COUNTY FEDERATION

The County Federation will meet 3 p. m. Saturday, Jan. 7. 1928, the court house. Mrs. R. E. arks of Foard City has prepared most interesting program. Let ev y woman in the county come and joy it.

Feed and Care of Breeding Stock

By F. W. Kazmeier, Bryan, Texas

People will soon be rigging up their mall incubators, or be planning on aking some eggs to a nearby cus m hatchery or public incubator. does not matter which plan of in ubation you will follow you are go ing to be interested as to whether the eggs are to hatch or not.

The care of the breeding flock, is to a large extent responsible for the hatchability of the eggs. Use only strong, vigorous hens and males in the breeding pen.

Allow the entire flock free range, if your lawn and garden will not do well with the chickens walking and scratching on it, then fence the lawn and garden, but allow the chickens free range.

As a general rule we recommend using one male to 10 or 12 females in the case of Barred Rocks, and other breeds similar in size and weight. In the case of such small breeds as Leghorns, Anconas, etc., we recommend one male to every 15 to 18 females. Do not use male birds more than 2 years old.

Green Food

A flock in order to produce fertile eggs and strong chicks must be fed a liberal supply of succulent green feed daily. In South Texas oats may be sown for winter green pasture. In North Texas and Oklahoma barley and wheat may be sown for winter pasture. We also provide a large cold patch from which we are gathering each day loads of green collard leaves. When all these fail, it is necessary to resort to sprouting oats which takes time and is troublesome, yet green food is absolutely necessary for the production of fertile eggs.

Direct Sunshine

Our poultry raisers have trouble [illegible] on account of [illegible] produced. This an indication of a lack of green ration or a lack of direct sunshine. It is best to allow direct sunshine to strike the hens for several hours each day. On sunny days we try to give the flock an opportunity to enjoy the sun to the fullest extent. Direct sunshine will do much to produce fertile eggs and vigorous baby chicks. It is also a good plan to keep a box full of oyster shell where the flock all day. This is important and oyster shell is cheap.

Milk in Ration

If you have any surplus milk, such as sour milk, skim milk or buttermilk, be sure and feed it to your hens. Milk fed to breeding hens will do much to increase both fertility and hatchability of the eggs. We do not know exactly why this is, but we do know that those flocks getting plenty of milk to drink, always produce better hatching eggs. Even if you have no pigs to feed the milk, experimental data prove you can make more money feeding this milk to your hens. Some poultry raisers think so much of milk, they buy either semi-solid buttermilk or dried milk. Both are commercial products and offered for

Oldest Spell for Years Has Swept Country

[illegible] seldom that the temperature around zero in this country, last week commencing with the night, we had such Friday night several nights. Saturday night was to have been the coldest, when thermometer showed 6 above about sunrise Sunday morning. This was one report that went to 2 and in all probability was the coldest temperature on north side houses.

can not determine yet what the effect on the winter crops. The farmers say that [illegible] of the has been frozen out. It may proved to some extent, but there is that the freeze has made way many of the cotton pests.

[illegible] Max Miller of Chil- send their check for another subscription to the News, say- at they look forward to the weekly [illegible] of the News. They are glad to know that is going on in county. Crowell their daughter, several years. Miss redia, is accepted position Davis Barwise

About $20,000 Is Realized from 1927 Turkey Crop

Practically $20,000 was distributed among the farmers from the 1927 turkey crop of this county.

The Crowell Produce Company shipped three and a half cars, each car dressing 20,000 pounds. But that does not represent the pounds bought from the farmers, as turkeys are said to lose about 5 per cent in dressing. So the actual weight per car would be about 21,000 pounds bought from the farmers at an average price of 28 cents per pound, or a total of about 73,000 pounds at that price.

The turkey crop was not quite so good as it was last season, according to Mr. Johnson, as the same company shipped four cars during the season of 1926. That is not explained on the grounds that interest in the turkey business has lessened, but it is due to conditions under which the crop was produced. There is nothing to indicate that there will be a continuous falling off of turkey production, but on the contrary, an increase in the years to come.

Atcheson Announces for a Second Term

After serving you for the past twelve months in the capacity of County Judge and ex-officio County Superintendent, I am making my announcement for a second term for same. At all times I have put forth my very best effort to make you an efficient officer. Your county finances have been carefully guarded by the Commissioners Court, over which I have had the pleasure of presiding. I will make the race for a second term of County Judge and ex-officio County Superintendent of Foard County, solely upon my official record. If the same has met with your approval, I certainly will appreciate your support.

Yours sincerely,
J. E. ATCHESON.

Mrs. Ida Reavis Stands for Re-Election

Mrs. Ida Reavis is a candidate for re-election to the office of County and District Clerk. She has held the office for one term and is now asking for the second.

Mrs. Reavis' record justifies her in expecting the support of the voters for a second term. She has made the county an efficient public servant and will make every possible effort to hold her high record.

Her announcement is subject to the action of the Democratic primary.

The Girls Lead Boys in Births for Year 1927

According to the record at the Clerk's office the girls are in the lead of the boys in point of number of births for the year that has just closed. There were born in the county, not including the city of Crowell, 59 girls and 53 boys, or a total of 112.

The record of deaths in the county show that there were nearly twice as many males to die as females, the number being 18 and 10, respectively, a total of 28 for the year. By comparison we find that we have made a net gain of 84 in the increase of the births over the deaths.

Que R. Miller Is Candidate for Sheriff

The News is authorized to say that Que R. Miller is a candidate for the office of sheriff and tax collector of Foard County, and in making his announcement for this important office he wants the people of Foard County to know that he intends to conduct a campaign in such manner that if he is not elected he can still live here and be a friend to every voter in the county. He believes he is qualified to discharge the duties of the office and if elected he promises that he will continue to enforce the law with favor to none. He will make a thorough campaign and expects to see every voter in the county.

Mr. Miller is no stranger to the people of Foard County. He has resided here for a number of years and has at all times been active in the support of every movement that has aimed to develop the country and contribute to the well being and happiness of our people. He is capable of discharging the duties of any office for which he might ask at the hands of the voters. He is entitled to the earnest consideration of every voter in the county.

New Chevrolet Models Viewed By Hundreds

People of Crowell and Foard County had their first opportunity Monday of viewing the new Chevrolet models which were on display at Allen Chevrolet Company. According to the record kept of the visitors there were between 750 and 1,000 people at the display room Monday and Tuesday.

The several new features of the car were pointed out and the fact that they met with the favor of many was evidenced by favorable comment and also by actual purchases.

Know Foard County

Some days ago the News stated that Mack Boswell was preparing a brief setting forth facts about Foard County, including the towns, etc., and that we intended to give from time to time portions of this brief, which we thought would be interesting to our readers. These may not appear each week but at least at different times along through the year.

It seems that we should know our county first. Then, if we want to know the world, we might come into possession of that knowledge after we have known our own county. We are sure many of the things contained in this brief will be interesting to the older portion of our population, and will be instructive to the younger folks.

Foard County was created by an act of the Legislature, February 12, 1891, when most of its territory was cut from Hardeman County. Through the efforts of J. G. Witherspoon, well known ranchman of this section at that time, the required area for a new county was secured by getting a strip of land three miles wide from the east side of Cottle and the portion of Knox County north of Wichita River, with the principal part of the county cut from Hardeman south of Pease River. The county was named for Major Robert L. Foard, prominent lawyer of Columbus, Texas.

Crowell was elected as county seat on April 27, 1891. School section No. 446, owned by Geo. T. Crowell, and railroad section No. 445, owned by the Crowell Townsite Company, were divided in half to make up the section for the site selected. Organizers of Crowell were M. F. Thacker, George T. Crowell, J. G. Witherspoon and Homer Pack, all of Foard County, and C. A. Andrews of Sherman, Texas. The town was named for Mr. Crowell and the court house was set on the dividing line between the two sections 445 and 446.

At that time Foard County had only one general mercantile establishment in which the post office was located. Foard County now has five post offices, Crowell, Thalia, Margaret, Foard City and Vivian, and the county has grown from a pioneer ranching country to one of the greatest diversified farming sections of Texas.

With the coming of the main line of the Orient railroad in 1908, Crowell and Foard County have developed rapidly. Margaret and Foard City are also served by the Orient in this county. Crowell was incorporated in 1909 and is now a well balanced city of over 2200 people. Thalia, with a population of over 400, was incorporated in September 1927. It is an inland town ten miles east of Crowell.

