

Advocates Panamaizing Texas.

Mrs. O. B. Colquitt, who has just returned from a trip to Panama with the Governor, believes that Texas should be Panamaized along sanitary lines. In an interview yesterday, Mrs. Colquitt said:

"The Governor and I were, very naturally, much interested in the sanitary miracle which has been wrought at Panama. The Isthmus has been the unhealthiest spot in the world, the breeding ground of yellow fever and malaria; typhoid fever, dysentery, and other tropical diseases were very common. Nothing is known of the death rate before the French undertook to build the canal, but the annual death rate during the eight years they were at work was 240 per thousand. The city of Colon, with a population of ten thousand, has a cemetery with one hundred and sixty-seven thousand graves.

Yellow fever has been wiped out. Typhoid fever and dysentery are almost eliminated. Malaria is almost controlled. The death rate per thousand is only seven and one-half among canal employees and less than three per thousand among white American employees, a lower death rate than in any other part of the world. I was told that the cost per day per man expended for the prevention of disease, worked the miracle.

"Colon and Panama are now sanitary cities. The houses are built well off the ground, are well ventilated, and carefully screened to protect against mosquitoes. Sanitary plumbing and sewer systems have been installed. Pure water in abundance is supplied. Rigid observance of the sanitary ordinances and of quarantine is required. A great modern hospital has been built with up-to-date equipment. I should be proud of Texas if we had many such hospitals throughout the State.

"The sanitary work in the interior has been as thorough as in the cities. Lakes and swamps have been drained, when possible. All that could not be drained are covered with oil so that mosquitoes can not breed. The jungle has been cut back from the towns or stations, so that the mosquito can find no resting place. Each station and town has a pure water supply and proper sewage disposal. Cats and other vermin have been destroyed. A thousand minor details of sanitary work have been done. And it all cost one cent per day per man.

"The marvelous results in Panama and the tremendous difference in the death rates during the French and American occupation mark the advancement in sanitary science during the last generation. What has been accomplished there can be done in every city, county, and state in America, if we but spend the money for the work. If America were Panamaized, we should save the 1,700 lives now sacrificed daily through deaths from preventable disease. If Texas were Panamaized, we should prevent more than 1,000 deaths per month from communicable diseases.

"One of the first things to be done in Texas is the building of a sufficient number of county hospitals to care adequately for the sick. Our Public Health Association estimates that 11,000 hospital beds are needed before

Three Lakes

October 30, 1912.

Editor Lynn County News: Here comes Little Willie to help Billie Yank carry the news.

I suppose it isn't necessary to mention the sand storm that passed through our country the other day, as I suppose most every one enjoyed the same blessing.

Prof. Yates and Roy Green had business in town Tuesday.

Mr. T. C. Marshall had business in town Monday.

Misses Eula Yates and Selah Reynolds and Prof. Yates called on the Green family Saturday night at the S. W. Joplin house.

Several of our young folks attended singing at Mr. Noble's Sunday evening. After singing the young people took supper with Miss Linnie Babston.

The Green boys have moved their camp to G. W. Hickerson's place to finish picking his cotton.

Mr. C. R. Strong and John had business in town Monday and Tuesday.

There will be preaching at Three Lake Sunday. We are glad to have preaching again as it seems rather dull without the "Gude Mon" to talk to us once in a while.

Come on Heel Fly with some more news; your letters are good.

LITTLE WILLIE.

Many thanks Little Willie for helping Billie Yank send in the news from Three Lake community. We regret it very much when one of our correspondents has to miss a letter. [Ed.]

We can say we have "no uncarred for sick" in Texas. Hospitals are absolutely necessary in the work to stamp out communicable diseases.

"Before leaving on our trip. I had completed plans for the 1913 Red Cross Christmas Seal Campaign. Three million Seals were sent us by the National Red Cross Society, and two million have already been sent to cities and towns of the State. We hope to realize \$25,000 from the sale this year so that we may continue our work to secure county hospitals for our own sick, and Federal hospitals for consumptive strangers in the Southwest, to start the public health educational exhibit on a trip throughout the State, and to maintain our hospital for children with bone tuberculosis at Galveston.

HULEN'S BIG RED APPLE CAR

Will be in Tahoka Saturday Sunday and Monday November 8th, 9th and 10th. Bring your sacks and get them full of Big Red Apples. Prices right. 9-1tr

Methusalah didn't care for photographs. You do—life is short. Ben Moore, South Side Square, Tahoka. 9-1t

FOR SALE—South Plains registered Duroc pigs, \$10. Bred gilts, \$25. C. C. McLaurine, O'Donnell, Texas. 9-12

FOR SALE, OR EXCHANGE

for white face bulls of equal value; one Registered Short Horn Bull, one Registered Red Poll Bull and one full blood Short Horn Bull. 9-11

J. B. MILES, O'Donnell, Texas.

WANTED—Good fresh eggs at 25 cents per dozen in trade by J. B. Keever, the "Bigger Dollar Store." 8-ft

Try a want ad. It will get it.

