

On The BEAM

By J. W. King, Sr.

The news of the dismissal of General Douglas McArthur came as a surprise and shock to most people. A lot of folks have been rather indignant about the matter. Just about everybody, it seems, is upholding the General and bemoaning President Truman for his action.

Regardless of who was right or wrong the General was guilty of insubordination to his commander-in-chief which justified his dismissal.

The big stir in Congress over the incident smacks of petty politics. But the Republicans were in need of some issue on which to launch their campaign in 1952. We hope the plot backfires.

Loraine Wins From Ira In Baseball

The Loraine high school team defeated Ira 11 to 10 in a baseball game played at Loraine last Friday.

Loraine jumped into an early lead with a run in the first, two runs in the second, two in the fourth, and one each in the fifth and sixth.

Bobby Price held Ira hitless and scoreless until the top of the sixth inning when two errors and a hit gave Ira two runs. In the seventh Ira got to Price for 4 hits and 5 runs to tie the ball game. Loraine failed to break the tie in the seventh. In the 8th Ira went into a three run lead, but Ira's pitcher walked the first two Loraine men to face him in the bottom half of the eighth then gave up four hits to put Loraine ahead.

Price and Blair led Loraine at bat with 3 hits in five trips to the plate. Price struck out 13 batters.

Fifteen Years Ago In Loraine

(Taken from files of the Mitchell County News April 16, 1936)

The long looked for rain fell in this territory early Wednesday night, amounting to about an inch in most sections.

Funeral services for Mrs. H. C. Taylor were held in Roscoe. In introducing the seniors,

Charles Reeder was introduced as the tall, dark and handsome of the class, Dorris Narrell as the frivolous type with a heart of gold, and Juanece Hart as the clown of the class.

SCANNING THE WEEK'S NEWS of Main Street and the World

Truman Says He Knows 1952 Plans; Research Group Urges Higher Taxes

Moral Indictment IN ONE OF the most savage indictments of the moral standards of the American people on record, Sen. William Fulbright, of Arkansas, proposes to set up a commission of eminent citizens to re-evaluate our moral standards and strengthen the "faith of all decent men in our democratic society."

CONFIDENT HARRY—Harry S. Truman, appearing "fat and sassy", as the home town folks would put it, was back in Washington after his three-week vacation in Florida for a round of activities which included greeting President Vincent Auriol of France, and a speech before Latin-American foreign ministers, meeting in Washington to discuss topics concerning western hemisphere peace and security.

Confident Harry He'll tell all in due time.

The statement also caused considerable speculation among professional politicians throughout the country, with the majority believing he won't run again. Remembering that Truman is no amateur politician himself, average Main Street voters were about equally divided in their speculation.

CONSUMER SPENDING—If the Committee for Economic Development, a businessmen's private research group, had its way the people of the home towns of the nation would face a \$10 billion tax increase next year.

According to the C.E.D. the small town income group must pay because "it is these incomes that provide the largest part of consumption expenditures."

TWO YEARS OF DRIVE—Charles E. Wilson, top man of the administration's mobilization effort, in his first report said with two more years of drive and unity, the U. S. should be strong enough to give "reasonable safety against aggression" and a high-level civilian economy at the same time.

For the average American in the home towns of the nation, Wilson listed these necessary efforts: (1) Virtually every qualified young man, upon reaching a certain age, will have to serve in the armed forces; (2) everyone will have to pay more taxes; (3) people will have to wait for some of the things they want to buy—new housing and automobiles; (4) there will be dislocations in the economy and some production cutbacks and unemployment; (5) the technological and social progress of the nation will be slowed down.

Inflation must be stopped and the economy controlled. In this category is farming, on which the Main Street of America directly or indirectly depends. He said careful attention must be given to changing the farm-price provisions of the Defense Production Act "in such a way as to accomplish a greater degree of stability in food prices and at the same time treat farmers equitably in relation to the other elements of the economy."

As for present price controls, he said: "There is no doubt that, if price controls had not been put on, prices would have risen much farther and faster, since January than they actually have."

BRANNAN'S PLAN—The people of the great midwest-farm belt were pondering the abrupt shake-up in the department of agriculture by Secretary Brannan. The speculation began when Brannan suddenly announced the replacement of Ralph S. Trigg and Frank K. Woolley in the powerful production and marketing administration.

NEW SYSTEM—On April 30 grocery items comprising more than 80 per cent of the \$32 billion spent annually for food in this country will go under rigid margin controls at wholesale and retail levels.

Michael V. DiSalle, director of price stabilization, who announced the new controls, reported the immediate "impact of these regulations will be to reduce prices," but he warned the Main Street housewife not to expect big reductions.

Among the major foods covered in the new regulations are butter, packaged cheese, baby foods, cocoa, breakfast cereals, coffee and tea, flour, four mixes, canned and frozen fruits and vegetables, jams and jellies, lard, mayonnaise and salad dressings, shortenings, canned meats and canned fish.

JAPANESE TREATY—The 14 nations concerned with a peace treaty with Japan have received the American version worked out by Ambassador John Foster Dulles.

CLAY RESIGNS—The resignation of Gen. Lucius D. Clay as special assistant to Charles E. Wilson, director of the office of defense mobilization, was viewed by many observers as another move on the government's part to bring organized labor back into the mobilization program.

DISAPPOINTING FARM REPORT 1951 Crop Plantings Called Inadequate A recent report by the agriculture department indicated that farmers were not planning to plant enough crops in 1951 to maintain present levels of food supplies.

good enough to encourage larger crops. Government crop reporters who made the department survey came up with two explanations for reduced plantings: (1) A farm labor shortage and (2) a reluctance to plant up land which, at government urging, had been returned to grass.

THIRSTY LAND California Canal Project Moves Water 500 Miles to Dry Farms

(This is the first of two articles on California's world-famous Central Valley project.)

A major milestone in civilized man's elemental urge to control and utilize the fresh waters of the earth will be observed in California from August 1 to 10 with the first full, integrated operation of the initial features of the vast Central Valley project.

