Yes, Special Services for You, will be held at the Rotan Church of the Nazarene, tonight, July 16, at 7:30 p. m. The special speaker will be Rev. J. MacLachlan of Africa. Rev. MacLachlan was one of the earliest leaders to cast his lot with the Church of the Nazarene. He had become acquainted with the Church of the Nazarene through the "Herald of Holiness," and long before Doctor Strickland went to begin our work among the Europeans of South Africa, he was calling the Church of the Nazarene his church. When someone who knew him tried to persuade him to join other groups, he said, "I'm waiting for my church to come." When asked, "Are they coming?" he said, "Yes, they will have to if they believe what they say they do in the Herald of Holiness."

Rev. MacLachlan was the South African European district delegate to the Church of the Nazarene General Assembly which met the last part of June in Portland, Ore. He pastors our largest church in South Africa and is recognized as an outstanding Evangelist preacher in Johannesburg.

You will enjoy this Special Service, held just for you. Everyone is welcome!

The date: July 16, 1964.
Time: 7:30 P. M.

The place: Rotan Church of the Nazarene, Lee and McKinley.

Draft Boards Order Exams for 18 Yr. Olds

Austin, Texas, July 6. -- State draft boards will forward 2,762 18-year-old males for Army mental-physical examinations in August, compared to 1,816 scheduled for July, Colonel Morris S. Schwartz, state Selective Service director, said Monday.

These tests are the result of President Johnson's action early this year which ordered the Director of Selective Service and Secretary of Defense to examine all newly-registered men who are out of school and available for service.

Colonel Schwartz stressed that these youths will not be considered for armed forces service at this time. Normally, a man is not reached for draft induction until about age 22.

Only about 225 of the older males will be sent for the examinations in August, and only 119 men are scheduled for induction in that month. This is the lowest induction call the state has received since April 1961, when the quota was only 65. The highest monthly induction call since then was 1,112 in September 1961, as a result of the Berlin crisis.

The August quotas are scheduled to be placed in the mail to local boards Monday, Colonel Schwartz said.

Males married at age 18 and those known to be continuing in school currently will be examined. Also, high school graduates whose draft files show they intend to enter college this fall will not be ordered. If a high school graduate plans to enter college this fall, he should notify his draft board immediately.

The 18-year-olds going for the examination in August will be those who registered at boards during the first part of the year.

"The 18-year-olds scheduled for examination in August," Colonel Schwartz said, "are those in class I-A, I-A-O, and I-O who became 18 this year, the oldest going first. The rule is scheduled to apply in succeeding months."

The examinations of these youths is a part of the President's actions on manpower conservation, generally referred to as the "war on poverty." The ones who fail the examination will be referred by draft board letters to local offices of the Texas Employment Commission, where they will receive advice and counsel on jobs and preparation for jobs.

The youths who get these letters will be under no compulsion to visit the TFC offices, but may go if they feel the government's offer of possible help will benefit them.

Showing The Way...

HERE is life's romance; a grandfather guiding the minds of young boys and young boys seeing Heaven through grandfather's eyes. This may be hero-worship but it is a grand time to teach them to pray... to introduce them to the eternal Friend. *Your child will listen at each bedtime when you talk about God, and Heaven, and the Church.* He will follow when your journey is toward Sunday School. Oh, for the faith of grandfathers who care and who help youngsters find the way to God. It is our privilege and our responsibility to teach them to say, "Now I lay me down to sleep, I pray the Lord my soul to keep. If I should die before I wake, I pray the Lord my soul to take." If you teach them to trust this prayer, then you can trust them anywhere.

'Waterways' Proving To Be Good Investment

Mrs. Silas Cardwell, J. W. Williams and Alva Kolb have grassed waterways that can be seen by driving along highway 70 south of Roby. Each of these cooperators with the Upper Clear Fork Soil Conservation District have excellent waterways established to a perennial grass.

Each of these cooperators will tell you that a waterway is not the easiest thing to establish. They all agree that the finished product was well worth the effort. The careful maintenance job each is doing on their waterways shows respect that they have for a good waterway.

Success with grass waterways is tied to two important things. The first is to get a good waterway established and the second is proper maintenance after the waterway is established. The first job is to get a good waterway established.

The waterway should be located in a natural drain if at all possible. Generally some shaping will need to be done to give the waterway its proper shape. This can be done with farm equipment or heavy machinery.

The next job is to get a good cover of a perennial grass established. The grass should be planted in a dead litter cover of sorghum or cotton bur litter material may be used. The first year after the perennial grass is planted is probably the most critical time in getting a waterway established.

The weeds should be controlled by either shredding or spraying to give the young grass seedlings a chance to grow. The waterway should be checked after every rain or washed out places or silt bars. Needed repairs should be made immediately.