Tahoka Is High School Of The First Class, Now

The long worked for end has been obtained—the Tahoka High School has been recognized as a High School of the First Class by the State Department of Education, as the following letter will show:

Austin, Texas, October 28, 1913. Supt. E. A. White,

Tahoka, Texas, Dear Sir:

Your application for the classification of your school has been received at this Department. I beg to advise you that I have gone carefully into the matter of classifying your school, and am glad to report to you that I feel warranted in granting you classification of the first class. Your list of equipment is especially strong. I believe that your other departments will show equally satisfactory work as your department of science. Enclosed herewith please find a Certificate of Approval sooting that your school has been granted the above mentioned classification. I beg to advise you, however, that at an early date our official representative will call upon you and investigate your work, or

will request that you submit examination papers from your most advanced classes. Should he find that satisfactory work is being done his report will be favorable and will enable me to make this classification for the Tahoka school permanent. It is my sincere wish that his report may be favorable.

I beg to advise you that Hon. T. M. Bartly called on me last Saturday afternoon and went into detail concerning your school. I am under obligations to him for supplying me with quite a good deal of necessary information. In fact his report enabled me to arrive at a decision in the matter some days sooner than I would have otherwise been able to have done.

Wishing for you a prosperous school year, I am,

Respectfully yours,
W. F. DOUGHTY,
State Superintendent.

So you see it is in order now for our student body to do the work required of them in a satisfactory manner so the classification of our school may be made permanent.

Miss Bessie Chisum.

Miss Bessie Chisum, daughter of Mr. and Mrs. R. C. Chisum, was born May 2nd, 1891, died at Post City Monday night at eleven o'clock and was buried in Tahoka Tuesday afternoon. Funeral services were held at the Methodist church by Rev. J. P. Callaway. In spite of the fact that a severe sand storm was blowing the church was filled and a large number attended at the Tahoka cemetery.

Miss Bessie was a beautiful girl with a fine Christian character, having joined the Presbyterian church when twelve years of age, living and dying a consistent member of the church of her choice.

She was sick about two months and death came as a blessed relief and permitted the reunion with her mother who preceeded her a couple of years.

Her father and sister Miss Robbie, of Tahoka, and her sister-in-law, Mrs. Toney Chisum, of Albuquerque, were present at the last, but her brother Toney, and sister, Mrs. E. H. Wilkenson at Stamford were unable to be present.

Is After Creamery

This, Friday evening, the Tahoka Young Men's Business Club held a regular monthly meeting at the court house. At this meeting some very important matters came up for discussion and were acted upon by those present.

The first question to come up was what had been done about the Creamery? There were 290 head of cows signed up for, and as 400 head was required, and as many farmers who are now shipping cream had not been seen, and the time for making the report at hand; the President on a unanimous vote of the members present appointed a committee of four to go out Saturday and get five or six hundred cows pledged.

It was also reported that the official logger for the Colorado to the Gulf Auto Highway, Western Division, would come through Tahoka between now and the tenth of November and arrangements set on foot to do our part in this very important project.

A NEWS WANT AD GETS RESULTS. TRY ONE.

STATE OF TEXAS, COUNTY OF LYNN, ss:
I, W. B. Slaton, Cashier of the above-named bank, do solemnly swear that the above statement is true to the best of my knowledge and belief.

W. B. SLATON, Cashier.

Subscribed and sworn to before me this 25th day of Oct., 1913.
C. H. Cain,
Notary Public.

CORRECT—Attest:
W. D. Nevels
A. L. Lockwood
O. L. Slaton
Directors.

Wilson, Texas

October 28, 1913.

Wilson is still alive and on a live wire: It is on the Santa Fe R. R. half way between Slaton and Tahoka. We have phone connections all over the county of Lynn and long distance to many distant cities. A large territory of trade, a host of farmers and several ranches get their chuck here.

Mr. D. Rogers has completed two more country residences.

Mr. Lumsden and wife returned last week from the Fair and report a good time that only cost them a thousand dollars. He has just received 350 calves from Mr. Paul, of Slaton, and bought 150 steers from Mr. Opdyke. He has now about 3,500 head with plenty of grass and 100 tons of cake. They will bring fancy prices next spring.

He has dipped about 2,000 head of his neighbors cattle and will begin on his little bunch about the first. They will dehorn all steers.

We will soon ship out several more cars of maize heads. Plenty of feed to spare yet and lots of cotton yet to gather. Will have a fine gin next season and will easily gin a thousand bales.

We buy more eggs than Slaton and Tahoka because we ship them both ways. Yes, we pay the top prices for eggs. Yes, we shipped out 120 dozen yesterday and more to follow every few days.

Yes, we have a big trade in coal, salt, lumber, oil, gas and groceries, away out in New Mexico, because the prices are right; yes, wholesale and retail.

Yes, we have on foot now a couple of rural mail delivery routes. One on the east and one on the west side.

Say all ye good folks take the Lynn County News and get posted on the Progressive Plains country.

Yes, when the cotton is sold and the feed is all shipped there will be some nice homes built in the best best part of Lynn county.

OLD SINNER.

HULEN'S BIG RED APPLE CAR

Will be in Tahoka Saturday Sunday and Monday November 8th, 9th and 10th. Bring your sacks and get them full of Big Red Apples. Prices right. 9-1tr
R. B. HULEN.

