Fly-In Draws Airport Crowd

The annual Fourth of July Fly-In experienced threatening rain clouds Sunday morning which kept some fly-ins away and also hindered others who did fly in to city-county airport but there were 21 planes flying in for the event.

A group of Abilene sky divers were unable to attend, phoning from Sweetwater that they were unable to fly further. Other fly-ins also phoned, said Chamber of Commerce executive vice president Sefton Pickens.

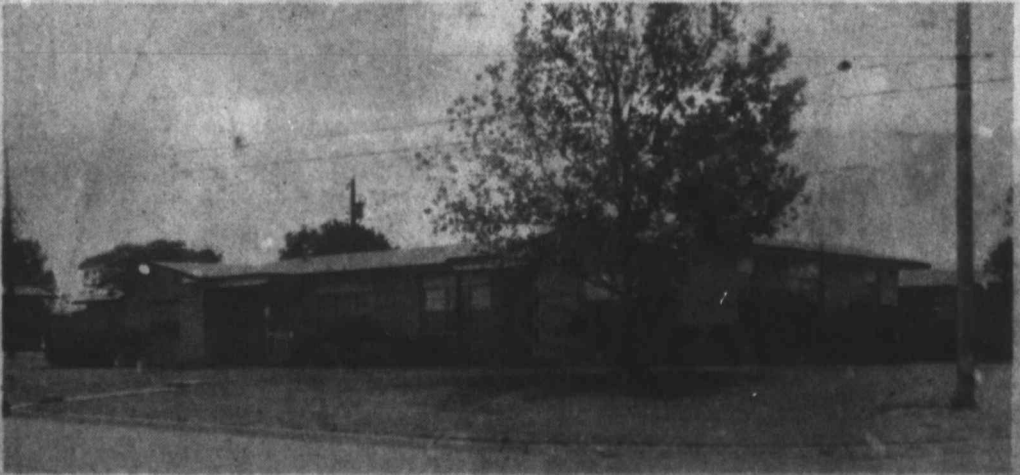

The Fly-In had the biggest crowd of riders for plane trips over the city and two lakes as the rides began shortly after the breakfast serving began and continued until 3:30 to 4 p.m. Sunday afternoon.

Motorcyclist Injured

Carlos Polanco Rios, 30, of P. O. Box 327, Colorado City, was injured when the motorcycle he was riding was hit by a gust of wind which threw him off the road.

The accident occurred at 7 a.m. Friday four miles west of the city on the eastbound lane of I-20 as he was coming in to work followed by his wife in the family car.

Investigating officer Jimmy Granato of the Texas Department of Public Safety said that the only cause for the accident that he could determine was from a gust of wind. Rios suffered a broken arm and facial abrasions.

SET FOR MODERNIZATION, the Colorado City Housing Authority's older units, 20 on College Avenue in the southern part of the city, and 80 units near the hospital will soon get a renovation of the exteriors which will include updating porches and overhangs, sidewalks, and replacing some ranges and refrigerators. Cost of the project will be \$108,000, approved last week by the Department of Housing and Urban Development.

FLY-IN at city-county airport this Fourth of July experienced a cloud cover which kept some pilots from flying in but there were 21 fly-ins and a large crowd on hand to see the planes arrive and depart, see stunts and eat breakfast prepared by Chamber of Commerce volunteers.

Mothers Battle Tonight

Tonight (Thursday) at 8 o'clock, the battle between the Daring Dollies and Bruising Beauties gets underway at Little League Field, the annual contest of Farm League and Little League mothers staged to raise money for the leagues. Practice sessions have been held by both lineups and coaches of the teams say it will be one of the epic baseball games in the city's history.

Coaching the Dollies will be Larry Blasingame, Steve Smith and Raymond Rich. The Beauties will be coached by Johnny Freelen, Cleve Moore and Leon Light.

Mothers are also asked to bring cakes to be auctioned off, some before the game starts and some at the end of each inning. Carol Dakan, one of the organizers of the game, said that if some of the mothers could bake cakes then the money raising project would be even more successful.