WEST RAYLAND

(By Special Correspondent)

Mrs. Ralph Gregg underwent an operation at King's Hospital at Vernon Tuesday afternoon. She has been suffering with serious head trouble for the past year. It became necessary to remove a portion of her skull Tuesday. She is doing nicely.

[illegible] and Mrs. George Moore of [illegible], Mrs. Dale Thorn and baby of [illegible], Mrs. Lola Marlow of Dixie [illegible]unity, Mr. and Mrs. Manning [illegible]ildren and Owen McLarty and [illegible] spent Tuesday with Mr. and [illegible]ther Jobe.

[illegible] Marie Clark spent Saturday [illegible] aunt, Mrs. Molly Clark, of

A SUPPER

[illegible] at the home of Dr. and Mrs. [illegible] Kincaid on Thursday night, [illegible] was enjoyed by Annie Ru[illegible]zabeth Kincaid, Grace Russell [illegible]y Neil Merriman, but they we[illegible] selfish as the man who pr[illegible] himself and wife, his son J[illegible]his wife, these four and no m[illegible] the doors were thrown op[illegible]our more—Jack Welch, Rob[illegible] Oswalt, Vance Swaim and Charles Ferguson.

After the delicious supper was served, forty-t[illegible]d other game were played.

Every one f[illegible]time.—Co[illegible]

Margaret Man Injured When His Car Turns Over

Bagley Russell, Margaret man, about 22 years of age, was seriously injured Saturday near Margaret when his car turned over with him as he was going to his home.

The man had been to Crowell and was turning when suddenly his car went into the ditch, supposedly because of some portion of the steering becoming broken.

Mr. Russell sustained a fractured hip and internal injuries. He was partially pinned under the car but extricated himself and crawled for some distance before he was picked up by a passing car.

It is not thought that he is fatally injured.

Bargain Rate on News in Effect Till February

The following is the largest list of renewals and new subscriptions it has been our pleasure to publish since the bargain rates were put on last fall. The rate on the News will continue till February and we hope to have every one of old subscribers dated up for another year and many new ones added by that time. The list follows:

FOX-[illegible] GROCERY CO.

1907 21 Years 1928

Continuous Furniture Undertaking Business. We have been here long enough for you to judge us from every angle. We are willing to stand or fall by the record we have made.

Our policy has always been to give the very best goods at the very best price possible, and service unexcelled by anyone.

We have never waited to be forced to give service. We have been only too glad to do for our customers anything within reason in connection with sale of our goods. We attribute our success to this steadfast policy of giving good goods at fair and reasonable prices with genuine, "jam-up" service, and the loyalty of our friends.

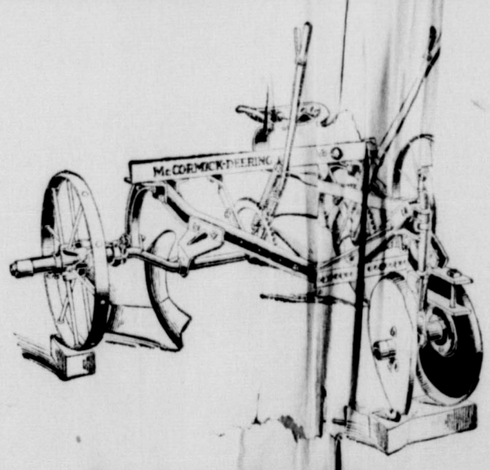

Folks, we ask for your 1928 business promising to give you all that is coming for your dollar and genuine service, too.

Our new line of gas stoves are here now. Don't buy anything until you've seen THE ROPER, the WHITE STAR or the LEONARD. Nothing will be offered you at any price better.

PILES (OR HEMORRHOIDS)

Have now successfully treated nearly seven hundred cases of blind, bleeding and protruding piles by this method.

NO DETENTION FROM BUSINESS. NO CHARGE FOR CONSULTATION OR EXAMINATION.

Many cases of stomach trouble, constipation, rheumatism, and nervousness are caused from piles. Treatment generally requires one to three weeks' time. Most cases are permanently cured, but should there be any recurrence inside of five years, will treat again free of charge.

DO NOT DELAY taking treatment, as the piles not only cause you pain, suffering and inconvenience, but they are very injurious to your general health, and often prevent your getting well of other troubles.

Again Coming to Quanah

Beginning Wednesday, Jan. 4, 1928, I will be at The Imperial Hotel, Quanah, Texas, on Mondays, Wednesdays and Fridays, for a limited time. Hours 10 a. m. to 4 p. m. Come and see me and let us talk over your case.

REFERENCE—Former Patients.

WHERE DAIRYING PAYS

A good dairying section is one in which grass and grain grow willingly and men are industrious enough to milk cows. At least three-quarters of Texas, maybe four, are excellent for dairying. But the dread of having to milk has prevented thousands of potential cow owners in Texas from going into the dairying line. It is not enough to have natural conditions suitable for an industry. It is equally important to have the human conditions right. The business of diamond cutting is said to be very profitable, and might be carried on successfully in the brilliant climate of Texas. But diamond cutting is mostly done at Amsterdam, in foggy Holland. Why? Just because the best diamond cutters live there and don't move away. The physical facts in relation to the psychological facts. A cotton minded farmer given thirty milch cows to manage would wind up at the end of three years with little more to show for his labor than a ticky yearling and a slow note at the bank. Dairying requires not only industry, but alertness, management, knowledge, business ability. Let no man go into dairying with the idea that he can "lay by" his cows in mid-July, or lay off from work every rainy day. The dairy business, more than any other real business, demands work seven days a week and a lot of meditation on the side. Nobody can make any money at dairying by depending on luck to keep his cows healthy or Providence to milk them.—Dallas News.

Parent-Teachers Assn. Organized

On Dec. 14th the Parent-Teachers Association of the Vivian school had its first meeting. After a short business session a program was rendered by the primary and intermediate grades, which was enjoyed by all.

The next meeting will be at night on Wednesday, Jan. 18th. Let all parents who are interested in the school, come and do your part to make this organization a success. Following is the program for next meeting.

Song—"Battle Hymn of Republic"

Proverbs 2—Read by Mrs. Jno. Walling.

The compulsory attendance law of your state, by Mrs. Allen Fish.

The relation of attendance to promotion, by Miss Cora Carter.

The cost of keeping a child out of school, by Mr. Rennels.

Discussion of special problems of attendance. Round table. Discussion led by Mrs. Everson.

Roll call: My New Year's resolution for the children of the community.

MRS. ALLEN FISH, Cor. Sec.

M. E. Missionary Society

The ladies of the missionary society met in regular session Jan. 2nd, 1928.

The new officers for the coming year were installed.

Plans were discussed and formulated to cover the financial budget of the society.

A committee was appointed to outline the Missionary Voice program for the year. The out-going officers rendered their final reports which contained proofs of gradual growth in various channels. Under the direction of our most splendid president, Mrs. Sam Crews, the society is looking forward to a most successful year.—Press Reporter.

IT DRIVES OUT WORMS

The surest sign of worms in children is paleness, lack of interest in play, fretfulness, variable appetite, picking at the nose and sudden starting in sleep. When these symptoms appear it is time to give White's Cream Vermifuge. A few doses drives out the worms and puts the little one on the road to health again. White's Cream Vermifuge has a record of fifty years of successful use. Price35c. Sold by Fergeson Bros. and Reeder Drug Co.

THE FOARD COUNTY NEWS

KIMSEY & KLEPPER, Owners and Publishers

Entered at the Post Office at Crowell, Texas, as second class matter

Crowell, Texas, January 6, 1928

Mr. Ferrin Reports Cold Weather in Ala.

H. M. Ferrin writes the News from Fairhope, Ala., and in the letter states that they have had very cold weather for that country. One morning the thermometer went to 20 above zero, and for some time it stood at 32 and 34 above, causing great damage to winter gardens. Onions and cabbage were about the only garden stuff that stood the temperature.

Mr. Ferrin says only about half the usual number of people from the North went to that country to spend the winter.

He incloses a check for another year's subscription, saying that he and his wife like to hear from the people of Foard County where they spent several happy years.