I will buy all your fat Jersey and off colored calves and yearlings.—Loyal McGonagill. 2-ft

I'm not in business to knock but to take pictures.—Ben Moore: 8-9

McAdams Co. sell the old reliable McCormick Harvesters and Extras. 45-ft

LOST—From the livery stable yard a 300 pound, black boar. Kindly inform me of his whereabouts.—Ben King. 7-1i

FOR SALE—Wagon and team at a genuine bargain. See C. P. Gentry, at Thomas Bros. Drug Co.'s store. 5-ft

WANTED—Good, Fresh Butter, any quantity, at the Cash Meat Market.—Loyal McGonagill. 2-ft

Notice to Hunters.
Anyone hunting or wood cutting in the Tahoka Lake pasture without my consent will be prosecuted.

J. T. Lofton

From The Exhibit At Dallas Fair

Fair Park, Dallas, Texas, October 28th, 1913.

Editor News:

Tonight closes the 11th day of the Texas State Fair, and still the continues to come and go. On two special days, over a hundred thousand visitors passed through the gates, and jostled and jolted and elbowed their way through the immense throng of humanity; prominated the spacious grounds, took in the sights, ornamented themselves with badges, medals and banners, blew rubber whistles, loaded their satchels with souvenirs and advertising folders, and invested their dimes in the fakir's wares, drank pink lemonade, ate roasted peanuts and pop corn, rode over the scenic railway, saw the fat woman, visited the wild west shows, marched through the Exposition halls, looked on Lynn county watermelons, the big maize heads and Sudan grass, asked where where Lynn county was and expressed surprise that such products could be grown on a desert without irrigation. Our little exhibit has placed our county on the map and made people stop and take notice and make inquiry about the country, its products and soil and climate, and in every way has been a great advertisement for our section.

With 650 students in line the North Texas Normal College stormed the State Fair grounds this morning, amid the applause of the thousands already here. It was the biggest single procession of the Fair so far and well merited approbation. It was headed by their own band which boasts of two girl players; they executed several faultless marches; gave the college yell and scattered the grounds with their white hats and green ribbon bands. Denton county occupying a space directly opposite Lynn county, being the home county of the North Texas Normal, was the center of attraction for the day and Lynn county came in for a share of the attention of the student body, which is the largest that ever marched over the Texas State Fair ground.

We have registered quite a number of prospective home seekers who desire descriptive matter pertaining to our county and it behooves our Young Men's Business Club to get ready and prepare some up-to-date literature to meet the demand of those who desire information in regard to Lynn county and its future possibilities.

Five more days of the Fair yet remain and large crowds are expected to visit and look on our county display pass judgement on our agricultural opportunities and go home with a revised opinion of the South Plains, and a desire to locate among us where lands are yet cheap, and pure water, fertile soil and luxurious grasses abound.

Where melons smile in the Autumn sun,
And peaches wear the blush of maiden's fair,
And ruddy checked apples hang,
And the grape vines cling to the tight stretched wire—
While the purple fruit satisfies man's desire.

Where baldfaced cattle roam over the plain,
And big fat porkers are loaded upon the train,
All of these things I have told in prose and rhyme,
But the half has not been told because we have not had the time.

Very truly yours,

W. J. CROUCH,

OUR AGRICULTURAL PRODUCTS CROSS OCEAN TO REACH FACTORY.

Each Consumer Should Call for
 Texas-Made Goods.

Texas Farmers Produce \$600,-
 000,000 of Raw Factory
 Material Annually.

The farmers of Texas produce
 \$600,000,000 worth of raw material
 per annum which must pass through
 the factory before it is consumed,
 and \$100,000,000 is the raw material
 capacity of the Texas factories. The
 balance must journey to the foreign
 factory and a large per cent of our
 agricultural products cross the ocean
 to reach it. These statistics present
 a startling necessity for more factories
 and in defense of our growing
 country we must have them, but
 many of the factories we now have
 are compelled to seek out-of-state
 markets for their output and a few
 have had to shut down for want of
 a market.

Every consumer is a market-maker
 and can become a powerful factor
 in building up the manufacturing
 industry in Texas by calling for
 Texas-made goods. If we would patronize
 home factories, it would call
 for an investment of \$500,000,000
 in the manufacturing industry, give
 employment to 400,000 people and
 provide a home market for the products
 of the farm, ranch and mine.

The federal census reports show
 4,388 manufacturing establishments
 in Texas. The capital invested is
 \$216,876,000, there are 84,575 employees
 engaged in the business; the
 factory value of the annual output
 is \$272,896,000 and the value added
 to the raw material by manufacturing
 is listed at \$94,717,000. The
 four leading industries in the order
 of the value of their annual output are:

Slaughtering and meat packing,
 \$42,530,000; flour and grist milling,
 \$32,485,000; lumber and timber products,
 \$32,201,000; cottonseed oil
 and cakes, \$29,916,000.

During the past five years we show
 an increase in establishments of 1,
 100; in capital invested an increase
 of \$101,211,000 and an increase in
 employes of 26,683.

TRUMBULL TALKS DEVELOPMENT.

Pending Litigation Against the
 Katy Prevents Improvements
 and Extensions.