"If we could get even 10 or more cakes to auction, then the Farm League and Little League would get the money from the auction," she said.

Dads will be working the concession stand for the game and donations from the crowd will be taken to raise money for the leagues.

Reception Today

U. S. Senator Lloyd Bentsen has scheduled a few days to visit in West Texas including Colorado City on his agenda for Thursday.

He will be honored with a reception starting at 2 p.m. Thursday (today) in the Charles C. Thompson meeting room of City National Bank annex.

County Democratic Chairman Tom L. Rees and Raymond Fuller will be the hosts for the reception. The public is invited.

Following the reception, the Senator will meet with members of the local press and go on a hand-shaking tour of the downtown area.

Bank Reports Reflect Economy

Deposit and loan figures at both City National Bank and First State Bank in Loraine continue to reflect the county's economy as the last call date figures, June 30, show that City National's deposits have grown by more than \$150,000 since the last quarter's report and almost \$2 million over the same period last year.

At the Loraine bank, while deposits have fallen slightly, loans have increased by a small amount and the call date figures continue to show a growing financial institution.

At City National Bank, deposits were \$18,819,409.34 on June 30 while loans were \$8,560,662.30.

First State Bank recorded deposits of \$3,496,818.86 on June 30 and loans were \$1,648,916.55.

For the same period last year, City National recorded deposits of \$16,753,684.36 and loans at \$7,271,096.04.

Six Days To ASCS Deadline

Mitchell County cotton producers have only six days left to certify their cotton acreage at the Agriculture Stabilization and Conservation Service office in the G-Kell Building.

Deadline for certification is July 15, next Thursday, reminds ASCS executive director Don Stewart.

"About half the county, at least 250 farmers, need to certify their cotton acreage to be eligible for program benefits," Stewart said, "including disaster payments and yield adjustments."

The rains which fell in the county over the weekend ranged from good to scanty, most northern parts of the county getting enough rainfall from west to east but the southeastern part of the county is still dry and looking for a good rain.

The Rain Gauge shows the following for the four-day period from Friday to Monday:

Loraine	2
Westbrook	2.8
Buford	1.6
China Grove	3.5
Cuthbert	1.1
Fairview	1.5
Lake Champion	9
Lake Colorado City	1.3

Lakes At Low Level

Lake Colorado City's watershed on Morgan and Cherry Creeks received heavy rainfall Saturday and Sunday but the lake level rose only three-fourths of an inch from a low mark of 2062.0 last Thursday to a high mark of 2062.75 Monday.

The lake's elevation when full is 2070.

Lake Champion's elevation was measured at 2055.25 Tuesday, capacity level considered to be 2083.

Rainfall at Morgan Creek Power Plant measured only .6 for the Friday-Monday period.

City Councilman J. Lee Jones Jr. phoned the police dispatcher at 2:53 p.m. July 4, informing the police department and water department superintendent Buzz Rich that an oil spill on Morgan Creek was headed toward the city's water supply, Lake Colorado City, and requesting that Rich lower the filter apparatus at the city filter plant to keep the oil out of the city water supply.

Councilman J. O. Dockrey flew Rich over the oil spill and also Sheriff Bill McGuire reported that the spill had reached the bridge at Westbrook at 3:09 p.m. and the spill was not completely across the creek and that "it doesn't look like much."

Deposits recorded the first quarter, March 31, 1976 were \$18,663,329.71 and loans were \$7,949,855.45.

For the Loraine bank, last year's report recorded deposits of \$2,734,080 and loans of \$1,917,463. The first

quarter report, March 31, 1976, recorded deposits of \$3,791,288.95 and loans of \$1,539,360.14.

JUBILEE-The July 3 Bicentennial Jubilee at Wallace planned by the Senior Citizens was a crowd pleasing event as many visitors attended the exhibits, demonstrations and other activities during the day. Top photo was taken at the Country Store, a project planned by Mina and Phillip Berman, right. The Looney Home Demonstration Club served food during the day, part of the group pictured in their Bicentennial dress in the bottom photo.

