.

In the contests to escertain who would be the four boys to take a free plane ride, Holbert Rosson of China Grove, was one, winning on a hog calling contest. John Henry Trussell, Fluvanna, won a ride by being voted the most popular boy at the camp. Wilson Ross and Curtis Jeffries won their rides in a drawing contest held Thursday night at the Wolf Park Auditorium when a short program was put on by a number of Snyder young people.

Six winners were announced in the dairy judging contest with S. D. Hays Jr. winning first prize. Other winners were Edward and Algee Stevenson, Martin Murphy and J. T. Beavers.

County Agents C. M. Heald of Abilene and Knox Parr, Garza County, with Poultry Expert J. B. Dennerson of Abilene co-operated in the two-day meeting.

Thursday morning was registration time, and the boys enjoyed themselves at various pleasures until the noon hour, when they had their lunch. Following lunch they marched in double column to the public square where they were given an official welcome by C. F. Sentell who gave every key that Snyder owns to the boys, and the "gang" surely responded with an ovation following his talk. For the boys, John Henry Trussell responded in a boyish fashion, and while young Trussell has won no oratorical medals yet, he represented that fine group of young citizens nobly and well. Short talks were given by Pat Bullock, O. P. Thrane and Judge Horace Holley.

Following the welcome, the entire group paid their official respects to the Times-Signal, every one of them registering, meeting the entire force, after which the big newspaper press was placed in operation with a copy of the paper being given to each and every boy.

Those registering at the Times-Signal included:

Lonie Johnston, D. Brock, Ulmer Vernon, Wilson Ross, Hugh Merritt, Geo. Trousdale, Charlie Johnston, Roy Casey, W. S. Goodlett, Harvey Bates, Jim Sterling, Joe Green, Dulane McMullan, Willis Green, Ferrell Coston, Jeff Faver, Raymond Worrell, L. M. Reed and Marion Tarter.

Leslie Gibson, Essie Ryan, Algie Stevenson, Iverl Johnson, John Henry Trussell, Ambrose Trussell, Neil Soules, Andrew Graham, Pete Kachlinger, Gordon Stevenson, J. R. Mims, Edward Stevenson, Buford Light, Boles Fry, Otho Gilmore, Elmer Faver, Elmer Rhodes, L. A. Berry and Leland Light.

Jack Watson, A. J. Grubbs, Pete Hodnett, Avery Soules, Bud Merritt, Floyd Fowler, Dickson Bills, Lanis Cobb, Reuben Goodlett, Billie DeShazo, Freddie Minor, Robert Groves, Lester Turner, J. T. Beavers, John Truss, Ernest Laster, Charlie Drennan, Autry Light, Fred Drennan, Stanley Merket, Dick Hanna, Charlie McKinney, Bob McKinney, Troy Bowen, W. A. Laster, Earl Bullock, S. D. Hayes, Robert Mitchell, Benjamin Parmer, E. L. Jones, Martin Murphy, Joseph Goodlett, J. C. and Jack Witherspoon, Charles Binion, Conway Peterson, Weldon Birdwell and Ted Pitner.

Eldon Birdwell, Odell Fuller, Willis Huckleberry, W. T. Falls, Johnie Jordan, L. A. Crenshaw, Orville Taylor, Ray Woody, Elmer Prather, J. A. Merritt, Raymond Prather, Holbert Rosson, Charlie White, Odell Kinney, Kenneth Pitner, Travis Fowler, Roy Lee Merket, Alexander Gillis and S. B. Taylor.

Weldon and Curtis Jeffress, Royce Eiland, Walter Minton, Robert Bond, C. L. Moore, Paul Crumby, J. W. Green, Crowley Gardner, Jetty Hanback, John Trousdale, Jack Irion, J. C. Fields, James Davidson and Johnnie Crabtree.

Following the visit of the boys at the Times-Signal, County Agent Logan took the group to Wolf Park where they enjoyed a fine swim, during which a fine shower came up to cool things off and to add further smiles to everyone present.

During the early evening, following a pot-luck supper, several boxing bouts were enjoyed in which there was very keen competition. A hog-calling contest preceded the boxing bouts with Holbert Rosson winning first place. Harrie Winston and Lee Grant were present and attempted to show the boys how it was done, but judging from the tones they let out, both of them either had sore throats or a misplaced larynx. At least the gang thought so.

Then followed a short program in the auditorium with Miss Eula Pearl Ferguson rendering a piano selection that pleased. Miss Louise Wilsford gave a beautiful dance number, following which Miss Lucille Brown gave a most pleasing reading that put the boys in the right shape. Miss Mary Janet [illegible] closed the program with a dance. Every number was enjoyed by [illegible] more than 300 folks who were present. Pat Bullock gave a short address in which checks were presented for the Lions Club to the two boys who won in the special calf club program last spring. Borden Gray won the first prize of $10, and as he was not present, County Agent Logan acted for him. J. T. Beavers won second prize of $5, which he accepted graciously.

Then came the big surprise of the evening, a visit to the Palace Theatre where many of the boys enjoyed for the first time a 100% "talkie." This gift was made possible by Stinson Dry Goods No. 1, the Snyder National Bank, the First State Bank & Trust Co., Caton-Dodson Dry Goods No. 2, G. Towle and the Times-Signal.

Credit for the remarkable success of the encampment are due County Agent Logan and the folks whom the boys want to thank for their good times is contained in a resolution appearing in this issue.

Fifteen to Attend Short Course at College Station

Winners in Local Contests to Attend Annual Farm Program

Miss Jessie Lee Davis, home demonstration agent, has announced that ten girls and five women, all Scurry County boosters, were winners in the annual club women and club girls contest that was completed last week. Miss Myrtle Murray, district agent, of Lubbock assisted in determining the winners. The winners and delegates will leave with Miss Davis on the midnight train Saturday to go to College Station for the Short Course at A. & M. College.

More than 100 farm women and girls were entered in the contests with the Hud community securing five of the winning places. A style revue held during the afternoon nearly filled the county court room.

Winners as announced by Miss Davis are:

Mrs. Oscar Coston, Camp Springs, county winner in the dress contest for women.
Mrs. J. R. Truss, Fluvanna, butter scoring and judging.
Mrs. James Beavers, Camp Springs.
Miss Esther Bearden, Union.
Mrs. J. W. Wade, Gannaway.
Miss Lera Mae Cook, Hud.
Miss Lucile Harden, Hud.
Miss Esther Fambro Loyd Mt.
Miss Eloise Lewis, Ira.
Miss Marie Guerrero, Bison.
Miss Ruby Lee Burney, Bison.
Miss Sybil Gilmore, Bethel.
Miss Jessie Dowden, Hud.
Miss Shirley Helms, Hud.
Miss Daisy Harden, Hud.

Seven women were included in the butter judging contest who were Mesdames George Lewis, Ira; R. E. Jones, Gannaway; T. W. Pollard, Camp Springs; J. L. Carrell, Union; D. E. Watson, Gannaway; J. R. Truss, Fluvanna; and Miss Gertrude Binnion, Union.

Much interest was shown in the various contests, and under the skillful direction of Miss Davis, greater progress is being made in club work than heretofore shown in Scurry County.

The Times-Signal wants to join in congratulations to the winners, as well as handing Miss Davis a fine large bouquet for the masterful way in which she is conducting her work for this section.

NEW EQUIPMENT

The Times-Signal received further new equipment Monday with the arrival of a new Boston No. 5 stapler and stitcher, and the yearbook of the Alturian Club was the first to be stapled on the machine.

Several new styles and sizes of type for high class job printing have also been received at the Times-Signal office the past few weeks.

With the new stitcher, new type, and the recent addition of a Miller Heavy Duty Saw Trimmer, and a 14½x22 Chandler & Price press, the Times-Signal has one of the finest and best equipped plants in West Texas, taking its hat off to no office.

With but one or two exceptions in Snyder, the Times-Signal has more cash actually invested in its plant than any other one place of business in town.

Colorado voted 107 in favor of the increase in the governor's salary, and 47 against; 110 for more judges and 45 against.

Epworth League District Meet to Open Saturday

Young Folks Will Be Here From All Over Sweetwater District

The coming week-end promises to bring together one of the largest crowds of young people that has ever gathered in Snyder for a meeting of the nature that is scheduled for Saturday and Sunday, July 27 and 28, when the Epworth Leagues of the Sweetwater District will hold their district meeting at the local Methodist Church.

Many out-of-town Leaguers are expected for the Saturday evening program and social, and the crowd is expected to swell to more than two hundred by the time for lunch in the basement of the church Sunday.

There are several noted speakers on the program for the occasion, the outstanding being Rev. S. E. McCreless of San Antonio, who will preach the sermon at 11 o'clock on Sunday. Brother McCreless is a young people's specialist and evangelistic worker. He has been a student in Asbury College, Wilmore, Kentucky, for the past four years and took his B. A. degree from that college last month. The Snyder Leaguers know Brother McCreless to be a very consecrated Christian and an able young people's worker. You will miss the best part of the entire meeting if you fail to hear him.

Other outstanding people on the program are: J. H. Agee of Abilene, who is the field secretary of the Northwest Texas Conference Epworth Leagues; Mrs. Agee, who will have charge of the games and entertainment during the social Saturday evening; and W. T. Roberts, who is the district secretary of the Sweetwater district. Beside these, there are many other good speakers on the program for the devotional meeting on Sunday afternoon, which will be directed by the Sweetwater First Church Epworth League.

The Snyder Leaguers are on the job this week preparing to take care of the meeting. The visiting Leaguers will be cared for in the homes of the local young people on Saturday night. Mrs. Warren Dodson and Mrs. H. G. Towle are working at the heads of committees for securing homes and serving lunch on Sunday. They are being assisted by a group of enthusiastic young Leaguers who are willing and anxious to put the meeting over successfully.

The Sweetwater District is running hard for the loving cup offered by the Conference Epworth League Board to the district making the highest score according to the rules prescribed by the board. Mr. and Mrs. J. H. Agee and Miss Ila Mae Hastings, who is the district secretary of the Plainview district, were visitors at the service of the local League Sunday evening, and they say that the district that gets the loving cup this year is going to have to work for it. They had just completed a swing around the entire conference, having been in Lamesa for a district meeting of the Lubbock District on Saturday and Sunday before coming to Snyder Sunday evening. With all this in view, the Sweetwater district has a tremendous task on hand in order to win the cup. The meeting Saturday and Sunday is to be the real starting point of the race.

DAL-PASO MOTORCADE TO ARRIVE AUGUST 2

Sec'y [illegible] A. Wilson, Lamesa, of the Dal-Paso Cavern Highway Association, met with a group of local [illegible] the Chamber of Commerce Monday noon, completing plans for the motorcade that will arrive here next Friday night, Aug. 2.

[illegible] cars are wanted by the committee composed of [illegible] R. E. Snow, Mrs. E. J. Anderson and Mrs. Fritz R. Smith to meet the [illegible] at the Fisher County line at 6 o'clock, the night of arrival, and escort them back to the public square where a short, snappy program will be held.

According to Judge Horace Holley, an old-time fiddler's contest will be staged at Wolf Park that night in which cash prizes will be offered and a short program rendered the visitors. President O. P. Thrane will have charge of the park program.

Other members of the local committee who are asking the co-operation of Snyder and Scurry County citizens include Warren Dodson, Horace Leath and J. W. Scott. It is hoped that at least a dozen cars will join the motorcade here, as in the past two years Snyder has fallen down woefully in placing cars in the annual motorcade, and this year it is hoped to be in line with the many other towns on the route.

Sec'y Wilson during his stay in Snyder stated that the tour was receiving state-wide attention and that 100 letters a day were being received at Lamesa from all points in the state from people who are interested in this All-Texas Tour over the Dal-Paso Cavern Highway.

Howard Dry Goods Co. has two new road signs erected this week on Gail and Post roads.

Three Sets of Four Generations in Family Reunion

Three sets of four generations are shown in the above picture with the family tree showing the following:

(1) Mrs. M. A. McGlaun, E. H. McGlaun, Leroy McGlaun and Una Ruth McGlaun.

(2) Mrs. M. A. McGlaun, Gay McGlaun, W. A. McGlaun and Billie McGlaun.

(3) Mrs. O. L. Jones, Mrs. Gay McGlaun, W. A. McGlaun and Billie McGlaun.

Seated in the above picture on the ground, left to right: Una Ruth McGlaun, Bill Fulghum, Margaret McGlaun, Donald McGlaun and Loyd McGlaun.

Seated in chairs, left to right: Etta V. McReynolds, Mrs. Jack McGlaun, Mrs. E. H. McGlaun, Mrs. M. A. McGlaun, Mrs. O. L. Jones, Mrs. Gay McGlaun, with Billy McGlaun seated at her left; Mrs. O. D. McGlaun, Douglas McGlaun, O. D. McGlaun with his "basket of babies"—twins, born to Mr. and Mrs. O. D. McGlaun June 13 and named Jack and Joy.

Standing, left to right: Vard McGlaun, Weldon McGlaun, E. H. McGlaun, Mrs. Leroy McGlaun, Leroy McGlaun, Mrs. Jack Fulghum, Jack Fulghum, Mrs. W. A. McGlaun, Mrs. W. M. McGlaun, W. M. McGlaun and Gay McGlaun.

Cottingham & Briscoe Spud In On Truss Place Near Fluvanna

Large Crowd Sees Officials Start Drilling Operations on New Test

Large crowds witnessed the spudding in of the Cottingham & Briscoe John R. Truss No. 1 well south of Fluvanna which occurred Tuesday afternoon promptly at five o'clock. The location of the new well is 14 miles south and slightly west of the Emerald Oil Company's production on the Borden land near Justiceburg in Garza County.

V. E. Cottingham of San Angelo, one of the principal boosters in the oil test, was present at the "spudding-in" with C. S. Bradley of San Angelo and W. L. Power, primary booster for the location. Many Fluvannians were present. Two representatives from the Times-Signal with R. L. Lowry and A. E. Harvey were likewise on the ground.

F. W. Cromwell and D. E. Vandevoort of San Angelo, who hold the drilling contract on the new oil test, handled the famous wonder well in the Big Lake field that was drilled to a depth of 8525 feet where it was 2 feet in the pay. Mr. Vandevoort holds the unusual honor of having drilled the last inch of this well. The wonder well formerly held the distinction of being the world's deepest well, but a recent California well has surpassed the mark set in the Big Lake field.

But the Times-Signal hopes that the new test bears out the geology report and that it is the spot that will eventually make the next great American pool, and that if Snyder cannot have the honor, then we hope that Fluvanna is the favored spot for the start of a great oil play in this wonderful county of Scurry. Geologists have been proclaiming for years that "thar's gold in them thar hills," and we hope the time has arrived that the gold summarizes itself into liquid gold and that 1929 will mark the start of the greatest year in Scurry County history.

Should Insist that Certificates Are Registered

Birth and Death Records Incomplete in Texas; Must be Remedied

The Times-Signal has often spoken of the apparent dereliction in duty of some Scurry County physician in not reporting births and deaths to the attention of vital statistic heads.

According to Joseph F. Leopold, manager Southwestern Division of the United States Chamber of Commerce, who wrote to Sec'y Watt Scott of the Chamber of Commerce here, "Texas is receiving bad advertising with the laws not being obeyed as regards birth and death registration."

"Mr. Leopold's letter further stated: "It is my opinion and that of the United States Chamber that it is a serious question. Texas is one of three states, Texas, New Mexico and South Dakota not included in the birth and death registration area. Get after your doctors. It is a very pertinent activity of your chamber of commerce. If this isn't done soon we will lose our opportunity. September 1st is the dead line."

Included with Mr. Leopold's letter was an enclosure from the Department of Commerce Bureau of Census, Washington, which needs no comment but thoroughly explains inself, which says in part:

"There is no assurance that our program can be continued after September 1 as whatever is done to improve registration must be done at once. We expect to have a test soon after Sept. 1 to determine the completeness of registration, and 90 per cent is necessary to pass the test.

"There were 2100 deaths of infants in Texas during 1928 where the death certificates had been filed but no birth certificate had ever been placed on record. This indicates a great laxness on the part of doctors and midwives.

"We secured through the scholastic census 66,000 names. Of these 66000 names about one third of them were registered. There seems to be a belief on the part of the public generally that if a physician was in attendance, a certificate was filed. This is not always the case, as many physicians are very negligent in filing such certificates."

Ed. Note—Records in County Clerk Mabel German's office will prove the correctness of this thought as regards county physicians.

Getting back to the letter from Washington, they say that death registration is much better than birth registration. Undertakers are showing a great deal more enthusiasm and are complying with the law very well in their opinion.

Folks residing in Scurry County and in Snyder today should make it a point to check up on births in their family with the county clerk and see to it that the matter has been taken care of. That Texas is not included in the birth and death registration area of the United States Chamber of Commerce is a terrible black-eye, and Scurry County folks can generally assist in getting back into the registration area with the cooperation of the fathers and mothers who will personally see to it that their child's birth has been officially registered. If your doctor has not made a report to the county clerk, then he has been sadly derelict in his duty and needs a thorough reprimand.

Big Spring will dedicate it new airport Sept. 11 and 12.

REGARDING TRANSFERS

Those desiring to transfer their children from one school district to another will please give their attention right away, as August 1 is the limit under the law by which said transfers may be made. The trustees of the different districts have transfer blanks, and they will be glad to assist anyone in need of making a transfer. The county superintendent's office will be glad to take care of any transfers, either in person, by letter, or by phone. Six year old children do not come into the free school age for the 1929-30 term, therefore they are not eligible for transfer.

The transfer privilege is confined to the county where one lives, or into an adjoining county, if the districts affected have the county line as a common boundary between them.

A. A. BULLOCK,
Co. Supt., Scurry County.

GROUND BROKEN FOR COLORADO CHURCH

Ground was broken Thursday for the new Church of Christ in Colorado. The new structure will cost about $20,000 and will have an auditorium seating 750 and Sunday school rooms for 500. This will be the fourth new church building to be erected there within the last three years.

Members of the building committee are: John Hale, J. W. Watson and John Thompson. The Rev. J. D. Harvey is pastor of the church.

Official Rain

Precipitation of 1.04 inches was reported in the Saturday night rain here. Other parts of the county have reported from one to four inches, in some places a real washout.

Jerseys To Be Given Away at County Fair

Committees Working Hard Long In Advance of Annual Meet

Three high class registered heifers are to be given away during the Scurry County Fair. That is the good news that came out of a meeting Tuesday of the executive committee at the Scurry County Chamber of Commerce offices.

The committee will meet again Monday afternoon to make final approval of the fair catalog, after which bids are to be secured for its printing.

Sec'y Watt Scott was instructed to purchase 75,000 tickets which will be given out by local merchants for all cash purchases and accounts paid. The fund created through this progressive move will enable the committee to purchase registered Jerseys which in turn will aid in the dairy program that has been increasing every day.

Plans that are under way indicate that the Scurry County Fair for 1929 will be one of the greatest agricultural exhibitions ever given in the county. While the fair dates are still two months away, early preparation is creating widespread interest.

CAMP MEETING AT WOLF PARK STARTS

The camp meeting of the Original Apostolic Faith Movement will start at Wolf Park tomorrow and continue to August 11, according to S. W. Ditto, who advised the Times-Signal of the change Monday morning.

The original place of meeting had been given at the City Tabernacle, but a change was made necessary owing to the Christian Church now holding its revival meeting there.

Among the visitors who will be at the camp meeting will be C. R. Swanson, musical director; H. L. Watkins, Mr. and Mrs. Alfred Whitely and several others.

Free seats, free eats, with no collections are some of the things that Mr. Ditto and his co-workers offer, and everyone is welcome to attend.

BISON VOTES NAY ON AMENDMENT

The Bison community in voting on the amendments last week fully stated their feelings as regards increased salary for the governor and the supreme court detail by registering twelve votes against each amendment and not a single "aye" vote. That's a record for any election, and judging from the totals registered in Scurry County against the amendments, many folks evidently thought just as Bison voted.