Mr. Frank Trumbull, the executive
 head of the M. K. & T. Railway
 in a recent communication discussed
 the litigation instigated by the At-
 torney General against that line. Mr.
 Trumbull has brought many millions
 of dollars to Texas and it is so sel-
 dom that we have an opportunity of
 hearing men who are capable of in-
 fluencing investments, that his ut-
 terances are here reproduced in part.

"I have been particularly inter-
 ested in the development of Texas,
 as it was formerly my home, and I
 have been for a number of years con-
 nected with properties which are im-
 portant factors in the industrial life
 of the state. More than that, I have
 been instrumental in getting a good
 many millions of dollars invested in
 Texas."

"We want to improve our Texas
 lines. We want to give better ser-
 vice. On the other hand we want to
 look everybody in the face, including
 our creditors and shareholders, as
 well as our Texas friends. We can-
 not ignore our responsibility to in-
 vestors. No conscientious man can
 do that."

"I regret that what seems to me
 an unwarranted and superfluous im-
 pairment of our credit has made
 some of the things I had hoped to
 do even less possible than they were

LIVE STOCK INSTITUTE

Ft. Worth Fat Stock Show Will
 Be Attended by the Leaders
 of Herds.

A state institute for instructing
 livestock in the art of correct shape,
 personal appearance and market con-
 ditions will be held at Ft. Worth,
 on November 22-28. For eighteen
 years the Fat Stock Show has been
 giving the livestock of this state a
 course of instruction annually in
 physical culture and the translation
 of the rules and regulations of the
 National Feeders' and Breeders' As-
 sociation into the language of the
 animal has done more to improve our
 livestock than any other educational
 influence in Texas.

The best stock on the farms and
 ranches will be sent as delegates
 to the Fat Stock Convention and re-
 ceive a special course of instruction
 in the latest models of physical per-
 fection and how to acquire it. These
 dumb animals are close students of
 market designs, breeding models and
 feeding standards of animal flesh.
 They listen attentively to the ruling
 and interpretation of the judges and
 return to the pastures, determined
 to build flesh and blood to conform
 to the verdict of those in authority.

They are given higher ideals in
 life. It is here they are taught les-
 sons in high-thinking and cheap-liv-
 ing. They are taught that producing
 revenue for man is the highest call-
 ing to which they can aspire and
 they are thoroughly instructed in
 the science of living economically
 and fattening cheaply and rapidly.

They are given authoritative in-
 formation on diets and shown how
 to take on the greatest quantity of
 flesh within the least time and with
 the smallest expense.

These cultured animals when given
 a course of instruction and decorated
 with blue ribbons, enter the elite of
 packing house society and parade at
 the head of the market, and the
 newspapers, with flaming headlines,
 give glowing accounts of their rec-
 ord-breaking triumphs.

The Texas steers once traveled
 overland under their own steam to
 Fat Stock Shows, piloted by cow-
 boys with six-shooters, but since they
 have become more refined and cultur-
 ed, they travel in palace cars and uni-
 formed attendants anticipate their
 wants. They are met at the train
 by the mayor with a brass band and
 conducted to palatial stalls, where
 they prepare for the exhibits.

before. The state of Texas had
 endeavored to find a way to prevent
 our making extensions, it could have
 hardly chosen a more effective meth-
 od than to bring suit for penalties
 aggregating \$105,000,000. We will
 do the best we can, all things con-
 sidered, but ought we to ask our
 friends to put more money into Tex-
 as except for maintenance of existing
 lines?

"If the suit brought by the state
 of Texas is successful, I and all my
 friends here and abroad will lose
 every dollar we put into that state.
 What would you do in my place?
 This is a broad, far-reaching ques-
 tion, but it is a broad and far-reach-
 ing condition and not a theory that
 confronts us. And I am sure you
 will agree with me that it is a very
 sobering question to ask ones self."

REMBRANDT AN EASY MARK.

The Great Painter Was a Victim of
 Reckless Speculation.

German art students who have been
 investigating the reason why Rem-
 brandt died hopelessly bankrupt have
 discovered that he was an incorrigible
 speculator. It had hitherto been pop-
 ularly supposed that he was compelled
 to remain poor because of his extrava-
 gant love of jewels.

Unfortunate speculations turn out
 to have been the cause of his financial
 ruin. Documents have been disinter-
 red showing that he officially informed
 the municipality of Amsterdam that
 he had suffered heavy losses in busi-
 ness transactions as well as through
 damages and losses on the high seas.

It was at a time, 1640-60, when all
 Europe was engaged in feverish mon-
 ey making in connection with Hol-
 land's meteoric commercial prosperity.
 Speculation took place on a reckless
 scale. Immense fortunes were sunk
 in shipping, banking and colonial en-
 terprises.

Rembrandt, whose highly artistic
 nature was sadly devoid of even ele-
 mentary business sense, fell an easy
 victim to the scheming speculators of
 that era of frenzied finance, and he
 lost his entire fortune. Many of his
 pictures were seized for debt by the
 legal authorities before the canvases
 were half finished. Bankruptcy final-
 ly overtook him and compelled him to
 sell all his properties, his home and
 priceless works of art under the ham-
 mer at sacrifice prices.—Philadelphia
 Ledger.