H. L. Hlavaty of Thalia was here Tuesday and placed an ad with the News advertising his fine White Leghorn chicks. Mr. Hlavaty is building up one of the best flocks in this country and he has something worth while to offer those who are interested in the famous White Leghorn. You will find Mr. Hlavaty advertising regularly his chicks this spring.

Paul Clifford has leased the Whiteway Filling Station from George Hinds and took charge of the business first of the month. Mr. Clifford is a good business man and will doubtless make a success of his new business venture. He and his wife have moved here from Amarillo.

E. Swaim was recently called to Salem, Ind., on account of the serious illness of his father. A message from him Sunday stated that his father was no better. He is in a critical condition and not expected to recover. Mr. Swaim also said the temperature is 10 below zero.

J. W. Bruce of Richards, Colo., sends his remittance for another year of the News and states that they have had several snows and some very cold weather in that country. Mr. Bruce is father of our townsman, Jeff Bruce, and once resided in Foard County.

Mrs. A. H. Clark and daughter, Elizabeth, of Oklahoma City were here from Thursday of last week till Sunday visiting the former's mother, Mrs. Fannie Thacker, and other relatives and friends.

Mr. and Mrs. L. I. Saunders went to Archer City Wednesday of last week on account of the death of Herbert Hill, Mrs. Saunders' nephew. They returned Friday morning.

Miss Cassie Dockins was here a few days during the Holidays from Santa Anna visiting her homefolks and friends. She is superintendent of nurses in Sealy Hospital at Santa Anna.

AT THE METHODIST CHURCH

We regretted exceedingly being unable to attend services last Sunday. It was the first day and the first Sunday of the new year. We had made plans for a big day.

The attendance at the Sunday school as we have been told was small, less than 50, and no preaching services at all during the day.

Since the early part of last week we have been indisposed, sure enough shuit in most of the time. Our neighbors and many of our people have called and offered assistance for which we are very grateful. We hope to be able to be out Sunday and in service.

We want to make Sunday Advocate Day. Will give an opportunity both for renewals and new subscribers.

Sunday school at 10 a. m., with a specially provided place and teacher for each one present.

Preaching services at 11 a. m. and 7 p. m. A warm welcome for all who attend.

Preaching at Black school house Sunday afternoon at 3 o'clock.

Junior League at 2 p. m.

Senior League at 6:15 p. m.

W. R. McCARTER.

Mothers' Self Culture Club

Mrs. Geo. Allison was hostess Nov. 18 to the Mothers' Self Culture Club.

Principles of interior decoration was the subject of study and Mrs. White, the leader for the afternoon, gave the effect colors have on us in our homes.

Selection of durable furniture, built-in furniture, draperies, books and jewels in the home were discussed by the members.

Delicious refreshments were served after which the club adjourned.

On Dec. 16 there was a Christmas tree and program for the members of the club and their children at 3 o'clock in the basement of the Methodist church. A good time was enjoyed by all.

January 6th the club will meet with Mrs. Jesse Owens at which time officers for the next year will be elected.—Reporter.

COMMUNITY SINGING

The community singing will be held at the Baptist church, Sunday, January 15, 1928.

Leader—J. A. Wright.
Two songs led by Steve Mills.
Two songs led by Joe Ward.
Two songs led by T. T. Golightly.
Reading—Mrs. Baxter Johnson.
Duet—Mrs. Griffith and daughter.
Male Quartet, arranged by E. A. Dunagan.
Mixed quartet, arranged by Mrs. Burress.
Song led by Duke Wallace.
Solo—Rev. Smith.

Grover Crowell and family were here from Breckenridge during the Christmas Holidays visiting his mother, Mrs. N. A. Crowell, and other relatives.

Mrs. A. E. Propps and two daughters of Knox City were here the latter part of last week visiting in the home of Mrs. Propps' mother, Mrs. Fannie Thacker.

"The Big Parade" Jan. 16-17-18.

Party for Presbyterians

The membership of the Presbyterian Sunday School was entertained with a party at the home of Miss Frankie Kirkpatrick on New Year's Eve.

Guests were given pink crepe paper "baby" caps, on arriving, which they were to wear during the party. They were introduced by nichnames, by which names they were to be called throughout the evening. Those failing to use these names did so at the risk of paying a forfeit. New Year's resolutions were enacted by different groups, the one voted as best being given by the group directed by Mack Boswell. Other games and contests were enjoyed.

Refreshments consisting of apples and candy were served a la cafeteria, to the accompaniment of a different song sung at the same time by each member of the bread line.

A leather bill fold and pocket book was presented to W. F. Kirkpatrick by the Sunday School as a token of appreciation for his services as superintendent.—Contributed.

ALLEN CHEVROLET CO.,
Crowell, Texas.

Areas Awaiting Settlers

There are no parts of the United States which can be designated as "unexplored," but there are many sections where there are considerable stretches of territory of which little or nothing is known. In the lake country near the Canadian border there is a large area about which little is known, while Yuma and Pima counties and a portion of Maricopa county, Ariz., are yet to be thoroughly explored. A short time ago San Juan county, in southwestern Utah, near Chaco Canyon national monument, was included among these untrampled areas. A large part of Nevada, which is more than twice as large as Pennsylvania, is almost devoid of human life, particularly the central and southern portions of the state. Fewer than 80,000 people live in the whole state. One has still to travel by compass in parts of northern Michigan and Wisconsin.

Famous Valley

A letter from a friend in Florence tells me the leaves have been falling thicker than ever in Vallombrosa this autumn. There have been tempests in the Apennines. Around the ancient abbey which two lines of "Paradise Lost" made famous the chestnuts and firs and beeches which make the valley shady have been falling victims to the wind. It is a delicious spot; the Benedictines who established themselves there just before William the Conqueror landed in England always chose pleasant places for their abbeys. But how did Milton come to hear of it, I wonder? In the Seventeenth century to make the excursion from Florence to Vallombrosa wasn't as easy as it is today.—London Daily Chronicle.

Once Upon a Time

there was a small town in West Texas. This town grew into a city with paved streets, water works, sewer and modern lighting equipment. Then came another great convenience—gas.

To make this story run true to form and end with "and lived happy ever after" you will have to let us pipe your house for gas now, before the rush, and leter install a DETROIT JEWEL GAS RANGE. They bake better and REZNOR OTHORAY GAS HEATERS.

We have a complete display of these stoves on our floor priced from $3.75 up.

Credit a Big Factor

The man who lives by honest work,
Who pays his debts and does not shirk,
Who builds a credit in advance
Can take advantage of business chance;
The man who works and plans and
chemess,
But has no credit, only dreams
Of things he hopes to some day do
While he with credit puts them thru.
The First State Bank is ready to go
With honest men who ability show.

Bigger and Better

See the New Chevrolet now on display!

Today, Chevrolet presents the crowning triumph of sixteen years' continuous progress—a great new automobile so impressive in appearance, performance and staunchness that it marks the opening of a new era of luxurious transportation at low cost.

Built on a 107-inch wheelbase—4 inches longer than before—the Bigger and Better Chevrolet is impressively large, low and racy. Its new Fisher Bodies are finished in new Duco colors and offer rich new upholsteries and handsome appointments. Its improved valve-in-head engine has numerous impressive features such as alloy "invar strut" pistons, hydro-laminated camshaft gears, mushroom type valve tappets, AC oil filter and AC air cleaner. The chassis also has been redesigned. As a result, the new Chevrolet provides delightful smoothness throughout the entire speed range—a wide margin of power for hills—click-of-the-heel acceleration—the ability to maintain 50, 55 and 60 miles an hour without the slightest sense of forcing or fatigue—the safety of four-wheel brakes—the steering ease that can only result from a ball bearing worm and gear steering mechanism—and comfort over all roads at all speeds due to semi-elliptic shock absorber springs—84% of the wheelbase.

Come in—see the car—and learn how Chevrolet has again electrified America by creating a bigger and better motor car and offering it at prices so low as to be actually amazing!

Every feature of advanced design demanded in the finest cars now offered in the New Chevrolet! Read this partial list.