GIANT VISITS SNYDER

Joe H. Clark of the First and Last Chance Filling Station reported a visitor at the station last week who bore unusual proportions in that he measured 7 feet 4 inches in height and weighed near three hundred pounds. Joe says it's the truth, for he measured him. The man hailed from Tennessee and was en route to the west coast to enter the movies.

Camp Prospering

Manager Jim Baze at the Airport Camp states that 450 tourists have taken advantage of the Cabin Inns since their opening.

The Casstevens Tin Shop is now located four doors north of the Snyder National Bank in the building formerly occupted by the recreation parlor.

Last year over $1,000 worth of property was burned every minute and a life was lost every 35 minutes.

DUNN HIGH SCHOOL GETS HIGH RATING; 10 UNITS AFFILIATION

Supt. W. C. Hooks, Faculty, Board and Patrons Due Honors

Supt. W. C. Hooks of the Dunn school received a report this week on their application for classification and affiliation. In part the letter from the department at Austin read: "We wish to congratulate you and your teachers on the splendid type of work sent in; we are proud of the work and unhesitatingly give you four-year high school classification and 10 units of affiliation for the work sent in this year. we are proud for you, for it is indeed an unusual record for any school to start from the bottom and accomplish so much in one year."

According to County Supt. A. A. Bullock, it will be remembered that the Dunn school has never taken any steps toward affiliation and classification until this past year, and everything accomplished has been accomplished during the past school year. This only goes to prove that any school, either rural or urban, that has as many as seven teachers or more with three teachers in the high school, can become an accredited high school with the proper leadership and backing of the board and the patrons of the school. Mr. Hooks started at Dunn last September with nothing but a vision, and he has made that vision come true. He has put this proposition over and gained recognition as a first class four year high school with an additional cost of only $560 and a tremendous amount of work on the part of himself and his faculty. Of course, this would have been impossible without the undivided support of the board of trustees so far as their means would permit them to go.

What Dunn has done this year can be done in any school of the size stated above if the determination to do is behind the movement as in this case.

They received two units in algebra, two in English, one in plane geometry, one in ancient history, one in modern history, one in American history, one in general science, and one in civics this year and are applying for two more in English, two in Spanish, one in biology, one-half unit in commercial geography, and one-half unit in advanced arithmetic during the coming school year. This will give them a total of fifteen units or sufficient number for college entrance.

The faculty for the coming school term will be composed of the following: W. C. Hooks, superintendent; Guy Stark, principal; and Vernelle Stimson in the high school, Mr. Hooks teaching mathematics, Mr. Stark history and English, and Miss Stimson Spanish and science. The grammar school is composed of Miss Lucile Brown, Miss Doris Johnson, Mrs. Marvin Hanson, Miss Bonnie Gary and Miss Gladys Thurman.

L. E. Russell is the chairman of the board of trustees, Mr. T. E. Grimes is secretary, and W. A. Johnson, H. A. Amos, Walter Wade, M. T. Casey and T. J. Fuller are the members.

It is to be hoped that the day is not far distant when every child in Scurry County will have access to an affiliated school and that many schools will follow the example of this outstanding rural school at Dunn.

The Times-Signal wants to be counted among those folks who offer hearty congratulations and best wishes to Supt. Hooks and his faculty, as well as the board of trustees and patrons of the Dunn school for setting a marked pace of improvement in the rural school development of Scurry County.

Band Concert To Be Held on Square Monday

Crowley to Have Group of Forty Musicians For County Fair

The first "Sundown Band Concert" to be held in Snyder in many years will be given at the band shell in the public square Monday evening starting around 7:45. The announcement coming from Band Master J. W. Crowley is mighty wonderful, coming so soon after the band has been organized, but under his expert leadership, fast progress is being made. According to Mr. Crowley, more than forty musicians will be available for the coming Scurry County Fair, which will add one of the finest entertainment features possible for any city. Many are now in training under Mr. Crowley who will soon be available.

Snyder citizens should realize that in Mr. Crowley they have one of the outstanding band men of the state. A man who can have a mammoth silver loving cup presented to him in a prize winning contest from the hands of John Phillip Sousa is worthy of the highest commendation. During the past five years with Lubbock High School, Mr. Crowley and his band won the state championship once, second place twice and third place once. In the South Plains championship contest Mr. Crowley won four out of five years in the stiffest of competition.

All Scurry County is invited to come to Snyder Monday night and enjoy the first band concert that has been held here for years. Every one has a wholesome welcome to be the city's guests.

The personnel of the band that will give the concert includes:

W. W. Hull Huge Boren, cornets; Burl Ballew, E. V. Boynton, J. T. Beavers, trumpets; Miss Burline Boynton, Cleve Blackard, mellophones; Mrs. John Stavely, baritone; E. J. Bradbury, Miss Vera Stavely, trombones; Emmett Askins, Boss Stavely, Mrs. J. W. Crowley, basses; Virgie Handback, bells; N. R. Clements, bass drum; Robert Gray, snare drum; John Stavely Mrs. Jones, Morris Sturdivant, Willard Lewis, Odell Blackard, H. Trigg, saxophones; Elmer Spears, Dodson Smith, Mattie Lynn Beaver, Charley Bley, Burgess Brown, Ben Patterson, clarinets.

District Hi-Way Engineer Makes Traffic Report

Traffic Good on Both Highways Passing Through This City

Official statistics of highway traffic through Snyder have been received here from Division Engineer W. J. VanLondon, Abilene. According to Mr. VanLondon, the census was taken over a period of four days, 20 hours each day from 4:00 a. m. to 12:00 midnight, beginning at 4:00 .a. m. Saturday, June 29, and ending at midnight July 2.

Highway 83 census was taken at a point 15 miles east of Snyder, and during the time noted above, 38 out-of-the-state cars passed, with 313 Texas licensed cars; one out-of-the-state truck, and 30 Texas licensed trucks.

Highway No. 101 at a point five miles south of Snyder showed 7 out-of-state cars, 193 with state licenses and 15 state licensed trucks.

The report also showed that an average of one to four horse drawn vehicles passed the traffic observers' locations.

LAUNDRY CO-OPERATES WITH LOCAL CLUB

S. A. Larue, owner of the Snyder Laundry, invited the members of the Business and Professional Women's Club to see the laundry in operation. Monday afternoon a group of club women were taken by Mrs. Sam Hamlett, and Tuesday afternoon Mrs. A. G. Eiland invited a different group to the Laundry, and Wednesday afternoon Mrs. W. R. Merrill invited some of the ladies.

Mr. Larue made an interesting talk to the different groups of club women about the laundry. He wanted fifty of the club women to visit the laundry and said if that many called he would give the club a $10.00 check, but when the check came it amounted to $12.50, which was greatly appreciated by the ladies who are members of one of Snyder's most progressive organizations.

"It would be a great mistake to suppose that we can continue our national prosperity with the attendant blessings which it confers upon the people unless we continue to insist upon constructive economy in government."—Calvin Coolidge.

Loraine is to get a new hotel.

NOTICE, EX-SERVICE MEN

The Times-Signal wants to inquire if there are fifteen ex-service men in Scurry County who will sign their names on the dotted line and pay down $2.25 when they sign the charter for an American Legion Post for Snyder.

If the ex-service men signify their desire to again get started, Ross R. Cole, deputy adjutant at Austin, has promised the Times-Signal that he will arrange for either the Sweetwater or Lubbock post to come here and give the boys a start.

Application for charter and all necessary papers and instructions are now here and may be seen at the Times-Signal office. BOYS, LET'S GO!

A London banker says he would enjoy running a newspaper column for just one day. And what we could do to a bank in just an hour!—New York Evening Post.

Miss Lucille Porter of Hopsett, W. Va., is earning her way through Marshall College by raising Boston terriers, some of which are valued in thousands of dollars.

An initial price of 52c a pound for butterfat is announced by the Borden plant at Waco.

Sixty-five thousand girls who leave home each year, reports show never are heard of thereafter.

Miss Leora Huggins returned home Thursday from Abilene where she has been attending Abilene Christian College.

Miss Minnie Lou Rothrock returned home Sunday from Abilene where she has been attending A. C. C.

Mrs. Sam Hamlett and Miss Charlsie Hamlett left Monday for Dublin where they will be the guests of Mrs. Hamlett's parents. They will return home by Dallas where Mrs. Hamlett will buy ready-to-wear for Caton-Dodson Dry Goods Company. They expect to be gone about ten days.

Mr. and Mrs. Jesse Eoff and daughter, Miss Christine and sons, George and Larry Lewis, left Monday morning for Raton, N. Mex., where they will spend their vacation.

Judge and Mrs. H. F. Lewis of Lampasas visited their son, Munger Y. Lewis, who is secretary of the retail merchants association here, several days this week. They were en route to California and will visit other points of interest before their return home.

Mr. and Mrs. T. J. Green and family returned home Tuesday night from a pleasant 14-day vacation with home folks at Tulsa, Okla.

"THE DESERT SONG," FILM OPERETTA, TO BE HERE NEXT WEEK

Warner Brothers Vitaphone Version Production Dwarfs Stage Presentation

Screen operetta is now a fact. Through the magic of the talking picture, "The Desert Song," one of the most tuneful and most popular musical plays ever shown on the stage, has been brought to the scren, and has been produced on a scale that would be impossible in the theatre.

Sigmund Romberg's score with its magnificent choruses and the lilting charm of its beautiful solo numbers, has been reproduced by Vitaphone in all its original glory.

The remarkable production qualities included in "The Desert Song" have been equalled by the unusual excellence of the all-star cast presented by Warner Brothers.

The scenes throughout the picture are especially beautiful, ranging from an extensive French military post in Morocco to encampments of the Red Shadow and his band of native Riffs in rocky passes of the mountains, and far-flung vistas of the rolling sands of the great African deserts, with the Riffs, singing as they go, riding their magnificent horses at breakneck speed into the setting sun.

The all-star cast of "The Desert Song" includes John Boles, Louise Fazenda, Carlotta King, Johnny Arthur, John Miljan, Marie Wells, Jack Pratt, Edward Martindel, Otto Hoffman, Robert E. Guzman, Myrna Loy and many others, as well as a chorus of one hundred beautiful voices. Roy Del Ruth directed, and the operetta was adapted for the screen by Harvey H. Gates.

"The Desert Song" will be the attraction at the Palace Theatre next Monday and Tuesday.

BLACKARD WINS GOLF TOURNAMENT

The local golf tournament has has been under way for the past two weeks ended yesterday morning when Cleve Blackard defeated Earl Fish.

Fish came in with a score of 41 and Blackard with a 51, and on the second round Fish shot another 41, while Blackard shot a 45. These two scores with a net handicap of 18 strokes proved too large a lead for the local star.

"Blackard played a good game and deserved to win. He did not 'blow up under pressure,' and played a good sportsman-like game," said Fish.

The winner of the consolation match has not been decided as yet, but this week will wind up the activities of the tournament, as the driving and putting contest will be completed this week.

The tournament has proved to be very interesting, and with a few more such contests to keep up the good fellowship, the Golf and Country Club will continue to grow.

Why not a tournament for the women?

MR. HOOVER AND ANIMAL PETS

Herbert Hoover does not have many pets of his own, but he fully understands how much they mean to others.

When the Mississippi flood was riveted on the task of assisting thousands of refugees, a soldier came into his temporary office.

"What are we gonna do with these dogs, Mr. Secretary?" he asked.

"What dogs do you mean?" asked Hoover.

"Why, a lot of these refugees have brought dogs with them, and some have cats, too," replied the soldier.

"We'll take care of them, and good care," Hoover announced. "Those people haven't saved much. If any of them have pets—dogs, cats or elephants—let them keep them and take care of them. Have some of the refugees build corrals with runways for the dogs."

"A few of them have canaries," the soldier began.

"All right," said Uncle Sam's emergency man, and turning to his and if it is not on the regulation secretary, "Order some bird seed, list, charge it to me."

TEXAS IS GROWING NEW SMALL GRAINS

Denton wheat, Nortex and Frazier oats, developed at the Denton, Texas, experimental substation, give much promise as varieties for North Texas. The introduction of these new grains has laid the foundation for replacing much of the scrub or nondescript oats and wheat in that part of Texas and in parts of southern Oklehoma, accodring to the July 15 Oklahoma Farmer-Stockman.

Denton wheat is described by the men who had charge of its development as a typical Mediterranean wheat for its stem color which is yellow rather than blue. It is a soft, winter wheat, rather tall growing and of mid-season maturity, ripening from one to three days later than ordinary Mediterranean. The head is short to medium-long, compact, erect or slightly inclined and bearded, showing no tendency to shatter—the latter a characteristic of considerable importance in these days of the combine. The variety has a stiff straw and stands up moderately well under adverse conditions. It has shown considerable resistance in both leaf and stem rust but is not immune to either disease.

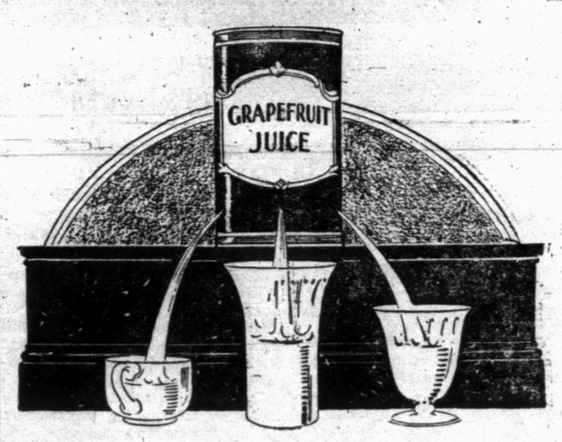

Yields of this wheat at the Denton station and on farms of farmers who have tried it out have been higher than those of other Mediterranean strains and other varieties with which it was compared.

The Nortex oats has shown a greater strength of straw than any other oats tested and has shown the highest average yield of the different lots of Red Rust Proof oats tested at Denton. The variety will mature from two to three days ahead of the commercially grown strains of Red Rust Proof oats.

The Frazier oats has been the highest yielder of the spring-planted oats varieties at Denton over a period of years. It is recommended by the Denton station for planting in January and February. The oats is similar in type of plant and date of maturity to the other Fulghum-type oats strains and is from eight to ten days earlier in maturity than the Red Rust Proof types.

A convict threw a bible at Governor Wilkinson of Barlinnie prison in Glasgow while attending religious services.

Frosty Summer Drinks

FRUIT drinks have now become a regular and most welcome part of the summer. One of the most delectable ingredients of these frosty concoctions is grapefruit juice put up in cans which is here to stay because it's so good. One proof of this permanence is that a company in Florida which already operates two large grapefruit canneries at Eagle Lake and Lake Alfred is now planning to build the largest grapefruit cannery in the world at Winter Haven, but the best way to convince yourself of it is to try out some of the following:

Fruit Combinations

Havana Special: Mix one ten or eleven-ounce can of grapefruit with one cup of pineapple syrup, and add one-fourth cup sugar and one cup water which have been boiled together and then cooled. Chill, add a bottle of white rock, and serve ice cold in punch glasses. This recipe will make ten glasses.

Citric Delight: Boil one-fourth cup sugar and one cup water five minutes, cool and add one ten- or eleven-ounce can of grapefruit juice, one cup orange juice, one-fourth cup lemon juice and four cups of cold water (charged if desired.) This will fill fifteen punch glasses.

Cherry Rickey: Boil one-fourth cup sugar and one cup water, cool and add one ten- or eleven-ounce can of grapefruit juice, the juice from a No. 2 can of sour pitted cherries and one-fourth cup Maraschino cherry juice. Chill, add a bottle of white rock and serve ice cold. Twelve punch glasses.*

SNYDER NATIONAL BANK

We Now Have the New Currency for Distribution.

I interviewed Wilbur B. Foshay, president of the W. B. Fashay Company, who owns and operates businesses throughout the United States, Canada, Mexico and Central America, as to the value of newspaper advertising in connection with the building of their great business. Mr. Foshay said:

"We appreciate the great things that the newspapers of our country have done for us, and I think without a doubt you get more for your money through the purchase of advertising space in the newspapers than you do for any other money you spend.

"There has been a lot of discussion as to the best means of advertising. To say that any one medium is the best advertising medium is an impossibility because of the diversity of things to be advertised, necessitating a diversity of mediums. From the viewpoint, however, of anyone who wants to get to the biggest number of people with something everyone can use, there is no question in our minds that the newspaper is the best medium.

"Our expenditures for advertisements have increased each year, with the exception of 1928, in which year we spent less than in 1927. But we didn't curtail our newspaper advertising in 1928. We curtailed other things and increased our newspaper advertising somewhat over 1927. This year we have increased our advertising program about one-fifth, and will spend about that much additional money over last year. A large proportion of the additional expenditure will go to newspaper advertising.

"We don't hesitate to make the unqualified statement that newspaper advertising has been one of the greatest assets we have had in building up our business."

DERMOTT NEWS

Everybody appreciated the good rain that fell Saturday evening. The farmers are wearing smiles. This will help the crops wonderfully and will be a great benefit to the grass.

Mr. and Mrs. Emmett Murphy and family of Waco spent last week visiting Mrs. Charlie Johnson and other relatives.

A. N. Edmonson spent the weekend visiting relatives in Portales, N. M.

Miss A. D. Dodson spent the last of the week with her sister, Mrs. Arch Lavender, of Fluvanna.

W. T. Rankin returned home the first of the week from Wise County and reports finding a bee tree and plenty of honey.

Mr. and Mrs. C. C. Harvey and children, formerly of this place but now of Sterling City, spent a while Sunday afternoon with their friend, Mary Hulsey.

George Chowns and wife of Big Spring spent Sunday with his brother, William Chowns, and family.

Harvey Johnson returned home this week from Waco where he has been visiting relatives.

Several of the young people visited the Fluvanna cap last week-end.

Mr. and Mrs. Fonzo Smith and children and Tom Smith returned home Monday from Comanche County and report a good time. They say the crops are not very good in that section.

Mr. and Mrs. Bob Browning, Harvey Browning, and Mrs. Viola Browning and daughter made a business trip to Snyder Monday afternoon.

M. J. H.

POLAR NEWS

By Mrs. J. A. Martin

A part of our community has been blessed with a good rain during the past week, but part of the community received only a slight shower.

Bro. S. B. Wilkerson preached two inspiring sermons at Polar Sunday. The Methodist meeting began Sunday night. We are praying that there may be a harvest of souls during the coming week at Polar.

S. B. Weatherby and family visited Marvin Gafford and family at Crosbyton last week-end.

Kelly Simms and family and Miss Frances Lisles of Post were guests at the Simms ranch last Sunday.

B. A. Moore with the help of Ike Boren, Will Williams, Sid McFalls, Alvin Elkins, Clarence Coleman, Ott Nance and Jim Mitchell, rounded up and shipped 715 head of steers from the E. W. Clark ranch last week. Mrs. Ike Boren and Miss Dutch Elkins were also visiting and helping Mrs. Moore during the roundup. We understand that the steers brought $60 per head.

Clayburn Pirtle of Justiceburg was a visitor with Mr. and Mrs. Ott Nance last Sunday.

Miss Stella Smith, who has been on a business trip to Calgary, Tex., returned home Friday.

Mrs. Calline Love and son, W. Z. Love and family of Purcelle, Okla., have been guests of Mrs. Love's sister, Mrs. R. C. Hoyle, for the past week.

Miss Lanell Simms of Post was a guest at the Simms ranch last week.

Misses Glyn and Ooris Weatherby spent Friday and Saturday as guests in the Craig home.

Mr. and Mrs. Bryan Walker of Odessa have been guests of Mrs. Walker's sister, Mrs. J. T. Simms, for the past week.

Mrs. Ethel Butts of Snyder was a guest of her father and mother, Mr. and Mrs. R. C. Hoyle, last Friday.

Jim Clanton and family of Luther were guests in the Blythe home Sunday.

Mr. and Mrs. Walter Harris, who has been visiting friends and relatives at Luther, returned home last week.

Mrs. Johnnie Hoyle accompanied her father, S. B. Wilkerson, to his home near Snyder Sunday afternoon.

Mr. and Mrs. Bernice Clanton motored to Luther Sunday and were accompanied home by Mrs. Will Clanton.