Not only strike when the iron is hot,
 but make it hot by striking.—Ottor
 Cromwell.

TEXAS SUGAR INDUSTRY

Built Up by Home Patronage
 State Sands Second in
 Production.

Sugar and related products are
 obtained from three widely different
 classes of plants, to-wit: cane, beets
 and maple trees. In Texas cane is
 the only article producing sugar in
 commercial quantities. The soil and
 climate of the coast country from
 the Mississippi to the Rio Grande
 are especially adapted to the propa-
 gation of sugar cane.

We have 40,000 acres in cane, pro-
 ducing 400,000 tons, valued at \$4.50
 per ton, and the average production
 is ten tons per acre. The sugar
 cane crop for 1912 approximated \$2,-
 000,000 in value. The entire pro-
 duction is manufactured in Texas.
 We ship into the state from Porto
 Rico for refining at our mills 10,000,-
 000 pounds of raw sugar per annum,
 and approximately 50,000,000
 pounds from Cuba. We manufac-
 ture per annum in Texas 250,000
 barrels of sugar and 20,000 barrels
 of syrup. One-half of the Texas
 production is compelled to seek a
 market outside the State, although
 we consume four times more sugar
 than we produce. The investment in
 this industry approximates \$2,000,-
 000 and gives employment to 2,000
 people. The annual output has a
 factory value of \$3,000,000. Texas
 ranks second with the states in the
 Union in production of sugar cane,
 Louisiana leading with almost ten
 times the acreage of Texas. In the
 United States 6,240,000 tons of sug-
 ar cane were produced in 1909, ac-
 cording to the federal census reports.
 The West Indian Islands furnish the
 bulk of the raw sugar manufactured
 in the United States.

The beet sugar producing states
 are on the Canadian border and the
 Pacific Coast. The production in the
 United States in 1909 was 3,933,000
 tons.

The average consumption of sugar
 per capita in the United States is
 87 pounds per annum. A little more
 than one-half the sugar consumed is
 for household purposes; the remain-
 der is used in the manufacturing es-
 tablishments chiefly in the prepara-
 tion of articles utilized for food and
 drink.

King of Flowers.

On the score of age alone the peony
 should command the interest of all
 flower lovers. It has a history which
 began many hundreds of years ago.
 The tree peony, *Paeonia moutan*, is a
 native of China. This peony, more
 than any other flower, has been the
 glory and pride of the Chinese for near-
 ly 1,500 years and has been a subject
 for their painters and a theme for
 their poets. In China for more than
 1,000 years a record has been kept of
 the percentage of seedlings of this
 peony and their characteristics. Its
 great beauty and fragrance made it
 centuries ago the favorite flower of
 China's emperors, and it was called
 Hwa Wang—king of flowers.—Subur-
 ban Life.

Just Try It.

A curiosity in arithmetic has recent-
 ly been worked out by a British as-
 tronomer in answer to the question,
 What is the largest number that can
 be expressed with three digits?

The answer is 9⁹ (the ninety-ninth
 power of nine).
 The figure which this represents is so
 big that it is awesome. If it were
 printed in full it would fill thirty-three
 volumes of 800 pages each of fine type.
 The first twenty-eight figures are
 428,124,773,175,747,048,036,987,115,9, and
 the last two are 89. In between these
 are 339,692,070 figures.
 If you don't believe it try it and see.

STOMACH TROUBLE FOR FIVE YEARS

Majority of Friends Thought Mr.
 Hughes Would Die, But
 One Helped Him to
 Recovery.
 Pomeroyton, Ky.—In interesting ad-
 vices from this place, Mr. A. J. Hughes
 writes as follows: "I was down with
 stomach trouble for five (5) years, and
 would have sick headache so bad, at
 times, that I thought surely I would die.
 I tried different treatments, but they
 did not seem to do me any good.
 I got so bad, I could not eat or sleep,
 and all my friends, except one, thought I
 would die. He advised me to try
 Thedford's Black-Draught, and quit
 taking other medicines. I decided to
 take his advice, although I did not have
 any confidence in it.
 I have now been taking Black-Draught
 for three months, and it has cured me.
 I haven't had those awful sick headaches
 since I began using it.
 I am so thankful for what Black-
 Draught has done for me."
 Thedford's Black-Draught has been
 found a very valuable medicine for dis-
 arrangements of the stomach and liver.
 It is composed of pure, vegetable herbs,
 contains no dangerous ingredients, and
 acts gently, yet surely. It can be freely
 used by young and old, and should be
 kept in every family chest.
 Get a package today.
 Only a quarter.

In his day of progress the man who would succeed
 must be informed about the world's doings. The local
 paper gives him local information that is needfull, but it
 cannot cover the whole field. Hence the man that would
 keep step with the march of the times will take a general
 newspaper.
 The Fort Worth Semi-Weekly Record has taken front
 rank among the great publications of the South and West.
 It is especially prepared for the reader who has not the
 time or the opportunity to read a daily paper.
 First of all, it is a newspaper. The record believes
 that the people of the country and the village are as much
 interested in current events as the the people of the city.
 In the next place, it carries features suitable for all
 members of the family—women and children as well as men.
 Last, but by no means least, the record's editorial pol-
 icy comprehends the economic welfare of the farmer and
 stock raiser. The Record is an acknowledged leader in the
 discussion of public questions in their relation to agricul-
 tural production.
 In subscribing thru this office you can get the Fort
 Worth Semi Weekly Record together with the Lynn County
 News, both papers one year for only \$1.75. Accept this
 remarkable offer.