Firecracker Complaints

The police department was busy over the four-day Fourth of July weekend investigating numerous complaints from city residents concerning setting off fireworks in the city limits.

There were 14 complaints from citizens recorded on the log and Colorado City Police Chief Jesse Browning said that about twice that number came in that were unrecorded because of other calls coming in at the same time.

Two persons were arrested and charged with disorderly conduct during the holiday weekend.

Douglas Ward Stephens, 23, of 533 E. 9th, arrested at 604 E. 16th 10:49 p.m. July 2, charged with disorderly conduct. Arresting officers were Assistant Chief L. C. Devore and Patrolman Mark Kirkpatrick.

Tommy Glenn Wilson, 23, of 407 Cedar, arrested at 3:42 a.m. July 6 at 750 E. 5th by Devore and Kirkpatrick, charged with disorderly conduct and resisting arrest.

City during the four-day holiday weekend, citing three offenses of not carrying enough life jackets and one for fishing without a license.

Aston said that some juveniles cut the cables and stole two buoys from the Morgan Creek restricted area but by working with the father of one of the boys, he recovered the two buoys, valued at about \$162 each, about noon the next day.

The buoys were first reported missing by a lake resident who said that a boat came in from the north, stole the buoys, then returned heading toward the north. This was reported to the police dispatcher about 10:30 Saturday night.

Aston said he recovered the buoys about noon Sunday and will get them re-installed when he can get some additional weights and cable, maybe by the end of the week, he said.

During the afternoon Sun-

Game Set Saturday

The Farm League All-Star game will start at 8 p.m. Saturday in Little League Field, preceded at 6 p.m. by a practice game between the Little League A and B team All-Stars.

day and Monday, there were a number of complaints from lake residents about skiing in the Morgan Creek area and Aston said he couldn't do anything about it since the buoys were stolen.

