REV. OMER JARRELL, Pastor.

IMPROVEMENTS AT STATE U

Construction of the new dining hall for the University of New Mexico is progressing rapidly, according to announcement from Mrs. Walter Simpson, who is in charge of this new building located at the north of the campus. The hall will accomodate 225 persons.

Indian architecture is used in the building, which was designed by George Williamson and is being built by the Lembke Construction Company. It is expected that it will be completed about December 15. The cost is estimated at about $43,000.

The building consists of a lounge, main dining hall, rest rooms for men and women, banquet room, kitchen, three sleeping rooms, a private bedroom with bath for the director, and a basement for storage.

The lounge is a room 20 by 30 feet and will be used as the entrance unit. In this room is a large fireplace. Off the lounge are rest rooms for men and women. There is also a linen closet in the lounge. The light fixtures are all in wrought iron. The windows are French, as are the steel casements. There is an open terrace just outside the lounge.

The main dining room is 45 by 75 feet and is higher than the lounge and the kitchen. It has three 9 foot windows and ventilation on all four sides. The floor is maple and will probably be used for dancing later. There is a banquet room off the main dining hall. It is closed off with a folding steel curtain.

The kitchen is to have red tile floors and glazed tile walls 7 feet high, an unusual feature for a kitchen. It is equipped with an electric dish washer, metal dish warmers, and steam coils. In the preparation unit are potato peelers, potato dicers, and a vegetable sink.

The cooking unit is to be equipped with a hotel range, a gas range, steam jacketed roasting kettle, and a steam vegetable cooker. Just off the kitchen is a small enclosed yard where the garbage cans are to be placed so they are not visible.

There are also to be installed two large electric refrigerators using the ammonia system. The pantry and bake room are also off the kitchen. In the pantry are several cases for salads and other dishes. There will be four exhaust fans in the kitchen to carry out the odors and bad air.

President Hoover Issues Thanksgiving Proclamation

A custom of long standing, wherein the President of the United States, not only issues a proclamation, but asks that the American people give thanks for the blessings of the past year. Conforming to that custom a proclamation was issued in Washington November 6th, setting the date of November 28th, as the day of thanksgiving.

"By the President of the United States of America.

"A proclamation.

"At this season of the year, when the harvest has been gathered in, the thoughts of our forefathers turned toward God with thanksgiving for the blessings of plenty and provision against the needs of the winter. They came by custom to look to the chief magistrate to set apart a day of prayer and praise whereon their thanks as a united people might be given with one voice in unison. God has greatly blessed us as a nation in the year now drawing to a close. The earth has yielded an abundant harvest in most parts of our country. The fruits of industry have been of unexampled quantity and value. Both capital and labor have enjoyed an exceptional prosperity.

"Assurance of peace, at home and abroad, have been strengthened and enlarged. Progress has been made in provision against preventable disaster from flood and pestilence. Enlightenment has grown apace in new revelations of scientific truth and in diffusion of knowledge. Educational opportunities have steadily enlarged. Enduring advance have been gained in the protection of the public health. Childhood is measurably more secure. New experiences and new knowledge in many fields have been recorded from which a deeper wisdom may grow. We should accept these blessings with resolution to devote them to service of Almighty God.

"Now, therefore, I, Herbert Hoover, President of the United States of America do appoint and set aside Thursday, the 28th day of November, as a day of national thanksgiving, and do recommend that all our people on that day rest from their daily work, that they should extend to others less fortunately placed a share in their abundance and that they gather at their accustomed places of worship, there to render up thanks to Almighty God for His many blessings upon them, for His forbearances and goodness.

"In witness whereof I have hereunto set my hand and caused to be affixed the great seal of the United States.

"Done at the city of Washington this 5th day of November in the year of our Lord, one thousand, nine hundred and twenty-nine, and of the independence of the United States, the one hundred and fifty-fourth.

"HERBERT HOOVER.

(Seal)

"By the President:

"Henry L. Stimson,

"Secretary of State."

CHRISTMAS TREES

The News wants to go on record this year as favoring a Christmas tree on the turn block at each corner of the square, and will do it's bit gladly, to help put them here.

And lets put them up soon. Weather conditions may be such that every one won't get to be in town the last few days before Christmas, so why not put them up at least three weeks before. There may be children in the country who will not have a chance to see any other Christmas tree.