FIRE IN IRKUTSK.
 Flaming Torches and later Wagons.
 in a peculiar way in the districts, each with and watch-tower. On day and night who scans the house of smoke. When the headway for him gives the alarm and the engines dash out. The spectator is amused, not so much at the dash as at the engines. They are primitive, and the use of them is more so.
 We went to a fire one Sunday afternoon in Irkutsk, continues Mr. Richardson L. Wright in his book "Through Siberia." It was close to our hotel, so that we had an excellent view. First came a troika team that dragged a hook and ladder carriage. On the carriage clung the firemen, howling Cossacks with brass helmets jammed down over their ears, who carried in one hand—how the symbolism would have stirred the heart of Maeterlinck.—flaming torches. Behind the hook and ladder was the hosecart, and then came a hand engine of the type our grandfathers used to drag to fires. After that, for two blocks, trailed a queue of water filled hogsheads on wheels. The cavalcade passed us in a cloud of dust, accompanied by the yells of the torch bearing firemen. When the supply of water ran out the carts dashed down to the river and were replenished.
 This crude high pressure service gave rise once to a rather humorous incident that the Irkutskians tell with great glee. During a fire several years ago a string of water wagons went down to the river, were filled and came rumbling back. When they reached the fire the water was gone. The enthusiastic captain of hogsheads had neglected to put back the plugs in the barrels and had spilled his supply for several blocks along the main street.

TWO GREAT STARS.
 Sirius is the Brightest of All, and Canopus Comes Next.
 The results of that instrument of precision, the meridian photometer, are that Sirius is seven-tenths of a magnitude brighter than Canopus, which easily teaches that Sirius is brighter than any other star.
 Canopus, next in brilliancy, is visible from all that portion of the world south of north latitude 37 degrees, since its declination is south 53 degrees and 53 is the complement of 37.
 It therefore never rises above the south horizon of any point 37 degrees north. The latitude of this observatory is 34 degrees 17 minutes; hence Canopus rises very nearly 3 degrees above the watery wastes in the Pacific sea. Its low altitude makes it much fainter than higher Sirius, as the light must traverse layers of dust and water vapor near the earth's surface. Still it is magnificent, especially when standing over a calm ocean surface.
 Canopus has no parallax that the highest power telemicroscopes that can be made are able to measure. This is one of the most overwhelming facts within the entire range of human experience. This means that if one goes to Canopus with the most powerful telescope ever made, turns and looks back this way, the base line, the entire diameter of the orbit of the earth—185,764,000 miles— dwindles to a minute point too small to be measured by any microscope. Some idea may be had of the immensity of the universe by thinking of this fact during each spare minute. Better to so think than to waste the precious moments.—Edgar Lucien Larkin in New York American

Uncle Sam's Antecedents.
 A reader asks how the name Uncle Sam came to be adopted for the imaginary genius who directs the destinies of this nation. The answer is very simple. "Uncle Sam" is merely a popular expansion of the letters "U. S." Albert Matthews once wrote a forty-five page monograph to prove this, and he showed that the expression went back to the year 1813. James Fenimore Cooper in "The Prairie" in 1827 spoke of "the well known initials that have . . . gained for the government of the United States the good humored and quaint appellation of Uncle Sam."—New York Post.

What She Lacked.
 Wigg—I suppose Mrs. Pneurich has the best of everything. Wagg—Well, perhaps the best of everything except manners.—Philadelphia Record.

SPIRIT OF THE AIR.

It Permeates the Entire Being of the Flying Bird.

The bird is little more than a drift of the air brought into form by plumes. The air is in all its quills. It breathes through its whole frame and flesh and glows with air in its flying, like brown flames. It rests upon the air, subdues it, surpasses it, outraces it—is the air, conscious of itself, conquering itself, ruling itself. Also in the throat of the bird is given the voice of the air. All that in the mind itself is weak, wild, useless in sweetness, is knit together in its song.
 As we may imagine the wild form of the cloud closed into the perfect form of the bird's wings, so the wild voice of the cloud into its ordered and commanded voice, unwearied, rippling through the clear heaven in its gladness, interpreting all intense passion through the soft spring nights, bursting into acclaim and capture of choir at daybreak or hissing and twittering among the boughs and hedges, through the heat of day, like little winds that only make the cowslip bells shake and ruffle the petals of the wild rose.
 Also upon the plumes of the bird are put the colors of the air; on these the gold of the cloud that cannot be gathered by any covetousness; the rubies of the cloud, that are not the pride of Athena, but are Athena; the vermilion of the cloud bar, and the flame of the cloud crest, and the snow of the cloud and its shadow, and the melody of the deep wells of the sky—these, seized by the creating spirit woven by Athena herself into filaments and threads of plume, with wave upon wave following and fading and breast and throat and opened wings infinite as the dividing of the fog, and the sifting of the sea sand, and the white down of the cloud seem, to flutter up between the strong plumes—seen, but too soft for touch.