Messrs. Marvin and Grady Craig and Miss Vera Craig started to cross the river to see friends Sunday and stuck so fast in the river bed that only a team could remove the car.

G. M. Elkins, who owns and operates Polar's store, has been making some more improvements by having the inside woodwork painted and also a part of the outside.

COMMUNITY PROJECTS

THE CHILDREN'S LITTLE THEATRE

As business manager of the Children's Little Theatre of Flushing, Long Island, New York, I take pleasure in describing a project which, I feel, has benefited our community in many ways.

With the cooperation of a few friends, I opened the theatre in January, 1928. Since the very start we have had the support of Mother Clubs in our local schools and the backing of the various women's clubs of our town.

Our aim is to provide clean, wholesome amusement on Saturday mornings for children, to present suitable plays and films and to try to bring back some of the make-believe, of which our children seem to get so little in these present days.

Our program consists of one or two one-act plays, the parts being played by children of the neighborhood. This affords children with any talent an opportunity to develop it. They are encouraged to write little plays themselves, which are produced by us. The pupils of several dancing schools are given a chance to appear in public, an opportunity which they otherwise lacked.

The Boy Scouts and Girl Scouts as well as the Sunday Schools are invited to sell tickets on commission, so they benefit materially by our venture. We also put on a few performances in several schools on a fifty-fifty basis, which enables them to buy equipment otherwise unavailable.

After twenty performances in our community we organized the Children's Little Theatre Guild, children acting as officers and being supervised by a board of mothers. The purpose of this Guild will be work for the Little Theatre. The boys will be instructed in the construction of scenery and the girls in the designing and making of costumes. Children showing ability to write will be encouraged and helped to do so. All this, together with the kind of performance given, has been a source of much enjoyment to the younger children and of benefit to them spiritually. It is hoped that this idea may be adopted elsewhere and aid in bringing about an improvement in the form of entertainment offered to children.

Any money over and above that needed for the maintenance of the Little Theatre will be used for children's charities. Up to the present time we have cooperated with the local theatre, but in time we hope to have a real Children's Theatre, a place devoted to the entertainment of children exclusively.

Mrs. William Richardson,
4016 158th Street,
Flushing, New York.

"ERNIE" WRITES

Rogersville, Tenn.
July 19, 1929.

Dear Times-Signal:

Surely glad to get the good old Snyder Times-Signal on our arrival here and believe it to be one of the best weekly newspapers published in Texas. Please keep it coming to the above address.

We had a very nice trip over here, the distance being only 1385 miles, and, too, I want to add that there is only 15 miles of dirt road between Snyder and this good town, that being a detour out of Malvern, Ark. Mrs. Taylor and the children are all well, and of course enjoying their visit very much.

Sincerely yours,
ERNEST TAYLOR.

Ed. Note—The Times-Signal surely appreciates Mr. Taylor's boost, as we enjoy either bouquets or constructive criticism from our friends.

LOCAL FIRM GETS AFTER T. & P.

There has been a great deal of criticism here regarding the long time that it takes local concerns to get freight shipments out of Dallas via the Texas & Pacific railroad. It remained for a local business house, King & Brown, to hit the nail on the head when they protested to the Dallas Chamber of Commerce. Under date of July 18, the following letter was received here:

King & Brown,
Snyder, Texas.
Gentlemen:

We desire to thank you for the cooperation in calling our attention to the delinquency in our merchandise service from Dallas to Snyder, Texas.

According to our agreement with the T&P, merchandise from Dallas to your city should be delivered on the 2nd day. It is only by means of such communications as yours that this organization is able to develop whether the service rendered is in accordance with agreement between carriers and this organization.

We will immediately make necessary investigation as to the time in transit of shipments in the past, as well as what service is now being rendered, advising you the outcome later.

Yours very truly,
S. GOODSTEIN, Manager,
Transportation Dept.

E. H. WHITEHEAD NOW IN GREENER PASTURES

We see where our old friend, Elmer H. Whitehead, is now with the South Texas Chamber of Commerce as assistant manager and publicity man deluxe. Mr. Whitehead during his term of office with the West Texas Chamber of Commerce initiated and put through a great and constructive piece of work, not only along publicity lines but with whatever the body took up, "Whitey" could be found right at the front door ready to do his part 100%. South Texas is getting a mighty fine executive, a hard-hitting "plugger" who can throw more publicity in a minute than most fellows can in an hour, and its good copy.

The Times-Signal congratulates the South Texas Chamber of Commerce for being able to secure a man like Whitehead. He's just all-wool, more than three yards wide and a fellow who hits the king row every time and remains right there. We were sorry to hear of Whitehead's leaving, but no one can blame a man that can accept a position with a greater responsibility and increased salary. One follows the other, and here's best wishes to all concerned.

"It's Great to be a Texan."

"You'll Like Snyder."

STOP AND THINK

E. W. Jorgenson, editor of the Spokane (Wash.) Press, says:

THAT if the average man could picture his dollars as soldiers working for him, fighting his battle of independence, he would save more. Every dollar is a soldier—a little doughboy on detail—working for you!

In army life there are many kinds of soldiers. There are those who waste their moments and bring no returns to their commanders. There are other soldiers who are constantly on the job, doing the daily duties industriously, helping to win whatever war or project the army has on its hands at the moment.

You can have YOUR army of dollar soldiers if you want them. You can have just as large an army as you wish! It's all up to you. By holding grimly to your soldier dollars and making them work for you—by putting them into savings accounts at interest—by putting them out as safe loans—by investing them in bonds or in property that will increase in value—you build up your own little army and become strong and powerful. No great financier ever won his position of financial power without clinging tightly to his dollar soldiers. You have probably heard the story of Rockefeller, who saved his early earnings. You have heard many tales told of rich men who put their first earned "soldier dollars" to work for them.

The size of your dollar army is up to you. A squad is eight men in army life. You can have a squad of eight silver dollars working for you or you can have more. You can have a platoon, 24 men. Or you can have a company of 85. If you are real ambitious you can build your little army up from platoon to a battalion of 334 men, or to a regiment of three battalions, 1,150 men, or even to a brigade, 3,221 men, or a division of 10,939.

You can be a corporal in your army of dollar soldiers or you can be a captain or general. You are commander-in-chief. When you have built up your little army of soldiers you have a powerful force. You can make war on poverty, destitution, sorrow. You can be independent. You can purchase the luxuries and necessities that you and your family desire. You can have a home of your own, an automobile, a fine radio, a washing machine, an electric refrigerator, furniture, soft carpets, good things to eat.

If you already have an army of dollar soldiers in the making, keep it growing. If you haven't got even a corporal's squad—start one now! The battle of financial freedom starts with that FIRST SAVED DOLLAR!

THE TABERNACLE MEETING

Following are the sermon subjects to be chosen from during the next ten days of service:

"What Constitutes the Inspired Scriptures?"
"My Father's Business."
"What Shall I Do with the Rod?"
"Ruth, The Satisfied Stranger."
"The Side Entrance to Heaven."
"Our Generation in Prophecy."
"Operation of the Holy Spirit."
"A Message from Hell."
"Must Jesus Have Died on the Roman Cross?"
"The Authority of Jesus."
"The Sin of a Divided Kingdom."
"In the Clutches of a Monster."
"Mountain Top Experiences."
"The Tabernacle Church."
"Show Me the Way to Zion."
"God's Uninterpreted Plan of Salvation."
"Grace Through Righteousness."
"My Faith in Evolution."
"Paul's Conversion a Pattern."
"The Forgotten Waterpot."
"Quench Not the Spirit."
And others.

If you seek spiritual development through God's spiritual food, why not come and partake? "The feast is prepared." "The Spirit and the Bride say, Come! Whosoever will, let him come and drink of the waters of life freely." A very cordial invitation is extended to all.

THOMAS M. BROADFOOT,
Minister.

ECONOMY STORE STARTS ANNUAL CLEARANCE SALE

Last week's Times-Signal told of the annual clearance sale of the Economy Dry Goods Co. on the south side of the square. Mr. Rosenberg had some real prices quoted, and it would pay our readers to check back to last week's paper that they might take advantage of the remarkable prices that were listed.

"It's Great to be a Texan."

The department of national defense in Canada is said to possess the secret of an explosive more powerful than any previously known.

Helen Beamer, 9, one of the most famous of present day Hawaiian hula dancers, is making her first visit to the mainland of the United States.

THE VALETOR

SIGN on the window of an establishment means:

Through modern pressing equipment the care of clothes has become a scientific operation which delivers far more than perfectly pressed garments.

Vacuum Drying

Dry heat, harmful to fabrics, is not used in the Valetor method. Garments never have a stiff, **boardy** finish. They have the soft-dry, luxurious feel of new clothes. They are ready to be put on instantly.

Creases Last Longer

Regular pressing by this method maintains the original balance and fine lines of your suit. The pressed effect lasts longer.

Can't Harm Delicate Dresses

By **regulated** steam pressure the Valetor smooths wrinkles gently and safely, sending back your loveliest chiffon, crepe or satin frock soft and fresh.

Mr. and Mrs. T. J. Green and family returned home Tuesday night from a pleasant 14-day vacation with home folks at Tulsa, Okla.

"THE DESERT SONG," FILM OPERETTA, TO BE HERE NEXT WEEK

Warner Brothers Vitaphone Version Production Dwarfs Stage Presentation

Screen operetta is now a fact. Through the magic of the talking picture, "The Desert Song," one of the most tuneful and most popular musical plays ever shown on the stage, has been brought to the screen, and has been produced on a scale that would be impossible in the theatre.

Sigmund Romberg's score with its magnificent choruses and the lilting charm of its beautiful solo numbers, has been reproduced by Vitaphone in all its original glory.

The remarkable production qualities included in "The Desert Song" have been equalled by the unusual excellence of the all-star cast presented by Warner Brothers.

The scenes throughout the picture are especially beautiful, ranging from an extensive French military post in Morocco to encampments of the Red Shadow and his band of native Riffs in rocky passes of the mountains, and far-flung vistas of the rolling sands of the great African deserts, with the Riffs, singing as they go, riding their magnificent horses at breakneck speed into the setting sun.

The all-star cast of "The Desert Song" includes John Boles, Louise Fazenda, Carlotta King , Johnny Arthur, John Miljan, Marie Wells, Jack Pratt, Edward Martindel, Otto Hoffman, Robert E. Guzman, Myrna Loy and many others, as well as a chorus of one hundred beautiful voices. Roy Del Ruth directed, and the operetta was adapted for the screen by Harvey H. Gates.

"The Desert Song" will be the attraction at the Palace Theatre next Monday and Tuesday.

BLACKARD WINS GOLF TOURNAMENT

The local golf tournament has has been under way for the past two weeks ended yesterday morning when Cleve Blackard defeated Earl Fish.

Fish came in with a score of 41 and Blackard with a 51, and on the second round Fish shot another 41, while Blackard shot a 45. These two scores with a net handicap of 18 strokes proved too large a lead for the local star.

"Blackard played a good game and deserved to win. He did not 'blow up under pressure,' and played a good sportsman-like game," said Fish.

The winner of the consolation match has not been decided as yet, but this week will wind up the activities of the tournament, as the driving and putting contest will be completed this week.

The tournament has proved to be very interesting, and with a few more such contests to keep up the good fellowship, the Golf and Country Club will continue to grow.

Why not a tournament for the women?

MR. HOOVER AND ANIMAL PETS

Herbert Hoover does not have many pets of his own, but he fully understands how much they mean to others.

When the Mississippi flood was riveted on the task of assisting thousands of refugees, a soldier came into his temporary office.

"What are we gonna do with these dogs, Mr. Secretary?" he asked.

"What dogs do you mean?" asked Hoover.

"Why, a lot of these refugees have brought dogs with them, and some have cats, too," replied the soldier.

"We'll take care of them, and good care," Hoover announced. "Those people haven't saved much. If any of them have pets—dogs, cats or elephants—let them keep them and take care of them. Have some of the refugees build corrals with runways for the dogs."

"A few of them have canaries," the soldier began.

"All right," said Uncle Sam's emergency man, and turning to his and if it is not on the regulation secretary, "Order some bird seed, list, charge it to me."

TEXAS IS GROWING NEW SMALL GRAINS

Denton wheat, Nortex and Frazier oats, developed at the Denton, Texas, experimental substation, give much promise as varieties for North Texas. The introduction of these new grains has laid the foundation for replacing much of the scrub or nondescript oats and wheat in that part of Texas and in parts of southern Oklehoma, accodring to the July 15 Oklahoma Farmer-Stockman.

Denton wheat is described by the men who had charge of its development as a typical Mediterranean wheat for its stem color which is yellow rather than blue. It is a soft, winter wheat, rather tall growing and of mid-season maturity, ripening from one to three days later than ordinary Mediterranean. The head is short to medium-long, compact, erect or slightly inclined and bearded, showing no tendency to shatter—the latter a characteristic of considerable importance in these days of the combine. The variety has a stiff straw and stands up moderately well under adverse conditions. It has shown considerable resistance in both leaf and stem rust but is not immune to either disease.

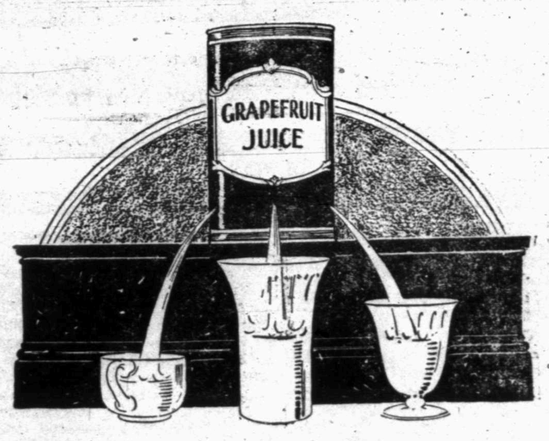

Yields of this wheat at the Denton station and on farms of farmers who have tried it out have been higher than those of other Mediterranean strains and other varieties with which it was compared.

The Nortex oats has shown a greater strength of straw than any other oats tested and has shown the highest average yield of the different lots of Red Rust Proof oats tested at Denton. The variety will mature from two to three days ahead of the commercially grown strains of Red Rust Proof oats.

The Frazier oats has been the highest yielder of the spring-planted oats varieties at Denton over a period of years. It is recommended by the Denton station for planting in January and February. The oats is similar in type of plant and date of maturity to the other Fulghum-type oats strains and is from eight to ten days earlier in maturity than the Red Rust Proof types.

A convict threw a bible at Governor Wilkinson of Barlinnie prison in Glasgow while attending religious services.

Frosty Summer Drinks

FRUIT drinks have now become a regular and most welcome part of the summer. One of the most delectable ingredients of these frosty concoctions is grapefruit juice put up in cans which is here to stay because it's so good. One proof of this permanence is that a company in Florida which already operates two large grapefruit canneries at Eagle Lake and Lake Alfred is now planning to build the largest grapefruit cannery in the world at Winter Haven, but the best way to convince yourself of it is to try out some of the following:

Fruit Combinations

Havana Special: Mix one ten or eleven-ounce can of grapefruit with one cup of pineapple syrup, and add one-fourth cup sugar and one cup water which have been boiled together and then cooled. Chill, add a bottle of white rock, and serve ice cold in punch glasses. This recipe will make ten glasses.

Citric Delight: Boil one-fourth cup sugar and one cup water five minutes, cool and add one ten- or eleven-ounce can of grapefruit juice, one cup orange juice, one-fourth cup lemon juice and four cups of cold water (charged if desired.) This will fill fifteen punch glasses.

Cherry Rickey: Boil one-fourth cup sugar and one cup water, cool and add one ten- or eleven-ounce can of grapefruit juice, the juice from a No. 2 can of sour pitted cherries and one-fourth cup Maraschino cherry juice. Chill, add a bottle of white rock and serve ice cold. Twelve punch glasses.*

SNYDER NATIONAL BANK

We Now Have the New Currency for Distribution.

I interviewed Wilbur B. Foshay, president of the W. B. Fashay Company, who owns and operates businesses throughout the United States, Canada, Mexico and Central America, as to the value of newspaper advertising in connection with the building of their great business. Mr. Foshay said:

"We appreciate the great things that the newspapers of our country have done for us, and I think without a doubt you get more for your money through the purchase of advertising space in the newspapers than you do for any other money you spend.

"There has been a lot of discussion as to the best means of advertising. To say that any one medium is the best advertising medium is an impossibility because of the diversity of things to be advertised, necessitating a diversity of mediums. From the viewpoint, however, ofanyone who wants to get to the biggest number of people with something everyone can use, there is no question in our minds that the newspaper is the best medium.

"Our expenditures for advertisements have increased each year, with the exception of 1928, in which year we spent less than in 1927. But we didn't curtail our newspaper advertising in 1928. We curtailed other things and increased our newspaper advertising somewhat over 1927. This year we have increased our advertising program about one-fifth, and will spend about that much additional money over last year. A large proportion of the additional expenditure will go to newspaper advertising.

"We don't hesitate to make the unqualified statement that newspaper advertising has been one of the greatest assets we have had in building up our business."

DERMOTT NEWS

Everybody appreciated the good rain that fell Saturday evening. The farmers are wearing smiles. This will help the crops wonderfully and will be a great benefit to the grass.

Mr. and Mrs. Emmett Murphy and family of Waco spent last week visiting Mrs. Charlie Johnson and other relatives.

A. N. Edmonson spent the weekend visiting relatives in Portales, N. M.

Miss A. D. Dodson spent the last of the week with her sister, Mrs. Arch Lavender, of Fluvanna.

W. T. Rankin returned home the first of the week from Wise County and reports finding a bee tree and plenty of honey.

Mr. and Mrs. C. C. Harvey and children, formerly of this place but now of Sterling City, spent a while Sunday afternoon with their friend, Mary Hulsey.

George Chowns and wife of Big Spring spent Sunday with his brother, William Chowns, and family.

Harvey Johnson returned home this week from Waco where he has been visiting relatives.

Several of the young people visited the Fluvanna cap last week-end.

Mr. and Mrs. Fonzo Smith and children and Tom Smith returned home Monday from Comanche County and report a good time. They say the crops are not very good in that section.

Mr. and Mrs. Bob Browning, Harvey Browning, and Mrs. Viola Browning and daughter made a business trip to Snyder Monday afternoon.

M. J. H.

POLAR NEWS

By Mrs. J. A. Martin

A part of our community has been blessed with a good rain during the past week, but part of the community received only a slight shower.

Bro. S. B. Wilkerson preached two inspiring sermons at Polar Sunday. The Methodist meeting began Sunday night. We are praying that there may be a harvest of souls during the coming week at Polar.

S. B. Weatherby and family visited Marvin Gafford and family at Crosbyton last week-end.

Kelly Simms and family and Miss Frances Lisles of Post were guests at the Simms ranch last Sunday.

B. A. Moore with the help of Ike Boren, Will Williams, Sid McFalls, Alvin Elkins, Clarence Coleman, Ott Nance and Jim Mitchell, rounded up and shipped 715 head of steers from the E. W. Clark ranch last week. Mrs. Ike Boren and Miss Dutch Elkins were also visiting and helping Mrs. Moore during the roundup. We understand that the steers brought $60 per head.

Clayburn Pirtle of Justiceburg was a visitor with Mr. and Mrs. Ott Nance last Sunday.

Miss Stella Smith, who has been on a business trip to Calgary, Tex., returned home Friday.

Mrs. Calline Love and son, W. Z. Love and family of Pureelle, Okla., have been guests of Mrs. Love's sister, Mrs. R. C. Hoyle, for the past week.

Miss Lanell Simms of Post was a guest at the Simms ranch last week.

Misses Glyn and Ooris Weatherby spent Friday and Saturday as guests in the Craig home.

Mr. and Mrs. Bryan Walker of Odessa have been guests of Mrs. Walker's sister, Mrs. J. T. Simms, for the past week.

Mrs. Ethel Butts of Snyder was a guest of her father and mother, Mr. and Mrs. R. C. Hoyle, last Friday.

Jim Clanton and family of Luther were guests in the Blythe home Sunday.

Mr. and Mrs. Walter Harris, who has been visiting friends and relatives at Luther, returned home last week.