Final Three Performances

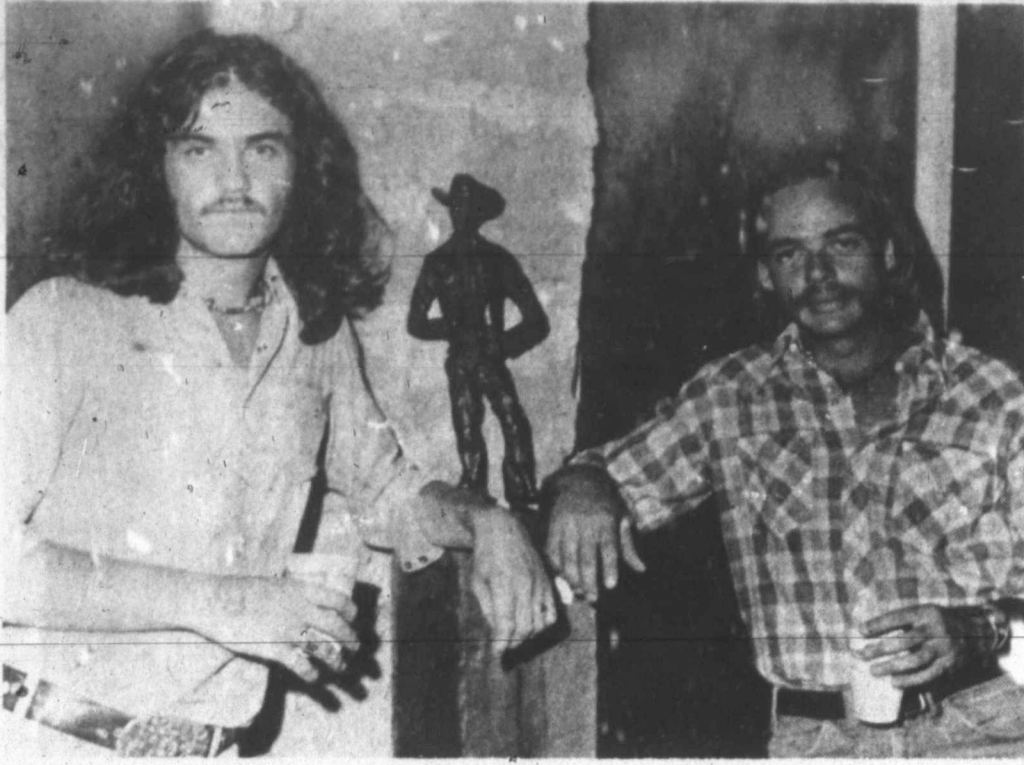

The final three days for the Playhouse melodrama, *Dirty Work at the Crossroads*, starts tonight (Thursday) and continues through Saturday night's final performance.

Tickets may be reserved at the Opera House box office, phone 728-3491. Tickets are \$2 each.

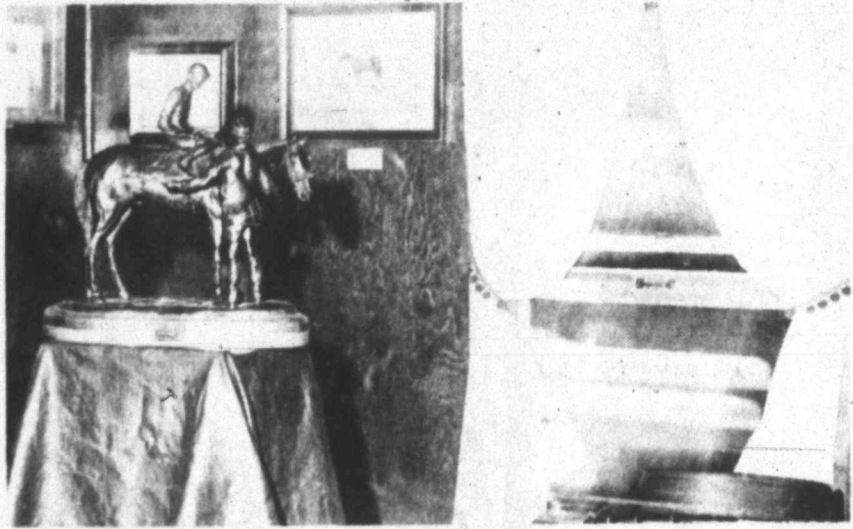

The cast, directed by Porter Richardson, features Glenn Polk as the villain, Susanne Morgan as Nellie, Mark Reynolds as Adam Oakhart, Trina Taylor as Ida Rhinegold, Twila Polk as Leonie Asterbilt, Joe Vincent as Mookie Magugins, Montie Foster in a dual role as the Widow Lovelace and Mrs. Asterbilt and Midge Ledbetter in a dual role as the French maid Fleurette and Little Nell.

The curtain rises at 8 p.m. at Colorado Opera House.

POSING ON either side of one of the sculptures in the screened-in porch are two of the guests, a little waterlogged but enjoying the exhibit and the "Evening At The Ranch."