Improved valve-in-head motor.
New stronger frame 4" longer; wheelbase 107".
Thermostat control cooling system.
New alloy "invar strut" pistons.
New instrument panel, indirectly lighted.
New two-port exhaust.
New ball bearing worm and gear steering.
Semi-elliptic shock absorber springs; 84% of wheelbase.
Safety gasoline tank at rear.
Larger balloon tires 30" x 4.50".
New streamline bodies by Fisher.
Alemite pressure lubrication.
New Duco colors.
Theft-proof steering and ignition lock.
AC oil filter.
AC air cleaner.
Single-plate dry disc clutch.
New crankcase breathing system.
Heavy one-piece full-crown fenders.
Vacuum tank fuel supply.
Improved Delco-Remy Distributor ignition.
Combination tail and stop light.
Large 17" steering wheel, spark and throttle levers located at top.
Fisher "VV" one-piece windshield on closed models.
Automatic windshield wipers on closed models.
Semi-floating rear axle.
and
4-Wheel Brakes

QUALITY

MARGARET

(By Special Correspondent)

Eph. Dunn of Starks, La., and Will Dunn of Lemonville, Texas, returned to their homes Friday after a short visit with relatives here.

Miss Lillie Belle Stephens of Vernon is visiting relatives here.

Mrs. Kinard of Goodnight is visiting her parents, Mr. and Mrs. M. Bond.

Miss Edythe Jones of Crowell spent the week-end with Mrs. W. T. Blevins.

Kenneth Taylor returned to his home in El Reno, Okla., Thursday after a few days visit with relatives here.

Alma Wesley returned to Quanah where she is attending school after a two weeks' visit with her parents, Mr. and Mrs. G. C. Wesley.

Bagley Russell was seriously injured when his car turned over near his home Saturday.

Mr. and Mrs. Clint White of Crowell spent Sunday with Mr. and Mrs. Homer White.

Mr. John Wesley was called to Oklahoma City Thursday on account of the illness of his wife who was spending the holidays there.

Edythe Merle Graham returned to school at Canyon Tuesday after a two weeks visit with her parents, Mr. and Mrs. C. B. Graham.

OBSERVES GUEST DAY

The Adelphian Club observed annual guest day Thursday afternoon of last week in the beautiful home of Mrs. Sam Bell with Mesdames Bell, Jeff Bruce and Miss Lottie Woods as hostesses. The members of the Columbian Club, the Mothers' Club and the Community Club together with the Holidays guests of a number were invited. Miss Carrie Maurice Allee rendered a vocal solo, as also did Miss Christine Campbell of Pampa who was spending the holidays here. Both numbers were very much enjoyed. Then Mrs. W. S. Douglas, State Chairman of Art, who is well known to the people of Crowell, gave a most interesting discussion of art in Texas and Texas artists. A number of pictures were on display, original paintings by Julian Ouderdonk, E. H. Jackson and a special collection of paintings of Frank Klepper of McKinney. These were all discussed and explained in an interesting manner by Mrs. Douglas. After this feature of the program a clever contest was held in which the guests were asked to name a series of Bible pictures which were found in several rooms. In this contest Mrs. Lizzie Roberts of Dallas was awarded the prize in a cut with several others who were successful.

Delicious refreshments consisting of chicken sandwiches, potato flakes, olives, boiled custard, fruit cake and coffee were served buffet style to about 65 guests.

This was one of the most delightful parties of the Holiday season.

Senior League Program

Subject—The League's Partner.
Leader—Marion Cooper.
Hymn—"Day Is Dying in the West."
Prayer led by leader.
Scripture read, I Cor. 3:8-9.
Announcements.
Hymn—"O For a Thousand Tongues to Sing."

FOR WORKING PEOPLE

The best of workers get out of sorts when the liver fails to act. They feel languid, half-sick, "blue" and discouraged and think they are getting lazy. Neglect of these symptoms might result in a sick spell, therefore the sensible course is to take a dose or two of Herbine. It is just the medicine needed to purify the system and restore the vim and ambition to health. Price 60c. Sold by

Fergeson Bros. and Reeder Drug Co.

Attention Builders

Let me figure with you on any building you may be contemplating. You will not have to wait until the material is shipped on any buildings contracted by me and can inspect the material before letting the contract. You will be surprised at the low figure I am in position to make.

Loans can be procured if desired to finance the dwellings I may build for you.

Will appreciate the opportunity of figuring with you.

ORDINANCE

ORDINANCE providing for the plication by and licensing of aster Plumbers fixing the fees erefor, and issuing of a license fining the duties of Master umbers; providing for filing of plications for permits, fees, erefor; for bonds and their con- itions; prescribing the materials be used in all plumbing done in is city and the manner of its in- allation and inspection; requiring permit to have been issued upon proper application and payment f fees before any such installa- on shall be begun in the City of rowell; for inspection before me shall be used; repealing all rdinances and parts of ordi- ances in conflict herewith; d declaring an emergency ac- ount of unsanitary plumbing be- g a danger to public health; and ixing penalties for violations of ny part hereof.

IT ORDAINED BY THE CITY UNCIL (COMMISSION) OF THE ITY OF CROWELL, TEXAS:

ection 1. When used in this ordi- ce—

The term "Person" or "Master mber" includes partnerships, as- ations, and corporations, as well individuals.

ection 2.—Application for Li- se: All Master or Employing mbers desiring to do contiact k in this city, shall fill out an lication for license to contract mbing in this City, on forms to prescribed by the Inspector of mbing, and pay a license fee of .00 per annum, provided, all li- se shall be for the calendar year. l paid pro rate for the unexpired t thereof.

When the application has been perly filled out and approved and applicant has duly complied with other requirements of the ordi- nces of the City, a license shall issued to said applicant as a mas- plumber to do contract work in city, signed by the Plumbing In- ctor, and subject to the conditions erwards named.

Section 3.—All Master Plumbers, ensed to carry on a plumbing bus- ss, shall, before the license herein vided for is issued, and before any rk is done, make and deliver a d in the sum of $2500 in the use l benefit of the City of Crowell, xas, conditioned for the faithful rformance of the duties of Master mber and all laws and ordinances ating thereto, and especially as vided in Section 4 hereof, which ll be made by a surety corpora- n, authorized to do business in s State.

Section 4.—Duties of Master or ploying Plumbers:—(a) All work on any sanitary sewer, or in con- ction therewith, or work done upon y of the mains, pipes of connec- ns to the water works, shall be ne in good and workmanlike man- r, and in accordance with the rules d regulations now or hereafter in stence, including this ordinance.

(b).—The City of Crowell shall be ly indemnified and held whole and rmless from any cost injury or mage on account of any injury or mage done to any person or pro- y in the prosecution of said work, as a consequence of the doing of d work, or that may arise out of, be occasioned by the performance ereof.

(c).—The said licensee carrying any such plumbing business shall place, in a good and workmanlike anner, and restore any portion of y street or alley which may be ened for the purpose of making y connection with any gas, sewer, ater, or pipe or main, and shall re- l all such openings or excavations as good condition in all streets d alleys as before such opening or tcavation was made; Provided, that said opening or excavation is not filled and restored as herein pro- ded, and such work approved by e City Engineer, it shall be the ty of such licensee to do so romptly refill and restore the same pon a written notice from the City ngineer or Plumbing Inspector, and rovided, also that in case of the ailure of the said licensee on re- iving such notice to so refill and store, as directed, within three ays from the receipt thereof, the id failure shall be reported by the fficer giving such notice to the City ommission, which may direct the fficer to so restore the same as pro- ided in the notice and the certifi- ate of restoration shall show the ex- enses incurred therein chargeable the licensee, which shall be con- lusive evidence of the reasonable ost against him.

(d).—If such licensee shall, in any ay, injure any sanitary or storm ewer, meter, meter box, or any pipe, r any equipment belonging to the ity of Crowell in making any con- ections or disconnections, or in do- g any work whatsoever, or shall il to make such connections or dis- onnections in accordance with the les, regulations and ordinances of e City, the injury or damage shall e paid by the licensee upon the de- rmination of the Commission of ch injury or damage.

(e).—Said licensee shall do all lumbing in houses or public build- gs where same is to be connected ith either city sewers or city water orks, pipes or connections so that e same shall conform to the rules, egulations and ordinances of the ity of Crowell;

Provided, that if such licensee shall ail, neglect or refuse to so install or onstruct such plumbing work or con- ections, the owner of such house r building who may be injured hereby shall have a right of action gainst such licensee for any injury r damage sustained; Provided, fur- her, that such work must be first in- pected and disapproved by the In- pector of Plumbing, and if he re- uses to issue his certificate of ap- roval of the work, he shall notify he licensee in writing to change or rectify the same so that it will com- ply with the rules, regulations and ordinances of the City, and if the licensee fail, refuse or neglect to do so within three days after the re- ceipt of said notice, then the owner of such building may have the work changed, completed or rectified as to comply at the expense of the licensee.