There isn't anything that would add more to the Christmas feeling of Good Will to All, than the sight of a Christmas tree.

The News suggests that the Chamber of Commerce, the Women's Club and the Boy Scouts take this up.

We are sure the Utilities company will see to the lighting of these trees—and their brightness will say Merry Christmas both day and night.

Then if each merchant will use Christmas decorations for their windows, the town will have the welcome sign.

The cold weather this month seems to be unusual. It has happened before and will happen again, but, like California's bad weather, it is "unusual." We were told by the weather sharps that this was going to be a cold winter. These forecasts declared that trees were growing heavier bark than usual, fur and hair on animals was heavier, corn husks were thicker, and so on. They argued that these things meant a colder winter—and so far they seem to have hit it. Don't know but what they may be right. There may be something in nature that provides life, animal and vegetable, with the ability to prepare for colder weather. What makes winters colder or warmer? Perhaps the same thing also grows protection on animals and vegetables. Anyway, they said, these weather prognosticators, that it would be colder and it is. Cleve Hallenbeck probably will say they "guessed right, once." — Roswell Record.

FASHION'S DECREE OPPOSED

When the demi-mondians of Paris decided to exhibit their legs publicly as well as privately and the fashion edict of knee-length skirts went forth, the feminine world was startled but promptly bowed to the decree. Now another edict has come from Paris, as radical as the former, commanding an immediate return to long dresses, and the feminine world is anguished over the bitter choice of surrendering short-skirt "freedom" or consenting to look "old-fashioned." Prominent women have written in outrage to the papers, declaring that this time they simply will not bow the knee of Paris and girls who have to "crash the subway" mournfully assert that they simply cannot "wear a train." Never before has there been such a clamor of rebellion, but if the past is any indication of the future, the rebels of all classes will soon be found in line on the principle that a woman might as well be in her coffin as in old-fashioned clothes.

Even some of the men who at first were shocked by the spectacle of legs of all degrees of beauty (and ugliness) have joined in the protest. After all, legs are legs even if no longer a "treat" on account of their multitude and disturbing variety. To the delight of the protesting women, the Science Service of Washington has marshalled an impressive list of medical authorities and hygienists who hold that mud-sweeping skirts are unsanitary and should nnot come back, But Paris will merely laugh at such futile struggles, knowing that its will is law. Meanwhile the philosophic non-partisan wonders why a sane compromise of skirts three or four inches above the ankle is not possible of arrangement.—Albuquerque Journal.

"DOPE"

It has been noticed the "wildcats" have figured out some "dope" that makes them believe they can defeat the Rams on Thanksgiving day. They say that they beat a team 26-6 that held the Rams to a scoreless tie. Now, it is admitted that this works out fine on paper, but can they prove they can keep the Rams away from their goal line on the Portales field November 28?

Some more dope that the Wildcats might consider is that the Rams beat Artesia 23-0, and Artesia beat Roswell 18-0, then Clovis beat Roswell 26-6. From this dope the Rams should beat Clovis by at least one touchdown, but a game does not always go the way the dope does, the game between Artesia and Portales proved that.

The best way to see who will have the big end of the score on Thanksgiving day is to go see the fun.

Come in and inspect our line of Christmas Cards. Portales Valley News.

Telephone News

70 New Telephones Today

MORE TELEPHONES—MORE PEOPLE YOU CAN REACH QUICKLY

Today you can reach 70 more telephones throughout the Mountain States territory than you could yesterday. Tomorrow, 70 more will be available. During each hour of every working day, approximately nine more will be added, for at the end of October, the number of telephones installed in the Mountain States had been about 70 a day, throughout this year.

Perhaps you may have no reason to call any of these new telephones today, but tomorrow one of them may provide a contract that is most necessary to your business. Your salesmen may call some of these new subscribers to sell by telephone. Some may be manufacturers of products you need—others may be local merchants who enable you to reach the consumer.

The 21,000 new telephones which will be installed in the Mountain States territory this year mean more people you can reach quickly; more things that can be quickly and satisfactorily accomplished by telephone. With each working day additional offices and homes are linked together by the fastest, most personal means of communication. Each day increases the value and usefulness of your telephone.