Mrs. Johnnie Hoyle accompanied her father, S. B. Wilkerson, to his home near Snyder Sunday afternoon.

Mr. and Mrs. Bernice Clanton motored to Luther Sunday and were accompanied home by Mrs. Will Clanton.

Messrs. Marvin and Grady Craig and Miss Vera Craig started to cross the river to see friends Sunday and stuck so fast in the river bed that only a team could remove the car.

G. M. Elkins, who owns and operates Polar's store, has been making some more improvements by having the inside woodwork painted and also a part of the outside.

COMMUNITY PROJECTS

THE CHILDREN'S LITTLE THEATRE

As business manager of the Children's Little Theatre of Flushing, Long Island, New York, I take pleasure in describing a project which, I feel, has benefited our community in many ways.

With the cooperation of a few friends, I opened the theatre in January, 1928. Since the very start we have had the support of Mother Clubs in our local schools and the backing of the various women's clubs of our town.

Our aim is to provide clean, wholesome amusement on Saturday mornings for children, to present suitable plays and films and to try to bring back some of the make-believe, of which our children seem to get so little in these present days.

Our program consists of one or two one-act plays, the parts being played by children of the neighborhood. This affords children with any talent an opportunity to develop it. They are encouraged to write little plays themselves, which are produced by us. The pupils of several dancing schools are given a chance to appear in public, an opportunity which they otherwise lacked.

The Boy Scouts and Girl Scouts as well as the Sunday Schools are invited to sell tickets on commission, so they benefit materially by our venture. We also put on a few performances in several schools on a fifty-fifty basis, which enables them to buy equipment otherwise unavailable.

After twenty performances in our community we organized the Children's Little Theatre Guild, children acting as officers and being supervised by a board of mothers. The purpose of this Guild will be work for the Little Theatre. The boys will be instructed in the construction of scenery and the girls in the designing and making of costumes. Children showing ability to write will be encouraged and helped to do so. All this, together with the kind of performance given, has been a source of much enjoyment to the younger children and of benefit to them spiritually. It is hoped that this idea may be adopted elsewhere and aid in bringing about an improvement in the form of entertainment offered to children.

Any money over and above that needed for the maintenance of the Little Theatre will be used for children's charities. Up to the present time we have cooperated with the local theatre, but in time we hope to have a real Children's Theatre, a place devoted to the entertainment of children exclusively.

Mrs. William Richardson,
4016 158th Street,
Flushing, New York.

"ERNIE" WRITES

Rogersville, Tenn.
July 19, 1929.

Dear Times-Signal:

Surely glad to get the good old Snyder Times-Signal on our arrival here and believe it to be one of the best weekly newspapers published in Texas. Please keep it coming to the above address.

We had a very nice trip over here the distance being only 1385 miles, and, too, I want to add that there is only 15 miles of dirt road between Snyder and this good town, that being a detour out of Malvern, Ark. Mrs. Taylor and the children are all well, and of course enjoying their visit very much.

Sincerely yours,
ERNEST TAYLOR.

Ed. Note—The Times-Signal surely appreciates Mr. Taylor's boost, as we enjoy either bouquets or constructive criticism from our friends.

LOCAL FIRM GETS AFTER T. & P.

There has been a great deal of criictism here regarding the long time that it takes local concerns to get freight shipments out of Dallas via the Texas & Pacific railroad. It remained for a local business house, King & Brown, to hit the nail on the head when they protested to the Dallas Chamber of Commerce. Under date of July 18, the following letter was received here:

King & Brown,
Snyder, Texas.
Gentlemen:

We desire to thank you for the cooperation in calling our attention to the delinquency in our merchandise service from Dallas to Snyder, Texas.

According to our agreement with the T&P, merchandise from Dallas to your city should be delivered on the 2nd day. It is only by means of such communications as yours that this organization is able to develop whether the service rendered is in accordance with agreement between carriers and this organization.

We will immediately make necessary investigation as to the time in transit of shipments in the past, as well as what service is now being rendered, advising you the outcome later.

Yours very truly,
S. GOODSTEIN, Manager,
Transportation Dept.

E. H. WHITEHEAD NOW IN GREENER PASTURES

We see where our old friend, Elmer H. Whitehead, is now with the South Texas Chamber of Commerce as assistant manager and publicity man deluxe. Mr. Whitehead during his term of office with the West Texas Chamber of Commerce initiated and put through a great and constructive piece of work, not only along publicity lines but with whatever the body took up, "Whitey" could be found right at the front door ready to do his part 100%. South Texas is getting a mighty fine executive, a hard-hitting "plugger" who can throw more publicity in a minute than most fellows can in an hour, and its good copy.

The Times-Signal congratulates the South Texas Chamber of Commerce for being able to secure a man like Whitehead. He's just all-wool, more than three yards wide and a fellow who hits the king row every time and remains right there. We were sorry to hear of Whitehead's leaving, but no one can blame a man that can accept a position with a greater responsibility and increased salary. One follows the other, and here's best wishes to all concerned.

"It's Great to be a Texan."

"You'll Like Snyder."

STOP AND THINK

E. W. Jorgenson, editor of the Spokane (Wash.) Press, says:

THAT if the average man could picture his dollars as soldiers working for him, fighting his battle of independence, he would save more. Every dollar is a soldier—a little doughboy on detail—working for you!

In army life there are many kinds of soldiers. There are those who waste their moments and bring no returns to their commanders. There are other soldiers who are constantly on the job, doing the daily duties industriously, helping to win whatever war or project the army has on its hands at the moment.

You can have YOUR army of dollar soldiers if you want them. You can have just as large an army as you wish! It's all up to you. By holding grimly to your soldier dollars and making them work for you—by putting them into savings accounts at interest—by putting them out as safe loans—by investing them in bonds or in property that will increase in value—you build up your own little army and become strong and powerful. No great financier ever won his position of financial power without clinging tightly to his dollar soldiers. You have probably heard the story of Rockefeller, who saved his early earnings. You have heard many tales told of rich men who put their first earned "soldier dollars" to work for them.

The size of your dollar army is up to you. A squad is eight men in army life. You can have a squad of eight silver dollars working for you or you can have more. You can have a platoon, 24 men. Or you can have a company of 85. If you are real ambitious you can build your little army up from platoon to a battalion of 334 men, or to a regiment of three battalions, 1,150 men, or even to a brigade, 3,221 men, or a division of 10,939.

You can be a corporal in your army of dollar soldiers or you can be a captain or general. You are commander-in-chief. When you have built up your little army of soldiers you have a powerful force. You can make war on poverty, destitution, sorrow. You can be independent. You can purchase the luxuries and necessities that you and your family desire. You can have a home of your own, an automobile, a fine radio, a washing machine, an electric refrigerator, furniture, soft carpets, good things to eat.

If you already have an army of dollar soldiers in the making, keep it growing. If you haven't got even a corporal's squad—start one now! The battle of financial freedom starts with that FIRST SAVED DOLLAR!

THE TABERNACLE MEETING

Following are the sermon subjects to be chosen from during the next ten days of service:

"What Constitutes the Inspired Scriptures?"
"My Father's Business."
"What Shall I Do with the Rod?"
"Ruth, The Satisfied Stranger."
"The Side Entrance to Heaven."
"Our Generation in Prophecy."
"Operation of the Holy Spirit."
"A Message from Hell."
"Must Jesus Have Died on the Roman Cross?"
"The Authority of Jesus."
"The Sin of a Divided Kingdom."
"In the Clutches of a Monster."
"Mountain Top Experiences."
"The Tabernacle Church."
"Show Me the Way to Zion."
"God's Uninterpreted Plan of Salvation."
"Grace Through Righteousness."
"My Faith in Evolution."
"Paul's Conversion a Pattern."
"The Forgotten Waterpot."
"Quench Not the Spirit."
And others.

If you seek spiritual development through God's spiritual food, why not come and partake? "The feast is prepared." "The Spirit and the Bride say, Come! Whosoever will, let him come and drink of the waters of life freely." A very cordial invitation is extended to all.

THOMAS M. BROADFOOT,
Minister.

ECONOMY STORE STARTS ANNUAL CLEARANCE SALE

Last week's Times-Signal told of the annual clearance sale of the Economy Dry Goods Co. on the south side of the square. Mr. Rosenberg had some real prices quoted and it would pay our readers to check back to last week's paper that they might take advantage of the remarkable prices that were listed.

"It's Great to be a Texan."

The department of national defense in Canada is said to possess the secret of an explosive more powerful than any previously known.

Helen Beamer, 9, one of the most famous of present day Hawaiian hula dancers, is making her first visit to the mainland of the United States.

THE VALETOR SIGN
on the window of an establishment means:

Through modern pressing equipment the care of clothes has become a scientific operation which delivers far more than perfectly pressed garments.

Vacuum Drying

Dry heat, harmful to fabrics, is not used in the Valetor method. Garments never have a stiff, **boardy** finish. They have the soft-dry, luxurious feel of new clothes. They are ready to be put on instantly.

Creases Last Longer

Regular pressing by this method maintains the original balance and fine lines of your suit. The pressed effect lasts longer.

Can't Harm Delicate Dresses

By **regulated** steam pressure the Valetor smooths wrinkles gently and safely, sending back your loveliest chiffon, crepe or satin frock soft and fresh.

SANDEFER NOT A CANDIDATE

There will be mixed feeling in West Texas relative to the announcement that Dr. J. D. Sandefer, president of Simmons University, has eliminated himself from consideration as a candidate for the governorship of Texas in the ensuing campaign. The doctor feels that he has a life's work cut out for him at Simmons.

Much religious feeling is going to be injected into the next political campaign. In fact it begins to look like religious prejudice is going to be the deciding factor for the next few years in political campaigns, taking the place of prohibition. Regrettable as this may be, it is a situation that must be met. When people get their religious prejudices stirred up they are more determined, madder, than over any other one question save one—that of race.

A great majority of West Texans could have voted for Dr. Sandefer very gracefully. Really, it looked like he could get enough votes to get in the second primary where he would be an almost sure shot. But that a good West Texan should eliminate himself from a political campaign where his own vigorous cation and religious hatred is a hidden behind a barrage of villification and religiousu hatred is a sort of relief.—Floyd County Hesperian.

This is not the first time President Sandefer has been mentioned for the governorship of Texas. He has even been repeatedly urged to become a candidate in more than one election in the past. But his answer is invariably the same. He is a servant of humanity. He believes that he is in a place of greater service to humanity than the governorship of Texas affords. Doctor Sandefer's heart and soul are interested in the youth of this nation and believes it is his duty to fill his place as a Christian educator. This he has done for many years with great success, and, loving the work as he does, no political glory or financial gain can swerve him from his purpose.

President Sandefer has ben repeatedly offered the presidency of larger universities and colleges, with correspondingly increased salaries, but his heart is with Simmons, the school he has led from the struggling small college of a few years ago to the great outstanding West Texas institution it is today. He would feel untrue to his thousands of friends and the countless thousands of Simmons alumni, ex-students and friends all over the nation if he should quit now to pursue some political honor by treading through the muck and mire of political scandal and religious prejudice in the attainment of that honor.—O. D. C.

HIGHWAY SAFETY CONSCIOUSNESS ESSENTIAL

There are but three causes for our disgraceful automobile accident record: carelessness, incompetence and lax enforcement of traffic laws.

It is time for Americans to admit that the accident problem has reached a point where it is a menace to the life and property of every person and that the "prevention" methods of the past have been failures. The much-lauded solution by compulsory insurance was found to increase accidents, rather than decrease them.

Insurance can only indemnify. It can never prevent. It is a minor phase of the accident problem, not the crux.

In most communities, traffic laws are inadequate to meet modern conditions. Drivers are licensed wholesale, usually without tests to determine their mental and physical fitness. The irresponsible and the reckless crowd the highways. America has not gained a "highway safety consciousness."

An insurance law, such as New York has adopted, which forces a motorist to prove financial responsibility after he has caused an accident, or lose his license, places responsibility where it belongs, on the party at fault.

We must rid ourselves of the reckless and ignorant and instill the basic facts of safety in the mind of every driver and pedestrian using the highways.

SNYDER NATIONAL GUARD WILL LEAVE FOR ANNUAL CAMP AUGUST 3

Saturday, August 3rd, Snyder's famous Company "G", 142nd Regiment, will entrain for Camp Palacios. Capturing records has been the annual fare of our Scurry County boys. They will be leaving here for a two weeks' stay and will drill hard.

What of that?

It means that a lot of husky fellows will go down there and take on physical military training for that time and get fit mentally for anything that may come along to destroy the peace and dignity of the state, nation or world. They will learn the tactics and be paid while learning. They will be given thousands of dollars worth of information, food and raiment and be paid to take it.

A sergeant gets $1.70 per day. Privates get $1.15 and $1.00 per day.

Why such a plan?

Well, Uncle Sam figures that he can thus expend a lot of money that will be big money saved in a safe investment for the future—against the day when somebody will try to start something on an unprepared nation.

We are told that there is some little trouble experienced in getting some men away from their jobs to attend the Palacios Encampment. The employers seem to think, in some instances, they cannot let them off. Other employers are looking at the matter from a different viewpoint. They point out the facts that the men are laying off from their jobs when they make that trip, hence they are not paying them anything. They also show where that outing is to take the place of a vacation, for a vacation is nothing but a diversion, and a diversion helps build where the vacation has torn down. They actually say that their men work better when they come home than they did before they went to the camp for the simple reason that they have had a rest—that same diversion we have been talking about above. The men feel more kindly toward helping their employers, it is stated, for having had the outing. It seems to pay on both sides of the counter, so to speak, therefore is not a bad bargain after all.

Although we have heard all say there is real work in a real drill, especially if they come about four times a day with about four hours to each drill. But they like it. They say it is the very thing to get the fitness from; to become efficient in, and then, when it is necessary, impart that efficiency to many others.

With the nucleus like the National Guard, which will spread the leaven to far and near, no nation on earth will ever be able to say again we know nothing of military matters; that we will be whipped when we start, etc.

Sure, we won the World War without any preparedness to speak of.

But how much quicker would we have won it with preparedness? We would have won it before it started, for nobody would have jumped us at all, and we would not have had to jump anybody.

If everybody is prepared, there will be no war, simply because professional warriors jump defenseless victims. Prepared pacifists are a terror to professional warriors.

We hope the boys go to the camp and then come back very muchly benefitted.

METHODIST NOTES

Interest in the various activities of the church is good. There is not the usual mid-summer slump in attendance. In fact, some departments show a marked increase, notably the Woman's Missionary Society.

Rev. Hardy is bringing some very helpful messages to fair congregations. More Methodists ought to hear him.

The Sunday School is ably headed by Supt. A. C. Preuitt. All departments are making progress.

The choir is doing good work and furnishing special music for all services.

A musical program is being prepared, to be given Sunday evening, August 4.

Announcements
Sunday School, 9:45 a. m.
Preaching, 11:00 a. m.
Epworth League, 7:15 p. m.
Preaching, 8:15 p. m.
Prayer meeting, Wednesday evening, 8:15, followed by choir practice.
W. M. S. Monday, 4 p. m.
Every Methodist in the community owes it to himself and the church to attend these services.
A cordial welcome to all.

SWEETWATER WILL DEDICATE AIRPORT

Sweetwater citizens are making extensive preparations for the dedication of their new airport Saturday and Sunday, August 10 and 11. A fund of $1,500 is being raised by popular subscription to offer as prizes to visiting fliers.

The tentative program as announced for the opening day includes:

9 a. m. to 12 noon—Inspection of arriving planes.

10 a. m. to 11 a. m.—Band concert.

1 p. m.—Invocation by Rev. Chas. T. Whaley, pastor of the First Baptist Church.

1:05—Presentation of the Sweetwater Municipal Airport to the world, C. W. Bryant, mayor of Sweetwater.

1:15—Acceptance on behalf the people of Sweetwater, Palmer Leeper, president of the Board of City Development.

1:25—Acceptance on behalf the aviation industry, Earl P. Halliburton of the Southwest Air Fast Express, Tulsa.

1:35—Acceptance for International circles of aviation, Lauro Izaguirre, Mexican Consul, Sweetwater.

Band concert.

The following contests will be staged with cash prizes to the winners:

Dead stick landing; army pursuit plane race; airplane race; army planes balloon breaking contest; army planes bombing contest; parachute jump.

Sunday, 1:30 p. m.: Race, army two-seaters; army formation flying; commercial plane balloon breaking contest; race; free-for-all race.

To make orange ice for dessert you need 2½ cups of orange juice, ¾ cup lemon juice, 2 cup sugar, ¼ teaspoon salt, and 1 egg white. Strain the fruit juices, add the sugar and salt, and stir until the sugar is dissolved. Freeze with a mixture of 1 part salt to four to six parts of ice. Turn the crank slowly. When partly frozen add the beaten white of egg and turn until firm. Pack in ice and salt for an hour or so before serving.

HELPING TO BUILD TEXAS

A pearl button factory is to be a new Texas industry at Brownsville where the Automatic Pearl Button Co., Muscatine, Ia., has contracted with the Cameron County water improvement District No. 5 for the right to go into all irrigation canals and resacas and take out clam shells, paying at the rate of $1 and $2 a ton. The plant is expected to bring 50 or more families to Cameron County. Mercedes has a plant already in operation employing 25 workers with a total of 55 expected to be at work soon.

Texas was the fourth largest shipper of dressed poultry to Chicago in May, Iowa, Missouri and Kansas ranking ahead of it.

The new canning plant at Robstown will can pickles and kraut.

Fort Worth voted $3,000,000 in bonds, $2,000,000 of it for subways and viaducts as a part of the plan for a $4,000,000 passenger station and freight terminal. A half million of the remainder for a central fire station and enlarged fire alarm system.

Claim is made for the North Texas State Teachers College at Denton of the largest college summer session enrollment in the Southwest with 3,500 the probable total before the term ends.

A Mercedes company has been organized to handle the export of eggs from the Valley into Mexico.

A $1,000,000 office building for the Houston Gas & Fuel Co. is to be erected by the Moody-Seagraves Co.

The Archer City Chamber of Company purchased twenty-six registered animals to be shipped from Michigan, Indiana and Ohio. The Crockett Chamber of Commerce has purchased four registered Jersey bulls to comprise the first Crockett bull circle.

A Jersey cow in the herd of the West Texas State Teachers College at Canyon produced 648.48 pounds of butterfat and 10,853 pounds of milk in 305. As a senior 3-year-old she won the state championship with 736.86 pounds of butterfat and 13,215 pounds of milk in 365 days.

END COACHING SCHOOL

The Texas Tech coaches ended their coaching school July 13 with the conclusion of the first term of summer school. Since then Coach Payne has left on a visit to his home in Abilene and a fishing trip to Devil's river. Director Freeland plans to spend his vacation in the mountains of New Mexico. Coach Higginbotham will remain in Lubbock for the time being, but both he and Coach Payne expect to attend some coaching school in August.

Dry As Dust

Minister—I hear, Paddie, they've gone dry in the village where your brother lives.

Paddie—Dry, mon! They're parched. I've just had a letter from Mike, and the postage stamp was

When Walter Corson of Chicago failed to show up for his wedding, friends found him under arrest for being drunk.

How to Raise Poultry

By Dr. L. D. LeGear, V. S., St. Louis, Mo.

Dr. LeGear is a graduate of the Ontario Veterinary College, 1892. Thirty-six years of veterinary practice on diseases of live stock and poultry. Eminent authority on poultry and stock raising. Nationally known poultry breeder. Noted author and lecturer.

ARTICLE XXVIII
NATURAL BROODING METHODS THAT INSURE REAL SUCCESS

Editor's Note—This is another story in a series of 52 stories on poultry raising written by the well known national authority, Dr. L. D. LeGear, V. S., of St. Louis. The entire series will appear in this paper. Our readers are urged to read them carefully and clip them out for future reference.

A well known, high ranking church official of other days is credited with having said, "Give me the child until he is six years old, and I don't care who has him after that." In other words, this famous prelate believed that any influence exerted on a child during the tender formative years was much more important than anything which might come later. Much the same principle may be applied to chicken raising without straining the logic too greatly.