(f).—It shall be unlawful for any Master Plumber to do any plumbing in the City of Crowell, unless and until such Master Plumber, whether or not licensed, shall have procured and deposited with the City the bond hereinabove provided for.

(g).—In the event the surety company withdraw from such bond, it shall be unlawful for the Master plumber, principal therein, to con- inue any plumbing work in the city then or thereafter to be done, unt.l he shall have presented and approved a sufficient bond conditions as above provided.

Section 5.—Approval of Bond: The bond herein provided for shall be submitted to the board of commis- sioners and subject to its approval, and of regular prescribed form.

Section 6.—Registration of Licen- see:—Every Master Plumber shall furnish to the Officer issuing said license the full name and local ad- dress of each person constituting such facts shall be duly registered by the Officer, and any change therein shall be noted upon information fur- nished by the licensee, whose duty it is to report same.

Section 7.—Revocation: Any li- cense issued to any Master Plumber hereunder may be revoked by the City Commission of the City at any time, upon charges filed against such Master Plumber, by any person, or its own motion; such charges by other person to be under oath, and the Commission shall fix a time for hearing hereof and notify the licen- see of the time and place of the hearing, together with a copy of the charges. If, upon hearing the Com- mission shall be of the opinion that such license should be revoked, such order may be entered, and the un- earned license fee returned.

Section 8.—Licenses not Transfer- able: Each license and each permit issued shall be personal to the licen- see named therein, and shall not be transferred, nor the name of the licensee to be used, either directly or indirectly, by any other person for the purpose of obtaining a license or permit, or doing any plumbing work in this City.

Section 9.—(a)—All application blanks for permits for sewer connec- tions, for installing and for con- struction with regard to all plumb- ing shall be furnished under the supervision of the Inspector of Plumbing, which must be filled out by the applicant and when so com- pleted, subject to the approval of such Inspector, or rejection, which shall be endorsed thereon, all of which shall be accomplished before any permits for any such work may be issued.

(b).—Any plumber, or firm or corporation engaged in such work, desiring to open any street or alley to make any connection with City Sewer, shall make application for a permit for such opening, and receive the same before the work commences, which permit shall specify the exact places and the work to be done, and the application shall contain a prom- ise to comply with Section 1, subdi- vision c, of this ordinance.

(c).—Any plumber, firm or corporation engaged in plumbing work in the City desiring to construct or install fixture, or fixtures, in any building, or to connect any such which may have been disconnected, shall first obtain permit therefor, upon applications to the Inspector, upon form prescribed by him.

(d).—The sum of One Dollar for one fixture, or roughing in for one fixture, and seventy-five cents for each additional fixture, or roughing each in, shall be paid as a permit and inspection fee for the fixtures proposed to be placed in the work de- scribed in the application for per- mit; which sum, or sums, shall be paid by the Master Plumber to whom the permit is issued at the time of application therefor. By the term "fixture" as used herein is meant each water closet, sink, bath tub, basin or section of basin in battery, drinking fountain, soda fountain, urinal, laundry tray, or section of laundry tray, sand trap, catch basin, and all other receptacles that may be classed as plumbing fixture. The permit and Inspection Fee shall ap- ply to all floor and cellar drains (connecting with the sanitary sewer) septic tanks and sewers, fees to be the same as for plumbing fixtures. A fee of One Dollar shall be paid for outside closet and connection which covers inspection.

(e).—A special permit may be is- sued where additional fixtures are to be made which cannot be practicably constructed in accordance with all the provisions of these regulations, provided, that nothing shall be held to repeal any express provision of this Ordinance regarding plumbing.

Section 11.—Inspection and Test:

(a).—Application in writing for inspection must be made to the In- spector when work is ready for in- spection at least four hours before such inspection is desired. All plumbing work shall be inspected by the inspector or his assistant, as fol- lows:

(b).—No soil, drain or vent pipe shall be covered or concealed from view until after the work has been tested, inspected and approved by the Plumbing Inspector, which in- cludes connections with the sewer; openings or trenches must not be filled until the sewer and connections have been approved, if any part is covered before such time, it shall be uncovered at the expense of the Master Plumber, under direction of the Inspector.

(c).—There shall be two inspec- tions on all work in any building, one when the roughing in is complete, that is, the entire system shall be prepared for inspection, waste and vent openings shall be sealed, or plugged and system filled with water to top stack on roof, if leaks are in- dicated, they shall be corrected at once by removing all defective ma- terial and workmanship, and replac- ed by sound material, again tested and repeated until the work is tight and conforms to this ordinance; final inspection shall be made when the work is fully completed and build- ing is ready for occupancy. After the final inspection is satisfactory, a certificate shall be issued showing acceptance.

(d).—Before the city water shall be turned onto the premises, or the sewer connections used, the owner of the premises shall present to the Water and Sewer Departments of this city the final inspection certifi- cate, certifying that all the plumbing on such premises has been found to be in compliance with the rules, reg- ulations and ordinances of this City; and any person turning on such water, or using any sewer connection, without such final certificate having been issued and presented, shall be guilty of a misdemeanor and punish- ed as provided elsewhere in this Or- dinance.

Section 12—Fixtures and Material:

(a).—All receptacles used for water closet, urinals or otherwise, for the disposal of human excreta, shall be constructed of material imperviv- ous to moisture and that will not corrode, such as vitrified earthen- ware, hard natural stone, cast iron, white porcelain and enambled on in- side.

(b).—Flushing Rims. All water closets and pedestal urinals shall be provided with flushing rim construct- ed so as to flush the entire interior surface of the bowl thereof with water as after in this ordinance pro- vided.

(c).—Open Plumbing. All plumb- ing fixtures shall be installed or set free and panelled doors, wainscoting, flour bins, open from enclosing wood- work, such as drawers and cupboards for cooking utensils, etc., provided, however, that wooden drain boards may be used at end of sinks, and where practical, all wastes and sup- ply pipes shall run to wall.

(d).—Water Supply to Fixtures: Every water closet and urinal bowl shall be indirectly flushed through a flushing tank or approved flush-ometer valve of at least three gallons capacity for water closet, and one gallon for urinals; the tank shall be properly supplied with water and the flush pipe to the water closet and at least one and one quarter inches in diameter, flush pipe for urinals shall be at least one inch in diameter.

(e).—Flushing Tanks, Groups of Fixtures: A group of urinals on the same floor subject to constant use, as in schools and factories, may be supplied with one automatic flushing tank of a capacity equal to one gallon to each urinal; automatic flush must be simultaneous and of such force as to cleanse each individual fixture; in- termittent or automatic flushing de- vices shall be flushed at regular in- tervals not to exceed ten minutes be- tween intervals during the hours that such fixture is used. The backs of stall to the length of three and one half feet must be kept constantly moist with a proportionate supply of water while in use.

Section 13.—Material:

(a).—Water Service, Supply Pipes and Fittings. All water pipes used for supplying fixtures and water sys- tem shall be wrought iron galvanized —merchant steel galvanized—Brass pipe—iron pipe size and weight or lead pipe of weight known as "Ex- tra Strong." All fittings used in water supply system shall be galva- nized malleable fittings—galvanized cast iron fittings or brass water fit- tings. All connections and branches on lead service pipes must be made by means of plumbers wiped joints.

(b).—Waste and Vent Lines. All pipes and fittings used for waste and vent lines in buildings shall be of kind and grades known to the trade as "Extra Heavy" and must be cylin- derical smooth of uniform in thick- ness, and free from defects and shall have a coating of cold tar preserva- tion solution. Duro-iron pipe and fitting may be used in this con- struction.

(c). Threaded pipe used in waste and vent construction shall be of grade known to the trade as "Genuine Wrought Iron" and to be galvanized inside and out. All fit- tings used in wrought iron waste con- struction must be cast iron galva- nized, recessed, threaded drainage fittings, known as "Durham" pattern. Fittings used in vent lines in wrought iron construction may be standard malleable galvanized thread- ed fittings up to two inch and above two inch may be standard cast iron galvanized threaded fittings.

