Farewell social held

A farewell social was well attended Wednesday evening honoring Reta Richards. She is moving to Harrah Le-flores Methodist Church at Pampa. She has been pastor of the Loraine United Methodist Church four years, serving the people of this area. The table in the fellowship hall was laid with lace, as punch and cookies were served to many of her friends. As guests registered, it was noted out of town people also attended. Group singing, led by George Martin, and quartet numbers by the Loraine Senior Citizens quartet, was enjoyed by everyone.

WHO IS THAT EXECUTIVE IN OVERALLS?

What is a farmer?

Farmers are found in fields — plowing up, seeding down, rotating from, planting to, fertilizing with, spraying for and harvesting if.

Wives help them, little boys follow them, city relatives visit them, salesmen detain them, meals wait for them, weather can delay them, but nothing can stop them.

A farmer is a paradox. He is an overalled executive with his office in his home. He is a scientist who uses fertilizer attachments, a purchasing agent in an old straw hat, a personnel director with grease under his fingernails, a dietician with a passion for fresh fruits and vegetables, a production expert faced with a surplus, and a manager battling a price-cost squeeze.

He manages more capital than most of the businessmen in town.

He likes sunshine, good food, county fairs, dinner at noon, auctions, his neighbors, his shirt collar unbuttoned and above all, an above-average annual rainfall.

He is not much for droughts, ditches, freeways, weeds, the eight-hour day, dusty roads, development, insects, diseases, freezing weather or helping around the house.

Nobody else gets so much satisfaction out of modern plumbing, good weather, automatic furnaces, electric blankets, and homemade ice cream. Nobody else has in his pockets at one time a three-bladed knife, a checkbook, a billfold, a pair of pliers, and a combination memo book and general farm guide.

A farmer is both Faith and Fatalist. He must have faith to meet the challenges of his capacities amid the ever-present possibility that an act of God (a late spring, an early frost, flood, drought) can bring his business to a sudden halt. You can reduce his acreage but you can't diminish his optimism.

Might as well put up with him. He is your friend, your competitor, your customer, your source of food and fiber. He is your countryman — a denim-dressed, business-wise statesman of stature. And when he comes in at noon having spent the energy of his hopes and dreams, he can be recharged with the magic words — "The market's up!"

Chemicals control caterpillars

Many homeowners in Mitchell County are being plagued by large hairy caterpillars known as woollybear caterpillars, said Mike Mauldin, county extension agent.

"The larvae are very hairy or woolly, and yellowish to brown in color and range up to two inches in length," said Mauldin. "They riddle the foliage of many gardens, ornamental, field and

pasture plants."

Small worms usually feed in groups on underside of leaves. Larger larvae feed voraciously and when full grown are often seen scurrying hurriedly over the surface of the ground. The adult is a white moth with black dots with wing span of 1 1/2 inches. Larvae often migrate from pastures into crops or urban areas when larvae are

large.

The woollybear caterpillar overwinters as pupa inside a silken cocoon. The eggs are laid in clusters, usually on the underside of leaves. Larvae feed and develop for 30-60 days, pupate in the soil under leaves or other debris and emerge as moths.

Chemicals for control include: -Lawns: Sevin, Diazinon, Dursban, Dyllox

-Gardens: Sevin, Diazinon, Dyllox

-Ornamentals: Sevin, Diazinon, Dursban, Dyllox, Orthene.

"Control of large larvae may be difficult," said Mauldin. "Large populations can be reduced by handpicking and destroying."

Users should check pesticide labels for specific plant recommendations.

The after-graduation party at the county ag barns was filled with games, food and prizes as well as a dance. Community organizations and individuals contributed time, money and other items to make the party a success, said organizers. When they're not working for us, these — and many more electric company employees — put in overtime as volunteers. They do it because they want to help. And because they care. And that's something we think deserves a little recognition. So, to everyone who gives a helping hand, we'd like to offer our words of thanks.

MAKE SURE YOU GET WHAT YOU PAY FOR

Shop-At-Home

Do you bring home everything you've paid for when you shop out of town? It's probably not as obvious as getting only nine eggs for the price of a dozen, but you don't get full value for the dollars spent.

Wherever you buy, part of the money goes to support the community in which you spend. Your money goes to support schools,

churches, civic projects and to pay people who work in that community.

When you buy anywhere else, your home community is a little poorer because you carried off part of its resources.

Put your eggs all in one basket.....with your hometown merchants.

Support your local businesses they support you!

Pirates beat Dodgers

The perennially strong Little League Pirates took sole possession of first place in the Freshman League standings Saturday with a 5-4 victory over the Dodgers.

Both clubs went into the contest with 3-0 records. Michael Humphrey pitched the entire six innings for the Pirates and third baseman Richard Gomez provided the winning run with a homerun in the bottom of the third inning.

The Pirates took a 1-0 lead on M. Humphrey's score in the second inning that also included hits by catcher Timmy Humphrey and second baseman Pete Rivera.