Water for farms, homes and industry is provided by the Contra Costa canal of the Central Valley project, which meanders through a 48-mile course of pleasant valleys and rolling hills along the south shore of Suisun Bay.

ern tip of the state's central valley basin, and transports it to parched farm lands at the southern end, nearly 500 miles away. The great Central Valley is 500 miles long, 100 miles wide and supports 1 1/2 million people in its towns and on its farms.

land-slide. One of the other two stars, Ruth Roman, met Mortimer Hall soon afterward, and recently married him. The third, Richard Todd, brought his bride to Hollywood for a honeymoon while he appeared in the picture. Now the studio suggests that possibly the picture will have the same effect on audiences that it had on the players, but can't figure how to get statistics.

The Duke and Duchess of Windsor will make a rare radio appearance on April 20 on NBC (10:45, E.S.T.) when Henry Cassidy, the network's director of news and special events, interviews them on the "Pro and Con" program.

Berry Kroeger, of "Young Dr. Malone" and "The Road of Life", was enroute to Hollywood last spring, to appear in "The Count of Monte Cristo", when he was jailed as a wanted convict in Zanesville, Ohio. A citizen recognized his face, but assumed that he had seen it in one of those "Wanted" notices in the Post Office—whereas he had really seen Berry on television.

Phil Baker, now back on NBC's "The \$64 Question", says there is no way to rest but by working. He found that out last year. After three decades in show business he decided to take a year-long vacation and do what he had always wanted to—see this country from Walla Walla to Key West. He turned down lucrative offers in order to do it.

GRASSROOTS

Government May Be Legally Right, Morally Wrong

By Wright A. Patterson

WHAT MAY BE MORALLY wrong may not necessarily be legally wrong. There is nothing illegal in a United States Senator using his influence to secure a Reconstruction Finance Corporation loan for a client of his attorney son, for which the son received a fee of \$21,000, but the senator's action was definitely morally wrong.

No court of law would convict him of legal wrong doing, but the court of public opinion—the voters—should convict him of moral wrong. At the next election, when that senator is a candidate for reelection, and all others who have been mixed up in the R.F.C. scandals, regardless of political affiliations, they should be retired to private life.

Such men should not be placed in positions of influence. They are not entitled to public confidence. The Fulbright committee brought these men into the limelight, but that committee cannot convict them as can the court of public opinion. Morally they are guilty as were those in the Harding administration, but they were smoother, and avoided legal wrong doing.

So long as they were only morally crooked the President condones their offense, and sees nothing wrong in the action of those in White House payrolls, and finds no reason for dropping them as public employees. That is the job the voters can do, but to do that it may be necessary to dis-

ern tip of the state's central valley basin, and transports it to parched farm lands at the southern end, nearly 500 miles away. The great Central Valley is 500 miles long, 100 miles wide and supports 1 1/2 million people in its towns and on its farms.

Of the 220 different crops grown on Central Valley farms, the principal ones are field crops—including alfalfa, irrigated pasture, sugar beets, beans, barley, cotton and rice; truck crops—including asparagus, tomatoes, melons and a variety of other vegetables; fruits and nuts, including grapes, peaches, plums, prunes, apricots, pears, figs, almonds, olives and oranges.

ONE OF THE FIRST men to advocate a concrete suggestion for the solution of the area's water problem was Col. Robert B. Marshall, chief geographer for the U.S. geological survey. In 1891, when he first toured the inland basin, Colonel Marshall envisioned a great system of dams, canals and other works.

His plan was made public in 1919, and placed before the California legislature in 1921. There followed the "State Water Plan" of 1931, forerunner of the Central Valley project. After the people of California approved the plan, federal assistance was sought. In September, 1935, President Roosevelt allocated funds for the project under the Emergency Relief act.

Individual units of the project have been in partial operation since 1940, but to date the project's initial features have not been operated as an integrated system.

THE FICTION CORNER

A CASE FOR THE KIDS

By O. F. Lathrop

SAM BROMLEY replaced the telephone in its cradle with a slam and reached for his broad-brimmed felt.

"I'm going out on this case myself," he told the office girl. "That's the third call in an hour about these explosions and the deputies don't seem to be doing a thing. The pavement just blew up over a culvert and broke five windows in the Wright Hatchery near Sunville."

He had an uneasy feeling about these blasts and a very personal reason for investigating them himself. People in little towns all over the county had been calling for the last twenty-four hours. And his son, Tommy, was missing.

"I thought the Rooshians had bombed us," old Ben Grubbs had said. "Busted the sidewalk over the crack like eggshells."

Sam drove to all the spots reported and inspected the damage. Sidewalks heaved up, windows shattered, but not a clue. At the Sunville Hatchery he met his deputies.

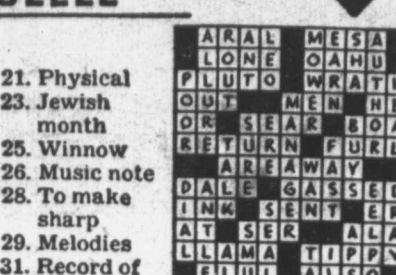

"What do you make of it, Sheriff? Could be Red sabotage, eh?"

Sam shook his head. "Hoodlums, probably. Not any real damage done." But he didn't say what was in his mind—that it could even be kids' pranks.

He thought uneasily again of his own son, Tommy, and that crazy gang of his. Still, it didn't seem as if kids would go that far.

God In a Nation

Lesson for April 22, 1951

WHEN IS GOD IN THE LIFE of a nation? It depends on what you mean by the question. God is the Ruler of all nations, and Judge of them all.

But some nations have been far more conscious of the true God and obedient to Him than other nations have.

God's Name on Paper

GOD CAN be mentioned often, yet not count for very much in a nation. For instance, His name can be on the money, it can be in the state ceremonies, it can be in the constitution, or if there is no constitution, the monarch may be said to rule "by divine right."

But such things may be no better than formal. The money can pass from wicked hand to wicked hand, it can be used for godless purposes by men who do not have God in all their thoughts. The name of God in public ceremonies (such as oaths of office) or in the constitution may mean no more than decorative designs on a letter-head. The king ruling by "divine" right may be a cruel and corrupt man.

Religious-sounding songs, such as "God Bless America" or "God Save the King", can be sung by rascals. No, God in a nation's life must be more than a name on paper, green or white.