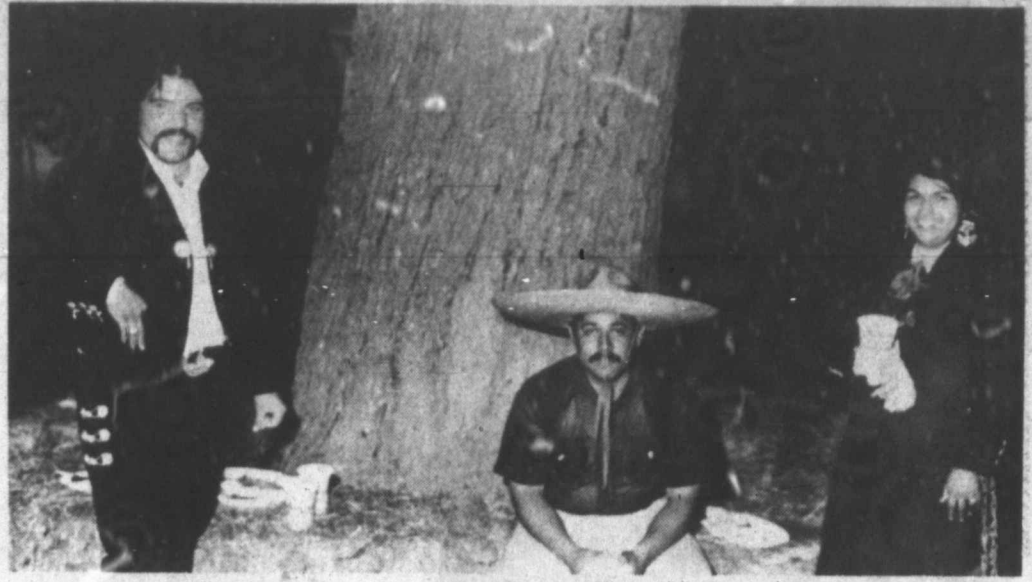

THE OLD BUNKHOUSE was the rustic setting for the Spade Art Exhibit. All types of art work and sculpture was displayed in the main hall and in the two rooms at each end. Sale of art plus ticket sales netted several thousand dollars which will benefit the Ranch Headquarters Association, Texas Tech University.

TWO OF THE Ranch's five hundred and fifty guests paused to talk over a cowboy sculpture in one of the display rooms of the bunkhouse. The interest was mirrored by the other guests as they toured the gallery. Frank Bassham also exhibited some of his paintings in the old barn near the bunkhouse and created an unusual scene with displays in each of the nooks and crannies and hung from the weathered walls.

Spade-Renderbrook Invitational Art Show

THE RAIN which fell midway through the Spade-Renderbrook Invitational Art Show didn't deter these three members of The Charros from finishing their barbeque dinner beneath a huge tree. The Charros, a singing and performing group from Mexico, highlighted the "Evening At The Ranch" with colorful and South of the Border entertainment.

THE ODESSA Chuckwagon Gang catered the barbeque dinner at the ranch with a menu of barbeque beef, hot links, potato salad, red beans, cole slaw and iced tea. The gang continued serving and didn't seem to mind the rain until their truck got stuck while leaving.

LAKE FISHING REPORT

LAKE COLORADO CITY COOPER'S COVE - Reports of pan-size crappie, channel cat and bass have been made but weather has caused the fishing to drop over the 4th of July weekend. Perch are the only thing in abundance.

STATE PARK - Weekend fishermen caught lots of small fish off of the floating dock and pier. Crappie, black and white bass and catfish were all biting.

LAKEVIEW CAMP - Channel catfish up to a pound have been hooked but crappie have been elusive. Pan-size bass and channel catfish have been reported.

LOUIE'S LAKESIDE LODGE - Carp fishing seems to be the best now as most other fishing has slackened off quite a bit. Pan-size black bass, and channel cat have been caught and carp up to 5 lbs.

LAKE CHAMPION FISHER PARK - Jerry Watts of Odessa caught 11 black bass at 3 1/2 lbs. each and Jack Wallace of Big Spring caught 10 channel cat 1-2 1/2 lbs. each, six crappie at 2 lbs. each and 2 black bass at 2 1/2 lbs. each.

James Lanier of Snyder caught a 4 1/2 lb. black bass and H. A. North of Stanton caught 42 pan-size catfish and a 14 lbs. yellow cat on his trotline using goldfish for bait.

BRUCE BYRNE of Colorado City could be accused of aiding and abetting this gang of train robbers if it weren't for the fact that the "robbery" was a part of the Roscoe Bicentennial Celebration this past weekend. The men, who actually work together at H&H Feedlot in Roscoe taking care of cattle, are from left: (standing) Kenneth Reed, Larry Cornoyer, Johnny Jay and Doug Richards and (on horseback) Byron Byrne III, Barney Barnett, Zenoaldo Sanchez and Marcus Box. Bruce Byrne supplied some of the horses and guns for the raid.

