TRACKSTER'S DREAM FELLED BY FALL

By Reta Heck
The hopes of any dedicated runner can be diminished at the slightest mistake, such as the case with Juan Valadez. Juan has worked hard in track this season, doing an exceptional job in the events he has undertaken.
At the district track meet Juan qualified for the finals by coming in 2nd in the preliminaries, even though he had run the 330 yd. intermediate hurdles in only one previous track meet. During the finals Valadez was doing well in the race, coming closer to the dream of qualify-

ing for regional, when he had the misfortune of falling. Juan continued the race and managed to place 6th.
Though faced with disappointment, Juan can pride himself on his efforts to reach a goal through individual determination and hard work.

Time is rapidly passing and school will be out soon. I know this is a busy time for us all. I'd like for you to sit down a minute and relax while you read this month's newsletter. Thank you to all of you who let me know what you think about this letter. I'm always open for ideas and suggestions to improve this to meet your needs better.

Here are several reminders. The Home Demonstration Council is sponsoring a community birthday calendar which will go from July 1, 1973 to June 30, 1974. For \$2.50 you can get your family's birthdays and anniversary listed and get your calendar. The 1973-74 school holidays and teacher workday schedule will be on this calendar as well as dates for many organizations meetings. If you need a calendar call Nell Ingram at 647-4488 or call my office at 647-3455.

I'll have my Easter holidays on April 23rd and 24th. I hope all of you will enjoy your children during their week out of school.

April 26th will be the clothing leader training for 4-H leaders. ANYONE interested in helping teach clothing is urged to attend. Anyone interested is invited to attend this clothing training.

During this time of year we become aware of the many colors around us. All of us are interested in the psychology of color. Max Luscher, a Swiss psychologist, has developed a color test that reveals a great deal about our personality. The person who favors red is usually impulsive, with a vitality for living, winning and achieving results. The person who favors blue is a traditionalist and needs a calm, orderly environment, while the one who chooses violet, a mixture of red and blue, brings qualities of both colors - gentleness and impulsiveness - to his personality. He is usually an idealist who does not always view life in a mature way. (In tests Dr. Luscher found that violet was

the first choice of many pre-adolescent children.)

A preference for green indicates a persevering, stubborn and opinionated side to the personality. These people tend to be moralists and reformers intent upon striving for better conditions. Yellow indicates the bright, cheerful disposition of the optimist. People who are overly concerned with health and physical comfort generally hold brown as their color preference. Black, or the absence of color, indicates the same meaning in personality - the negation or rejection of everything - while a preference for gray indicates a tendency toward noninvolvement.

Remember also that color excites, depresses, soothes us or motivates us for action. Colors that we wear and have in our homes (or your own room) are an expression of our personality. How do you rate? I think all of us have a little bit of all the traits even though the one of our favorite color may dominate.

ABILENE, KANS., REFLECTOR-CHRONICLE: "Mobile home owners are getting hit with taxes. The assessments vary with the states. Oregon taxes an owner if his home is over a certain length and width, while Arizona charges a tax rate based on the mobile home's assessed value, plus the local school tax rate. Other states are taking fresh looks at their methods. It all adds up that they're apparently going to have to stay mobile to keep ahead of the tax man."

CHILDREN'S NIGHTIES

When constructing children's pajamas, robes or gowns, use flame-retardant fabrics--as indicated by special information on the bolt end, says Marilyn Brown, consumer education-clothing specialist, Texas Agricultural Extension Service, Texas A&M University.

Good plumbing can make it perfectly clear.

Plumbing and piping people are trained to get you water when you want it, where you want it and in the volume and pressure you want. We also get rid of your waste water. And most important, we make certain that this contaminated water doesn't get mixed up with your fresh water supply. The next time you turn your faucet tap for a cool, drink of water, you might remember that we helped make it perfectly clear.

Enhance the beauty, privacy and value of your home by adding a patio this spring, suggests a landscape horticulturist for the Texas Agricultural Extension Service. Involve the entire family in the project. Make the structure at least 8 to 10 feet wide with a firm surface gently sloping away from the house. Add privacy with a fence, vines or plants.