God in Great Men

GOD BEGINS to get into the life of a nation when He gets into the lives of people. It is not disparaging the common man to point out the plain fact that as between one believer in God who is obscure, and another who is prominent and powerful, the latter means more in the long-run life of a nation.

It was so in the era of Moses. That was a time of religious confusion, just as it is today. Doubtless there were many humble persons at that time who had a living faith, but if it had not been for Moses, the nation of Israel would never have been a nation, but would have shrunk back into the ruck of little no-account tribes, never to be heard from again. When we hear that even Moses' own brother was so stupid or bad as to lead the people in worshipping a gold-plated calf, we can imagine what the masses of the people were like.

If the United States and Canada can be called Christian nations today, it is because we can point to men on both sides of the line who have been not only high-calibre, influential men, but also men not ashamed of their faith in God.

An American congressman who is respected by friends and opponents alike, has said it is more important to him to know what God wants than what his constituents want. Most governors of states profess religion; and some of the best of them practice it. What America would have been without such men, one can only guess; certainly far worse than it is.

God in Laws and Lives

GOD CAN also be in a nation's laws: It is true, we cannot run a modern nation or municipality on the laws of Leviticus, and nobody wants to, not even the preachers and rabbis. Still, the laws of a land either reflect the will of God or they do not. So far as the laws of a nation are in line with the teachings and truth of Christ, so far God is in the life of that nation.

But the question is not finally: What do the laws prescribe, but do the people respect the laws? God does not get deeply into the life of a nation until He gets into the homes of high and low alike.

If the nation of Israel ever became godly, they had Moses to thank; yet he himself was under no illusions as to the people he left behind him. "I know that after my death you will utterly corrupt yourselves and turn aside from the way which I have commanded you." (Deut. 31:29.)

It took centuries of toil and patience on the part of God and His prophets to change Israel from a nation mostly indifferent to God, to a people mostly God-fearing; and the change took place only as homes changed.

Is ours a Christian nation today? The answer is not in our constitution, not in our leading men, not in our history or laws or traditions; the answer is in our homes. When the cry goes up "Back to God!" the place to start back, and the place that counts most, is our homes.

Challenge to America

The challenge to the moral stamina of the American people in the home towns of the country is not whether some basketball players accepted bribes, or whether a half-dozen government employees accepted mink coats or deep freezes, or hotel rooms in return for favors, or whether Costello is still out of jail where he should be, reprehensible as these facts are. The challenge is whether we shall keep our hard earned freedoms and civil liberties in the face of the mortal threat of Soviet Communist aggression. This is the one menace this congress and all the people should be united in opposing. Never before have the American people faced a menace of this magnitude—the Kremlin blueprint for a Communist world. Of what relative importance is the Kefauver committee as compared to the meeting of the foreign ministers of the 21 sister American Republics here in Washington?

Character Assassination

Probe after probe has been under way in this and receding congresses in which witness after witness, the innocent and the guilty, have been paraded before television and the radio without benefit of the inalienable rights guaranteed under the Declaration of Independence and the Bill of Rights. Names have been assassinated while justice and the due process of law have been shunted aside by the very men who make the laws of the land.

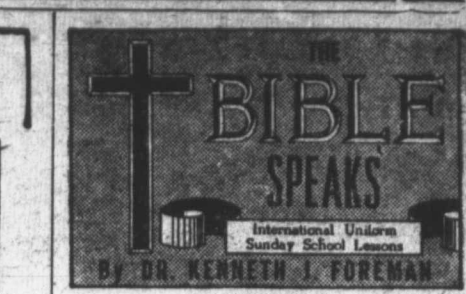

Chortling" Smith

Sam J. Smith looked aloft and chortled with happiness as a downpour of rain drenched his land in San Antonio's Belgian garden district. Rain which began on Easter Sunday and continued through Monday was a blessing to the parched land and pleased farmers and ranches of the area.

was viewed by many observers as another move on the government's part to bring organized labor back into the mobilization program.

WOMAN'S WORLD

Bedroom Decor Need Please Only Persons Who Use It

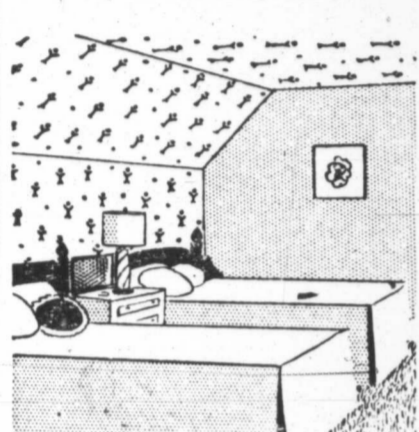

By Ertta Haley

LIVING AND DINING rooms, hallways and kitchens usually have to please any number of individuals. First of all there's the whole family to please, and then the number of guests who will see them which varies from several close friends to any number, depending upon the family's social circle.

Successful bedrooms need please only their occupants. Children, for example, as soon as they have some definite ideas of their own that make sense, should be permitted to have a hand in decorating theirs. At least, if their interest runs to fishing poles or worm collections, you could give them a place for them in their own rooms.

Daughters frequently like wide flounces and ruffles to which mother may object because of the laundering problem. Let them lend a hand when this is necessary, and see whether tastes won't change.

Children frequently change their minds about things more readily if they have to live with their choices. They will grow and mature much more readily if you let them have their way on some aspects of deco-

rating. If they feel frustrated about decorating ideas, they may never outgrow them.

Bedrooms can be interesting to you, if no one else, if they reflect your favorite colors, as well as your favorite interests. There really is no limit as to what type of hobbies the bedroom can show: sewing, patchwork quilts, hooked rugs, sketching, china collections, books or music.

Like any other room, if you have a theme around which to decorate, the job will be easier and more satisfactory. The room should hold together so that principles of unity are intact, and the effect should be pleasing, as you will spend much time in the room decorated to suit you.

Lighting Determines Color Scheme. Rooms on the shady side of the house will take lighter colors like the pastels so they can be lightened in their effect. You don't have to be afraid of the darker colors, if they're your preference when the room is on the sunny side of the house.