THANKSGIVING

There are certain days in the year when we all like to be at home—one is Thanksgiving. If you are unable to be with your family, exchange greetings by telephone. Perhaps you will want to invite friends or relatives from out of town to have dinner with you—telephone, it's the quickest and most personal way of communicating your invitation.

Sore Throats and Coughs

Quickly Relieved by this Safe Prescription

Here's a doctor's prescription that is really throat insurance. Sore or irirtated throats are relieved and soothed almost instantly with the very first swallow. About 90 per cent of all coughs are caused by an irritated throat; consequently for most coughs too there is nothing better than this famous prescriptionit goes direct to the internal cause. It is put up under the name Thoxine and is guaranteed to stop coughs and relieve sore throats in 15 minutes or your money will be refunded. Singers and speakers find Thoxine very valuable.

The remarkable thing about Thoxine is that while it relieves almost instantly it contains nothing harmful, is pleasant tasting and safe for the whole family. Ask for Thoxine 35c., 60c., and $1.00 bottles. Sold by

New Mexico Drug Co.
And all other drug stores.

Buy Your New Battery at Brackens Battery Shop

SALINA, KANSAS, MOTORIST RETAINS ANCIENT AUTOS

There wouldn't be any used cars for sale if all automobile buyers were like William Butzer, President of the Butzer Packing Company of Salina, Kansas.

Like a majority of motorists, Mr. Butzer occassionally succumbs to the lure of a bright new car. But there the resemblance ends he refuses to part with his old cars. His "stable" now includes three Oaklands which he has been buying and driving since back in 1916.

The oldest of the three cars is a high-topped touring model which has been driven far beyond the 100,000 mile mark. The second was purchased in 1924 shortly after Oakland had staged a nation-wide demonstration of four-wheel brakes with its fleet of "true Blue Travlers." The speedometer of this car now carries more than 50,000 miles. The latest of the trio is an Oakland All-American landaulet sedan which Mr. Butzer has driven only 1,500 miles.

The three cars present an interesting study in the evolution of the automobile since 1916. The principal external changes include a progressive reduction in height, wider, more flaring fenders and narrower, higher radiators. The internal mechanical details seldom seen by the average owner changes fully as important. Among the develpoments to be found in the latest Oakland are the Cross Flow radiator, thermostatic control of engine temperature, crankcase ventilation, the G-M-R cylinder head, rubber engine mountings, fuel pump Harmnoic Balancer, internal expanding mechanical brakes and many other features which have increased the comfort and safety of motoring since 1916.

And a more intimate "inside view of the cars under the exacting eye of the modern engineer, who deals in such measurments as one ten-thousandth of an inch, suggests a comparison between the "works" of an alarm clock and those of a finely built watch.

"That may all be true," agreed Mr. Butzer, "But you can't get away from the fact that both of the old cars are in excellent shape and are running fine. Certainly the Oakland is a better car but the old ones are still good. My men and I get a lot of service out of them. They are worth more to me than to anyne else so why should I turn them in?"

We handle the famous PHILCO line of batteries. They are, in our opinion, the best battery for the money that we know of. And what's more they carry a money-back guarantee. The customer is fully protected.

When, and if you find a battery priced cheaper than ours, just remember that we, too, could handle "so-called" batteries that we would be able to make a very attractive price on. We appreciate any business you care to give us, so therefore do not wish to run the risk of losing your good will by selling, or offering for sale, a battery that is not worth the money.

—BATTERY TESTING AND REPAIRING—

We are completely equipped to "weed out" and diagnose battery troubles of all kinds. And do all kinds of repairing from the smallest job up to the best of re-built jobs which carry the money-back guarantee. We CHALLENGE anybody, anywhere, to turn out better repair jobs than we do, both in neatness, and quality of workmanship.

—BATTERY RE-CHARGING—

Ours is truly a "BETTER CHARGING SERVICE!" You are assured that your battery will receive the greatest amount of charge that it will take. (This varies with different batteries according to age and general condition.)

—DISTILLED WATER—

We use only pure distilled water here. Is distilled by us, so we do not have to guess at the quality of same. This water is also very good for drinking. If the regular water does not agree with you, why not try a gallon, or more of our pure distilled water?

If you have mechanical trouble with your car, we refer you to the garage man, but if it is battery trouble—WE WANT THE JOB!