As was the case with the above cooperators, in many instances it takes more than one year to get a waterway established. It will be necessary in many instances to do some spot seeding or sometimes a complete reseeding job is needed the second year. When this is needed, same careful attention should be given the waterway as when it was seeded the first time.

After the waterway is established the waterway should be checked frequently. Grass and weeds should be mowed as needed and all other repairs be made when damage is found.

Misses Theresa and Joanne May of Salinas, Calif., have visited their aunt, Mrs. J. Frank Johnson and Dr. Johnson for the past two weeks. Their parents Mr. and Mrs. J. T. May and Robert arrived here Wednesday night for a visit.

Mr. and Mrs. Kenneth Gable and three sons of Lubbock recently visited relatives here. Their cousin, Mrs. Charles Gable and two children of Arkansas, who are visiting relatives here returned home with them.

Former Area Resident Dies at Christoval

Funeral rites for Mrs. Horace Heath, 74, a long time resident of the Sweetwater area were held at 2 p. m. Sunday at Cate-Spencer Chapel in Sweetwater.

Mrs. Heath was the former Zelda Millsapps and lived in Roby as a child, coming here with her parents from Quintman where she was born July 21, 1887. Later the family moved to Sweetwater. She, her brother and two sisters once owned the Sweetwater Reporter. In 1907 she was married to Horace Heath who died March 6, 1928.

Since 1944 she lived in San Angelo until about a month ago when she went to the Golden Years Home at Christoval. She died there at noon Thursday.

Survivors are a son, Horace J. Heath of San Angelo; two daughters, Mrs. Thomas M. Whit of Abilene and Mrs. Paul Hesser of Kenton, Ohio; two sisters, Mrs. Ruth Ingram and Mrs. Carrie McCauley both of Sweetwater; eight grandchildren and one great-grandchild.

Among the number of surviving nieces and nephews are nieces Miss Lora Blount and Mrs. C. H. McClure of Roby and Miss Mollie Blount of San Antonio. The three attended the funeral of Mrs. Heath on Sunday with relatives from Lubbock, Post and other Texas points.

Christian Science Service Sunday

"I shall not die, but live, and declare the works of the Lord" — this verse from Psalms is part of the Golden Text that will introduce the Bible Lesson to be heard at Christian Science churches this Sunday. The subject is "Life" and begins a Series on names which belong to God.

Readings will include the following lines from the Christian Science textbook: "Because Life is God, Life must be eternal, self-existent. Life is the everlasting. I Am, the Being who was and is and shall be, whom nothing can erase" (Science and Health with Key to the Scriptures, by Mary Baker Eddy, pp. 289, 290).

Farm Safety Week Urged by Credit Assn.

Farm and ranch families throughout the United States will observe the twenty-first annual National Farm Safety Week, July 19-25, and are being urged by participating agencies and firms to utilize good safety practices in an effort to decrease the more than 2,000 non-traffic rural fatalities that occur in the nation each year.

The Production Credit Associations of Texas, home-owned and operated agricultural financing institutions, are cooperating with the National Safety Council, the U. S. Department of Agriculture and various other agencies in the promotion of safety among the nation's rural population.

A slogan of "Safer American Families Everywhere" is being utilized, and emphasis this year is being placed on safe use of pesticides and tractors.

"Both pesticides and tractors are safe if they are used safely", commented H. G. Pitts, general manager of the Sweetwater Production Credit Association.

Pitts urged that farm and ranch families throughout Borden, Dawson, Fisher, Mitchell, Nolan and Scurry counties, served by the operator-owned Sweetwater Production Credit Association, observe proper safety rules the year around to help decrease loss of life and costly lost-time accidents.

The observance of safety rules in the use of pesticides and tractors will eliminate many costly accidents each year, Pitts said. Tractor accidents are caused chiefly by tipping, falls, power take-off runover and highway collision, he said, and proper safety precautions will prevent many of these accidents.

In 1962, according to the U. S. Department of Health, Education and Welfare, there were 2,245 fatal accidents on U. S. farms and ranches, excluding traffic and home accidents. Highest number of fatal accidents occurred with machinery and highest incidence of fatalities occurred in the 15-19 age bracket, the figures revealed.

There are also several simple suggestions for the safe use of pesticides, he said, which will eliminate most of the serious accidents resulting from dusting and spraying: follow directions carefully, keep pesticides in safe places, do not smoke around pesticides, store in original containers, avoid inhalation, avoid spillage on skin or clothing, wash hands and face and change clothing after using, cover food and water containers when spraying or dusting, make thorough disposal of empty pesticide containers.

Mrs. Nancy White is visiting her son Earl Burke in Snyder several days this week. Cheryl Day of Abilene is visiting her grandmother Mrs. Dono Day Sr., this week.