Natural brooding with hens is the easiest and simplest way when comparatively few chicks are to be raised, as on many farms and with practically all of the so-called "back yard flocks." This method relieves you, to some extent, of the constant watchfulness necessary with the artificially raised chicks. The hen takes much of the burden off your shoulders by protecting, teaching, and exercising the chicks.

If you select this plan, the time to start is when the first chick breaks out of the shell. Visit the nests frequently and remove broken shells so that they will not slip over the ends of eggs and smother unhatched chicks. Watch the hens carefully. Some hens have a tendency to desert the nest as soon as one chick has hatched. Either confine such a hen to the nest until the hatch is completed, or transfer her to a broody coop, putting the eggs and chicks under some other hen.

Watch also for nervous, restless hens that shift about a great deal. They often crush the newly hatched chicks. Remove chicks from such hens as fast as they hatch.

Once the hatch is completed, the next step is to transfer hen and chicks to appropriate brooding quarters. These, of course, will have to be prepared in advance. Such quarters usually consist of a good weather-tight coop that is free from draughts. One side of the coop is partly open as a rule to provide sufficient ventilation and to let the chicks run in and out at will, when the weather will permit. On this side there should be a runway or small yard so the chicks can get out on the ground for the needed exercise.

Coops should be thoroughly cleaned, disinfected and aired for several days before chicks are placed in them. Under no circumstances feed the hen cracked grains. She should be fed whole corn as the chicks may eat small particles with serious or even fatal results. Carry the chicks in a box or basket well lined and covered, to avoid chilling them, and carry the hen under your arm. Place the hen in the coop and gently slip the chicks under her.

Even in the best weather it is best to confine the chicks to their quarters for the first two or three days. Otherwise they may roam too far away. They also need protection against hawks, rats, cats and other enemies.

Keep the hen confined to the brood coop preferably until the chicks are weaned and under no condition let her out under two weeks. Even then, do not permit her to run at large. Keep her in the runway, allowing the chicks to range outside if you wish. She will keep them near at hand by constantly clucking and calling to them so they get plenty of exercise. If the hen is allowed free range she is likely to tire the chicks out. She may also lead them through wet, cold grass, chilling them too much.

When you finally decide to give the brood their full freedom, release them rather late in the day the first time. Each succeeding day advance the time a little until they are out a full day.

Watch hens carefully from this time on. They do not know exactly how many chicks they have and may lose one or two. A so look after them in the same way when sudden showers come up. A hen will often leg it back to shelter leaving one or more hapless chicks at the mercy of the elements.

The hen may continue to mother the chicks anywhere from six to twelve weeks and even longer.

Chicks brooded by hens are much more likely to become infested with vermin. This can be avoided by dusting the hen at frequent intervals with a good lice powder. This should be done the first time before the hen is set and then three or four days before the hatch is done. Do not use the strong lice powder on the hen while the chicks are quite young, as it may kill the chicks. Later, the regular lice powder may be used.

ROBERT QUILLEN TELLS TRUTH IN WEDDING WRITE-UP

Robert Quillen, the strange small town genius who does Aunt Het, a daily syndicated editorial feature, and writes all of the news and editorial matter that appears in a small four-page weekly, the Fountain Inn Tribune, at Fountain Inn, South Carolina, has turned out a masterpiece in the form of a truthful wedding write-up.

It is better than anything Artemus Ward, Eugene Field or any other daily newspaper scribe ever wrote.

POPULAR YOUNG COUPLE MARRIED THIS WEEK

Mr. Robert Ghetway and Miss Alive Broadkin were married at noon Monday at the home of the bride's parents, Mr. and Mrs. P. D. Broadkin, Rev. M. L. Gassoway officiating.

The groom is a popular young bum who hasn't done a lick of work since he got shipped in the middle of his junior year at college. He manages to dress well and keep a supply of spending money because his dad is a soft hearted old fool who takes up his bad checks instead of letting him go to jail where he belongs.

The bride is a skinny, fast little idiot who has been kissed and handled by every boy in town since she was 12 years old. She paints like a Sioux Indian, sucks cigarettes in secret, and drinks mean corn liquor when she is out joy-riding in her dad's car at night. She doesn't know how to cook, sew or keep house.

The house was newly plastered for the wedding and the exterior newly painted, thus carrying out the decorative scheme most appropriately, for the groom was also newly plastered, and the bride was newly painted.

The groom wore a rented dinner suit over athletic underwear of imitation silk. His pants were held up by pale suspenders. His number eight patent leather shoes matched his state of tightness and harmonized nicely with the axle grease polish of his hair. In addition to his jag he carried a pocket knife, a bunch of keys, a dun for the ring and his usual look of imbecility.

The bride wore some kind of a white thing that left most of her legs sticking out at one end and her bony upper end sticking out at the other.

The young couple will make their home with the bride's parents,—which means that they will sponge on the old man until he dies, and then she will take in washing.

The happy couple anticipates a great event in about five months.

POSTSCRIPT—This may be the last issue of The Tribune, but my life ambition has been to write up one wedding and tell the unvarnished truth. Now that it is done, death can have no sting.

MAKE GEOLOGICAL TOUR

Dr. L. T. Patton, head of the department of geology of Texas Technological College, and nine students of geology who left Lubbock June 3 on the annual summer geology tour, returned July 15 after an extended trip of 4,500 miles covering important places of geological interest in New Mexico, Arizona, California, Utah, Nevada and Colorado.

Dr. Patton and the students did special research work in the Great Basin, the Royal Gorge, the Mohave desert and other places of geological interest and visited the most important art galleries and museums in the West.

BIG SPRING PLANS FOR I. O. O. F. MEET

The Big Spring Chamber of Commerce is cooperating with the I. O. O. F. Lodge in perfecting plans to entertain 500 Odd Fellows and their families on August 14 and 15 when they will hold their district meeting there.

Prominent speakers will appear on the program, according to Jim Crenshaw, and an old time West Texas barbecue will be included in the entertainment features. The meeting was recently transferred from Merkel.

After being imprisoned for an hour under several tons of clay, Ray Tribble of Brazil, Ind., was dug out alive.

Tables Turned After 15 Years

"Sargon turned the tables for me after I had tried for 15 years to get well of stomach trouble. Now I am gaining every day. I went from 119 to 130 pounds, a gain of 11 pounds in three weeks on just three bottles. That's pretty good for a man 62 years old.

"I suffered day and night for almost 15 years and spent many hard earned dollars for medicines, but none of them reached my case until I got Sargon. I felt weak and sick from morning until night. I would just drag myself around but now I feel years younger and can keep going all day. I eat anything I want and have no trace of stomach trouble, headaches or dizzy spells any more.

"The Sargon Soft Mass Pills straightened out my liver and I no longer suffer from biliousness and constipation. It sure is great to be feeling like my old self again and I will always praise the Sargon treatment. There never was any medicine equal to it."

G. B. Beatty, 514 Page Street, Ft. Worth, Texas.

Warren Bros., Agents.

GASSAWAY DAIRY IS NOW RATED "GRADE A"

According to records of the State Board of Health, the Gassaway Dairy is the only local dairy that can mark their milk "Grade A" and which conforms to the recent milk ordinance.

Crystal City, in the Winter Garden district, is the largest shipping point for spinach in the world. In the 1928-29 season spinach shipments out of the Winter Garden area totaled 4,300 cars.

FINDING OUT ABOUT STEEL

The first steel skyscraper ever built is now being torn down in Chicago. Put up in 1887, it is now out of date and is being removed so that a bigger structure can take its place.

Experts from the American Institutue of Steel Construction are watching the demolition with great interest. For years there has been considerable discussion about the way a building's steel framework will endure the changes wrought by passing years. Some experts have thought one thing, some another, no one has been quite certain.

Now, however, they are going to get a chance to find out. Steel from this pioneer skyscraper will be put through all kinds of tests, so that the experts can tell definitely just what, if anything, has happened to it. The new knowledge thus gained will prove of great value in future steel construction work.

THE TOWN THAT GROWS

Once in a while—say in a hundred years or so—a town can sit still and without an effort grow into a city, just by the location of some industries which drop in unasked. But the other ninety-nine years the town which grows into a city is the town whose people have vision, energy, courage and a go-getting spirit. There is too much competition now among cities for the town which only sits and waits to have much of a chance.

OPEN NEW STORE

Charley Noble, who has been with the Bryant-Link Company for several years, and B. H. Moffett, are opening up a gent's furnishing store this week. The new store is located on the east side of the square where the Casstevens tin shop was formerly located.

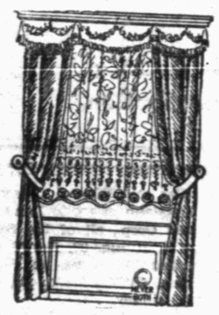

Six bridal couples recently arrived in Paris from London on aerial honeymoons.

U.S. makes Dollars SMALLER
PLYMOUTH makes them LARGER

IN WASHINGTON, the government presses are turning out smaller dollar bills. In Detroit, the huge Plymouth plant, largest of its kind in the world, is turning out a motor car that makes the dollar bigger in purchasing power.

$655 and upwards f. o. b. factory

Not in all automobile history has another such value appeared in the low-priced field.

There has never been another low-priced car to compare with the improved Plymouth in full-size roominess—in Chrysler-designed stylishness—in Chrysler-like briskness and smoothness—in all-around quality, ability and stamina.

In every respect, Plymouth is the biggest thing in its class. Compare—you'll be astonished how much bigger in value Plymouth has made the dollar.

Six body styles, priced from $655 to $695. All prices f. o. b. factory. Plymouth dealers extend the convenience of time payments.

Fluvanna News Notes

Mr. Jas. H. Tate (V. P.) is the authorized correspondent for Fluvanna, and as such is authorized to receive renewal and new subscriptions. Cooperate with him in building a fine weekly news column for this thriving town.

Fine Rains

On Thursday afternoon of last week we had a nice rain amounting to one-half inch here in town—heavier in some parts and lighter in some places. Then from Saturday evening until Sunday morning we received one of the finest rains we ever saw, amounting to 1½ inches, thus making two inches during the latter part of last week. The Saturday rain was free from any sort of storm condition, except lightning—no wind or hail. The Thursday flurry brought considerable hail to the east of Fluvanna, doing considerable damage to a few crops. We understand that the Houston and Ed Boles crops were ruined. With an abundance of stock water and a good season, the general outlook is very good.

Oil Well

Our new oil well test—John Truss No. 1—two miles south of Fluvanna, is expected to spud in today (Tuesday). With the fine season in the ground, an oil well in the course of drilling and a fine new school building in course of construction (as will be in a very short time), something is doing at Fluvanna.

Church Affairs

The meeting under the auspices of the Christian Church is now in progress at the arbor. That congregation served dinner on the ground last Sunday, and three services were held during the day.

The other churches called off services out of deference to the meeting.

Visits and Trips

We understand that Arch Odom and family have gone on a visit to Hill County.

John Stavely made a flying trip to Lubbock last Thursday.

John Bley of Sweetwater visited his father here last Wednesday. The old gentleman has been down with inflamatory rheumatism for some time.

Will Sturdivant and wife and a few of their children—eight—of Hermleigh visited Uncle Jimmie and Aunt Tennie Johnson last week.

W. R. and Mrs. Carmichael and Abilene spent the week-end here with home folks.

Mrs. Clarence Dowdy is spending a few days visiting the Dowdy family.

O. A. Sewalt and family have returned from Big Spring.

Bob and Mrs. White have recently returned from a visit among relatives in East Texas.

J. H. Roddy and wife of Runnin County are here visiting their son, J. L. Also Miss Mildred Roddy of

Mr. Johnston is here visiting his daughter, Mrs. F. J. Moore. He spent the winter and spring in California.

Virge Hale is back from California, and his wife has returned from Brown County.

Miscellaneous Notes

The Demonstration Club put on a nice exhibit of vegetables and fruits at the Presbyterian Church last Monday. Sixty-three vegetables and eleven fruits were on display.

Some one or more thieves tried to steal Wallace Jones' car one night last week while several of our young people were attending orchestra practice at the school building in Snyder. The car has a Yale lock, and the thieves tried to wire the switch out in order to start the engine.

Stealing, boot-legging, robbing and everything else that is mean goes on apace, and yet, in spite of the president's urgent plea for law observance and law enforcement, there are plenty of people who wish to be regarded as respectable but who habitually patronize the bootlegger; not only so, but there are public officers who get drunk on the stuff; and the court will turn a bunch of thieves loose without trial, giving as an excuse the statement, "There were no eye-witnesses." How many times are there eye-witnesses to stealing? So long as the people elect that kind of stuff to public office, just so long will all sorts of crime flourish and get by without punishment; and no man's person or property can be considered reasonably safe. There has been a course of procedure going on at our state capital, as well as elsewhere, during recent months which is a burning shame to Christian civilization. What can we do? Why, there are many avenues through which we may work effectively, but the ballot is a safe and most effective means of redress if only it is used in an intelligent and careful manner and in the true patriotic spirit; otherwise the days of our great state and of our glorious republic are already numbered.

What shall the end be?

JAS. H. TATE.

Dal-Paso Cavern Motorcade to Get Under Way at Marshall Aug. 1

Motorcaders who take the All Texas Tour which starts at Marshall August 1 will have an opportunity of visiting the Carslbad Caverns, according to Wm. A. Wilson of Lamesa, secretary of the Dal-Paso Highway Association and who is in charge of this tour.

Thirty miles southwest from the city beautiful is "The Dream of the Ages," the world's largest and most magnificent Carlsbad Cavern! More than forty years ago, according to old timers, tiny bats attracted attention to a great opening from which they came forth to feed. A sheer drop of ninety feet for many years prevented man's entrance into the cavern. Later, Jim White, now the veteran explorer and chief guide, lowered himself on a rope into the earth's bosom and over a period of years explored its innermost recesses and brought back stories of the marvelous formations within the apparently inaccessible grottos of what is now one of the most celebrated caverns. World tourists, art connoisseurs, writers and even lexicographers who have explored the subterranean passages of this newest of national monuments, find themselves helpless to describe the ornate formations and the unbelievable magnitide of the great cave. In the language of a mineralogist of 25 years service with the government, there is but one explanation applicable to the cavern, namely, the first words to pass over the first telegraph wire: "What Wonders God Hath Wrought."

The National Park Service on April 1, 1926, assumed control of the monument and at the close of the year 11,741 visitors had seen the wonderful structure. In 1927 and 1928 there were 29,034 and 46,222 visitors, respectively. Estimated attendance for the current year is 65,000 visitors and probably 100,000 visitors annually hereafter. Electric lights and easy comfortable trails offer to the visitor a day of wonderment unlike any other experience.

An added attraction of the Carlsbed community is the fresh mineral water bathing beach attraction only five minutes drive from the main business district, and summer tourists on their return to Carlsbad from the cavern trip wend their way to the lake to ra plunge in the waters from the Carlsbad mineral spring. Carlsbad is also known for its hospitality. Recent discoveries of potash within a few miles from the city beautiful, and increased activity in oil development, likewise have given the city a place of unusual prominence.

The itinerary for this tour, according to Wilson is: August 1, Marshall, Longview, Mineola, Grand Saline, Wills Point, Breckenridge, Albany, Anson, Roby and Snyder, (spend second night in Snyder); August 3, Gail, Lamesa, Seminole, Hobbs, N. M., and Carlsbad, N. M. (spend third night in Carlsbad); Sunday, August 4, visit Carlsbad Caverns National Monument (spend fourth night in Carlsbad;; August 5, leave Carlsbad for El Paso where the party will break up with entertainment by the El Paso Chamber of Commerce.

According to Wilson, in charge of the tour, many notable and prominent citizens from all parts of the state will be in this tour.

Diseases In Poultry Flocks Are Very Costly

By Jack B. Denerson, Field Rep., Western Produce Co.

Poultry has gained much ground in West Texas in the past five years. Diseases have also gained some ground. We will take roup as an example. We have had roup as far back as I can remember, and will always have roup as long as we have colds. Colds are usually brought about by a change in weather conditions, or roosting in houses that are poorly ventilated. Crowding is another good way to get roup. I have never been convinced that roup is contagious, as I have placed roupy birds in close confinement with well birds and have never had it show up on well birds.

Roup symptoms: Discharge from one or both nostrils, swelling below eyes, which if not removed in a few days becomes a chick chesy mass. We have more than one kind of roup, so you must be careful or you may be treating the roup when you have nutritional roup. This nutritional roup looks very much like other roups. Its causes are the lack of Vitamin A, which they get from green feeds and cod liver oil. Roup, chickenpox and nutritional roup will all develop a cheesy mass in the mouth and throat. The white patches in the mouth of the bird with nutritional roup are about the size of a pin head and sometimes show masses of white cheesy material in the cleft of the mouth. This disease may be distinguished from chickenpox by the absence of yellow color in cheesy material and the small patches in the mouth.

Roup treatment: Keep your houses free from drafts but well ventilated. Use a half pound of epsom salts to one hundred 2-lb. and up chickens in drinking water. Every three weeks spray nights with some kind of good spray until you have the disease under control.

Treatment for nutritional roup: Is all the green feed they will eat or cod liver oil with the mash feed.

Our next subject will be chickenpox, blackhead, coccidiosis and internal worms in poultry.

What does it profit the poultryman to spend his time and money incubating, brooding and feeding a flock of poultry and then let some of these diseases mentioned that can be controlled at very small expense take all the profits of the year's work?

If you are a poultry producer or dairyman and are having trouble that you cannot control, write me at Abilene, Texas, care of the Western Produce Co., Inc. Always describe your trouble as near as possible. How long the disease has been in the flock, the breed of poultry you have and treatment you have been using. All of this is important. Our services are free to all. Will be glad to hear from all having these troubles.

WHO MAKES THE PRICES?

At Brownfield the other day, the editor noticed some cream cans in a merchant's store, with the name of Armour, Woodward, Okla., on them. Inquiry brought out the fact that this particular merchant was buying cream in Brownfield, paying 38c a pound butterfat basis for it, and shipping all he purchased to Armour's creamery at Woodward.

The price happened to be the same price offered to producers of cream af Lubbock, where Swift and Company operate a creamery.

Which brings up the question:

Is cream bought at 38c in Brownfield and shipped all the way to Woodward, Okla., paying returns to the big companies comparable to that purchased at the same price in the same town a creamery is located?

If cream is worth 38c a pound butterfat to the big companies at Brownfield, more than 200 miles from the creamery, then it should be worth more than 38c a pound in Lubbock, or in any other town where a creamery is located.

Are cream prices made by the big companies on a differential basis—figured from the distance farthest removed? If so, then the producer nearest the plant is not getting as much for his cream as he is entitled to.

This is just another instance where the producer has no say in fixing the price of his product.

Some may say that this condition, because it prevails, is right, but there is another opinion and, some day, it may prevail. That is, that the producer might wake up to the fact that from his right of production he possesses the right to say what he shall sell for. In the case of cream the producer is more or less at the mercy of the market offered, or lose his cream.

Even that has been done. There are instances on record where the producers were being bled for their profits. They kicked and balked and refused to deliver their products, unless a better price were paid. And it was paid.

Through cooperation this question, and many similar ones, can be solved to the advantage of the man who produces.—Lubbock Avalanche.

NEWSAPER WOMAN WILL BE CANDIDATE FOR GOVERNOR

A newspaper woman has announced her candidacy for the governorship of Texas—a year in advance of the 1930 primaries.

Miss Katie Daffan's campaign will mark her debut in the political arena. It may be the climax to an active literary career and many years of leadership in Texas women's organizations.

Sponsoring her candidacy is the Texas division of the United Daughters of the Confederacy, of which she has been president four times.

This fourth woman to seek the rank of chief executuive in the Lone Star state may be opposed by Mrs. Miriam A. Ferguson, who was governor before Dan Moody, the incumbent. Some political prophets say that Mrs. Ferguson again will be a candidate. She was defeated for re-election three years ago.

The state's men politicians, true to tradition, do not take Miss Daffans candidacy seriously. Neither did they take Mrs. Ferguson's aspirations to mean anything a few years ago.

At present Miss Daffan is literary editor of the Houston Chronicle. She has been state president of the Texas Women's Press Association, state historian of the Daughters of the American Revolution, state secretary of the General Federation of Women's Clubs and superintendent of the Confederate Woman's home.