Letters to the Editor

Dear Sir:

I just wanted to let the good Christians in this fine so-called up-right city (and I use the term loosely) voted to keep it dry, supposedly because of the disturbance and problems it would cause.

Well, they sure don't mind putting a ball park that operates between 7 and 11:30 most nights within 125 ft. of someone else's bedroom, plus blocking their front drive and main driveway.

At least most drunks don't honk their horns half the night and yell through a P.A. system.

CRIME SERIES

By Sidney Lyle

Would you put up a sign in your front yard that read "Burglars Welcome?" You may not realize it, but most people do advertise their absence from home one way or another. Obviously they don't plant a sign in their front yard welcoming the thief, but what they do leave behind is almost as inviting. Have you ever noticed what happens when a family goes on vacation, or out-of-town for the weekend? Suddenly, their house looks like the family has gone on vacation, or is out of town for the weekend. It doesn't have to look that way, but it usually does. Their garage is always left open except when out of town. "Burglars Welcome?" Certainly not, but when we leave the invitation to crime in the wide open spaces, we are asking for trouble. The fact is, most burglars live within a few blocks of his intended victim. Therefore, he has an excellent opportunity to observe who is away and who isn't.

But how can we decrease criminal opportunity? By having a trusted neighbor check our home each day, changing the positions of curtains, and rearranging the interior lighting. In short, making our homes look lived in. We should begin closing the garage at all times so when we are away, with the garage closed, the appearance would be normal. With the use of an inexpensive timer (usually less than ten dollars) we can have our lights turned on and off at predetermined times.

The radio or television can also be worked off the timer, and the neighborhood thief won't risk entering your home, if he has reasons to believe someone is present. All of these steps are important in reducing the likelihood of a crime occurring. However, it is folly if we depend too heavily on any one precaution.

What is required is a coordination of various efforts working together to increase physical and procedural security. First of all, we should have all of our valuable property marked for proper identification. To do this, any sharp pointed object that can scratch metal will do. However, an electric etching tool is ideal and can be purchased from any variety or hardware store, or borrowed from most law enforcement agencies. Once you have inscribed your driver's license number as a permanent identification mark, the next step is to let the potential thief know your valuables are inscribed by placing a small sticker on the front and back doors advising that all valuable are marked. After all, no self-respecting fence will purchase from a thief, property that is marked, or property that has had the mark filed off. The stickers can also be obtained from variety or hardware stores.

Identifying your property with a driver's license number discourages most thieves, but others will still take the chance of being caught with marked property, if we make it easy for them to enter our homes. Therefore, properly installed locks become the next major barrier against crime. Most home owners are unaware that their "security" locks offer no more security than a bathroom lock. In fact you can make a quick check of your household locks by first looking at the spring latch on the front door. You should be able to depress the latch back into the housing just as it does when you close the door. Now examine the spring latch on your bathroom door. If the latches look the same, you're in trouble. You know already how insecure the bathroom lock is.

All exterior doors should incorporate a spring latch with a small (usually half circle) metal plunger on the trailing edge of the latch. This deadbolt plunger re-

mains depressed while the door is closed, and thereby keeps the latch from being jimmied open. If your exterior door locks do not have this small security device as part of the lock, see your local hardware store, or lumber company for a replacement lock. If you do not want to change out the entire lock, you may consider replacing your present latch bar with one that has the deadbolt plunger. The cost of the latch bar is usually under a dollar, and can be installed in less than three minutes with a screwdriver.

But even then, a few thieves will try to force the door open, if they can do so without arousing suspicion. In this respect good observation is very important. A daytime thief appreciates a lot of shrubbery that is tall enough to hide behind, and

nighttime thieves appreciate the home owner turning off outside lights.

The moral of the story is, if you mark your valuable property for positive identification, lock your home with a lock that "locks," and light your property at night, you will be doing your part in reducing criminal opportunity.