1928 GOOD FARM YEAR

sized farms had the best year in 1928 since the big farm slump of 1921, according to a Department of Agriculture report. They averaged $1,334 in cash returns against $917 for the low year of 1922. Food reaised on the farm and consumed at home was estimated worth an average of $269.

The cash returns included the returns on the labor of the farmer and his family, estimated at an average of $768 at ordinary farm wages.

Expenses were higher in 1928 than in 1927, averaging $1,518, the department found Increases in frams, averaging 284 acres and representing an average investment of $15,417.

CENSUS EXAMINATION ANNOUNCED

WASHINGTON, D. C., Oct. 12—The United States Civil Service Commission has announced that it will receive applications until November 2, 1929, for certain temporary positions in the Bureau of the Census in Washington, D. C., in connection with the Fifteenth Decinnial Census.

The positions for which examinations are to be held are junior clerk, junior calculating machine operator, and junior tabulating machine operator, with an entrance salary of $1,440 a year, and under card-punch optrator with an entrance salary of $1,260 a year.

These examinations are open to all citizens of the Unitde States, both men and women, who meet the requirements.

It is expected that a large number of appointments will be made. The length of service will probably range from one to two years in most cases but in no case will it extend beyond December 31, 1932.

Full information regarding these examinations can be obtained from the United States Civil Service Commission, Washington, D. C., or from the secretary of the United States Civil Service Bureau at the post office or customhouse in any city.

DORA NEWS

CONVENIENT WATERING

Since the Dora school has been in existence, there has never been a convenient means of watering the pupils. A hand pump is now being used. The water, after being pumped, passes into a barrel, through a pipe and out through faucets. Most of the time the water is low in the barrels and the pupils have to suck the faucets in order to quench their thirsts. To prevent the water from being low, there must be more pumped in.

Now, what pupil likes to take part of his playtime to pump water? When there is sufficient water in the barrel, there is pushing and shoving among the smaller children to beat the older to it.

In winter the water freezes and the pupils remain in school without it.

This poor method can be replaced by an over-head tank, windmill and more faucets.

A committee should be organized to raise funds for putting up these things. Every parent will then be assured that his child is not in want of water and that he will receive the required amount, which is four glasses each day.

The singing Sunday night was good and was enjoyed by a large crowd. Let's don't forget that next Sunday night is singing night again. The new song books are now being published and now is the time for uor class to get an even start with the surrounding ones. To do this we must get new books.

Mr. J. O. Creighton, of Dora, and his brother, Mr. Curtis Creighton, of Portales, and Mr. Bill Creighton of La Mesa, Texas, came home today from their deer hunt in the Magdelena mountains on their return trip they came by the school building and showed the pupils a reed they had killed. Most of the pupils had never seen a deer, so this was quite a treat for them.

Mr. Charlie Porter and Barnard Bennett, of Portales, spent Sunday at Dora.

Rev. Vance of Rogers, New Mexico, is pastor of the Methodist church here. He preaches here every 1st Sunday morning and evening. Everyone is invited to come and hear his sermons.

Misses Luna Mae Preston, Averil and Panay Richards, Ruth Venable, Ruby Mae, Frankie Fair and Wren Drew, Mr. and Mrs. Henry Taylor and children, and Mr. Leland Jones were Sunday dinner guests of Mr. and Mrs. Fred Taylor.

Mr. Jim Richards, and uephew, Lyn Richards, visited Mr. Richards' mother, of Wilson, Texas, last week. Mr. Richards reports his mother in bad health.

More and More COLDS treated EXTERNALLY

A GENERATION AGO, Vicks originated the better method of treating colds *externally*. Today, the whole trend of medical practice is away from needless "dosing", and the demand for Vicks has increased to "Over 26 Million Jars Used Yearly."

Mothers appreciate Vicks, because there's no "dosing" to upset children's stomachs. It is equally good for adults. Just rubbed on, Vicks acts thru the skin like a plaster; it also gives off medicated vapors which are inhaled.

Now 26 25 17 million jars used yearly

Ford **AUCTION SALE USED CARS.**

Until X-Mas

EVERY SATURDAY AT 2 P. M. FROM NOW UNTIL CHRISTMAS

We will sell to highest bidder 3 or more Used cars on our back lot every Saturday at 2 p. m. from now until Xmas, regardless of weather. Old Fords, Chevies, and all makes of cars, mostly closed cars, and will give good service all winter.