(d).—Lead pipe used for waste, vent or flush pipe must not be of lighter weight than that known to the trade as "Extra Light."

(e).—Where cast iron soil pipe vents are called for, vents, for kitch- en sinks, basin and bath tubs, in pri- vate residence of one and two story, may be vented with galvanized steel pipe reamed full pipe size, and gal- vanized malleable iron fittings; sizes of these vents per single fixture as follows: one and one half inch for kitchen sinks, and one and one quar- ter inch for bath tubs and basins.

(f).—Sewer pipe must be of the best grade of vitrified salt glaze tile, and all fittings of the same ma- terial.

(g).—All clean-out plugs must be brass screw, the body of which may be either cast iron or brass.

(h).—Brass ferrules shall be of good quality of brass composed of a mixture that will fuse readily with plumber's solder, free from sand holes, flaws and other defects, uni- form in thickness, and at least four and one half inches long, of a size and weight shown by the following table:

Inside diameter	Weight
2 inches	1 lb 4 oz.
3 inches	1 lb 14 oz.
4 inches	2 lb 8 oz.

(i).—Drum traps shall not be of smaller diameter than 4 inches by eight inches, with brass threaded air and gas tight cover, and not be of lighter weight than that known to the trade as "Extra Heavy."

(j).—Lead bands shall not be of lighter weight than what is known to the trade as "Extra Heavy."

Section 14. Construction.

(a).—Water Service and Supply. Water service line of any building shall not be of less than three-quarter inch and shall be laid not less than twelve inches below the ground sur- face, and where laid in the street or alley, not less than twenty-two inches below the surface of the ground. Water pipe run under buildings must be eight inches under ground up to point of riser and shall not be sus- pended to timbers or exposed to cold air.

(b).—Construction for fire protec- tion must be made independent of all other service pipes.

(c).—The service supply to each one story building where there is a bath room and kitchen, and used as a residence must be provided with separate stop and waste cocks, one to control the bath room fixtures, one to control kitchen fixtures and one to control hot water pipes. Stop and waste cocks must be installed as herein mentioned, with key through floor; still cocks and yard hydrants shall be controlled by separate stop and waste cocks in order that yard service and house service can be separately controlled.

(d).—The service supply to each two story building, or more, known as a residence, must have at least one stop and waste to drain cold water and one to drain hot water pipes with keys made of not less than three-eighths inch square rod through floor or wall.

(e).—The supply pipes to each tenement in a house having more than one, must be provided with stop cocks, so that water can be shut off and the pipes emptied when neces- sary without affecting other ten- nants.

(f).—Main supply to any bath room shall not be smaller than three quarter inch pipe.

(g).—Connections to hot water heater must not be smaller than half inch pipe size, when coil in heater is not larger than five-eighths inch pipe size. Where coil is larger than five-eighths pipe size, connection to and from heater must be not smaller than three quarter inch pipe size. No supply to and from any hot water boiler known as storage system, shall be smaller than three quarters inch pipe size.

Section 15. Soil Pipe.

(a).—Every building in which a water closet is installed shall have at least one four inch soil pipe waste and vent stack extending through the roof at least one foot and three inches, and for every branch of twenty-five feet or more in length vent for same shall extend full size to main stack or through the roof. Branches of less than twenty-five feet must extend full size through roof if fixtures wastes into the vent serving the branch. Fixtures of the branch may be revented as provided for in this ordinance. When condi- tions require a five or six inch drain or waste pipe within the building, then there shall be a five or six inch vent pipe carried out through roof, unless the area of ventilation from the various branches are equal to or greater than the main line.

(b).—Soil pipe waste from three feet outside of building wall must be "Extra Heavy" cast iron pipe or Duro iron pipe and must extend up through building and out above roof as provided herein. All branches and changes of direction must be made with Y's and 1-8 bends. Clean outs provided and made accessible in change of direction where practi- cable. Tapped soil fittings will not be permitted, except that they be of the sanitary pattern and waster pipe between tapped T and water seal of trap be of brass pipe I. P. size, and fittings must be of cast iron galva- nized recess fittings.

(c).—Genuine wrought iron gal- vanized pipe of standard weight may be used for soil or waste pipe above ground in any building of six stories or more, not including basement; the ordinance applying the same in wrought iron installation as it does to cast iron construction. End of pipe must be well reamed and screws to shoulder of fittings. All fittings used in wrought iron waste con- struction must be cast iron galva- nized recessed drainage fittings, known as "Durham" pattern and all branches or change of direction must be made with Y's and long radius bends with clean out provided and made accessible where practicable as provided in system of cast iron pipe.

(d).—All joints in cast iron pipe must be made with picked oakum and soft pig lead, the oakum to be well packed and then at least twelve ounces of molten soft lead to each inch of diameter of pipe poured into hub of pipe and joint caulked until water and air tight.

(e).—All horizontal soil and waste pipes must be graded and given uni- form fall, and must be supported by piers built of brick or concrete or suspended from beams or joints ev- ery five feet for cast iron, or every twelve feet for wrought iron pipe, all hangers to be neat, durable, hangers of iron, steel or brass. All vertical lines shall be supported on heavy cast iron rest on every second floor, must be plumb and permanent- ly stayed in position just below roof line. Horizontal lines of lead work shall be supported under its full length with permanent supports in such manner as to prevent sagging of lead. Each stub vent or waste, also supply stub, run through floor or wall must be securely staved in position and be at right angle with the floor or wall to which it runs.

(f).—No arms for kitchen sinks or urinals will be allowed for waste, but shall be brought up through floor, or where P. trap is used shall be brought up vertically and direct- ly behind sink or urinal waste open- ing.

(g).—In remodeling work the ex- isting system of soil, waste and ven- tillating pipes shall be changed to reasonably comply with this code, and the Plumbing Inspector shall be consulted with the proposed layout before work is started.

(h).—A soil or waste line shall in no case be of less diameter than the trap of the fixture it serves.

(i).—The proper sizes of waste pipe for a fixture shall not be less than the following size, and for ad- ditional fixtures, increase in size as follows:

Extra Light Lead Pipe of Extra Heavy Cast Iron Pipe. Inches	1¼	1½	2	3	4	5	6
Closets					1- 10	11- 35	36- 50
Sand Traps					1- 10	21- 35	36- 50

Pantry Sinks	1	2	3-8	9-20	21-100	101-175	176-250
Wash Basins	1	2	3-8	9-20	21-100	101-175	176-250
Drinking Founts	1	2	3-8	9-20	21-100	101-175	176-250

Section 16. Cleanouts. (a).—Cleanouts shall be placed at bottom of each stack, and shall be of same size as pipe up to four inches diam- eter. No sink waste cleanouts will be permitted under any buildings where floor is less than two feet from ground, otherwise, same shall be brought through wall or floor in full view. All drain and waste pipes con- structed under concrete floors must be provided with cleanouts at end of each branch, and in all cases must be accessible. It must be expressly understood that no cleanout screw will be installed in any position or in any location except where accessi- ble for use, and where impossible to construct cleanout at base of soil on end of house drain where same con- nections with the house sewer, and, in all cases, brought to grade line.

(b).—Base of all stacks must be constructed with Y and 1-8 bend or two 1-8 bends. Where Y and 1-8 bends are used 1-8 bend must be inserted in horizontal run with Y caulked into 1-8 bend. In no case will a T or combination T Y be per- mitted at base of stack.

Section 17. Vents: (a).—Re- vent stacks from groups of more than five fixtures to each floor in build- ings more than two stories in height must connect into waste stack or waste branch with Y's and 1-8 bends and must not connect into stack or branch above waste or fixture it serves.

(b).—Batteries of water closets or urinals in toilet rooms on same floor from three to twenty in num- ber may be installed by system of loop venting by extending the hori- zontal line of soil pipe up and return full size to main vent stack at a point one foot above highest fixture or continue separate through roof full size, thus forming a circuit vent system. When more than ten closets or urinals in a battery are vented in this manner, there shall be an ad- ditional connecting line between waste and vent full size in center of such battery for the purpose of relieving air pockets.