No matter what the color choice, be certain the color you've chosen is restful. If you have a favorite shade, you can usually obtain it in the lighter and darker shades and thus have both the color desired as well as the shade the room will take best.

Wallpapers for the bedroom are chosen with the same principles in mind. Several things will determine pattern. If the room is small, don't crowd it with a large figured paper. It may even be better to paper just one wall, like that behind the bed, if the room can't take much pattern. Sloping walls in a bedroom can be handled easily by extending

Dentist.—Having trouble with your teeth?

Malik.—No.

Dentist.—What do you mean "no"?

Malik.—I never say yes to anything.

Dentist.—Open wider, please.

Malik.—I insist upon my right to be heard on that proposition first.

Dentist. (somewhat puzzled).—Very well, go ahead.

Malik.—I wish to submit a resolution condemning you for cruelties in violation of the laws of humanity and I submit affidavits proving my extreme sufferings.

Dentist.—But I haven't touched you yet!

Malik.—That is absurd and false. The whole world knows I am bleeding.

Dentist.—I haven't even looked into your mouth.

Malik.—That amounts to a typical denial of the fact you have had spies and other secret agents looking into my mouth for months.

Dentist.—Look, do you wish dental attention from me or not? I don't have to treat you.

Malik.—Yes you do. It is on the agenda.

Dentist.—It is not on my agenda.

strong indications against it. White or light gray shades will go with almost any type of decor.

Inexpensive Furniture Can Be Smart

Odds—chests, shelves, mattress mounted on box springs, comfortable chairs of uncertain vintage, can all go into today's bedroom and still be smart.

Modern bedrooms are so flexible that they can look hobby or playrooms, and still meet the standards of good taste. That's the reason for the great freedom in choice of furniture.

All manner of space-saving devices have been put in practice so you'll have room in the sleeping quarters for hobby interests. Footboards are disappearing, and so are the matching bedroom sets. You may use any type of bed. An odd mattress mounted on box springs

with legs will take any type of headboard which can be decorated to match your taste.

In place of a single bulky chest you may have twin chests mounted against the wall with a single large mirror.

You don't have to forego an easy chair in the bedroom. Have a chaise longue decorated to match the drapes or walls, or get an extra chair from the living room with a footstool for sheer comfort. The footstool can double as a seat for the dressing table.

Those who like the strictly old-fashioned bedroom with a tester bed, can make one easily enough by using a pine headboard, two tapered uprights nailed to the wall and a few feet of cornice molding. This makes for a good center of interest, and is an excellent idea for a bedroom where rest is to be the main feature.

Much Freedom Permitted In Choice of Rugs. Wall-to-wall or over-all carpeting is good for a bedroom just as it is in any other type of room, but budgets won't always allow it. In this case, find the largest type of throw rugs possible.

It's essential that sliding rugs be eliminated as much as possible in the bedroom because they're a hazard to safety. Non-slip pads, hangers or other devices used with the rugs will cut down this feature.

Floral hooked rugs are popular in bedrooms; so are matching shag rugs. Sometimes you can buy sev-

eral looped rugs, such as are used in bathrooms, and have them matched. In this case sew several of them together and you have the effect of a nice luxurious large rug.

Floors should be kept covered in winter as much as possible if heating is a problem, as rugs do make the room warmer with their insulation. In summer, however, the room may be practically bare, and it will look cooler, especially if it's on the sunny side of the house.

Here Are Tips On Treating Rooms

Guest rooms must frequently serve a double purpose. In many homes, they are usually the study. In this case, use a double seat sofa that converts into a bed, some low bookcases that will serve as a table when used as a guest room.

When bedrooms are small and must hold two people and serve also as a sitting room, use studio couches with matching covers. They may be placed on opposite walls, or corner to corner against two adjoining walls, depending upon the space available. In place of night or lamp table, use small chests which will give some storage space as well as the table top.

Bed and sitting room combinations for the teen-age set as well as male members of the family take to tailored bedrooms with studio couches.

Chintz, if a print is desired, is good to use in tailored rooms with sturdy cotton tweeds or plaids or the solid colors in herringbone-or-duck.

KATHLEEN NORRIS

Don't Let Your Campaign Show

SOME GIRLS are born with charm. They attract everyone within reach without much effort. Other girls—well, Olive Russell is one of the others. Olive is 23; she lives in Duluth.

"I'm just not attractive, and I know it," says her letter. "I've known it for about seven years. I'm sick and tired of struggling to make people—and especially men—like me, and yet I can't drop out of the world, I can't die, and sometimes it seems as if I simply couldn't live and be so unpopular, so left out of things."

"There's no use cataloguing what I have or what I haven't in the way of looks; I've got all my features in their usual places; I've got hair, I don't wear glasses, ear-drums, a wig or false teeth. My aunt, by the way, who is 45 and has all these disadvantages has just made a very prosperous second marriage."

"I dress nicely, I smile, I listen interestedly to any man who happens to be near me. And without the slightest warning he gets up and walks away to another woman. No man asks me to go to dinner or the theatre, and if I ask a man to dine with my father and mother and me he may come, but he doesn't stay late, and the conversation is general for only about an hour after dinner. If I tell a joke it falls flat. If I buy an expensive coat another girl in the office buys one for \$20.85 and it looks just as well. If I propose a plan for a week end, everyone in the office has something else to do."

Left Out

"I tell you," continues Olive's letter, "it breaks you down to be always trying to push your way into good times and normal life and to be always left on the outside. My group—my old college group and present office group—is break-

ing, and it isn't an unusual one. In every group of girls, in every school, there are a few who really do not attract young friendships and glide easily into young good times, for no discernible reason. Homelier girls, more stupid girls make their way; girls with spectacles, freckles, too much weight or too much height saunter about the campus with attentive squires in tow, but girls in Olive's position appear to be under a malignant spell, and their cleverest efforts don't attract to them the beaux and the good times for which they hunger.

Often they try too hard, too obviously. Often that assumed merriment, those plans, that careful listening are perfectly recognizable. And nothing—nothing so isolates a girl as the suspicion that she is angling, straining, campaigning determinedly to be popular.

Olive, forget men. Of course you can't. But act exactly as if there were no men about. Don't flaunt your activities and assert that you really are so busy what with Red Cross and Spanish lessons.