WE ARE OFTEN ASKED—"HOW CAN YOU SELL SO MANY GOOD USED CARS AT SUCH LOW PRICE?" The answer is quite simple. "The public, realizing the value of the "New Ford" is willing to trade them to us at their actual value, rather than accept the higher inflated prices offered by other dealers having a so-called "Trade-in-allowance."

That saving is passed onto our used car buyers, and at Auction, you buy at your own price, and terms to responsible parties.

SOCIETY

Y BRIDGE CLUB

Miss Sybil Lyons was hostess Thursday evening to the members of the Y Bridge Club.

Mrs. N. T. Watson and Miss Katherine McCall substituted for Mrs. J. W. Lee and Mrs. J. H. Slone, Jr.

The members were: Misses Iris Ribble, Lucile Wurster, Mae Watts, Naomi McCarty and Vada Mae Jackson.

Miss Iris Ribble won high score and Miss Mae Watts was low.

Mrs. Lyons assisted by Miss Sybil served a delicious salad course.

Dr. and Mrs. Wollard at Home

Dr. and Mrs. N. F. Wollard extended the hospitality of their home Tuesday evening to a few friends.

The Wollard home was tastefully decorated with autumn leaves and a beautiful fruit basket surrounded with colored leaves centered the lovely dining table, around which the friends gathered to partake of the delicious turkey dinner which Mrs. Woolard had prepared.

After dinner the guests enjoyed conversation by the bright fire in the new fire-place, which the Wollard's have juse built.

Those present were: Mr. and Mrs. J. P. Steiner, Mr. and Mrs. Floyd D. Golden, Mr. and Mrs. P. M. Bailey, Mr. and Mrs. Chester F. Brown, and Mrs. Edwin Lanzer.

The Baptist W. M. U.

The Baptist W. M. U. met on Monday at the home of Judge and Mrs. J. C. Compton. Their regular meeting time from this will be Mondays at 2 p. m.

Mrs. C. E. Ball led the devotional and the president, Mrs. M. B. Jones presided over a business meeting.

There were twenty ladies and four children present. Mrs. Compton served delicious refreshments at the close of the meeting.

Mr. and Mrs. C. V. Harris at Home

Mr. and Mrs. C. C. Harris were at home Monday evening to a few friends with a six o'clock dinner. Mrs. Harris is an excellent cook, and the turkey with all its 'fixings' was a treat.

The guests gathered around one large table centered with a crystal tree and rose buds.

The gathering was quite informal and the guests enjoyed visiting with each other.

Those enjoying the Harris' hospitality at this time were Mr. and Mrs. A. D. Ribble, Mr. and Mrs. E. A. Herndon, Mr. and Mrs. A. F. Jones, and Mrs. T. E. Bell.

"EVERYBODY'S SIX"—

Smart · Smooth · Safe · Dependable—and Priced Within the Reach of All!

THE new Chevrolet was designed and built to bring the advantages of six-cylinder performance within the reach of all those who can afford *any* automobile. For that reason it has met with sensational success—more than a million two hundred and fifty thousand on the road in less than nine months!

We cordially invite you to come in and see this remarkable car. Its smart Fisher bodies are styled in the latest mode—with tasteful mouldings, concave front pillars and oblong windows. Its great six-cylinder valve-in-head engine is smooth, powerful and unusually swift in acceleration. It is designed throughout for greater safety and dependability. And its low first cost, combined with its outstanding economy of operation, makes it truly "Everybody's Six."

Come in today for a demonstration!

The Roadster, $525; The Phaeton, $525; The Coach, $595; The Coupe, $595; The Sport Coupe, $645; The Sedan, $675; The Imperial Sedan, $695; The Sedan Delivery, $595; Light Delivery (Chassis only), $400; 1½ Ton Truck (Chassis only), $545; 1½ Ton Truck (Chassis with Cab), $650. All prices f. o. b. factory, Flint, Michigan.

Consider the delivered price as well as the list (f. o. b.) price when comparing automobile values. Chevrolet delivered prices include only authorized charges for freight and delivery, and the charge for any additional accessories or financing desired.

and a *Challenge*

the Challenge

Several years ago, the exclusive North American patent rights on the Germ Process were acquired by this Company. It was evolved and patented by two British scientists after exhaustive chemical and physical laboratory tests.

