VOLUME 9 NUMBER 18 HART, CASTRO COUNTY, TEXAS, THURSDAY, NOVEMBER 2, 1972 10 CENTS A COPY

OLD MAN WINTER'S DEADLY VISIT - freezing rain coated tree branches and utility lines Tuesday in the frigid blast that brought the area's first hard freeze. Tree limbs, felled here by their icy coat, were broken all over town.

Horns Battle Kangaroos 0-0, Lose Game On Penetrations

Zeroes gleamed from the Kangaroo scoreboard when the final whistle blew Friday night, proclaiming a battle of defense.

For the Longhorns, it was a heartbreaking notch in the loss column of district play - even though the Horns are still credited with an undefeated season. With three penetrations, the Kangaroos drew the win and now share the district lead with Bovina whose Mustangs stopped Farwell, 26 to 15.

The Longhorns, unnoticed in pre-season speculations, are still not out of contention for the district championship, however. The district could even wind up in a three-way tie if the Kangaroos stop Bovina and the three suffer no further losses.

Kress' three first downs came in the second half. On the opening kickoff, the Roos marched to the Longhorns' 23 yard line and with fourth down, the Horns defense stopped the threat by throwing Terry Stark for a three-yard loss.

Kent Irons fell on a bad pitch-out by the Roos at the Hart 40 to stop another threat.

Dirk Rambo connected on a 15-yard aerial to Jimmy Brown near the end of the third quarter but the Horns were stymied at the Kress 44.

Two plays later, Bill Clifford recovered a Stark fumble. With fourth and three at the Roos 36, Brown went off left tackle for 11 yards but the ball was knocked loose with Kress recovering.

With the clock showing 1:55 left in the game, the Horns had possession on their own nine when a fourth down pass by Rambo to David Barham was incomplete and Kress had another penetration.

Kress drove to the Longhorns' 4, 23, 18, 21 and 8 yard lines but the Horns stout defensive action coupled with two Kress bobbles kept the Roos from chasing the zeroes off the scoreboard.

The Horns will travel to Springlake-Earth Friday night in quest of victory needed to flame their spark of life in the district chase. Kress and Bovina will clash in vital action at Kress.

Texas DPS Investigates 12 Accidents In County

The Texas Highway Patrol investigated 12 accidents on rural highways in Castro County during the month of September, according to Sergeant Rex Smith, Highway Patrol supervisor of this area.

These crashes resulted in no persons killed and nine persons injured.

The rural traffic summary for this county during the first nine months of 1972 shows a total of 64 accidents resulting in 16 persons killed and 44 persons injured.

Region 5 of the Texas Department of Public Safety shows a total in September, 1972 of 561 accidents resulting in 21 persons killed and 335 persons injured as compared to the same month in 1971 with 499 accidents resulting in 33 persons killed and 268 persons injured. This was 62 more accidents, 12 less fatalities and 67 more injured in 1972 at the same period of time.

The Highway Patrol supervisor reminds you that speed is one of the main factors in accidents on the highway. Slow down a little and live a lot. Drive friendly the Texas way!

The 21 deaths for the month of September, 1972 occurred in the following counties: Oldham, Knox, Lamb, Wise, Yoakum and Young, two each; Childress, Deaf Smith, Hartley, Potter, Randall, Wheeler, Palo Pinto, Terry and Wichita, one each.

RICH IN VITAMIN A

Yellow vegetables are especially rich in vitamin A. This vitamin protects us against night blindness (or the inability to see in dim light or darkness after being in a bright light). Sweet potatoes, carrots, winter squash, pumpkin, apricots, and cantaloupes are all important vitamin A foods.

LOUP CITY, NEBR., SHERMAN COUNTY TIMES: "No one expects you to go out and get the fumes out of the sky single-handed. But in every community there are things you can do to help--even in a million little ways, starting right at home! For instance, you might return all wire hangers to your dry-cleaner and laundry....these can be re-used. Save on unnecessary paper-bag disposal...do as the Europeans do, take along a smart, re-usuable shopping bag of your own. Keep a litter-bag in your car. There are some people who even keep small plastic bags in their purses--for cigarette and candy wrappers, junior's gum, things like that. And get to know your community recycling centers. Find out what materials they want, and do what you can to support them. Try it, and help reduce pollution by eliminating much of what usually goes to huge disposal plants to 'go up in smoke!'"