Don't say anything at all. Drop out of the picture as you would if you had a delightful husband in the service overseas, and were improving yourself to be even more charming when he comes back.

Or if you don't like that idea, take it the other way. Say to yourself, "I am 23. At 22 I am going to make a really good marriage. I want my husband to have a cultured, genteel, happy busy woman for a wife; a real woman, fragrant and loving and ready for the supreme experiences of wifehood."

Quakers Oppose Loyalty Oath

Call Act Invasion Of Civil Liberties

SAN FRANCISCO — California's loyalty oath law drew criticism from the northern California regional office of the American Friends Service Committee here.

In a communication sent to all members of the California legislature, the Quaker group urged the prompt repeal of the Levering Act, which was passed last fall. The act was described as "a serious invasion by the state of the civil liberties of the individual citizen."

"We consider this invasion real and dangerous," the committee said. "It substitutes association in place of acts as a measure of loyalty; it commits the signer to future obedience to undefined orders without reserving to him the free exercise of his own moral judgment; it establishes a double standard of truth by requiring a special oath in addition to the customary oath or affirmation set forth in our state constitution."

Under the act, state, county and municipal employees must supplement any previous loyalty affirmations with a new oath stating that they do not seek the overthrow of the government, that they belong to no "subversive" groups. The law does not specifically define such groups.

The law also requires public employees to list all "subversive" groups to which they have belonged during the past five years, and it automatically makes all oath signers a part of the civilian defense organization.

Church Women to Survey Local Employment on Fellowship Day

Church women in hundreds of home towns in the nation will take a "show of hands" on May Fellowship Day (Friday, May 9) to find out what they are doing and what they can do in the national defense program.

At their May Fellowship Day meetings, the women will ask themselves such questions as these:

"Am I folding my hands in complacency?"

"Am I wringing my hands in helplessness and self-pity?"

"Or, am I putting my hands to some task or joining hands with other Christians to do bigger jobs?"

When these questions are answered the women will begin planning what they can do—as workers, employers, consumers and Christian citizens to help their families, their home towns and the nation.

May Fellowship Day is sponsored by the general department of United Church Women of the National Council of the Church of Christ in the U.S.A. The general department is the national organization for women of over 80 Protestant denominations in nearly 1,800 state and local councils of church women.

On May Fellowship Day last year, the women began a two-year study of economics as the concern of Christian women. This year their emphasis has shifted from a survey of local employment, child labor and other general conditions to the place of women in the national economy. What they learned of their communities during the past year may have great bearing on the future of many home towns of the nation.

Mrs. George B. Martin, of Summit, N.J., national chairman of the committee for the annual May observance, citing figures from a fact book, "Women at Work," prepared for use in the year's survey, pointed out that 19,000,000 women make up 30 per cent of the U.S. labor force at present and 37,000,000 more listed as "non-workers," form a large source of labor that could be drawn on for defense.

At least 90 per cent of all nurses, medical and laboratory technicians, household employees and telephone operators are women; so are the majority of office workers, retail clerks, teachers, restaurant and hotel workers.

One of the questions the women will be concerned with, Mrs. Martin says, is whether their own church—the home town churches—as employers, maintain standards consistent with those they advocate for other kinds of employment in the community—in conditions of work, salary and wage scales, retirement arrangements and vacation time.

As volunteers, women are important not only in the churches, but also in social welfare and civic organizations of their communities. In the national defense program they will be

called upon for civilian defense, Red Cross work and similar jobs.

If price control and rationing boards are set up in communities, women serving on them do an important job in presenting the consumers' point of view.

Mrs. Martin points out, "It is important to write to our congressmen. It is just as important to express our point of view at our dinner tables and to carry out our beliefs in our home towns."

JUST IN TIME

No Kicks Teacher—"Johnny, why does Missouri stand at the head in mule-raising in the United States?"

Johnny—"Because the other end is dangerous."

This One's in Bad Taste

Mamie had been looking all night long—from bar to bar—for her wandering husband, Ogelthorpe. At two in the morning she finally found him, seated in front of a tall glass in a tavern. She sneaked up and sampled his drink.

"Err!" she spat, dropping it quickly. "That stuff is awful." Ogelthorpe eyed her sadly. "See that. And you thought I was out having a good time!"

Calamity

Jim: "What's all the excitement about?" Jack: "My wife has gone off with a man in my car." Jim: "What? — Not your new coupe!"

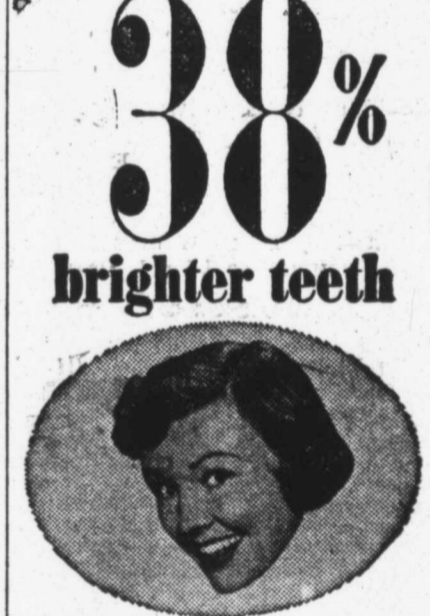

His Face Is His Defense

The defense attorney was summing up. "The man who robbed that bank was a genius," he told the jury. "His every move was cleverly planned. Now will you please take a good look at the defendant?"

NEW SCIENTIFIC DISCOVERY QUICKLY RELIEVES MISERY OF ATHLETE'S FOOT

The three amazing ingredients that science has found will kill most fungi causing athlete's foot, ringworm and other fungus produced skin infections have at last been successfully combined in liquid and powder form in a remarkable new product called FUTSANA. Users say it beats anything they have ever tried.

When you notice the itching, burning, stinging, painful symptoms of fungal infection, act quickly. Fight it two ways: apply FUTSANA liquid to affected areas to combat the condition, dust FUTSANA powder in shoes to kill germs causing reinfection. Often only one or two applications will bring complete relief. Now available at your drug store. FUTSANA is sold on a money back guarantee.