(c).—The vent pipe from all drum traps must be wiped into waste pipe (Y branch) not more than six inches from trap seal. Closet vents must be connected to branch of soil or waste pipe just below line of floor and above any waste connections. Revents to closets may be omitted when closets are not more than three feet from said stack, and there are no fixtures on floor above, wasting into same stack. When a vent pipe from a trap connects into a vent from another the said connections must be made at least one foot above the highest fixture. The back vent from any fixture must be not more than six inches from trap it serves, meas- uring from water seal.

(d).—Trap revents shall be con- tinuous where possible; where the vent or revent pipes are continuous and traps are ventilated through the waste fittings, the center of the out- let of such fittings shall not be set below the water seal of the trap and the trap shall not be more than two feet from the waste fitting, measur- ing from water seal. Quarter bends or offsets will not be permissable in

ORDINANCE

(Continued from page 7)

sink or urinal vents where placed at point lower than six inches above the fixture served.

(e).—Where a stack or vent pipe extended through a roof is within a distance of fifteen feet of any opening above said stack or pipe, the said stack or pipe must be extended two feet above the top of opening. Flat roof vents must be extended at least six inches above fire wall. No caps, cowl, or bends shall be affixed to the top of any stacks or vents, wire baskets may be used.

(f).—Flashings: All pipe or stacks passing through roof must be flashed with sheet lead not less than two and one-half pounds to square foot, or two ounce copper. Flashing must have sleeve brought up to top of pipe and turned on inside of pipe and must extend at least four inches on either side of vent stack and six inches on the upper side.

(g).—No lead vents will be permitted to extend through roof but must be returned to vent stack or go through roof with soil pipe properly flashed.

(h).—Except as otherwise provided in this ordinance, each and every fixture must be revented and have water seal trap placed as close to fixture as practicable.

(i).—Extra heavy vent branches, inverted Y's or plain T's shall be used in opening left in vent pipes to prevent fixtures. Revent pipes for a fixture shall not be less than the following sizes for additional fixtures, increase in size as follows:

Extra Heavy Cast Iron Pipe or Extra Light Lead Pipe.

Section 18.—Sewers: Sewers shall not be less than four inches in diameter. All connections at main shall be made with Y's and 1-8 bends, up to and including eight inches, where main is larger than eight inches, plumbing inspector must be consulted. All fittings used in lateral from the main must be regulation Y's and 1-8 bends. Sewers shall be laid in trench of uniform grade with one-quarter inch fall to the foot, in as direct line as possible. Tile may be used to within three feet of outside of building wall, with bell holes provided and joint to be caulked with hemp, well cemented with 2 parts of well screened sand and 1 part of best Portland cement. These pipes to be laid so as to measure at least twelve inches below grade, measuring from the top of pipe, and above that depth (when within twenty feet of any building) to be extra heavy cast iron pipe. No traps or any manner of obstruction to the free flow of air through the whole course of the drain and soil pipe to be allowed; and any mechanic who shall directly or indirectly make or cause or allow to be placed or made, any trap construction or other obstacle anywhere in the course of such pipe or sewer without the written approval of the plumbing inspector shall be subject to the penalty provided for a violation for a violation of this ordinance, and in addition shall pay the cost of rectifying the wrong. Each building shall be served with an individual house sewer from main to house. Sewer shall not be less than two feet deep at the gutter, where house sewer runs into street. If the grade of sewer is such as not to permit a depth of two feet below ground surface, it shall be laid with extra heavy cast iron pipe with the joints made as herein provided for soil pipe, and an extra heavy cast iron increaser must be used where the cast iron pipe receives the spigot to tile sewer of house drain.

(b).—House sewer connections shall not be made to any City manhole or cleanout stack, unless written permission is secured from the Plumbing Inspector.

Section 19. (a).—All joints on lead pipe or between lead and brass pipe must be plumber's wiped joints, sweated or bolted joints will not be permitted.

(b).—Cast iron rust joints shall be made by first caulking a gasket of oakum tightly into the hub with cement made of flour of sulphur, salammoniac and iron borings or filings, or its equivalent.

(c).—Only salammoniac, Portland cement and other equally efficient joints shall be permissible in drainage plumbing systems to be used for carrying off fluids containing acids deleterious to lead joints or in lines subject to extreme altering range in temperature.

(d).—All connections between lead and cast iron pipes must be made with extra heavy brass ferrules, wiped into lead pipe, caulked into pipe connecting therewith.

(e).—Connections on brass pipe and between brass pipe and traps or iron pipe must not be made with slip joints on sewer side of trap.

Section 20. (a).—Fixtures with earthenware traps connected directly with soil or waste pipes shall have solid brass floor plates of not less than three-fourths of an inch thick soldered to the lead bend or pipe and screwed to the floor where the floor is other than wood, and where iron or brass pipe is used, screwed to the same and bolted to the trap flange. Joints shall be made gas tight with asbestos graphite ring, lead or white lead, or perfect screwed joint. Where floor is wood and lead bend or pipe is used lead shall be flanged over not less than three-quarters of an inch, and putty joint made. In wooden joist construction, the connection between wiped joint and under side of floor shall not be less than four inches.

Section 21.—Traps. (a).—Each bath tub shall be provided with a lead four inch by eight inch or larger "Extra Heavy" drum trap. Traps on bath tubs shall be placed in such manner that the cleanouts will be in plain view and above the floor. The outlet from drum traps must be wiped into the trap in a position that waste outlet shall be water sealed and two and one-half inches; inlet and outlet must not be less than one and one-half inches in diameter.

(b).—Drum traps for seitz bath and bath tubs where waster connects with lead bend and installed within 24 inches of where waster intersects lead bend need not be revented, and drum traps shall not be located more than 24 inches from outlet of tub. This construction may be used where there are not fixtures on floor above wasting into same stack.

(c).—Each shower bath shall be provided with trap of seal not less than two inches, inlet and outlet of trap must not be less than two inches in diameter. Showers installed independent of bath showers must be wasted through a double drainage, floor drain where floor or shower stall is other than regular shower receptor waste from drain to be revented within six inches (on horizontal run) of trap. Waste shall not be connected with another fixture waste (except closed bend), but shall run independent to closet bender soil stack. Use urinal vent schedule for shower vent sizes.

(d).—Traps of lavatories must be Extra Heavy lead or heavy brass tuging traps with seal not less than one and one-half inches in depth and a discharge capacity to equal one and one-fourth inch pipe.

(e).—Traps for kitchen sinks must be extra heavy lead or cast brass traps with seal not less than one and one-half inches and a discharge capacity equal to one and one-half inches pipe provided with trap screw and cleanout.

(f).—Traps for urinals must be cast iron or cast brass traps with seal not less than one and one-half inches and a discharge capacity equal to two inch pipe, provided with cleanout or trap screw, or so constructed as to afford access in case of stoppage.

(g).—Traps for lavatories, sinks, urinals or other fixtures which connect with screw pipe (as provided herein) must be cast brass and of New York or Los Angeles Pattern.

(h).—Traps for wash trays shall be drum traps of no smaller dimensions than four inches by eight inches. Extra Heavy lead and one trap may be used for battery of three trays. Outlet shall not be less than two inches diameter.

(i).—Bars and soda fountains waste through a cast iron basin not smaller than 18 inches by 18 inches. Basins must be provided with a removable cover, and to be vented as other fixtures herein provided. Basins may be located in rear of room or building and waste line continued to location of bar or fountain where waste terminates in waste gutter or other recepitacle. Wastes must be provided with cast iron trap with at least four inch seal. When this kind of construction is used the waste line between catch basin and trap at fountain must be vented (at any point on the line.)

(j).—Waste pipe from kitchen sinks in any hotel, restaurant, boarding house or other public cooking places must be run into grease traps made of cast iron.

(k).—One sink to have 10 inch by 10 inch trap with 2 inch waste. Two to four sinks to have 18 inch by 18 inch traps, with 3 inch waste. Trap and waste sizes to increase with number of sinks connected to it with cleanout on sewer side of trap, and at end of lines. All sinks to have cleanout flush with floor. Each fixture must be connected with proper size lead pipe wiped to Extra Heavy brass ferrule, and soldered to brass tail pieces from fixtures. No lead pipe to be less than one and one-half inches; no traps shall be used under fixtures.

(l).—Waste pipe from dental cuspidor may be connected with drum trap with one and one-half inch outlet for one to four cuspidors, two inch outlet for five to twenty cuspidors.