ESSENTIAL NUTRIENT

The mineral IRON is an essential nutrient in a person's diet. The iron requirement for females is greater than that for males. In general, meat sources of iron are superior to vegetable sources. Liver is by far the best food source for this mineral; although other red meats are also excellent sources.

CALCIUM REQUIREMENT

A major portion of your calcium requirement comes from the milk group and it is an excellent source of protein and riboflavin (vitamin B2). Drink milk or try ice cream milk shakes, ice cream sodas, cream soups, milk on your cereal, cheese, and even puddings.

ATLANTA, GA., NORTH SIDE NEWS: "We frequently hear the comment to the effect that this nation was built by common people. I don't subscribe to that philosophy. I think it was built by uncommon people. Uncommon in the sense of possessing a desire to work, a willingness to sacrifice if need be, to study, to build upon a firm foundation of loyalty and service. Undergirded by this philosophy, uncommon people have pointed a way to a better life for all who follow their example in leadership."

PRETEND YOU'RE GEORGE!

"Get out and vote" is a phrase often read or heard in these few remaining days before the election. Have you begun to give serious thought to the implication of these words?

November 7 is the day of reckoning--when no longer will you be able to complain about the state of the nation and then in good conscience stand around and "Let George Do It" when it comes to improving matters. You should make it a point to learn about the issues that will affect you and yours. Study the problems and ask questions when in doubt. Ask your elected representatives their opinion of specific legislation, reforms, taxation, inflation, etc. If we are to make any real progress toward controlling the ruinous impact of government on our pocketbooks and freedom of action, we have to first become acquainted with the issues. November 7 is the big day--pretend you're "George" --get informed and then get out and vote according to your best judgment.

WEST POINT, MISS., TIMES LEADER: "..... somehow or other, many American public school systems miss the boat when it comes to graduating young people with a sound basic skill in use of their native language. With all due acknowledgment of the truism that generalizations are odious, we say that students who get through high school and enter college should be able to write straightforward English without a lot of misspelled words and grammatical mistakes."

All-Day Fitting Clinic Slated For 4-H Leaders

4-H livestock showmen and adult leaders from 22 Panhandle counties will convene for an all-day fitting clinic on Nov. 11. The clinic will be held at the Gouldy Sales Arena on the Tri-State Fairgrounds in Amarillo.

The program will get underway at 8:50 a. m. with a demonstration on steers by James Shelton, vice-president of Bank of the Southwest in Amarillo and Potter County Beef Cattle Project Leader and Charles Beedy, Claude Rancher and adult leader.

NEWVILLE, PA., VALLEY TIMES-STAR: "It's encouraging to learn that the government itself is preparing to blow the whistle on unlimited contributions to be printed in the Congressional Record by members of Congress. Reform is long past due. Many voters with more logic than experience have been led by congressmen to believe that because their remarks are printed in the Congressional Record, they were delivered in an actual speech before Congress. This was not necessarily the case and the supposed influence on the floor of Congress was a pipe dream to say nothing of expensive publication costs."

Dear Editor

Dear Editor,

The contrasts between my candidacy and that of my opponent, Dolph Briscoe, are, I believe, startling.

In 1966, after six years in the Texas House, I was the first Republican elected State Senator in over 40 years. I was returned to the Senate in 1968 with over 73% of the vote of my Houston district. The knowledge and experience I have gained in my twelve continuous years in the legislature qualify me to serve as Governor. I have served on nearly every important committee in both the House and Senate, including the Appropriations and the Appropriations Conference Committees. On the other hand, Mr. Briscoe has been politically inactive and out of touch with the problems facing our state for the past 15 years.