Martha Class Has Salad Supper

The social committee of the Martha Bible Class of Oak St. Baptist Church hosted their June meeting with a salad supper last Thursday evening at the church.

A brief business session followed. Group leaders were up-dated with names for visitation. Mrs. Vivian Harris gave the treasurer's report.

"How can I control my air conditioning costs this summer?"

UNDERSTANDING YOUR ELECTRIC BILL

Here's a checklist of things you can do to keep your cooling costs down when the temperature is up.

- ☐ Have your air conditioning unit checked to be sure it's operating at top efficiency.
- ☐ Try a thermostat setting in the upper seventies.
- ☐ Keep filters clean. Check them every month.
- ☐ Keep air vents clear so air can flow freely.
- ☐ Close fireplace dampers.
- ☐ Keep direct sunlight out with awnings, draperies, blinds or shades.
- ☐ Keep doors and windows closed. Try to limit traffic in and out.
- ☐ Vent clothes dryers to the outside.
- ☐ Use kitchen and bathroom exhaust fan only to remove excess heat and moisture.
- ☐ Schedule cooking, washing and ironing for the cooler times of day to avoid adding excess heat to your home.
- ☐ Raise your thermostat at least five degrees if you're going to be away for several hours.
- ☐ Turn off air conditioning unit when on vacation unless there are items that might be damaged from heat.
- ☐ Attics should be well ventilated to prevent excess heat buildup.
- ☐ Make sure your insulation is at least up to the latest FHA standards.
- ☐ Weatherstrip or caulk around all doors and windows.
- ☐ Keep shrubbery trimmed back from outside units to allow good air flow.
- ☐ Consider cooking outdoors more this summer.
- ☐ Consider storm doors and windows. Think of them as insulation.
- ☐ Remember that a window unit is designed to cool only one room. Turn it off if that room is not being used.
- ☐ If buying new air conditioning, get the unit with the highest energy efficiency ratio (EER) — at least seven or better.
- ☐ For a free copy of our newest booklet on how to save electricity, give us a call. Or request one on the comment portion of your bill.

Engineer Reports On Street Project

EDITOR'S NOTE: The following article about the city street program was prepared by A. W. Harrison, Engineer in charge of the project. It is printed here to inform city residents about the progress of the street project and what to expect in the next few weeks.)

A short time ago, you, the people of Colorado City, voted a sizeable bond issue to repair your City streets, which as you all know are badly in need of repair.

Since the bond issue was passed, your City Council advertised for bids on some of the proposed work, the bids were opened on the evening of June 8, 1976. Seven bids were presented to the City Council, and of the seven the low bid was from Price Construction, Inc., Big Spring, Texas, for approximately \$254,803.00. They were awarded the contract for the work.

We are sure that most of you are aware that work has already begun in the business district and adjacent area.

We are aware that from time to time most of you will be inconvenienced to some degree because of the work; there is no way to avoid such inconvenience but we assure you that the City and Contractor will try to hold it to a minimum.

We believe that you will be interested in knowing what type of improvement is planned for the streets, especially the streets that affect your business or your home or property.

The City has a plat of the entire City showing in colors the type of proposed work on the streets. You are invited to come look at it and any questions you may have will be answered.

Many of you may not be familiar with the various types of pavement or surfacing used in this kind of work and so we will attempt to briefly describe them as follows:

1. **HOT MIX OVERLAY** is a blend of asphaltic material, sand and gravel in certain proportions and heated in an asphalt plant to several hundred degrees and hauled to the site of the work and deposited in a self-propelled machine which spreads the material to a prescribed thickness over the street. The material is then rolled with a two wheel flat roller and with pneumatic rollers for the final rolling. After the material is completely cold it is ready for traffic.

