Corn Contracts May Be Available

BY JACK WALLS

In the wake of a Texas Legislature agriculture committee meeting in Hereford Monday, Garland DePrang told the Hart Beat that a tentative agreement has been reached between Grain Handling Corp. and Frito Lay.

DePrang said they had "agreed to agree" although the specific details of an agreement had not been finalized.

The outlines of the tentative agreement would put Frito-Lay in charge of the Grain Handling operation. DePrang noted, "they would be taking over" and "I would be getting out." He said that under the proposed settlement he would not have anything to do with the corn handling operation.

He cautioned, however, that no agreement had been reached yet and that there could be a snag. "I feel it will take place." he said.

DePrang said he could not go into detail of the agreement but that as discussed all suits would be dropped. He noted that if all goes well corn contracts should be available shortly after the first of the year.

DePrang explained his motives saying tha he wanted what was best for the employees and the farmers, and that litigation would not be good for anybody.

"The employees and farmers built Grain Handling," he noted, "and I want what is best for them to happen."

"I hope Frito-Lay does too," he noted.

DePrang said he appreciated the hard work and effort put into Grain Handling Corp. by both the employees and the farmers.

The first inkling of a tentative settlement came out at the meeting Monday when Speaker of the Texas House of Representatives Bill Clayton of Springlake-Earth made the announcement.

About 300 area farmers joined committted members Joe Hubenak, Forrest Green, Betty Denton, Pete Patterson, Bill Keese, and Staff member Charles Carter, to hear Sworn Testimony on the condition of the farmer.

More than the Grain Handling situation was discussed.

Bill Freeman, professor of agricultural economics at Texas Tech University, testified that the farmer needs a minimum of $5.06 per cwt. for his corn with a yield of 8,000 pounds per acre to break even on yellow feed corn.

He noted that for white corn with 5,000 pound yield the farmer needs $8.08 per cwt. to break even.

Other testimony was heard on the importance of parity, the