I have traveled across Texas for the past six years meeting the voters and members of the media at every opportunity. I have always been completely open and honest and have spoken to the issues. Mr. Briscoe in his primary campaign and in this campaign, has been exactly the opposite. He has not been open. He has dodged the issues. He has avoided the public and the press. His "campaign" has been an insult to every thinking voter in Texas.

I have been fighting for good government in Austin for over a decade. Mr. Briscoe represents a continuation of the tired, discredited machine politics which have dominated our state for so long.

Mr. Briscoe supports George McGovern and a philosophy alien to most Texans. While some feel his support of the McGovern candidacy is a result of bungling, lack of leadership and personal weakness rather than of political conviction, Mr. Briscoe's sketchy record would indicate otherwise. Every time a decision has been forced upon him that decision has been in favor of the McGovernites:

(1) His "flip-flop" performance at the National Convention ended with a vote for McGovern;

(2) His choices for both state Democratic Chairman and Vice-Chairman Calvin Guest and Senator Barbara Jordan, are avid McGovernites;

(3) His choices to fill two of three Texas seats on the National Democratic Committee were McGovernites;

(4) The State "Governor's Convention", which he controlled, failed to take a meaningful stand against forced busing of our school children; it failed to repudiate the National Democratic Platform which endorses forced busing;

(5) That same state convention adopted a platform plank favoring the lettuce boycott, a potential disaster for Texas farmers and ranchers, and an embracing of the principle of the secondary boycott.

It is obvious that Mr. Briscoe is either incredibly confused, a political opportunist of the highest degree, or in sympathy with a McGovernite vision for America.

I consider the major goal of the next Governor of Texas to be the restoration of integrity and moral and political leadership to Austin. In my twelve years in the Legislature, as both a Democrat and a Republican, I have never been in the hip pocket of the lobbyists or a rubber stamp for House and Senate leadership. No party heirarchy controls me. I am free to serve the people of Texas as my own man and I will do just that.

I have specific recommendations to bring economy in government without which we are going to have both a personal and corporate income tax. As a former public school teacher in Houston, I stand for educational reform; for vocational and technical training which equips students with a marketable skill. I'm for more of our funds going to the essential teacher-student relationship instead of a superfluous education administrative bureaucracy. I stand for welfare reform. I stand for commonsense measures to increase the security of our citizens from crime and criminals, including a denial of bail to those accused of crime while free on previous bail, longer sentences and more time served before parole. I favor no-fault insurance and was the first elected official in Texas to advocate it, having first done so in July, 1971.

I know that I am considered the underdog in this race simply because of party affiliation, and that most observers view the balloting on November 7 to be little more than a PRO FORMA exercise. I do not share that view. I give the voters of Texas a lot of credit for having minds of their own in what has already been a year of political surprises.

Sincerely,
Hank Grover

THE FAMILY LAWYER

Mystery Mishap

At 7:13 p.m., in the main dining room of a large hotel, a mirror suddenly fell from the wall and landed on the head of an unsuspecting diner.

No one could figure out exactly why the mirror had fallen. Nevertheless the diner, painfully injured, filed a lawsuit for damages against the hotel.

"He has no case," the management argued in court. "He cannot point to any specific thing we did wrong."

But the court upheld the man's claim.

"Mirrors do not ordinarily fall off walls," reasoned the court, "unless someone is negligent."

The court was invoking a famous legal doctrine known as *res ipsa loquitur*—"the thing speaks for itself." This doctrine is widely used when there is no direct, eyewitness evidence of an act of negligence. Weighing the odds, the law decides that an act of negligence — even though unseen — probably did occur.

Thus:

Using *res ipsa loquitur*, a court found negligence when a car, parked on a steep slope, started to roll downhill. Chances were good, said the court, that the driver had neglected to set his brakes and cramp his front wheel against the curb.

Also using *res ipsa loquitur*, another court found negligence when a housewife encountered a piece of glass in a newly opened can of spinach. Chances were good, said the court, that someone in the canning factory had been careless.