2. **TWO COURSE SURFACE TREATMENT** is as the name implies. After the base caliche or gravel is processed, shaped and compacted and ready for pavement, a prime coat of light asphalt is applied to the street. This prime coat for pavement is analogous to a prime coat of paint applied on new lumber before the regular paint is applied. After the prime coat has cured from forty-eight to seventy two hours, a coat of heavier asphalt is applied at a prescribed rate per square yard. The surface is then covered with coarse gravel and rolled lightly. A second application of asphalt is then applied and is then covered with a smaller gravel and rolled. After the second application of asphalt and rock and rolling the street is then opened for traffic.

It should be understood that during the application of the prime coat that no traffic will be allowed on the street and that for a period of several hours after application the prime coat is messy, to say the least, and very hard to remove from cars if they run on it before it is absorbed in the base.

When the Two Course

Surface Treatment is being applied, no traffic will be allowed on the street until it is completed. This is for two important reasons: (1) car tracks cannot be removed and cause a lasting damage to the pavement; (2) this asphalt is much harder to remove from a car than the prime coat asphalt.

3. **SEAL COAT** is an application of asphalt and rock on existing pavement and is applied exactly as the second course of asphalt and rock in the Two Course Surface Treatment. Seal Coat is primarily a maintenance type pavement and adds some years to the life of an existing pavement when applied at the proper time.

The Two Course Surface Treatment and Seal Coat are both called Penetration Type Pavements and require warm weather and traffic in order to cure properly.

Immediately upon completion, a Two Course Surface Treatment or Seal Coat application leaves the street surface the color of the rock which has been used. A few days after the street is opened for traffic, dark spots and streaks will appear on the surface and traffic will have kicked a small amount of the excess top rock toward the gutter lines. This is normal and in no way is the pavement damaged.

As time passes and the streets are traveled the surface will get blacker and look rough when compared to the smoother and more expensive Hot Mix Overlay. Eventually the street surface will all get black. By the end of summer it will nearly all be black except the sides near the curbs which will probably take until next summer to look about the same as the heavily traveled part of the street.

The Seal Coat is costing the City approximately 29c per square yard, the Two Course Surface Treatment costs approximately 62c per

square yard while the Hot Mix Overlay costs approximately \$2.20 per square yard.

With patience and understanding from you people for the next few weeks we will be able to finish your streets and your City will present a nice appearance.

Softball Scores

Four games have been played in the women's church softball league during the past week and a half.

Colorado City Catholic team lost to Loraine Baptist 10-9 June 28 but won over Calvary Baptist 14-4 with the help of a home run by Loretta Jackson July 6.

June 29, Loraine Catholic A team won over the Methodist team 8-2 and on July 1 Connie Rodriguez hit a home run to help the Loraine Catholic B team win over Calvary 11-5.

Extension Planned

James A. Dyson of Lubbock intends to drill No. 1 Gray as a three-fourths mile northwest extension to the two-well Hurlbut (Sunflower Sand) Field in Mitchell County.

Location is staked 822 feet from the south and 540 feet from the west lines of Section 11, Block 13, J&TC Survey. Scheduled depth is 150 feet.

Fitness Topic For Noon Lions

Pete Nevin, vice president for Physical Fitness Institute Inc., midwest region, will be guest speaker for the Friday meeting of Noon Lions in the Civic Center.

Nevin's topic will be "How to Remain in Business and Stay Alive."

PFI is headquartered in Peoria, Ill. and was organized in 1972 by its director, Perot Nevin, Jr., a California educator and life-long physical fitness advocate.

The Institute's goal is to attack the source of a major contributing factor to many of the health problems afflicting modern society—the lack of physical fitness in the average individual or family.

PFI has worked up programs for schools, fire and police organizations, military units, physical rehabilitation, business and industry through an affiliate, Executive Fitness of America Inc.

The organization also works with those whose vocation requires them to be physically fit, such as for the Minnesota Vikings, Oakland Raiders, Philadelphia Flyers, Golden State Warriors, plus several national amateur teams and individual athletes in various sports.

Data collected to date has shown that muscle fiber responds much more quickly to conditioning by "Total Isokinetics" than by any other method. It offers total fitness in five major fitness areas—cardiovascular, strength, coordination, flexibility and endurance.