Miss Daffan probably will find herself in a large field of candidates. Politicians predict a multi-cornered race to determine who shall succeed Governor Moody.

Convicted for the 91st time for fighting, Mrs. Mary Walsh of Liverpool maintained that she was "a lady."

$13,500 PLANE ARRIVES AT LOCAL LANDING FIELD

V. E. Cottingham and Carl Cromwell of San Angelo, arrived here last Thursday in a new Lockheed-Vega monoplane and went at once to the John R. Truss No. 1 oil test location to complete plans for the spudding in of the well.

The monoplane, powered with a Wright Whirlwind J-5, 220 horsepower motor, was pilgted by C. S. Darnall and cost $13,500. The plane was the property of Mr. Cromwell and will be making many trips here from its home port of San Angelo as the Fluvanna oil development gets under way. W. L. Power and C. S. Bradley met the plane when it landed at Yoder Field.

STINSON DRUG CO. NO. 1

GATHER EGGS FROM MAY-JUNE CHICKS DURING NOVEMBER

"Gather eggs from May-June chicks in November."

"Impossible!" you say. According to E. A. Sindecuse in the current issue of the Purina Poultryman, May-June chicks may be made to produce eggs in November and hit the peak of the fall egg market.

"Remember last winter," the article says, "we had pullets in our flock that waited until January to start laying. Perhaps they were late May or earlyJune hatched, but how old they were when they came into lay. If it were January or liter—they were eight months old. Think of it—eight months! We had carried them through the time of the year when it costs the most to house and feed them. Before they hit their stride in egg production, egg prices tobogganed—and we couldn't get out of the way.

"Just why didn't these pullets start laying during November instead of waiting until January? True, they were late hatched. Allowance has been made for that, or the question would be, 'Why didn't they start laying during September or October?' Plenty of pullets reach production in five months time—but these took eight months. Why? Well, checking back into the past, one wouldn't need many guesses to hit upon the things he failed to do to get them into laying at five or six months."

Continuing, the article says, "Instead of watching those late hatched chicks closely through the growing period, we sort of let them coast. On the level, now, isn't that true? We put a lot of faith in pasture, grasshoppers, worms and grain. We leave it up to nature to do a lot of the feeding.

"Now what are we going to do about it? Let's give them every chance to go ahead. Let them have the things they need to develop their egg-producing systems, body frames, tissues, muscles, feathers and vital organs. Watch them closely. See that they are kept free from contaminated or unclean soil. Keep them from running and mingling with the early-hatched chicks. Make sure that their houses are well-aired at nights and that they have shade on the hot days.

"Think about their feed," the article says. "A lot depends on how we feed. Still more on what we feed. By all means full-feed. Nothing delays late-hatched chicks more than stinting on the feed. Good feed and plenty of it hustles them along. Keep the mash hoppers filled with a growing mash that promotes a steady, even development. Keep plenty of cool clean water near the feed hoppers.

"Follow this system out and late-hatched chicks will be well-developed, fully matured and fit for the job of laying as early as November. We'll be gathering eggs at the time we can put real money into our pockets. This year, our late May and early June hatched chicks instead of being profit takers will be profit makers."

Mrs. Edith Carlson of Chicago arrived on the scene just in time to prevent her husband's marriage to Miss May Roake.

TEXAS TECH RECEIVES RELICS OF WEST TEXAS

A large collection of articles which are reminiscent of the old ddys of the West were received recently by Prof. R. A. Studhalter, head of the department of biology of Texas Technological College for addition to the collection of the Plains Museum Society. Prof. Studhalter is president of the Plains Museum Society, and the collection is a gift from Clifford B. Jones, who is chairman of the board of regents of the college.

The gift to the musuem includes parts of Indian skeletons, some knives, corn grinders and other implements used by the West Texas Indians. Mr. Jones also included in the collection a number of branding irons which were collected from the Swenson ranch and other historic ranches of the West, and lent the college library some old records of the Swenson ranch to be used in the class of advanced students who are studying the history of the South Plains.

ENROLLMENT INCREASES

The total number of summer school students enrolled in the Texas Technological College, as given out by the registrar's office July 17, is 1,258, which shows an increase of 140 students over the first term which had an enrollment of 1,118 students.

"YOUTHFUL DEVILS"

Some person desiring to play some sort of a trick on the law called the sheriff's office Thursday night that "hi-jackers" were on the east highway near the new camp grounds. Sheriff Brownfield, Walter Camp and "Red" Townsend rushed and found twelve young boys hiding behind a signboard with a tire casing laying out in the road. They were just full of the old mischief and thought they would have a little fun, but when the law swooped down on them with drawn guns, it wasn't quite so funny.

Every time they bury the hatchet in Mexico they leave the handle sticking out of the ground.

KNOW TEXAS

Farm timber in thirty-four East and Northeast Texas counties brought its owners $6,192,000 in 1928, according to State Forrester E. O. Siecke.

The 1928 Texas wool clip is estimated at 40,000,000 pounds, valued at more than $12,000,000.

There are 3,136 cities, towns and villages in Texas, with 92,500 business concerns of all kinds.

Texas streams carry into the Gulf of Mexico approximately 26,913,000 acre-feet every year.

Texas shipped more than one-seventh of all the mixed vegetables shipped in the United States in the 1928-29 season. Totals: U. S. 35,000 cars; Texas 7,856 cars.

Testifying in her divorce suit, Mrs. Caroline Pelham of Chicago said she was married last Christmas but that her husband was "an awful gift."

Palace Theatre

PROGRAM FOR THE WEEK

VITAPHONE

Friday, July 26

"WINGS"

Featuring Clara Bow, Buddy Rogers, Gary Cooper and Richard Arlen. This is an All-Sound Picture. Bargain Matinee at 2:30. Admission 15 and 35 cents. Night 25 and 50 cents.

Monday and Tuesday Saturday, July 27

"OVERLAND TELEGRAPH"

Starring Tim McCoy. Comedy, and Talking Comedy.

Wed. and Thurs. July 29 and 30

"THE DESERT SONG"

Featuring John Boles, Carlotta King, Louise Fazenda, Myrna Loy and Johnny Arthur. Vitaphone's first operetta. Singing sensation of four continents. Your heart will tingle with this brilliant rendition of throbbing melodies, sonorous grandeur of the mighty chorus of 132 singers, 116 exotic dancers and orchestra of 109 players.

Also special talking comedy starring Oliver Hardy and Stan Laurel in "Unaccustomed As We Are" and Paramount News.

Bargain matinee at 2:30, admission 15 and 35 cents, night 25 and 50 cents.

July 31 and Aug. 1

"SONNY BOY"

Starring Davey Lee with Edward Everett Horton and Betty Bronson. If you loved him in the Singing Fool, you will adore him in this. He sings, he talks, he charms.

Also Paramount News and comedy.

Sauce Pans	Queen Anne, Non-tip, While They Last, each	.10
Coffee	WAMBA—Morning, Noon, and Night, 3 lbs. and 1-4 lb. Tea, all for	$1.29
Sardines	TIN-A-PA, You Will Like Them, Per Can	.05
Ham	Wilson's Sugar Cured Picnic, 4 to 6 lb. average, per lb.	.22
LYE	Rex Per Can	.08
Gold Dust	Small Package	.03
Gum & Mints	Beech Nut 3 Packages	.10
Salmon	Nile Brand Per Can	.15

WE NOW HAVE COMPLETE LINE OF WATKINS EXTRACTS

POSTUM COMPANY BUYS BIRDSEYE FREEZING PROCESS

The Postum Company, in the future to be known as the General Foods Corporation, has recently acquired, along with about a score of famous food products and processes, what is known as the Birdseye process for freezing fresh meats and vegetables.

Describing the process, Wetmore Hodges, president of the corporation, in a recent issue of The Manufacturer, said:

"The Birdseye process represents an important step forward in the refrigerating art. In ordinary 'sharp freezing' the slowness of the freezing causes ice crystals to form which pierce the minute cell walls of fish, meat and other perishable foods, thus breaking down their natural structure and permitting escape of a large percentage of natural juices and flavor. By comparison with those methods in general use today, the Birdseye process imparts to any perishable food a temperature of 50 degrees below zero so quickly that virtually none of those cell destroying ice crystals has time to form, thus preserving the original freshness of the food."

The process is adapted to the distribution of a variety of foods such as meats, poultry, vegetables and fruit. Those products can be shipped across the continent and to European markets in consumer packages and be made available throughout the year regardless of the season, according to Mr. Hodges.

The Birdseye Quick Freezing Process was discovered by a young American biologist engaged in a fur-trading venture in Labrador. The idea came to Clarence Birdseye, who discovered the process during a fishing expedition. He threw a fish which he had caught into a tub of water to thaw it out for supper. When it had been in the water for a short time the frozen fish came to life, apparently unaffected by the freezing experience.

This gave him the idea that if fresh fish was frozen quickly at an extremely low temperature, the cell structure would not be ruptured. It has been found that when fish is frozen slowly, countless needle-like ice crystals form and rupture the flesh cells, liberating the rich juices and flavor. Fish frozen by the Bridseye process retains its firm texture, whereas slow-frozen fish, after it is thawed, is reduced to a soft pulpy mass.

During the past two years Mr. Birdseye and other members of the laboratory have produced a great variety of quick frozen package products, including cuts of meat, chicken, game, vegetables, fruits and berries. It is well within the realm of possibility that some day the average housewife will be buying many of her perishable food staples in this convenient form.

FORD MOTOR CO. OFFERS 12 RULES

As a contribution towards greater safety and more pleasant driving conditions on the highways of the country this summer, the Ford Motor Company has listed twelve rules as suggestions to motorists and has distributed them to dealers over the country.

Announcement of the suggestions was made recently by Roy Strayhorn of the local Ford agency who will display the list prominently in the local salesrooms.

"These rules," said Mr. Strayhorn, "are merely common sense applied to automobile driving. Every experienced motorist knows all of them. It is our hope, however, that by stating them concisely and posting them where they will come to the attention of a great many motorists, we can so emphasize them as to make a real contribution towards greater highway safety."

The twelve rules are:

1. Courtesy comes first. Consider the rights and privileges of others.
2. Keep your mind on your driving and anticipate sudden emergencies.
3. Learn the 'feel' of having your car under control.
4. Obey all traffic and parking regulations.
5. Keep to the right, and comply with road markings and signs.
6. Signal for stops and turns. Watch the car ahead.
7. Slow down at crossings, schools and dangerous places.
8. Never pass cars on hills, curves or crossings.
9. Adapt your driving to road conditions—rain, ice, soft spots and ruts.
10. It doesn't pay to take the "right of way" too seriously.
11. When you drive, remember the times when you're a pedestrian.
12. Know the law. It was passed for your protection.

"It is estimated that 20,000,000 persons will tour on American highways this summer," Mr. Strayhorn continued. "Recognition of the rights of others will be essential. Many unpleasantries and accidents will be avoided if motorists, at times of close situations, will recall these rules and act accordingly. They are the recommendations of the Ford Motor Company offered to give greater peace of mind to those who travel by automobile."

CATS

A grammar school boy passed in the following composition on cats:

"Cats that you can maul and tease is called Maultease Cats. Some cats is' reckernized by how quiet their purrs is and these is named Persion Cats. The cats what has very bad tempers is called Angoe Cats. And the cats with deep feelin' is called Feline Cats."

James Calkin of St. Paul asked to be sent to jail so that he might be cured of his desire to steal, and was given six years.

Woman Governor Topic of a Fiery Novel by Texan

Journalist, Once Secretary to Gov. M. A. Ferguson, Baits Feminists

Texas, cradle of fighters, personal and political, has produced the first novelist brave enough to declare a real woman is not equipped to hold

a high political post and should not aspire to it.

"The Woman of It" is the story of a woman governor of a Southwestern state. Clare Ogden Davis, who wrote it, was personal secretary to Miriam A. Ferguson, first woman governor of Texas, handling Mrs. Ferguson's contacts with the press during the more tranquil first year of her stormy term of office.

Several million American women may not agree with the conclusions of Mrs. Davis. Others will. "The Woman of It", published this week by J. H. Sears & Co., publishers of New York City, is considered by political experts who have read advance copies as certain to start a nationwide controversy among club women and feminists and beween "advanced" women and conservative men. Mrs. Davis will thrive on the fight. Behind this red-headed and vivid newspaper and magazine writer, born on a ranch in Bosque County, Texas, is a line of pioneer ancestors who fought redcoats at Bunker Hill, Indians from New York State to Texas, the Union Army, carpetbaggers and cattle thieves.

Graduated from Baylor College in 1913 teacher of history in high schools at Bonham, Arlington and Cleburne for four years, Clare Ogden realized her ambition to be a newspaper writer by joining the Fort Worth Bureau of the Dallas News in 1917. She was star reporter of the Fort Worth Record for two years. In 1920 she was married to Burton Davis, newspaper man. She became the first woman staff correspondent of the Dallas and Galveston News, working out of their Houston bureau in 1922-24 and was a special writer for the Houston Chronicle in 1925-26, until she went to New York with her husband. Her exploits as a reporter working on difficult and dangerous assignments are still talked about among Texas newspaper men. Since 1926 she has been a magazine and syndicate writer in New York. "The Woman of It" is her first novel.

INSIDE STUFF

With a rich dinner serve a salad with French dressing, not mayonnaise.

In making bloomer dresses for children it is a good plan to make two pairs of bloomers as they are likely to wear out before the dress does.

Lyonnaise potatoes are cold boiled potatoes, diced, and browned in fat with chopped onion and served with parsley sprinkled over the top. They make a tasty variation of plain fried potatoes.

When lamb or mutton fat is used in making cream gravy, both the texture and the flavor of the gravy are better if the flour used is browned in the hot fat before the liquid is added.

Waxing or varnishing improves the appearance of linoleum and makes it last longer. Use wax on the inlaid kinds and varnish on the printed ones, for wax sometimes tends to soften the printed surface.

Coffee stains not more than a few hours old on washable fabrics can be removed by pouring boiling water on the stain from a height of two or three feet. Stretch the stained part of the fabric over a large bowl.

The addition of capers, or the liquid in which they have been bottled, chopped pickle, lemon juice, tomatoes, or currant jelly to lamb or mutton gravy is suggested as a change and improvement in flavor.

HERE ARE ALL THE QUESTIONS AND ANSWERS IN EGG CONTEST

CONDUCTED BY WARREN BROTHERS, THE REXALL DRUG STORE

CONSTRUCTION OF AN EGG

1. Name the four parts of an egg.

The shell, the membrane which lies next to the shell, the white and the yolk.

2. Outline the construction of an egg.

The white consists of albuminous material which fills the space between the yolk and the shell. It varies in density, being thickest in the portion near the yolk and thinnest in the portion next to the shell membrane. The white is clear and transparent except for two cloudy-white thickened portions resembling twisted cords which adhere to the yolk at the points nearest the ends of the egg. These cords are called chalazae; and allow the yolk to rotate freely as the egg is turned but serve to retard the rise or settling of the yolk toward the shell when the egg is left in one position for any length of time.

3. Explain the construction of the shell.

The shell is composed largely of lime, is porous in structure, and allows the evaporation of water from the egg contents, the penetration of odors and flavors and under unfavorable environment, the entrance of bacteria.

4. What percentage of an egg is water?

Of the whole egg, 65.5 per cent is water, while of the edible portion of the whole egg, 73.7 per cent is water.

5. How is the weight of an egg distributed?

In the hen egg, the shell comprises about 11 per cent, the white about 57 per cent, and the yolk about 32 per cent of the entire weight.

6. About how much does an egg weigh?

Of two seperate dozens put on a scale, the first dozen weighed 21½ ounces and the second dozen 26¾ ounces, or an average weight of two ounces for each egg.

The average net weight per dozen for such grades as U. S. Extras and U. S. Standards is 24 oz. with a minimum at the rate of 22 oz. for individual eggs.

The minimum average net weight per case (30 dozen) for U. S. No. 1 Extras is 45 lbs.—no case under 44 lbs.

7. At which end of the egg is the air cell located?

The air cell is normally located at the large end of the egg, between the two shell membranes. When the egg is first laid and is still warm, the contents entirely fill the shell. As the egg cools and the contents shrink a small air cell is formed.

HOW TO TEST AN EGG

8. (a) When broken out in a dish, the yolk of a fresh egg is well rounded or "stands up" well while the yolk of a stale egg is flatter and more spread out.

(b) Hold egg near ear and shake it. There should be but a little sound.

(c) Put in a dish of water. It should sink.

(d) Afreshly laid egg should have a slightly rough shell.

9. What is meant by "lighted" eggs?

Eggs held in front of a lighted candle or an electric light. The air space at the larger end of an egg is quite small, but increases as the eggs grow older. If the eggs look clear they are fresh, whereas if a dark spot shows the eggs are questionable.

10. How long after being laid does an egg deteriorate.

After twenty-four hours.

11. How long after being laid should an egg be used?

About ten hours after. The white does not get thick or set until then. The white cannot be beaten stiff until after the egg has been laid ten hours.

12. What causes eggs to deteriorate?

Evaporation of the water through the shell, which allows the air to rush in.

13. At which season of the year are eggs at their best?

Eggs are considered to be more palatable and of better flavor in the spring. When perfectly fresh, however, they are good at any season.

14. Why are eggs produced during the summer months rarely of the same quality as eggs produced in early spring?

In warm weather the watery content of the egg tends to escape through the porous shell more than in the early spring when the weather is cooler. Eggs should not be left in the sun.

15. Can the air cell in an egg be considered as a guide to the age of an egg?

The size of the air cell is a good indication of the age of an egg, when eggs have been kept under normal condition. It is true, however, that the air cell increases in size much more rapidly in hot than in cool weather, so that an egg two days after it is laid in summer may appear much older than an egg seven days old which has been laid in October or November. The air cell is usually at the large end of the egg. In a strictly fresh egg, the air cell should be small, not over three-sixteenths of an inch in depth.

FOOD VALUE OF AN EGG

16. Which has the greater nutritive value, the yolk or the white?

The yolk. It contains iron, lime and phosphorous in organic combinations.

17. Is the energy value of eggs due to the yolk or the white?

Largely from the fat of the yolk. The yolk contains 23 per cent of fat. The energy value of the whole egg has been shown to average 770 calories a pound, the yolk 1,645 calories, and the white 230 calories.

18. Does the yolk contain any iron?

The egg yolk is one of the best-known sources of iron in foods.

19. What is the name of the protein found in the white of an egg?

Albumen, almost pure.

20. What is the substance known as "lecithin" in an egg?

It is nitrogenous, fatty substance contained in the yolk. It readily decomposes and forms acids. This is one reason why eggs do not agree with a few persons.

21. Is vitamin D, which promotes the development of normal bone and teeth, present in eggs?

Yes. Four sources of vitamin D are eggs, codliver oil, leafy vegetables and sunshine. Many physicians now recommend the feeding of codliver oil or egg yolk or both to all infants, commencing in many cases as early as two months.

22 Which of the five food principles is absent in an egg?

Only one—carbohydrates. A starchy food combined with an egg supplies the carbohydrates.

23. Are eggs easily digested?

Yes. Eggs rank high in respect to their completeness of digestion whether eaten raw or cooked, with the advantage on the side of the slightly cooked egg, especially in the case of the egg white.

METHODS OF PRESERVING EGGS

24. Since the evaporation of the water from an egg through the porous shell and the rushing in of air to fill the place of the water causes the nitrogenous elements to spoil, what substance can be used to preserve the eggs?

Any substance which will fill up the pores in the shell and thus keep out the air, if applied to perfectly fresh eggs, will preserve them indefinitely.

25. How many eggs with a gallon of Silicate of Soda solution preserve?

Seven dozen if closely packed.

26. How many gallons of solution will a quart can of Silicate of Soda make?

Three gallons.

27. Why should the warning "Do not wash the eggs before preserving" be observed?

Washing removes the mucilaginous coating from the shell and causes the pores to be exposed, thus allowing an excessive evaporation of the watery content of the egg. A washed shell also allows eggs to obsorb odors very readily, which you can demonstrate by placing eggs in an empty lemon or onion crate.