But the mere fact that an accident has happened does not necessarily justify the use of the doctrine. Consider this situation:

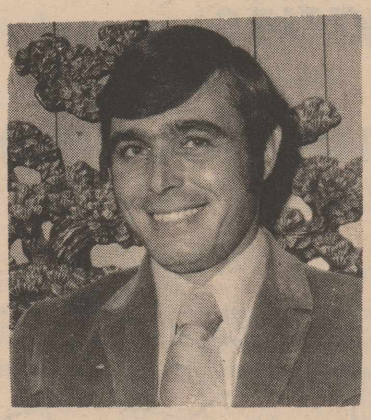

A woman climbing down from a trolley lost her footing and fell to the pavement. Demanding damages later from the trolley company, she said the car had probably moved just as she was getting off.

But the court said there was an equal probability that she herself had simply failed to watch her step. With no odds in her favor, said the court, she could not use *res ipsa loquitur* to win her case.

Judge Wilson gave an interesting talk on the duties of county officials at the Town and Country Home Demonstration Club last week.

Tonight at 7:30 in my office we will have a meeting of the Spanish-American Home Demonstration Club and elect officers and select a name. All homemakers are invited to attend. The club is our fifth club in the county. I hope we can organize a club in the Hart area also. If you're interested let me know.

NON-FAT MILK

Nonfat dry milk is the dairy product resulting from the removal of fat and water from fluid milk. Most of the protein, minerals, and vitamins (with the exception of vitamin A) of the fluid milk are retained. Buy and use nonfat dry milk - - it costs a lot less than fluid milk.

MYRTLE CREEK, ORE., MAIL: "Much has been made of the greater exemptions and lowering of income tax rates for the U. S. taxpayer. Unfortunately, not so much attention is devoted to the fact that his social security rates keep advancing, which, even if inflation were completely halted, would nullify net gain. And now a national magazine headquartered in Washington warns that it is a certainty that shortly after election this year, proposals will be made in Congress for a type of national sales tax. Such a tax would hit the taxpayer for more than the so-called savings he is making via the income tax proposals. It would be no favor. Maybe it would be well to quiz the candidates for this year on such a probability and get a commitment before deciding where to mark our ballots this fall."

DEFENSIVE DYNAMOES - - Longhorn defense sparkled Friday night in the 0-0 battle between the Horns and Kangaroos. The defensive tactics stopped the Roos inside Hart's 25-yd line three times.

Why You Should Re-Elect President Richard Nixon Nov. 7

LET'S LOOK At AGRICULTURE And STOCK RAISING

WE HAVE one of the most abundant supplies of food in history. Our exports of livestock, fresh meats, grain sorghums and grain are going to add many dollars to the general economy.

WE'RE SELLING COMMODITIES of which we've had surpluses—and we're helping provide jobs on trucks and ships at the same time.

HERE ARE SOME OF THE REASONS

PRESIDENT NIXON'S AGRICULTURAL ACT OF 1970 gave producers more flexibility and freedom in operations.

PRESIDENT NIXON'S ADMINISTRATION has turned around the farm situation that saw farmers get an increase in income of 6 per cent between 1951 and 1969 while wage rates went up 6 per cent every year.

PRESIDENT NIXON gave agriculture one of the most effective spokesman in recent history by appointment of Earl Butz as Secretary of Agriculture.

VACUUM

Steve doesn't mind. Only a little. He knows Dad has to travel. And some days Mom must work the swing shift.

Steve doesn't mind. Not very much. It's just that food doesn't make a dinner. It's like a vacuum when you're alone. And the evening — what's to do?

Such vacuums can affect adversely the developing personality of a child. They can also test a child's sense of security and self-reliance.

We claim no expertise in child psychology. Our concern, however, is that there be no *Sunday morning vacuum*. A Steve whose character is being molded by spiritual and moral training, a Steve whose home has the atmosphere of religious conviction and integrity . . . such a Steve is better equipped to meet the tests of loneliness and freedom.

In many families we cannot alter circumstances—but we can foster quality of character to cope with it. The Church is ready to help!