Germ Process oils were revolutionary in that they met every requirement, through special characteristics, for each type of internal combustion motor. These scientists, by the Germ Process, eradicated the prevalent weaknesses existent in motor oils regardless of their base.

This Company has made innumerable laboratory and road tests, under every conceivable condition, over the past seven years, and we are now prepared to state definitely that your motor oil problem is solved by the Germ-Processed Motor Oils.

By comparison, our tests prove that the "Germ Essence" creates the only safe motor oil under all conditions and at all times operates at the highest obtainable efficiency.

We are now prepared to meet any challenge of competitors. I confidently believe that Conoco Germ-Processed Paraffin Base Motor Oils are superior to any other motor oils made from any crude by any process.

More than twenty thousand outlets are now prepared to offer to the public such a motor oil for the discriminating buyer, and for a technical problem which has always been recognized but not solved until now.

Here are our Claims for Conoco Germ-Processed Motor Oil—
Check against the oil you are now using

1 Under the Germ patents .... exclusive to CONOCO for North America .... there is imparted to CONOCO Germ-Processed Motor Oil an "oiliness" which is responsible for its greater lubricating value, greater film strength, greater penetrativeness, greater adhesiveness, greater tenacity, greater permanence, greater stability, greater stamina and a more nearly perfect compression seal than any other oil on the American market. Because of this affinity for metal—this actually combining with the metal itself, CONOCO Germ-Processed Motor Oil *never leaves the bearings.* Where other oils drain out and leave the surface dry, Germ-Processed oil penetrates the metal surfaces, *forming a film that adheres for months.* This "carry-over" film—*this always present film* gives ample lubrication to all parts needing it when a cold motor is started, until such time as oil from the crank case can reach them.

2 This remarkable and exclusive feature of CONOCO Germ-Processed Motor Oil is reinforced by the fact that these oils are refined from *only carefully selected paraffin base crudes* by the most modern and scientific methods known to the petroleum technologist. Patented processes are used to remove all objectionable elements, leaving a perfectly balanced, stable product that is 100% lubricating oil. Thousands of tests demonstrate its remarkable resistance to corrosion.

The majority of motor oils never receive this degree of refining. *None ever exceed it.*

3 Increased gasoline mileage and improved motor performance are realized through the use of this new oil. The exclusive CONOCO Germ Process so adds to the "oiliness" of this lubricant that metal-against-metal friction is eliminated, even in motor starting after all oil ordinarily would have drained from the motor into the crankcase. The perfect sealing qualities of the CONOCO fracture-proof film insures a high compression efficiency that results in greatly increased motor performance. Marked improvements in power, speed, acceleration and flexibility are noticeable.

4 Due to the Germ Process and the select, premium, paraffin base crude stocks used, CONOCO Germ-Processed Motor Oil positively does not break down under the most intense cylinder wall heat. A climb, high speed, heavy load, temperature extremes—none of these strains cause this oil to heat sufficiently to actually burn, break down or evaporate to any appreciable degree. By comparison with many oils on the market, you may confidently expect a saving in oil consumption up to 50%.

5 Automotive engineers agree that 40% to 60% of all motor wear occurs during the starting period. This destructive wear is definitely reduced by the use of CONOCO Germ-Processed Motor Oil. Ordinary oil, thinned by heat and dilution, drains down past the piston rings when the motor is stopped, leaving little or no protective film. On starting the motor, a considerable time is required for the oil to reach all bearings and working surfaces. Under adverse conditions, such as winter temperatures, this time may be from 15 to 20 minutes or even longer.

Since CONOCO Germ-Processed Motor Oil never leaves the bearings and working surfaces, it is always there under any and all conditions to provide needed lubrication until the normal supply of oil arrives.

6 Unlike other oils, dilution does not impair the "oiliness" value of CONOCO Germ-Processed Motor Oil.

7 CONOCO Germ-Processed Motor Oil retains its fluidity at sub-zero temperatures. No practical operating conditions in winter will affect its immediate lubricating value at the first touch of the electric starter.

We invite you to enjoy the many additional miles of pleasure your motor car owes you by using this amazing new motor oil regularly. You will find it today at all stations displaying the CONOCO Red Triangle.