WHEN SLEEP WON'T COME AND YOU FEEL GLUM

Use Delicious Chewing-Gum Laxative REMOVES WASTE NOT GOOD FOOD

When you can't sleep — feel that awful "lump" in your throat — do a million things — you need a laxative. Doctors say many other laxatives, taken in large doses, start their "pushing" action too soon... right in the stomach where they often flush away nourishing food you need for top energy! You feel weak, tired.

But gentle laxative in different form in the lower bowel — removes only waste, not good food — you feel fine, full of life! Get Free Sample, 25¢, 50¢, or only 1¢!

Senior Present Play
 The class of '51 is reviewing that old favorite, "An Arizona Cowboy" Thursday April 19, at the high school gym. Admission is 15c, 25c, and 40c. Proceeds of the play will go to the class fund for the class gift to the school and the class trip to New Orleans.

The play is in four acts. The first three acts are outdoors scenes, and the last act is in the "Blackhole", an outlaw hideout in a cave.

The cast contains five women and seven men. It includes such characters as a cowboy sheriff, a pretty ranch owner, a tall-tale spinner, a chinese cook, and Indian maiden, a bossy old woman, a cowboy, a poorhouse walf, an Indian chief, a troublemaker from Frisco, and his wicked sister.

Many of you may have seen this play before. If so, we are sure you will want to see it again and we would appreciate your telling your friends to come. Better than ever!

Campus Chatter
 The annual Senior Play will be presented April 19, Thursday night, at 7:30 at the high school gym. This year the class is presenting "An Arizona Cowboy" which is going to be very good. Don't miss it!

Saturday, April 21, the track boys are entering in the regional meet which is to be held at Brownwood. Betty Horton and Mary Rose Templeton are entered in the shorthand meet and Patsy Ruth Green and Marie Belights are competing in the typing meet. Good luck to all of them.

The Senior members of the basketball squad received their sweaters in assembly Wednesday, April 11. Those receiving sweaters were: Co-captains Patsy Green and Barbara Pierce, and Betty Horton, Peggy Beaty, Inez Stewart, and Mary Templeton. Marie Belights also received hers this year. All the girls were really thrilled to receive these sweaters.

Also at this time the football boys received their jackets. The two Co-captains, Lowell Richardson and Kenneth Merket, and 15 other boys lettered. The jackets are solid black with black letters and gold stripes and stars. The senior jackets are also solid black, but since this is their last year to play for L. H. S., they received reversible jackets. The reversed side is gold satin. All the boys are very proud of them.

H. E. News
 Here we are again! The freshmen, have just completed their blouses. What we have seen of them are really homey's.

The sophomores are cooking cakes, breads, and pastries. We have some very good cooks too.

The third year girls are studying house plans.

Mary Rose and Miss Scott attended a State meeting in Austin Saturday. A wonderful time was reported.

We are going to have a bake sale Saturday at the Lions Club. We want you to come and buy a wonderful home made cake or pie. Cake and pie will be served by the piece with a cup of hot coffee. The money from the sale will help us to send our incoming president to Fort Worth to the state meeting and to have our annual Mother and Daughter Banquet.

See you next week.
 Mr. and Mrs. Sam Haggerton spent the weekend with Mr. and Mrs. Troy Lankford at Mintone.

CONSTRUCTION DELAYED

When the author died in 1937 the hospital was building a structure on the site of the old one in London's Bloomsbury district. It is not yet finished and probably won't be for a number of years. Building material shortages, then a change in plans, have held up the work.

The war stopped construction after the seven-story in-patient building had been completed. That's a many-windowed, H-shaped building with balconies running around every floor.

There are 326 beds, with almost 400 nurses to look after the youngsters night and day. There are 40 staff doctors and 30 consulting specialists who visit the hospital almost daily.

In addition, there are another 100 beds at the hospital's country branch, a former large private home on a 75-acre estate at Tadworth, Surrey, about 20 miles south of London. Then there are two convalescent homes with 18 beds each—one at the seashore near Brighton and another in rural Oxfordshire.

The royalties from Peter Pan help run all these, as does the government, which took over the control of virtually all British hospitals a few years ago.

Government Pays Part

Because the hospital for sick children is a teaching hospital, its funds do not come under the control of the Health Ministry, but are administered by the hospital authorities solely for research and treatment. The government pays all maintenance costs.

There is a Peter Pan ward—the eye, ear, nose and throat section. Like the other wards, it is gaily painted and cheerful. There is a miniature surgery for each unit of eight beds. Every unit also has its playroom, with rocking horses, fire engines, trains and dolls for convalescent patients.

Every Christmas season Peter Pan is presented in one of the London theaters. And members of the cast pay an annual visit to the ward to entertain the children.

In the Peter Pan ward is a plaque that reads: "Dedicated to the never-fading memory of one who loved children—Sir James Barrie."

Outbound Flier Bestows Automobile on Stranger

ATLANTA, Ga.—M/Sgt. John H. Cameron was given an automobile by a stranger.

One Air Force sergeant on the flight line at Dobbins field yelled to another, "Hey, Sergeant!"

Sgt. Cameron walked over to the man.

"You're gonna think I'm crazy, but see that car over there? It's yours. I've got a plane to catch and I won't be back for awhile."

With that the stranger handed Sergeant Cameron the keys and title papers, boarded a plane and flew off into the wild blue yonder.

The amazed sergeant checked the registration papers on the 1947 model automobile and the plane's passenger list, and found the donor was Sgt. Antonio C. Germano, bound for overseas.

Sergeant Cameron said he was going to keep the car. And then? "I'm going to give it to the last GI I see before pulling out."

Churchill Paintings Appear On Christmas Greeting Cards

NEW YORK—Winston Churchill's paintings will appear on Christmas greeting cards this year.

Twenty paintings by Mr. Churchill for reproduction on cards have been selected by a greeting card company. Another group, including two holy land scenes, a sunset over Jerusalem, and a village landscape, have been selected for next year.

Joyce C. Hall, who selected the paintings, said: "Mr. Churchill is a very vigorous painter. His work is surprisingly professional, and he has done a lot of painting. There are several hundred which he did while he was in his country home and at his London house. And there is a stack of others that he doesn't rate highly."