And so the spirit of the air is put in and upon this created form, and it comes through twenty centuries, a symbol of divine help, descending the fire to speak, but as the dove bless.—From John Ruskin's "The Queen of the Air."

WHEN THE EARTH QUAKES

Stresses and Strains to Which One Globe is Subjected.
 When the stairs creak and the furniture gives out mysterious crackling sounds at night we sometimes sit up in bed and wonder if there is a burglar about, but it doesn't occur to us that what we hear is really an earthquake on a small scale. The night air has caused the wood to contract with a snap, thus accounting for the abrupt sounds. This is just exactly what the earth is doing periodically. To a geologist, resting on the polished surface of the table, this disturbance is probably as violent as an earthquake is to a human being.
 An earthquake is a terrible thing. It comes without warning. It is over before one knows which way to fly, and its fury can be abated by no man.
 Yet to the geologist earthquakes are only symptoms. They are not causes so much as results—results of great stresses and strains within the earth that cause slippings and slidings from time to time. If the rocks on the shell of the earth slip and grate against each other so much as an inch along a fissure ten miles in length a shiver is felt. A slip of fifteen feet along a course of 200 miles sufficed to bring about the terrible San Francisco earthquake and fire.
 These strains and stresses accumulate steadily within the earth. The point at which they have once found relief is weaker to resist the next strain. It slips again presently. By successive movements its sides become more and more displaced. Rock layers, mineral veins, coal seams that cross the line of displacement, are joggled out of their course. So are roads, fence lines and brooks that run across it on the surface. In the San Francisco quake one man's front yard was moved twenty feet to one side of his house, and in another place the slip line came so close to a man's barn that some piles of straw, thrown out from the windows, were carried away. In Japan a cliff twelve feet high interrupted a roadway, and thousands of similar cases might be cited. These were primary movements along the line of the disturbance that caused the earthquakes.—Brooklyn Eagle.

Origin of Iron Duke.

The Iron Duke, of course, was Wellington, but he came by the nickname in a roundabout way. He was never so called until long after Waterloo. An iron steamship, a novelty at the time, was built in the Mersey and named the Duke of Wellington, and so the vessel came to be known as the Iron Duke, the transition being easy and obvious. It was the duke's union of resolution and physical energy which made the popular name for the Mersey built steamship to fit him like a perfect cap. Such, at least, is the explanation of his biographer, Sir Herbert Maxwell.—London Chronicle.

Song of a Little River.

There's no music like a little river's. It plays the same tune (and that's the favorite) over and over again, and yet it does not weary of it like men fiddlers. It takes the mind out of doors, and, though we should be grateful for good houses, there is, after all, no house like God's out of doors. And, lastly, sir, it quiets a man down like saying his prayers.—Robert Louis Stevenson.

Storage of Potatoes

The keeping of sweet potatoes in storage is one of the most important problems the grower has to deal with. There are a few things that should be kept in mind when handling the crop and when storing:

1. Dig the potatoes carefully and dry thoroughly in the sun.
2. Sort out the sound ones and handle them carefully. A bruised potato does not keep well.
3. Keep the potatoes from getting chilled.
4. Place the potatoes where they will be dry and warm. A temperature of from 50 to 65 degrees has been found to be about right for keeping sweet potatoes.

Making a circular bed about six feet in diameter, in some sheltered location, by throwing up dirt from the sides. Put on top of this a few inches of straw or hay. Erect a ventilator or a flue in the center of the bed. The ventilator should be six inches in diameter.

The farmers of Texas produce \$600,000,000 worth of raw material each year which must pass through the factory before it is consumed, and \$100,000,000 is the raw material of the Texas factories. The balance must journey to the foreign agricultural products cross the ocean. On top of this is a startling necessity for more factories and in defense of our country we must have them, but the factories we now have are compelled to seek out-of-state markets for their output and a few have had to shut down for want of a market.

Every consumer is a market-maker and can become a powerful factor in building up the manufacturing industry in Texas by calling for Texas-made goods. If we would patronize home factories, it would call for an investment of \$500,000,000 in the manufacturing industry, giving employment to 400,000 people and provide a home market for the products of the farm, ranch and mine.

The federal census reports show 4,588 manufacturing establishments in Texas. The capital invested is \$216,876,000, there are 84,575 employees engaged in the business; there are more potatoes and cover, as before. A layered bed several feet in height can be built if sideboards are used.

When storing sweet potatoes it will be found profitable to pay close attention to details. The potatoes should be kept dry and warm, and be properly ventilated. —St. Louis Post Dispatch.

A Sure Remedy For Lazy Liver

Go to Thomas Bros. Drug Co. For This Safe, Reliable Remedy And Get Your Money Back If It Fails

There are very few remedies that gain the confidence of druggists as Dodson's Liver Tonic Does. Thomas Bros. & Co. sells it and back up the sale of every bottle with the money back guarantee that the price will be refunded if it fails to give complete satisfaction.