28. Should badly soiled eggs be used for preserving?

No. If put into the jar while dirty they will spoil. If the egg is only slightly soiled, a cloth dampened with vinegar may be used to remove such stains.

29. What is the cost per dozen when the water glass method is used for preserving eggs?

Approximately two cents a dozen. With water glass at 30 cents a quart and using one quart to nine quarts of water that has been boiled and cooled, you can preserve 15 dozen eggs.

30. What other method is used for preserving eggs?

The Lime Method. Dissolve 2 or 3 pounds of unslacked lime in 5 gallons of water that has been previously boiled and cooled, and allow the mixture to stand until the lime settles and the liquid is clear. Pour the clear limewater into a clean earthenware crock or jar until the eggs are covered.

31. Can eggs preserved in water glass be used for boiling?

Yes, by making a small hole in the shell with a pin at the large end of the shell before placing the eggs in the water. This is done to allow the air in the egg to escape when heated so as to prevent cracking.

32. Why are eggs put in cold storage?

One of the functions of the wholesale egg trade is to equalize the supply and meet the demand at all seasons as nearly as possible. This is done by moving a part of the spring eggs through the usual channels for immediate consumption while the rest are carefully candled, packed in new cases, with new fillers and flats, and shipped to the larger cities, where they are placed in cold storage and held until fall and winter when there is a shortage [illegible]

33. Where are the principal cold storage markets located?

New York, Chicago, Philadelphia, Boston and San Francisco. Apparently 40 to 50 per cent of the total annual holdings for the United States is stored in these five markets.

34. How long does the storage season last?

It begins in March, is most active during April and May, and continues at a lessened rate during July and August, and closes about August 1. Withdrawal of eggs from storage is slight in August, but gradually increases in September and October, is heaviest in November and December, and continues through January and February until the stocks are practically exhausted by March 1 or earlier.

635. What percentage of the total annual production of eggs is stored?

Approximately 12 per cent.

36. What is the maximum holding of eggs in cold storage in the United States?

In 1923 it amounted approximately to 315,000,000 dozen, and occurred about August 1.

37. Which are the best eggs for cold storage?

Eggs produced in April. This is because they are produced and traverse the various market channels to the storage warehouse during a period when the weather is still cool and favorable.

38. Is the holding of eggs in cold storage considered a legitimate method?

Yes. Without cold storage, eggs would hardly be worth enough in many localities in the spring to pay to gather them and in the fall the supply would be far from sufficient to meet the demand, and the price so high as to be prohibitive. There are various state regulations with reference to the cold storage of eggs, such as the length of time that eggs can be kept in storage, the length of time they may be temporarily held in storage without being termed storage eggs (usually 30 days or less), marking the cases with the date on which the eggs went into storage and the date when withdrawn, and the sale of sold storage eggs only as such.

39. What is the temperature of an egg storage room?

The temperature should be maintained within the range of 29 to 30 degrees F., the humidity should range from 82 to 85 per cent.

40. What is meant by frozen eggs?

Eggs which are broken and dumped into a churn where they are thoroughly agitated so as to secure a uniform mixture, then drawn off into containers, which are most commonly 30-pound cans. These cans are taken to a sharp freezer where a temperature from 0 to 10 degrees F. is maintained and there the contents are frozen solid. The frozen eggs are shipped in this condition and should not be thawed until they are used.

641. What kind of eggs are used for freezing?

Eggs chosen for freezing are those which come to packing houses damaged by breakage, or those which are dirty, or which are too weak to stand shipment to market.

Frozen eggs are used principally by bakers and confectioners.

42. Where are the specialized egg farms located?

In greatest numbers along the Atlantic coast, near the great consuming centers, and along the Pacific Coast, where climatic conditions are especially favorable.

43. Where is the greater supply of eggs produced?

In the eastern North-Central and western North-Central states, Iowa, Missouri, Illinois, Ohio, Indiana and Kansas; also in Pennsylvania, Texas, California and New York.

44. Do the various egg markets show a price preference for the shell color of eggs?

Yes. The New York market shows a price preference which is nearly uniform throughout the year for white eggs as compared with brown, whereas the reverse is true of Boston.

45. Does the shell color of eggs affect their food value or quality?

No.

46. Why is it important, on any market, that eggs be uniform in color, that is, all brown or all white, rather than brown and white mixed?

A mixture of colors affects the appearance as a lot, and usually the price.

47. Does the kind of feed given to laying hens affect the color of the yolk?

To some extent. Yellow corn, for instance, will produce a much darker colored yolk than white corn, but yellow corn is a better feed for poultry than white corn.

The color of a yolk may vary all the way from a pale to a deep yellow. This depends largely upon the amount of green feed which the hens have received and therefore varies to a considerable extent with the season.

48. Do consumers show any preference for any particular color of the yolk?

Most consumers prefer a fairly deep-colored yolk but there is a rather limited yet special demand in the New York City market for eggs with pale yolks.

PALACE THEATRE

BOUNDING TO THE SUPREME PINNACLE OF MOTION PICTURE ART!

A staggering, bewitching succession of rapturous melodies, scintillating scenes presented with boundless magnificence. The thrilling rendition of throbbing love songs that will capture your enthusiasm and raise you to the insurmountable heights of perfect entertainment, and calling forth your applause in measures of feverish intensity for an epochal production that will live forever in your memory!

With John Boles and Carlotta King, 132 singing voices, 116 exotic dancers and operatic orchestra of 109 players.

Monday and Tuesday, July 29 & 30

Your tongue tells when you need

Calotabs

TRADE MARK REG.

Coated tongue, dry mouth, bad breath, muddy skin, groggy nerves and sour stomach suggest its use.

RELIEF that is REFRESHING

"We have used Thedford's Black-Draught for years in our family. I can highly recommend it for many ailments. We take it for colds and for constipation.

"I have four children, and I give it to them. When my little girl gets bilious, or complains of headache, I give her a treatment of Black-Draught, and she is all right in a day or two.

"Sometimes when I have indigestion from improper eating, I have headache. Then I take Black-Draught. I always feel fresh and have more energy after I have taken it."—Mrs. E. Reich, 2215 East First Street, Austin, Texas.

EX-147

WOMEN who need a tonic should take CARDUI. In use over 50 years.

Iodine For Everyone

GOITER, that dread and disfiguring disease is diminishing in this country because it was generally due to a lack of iodine in the diet, and now iodine is available to everyone. It is told that in former years every white baby born in Pemberton Valley in British Columbia had a goiter, yet in a village of Indians in this valley there was never a case of it. A scientist who sought long for the cause finally said:

"Whilst considering the lack of goiter among these Indians I would like to draw attention to the fact that they eat a great deal of salmon—and annually cure thousands for winter use. It is quite probable that they get enough iodine from the salmon to give their thyroids the necessary quantum of this element."

The millions of cans of salmon and other fish now sold in this country are doing much to save it from this scourge, but how did our Indian aborigines who lived inland escape it?

Canned in Conch Shells

A thousand years ago the Scheyechbians canned fish in conch shells.

Beauchamp Plantagenet, early navigator, writing in 1648, tells of the then centuries old custom of this ancient American tribe to trek each year in early June to the beaches of Cape May and Cold Spring Harbor. There the braves enjoyed a summer of hunting and fishing while the squaws gathered shell-fish, smoked them at great circular fires and packed them in the conch shells. And not a papoose, probably, ever had goiter, though, equally probably, they never knew why.

THE TOWN DOCTOR

(The Doctor of Towns)

—SAYS—

GET COMMUNITY MINDED

What you do, what you say; your attitude toward the place where you live, creates or destroys public opinion, prestige and good will of your community.

Other people look to YOU for an example—if you do not speak well of the community, if you do not do something for the community, others will do likewise.

No city, town, village or hamlet can expect to become a better, more interesting, more attractive place in which to live, work, play and prosper unless everybody does a little something. It isn't necessary to spend days or weeks on a drive of some kind; you don't have to get out and make a show of yourself; nor is it necessary for you to be one of the big toads in the puddle, to be able to do something.

And don't think that when you do do anything for the benefit of others that you are a martyr to the cause; nor that you are donating. Get it out of your head that you are doing something charitable every time you go a little out of your way to perform a little service or dig down in your pocket for a few dollars to make possible something that the other fellow will get some good out of.

You can't make money unless the other fellow does. What profits the community profits you, and there are no "if's", "and's" and "but's" about it.

Do something! You have a dozen chances every day to do something, to say something that will BUILD. You have as many opportunities to put your foot on what others say and what others fail to do that tears town.

Get Community Minded; It is good business, and plain, every-day common sense.

This Town Doctor Article, one of a series of 52, is published by the Scurry County Times-Signal in cooperation with the Snyder Lions Club

Note: These articles are written by The Town Doctor, without prejudice or malice and are impersonal. They treat each subject as applied in general—not to a particular town. Opinions favorable or otherwise on subjects covered are solicited and may be addressed to the paper in which these articles appear, or to The Town Doctor, Suite 350, McCormick Building, Chicago, Illinois.

PONTIAC BIG SIX at $745

PRODUCT OF GENERAL MOTORS

f. o. b. Pontiac, Mich.

You save in purchase price when you buy a Pontiac Big Six—because no other car offering comparable advantages can be bought for less than a thousand dollars. You save also in operating costs and in depreciation. In other words, you save in every way with the Pontiac Big Six—America's biggest motor car value!

And here is what you enjoy!

More Speed
More Power
More Snap
More Style
More Safety
More Comfort
More Value

FIVE-PASSENGER TWO-DOOR SEDAN BODY BY FISHER

No Increase in Prices!

Even though sales of the Pontiac Big Six have shattered all earlier Pontiac records—and even though the value offered by this car is without parallel today—the Pontiac Big Six continues to sell for the prices at which it was introduced. *There has been no increase in Pontiac prices!*

Prices, $745 to $895, f. o. b. Pontiac, Mich., plus delivery charges. Bumpers, spring covers and Lovejoy shock absorbers regular equipment at slight extra cost. General Motors Time Payment Plan available at minimum rate.

Consider the delivered price as well as the list price when comparing automobile values . . . Oakland-Pontiac delivered prices include only reasonable charges for handling and for financing when the Time Payment Plan is used.

STIMSON CAMP GROUNDS

SOCIETY

FRIENDLY HELPERS MEET

The Friendly Helpers Class of the Methodist Sunday School held their regular monthly social meeting at the home of Mrs. E. G. Neeley Tuesday afternoon with Mesdames Porter King, E. C. Neeley, Josie York Lemley and H. C. Moore as hostesses.

The regular business meeting was held after which the play of forty-two was enjoyed. A most delightful plate luncheon was passed to twenty guests.

EUZELIANS ENTERTAINED

The Euzelian Class of the First Baptist Sunday School has recently held a membership contest. Tuesday afternoon the losing side entertained the winners with a swimming party and picnic at Doak's swimming pool. About twenty-five were present on this occasion.

SWIMMING PARTY

Miss Alma Nell Morris entertained her art pupils with a swimming party Tuesday evening at Doak's swimming pool. After the swim a picnic lunch was enjoyed by Misses Ada Nell Teague Marian Rosser, May McClinton, Agnes Mitchell and Mesdames Page Cleavenger of Cisco, H. C. Teague, Amos Joyce, H. E. Rosser and A. P. Morris.

BIRTHDAY PARTY

Mrs. Raymond Smith entertained a number of young people in her country home last Monday in honor of her daughter, Katherine's, fourth birthday.

The afternoon was spent in games, after which delicious cream, cake and candies in pink and white were served to the following guests: Alice Reichardt, Lind Clifton, Virgie Clifton, Mildred Green, Jean Taylor, Thaba Benbenek, Thana Benbenek, Andrew Broadfoot, Emma Ruth Broadfoot, Alma Broadfoot, Naomi Smith, Elizabeth Brown and Mesdames Hugh Taylor, R. S. Snow and A. J. Cody.

SELLARS—BEAN

Jesse Sellars of this city and Miss Thomsie Bean of Amarillo were married July 7 at the home of the bride's parents, Mr. and Mrs. T. H. Bean, with Rev. R. Thompsen, pastor of the Presbyterian Church of that city, officiating.

The groom is the son of Mr. and Mrs. S. E. Sellars of Shamrock. He is employed in the Snyder National Bank here.

Mr. and Mrs. Sellars arrived in Snyder Friday night. Jesse made his vacation an eventful one.

The Times-Signal joins the many friends in extending best wishes for happiness and success.

PICNIC AT COUNTRY CLUB

A very happy evening was spent last Thursday when a number of friends gathered at the Country Club where they enjoyed a delightful picnic.

Those present were: Mr. and Mrs. Guy Stoker; Mr. and Mrs. H. J. Brice and son, Wylie; Mr. and Mrs. Otto Williamson and daughter, Frances; Mr. and Mrs. C. E. Fish and son and daughter, Creston and Cyrella; Mr. and Mrs. Joe Graham; Mr. and Mrs. Roland Bell and two sons; and Misses Charline and Roberta Ely, Mary Ellen Martin, Maurine Stimson, Mary Frances Coppedge of Dallas, Frances Denson and LaVera Smith of Mineral Wells, Jeanette Lollar, Roberta Raybon and Margaret Deakins.

FISH FRY

Mrs. Guy Stoker complimented Misses Mary Frances Coppedge of Dallas and La Vera Smith and Frances Denson of Mineral Wells with a fish fry last Wednesday at her home. The fish were cooked and served in the yard to the following guests: Misses Mary Ellen Martin, Maurine Stimson, Jeanette Lollar and the honorees, and Mr. and Mrs. H. J. Brice and sons, Richard and Wylie, and Frank Stoker.

Attend Picnic

Lyman Wren, George Northcutt, W. Gentry and F. T. Wilhelm attended a community picnic given at Rodman Friday night. A delicious picnic supper was enjoyed, after which talks were made. Included among the speakers for the evening were Lyman Wren, George Northcutt and F. T. Wilhelm. Another feature of the evening's entertainment was accordian music furnished by Mr. Wilhelm and singing by the crowd.

PARTY GIVEN FOR MRS. SORRELLS

Mrs. J. E. Sorrells of Knapp was entertained Friday evening at her home with a delightfully planned surprise birthday party which was given by her friends.

A very happy evening was spent. Refreshments were served to about thirty guests.

Most Nurses Use New Face Powder

MELLO-GLO, the new wonderful French Process Face Powder, is preferred by nurses because of its purity, and they say it does not make the skin dry and drawn. Stays on longer, keeps shine away, and is very beneficial to the complexion. You will love MELLO-GLO Face Powder. Warren Bros.

MRS. J. LEE GRIFFITH IS HONOREE AT PARTY

Four tables prettily appointed for the play of bridge and forty-two were arranged in a setting of charm at the home of Mrs. Wayne Williams Thursday afternoon when she entertained in honor of Mrs. J. Lee Griffith of Tulia.

Red Verbenas added to the attractiveness of the entertaining rooms.

At the termination of the bridge play, Mrs. G. B. Clark Jr. held high score, while Mrs. Griffith was presented with guest prize.

At tea time delicious two-course refreshments were passed to the honoree and Mesdames Maurice Brownfield, G. B. Clark Jr., Alfred McGlaun, Melvin Blackard, George Oldham, Lewis Blackard, Amos Joyce, Ixon Joyce, Will Williams, H. M. Blackard, Orville Blackard, Tom Gates, E. M. Hicks and L. L. Lindsey of Fort Worth, and Misses Alma Nell Morris and Blanche Mitchell.

McGLAUNS HOLD FAMILY REUNION

A reunion was held Sunday at the home of Mr. and Mrs. Gay McGlaun with three sets of four generations represented, with twenty-nine present.

At noon a feast of good things to eat was enjoyed. The afternoon was spent in conversation of old times, and pictures were taken of the group.

The McGlaun generation included Mr. and Mrs. LeRoy McGlaun and their child; LeRoy's parents, Mr. and Mrs. E. H. McGlaun; and Mr. McGlaun's mother, Mrs. M. A. McGlaun.

The Jones generation represented were Mrs. A. L. Jones and her daughter; Mrs. Gay McGlaun and her son; W. A. McGlaun and his son, W. A. McGlaun Jr.

Gay McGlaun has been a resident of Snyder for 21 years, and his mother has lived here for about 18 years.

Those present were Mrs. O. L. Jones, Snyder; Mr. and Mrs. E. H. McGlaun, Mr. and Mrs. LeRoy McGlaun and son, Mrs. E. H. McGlaun Jr., and Mr. and Mrs. J. A. Fulghum of Sweetwater; Mr. and Mrs. W. M. McGlaun and family of Texarkana; Mr. and Mrs. O. D. McGlaun and family, Ennis Creek; Miss Ettabea McReynolds of Belen, N. M.; Mrs. M. A. McGlaun, and Mr. and Mrs. W. A. McGlaun and son, W. A. Jr.

MISS EVELYN RAYBON ENTERTAINED

Mrs. W. T. Raybon complimented her daughter Evelyn, with a slumber party Friday night at the Country Club in honor of her thirteenth birthday.

A swim in the club pool was enjoyed after which supper was spread.

Saturday morning breakfast was served to Misses Beverly Chambers, Roberta Raybon, Margaret Deakins, Jeanette Lollar, Pauline Harris of Elgin, Frances Denson and La Vera Smith of Mineral Wells, Mary Frances Coppedge of Dallas, Evelyn Erwin, Ruby Lee, Charline and Roberta Ely and the honoree.

Mrs. W. B. Lee assisted the hostess in entertaining.

WHAT'S DOING IN WEST TEXAS

DIMMITT will have a new $100,000 high school completed by December 1, as excavation work has already begun. The contract for plumbing and heating will include the installation of heating and plumbing in the old building. Supplies are being selected at this time.

COMANCHE will be visited by representatives from Aransas Pass who are making arrangements to ship the Comanche County Carmen grape crop. Growers are urged to inspect the method of grading and packing and inform themselves as to what they will be expected to offer.

LAMPASAS is to have a fair again this summer, August 7, 8 and 9. It is the desire of those in charge that they have the best exhibits of farm, poultry and livestock that have ever ben assembled in that part of the country.

LAMESA will send several representatives on the All-Texas Tour to Carlsbad, N. M., and El Paso, Texas. The tour is being sponsored by the Dal-Paso Cavern Highway Association, of which Wm. A. Wilson, secretary of the Lamesa Chamber of Commerce, has been secretary for two years. The tour starts August 1, and there are no set expenses.

TURKEY'S Farmers & Merchants State Bank will be modern in every respect with new fixtures. Brick, sand, gravel and other building material is being placed on the grounds previous to the start of the construction work. The building is being erected on the property of the Security Investment Co.

ESTELLINE recently voted a $6,000 bond issue for the erection of a city hall, fire station and jail. The issue will be used to purchase a site and erect a brick and tile building. It is the opinion of Estelline people that this building will serve to great advantage the needs of the people.

THE WEST TEXAS Chamber of Commerce motorcade disbanded at Vernon after ten days of intensive sightseeing over a 3,000 mile tour. Carlsbad Cavern was the ultimate objective of the tour, and one day was spent in exploring the underground caves. Two district conventions of the regional organization were held on the way.

SLATON reports that a new high record for the shipment of wheat from that section of the Panhandle is being made. Four hundred cars of wheat are being handled daily through the Santa Fe terminal, and the peak has not yet been reached. A large volume of the crop will continue to move for the next 30 or 40 days.

MULESHOE shipped fifty thousand pounds of wool from neighboring ranches in one load recently. The car was loaded by M. L. Morris, representing Bond-McRae Company of Clovis, N. M., and shipment was made to Hallowell, Jones & Donald of Boston, Mass.

The NOCONA News has been sold to T. R. Stump and F. E. and F. L. Perry, who are now in charge and will publish the paper and conduct the printing business under the firm name of Perry Bros. F. L. Perry was formerly with the Arlington Journal at Arlington, and F. E. Perry was former president of the Baylor University Press.

WEST TEXAS TODAY for July was mailed out the earlier part of this week. It was the annual special college number of the official magazine of the West Texas Chamber of Commerce. Practically every college that draws a majority of its student body from West Texas is written up in the journal.