(m).—Traps. Traps shall be placed as near to fixtures as possible, and in no case shall a trap be more than two feet from waste outlet of fixture; all traps shall have at least one and one-half seal. The discharge from any fixtures must not pass through more than one trap before reaching house drain; traps placed below the floor shall have a brass trap screw for cleaning, in plain view, and flush with the floor and must be accessible; all traps shall be rigidly supported and set true with respect to their water level and shall be so located as to protect their waste seal.

(n).—No form of traps which depends upon the action of movable parts for its seal be used. No trap which depends upon concealed interior partitions for its seal, or which has an interior partition that, in case of defect, would allow the passage of sewer air, shall be used.

(o).—All closets, urinals or slop sinks with trap combined shall have visible trap seal.

(p).—Garage and wash rack drains shall discharge into cast iron sand traps provided with removable receptacle inside of trap to remove mud and other refuse washed into same. Traps to be not less than 20 inches in diameter and 30 inches deep, and to be provided with 4 inch waste and revented. Garages in which more than two cars are stored, traps must have 2 inch local vent out through roof, local vents will not be allowed to connect with vents from sewer side of trap. Every building or place of business where gasoline, benzine, naptha or other inflammable oils, or compounds are used shall be provided with traps as garages.

(q).—Floor, cellar and area drains may discharge into catch basin which must have a water seal trap of deep pattern. Catch basins shall be of cast iron not less than 18 by 18 inches with cast iron cover bolted on and where inside basement shall be provided with a gate valve. Cellar and area drains where connected direct to house lines must be protected by back pressure valve and be revented. Catch basin shall be considered fixtures and must be installed accordingly. Bell traps and area drains connected to catch basins are not classed as fixtures and cast iron or tile may be used for connections to same.

Section 22. Sumps.

(a).—In all buildings in which the whole or part of the house drainage and plumbing system thereof lies below the crown level of the main sewer, sewage or house waste shall be lifted by mechanical appliance and discharged into sewer.

(b).—All sub-house drains shall discharge into a perfectly air tight sump or receiving tank so located as to receive the sewage by graving, from which shall be lifted or discharged automatically into house sewer by pumps, ejectors or any equally efficient method.

(c).—All motor, air compressors and air tanks shall be located where they are open for inspection and repairs at all times. The air tanks shall be so proportioned as to be of equal cubical capacity as the ejectors connected therewith, in which there shall be maintained an air pressure of not less than two pounds for each foot of height the sewage is to be raised.

Section 23.—Septic tanks and connections.

(a).—All buildings situated upon any lot, tract of land within the limits of the City of Crowell, the outside line of which part thereof abutts upon an alley or such lot, tract or parcel of land, or any street in or through which public sewer extends or is within a distance or radius of one hundred feet of such public sewer shall be connected with such public sewer.

(b).—When there is not a City sewer within one hundred feet an approved septic tank may be used, with the proper amount of drain tile leading from it, installed under the supervision of the Plumbing Inspector, but in no case shall a cess pool be allowed. Permission to install septic tank must be obtained from the plumbing inspector, and permit taken out the same as for a plumbing fixture, and the City Inspector will upon demand furnish approved plans and specifications for the tank.

Section 24.—Waste from Acid Sinks.

Where there is a discharge of industrial waste with a high acid content the drainage shall be through pipe of acid resisting metal, if placed on outside of a building, such pipes may be vitrified earthenware pipes, with caulked and cemented joints, and be properly trapped before entering the sewer or drain. In no case shall corrosive liquids or other spent acids liable to destroy or injure drain, sewer, soil or waster pipes discharge into them without being thoroughly diluted or neutralized by passing through properly constructed trapped dilution or neutralizing catch basin, such catch basin to be automatically provided with sufficient intake of water or neutralizing medium or substance so as to make its content non-injurious before being charged.

Section 25. Prohibited Material and Connections.

(a).—Pan or short hopper closets, latrine, or range closet, or closets having an unventilated space, or whose walls are not flushed at each discharge shall not be used. No water closet shall be supplied directly from the water supply pipes, except with valves made for same and approved by Plumbing Inspector. No steam exhaust sediment from boiler or drain tubes from stop and waste cocks, or rain water pipes or cellar drains, shall be connected directly with sanitary sewer.

(b).—No slip joint shall be made on any waste line, or revent line on sewer side of trap. Combination lead bends and ferrules shall not be used, nor combination solder nipples, nor shall solder unions be used. Earthenware closet bowls with vent horn shall not be used; nor an double hub fitting or inverted caulked joint permitted on any soil waste line, nor shall any fitting known as offset fitting be used on such waste line. The installation or maintenance of wooden wash trays or sinks is prohibited in any building or part of building designed or used for human habitation, but may be used in daily use such as public laundries and dye houses. No fixture shall be installed without water connections. No sanitary tests shall be used as waste or soil fitting on horizontal pipe unless side opening is smaller than the main body of fittings.

(c).—Trough urinals or gutters will not be permitted, but urinals must not be of the individual type.

(d).—Long hopper water closets cannot be used inside any building used for human habitation, but may be used as yard closets.

(e).—In no case shall a water pipe from any fixture be connected with any water closet trap, vent or revent connections for same.

(f).—Welding hub openings iron fitting will not be allowed lead waste or vent shall be on outside of building below ond floor.

Section 26.

All persons are prohibited connecting pipes whereby high sure steam boilers may be with water direct from City all such boilers shall be provide a tank or other receptacle of cient capacity to hold at lea hours supply of water in cas pipe district being shut off to mains, fire hydrants or make nections or extensions; and the shall not be responsible for l water for steam boilers for any poses.

Section 27.

(a).—Soil or waste pipes pla any building for future use sha ventilated, tested and subject the same rules in every respect intended for immediate use and openings caulked or soldered.

(b).—Old house blumbing connected with the sewer only it is found on examination by Plumbing Inspector to conform respects to the requirements go ing new plumbing.

Section 28.

The Plumbing Inspector shall the power, and it shall be his to, condemn any work heretofor hereafter installed when, in his ion, such work is unsanitary dangerous to the health of the c munity where such work may be

Section 29.

No person, firm or corpora shall install or connect any hot heater for heating water by the of gas, natural or artificial, u the same be provided with a hood to which shall be connect suitable ventilating pipe not less the size of the heater opening said pipe shall extend to a ca flue or to the open air in such provided, all such ventilating when placed on the inside of tions or enclosed in any manner that said pipes are in contact wood shall be fully covered and tected with asbestos, or incased tile pipe lining to fully protect insure against fire; in case ventilating pipe shall extend to air, it shall be provided with a or cowl so as to prevent back dr no heater shall be placed in a cl

Section 30.

This Ordinance shall repeal all dinances and parts of Ordinances direct conflict herewith, or re nant hereto, but shall be conside cumulative of all regulations wh there is no change herein by essary implication.

Section 31.

Any person violating, or caus to be violated, any term or provi of this Ordinance shall be guilty a misdemeanor, and, upon convict shall be punished by a fine of less than Ten Dollars nor more th Two Hundred Dollars; and in ad tion thereto, the City Commiss may declare the license by any person forfeited and may revoke same..

Section 32. Emergency Clause.

The fact that a great deal of plumbing now in use and being stalled in this City is unsanitary dangerous to the health of the p ple residing herein, creates an emer ency and public necessity that the rule of the Charter requiring an O dinance to be read at two sever meetings before passage, be, and the same is, hereby suspended, and this Ordinance enacted at the meeting its introduction and first reading and it is so ordered.

Passed by unanimous votes of the City Commission this 20th day of De cember, 1927, and approved.

C. T. SCHLAGAL.
Mayor, City of Crowell, Texas

Witness my hand and seal of City this the 4th day of January, A. D. 1928.

J. T. BILLINGTON.
City Secretary.

Pampa Visitors Honored

Complimentary to Mr. and Mrs. R. C. Campbell of Pampa, Texas, who were visiting their daughter, Mrs. W. B. Johnson, and Miss Christine Campbell, a student in the University of Texas, who was also a guest of her sister during the holidays, Mrs. J. A. Johnson entertained a number of guests with a party Wednesday evening, Dec. 28th. Forty-two and bridge furnished diversion during the evening. Plates containing sandwiches, pickles, potato chips, fruit cake, whipped cream and tea were served.—Contributed.

We have a large supply of gas ranges and heaters on the floor. Come in and see them.—Crews-Long Hdwe. Co.