Royalties From Play Finances London Hospital

LONDON, England—Sir James Barrie, the playwright, loved children so much he gave all the earnings from his fairy-tale Peter Pan to a children's hospital in his home town. When he died he made—the royalties a perpetual bequest.

Because of that gift, the London hospital for sick children, also known as Peter Pan Hospital has been made richer by 100,000 pounds (\$280,000)—and the money keeps coming in.

Peter Pan and his playmates—the Darling children, Captain Hook and all the other inhabitants of fairy land—have helped the people who run the hospital to build one of the finest, most modern hospital buildings in the world. They also help to pay for research by doctors and skilled technicians to study the costly and baffling diseases that strike at children.

Some of the money this year is coming from the pockets of Americans whose reverence of Sir James has made a revival of Peter Pan a current Broadway success.

Entertaining at Showers

Having a Party for a Bride-to-be? Or, is there a baby shower on your calendar for a close friend? These occasions, which are really very simple affairs, often put a hostess to the real test: she has to greet a number of people and make everyone at home; at the same time, she must serve foods nicely.

It isn't such a big order if you've planned your food well and prepared it all in advance. This frees you for that important job of hosting, greeting at the door as well as mingling with your guests.

The food should be all ready to serve, except for bringing in on trays. The table can be set in advance, except for the food, since buffet style is a good casual way of doing this type of party. If you're serving a fruit punch, this can be all set, too, in a large bowl, chilling in ice.

SANDWICHES, cakes and cookies, all go well with the punch, and may be made in advance. Select a colorful punch with fruit flavors which will appeal to your guests:

*Spiced Pineapple Punch (Makes 2 quarts)

1/2 cup sugar
1 1/2 cups water
4 sticks cinnamon
12 whole cloves
1 large (46-ounce) can pineapple juice

1 1/2 cups orange juice
1/2 cup lemon juice

Simmer first four ingredients about 30 minutes. Strain and add to fruit juices. Chill. Pour over ice just before serving.

EXTRA interest can be added to the punch bowl, or to the glasses in which you place the punch if you do not have the bowl, by serving with pineapple cubes. Just fill the refrigerator ice cube tray with pineapple juice, or a combination of citrus juices with a maraschino cherry in each cube, and freeze until firm.

For a colorful punch cup garnish, spear two pineapple chunks on a toothpick with a maraschino cherry in-between. Cut a little slit in the cherry and fit it over the rim of the punch glass.

*Hawaiian Pastries

First make a cardboard pineapple pattern, then cut around it with a rich pastry rolled about 1/4 inch thick. Sprinkle the tops of the tiny pineapple designs generously with a mixture of sugar and cinnamon. Place on a cookie sheet and bake in a very hot (450°) oven for about 10 minutes.

IF YOU LIKE to serve small cakes or cookies with the punch, here are two taste-tempting suggestions which are certain to agree with the taste of shower guests:

*Fudge Spritz (Makes 2 1/2 dozens)

1 package semi-sweet chocolate
2 cups sifted cake flour
1/2 teaspoon salt
1/4 cup shortening
1/2 cup sugar
1 egg
2 tablespoons milk

Melt chocolate over hot, not boiling, water; cool. Sift together flour and salt; set aside. Blend the shortening with the sugar. Add the egg; beat well. Add the milk alternately with the sifted dry ingredients. Mix in the chocolate. Put through a cookie press onto an ungreased cookie sheet. Bake in a moderately hot (400°) oven for 8 to 10 minutes.

Chocolate Drop Cookies (Makes 3 dozens)

1 package semi-sweet chocolate
3/4 cup sweetened condensed milk
1 teaspoon vanilla
1 cup nutmeats
1/2 teaspoon salt

Melt the semi-sweet chocolate over hot, not boiling, water. Add the milk and vanilla, and stir until thick. Add the nutmeats and salt. Blend well and drop by teaspoonfuls on a greased cookie sheet. Bake in a moderate (350°) oven for 10 to 12 minutes.

Buttercup Cupcakes (Makes 9 cakes)

1/2 cup butter
2 tablespoons grated orange peel
1/2 cup sugar
1 egg
1 1/2 cups cake flour
1/2 teaspoon salt
2 teaspoons baking powder
1/4 cup milk
1/2 cup orange juice

Thoroughly cream butter, orange peel and sugar. Add egg and beat thoroughly. Add sifted dry ingredients alternately with milk and orange juice. Fill greased cupcake pans half full. Bake in a moderate (350°) oven for 15 minutes. When cool, frost with:

Orange Frosting

1 1/2 cups confectioners' sugar
2 tablespoons cream
2 tablespoons orange juice
1-2 tablespoons grated orange peel

Yellow food coloring

Blend together ingredients in order given. Add just enough yellow food coloring to give an attractive tint. Beat until mixture has a spreading consistency.

A feather-like cake with a delightful flavor and texture is this novel sponge cake that goes nicely with a party punch. It may be frosted with a boiled icing, or a cream cheese or butter frosting. Garnish with whole nutmeats.

Applesauce Sponge Cake (Makes 1 9-inch tube cake)

3 eggs
1 cup sugar
1/2 cup hot applesauce
1 1/2 cups cake flour
1/2 teaspoon salt
1 teaspoon baking powder
1/2 teaspoon soda
1 teaspoon nutmeg
1/2 teaspoon cinnamon

Beat eggs until light and thick. Add sugar gradually and beat until sugar is dissolved. Add applesauce and beat well. Add dry ingredients which have been sifted four times. Beat until smooth. Bake in an ungreased 9-inch tube pan in a slow (325°) oven for 55 minutes.

There are times when you need a first course, so split tiny creamy puffs and fill with lobster or crabmeat, shredded and mixed with mayonnaise.

Extend the chicken with oysters when you want to cream it. Serve on toast triangles or hot, flaky biscuits. If you like compressed, try these in place of the biscuits.

With fruit salads, there's nothing better than this dressing: mix together 3 parts soured cream, 2 parts chili sauce and 1 part Worcestershire sauce. Chill thoroughly.