A. M. BOURLAND, president of the WTCC, took up his duties as manager of the regional organization Monday upon his return from the motorcade. H. J. Adair heads the publicity department and will have charge of the August issue of West Texas Today.

DID YOU EVER STOP TO THINK

By Edson R. Waite, Shawnee, Okla.

THAT the East can often learn from the West? Out in the West is located the Mountain States Power Company. It is setting an example to the companies in the East. It operates in scattered districts of Wyoming, Montana, Idaho and Oregon.

Through its eagerness to serve the people in its territory and its progressive ideas in newspaper advertising it has built up a market for electrical merchandise unparalleled in the East.

In this rural territory are homes in many cases better than those seen in many cities. There are rural lines which were developed before experiments of this nature were started in the East.

There are lines reaching into agricultural sections, providing the farms with electric service adequate to operate motors of sufficient size to drive silo fillers, water pumps, electric milking machines, refrigerators and all other electric equipment that might be required on a modern farm.

The homes have the latest house lighting equipment and they enjoy all the comforts of an electrical home.

The Mountain States Power Company is indeed an empire builder. It early learned that progressive ideas—sold through newspaper advertising brought lasting results in profit to themselves and profit to the communities they serve.

COLORADO LADY CATCHES "COLD CHECKER" THERE

Retail Merchant Head Receives Bulletin and Catches Culprit

Within little more than an hour after she had received a bulletin from state headquarters of the Retail Merchants Association in San Antonio describing a cold checker operating in the state, Mrs. W. H. Turner, manager of the Retail Merchants Association here, saw the man described in the bulletin and give information leading to his arrest by local officials, says the Colorado Record.

The man, whose real name is thought to be J. A. Bowers, was said to have been wanted for cold checking not only in several Texas towns, but also in several Colorado state towns. The bulletin was sent out to Retail Merchants Associations over the state from headquarters after information had been sent in by the Lockney Retail Merchants Association concerning Bowers' alleged operations there.

The man described in the bulletin had been going from town to town supposedly on the track of some large real estate deal. In each town he wrote several cold checks, getting them endorsed by the men who he was supposedly consulting concerning the purchase of a large farm.

Mrs. Turner read the bulletin and the description of the man about 10 o'clock, and about 11:30 saw him enter the office of Ellis & Wood, real estate dealers. He was arrested on suspicion after she had tallied his appearance with the description given on the bulletin, and authorities who came from Lockney to claim him, positively identified him as the man wanted.

A scheme similar to this was worked in this city last year, the would-be purchaser of real estate handing out "cold" checks promiscuously, and even going so far as to give one for a new automobile.

FEDERATED MISSIONARY SOCIETIES TO MEET AT PRESBYTERIAN CHURCH

The ladies of the First Presbyterian Church extend a most cordial invitation to the members of the several missionary societies and all other ladies of the city to attend the meeting of the Federated Missionary Societies to be held at the First Presbyterian Church Monday afternoon, July 29, at 4 o'clock.

The following program will be given, after which a social hour will be enjoyed in the basement of the church:

Hymn: "America, the Beautiful."
Scripture Reading, John 15:1-15, Mrs. T. M. Broadfoot.
Prayer, Mrs. J. H. Hamlett.
Soprano solo, Mrs. O. D. Carter.
Short play, "Waiting for the Doctor," Y. P. S. Presbyterian Church.
Hymn: "The Kingdom is Coming."
Prayer, Mrs. H. L. Davis.
Social hour.

THIS IS ORIGINAL

We overheard this one at the First & Last Chance filling station the other night. Joe Clark, boss, and his youngest son were standing at the pumps when two traveling men drove up. The youngster cut some "dido" or something, and one of the traveling men said to Joe: "Mister, how many children have you?" Joe responded with "Well, we have three Jacks (meaning three boys, you know) and a Queen."

The young son whose first name is Kendall, spoke up and said, "Mister, my mother holds a better hand than Dad's, for she's got three jacks and a joker."

It has not been related what Joe did to Kendall, but suffice it to say that there was a real laugh all the way around.

Mrs. Edith Morris of Belfast was sent to prison on a charge of embezzlement a few hours after her wedding.

SINGER-ARTIST ATTRACTS ATTENTION

An unusual feature of the First Church of Christ evangelistic campaign now in progress at the City Tabernacle is the feature special each night given by Paul Campbell in song, lecture and art. Mr. Campbell, in addition to directing the singing, illustrates many of the old hymns, using a large electric easel and stand on which under his skillful touch beautiful pictures appear within a very few minutes time.

These drawings, all made in brilliant colors, are given away each night to the person in Snyder who has brought the people, present for the first time, to the night's service.

Among the interesting subjects to be used by Mr. Campbell through the remainder of the week are, "End of the Way," "How Firm a Foundation," "Way of the Cross Leads Home," and on Sunday night he will present one of his most popular illustrations, "The Old Rugged Cross."

Everyone is urged to attend each service so as to not miss a single one of these unusual presentations.

COTTON PICKING IS ENGINEERING PUZZLE

When a native of India gathered the first balls of cotton more than 20 centuries ago, he picked them with his hands, and he put the seed cotton in some sort of container which he carried on his side. We still pick cotton that way.

The only place in the farming industry where women and children still work from sunup to sundown, where children are stunted and their education neglected is at the open ends of cotton sacks, the Oklahoma Farmer-Stockman of July 15 points out. So far there is no mechanical substitute for the nimble, sensitive fingers.

The best farm engineers among experiment stations and implement manufacturers are working on this problem. For 30 years, farmers and engineers have thought they were on the verge of solving the problem. No machine is yet being produced on a commercial scale that will pick cotton.

Agricultural engineers are not yet convinced that cotton will be field picked by machine, but considerable progres has been made toward field stripping and gin cleaning thereafter. Last year one manufacturer offered a ready-made stripper that sold for $175, and many more of these machines will be in use this year.

Cotton breeders are working at the job of selecting or creating a cotton plant adapted to mechanical gathering. Every farmer may well keep an eye open for a cotton plant that will meet the requirements. Such a plant can probably be field selected quicker than it can be created by crossing. These are some of the requirements:

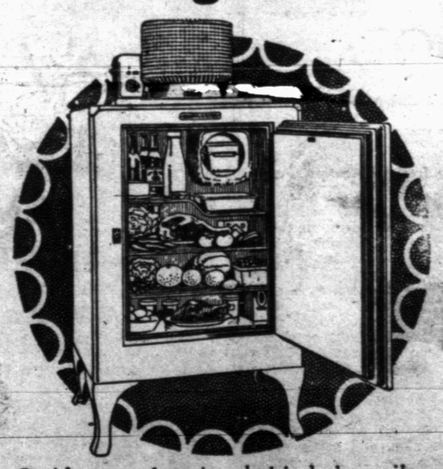

It should be storm resistant, medium large bolled, early, mature a large crop of bolls at about the same time. The stem below the bur should be brittle after maturity. The plant should have little vegetative growth. The fruiting branches should be set closely around the center stem of the plant. A high percentage of lint will be desirable. Some 4-H club boy or vocational agriculturue student has a good chance to select such a plant. It means a fortune and a name for the finder.

FIRST FILM OPERETTA

"The Desert Song," the Warner Brothers' Vitaphone screen version of this remarkably successful singing play, is the first operetta ever brought to the films in its entirety, including both dialogue and music. It comes to the Palace Theatre on Monday and Tuesday, July 29 and 30, according to the program appearing elsewhere in this issue.

An apparatus has been perfected whereby photographs of heart pulsations may be observed and recorded.

GENERAL ELECTRIC Refrigerator

Inside a steel casing behind the coils, there is sealed every bit of mechanism of this remarkable refrigerator. You never see it—never have to oil it. Automatically, quietly, it manufactures your ice and gives you perfect refrigeration.

Designed, built and guaranteed by General Electric Company.

Texas Electric Service Company

The Silent Partner of Progress

GETTING AHEAD

Take two young men and put them behind windows in a bank. Each will do his immediate job equally well. Each will be accurate, courteous, honest, efficient.

In five years one man will be in charge of an important branch, and the other will be making $175 a month, which will be $75 more than his initial salary. The branch manager will be making $7,500 a year.

What has one man done that the other has not?

The man who went forward got it into his head right at the start that making entries in pass-books and counting money was not the way banks made money. He quickly realized that banks, like milk companies, had to find customers and keep them. He used his time outside of banking hours to make friends with people who might be induced to use the bank. He made it a part of his job to meet and know his superiors. His curiosity led him to study the monthly statement of his bank, and the statements of other banks. This led to a study of banking principles, and soon he knew something about lending money. He acquired a knowledge of real estate values in his community. He learned to judge the worth of collateral stocks and bonds. He began to study human nature and became a judge of men as financial risks.

In short, this man, although working as a teller, became a banker. His promotion to an important position was as certain as the rising sun.

That's about the way it works out in all lines. Some men never master anything other than the details of a job. Others master the main idea back of the job.

BUDGET ADVISED

Girls attending the Farmers Short Course at A. & M. College were told that haphazard saving and spending often brings grief and that a budget is the thing for all except millionaires. The speaker was Mrs. Lily Pearl Chamberlain of the North Texas Agriculutural College, Arlington. "To care for your nest egg," she said, "so that it will finally hatch into a comfortable competency, you must learn and follow the ten financial commandments. They are:

1. "Work and earn.
2. "Make a budget.
3. "Record expenditures.
4. "Have a bank account.
5. "Carry life insurance.
6. "Make a will.
7. "Own your own home.
8. "Invest in reliable securities.
9. "Pay your bills promptly.
10. "Share with others."

OPEN NEW STORE

Ollie Bruton will open a new Majestic radio store in the room next to the Miles Studio starting August 1. The folks sure join in a welcome to Mr. Bruton to come on down town.

"It's Great to be a Texan."

Each summer night may be calm, peaceful, undisturbed. Just by using FLY-TOX. Spraying the sleeping rooms. Killing the mosquitoes. Everyone knows mosquitoes are disease carriers. They must be killed. Health authorities advocate FLY-TOX. It is the scientific insecticide developed at Mellon Institute of Industrial Research by Rex Research Fellowship. Simple instructions on each bottle (blue label) for killing ALL household insects. INSIST on FLY-TOX. It is safe, stainless, and has a perfume-like fragrance. —Adv. 6

NEW TEACHER RULES

Snyder and Scurry County are hiring many teachers whose conduct is more or less of public interest. The National Education Association has been working for several years on a code of ethics for the profession.

Here are some of the principles that are being evolved:

1. Be fair to yourself, your superiors, and your children.
2. Do not advertise yourself.
3. Do not gossip about your pupils or repeat the private information you have learned.
4. Be tolerant and avoid stirring any controversies on race, politics, or religion.
5. Respect your profession; keep abreast of the times.

These are common sense suggestions, yet what is so rare as sincere application of common sense in any profession?

Young Genius

O. K. Clark, youthful attendant at the First & Last Chance filling station, has built a model steam engine that is remarkable in its building lines and operations. Young Clark was assisted in making the model by Gene Huggins, and the boys should be patted on the back for their ingenuity.

FILM CHORUS OF 100

Warner Bros.' Vitaphone, "The Desert Song," the screen's first operetta, beside the all star cast, has a singing chorus of one hundred.

SHULL VARIETY MOVING TO NEW QUARTERS

The Clyde Shull Variety Store is advertising a big removal sale in this issue, page eight, preparatory to removal to the room formerly occupied by the H. G. Towle store on the west side of the square. Mr. Shull is quoting some attractive prices, and it will pay you to read what he is telling the folks.

To make a souffle or baked fruit whip that will not collapse, put the mixture into a buttered baking dish as soon as the whites of egg have been folded in, and bake it in a very moderate over (300 degrees F) for 45 to 50 minutes.

San Antonio Bound

Mrs. T. B. Faver is anxious to know if any Times-Signal readers are driving to San Antonio this week-end. If such be the case, please get in touch with Mrs. Faver at once, and she will appreciate your thoughtfulness.

Liver and cucumber salad is a good combination. Mix 2 cups of cold chopped broiled liver, ⅓ cup of diced cucumber, and ½ cup of diced celery with mayonnaise dressing, and serve on lettuce leaves.

"It's Great to be a Texan."

FISHER COUNTY BOOSTING ROADS

The Rotan Lions Club has started the ball rolling in Fisher County to have State Highways Nos. 70 and 83 hard-surfaced. The first named road runs north and south, while 83 is the Dal-Paso Cavern Highway.

According to the Rotan Advance, Guy Patterson of the Rotan State Bank stated at the regular meeting of the Lions Club that it was his opinion that the time was now ripe for a county wide bond issue, and that a bond issue at this time seemed the most practicable solution of the unsatisfactory travel facilities now prevailing in the county since the recent heavy rains. Nearly every bridge in the county is in need of repairs or rebuilding, according to Mr. Patterson, and it was given as his opinion that while the bridge repairs might be made without a bond issue, the cost of such repairs would likely leave the county road funds in such depleted condition that there could not be any extensive maintenance work done on lateral roads that the county must maintain without outside help. Since it is probable that a bond issue will be necessary to put the bridges of the county in good condition it seemed to him to be the proper thing to do to go still further and vote bonds to pave the two important highways through the county.

THEY SAY THAT:

When a man gets beyond temptation he is too sorry for the devil to have any use for.

Sometimes generosity is prompted by curiosity.

Some of our cheerful givers can be cheerful because they give so little.

One consolation a poor man has is that he doesn't have to worry about taxes.

If we ever have a law that really keeps a man from carrying a gun it will be hard for the coroner to make a living.

Nobody can tell how a Ford is going to turn until after it has turned, and even then you are doubtful.

Getting even with your neighbors makes you feel small.

Worry won't keep the worst from happening in the end, but hope and trust may.

So long as a mother takes care of things for the children they will never learn to take care of things for themselves.

You can get into more trouble by trying to take the advice of everybody you meet than any other way.

If the devil loves a shining mark we can't see why his followers are such a sorry lot.

Water seems to mix well with oil stock.

The manufacturers claim balloon tires are easier on pedestrians.

Sometimes language used during a baseball game makes the game very base.

More men succeed in spite of poverty than succeed in spite of wealth.

Miss Dorothy Clifton of London was awarded $500 in a suit against a hairdresser who injured her head while giving a permanent wave.

EAT THE SALAD—ALL OF IT

A salad can't do its stuff for you, dietically speaking, if you refuse to eat the lettuce or other leaf on which it reposes. This was brought out in the sessions for 4-H club girls at the Farmers Short Course, A. & M. College of Texas, by Miss Ottis Neighbors, director of the home economics department, South Texas Cotton Oil Company, Houston, who showed that a good summer salad must have a green leafy vegetable such as endive, escarole, romaine, lettuce, water cress, chicory, green mint, cabbage, mustard, beet tops or celery leaves to make it come up to the protective diet standard. "From such vegetables," she said, "we get valuable vitamins and essential mineral salts of the iron, phosphorous and calcium variety.

"The remainder of the salad is dressing, which for summer use should usually be French dressing. Its flavor depends on its ingredients and on skillful mixing. Tarragon vinegar or cider vinegar and finely chopped onion and orange juice give a pleasing variety to the dressing.

"Finally," Miss Neighbors said, "be sure your salad is attractively arranged, for we eat with our eyes, too, and a perfect salad is not only healthful and nourishing but a work of art."

Many markets make a deduction in weight or in place for live poultry that is "overcropped." It is advisable not to put any feed in the crops when shipping poultry to market. If the birds will not arrive at the market for 24 hours or more, one or two tin cans filled with corn well soaked in water may be nailed in each coop. The water in the corn helps to satisfy the birds' thirst, and the corn helps to cut down shrinkage in weight but does not make the crops too full.

HOW TO REDUCE

"My little gurl," sez Ma Hopkins, "uster eat as high as 50 jelly beans a day, and you'd oughter see how fat she wuz. Now she smokes fifty seegurettes a day and she's thin as an heck. We can't express our thanks for larnin' sich a simpl method off rejuicing. She ain't but fourteen years old and she ways nigh onto fifty pounds and can ware the step-ins of our Angelina, what's ten this coming Oktober. I red the add in yur good paper and wanta let you all no how glad we all are. The teecher sez she's under wait and wuz normal before, but no teecher nos as mutch as adz—so sez we all uv us."

Cattle fed in dry lot need particular care during the summer months if they are to be fattened economically. To keep their appetites keen, supply plenty of shade, fresh water, and salt, and keep the feed bunks clean and free from feed that has been "slobbered on" or has become sour. Feed should be as palatable as practicable without increasing the cost too much. A well ventilated shed that can be darkened during the day to drive out the flies makes the cattle more comfortable and therefore increases their tendency to put on flesh. Rotting manure is a source of heat and should be removed as often as possible from the sheds.

FIRST COMES FOOD

THE national food bill of the United States was recently estimated at $23,000,000,000. The food industry as a whole thus exceeds by many billions the textile, steel and automotive industries which our financial manuals list as our largest.

All this was pointed out by Colby M. Chester, Jr., president of the Postum Company, in a recent speech before the American Newspaper Publishers' Association, and he went on to discuss the effect food had exerted on the world's history.

"Because of it," he said, "armies have surrendered and cities have been made captive. International boundaries have continually been altered and nations made subject peoples. It was the seed on which red revolution thrived in France and Russia. It is safe to say it forced Lee's surrender at Appomattox, and there is every reason to believe that the World War would not have ended in 1918 if the Central Powers had been well nourished and well fed.

In War and Peace

"China still continues to be a backward nation because dread famine wipes out millions of its people periodically. Food has had its place equally on the constructive side. Joseph averted famine in ancient Egypt by hoarding a surplus in the productive years, making him most favored of the King. Food brought peace and order to the world after the Great War, and Belgium, Poland and Southern Europe threatened with chaos were saved from anarchy and ruin by food."

Have you ever stopped to think that the population of this great country consumes 360,000,000 meals every day in the year? So important is this fact economically that dietary studies of the distribution of expenditure for food have been made by the United States Bureau of Labor Statistics, the United States Department of Agriculture and the New York Association for Improving the Condition of the Poor.

Where Your Money Goes

From these studies it can be estimated that of the money devoted to the purchase of food the average American family spends from 30 to 40 per cent for meats and fish (including poultry and shell fish when used), about 5 or 6 per cent for eggs, about 7 to 10 per cent for butter and other fats, from 10 to 20 per cent for bread and other cereal and bakery products, 3 to 7 per cent for sugar and other sweets, 7 to 10 per cent for vegetables, 2 to 8 per cent for fruit, and less than 2 per cent for cheese and nuts.

An amazing fact is that, at the most moderate estimate, more than 50 per cent of the foods enumerated in this combined budget may be obtained in cans. These foods include meat and fish, milk, butter, some cereal and bakery products, many sweets, practically the whole range of vegetables and fruits and many varieties of cheese and nuts. Who shall say that the commercial canner who makes available in safe, sanitary and palatable form and at moderate prices more than 50 per cent of the kinds of foods the public eats is not a modern Joseph of a most practical kind?

Far from Saturation Point

The number of meals consumed in this country daily multiplied by the number of days in the year makes the astonishing total of 131,400,000,000 meals. Yet the commercial canners of the United States are now putting up only about 9,000,000,000 cans of processed food a year, or only one can for every 14.6 meals, or sufficient meals for nearly five days. If you will call on your own experience at home and in restaurants, you will realize that you eat more than one can of food every six days. The answer to this paradox is partly home canning, and partly the fact that there are still many people in this country who are not consuming their possible proportion of canned foods.

The men in the canning industry are conservative, but they continue to build year after year huge plants for making cans and big new canneries. They are saying nothing and sawing wood, but it is obvious from the above figures that the industry can and will continue to grow.

The food products which are canned in any great quantities now number approximately 240, but new foods, combinations and ready prepared dishes are constantly being added to this total, and each one holds the possibility of growing into a respectable sized industry of its own.

REMOVAL SALE

We have leased the H. G. Towle Building on west side of square and will move as soon as new fixtures are installed. But we are offering our entire stock at our old stand at greatly reduced prices until we move to our new location.

Sale Starts Friday