Heath Mann, who took the loss as pitcher, singled for the Dodgers in the top of the third inning

and reached home on an error to tie the game at 1-1. The Pirates Sabastian Santana led off the bottom of the third with a single and was joined on base by center fielder Aston Weatherly who took a base on balls.

Gomez followed Weatherly with his homerun to make it 4-1. Second baseman Scott Payne's score for the Dodgers in the fourth made it 4-2. The Dodgers pulled within one at 4-3 in the fifth with third baseman Shane Jones' score. Jones was batted in on a Mann triple.

The Pirates got a run from first baseman Jarrod Goff in the fifth for a 5-3 lead. Humphrey also singled in the inning. Dodgers catcher Doug Conner ended the scoring with a run in the top of the sixth that also included a

single by first baseman Brian Ritchey.

Humphrey struck out only three Dodgers in the win but his Pirates teammates committed only three errors. Mann struck out nine in a losing effort.

The win left the Pirates with a first place record of 4-0 while the loss was the first for the Dodgers for a second place 3-1 mark. In third place are the Yankees at 2-2 after their 7-2 win over the Rangers Saturday.

James Lopez pitched for the Yankees while Joey Arispe and Cody Barker combined for the loss. The Rangers averted a shut-out with two scores in their last bat.

The Yankees opened the scoring with four in the second by Seneca Lee, Eric, Jaime Rivera and Adrian Martinez. Scores by third baseman Justin Zamaripa and Lopez made the score 6-0 for the Yankees. Scott Lamb and Arispe got the two runs for the Rangers in the top of the sixth.

In fourth place in the Freshman League standings are the Indians at 2-3. The Indians dropped an 11-6 contest to the Astros

Saturday but came back to beat the Rangers 10-6 Monday night.

Zach Findley started on the mound in the Astros win over the Indians Saturday but didn't get the decision. Findley pitched three innings and left the mound trailing 6-4. Greg Conaway picked up the win in relief of Findley. Conaway himself was relieved by Ryan Galey.

The Astros scored four in the bottom of the third to erase the 6-4 Indians lead then added three in the fifth. Nikko Biggers scored three times for the Astros while Daniel Silva and Dwayne Riggs added two runs.

The Indians scored six runs in the first inning against the Rangers Monday night to give starter Frank Brisenno a cushion. Brisenno got a homerun in the inning.

Jeff Haggerton hit a homerun for the Indians in the top of the sixth to help increase the lead to 10-3. Rangers third baseman Mike Dossey had homered in the first inning and repeated the feat in the bottom of the sixth to drive in five of the six Rangers runs.

Marketing loan program offers trade leverage

By Lloyd Bentsen
United States Senator

We've had a drought of good news for Texas agriculture over the past several years, but we are beginning to see a few hopeful signs for our state's farm economy.

Texas farmers, already the world leaders in cotton production, saw their exports more than triple in 1986. Meanwhile, a number of foreign competitors decided to cut their cotton acreage.

We have seen similar success stories in rice production, and the reason behind both is simple. It's called the marketing loan program—a tool for our farmers and leverage for our trade negotiators.

This program prevents international competitors from undercutting American producers' prices. It lets us tell the rest of the world, in effect, "No more free rides. We're going to compete."

We must help producers of all major commodities and our American trade negotiators as they fight unfair practices. That is why I have joined in sponsoring legislation to establish marketing loan programs for feed grains, soybeans and wheat—un-

less we have secured an agricultural trade agreement which would accomplish the same goal.

Under old farm programs, unfair subsidies by other nations chased our products out of many markets. Our competitors would price their products just below ours, then sell their entire crop. Much of ours went unsold and into storage, and we accumulated huge surpluses of farm products.

The marketing loan program can change things, as the cotton and rice programs have shown. It allows the farmers' loan payments to drop enough that they can lower their prices and export their crops competitively.

But this is no giveaway program. Rather, it is a sound business deal which lowers the government's costs and benefits our economy.

For rice, the government costs dropped from more than \$300 million in 1986 to about \$200 million in 1987 and should decline to about \$50 million in 1989 and 1990.

Meanwhile, there are more jobs on farms, in milling and in other related industries. As a result of the rice marketing loan program, the Texas economy

will see \$248 million of economic activity, \$31 million of additional tax receipts and 3,150 more jobs over the next five years.

America's share of world rice trade is projected to expand to its 1970s level—23 percent (9.3 million metric tons)—by 1990-91. That's a 60 percent increase from the level before marketing loans were begun.

However, an agricultural trade agreement could achieve the same goals—price protection for our farmers while saving taxpayers' money.

A major round of trade negotiations began last fall, with the U.S. seeking to cut back agricultural subsidies and trade barriers. Unfortunately, the negotiators on the other side of the table have the upper hand and are in no hurry to deal.

But they respect the power of our marketing loans, and the possibility that we will expand these loans to feed grains, soybeans and wheat should be a powerful bargaining tool.