Brooklyn Indian Scares Housewife With Scalping Knife

NEW YORK—A resident of a Brooklyn apartment house told the Flatbush court an Indian working as an elevator operator in the building has some rights, but she doesn't believe they include wearing a "scalping knife" and hanging a modified war club in his elevator.

Mrs. George Hagopian, one of the 12 tenants in the building, said that it had taken a little time to get used to Chief Reindeer, otherwise known as "Joe" when he went to work as superintendent and elevator operator—not that his strangeness was entirely distasteful.

She thought his custom of wearing his hair in a braid was novel and when he occasionally stuck a gay feather into his coiffure, it lent a romantic touch that brightened all of Flatbush.

However, she said the elevator service was poor. You could "ring and ring" before the car came and it did not do much good to complain. Once, she added, when she did complain, Chief Reindeer replied: "This is my country, you leave."

Mrs. Hagopian reminded him of a real estate transaction involving Manhattan island and \$24 worth of trinkets. Neither was calm enough at the time to speculate on how Brooklyn was included in the parcel. In any event, the Indian directed her attention to a knife in his belt, which terminated the argument, she said.

Mrs. Hagopian said that she was afraid of being scalped. She said that other tenants had been insulted and that several had signed a petition to the landlord for the chief's removal.

The building's owner was advised to keep the chief under wraps.

Black Eyed Peas Confuse New Bean Sorting Machine

WASHINGTON—The government has developed a bean sorting machine in which a television tube "eye" picks the bad from the good.

The machine can scan 3,780 beans a minute, and eject any that does not conform to a normal color pattern. Some 100 are being used at the Chester B. Brown plant at Gering, Neb.

They can be adjusted to sort beans of any color, even pinto, it is reported, but the so-called black eyed pea (experts call it a bean, too) has the TV eye stumped. It can't tell the difference between a bad pea's discoloration and the distinctive black eye on a good one.

It's another mystery that science has not explained yet.

Wisconsin Town Loses Tax Revenue Over Technicality

WAUSAU, WIS.—Sam Nigar is the town in an uproar. And it is through no particular fault of his own.

Sam's property sits astride the city limits. His barn is in the city of Wausau and his house is in the county of Wausau. Last year he asked the Wisconsin Fuel & Light company to hook him up to the gas mains. It meant a 300-foot extension of the mains, but the company obligingly made the connection.

Sam's gas hookup has had far reaching results. Previously the company serving only city customers, had been classified as a private utility and paid its taxes directly to the city. When the company first started serving Sam, outside the city limits, it became a public utility. From now on it will pay its taxes to the state, the department of taxation has ruled.

That's good for the city. Last year the company paid \$14,900 in taxes on a city tax rate of \$38 per \$1,000 valuation. This year the company will have to pay only \$11,205 in taxes, because the paid rate is \$27 per \$1,000 valuation. Of this tax money collected by the state, the city will get half, or \$5,600.

Wausau officials, aggrieved at the prospect of an annual \$9,340 revenue loss, are reported to be toying with the idea of "annexing" Sam Nigar's house.

300-Mile Tunnel Planned To Drain Huge Coal Field

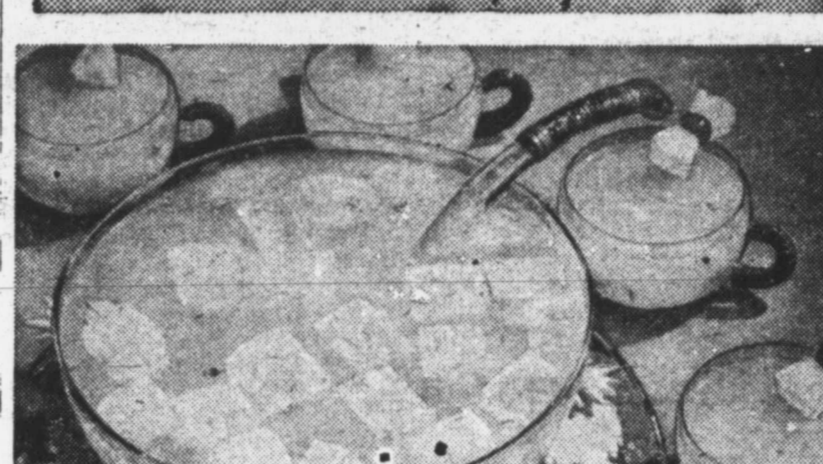

WASHINGTON—A 300-mile-long twin bore tunnel to open vast hard coal reserves now under water in central Pennsylvania is being planned by the bureau of mines.

S. A. Ash, chief of the bureau's safety branch, said the tunnel—the longest of its kind—should be constructed from the central Pennsylvania coal field to Tidewater near Havre de Grace, Md.

The project would cost from 300 to 500 million dollars, Ash said, but would have a double barreled purpose. While opening new anthracite reserves in an area now producing more than 600 million dollars worth of coal a year, it also would create 600,000 gallon of water a minute through a heavily populated industrial area which is frequently threatened with water shortages.

This water would provide a new source of electric power to supplement supplies in an industrial area roughly from Jersey City to Baltimore, Ash said. He added that the drainage would double the remaining life of the Pennsylvania anthracite field.

prices are lower - not higher!

Model BR-1118
11 1/2 cubic feet
\$489.95

come see new Serval Gas Refrigerators

LOWER PRICES, in times like these, deserve an explanation. And here it is: New Servels are redesigned, creating production savings which are being passed on to you.

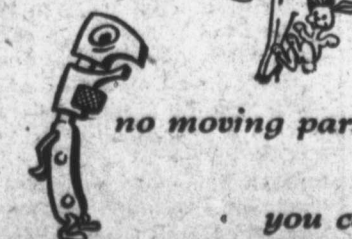

Materials and workmanship are as good as ever. They have to be good because Servels are Guaranteed 10 Years—twice as long as any motor-driven refrigerator.

Yet new Servels are priced as much as \$32.55 lower than last year's models! If you can afford any refrigerator, you can buy Serval.

By any comparison, new Servels are the better buy—one to take advantage of immediately. Come in, today.

a size to fit every family!

like magic! larger inside—smaller outside

no moving parts to monkey with!

you can't hear it—see it today!

the longest in the world!