Dodson's Liver Tonic costs 50 cents a bottle. It is the safest and best remedy for torpid liver, constipation, biliousness, etc., that has ever been sold in this city. It takes the place of dangerous calomel and does not lay you up as a dose of calomel often does. A bottle in the house is as good as fifty cents in the bank. If you or your family need a liver tonic you have the medicine ready. If it fails you get your money back.

Be sure you get Dodson's Liver Tonic when you ask for it. There are imitations of it that may disappoint you. 9-11

Born, Friday October the 24th to Mr. and Mrs. O. C. Jackson, nine miles east of Tahoka, a son.

\$100 Reward, \$100
The readers of this paper will be pleased to learn that there is at least one cure for all diseases. It is a new discovery, a scientific fact, and that is Catarrh. Hall's Catarrh Cure is the only positive cure now known to the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system, thereby building up the constitution and assisting nature in doing its work. The proprietors have so much faith in its curative powers that they offer One Hundred Dollars for any case that it fails to cure. Send for list of testimonials.
Address F. J. CHENEY & CO., Toledo, Ohio. Sold by all Druggists, 7c.
Take Hall's Family Pills for constipation.

A Double Wedding

Rev. T. A. Knight, a Methodist preacher of O'Donnell community was married Sunday to Miss Lillie Haws, Rev. Geo. B. Killough officiating. At the same time Miss Haws' brother Clinton Haws, a young man said to be 22 years old, married Miss Dona Knight, the daughter of Rev. T. A. Knight, who married Clinton Haws' sister, Miss Dona Knight is said to be not quite 18 years of age.

Disolution Notice

I wish to thank my friends for the excellent patronage recorded while I have been in the coal and grain business. I have sold my business to Edwards Bros. Coal Co., who will carry on at our mills, block north of the depot. We have ordered and will manufacture a large increase of coal and grain of all kinds. I shall expect all those knowing themselves to be indebted to me to come in and pay up promptly as I must balance my books at once. Yours respectfully,
S. N. MCDANIEL.

NOTICE TO HUNTERS

Anyone hunting or wood cutting in my pasture three miles south of Tahoka without my consent will be prosecuted. 8-11
W. C. COWAN.

Try the Tahoka Art Studio for first class portrait work.—Ben Moore, Prop., S. of Sq. 8-

We call attention to our colt show ad on the last page.

While on their way to Lubbock last Saturday, Geo. E. Tiernan and family had a serious accident near the L7 headquarters. The family consisting of Mr. and Mrs. Tiernan, Jack age seven and Elwood, age four, were on their way to Lubbock in order that Mrs. Tiernan might have some dental work done, and in crossing a different stock-guard at a good rate of speed, the car plunged off the guard into the pit, throwing Mrs. Tiernan and Elwood clear through the windshield, cutting her face terribly and hurting Elwood considerably. The steering wheel saved George, but bruised his breast somewhat. Jack occupied the rear seat, and while shaken up a bit, was not otherwise hurt. Their car was in such condition that it could not be run on its own power. Sam Aracri carried them to Lubbock, where the doctors took twelve stitches in Mrs. Tiernan's face. Latest reports say she is getting on very well, and her many friends hope to see her at home.

HIGH BLOOD PRESSURE.

It Causes Hardening of the Arteries and Other Grave Troubles.

Physicians have always studied the pulse, because it gives valuable information concerning the body's condition of health or disease. But it is only recently that they have begun to use the term "blood pressure" frequently and to regard the amount of that pressure as of great importance. That is because they now have instruments for accurately measuring the pressure, which previously they could only estimate by feeling the pulse.

Blood pressure or the degree of tension of the blood current within the arteries is chiefly significant because a permanent increase in it is quite sure to be followed in time by hardening of the arteries and by the degeneration or disease of important organs, especially the kidneys.

The blood pressure is increased by a number of causes that increase the force of the heart beat or that contract the smaller blood vessels. Any excitement—anger, joy, fear, "nervousness"—raises it temporarily. But that is of little importance unless the emotion is frequently repeated or unless the person already has diseased arteries. The blood pressure that is permanently high is more serious. That comes from long continued mental excitement, such as worry, business anxiety or political strife or from the action of certain poisons that are formed in the system and not properly excreted.

These poisons come from the waste products of digestion, especially in large meat eaters. They raise the blood pressure by causing the smaller arteries to contract.

TAN-NO-MORE,
THE SKIN BEAUTIFIER,
IT HAS NO EQUAL.
IT HAS NO COMPETITOR.
IT STANDS IN A CLASS TO ITSELF,
IT IS UNIVERSALLY COMMENDED
BY THOSE WHO USE IT.
It is distinctly two preparations made into one: First, it serves as a Massage Cream, thoroughly cleansing the pores of the skin of all impurities, and directly rebuilds the tissues and aids circulation. Second, it serves as an invisible powder, that can not be detected if properly applied, and does not run or rub off as does ordinary powder. You can use Tan-No-More during the day, as it beautifies the skin when applied, and serves as a protection against the sun in summer and winds in winter. Tan-No-More is guaranteed to please you, or your money back.—Price 50 and 35c. All Dealers.—We also manufacture Freckle-er-preparations.
Will be pleased to mail our little booklet explaining more fully our entire line.
